

Q5: Provide SCH and headcount details for in person and online-only students by institution over the past 5 years, identifiable by state of student residency.

b. For clarification and consistency of information:

In Person: students who can complete program/degree requirements on campus

Online: students who can complete program/degree requirements at a distance such as through the internet.

Handout:

NDUS Online Degree Programs

Analysis:

Unable to make analyses or generalizations. The data is incomplete, does not adequately identify students enrolled entirely virtually, and does not accurately indicate where a student is located when taking coursework.

Limitations:

Campus Solutions does not have built-in capabilities to identify online programs. NDUS has developed a workaround to assist in the identification of these programs; however, this identification is not consistently implemented across institutions.

Students are identified here by their resident state. While there seems to be an implication that non North Dakota residents enrolled in distance ed programs are located out of state, this assumption is not accurate. A better proxy for location would be an address state, however, Campus Solutions has as many as twelve addresses for each student, and none of these addresses are specifically designate where the student is located while taking courses.

Credits earned by students enrolled in online programs do not exclusively translate as distance education credits. Students in online programs can still take courses on campus.

Comments:

This data has not been validated by individual NDUS institutions.
