

My name is Hailey and I am a student training to become a Clinical Mental Health Counseling in the Master's program at the University of Mary. This change in how Mental Health Counselors are recognized is very important to me. It would allow me and my peers to receive Blue Cross Blue Shield insurance, which would help us to serve more clients and meet more needs in our community. This change would make all of us more hireable and desirable as employees. Hopefully, this change would allow more graduates to find jobs in the Bismarck/Mandan and rural surrounding areas.

Thank you for your consideration!
