## Homelessness in North Dakota

HHS services and housing crisis risk factors

September 4, 2025

Interim Human Services Committee Senator Kyle Davison, Chairman

Presentation by: Jessica Thomasson, Executive Director, Human Services

## Housing crisis is a de-stabilizing force

### **Housing Crisis =**

Instability, Eviction, or Homelessness

### **Homelessness**

An individual or family who lacks a fixed, regular, adequate nighttime residence. This includes a living situation where you are temporarily doubled up with another household.

### **Episodic | Long Term | Chronic**

<u>Episodic</u> = repeated, short episodes of homelessness, not continuous

<u>Long-term</u> = extended time homeless, duration-focused (not always tied to a disability or necessarily meeting HUD's criteria)

<u>Chronic</u> = long-term and disabling condition (meeting HUD standard)

### Housing crisis is real. It affects people all over the state.

Over the last 3 years, people in 100% of ND counties have reached out to HHS for assistance because they were in housing crisis (experiencing homelessness or at imminent risk).

## Homelessness in ND: A snapshot of what we know

Over a 3-year period, HHS documented homelessness for almost **21,000 people** who applied to ND Rent Help for emergency rental assistance or eviction prevention.

- 13,000+ households
- 31% of homeless households had children younger than age 18 (6,900 children)

### **Living situations** at time of application varied.

- 19% (≈2,500 households) unsheltered (living in vehicle or other public or private place)
- 48% (≈ 6,500) doubled up (temporarily staying with friend of family)
- 10% (≈1,300) living in emergency shelter
- 15% (≈ 2,000) living in transitional housing
- 8% (≈ 1,000) exiting an institution

## Why are people in ND experiencing housing crisis?

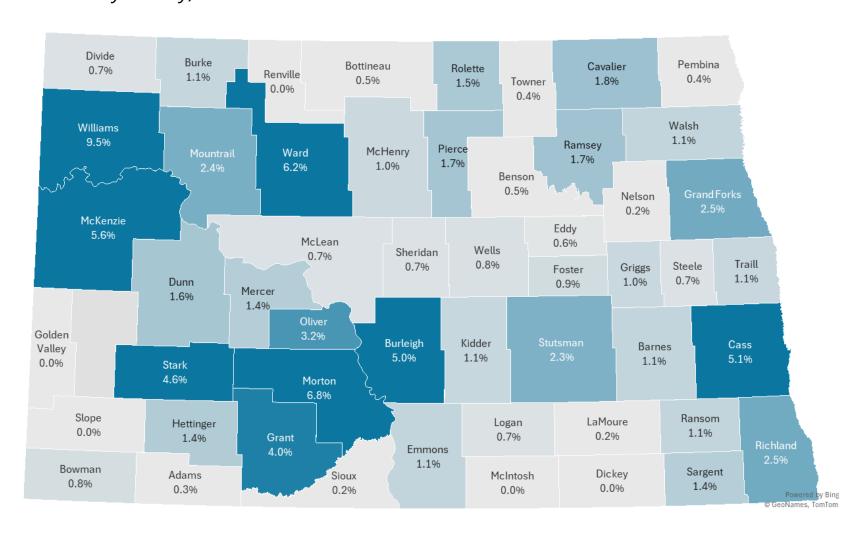

- ✓ **Job loss & unemployment** losing jobs, layoffs, and struggles finding work
- ✓ Childcare & family care challenges with children, schools, and caring for family members
- Reduced income & hours reduced working hours, pay cuts, and loss of wages
- ✓ Housing & rent struggles difficulties paying rent, risk of eviction, or mortgage stress
- ✓ Transportation & travel issues inability to travel, commuting struggles, and related costs
- ✓ Home stress overcrowded households, family distress/discord
- ✓ Health issues (physical & mental) illness, chronic health concerns, life stressors, mental health, and healthcare access problems
- ✓ Transitioning back to community leaving incarceration, treatment, hospitalization, background issues, moving costs
- ✓ **Debt & financial strain** rising bills, debt accumulation, utilities, and loans
- ✓ **Food insecurity** trouble affording or accessing food and groceries

Source: Aggregate of self reported data; HHS emergency housing assistance program data

### Between Jan 2023 and Dec 2024, 4.3% of all occupied rental units in North Dakota were affected by an eviction judgment

Total eviction judgments Jan 2023-Dec 2024 (ND Supreme Court) as a % of total occupied rental units (2022 American Community Survey)

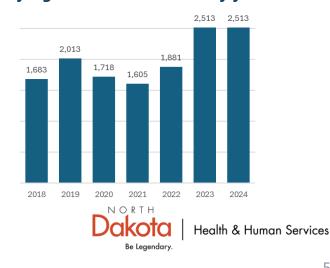

117,453

Occupied rental housing units 2022

5,026

**Eviction judgments** Jan 2023 – Dec 2024

### # judgments not dismissed by year

### Who is most at risk of homelessness?

- Extremely low-income renters
  - Often one missed paycheck or expected expense away from crisis
- Lower income families with young children
  - Often paying 50-70% of income on rent
  - On average, households with children experience poverty at higher rates than households without children.
- People with disabilities or chronic health issues
  - Individuals with serious mental illness, chronic health conditions or disabilities are over-represented among those who lose housing
  - Disability-related fixed incomes rarely cover market rents
- Older adults on fixed incomes
  - Senior homelessness is rising faster than for other age groups
  - Increasing housing costs are straining household budgets, especially fixed incomes
- People facing domestic violence
  - A leading cause of family homelessness

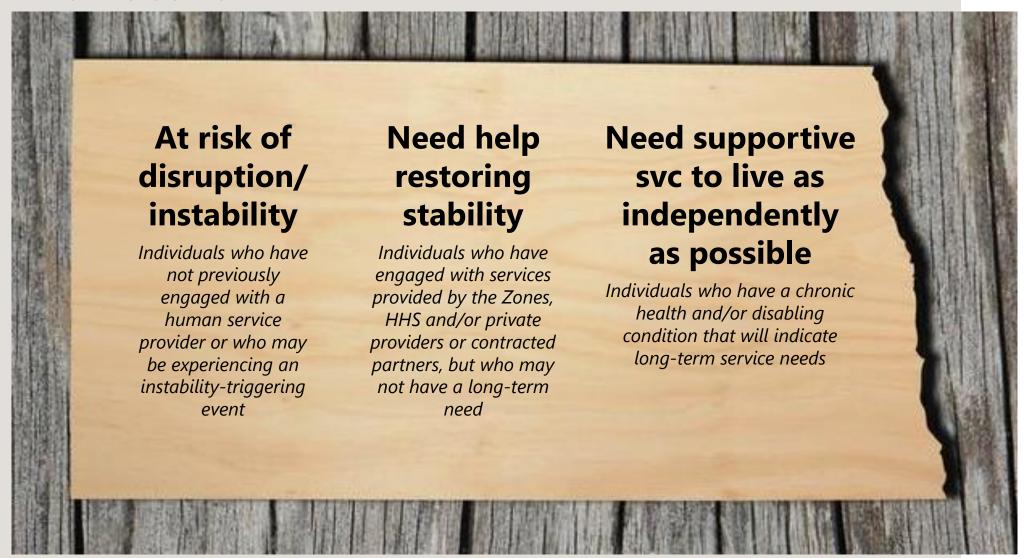

Across all groups, certain conditions heighten risk:

- ✓ **Severe rent burden** (spending 50%+ of income on housing)
- ✓ Lack of affordable housing supply in the local market
- √ Job loss or unstable employment
- ✓ Criminal justice involvement (eviction histories, incarceration records limit rental options)
- ✓ Limited social supports (family/friend networks)

Who does HHS serve?

### Helping people realize their potential

Who We Serve

### Who we serve: Who's at risk of disruption/instability?

Individuals who have not previously engaged with a human service provider or who may be experiencing an instability-triggering event

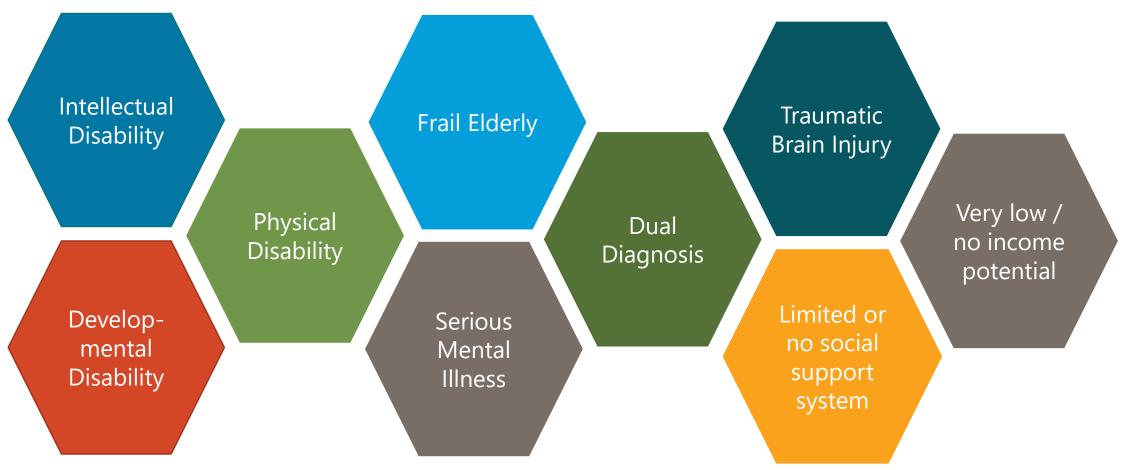

### Who we serve: Who needs help restoring stability?

Individuals who have engaged with services provided by the Zones, HHS and/or private providers or contracted partners, but who may not have a long-term need

## Who we serve: Who needs long-term supportive services to live as independently as possible?

Individuals who have a chronic health and/or disabling condition that will indicate long-term service needs

### Targeted services delivered with intention can be a frontline resource for stability and wellbeing

Prevention | Early Intervention | Crisis Intervention | Long term supports

### **Building Stability by Avoiding Crisis**

Helping people navigate difficult times

### **DISRUPTION**

When families experience disruption, their ability to be a fully engaged, productive member of the community and the workforce is compromised.

### ...CAN LEAD TO CRISIS

In helping families avoid the escalation of instability to crisis, we are also avoiding unnecessary spending in the deepest, and often most expensive, components of the existing human service system.

### SERVICES SUPPORT STABILITY

Intervening early will both save money and strengthen families. It will allow us to reserve deep end services for the times when they are truly needed, and help people avoid deepening their journey into crisis by diverting from institutions, keeping families together, and helping and sure that people have a place to call home.

### Foundations of Wellbeing are Interconnected

### **Economic Health**

Having the resources you need to meet basic needs contributes to stability and is a foundation you can build on

### **Behavioral Health**

Having good mental health and a healthy relationship with substances boosts your ability to weather life's storms

### **Physical Health**

When you are in good physical health you can better navigate the activities of daily and community life

Human Connection • Human Connection • Human Connection • Human Connection • Human Connection

The stability that comes from good **economic** health can **improve behavioral** health.

The stability that comes from good **physical** and **behavioral** health **enables economic** health.

Relationships and **human connection** provide the support and belonging people need to grow, recover, and thrive.

TANF – 50% FPL SNAP – 200% FPL LIHEAP – 60% SMI CCAP – 75% SMI

## Most households earning <40-50% of state median income (SMI) will struggle with costs of housing

### NOTE:

30% State Median Income (SMI) is roughly equivalent to 110% of the Federal Poverty Level (FPL) 60% State Median Income (SMI) is roughly equivalent to 250% of the Federal Poverty Level (FPL)

# Housing represents the largest element of most household budgets

### Can I find a place that meets my needs?

In the community where I want to live Right size for my household Accessible

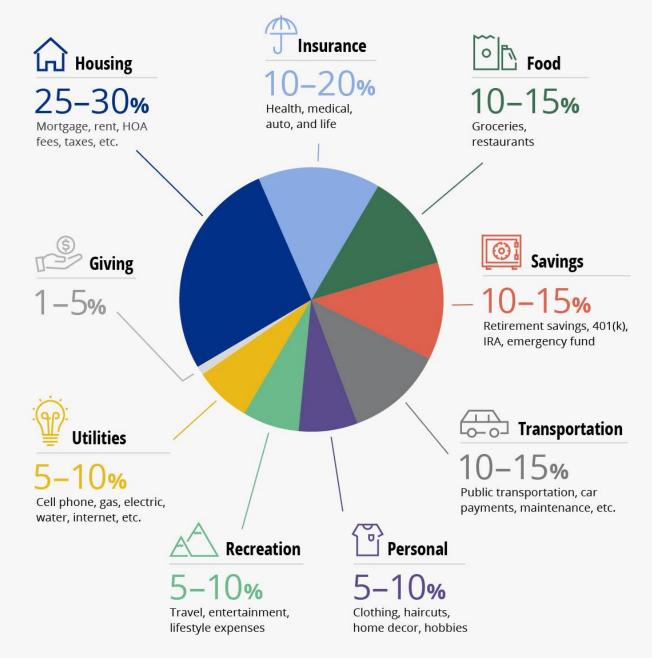

### Can I afford to pay the cost of my housing?

Rent or Mortgage Utilities Taxes Repairs

### If things aren't going well, can I get help if I need it?

Help with activities of daily living or health issues
Help with my substance use issue
Help managing my budget / decisions
Help for my child who is struggling

# What is an "Affordable" housing payment

Based on median household incomes in the Bismarck Metropolitan Statistical Area, 2023-24

### **HOURLY WAGE ESTIMATE (total for household)**

### Assume full time employment of 2,080 hours

### Lowest income renters need help to compete in the marketplace.

- Someone's "willingness to pay" and "ability to pay" are not always the same thing.
- Competition for the lowest cost (market worthy) housing is always greatest.
- Lower income households can only shop in segments of the market where competition is greatest and vacancy rates are lowest.

# Working families with jobs that don't pay high wages often fall into the "hardship gap", which is a risk factor for crisis

"Hardship Gap"

Earned Income is greater than poverty level but less than cost of living

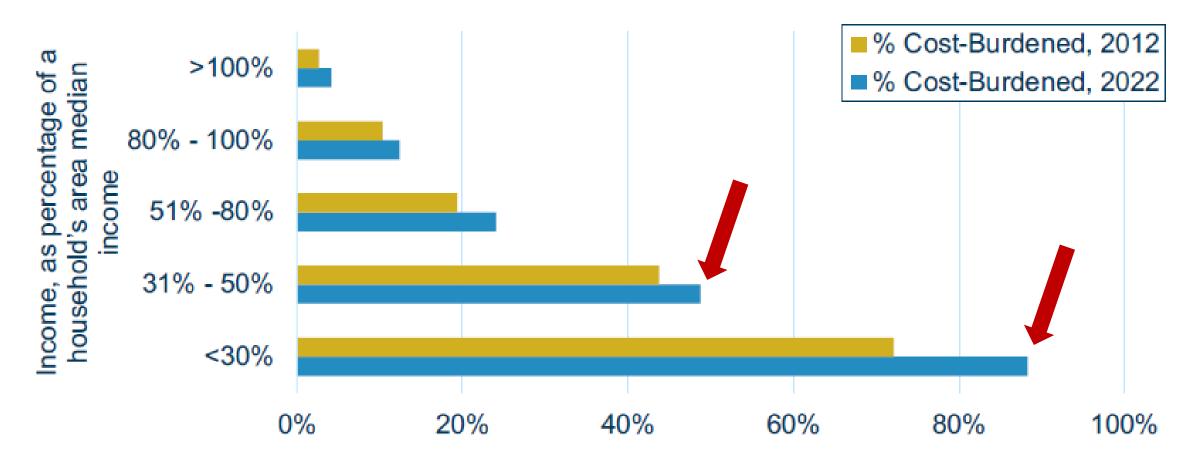

Working but falling short of selfsufficiency even after supplementing wages with public benefits

	Household Inco	ome*	where programmatic Eligibility Ends	% of state population	Typically able to meet basic needs without assistance
'	20-50% of federal 12% of state poverty level income		Temp Assistance for Needy Families (TANF) Medicaid (full coverage for the entire family)	10, 120/ . (	No (0%)
	100-140% of federal poverty level	25-35% of state median income	Head Start Medicaid (medically needy (aged/blind/disabled)) Medicaid (children ages 6-19) Medicaid (Expansion)	10-12% of state population	No (0%)
•	200-250% of federal 50-60% of poverty level state median income		Supplemental Nutrition Assistance (SNAP) Children's Health Insurance (CHIP) Low Income Home Energy Assistance (LIHEAP) Women Infants and Children (WIC) Earned Income Tax Credit (EITC) Free-Reduced Lunch (FRL) Housing Choice Voucher (Sec 8)	28-30% of state population	Maybe (20%)
٠	350% of federal poverty level	85% of state median income	Child Care Assistance (CCAP)		Likely (50%)

<sup>\*</sup>Income levels described in this table are intended to communicate estimated ranges of eligibility; they are not a precise accounting of each program's unique eligibility rules

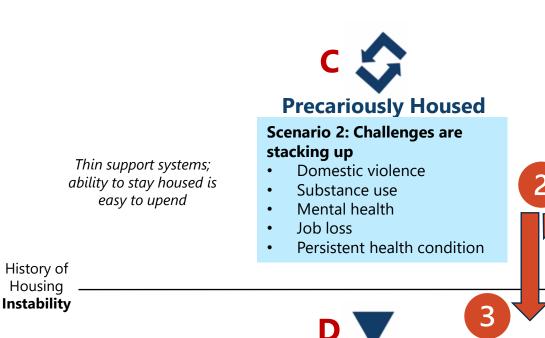

### **Housing Cost Burden in North Dakota: 2012 v 2022**

Housing cost burden occurs when a person pays more than 30% of their gross income for housing

Source: Minneapolis Fed and HUD analysis of American Community Survey data

### Housing Crisis is a confluence of events as much as it is a characteristic of a single point in time

No supports that are a buffer between them and impending loss of housing; urgency (no ability to "wait" for assistance)

**Crisis** 

Scenario 3: Life tips into crisis

Persistent lack of resolution to family level disruptions

- Inability to maintain earnings
- Actions that trigger eviction
- Worsening health

Not in an **Emergency** 

In an

### Stable

Not at imminent risk of housing instability

Solid support system; have resources to navigate challenges; stable health; stable employment

> History of Housing **Stability**

### At Risk

### **Scenario 1: Something happens**

- Income interruption
- Health issue
- Caregiving change
- Unexpected expense

More than one support system in place; typically able to stay housed and prevent further crisis

**Emergency** 

Health & Human Services

## Intentional interventions can stop de-stabilizing events from taking hold

### Scenario 1: Keep disruption short

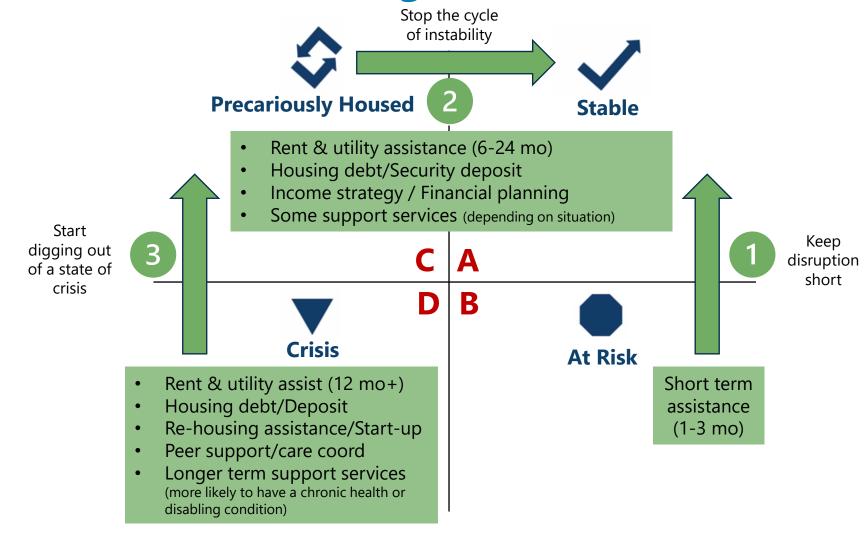

Short-term rent &/or utility assistance

### Scenario 2: Stop the cycle of instability

- Rent & utility assistance
- Housing debt/security deposit
- Income strategy/ financial planning
- Some support services

### Scenario 3: Start digging out of a state of crisis

- Rent & utility assistance
- Housing debt/Deposit
- Re-housing assistance/Start-up
- Peer support/care coord
- Support services (more likely to have a chronic health or disabling condition)

# Services without housing are rarely effective.

- A person can't focus on their physical health or their mental health if their most basic needs aren't met.
- Having a place to live is a first order need.
- Housing status is foundational to a person's ability to build a life for themselves and their family.

### Housing is...

- The largest item in most household budgets (unless you have small children then it's likely child care)
- A top barrier when trying to move from an institution back to community
- A risk factor for child neglect and a barrier to successful family reunification
- A challenge for successful transition from prison to community and a risk factor for criminal recidivism
- A likley trigger for family level crisis if unstable
  - If someone can't find it, afford it, keep it their likelihood of falling into a crisis situation goes up quickly

# Many HHS-administered programs are designed to address de-stabilizing situations that can trigger housing crisis

- Free Through Recovery
- Community Connect
- Recovery Housing Assistance
- SUD Voucher
- On-site and community-based behavioral health services
- Health care coverage (Medicaid) •
- Food and home energy assistance (SNAP, WIC and LIHEAP)
- Child care assistance (CCAP)
- Temporary Assistance for Needy

Families (TANF)

- Child support
- Family First Services
- Transition supports
- Home and Community Based care services
- Employment supports and vocational rehabilitation
- Kinship care supports
- Crisis Stabilization services
- MFP Transition/Diversion assistance

# Some HHS-administered programs are specifically designed to serve people already experiencing homelessness

- Permanent Supportive Housing service grants in buildings serving people exiting chronic homelessness
- Projects for Assistance in Transition from Homelessness(PATH) Grant
- Recovery Housing assistance program
- Grants to Domestic Violence agencies
- Grants to local public health units

## Some HHS-administered programs help address housing costs directly or indirectly

- Facility-based housing assistance (i.e., "bundled rate")
  - Intermediate Care Facilities (ICF), Skilled Nursing, Basic Care, All acute and emergency (incl Qualified Residential Treatment (QRTP), Psychiatric Residential Treatment (PRTF), Hospitals, Detention)
  - The bundled rate pays for your room and board. Person served maintain responsibility for paying for room and board outside of the facility, simultaneously.
- Community based housing assistance
  - Money Follows the Person, Recovery Housing assistance, LIHEAP
- Environmental modifications and repairs
  - LIHEAP, Medicaid State Plan, Medicaid waivers and state-funded environmental modifications and assistive devices

## Preventing homelessness is about stabilizing a family's financial ecosystem and the things that can disrupt it

HOMELESSNESS RISK FACTORS	Care Coordination	Financial Assistance	Behavioral Health	Housing Costs	Employment Assistance	In home Services
Extremely low income renters (severe rent burden)	Х	X	X		X

## HHS is invested in housing conversations

- We've made investments in a wide range of services that help people find care, get treatment, pay for child care, get a better job.
- We've invested in care coordinators, peer supports, case managers, and navigators to help people find what they need.
- We've made a commitment to transition/diversion to assure that facility-based living is not someone's only viable option.
- Delivering on these commitments depends on housing.
- To be effective in helping people navigate life disruptions, find a stable path forward, and truly realize their potential, we need to keep basic needs in mind.
