Economic diversification research fund - Report to legislative management.

1. There is created in the state treasury the economic diversification research fund. The fund consists of all moneys deposited in or transferred to the fund pursuant to legislative action. Moneys in the fund may be spent by the Bank of North Dakota pursuant to legislative appropriations to provide grants to institutions under the control of the state board of higher education for economic diversification research.
2. In consultation with representatives of North Dakota state university and the university of North Dakota, the Bank, in consultation with the state board of higher education, shall award grants to institutions under the control of the state board of higher education. Up to ninety percent of the funding must be awarded to North Dakota state university and the university of North Dakota with equal amounts awarded to each institution. The remaining funding must be awarded to the other institutions under the control of the state board of higher education, as determined by the board. The state board of higher education may not award more than fifty percent of the available funding during the first year of the biennium. The Bank of North Dakota shall distribute the grant funding as awarded by the state board of higher education.
3. The state board of higher education shall develop guidelines for the economic diversification research grants. The purpose of the grants is to stimulate economic activity across the state through innovation of new technology, concepts, and products; to promote job creation and career and wage growth; to enhance health care outcomes; to address loss of revenue and jobs in communities with economies that depend primarily on the fossil fuel industry; and to provide experiential learning opportunities for students. Research projects may be initiated by an institution under the control of the state board of higher education or by the private sector. The guidelines must include consideration for research projects with matching funds and provisions for grant oversight by an internal advisory committee and an external advisory committee.
4. The state board of higher education shall develop reporting requirements for the institutions under the control of the board. The reporting requirements must include criteria for assessing performance outcomes related to the grants. The state board of higher education shall compile the reports and submit a comprehensive report annually to the legislative management. The comprehensive report must include information on how the research efforts by each institution align with the state's priorities, how the institutions collaborate when appropriate, and how the outcomes of the research meet established performance expectations."
