

Dear Committee Members
HB 1323

Please vote Pass

All I really want to say amidst all the evidence that masking has caused a major upheaval to life, liberty, leisure, business success, school life, and the list does go on and on. Please pass this and stop the madness and the infringement on life as we once knew it.

Why does government get to mandate and force masking upon anyone? It should be the choice of an individual who has been given sound reasoning, logic and scientific results, that the measure suggested is actually of value and proven.

I thought we lived in a free America. We can provide condoms, but did we mandate them because of HIV? Are we going to after this? Cause HIV still exists and it is extremely dangerous!

How invasive is the government going to be allowed to become just because they want to scare the rest of the world into conforming to this continued masking standard, that has really not changed any thing but the quality of life for everyone and especially the aged who are dying alone, due to drastic and evil covid separation practices. Its just evil! All of it!

The precedent is being established to allow the government power to force public to conform to government demands if this continues. It's the slow fade of people's rights and into government takeover.
