Re: HB 1532

To Whom it May Concern:

This letter is in support of House Bill 1532. Providing a reimbursement program for qualified schools for qualified education expenses will help ease the financial burden many of us face when choosing the right school for a particular child(ren). I support my tax dollars allocated to public schools and understand that public education is important. However, I support more choice and assisting with the financial burden and encourage the passing of HB 1532.

Thank you,

Loren Artz
