

Chairman Patten & members of the Energy and Natural Resources committee,

I support Carbon Capture and Sequestration as I feel it is vitally important to the future of North Dakota's two most important industries, agriculture and energy.

Summit Carbon Solutions is an innovation project which offers landowners an opportunity to develop their pore space as well as providing tax revenue for local government.

As a landowner in the project area, I believe Senate Bills 2209, 2213, 2212, 2228, 2317, and 2314 as well as House Bills 1384 and 1466 are short-sighted and interfere with my property rights. I urge you to vote NO on these bills.

Thank you for your consideration,  
Bill and Norma Breimeier, landowners
