25.1038.02005 Title. Prepared by the Legislative Council staff for Representative Porter
April 28, 2025

Sixty-ninth Legislative Assembly of North Dakota

PROPOSED AMENDMENTS TO FIRST ENGROSSMENT

ENGROSSED HOUSE BILL NO. 1459

Introduced by

Representatives D. Anderson, Berg, Bosch, Mitskog, Novak, O'Brien, J. Olson, Porter, Lefor Senators Hogue, Marcellais, Patten

In place of amendment (25.1038.02001) adopted by the Senate, Engrossed House Bill No. 1459 is amended by amendment (25.1038.02005) as follows:

1 A BILL for an Act to create and enact a new chapter to title 38 of the North Dakota Century 2 Code, relating to regulations, development, and production of critical minerals and rare earth-3 elements; to amend and reenact sections 38-12-02 and 47-10-24 of the North Dakota Century 4 Code, relating to the authority of the industrial commission and descriptions and definitions of 5 minerals in leases and conveyances; to provide a penalty; and to declare an emergency.for an 6 Act to create and enact three new sections to chapter 38-12 of the North Dakota Century Code, 7 relating to critical minerals and rare earth minerals and royalties; to amend and reenact sections 8 38-12-01 and 47-10-24 of the North Dakota Century Code, relating to the definitions of critical 9 minerals and rare earth minerals and descriptions and definitions of minerals in leases and 10 conveyances; to provide for retroactive application; and to declare an emergency.

11 BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

12	SECTION 1. A new chapter to title 38 of the North Dakota Century Code is created and
13	enacted as follows:
14	— Definitions.
15	As used in this chapter:
16	1. "Commission" means the industrial commission.
17	2. "Critical minerals" means a nonfuel mineral or mineral material essential to the
18	economic or national security of the United States and which has a supply chain
19	vulnerable to disruption. The term includes aluminum, antimony, arsenic, barite,
20	bauxite, beryllium, bismuth, cesium, chromium, cobalt, fluorspar, gallium, germanium,

1	resources be obtained in the state, to the end that landowners, producers, and the general
2	public realize and enjoy the greatest possible good from these vital natural resources. Critical
3	minerals and rare earth elements are fundamental to the economy, competitiveness, and
4	security of the United States. Many critical minerals and rare earth elements are broadly
5	disseminated and can only be recovered when produced as part of another extractive activity of
6	a host mineral which for purposes of this chapter is coal. To the maximum extent practicable,
7	the critical minerals and rare earth elements needs of the United States should be satisfied by
8	the vital natural resources responsibly produced in the United States. The legislative assembly
9	finds it necessary to declare that the mining of coal in this state, and a lease of coal in this state
10	whenever granted must include the right to mine all critical minerals and rare earth elements,
11	unless specifically excluded by the lease.
12	— Jurisdiction of commission.
13	The commission has jurisdiction and authority necessary to enforce this chapter. This
14	section does not apply to a mine under the jurisdiction and authority of the public service
15	commission under chapter 38-14.1. The commission may conduct investigations to determine
16	whether facts exist which justify action by the commission. The commission may:
17	— <u>1. Require an operator to:</u>
18	a. Furnish a reasonable bond with good and sufficient surety, conditioned upon the
19	full compliance with this chapter, and the rules and orders of the commission
20	governing the exploration, development, and production of critical minerals or
21	rare earth elements on state and private lands within the state. The person
22	required to furnish the bond may elect to deposit a collateral bond, self-bond,
23	cash, or any alternative form of security approved by the commission, by which a
24	permittee assures faithful performance of all requirements of this chapter and the
25	rules and orders of the industrial commission. If a permit is issued for the
26	extraction of critical minerals or rare earth elements, in conjunction with a surface
27	coal mining permit issued under chapter 38-14.1, the bond for the surface coal
28	mining permit may be used to satisfy the bond required under this chapter.
29	<u>b.</u> <u>File production reports in the manner prescribed by the commission.</u>
30	<u>c.</u> <u>Conduct an extraction process in a manner as to prevent pollution of freshwater</u>
31	supplies and to provide for the protection of the environment and public safety.

1 Adopt and enforce rules and orders to effectuate this chapter, including rules requiring 2 an operator under permit with the commission to provide to the state geologist 3 reasonable amounts of data collected during the extraction process for critical 4 minerals or rare earth elements, and data necessary to evaluate the ongoing attributes 5 of critical mineral or rare earth extraction in the state. 6 Inspect all processing facilities. The commission must have access to all processing 7 facilities for purposes of inspection and may require the operator's aid if necessary 8 and requested. 9 At the request of an operator, approve the commingling of production for any 10 processing facility on land with diverse ownership. The commission shall establish a 11 method to measure production from each parcel of land with diverse ownership. 12 Permit required. 13 A person may not commence operation of a processing facility or the exploration. 14 development, or production of critical minerals or rare earth elements without first 15 obtaining a permit from the commission and paying the permit fee set by the 16 commission. 17 This section does not apply to a mine under the jurisdiction and authority of the public 18 service commission under chapter 38-14.1. 19 An operator shall pay any applicable owners, according to each owner's respective 20 undivided ownership within the applicable permit area, a royalty of two and one-half 21 percent of the net profits from all critical minerals and rare earth elements mined, 22 removed, and sold during the extraction process. For purposes of this section, "net-23 profits" means the gross receipts received by an operator from any sale of critical 24 minerals or rare earth elements less costs incurred or expenditures attributed, only 25 including any expenditures related to the extraction, processing, milling, smelting, 26 refining, and transportation of the critical minerals or rare earth elements. 27 Procedure. 28 The adoption of rules or or the issuance of orders by the commission under this 29 chapter must be in accordance with the provisions of chapter 38-08 governing the 30 procedure in the administration of the Oil and Gas Conservation Act.

2. A surface coal mine permit must be issued under chapter 38-14.1.

- 3. If an emergency is found to exist by the commission which in the judgment of the commission requires the making, revoking, changing, amending, modifying, altering, enlarging, renewal, or extension of a rule or order without first having a hearing, an emergency rule or order has the same validity as if a hearing had been held after due notice.
- 4. An emergency rule or order permitted by this section may remain in force no longer than fifteen days from its effective date, or when the rule or order made after due notice and hearing with respect to the subject matter of the emergency rule or order becomes effective, whichever occurs first.
- Penalty Revocation Provisions applicable.
- Sections 38-08-16 and 38-08-17 are applicable to the provisions of this chapter and to the rules and orders of the commission adopted under this chapter.
- SECTION 2. AMENDMENT. Section 38-12-02 of the North Dakota Century Code is amended and reenacted as follows:
- 38-12-02. Jurisdiction of commission.
- The commission has jurisdiction and authority over all persons and property, public and private, necessary to enforce effectively the provisions of this chapter. Subject to the provisions of section 38-08-21, the director of mineral resources shall act as a supervisor charged with the duty of enforcing the regulations and orders of the commission applicable to the subsurface mineral resources of this state and the provisions of this chapter. The commission has authority to make such investigations as it deems proper to determine whether facts exist which justify action by the commission. The commission acting through the director of mineral resources has the authority:
- 1. To require:
 - a. The furnishing of a reasonable bond with good and sufficient surety, conditioned upon the full compliance with the provisions of this chapter, and the rules and orders of the commission prescribed to govern the exploration, development, and production of subsurface minerals on state and private lands within the state of North Dakota. The person required to furnish the bond may elect to deposit a collateral bond, self-bond, cash, or any alternative form of security approved by the commission, or combination thereof, by which a permittee assures faithful

1	performance of all requirements of this chapter and the rules and orders of the
2	industrial commission.
3	b. The delivery, free of charge, to the state geologist of the basic exploration data-
4	collected by the operator, within thirty days of field collection of such data. This
5	data must include:
6	(1) Sample cuts, core chips, or whole cores.
7	(2) Sample logs, radioactivity logs, resistivity logs, or other types of electrical or
8	mechanical logs.
9	(3) Elevation and location information on the data collection points.
10	(4) Other pertinent information as may be requested by the state geologist.
11	The data so submitted is confidential for a period of one year when so requested
12	by the operator and such period may be further extended upon approval by the
13	commission.
14	c. The filing of monthly production reports in the manner prescribed by the
15	commission and any other reports deemed necessary by the commission.
16	d. The conducting of all exploration, development, and production operations in
17	such a manner as to prevent pollution of freshwater supplies, to provide for the
18	protection of the environment and public safety, and to ensure the optimum
19	recovery of the mineral resource.
20	e. The reclamation of all land disturbed by operations regulated by this chapter to a
21	condition consistent with prior land use and productive capacity.
22	2. To regulate the drilling and abandonment of exploration test holes and producing wells
23	and all other exploration, development, production, and reclamation operations.
24	3. To promulgate and to enforce rules, regulations, and orders to effectuate the purposes
25	and the intent of this chapter.
26	4. To inspect all exploration, development, and production sites. For the purposes of this
27	subsection, the director of mineral resources or the director's representative shall have
28	access to all exploration, development, or production installations for purposes of
29	inspection and shall have the authority to require the operator's aid if it is necessary
30	and is requested.

5. To regulate the exploration of critical minerals embedded, commingled, included, contained within, or in any way associated with a coal seam or coal deposit located outside of any surface coal mine permit boundary approved by the public service commission.

SECTION 3. AMENDMENT. Section 47-10-24 of the North Dakota Century Code is amended and reenacted as follows:

47-10-24. Description and definition of minerals in leases and conveyances.

1. All conveyances of mineral rights or royalties in real property in this state, excluding leases, shallmust be construed to grant or convey to the grantee thereof all minerals of any nature whatsoever except those minerals specifically excluded by name in the deed, grant, or conveyance, and their compounds and byproducts, but shallmay not be construed to grant or convey to the grantee any interest in any gravel, clay, or scoria unless specifically included by name in the deed, grant, or conveyance.

---No

- 2. Except as provided in subsection 3 regarding a lease for coal, a lease of mineral rights in this state shallmay not be construed as passing any interest to any minerals except those minerals specifically included and set forth by name in the lease. For the purposes of this paragraphsection, the naming of either a specific metalliferous element, or nonmetalliferous element, and if so stated in lease, shall beis deemed to include all of its compounds and byproducts, and in the case of oil and gas, all-associated hydrocarbons produced in a liquid or gaseous form so named shallmust be deemed to be included in the mineral named. The Except as provided in subsection 3 regarding a lease for coal, the use of the words "all other minerals" or similar words of an all-inclusive nature in any lease shallmay not be construed as leasing any minerals except those minerals specifically named in the lease and their compounds and byproducts.
- 3. As provided under section 1 of this Act, a lease of coal in this state whenever granted is deemed to include all critical minerals and rare earth elements embedded, commingled, included, contained within, or in any way associated with any coal seam or coal deposit, unless specifically excluded from the lease of coal.
- **SECTION 4. EMERGENCY.** This Act is declared to be an emergency measure.

SECTION 1. AMENDMENT. Section 38-12-01 of the North Dakota Century Code is amended and reenacted as follows:

38-12-01. Definitions.

As used in this chapter, unless the context otherwise requires:

- 1. "Commission" means the industrial commission of the state of North Dakota.
- 2. "Critical mineral" means a nonfuel mineral or material essential to the economic or national security of the United States and which has a supply chain vulnerable to disruption. The term includes aluminum, antimony, arsenic, astatine, barite, bauxite, beryllium, bismuth, cerium, cesium, chromium, cobalt, erbium, fluorspar, gallium, germanium, graphite, hafnium, helium, indium, lithium, magnesium, manganese, neodymium, niobium, platinum group metals, potash, the rare earth elements group, rhenium, rubidium, samarium, scandium, strontium, tantalum, tellurium, thulium, tin, titanium, tungsten, uranium, vanadium, and zirconium which are chemically bound, embedded, commingled, included, or contained within a coal seam or coal deposit.
- 2.3. "Extraction facility" means any well or mine or other extractive process operated for the purpose of recovering subsurface minerals.
- 3.4. "Operator" means any person who, duly authorized, is in charge of the development of a lease or the operation of a producing property.
- 4.5. "Owner" means the person who has the right to explore for, develop, and produce subsurface minerals and to appropriate the subsurface minerals the owner produces either for the owner or for the owner and others.
- 5.6. "Person" means and includes any natural person, corporation, limited liability company, association, partnership, receiver, trustee, executor, administrator, guardian, fiduciary, or other representative of any kind, and includes any department, agency, or instrumentality of the state or of any governmental subdivision thereof; the masculine gender, in referring to a person, includes the feminine and the neuter genders.
- 6.7. "Producer" means the owner of an extraction facility which is or has been capable of producing subsurface minerals.
 - 8. "Rare earth minerals" means any of a series of metallic elements of which the oxides are classed as rare earths and which include the elements of the lanthanide series,

yttrium, and scandium which are chemically bound, embedded, commingled, included, or contained within a coal seam or coal deposit.

7.9. "Subsurface minerals" means all critical minerals and rare earth minerals not chemically bound, embedded, commingled, included, or contained within a coal seam or coal deposit, and all other naturally occurring elements and their compounds, volcanic ash, precious metals, carbonates, and natural mineral salts of boron, bromine, calcium, fluorine, iodine, lithium, magnesium, phosphorus, potassium, sodium, thorium, uranium, and sulfur, and their compounds, but does not include clay, scoria, or sand and gravel and rocks crushed for sand and gravel.

SECTION 2. A new section to chapter 38-12 of the North Dakota Century Code is created and enacted as follows:

Declaration of policy for critical minerals and rare earth minerals.

- 1. It is in the public interest to encourage, accelerate, and promote the development, production, and utilization of critical minerals and rare earth minerals in a manner that prevents waste, allows a greater ultimate recovery of these natural resources, and protects the rights of owners so the greatest possible economic recovery of these resources may be obtained in this state and landowners, producers, and the general public may enjoy the greatest possible good from these resources.
- 2. As reflected in federal policy, the legislative assembly recognizes critical minerals and rare earth minerals are fundamental to the economy, competitiveness, and security of the United States. The United States relies on foreign nations to supply these critical minerals and rare earth minerals to develop and manufacture medical devices, information technology, and equipment and technology for national defense, energy infrastructure, and other critical items. Domestic development and production of critical minerals and rare earth minerals is inadequate to meet the nation's needs. The United States must have a reliable, diversified, and affordable supply to drive medical manufacturing, transportation, agriculture, and defense industries and to sustain military preparedness, national security, and economic security.
- 3. The legislative assembly acknowledges the public interest to foster, encourage, and promote the development, production, and utilization of all natural resources of coal,

- and the public interest is served by the preservation of existing coal conversion facilities, which significantly contribute to the state economy and general public.
- 4. Development of critical minerals and rare earth minerals also may lead to significant economic benefits for owners, new jobs in mining, processing, and related industries, and contributions to the state economy. Many critical minerals and rare earth minerals are broadly and irregularly disseminated and chemically bound, embedded, commingled, included, or contained within coal. Certain owners are unable to develop critical minerals and rare earth minerals because the minerals are contained within the coal seam or coal deposit, are covered by an existing mining permit, and are subject to the prior legal rights of the coal producer.
- 5. This chapter provides potential for coal owners and critical mineral and rare earth mineral owners to obtain added value from the development of critical minerals and rare earth minerals extracted from coal. These critical minerals and rare earth minerals are chemically bound, embedded, commingled, included, or contained within a coal seam or coal deposit and cannot otherwise be produced on their own without infringing on the working interests of the coal estate without first mining the host mineral coal or in an economic manner.
- 6. To the maximum extent practicable, the critical mineral and rare earth mineral needs of the United States should be satisfied by the vital natural resources responsibly produced in the United States. The legislative assembly finds it necessary to declare that the mining of coal in this state, and a lease of coal in this state whenever granted, must include the right to all critical minerals and rare earth minerals chemically bound, embedded, commingled, included, or contained within the coal unless specifically excluded by the lease.
- 7. A party is not obligated to mine, remove, or sell critical minerals or rare earth minerals from coal. The legislative assembly finds that because critical minerals and rare earth minerals are chemically bound, embedded, commingled, included, or contained within a coal seam or coal deposit, and are not uniformly disseminated, production must be commingled and a royalty rate must be applied only if the minerals are extracted and sold. It is necessary to fulfill the public policy of this state by clarifying law related to this policy and the development of critical minerals and rare earth minerals.

47-10-24. Description and definition of minerals in leases and conveyances.

All conveyances of mineral rights or royalties in real property in this state, excluding leases, shallmust be construed to grant or convey to the grantee thereof all minerals of any nature whatsoever except those minerals specifically excluded by name in the deed, grant, or conveyance, and their compounds and byproducts, but shallmay not be construed to grant or convey to the grantee any interest in any gravel, clay, or scoria unless specifically included by name in the deed, grant, or conveyance.

-No

- Except as provided in subsection 3, a lease of mineral rights in this state shallmay not be construed as passing any interest to any minerals except those minerals specifically included and set forth by name in the lease. For the purposes of this paragraphsection, the naming of either a specific metalliferous element, or nonmetalliferous element, and if so stated in lease, shall be deemed to include all of its compounds and byproducts, and in the case of oil and gas, all associated hydrocarbons produced in a liquid or gaseous form so named shallmust be deemed to be included in the mineral named. The Except as provided in subsection 3, the use of the words "all other minerals" or similar words of an all-inclusive nature in any lease shallmay not be construed as leasing any minerals except those minerals specifically named in the lease and their compounds and byproducts.
- 3. As provided under section 2 of this Act, a lease of coal in this state whenever granted is deemed to include all critical minerals and rare earth minerals chemically bound, embedded, commingled, included, or contained within a coal seam or coal deposit unless specifically excluded from the lease of coal.

SECTION 6. RETROACTIVE APPLICATION. This Act is retroactive in application. **SECTION 7. EMERGENCY.** This Act is declared to be an emergency measure.
