

To Whom It May Concern

Please recommend a Do Not Pass on HB 1151. I believe it has been proven in other states that Ballot Box Biology does not work. We have to let the Biologist and science lead our decisions. If we pass laws every time there is something we don't like, we are in for a world of hurt. We need to come together to protect North Dakota's deer herd. We need to remember that the deer belong to the people of North Dakota and not the person who owns the land that they may be standing on today. If we want a healthy deer herd for our children to hunt or to just watch, we need to make hard decisions now for a better tomorrow. Do we really want to put our herd in jeopardy so that I can throw some corn out, so I can look like a great hunter. I think not. Thank you for your time.

Sincerely

Brianne McWhorter
