

24-05-16. County road system - Designation.

The county road system must be the roads designated and selected by the boards of county commissioners. The director must be informed of the system so designated. Any changes of the original designation which can be justified and based on new developments must be made by the board of county commissioners and the director must be notified of such changes. In designating and selecting roads on the county road system, the boards of county commissioners of the several counties shall take into account such factors as the actual or potential traffic volumes, the conservation and development of the county's natural resources, the general economy of the communities, and the desirability of integrating such county roads into the general scheme of the statewide network of county roads.

What this bill is.

Current century code as referenced above.

What does this bill do.

It adds legislative intent to current century code exactly as it stands in law today

Why do we need this if it already exists in current century code

In Dickey County the county commissioners voted and passed to do exactly what current law says it has the authority to do and the law was silent. The states attorney was unable to make a ruling due to lack of legislative intent and that is exactly what this bill does it gives legislative intent to current law already on the books.

What this bill is about is public safety, something you would think elected officials would have as there focus rather than revenue.
