

Dear Members of the Committee,
Regarding HB 1118

Please Pass this bill:

The citizens of North Dakota need to have representation in the case of any further state of emergency or pandemic declaration, despite the fact that the legislative branch could be on an off year term. There needs to be an ability to be able to call for a special session to assemble to determine appropriate responses and timelines for how to approach any future state of emergency or pandemic, and not leave the power solely in the hands of the governor.
