- One ID card, one provider network, one set of letters and notifications, zones have one set of policies.
- Current situation:
  - Creates **confusion** as to which coverage option is applicable for date(s) of service
  - **Interrupts continuity** which can lead to fragmented care due to differences between the model processes such as the following:
    - Available Benefits
    - Utilization Management or Case Management
    - Service Authorization requirements and requests
    - Appeals for Adverse Benefit Determinations
    - Claims Submission
    - Provider Enrollment – Credentialing
    - Quality or Value Based Purchasing requirements
    - Oversight Requirements

Medicaid Expansion: Transition from Managed Care to DHS Administration

Other Issues from Public Testimony

Prior Testimony
Critical Access Hospital Impact

Prior testimony implied that DHS has not considered the impact on critical access hospitals.
Handout shows the Medicaid percentage of payer mix for all hospitals. Average Medicaid is 8% of payer mix across all hospitals. According to enrollment data, about 20% of that is expansion enrollees.

Average estimated expansion payer mix for CAHs is 1.58% and 1.3% for PPS

Prior Testimony Critical Access Hospital Impact

Prior testimony implied that DHS has not considered the impact on critical access hospitals

- DHS collected and extracted information from PPS and CAH cost reports for 2019
  - Medicare is the **primary payer source** for the CAHs
  - Net operating margins were on average -**1.8%** *(Larger CAHs have better net operating margins)*
  - Historically, CAH **net operating margins are negative** and Medicare **sequestration** have **exacerbated** this issue.
- In 2019, estimated **total Medicaid revenues** were **9.9%** of total revenues
  - If 20% of the expenditures are for expansion, DHS estimates that CAHs will have reduced revenues of **approximately $4.7 million to $12.8 million** (75% of inpatient and 100% of outpatient)

Prior Testimony Critical Access Hospital Impact

Prior testimony implied that DHS has not considered the impact on critical access hospitals

Actuary studied CAH revenue structure for expansion at traditional and expansion rates. Would remove about **$7 to $7.5 million** from the CAH payment system.

	CY17 Number of CAHs	CY18 Number of CAHs	CY17 Percent of CAHs	CY18 Percent of CAHs
Repriced > Incurred Dollars	16	14	44.4%	38.9%
Incurred > Repriced Dollars	20	22	55.6%	61.1%

Prior Testimony Critical Access Hospital Impact

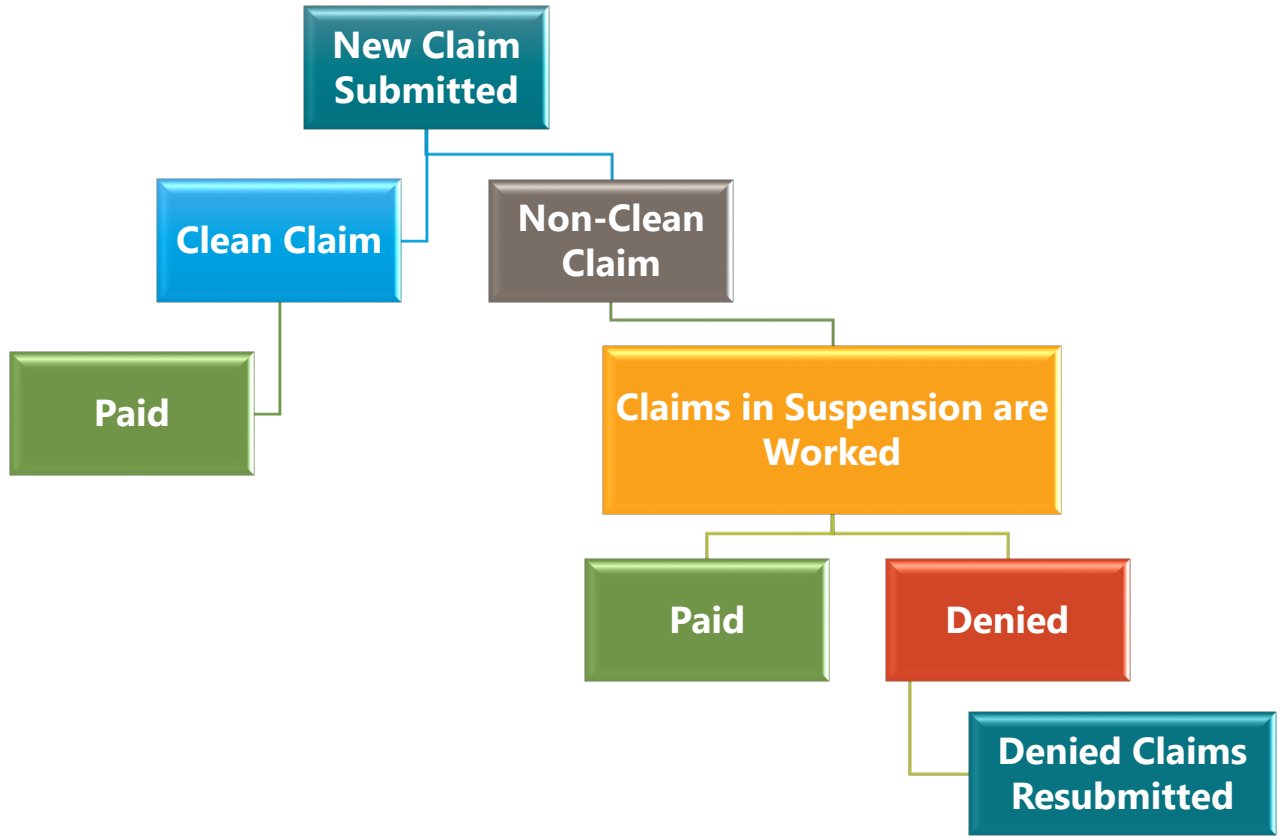
Another Source of Funding:

- CAHs can participate in Health Homes if they have a Rural Health Clinic or FQHC *(Large CAHs were included in value-based purchasing discussion as well)*

Possible solutions:

- Increase supplemental payment by **$7.5 million up to $12.8 million**, there is room in the Upper Payment Limit for Outpatient Hospital Expenditures of about $50 million of which about $15 million can be used for expansion. This would mean rebasing CAHs for inpatient and outpatient care.
- Could consider providing **$7.5 million** more in revenue to CAHs which is about **7% rate increase** on traditional spending for CAH acute and outpatient care.

Prior Testimony Critical Access Hospital Impact



Prior testimony implied that critical access hospitals would close

- **DOH record on hospital closures-**
  - **Dakota Heartland Health System**, Fargo closed in 2002 (PPS)
  - **Richardton Memorial Hospital and Health Center**, Richardton closed in 2009 (CAH)
  - **Red River Behavior Health Systems**, Grand Forks closed in Sept 2020 (Psych)
  - **Altru Rehabilitation Center**, Grand Forks terminated their state hospital license in 2019 (Rehab) *(Altru still remains certified as a hospital and has 2 licensed locations)*

2 Hospital Closed Before Expansion &
2 Closed Since Expansion was Implemented

Suspension By DHS

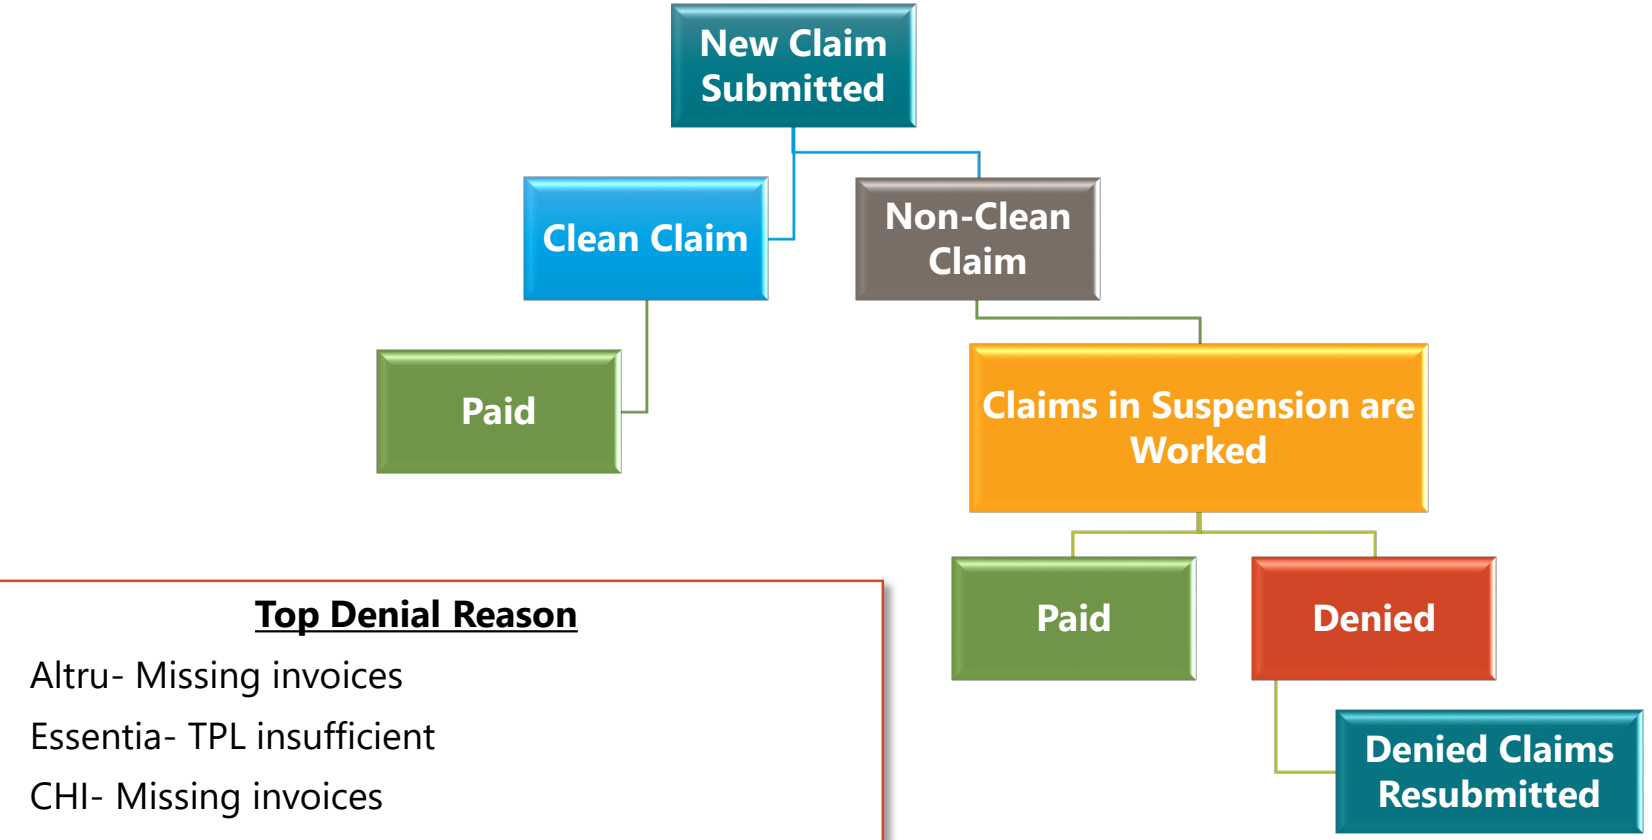
How long to take work the suspension?



- Within 10 days 54% of suspended
- 84% within 30 days

Why are claims denied?

- These are provider reasons- no referral, TPL is insufficient, attending provider license expired, billing provider license expired, missing invoice
- These are state reasons to deny- diagnosis requires review, TPL issues, claim type on review, trauma/accident (looking for accident file like State Farm invoice)

Savings From RX Carve Out- IHS

- **IHS claims are now 100% FMAP**
  - Prior to carve out, claims simply part of the rate
- **$3.6 million saved (1Q20 – 3Q20)**
  - Currently trending at $1.2 million per quarter
  - $3.6 million projected for next three quarters for total of $7.2 million in savings
- **Expansion contract included contractor being responsible for ensuring Medicaid Expansion was the payer of last resort**
- With DHS paying Rx claims, we have now included Expansion population in our processes for finding other coverage
- **A minimum of 190 recipients have been found to have Medicare coverage**
  - Premium ranges from roughly $900 to $1400 per month for different expansion recipients
  - 190 recipients X $1052 per month = $200,000 per month
- **$2.2 million in premium savings (Feb 2020 through Dec 2020)**
  - $1.2 million expected for next six months to total $3.4 million

Prior Testimony
ND Medicaid Savings

RX Carve Out Savings

	Realized Savings	Expected Total Savings
Claims	$ 1,509,000	$ 3,018,000
IHS	$ 3,600,000	$ 7,200,000
Premiums	$ 2,200,000	$ 3,400,000
Administration	$ 2, 641,000	$ 3,441,000
Total	**$ 9,950,000**	**$ 17,059,000**

Expected Total Savings

- Claims = $3.018 million (> $2.1 million projected in 2019 session)
- IHS = $7.2 million **(*New savings)**
- Premiums = $3.4 million **(*New savings)**
- Admin = $3.441 million (< $3.991 million projected in 2019 session due to HIPF going away in 2021)

Total = $17.059 million (> $6.091 projected in 2019 session)

Prior Testimony ND Medicaid Savings

CHIP Savings (1Q20-3Q20)

Expected CHIP cost	**$6,706,332**
▪ *Average 2,378 kids per month x Average $313.38 premium per month*	
Actual CHIP cost	**$1,932,582**
Actual Provider Payments	**$2,872,734**
Drug rebates	**$940,152**
Savings	**$4,773,750**
% reduction	**71.18%**

Prior Testimony Commercial Premiums

Prior testimony implied that there would be an increase to commercial premiums if Medicaid expansion rates are set at traditional fee schedule.

Manatt Health Strategies consulted to see if there was any evidence of cost shifting due to decrease in government health payments for health care.

The answer was NO

Literature cited:

- Colorado Department of Health Care Policy and Financing, Colorado Hospital Cost Shift Analysis, January 2020
  - *"Despite significant reductions in uncompensated care and significant increases in Medicaid and Medicare rates, hospitals are persistently increasing the price of care."*
  - *"Cost shifts are driven by strategic hospital decisions, not by shortfalls from public insurance. The increased funding generated by public, taxpayer funded programs— which are intended to reduce private insurance premiums and out-of-pocket costs — are not being passed along to health care consumers and employers."*
- Kaiser Health News, Medicaid Expansion Boosts Hospital Bottom Lines — And Prices, March 2019
- Colorado Health Institute: The Cost Shift Myth

Historical studies and articles:

- JAMA Forum, Hospitals Don't Shift Costs From Medicare or Medicaid to Private Insurers, January 2017
- Journal of Health Economics, Shock, But No Shift: Hospitals' Responses to Changes in Patient Insurance Mix, September 2016 (full article)
- New York Times, Hospitals Are Wrong About Shifting Costs to Private Insurers, March 2016
- Milbank Quarterly, How Much Do Hospitals Cost Shift? A Review of the Evidence, March 2011 (Pre-ACA)

Prior Testimony Not Taking Advantage of Federal Funds

Prior testimony implied that transitioning Medicaid expansion from managed care to DHS administration would *"leave federal dollars on the table".*

Medicaid expansion is still 90%/10% match regardless of if it is under a managed care company or DHS.

Even though the State match is only 10%, it is more difficult to find that State match each session. 10% of **a larger number** is harder to find than 10% of a smaller number. Suppose the Legislature does not support this policy proposal the total appropriation (at current rates**) $708 million of which $80 million is General Fund. This is an increase of $73 million from 19-21 ($14 million in General Fund)**

This point implies that taxpayers only are concerned with the 10% State match. American taxpayers are responsible for the **entire amount** as it comes from federal taxes and some from State taxes.

The federal government continues to investigate Medicaid expansion spending. GAO reports typically are the first steps before legislative action, and several have already been commissioned:

- from 2017 https://www.gao.gov/products/GAO-17-145 and
- from 2020 https://www.gao.gov/products/GAO-20-260
- from 2020 https://www.gao.gov/products/GAO-20-157
- from 2020 https://www.gao.gov/assets/720/710680.pdf.

Prior Testimony Not Taking Advantage of Federal Funds

Prior testimony implied that transitioning Medicaid expansion from managed care to DHS administration would *"leave federal dollars on the table".*

During revenue downturns, 100% state-funded programs and **traditional Medicaid providers are disproportionately targeted for savings** versus expansion providers due to the funding split. Again, this creates a **non-equitable** Medicaid system.

100% General Fund or 50%/50%	**90%/10%**
Autism Voucher, Basic Care, AARP, Valley Senior Services, Alzheimer's Association, Independence Inc., Poppy's Promise, Red River Human Services Foundation, Enable Inc., Family Voices of ND, Mental Health America ND, Dacotah Foundation, Beyond Shelter, Cooper House, Edwin House, LaGrave on First, ShareHouse, Prairie St. John's, Northland PACE, ND Brain Injury Network, ND Brain Injury Advisory Council, ARC of ND, Nexus-PATH, Prairie Harvest Mental Health, Developmental Disabilities, HCBS, Nursing Homes, Dental, Vision, Pediatrics	**Expansion**

Developmental Disability providers and **Nursing Homes** have put in the hard work to have **more equitable reimbursement**, reducing the financial burden on the State

Other Solutions? 2019 NDHA Study

DHS is committed to considering all possible solutions brought forward by stakeholders.

In 2019 NDHA brought forth a study by Levitt that indicated Accountable Care Organizations (ACOs) would be a viable solution.

After careful review and study DHS has the following observations:

- ACOs, like managed care in general, requires a large enough risk pool to spread the risk. By continuing to separate traditional and expansion, there would not be a critical mass of members to make this a viable solution. NDHA members expressed this concern during recent value-based purchasing meetings.
- ACOs might be possible if hospitals would work together in a regional or statewide approach. NDHA members expressed concern about working in a regional approach at recent value-based purchasing meetings.
- ACOs do not bring down commercial rates.
- ACOs can only reduce costs if providers accept upside and downside risk. DHS could not identify any providers in the state that have accepted downside risk. Therefore, the state would only be sharing the savings when providers manage below the total cost of care. The State would realize no savings if providers were unable to manage under the total cost of care unless 2-sided risk was mandatory.

Possible Outcome of Solution:
Reduced Rates **NO**; Better Management **???**

Other Solutions? Use of Tribal Care Coordination Dollars

DHS is committed to considering all possible solutions brought forward by stakeholders

Tribal care coordination savings were mentioned as a way to save general fund dollars instead of transitioning Medicaid expansion

Below is an update on tribal care coordination savings:

- To date, IHS and 2 providers (Sanford and CHI) have entered into an agreement to coordinate care
- However, 100% FMAP cannot be claimed until tribes agree as well ***(Thus far, no tribe has agreed)***
- Legislation from 2109 set the savings split from the 100% FMAP at 60% State: 40% Tribes ***(No tribe has agreed to this split)***
- DHS did not include savings last biennium or this biennium on tribal care coordination as the decision to participate is solely left to the tribes
- DHS has been working with Sanford and CHI to ensure that when, and if, the agreements are signed the correct FMAP can be applied to the claims
- Note that this solution is independent of the managed care organization

Possible Outcome of Solution:
Reduced Rates **NO**; Better Management **Yes**,
for tribal members only

ND Medicaid
The Future

- Medical Services Division's aim is to restructure its Medicaid programs to promote better care and **quality** for members, **reduced burden** on providers, and be **trusted stewards** of taxpayer dollars.
- Medical Services aims to have **equity for all ND Medicaid members**, regardless of one's category of eligibility, allowing for continuity of care across the continuum to ensure high quality care and outcomes.
- Medical Services aims to **align benefits** across the entire Medicaid program. Legislators have inquired previously about providing dental benefits, vision benefits and long-term care and support services for expansion members.
- Medical Services strives for a comprehensive utilization management approach through **health homes** to ensure patient centered care across the continuum.
- Medical Services seeks to create a **realistic risk pool** that can ultimately be used to spread risk, lower cost, and drive value through the entire program.
- Medical Services aims to give providers **consistent processes** in relation to service authorization, appeals, claims submission, and provider enrollment.

Thank you!

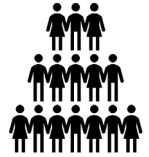
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

MEDICAL SERVICES DIVISION

Our Values

We help...

our members receive safe, appropriate, quality care in a timely manner.

We communicate...

by listening, sharing information, and seeking feedback.

We partner...

with stakeholders, other state agencies, and tribes to achieve shared goals.

We oversee...

Medicaid to ensure integrity, efficiency, and stewardship of public resources.

Medicaid Expansion Eligibility for Adults

6	$ 4,044
7	$ 4,559
8	$ 5,074
9	$ 5,589
10	$ 6,105
+1	$ 516

$17,609 per year

$36,156 per year

$14,000 per capita in health care benefits

MEDICAL SERVICES DIVISION

How We Pay

Contracted Services 1915(b) Waiver

- States design an Alternative Benefit Plan that describes the services and must include Essential Health Benefits

- Medicaid Expansion **does not** cover:
  - Skilled Nursing Facility Services*
  - Dental Care Office Visits**
  - Routine Eye Care**
  - Any waivered services
  - Long Term Care services
  - Room and board for Residential Treatment services**

** Only covers up to 30 days and only covers a skilled level of care*
*** Only covered for 19- and 20-year-olds*

Medicaid Expansion

Managed Care Organization:

- Risk Based Capitation paid on a per member, per month basis
- Current Vendor: Sanford Health Plan (SHP)
- Contract is currently being re-bid
  - Notice of Intent to Award will be issued approximately 5/21/2021
  - Contract Start will be approximately 1/1/2022

Medicaid Expansion:

EXECUTIVE REQUEST 2021-2023

NORTH Dakota | Human Services

Be Legendary.™

NORTH DAKOTA LEGISLATION TO DATE

Since the initial implementation, each subsequent session of the ND Legislative Assembly has reauthorized ND Medicaid Expansion as administered and managed through a **Private Carrier**.

The 2019 ND Legislative Assembly (SB 2012) did make the following updates to the ND Medicaid Expansion Program:

- Directed the Department to continue the utilization of a private carrier for the administration and management **except for pharmacy services**, effective January 1, 2020.
- Directed the Managed Care Organization (MCO), while under contract with the Department, to
  - **Develop and implement a uniform provider reimbursement methodology**
  - **Added 1915(i) Behavioral Health Services through the MCO**

ND Medicaid Expansion Transition Principles

All North Dakota Medicaid **members** should be valued the same, **regardless of Category of Eligibility**, and should have **access to the same core services.**

All North Dakota Medicaid **providers** should be valued the same, **regardless of traditional or expansion**, and should have **equity in reimbursement.**

Taxpayers should be assured that their state and federal taxpayer dollars are not being used to disproportionately support **able bodied adults**, who can work and **transition off government assistance** unlike most traditional Medicaid clients.

Medicaid Expansion Reimbursement Comparison DHS Payments to Hospitals

FIGURE 1. Base and Supplemental Payments as a Share of Total Medicaid Payments to Hospitals, FY 2018

Source: Medicaid and CHIP Payment and Access Commission (MACPAC), "Medicaid Base and Supplemental Payments to Hospitals, March 2020 Issue Brief.

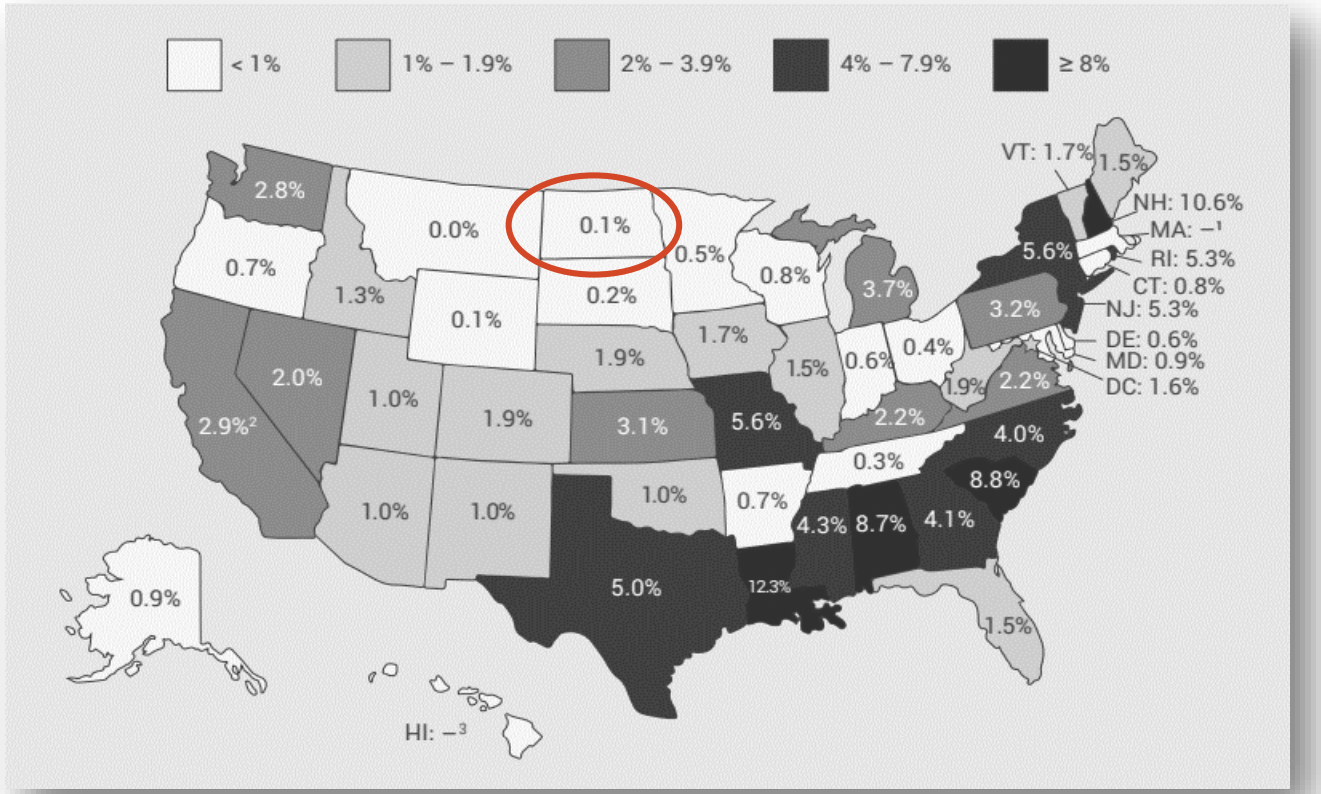
Medicaid Expansion Reimbursement Comparison DHS Payments to Hospitals

Medicaid DSH Payments to Hospitals

- Medicaid disproportionate share hospital (DSH) payments offset hospitals' uncompensated care costs

- Federal rules provide Medicaid matching funds up to a maximum level of DSH payments. Federal limits apply at the individual hospital level and statewide. State DSH allotments are largely based on historical DSH payments.

- The DSH limit is the maximum amount of uncompensated care costs that a State can reimburse a hospital under Medicaid. It is based on **"cost"** of inpatient and outpatient services provided by each hospital and defined as sum of:
    1. **Medicaid shortfall:** the difference between a hospital's Medicaid payments and its cost to provide services to Medicaid-enrolled patients, and
    2. **Uninsured losses:** the cost of providing care to those without insurance for services received, less payments from uninsured.

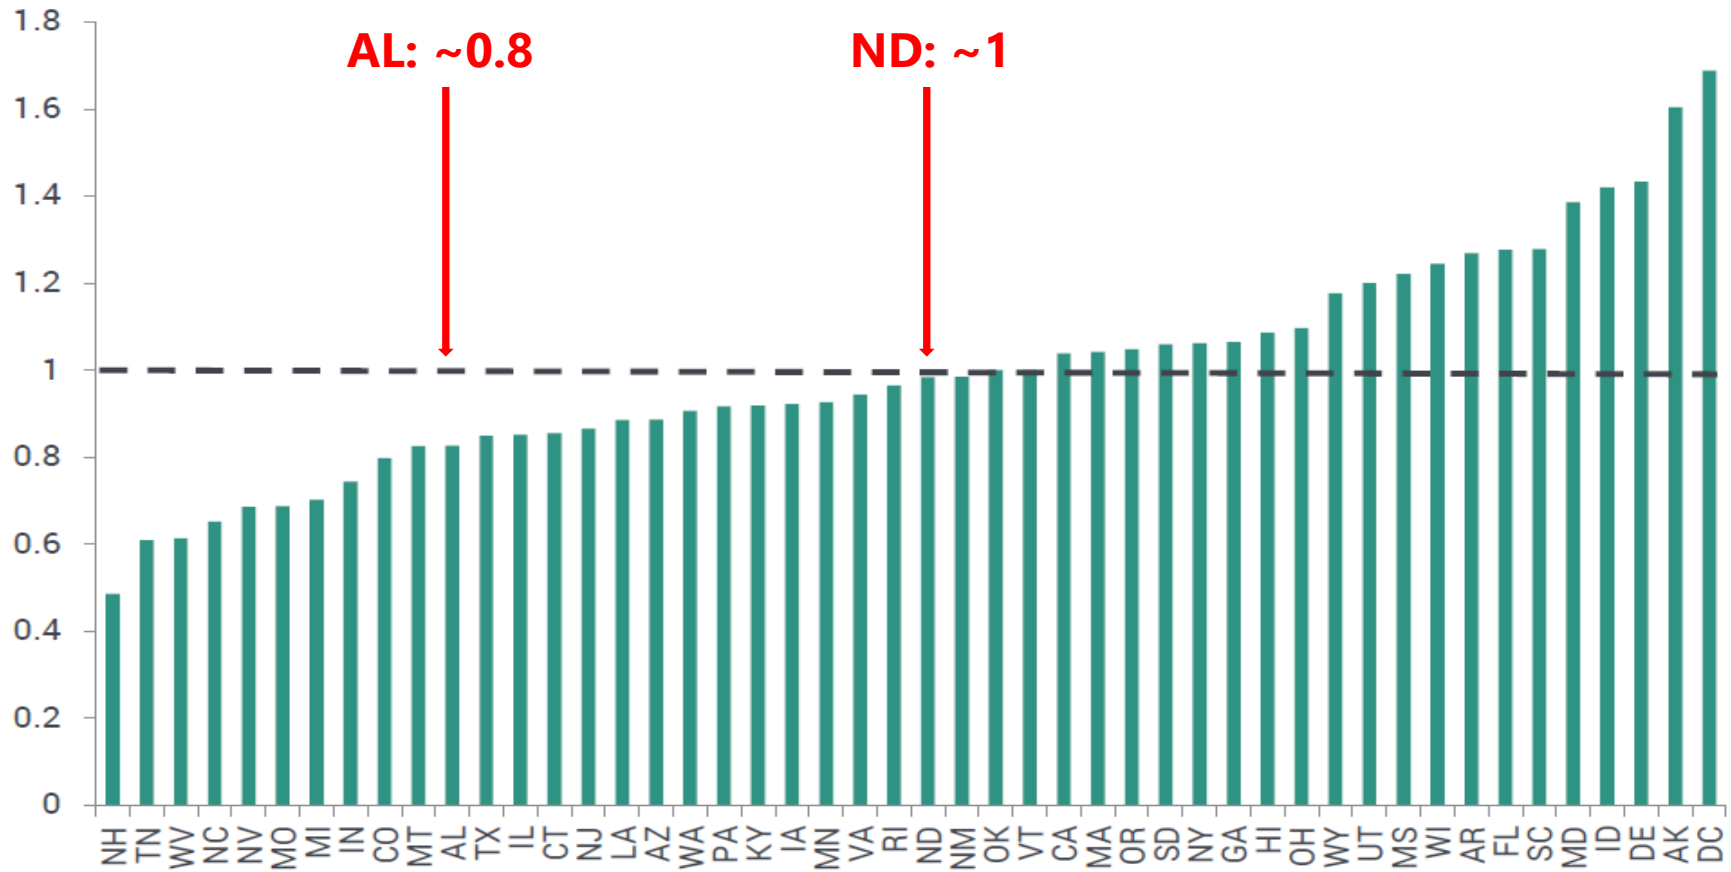


Medicaid Expansion Reimbursement Comparison

DHS Payments to Hospitals

Medicaid DSH Payments to Hospitals

- **North Dakota Medicaid DSH spending is among the lowest in the nation** – both in terms of share of Medicaid spending (0.1%) and absolute dollars ($22.3 million federal and state)
- **North Dakota's Medicaid DSH allotment is about the same as South Dakota** ($22.4 million) and smaller than all other states except for Hawaii, Montana and Wyoming.

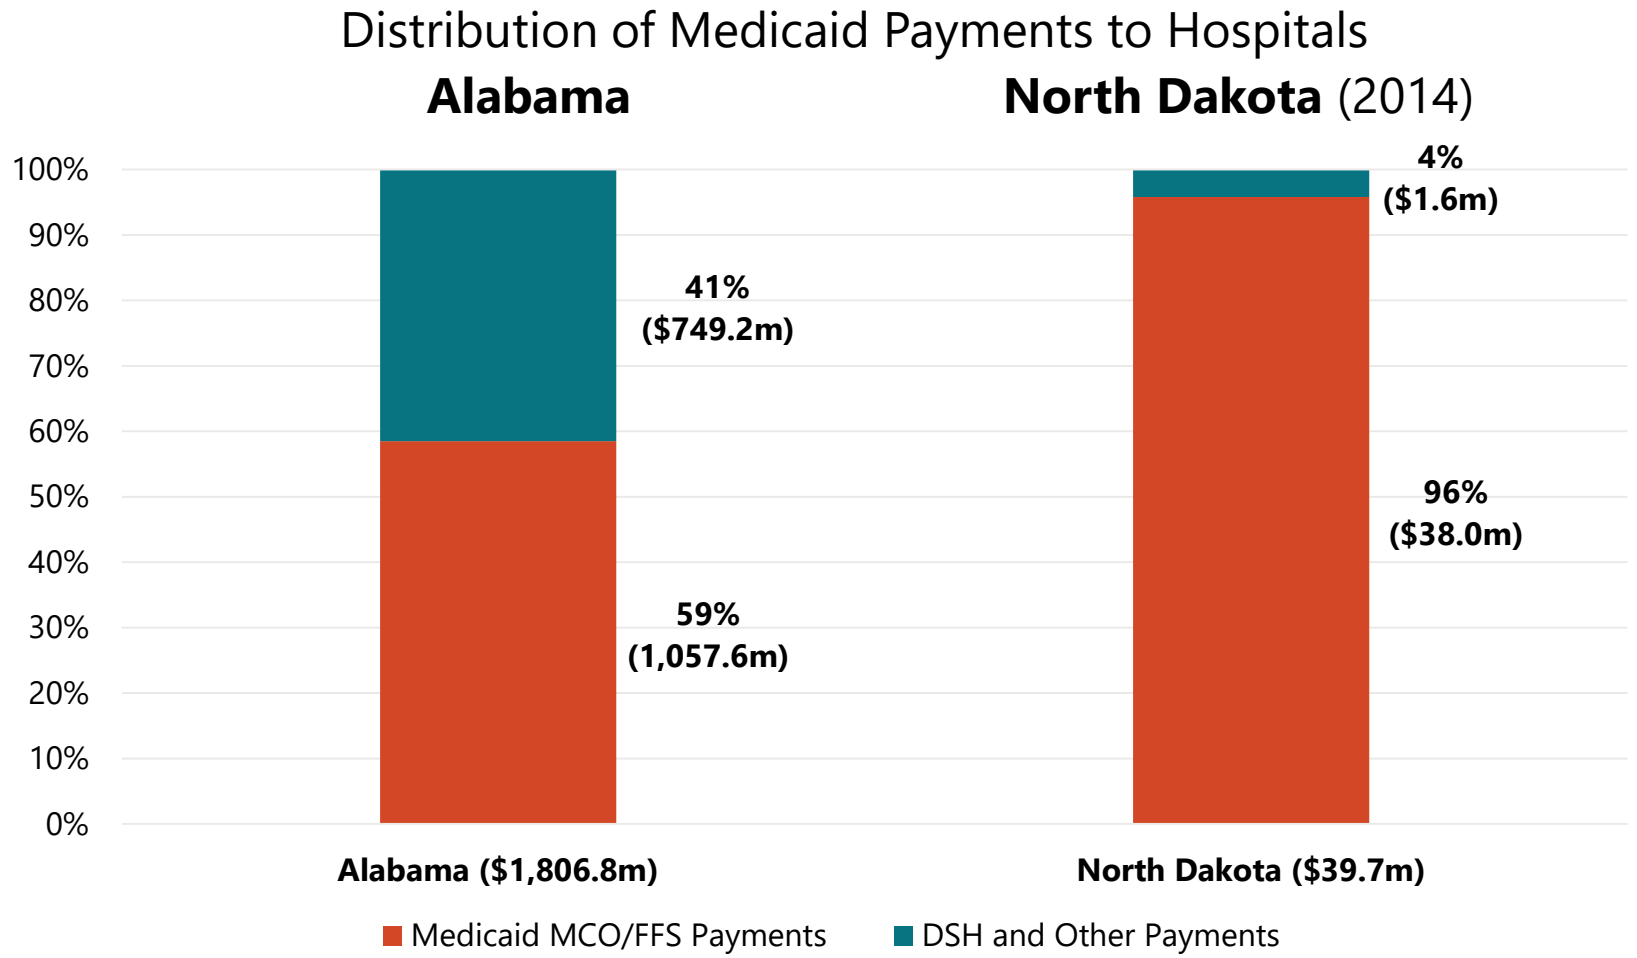


DSH Spending as % of Total Medicaid Benefit Spending by State, FY 2018

Source: Medicaid and CHIP Payment and Access Commission, "Report to Congress on Medicaid and CHIP," Washington, DC, March 2020.

Medicaid Expansion Reimbursement Comparisons Inpatient FFS Payment Index

EXAMPLE: MEDICAID-TO-MEDICARE INPATIENT FEE-FOR-SERVICE PAYMENT INDEX, CY 2010



SOURCE: MACPAC. "Medicaid Hospital Payment: A Comparison Across States and to Medicare," Issue Brief, April 2017.
NOTE: The payment index values are normalized around the national average, which has a value of 1.0. For example, a state with an index value of 1.10 would have payments that were 10 percent higher than the national average. Kansas, Maine and Nebraska were excluded due to missing data.

Medicaid Expansion Reimbursement Comparisons

ND's Medicaid Payments

SOURCE: U.S. Government Accountability Office, "States' Use and Distribution of Supplemental Payments to Hospitals," July 2019

Medicaid Expansion Reimbursement Comparison

Hospital Uninsured & Uncompensated Care Comparison

ND hospitals uncompensated care is a fraction of AL uncompensated care

North Dakota	ALABAMA
7.9% uninsured	12.1% uninsured
$5.9 million total uncompensated care	$592.4 million total uncompensated care

SOURCE: U.S. Government Accountability Office, "States' Use and Distribution of Supplemental Payments to Hospitals," July 2019

Summary of Medicaid Expansion Reimbursement Comparisons

North Dakota Medicaid expansion costs per capita are the highest in the country. 54% higher than the second highest state of Alaska.

North Dakota Medicaid FFS rates for physicians are:

- higher than average and comparable to neighboring states

North Dakota hospital expenses are highest per capita and in growth in the U.S.

DSH payments in North Dakota are among the lowest in the United States

Summary of Medicaid Expansion Reimbursement Comparisons

North Dakota Medicaid rates are not equitable

Payment to providers for the care of non-institutional, able-bodied adults, who can work and transition off Medicaid, are 75% to 100% higher than payments to providers for the care of other Medicaid populations like children, elderly, pregnant women, non-institutionalized adults.

Across all other state non-institutionalized programs, none incur per capita expenses as high as $14,107 for Medicaid expansion.

- Per pupil education $12,453
  - Per pupil Kindergartener $10,373
- Per pupil higher education $7,780
- Unemployment insurance $5,379 (average payment pf $448.26 times 12)

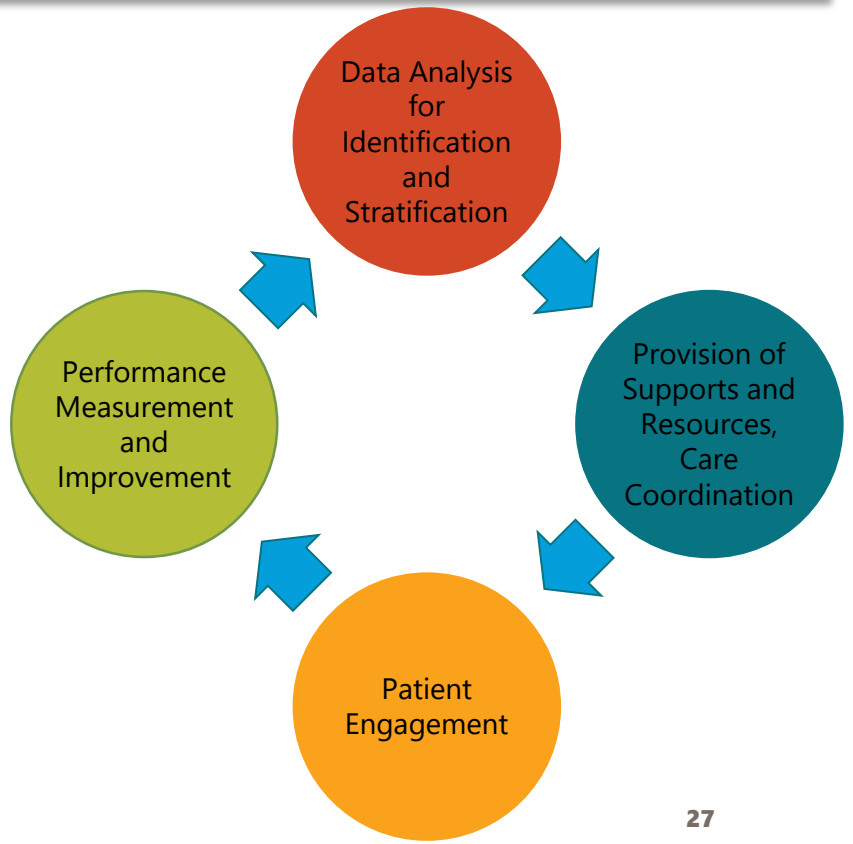
Summary of Medicaid Expansion Reimbursement Comparisons

- Transition from managed care to DHS administration will occur July 1, 2022 giving providers time to adjust, plan, and account for COVID impacts.
- As of 12/18/2020 North Dakota Medicaid providers received $326 million in provider relief funds from the federal government.
- HHS expected to **release $24.5 billion more** in provider relief funds so that providers can make up nearly 90% of lost revenues and net change in expenses. Payments will be made from 12/16/2020-1/31/2021.
  - **The department noted that more than 35,000 applicants won't receive an additional payment because the total relief they've received so far is 88% of their losses or they had no change in revenues or net expenses due to COVID-19.**

Medicaid Expansion: Transition from Managed Care to DHS Administration

Issue: Administration

Comparison Medicaid Expansion Financial Arrangement



What is Managed Care?

Goal: to **control costs** while simultaneously **improving health care quality and outcomes**

Requires more than just care coordination, it involves a set of activities intended to **identify populations** to prioritize for extra support care planning and coordination, patient engagement, and analysis of data to evaluate outcomes and improve processes.

Activities to Improve Health Care Quality & Outcomes

- Intensive management of high-cost individuals.
- Selective contracting with providers willing to offer services at discounted rates.
- Initiatives to steer consumers away from high cost, low value services towards low cost, high value services.
- Requiring enrollees to obtain prior authorization from their primary care physician to gain access to specialty services.
- Focusing on preventive services.
- Monitoring the use of basic and ancillary services and using incentives to reward below-average use and disincentives to discourage excess use.
- Requiring providers to assume part of the financial risk or cost overruns for services they control, directly or indirectly.

Comparison Medicaid Expansion Financial Arrangement

Why do State Medicaid Programs use MCOs?

1. Managed Care Organization Takes on the Risk versus the State
2. Budget Predictability
3. Budget Savings
4. Improved Outcomes

Risk & Predictability

- As in any risk-based model the more people in the risk pool the more likely the managed care organization can spread the risk across health and less health individuals
- The larger the risk pool, the more predictable and stable premiums will be.
- Premiums also rely on the average health care costs of the enrollees
- Adverse selection occurs when the insurer attracts individuals when they have greater health care needs
- In **North Dakota**, the
  - **risk pool** is the **smallest** in the **entire country** using managed care
  - **premiums** have **not** been **predictable** or **stable**
  - **churn rate** indicates that **adverse selection** is probably occurring

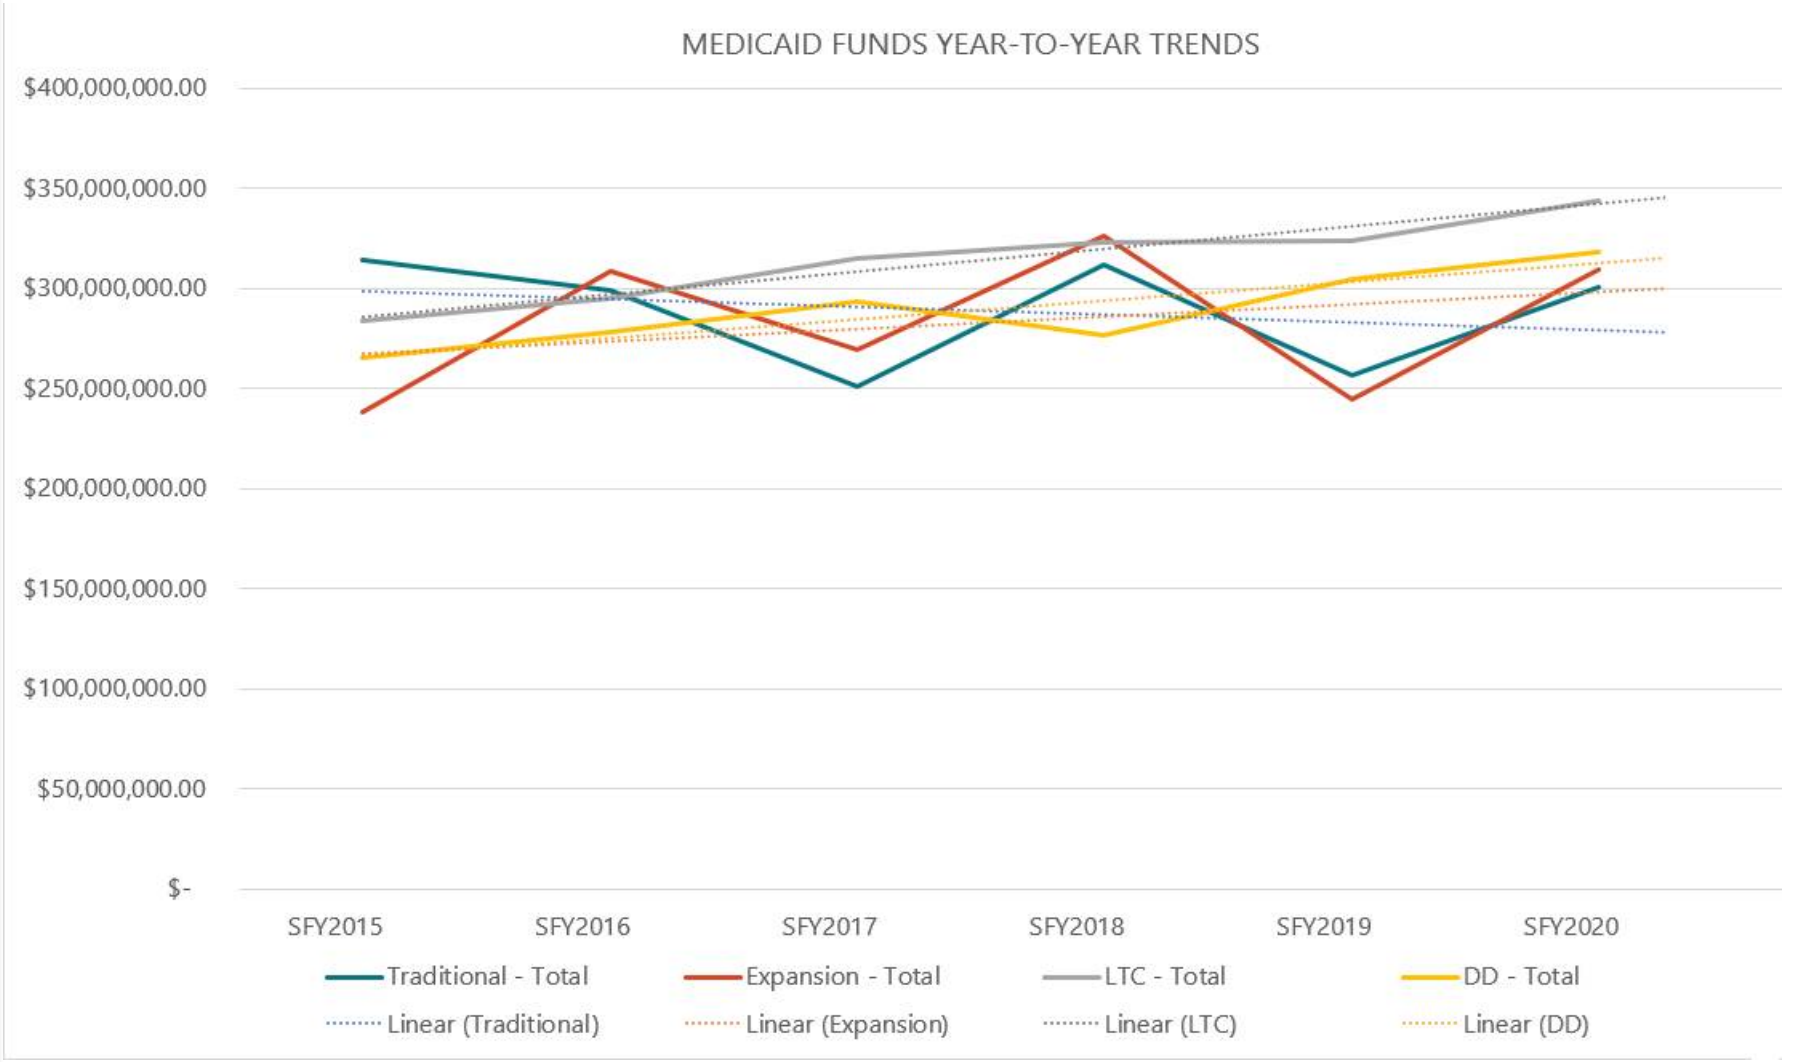
Comparison Does Managed Care Save Money?

Inconclusive Evidence

Lewin Group Analysis

- AHIP funded
- Meta-analysis, a review of 24 studies
  - none were peer reviewed
  - proposes that cost savings range from 0.5% to 20%
  - Point to decreases in inpatient utilization but at that time inpatient was going down throughout the U.S. health system

Mathematica 5-State Analysis



- Found no savings

Duggan Study from NBER Analysis

- Showed moving to managed care resulted in no improvement in health care and substantial increases in government spending.
- MCO did little to nothing to reduce spending.

Source:https://www.healthaffairs.org/do/10.1377/hblog20180430.510086/full/

Comparing Has Medicaid Expansion Saved Money in North Dakota?

Comparing Has Medicaid Expansion Improved Health?

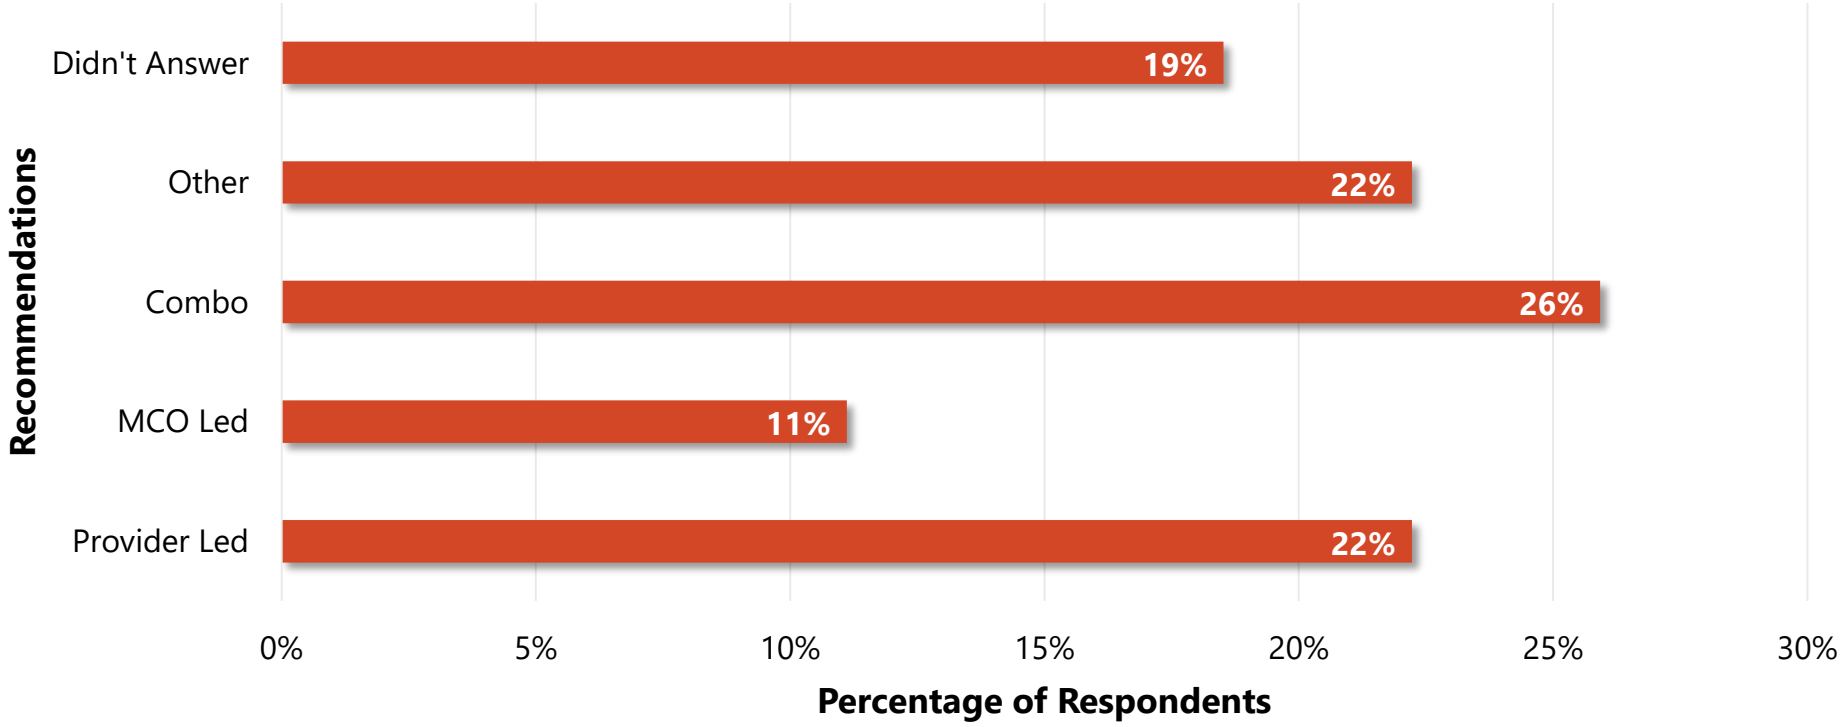
HEDIS and CAHPS measures are skewed toward members with **continuous enrollment**. In expansion we know the churn rate is high (~11,000 members) and we know that expenditures keep going up and not down.

The State's contracted actuary uses a different analytical tool to get a better idea of the **effectiveness of the managed care** organization called Prometheus.

- 43 episodes are built such as diabetes and knee surgery
- Compares the utilization and cost based on clinical standards
- Sorts potential waste and identifies care that should have been potentially avoided using the right interventions and clinical management

What is Care Coordination in an MCO?

Prior testimony in 2019 session on the number of care coordinators in managed care organization



- Difference between care coordination, case management, and population health in managed care:
  - Care Coordination: contracted to primary care providers
  - Case Management: typically done by the MCO typically and targets high risk members, high touch and costly
  - Population Health: typically done by MCO and relies on data analytics to target sub-groups.

ND Medicaid Expansion MCO Survey

There are different approaches to care management by a MCO:

1. **Provider-led** (with an enhanced payment to providers for outcomes)
2. **MCO-led** (MCO has its own care managers)

What do you think is the ideal care management approach, why?

ND Medicaid Expansion MCO Survey

"Provider led care management because the care managers are direct member of the patients care team coordinating care and service for the patient. Hybrid models work will where MCO's support provider led programs with expertise in certain programs such as behavioral health."

"I believe the best method should be a combination of provider-led, when possible, and MCO-led, when necessary. Not all providers will be able to perform necessary care management, but that doesn't mean the MCO should simply take on all care management when there are providers who can and do perform important care management to the benefit of their patients. As such, those high performers should be eligible for enhanced reimbursement. Different strengths and areas of expertise to the table that complement each other.

"Ideally, we feel the care management should be owned by the primary care providers who work closest with the patient. With the enhanced primary care models, we are able to fill in the gaps more easily by being closely connected to the patients and providing ongoing care management to the patients through calls, virtual care, patient portals, goal setting and management, mental health counseling, and medication management."

"The ideal approach is a hybrid of the two. Both the MCO carrier and the provider."

"I feel that provider lead would be more beneficial as they understand the needs of their patients and understand barriers to service delivery unlike MCO. I have learned that direct contact with individuals allows for feedback and ability to understand how policies affect direct practice."

What did providers comment in the MCO Survey?

Proposed Solution
Health Homes

Transition from managed care to managed fee-for-service

- requires a more robust management program than current PCCM program

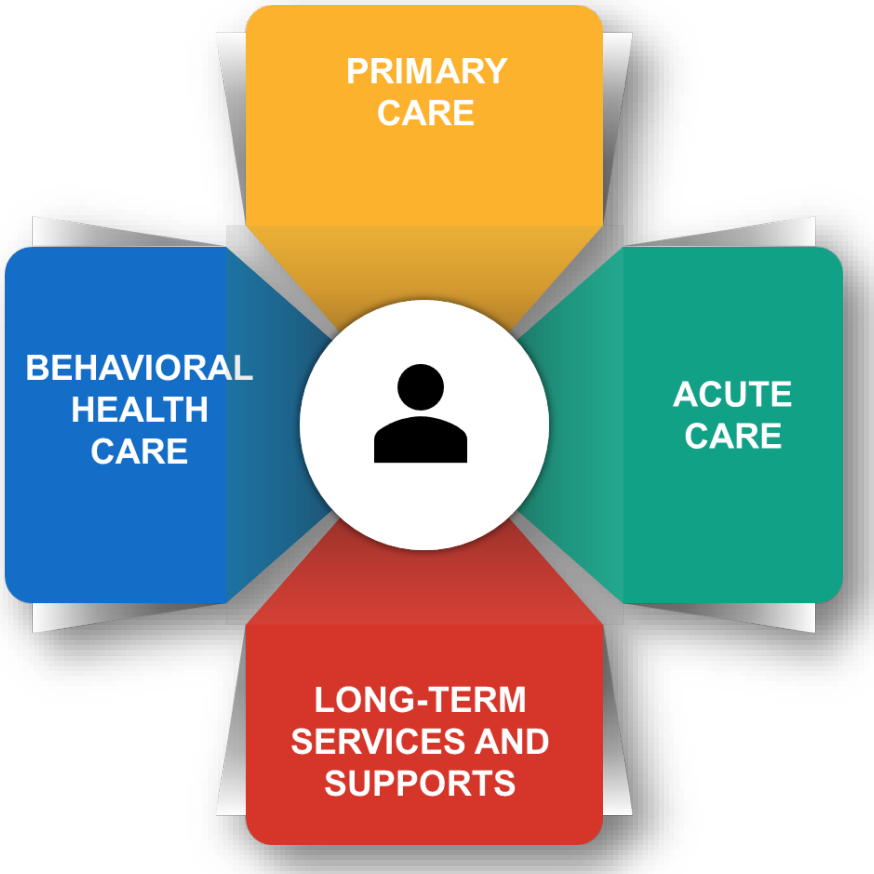
DHS brought in presenters from

- Alabama (Medical Homes to ACO)
- South Dakota (Health Homes Model)
- Connecticut (ASO model) in early 2020

South Dakota avoided $7.3 million in costs using Health Homes in 5 years

Feedback from North Dakota Medicaid Stakeholders

- Noted that **Health Homes** was the preferred model
- Subsequent meeting with outpatient stakeholders



2021-2023 Executive Request

- Authorizes DHS to plan for **Health Homes** and seek CMS approval
- Enhanced payment will offset some of the reduction in rates.

Proposed Solution
Health Homes

Medicaid Health Homes

- Builds on the PCMH model
- Fosters a **"whole-person"** orientation to care for individuals with **chronic conditions** through the integration and coordination of:
  - Primary Care
  - Acute Care
  - Behavioral Health Care
  - Long-Term Services & Support

Proposed Solution
MCO → DHS Administration

Parity to Medicaid members

- Adults in **household** will have **same benefit package**
- Adult **dental** and **vision** will be **part of benefit package**

Significant administrative simplification

- Staff time available to develop an overall care coordination for Traditional and Expanded Medicaid, including review of Targeted Case Management, Primary Care Case Management, and Coordinated Services Program
- Client repayment for eligibility overpayments will be limited to actual claims paid vs. the cost of the monthly premium
- Administrative rules and procedures are the same for providers across the entire Medicaid program
- Only one program to manage, evaluate, and report on

Legislature has more control as compared to privately contracted services

Proposed Solution MCO → DHS Administration

Streamlined movement between traditional and expansion

- One ID card, one provider network, one set of letters and notifications, zones have one set of policies.
- Current situation:
  - Creates **confusion** as to which coverage option is applicable for date(s) of service
  - **Interrupts continuity** which can lead to fragmented care due to differences between the model processes such as the following:
    - Available Benefits
    - Utilization Management or Case Management
    - Service Authorization requirements and requests
    - Appeals for Adverse Benefit Determinations
    - Claims Submission
    - Provider Enrollment – Credentialing
    - Quality or Value Based Purchasing requirements
    - Oversight Requirements

Prior Testimony Critical Access Hospital Impact

Prior testimony implied that DHS has not considered the impact on critical access hospitals

- DHS collected and extracted information from PPS and CAH cost reports for 2019
  - Medicare is the **primary payer source** for the CAHs
  - Net operating margins were on average -**1.8%** *(Larger CAHs have better net operating margins)*
  - Historically, CAH **net operating margins are negative** and Medicare **sequestration** have **exacerbated** this issue.
- In 2019, estimated **total Medicaid revenues** were **9.9%** of total revenues
  - If 20% of the expenditures are for expansion, DHS estimates that CAHs will have reduced revenues of **approximately $4.7 million to $12.8 million** (75% of inpatient and 100% of outpatient)

Prior Testimony Critical Access Hospital Impact

Prior testimony implied that DHS has not considered the impact on critical access hospitals

Actuary studied CAH revenue structure for expansion at traditional and expansion rates. Would remove about **$7 to $7.5 million** from the CAH payment system.

	CY17 Number of CAHs	CY18 Number of CAHs	CY17 Percent of CAHs	CY18 Percent of CAHs
Repriced > Incurred Dollars	16	14	44.4%	38.9%
Incurred > Repriced Dollars	20	22	55.6%	61.1%

Prior Testimony Critical Access Hospital Impact

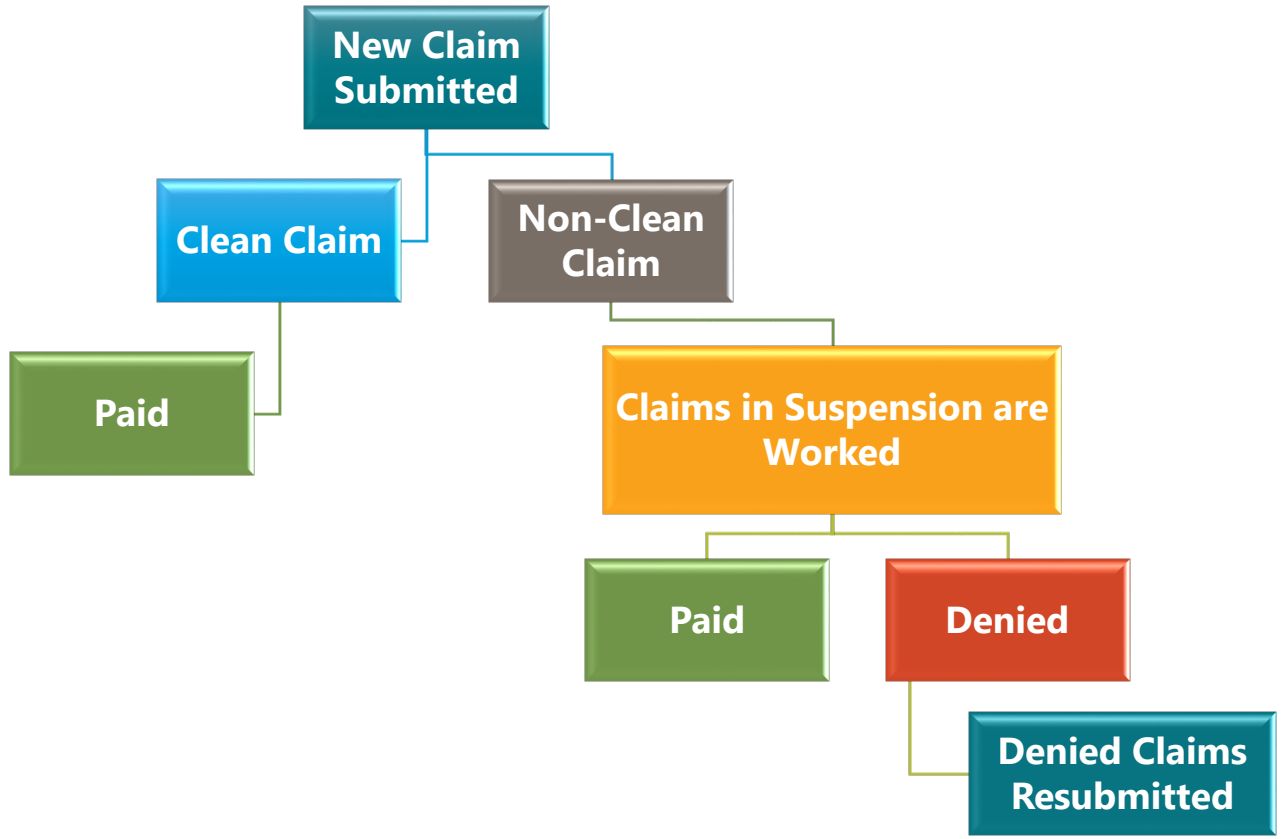
Another Source of Funding:

- CAHs can participate in Health Homes if they have a Rural Health Clinic or FQHC *(Large CAHs were included in value-based purchasing discussion as well)*

Possible solutions:

- Increase supplemental payment by **$7.5 million up to $12.8 million**, there is room in the Upper Payment Limit for Outpatient Hospital Expenditures of about $50 million of which about $15 million can be used for expansion. This would mean rebasing CAHs for inpatient and outpatient care.
- Could consider providing **$7.5 million** more in revenue to CAHs which is about **7% rate increase** on traditional spending for CAH acute and outpatient care.

Prior Testimony Critical Access Hospital Impact



Prior testimony implied that critical access hospitals would close

- **DOH record on hospital closures-**
  - **Dakota Heartland Health System**, Fargo closed in 2002 (PPS)
  - **Richardton Memorial Hospital and Health Center**, Richardton closed in 2009 (CAH)
  - **Red River Behavior Health Systems**, Grand Forks closed in Sept 2020 (Psych)
  - **Altru Rehabilitation Center**, Grand Forks terminated their state hospital license in 2019 (Rehab) *(Altru still remains certified as a hospital and has 2 licensed locations)*

2 Hospital Closed Before Expansion &
2 Closed Since Expansion was Implemented

Savings From RX Carve Out- IHS

- **IHS claims are now 100% FMAP**
  - Prior to carve out, claims simply part of the rate
- **$3.6 million saved (1Q20 – 3Q20)**
  - Currently trending at $1.2 million per quarter
  - $3.6 million projected for next three quarters for total of $7.2 million in savings
- **Expansion contract included contractor being responsible for ensuring Medicaid Expansion was the payer of last resort**
- With DHS paying Rx claims, we have now included Expansion population in our processes for finding other coverage
- **A minimum of 190 recipients have been found to have Medicare coverage**
  - Premium ranges from roughly $900 to $1400 per month for different expansion recipients
  - 190 recipients X $1052 per month = $200,000 per month
- **$2.2 million in premium savings (Feb 2020 through Dec 2020)**
  - $1.2 million expected for next six months to total $3.4 million

Prior Testimony
ND Medicaid Savings

RX Carve Out Savings

	Realized Savings	Expected Total Savings
Claims	$ 1,509,000	$ 3,018,000
IHS	$ 3,600,000	$ 7,200,000
Premiums	$ 2,200,000	$ 3,400,000
Administration	$ 2, 641,000	$ 3,441,000
Total	**$ 9,950,000**	**$ 17,059,000**

Expected Total Savings

- Claims = $3.018 million (> $2.1 million projected in 2019 session)
- IHS = $7.2 million **(*New savings)**
- Premiums = $3.4 million **(*New savings)**
- Admin = $3.441 million (< $3.991 million projected in 2019 session due to HIPF going away in 2021)

Total = $17.059 million (> $6.091 projected in 2019 session)

Prior Testimony ND Medicaid Savings

CHIP Savings (1Q20-3Q20)

Expected CHIP cost	**$6,706,332**
▪ *Average 2,378 kids per month x Average $313.38 premium per month*	
Actual CHIP cost	**$1,932,582**
Actual Provider Payments	**$2,872,734**
Drug rebates	**$940,152**
Savings	**$4,773,750**
% reduction	**71.18%**

Prior Testimony Commercial Premiums

Prior testimony implied that there would be an increase to commercial premiums if Medicaid expansion rates are set at traditional fee schedule.

Manatt Health Strategies consulted to see if there was any evidence of cost shifting due to decrease in government health payments for health care.

The answer was NO

Literature cited:

- Colorado Department of Health Care Policy and Financing, Colorado Hospital Cost Shift Analysis, January 2020
  - *"Despite significant reductions in uncompensated care and significant increases in Medicaid and Medicare rates, hospitals are persistently increasing the price of care."*
  - *"Cost shifts are driven by strategic hospital decisions, not by shortfalls from public insurance. The increased funding generated by public, taxpayer funded programs— which are intended to reduce private insurance premiums and out-of-pocket costs — are not being passed along to health care consumers and employers."*
- Kaiser Health News, Medicaid Expansion Boosts Hospital Bottom Lines — And Prices, March 2019
- Colorado Health Institute: The Cost Shift Myth

Historical studies and articles:

- JAMA Forum, Hospitals Don't Shift Costs From Medicare or Medicaid to Private Insurers, January 2017

- New York Times, Hospitals Are Wrong About Shifting Costs to Private Insurers, March 2016
- Milbank Quarterly, How Much Do Hospitals Cost Shift? A Review of the Evidence, March 2011 (Pre-ACA)

Prior Testimony Not Taking Advantage of Federal Funds

Prior testimony implied that transitioning Medicaid expansion from managed care to DHS administration would *"leave federal dollars on the table".*

Medicaid expansion is still 90%/10% match regardless of if it is under a managed care company or DHS.

Even though the State match is only 10%, it is more difficult to find that State match each session. 10% of **a larger number** is harder to find than 10% of a smaller number. Suppose the Legislature does not support this policy proposal the total appropriation (at current rates**) $708 million of which $80 million is General Fund. This is an increase of $73 million from 19-21 ($14 million in General Fund)**

This point implies that taxpayers only are concerned with the 10% State match. American taxpayers are responsible for the **entire amount** as it comes from federal taxes and some from State taxes.

The federal government continues to investigate Medicaid expansion spending. GAO reports typically are the first steps before legislative action, and several have already been commissioned:

- from 2017 https://www.gao.gov/products/GAO-17-145 and
- from 2020 https://www.gao.gov/products/GAO-20-260
- from 2020 https://www.gao.gov/products/GAO-20-157
- from 2020 https://www.gao.gov/assets/720/710680.pdf.

Prior Testimony Not Taking Advantage of Federal Funds

Prior testimony implied that transitioning Medicaid expansion from managed care to DHS administration would *"leave federal dollars on the table".*

During revenue downturns, 100% state-funded programs and **traditional Medicaid providers are disproportionately targeted for savings** versus expansion providers due to the funding split. Again, this creates a **non-equitable** Medicaid system.

100% General Fund or 50%/50%	**90%/10%**
Autism Voucher, Basic Care, AARP, Valley Senior Services, Alzheimer's Association, Independence Inc., Poppy's Promise, Red River Human Services Foundation, Enable Inc., Family Voices of ND, Mental Health America ND, Dacotah Foundation, Beyond Shelter, Cooper House, Edwin House, LaGrave on First, ShareHouse, Prairie St. John's, Northland PACE, ND Brain Injury Network, ND Brain Injury Advisory Council, ARC of ND, Nexus-PATH, Prairie Harvest Mental Health, Developmental Disabilities, HCBS, Nursing Homes, Dental, Vision, Pediatrics	**Expansion**

Developmental Disability providers and **Nursing Homes** have put in the hard work to have **more equitable reimbursement**, reducing the financial burden on the State

Other Solutions? 2019 NDHA Study

DHS is committed to considering all possible solutions brought forward by stakeholders.

In 2019 NDHA brought forth a study by Levitt that indicated Accountable Care Organizations (ACOs) would be a viable solution.

After careful review and study DHS has the following observations:

- ACOs, like managed care in general, requires a large enough risk pool to spread the risk. By continuing to separate traditional and expansion, there would not be a critical mass of members to make this a viable solution. NDHA members expressed this concern during recent value-based purchasing meetings.
- ACOs might be possible if hospitals would work together in a regional or statewide approach. NDHA members expressed concern about working in a regional approach at recent value-based purchasing meetings.
- ACOs do not bring down commercial rates.
- ACOs can only reduce costs if providers accept upside and downside risk. DHS could not identify any providers in the state that have accepted downside risk. Therefore, the state would only be sharing the savings when providers manage below the total cost of care. The State would realize no savings if providers were unable to manage under the total cost of care unless 2-sided risk was mandatory.

Possible Outcome of Solution:
Reduced Rates **NO**; Better Management **???**

Other Solutions? Use of Tribal Care Coordination Dollars

DHS is committed to considering all possible solutions brought forward by stakeholders

Tribal care coordination savings were mentioned as a way to save general fund dollars instead of transitioning Medicaid expansion

Below is an update on tribal care coordination savings:

- To date, IHS and 2 providers (Sanford and CHI) have entered into an agreement to coordinate care
- However, 100% FMAP cannot be claimed until tribes agree as well ***(Thus far, no tribe has agreed)***
- Legislation from 2109 set the savings split from the 100% FMAP at 60% State: 40% Tribes ***(No tribe has agreed to this split)***
- DHS did not include savings last biennium or this biennium on tribal care coordination as the decision to participate is solely left to the tribes
- DHS has been working with Sanford and CHI to ensure that when, and if, the agreements are signed the correct FMAP can be applied to the claims
- Note that this solution is independent of the managed care organization

Possible Outcome of Solution:
Reduced Rates **NO**; Better Management **Yes**,
for tribal members only

ND Medicaid
The Future

- Medical Services Division's aim is to restructure its Medicaid programs to promote better care and **quality** for members, **reduced burden** on providers, and be **trusted stewards** of taxpayer dollars.
- Medical Services aims to have **equity for all ND Medicaid members**, regardless of one's category of eligibility, allowing for continuity of care across the continuum to ensure high quality care and outcomes.
- Medical Services aims to **align benefits** across the entire Medicaid program. Legislators have inquired previously about providing dental benefits, vision benefits and long-term care and support services for expansion members.
- Medical Services strives for a comprehensive utilization management approach through **health homes** to ensure patient centered care across the continuum.
- Medical Services seeks to create a **realistic risk pool** that can ultimately be used to spread risk, lower cost, and drive value through the entire program.
- Medical Services aims to give providers **consistent processes** in relation to service authorization, appeals, claims submission, and provider enrollment.

Thank you!

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
2/1/2021am
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Representative	Present	Absent
Nelson	P	
Kreidt	P	
Andersen	P	
Mitskog	P	
Schobinger	P	
Strinden	P	

Chair Nelson opened the meeting at 9:01 a.m.

Discussion Topics:

- Department of Human Services
- Department of transportation questions
- Statewide HSC budget
- Department of Human Services Questions and Answers

Mike Gerhart, DOT (9:02 am) testified about DOT questions #4527

Rosalie Etherington and Jeff Stenseth (9:20 am) testified about the Statewide HSC Budget Detail #4502

Arnie Strebe, CEO/ CFO (10:36 am) testified about questions the Representatives had, oral testimony

Krista Fremming, Medical Services (11:00 am) testified about Northland Pace enrollment questions #4558

Chair Nelson closed the meeting at 11:50 a.m.

Cole Fleck, Committee Clerk

STATE FLEET VEHICLE RENTAL RATES #4527

There are three components to the rental rates of state fleet vehicles. They are operating, depreciation, and replacement. The operating and depreciation can be charged to federal projects, however the replacement rate cannot.

Operating Rate

To determine the operating rental rate, the following components are included in the calculation:

1. Direct Labor and Payroll Additives.
2. Parts, Fuel, Commercial Repairs, Etc.
3. State Fleet Services Overhead.
4. Shop Overhead.
5. Insurance.
6. The rate computation will include the adjustment for over/under applied revenues.

These costs are rolled up over a 12-month period and then divided by the 12 month usage to arrive at an actual cost operating rate per mile/hour. We review these costs quarterly and make adjustments to the rate to avoid as much over/under applied revenue as possible.

Depreciation Rate

To determine the depreciation rental rate the following components are used in the calculation:

1. Miles or hours vehicle to be in service.
2. Years vehicle to be in service.
3. The rate computation will include the adjustment for gain/loss from sale.

Financial Management Division will use this information as well as the estimated salvage value to determine the current depreciation schedule to be assigned to each group of new units. Estimated salvage value is based on a percentage of new vehicle cost as dictated by recent auctions. All vehicle depreciation is straight line over the useful months' life of the vehicle minus the estimated salvage value. Depreciation is charged based on if vehicle is a pool or assigned vehicle.

- For pool vehicles, agencies are to budget depreciation based on miles/hours driven.
- For assigned vehicles, agencies are to budget based on number of vehicles in group times the group monthly assigned depreciation rate times 24 months. This rate will be charged each month regardless of usage.

Replacement Rate

The purpose of the replacement rate is to recover the cost associated with inflation of new vehicle prices from the time a new vehicle is purchased until the time it is to be replaced and/or the addition of new vehicles to a group to meet the state's needs.

If the new prices remain flat within a group or there are no new additions to the group, the replacement rate may not be needed for periods of time.

The process used to calculate the rates is in full compliance with 2 C.F.R. Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. Compliance with this regulation allows agencies to apply State fleet usage costs to federal programs as applicable.

The rates are reviewed quarterly and, if necessary, adjusted to remain responsive to changing conditions. It should be noted the rates are not designed to result in a new profit or loss to state fleet; however, they are designed to cover the actual costs of operating and acquiring state fleet vehicles.

Replacement Guidelines

The following are examples of the guidelines used to replace some of the vehicle groups:

Group	Replacement age	Target miles
01 Mini Passenger Vans	7 Years	75,000 Miles
02 Sedans	5 Years	70,000 Miles
03 Light Duty Pickups and Cargo Vans	8 Years	85,000 Miles
04 Heavy Duty Pickups and Vans	7 Years	85,000 Miles
07 Highway Patrol Vehicles	5 Years	85-100,000 Miles
08 Game Enforcement	4 Years	80,000 Miles
09 Regulatory Vehicles	4 Years	85,000 Miles
12 Facility Vehicles	12 Years	N/A
13 Compact SUV	6 Years	80,000 Miles
18 Miscellaneous Trucks	12 Years	N/A
22 Tandem Axle Snow Plow Truck	15 Years	N/A

State Fleet consistently evaluates the depreciation (replacement years) to determine if changes should be made.

COVID INFO

- Initial expansion of telehealth capacity and retained limited in-person care
- Maintained crisis response throughout
- Returned to primarily in-person care in November

Telework Headcount

Pre-COVID	Current
0	6

STATEWIDE POSITIONS

STATEWIDE ALIGNMENT

- Statewide Medical Director
- Statewide Nurse Practitioner
- Psychosocial Rehabilitation Director
- Quality Management and Accreditation Director
- Quality Improvement Manager
- Health Records and Coding Lead
- Medical Coder
- Statewide Telehealth Coordinator*
- Electronic Health Record Operations Specialist*
- Support Professional*

KEY STATEWIDE CONTRACTS

- Centralized Call Center/211
- Solutions Mobile Crisis
- Behavioral Health Inpatient Services
- Clay County Medical Detox
- Employment Extended Services Coordination

SEX OFFENDER TREATMENT CONTRACT

- Contract established March 2019
- Provides for Sex Offender Assessment and Treatment Services for low-risk adults and adolescents
- 60-79 persons served per month
- Service available to all 8 regions
- All participants offense and revocation free

EXTENDED SERVICES SUPPORTED EMPLOYMENT

Provides state general funds to community rehabilitation providers (CRP) to assist individuals with a qualifying disability (serious mental illness, brain injury, or other disability) to maintain the integrated, competitive, community-based employment or obtain employment if maintaining employment is no longer an option.

EXTENDED SERVICES SUPPORTED EMPLOYMENT FUNDING

- **Current Funding Structure**
  - **$398 per month per client if CRP provides at least 1 hour of service for the month**
    - July 1, 2019 to December 31, 2020
      - Average number of hours provided to clients in a month= **3.3 hours**
    - **Equals to approximately $120.50 per hour**
- **Proposed Funding Structure (Individuals served would not see a change in service)**
  - Change $398 month per individual served to match the 1915i Medicaid rate of $41.96 per hour for same service to be provided (if this was to occur with current numbers this would decrease the payout by 65%)
  - 3rd party payer source would not be Statewide HSC State General Funds
    - Medicaid and Medicaid Expansion would be the 3rd Party Payor source for the CRP to provide same exact service. About 57% of clients using State General Funds would be shifted to 1915i services qualifying for Medicaid and Medicaid Expansions funds.

House Bill 1012 #5008
House Appropriations
Representative Nelson, Chairman

Substance Use Disorder Voucher Overview

Pamela Sagness, Director

SUD Voucher

Goal: improve access to quality substance use disorder treatment services and allow for individual choice, by providing reimbursement where other third-party reimbursement is not available.

- Initiated during 2015 legislative session (NDCC 50-06-42)
- Began serving individuals in 2016

Since 2016, approximately 4,200 individuals have received services through the SUD Voucher.

Twenty-one providers are providing voucher services.

Timeline of Changes/Expansion

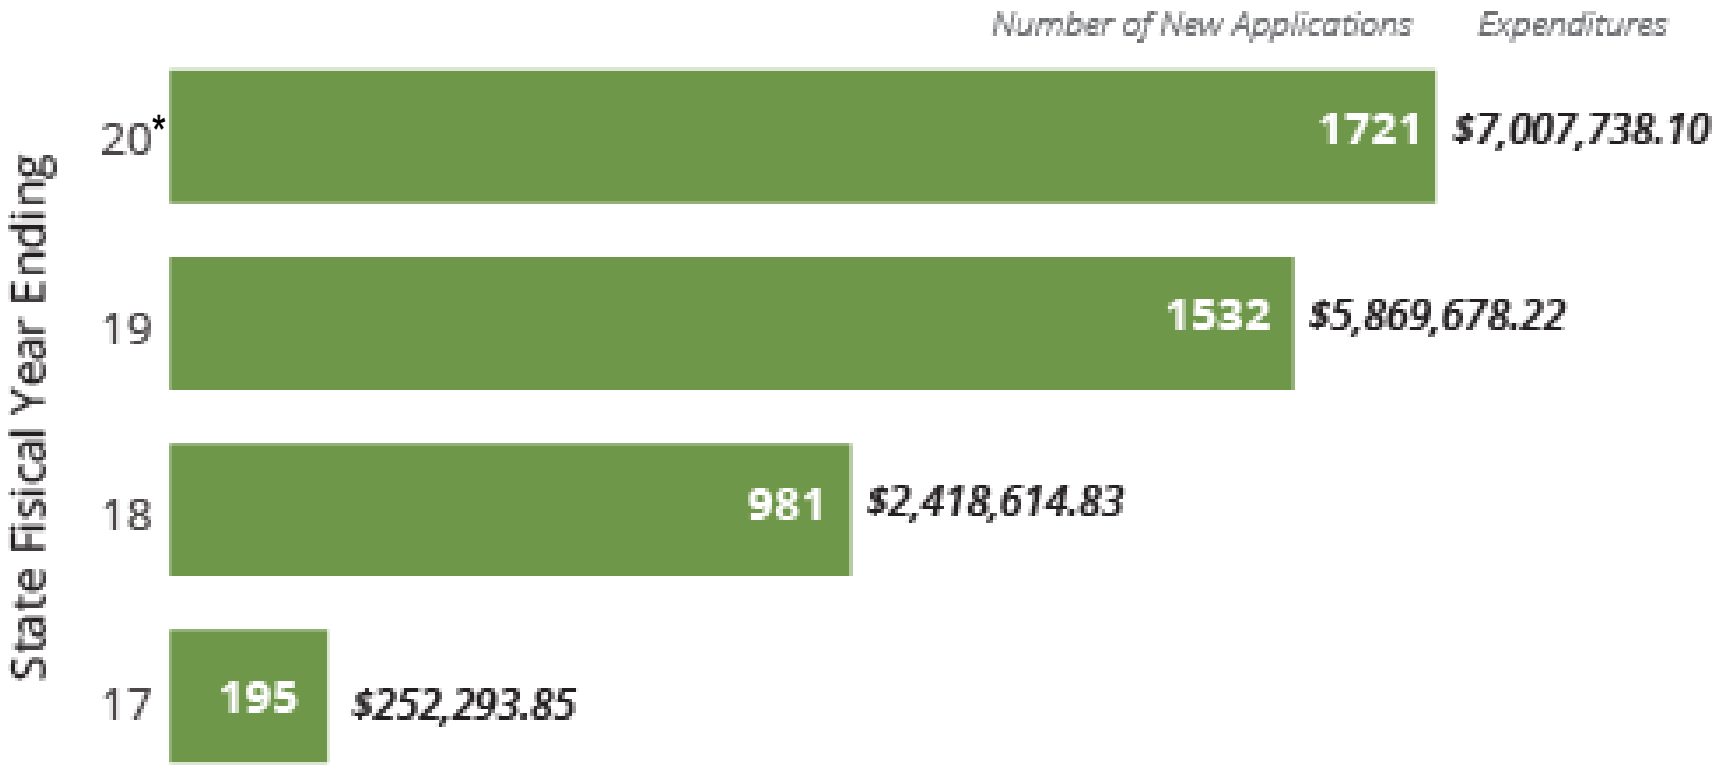
65th Legislative Session (2017)

Methadone maintenance was added as a covered service, effective July 1, 2017 **(HB 1012)**

66th Legislative Session (2019)

Providers who access the SUD Voucher were **expanded to public agencies** (i.e., public health and tribal agencies) who hold a substance abuse treatment program license - not including Human Service Centers. **(HB 1105)**

Eligibility age was changed from 18 to 14 years old, effective July 1, 2020. **(SB 2175)**



67th Legislative Session (2021)

House Bill 1402 is **proposed to include out of state providers within 5 miles of the North Dakota boarder** to access the SUD Voucher for North Dakota citizens

Appropriation and Expenditures

	2015-2017	2017-2019	2019-2021
Total Budget	$575,000	$4,917,087	$7,997,294
Amount Expended	$252,293.85	$8,288,293.05	$9,646,815.76 (as of Dec. 11, 2020)

Program Participant Growth and Expenditures

*New applications closed July 1, 2020.

2019-2021 Appropriation Update

	As of July 3, 2020	As of Dec. 11, 2020
Amount expended	$7,007,738.10	$9,646,815.76
Pending invoices	$1,125,508.45	$184,539.05
Remaining prior authorization	$10,558,630.11	$1,596,410.07*

**As of February 1, 2021*

Exhausted Appropriation

2019-2021 Appropriation: $7,997,294

CURRENT INDIVIDUALS

- Continue to be covered by their voucher and no interruption to their care and medically necessary services should occur.

NEW INDIVIDUALS

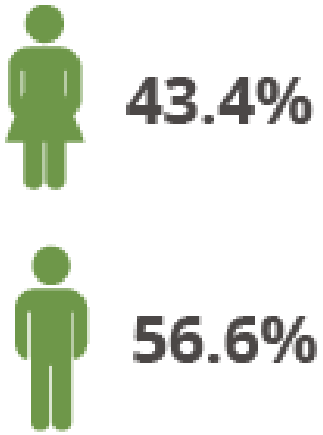
- Applications not considered for approval after 5pm on June 30, 2020.

NEW PROVIDERS

- Applications not considered for approval after 5pm on June 30, 2020.

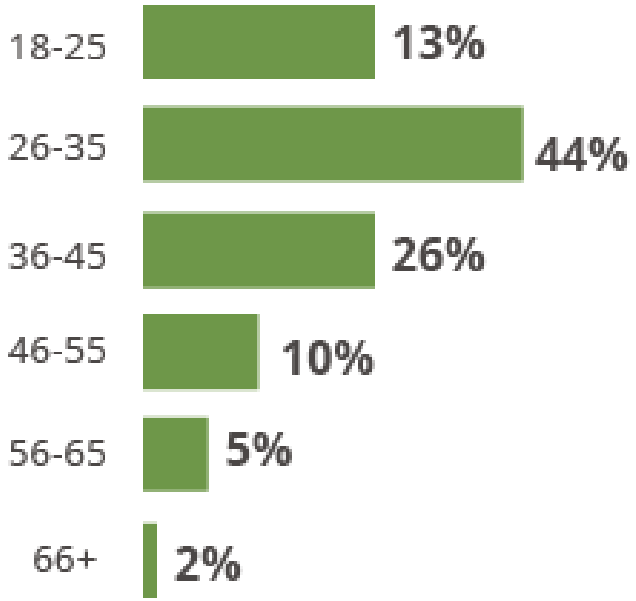
Community-based Behavioral Health Program

Coronavirus Relief Funds (CRF)



- On Friday, October 23, 2020 the North Dakota Emergency Commission approved an allocation of $1.7 million of the Coronavirus Relief Fund (CRF) for community-based behavioral health services.
- This request was reviewed and provided final approved by the Budget Section on October 28, 2020.
- Ends June 30, 2021.

By providing community-based behavioral health services to individuals in their homes and community the state can reduce the need for individuals to enter congregate settings such as residential treatment facilities, inpatient hospitalization, and avoiding the need for emergency department interventions.



Participant Demographics

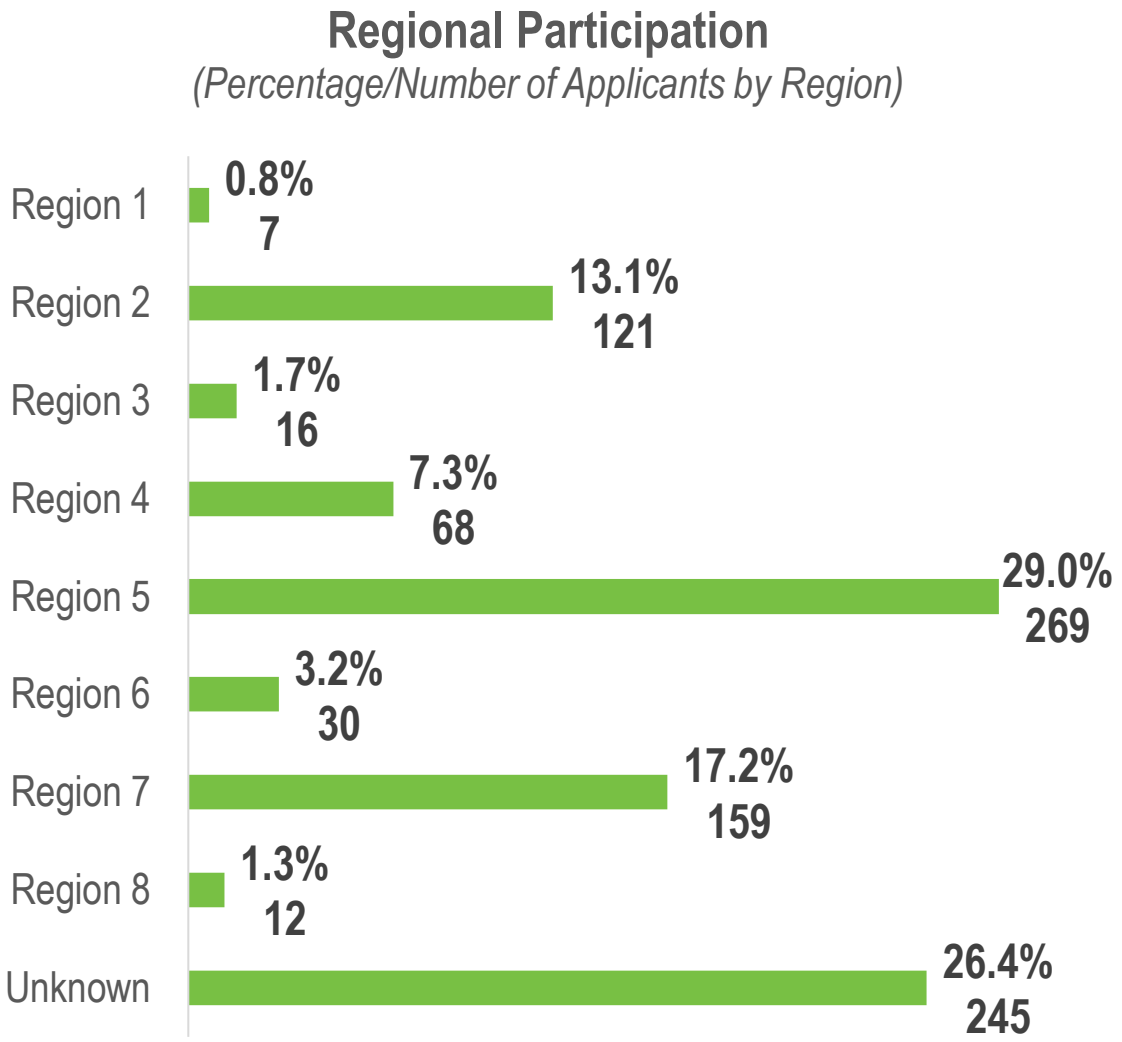
From July 1, 2019 through Sept. 30, 2020, approximately 2,296 individuals have received services.

Gender

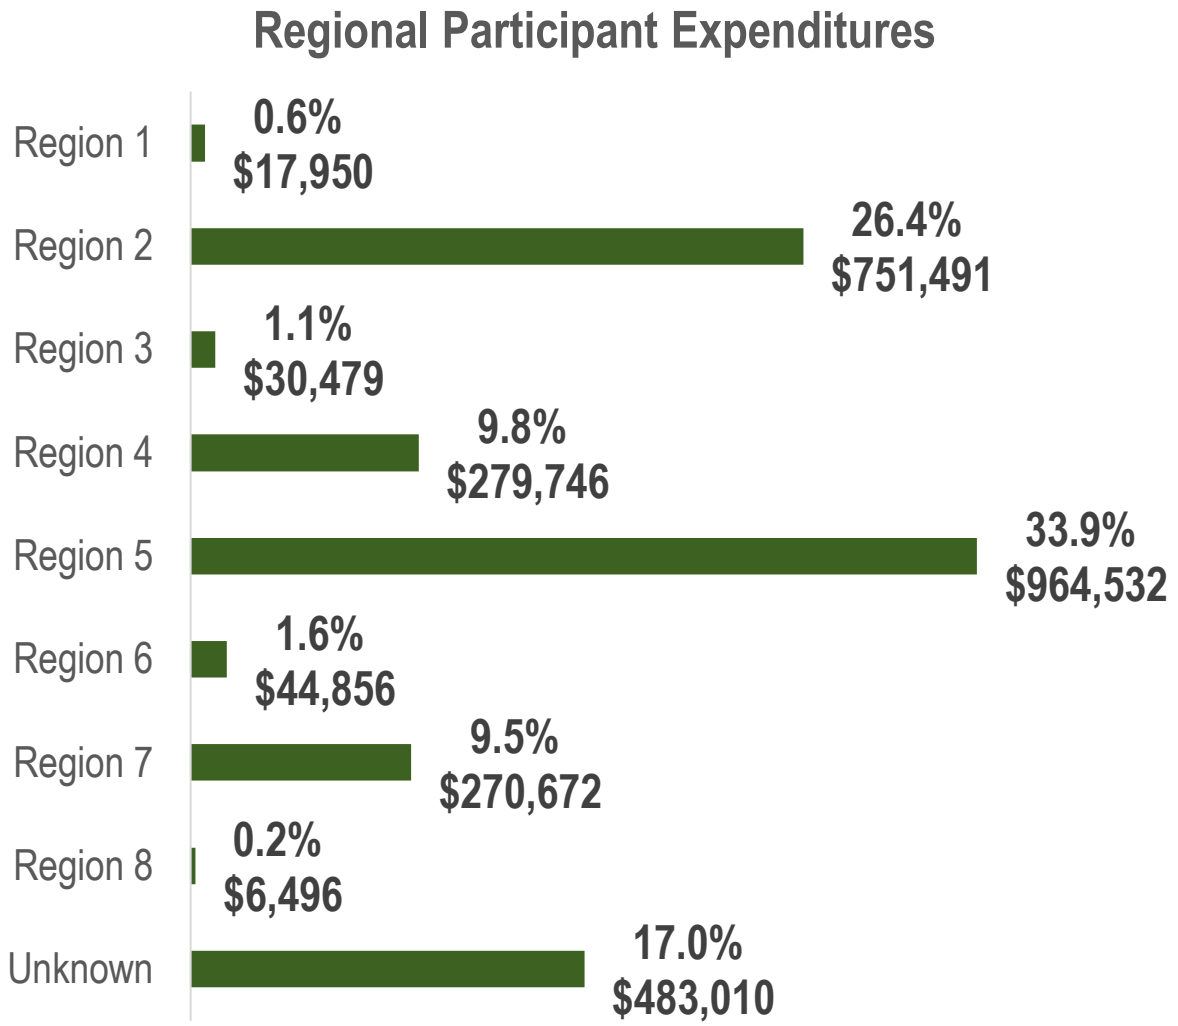
Age

Race

- White - **73%**
- American Indian or Alaska Native - **19%**
- Black or African American - **5%**
- Hispanic or Latino - **3%**
- More than one race reported - **3%**



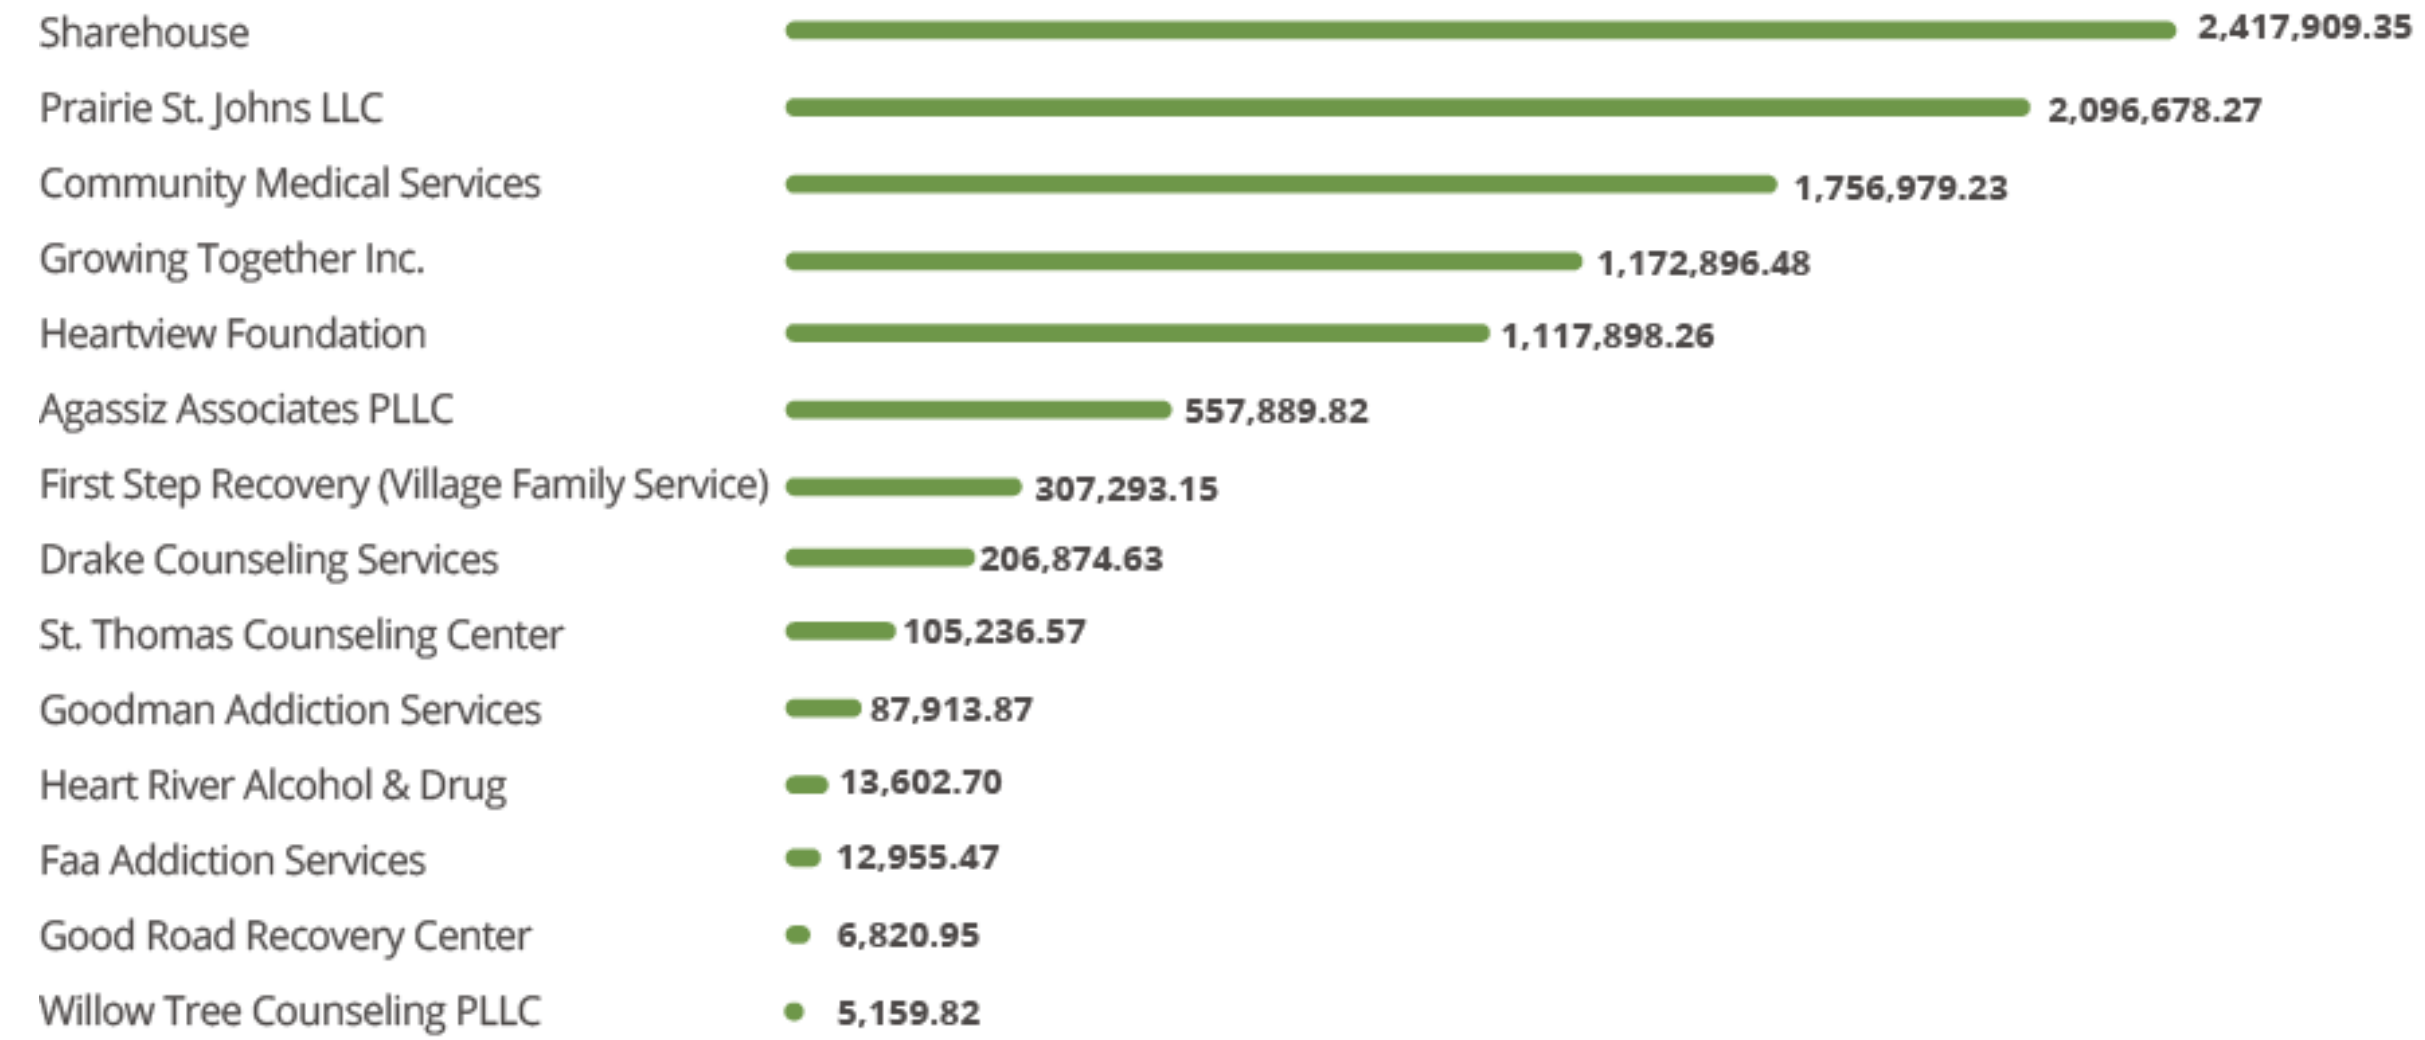
Native Hawaiian or Other Pacific Islander - **0%**



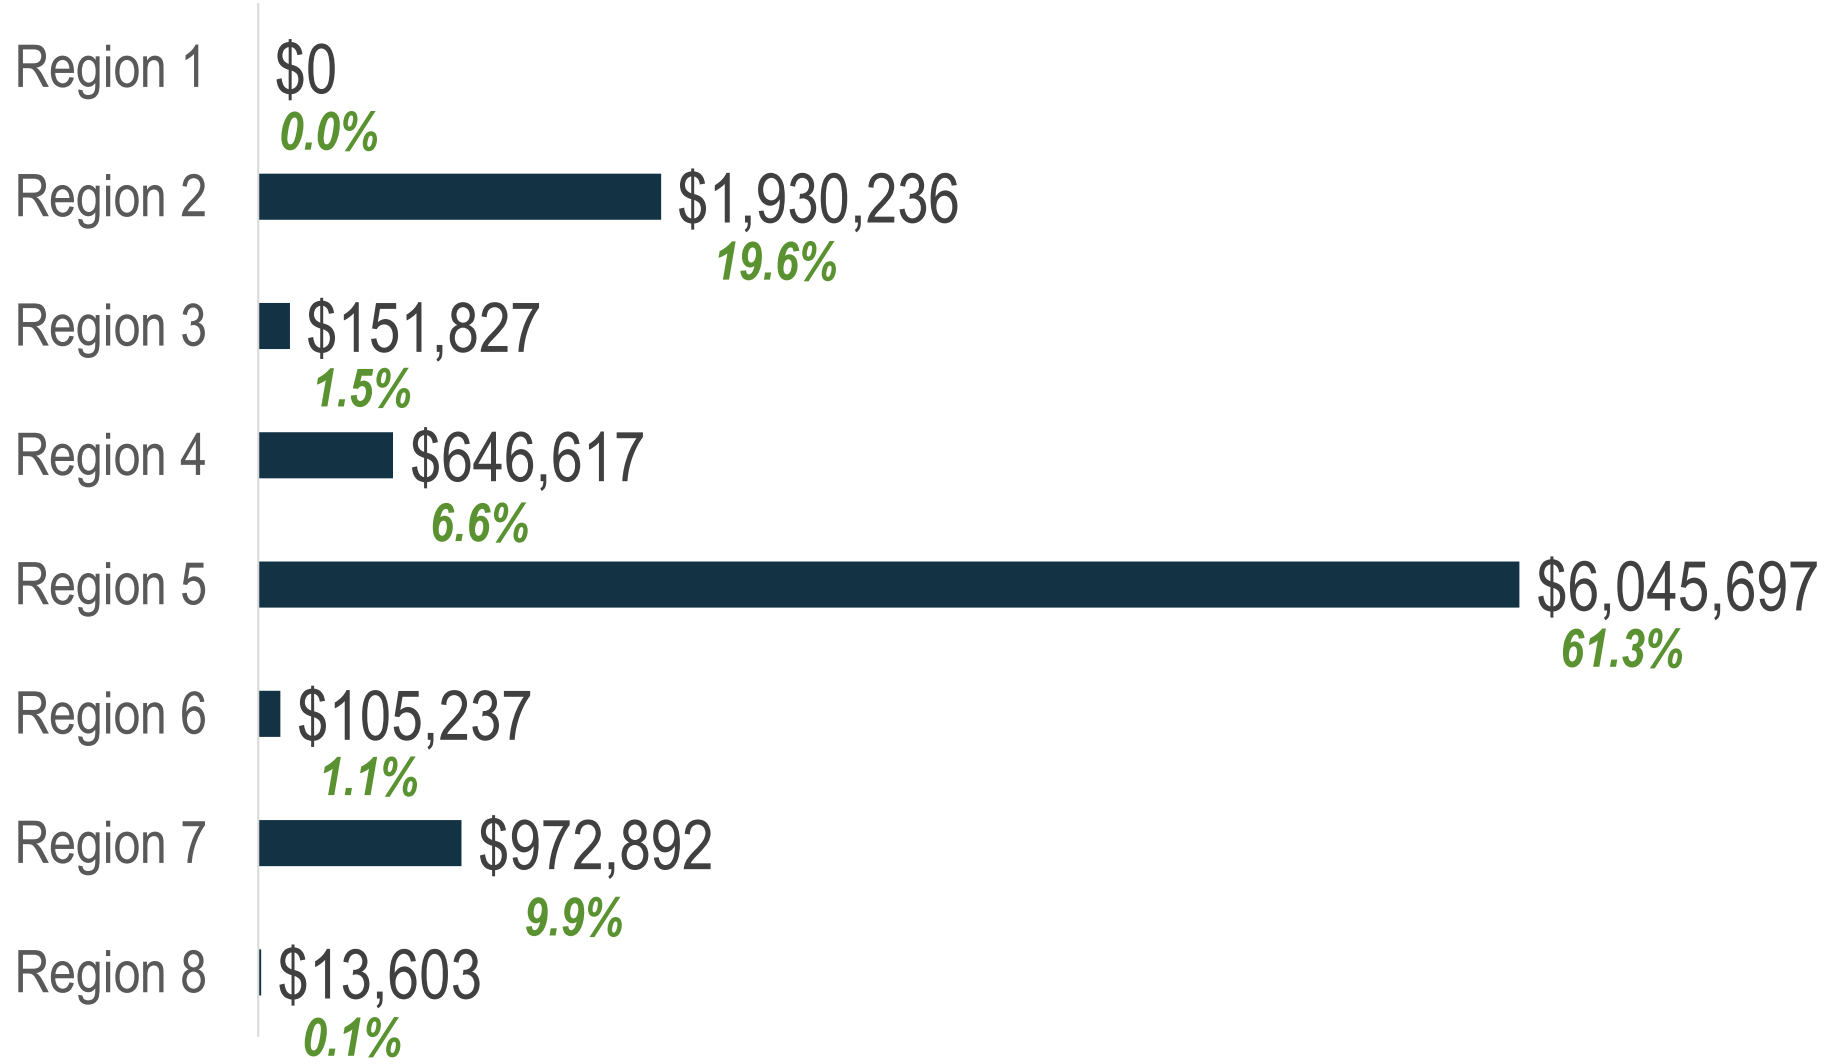
Asian - **0%**

Prefer not to answer - **0%**

6 Month Snapshot: Regional Participation and Expenditures

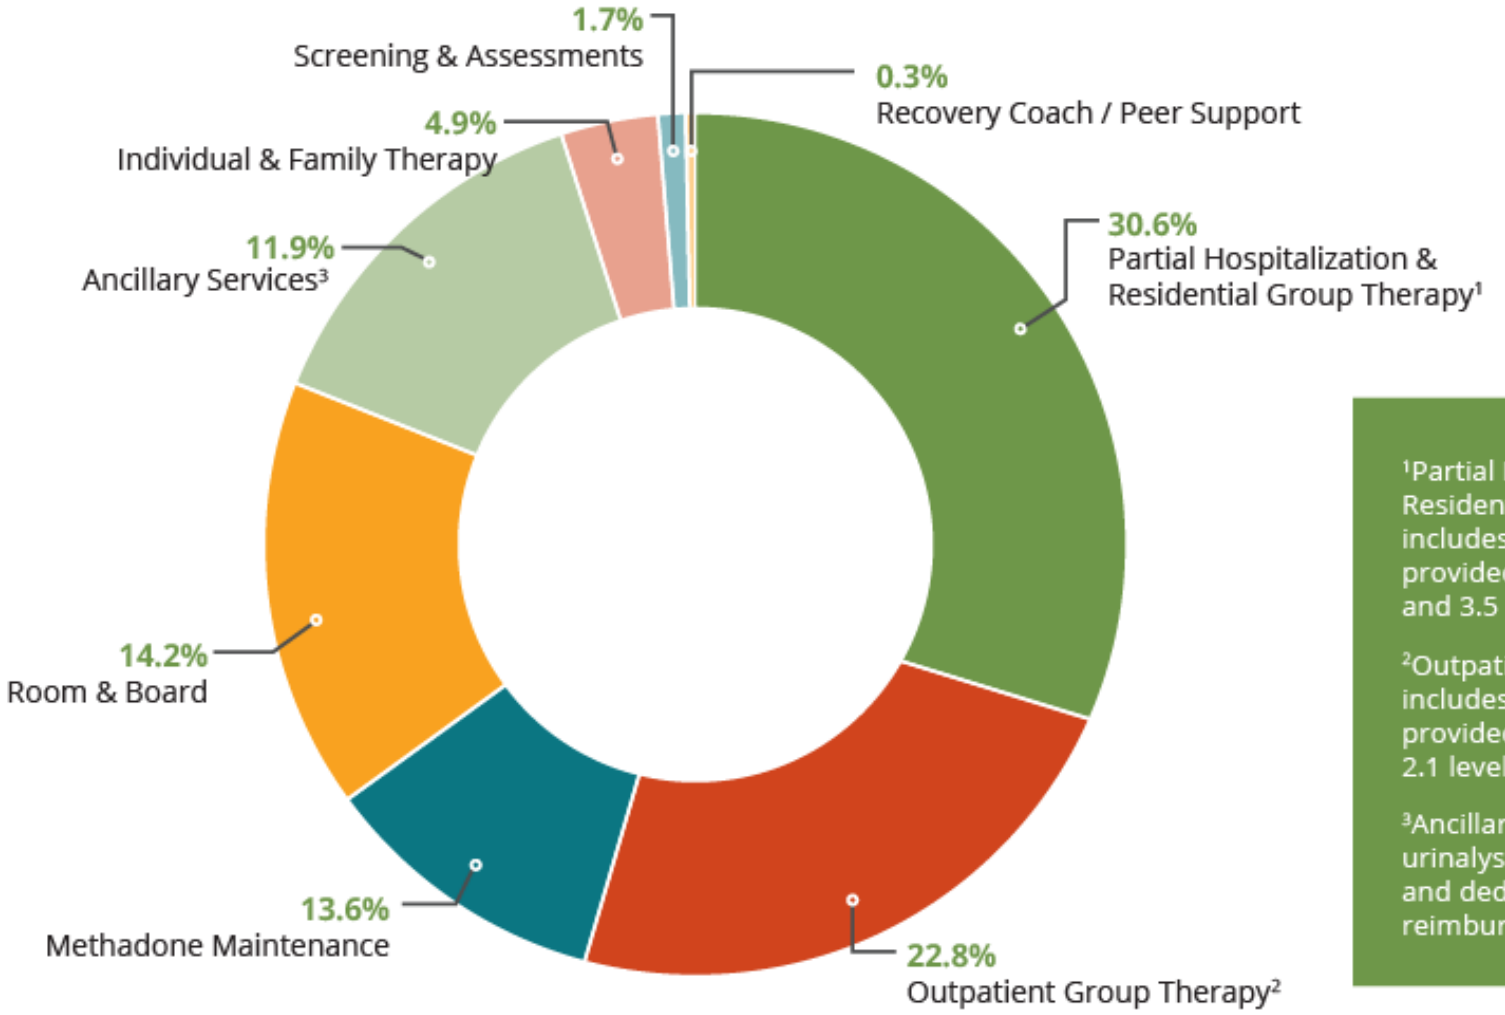


Applicants approved from February 2020 to August 2020



Total Voucher Reimbursements by Provider

The data below describes provider reimbursements from July 1, 2019 through December 11, 2020 ($9,866,108.57). Cumulative refunds received during this time totaled $219,292.81 for a net expenditure of $9,646,815.76.



Regional Provider Reimbursements

July 1, 2019 – December 11, 2020

Expenditures by Service Type

Percentage of expenditures by service type from February 6, 2020 through December 11, 2020.

[1]Partial Hospitalization and Residential Group Therapy includes therapy services provided in the ASAM 2.5 and 3.5 levels of care

[2]Outpatient Group Therapy includes therapy services provided in the ASAM 1 and 2.1 levels of care

[3]Ancillary Services includes urinalysis, transportation, and deductible/copayment reimbursements

Since inception, all outcomes increased following services reimbursed through the SUD Voucher program.

PURPOSE

Identify the extent to which the individual participates in meaningful daily activities (employment, school, volunteering, family caretaking, other activities, etc.).

Average Outcome Scores Over Time

HEALTH

Identify how well the individual makes informed healthy choices supporting their physical health and emotional wellbeing (physical activity, attending medical appointments, taking medications as prescribed etc.)

Average Outcome Scores Over Time

COMMUNITY

Identify the extent to which the individual's relationships and social networks provide support, friendship, love, and hope for overall wellbeing.

Average Outcome Scores Over Time

HOME

Identify the stability and safety of the individual's living environment.

Average Outcome Scores Over Time

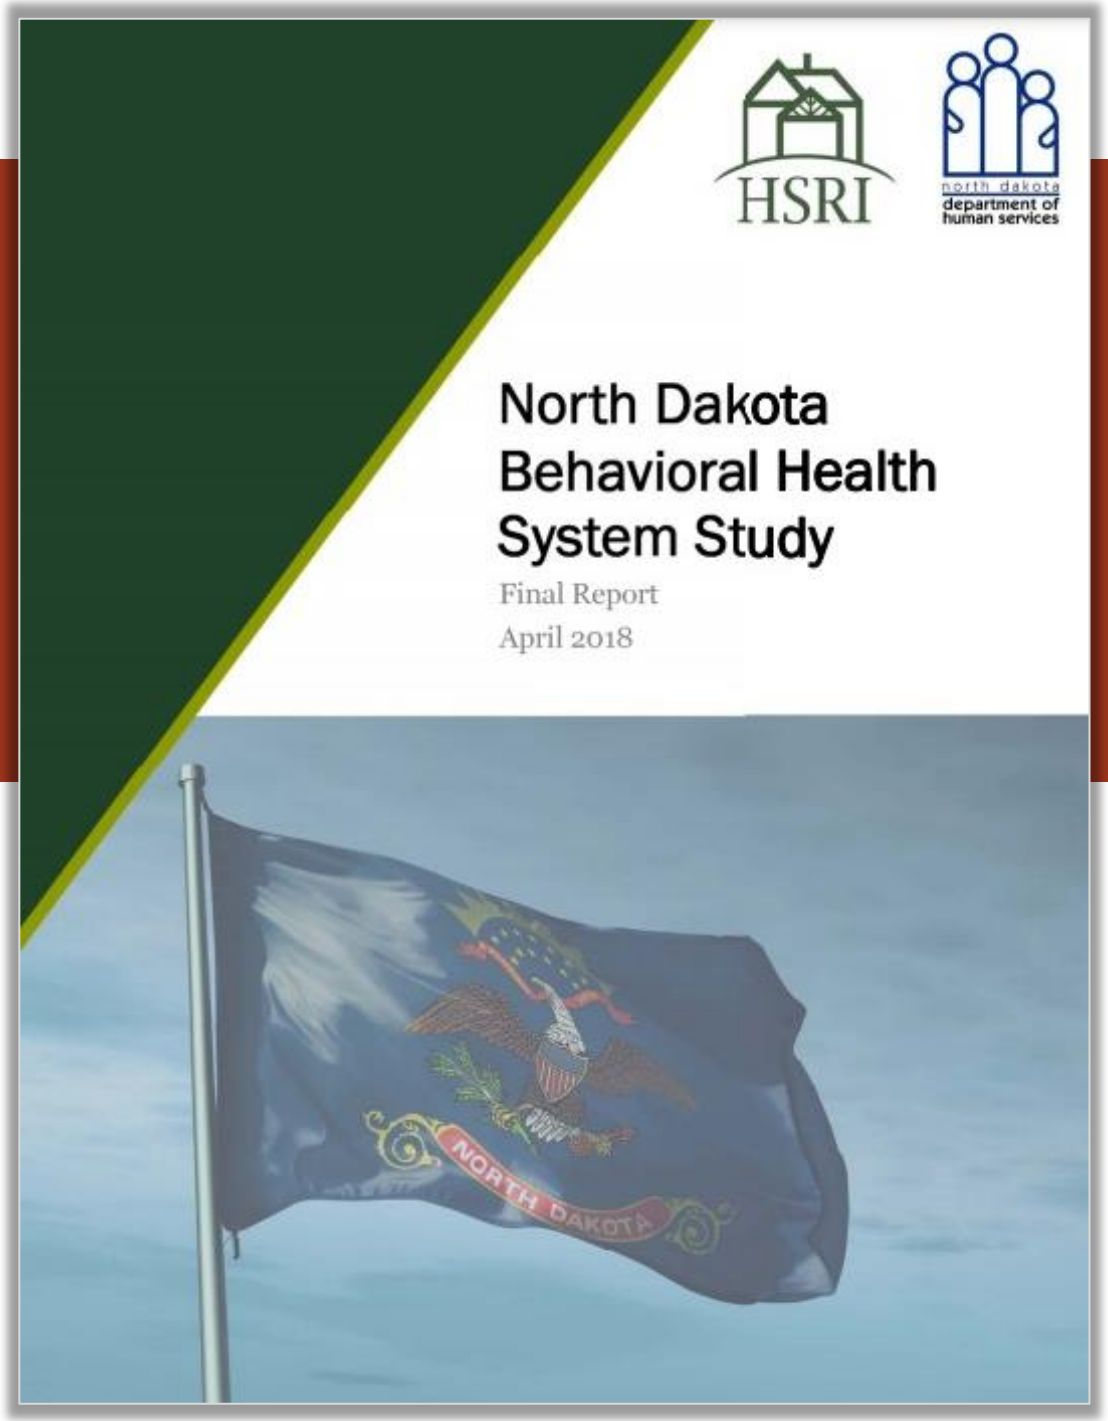
House Bill 1012 #5010
House Appropriations
Representative Nelson, Chairman

1915i State Plan Amendment Overview

Pamela Sagness, Director

What is Behavioral Health?



A state of mental/emotional being and/or choices and actions that affect **WELLNESS**.

ROADMAP

The Behavioral Health Systems Study, April 2018

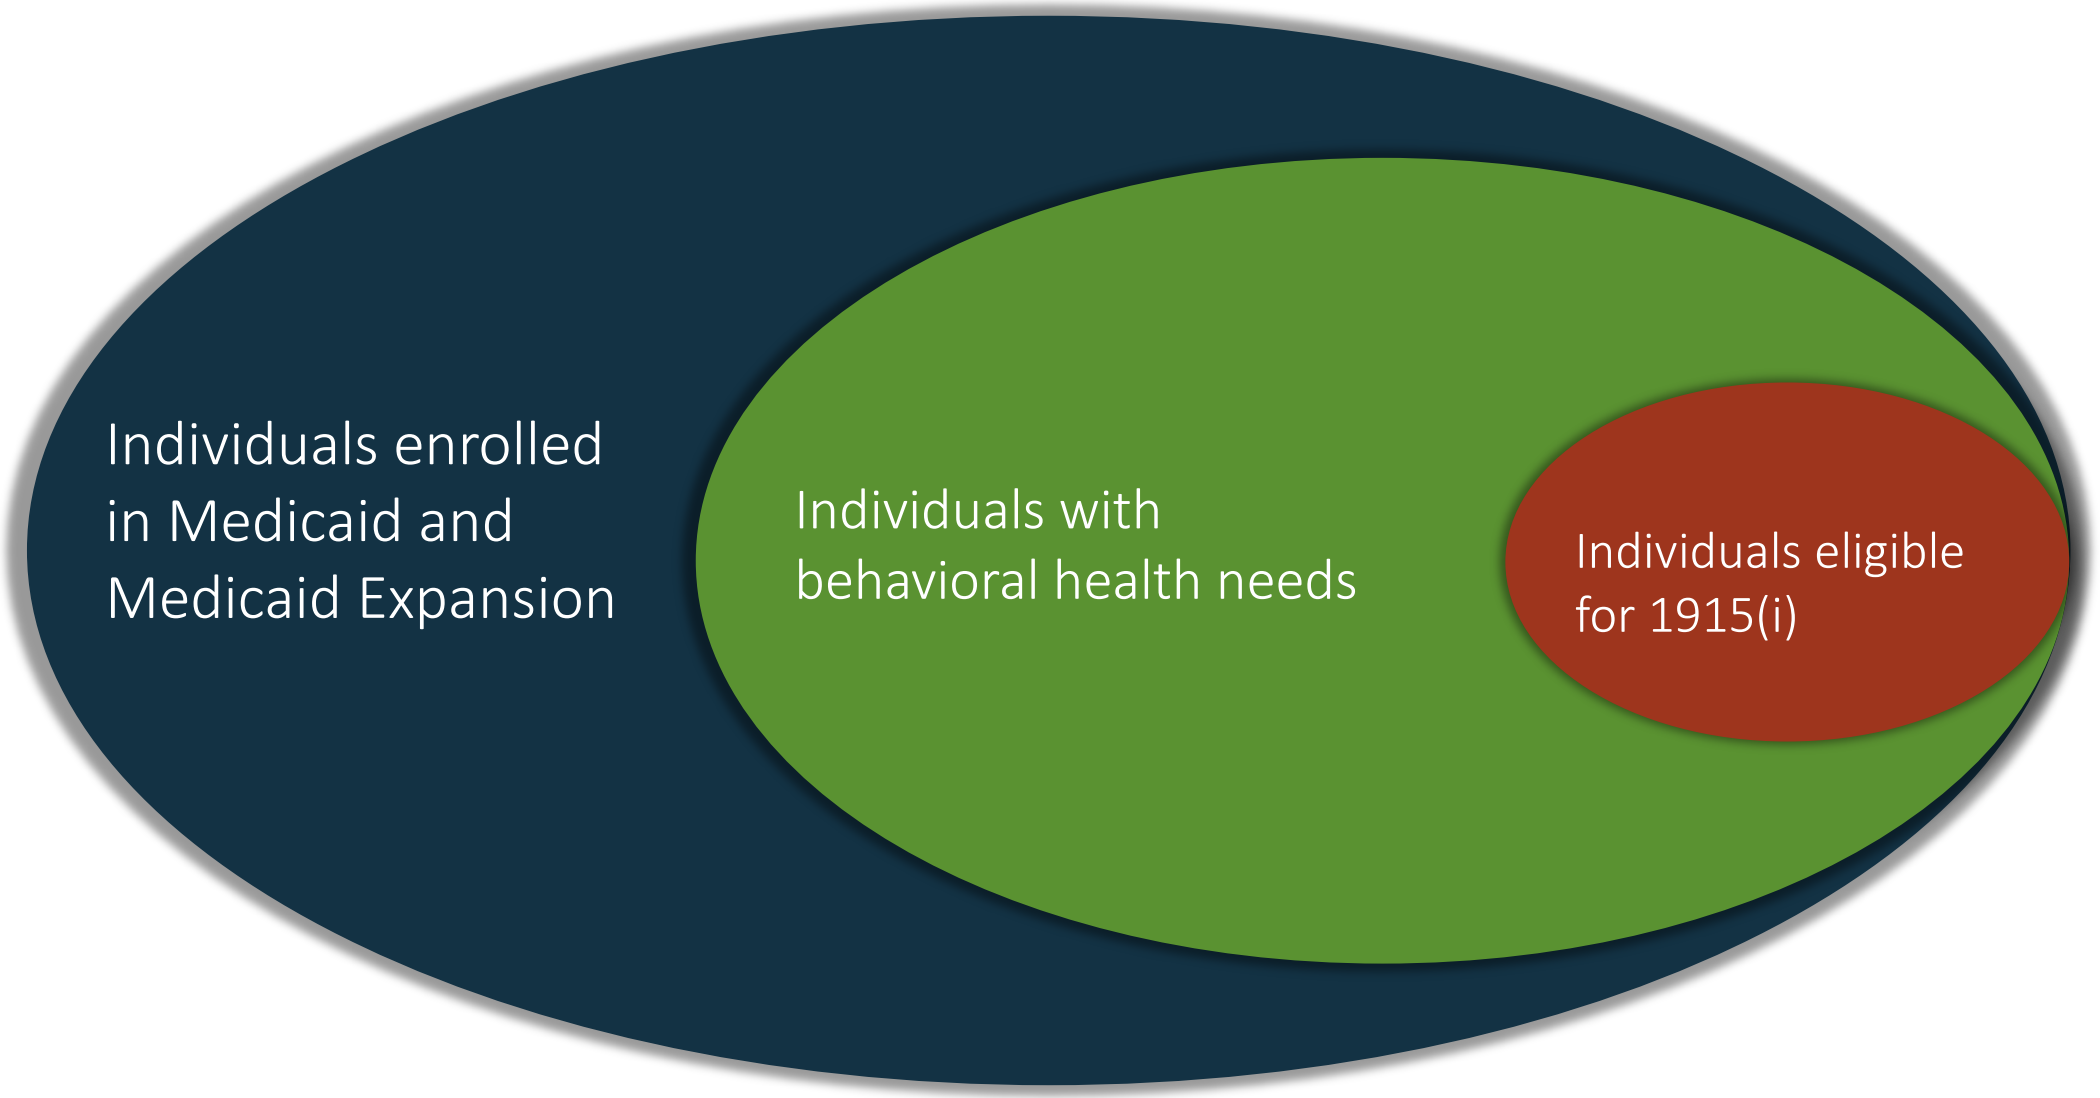
The implementation of the Medicaid 1915(i) State Plan Amendment aligns with the 2018 North Dakota Behavioral Health System Study recommendation **12.2: Pursue 1915(i) Medicaid state plan amendments**.

Benefits of 1915(i)

Consumers

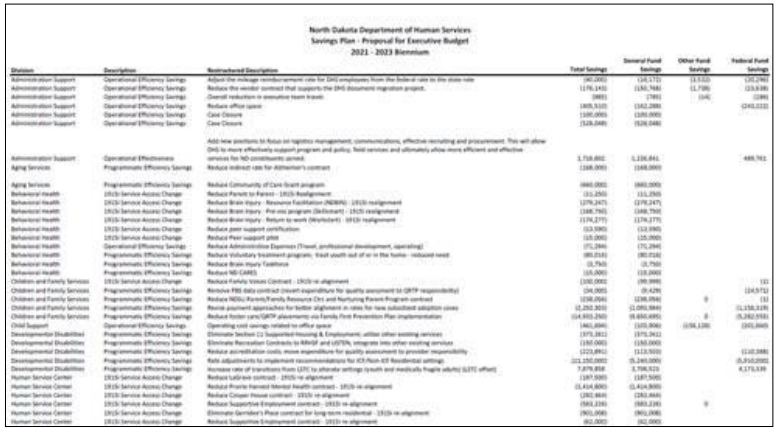
Services available closer to home and are specifically targeted to need

Behavioral Health Professionals



Opportunities to expand workforce through non-traditional behavioral health professionals and improve access in rural areas expands workforce

Private Providers



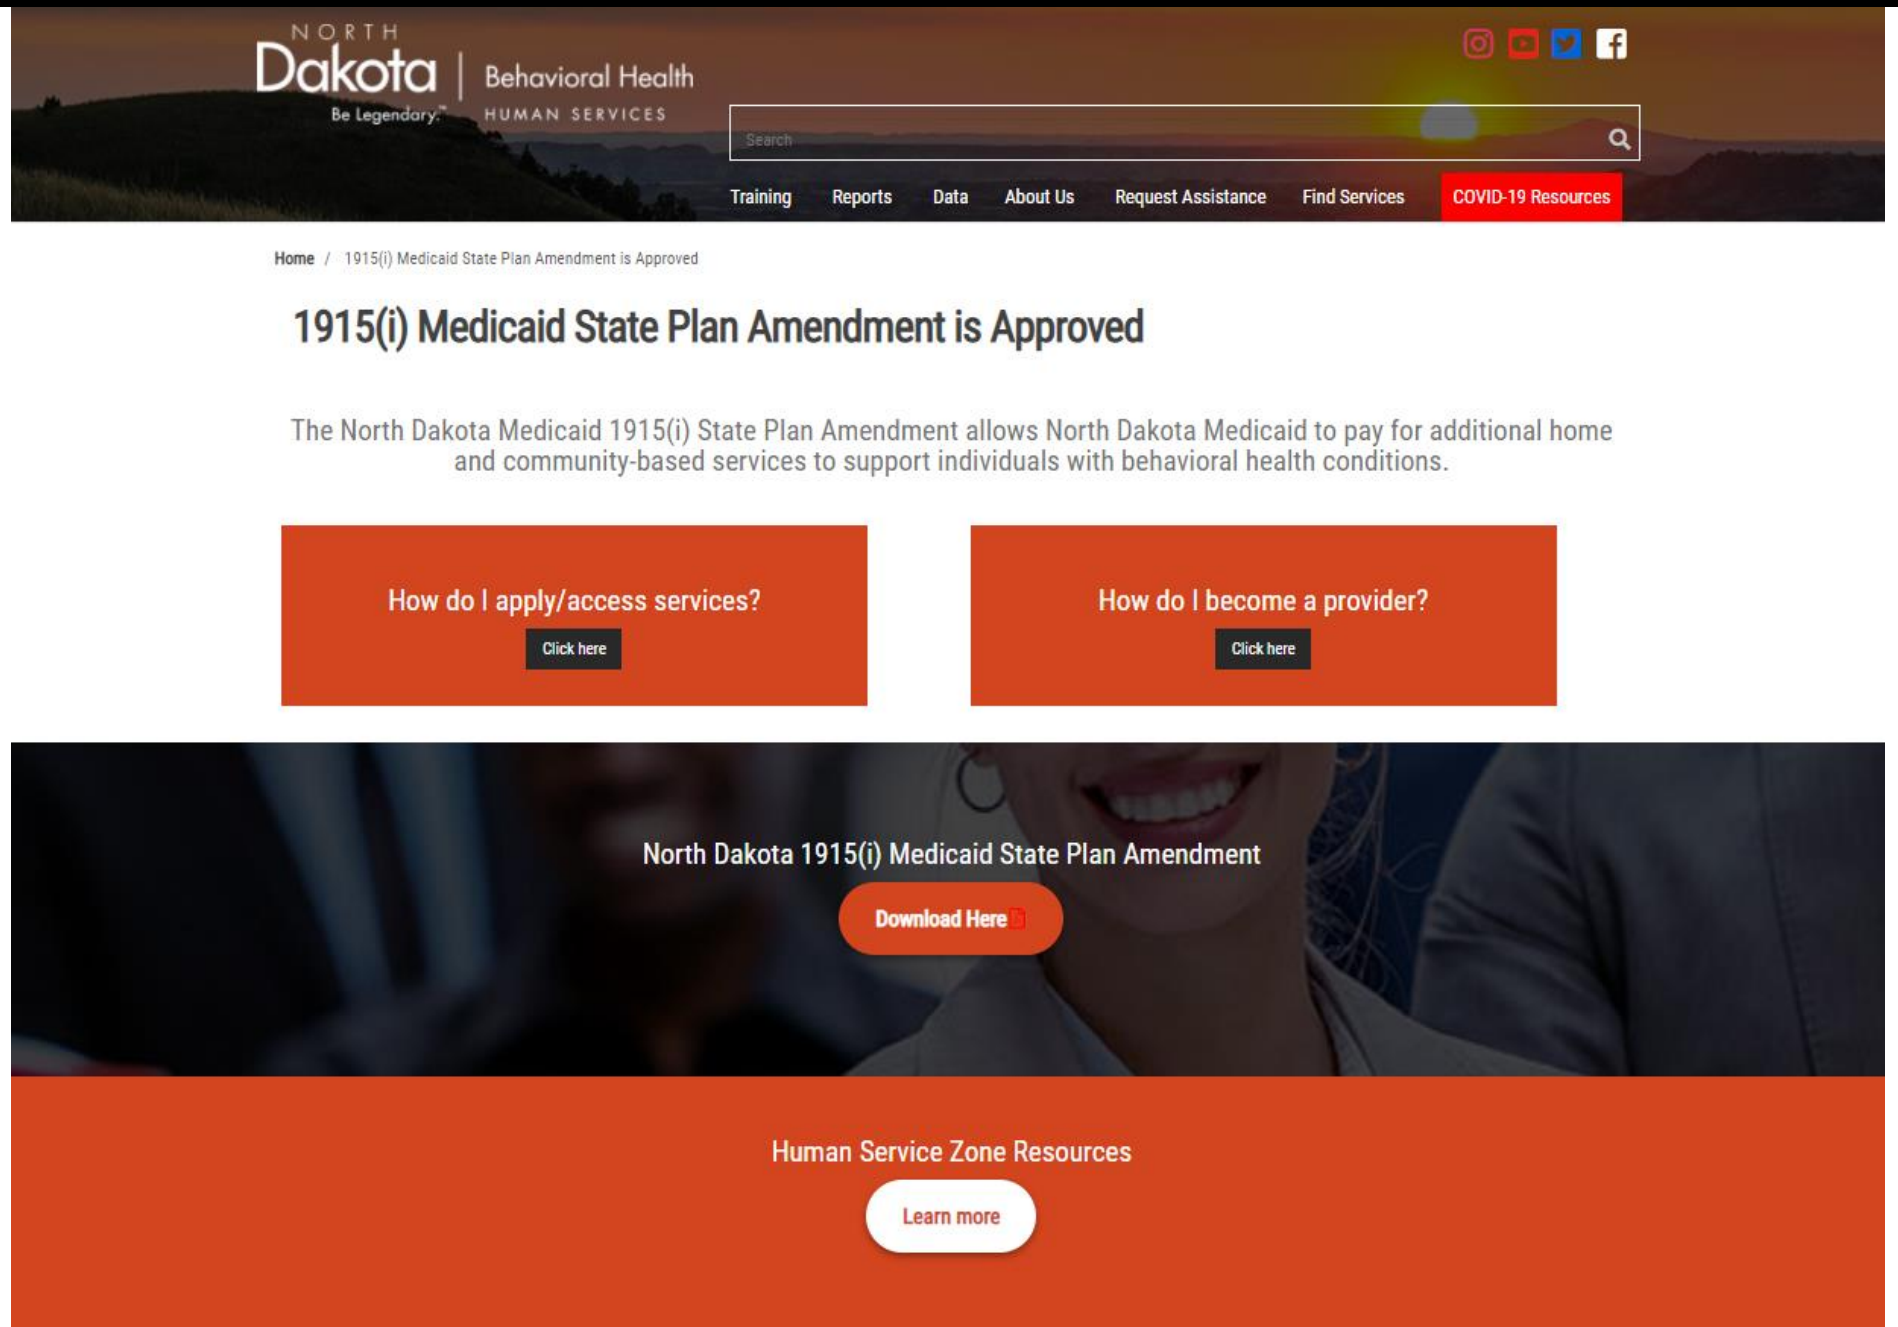
Opportunities to bill for new services, expanding services and increasing revenue

Population Served

Budget Considerations

- 1915(i) is in DHS Medical Services Budget
- See handout for DHS Savings Plan related to the 1915(i)

North Dakota Department of Human Services
Savings Plan - Proposal for Executive Budget
2021 - 2023 Biennium



Division	Description	Restructured Description	Total Savings	General Fund Savings	Other Fund Savings	Federal Fund Savings
Administration Support	Operational Efficiency Savings	Adjust the mileage reimbursement rate for DHS employees from the federal rate to the state rate	(40,000)	(16,172)	(3,532)	(20,296)
Administration Support	Operational Efficiency Savings	Reduce the vendor contract that supports the DHS document migration project.	(179,141)	(150,768)	(1,739)	(23,634)
Administration Support	Operational Efficiency Savings	Overall reduction in executive team travel	(985)	(785)	(14)	(186)
Administration Support	Operational Efficiency Savings	Reduce office space	(305,510)	(162,288)		(143,222)
Administration Support	Operational Efficiency Savings	Case Closure	(100,000)	(100,000)		
Administration Support	Operational Efficiency Savings	Case Closure	(528,048)	(528,048)		
Administration Support	Operational Effectiveness	Add new positions to focus on logistics management, communications, effective recruiting and procurement. This will allow DHS to more effectively support program and policy, field services and ultimately allow more efficient and effective services for ND constituents served.	1,718,892	1,226,841		489,761
Aging Services	Programmatic Efficiency Savings	Reduce indirect rate for Alzheimer's contract	(168,000)	(168,000)		
Aging Services	Programmatic Efficiency Savings	Reduce Community of Care Grant program	(660,000)	(660,000)		
Behavioral Health	1915i Service Access Change	Reduce Parent to Parent - 1915i Realignment	(11,250)	(11,250)		
Behavioral Health	1915i Service Access Change	Reduce Brain Injury - Resource Facilitation (NDBIN) - 1915i realignment	(279,247)	(279,247)		
Behavioral Health	1915i Service Access Change	Reduce Brain Injury - Pre-voc program (Skillstart) - 1915i realignment	(168,750)	(168,750)		
Behavioral Health	1915i Service Access Change	Reduce Brain Injury - Return to work (Worksteb) - 1915i realignment	(174,277)	(174,277)		
Behavioral Health	1915i Service Access Change	Reduce peer support certification	(12,090)	(12,090)		
Behavioral Health	1915i Service Access Change	Reduce Peer support pilot	(15,000)	(15,000)		
Behavioral Health	Operational Efficiency Savings	Reduce Administrative Expenses (Travel, professional development, operating)	(71,294)	(71,294)		
Behavioral Health	Programmatic Efficiency Savings	Reduce Voluntary treatment program; treat youth out of or in the home - reduced need	(80,016)	(80,016)		
Behavioral Health	Programmatic Efficiency Savings	Reduce Brain Injury Taskforce	(2,750)	(2,750)		
Behavioral Health	Programmatic Efficiency Savings	Reduce ND CARES	(15,000)	(15,000)		
Children and Family Services	1915i Service Access Change	Reduce Family Voices Contract - 1915i re-alignment	(100,000)	(99,999)		(1)
Children and Family Services	Programmatic Efficiency Savings	Remove PBS data contract (novel expenditure for quality assurance) to QRTP responsibility	(14,000)	(8,429)		(14,571)
Children and Family Services	Programmatic Efficiency Savings	Reduce NDSU Parent/Family Resource Ctrs and Nurturing Parent Program contract	(238,056)	(238,056)	0	(1)
Children and Family Services	Programmatic Efficiency Savings	Revise payment approaches for better alignment in rates for new subsidized adoption cases	(2,292,303)	(1,091,984)		(1,158,319)
Children and Family Services	Programmatic Efficiency Savings	Reduce foster care/QRTP placements via Family First Prevention Plan implementation	(14,931,250)	(9,650,495)	0	(5,282,555)
Child Support	Operational Efficiency Savings	Operating cost savings related to office space	(461,694)	(370,906)	(158,128)	(101,660)
Developmental Disabilities	Programmatic Efficiency Savings	Eliminate Section 11 Supported Housing & Employment; utilize other existing services	(373,381)	(373,341)		
Developmental Disabilities	Programmatic Efficiency Savings	Eliminate Recreation Contracts to MHSF and USTN; integrate into other existing services	(150,000)	(150,000)		
Developmental Disabilities	Programmatic Efficiency Savings	Reduce accreditation costs; move expenditure for quality assessment to provider responsibility	(122,891)	(113,503)		(110,388)
Developmental Disabilities	Programmatic Efficiency Savings	Rate adjustments to implement recommendations for ICF/Non-ICF Residential settings	(11,150,000)	(5,240,000)		(5,910,000)
Developmental Disabilities	Programmatic Efficiency Savings	Increase rate of transitions from LTFC to alternate settings (youth and medically fragile adults) (LTFC offset)	7,879,858	3,708,321		4,171,539
Human Service Center	1915i Service Access Change	Reduce LaGrave contract - 1915i re-alignment	(187,500)	(187,500)		
Human Service Center	1915i Service Access Change	Reduce Prairie Harvest Mental Health contract - 1915i re-alignment	(1,414,800)	(1,414,800)		
Human Service Center	1915i Service Access Change	Reduce Cooper House contract - 1915i re-alignment	(261,864)	(261,864)		
Human Service Center	1915i Service Access Change	Reduce Supportive Employment contract - 1915i re-alignment	(563,235)	(385,236)	0	
Human Service Center	1915i Service Access Change	Eliminate Gerrider's Place contract for long-term residential - 1915i re-alignment	(901,008)	(901,008)		
Human Service Center	1915i Service Access Change	Reduce Supportive Employment contract - 1915i re-alignment	(62,000)	(62,000)		

- Opportunities for Private Providers to adopt a business model change

Representative Jon Nelson, Chairman

WORLD HEALTH ORGANIZATION DISABILITY ASSESSMENT SCALE (WHODAS)

Rosalie Etherington, Chief Clinics Director, State Hospital Superintendent

NORTH Dakota | Human Services

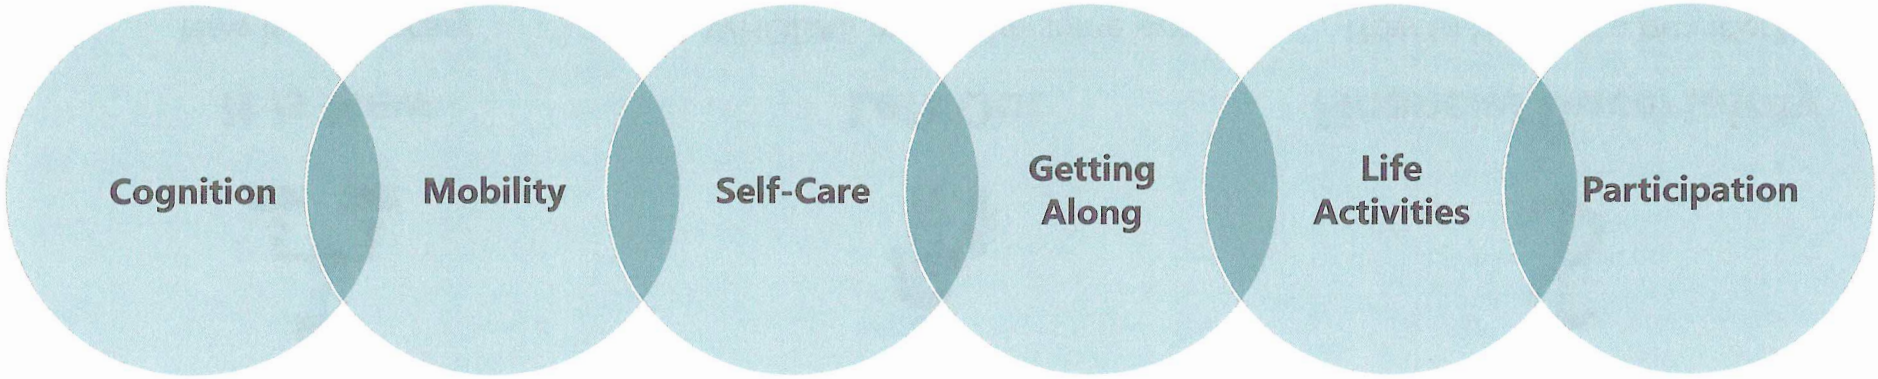
Be Legendary.™

WHODAS (WORLD HEALTH ORGANIZATION DISABILITY ASSESSMENT SCALE)

WHAT IT IS

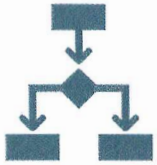
Generic assessment for measuring health and disability across all of medicine and healthcare

WHY USE IT



Excellent measurement precision for all medical and behavioral health disorders across age groups and cultures

Simple, fast, and freely available



WHY DIAGNOSIS ISN'T ENOUGH

A disorder fails to predict service need, treatment outcome, work performance, or social integration

WHODAS – What it Measures?

Why Does it Seem So Hard?

It is New

New is often scary

New things takes practice

What if the WHODAS is wrong?

Left Out

WHODAS may leave some out

What if a person doesn't quality?

Financial Uncertainty

How to become a provider?

Will Medicaid pay?

Will it be enough?

STRATEGY

1915(i) Home and Community-Based Behavioral Health Services

NORTH Dakota | Human Services
Be Legendary.

The 1915(i) Medicaid State Plan Amendment allows North Dakota Medicaid to pay for additional home and community-based services to support children and adults with behavioral health conditions which substantially interfere with their ability to function in the family, school, or community. This document provides responses to questions that have been raised about the program.

Medicaid-Related Questions and Responses

Question/Concern	Response
Why can't the same service provider deliver 1915(i) care coordination as well as other 1915(i) services?	Section 1915(i) of the Social Security Act requires the state to establish standards for conducting independent assessments to safeguard against conflicts of interest. The independent assessment is conducted as part of the care planning process. The assessment is intended to be separate from service provision to maintain the integrity of the process. In counties where the participant lives that are designated as mental health professional shortage areas, the same service provider may deliver multiple 1915(i) services. However, in counties without this designation (Burleigh, Cass, Grand Forks and Morton), the participant must choose a different provider for care coordination than for other 1915(i) services. The Department of Human Services requested that the same provider be able to deliver all 1915(i) services, regardless of the county, but the Centers for Medicare and Medicaid Services (CMS) did not approve the request.
Which Medicaid category of eligibility groups can qualify for 1915(i) services?	All category of eligibility groups may qualify to receive 1915(i) services, including those who qualify for Medicaid through a 1915(c) waiver.
What resources are available to assist new Medicaid providers with enrollment and billing processes?	North Dakota Medicaid has training and resources specific to 1915(i) providers on its website at http://behavioralhealth.nd.gov/1915i. Once providers are enrolled, claim submission templates can be set up in the Medicaid Management Information System (MMIS) web portal, which makes it easier for providers to submit claims for services they have delivered.
Why can't the 1915(i) program be geared towards preventing	The 1915(i) program is designed to serve individuals with intense behavioral health needs in their homes and communities to prevent them from needing institutional services including hospitals and psychiatric residential treatment facilities. Children who do not qualify for 1915(i) services can receive prevention, screening, diagnosis and treatment services through the Early

children from needing intensive services later?	Periodic Screening, Diagnosis and Treatment (EPSDT) program, which is covered for all children through North Dakota Medicaid.
How can we track outcomes and value?	The 1915(i) program requires the State to perform quality assurance and quality control activities. It does not, however, require a formal evaluation of outcomes to determine if goals are reached to decrease inpatient or emergency department services and shift more toward home and community-based services. If the Legislature desires, funds of approximately $150,000 could be included in the program budget to request that our actuary review and analyze service utilization. Since the 1915(i) program will most likely take some time to be fully utilized by our members, a formal program evaluation could be delayed until the next biennium. Finally, North Dakota Medicaid plans to report on all the CMS adult core behavioral health measures in the upcoming biennium. These measures could be used as a proxy to track outcomes and value for the 1915i program.

ND Medicaid 1915i Services Fee Schedule
as of 10/1/2020

Inclusion or exclusion of a procedure code, supply, product, or service does not imply Medicaid coverage, reimbursement, or lack thereof.

Code	Modifier	Description	Medicaid Fee	Rate Methodology
H2015		Care Coordination (per 15 minutes)	$20.40	Rate is equal to the SMI/SED Targeted Case Management rate
H0039	UK	Training and Supports for Unpaid Caregivers (per 15 minutes) [1]	$7.38	Rate is equal to the Skills Integration rate, a service provided under Rehabilitative Services
T2025		Training and Supports for Unpaid Caregivers (per service)	$500.00	
H0038		Peer Support (per 15 minutes)	$7.38	Rate is equal to the Skills Integration rate, a service provided under Rehabilitative Services
H0038	UK	Family Peer Support (per 15 minutes)	$7.38	Rate is equal to the Skills Integration rate, a service provided under Rehabilitative Services
T2027		Respite (per 15 minutes)	$7.31	Rate is equal to the Agency Respite Care rate in the HCBS waiver
T2003		Non-medical transportation; encounter/trip	$13.09	Rate is equal to the round trip rate in the HCBS waiver
T5999		Community Transition Services (per service)	$3,000.00	Rate is equal to the one-time transition amount per individual in the HCBS and DD waivers
H2021	U3	Benefits Planning (per 15 minutes)	$10.49	Rate is equal to the Supported Employment rate in the DD waiver
H2025	U3	Supported Education (per 15 minutes)	$10.49	Rate is equal to the Day Habilitation rate in the DD waiver
H2023		Prevocational Training (per 15 minutes) [1]	$10.49	Rate is equal to the Prevocational Services rate in the DD waiver
H2025	U4	Supported Employment (per 15 minutes)	$10.49	Rate is equal to the Day Habilitation rate in the DD waiver
H2021	U4	Housing Support Services (per 15 minutes)	$10.49	Rate is equal to the Benefits Planning rate

[1] This service can be billed for individual or group setting. If group setting is provided, modifier UA must be appended to the line and reimbursement will be 25% of the allowed amount.

DEVELOPMENTAL DISABILITIES REIMBURSEMENT PROJECT – WHY CHANGE?

Timeline of Project

2009 - legislative session: HB 1517 directed the Department to contract to study the methodology and calculations for the rate setting structure.

- 2009/2010: Burns & Associates studied retrospective system and issued recommendations.

2011 - legislative session: SB 2043 directed the Department to work with DD providers to develop a prospective or related payment system with an independent rate model utilizing the Support Intensity Scale (SIS). Funding appropriated was enough to complete ½ of the work.

- 2011/2012: Steering committee created, consultants began development of component driven compensation structure and assessing clients.

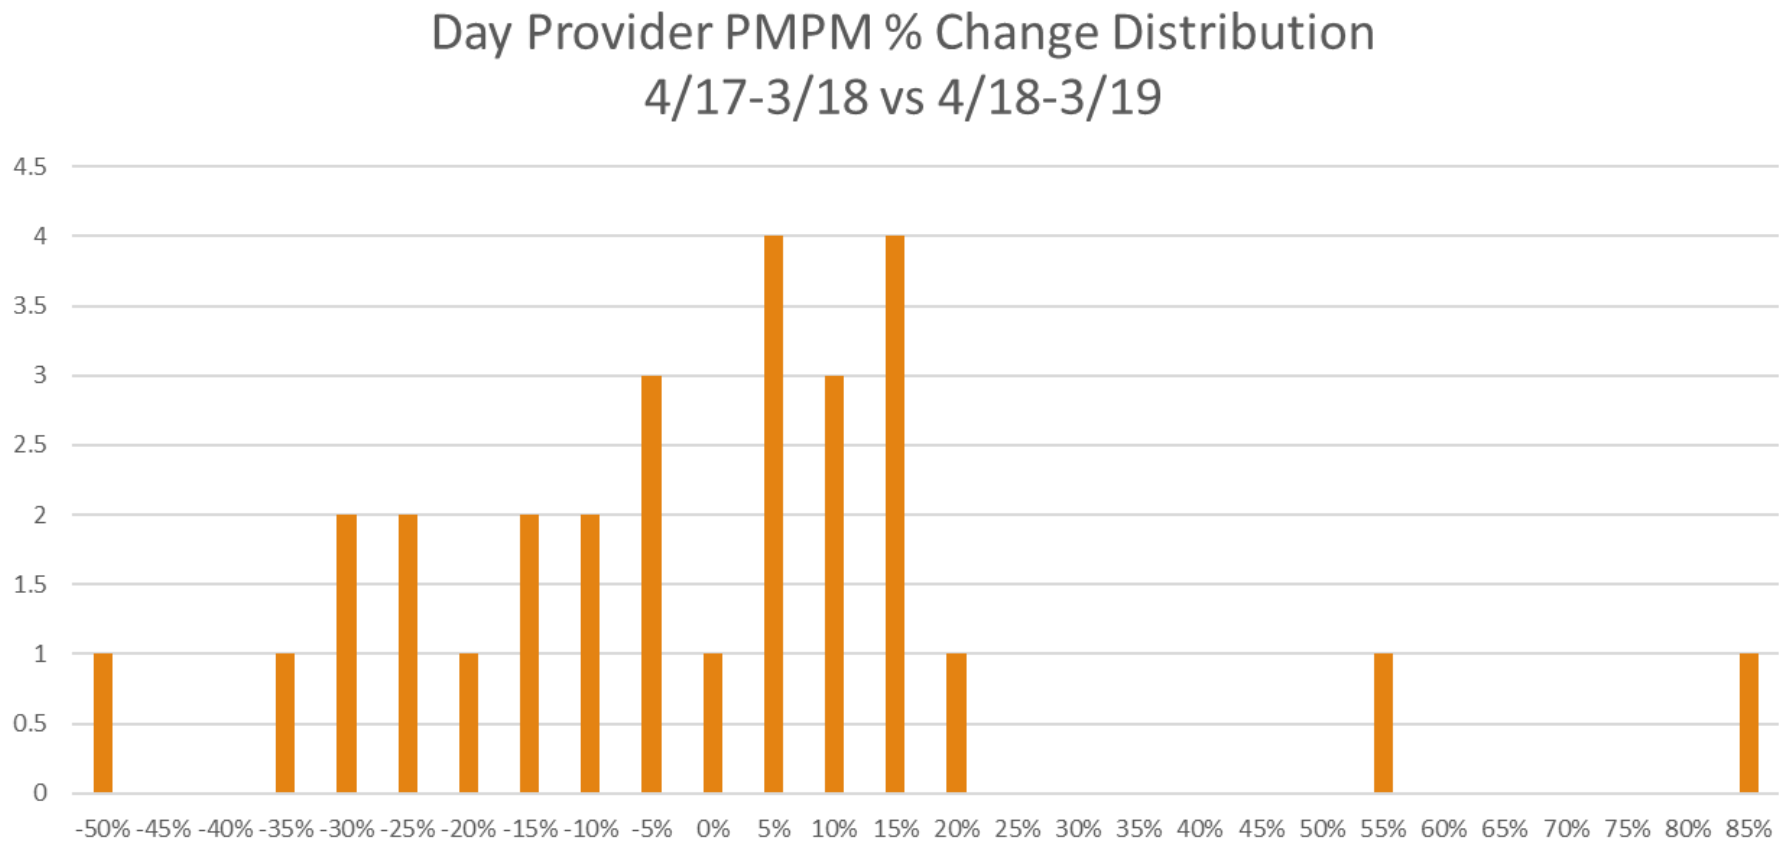
2013 – legislative session: appropriations to complete the remaining work was provided.

- 2013/2014: Rates finalized, assessments continued, crosswalk developed, and universal budget impact completed.

2015/2017: NDACP requested delay of planned 7/1/15 implementation.

- Steering committee developed multiplier method to replace crosswalk, outliers process finalized, administrative rules, waiver and state plan amendments submitted.

2018: Implementation 4/1/18



2019: DHS contracted with Optumas to conduct a year end review

DEVELOPMENTAL DISABILITIES REIMBURSEMENT PROJECT

Scope of year-end review

- Review of current rate structure and methodology
  - Review appropriateness of assumptions
  - Use real data experience
  - Identify possible opportunities for fine-tuning methodology
  - Solicit stakeholder feedback
  - Provide recommendations to the Department
- Address CMS feedback on vacancy and absence factors
- Develop Medically Fragile Residential Habilitation rates

DEVELOPMENTAL DISABILITIES REIMBURSEMENT PROJECT

February 2020, Optumas finalized year end review

- Key findings :
  - Medically fragile residential habilitation rates: increase the program support component to represent the hours of nursing relative to the hours of direct support professionals for each acuity tier.
  - Absence factor: remove the 4% absence factor applied to every base residential rate and replace it with a 30-day personal assistance retainer policy.
  - Vacancy factor: add a 2% vacancy factor to the residential and ICF rate to account for vacancy costs.

DEVELOPMENTAL DISABILITIES REIMBURSEMENT PROJECT

- Key findings continued:
  - Day Services, Residential Habilitation, ICF services:
    - System-wide changes in SIS scores.
    - The decrease in the unit cost for day service is likely the result of the conversion from an hourly rate to 15-minute increments.
    - Overall rate change necessary to mitigate ongoing SIS score growth.

SUPPORTS INTENSITY SCALE (SIS) ADULT VERSION

The SIS is a standardized assessment tool that was

designed to measure the pattern and intensity of supports

that a person aged 16 years and older

with intellectual and developmental disabilities

requires to be successful in community settings.

Source: American Association on Intellectual and Developmental Disabilities (AAIDD) webpage: SIS Product Information https://www.aaidd.org/sis/product-information

The SIS has three sections

1. Exceptional Medical & Behavioral Needs*
2. Support Needs Index
   - Home living activities*
   - Community living activities*
   - Lifelong learning activities
   - Employment activities*
   - Health and safety*
   - Social activities
3. Supplemental Protection and Advocacy Scale

* These sections are **used in the rate determination** for ND. Both the medical and behavioral sections are weighted higher than the other sections. A change of 1pt in either the medical or behavioral sections results in a change in approximately 10 hours/month.

SUPPORTS INTENSITY SCALE (SIS) ADULT VERSION

Administration

- The assessment is done through an interview with the individual and qualified responders (known the individual for at least 3 months).

Utilization of the SIS

- 19 states and 2 Canadian provinces use the SIS-A.
- Of those, 9 use the assessment to inform decisions over the reimbursement rate or the allocation of the support budget for clients.

North Dakota Supports Intensity Scale

North Dakota Assessments:

- Contract with an independent vendor to conduct the interviews.
- Assessors must have experience in the human services field, hold a 4-year degree and complete ongoing training.

During the timeframe of July 1, 2020 – January 15, 2021:

- 481 assessments were completed. Of those assessments
- 381 were reoccurring assessments.

A preliminary review of these assessments reflected the following:

Exceptional Medical:

1) 118 or 30.97% had no change in score.
2) 110 or 28.87 % had an increase in score.
    a) 107 or 28.08% increased between 1 and 5 points;
    b) 3 or 0.79% increased between 6 and 9 points; and
    c) 0 increased by 10 or more points.
3) 153 or 40.16% had a decrease in score.
    a) 147 or 38.58% decreased between 1 and 5 points;
    b) 6 or 1.57% decreased between 6 and 9 points; and
    c) 0 decreased by 10 or more points

Exceptional Behavioral:

1) 101 or 26.51% had no change in score.
2) 102 or 26.77 % had an increase in score:
    a) 98 or 25.72% increased between 1 and 5 points;
    b) 4 or 1.05% increased between 6 and 9 points; and
    c) 0 increase by 10 or more points.
3) 178 or 46.72% had a decrease in score:
    a) 144 or 37.08% decreased between 1 and 5 points;
    b) 26 or 6.82% decreased between 6 and 9 points; and
    c) 8 or 2.10% decreased 10 or more points.

* Medical Acuity Tiers may be applied to individuals with a SIS Medical Score of 15 or higher and is available to a qualifying provider in Residential Habilitation, Day Habilitation, Prevocational Services, and Small Group Employment Supports only.

DEVELOPMENTAL DISABILITIES (DD) REIMBURSEMENT PROJECT

Next steps:

- The goal of the steering committee was to create a subcommittee to review the report and make recommendations to address the findings. This work was to be completed by mid April 2020 so changes would go into effect July 2020.
- Due to the COVID pandemic, initial subcommittee work was put on hold.
- Subcommittee reconvened and presented their findings to the steering committee in Oct 2020.
  - Rate adjustments - data confirms that assessment scores are higher than what we built our methodology on. Would like to see changes to the multiplier rather than across the board adjustments.
    - Consider having Optumas conduct another review to focus specifically on the SIS scores to see where adjustments could be made to the multiplier formula.
  - Day supports - adjust formula to account for the decrease in units.

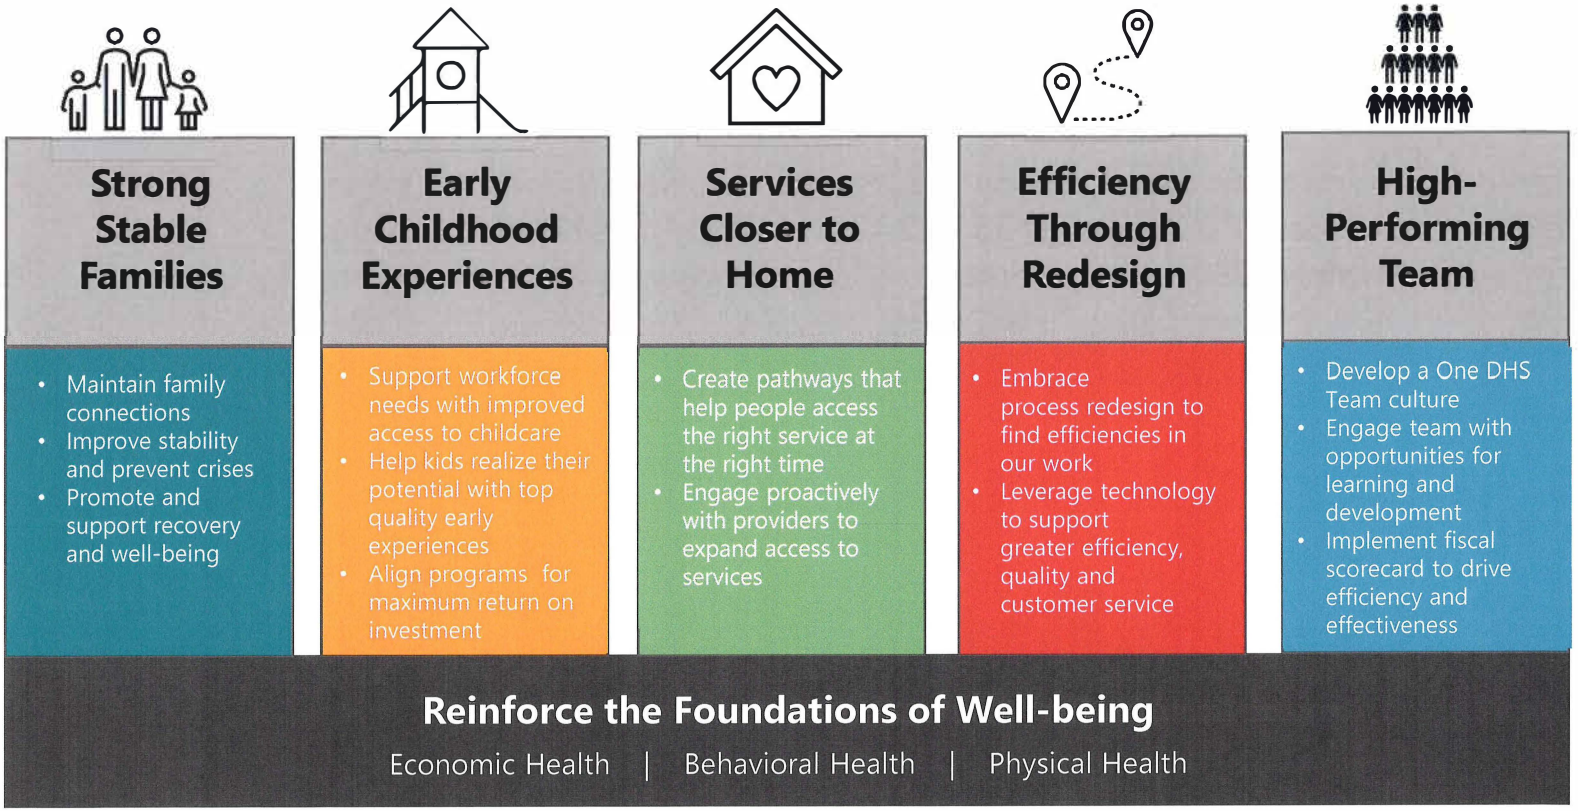
Medical Services Budget- House Bill 1012
Quality



House Appropriations Human Resources Division, Chairman Nelson

Caprice Knapp, PhD Medical Services Director

NORTH Dakota Be Legendary.℠ | Human Services

DHS 2021 - 2025

KEY PRIORITIES:

North Dakota Medicaid

OUR VALUES:

We help...

our members receive safe, appropriate, quality care in a timely manner.

We communicate...

by listening, sharing information, and seeking feedback.

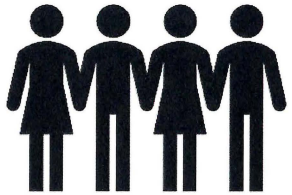
We partner...

with stakeholders, other state agencies, and tribes to achieve shared goals.

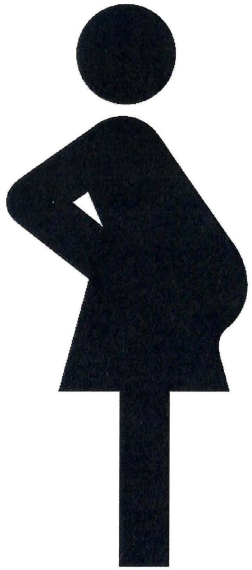
We oversee...

Medicaid to ensure integrity, efficiency, and stewardship of public resources.

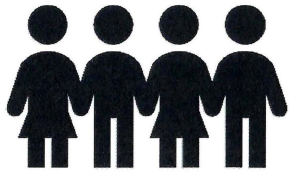
In the United States...

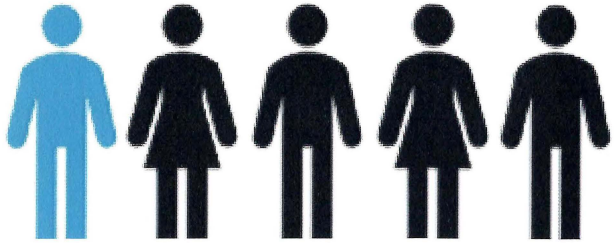


Medicaid covers **45%** of adults with disabilities



Medicaid covers **6** in **10** nursing home residents

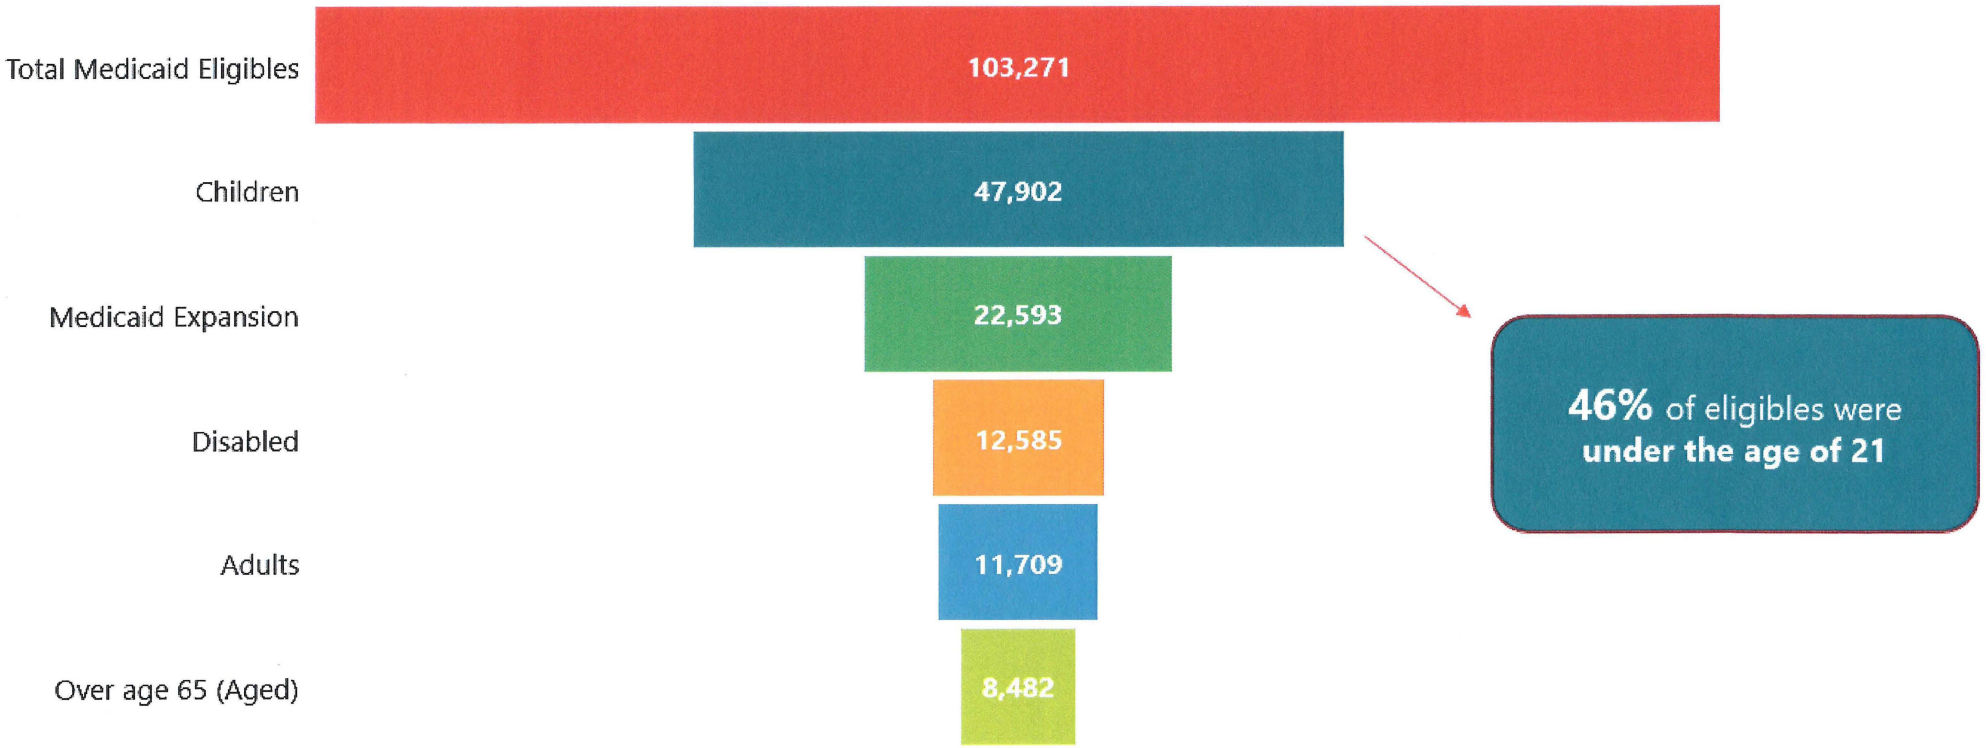




Medicaid and Medicaid Expansion covers low-income families and nonelderly adults with income up to **138% FPL**

Medicaid covers **43%** of all births

4 in **10** Medicaid enrollees are Children

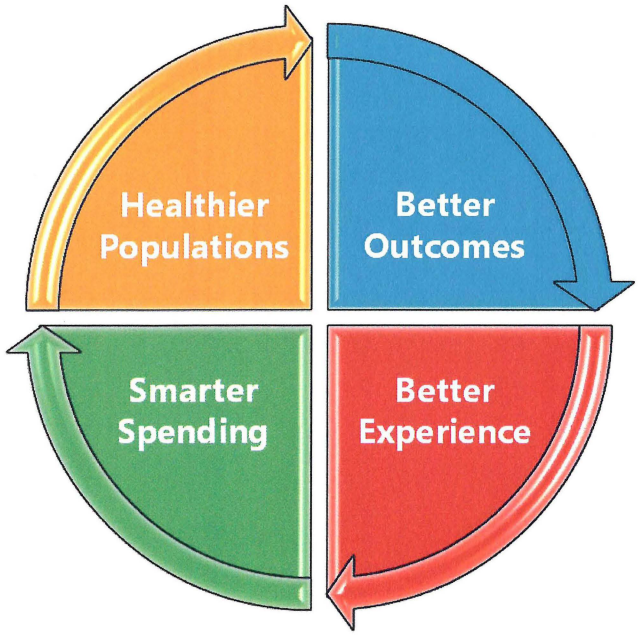


Medicaid covers **1** in **5** Americans

Who does Medicaid cover?

*Medicaid provides health and long-term care for **millions** of America's poorest and most vulnerable people.*

*Data retrieved from Kaiser Family Foundation (2019) 10 Things to Know about Medicaid: Setting the Facts Straight and MACPAC (2020) Factsheet Medicaid's Role in Financing Maternity Care



North Dakota Medicaid Eligibles

** Data from September 2020 Quarterly Budget Insight Report*

HOW TO DRIVE QUALITY

Quadruple Aim for ND Medicaid

*Institute for Healthcare Improvement Triple Aim

Value Equation

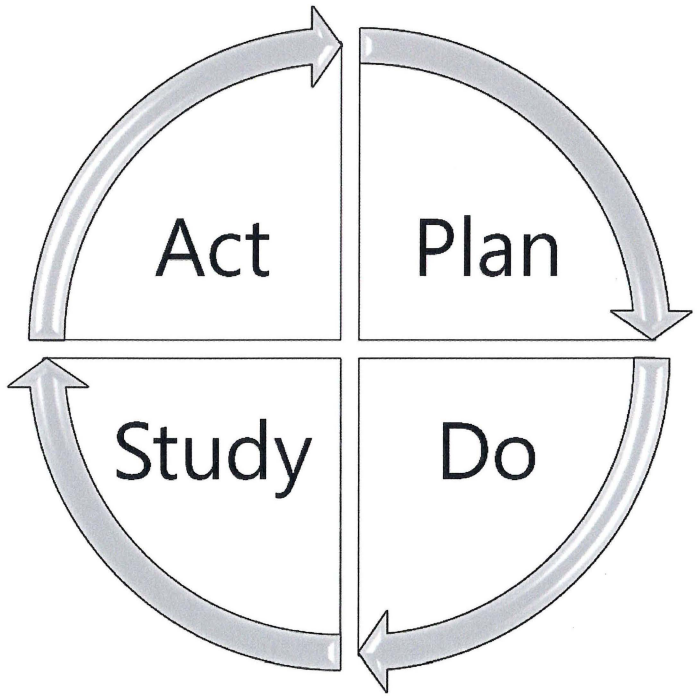
$$V_{\text{(VALUE)}} = \frac{Q_{\text{(QUALITY)}} + S_{\text{(SERVICE)}}}{\$_{\text{(COST)}}}$$

*University of Utah & Harvard Business School's Michael Perter value equation

HOW TO IMPROVE

Continuous Quality Improvement

Is a quality management process that encourages all health care team members to continuously as the questions:



1. **How are we doing?**
2. **Can we do it better?**

The Institute for Healthcare Improvement Model for Improvement is a simple strategy that use **PDSA cycle** that accelerates improvement by seeking answers to three questions:

1. **What are we trying to accomplish?**
2. **How will we know that a change is an improvement?**
3. **What changes can we make that will result in improvement?**

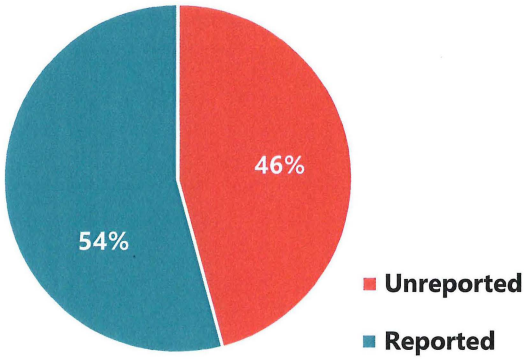
**National Learning Consortium (2013) Continuous Quality Improvement Strategies to Optimize your Practice*

PDSA Cycle

**The W. Edwards Deming Institute PDSA Cycle*

HOW QUALITY IS MEASURED

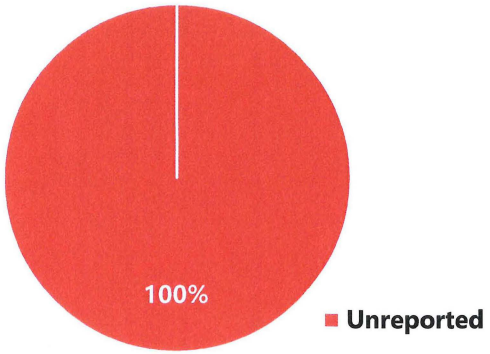
Health Care Quality Measures for Medicaid:



Child Core Set is a set of **24** measures encompassing: preventative health, maternal health, mental health, dental health, and experience of care.

https://www.medicaid.gov/medicaid/quality-of-care/downloads/performance-measurement/2020-child-core-set.pdf

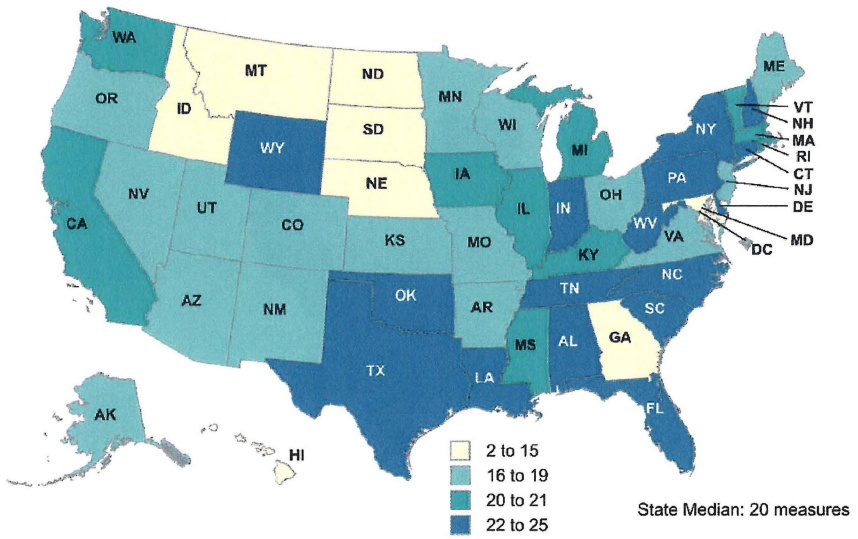
Adult Core Set is a set of **33** measures encompassing: preventative health, maternal health, mental health, dental health, and experience of care.



https://www.medicaid.gov/medicaid/quality-of-care/downloads/performance-measurement/2020-adult-core-set.pdf

ND Child Quality Measures

In 2019, ND reported on
13 Child Core Set Measures
Mandatory State Reporting for all Child Core Set Measures by 2024

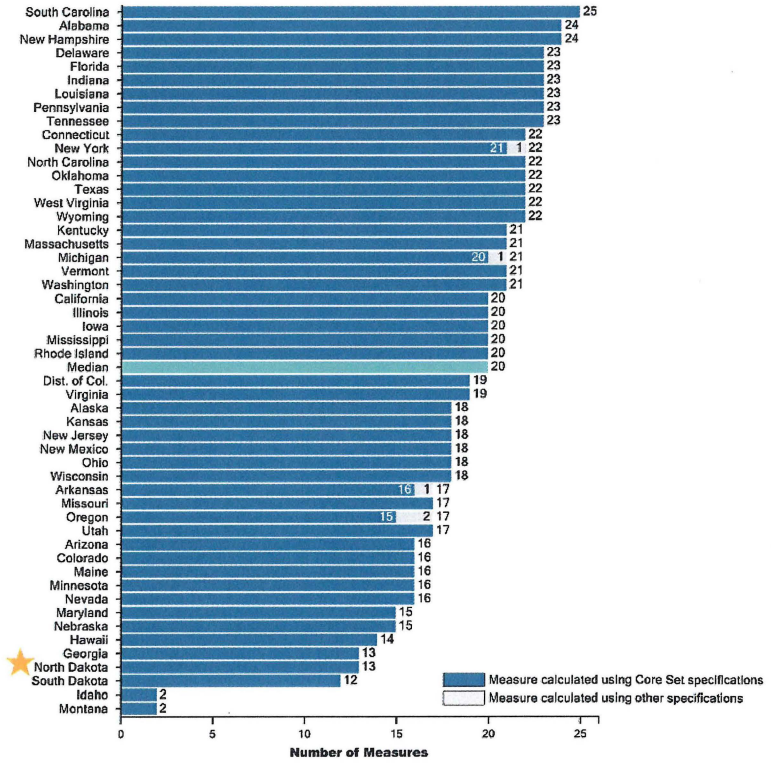


ND Adult Quality Measures

In 2019, ND reported on
0 Adult Core Set Measures
Mandatory State Reporting for all Adult Behavioral Health Measures by 2024

**Retrieved from Medicaid.gov Adult and Child Health Care Quality 2020 Measures*

Geographic Variation in the Number of Child Core Set Measures Reported by States, FFY 2019



Sources: Mathematica analysis of MACPro reports for the FFY 2019 reporting cycle as of May 31, 2020; Form CMS-416 reports for the FFY 2019 reporting cycle as of July 1, 2020; and Centers for Disease Control and Prevention Wide-ranging ONline Data for Epidemiologic Research (CDC WONDER) for calendar year 2018.

Notes: The term "states" includes the 50 states and the District of Columbia. The 2019 Child Core Set includes 26 measures. This chart excludes the CLABSI measure, which is obtained from CDC's National Healthcare Safety Network.

Scorecard LTSS System Performance

Dimension	Rank	Number of indicators with trend*	Number of indicators showing:		
			Substantial improvement	Little or no change	Substantial decline
OVERALL	**28**	**21**	**7**	**13**	**1**
Affordability & Access	**30**	6	1	4	1
Choice of Setting & Provider	**25**	6	2	4	0
Quality of Life & Quality of Care	**20**	2	1	1	0
Support for Family Caregivers**	**34**	4	2	2	0
Effective Transitions	**22**	3	1	2	0

The **Scorecard** aims to empower state and federal policy makers and consumers with information they need to effectively assess their state's performance across multiple dimensions and indicators, learn from other states, and improve the lives of older adults, people with physical disabilities, and their families.

*Data used for this Scorecard was analyzed in 2019, **prior to the COVID-19 outbreak**. Therefore, performance on this Scorecard does not include the impact of the pandemic on the LTSS system, which is considerable.

ABOUT FREE THROUGH RECOVERY

Free Through Recovery is a community based behavioral health program designed to increase recovery support services for individuals involved with the criminal justice system who have behavioral health concerns.

THE MISSION OF FREE THROUGH RECOVERY IS TO IMPROVE HEALTHCARE OUTCOMES AND REDUCE RECIDIVISM BY DELIVERING HIGH-QUALITY COMMUNITY BEHAVIORAL HEALTH SERVICES LINKED WITH COMMUNITY SUPERVISION.

Pay for Performance Model

- Providers are paid a monthly base rate for each participant with the opportunity to receive performance pay if the participant meets at least 3 out of 4 monthly outcomes.

Outcome Monitoring

Stable Housing

Is the person living in a residence that is supportive of their recovery?

Stable Employment

Is the person actively seeking or participating in employment?

Recovery

Is the participant demonstrating effort to reduce their substance use or the harm associated with their use and/or improve their mental health functioning.

Criminal Justice

Did the participant avoid law enforcement involvement resulting in arrest, criminal charge, or probation violation resulting in initiation of revocation?

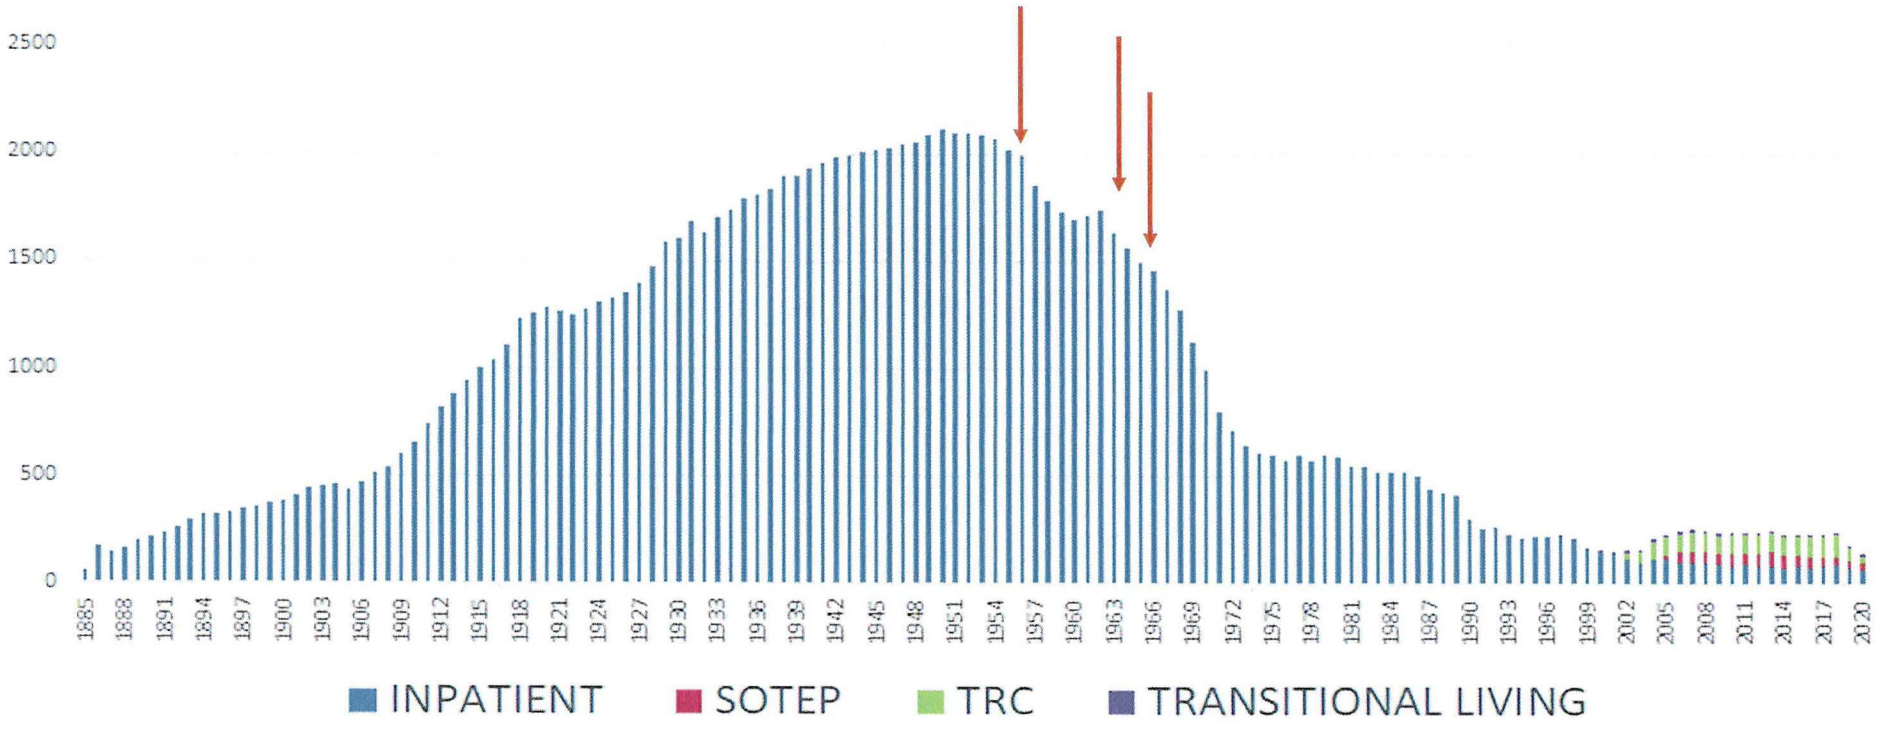
Psychiatric Hospital and Residential Bed Study Conclusions

Rosalie Etherington, Chief Clinics Officer, State Hospital Superintendent

NORTH Dakota | Human Services

Be Legendary.™



INSTITUTE FOR MENTAL DISEASE (IMD)

- An **IMD** is **defined** in federal statute as a hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases, including medical attention, nursing care, and related services.

HISTORICAL CONTEXT

- Disincentivize the treatment in large institutions
- Shift the costs from the federal government onto states.

1963 COMMUNITY MENTAL HEALTH ACT
1965 IMD EXCUSION

PSYCHIATRIC HOSPITAL BED STUDY CONCLUSIONS

- North Dakota has sufficient psychiatric hospital beds
- North Dakota does not have signs of a hospital bed shortage
- Expansion of beds is counter to the expansion of community services
- No evidence regarding risks and benefits of mental health waivers

RESIDENTIAL BED STUDY CONCLUSIONS

- North Dakota has sufficient youth and adult residential beds
- Utilization rates of residential beds are higher than the national averages
- Residential beds are occupied with those that could be served elsewhere

BED STUDY ACTION STEPS

Thank you

Institutions for Mental Diseases (IMDs) – Concept and Process Overview #5270

House Appropriations Human Resources, Chairman Nelson

Medical Services Division, Caprice Knapp – Director

February 3, 2021

NORTH Dakota | Human Services

Be Legendary.™

Background

An institution for mental diseases (IMD) is defined in section 1905(i) of the Social Security Act to mean a "hospital, nursing facility, or other institution of more than 16 beds, that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases, including medical attention, nursing care, and related services."

Under section 1905(a) of the Act, there is a general prohibition on Medicaid payment for any services provided to any individual who is under age 65 and who is residing in an IMD. There are two exceptions to the IMD exclusion: 1) inpatient hospital services, nursing facility services, and intermediate care facility services for individuals age 65 and older in IMDs (42 CFR § 440.140), and 2) inpatient psychiatric hospital services for individuals under age 21, furnished by a psychiatric hospital, a general hospital with a psychiatric program that meets the applicable conditions of participation, or an accredited psychiatric facility that meets certain requirements, commonly referred to as a "Psychiatric Residential Treatment Facility" (PRTF) (42 CFR § 440.160).

IMDs in North Dakota

In North Dakota, the following facilities are classified as IMDs: The State Hospital in Jamestown (140 beds); Prairie St. John's in Fargo (110 beds); ShareHouse in Fargo (87 beds); and Summit Prairie Recovery Center in Raleigh (36 beds).

'Waiving' the Prohibition of Medicaid Payment for IMD Services

Section 1115 of the Social Security Act gives the Secretary of the U.S. Department of Health and Human Services authority to approve experimental, pilot, or demonstration projects that promote the objectives of Medicaid and Children's Health Insurance Program (CHIP). Under this authority, the Secretary may waive certain provisions of Medicaid law to give states additional flexibility to design and improve their programs.

Some states have received approval from CMS for 1115 waivers related to substance abuse disorder (SUD) treatment services provided in IMDs. In November 2018, CMS clarified that they will also approve 1115 waivers for services provided in IMDs that focus primarily on treatment for individuals with serious mental illness (SMI) or serious emotional disturbance (SED)[1]. States may choose to focus their 1115 waivers on SUD treatment, SMI/SED treatment, or both at the same time.

States have the flexibility to design 1115 demonstrations aimed at making significant improvements over the course of a five-year period. Compliance with the following goals and milestones is required.

Required Goals for SUD 1115 waiver:

- Increased rates of identification, initiation, and engagement in treatment;
- Increased adherence to and retention in treatment;
- Reductions in overdose deaths, particularly those due to opioids;

[1] https://www.medicaid.gov/federal-policy-guidance/downloads/smd18011.pdf

- Reduced utilization of emergency departments and inpatient hospital settings for treatment where the utilization is preventable or medically inappropriate through improved access to other continuum of care services;
- Fewer readmissions to the same or higher level of care where the readmission is preventable or medically inappropriate; and
- Improved access to care for physical health conditions among beneficiaries.

Required Milestones for SUD 1115 waiver:

- Access to critical levels of care for opioid use disorder (OUD) and other SUDs;
- Widespread use of evidence-based, SUD-specific patient placement criteria;
- Use of nationally recognized, evidence-based SUD program standards to set residential treatment provider qualifications;
- Sufficient provider capacity at each level of care;
- Implementation of comprehensive treatment and prevention strategies to address opioid abuse and OUD; and
- Improved care coordination and transitions between levels of care.

Required Goals for SMI/SED 1115 waiver:

- Reduced utilization and lengths of stay in EDs among Medicaid beneficiaries with SMI or SED while awaiting mental health treatment in specialized settings;
- Reduced preventable readmissions to acute care hospitals and residential settings;
- Improved availability of crisis stabilization services including services made available through call centers and mobile crisis units, intensive outpatient services, as well as services provided during acute short-term stays in residential crisis stabilization programs, psychiatric hospitals, and residential treatment settings throughout the state;
- Improved access to community-based services to address the chronic mental health care needs of beneficiaries with SMI or SED including through increased integration of primary and behavioral health care; and
- Improved care coordination, especially continuity of care in the community following episodes of acute care in hospitals and residential treatment facilities.

Required Milestones for SMI/SED 1115 waiver:
Ensuring Quality of Care in Psychiatric Hospitals and Residential Settings

- Participating hospitals and residential settings are licensed or otherwise authorized by the state to primarily provide treatment for mental illnesses and are accredited by a nationally recognized accreditation entity including the Joint Commission or the Commission on Accreditation of Rehabilitation Facilities (CARF) prior to receiving FFP for services provided to beneficiaries;
- Establishment of an oversight and auditing process that includes unannounced visits for ensuring participating psychiatric hospitals and residential treatment settings meet state licensure or certification requirements as well as a national accrediting entity’s accreditation requirements;

- Use of a utilization review entity (e.g., a managed care organization or administrative service organization) to ensure beneficiaries have access to the appropriate levels and types of care and to provide oversight to ensure lengths of stay are limited to what is medically necessary and only those who have a clinical need to receive treatment in psychiatric hospitals and residential treatment settings are receiving treatment in those facilities;
- Participating psychiatric hospitals and residential treatment settings meet federal program integrity requirements, and the state has a process for conducting risk-based screening of all newly enrolling providers, as well as revalidating existing providers (specifically, under existing regulations, states must screen all newly enrolling providers and reevaluate existing providers pursuant to the rules in 42 CFR Part 455 Subparts B and E, ensure treatment providers have entered into Medicaid provider agreements pursuant to 42 CFR 431.107, and establish rigorous program integrity protocols to safeguard against fraudulent billing and other compliance issues);
- Implementation of a state requirement that participating psychiatric hospitals and residential treatment settings screen enrollees for co-morbid physical health conditions and SUDs and demonstrate the capacity to address co-morbid physical health conditions during short-term stays in these treatment settings (e.g., with on-site staff, telemedicine, and/or partnerships with local physical health providers);

Improving Care Coordination and Transitions to Community-Based Care

- Implementation of a process to ensure that psychiatric hospitals and residential treatment settings provide intensive pre-discharge, care coordination services to help transition beneficiaries out of these settings and into appropriate community-based outpatient services - as well as requirements that community-based providers participate in these transition efforts (e.g., by allowing initial services with a community-based provider while a beneficiary is still residing in these settings and/or by hiring peer support specialists to help beneficiaries make connections with available community-based providers, including, where applicable, plans for employment);
- Implementation of a process to assess the housing situation of individuals transitioning to the community from psychiatric hospitals and residential treatment settings and connect those who are homeless or have unsuitable or unstable housing with community providers that coordinate housing services where available;
- Implementation of a requirement that psychiatric hospitals and residential treatment settings have protocols in place to ensure contact is made by the treatment setting with each discharged beneficiary within 72 hours of discharge and to ensure follow-up care is accessed by individuals after leaving those facilities by contacting the individuals directly and by contacting the community-based provider the person was referred to;
- Implementation of strategies to prevent or decrease the lengths of stay in EDs among beneficiaries with SMI or SED (e.g., through the use of peers and

psychiatric consultants in EDs to help with discharge and referral to treatment providers);
- Implementation of strategies to develop and enhance interoperability and data sharing between physical, SUD, and mental health providers with the goal of enhancing care coordination so that disparate providers may better share clinical information to improve health outcomes for beneficiaries with SMI or SED;

Increasing Access to Continuum of Care Including Crisis Stabilization Services

- Annual assessments of the availability of mental health services throughout the state, particularly crisis stabilization services and updates on steps taken to increase availability;
- Commitment to a financing plan approved by CMS to be implemented by the end of the demonstration to increase availability of non-hospital, non-residential crisis stabilization services, including services made available through crisis call centers, mobile crisis units, coordinated community crisis response that involves law enforcement and other first responders, and observation/assessment centers as well as on-going community-based services, e.g., intensive outpatient services, assertive community treatment, and services in integrated care settings such as the Certified Community Behavioral Health Clinic model as well as consideration of a self-direction option for beneficiaries;
- Implementation of strategies to improve the state's capacity to track the availability of inpatient and crisis stabilization beds to help connect individuals in need with that level of care as soon as possible;
- Implementation of a requirement that providers, plans, and utilization review entities use an evidence-based, publicly available patient assessment tool, preferably endorsed by a mental health provider association, to help determine appropriate level of care and length of stay;

Earlier Identification and Engagement in Treatment Including Through Increased Integration

- Implementation of strategies for identifying and engaging individuals, particularly adolescents and young adults, with serious mental health conditions, in treatment sooner including through supported employment and supported education programs;
- Increasing integration of behavioral health care in non-specialty care settings, including schools and primary care practices, to improve identification of serious mental health conditions sooner and improve awareness of and linkages to specialty treatment providers; and
- Establishment of specialized settings and services, including crisis stabilization services, focused on the needs of young people experiencing SMI or SED.

Other 1115 Waiver Requirements:

- Demonstrations must be "budget neutral" to the Federal government, which means that, during the project, federal Medicaid expenditures will not be more

than federal spending without the demonstration[2]. Calculations are based on per member, per month expenditures pre- and post-implementation for the targeted population [PMPM*Member Months]. Other methodologies may be accepted by CMS.

- Demonstrations must have implementation and evaluation plans approved by CMS.
- 1115 waivers do not allow for room and board payments unless the facility qualifies as an inpatient facility under section 1905(a) of the Social Security Act.
- States are required to have staff and/or contractual resources necessary to conduct independent and robust interim and final evaluations.

Other Considerations:

- Even if ND was approved for an 1115 waiver that would allow Medicaid to reimburse for treatment within an IMD, there would still be limits on the number of days that can be reimbursed (15 days per year for inpatient IMD; 30 days per year for residential IMD[3]). An 1115 waiver would apply only to traditional fee-for-service Medicaid.
- IMD reimbursement for the Medicaid Expansion group, which is currently operated as managed care, would not be included in an 1115 waiver. Federal managed care rules allow capitation payments to be made to a managed care organization (MCO) for a member aged 21 through 64 receiving inpatient treatment in an IMD if it is for psychiatric or SUD crisis residential services and the length of stay is no more than 15 days during the month of the capitation payment[4]. These services must also meet the requirements for 'in lieu of' services, meaning that the state has determined the IMD is medically appropriate and a cost effective substitute, the member is not required by the MCO to choose the IMD setting and the approved in lieu of services are considered in developing the component of the capitation rates that represents the covered services[5].
- There are a targeted number of IMD beds in the state that a waiver would open to Medicaid reimbursement. Also, since Medicaid is the only health care payer with a restriction on paying for IMD services and is the payer of last resort, other payers would pay before Medicaid.
- A waiver for IMDs would not expand eligibility or services. SUD and SMI/SED treatment can already be accessed by Medicaid members in settings not classified as IMDs. The only SUD treatment service that would be offered by an IMD is medically managed detoxification, which is a higher level of SUD treatment than most people need.
- Budget neutrality may be difficult to achieve, given the complex needs of the population who would be eligible for the waiver services, the infrastructure development requirements associated with the required goals and milestones, and the assumptions that are used to generate cost estimates. CMS monitors

[2] https://www.medicaid.gov/federal-policy-guidance/downloads/smd18009.pdf
[3] https://www.medicaid.gov/federal-policy-guidance/downloads/smd15003.pdf
[4] https://www.law.cornell.edu/cfr/text/42/438.6
[5] https://www.law.cornell.edu/cfr/text/42/438.3

budget neutrality throughout the demonstration period and performs a formal adjudication at the end of the demonstration period to determine whether a state's actual spending has remained within the specified limit. During demonstration approval, the state must agree to limit their receipt of federal financial participation to the amounts indicated in the budget neutrality test and to return any funds they receive above those limits to CMS[6].

- In two Human Services Research Institute studies pursuit of an IMD waiver was not a recommendation.
- The milestones required to be addressed by states that implement 1115 waivers are broad and would require significant development of the behavioral health continuum.
- The US Government Accountability Office (GAO) found[7] that selected states' evaluations of these demonstrations had widespread, significant limitations that affected their usefulness in informing policy decisions. The limitations included gaps in reported evaluation results for important parts of the demonstrations. CMS is attempting to strengthen evaluation requirements and hold states accountable for meaningful and timely 1115 evaluation requirements.

<u>Examples</u>

Colorado's SUD 1115 waiver

- 2018 started the process, 2021 completed the process
- 2 FTEs allocated; unclear others that contribute to supporting roles.
- ~$500,000 year 1 and year 2; year 1 of implementation $174 million (inpatient and residential treatment)
- Post-implementation $1.58 million for consultants and IT systems (annually)

Virginia's 1115 waiver on Community Engagement, Premiums and Wellness Accounts, Housing and Employment Supports for High Need Enrollees

- 3 FTEs working 100%; 9 total from Compass Division chart (housing analyst, employment analyst, data analyst, wellness accounts analyst, finance analyst, Senior Advisor, Senior Program Analyst, Senior Policy Analyst)
- Manatt as a consultant to write the waiver; cost $3.495 million for Manatt
- Timeline- 2018 to December 2019 but an added 6 months after that to implement. Negotiate with CMS on budget neutrality, implementation plan, and evaluation plan.

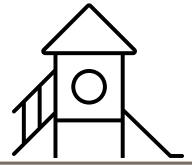
Housing and its role in Economic Health and Wellbeing

February 3, 2021



NORTH Dakota | Human Services
Be Legendary.™

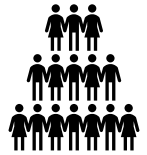
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

DHS AUTHORITY ESTABLISHED IN NDCC 50-06

Administration of human services programs related to:

- Children and families
- Individuals with developmental disabilities
- Aging services
- Behavioral health
- Economic assistance
- Medical service
- General assistance
- Child support

CHAPTER 50-06
DEPARTMENT OF HUMAN SERVICES

50-06-01. Definitions.
As used in this chapter, unless the context otherwise requires:

1. "Behavioral health" means the planning and implementation of preventive, consultative, diagnostic, treatment, crisis intervention, rehabilitative, and suicide prevention services for individuals with mental, emotional, or substance use disorders, and psychiatric conditions.
2. "Behavioral health provider" means any licensed or accredited behavioral health provider in this state.
3. "Department" means the department of human services.
4. "Human services" means:
   a. A service or assistance provided to an individual or an individual's family in need of services or assistance, including child welfare services, economic assistance programs, medical services programs, and aging services programs, to assist the individual or the individual's family in achieving and maintaining basic self-sufficiency, including physical health, mental health, education, welfare, food and nutrition, and housing.
   b. A service or assistance provided, administered, or supervised by the department in accordance with chapter 50-06.
   c. Licensing duties as administered or supervised by the department or delegated by the department to a human service zone.

50-06-01.1. Department of human services to be substituted for public welfare board of North Dakota and social service board of North Dakota, members of board, and executive director.

When the terms "public welfare board of North Dakota", "social service board of North Dakota", "executive director of the public welfare board", "executive director of the social service board", "member of the public welfare board", or "member of the social service board", or any derivative of those terms which, when used in context indicates an intention to refer to those persons or that board, appear in the North Dakota Century Code, the term "department of human services", or the term "executive director of the department of human services", as the case may be, must be substituted therefor. It is the intent of the legislative assembly that the department of human services must be substituted for, shall take any action previously to be taken by, and shall perform any duties previously to be performed by the public welfare board of North Dakota or by the social service board of North Dakota.

The threads that run through every person's life

Foundations of Wellbeing are Interconnected

Economic Health

Having the resources you need to meet basic needs contributes to stability and is a foundation you can build on

Behavioral Health

Having good mental health and a healthy relationship with substances boosts your ability to weather life's storms

Physical Health

When you are in good physical health you can better navigate the activities of daily and community life

The stability that comes from good **economic** health can **improve behavioral** health.
The stability that comes from good **physical** and **behavioral** health **enables economic** health.

DHS Mission and Operating Principles

Provide quality, efficient, and effective human services, which improve the lives of people

- Services and care should be provided **as close to home as possible**
- Services should be **provided consistently across service areas** to promote equity of access and citizen focus of delivery

- Services should be administered to **optimize** for a given cost **the number served** at a service **level aligned to need**
- Investments and funding in DHS should **maximize ROI for the most vulnerable** through safety net services
- Cost-effectiveness should be considered holistically, acknowledging **potential unintended consequences** and **alignment between state and federal priorities**

- Services should help vulnerable North Dakotans of all ages maintain or enhance quality of life by:
- Supporting **access to the social determinants of health**: economic stability, housing, education, food, community, and health care
- **Mitigating threats** to quality of life such as lack of financial resources, emotional crises, disabling conditions, or inability to protect oneself

SOCIAL DETERMINANTS OF HEALTH

The social determinants of health are the conditions in which we are born, we grow and age, and in which we live and work. The factors below impact on our health and wellbeing.

Childhood experiences

Housing

Education

Social support

Family income

Employment

Our communities

Access to health services

HOUSING SNAPSHOT - NORTH DAKOTA

$714-$972

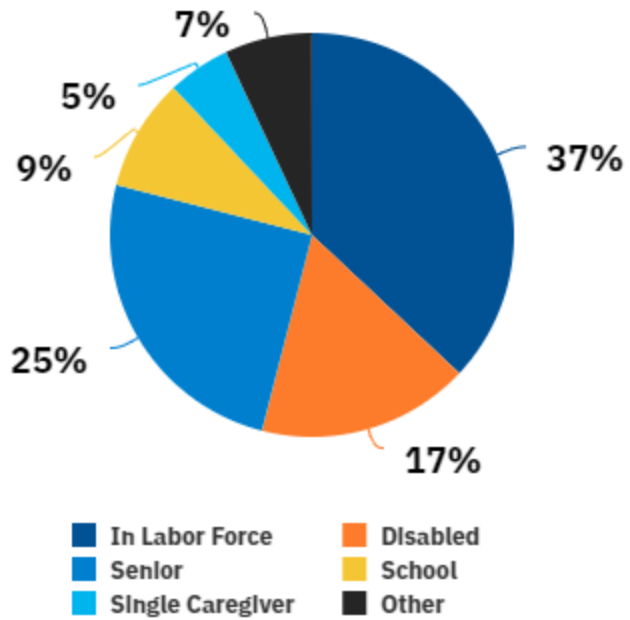
40th percentile rents

Fair market rent (FMR) for a 2-bedroom apartment in ND varies from $714 - $972 (by region, 2018)

120,780

2 in 5 households

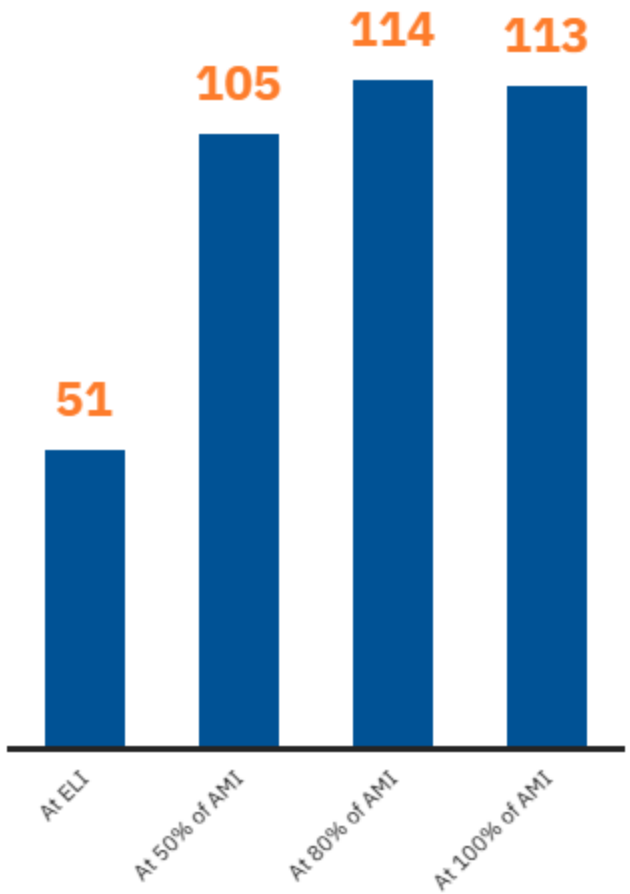
38% of North Dakotans are renters



$26,140

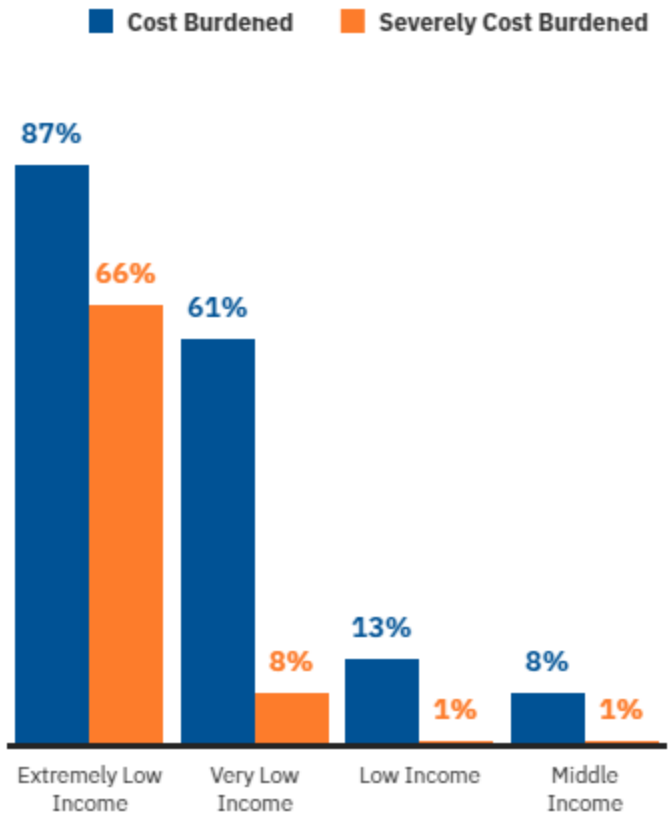
30% of AMI

22% of renter households are considered extremely low income (30% AMI – state level)



Which means a 4-person household earns a max of $26,140 (equal to a single wage of $12.56/hour)

EXTREMELY LOW INCOME RENTER HOUSEHOLDS



Note: Mutually exclusive categories applied in the following order: senior, disabled, in labor force, enrolled in school, single adult caregiver of a child under 7 or a person with a disability, and other. Fifteen percent of extremely low income renter households include a single adult caregiver, more than half of whom usually work more than 20 hours per week. Eleven percent of extremely low-income renter households are enrolled in school, 48% of whom usually work more than 20 hours per week.
Source: 2018 ACS PUMS.

AFFORDABLE AND AVAILABLE HOMES PER 100 RENTER HOUSEHOLDS

Source: NLIHC tabulations of 2018 ACS PUMS

HOUSING COST BURDEN BY INCOME GROUP

Note: Renter households spending more than 30% of their income on housing costs and utilities are cost burdened; those spending more than half of their income are severely cost burdened.
Source: NLIHC tabulations of 2018 ACS PUMS

ECONOMIC ASSISTANCE

State Median Income for ND households 2020

Many federal assistance programs are designed to help individuals and families who earn less than 60% of State median income (SMI).

60% SMI is roughly equivalent to 200% of the federal poverty level.

	30% SMI		60% SMI		100% SMI	
Household Size	Annual Income	Hourly Wage	Annual Income	Hourly Wage	Annual Income	Hourly Wage
1	$ 15,720	$ 7.56	$ 31,440	$ 15.12	$ 52,400	$ 25.19
2	$ 20,562	$ 9.89	$ 41,124	$ 19.77	$ 68,540	$ 32.95
3	$ 25,398	$ 12.21	$ 50,796	$ 24.42	$ 84,660	$ 40.70
4	$ 30,234	$ 14.54	$ 60,468	$ 29.07	$ 100,780	$ 48.45
5	$ 35,070	$ 16.86	$ 70,140	$ 33.72	$ 116,900	$ 56.20
6	$ 39,912	$ 19.19	$ 79,824	$ 38.38	$ 133,040	$ 63.96
7	$ 40,818	$ 19.62	$ 81,636	$ 39.25	$ 136,060	$ 65.41

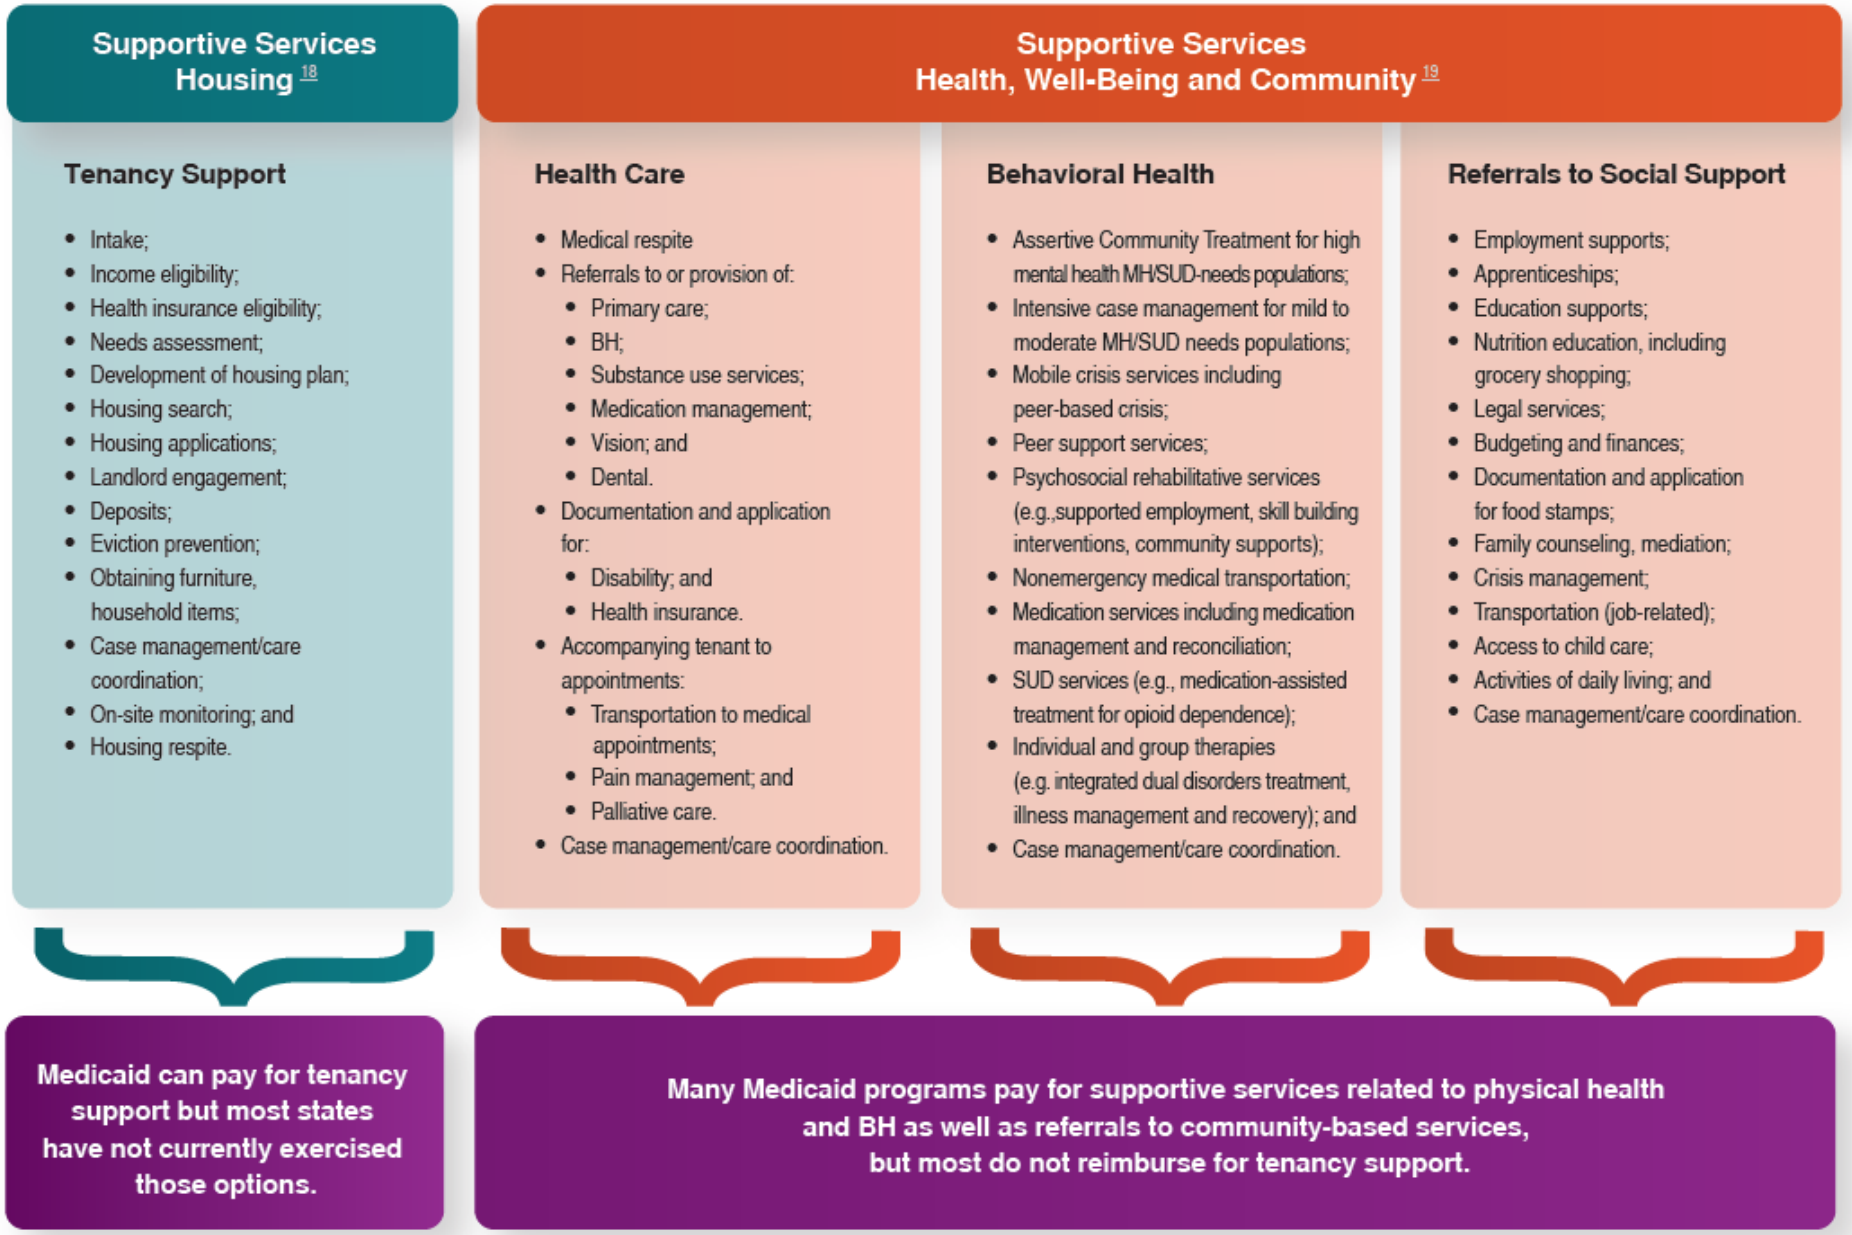
Three Housing Models

Supportive Housing Without Medicaid



Supportive Housing With Medicaid

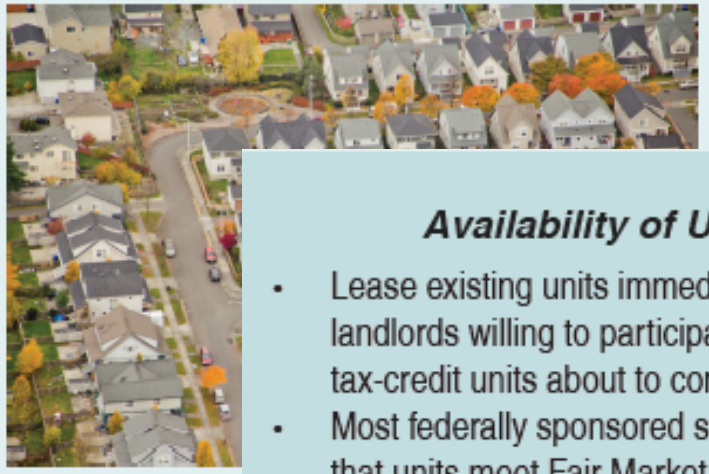
Source: Housing as Health | A Road Map for States: Leveraging Housing Interventions that Improve Health Outcomes and Reduce Costs, Sept 2016

What are Supportive Services?

Source: Housing as Health | A Road Map for States: Leveraging Housing Interventions that Improve Health Outcomes and Reduce Costs, Sept 2016

*Note: This list is not exhaustive but rather intended to serve as an example of the most commonly offered services.
For more information on supportive housing, see: https://www.usich.gov/solutions/housing/supportive-housing

Incorporate key elements of Behavioral Health Services that are integral to housing intervention



Source:
Housing as Health | A Road Map for States: Leveraging Housing Interventions that Improve Health Outcomes and Reduce Costs, September 2016

Two Different Supported Housing Models

Scattered Site

- Rental units located throughout the community;
- Apartments or single-family homes;
- Case managers may be mobile and provide services in the home, or patients can receive care at FQHCs or other partner facilities;
- Patients also referred to providers in their community;
- Little or no up-front capital investment; and
- Works well in communities well supplied with MH, BH and other service providers needed to effectively treat this population.

Availability of Units:

- Lease existing units immediately from landlords willing to participate, or identify tax-credit units about to come online.
- Most federally sponsored subsidies require that units meet Fair Market Rent guidelines and Section 8 inspection standards.

Single Site or Mixed Single Site

- Units located in a single building;
- Many services provided onsite by hired staff, through partnerships with providers or onsite at a provider facility;
- Depending on financing:
  - 100% units reserved as supportive housing
  - Percentage of units set aside as supportive housing, remainder reserved as market-rate housing for the general population
- Good option for cities with a shortage of affordable rental units to meet Fair Market Rent guidelines.

Availability of Units:

- Existing units are likely to be filled, with a low turnover rate.
- New units will need to be created through construction or rehabilitation.
- For this reason, scattered site complements single site nicely.

KEY TERMS | DOJ SETTLEMENT
Most Integrated Setting

A *living environment* that allows individuals with disabilities to interact with non-disabled persons to the fullest extent possible.

December 2020 U.S. Dept of Justice
Settlement with State of North Dakota

For Example

Single Family Home
Apartment
Townhome
Condominium
Farm or Ranch
Adult Foster Care
Living with family

SETTLEMENT AGREEMENT BETWEEN U.S. DOJ & STATE OF ND

Purpose is to ensure that the State will meet the ADA requirements by providing services, programs, and activities for individuals with physical disabilities in the most integrated setting appropriate to their needs.

Effective December 14, 2020

Agreement will terminate eight years after effective date if Parties agree that the state has attained substantial compliance with all provisions and maintained that compliance for a period of one year.

KEY TERMS | DOJ SETTLEMENT
Community Integration Mandate

Public entities are required to provide **community-based services** when:

- Community-based services are **appropriate** for the individual; and
- The individual **does not oppose** community-based treatment; and
- Community-based treatment can be **reasonably accommodated**, taking into account:
  - Resources available to the entity and
  - Needs of others receiving disability services.

KEY TERMS | DOJ SETTLEMENT
Permanent Supported Housing

Affordable, permanent housing coupled with housing supports and other community-based services. Individual lives in a private home alone, with family, significant other, or roommates of their choosing.

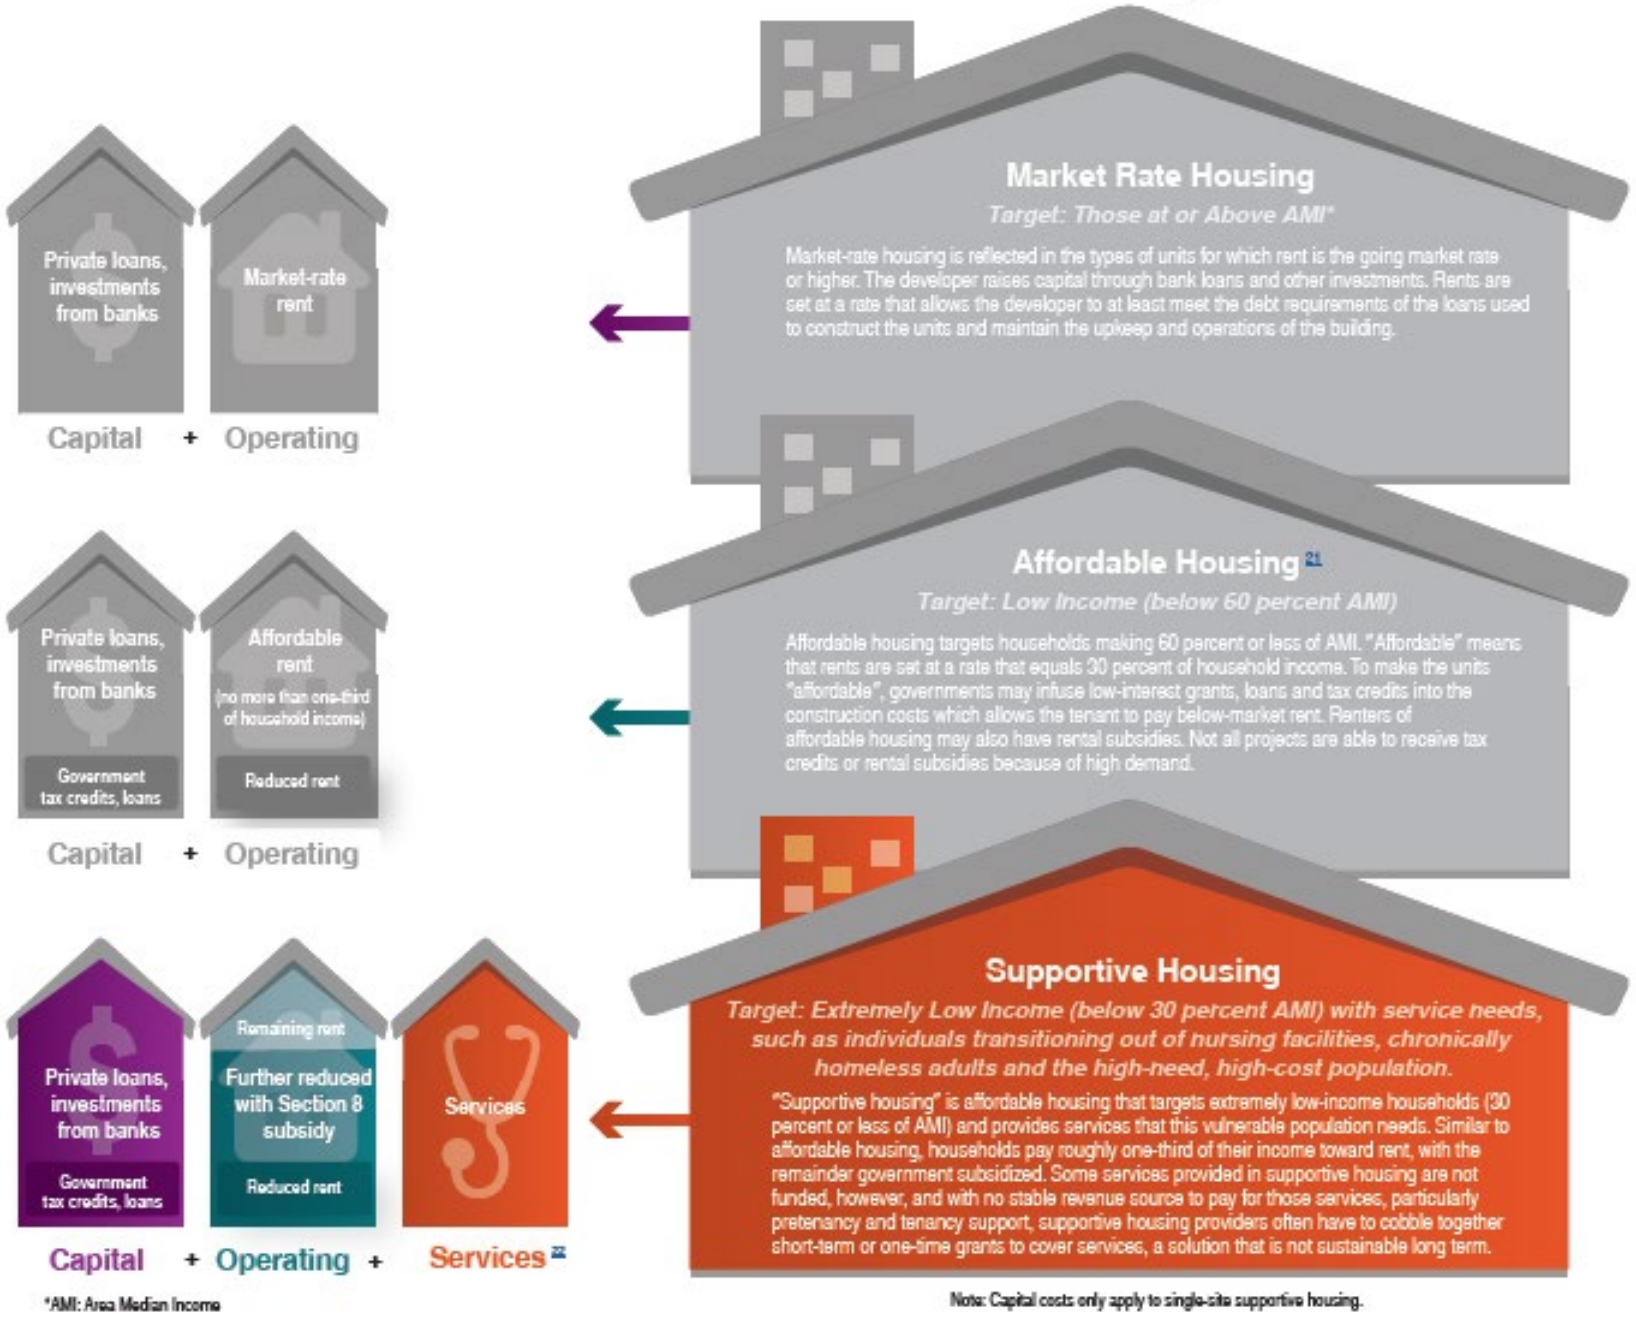
December 2020 U.S. Dept of Justice
Settlement with State of North Dakota

Notes

- Tenants must have access to community provider for intermittent on-call, planned and back up community-based services
- Must be scattered site housing

KEY TERMS | DOJ SETTLEMENT

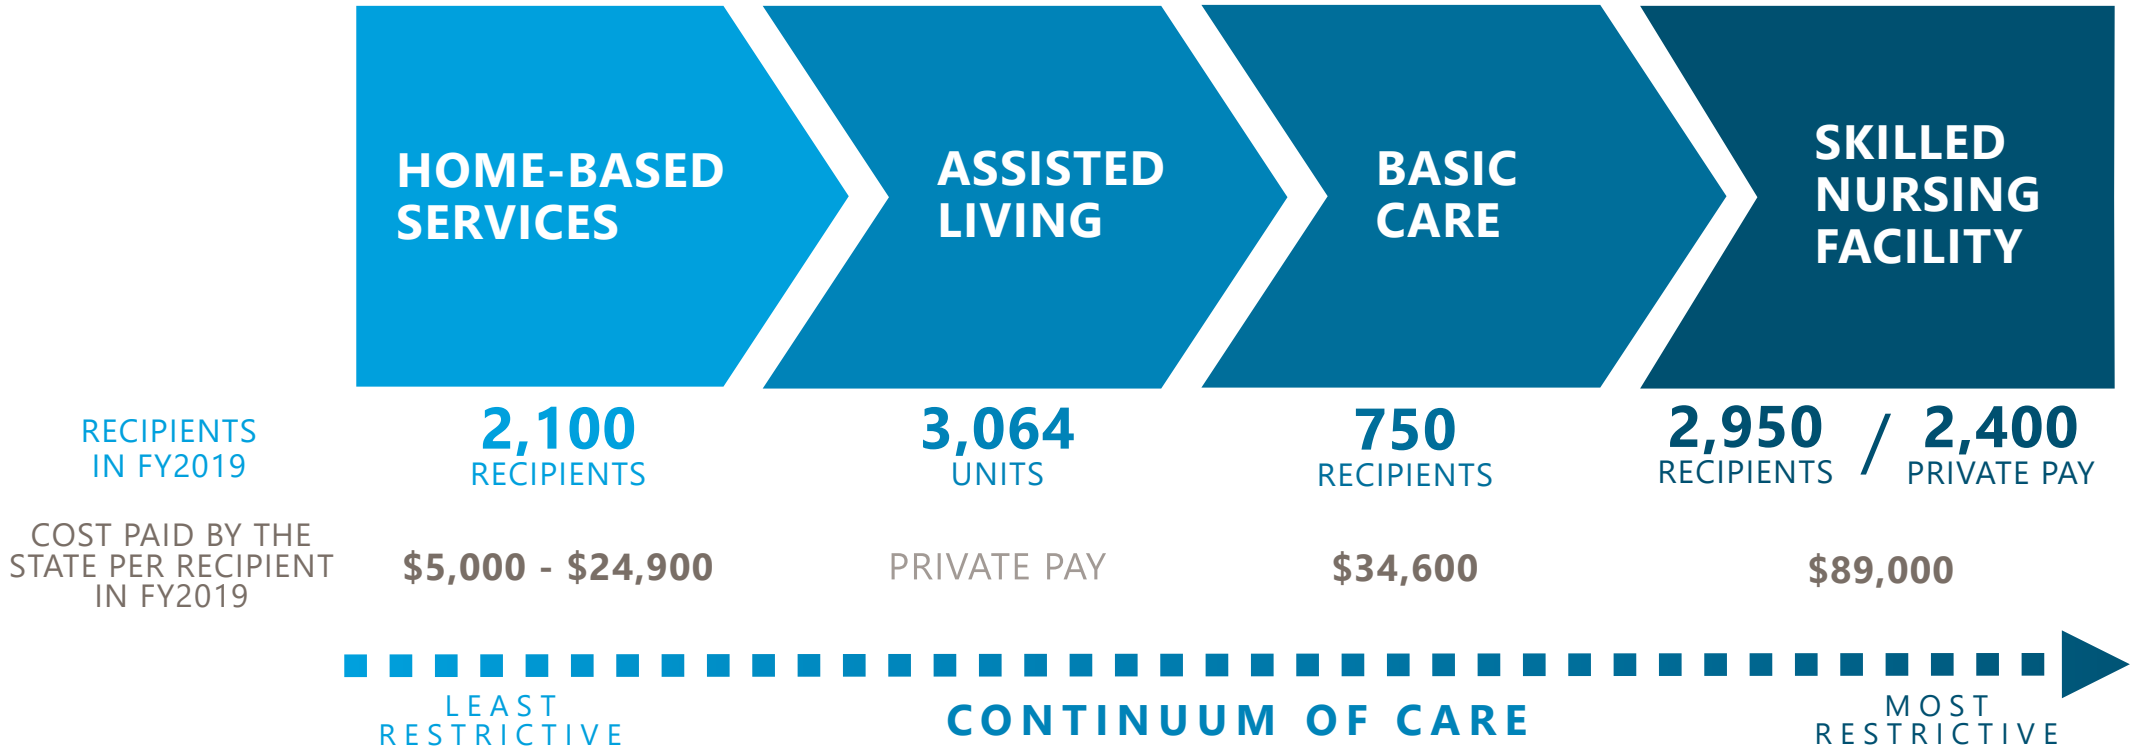
Integrated Housing



Housing **cannot be provided in** group homes, nursing facilities, boarding homes, residential care facilities or assisted living residences; or any building where more than 25% of the occupants are TPM.

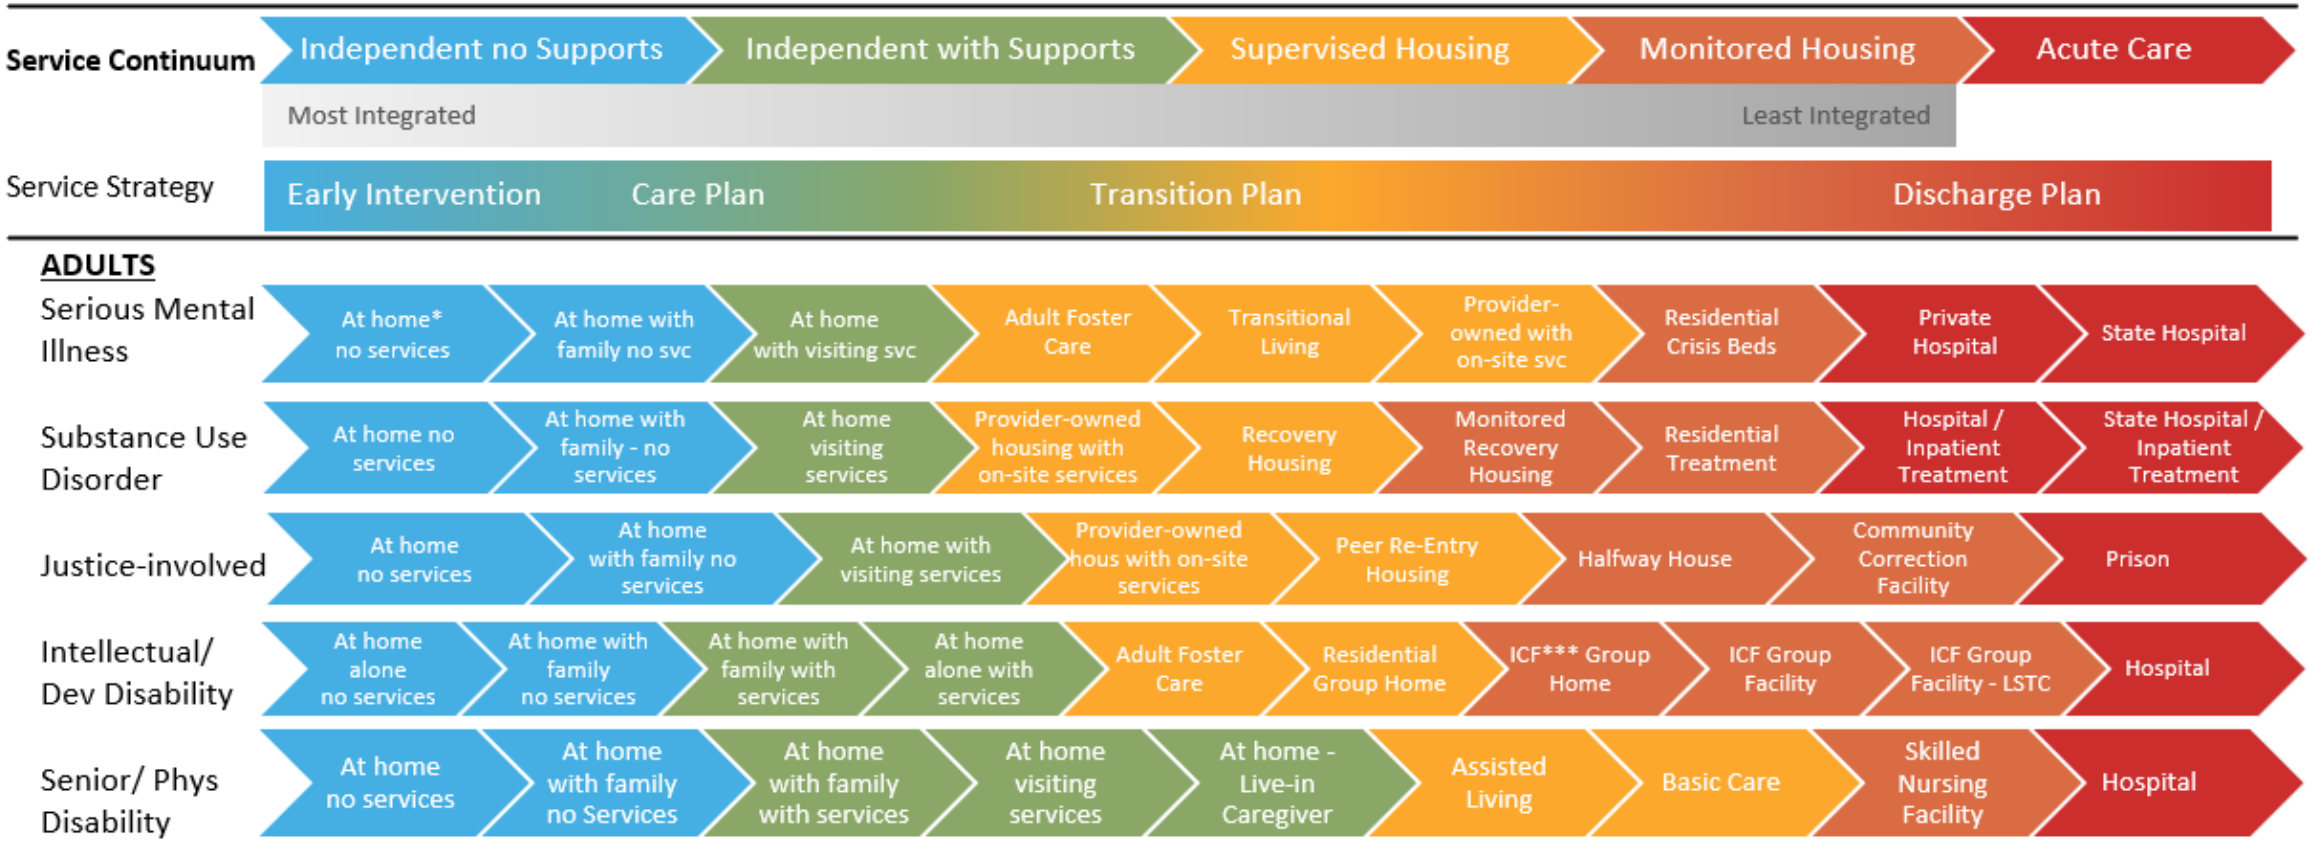
Requires state to **provide** funding for **rental assistance** including reasonable expansion of existing capacity by funding and providing rental assistance to support permanent housing for TPM.

Requires state to **provide** for **assistance** with **identifying** housing, **coordinating** housing modifications, applying for subsidized housing, as well as help **preserving** tenancy if temporarily admitted to a Nursing Home.



A Fourth Model

Integrated Housing Supports

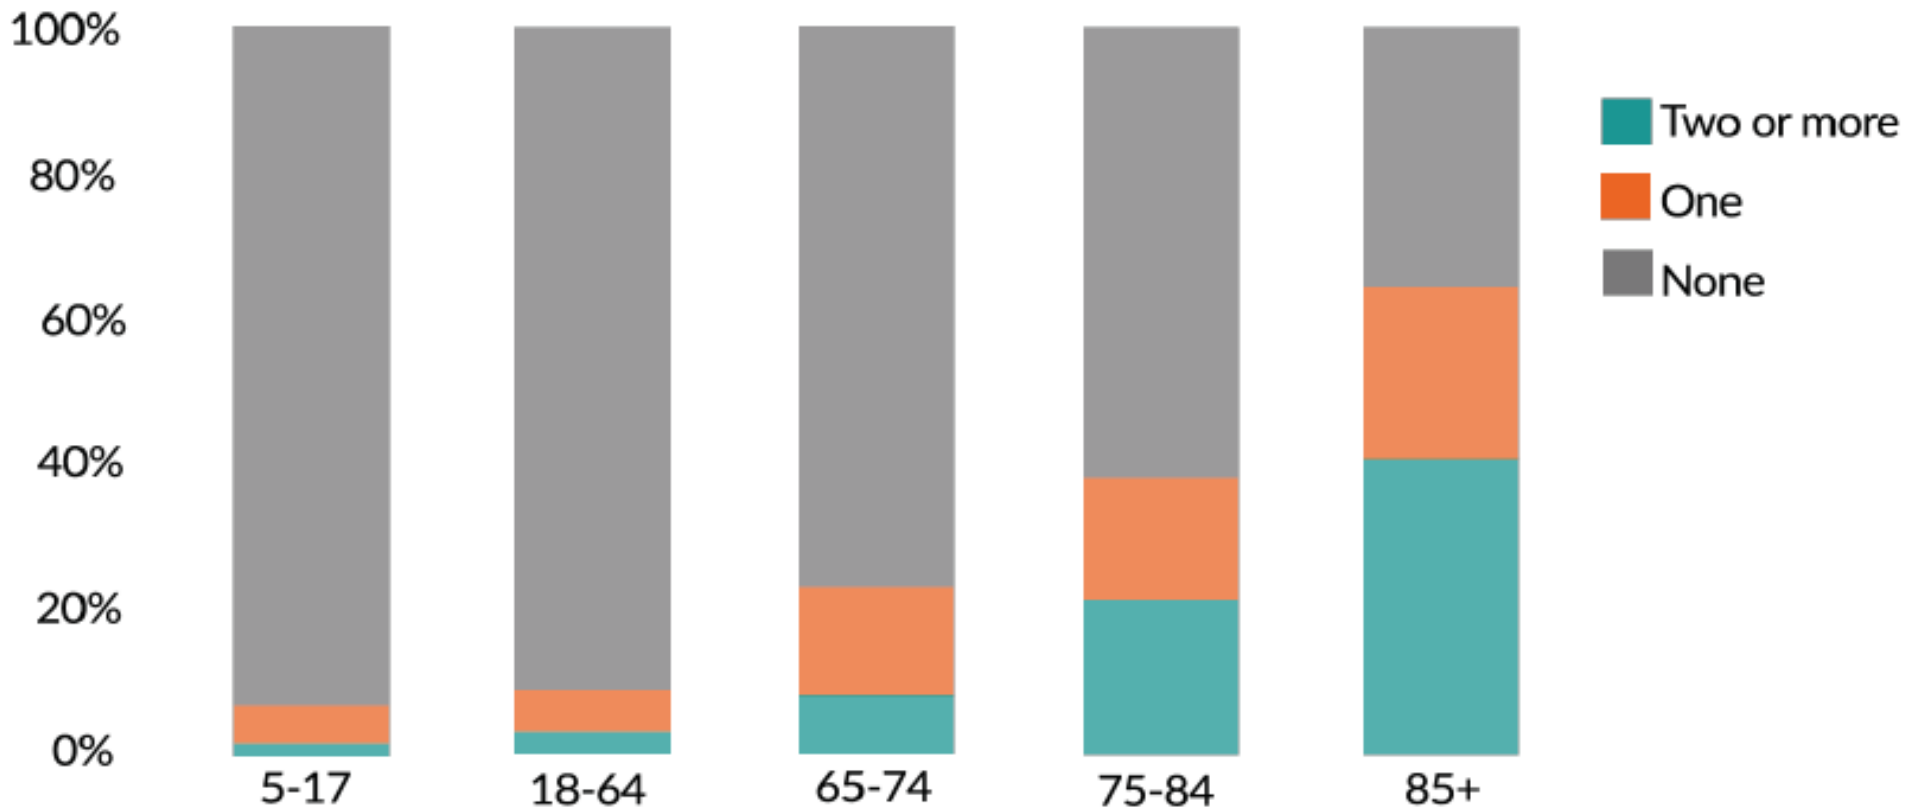


CONTINUUM OF CARE | DOJ SETTLEMENT

Long-term care services & supports

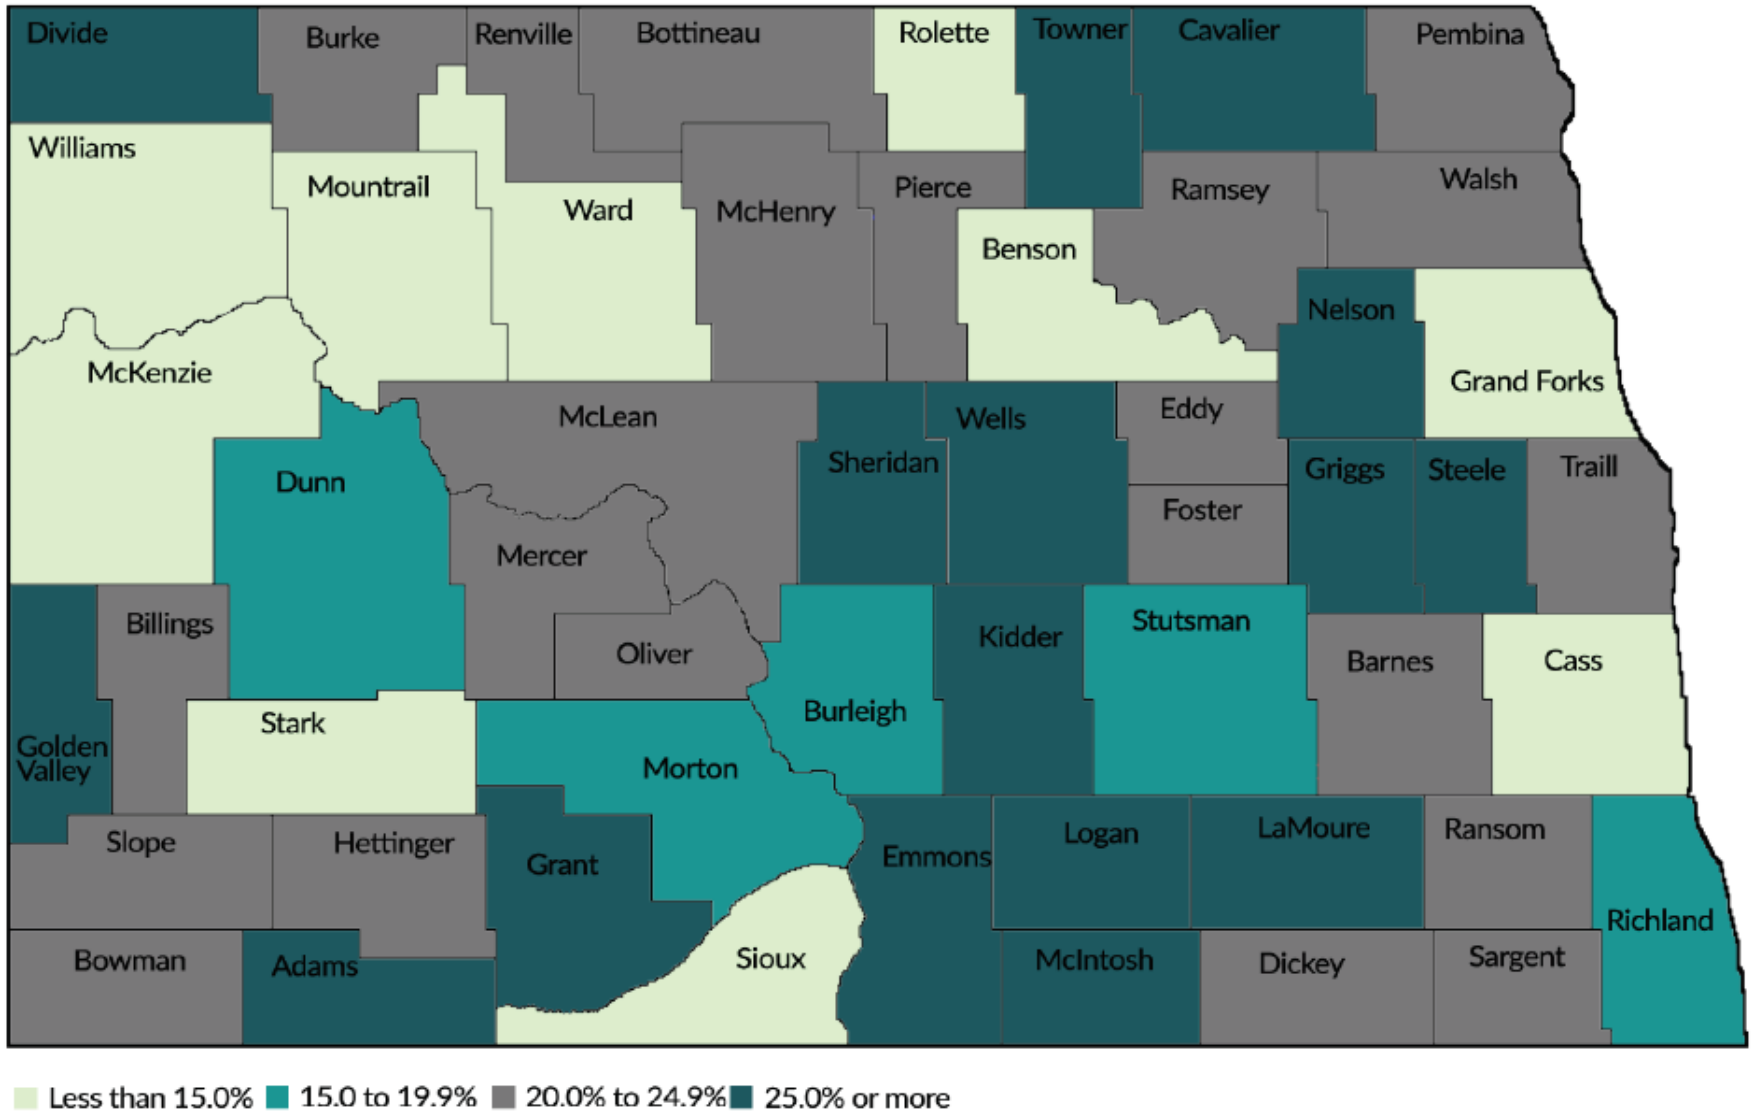
The Service Continuum - Adults

A critical concept defined



**Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)*

***Family = includes birth family, kin-caregiver, adopted family*



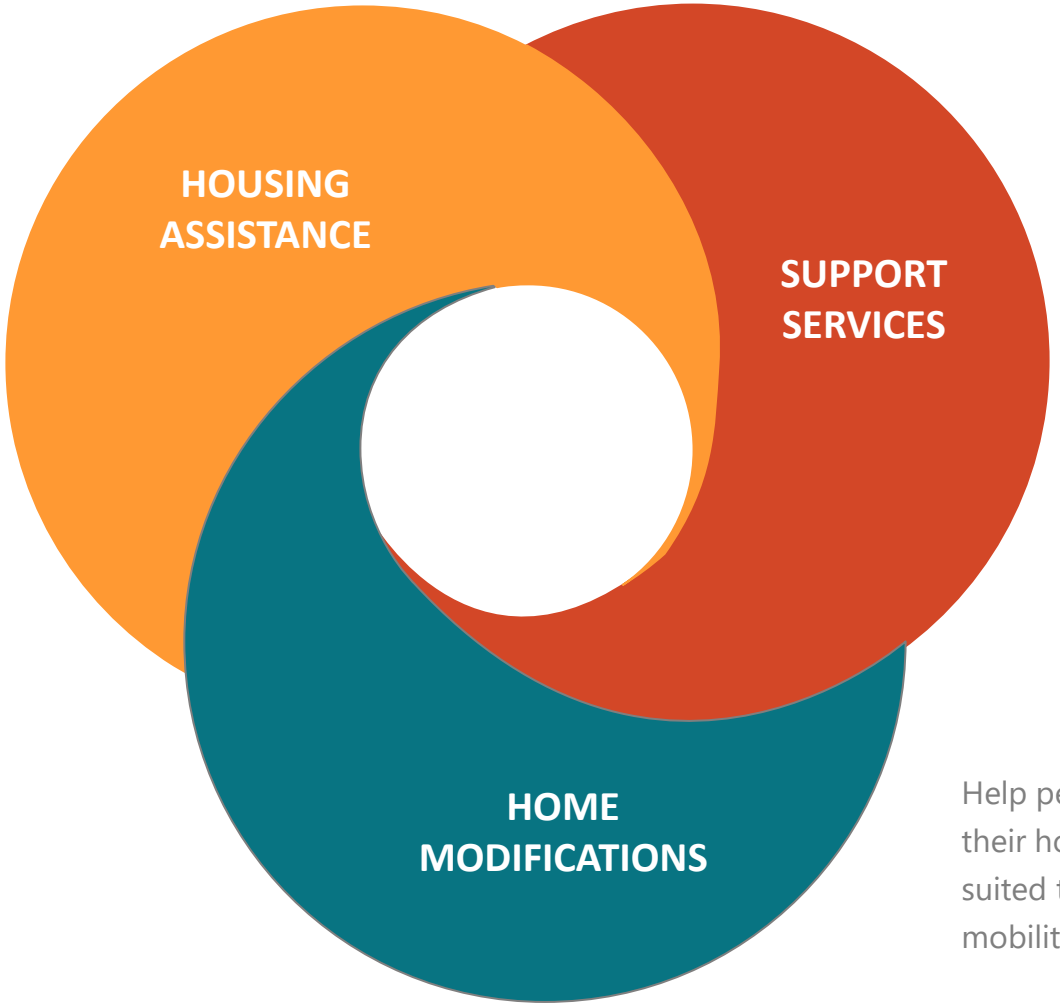
****ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)*

Individuals by Detailed Age and Number of Disabilities [18]

Source: "The Current State of Housing in North Dakota", 2020, p.18

Percent of Population Age 65+ [19]

Source: "The Current State of Housing in North Dakota", 2020, p.18

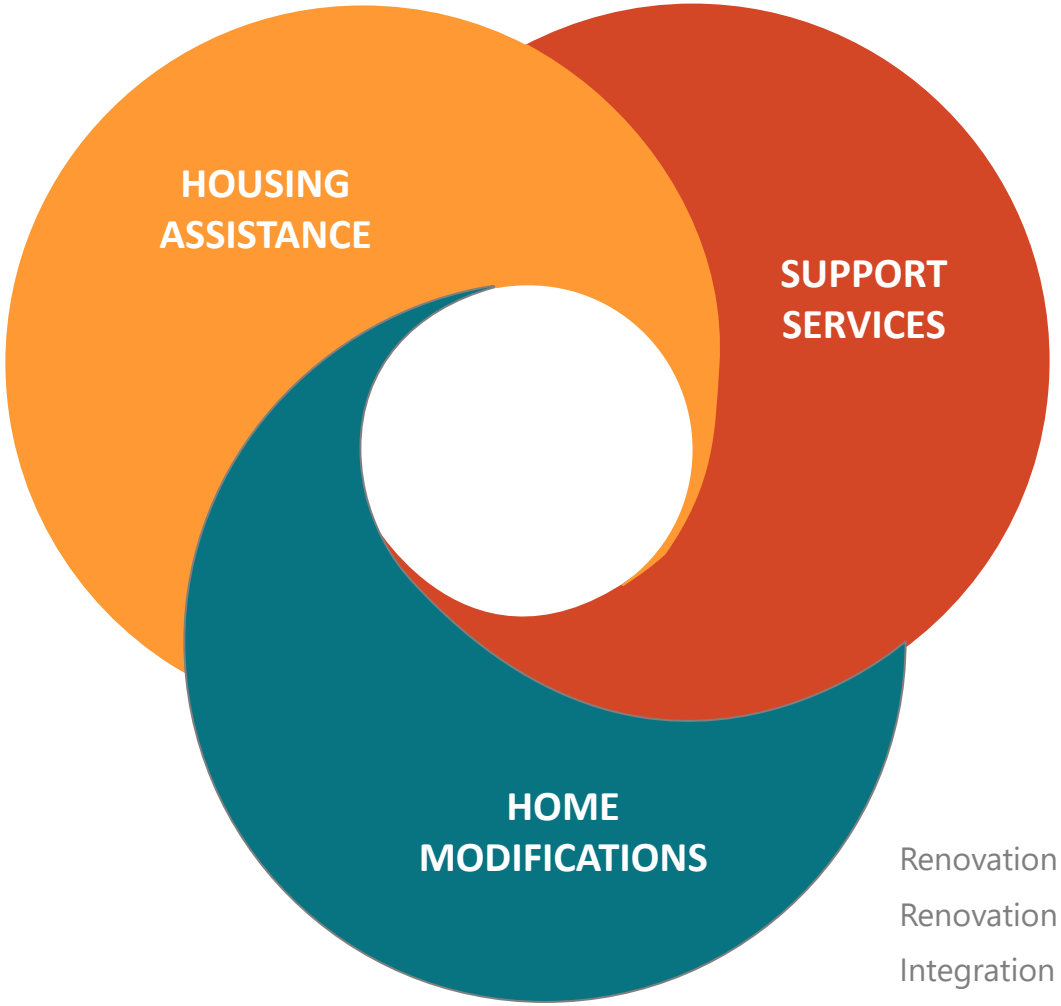


What do we need to do to help someone make an informed choice about how they may want to access services in the most integrated setting that is right for them?

Improve ability to live as independently as possible

Intersecting approaches can help preserve possibilities and assure choice

Provide housing assistance to remove affordability as a barrier to independent living.



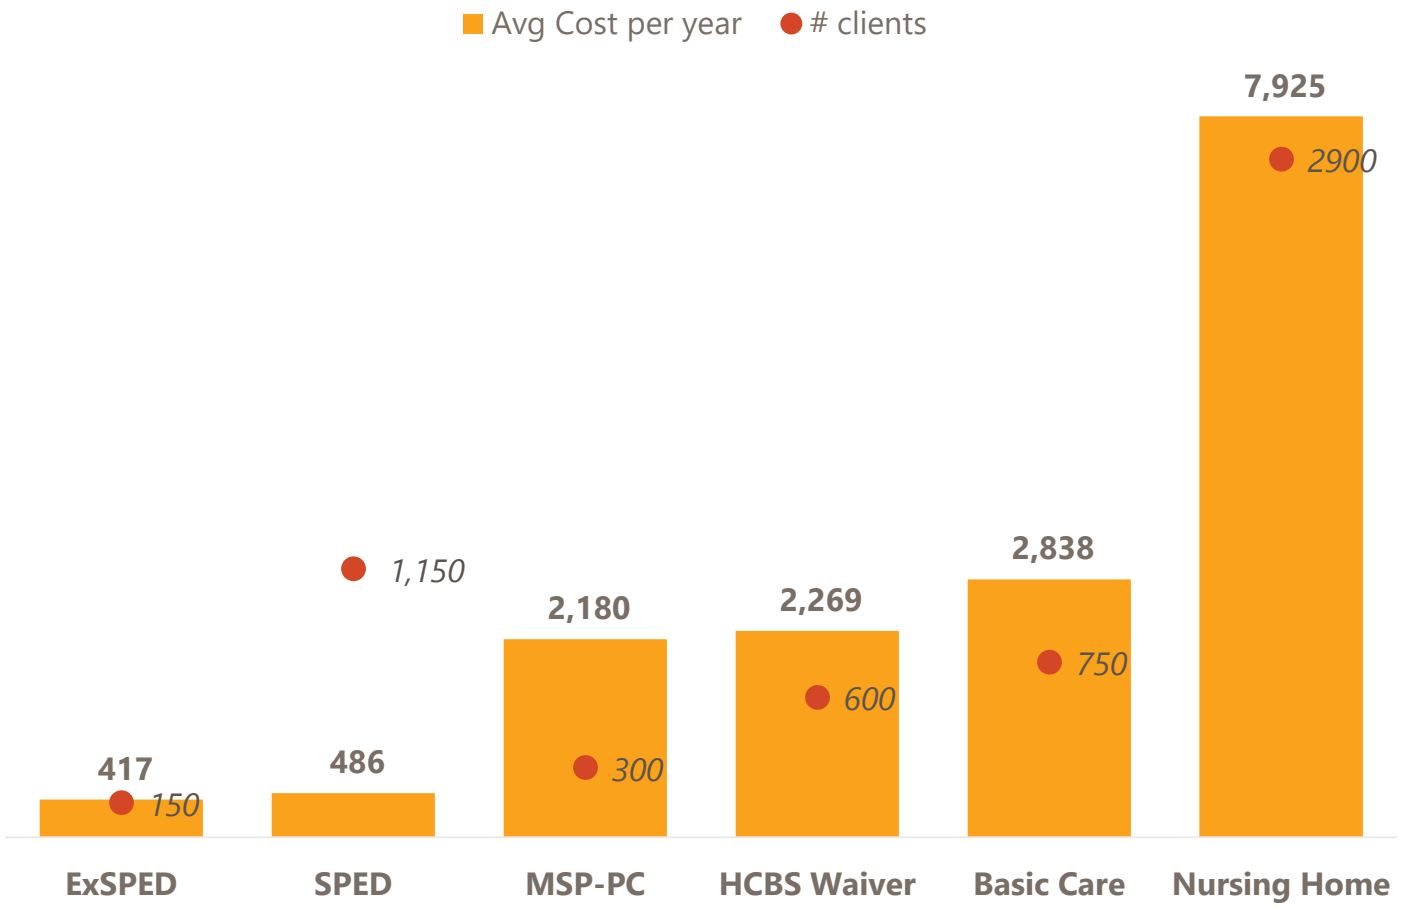
Home and community-based support services that provide the assistance necessary for someone to stay living independently.

Help people make modifications to their home to ensure that it is well suited to their changing health and mobility needs.

Improve ability to live as independently as possible

Intersecting approaches can help preserve possibilities and assure choice

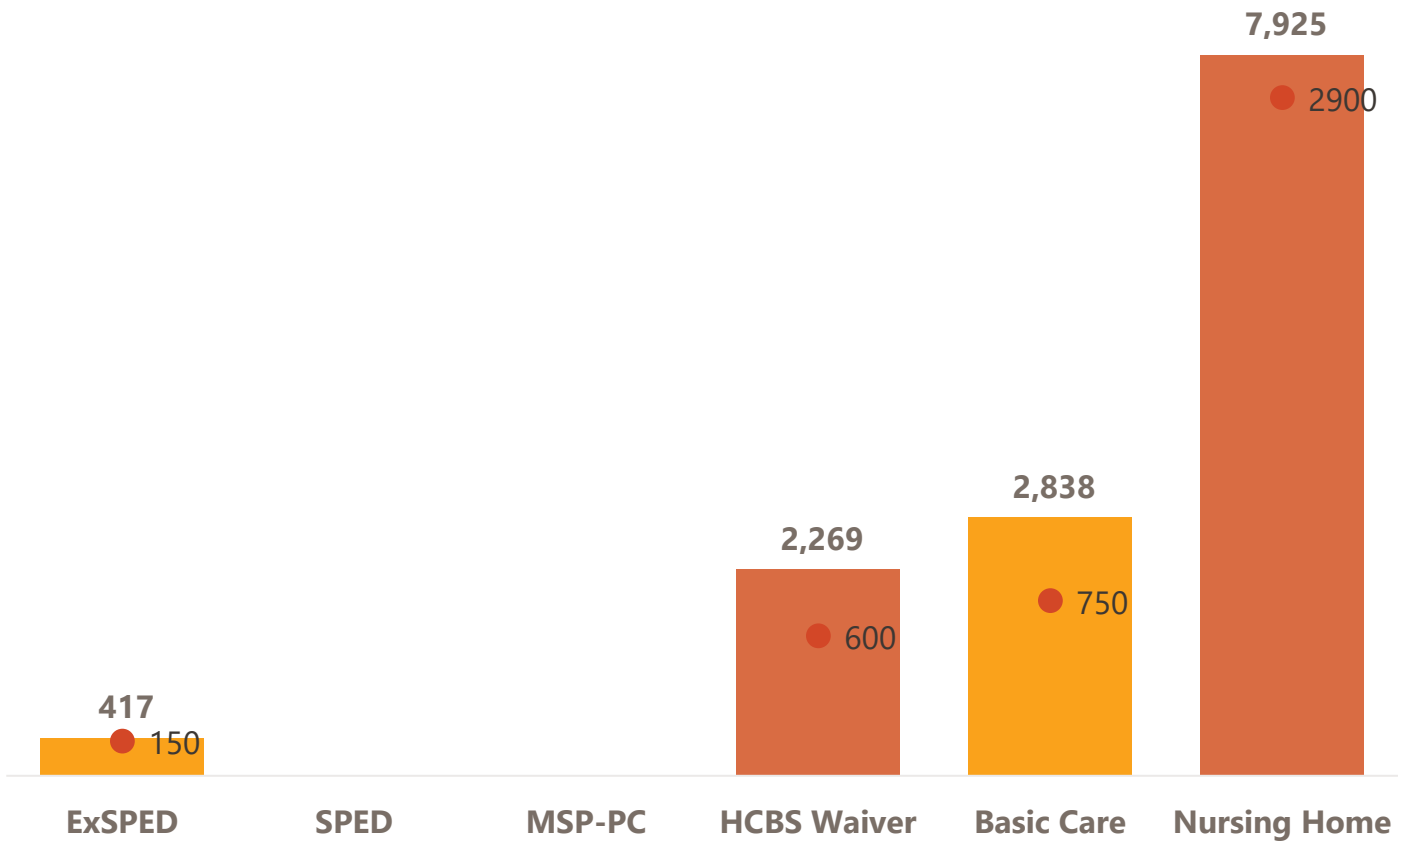
Rental Assistance
Property Tax Assistance
Special Assessment Assistance
Utility assistance
Assistance with home repairs



Personal Care
Medication Assistance
Meal Preparation
Shopping Assistance
Transportation Assistance
Companion Services
Preventative Health Care
Behavioral Health supports
Employment supports
Economic assistance
Budget planning
Care coordination

Renovation to address mobility
Renovation to address accessibility
Integration of assistive devices

What do we need to do to make sure we are delivering the right service in the right place at the right time?



AGING & ADULT SERVICES
Cost per month per person per type of service – SFY20

Program Descriptions / Detail

- **Service Payments for the Elderly and Disabled (SPED):** Provides services for people who are older or physically disabled, have limited assets, and who have difficulty completing tasks that enable them to live independently at home.
- **Expanded SPED (Ex-SPED):** Pays for in-home and community-based services for people who would otherwise receive care in a licensed basic care facility.
- **Home and community-based services (HCBS) waiver:** This waiver from the federal government allows the state to use Medicaid funds to provide services enabling eligible individuals who would otherwise require nursing home services to remain in their homes or communities.
- **Medicaid State Plan personal care (MSP-PC):** Personal care services available under the Medicaid state plan and enable persons with disabilities or chronic conditions accomplish tasks they would normally do for themselves if they did not have a disability.
- **Basic Care:** Room and board and personal care services for persons eligible for Medicaid.

AGING & ADULT SERVICES
Cost month per person per type of service – SFY20

Types of Care with same criteria for eligibility *(level of care, assets, income)*

Expanded SPED = Basic Care

$417 / mo v $2,838 / mo

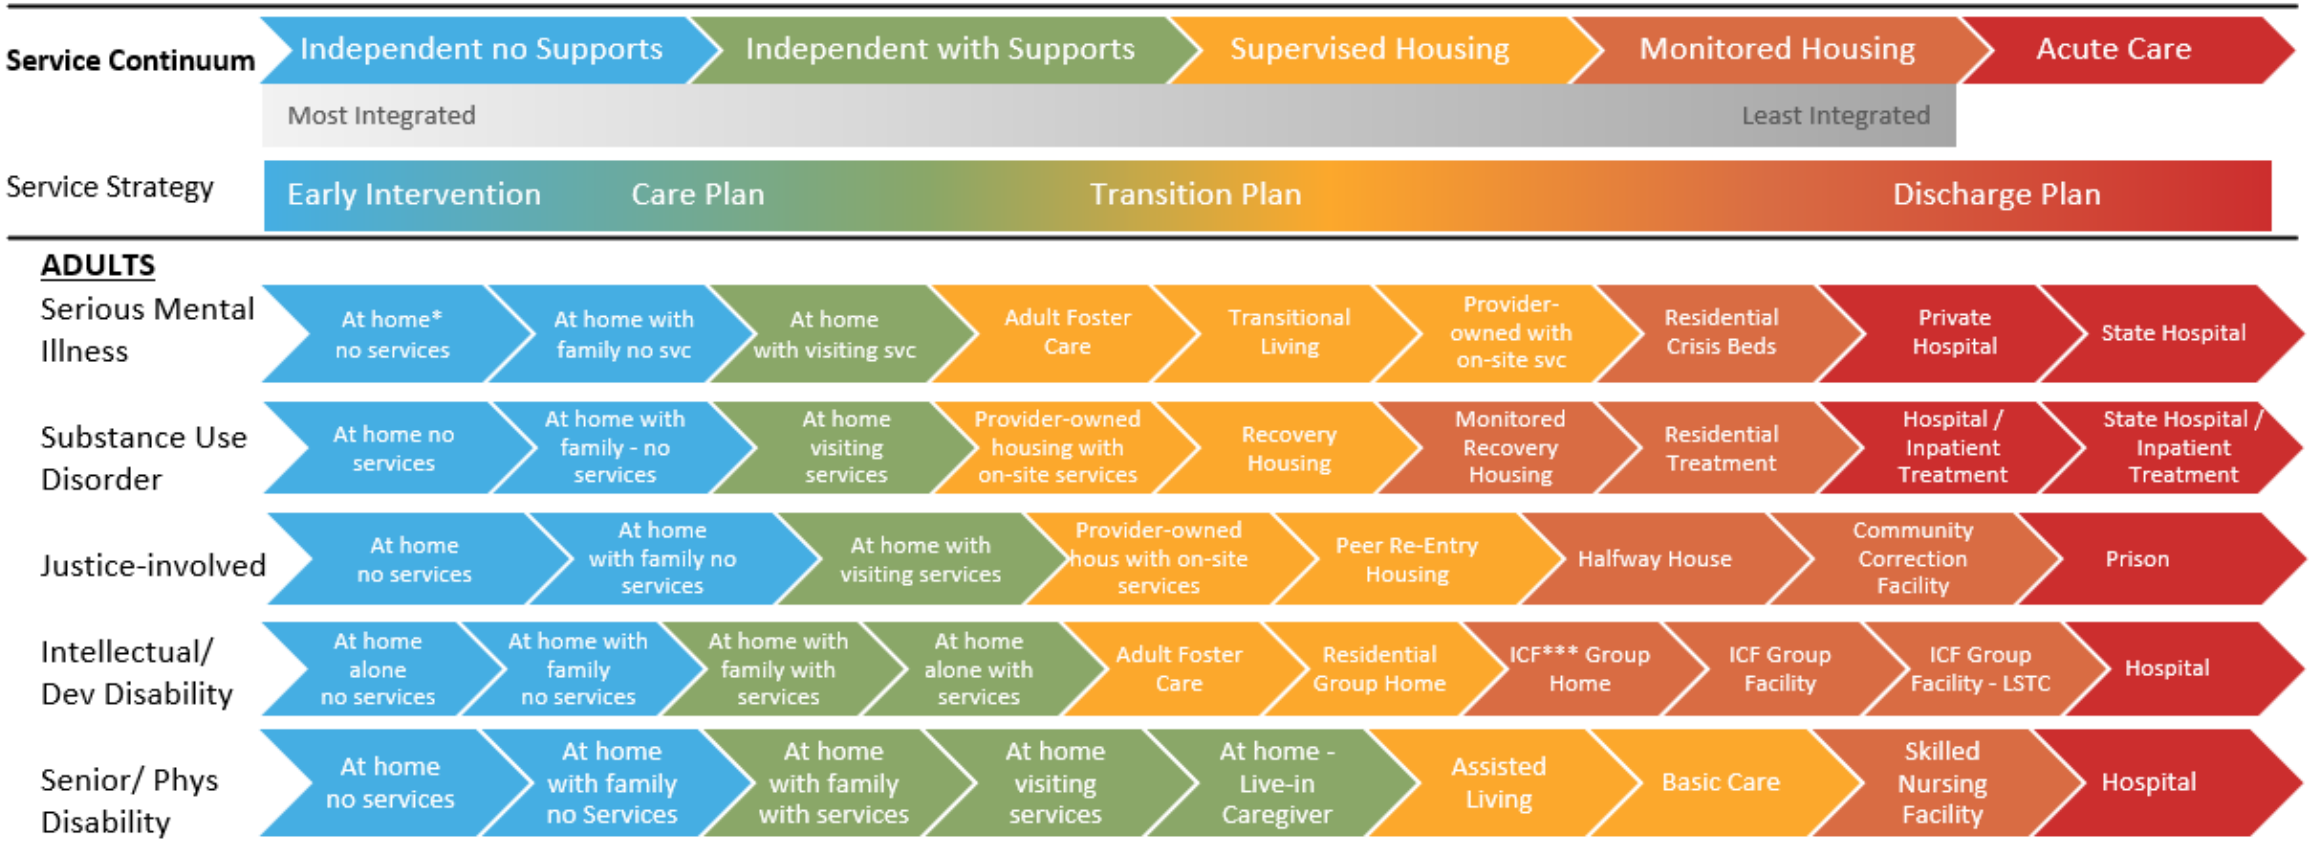
DIFFERENCE IN COST : $2,421

DIFFERENCE IN SVC :

Rent, Meals, Supervision

HCBS Waiver = Nursing Home

$2,269 / mo v $7,925 / mo



DIFFERENCE IN COST : $5,656

DIFFERENCE IN SVC :

Rent, Meals, Supervision, 24/7 Nursing

The Service Continuum - Adults

A critical concept defined

**Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)*

***Family = includes birth family, kin-caregiver, adopted family*

****ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)*

What do we need to do to help someone find their way through a situation that threatens to push them into crisis, and instead help them find their way to stability.

DHS 19-21 BIENNIUM ACCOMPLISHMENTS & WORK IN PROGRESS

Improved access to effective services

Process Improvement & Redesign Efforts

- Long term care eligibility team
- Child Protective Service Redesign
- Human Service Zones
- Centralized approach to childcare licensing
- Move to functional teams for child support
- Electronic Visit Verification & case management systems

Treatment & Recovery Supports

- Medication Assisted Treatment
- Expanded use of SUD voucher
- Behavioral health crisis services

In-Community Services

- Peer supports, Companionship, and Adult Foster Care
- Social Determinants of Health via Medicaid (1915i)
- Centralized connection point for home & community-based svc (ADRL)
- Extended Free Through Recovery

Return
On
Investment

NORTH Dakota | Human Services

Be Legendary.™

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
2/8/2021 am
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

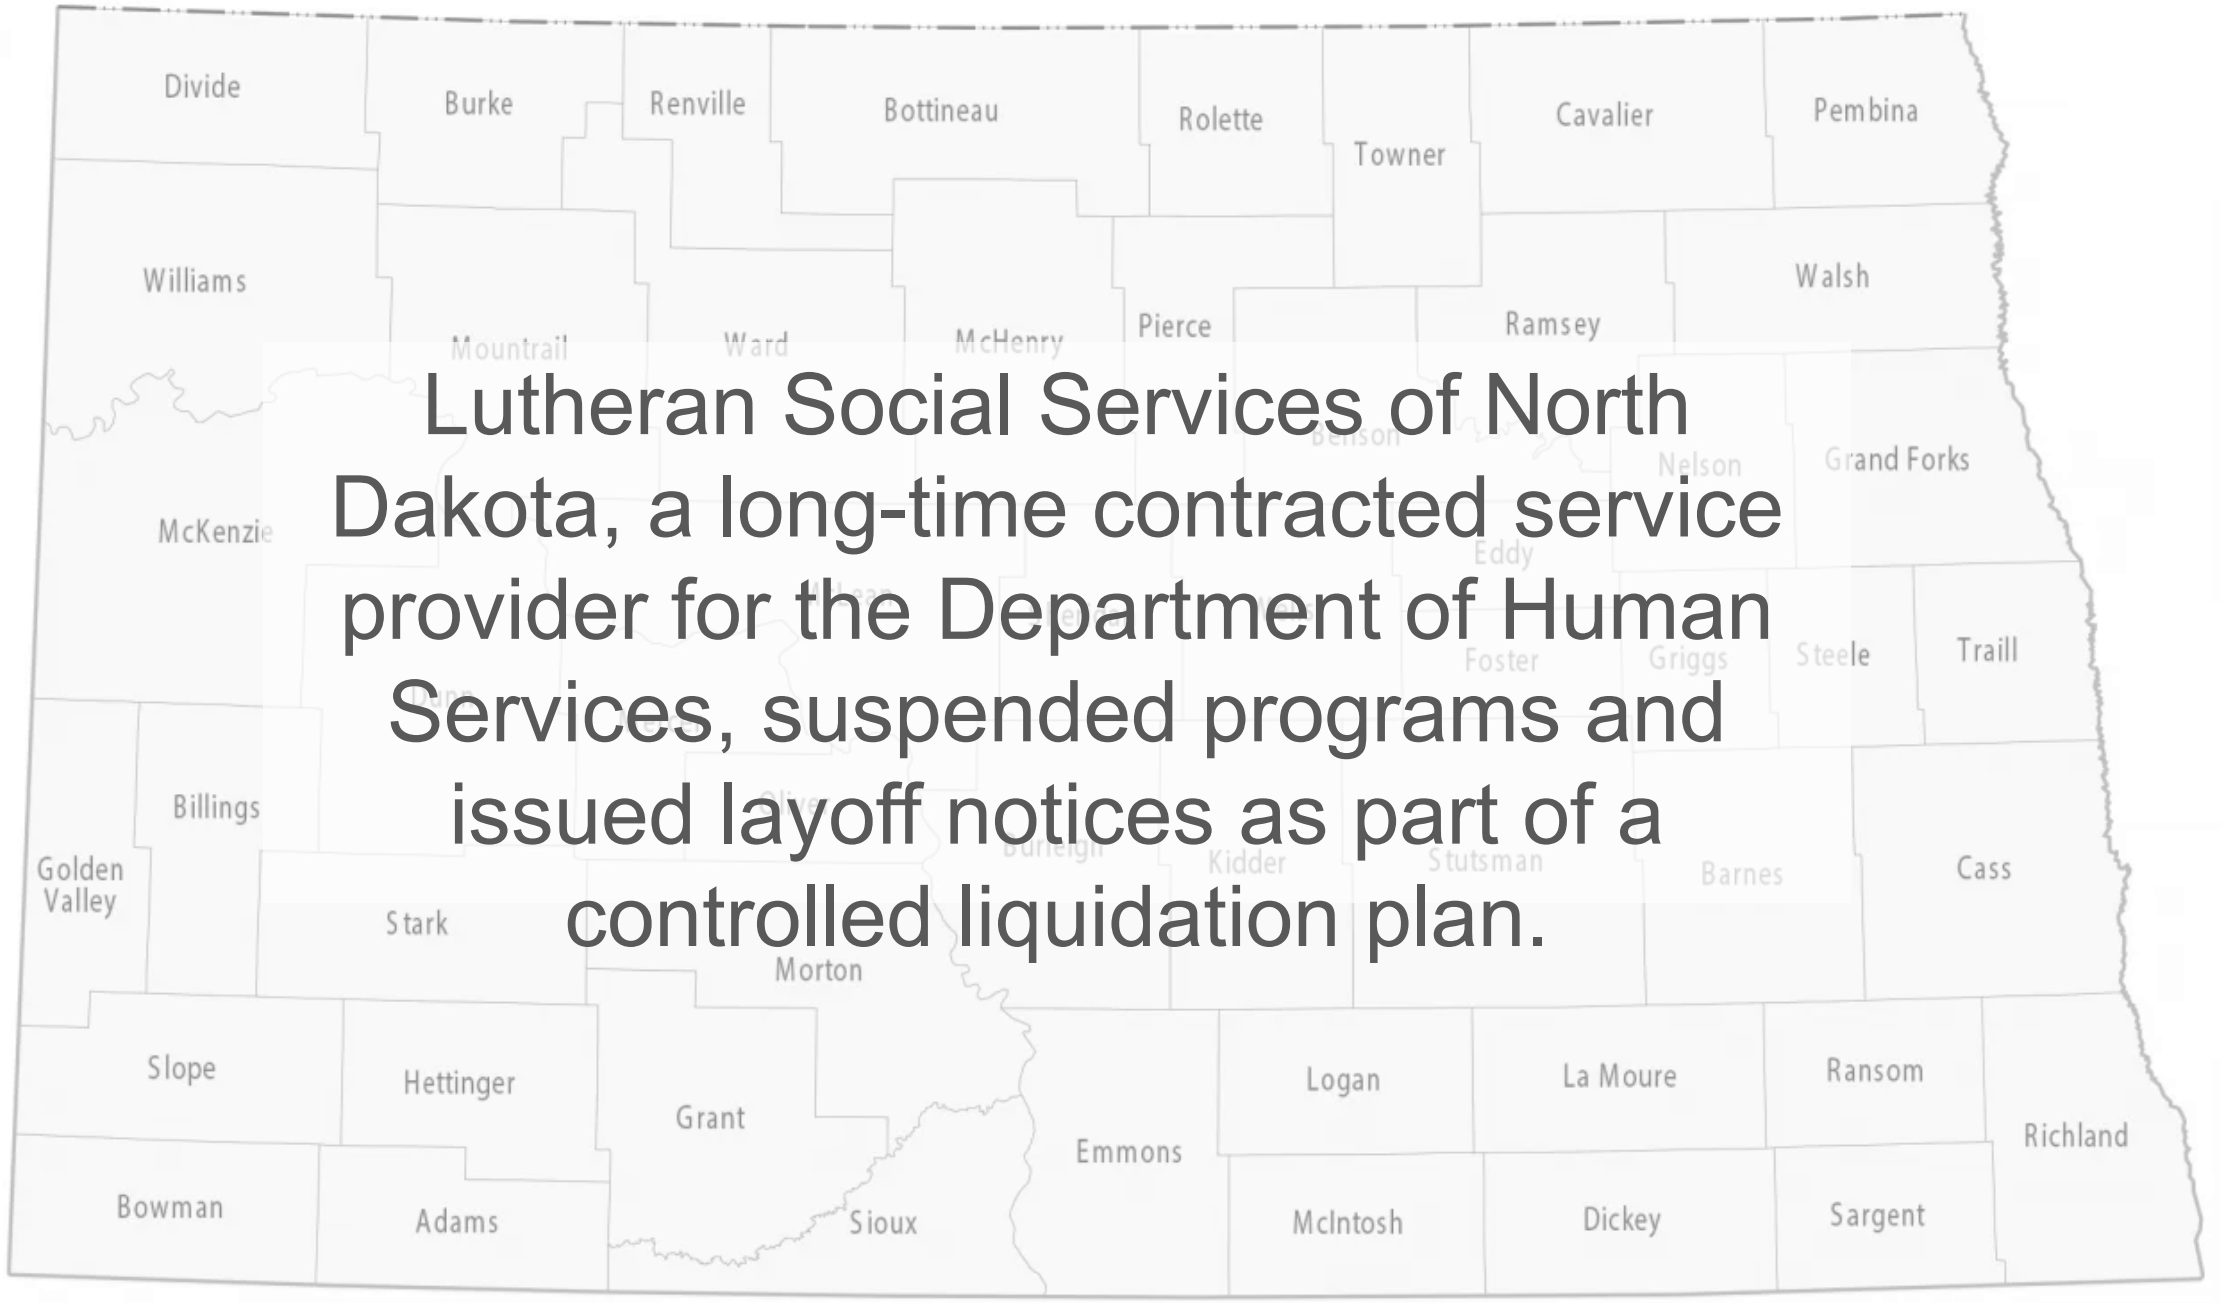
Chair Nelson Opened the meeting at 10:30 a.m.

Representative	Present	Absent
Nelson	P	
Kreidt	P	
Andersen	P	
Mitskog	P	
Schobinger		A
Strinden		A

Discussion Topics:

- Lutheran Social Services
- Early Childhood System Infrastructure
- Refugee Resettlement Program
- URM Foster Care

Sara Stolt (10:31 am) testified about Lutheran Social Services #6105



Chair Nelson closed the meeting at 11:14 a.m.

Cole Fleck, Committee Clerk

AN UPDATE RE THE MAINTENANCE OF CONTRACTED SERVICES FORMERLY PROVIDED BY LUTHERAN SOCIAL SERVICES OF NORTH DAKOTA

House Appropriations | Human Resources Subdivision
#6105

NORTH Dakota | Human Services
Be Legendary.™

Lutheran Social Services of North Dakota, a long-time contracted service provider for the Department of Human Services, suspended programs and issued layoff notices as part of a controlled liquidation plan.

Why did DHS establish a Work Group in this situation?

LSSND was contracted to provide several critical services on behalf of the state. The **state** has a **responsibility** to assure uninterrupted delivery of these services.

LSSND provided a wide array of human services n communities across North Dakota and, in many cases, was the **only provider** of a particular service in a community.

WORK GROUP GUIDING PRINCIPLES

- Minimize disruption of core services
- Ensure safety for children and adults receiving behavioral health and addiction/recovery services
- Transition core staff for state-required services to DHS temporarily, to allow for longer-term solutions to be identified
- Evaluate efficiency and effectiveness of contracted services to guide future procurement

EARLY CHILDHOOD SYSTEM INFRASTRUCTURE

Programs:
Child Care Aware
Bright & Early
Growing Futures

Coaching, training, workforce development, quality improvement for child care providers; parent resource and referral services

Funding:
Child Care Development Block Grant

Impact:
3 provider-oriented data systems; 33 staff

BEHAVIORAL HEALTH

Programs:
Project Renew
Crisis Counseling response line for behavioral health needs related to pandemic

Funding:
SAMHSA and FEMA Crisis Counseling Assistance

Impact:
5-7 staff temporarily connected to DHS to avoid interruption in availability of behavioral health crisis resource

Programs:
Gambler's Choice
Problem gambling prevention and treatment program to be made available to ND via State Lottery revenues

Funding:
State Special Funds (lottery)

Impact:
4 staff temporarily connected to DHS to avoid disruption in specialized addiction services

REFUGEE RESETTLEMENT COORDINATION

Programs:
Refugee Medical Assistance
Refugee Cash Assistance
Refugee Support Services

Wrap-around services for resettled refugees.

Funding:
Office of Refugee Resettlement (U.S. Dept of HHS)

Impact:
DHS re-assumes responsibility for state refugee coordination; 8-10 staff temporarily connected to DHS to facilitate program administration

URM FOSTER CARE

Programs:
Unaccompanied Refugee Minor (URM) Foster Care

Licensed foster care program that is fully federally funded to serve unaccompanied children

Funding:
Office of Refugee Resettlement

Impact:
7-9 staff temporarily connected to DHS to ensure continued service to 40 foster children in 25 licensed foster homes

TIMELINE

January 13-Present: DHS/LSSND Workgroup

January 15: Public notice of LSS ND closure

January 21: Public notice of DHS temporarily assuming early childhood infrastructure services

January 25: Public notice of DHS temporarily assuming responsibility for refugee resettlement

January 29: Notice of termination of state contracts

February 1: First set of employee / system transitions occur

March 1-31: Second set of employee / system transitions occur

NEXT STEPS

1. Finalize the operating budget and provide an amendment to HB 1012
2. Write the ND State Plan for Refugee Support Services and submit to ORR on February 22
3. Continue to transition staff
4. Fully operational March 31

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
2/18/2021 am
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Chair Nelson Opened the meeting at 8:33 a.m.

Representative	Present	Absent
Nelson	P	
Kreidt	P	
Andersen	P	
Mitskog	P	
Schobinger	P	
Strinden	P	

Discussion Topics:

- Amendment Review and Approval Process

Arnie Strebe (8:35 am) testified #6623 #6938 #6939 #6940

Rep Kreidt moved to adopt amendment and Rep Anderson seconded Voice

Vote (8:52 am) do pass Institutions, motion carries

Caprice Knapp (8:55 am) testified #6623

Rep Schobinger moved to adopt amendment and Rep Strinden seconded

Voice Vote (9:24 am) do pass long term care, motion carries

Rep Kreidt moved to adopt amendment and Rep Anderson seconded

Voice Vote (9:26 am) do pass Field Services. motion carries

Rep Anderson moved to adopt amendment and Rep Kreidt seconded

Voice Vote (9:40 am) do pass aging Services. motion carries

Rep Kreidt moved to adopt amendment and Strinden seconded

Voice Vote (9:54 am) do pass Developmental Disabilities, motion carries

Chair Nelson closed the meeting at 9:56 a.m.

Cole Fleck, Committee Clerk

These leases have been terminated or have not been budgeted in the 21-23 executive budget request
These leases do not expire at the end of the biennium

Life Skills and Transition Center Psychiatrist #6940

- At the present time, 88% of LSTC residents require consultation with a psychiatrist as part of their care.
- Psychiatry services are currently being provided by Dr. Hill, a psychiatrist employed at Northeast Human Service Center.
- He has historically provided approximately 4 hours of care to LSTC residents per week.
- He has been working with LSTC for 27 years. Dr. Hill specializes in serving people with developmental disabilities, which is a rare specialization in the field of psychiatry.
- Dr. Hill is retiring from NEHSC in June 2021.
- NEHSC intends to replace Dr. Hill with another full time psychiatrist.
- The needs for psychiatry services provided by NEHSC will make it difficult for the new hire to continue to serve LSTC.
- As such, LSTC is proposing to contract with Dr. Hill on an hourly basis, to ensure uninterrupted psychiatric care for LSTC residents. The contract provides approximately 8 hours of services to residents on site, to accommodate the increased need we expect to see due to LSTCs increased focus on providing crisis and stabilization services.
- Dr. Hill is willing to continue to provide this service to LSTC as proposed.
- His continued service to LSTC will help ensure LSTC maintains certifications and accreditation, particularly in terms of serving people with dual diagnoses and complex pharmacotherapy needs.
- The estimated cost of the psychiatric service contract for LSTC is $183,000.

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
2/19/2021am
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Chair Nelson Opened the meeting at 8:02 a.m.

Representative	Present	Absent
Nelson	P	
Kreidt	P	
Andersen	P	
Mitskog	P	
Schobinger	P	
Strinden	P	

Discussion Topics:

- Amendment Review and Approval

Arnie Strebe (8:03 am) testified #6623

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
2/19/2021 pm
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Chair Nelson Opened the meeting at 3:09 p.m.

Representative	Present	Absent
Nelson	P	
Kreidt	P	
Andersen	P	
Mitskog	P	
Schobinger	P	
Strinden	P	

Discussion Topics:

- Amendment Review and Approval Process

Arnie Strebe (3:10 pm) testified #6623

Pam Sagness (3:12 pm) testified #6623

Rep Kreidt moved to amend behavioral health funding transfers

Rep Mitskog Seconded

Voice Vote (3:15 pm) Motion Carries

Rep Kreidt moved to amend- behavioral health exemptions

Rep Mitskog Seconded

Voice Vote (3:16 pm) Motion Carries

Rep Strinden move to amend behavioral health exemption

Rep Anderson Seconded

Voice Vote (3:17 pm) Motion Carries

Rep Kreidt moved to amend behavioral health provider process and outcome measures

Rep Strinden Seconded

Voice Vote (3:18 pm) Motion Carries

Rep Kreidt moved to amend SUD vouchers

Rep Anderson Seconded

Roll Call Vote (3:48 pm)

Representative	Yea	Nay
Nelson	x	
Kreidt	x	
Andersen	x	
Mitskog	x	
Schobinger		x
Strinden		x

Motion Carries 4-2-0

Caprice Knapp (3:49 pm) testified #6623

Rep Kreidt move to amend traditional Medicaid

Rep Mitskog Seconded

Voice Vote (4:22 pm) Motion Carries

Rep Schobinger moved to pass amendment 21.0271.01001

Rep Strinden Seconded

Roll Call Vote (4:30 pm)

Representative	Yea	Nay
Nelson		x
Kreidt		x
Andersen	x	
Mitskog	x	
Schobinger	x	
Strinden	x	

Motion Carries 4-2-0

Rep Kreidt move to amend Medicaid expiation; reduce by 25 million dollars or a 4% reduction to the total appropriation

Rep Mitskog Seconded

Roll Call Vote (4:41 pm)

Representative	Yea	Nay
Nelson	x	
Kreidt	x	
Andersen		x
Mitskog	x	
Schobinger		x
Strinden		x

Motion Fails 3-3-0

Tim Blasl (4:45 pm) testified orally

Rep Mitskog move to amend Medicaid expiation, option 2 (transparency)

Rep Kreidt Seconded

Roll Call Vote (4:47 pm)

Representative	Yea	Nay
Nelson	x	
Kreidt	x	
Andersen	x	
Mitskog	x	
Schobinger	x	
Strinden	x	

Motion Carries 6-0-0

Rep Kreidt moved to amend Medicaid expiation; option 3 (packages for every under 21)

Rep Anderson Seconded

Roll Call Vote (4:57 pm)

Representative	Yea	Nay
Nelson	x	
Kreidt	x	
Andersen	x	
Mitskog	x	
Schobinger		x
Strinden	x	

Motion Caries 5-1-0

Rep Mitskog move to amend Medicaid expansion; option 4 (reimbursement for behavioral health)

Rep Kreidt Seconded

Roll Call Vote (4:57 pm)

Representative	Yea	Nay
Nelson	x	
Kreidt	x	
Andersen		x
Mitskog	x	
Schobinger		
Strinden		x

Motion Carries 3-2-1

Rep Mitskog move to amend DD services

Rep Strinden Seconded

Roll Call Vote (5:07 pm)

Representative	Yea	Nay
Nelson		x
Kreidt		x
Andersen		x
Mitskog	x	
Schobinger		
Strinden	x	

Motion Fails 2-3-1

Rep Strinden move to amend Disorder Vouchers

Rep Mitskog Seconded

Roll Call Vote (5:13 pm)

Representative	Yea	Nay
Nelson		x
Kreidt		x
Andersen		x
Mitskog	x	
Schobinger		
Strinden	x	

Motion Fails 2-3-1

Rep Kreidt moved to amend section 12

Rep Anderson Seconded

Voice Vote (5:18 pm) Motion Carries

Rep Kreidt moved to amend 1 and 1 inflators

Rep Anderson Seconded

Voice Vote (5:23 pm) Motion Carries

Rep Kreidt moved to amend; reduce units to 450 and reduce amount to 28 hundred

Rep Anderson Seconded

Voice Vote (5:25 pm) Motion Carries

Rep Kreidt moved to amend; for overall operation of the Department of human services a reduction 6 ½%

Rep Anderson Seconded

Voice Vote (5:29 pm) Motion Carries

Rep Kreidt move to amend; strike the health homes piece from the budget bill (Section 14)

Rep Mitskog Seconded

Voice Vote (5:30 pm) Motion Carries

Rep Kreidt Move to amend; $2 incentive reinstated for the 1.6 million

Rep Anderson Seconded

Voice Vote (5:32 pm) Motion Carries

Rep Kreidt Move to amend; grant 333 thousand dollars less than the 8 million dollars

Rep Anderson Seconded

Voice Vote (5:35 pm) Motion Carries

Chair Nelson closed the meeting at 5:38 p.m.

Cole Fleck, Committee Clerk

Prepared by the Legislative Council staff for
Representative Schobinger
January 18, 2021

PROPOSED AMENDMENTS TO HOUSE BILL NO. 1012

Page 1, line 2, after "services" insert "; to amend and reenact section 50-24.1-37 of the North Dakota Century Code, relating to the Medicaid expansion program"

Page 4, after line 16, insert:

"**SECTION 9. AMENDMENT.** Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (~~Effective through July 31, 2021 -~~ Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.

5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section."

Renumber accordingly

STATEMENT OF PURPOSE OF AMENDMENT:

This amendment removes the sunset clause for the Medicaid Expansion program and continues the program in its current form.

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
2/22/2021 pm
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Chair Nelson Opened the meeting at 4:01 p.m.

Representative	Present	Absent
Nelson	P	
Kreidt	P	
Andersen	P	
Mitskog	P	
Schobinger	P	
Strinden	P	

Discussion Topics:

- Amendment Review and Approval Process

Brady Larson (4:03 pm) testified orally

Rep Kreidt move amendment 21.0271.01003

Rep Mitskog Seconded

Roll Call Vote (4:45 pm)

Representative	Yea	Nay
Nelson	x	
Kreidt	x	
Andersen	x	
Mitskog	x	
Schobinger	x	
Strinden	x	

6-0-0 Motion carried.

Rep Kreidt Made a motioned for a do pass as amended

Rep Schobinger Seconded

Roll Call Vote (4:46 pm)

Representative	Yea	Nay
Nelson	x	
Kreidt	x	
Andersen	x	
Mitskog	x	
Schobinger	x	
Strinden	x	

6-0-0 Motion carried.

Chair Nelson closed the meeting at 4:47 p.m.

Cole Fleck, Committee Clerk and Donna Whetham

Prepared by the Legislative Council staff for
the House Appropriations - Human Resources
Division Committee
February 22, 2021

PROPOSED AMENDMENTS TO HOUSE BILL NO. 1012

Page 1, line 2, after "services" insert "; to create and enact a new section to chapter 50-06 of the North Dakota Century Code, relating to substance use disorder treatment voucher system grants; to amend and reenact sections 50-06-42 and 50-24.1-37 of the North Dakota Century Code, relating to the substance use disorder voucher program and the Medicaid expansion program; to repeal section 50-24.1-18.1 of the North Dakota Century Code, relating to consumer-directed health maintenance services"

Page 1, line 2, replace "and" with "to provide legislative intent;"

Page 1, line 2, after "report" insert "; to provide for a study; to provide for a transfer; to provide for the conveyance of land; to provide an application; to provide an effective date; to provide an expiration date; and to declare an emergency"

Total general fund	$0	$1,311,724	$1,311,724"

Page 2, remove lines 27 through 30

Page 3, replace lines 1 and 2 with:

"

	Base Level	Adjustments or Enhancements	Appropriation
Grand total general fund	$1,461,150,884	$109,204,660	$1,570,355,544
Grant total special funds	2,623,604,181	287,500,058	2,911,104,239
Grant total all funds	$4,084,755,065	$396,704,718	$4,481,459,783
Full-time equivalent positions	2,230.23	1.60	2,231.83"

Page 3, line 3, after "**FUNDING**" insert "**- EFFECT ON BASE BUDGET - REPORT TO SIXTY-EIGHTH LEGISLATIVE ASSEMBLY**"

Page 3, line 4, after "biennium" insert "and the one-time funding items included in the appropriation in section 1 of this Act"

Page 3, replace line 6 with:

"Technology projects	$13,785,658	$67,641,747"

Page 3, replace lines 11 through 14 with:

"State hospital study	200,000	300,000
Medicaid system consultant	0	300,000
Nursing facility payment methodology	0	7,200,000
Total all funds	$22,068,926	$75,441,747
Less estimated income	20,556,323	51,607,531
Total general fund	$1,512,603	$23,834,216

The 2021-23 biennium one-time funding amounts are not a part of the entity's base budget for the 2023-25 biennium. The department of human services shall report to the appropriations committees of the sixty-eighth legislative assembly on the use of this one-time funding for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 3. APPROPRIATION - 2019-21 BIENNIUM - DEPARTMENT OF HUMAN SERVICES - FIRE PROTECTION AGREEMENTS - EXEMPTION. There is appropriated out of any moneys in the department of human services operating fund in the state treasury, not otherwise appropriated, the sum of $333,333, or so much of the sum as may be necessary, to the department of human services for the purpose of providing a grant to a political subdivision for the state share of costs relating to the purchase of a fire truck, for the period beginning with the effective date of this Act and ending June 30, 2021. The funding appropriated in this section is a one-time funding item. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section. The department of human services shall discontinue any agreement with a political subdivision for fire

protection services and may not enter any future agreement with a political subdivision for fire protection services."

Page 4, after line 2, insert:

"**SECTION 6. FULL-TIME EQUIVALENT POSITION - AGING SERVICES.** Section 1 of this Act includes one full-time equivalent position for the administration of services resulting from a federal department of justice lawsuit settlement. This position is authorized only for the biennium beginning July 1, 2021, and ending June 30, 2023, and may not be included in the department's base budget for the biennium beginning July 1, 2023, and ending June 30, 2025."

Page 4, line 4, replace "$173,700,000" with "$187,385,888"

Page 4, remove lines 7 through 10

Page 4, line 12, replace "$32,400,000" with "$24,000,000"

Page 4, line 16, after "fund" insert "and $1,150,538 from federal funds"

Page 4, after line 16, insert:

"**SECTION 10. CAPITAL PAYMENTS.** During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to expend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 11. STATE HOSPITAL - CAPITAL PROJECTS - EMERGENCY COMMISSION APPROVAL. During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to proceed with the demolition of the chapel and employee building and associated tunnels at the state hospital. Pursuant to section 4 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act. The department may transfer funds for the demolition of the identified buildings and associated tunnels and for emergency capital projects. Notwithstanding section 54-27-12, the department of human services may spend up to $5,000,000 for emergency projects under this section and may seek emergency commission approval to spend more than $5,000,000 under this section.

SECTION 12. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:

   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.

b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.

c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915i state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

6. The department of human services and the Medicaid expansion managed care organization shall ensure the appropriate contract amendment is adopted for coverage through December 31, 2021. The contract amendment shall stay within the appropriation and the requirements of chapter 54-44.4 do not apply.

SECTION 13. EXPENDITURES MAY NOT EXCEED APPROPRIATION - NURSING HOME RATES. Subdivision 2 of section 1 of this Act includes the sum of $621,362,568, of which $288,313,216 is from the general fund, for nursing home payments for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for nursing homes may not exceed this amount.

SECTION 14. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Substance use disorder treatment voucher system grants.

1. A licensed substance abuse treatment program, excluding regional human service centers and hospital or medical clinic-based programs for medical management of withdrawal, may apply for a competitive substance use disorder treatment voucher system grant. A licensed substance abuse treatment program is eligible for a one-time grant award. To receive a grant, a licensed substance abuse treatment program must:

   a. Submit an application in the form and manner prescribed by the department;

   b. Enter into a grant agreement with the department;

   c. Use grant funds for a licensed substance abuse treatment program with less than seventeen beds in an underserved area, as determined by the department, in the state's substance abuse treatment system;

   d. Use the grant funds to support the provision of substance use disorder treatment in underserved areas of the state's substance abuse treatment system;

   e. Provide and disclose information needed to comply with the department's data collection requirements; and

   f. Operate in compliance with grant requirements.

2. The department, within legislative appropriations, may distribute up to three grants under this section to licensed substance abuse treatment programs.

3. The department may recapture grant funds distributed to a licensed program found by the department to be out of compliance with the requirements established by the grant program, including ending or reducing the operation of the substance use disorder treatment services in the underserved area.

4. The department may not collect property, equipment, or supplies purchased with grant funds from the licensed substance abuse treatment program after successful completion of the terms of the grant.

5. The grant term must be for five years.

SECTION 15. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, and hospital- or medical clinic-based programs for medical management of withdrawal. Services eligible for the voucher program include only those levels of care recognized by the American society of

addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

2. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. No more than thirty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for nonresidential outpatient and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 16. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (~~Effective through July 31, 2021 -~~ Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.

5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.

SECTION 17. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (~~Effective through July 31, 2021 -~~ Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services and coverages for individuals ages nineteen and twenty, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. ~~This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.~~

~~5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.~~

SECTION 18. REPEAL. Section 50-24.1-18.1 of the North Dakota Century Code is repealed.

SECTION 19. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER. The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton parks and recreation department. The department of human services may convey a portion of two parcels of land commonly referred to as "the bowl" on the terms and conditions determined appropriate by the department and the attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance.

SECTION 20. LEASE OF LAND - STATE HOSPITAL. The department of human services and national guard may enter an agreement to lease up to twenty acres of real property associated with the state hospital for the national guard to construct a new training and storage facility.

SECTION 21. PROVIDER PROCESS AND OUTCOME MEASURES. Providers that receive funding from the department of human services shall submit process and outcome measures, as required by the department, to the department of human services for programs and services supported by state funding during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 22. IN-HOME SUPPORT SERVICES - DEVELOPMENTAL DISABILITIES WAIVER. The department of human services shall add in-home support services to the appendix K application submitted by the department to the centers for Medicare and Medicaid services for the developmental disability services waiver for the COVID-19 emergency. Funding for in-home support services under the appendix K application may not exceed $250,000 during the COVID-19 emergency.

SECTION 23. QUALIFIED RESIDENTIAL TREATMENT PROVIDERS. The department of human services shall adopt rules, on or before October 1, 2021, establishing a new ratesetting process and requirements for foster care maintenance rates for qualified residential treatment providers based on the appropriation approved by the sixty-seventh legislative assembly.

SECTION 24. COMMUNITY BEHAVIORAL HEALTH PROGRAM. Pursuant to section 4 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021, and ending June 30, 2023, as requested by the department of human services. The department may transfer funds for the continuation of the community behavioral health program pursuant to subsection 2 of section 54-23.3-10.

SECTION 25. EXEMPTION. The amount appropriated for the Medicaid management information system technology stack upgrade in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the Medicaid management information system technology stack upgrade during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 26. EXEMPTION. The amount appropriated for the modification of the department of human services' eligibility systems in chapter 578 of the 2011 Special Session Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2013-15 biennium, then the 2015-17 biennium, then the 2017-19 biennium, and then the 2019-21 biennium are available for the completion of the modification of the eligibility systems project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 27. EXEMPTION. The amount appropriated for the development of the child care licensing and data system in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the child care licensing and data system during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 28. EXEMPTION. The amount appropriated for the development of the health information network in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the health information network during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 29. EXEMPTION. The sum of $200,000 from the general fund appropriated for the department's operating expenses for the school behavioral health program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the school behavioral health pilot projects during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 30. EXEMPTION. The sum of $150,000 from the general fund appropriated for the department's operating expenses for behavioral health recovery home grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation may be used for behavioral health recovery home grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 31. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITY RATES. The appropriation in section 1 of this Act includes adjustments to reimbursement rates for developmental disability service providers. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly if funding provided for developmental disability provider payments is not sufficient to pay actual expenses.

SECTION 32. STATE HOSPITAL TREATMENT CAMPUS - REPORT TO LEGISLATIVE MANAGEMENT. During the 2021-22 interim, the department of human services, with the assistance of the state hospital's governing body, stakeholders, members of the legislative assembly, and consultants, shall conduct a study and prepare a report. The report must provide a cost-benefit analysis and available options and address the feasibility and desirability of closing the state hospital, renovating the state hospital, or building a new treatment campus to meet the health care needs of the state. Before October 1, 2022, the department of human services shall provide a report to the legislative management regarding the results of the study. Subdivision 3 of section 1 of this Act includes the sum of $300,000 for the purpose of contracting with a consultant to assist in the report and recommendation.

SECTION 33. BEHAVIORAL HEALTH SERVICES - REPORT TO LEGISLATIVE MANAGEMENT. During the 2021-22 interim, the department of human services shall study the feasibility and desirability of implementing behavioral health services for the medical assistance expansion program through an administrative services organization. Subdivision 2 of section 1 of this Act includes the sum of $300,000 for the purpose of contracting with a consultant to assist in the study and to develop a plan to implement behavioral health services for the medical assistance expansion program through an administrative services organization. The department of human services shall provide reports to the legislative management regarding the status and results of the study.

SECTION 34. EFFECTIVE DATE. Section 17 of this Act becomes effective January 1, 2022.

SECTION 35. EXPIRATION DATE. Section 14 of this Act is effective through July 1, 2027, and after that date is ineffective.

SECTION 36. EXPIRATION DATE. Section 16 of this Act is effective through December 31, 2021, and after that date is ineffective.

SECTION 37. EMERGENCY. Section 3 of this Act is declared to be an emergency measure."

Renumber accordingly

Total changes to base level funding	(256.72)	($31,262,297)	($13,370,943)	($44,633,240)

House Bill No. 1012 - Other Changes - House Action

This amendment also:

- Provides a 2019-21 biennium deficiency appropriation from the DHS operating fund for a grant to a political subdivision for costs to purchase a fire truck.
- Identifies 1 FTE position in the Aging Services Division for administration of services relating to a federal

Department of Justice lawsuit settlement as being authorized for only the 2021-23 biennium.

- Adjusts sections to identify the amount of funding provided from the human service finance fund, community health trust fund, and health care trust fund.
- Removes a section relating to funding provided from the tobacco prevention and control trust fund.
- Authorizes capital projects and payments at the State Hospital and Life Skills and Transition Center.
- Specifies the use of funding for the substance use disorder voucher program.
- Provides Medicaid Expansion expenditures may not exceed appropriations for the program.
- Provides expenditures for nursing facility payments may not exceed appropriations for the payments.
- Repeals the sunset clause on the Medicaid Expansion program, transfers 19- and 20-year old program recipients to a fee-for-service arrangement, and removes privacy requirements regarding provider reimbursement rates.
- Repeals Section 50-24.1-18.1 which relates to consumer-directed health maintenance services.
- Authorizes the conveyance of land at the Life Skills and Transition Center and authorizes the lease of land at the State Hospital.
- Requires providers receiving funding from DHS to submit process and outcome measures.
- Requires DHS to include in-home support services in the Appendix K application the department submits to the Centers for Medicare and Medicaid Services.
- Requires DHS to adopt rules to establish a new ratesetting process and requirements for foster care maintenance rates for qualified residential treatment providers.
- Authorizes DHS to transfer funds between line items to provide additional funding for the community behavioral health program.
- Provides exemptions to allow DHS to continue prior biennium appropriations into the 2021-23 biennium for various projects.
- Provides legislative intent that DHS seek a deficiency appropriation if funding for developmental disability rates is not sufficient to cover program expenses.
- Provides for DHS to conduct a study of the State Hospital complex.
- Provides for DHS to conduct a study of implementing behavioral health services for the Medicaid Expansion program through an administrative services organization.

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations Committee
Brynhild Haugland Room, State Capitol

HB 1012
2/23/2021

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

7:24 Chairman Delzer- Opened the meeting for HB 1012

Attendance	P/A
Representative Jeff Delzer	P
Representative Keith Kempenich	P

Total all funds	$22,068,926	$75,441,747
Less estimated income	20,556,323	51,607,531
Total general fund	$1,512,603	$23,834,216

The 2021-23 biennium one-time funding amounts are not a part of the entity's base budget for the 2023-25 biennium. The department of human services shall report to the appropriations committees of the sixty-eighth legislative assembly on the use of this one-time funding for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 3. APPROPRIATION - 2019-21 BIENNIUM - DEPARTMENT OF HUMAN SERVICES - FIRE PROTECTION AGREEMENTS - EXEMPTION. There is appropriated out of any moneys in the department of human services operating fund in the state treasury, not otherwise appropriated, the sum of $333,333, or so much of the sum as may be necessary, to the department of human services for the purpose of providing a grant to a political subdivision for the state share of costs relating to the purchase of a fire truck, for the period beginning with the effective date of this Act and ending June 30, 2021. The funding appropriated in this section is a one-time funding item. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section. The department of human services shall discontinue any agreement with a political subdivision for fire

protection services and may not enter any future agreement with a political subdivision for fire protection services."

Page 4, after line 2, insert:

"**SECTION 6. FULL-TIME EQUIVALENT POSITION - AGING SERVICES.** Section 1 of this Act includes one full-time equivalent position for the administration of services resulting from a federal department of justice lawsuit settlement. This position is authorized only for the biennium beginning July 1, 2021, and ending June 30, 2023, and may not be included in the department's base budget for the biennium beginning July 1, 2023, and ending June 30, 2025."

Page 4, line 16, after "fund" insert "and $1,150,538 from federal funds"

Page 4, after line 16, insert:

"**SECTION 10. CAPITAL PAYMENTS.** During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to expend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 11. STATE HOSPITAL - CAPITAL PROJECTS - EMERGENCY COMMISSION APPROVAL. During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to proceed with the demolition of the chapel and employee building and associated tunnels at the state hospital. Pursuant to section 4 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act. The department may transfer funds for the demolition of the identified buildings and associated tunnels and for emergency capital projects. Notwithstanding section 54-27-12, the department of human services may spend up to $5,000,000 for emergency projects under this section and may seek emergency commission approval to spend more than $5,000,000 under this section.

SECTION 12. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:

   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.

b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.

c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915i state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

6. The department of human services and the Medicaid expansion managed care organization shall ensure the appropriate contract amendment is adopted for coverage through December 31, 2021. The contract amendment shall stay within the appropriation and the requirements of chapter 54-44.4 do not apply.

SECTION 13. EXPENDITURES MAY NOT EXCEED APPROPRIATION - NURSING HOME RATES. Subdivision 2 of section 1 of this Act includes the sum of $621,362,568, of which $288,313,216 is from the general fund, for nursing home payments for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for nursing homes may not exceed this amount.

SECTION 14. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Substance use disorder treatment voucher system grants.

1. A licensed substance abuse treatment program, excluding regional human service centers and hospital or medical clinic-based programs for medical management of withdrawal, may apply for a competitive substance use disorder treatment voucher system grant. A licensed substance abuse treatment program is eligible for a one-time grant award. To receive a grant, a licensed substance abuse treatment program must:

   a. Submit an application in the form and manner prescribed by the department;

   b. Enter into a grant agreement with the department;

   c. Use grant funds for a licensed substance abuse treatment program with less than seventeen beds in an underserved area, as determined by the department, in the state's substance abuse treatment system;

   d. Use the grant funds to support the provision of substance use disorder treatment in underserved areas of the state's substance abuse treatment system;

   e. Provide and disclose information needed to comply with the department's data collection requirements; and

   f. Operate in compliance with grant requirements.

2. The department, within legislative appropriations, may distribute up to three grants under this section to licensed substance abuse treatment programs.

3. The department may recapture grant funds distributed to a licensed program found by the department to be out of compliance with the requirements established by the grant program, including ending or reducing the operation of the substance use disorder treatment services in the underserved area.

4. The department may not collect property, equipment, or supplies purchased with grant funds from the licensed substance abuse treatment program after successful completion of the terms of the grant.

5. The grant term must be for five years.

SECTION 15. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, and hospital- or medical clinic-based programs for medical management of withdrawal. Services eligible for the voucher program include only those levels of care recognized by the American society of

addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

2. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. No more than thirty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for nonresidential outpatient and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 16. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (~~Effective through July 31, 2021 -~~ Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.

5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.

SECTION 17. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (~~Effective through July 31, 2021 -~~ Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services and coverages for individuals ages nineteen and twenty, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. ~~This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.~~

~~5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.~~

SECTION 18. REPEAL. Section 50-24.1-18.1 of the North Dakota Century Code is repealed.

SECTION 19. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER. The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton parks and recreation department. The department of human services may convey a portion of two parcels of land commonly referred to as "the bowl" on the terms and conditions determined appropriate by the department and the attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance.

SECTION 20. LEASE OF LAND - STATE HOSPITAL. The department of human services and national guard may enter an agreement to lease up to twenty acres of real property associated with the state hospital for the national guard to construct a new training and storage facility.

SECTION 21. PROVIDER PROCESS AND OUTCOME MEASURES. Providers that receive funding from the department of human services shall submit process and outcome measures, as required by the department, to the department of human services for programs and services supported by state funding during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 22. IN-HOME SUPPORT SERVICES - DEVELOPMENTAL DISABILITIES WAIVER. The department of human services shall add in-home support services to the appendix K application submitted by the department to the centers for Medicare and Medicaid services for the developmental disability services waiver for the COVID-19 emergency. Funding for in-home support services under the appendix K application may not exceed $250,000 during the COVID-19 emergency.

SECTION 23. QUALIFIED RESIDENTIAL TREATMENT PROVIDERS. The department of human services shall adopt rules, on or before October 1, 2021, establishing a new ratesetting process and requirements for foster care maintenance rates for qualified residential treatment providers based on the appropriation approved by the sixty-seventh legislative assembly.

SECTION 24. COMMUNITY BEHAVIORAL HEALTH PROGRAM. Pursuant to section 4 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021, and ending June 30, 2023, as requested by the department of human services. The department may transfer funds for the continuation of the community behavioral health program pursuant to subsection 2 of section 54-23.3-10.

SECTION 25. EXEMPTION. The amount appropriated for the Medicaid management information system technology stack upgrade in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the Medicaid management information system technology stack upgrade during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 26. EXEMPTION. The amount appropriated for the modification of the department of human services' eligibility systems in chapter 578 of the 2011 Special Session Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2013-15 biennium, then the 2015-17 biennium, then the 2017-19 biennium, and then the 2019-21 biennium are available for the completion of the modification of the eligibility systems project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 27. EXEMPTION. The amount appropriated for the development of the child care licensing and data system in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the child care licensing and data system during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 28. EXEMPTION. The amount appropriated for the development of the health information network in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the health information network during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 29. EXEMPTION. The sum of $200,000 from the general fund appropriated for the department's operating expenses for the school behavioral health program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the school behavioral health pilot projects during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 30. EXEMPTION. The sum of $150,000 from the general fund appropriated for the department's operating expenses for behavioral health recovery home grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation may be used for behavioral health recovery home grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 31. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITY RATES. The appropriation in section 1 of this Act includes adjustments to reimbursement rates for developmental disability service providers. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly if funding provided for developmental disability provider payments is not sufficient to pay actual expenses.

SECTION 32. STATE HOSPITAL TREATMENT CAMPUS - REPORT TO LEGISLATIVE MANAGEMENT. During the 2021-22 interim, the department of human services, with the assistance of the state hospital's governing body, stakeholders, members of the legislative assembly, and consultants, shall conduct a study and prepare a report. The report must provide a cost-benefit analysis and available options and address the feasibility and desirability of closing the state hospital, renovating the state hospital, or building a new treatment campus to meet the health care needs of the state. Before October 1, 2022, the department of human services shall provide a report to the legislative management regarding the results of the study. Subdivision 3 of section 1 of this Act includes the sum of $300,000 for the purpose of contracting with a consultant to assist in the report and recommendation.

SECTION 33. BEHAVIORAL HEALTH SERVICES - REPORT TO LEGISLATIVE MANAGEMENT. During the 2021-22 interim, the department of human services shall study the feasibility and desirability of implementing behavioral health services for the medical assistance expansion program through an administrative services organization. Subdivision 2 of section 1 of this Act includes the sum of $300,000 for the purpose of contracting with a consultant to assist in the study and to develop a plan to implement behavioral health services for the medical assistance expansion program through an administrative services organization. The department of human services shall provide reports to the legislative management regarding the status and results of the study.

SECTION 34. EFFECTIVE DATE. Section 17 of this Act becomes effective January 1, 2022.

SECTION 35. EXPIRATION DATE. Section 14 of this Act is effective through July 1, 2027, and after that date is ineffective.

SECTION 36. EXPIRATION DATE. Section 16 of this Act is effective through December 31, 2021, and after that date is ineffective.

SECTION 37. EMERGENCY. Section 3 of this Act is declared to be an emergency measure."

Renumber accordingly

House Bill No. 1012 - Other Changes - House Action

This amendment also:

- Provides a 2019-21 biennium deficiency appropriation from the DHS operating fund for a grant to a political subdivision for costs to purchase a fire truck.
- Identifies 1 FTE position in the Aging Services Division for administration of services relating to a federal

Department of Justice lawsuit settlement as being authorized for only the 2021-23 biennium.

- Adjusts sections to identify the amount of funding provided from the human service finance fund, community health trust fund, and health care trust fund.
- Removes a section relating to funding provided from the tobacco prevention and control trust fund.
- Authorizes capital projects and payments at the State Hospital and Life Skills and Transition Center.
- Specifies the use of funding for the substance use disorder voucher program.
- Provides Medicaid Expansion expenditures may not exceed appropriations for the program.
- Provides expenditures for nursing facility payments may not exceed appropriations for the payments.
- Repeals the sunset clause on the Medicaid Expansion program, transfers 19- and 20-year old program recipients to a fee-for-service arrangement, and removes privacy requirements regarding provider reimbursement rates.
- Repeals Section 50-24.1-18.1 which relates to consumer-directed health maintenance services.
- Authorizes the conveyance of land at the Life Skills and Transition Center and authorizes the lease of land at the State Hospital.
- Requires providers receiving funding from DHS to submit process and outcome measures.
- Requires DHS to include in-home support services in the Appendix K application the department submits to the Centers for Medicare and Medicaid Services.
- Requires DHS to adopt rules to establish a new ratesetting process and requirements for foster care maintenance rates for qualified residential treatment providers.
- Authorizes DHS to transfer funds between line items to provide additional funding for the community behavioral health program.
- Provides exemptions to allow DHS to continue prior biennium appropriations into the 2021-23 biennium for various projects.
- Provides legislative intent that DHS seek a deficiency appropriation if funding for developmental disability rates is not sufficient to cover program expenses.
- Provides for DHS to conduct a study of the State Hospital complex.
- Provides for DHS to conduct a study of implementing behavioral health services for the Medicaid Expansion program through an administrative services organization.

Representative J. Nelson
February 22, 2021

PROPOSED AMENDMENTS TO HOUSE BILL NO. 1012

Page 1, line 2, after "services" insert "; to amend and reenact section 50-24.1-37 of the North Dakota Century Code, relating to the Medicaid expansion program"

Page 1, line 2, after "exemption" insert "; to provide an effective date"

Page 4, after line 16, insert:

"**SECTION 9. AMENDMENT.** Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (Effective through July 31, ~~2021~~2023 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.

5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.

SECTION 10. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (Effective through July 31, 2023 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services and coverages for individuals ages nineteen and twenty, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. ~~This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.~~

~~5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.~~

SECTION 11. EFFECTIVE DATE. Section 10 of this Act becomes effective January 1, 2022."

Grant total all funds	$4,084,755,065	$396,704,718	$4,481,459,783
Full-time equivalent positions	2,230.23	1.60	2,231.83"

Page 3, line 3, after "**FUNDING**" insert "**- EFFECT ON BASE BUDGET - REPORT TO SIXTY-EIGHTH LEGISLATIVE ASSEMBLY**"

Page 3, line 4, after "biennium" insert "and the one-time funding items included in the appropriation in section 1 of this Act"

Page 3, replace line 6 with:

"Technology projects	$13,785,658	$67,641,747"

Page 3, replace lines 11 through 14 with:

"State hospital study	200,000	300,000
Medicaid system consultant	0	300,000
Nursing facility payment methodology	0	7,200,000
Total all funds	$22,068,926	$75,441,747
Less estimated income	20,556,323	51,607,531
Total general fund	$1,512,603	$23,834,216

The 2021-23 biennium one-time funding amounts are not a part of the entity's base budget for the 2023-25 biennium. The department of human services shall report to the appropriations committees of the sixty-eighth legislative assembly on the use of this one-time funding for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 3. APPROPRIATION - 2019-21 BIENNIUM - DEPARTMENT OF HUMAN SERVICES - FIRE PROTECTION AGREEMENTS - EXEMPTION. There is appropriated out of any moneys in the department of human services operating fund in the state treasury, not otherwise appropriated, the sum of $333,333, or so much of the sum as may be necessary, to the department of human services for the purpose of providing a grant to a political subdivision for the state share of costs relating to the purchase of a fire truck, for the period beginning with the effective date of this Act and ending June 30, 2021. The funding appropriated in this section is a one-time funding item. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section. The department of human services shall discontinue any agreement with a political subdivision for fire protection services and may not enter any future agreement with a political subdivision for fire protection services."

Page 4, after line 2, insert:

"**SECTION 6. FULL-TIME EQUIVALENT POSITION - AGING SERVICES.** Section 1 of this Act includes one full-time equivalent position for the administration of services resulting from a federal department of justice lawsuit settlement. This position is authorized only for the biennium beginning July 1, 2021, and ending June 30, 2023, and may not be included in the department's base budget for the biennium beginning July 1, 2023, and ending June 30, 2025."

Page 4, line 4, replace "$173,700,000" with "$187,385,888"

Page 4, remove lines 7 through 10

Page 4, line 12, replace "$32,400,000" with "$24,000,000"

Page 4, line 16, after "fund" insert "and $1,150,538 from federal funds"

Page 4, after line 16, insert:

"**SECTION 10. CAPITAL PAYMENTS.** During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to expend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 11. STATE HOSPITAL - CAPITAL PROJECTS - EMERGENCY COMMISSION APPROVAL. During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to proceed with the demolition of the chapel and employee building and associated tunnels at the state hospital. Pursuant to section 4 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act. The department may transfer funds for the demolition of the identified buildings and associated tunnels and for emergency capital projects. Notwithstanding section 54-27-12, the department of human services may spend up to $5,000,000 for emergency projects under this section and may seek emergency commission approval to spend more than $5,000,000 under this section.

SECTION 12. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:

   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.

   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid

program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.

c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915i state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

6. The department of human services and the Medicaid expansion managed care organization shall ensure the appropriate contract amendment is adopted for coverage through December 31, 2021. The contract amendment shall stay within the appropriation and the requirements of chapter 54-44.4 do not apply.

SECTION 13. EXPENDITURES MAY NOT EXCEED APPROPRIATION - NURSING HOME RATES. Subdivision 2 of section 1 of this Act includes the sum of $621,362,568, of which $288,313,216 is from the general fund, for nursing home payments for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for nursing homes may not exceed this amount.

SECTION 14. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Substance use disorder treatment voucher system grants.

1. A licensed substance abuse treatment program, excluding regional human service centers and hospital or medical clinic-based programs for medical management of withdrawal, may apply for a competitive substance use disorder treatment voucher system grant. A licensed substance abuse treatment program is eligible for a one-time grant award. To receive a grant, a licensed substance abuse treatment program shall:

   a. Submit an application in the form and manner prescribed by the department;

   b. Enter a grant agreement with the department;

   c. Use grant funds for a licensed substance abuse treatment program with fewer than seventeen beds in an underserved area, as determined by the department, in the state's substance abuse treatment system;

   d. Use the grant funds to support the provision of substance use disorder treatment in underserved areas of the state's substance abuse treatment system;

   e. Provide and disclose information needed to comply with the department's data collection requirements; and

   f. Operate in compliance with grant requirements.

2. The department, within legislative appropriations, may distribute up to three grants under this section to licensed substance abuse treatment programs.

3. The department may recapture grant funds distributed to a licensed program found by the department to be out of compliance with the requirements established by the grant program, including ending or reducing the operation of the substance use disorder treatment services in the underserved area.

4. The department may not collect property, equipment, or supplies purchased with grant funds from the licensed substance abuse treatment program after successful completion of the terms of the grant.

5. The grant term must be for five years.

SECTION 15. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, and hospital- or medical clinic-based programs for medical management of withdrawal. Services eligible for the voucher program

include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

2. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. No more than thirty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for nonresidential outpatient and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 16. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (Effective through July 31, ~~2021~~2023 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.

5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.

SECTION 17. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (Effective through July 31, 2023 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services and coverages for individuals ages nineteen and twenty, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. ~~This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.~~

~~5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.~~

SECTION 18. REPEAL. Section 50-24.1-18.1 of the North Dakota Century Code is repealed.

SECTION 19. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER. The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton parks and recreation department. The department of human services may convey a portion of two parcels of land commonly referred to as "the bowl" on the terms and conditions determined appropriate by the department and the attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance.

SECTION 20. LEASE OF LAND - STATE HOSPITAL. The department of human services and national guard may enter an agreement to lease up to twenty acres of real property associated with the state hospital for the national guard to construct a new training and storage facility.

SECTION 21. PROVIDER PROCESS AND OUTCOME MEASURES. Providers that receive funding from the department of human services shall submit process and outcome measures, as required by the department, to the department of human services for programs and services supported by state funding during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 22. IN-HOME SUPPORT SERVICES - DEVELOPMENTAL DISABILITIES WAIVER. The department of human services shall add in-home support services to the appendix K application submitted by the department to the centers for Medicare and Medicaid services for the developmental disability services waiver for the COVID-19 emergency. Funding for in-home support services under the appendix K application may not exceed $250,000 during the COVID-19 emergency.

SECTION 23. QUALIFIED RESIDENTIAL TREATMENT PROVIDERS. The department of human services shall adopt rules, on or before October 1, 2021, establishing a new ratesetting process and requirements for foster care maintenance rates for qualified residential treatment providers based on the appropriation approved by the sixty-seventh legislative assembly.

SECTION 24. COMMUNITY BEHAVIORAL HEALTH PROGRAM. Pursuant to section 4 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021, and ending June 30, 2023, as requested by the department of human services. The department may transfer funds for the continuation of the community behavioral health program pursuant to subsection 2 of section 54-23.3-10.

SECTION 25. EXEMPTION. The amount appropriated for the Medicaid management information system technology stack upgrade in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the Medicaid management information system technology stack upgrade during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 26. EXEMPTION. The amount appropriated for the modification of the department of human services' eligibility systems in chapter 578 of the 2011 Special Session Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2013-15 biennium, then the 2015-17 biennium, then the 2017-19 biennium, and then the 2019-21 biennium are available for the completion of the modification of the eligibility systems project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 27. EXEMPTION. The amount appropriated for the development of the child care licensing and data system in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the child care licensing and data system during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 28. EXEMPTION. The amount appropriated for the development of the health information network in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the health information network during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 29. EXEMPTION. The sum of $200,000 from the general fund appropriated for the department's operating expenses for the school behavioral health program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the school behavioral health pilot projects during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 30. EXEMPTION. The sum of $150,000 from the general fund appropriated for the department's operating expenses for behavioral health recovery home grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation may be used for behavioral health recovery home grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 31. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITY RATES. The appropriation in section 1 of this Act includes adjustments to reimbursement rates for developmental disability service providers. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly if funding provided for developmental disability provider payments is not sufficient to pay actual expenses.

SECTION 32. STATE HOSPITAL TREATMENT CAMPUS - REPORT TO LEGISLATIVE MANAGEMENT. During the 2021-22 interim, the department of human services, with the assistance of the state hospital's governing body, stakeholders, members of the legislative assembly, and consultants, shall conduct a study and prepare a report. The report must provide a cost-benefit analysis and available options and address the feasibility and desirability of closing the state hospital, renovating the state hospital, or building a new treatment campus to meet the health care needs of the state. Before October 1, 2022, the department of human services shall provide a report to the legislative management regarding the results of the study. Subdivision 3 of section 1 of this Act includes the sum of $300,000 for the purpose of contracting with a consultant to assist in the report and recommendation.

SECTION 33. BEHAVIORAL HEALTH SERVICES - REPORT TO LEGISLATIVE MANAGEMENT. During the 2021-22 interim, the department of human services shall study the feasibility and desirability of implementing behavioral health services for the medical assistance expansion program through an administrative services organization. Subdivision 2 of section 1 of this Act includes the sum of $300,000 for the purpose of contracting with a consultant to assist in the study and to develop a plan to implement behavioral health services for the medical assistance expansion program through an administrative services organization. The department of human services shall provide reports to the legislative management regarding the status and results of the study.

SECTION 34. EFFECTIVE DATE. Section 17 of this Act becomes effective January 1, 2022.

SECTION 35. EXPIRATION DATE. Section 14 of this Act is effective through July 1, 2027, and after that date is ineffective.

SECTION 36. EMERGENCY. Section 3 of this Act is declared to be an emergency measure."

Renumber accordingly

Total changes to base level funding	(256.72)	($31,262,297)	($13,370,943)	($44,633,240)

House Bill No. 1012 - Other Changes - House Action

This amendment also:

- Provides a 2019-21 biennium deficiency appropriation from the DHS operating fund for a grant to a political subdivision for costs to purchase a fire truck.
- Identifies 1 FTE position in the Aging Services Division for administration of services relating to a federal Department of Justice lawsuit settlement as being authorized for only the 2021-23 biennium.
- Adjusts sections to identify the amount of funding provided from the human service finance fund, community health trust fund, and health care trust fund.
- Removes a section relating to funding provided from the tobacco prevention and control trust fund.
- Authorizes capital projects and payments at the State Hospital and Life Skills and Transition Center.
- Specifies the use of funding for the substance use disorder voucher program.
- Provides Medicaid Expansion expenditures may not exceed appropriations for the program.
- Provides expenditures for nursing facility payments may not exceed appropriations for the payments.
- Extends the sunset clause on the Medicaid Expansion program, transfers 19- and 20-year old program recipients to a fee-for-service arrangement, and removes privacy requirements regarding provider reimbursement rates.
- Repeals Section 50-24.1-18.1 which relates to consumer-directed health maintenance services.
- Authorizes the conveyance of land at the Life Skills and Transition Center and authorizes the lease of land at

the State Hospital.

- Requires providers receiving funding from DHS to submit process and outcome measures.
- Requires DHS to include in-home support services in the Appendix K application the department submits to the Centers for Medicare and Medicaid Services.
- Requires DHS to adopt rules to establish a new ratesetting process and requirements for foster care maintenance rates for qualified residential treatment providers.
- Authorizes DHS to transfer funds between line items to provide additional funding for the community behavioral health program.
- Provides exemptions to allow DHS to continue prior biennium appropriations into the 2021-23 biennium for various projects.
- Provides legislative intent that DHS seek a deficiency appropriation if funding for developmental disability rates is not sufficient to cover program expenses.
- Provides for DHS to conduct a study of the State Hospital complex.
- Provides for DHS to conduct a study of implementing behavioral health services for the Medicaid Expansion program through an administrative services organization.

REPORT OF STANDING COMMITTEE

HB 1012: Appropriations Committee (Rep. Delzer, Chairman) recommends **AMENDMENTS AS FOLLOWS** and when so amended, recommends **DO PASS** (19 YEAS, 2 NAYS, 0 ABSENT AND NOT VOTING). HB 1012 was placed on the Sixth order on the calendar.

Page 1, line 2, after "services" insert "; to create and enact a new section to chapter 50-06 of the North Dakota Century Code, relating to substance use disorder treatment voucher system grants; to amend and reenact sections 50-06-42 and 50-24.1-37 of the North Dakota Century Code, relating to the substance use disorder voucher program and the Medicaid expansion program; to repeal section 50-24.1-18.1 of the North Dakota Century Code, relating to consumer-directed health maintenance services"

Page 1, line 2, replace "and" with "to provide a statement of legislative intent;"

Page 1, line 2, after "report" insert "; to provide for a study; to provide for a transfer; to provide for the conveyance of land; to provide an application; to provide an effective date; to provide an expiration date; and to declare an emergency"

Total all funds	$22,068,926	$75,441,747
Less estimated income	20,556,323	51,607,531
Total general fund	$1,512,603	$23,834,216

The 2021-23 biennium one-time funding amounts are not a part of the entity's base budget for the 2023-25 biennium. The department of human services shall report to the appropriations committees of the sixty-eighth legislative assembly on the use of this one-time funding for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 3. APPROPRIATION - 2019-21 BIENNIUM - DEPARTMENT OF HUMAN SERVICES - FIRE PROTECTION AGREEMENTS - EXEMPTION. There is appropriated out of any moneys in the department of human services operating fund in the state treasury, not otherwise appropriated, the sum of $333,333, or so much of the sum as may be necessary, to the department of human services for the purpose of providing a grant to a political subdivision for the state share of costs relating to the purchase of a fire truck, for the period beginning with the effective date of this Act and ending June 30, 2021. The funding appropriated in this section is a one-time funding item. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section. The department of human services shall discontinue any agreement with a political subdivision for fire protection services and may not enter any future agreement with a political subdivision for fire protection services."

Page 4, after line 2, insert:

"**SECTION 6. FULL-TIME EQUIVALENT POSITION - AGING SERVICES.** Section 1 of this Act includes one full-time equivalent position for the administration of services resulting from a federal department of justice lawsuit settlement. This position is authorized only for the biennium beginning July 1, 2021, and ending

June 30, 2023, and may not be included in the department's base budget for the biennium beginning July 1, 2023, and ending June 30, 2025."

Page 4, line 16, after "fund" insert "and $1,150,538 from federal funds"

Page 4, after line 16, insert:

"**SECTION 10. CAPITAL PAYMENTS.** During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to expend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 11. STATE HOSPITAL - CAPITAL PROJECTS - EMERGENCY COMMISSION APPROVAL. During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to proceed with the demolition of the chapel and employee building and associated tunnels at the state hospital. Pursuant to section 4 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act. The department may transfer funds for the demolition of the identified buildings and associated tunnels and for emergency capital projects. Notwithstanding section 54-27-12, the department of human services may spend up to $5,000,000 for emergency projects under this section and may seek emergency commission approval to spend more than $5,000,000 under this section.

SECTION 12. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:

   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.

   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.

   c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915i state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

6. The department of human services and the Medicaid expansion managed care organization shall ensure the appropriate contract amendment is adopted for coverage through December 31, 2021. The contract amendment shall stay within the appropriation and the requirements of chapter 54-44.4 do not apply.

SECTION 13. EXPENDITURES MAY NOT EXCEED APPROPRIATION - NURSING HOME RATES. Subdivision 2 of section 1 of this Act includes the sum of $621,362,568, of which $288,313,216 is from the general fund, for nursing home payments for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for nursing homes may not exceed this amount.

SECTION 14. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Substance use disorder treatment voucher system grants.

1. A licensed substance abuse treatment program, excluding regional human service centers and hospital or medical clinic-based programs for medical management of withdrawal, may apply for a competitive substance use disorder treatment voucher system grant. A licensed substance abuse treatment program is eligible for a one-time grant award. To receive a grant, a licensed substance abuse treatment program shall:

   a. Submit an application in the form and manner prescribed by the department;

   b. Enter a grant agreement with the department;

   c. Use grant funds for a licensed substance abuse treatment program with fewer than seventeen beds in an underserved area, as

determined by the department, in the state's substance abuse treatment system;

d. Use the grant funds to support the provision of substance use disorder treatment in underserved areas of the state's substance abuse treatment system;

e. Provide and disclose information needed to comply with the department's data collection requirements; and

f. Operate in compliance with grant requirements.

2. The department, within legislative appropriations, may distribute up to three grants under this section to licensed substance abuse treatment programs.

3. The department may recapture grant funds distributed to a licensed program found by the department to be out of compliance with the requirements established by the grant program, including ending or reducing the operation of the substance use disorder treatment services in the underserved area.

4. The department may not collect property, equipment, or supplies purchased with grant funds from the licensed substance abuse treatment program after successful completion of the terms of the grant.

5. The grant term must be for five years.

SECTION 15. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, and hospital- or medical clinic-based programs for medical management of withdrawal. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

2. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

a. No more than thirty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

b. The remaining appropriation must be allocated for nonresidential outpatient and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 16. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (Effective through July 31, ~~2021~~2023 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.

5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.

SECTION 17. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (Effective through July 31, 2023 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services and coverages for individuals ages nineteen and twenty, the department shall implement the expansion by

bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. ~~This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.~~

~~5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.~~

SECTION 18. REPEAL. Section 50-24.1-18.1 of the North Dakota Century Code is repealed.

SECTION 19. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER. The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton parks and recreation department. The department of human services may convey a portion of two parcels of land commonly referred to as "the bowl" on the terms and conditions determined appropriate by the department and the attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance.

SECTION 20. LEASE OF LAND - STATE HOSPITAL. The department of human services and national guard may enter an agreement to lease up to twenty acres of real property associated with the state hospital for the national guard to construct a new training and storage facility.

SECTION 21. PROVIDER PROCESS AND OUTCOME MEASURES. Providers that receive funding from the department of human services shall submit process and outcome measures, as required by the department, to the department of human services for programs and services supported by state funding during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 22. IN-HOME SUPPORT SERVICES - DEVELOPMENTAL DISABILITIES WAIVER. The department of human services shall add in-home support services to the appendix K application submitted by the department to the centers for Medicare and Medicaid services for the developmental disability services waiver for the COVID-19 emergency. Funding for in-home support services under the appendix K application may not exceed $250,000 during the COVID-19 emergency.

SECTION 23. QUALIFIED RESIDENTIAL TREATMENT PROVIDERS. The department of human services shall adopt rules, on or before October 1, 2021, establishing a new ratesetting process and requirements for foster care maintenance rates for qualified residential treatment providers based on the appropriation approved by the sixty-seventh legislative assembly.

SECTION 24. COMMUNITY BEHAVIORAL HEALTH PROGRAM. Pursuant to section 4 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021, and ending June 30, 2023, as requested by the department of human services. The department may transfer funds for the continuation of the community behavioral health program pursuant to subsection 2 of section 54-23.3-10.

SECTION 25. EXEMPTION. The amount appropriated for the Medicaid management information system technology stack upgrade in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the Medicaid management information system technology stack upgrade during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 26. EXEMPTION. The amount appropriated for the modification of the department of human services' eligibility systems in chapter 578 of the 2011 Special Session Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2013-15 biennium, then the 2015-17 biennium, then the 2017-19 biennium, and then the 2019-21 biennium are available for the completion of the modification of the eligibility systems project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 27. EXEMPTION. The amount appropriated for the development of the child care licensing and data system in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the child care licensing and data system during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 28. EXEMPTION. The amount appropriated for the development of the health information network in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the health information network during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 29. EXEMPTION. The sum of $200,000 from the general fund appropriated for the department's operating expenses for the school behavioral health program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the school behavioral health pilot projects during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 30. EXEMPTION. The sum of $150,000 from the general fund appropriated for the department's operating expenses for behavioral health recovery home grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation may be used for behavioral health recovery home grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 31. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITY RATES. The appropriation in section 1 of this Act includes adjustments to reimbursement rates for developmental disability service providers. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly if funding provided for developmental disability provider payments is not sufficient to pay actual expenses.

SECTION 32. STATE HOSPITAL TREATMENT CAMPUS - REPORT TO LEGISLATIVE MANAGEMENT. During the 2021-22 interim, the department of human services, with the assistance of the state hospital's governing body, stakeholders, members of the legislative assembly, and consultants, shall conduct a study and prepare a report. The report must provide a cost-benefit analysis and available options and address the feasibility and desirability of closing the state hospital, renovating the state hospital, or building a new treatment campus to meet the health care needs of the state. Before October 1, 2022, the department of human services shall provide a report to the legislative management regarding the results of

the study. Subdivision 3 of section 1 of this Act includes the sum of $300,000 for the purpose of contracting with a consultant to assist in the report and recommendation.

SECTION 33. BEHAVIORAL HEALTH SERVICES - REPORT TO LEGISLATIVE MANAGEMENT. During the 2021-22 interim, the department of human services shall study the feasibility and desirability of implementing behavioral health services for the medical assistance expansion program through an administrative services organization. Subdivision 2 of section 1 of this Act includes the sum of $300,000 for the purpose of contracting with a consultant to assist in the study and to develop a plan to implement behavioral health services for the medical assistance expansion program through an administrative services organization. The department of human services shall provide reports to the legislative management regarding the status and results of the study.

SECTION 34. EFFECTIVE DATE. Section 17 of this Act becomes effective January 1, 2022.

SECTION 35. EXPIRATION DATE. Section 14 of this Act is effective through July 1, 2027, and after that date is ineffective.

SECTION 36. EMERGENCY. Section 3 of this Act is declared to be an emergency measure."

Renumber accordingly

House Bill No. 1012 - Other Changes - House Action

This amendment also:

- Provides a 2019-21 biennium deficiency appropriation from the DHS operating fund for a grant to a political subdivision for costs to purchase a fire truck.
- Identifies 1 FTE position in the Aging Services Division for administration of services relating to a federal Department of Justice lawsuit settlement as being authorized for only the 2021-23 biennium.
- Adjusts sections to identify the amount of funding provided from the human service finance fund, community health trust fund, and health care trust fund.
- Removes a section relating to funding provided from the tobacco prevention and control trust fund.
- Authorizes capital projects and payments at the State Hospital and Life Skills and Transition Center.
- Specifies the use of funding for the substance use disorder voucher program.
- Provides Medicaid Expansion expenditures may not exceed appropriations for the program.
- Provides expenditures for nursing facility payments may not exceed appropriations for the payments.
- Extends the sunset clause on the Medicaid Expansion program, transfers 19- and 20-year old program recipients to a fee-for-service arrangement, and removes privacy requirements regarding provider reimbursement rates.
- Repeals Section 50-24.1-18.1 which relates to consumer-directed health maintenance services.
- Authorizes the conveyance of land at the Life Skills and Transition Center and authorizes the lease of land at the State Hospital.
- Requires providers receiving funding from DHS to submit process and outcome measures.
- Requires DHS to include in-home support services in the Appendix K application the department submits to the Centers for Medicare and Medicaid Services.
- Requires DHS to adopt rules to establish a new ratesetting process and requirements for foster care maintenance rates for qualified residential treatment providers.
- Authorizes DHS to transfer funds between line items to provide additional funding for the community behavioral health program.
- Provides exemptions to allow DHS to continue prior biennium appropriations into the 2021-23 biennium for various projects.
- Provides legislative intent that DHS seek a deficiency appropriation if funding for

developmental disability rates is not sufficient to cover program expenses.

- Provides for DHS to conduct a study of the State Hospital complex.
- Provides for DHS to conduct a study of implementing behavioral health services for the Medicaid Expansion program through an administrative services organization.

First House Action

Attached is a comparison worksheet detailing first house changes to base level funding and the executive budget.

Executive Budget Highlights
(With First House Changes in Bold)

DEPARTMENTWIDE

1. Provides funding for state employee salary and benefit increases, of which $9,368,646 is for salary increases, $108,150 is for health insurance increases, and $1,908,797 is for retirement contribution increases. **The House added funding for salary adjustments of 1.5 percent per year with a $100 minimum and $250 maximum monthly increase and increases in health insurance premiums from $1,427 to $1,429 per month. The House did not add funding for retirement contribution increases**.	$8,737,712	$2,647,881	$11,385,593

2. Underfunds salaries and wages by $4,694,730 from the general fund in anticipation of savings from **vacant positions and employee turnover**	($4,694,730)	$0	($4,694,730)
3. Adjusts funding to reduce general fund support for traditional Medicaid ($50,919,245) and increase general fund support for Medicaid Expansion ($3,916,989) and the children's health insurance program ($1,222,892) due to changes in the state's federal medical assistance percentage (FMAP)	($45,779,364)	$45,779,364	$0
4. Adds funding for **cost, caseload, and utilization changes,** including $156,789,851 for medical services, $77,698,712 for long-term care, and $41,567,021 for developmental disabilities (DD). **The House adjusted estimated utilization rates for the medical services and long-term care programs.**	$124,345,846	$174,944,195	$299,290,041
5. Provides a 1 percent **inflationary increase** for human service providers during each year of the 2021-23 biennium	$13,883,837	$14,417,097	$28,300,934
6. Reduces ongoing funding appropriated during the 2019-21 biennium from the community health trust fund from $32.4 million to $24 million and replaces ongoing funding provided from the tobacco prevention and control trust fund ($6 million) and health care trust fund ($1 million). **The House added $1 million of funding from the health care trust fund and matching federal funds of $1,150,538 for nursing home operating margin adjustments.**	$15,400,000	($15,400,000)	$0
7. Adds funding for the Capitol grounds agency rent proposal. **The House did not add funding for the agency rent proposal.**	$474,286	$0	$474,286
8. Adds funding for Microsoft Office 365 expenses	$200,315	$50,079	$250,394
9. Adds ongoing funding to develop an early childhood integrated data system	$500,000	$0	$500,000
10. Provides **one-time funding** to replace the child welfare management and payments system	$15,000,000	$15,000,000	$30,000,000
11. Provides **one-time funding** to modernize the Medicaid management information system	$4,326,686	$30,673,314	$35,000,000
PROGRAM AND POLICY			
Medical services			
12. Provides $1,477.4 million for medical services, of which $385.2 million is from the general fund, an increase in total of $63.7 million, or 4.5 percent, compared to the 2019-21 biennium appropriation of $1,413.7 million. The executive budget:			
• Provides $623.8 million for Medicaid Expansion grants, of which $73.5 million is from the general fund, a decrease in total of $10.9 million, or 1.7 percent, compared to the 2019-21 biennium appropriation of $634.7 million, of which $64.1 million is from the general fund. The executive budget adds 12 FTE positions to transfer the administration of Medicaid Expansion to the department and changes the payment rates from commercial rates to fee-for-service rates. **The House did not transfer the administration of the Medicaid Expansion program to the department and did not change the commercial rate structure.**	$9,400,000	($20,300,000)	($10,900,000)
• Underfunds Medicaid grants	($9,580,913)	($9,955,925)	($19,536,838)
Long-term care			
13. Provides $822.6 million for **long-term care**, of which $404.2 million is from the general fund, an increase in total of $85.2 million, or 11.6 percent, compared to the 2019-21 biennium appropriation of $737.4 million. The executive budget:			
• Reprioritizes agency special funds by transferring $2.3 million from the basic care program to information technology services			
• Adds **one-time funding** to transition to a new nursing facility payment methodology	$3,348,000	$3,852,000	$7,200,000

• Adds **one-time funding** for a nursing bed buyback program to buy back approximately 250 licensed nursing home beds. **The House did not add funding for the nursing bed buyback program.**	$3,300,000	$0	$3,300,000
Developmental disabilities			
14. Provides $739.3 million for DD, of which $344.8 million is from the general fund, an increase in total of $68.1 million, or 10.1 percent, compared to the 2019-21 biennium appropriation of $671.2 million. The executive budget:			
• Adds funding for **equipment over $5,000**, which includes tymp machines ($10,000)	$979	$9,021	$10,000
• Adjusts department budget reporting by transferring certain FTE positions and funding relating to DD duties from the human service centers to the Developmental Disabilities Division			
Vocational rehabilitation			
15. Provides $37.7 million for vocational rehabilitation services, of which $7.3 million is from the general fund, an increase in total of $11 million, or 41.2 percent, compared to the 2019-21 biennium appropriation of $26.7 million. The executive budget:			
• Adjusts department budget reporting by transferring certain FTE positions and funding relating to vocational rehabilitation duties from the human service centers to the Vocational Rehabilitation Division			
Aging services			
16. Provides $34.5 million for aging services, of which $12.4 million is from the general fund, an increase in total of $9.3 million, or 36.9 percent, compared to the 2019-21 biennium appropriation of $25.2 million. The executive budget:			
• Adjusts department budget reporting by transferring certain FTE positions and funding relating to aging services duties from the human service centers to the Aging Services Division			
Behavioral health services			
17. Provides $85 million for behavioral health services, of which $36.7 million is from the general fund, an increase in total of $12.6 million, or 17.4 percent, compared to the 2019-21 biennium appropriation of $72.4 million. The executive budget:			
• Increases funding for the substance use disorder voucher program from $8 million to $17 million. **The House increased funding for the voucher program to $15 million and provided for $3 million of the funds to be distributed as facility grants in underserved areas of the state.**	$9,000,000	$0	$9,000,000
Economic assistance			
18. Provides $275 million for economic assistance, of which $11.9 million is from the general fund, an increase in total of $13.1 million, or 5 percent, compared to the 2019-21 biennium appropriation of $261.9 million. Major program changes include:			
• Provides $34.7 million for **child care assistance**, of which $5.6 million is from the general fund, an increase of $6.9 million, or 24.8 percent, compared to the 2019-21 biennium appropriation of $27.8 million	$2,952,579	$3,970,653	$6,923,232
• Increases federal funding for the **supplemental nutrition assistance program (SNAP)** or food stamp benefits to provide a total of $168 million, an increase of $2.8 million, or 1.7 percent, compared to the 2019-21 biennium appropriation of $165.2 million	$0	$2,760,000	$2,760,000
• Increases federal funding for the **low-income home energy assistance program (LIHEAP)** to provide a total of $36.1 million, an increase of $1.6 million, or	$0	$1,634,000	$1,634,000

4.6 percent, compared to the 2019-21 biennium appropriation of $34.5 million

Children and family services

19. Provides $165.6 million for children and family services, of which $72 million is from the general fund, a decrease in total of $10.6 million, or 6.0 percent, compared to the 2019-21 biennium appropriation of $176.2 million. The executive budget:

    - Transfers certain FTE positions and funding relating to children and family services duties from the human service center budget to the Children and Family Services Division

INSTITUTIONS

20. Provides $126.7 million for institutions, of which $84.3 million is from the general fund, a decrease in total of $17.7 million, or 24.2 percent, compared to the 2019-21 biennium appropriation of $144.4 million. Major items in the executive budget relating to institutions are as follows:

State Hospital

21. Authorizes the construction of a new **state behavioral health hospital and clinic** through a public-private partnership. **The House did not authorize the construction of a new state behavioral health hospital and clinic.**

22. Provides funding for **extraordinary repairs** as follows: $1,292,499 $0 $1,292,499

Sidewalk repairs	$35,000
Roof repairs	28,000
Door lock replacement	85,000
Auto shop oil interceptor	18,000
Oil control and steam valves	45,800
Water main valve replacement	6,500
Flooring updates	197,672
Paint client rooms	29,750
Sewer line cleanout	7,750
Penal fixture hook and cleanout pins	18,000
Boiler control upgrade	209,000
Remove water treatment loop	85,000
Automation control upgrades	235,750
Tuck pointing	291,277
Total	$1,292,499

23. Provides funding for **equipment over $5,000**, which includes: $60,800 $0 $60,800

Utility vehicle	$28,000
Pressure washer	6,800
Floor scrubber	7,500
Camera equipment replacement	18,500
Total	$60,800

Life Skills and Transition Center

24. Provides funding for **extraordinary repairs**, as follows: $637,106 $0 $637,106

Asbestos abatement	$30,000
Concrete work and repairs	156,760
Cottage repairs	25,000
Level cemetery markers	20,000
Painting	30,000
Skylight repairs	76,500
Parking lot maintenance	60,000
Tunnel repairs	25,000
Door repair and replacement	65,000
Flooring	90,000
Elevator pit coating	19,096
Colette fitness building roof	39,750
Total	$637,106

25. Provides funding for **equipment over $5,000**, which includes:	$208,055	$0	$208,055

Dishwasher	$90,000
Security cameras	38,727
Mower/blower	31,765
Utility vehicle	22,135
Floor scrubber	5,200
Washing machines	14,228
Gym divider	6,000
Total	$208,055

HUMAN SERVICE CENTERS

26. Provides $167.5 million for human service centers, of which $96.2 million is from the general fund, a decrease in total of $37.2 million, or 18.2 percent, compared to the 2019-21 biennium appropriation of $204.7 million. The executive budget:			
• Adds funding to contract with a private service provider for civil sex offender treatment	$917,004	$0	$917,004
• Adds funding for **extraordinary repairs** at the southeast human service center, which includes $80,000 for an air unit replacement	$80,000	$0	$80,000
• Transfers 238.12 FTE positions to program and policy and management to adjust the budget reporting for the department			

COUNTY SOCIAL SERVICES

27. Transfers $174.4 from the tax relief fund to the human service finance fund and appropriates the funding, along with funding from the general fund and other funds, for costs associated with the state takeover of county social services expenses. The transfer from the tax relief fund is an increase of $680,767 from the 2019-21 biennium transfer. **The House provided for a transfer of $187.4 million from the tax relief fund to the human service finance fund.**	$1,323,223	$2,135,515	$3,458,738
28. Adds 3 FTE home- and community-based case management staff	$0	$498,673	$498,673

Other Sections in House Bill No. 1012

Deficiency appropriation - Section 3 appropriates $333,333 from the Department of Human Services (DHS) operating fund during the 2019-21 biennium for a grant to a political subdivision for a portion of the cost of purchasing a fire truck.

Transfers - Section 4 authorizes DHS to transfer appropriation authority between line items within subdivisions 1 through 3 of Section 1.

Transfers - Section 5 authorizes DHS to transfer appropriation authority from line items within subdivisions 1 through 3 of Section 1 to subdivision 4 of Section 1.

Aging Services FTE position - Section 6 identifies 1 FTE position in the Aging Services program is for the administration of services resulting from a federal Department of Justice lawsuit settlement and the position is authorized only for the 2021-23 biennium.

Human service finance fund - Section 7 identifies $187,385,888 of the appropriation for the county social and human service project is from the human service finance fund.

Community health trust fund - Section 8 identifies $24 million of the appropriation for the Medical Services Division is from the community health trust fund.

Health care trust fund - Section 9 identifies $1 million from the health care trust fund and $1,150,538 from federal funds is for nursing facility operating margin adjustments.

Capital projects and payments - Section 10 authorizes DHS to pay special assessments at the State Hospital and Life Skills and Transition Center. Section 11 authorizes the demolition of the chapel and employee building at the State Hospital and allows DHS to transfer funds from other line items to pay for the demolition of the buildings and other emergency capital projects.

Medicaid Expansion appropriations - Section 12 provides DHS may not spend more for the Medicaid Expansion program than the amount appropriated in the bill with certain exceptions.

Nursing facility appropriations - Section 13 provides DHS may not spend more for nursing facility payments than the amount appropriated in the bill.

Substance use disorder voucher program - Sections 14 and 15 create a new substance use disorder voucher facility grant program and provide that no more than 30 percent of funding for service grants may be used for residential services.

Medicaid Expansion - Sections 16 and 17 amend North Dakota Century Code Section 50-24.1-37 to extend the sunset clause on the Medicaid Expansion program. Section 17 provides effective January 1, 2022, 19 and 20 year old recipients are transitioned to a fee for service arrangement and provider reimbursement rates are not confidential.

Personal care - Section 18 repeals Section 50-24.1-18.1 relating to personal care services for eligible medical assistance recipients.

Conveyance of land - Section 19 authorizes DHS to convey land at the Life Skills and Transition Center to the Grafton Parks and Recreation Department.

Lease of land - Section 20 authorizes DHS and the Adjutant General to enter an agreement to lease up to 20 acres of property at the State Hospital for a National Guard training and storage facility.

Provider outcomes - Section 21 requires providers that receive funding from DHS to submit process and outcome measures.

Developmental disabilities in-home support services - Section 22 directs DHS to include in-home supports to be included in the Appendix K application submitted to the Centers for Medicare and Medicaid Services for the developmental disability waiver.

Qualified residential treatment providers - Section 23 requires DHS to adopt rules establishing a ratesetting process and other requirements for foster care maintenance rates for qualified residential treatment providers.

Community behavioral health program - Section 24 authorizes DHS to use line item transfers to provide funding for the community behavioral health program.

Carryover authority - Sections 25 through 30 allow DHS to continue unexpended appropriations for various projects into the 2021-23 biennium.

Developmental disability provider rates - Section 31 provides legislative intent that DHS seek a deficiency appropriation from the 68th Legislative Assembly if developmental disability provider funding is not sufficient to pay actual expenses.

State Hospital complex study - Section 32 provides for DHS to conduct a study of the State Hospital complex and to provide a report to the Legislative Management regarding the results of the study.

Medicaid Expansion behavioral health services - Section 33 provides for DHS to conduct a study of the feasibility and desirability of implementing behavioral health services for the Medicaid Expansion program through an administrative services organization.

Continuing Appropriations

Child support collection and disbursement - Section 14-09-25 - Allows the department to receive child support payments and provide the funds to the custodial parent or appropriate governmental entity for those custodial parents receiving governmental assistance.

Child support improvement account - Section 50-09-15.1 - Allows the department to receive federal child support incentive funds and spend the funds in accordance with its business plan to improve the child support collection process.

Child support cooperative agreements - Section 50-09-33 - Allows the department to accept federal funds and other income generated by the department under a cooperative agreement with an Indian tribe for child support enforcement services for hiring staff and payment of other expenses as necessary for carrying out the department's duties under the agreement.

Transition to independence - Section 50-06-34 - Allows the department to receive grants and other sources of funding for the development of a program for services to transition-aged youth at risk.

Deficiency Appropriation

Section 3 of the bill appropriates $333,333 from the DHS operating fund during the 2019-21 biennium for a grant to a political subdivision for a portion of the cost of purchasing a firetruck.

Estimated Unspent General Fund Appropriation Authority (Turnback)

The 2021-23 executive budget recommendation includes estimated unspent general fund appropriation authority of $92.5 million for DHS for the 2019-21 biennium.

Significant Audit Findings

The June 30, 2019, State Auditor report for the Department of Human Services identified the following audit findings:

- Payments after death (prior audit finding) - A total of $108,425 may have been paid in Medicaid benefits for medical services billed for services dated after a beneficiary's date of death.
- Child care correction orders not resolved (prior audit finding) - Child care providers are operating without proper reinspection of correction orders, potentially jeopardizing the health and safety of children.
- Monitoring child care providers with memorandums of understanding (prior audit finding) - The department is not properly monitoring child care providers operating under a memorandum of understanding agreement resulting in increased risks to the health and safety of children when in child care.

- Failure to timely contact suspected victims of child abuse and neglect (prior audit finding) - Prior audit recommendations have not been implemented which may cause a child to stay in an at-risk environment susceptible to abuse or neglect for an additional amount of time.
- Not performing quality assurance for child protection services (prior audit finding) - Without sufficient monitoring procedures the department is unable to ensure that services will protect the health and welfare of children.
- Confirmed child abusers not listed on index (prior audit finding) - Background check search results of the child abuse and neglect index may be inaccurate.
- Financial errors - The department reported incorrect financial information for the state's comprehensive annual financial report.
- Medicaid drug rebate system errors (prior audit finding) - There is increased potential for fraud and errors to occur and be undetected within the Medicaid drug rebate program.

Major Related Legislation

House Bill No. 1065 - Nursing home bed moratorium - Amends Section 23-16-01.1 to adjust provisions relating to the nursing home bed moratorium.

House Bill No. 1066 - Accreditation of human service centers - Amends Section 50-06-05.2 to require DHS to request appropriations to ensure maintenance of the accreditation of human service centers and allows accreditation to be used as a basis for licensing in lieu of adopted rules for the operation of the centers.

House Bill No. 1076 - Children's Cabinet membership - Amends Section 50-06-43.1 to allow the chairman of the Legislative Management to appoint a member of the Legislative Assembly as the presiding officer of the Children's Cabinet.

House Bill No. 1090 - Nursing home payment methodology - Amends various sections to adjust the payment methodology of nursing homes.

House Bill No. 1247 - Department of Health and Human Services - Merges the State Department of Health into the Department of Human Services to create a new Department of Health and Human Services.

House Bill No. 1332 - Nursing home bed moratorium - Amends Section 23-16-01.1 to extend the moratoria on basic care and nursing facility bed capacity.

House Bill No. 1394 - Federal coronavirus relief funding - Appropriates federal COVID-19 relief funding anticipated to be received by state agencies.

House Bill No. 1395 - Federal coronavirus relief fund - Reallocates federal coronavirus relief funds previously authorized by the Emergency Commission and Budget Section.

House Bill No. 1402 - Substance use disorder voucher program - Authorizes an out-of-state substance use disorder treatment program located in a bordering state to participate in the voucher program to provide services to underserved areas of the state.

House Bill No. 1407 - Tribal health care coordination fund - Increases from 60 to 70 percent, the amount of eligible funding to be deposited in the tribal health care coordination fund.

House Bill No. 1416 - Early childhood duties - Transfers early childhood education duties from the Department of Public Instruction to DHS.

House Bill No. 1466 - Early childhood education grant program - Establishes a new grant program within DHS to provide grants for early childhood education programs.

Senate Bill No. 2014 - Health care trust fund - Amends Section 6-09.16-03 to remove the transfer of principal and interest from loan payments from the long-term care facility loan fund to the health care trust fund.

Senate Bill No. 2083 - Child abuse - Amends various sections relating to reporting and duties relating to child abuse.

Senate Bill No. 2085 - Medical services program adjustments - Amends various sections relating to the medical assistance program, including eligibility of Medicaid waivers for in-home services, services provided by advanced practice nurses, and payment methods for medical assistance providers.

Senate Bill No. 2086 - County social and human service project - Amends various sections relating to the county social and human service project, including the duties of counties and human service zones, payments to human service zones, and the process to inform county commissioners regarding options to transition zone employees to state employment, and transfers 16 FTE foster care licensing positions from zone employment to state employment.

Senate Bill No. 2087 - Medical assistance prior authorization - Amends Section 50-24.6-04 relating to prior authorization of medications for the medical assistance program.

Senate Bill No. 2088 - Adoption assistance - Amends Sections 50-28-02 and 50-09-02.2 relating to adoption assistance for children with special needs and payments to adoptive parents.

Senate Bill No. 2089 - Housing stabilization assistance and autism spectrum disorder voucher program - Amends Section 50-06-05.1 relating to housing stabilization assistance and repeals Section 50-06-32.1 to eliminate the autism spectrum disorder voucher program.

Senate Bill No. 2135 - Report on department quality - Requires DHS to provide a report to the Legislative Management before July 1, 2022, regarding the department's quality strategy.

Senate Bill No. 2161 - Behavioral health bed management system - Requires DHS to establish and maintain a registry of mental health providers in the state and establish and maintain a behavioral health bed management system for public and private providers.

Senate Bill No. 2199 - Interstate contracts for treatment - Amends Section 25-03.1-34.2 relating to DHS entering contracts with neighboring states for the treatment of mental illness or substance use disorders.

Senate Bill No. 2205 - Medicaid coverage for interpreter services - Requires DHS to cover interpreter services costs needed for individuals in the Medicaid program receiving medical services.

Senate Bill No. 2256 - Study of developmental disability services - Provides for a Legislative Management study of developmental disability services in the state and provides a $150,000 general fund appropriation to DHS to contract with a consultant for the study.

Senate Bill No. 2275 - **Task force on prevention of sexual abuse of children** - Provides a general fund appropriation of $281,715 for a grant to the task force on prevention of sexual abuse of children.

Department of Human Services - Budget No. 325
House Bill No. 1012
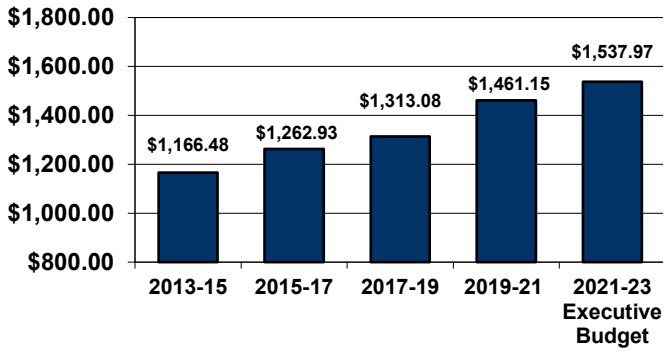
Other Sections

	Executive Budget Recommendation	House Version
Deficiency appropriation	Not included	Section 3 appropriates $333,333 from the DHS operating fund during the 2019-21 biennium for a grant to a political subdivision for a portion of the cost of purchasing a firetruck.
Line item transfers	Section 6 would allow DHS to transfer appropriation authority between line items within subdivisions 1 through 3 of Section 1. Section 7 would allow DHS to transfer appropriation authority from line items within subdivisions 1 through 3 of Section 1 to subdivision 4 of Section 1.	Section 4 allows DHS to transfer appropriation authority between line items within subdivisions 1 through 3 of Section 1. Section 5 allows DHS to transfer appropriation authority from line items within subdivisions 1 through 3 of Section 1 to subdivision 4 of Section 1.
Aging Services FTE position	Not included	Section 6 identifies 1 FTE position in the Aging Services program is for the administration of services resulting from a federal Department of Justice lawsuit settlement and the position is authorized only for the 2021-23 biennium.
Human service finance fund	Section 9 would identify $174,380,767 of the recommended appropriation for the county social and human service project is from the human service finance fund.	Section 7 identifies $187,385,888 of the appropriation for the county social and human service project is from the human service finance fund.
Community health trust fund	Section 8 would identify $24 million of the recommended appropriation for the Medical Services Division is from the community health trust fund.	Section 8 identifies $24 million of the appropriation for the Medical Services Division is from the community health trust fund.
Health care trust fund	Not included	Section 9 identifies $1 million of the appropriation for long-term care is from the health care trust fund for nursing facility operating margin adjustments.
Capital projects and payments	Section 21 would authorize the payment of special assessments at the State Hospital and Life Skills and Transition Center and would authorize the demolition of the chapel and employee building at the State Hospital. The section would also allow DHS to transfer funds from other line items to pay for the demolition of the buildings and other emergency capital projects.	Section 10 authorizes the payment of special assessments at the State Hospital and Life Skills and Transition Center. Section 11 authorizes the demolition of the chapel and employee building at the State Hospital. The section also allows DHS to transfer funds from other line items to pay for the demolition of the buildings and other emergency capital projects.
Medicaid Expansion appropriations	Section 11 would provide DHS may not spend more for the Medicaid Expansion program than the amount appropriated in the bill with certain exceptions.	Section 12 provides DHS may not spend more for the Medicaid Expansion program than the amount appropriated in the bill with certain exceptions.
Nursing facility appropriations	Section 12 would provide DHS may not spend more for nursing facility payments than the amount appropriated in the bill.	Section 13 provides DHS may not spend more for nursing facility payments than the amount appropriated in the bill.
Substance use disorder voucher program	Not included	Sections 14 and 15 create a new substance use disorder voucher facility grant program and provide that no more than 30 percent of funding for service grants may be used for residential services.
Medicaid Expansion	Section 3 would amend North Dakota Century Code Section 50-24.1-37 to extend the expiration date for the Medicaid Expansion program to June 30, 2022. Section 4 would provide for the Medicaid Expansion program to be a fee-for-service program administered by DHS effective July 1, 2022.	Sections 16 and 17 amend North Dakota Century Code Section 50-24.1-37 to extend the sunset clause on the Medicaid Expansion program. Section 17 provides effective January 1, 2022, 19 and 20 year old recipients are transitioned to a fee for service arrangement and provider reimbursement rates are not confidential.
Personal care	Section 5 would repeal Section 50-24.1-18.1 relating to personal care services for eligible medical assistance recipients.	Section 18 repeals Section 50-24.1-18.1 relating to personal care services for eligible medical assistance recipients.



Conveyance of land	Section 20 would authorize DHS to convey land at the Life Skills and Transition Center to the Grafton Parks and Recreation Department.	Section 19 authorizes DHS to convey land at the Life Skills and Transition Center to the Grafton Parks and Recreation Department.
Lease of land at State Hospital	Section 25 would provide legislative intent that DHS and the Adjutant General enter an agreement to lease up to 20 acres of property at the State Hospital for a National Guard training and storage center.	Section 20 authorizes DHS and the Adjutant General to enter an agreement to lease up to 20 acres of property at the State Hospital for a National Guard training and storage facility.
Provider outcomes	Section 23 would require providers that receive funding from DHS to submit process and outcome measures.	Section 21 requires providers that receive funding from DHS to submit process and outcome measures.
Developmental disabilities in-home supports	Not included	Section 22 directs DHS to include in-home supports to be included in the Appendix K application submitted to the Centers for Medicare and Medicaid Services for the developmental disability waiver.
Residential treatment providers	Section 24 would require DHS to adopt rules establishing a ratesetting process and other requirements for foster care maintenance rates for qualified residential treatment providers.	Section 23 requires DHS to adopt rules establishing a ratesetting process and other requirements for foster care maintenance rates for qualified residential treatment providers.
Community behavioral health program	Not included	Section 24 authorizes DHS to use line item transfers to provide funding for the community behavioral health program.
Carryover authority	Sections 14 through 19 would allow DHS to continue unexpended appropriations for various projects into the 2021-23 biennium.	Sections 25 through 30 allow DHS to continue unexpended appropriations for various projects into the 2021-23 biennium.
Legislative intent - Developmental disability provider rates	Not included	Section 31 provides legislative intent that DHS seek a deficiency appropriation from the 68th Legislative Assembly if developmental disability provider funding is not sufficient to pay actual expenses.
State Hospital complex study	Not included	Section 32 provides for DHS to conduct a study of the State Hospital complex and to provide a report to the Legislative Management regarding the results of the study.
Medicaid Expansion behavioral health services	Not included	Section 33 provides for DHS to conduct a study of the feasibility and desirability of implementing behavioral health services for the Medicaid Expansion program through an administrative services organization.
Nursing home bed reduction	Section 10 would appropriate $3.3 million from the general fund to provide incentives to nursing facilities to reduce licensed bed capacity.	Not included
Health home for individuals with chronic conditions	Section 13 would require DHS to develop a plan to implement a state Medicaid option to provide coordinated care through a health home for individuals with a chronic condition.	Not included
State Hospital facility	Section 22 would authorize DHS to enter a public-private partnership for the purpose of constructing a new State Hospital facility.	Not included

Major Increases (Decreases) in Ongoing General Fund Appropriations

2015-17 Biennium

1.	Added state matching funds due to changes in FMAP	$3,584,150
2.	Added funding for the state's share of Medicaid Expansion costs	$8,187,466
3.	Provided a 3 percent inflationary increase for providers for the 1st year of the biennium	$24,727,201
4.	Added funding of $19,312,165 for property tax relief to counties for costs previously paid by counties for child welfare programs, the SPED programs, and technology costs; and $3.9 million for grants to counties that have imposed an emergency human service levy	$23,212,165
5.	Transferred the high-risk sex offender treatment program to the Department of Corrections and Rehabilitation	($2,290,297)
6.	Added funding for physical, occupational, and speech therapy service provider rate increase to a 50 percent fee schedule	$468,629
7.	Added funding for Medicare drug clawback payments to reflect a premium rate increase	$2,183,214
8.	Added funding for basic care provider payment changes	$704,148
9.	Added funding for senior meals program	$502,300
10.	Added funding to establish and administer a substance abuse voucher system	$375,000

2017-19 Biennium

1.	Removed 33 FTE positions from the department	($3,127,902)
2.	Reduced funding for staff overtime	($1,082,857)
3.	Adjusted funding for child care assistance eligibility	($2,160,357)
4.	Adjusted the professional fee schedule to 100 percent of Medicare and provided other policy changes	($10,612,966)
5.	Added funding to continue Medicaid Expansion for 19 and 20 year olds as managed care	$1,653,008

6.	Changed a portion of funding sources for various programs from the general fund to the community health trust fund ($18,000,000) and the tobacco prevention and control trust fund ($22,175,000)	($40,175,000)
7.	Added funding for nursing home operating margin, rebasing, and incentives	$1,783,181
8.	Added funding for money follows the person grants	$527,954
9.	Added funding to increase the autism waiver maximum age to 11 years old	$183,609
10.	Reduced funding for vacant positions and employee turnover at institutions	($3,250,499)

2019-21 Biennium

1.	Added funding for provider inflationary increases of 2 percent the 1st year of the biennium and 2.5 percent the 2nd year of the biennium	$30,155,090
2.	Adjusted funding for anticipated changes in the regular FMAP	($25,682,840)
3.	Adjusted funding for anticipated changes in the FMAP for Medicaid Expansion ($20,254,376) and the children's health insurance program ($6,152,757)	$26,407,133
4.	Added funding for grant cost and caseload changes	$51,128,377
5.	Replaced funding provided in the 2017-19 biennium from the tobacco prevention and control trust fund	$34,175,000
6.	Replaced one-time funding provided in the 2017-19 biennium for Medicaid Expansion commercial rates	$13,300,000
7.	Adjusted funding sources to use funding from the community health trust fund rather than the general fund	($32,400,000)
8.	Added funding for the free through recovery program to provide services to individuals outside of the corrections system	$4,000,000
9.	Added funding to expand crisis services	$4,096,174
10.	Added funding for the substance use disorder voucher program	$3,053,523

2021-23 Biennium (Executive Budget Recommendation)

1.	Adds funding for cost, caseload, and utilization changes, including $156,789,851 for medical services, $77,698,712 for long-term care, and $41,567,021 for developmental disabilities. **The House adjusted estimated utilization rates for the medical services and long-term care programs.**	$124,345,846
2.	Underfunds salaries and wages by $4,694,730 from the general fund in anticipation of savings from vacant positions and employee turnover	($4,694,730)
3.	Reduces ongoing funding appropriated during the 2019-21 biennium from the community health trust fund from $32.4 million to $24 million and replaces ongoing funding provided from the health care trust fund ($1 million). **The House added $1 million of funding from the health care trust fund and matching federal funds of $1,150,538 for nursing home operating margin adjustments.**	$15,400,000
4.	Provides a 1 percent inflationary increase for human service providers during each year of the 2021-23 biennium	$13,883,837
5.	Increases funding for the substance use disorder voucher program from $8 million to $17 million. **The House increased funding for the voucher program to $15 million and provided for $3 million of the funds to be distributed as facility grants in underserved areas of the state.**	$9,000,000
6.	Adjusts funding to reduce general fund support for traditional Medicaid ($50,919,245) and increase general fund support for Medicaid Expansion ($3,916,989) and the children's health insurance program ($1,222,892) due to changes in the state's FMAP	($45,779,364)
7.	Underfunds Medicaid grants	($9,580,913)
8.	Adds funding to contract with a private service provider for civil sex offender treatment	$917,004
9.	Adds funding for the Capitol grounds agency rent proposal. **The House did not add funding for the agency rent proposal.**	$474,286
10.	Adds ongoing funding to develop an early childhood integrated data system	$500,000

GOVERNOR'S RECOMMENDATION FOR THE DEPARTMENT OF HUMAN SERVICES AS SUBMITTED BY THE OFFICE OF MANAGEMENT AND BUDGET

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from special funds derived from federal funds and other income, to the department of human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2021, and ending June 30, 2023, as follows:

Subdivision 1.

MANAGEMENT

	Base Level	Adjustments or Enhancements	Appropriation
Salaries and Wages	$ 16,939,176	$ 2,509,310	$ 19,448,486

SECTION 2. ONE-TIME FUNDING - EFFECT ON BASE BUDGET - REPORT TO SIXTY-EIGHTH LEGISLATIVE ASSEMBLY. The following amounts reflect the one-time funding items approved by the sixty- sixth legislative assembly for the 2019-21 biennium and the 2021-23 biennium one-time funding items included in section 1 of this Act:

One-Time Funding Description	2019-21	2021-23
Technology Projects	$13,785,658	$ 0
Capital Projects – Life Skills and Transition Center	4,277,165	0
Capital Projects – State Hospital	2,493,500	0
Medically Complex Children Provider Funding Adjustment	977,603	0
Hyperbaric Oxygen Therapy Grant	335,000	0
State Hospital Study	200,000	0
MMIS Modernization	0	35,000,000
Nursing Facility Payment Reform	0	7,200,000
Nursing Home Bed Buy Back	0	3,300,000
Frame/CCIPS Replacement	0	30,000,000
Total All Funds	$22,068,926	$75,500,000
Less Estimated Income	20,556,323	49,525,314
Total General Fund	$1,512,603	$25,974,686

The 2021-23 biennium one-time funding amounts are not a part of the entity's base budget for the 2023-25 biennium. The department of human services shall report to the appropriations committees of the sixty-eighth legislative assembly on the use of this one-time funding for the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 3. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (Effective ~~January~~August 1, ~~2020~~2021, through ~~July 31~~June 30, ~~2021~~2022 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.
2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.
3. Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.
4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even- numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.

5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.

SECTION 4. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion ~~- Legislative management report~~. (Effective ~~January~~July 1, ~~2020~~2022, through July 31, ~~2021~~2023 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.
2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.
3. ~~Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.~~
4. ~~The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even- numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.~~
5. ~~Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.~~

SECTION 5. REPEAL. Section 50-24.1-18.1 of the North Dakota Century Code is repealed.

SECTION 6. FUNDING TRANSFERS - EXCEPTION - AUTHORIZATION. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021 and ending June 30, 2023, as requested by the department of human services. The department of human services shall notify the legislative council of any transfer made pursuant to this section. The department shall report to the budget section after June 30, 2022, any transfer made in excess of $50,000 and to the appropriations committees of the sixty-eighth legislative assembly regarding any transfers made pursuant to this section.

SECTION 7. FUNDING TRANSFERS - EXCEPTION - AUTHORIZATION. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority from line items within subdivisions 1, 2, and 3 of section 1 of this Act to subdivision 4 of section 1 of this Act for the biennium beginning July 1, 2021 and ending June 30, 2023, as requested by the department of human services. The department of human services shall notify the legislative council of any transfer made pursuant to this section. The department shall report to the budget section after June 30, 2022 any transfer made in excess of $50,000 and to the appropriations committees of the sixty-eighth legislative assembly regarding any transfers made pursuant to this section.

SECTION 8. ESTIMATED INCOME - COMMUNITY HEALTH TRUST FUND. The estimated income line item in subdivision 2 of section 1 of this Act includes the sum of $24,000,000 from the community health trust fund for defraying expenses in the medical services division.

SECTION 9. ESTIMATED INCOME - HUMAN SERVICE FINANCE FUND. The estimated income line item in subdivision 4 of section 1 of this Act includes the sum of $174,380,767 from the human service finance fund for state-paid economic assistance and social and human services.

SECTION 10. APPROPRIATION – NURSING HOME BED REDUCTION. There is appropriated the sum of $3,300,000, from the general fund or so much of the sum as may be necessary, to the department of human services for the purpose of providing incentives to nursing homes to reduce licensed nursing facility bed capacity for the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 11. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM.

1. Subdivision 2 of section 1 of this Act includes the sum of $325,521,229, of which $36,606,115 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021 and ending June 30, 2022. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:
   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $5,120,064 included in subdivision 2 of section 1 of this Act.
   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $34,364,628 included in subdivision 2 of section 1 of this Act.
2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915i state plan.
3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.
4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.
5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.
6. The department of human services and the Medicaid expansion managed care organization shall ensure the appropriate contract amendment is adopted for coverage through June 30, 2022. The contract amendment shall stay within the appropriation and the requirements of chapter 54-44.4 do not apply.

SECTION 12. EXPENDITURES MAY NOT EXCEED APPROPRIATION – NURSING HOME RATES. Subdivision 2 of section 1 of this Act includes the sum of $635,373,451, of which $296,019,558 is from the general fund, for nursing home rates for the biennium beginning July 1, 2021 and ending June 30, 2023. The expenditures for nursing homes may not exceed this amount.

SECTION 13. HEALTH HOMES - REPORT TO LEGISLATIVE MANAGEMENT. During the biennium beginning July 1, 2021 and ending June 30, 2023, the department of human services shall develop a plan to implement, in accordance with section 1945 of the Social Security Act, health homes to coordinate care for people with Medicaid who have chronic conditions during the biennium beginning July 1, 2023 and ending June 30, 2025. Prior to October 1, 2022, the department shall report to the legislative management on the implementation plan.

SECTION 14. EXEMPTION. The amount appropriated for the Medicaid management information system technology stack upgrade in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54- 44.1-11. Any unexpended funds from these appropriations approved under section 54-44.1-11 are available for the completion of the Medicaid management information system technology stack upgrade during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 15. EXEMPTION. The amount appropriated for the modification of the department of human services' eligibility systems in chapter 578 of the 2011 Special Session Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54- 44.1-11 for continuation into the 2013-15 biennium, then the 2015-17 biennium, then the 2017-19 biennium, and then the 2019-21 biennium are available for the completion of the modification of the eligibility systems project during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 16. EXEMPTION. The amount appropriated for the development of the childcare licensing and data system in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019- 21 biennium are available for the completion of the childcare licensing and data system during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 17. EXEMPTION. The amount appropriated for the development of the health information network in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the health information network during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 18. EXEMPTION. The sum of $200,000 from the general fund appropriated for the department's operating expenses for the school behavioral health program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the school behavior health pilot projects during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 19. EXEMPTION. The sum of $150,000 from the general fund appropriated for the department's operating expenses for behavioral health recovery home grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation may be used for behavioral health recovery home grants during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 20. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER. The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to Grafton Parks and Recreation. The department may convey a portion of two parcels of land commonly referred to as “the bowl” on the terms and conditions determined appropriate by the department and the attorney general. Section 54-01-05.2 and 54-01-05.5 do not apply to this conveyance.

SECTION 21. CAPITAL PROJECTS AND PAYMENTS. During the period beginning with the effective date of this Act, and ending June 30, 2023, the department of human services is authorized to expend funds for the following capital projects and payments:

1. The payment of special assessments at the state hospital and life skills and transition center; and
2. The demolition of the chapel and employee building and associated tunnels at the state hospital.

Notwithstanding sections 54-16-04 and 54-27-12, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021 and ending June 30, 2023, as requested by the department of human services for the department to expend funds on the demolition of the identified buildings and associated tunnels and for emergency capital projects. The department of human services shall notify the legislative council of any transfer made pursuant to this section. The department of human services shall report to the

budget section after June 30, 2022 any transfer made in excess of $50,000 and to the appropriations committees of the sixty-eighth legislative assembly regarding any transfers made pursuant to this section.

SECTION 22. STATE HOSPITAL BUILDING PROJECTS. The department of human services is authorized to construct a new state hospital on the property owned by the state of North Dakota, in Stutsman County, near or on state hospital's current campus. The new state hospital may include space for the operation of the regional human service center. The department of human services shall utilize chapter 48-02.1 and have a private operator to build, transfer, and operate the facility through a development agreement on leased property owned by the state of North Dakota. The continuing cost to support the new state hospital through a development agreement must be included in the department of human services' 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 23. PROVIDER PROCESS AND OUTCOME MEASURES. Providers that receive funding from the department of human services shall submit process and outcome measures, as required by the department, to the department of human services for programs and services supported by state funding during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 24. QUALIFIED RESIDENTIAL TREATMENT PROVIDERS. The department of human services shall adopt rules, on or before October 1, 2021, establishing a new rate setting process and requirements for foster care maintenance rates for qualified residential treatment providers based on the appropriation received by the sixty-seventh legislative assembly.

SECTION 25. LEGISLATIVE INTENT – CONVEYANCE OF LAND. It is the intent of the sixty-seventh legislative assembly that the department of human services and national guard enter into an agreement to lease up to twenty acres of real property associated with the state hospital for the national guard to build a new training and storage center.

SECTION 26. EFFECTIVE DATE. Section 4 of this Act becomes effective on July 1, 2022.

SECTION 27. EXPIRATION DATE. Sections 3 and 11 of this Act is effective through June 30, 2022 and after that date is ineffective.

SECTION 28. EMERGENCY. Sections 21 and 22 of this Act are declared to be an emergency measure.

2021 SENATE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
3/9/2021 AM
Senate Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Holmberg opened the hearing at 8:31 A.M.

Senators present: **Holmberg, Krebsbach, Wanzek, Poolman, Erbele, Dever, Oehlke, Rust, Davison, Hogue, Sorvaag, Mathern, and Heckaman. Senator Bekkedahl** was absent.

Discussion Topics:

- DHS Administration
- Behavioral Health
- Medical Services

Chris Jones, Executive Director, Department of Human Services, testified neutrally and submitted testimony #8077.

Pamela Sagness, Director of Behavioral Health Division, Department of Human Services, testified neutrally and submitted testimony #8226 and #8231.

Caprice Knapp, Director of Medical Services Division, Department of Human Services, testified in favor and submitted testimony #8211 and #8259.

HOUSE BILL 1012

Senate Appropriations

Senator Ray Holmberg, Chairman

OVERVIEW/MANAGEMENT BUDGET

Chris Jones, Executive Director

NORTH Dakota | Human Services

Be Legendary.™

DHS MISSION AND OPERATING PRINCIPLES

Provide quality, efficient, and effective human services, which improve the lives of people

- Services and care should be provided **as close to home as possible**
- Services should be **provided consistently across service areas** to promote equity of access and citizen focus of delivery

- Services should be administered to **optimize** for a given cost **the number served** at a service **level aligned to need**
- Investments and funding in DHS should **maximize ROI for the most vulnerable** through safety net services
- Cost-effectiveness should be considered holistically, acknowledging **potential unintended consequences** and **alignment between state and federal priorities**

- Services should help vulnerable North Dakotans of all ages maintain or enhance quality of life by:
- Supporting **access to the social determinants of health**: economic stability, housing, education, food, community, and health care
- **Mitigating threats** to quality of life such as lack of financial resources, emotional crises, disabling conditions, or inability to protect oneself

DEPARTMENT OF HUMAN SERVICES

Quality services, Proven results, Closer to home

1. Base decisions on **quality**, **efficiency**, and **effectiveness**.

   Find success in a resource-constrained environment.

   Make **reductions** in some areas **and investments** in others to optimize outcomes.

2. The state has **enough treatment beds**. Investing in **earlier interventions** can help **avoid crisis**.

   Right service. Right place. Right time.

   Serving people in **lowest level of care necessary** will return **better outcomes**.

   To deliver services closer to home, **all** have to be **willing to change** how they do business – DHS can't do this alone.

3. How we **pay** for services should be **fair** and **equitable** across systems.

   Inequity in rates **affects** people's ability to **access** services - providers often prioritize more lucrative payment opportunities

   Demonstrate value to taxpayers. **Value** equals **high quality cost efficient care**.

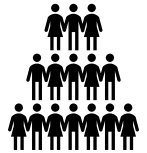
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

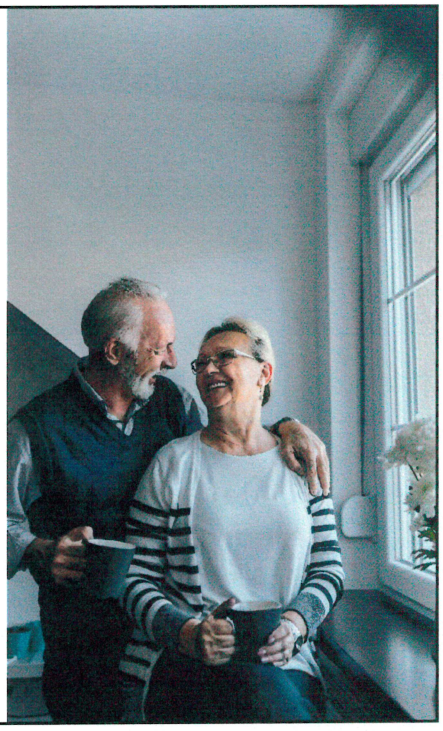
What is Behavioral Health?

A state of mental/emotional being and/or choices and actions that affect **WELLNESS**.

- Preventing and treating depression and anxiety
- Preventing and treating substance use disorder or other addictions
- Supporting recovery
- Creating healthy communities
- Promoting overall well-being

2

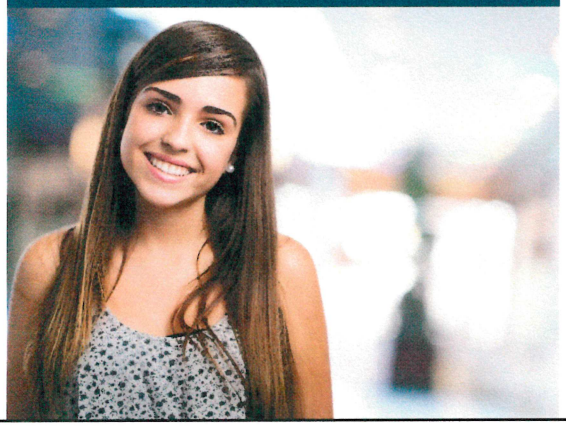
2



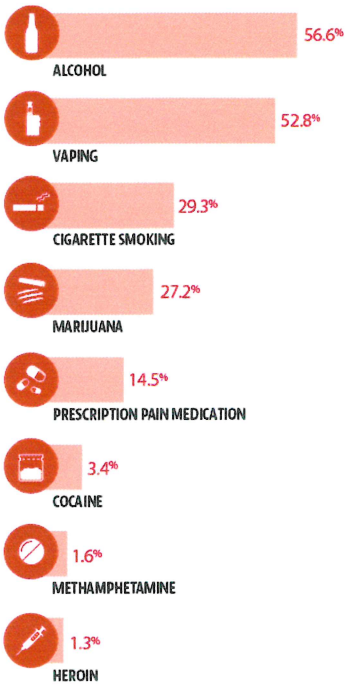
3

Why is Behavioral Health Important?

Persons with behavioral health disorders die, on average, about *5 years earlier* than persons without these disorders.



Persons with serious mental illness (SMI) are now dying *25 years earlier* than the general population



(Druss BG, et al. Understanding Excess Mortality in Persons With Mental Illness: 17-Year Follow Up of a Nationally Representative US Survey. Medical Care 2011; 49(6), 599–604.)

12

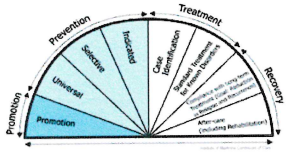
North Dakota Behavioral Health System Study RECOMMENDATIONS



The 250-page report provides more than 65 recommendations in 13 categories.

1. Develop a comprehensive implementation plan
2. Invest in prevention and early intervention
3. Ensure all North Dakotans have timely access to behavioral health services
4. Expand outpatient and community-based service array
5. Enhance and streamline system of care for children and youth
6. Continue to implement/refine criminal justice strategy
7. Engage in targeted efforts to recruit/retain competent behavioral health workforce
8. Expand the use of tele-behavioral health
9. Ensure the system reflects its values of person-centeredness, cultural competence, trauma-informed approaches
10. Encourage and support the efforts of communities to promote high-quality services
11. Partner with tribal nations to increase health equity
12. Diversify and enhance funding for behavioral health
13. Conduct ongoing, system-side data-driven monitoring of needs and access

13

13

Keys to Reforming North Dakota's Behavioral Health System

Support the full Continuum of Care

Increase Community-Based Services

Prevent Criminal Justice Involvement for Individuals with a Behavioral Health Condition

14

14

KEY INITIATIVES

Behavioral Health

NORTH Dakota Be Legendary.™ | Behavioral Health HUMAN SERVICES

15

15

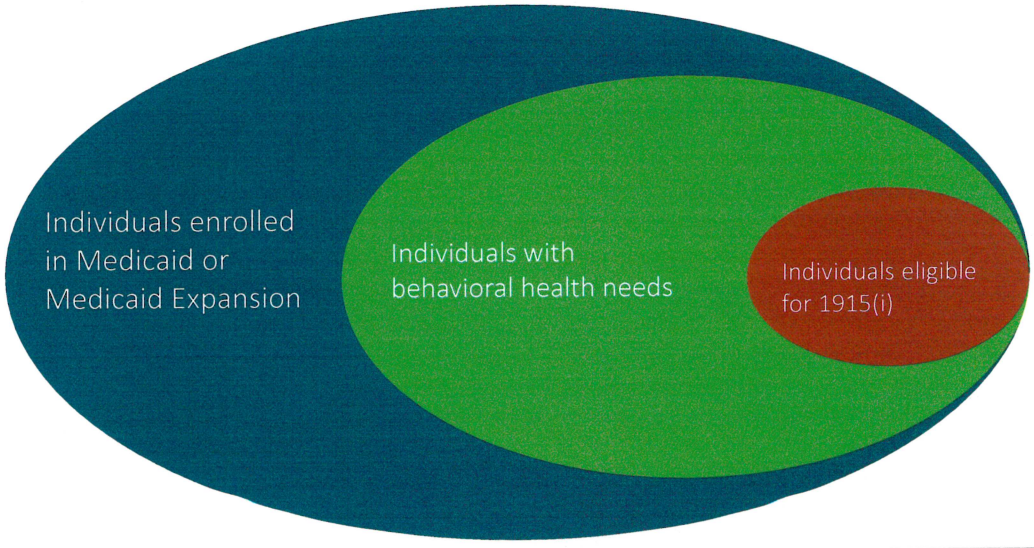
During the 2019 legislative session, North Dakota lawmakers authorized the Department of Human Services (Department) to create a Medicaid 1915(i) State Plan Amendment.

The amendment allows North Dakota Medicaid to pay for additional home and community-based services to support individuals with behavioral health conditions.

16

16

1915i State Plan Amendment

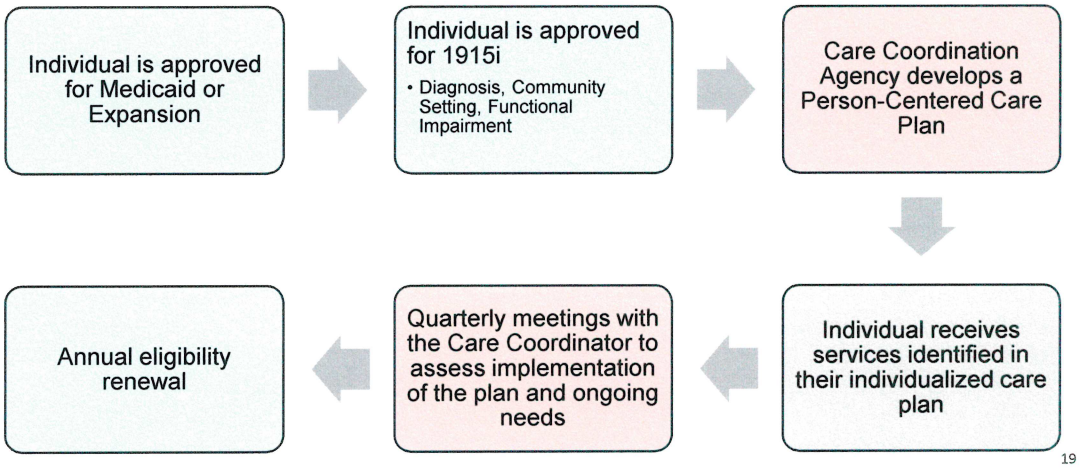


The amendment allows North Dakota Medicaid to pay for additional home and community-based services to support individuals with behavioral health conditions.

Individual Eligibility	Services
• The individual is age 0+; and • The individual is currently enrolled in ND Medicaid or Medicaid Expansion; and • The individual resides in and will receive services in a setting meeting the federal home and community-based setting requirements, and • The individual has a mental illness, substance use disorder or traumatic brain injury diagnosis The individual has a functional impairment, which substantially interferes with or substantially limits the ability to function in the family, school or community setting, as evidenced by a complex score of 50 or higher on the WHODAS 2.0.	• Care Coordination • Training and Supports for Unpaid Caregivers • Community Transitional Services • Benefits Planning • Non-Medical Transportation • Respite • Prevocational Training • Supported Education • Supported Employment • Housing Support Services • Family Peer Support • Peer Support

17

17

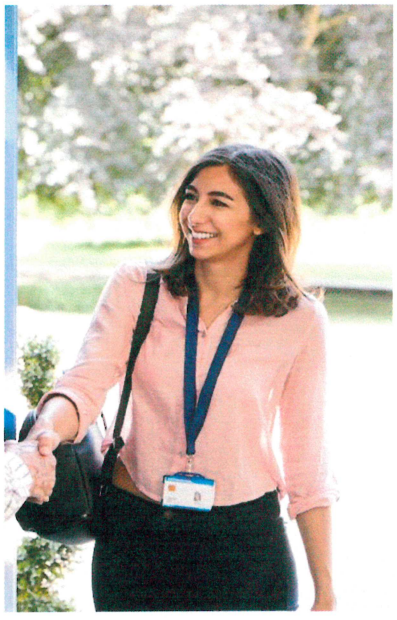


Population Served

18

18

Process



19

19

The Care Coordination Role

- 1915(i) Care Coordination Service are provided by enrolled 1915(i) Care Coordination Providers. Care Coordinators could be employed by the state, private providers/ community organizations.
- The Care Coordination Role is responsible for the development of the Person-centered Plan of Care and supporting the individual with accessing the greater community to meet the individual's overall needs. This includes:
  - Ensuring continuity of care including collaborating with existing systems and services.
  - Connecting individual to additional 1915(i) Services through the development of the person-centered plan of care.
  - Building informal supports network in the individual's community.
  - Providing services that are equitable and culturally competent.
  - Empowering individuals by upholding practice that promotes individual choice, rights and responsibilities.

20

20

Example 1: Community Behavioral Health Provider

NOW

- $1,000,000 **general** fund/biennium
- 60 individuals served at any one time/biennium
  - 50% qualify for Medicaid
  - 25% qualify for 1915i (15)
- Individuals receive support services 24/7

FUTURE

- 15 individuals (qualify for 1915i) - Provider reimbursed for person-centered services based on individuals need

EXAMPLE →

- *An individual receives 2 hours of Care Coordination/3 days a week/biennium = $50,918.40*
  - *For 15 individuals = **$763,776***
- *An individual receives Peer Support 4 hours/week/biennium = $12,280.32*
  - *For 13 individuals = **$159,644.16***
- *An individual receives Supported Housing 1 hour/day/5 days a week = $21,819.20*
  - *For 12 individuals = **$261,830.40***
- *An individual receives Supported Employment 3 hours/week/biennium = $13,091.52*
  - *For 4 individuals = **$52,366.08***
- *Total amount billed to the provider = **$1,237,616.64***
  - *$618,808.32 general funds/biennium for the 15 individuals serviced*

In current budget most providers continue to receive 50% of the original amount - $500,000

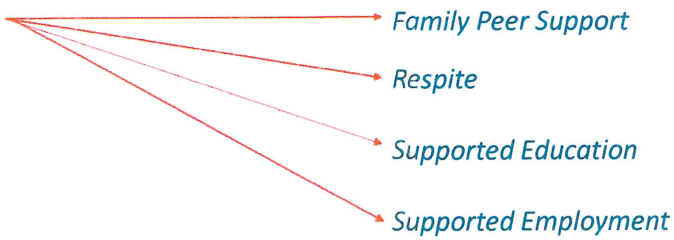
21

21

Outcomes of 1915i Implementation

- Individuals with highest need receive services that are more robust and targeted to their specific needs (person-centered).
- By leveraging other funds, the state is investing less funding yet providing more service to individuals with a behavioral health condition and providing opportunities for providers to expand services.
- Providers are able to bill for the specific services they are providing which allows greater opportunity to expand services and increase revenue.
- Behavioral health on par with health & sustainable.

22



22

Example 2: School

FUTURE

EXAMPLE →

- *School-Based Care Coordinator*
  30 hours/40 weeks/biennium =
  $195,840

23

23

Supporting Families

FUTURE

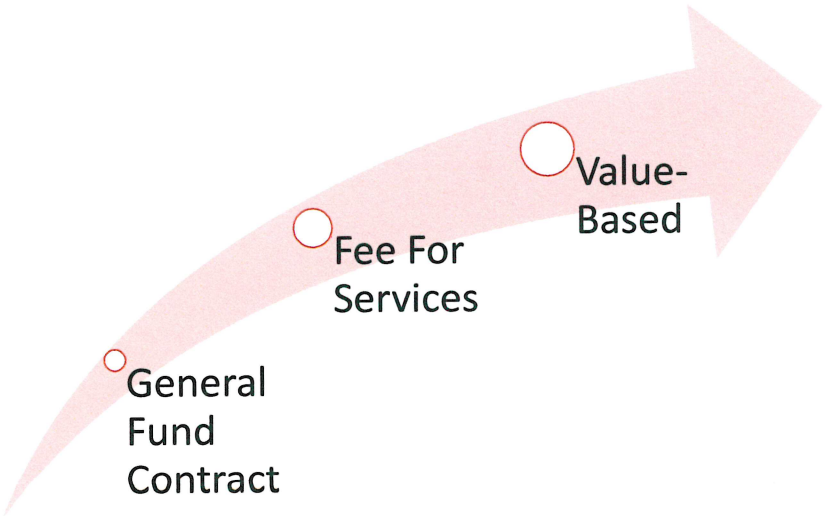
- ***Student struggles are often related to family issues.***
- ***Connecting family members to services can be significant for student success.***

EXAMPLE →

A family experiences homelessness due to parental mental illness. Connecting to care coordination providers of adult services will be vital.

24

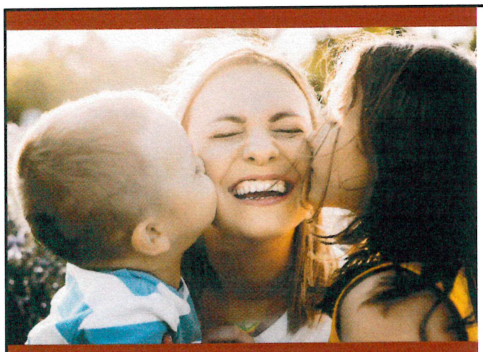
24



Expanded Behavioral Health Workforce

- 1915i services are provided by non-traditional behavioral health professionals
- Potential to improve access for workforce in rural areas
- Effectiveness of lived experience
- Career growth opportunities

25



25

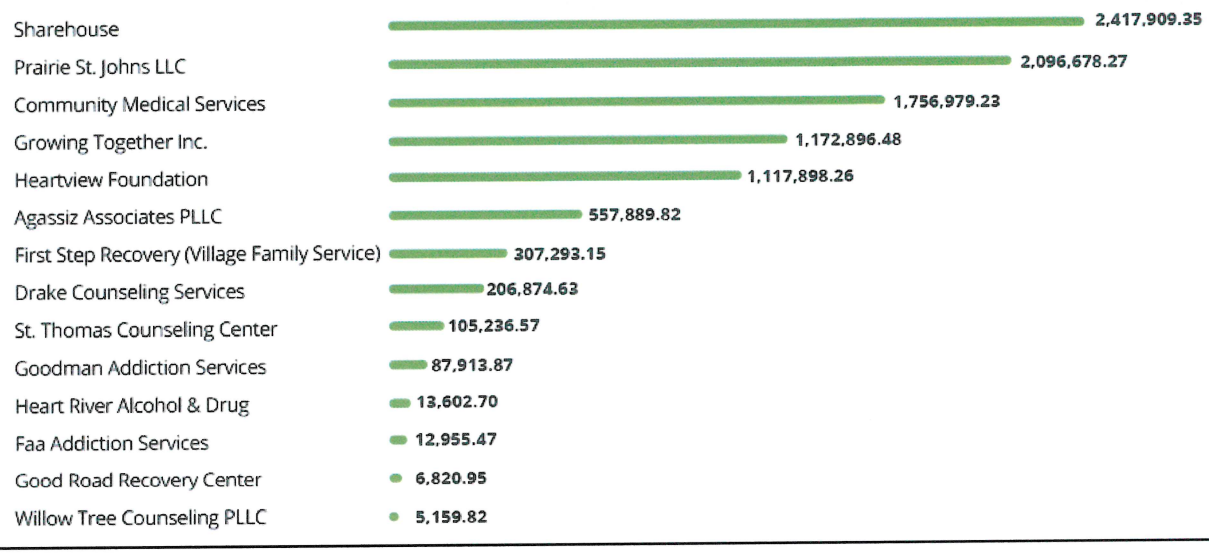
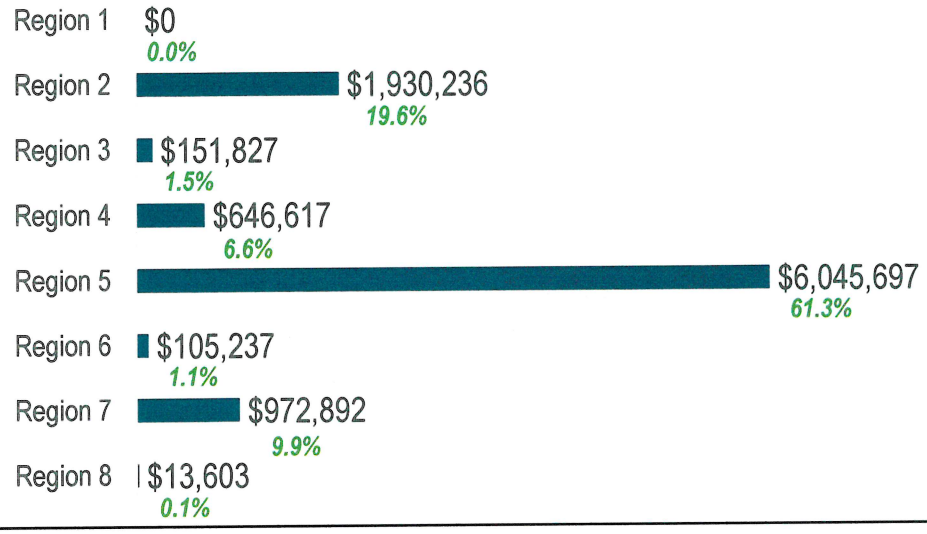
Applicants approved from February 2020 to August 2020



37

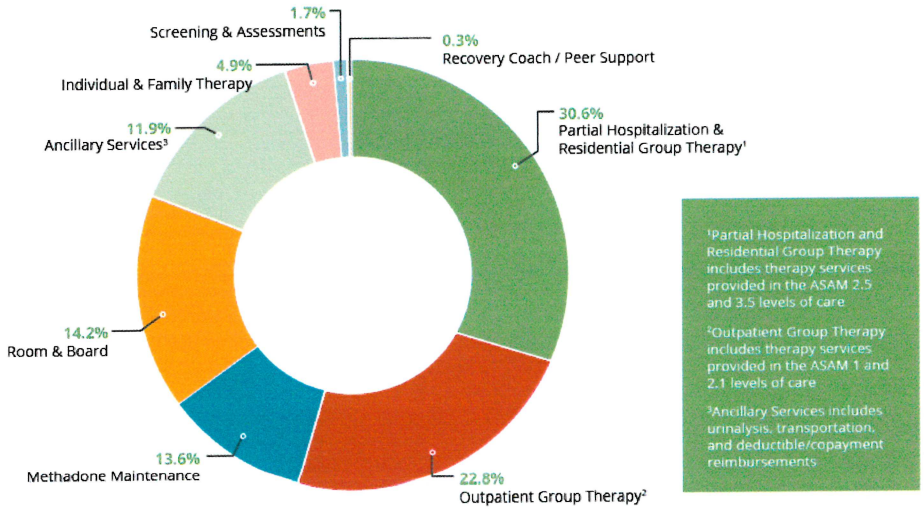
Total Voucher Reimbursements by Provider



The data below describes provider reimbursements from July 1, 2019 through December 11, 2020 ($9,866,108.57). Cumulative refunds received during this time totaled $219,292.81 for a net expenditure of $9,646,815.76.

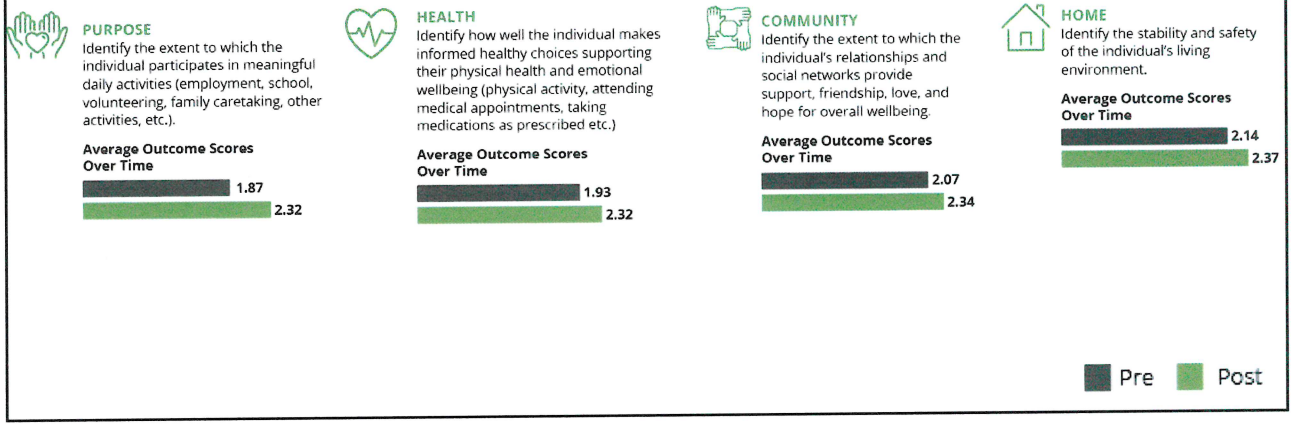
38

Regional Provider Reimbursements



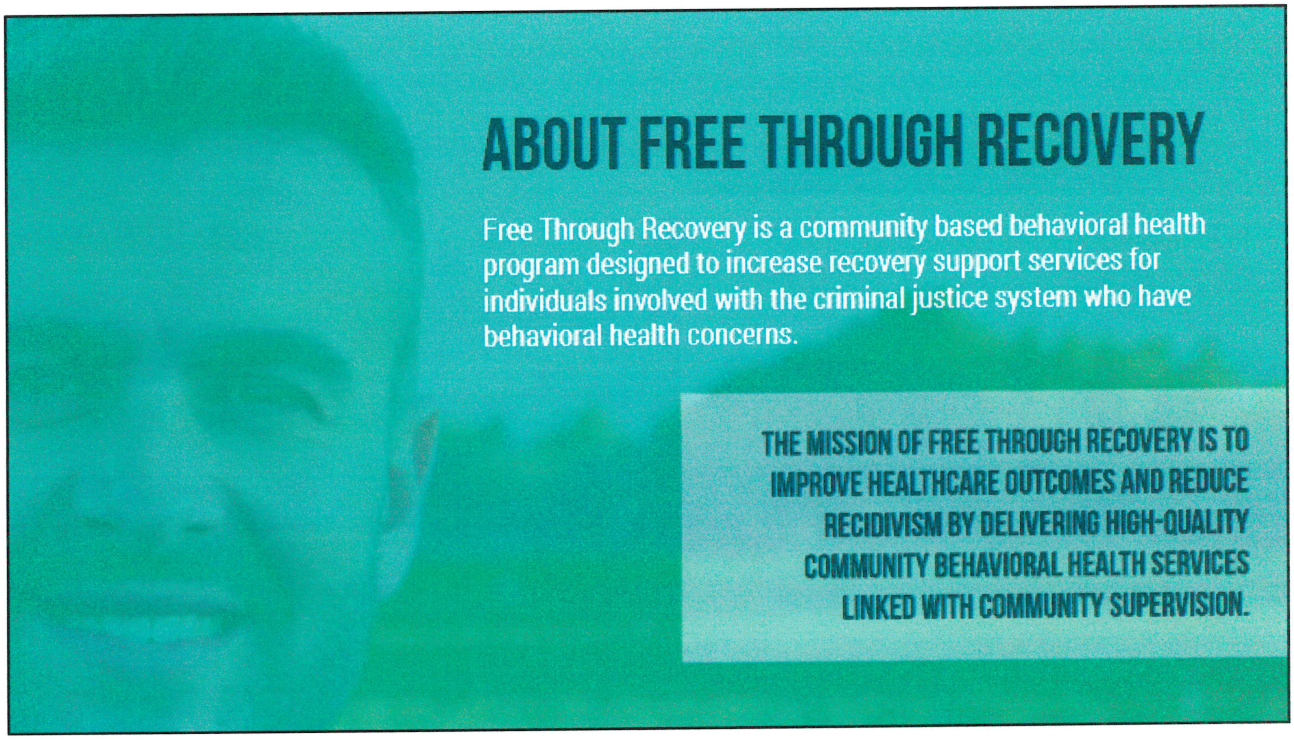
July 1, 2019 – December 11, 2020

39



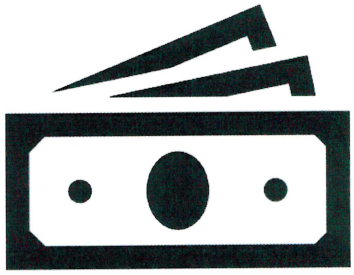
Expenditures by Service Type

Percentage of expenditures by service type from February 6, 2020 through December 11, 2020.



40

Since inception, all outcomes increased following services reimbursed through the SUD Voucher program.



41

42

Pay for Performance Model

- Providers are paid a monthly base rate for each participant with the opportunity to receive performance pay if the participant meets at least 3 out of 4 monthly outcomes.

43

43

Outcome Monitoring

Stable Housing

Is the person living in a residence that is supportive of their recovery?

Stable Employment

Is the person actively seeking or participating in employment?

Recovery

Is the participant demonstrating effort to reduce their substance use or the harm associated with their use and/or improve their mental health functioning.

Criminal Justice

Did the participant avoid law enforcement involvement resulting in arrest, criminal charge, or probation violation resulting in initiation of revocation?

44

44

FREE THROUGH Recovery

Overall, from March 2018 through March 2, 2021, providers earned performance pay for 68.5% of their participants.

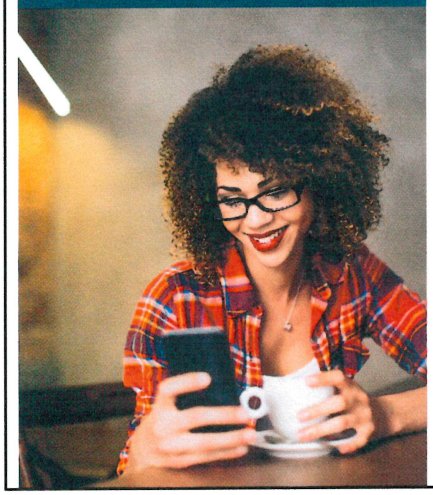
- 3,026 Individuals have Participated
- 995 Current Active Participants
- 35 Current Providers

45

45

Community-Based Behavioral Health Program

In October 2020, the North Dakota Emergency Commission and Budget Section approved the Department of Human Services' Behavioral Health Division request for $1.7 million in Coronavirus Aid, Relief, and Economic Security (CARES) Act funding for the development of a Community-Based Behavioral Health Program.



Program Goal: reduce need for treatment in congregate settings, such as residential treatment facilities, inpatient hospitalizations and emergency medical interventions.

	Number of PROVIDERS	Number of INDIVIDUALS
Substance Use Disorder Treatment Services	11	98
Care Coordination Services	35	178

46

46

Peer Support Certification

The ND 66th Legislative Assembly passed Senate Bill 2012 giving the Behavioral Health Division authority to develop and implement a program for the certification of peer support specialists.

Administrative Rules 75-03-43 were promulgated and outlines the requirements and process for two levels of Peer Support Specialist certification:

- Certified Peer Support Specialist I (CPSS I)
  - **43 CPSS I (as of March 2, 2021)**
- Certified Peer Support Specialist II (CPSS II)
  - **12 CPSS II (as of March 2, 2021)**

Since 2018 the Behavioral Health Division hosted 21 ***trainings*** *and trained over* ***506 individuals.***

47

47

Behavioral Health and Education

Prevention and Early Intervention Pilot	Behavioral Health School Grant Program	Behavioral Health Resource Support (B-HERO)
The ND 66th Legislative Assembly passed Senate Bill 2012 appropriating $300,000 to the Department of Human Services for the purpose of establishing a children's prevention and early intervention behavioral health services pilot project in the school system; including services to children suffering from the effects of behavioral health issues.	*The ND 66th Legislative Assembly passed Senate Bill 2012 appropriating $1,500,000 to the Department of Human Services for the purpose of providing behavioral health services and support grants to school districts to address student behavioral health needs.*	*The ND 66th Legislative Assembly passed Senate Bill 2149 which established the requirement for each school within a district to designate an individual as a behavioral health resource coordinator and Senate Bill 2313 which established the requirement for DHS to provide resources to behavioral health resource coordinators.*
October 2018 - Pilot project to Simle Middle School in Bismarck. October 2020 – Pilot project expansion awarded to Dunseith Public School (tribal) and Barnes County North Public School (rural).	25 schools utilized ND State Medicaid reimbursement during the previous school year and are eligible for funding. **12 grant applications have been received and awarded from 7 schools** (3/5/2021)	The Central Regional Education Association (CREA) was awarded the contract (through a Request for Proposal) to provide resources, information, and support to school behavioral health resource coordinators at each school in North Dakota, collaborating with the Behavioral Health Division.

8231

North Dakota Prevalence of Behavioral Health Conditions

	Adults
Addiction	8.9%
Mental Illness	19.1%
Brain Injury	2%

The 1915(i) will serve a subset of this population, based Medicaid eligibility and functional impairment

Medicaid 1915(i) State Plan Amendment

During the 2019 legislative session, North Dakota lawmakers authorized the Department of Human Services to create a Medicaid 1915(i) State Plan Amendment. The amendment allows North Dakota Medicaid to pay for additional home and community-based services to support individuals with behavioral health conditions.

Based on the 2018 North Dakota Behavioral Health System Study, three keys to reforming North Dakota's behavioral Health system were identified:

- **Support the full Continuum of Care**
- **Increase Community-Based ServicesPrevent**
- **Criminal Justice Involvement for Individuals with a Behavioral Health Conditions**

The implementation of the Medicaid 1915(i) State Plan Amendment supports these keys and also aligns with the 2018 North Dakota Behavioral Health System Study recommendation 12.2: Pursue 1915(i) Medicaid state plan amendments.

BENEFITS OF 1915(i)

Consumers
Services available closer to home and are specifically targeted to need

Behavioral Health Professionals
Opportunities to expand workforce through non-traditional behavioral health professionals and improve access in rural areas expands workforce

Private Providers
Opportunities to bill for new services, expanding services and increasing revenue

For individuals to be eligible to receive services reimbursed through the Medicaid 1915(i) State Plan Amendment, individuals must meet the following criteria:

- Age 0+; and
- Currently enrolled in ND Medicaid or Medicaid Expansion; and
- Meet Federal Poverty Level of 150% or below; and
- Receive a WHODAS score of 50 or above; and
- Reside in and will receive services in a setting meeting the federal home and community-based setting requirements, and
- Have a diagnosis of substance use disorder, mental illness or brain injury.

The following services are approved through the 1915(i):

- Care Coordination
- Training and Supports for Caregivers
- Community Transitional Services
- Benefits Planning
- Non-Medical Transportation
- Respite
- Prevocational Training
- Supported Education
- Supported Employment
- Housing Support Services
- Peer Support
- Family Peer Support

What is the process for receiving services under the 1915(i)?

1. Individual is approved for Medicaid or Expansion
2. Individual is approved for 1915i
   - Diagnosis, Community Setting, Functional Impairment
3. Care Coordination Agency develops a Person-Centered Care Plan
4. Individual receives services identified in their individualized care plan
5. Quarterly meetings with the Care Coordinator to assess implementation of the plan and ongoing needs
6. Annual eligibility renewal

Long-Term Care Budget- House Bill 1012

Senate Appropriations

Caprice Knapp, PhD Medical Services Director
Nancy Nikolas-Maier Aging Services Director

NORTH Dakota | Human Services
Be Legendary.™

Funding Requests

Nursing Home Payment Reform

- Reform of both care and property rate methodology
- Interim report submitted October 1, 2020
- Policy testimony will be presented in **Human Services Committee**
- DHS sponsored bill- House Bill 1090
- $7.2 million ($3.3m General; $3.8m Federal)

Nursing Home Bed Buy Back

- Request to purchase beds out of the current nursing home system and layaway
- State plans to pay between $12,000-$15,000 per bed
- Taking beds out of the system reduces future State liability
- $3.3m in General Funds

Services Closer to Home

Create pathways that help people access the right service at the right time

Engage proactively with providers to expand access to services

High-Performing Organization

Develop an adaptable, capable and mission driven workforce

Balance resources to achieve strategic goals

SAVINGS PACE RATES & ENROLLMENT

Estimated Total Potential Savings **$1,914,734**

Reduce PACE Rates & Enrollment

	Total	Federal	State
PACE Capitated Rate Reduction	$ (1,385,545)	$ (740,194)	$ (645,351)
PACE Enrollment Reduction	$ (529,189)	$ (282,709)	$ (246,480)

Medicaid Expansion: Transition from Managed Care to DHS Administration

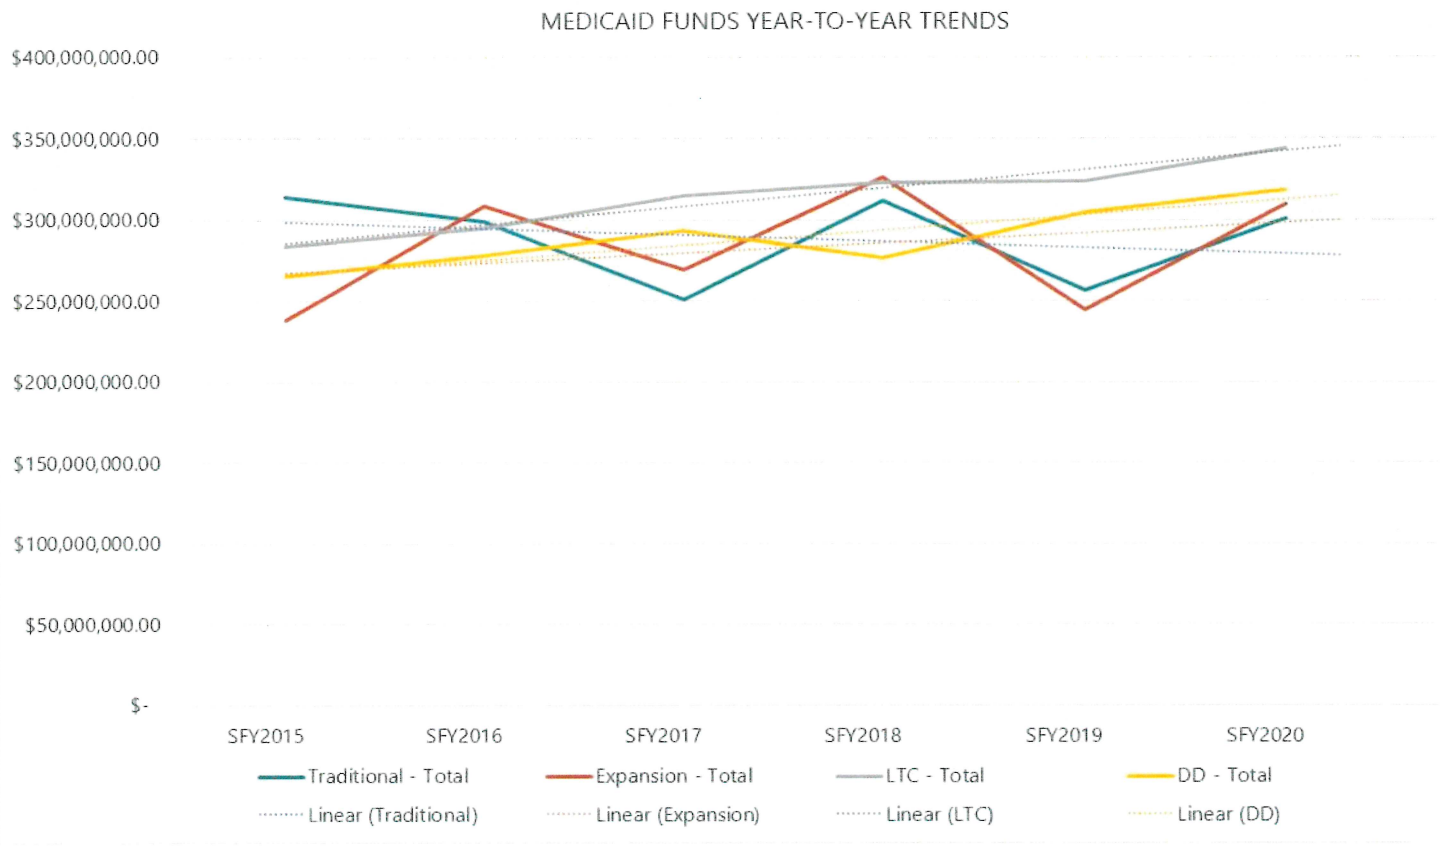
Issue: Administration

Comparison Medicaid Expansion Financial Arrangement



Why do State Medicaid Programs use MCOs?

1. Managed Care Organization Takes on the Risk versus the State
2. Budget Predictability
3. Budget Savings
4. Improved Outcomes

Risk & Predictability

- As in any risk-based model the more people in the risk pool the more likely the managed care organization can spread the risk across healthy and less healthy individuals
- The larger the risk pool, the more predictable and stable premiums will be.
- Premiums also rely on the average health care costs of the enrollees
- Adverse selection occurs when the insurer attracts individuals when they have greater health care needs
- In **North Dakota**, the
  - **risk pool** is the **smallest** in the **entire country** using managed care
  - **premiums** have **not** been **predictable** or **stable**
  - **churn rate** indicates that **adverse selection** is probably occurring

Medicaid Expansion: Transition from Managed Care to DHS Administration

Other Issues from Public Testimony

Proposed Solution
Health Homes

Transition from managed care to managed fee-for-service

- requires a more robust management program than current PCCM program

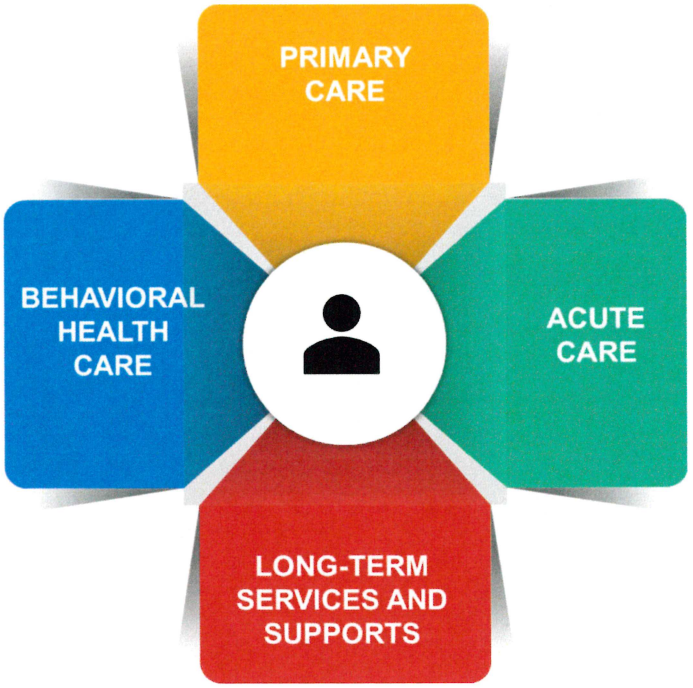
DHS brought in presenters from

- Alabama (Medical Homes to ACO)
- South Dakota (Health Homes Model)
- Connecticut (ASO model) in early 2020

South Dakota avoided $7.3 million in costs using Health Homes in 5 years

Feedback from North Dakota Medicaid Stakeholders

- Noted that **Health Homes** was the preferred model
- Subsequent meeting with outpatient stakeholders



2021-2023 Executive Request

- Authorizes DHS to plan for **Health Homes** and seek CMS approval
- Enhanced payment will offset some of the reduction in rates.

Proposed Solution Health Homes

Medicaid Health Homes

- Builds on the PCMH model
- Fosters a **"whole-person"** orientation to care for individuals with **chronic conditions** through the integration and coordination of:
  - Primary Care
  - Acute Care
  - Behavioral Health Care
  - Long-Term Services & Support

Prior Testimony Critical Access Hospital Impact

Prior testimony implied that DHS has not considered the impact on critical access hospitals.
Handout shows the Medicaid percentage of payer mix for all hospitals. Average Medicaid is 8% of payer mix across all hospitals. According to enrollment data, about 20% of that is expansion enrollees.

Average estimated expansion payer mix for CAHs is 1.58% and 1.3% for PPS

Prior Testimony Commercial Premiums

Prior testimony implied that there would be an increase to commercial premiums if Medicaid expansion rates are set at traditional fee schedule.

Manatt Health Strategies consulted to see if there was any evidence of cost shifting due to decrease in government health payments for health care.

The answer was NO

Literature cited:

- Colorado Department of Health Care Policy and Financing, Colorado Hospital Cost Shift Analysis, January 2020
  - *"Despite significant reductions in uncompensated care and significant increases in Medicaid and Medicare rates, hospitals are persistently increasing the price of care."*
  - *"Cost shifts are driven by strategic hospital decisions, not by shortfalls from public insurance. The increased funding generated by public, taxpayer funded programs— which are intended to reduce private insurance premiums and out-of-pocket costs — are not being passed along to health care consumers and employers."*

Prior Testimony Not Taking Advantage of Federal Funds

Prior testimony implied that transitioning Medicaid expansion from managed care to DHS administration would *"leave federal dollars on the table".*

Medicaid expansion is still 90%/10% match regardless of if it is under a managed care company or DHS.

Even though the State match is only 10%, it is more difficult to find that State match each session. 10% of **a larger number** is harder to find than 10% of a smaller number. Suppose the Legislature does not support this policy proposal the total appropriation (at current rates**) $708 million of which $80 million is General Fund. This is an increase of $73 million from 19-21 ($14 million in General Fund)**

This point implies that taxpayers only are concerned with the 10% State match. American taxpayers are responsible for the **entire amount** as it comes from federal taxes and some from State taxes.

The federal government continues to investigate Medicaid expansion spending. GAO reports typically are the first steps before legislative action, and several have already been commissioned:

- from 2017 https://www.gao.gov/products/GAO-17-145 and
- from 2020 https://www.gao.gov/products/GAO-20-260
- from 2020 https://www.gao.gov/products/GAO-20-157
- from 2020 https://www.gao.gov/assets/720/710680.pdf.

Prior Testimony Not Taking Advantage of Federal Funds

Prior testimony implied that transitioning Medicaid expansion from managed care to DHS administration would ***"leave federal dollars on the table".***

During revenue downturns, 100% state-funded programs and **traditional Medicaid providers are disproportionately targeted for savings** versus expansion providers due to the funding split. Again, this creates a **non-equitable** Medicaid system.

100% General Fund or 50%/50%	90%/10%

Developmental Disability providers and **Nursing Homes** have put in the hard work to have **more equitable reimbursement**, reducing the financial burden on the State

ND Medicaid
The Future

- Medical Services Division's aim is to restructure its Medicaid programs to promote better care and **quality** for members, **reduced burden** on providers, and be **trusted stewards** of taxpayer dollars.
- Medical Services aims to have **equity for all ND Medicaid members**, regardless of one's category of eligibility, allowing for continuity of care across the continuum to ensure high quality care and outcomes.
- Medical Services aims to **align benefits** across the entire Medicaid program. Legislators have inquired previously about providing dental benefits, vision benefits and long-term care and support services for expansion members.
- Medical Services strives for a comprehensive utilization management approach through **health homes** to ensure patient centered care across the continuum.
- Medical Services seeks to create a **realistic risk pool** that can ultimately be used to spread risk, lower cost, and drive value through the entire program.
- Medical Services aims to give providers **consistent processes** in relation to service authorization, appeals, claims submission, and provider enrollment.

Thank you!

Medicaid Expansion in North Dakota

Medicaid Expansion saves lives and rural hospitals

Backed by a broad coalition of healthcare, community service and business leaders, North Dakota legislators approved Medicaid Expansion in 2013. The program fills historic gaps in Medicaid eligibility for low-income adults ages 19-64 and covers approximately 22,000 North Dakota lives. Most Medicaid Expansion enrollees are childless adults working one or more jobs, but unable to afford health insurance. The program provides much-needed access to chronic disease management, mental health services and addiction treatment programs.

Since its implementation, North Dakota has leveraged Medicaid Expansion's cost-share model (federal match rates are 90% in 2020 and beyond), changing the face of North Dakota healthcare by reducing North Dakota providers' uncompensated care totals and stabilizing rural facilities.

House Appropriations Committee
IN SUPPORT – HB 1012 – DHS Budget – Economic Assistance
March 11, 2021
Janelle Moos, Associate State Director- Advocacy
jmoos@aarp.org
(701) 355-3641

Chairman Holmberg and members of the Senate Appropriations Committee, I am Janelle Moos, Associate State Director of Advocacy at AARP North Dakota.

AARP is a non-profit, non-partisan membership organization with more than 84,000 members in North Dakota. Our mission is to empower people to choose how they live as they age.

We wanted to take a moment to weigh in on a couple of important economic assistance issues.

First, SNAP is an important program that ensures older adults and families get the nutrition needed. We have closely monitored the food crisis more Americans and North Dakotans faced during the pandemic. SNAP benefits are an important tool that addresses this crucial problem. It is an especially important program for Americans over 50 because many face challenges to employment, live on fixed incomes, live alone, and have limited financial resources to pay for necessities like food, housing, and essential medicine. To people struggling to put food on the table, hunger is not a political issue, it is a daily reality. SNAP is a vital lifeline that feeds 23, 840 North Dakota households. 35% of those recipients are either elderly or disabled. Also remember, participants generally spend their SNAP dollars locally, soon after receiving them, boosting local economies. An important benefit in this time.

Also, LIHEAP has served as a lifeline for low-income families. As you may know, AARP believe utility issues and rates are a key pocketbook issue. We have intervened in various cases in front of the North Dakota Public Service Commission on behalf of older adults and consumers and know the struggle of families to afford their utility payments. Having a safety net for families especially in our climate is not only the right thing it is the moral thing to do.

We encourage you to continue to support these programs to ensure no North Dakotan goes hungry or without heating or cooling assistance when they need it.

Again, we appreciate the time to raise issues important to North Dakotans 50+ and would be happy to answer any questions. Thank you.

Senate Appropriations Committee
Sixty-seventh Legislative Assembly of North Dakota
House Bill 1012
March 9, 2021
Senator Holmberg, Chair

Good afternoon Chairman Holmberg and Members of the Senate Appropriations Committee. I am Carlotta McCleary, Executive Director of Mental Health America North Dakota and Executive Director of the North Dakota Federation of Families for Children's Mental Health. Today I speak on behalf of the Mental Health Advocacy Network (MHAN). MHAN advocates for a consumer /family driven mental health system of care that provides an array of service choices that are timely, responsive and effective.

MHAN has provided testimony since the 64th interim human service committee meetings (2015-2016) regarding our priorities for mental health services. We argue that peer to peer and parent to parent support, consumer choice, diversion from corrections, a core services zero-reject model, and conflict free grievance and appeals processes, and the access to a full and functional continuum of care serve as the backbone to correcting the crisis in North Dakota's behavioral health system.

MHAN is speaking in support of HB 1012. During the Sixty sixth legislative session, MHAN stressed that North Dakota needed to put the HSRI Report of 2018 into action. That report, much like the Schulte Report of 2014 said that North Dakota needed to drastically reduce its reliance on institutionalization and make sure that it had a fully functional community-based mental health system for children, their families, and adults that is as near their home as possible. Among the accomplishments of the last legislative session were the commitment to apply for the 1915(i) State Plan Amendment, peer support certification and training, prevention and early intervention pilot program in schools, the behavioral health pilot program, and the behavioral health resource coordinator in our schools.

MHAN's vision for this current legislative session was to ensure that the HSRI report would continue to be an active "road map" to ending the decade-long behavioral health crisis. MHAN commends the Department of Human Services for its continued emphasis on improving behavioral health services. The Department of Human Services' efforts in diverting people from corrections with Free Through Recovery and Community Connect should be applauded. MHAN also supports the building of a new State Hospital at Jamestown with reduced number of beds, along with development of six to ten beds in the western part of the state.

However, MHAN is deeply concerned about the current state of North Dakota's mental health system of care and what may come to pass with this budget. Let us start with the children's mental health system of care. Of the 180,171 children that live in North Dakota, about 29,728 of them have some form of a mental health disorder. Roughly 10% of all children in North Dakota have a serious emotional disorder (SED). As of 2019, this translates to roughly 19,098 children. We are currently serving only 1 out of every 19 children who have a serious emotional disturbance. As a result of not having access to care, many children are being sent into the juvenile justice system. From 2011 to 2017, the number of children in juvenile corrections who had a serious emotional disturbance rose from 49% to 79%. Although there have been improvements, children with serious emotional disturbance still represent the majority of children in the corrections system despite only accounting for 10% of all children in North Dakota. The *Olmstead* decision of 1999 and subsequent litigation made clear that people with disabilities (including mental illness) must be given access to community-based services before requiring that they seek only institutional care. Let me be clear: *Olmstead* applies to children too.

It comes as no surprise that the COVID-19 pandemic has led to an increase in behavioral health challenges and has forced our society to rethink how it conducts business and serves the community. Our national Mental Health America released a report this year finding that there was a 93% increase from 2019 in the number of people who took their anxiety screen, and a 62% increase in the number of people who took their depression screen. They found that children and youth ages 11-17 had been "more likely than any other age group to score for moderate to severe symptoms of anxiety and depression." In addition, they found that "since the end of May 2020, nearly every racial/ethnic group has

been experiencing consistently higher rates of suicidal ideation than the 2019 average." The Centers for Disease Control found that the COVID-19 pandemic has considerably increased the symptoms of anxiety disorder and depressive disorder compared to 2019. In their study, 40.9% of American adults reported at least one adverse mental or behavioral health condition, with 10.7% of respondents reporting to have seriously considered suicide in the previous 30 days. Suicidal ideation was especially pronounced among racial and ethnic minorities, young adults, unpaid caregivers for adults, and essential workers.

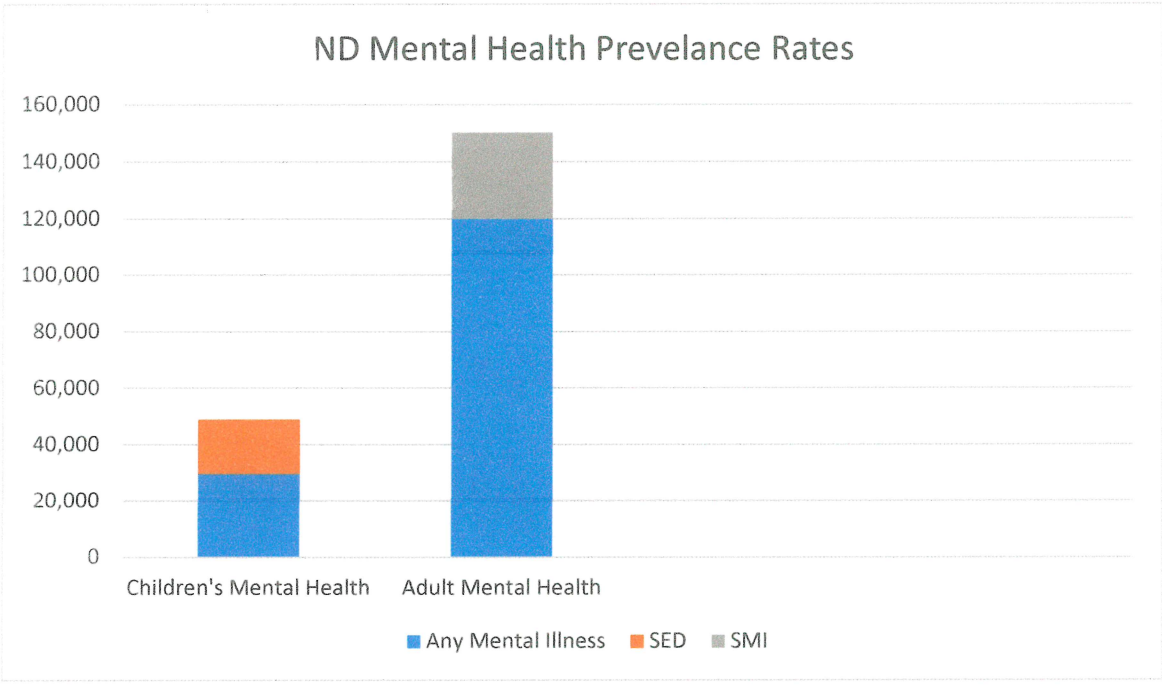
As the Executive Director of the North Dakota Federation of Families for Children's Mental Health I can attest that we have seen an increase in our children and youth who have displayed more significant mental health symptoms and suicidal ideation. In addition, COVID-19 has made it more difficult for children, families, and young adults to get access to the services and supports that they need and it has become much more difficult for teams to coordinate care. Families in the Bismarck area are reporting a concern for dealing with children's mental health crisis. Families have reported that when calling crisis response, the service is done over the phone instead of in-person. In order to deescalate someone, you really need to have an in-person, human connection to develop rapport with the individual. Once they are deescalated, in-person debriefing is essential to prevent future crises. In addition to crisis response, families in the Bismarck area are also without safe beds as an option for children's mental health crisis. Safe beds are a safe place for a child to deescalate as an alternative to costly hospitalization. As a result, the only options many families have are: a) do nothing, b) hospitalize their child, c) call law enforcement.

MHAN has other concerns with the Governor's proposed budget regarding reductions in children's mental health. The Governor's proposed budget cuts the voluntary treatment program from its previous budget of $533,440 to a proposed 2021-2023 budget of $453,424. Prior to this program, many parents were forced to relinquish custody of their children in order to receive mental health services (and those services were in a residential treatment facility). With the creation of the voluntary treatment program, those parents were no longer required to relinquish custody of their children in order to receive treatment that would be provided in that residential treatment facility. During the last

legislative session, the voluntary treatment program was given the flexibility to provide services to children in order to prevent an out-of-home placement. The voluntary treatment program is essential in families being able to maintain custody of their children and provide linkages to community-based services. Cuts to this program would be detrimental.

MHAN supports parent peer support and the organizations that provide this valuable service. Family Voices of North Dakota, who provides support to children with special healthcare needs and their families, and North Dakota Federation of Families for Children's Mental Health, who provides support to children with mental health needs and their families, are both facing reductions as proposed in the Governor's budget. Family peer support organizations provide support, provide education for families, assist families in system navigation, give education for providers, and advocate with families so that they receive the services and supports that their child needs. MHAN is also concerned with the elimination of the Experienced Parent Program for early intervention. MHAN supports fully funding family peer support organizations.

MHAN also has concerns about the current state of the mental health system for adults with serious mental illness. Of the 581,891 adults living in North Dakota, 119,870 have any mental illness (AMI). Roughly 30,258 adults in North Dakota have a serious mental illness (SMI). Much like the Developmental Disability system, individuals with serious mental illness rely on supported employment services and supported housing services so that they can maintain employment and can maintain living in the community. The proposed budget made significant cuts to both of those program areas, with some initial requests to eliminate entire programs. While some has been discussed to be restored to allow providers time to become Medicaid providers, it does not account for the fact that some of those individuals with serious mental illness will not meet the eligibility requirements of the 1915(i). Providers have serious concerns regarding whether or not their clientele will even qualify due to the requirement to have a WHODAS score of 50 or above. Another concern we have with the trajectory of supported employment services is with maintaining connection to services as a client's wages increase. For instance, once the client is being supported in a job and they get paid, they may no longer meet the financial eligibility for Medicaid. Will there be a process in place to maintain 1915(i)



while transitioning the adult SMI population who are no longer base Medicaid eligible, into Medicaid Expansion, or will they be cut off from services entirely?
This brings us to the 1915(i). Mental Health Advocacy Network advocated that all individuals meeting the definition of serious mental illness and serious emotional disturbance be eligible for the 1915(i) if they had access to Medicaid. Unlike "any mental illness," in adults, a serious mental illness is defined as "someone over 18 having (within the past year) a diagnosable mental, behavior, or emotional disorder that causes serious functional impairment that substantially interferes with or limits one or more major life activities." Unlike any mental illness in children, a "serious emotional disturbance" refers to a "diagnosable mental, behavioral, or emotional disorder in the past year, which resulted in functional impairment that substantially interferes with or limits the child's role or functioning in family, school, or community activities." These definitions also mean that an individual diagnosed with a serious mental health disorder are at significant risk of institutional level of care or meet the criteria for needing institutional level of care. When North Dakota submitted its application to the Centers for Medicare and Medicaid Services (CMS), it anticipated that it would be serving 11,150 individuals, divided between those with substance use disorder (SUD), serious mental illness (SMI), serious emotional disturbance (SED), and traumatic brain injury (TBI). If we only consider serious mental health disorders among children and adults, North Dakota has a legal obligation to serve those 49,356 people. These *are* the individuals with the most significant mental health needs.

MHAN urges the restoration to the cuts that have been made to the "1915(i) savings" to allow time and potential changes and adjustments to the 1915(i) to ensure that people are not going without services.

As you can see there is still a lot of work left to do in mental health. Now is not the time to reduce our efforts to improve the mental health system of care for children, adults, and their families.

Thank you for your time and I would be happy to answer any questions you may have.

Serious Emotional Disturbance (SED): for people under the age of 18, SED is a diagnosable mental, behavioral, or emotional disorder in the past year, which resulted in functional impairment that substantially interferes with or limits the child's role or functioning in family, school, or community activities.

Serious Mental Illness (SMI): someone over 18 having (within the past year) a diagnosable mental, behavior, or emotional disorder that causes serious functional impairment that substantially interferes with or limits one or more major life activities.

Testimony HB 1012

Senate Appropriations Committee

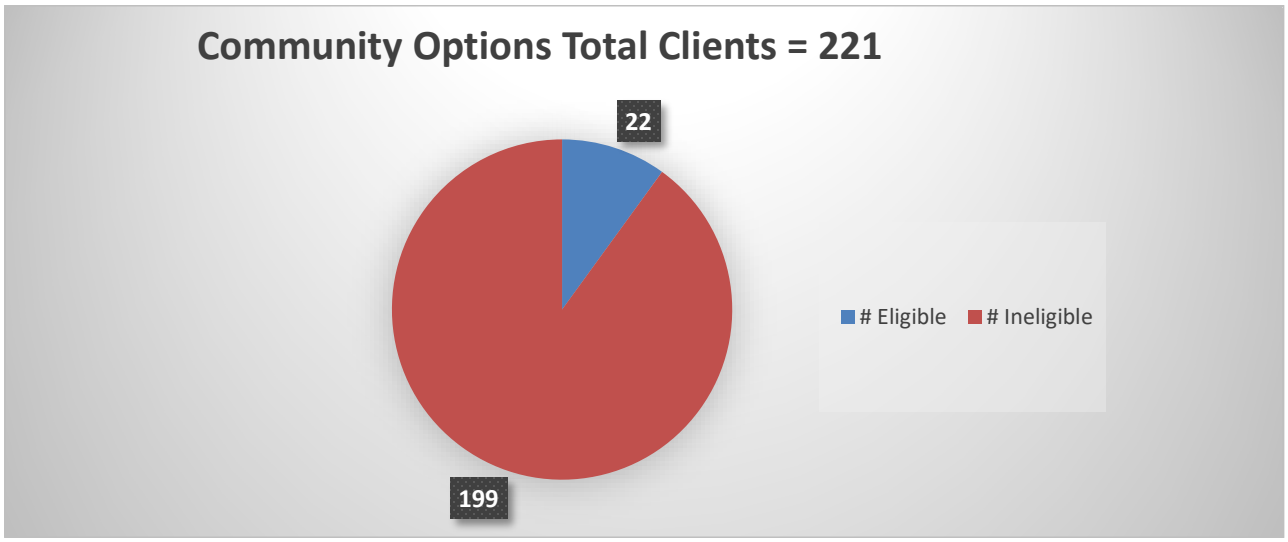
March 9-10, 2021

Good afternoon Chairman Holmberg and members of the Committee. My name is Trina Gress, I am Vice President of Community Options. I stand before you today to represent Community Options and the clients we serve.

My testimony is in opposition HB 1012 as it was submitted to the Senate. HB1012 proposes to cut four Community Options services with the intent that the clients will be served in the 1915i Medicaid State Plan Amendment (1915i) after 12/30/2021.

My first request is that you extend this date through the entire biennium until 6/30/2023. While I fully understand and support the implementation of the 1915i, December 30, 2021 is an realistic target date. Providers and clients need time to gather the proper documentation and determine if clients are even eligible to review services in the 1915i.

In addition, there are major issues with the eligibility process and flow of services involving the 1915i. Below are the three biggest barriers to getting clients enrolled to receive services from the 1915i.



1. Eligibility hoops a client must jump through in order to receive 1915i services.
    - Must be Medicaid/Medicaid Expansion eligible.
    - Must get a score on the World Health Organization Disability Assessment Schedule (WHODAS) of 50 or higher. (See handout) The WHODAS must be completed by an independent, trained professional or the County Zone Worker. The WHODAS may also be done by the client's legal guardian. The assessment must identify employment/housing/peer supports/etc as a need on the WHODAS.
    - Must have an approved diagnosis according to ICD-10 Diagnosis Codes. (See Handout) There are clients who may need to get a psychological or neuropsychological evaluation to attain the diagnosis. This could take months to attain. NOTE – Not all Brain Injuries are included in the 1915i, only Traumatic Brain Injury is included, Acquired Brain Injury is not.

2. Need to secure Care Coordinators to meet the requirements of 1915i. Community Options is unable to provide care coordination and employment supports so a 3rd party will have to be secured to do Care Coordination. Currently, there is a lack of providers to cover the state to provide these services.

3. When a client secures employment, their earnings must be reported to the Zone. Financial Eligibility for the 1915i must not exceed 150% of Federal Poverty Line (FPL). For a single person household in FY 2020= $1,595 per month or 40 hours per week $9.20 per hour. If the client reaches the 150% FPL all 1915i services are discontinued immediately.

According to our data, there is only a small percentage of the clientele who will be deemed eligible for 1915i services. Reasons why include: the client's WHODAS score was not high enough or the client is currently working and does not meet the 150% FPL.

There are 221 clients working with Community Options Brain Injury Pre-Vocational and Return to Work programs and the Supported Employment programs. Of this number only 22 clients would be eligible to receive services from the 1915i.

As a result of so many clients not meeting eligibility criteria for 1915i services, Community Options is requesting this committee consider keeping the Pre-Vocational and Return to Work Brain Injury programs as well as the Supported Employment Programs.

In conclusion, there will always be a need of services for those people not meeting the 1915i eligibility guidelines. Community Options is requesting this committee fully fund these programs and extend the date to 6/30/2023 to ensure there is no gap in services for the currently served clients. If funds are not replenished in the DHS budget there will be almost 200 clients affected by this decision and will go without services as of 1/1/2022.

I appreciate your time and consideration in these matters listed above. Thank you, do you have any questions?

Trina Gress, VP
Community Options

CPAs & BUSINESS ADVISORS

SENATE APPROPRIATIONS COMMITTEE

House Bill 1012, Fair Rental Value

HISTORICAL PROPERTY RATE SETTING

- Current property rates are set based on accounting standards reporting of depreciation on allowable capital assets and interest on related debt financing
- Building and fixed equipment capital assets are subject to a per bed maximum allowable cost which limits what a facility can invest
- Depreciation on capital assets is calculated based on a straight-line method over an estimated useful life set based on AHA guidelines
- Interest expense is based on the payment terms of the allowable debt and includes the amortization of debt financing costs
- The allowable depreciation and interest are divided by actual cost report year resident days or 90% occupancy days, whichever is higher, to get to the rate per day
- ($500,000 of depreciation + $400,000 of interest expense) divided by 25,000 days = $36 rate per day

HISTORICAL PROPERTY RATE SETTING

- Current system provides for high rates in the earlier years after a major project, and decreasing rates as it ages due to short lives of some assets
- Current system only repays facilities for cost of capital projects over future years which discourages renovations as it will always require debt
- Current system does not provide funding to build reserves for future projects which leads to large projects having to be funded with debt which increases overall cost

PROPOSED FAIR RENTAL VALUE (FRV)

- Property rate would be based on a % return of the fair value of all allowable capital assets to determine the Fair Rent
- Capital asset Fair Value will still be subject to a per bed limit that is based on RS Means cost per square foot multiplied by an allowable square footage per bed license (entire facility space)
- Equipment is limited to $15,000 per bed license and land and land improvements are limited to 10% of the building limits
- FRV is adjusted annually for depreciation, changes in the effective age and an inflation factor
- Effective age increases annually, but can be decreased by capital renovations made which encourages ongoing maintenance
- The Fair Rent is then divided by actual cost report year days or 90% occupancy days, whichever is higher, to get to the rate per day

PROPOSED FAIR RENTAL VALUE (FRV)

- FRV will provide a more stable property rate
  - Early year rates will not be as high as current system, estimated cap is $62.14 vs $86 currently the high rate
  - Rate will remain stable over time as long as the facility maintains the buildings
- FRV will provide revenue streams that will help facilities reserve for future projects and encourages renovations over time without having to utilize debt to fund the entire project
- See Attachment 3 for calculation examples of new projects

EideBailly

FRV FOUR YEAR PHASE IN

- 71 facilities are estimated to see an increase in their property rates due to the transition from historical property rate setting to FRV
- These 71 facilities will see an average estimated impact of $7 per day increase in total on their rates that will increase the estimated Medicaid spending by $8,619,000
- FRV proposed rate setting will phase this increase in over 4 years at an estimated cost of $2,155,000 in each of the fiscal years 2023-2026
- Information is included as Attachment 1

FRV HOLD HARMLESS

- 8 existing facilities are estimated to have property rates as set under the current property rate rules that will exceed the 1/1/23 FRV rates based on 2020 rate data
- The Medicaid cost for these facilities is already included in the current DHS budget, there is no new money needed to keep them under the current property rate system
- If these 8 facilities were forced to move their rates down to FRV on 1/1/23, it would reduce revenues to them by an estimated $1,500,000 based on the estimated FRV vs current 2021 property rates, this could lead to debt obligation issues
- Of these 8, 3 are estimate to transition to FRV in year 1 with all but 1 transitioning by year 8
- Missouri Slope will be new in 2021 and is not expected to transition to FRV as the interest rate on the debt is too high
- See information provided in Attachment 2 and 3

QUESTIONS?

Thank you for the opportunity to share this information with you.

2021 SENATE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
3/9/2021 PM
Senate Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Holmberg opened the hearing at 2:12 PM

Senators present: **Holmberg, Krebsbach, Wanzek, Poolman, Erbele, Dever, Oehlke, Rust, Davison, Hogue, Sorvaag, Mathern. Senator Bekkedahl and Senator Heckaman** were absent.

Discussion Topics:

- Services Cuts
- Rural Hospitals
- Medicaid Expansion

Tim Blasl, President, North Dakota Hospital Association, testified in favor and submitted testimony #8104.

Dave Molmen, CEO, Altru Health System, testified in favor and submitted testimony #8293

Mike Delfs, CEO, Jamestown Regional Medical Center, testified in favor and submitted **testimony** #8234

Jane Jerzak, NDHA Advocate, testified in favor and submitted testimony #8232

Kurt Snyder, Executive Director, Heartview Foundation, testified in favor and submitted testimony #8298.

Ty Hegland, Volunteer Chair, NDATPC, testified in favor and submitted testimony #8164.

Brenda Owen, testified in favor and submitted testimony #8500.

Holly Johnson, North Dakota Autism Spectrum Disorder Task Force, testified in opposition and submitted testimony #8202, #8206, #8205, #8204, #8203.

Senator Fors, District 19, submitted an amendment LC 21.0271.02002; testimony #7755.

Shelly Peterson, President, ND Long Term Care Association, testified in favor and submitted testimony #8380.

Denise Harvey, Director of Program Services, ND Protection & Advocacy, testified in favor and submitted testimony #8383.

Arik Spencer, President and CEO, Greater North Dakota Chamber, testified in favor and submitted testimony # 7700.

Debra Johnson, CEO, Prairie Harvest Mental Health, testified in opposition and submitted testimony #7507.

Nancy McKenzie, Executive Director, Nexus-PATH Family Healing, testified in opposition and submitted testimony #8052.

Heather Simonich, Operations Director, Nexus-PATH Family Healing, testified neutrally and submitted testimony #8041.

Additional written testimony: #7915, #8093, #8103, #8105, #8182, #8207, #8271, #8291. #8319

Senator Holmberg closed the hearing at 4:49 p.m.

Skyler Strand, Committee Clerk

2021 HB 1012
Senate Appropriations Committee
Senator Ray Holmberg, Chairman
March 9, 2021

Chairman Holmberg and members of the Senate Appropriations Committee, I am Tim Blasl, President of the North Dakota Hospital Association (NDHA). I am here to testify in support of House Bill 1012 (as introduced). I ask that you give this bill a **Do Pass** recommendation.

Medicaid (Traditional)

Medicaid payments play an important role in hospitals' finances, which can affect beneficiaries' access to care. Like other public payers, Medicaid payments do not cover the cost to the hospital of providing the care, resulting in payment shortfalls. Adequate provider payment rates help to ensure improved outcomes and access to necessary medical services for the people who rely on Medicaid to get their health care.

Medicaid Expansion

Medicaid Expansion was designed to significantly reduce the number of uninsured and improve their health by providing access to routine health care and preventive screenings. Covering about 24,000 North Dakotans, Medicaid Expansion has been very good not only for patients, but North Dakota communities and health care providers as well. The federal government pays 90% of the cost. This requires the state to pay only 10% – considerably less than the 50% the state pays for traditional Medicaid enrollees. Before the program was authorized, North Dakota hospitals' bad debt and charity care rose from $102 million in 2008 to $274 million in 2014—a nearly threefold increase. Thanks to Medicaid Expansion, hospital bad debt has dropped by nearly 50 percent. This significant decrease in uncompensated care has contributed to positive operating margins for a number of our hospitals.

We support reauthorization of Medicaid Expansion at the rates that were appropriated last session. We are not asking for an increase. We are simply asking that current rates – rates that have been in place with no increase since 2014 – be maintained. The cut being proposed by the Department of Human Services (Department) represents a reduction of $100 million annually to hospitals (acute care hospitals). It makes little fiscal sense to cut $10 million in general funds and lose the corresponding $90 million in federal funds which amounts to an approximately 45 percent cut in hospital reimbursement.

The federal share for Medicaid Expansion is a nine to one return on investment. It provides dollars that flow directly into local communities, supporting wages, employment, consumer spending, and state tax revenue. It is critical to covering operating costs at our hospitals and clinics, the loss of which will result in staff cuts and closed facilities.

It has also been proposed to move administration of the Medicaid expansion program away from a private carrier and to the Department. We feel the administration of the Medicaid expansion program by a private carrier has worked well and our members would like to see that continue. We are also concerned with the FTEs that the Department is requesting to add in order to administer Medicaid Expansion and that they will not be sufficient to provide the strong managed care being provided by the current private carrier.

Medicaid – Value-Based Purchasing

NDHA supports a collaboration between the State and hospitals to design a Value-Based Purchasing model that will create incentives that encourage enrollees to take personal responsibility for their health, provide program cost certainty, and support practice innovations that further the objectives of efficient, patient-centered care delivery.

Conclusion

In summary, hospitals treat and care for the citizens of North Dakota in a variety of settings and at a number of locations. Services must be provided 24 hours a day, seven days a week, 365 days a year, and the competition for employees has been raised to a new level. I ask that you support reauthorizing Medicaid Expansion at current reimbursement rates, maintain administration by a private carrier, and providing for a partnership model between the State and provider organizations to implement a Value- Based Purchasing model.

For these reasons, we support HB 1012 and ask that you give it a Do Pass recommendation. Thank you. I would be happy to address any questions you may have.

Respectfully Submitted,

Tim Blasl, President
North Dakota Hospital Association

Chairman Holmberg and members of the committee, thank you for the opportunity to appear before you today. For the record, my name is Dave Molmen and it is my privilege to serve as CEO of Altru Health System. I am here to offer comments in support of HB 1012.

I want to begin by thanking you, legislators, for your longstanding support for and focus on healthcare needs in our state. Your work has had an incredibly positive impact for our people.

This afternoon you will hear testimony on various aspects of Medicaid Expansion, and in my comments, I would like to focus on the historical underpinnings of our program in North Dakota.

This committee has heard prior testimony asserting that payments under this program are higher than other states, and as such, should be reduced to be more "in line" with those other states. While on the surface, that argument may have some appeal, it doesn't hold up when we look at the facts.

I would like to briefly walk you through an understanding of how North Dakota came to expand Medicaid to explain why we feel the issue has been wrongly framed, and why it would not be advisable to implement reductions.

When the Affordable Care Act was signed into law in 2010, it created the Medicaid Expansion program wherein, if states determined to extend Medicaid eligibility to those with incomes of up to 138% of federal poverty level, the federal government would provide 100% of the funding to do so in 2014, phasing down to 90% in 2020 and beyond.

The question of Medicaid Expansion was debated vigorously in the North Dakota legislature in 2013. Although the program held the promise of making care available to low-income families with a large federal match, legislators were concerned, both about the long-term sustainability of the program and whether the federal share of funding would remain true to the initial representations.

Ultimately, the Legislature recognized the high benefit of this program to over 20,000 North Dakota citizens and moved ahead with plans to implement. It was the right thing to do for the health and well-being of North Dakotans, and in the succeeding years Legislators' wisdom would be borne out.

It's important to recognize that, after authorization, a parallel debate was taking place among our state's health care providers. Hospitals in the US had $160 billion cut from their Medicare payments to pay for Medicaid Expansion and other components of the Affordable Care Act. On one hand, participation in this program was a way to get some of that money back, but on the other, providers had severe concerns about the stability and funding of the program and for taking on a new category of care that may pose new risks, especially the risk of cost shifting. For a time, it appeared as though we might not be able to get enough contracts with providers to cover the state for care.

Now here's the important part, and I'm going to call this the North Dakota way.

I'm sure you're all aware of many situations in which North Dakota gets treated unfairly under Federal programs in comparison to many more populous, more urban states. Medicaid Expansion, by contrast, is an example where North Dakota used skill in negotiating our unique position to achieve something very good for our state.

The Obama administration had, to the time of our negotiation with them in 2013, not been successful in getting Expansion authorized and implemented in any "red state". It was highly motivated to do so, and willing to do what was needed to get it going in North Dakota. The bottom line is that in these negotiations, they agreed to terms that would provide a rate of payment for services in North Dakota that would not have to be cross subsidized by other patients, as they do in other states. This was a major victory and it leveraged our position as a small rural state to get terms that worked our state. As I said, we can find plenty of examples where it hasn't worked that way for North Dakota, but this is something that over the years has delivered huge benefits to our people. Nearly a decade into the program, the federal government continues to pay 90% of the cost.

Mr. Chairman and members, should the state reverse this position, health care will be put at great risk. That move would result in only a small relative benefit (10%) to our state coffers, while turning away well over $100 million from our economy every year. $100 million dollars *every year.* I think of what we do in North Dakota to bring any enterprise into the state that brings with it $100 million in revenues annually. Think what a loss it would be to send $100 million out of the state every year.

It's important to remember that over half of that $100 million goes to directly pay nurses, doctors, and other workers, who provide the care to our people, pay taxes, build houses, and buy groceries. That's nearly 1,000 jobs across our state. Jobs in Hettinger, and Harvey, Bismarck and Grand Forks, Mayville and Jamestown; those are jobs of people caring for their neighbors in every community, my community and yours.

I want to emphasize that this is an issue that impacts all providers of care and does so in equal proportion in every community in our state, those in our rural areas and larger cities alike. I'm confident that if asked, health care leaders in any community, small or large, they would tell us the loss of this reimbursement would be a devastating blow. For many of our institutions, the reduction would be larger than their entire bottom line.

Study after study after study has shown that in other states *the payment for services under their Medicaid programs are less than the cost providers' incur to deliver them*. This means that in those states the burden must be shifted to commercial payors or other sources. The tab has to be picked up by their Blue Cross Blue Shield plans, other payment sources, or somehow cut out of services delivered.

Emulating other states' model does not strike me as a formula for success.

Although I do not have access to the figures for the whole state, I would speculate that, in our state, implementation of the reimbursement reductions advocated by the DHS would cut payments by 40% or in some cases, nearly in half. Given historically low margins of hospitals in our State, it doesn't take any complex actuarial formula to conclude that if you reduce the payment for any

type of service by 40-50%, that service would then have to now have to be subsidized by other services or payments from other sources. And I would say that for any form of payment, whether it was Medicaid, commercial insurance, or any other form of payment.

My question is, why would we do that? Why would we want to severely cut the payments to support the program only to send the money that could pay for it out of the State of North Dakota to Washington DC? Why would we purposely underpay services and then turn away $9 to at best save 1?

The North Dakota Legislature was wise to expand our Medicaid program. It's done immeasurable good for our citizens and our state. We negotiated well and effectively to ensure the program's sustainability. Mr. Chairman and members of the committee, I ask that in your wisdom you act to protect our success and see that it not be undone. I would further encourage you to remove the "sunset" provision in the bill as unnecessary. This is an important component of our state's budget and would receive the needed scrutiny without sunsetting the entire authorization every biennium.

Chairman Holmberg, I'll close where I started. I thank the members of this committee for their selfless efforts on behalf of our citizens. As we move into the future, we're eager to discuss how we might continue to build toward a healthier and more productive State.

Senate Appropriations Testimony

Medicaid Expansion

March 9th, 2021

INTRODUCTION:

Name: Mike Delfs

Position: President/Chief Executive Officer

Organization: Jamestown Regional Medical Center

Chairman Holmberg and Members of the Appropriations Committee,

I appreciate the challenging and important work all of you are doing for North Dakota and I'm thankful for your willingness to serve. The legislature and the ND Hospital Association have accomplished some amazing things to positively impact the health of North Dakotans and provide coverage for at-risk individuals, particularly those who fall within the confines of the Medicaid Expansion program.

Thank you for the time to today to present information on what Medicaid Expansion means to Healthcare across the state, to the communities we serve and most importantly, to the people whose healthcare needs we serve.

As stated previously, but certainly worth repeating; there are few programs that can boast a 10% state contribution to access an additional 90% from the federal government. While some have asserted the payment rate is too high, I would remind everyone that the rate was set high by design. To mitigate cost shifting to other programs and payers, the healthcare providers and state worked together to establish a rate that could stand on its own and not produce the unintended consequence of cost shifting. In fact, one need only look at our neighbor to the south to see the effects of a state that did not enroll in Medicaid Expansion (essentially take only Medicaid rates). South Dakota's commercial rates are higher around 190% of Medicare fee schedule rates for professional fees and 260% of Medicare fee schedule rates for Facility Fees while in ND we are at 170% and 175% respectively according to a 2020 Rand study.

It is important to keep in perspective that the funding used for Medicaid Expansion by the Federal Government (the 90%) is originated through the taxes paid by North Dakotans and decreasing the amount the state takes through the federal match is essentially taking North Dakotan's tax dollars and consciously sending this funding elsewhere in the U.S. The portion of all of our taxes that goes to pay for the program will not decrease simply because the state decreases payment to healthcare providers.

The positive impact of the Medicaid Expansion dollars can't be overstated. Aside from the obvious positive influence of decreased bad debt, more patients qualifying for coverage and therefore seeking out care, the secondary but equally important economic impact for our communities is vital across the state. Economically, these dollars flow through to communities and end up as money spend at the local hardware store, grocery story, car dealership, or spent on a new home and countless other ways. What would the state do to attract $125 million to the economy of North Dakota and to our communities around the state?

Primarily, the Medicaid Expansion program has improved health of our citizens who receive care on a regular, consistent basis, with properly managed chronic conditions (such as hypertension and diabetes), and now receive much needed screenings that mitigate potential life threatening conditions and expensive treatment.

While providing medical care to an at-risk population, the Medicaid Expansion reimbursement has also provided a safety net to North Dakota's hospitals by reducing the amount of uncompensated care, commonly known as bad debt. For decades, segments of our population without medical coverage or with poor coverage, have used the emergency room as their healthcare option when their conditions became so bad they had no choice but to seek emergency assistance. As you may know, emergency room fees can run as much as ten times the fees of a primary care visit which further exacerbates the problem.

Consider the primary impact to hospitals and healthcare providers of losing these dollars. The patients who fall within the Medicaid Expansion rates do not simply "go away" if the reimbursement is reduced down to traditional Medicaid Rates. They continue to need services while the costs associated with providing care for them i.e. salaries of nurses, doctors, technicians, people to keep the facility germ free etc. do not change and in fact most often go up year-over-year to meet the increased cost of living. Similarly, the cost of medical (and nonmedical) supplies, drugs, equipment etc. continue to increase every year. Unfortunately, the fact remains; there are very few services that break even at traditional Medicaid rates and in fact, most services are reimbursed at a significant loss at traditional Medicaid rates. These

losses range from 30% up to 50% or more on every dollar spent. This is true at all hospitals and healthcare providers across the U.S.

What could this mean for your local hospital? For example, at Jamestown Regional Medical Center, decreasing payment down to traditional Medicaid rates would result in a loss between $900,000 and $1 million dollars per year. Hospitals across the state, including Jamestown Regional Medical Center, and the communities we serve, will be faced with some extremely hard choices. Are there services that the community needs but we can no longer provide? Will patients have to drive hundreds of miles to get the same services they are receiving locally today? Will your rural hospital be there in the future if they are no longer paid at the current rate for these patients? This is not an overly dramatic question to ask.

New information has just came out in January of 2021 from CHPQR (Center for Healthcare Quality and Payment Reform) a national association dedicated to improving quality and exploring payment reform. They have assessed how many rural hospitals in each state are at immediate and high risk for closing. In ND, 9 rural hospitals are at immediate risk for closing with another 7 at high risk for closing. While some of this is due to the COVID-19 crisis, it illustrates that hospitals in ND do not have exorbitant bottom lines or that Medicaid Expansion dollars are reimbursement revenue that is the proverbial cherry on top. This reimbursement is vital for all hospitals to continue providing services locally be it a rural or urban setting.

I asking, on behalf of hospitals across the state that you continue reimbursement for the Medicaid Expansion program at the current levels. It helps patients, helps healthcare in maintaining the ability to serve our communities and it is good for the communities we serve both economically and from a healthcare perspective. In short, it is good for North Dakota.

Thank you.

House Bill 1012

Medicaid Expansion Testimony

March 2021

WIPFLI

House Bill 1012 – Medicaid expansion

Information presented in this document is intended to address the value of:

- Reauthorizing the program
- Continuing with current reimbursement rates

Wipfli LLP is a national accounting & consulting firm focusing on the health care industry including hospitals, health systems, physician clinics and other providers:

- Strategic financial & capital planning
- Reimbursement
- Revenue cycle
- Audit and accounting

House Bill 1012 – Medicaid expansion

Our comments address the following:

- Why the current Medicaid expansion program is important to support the stability of healthcare in North Dakota
- What type of return on investment the Medicaid expansion program provides for the state
- How the data used to conclude on the program cost is in question

House Bill 1012 – Medicaid expansion

Medicaid expansion supports the stability of healthcare in North Dakota

House Bill 1012 – Medicaid expansion

Why the current Medicaid expansion program and current funding level is important to support the stability of healthcare in North Dakota

- North Dakota reports health concerns and access challenges.
- Healthcare workforce challenges impede access to care and care continuity.
- Care transformation is essential to ensure the right care is provided at the right time at the right place. Stable healthcare provider funding is required to support this significant initiative.
- A strong healthcare ecosystem supports economic stability of the State
- Medicaid Expansion has reduced hospital bad debt expense, which as benefited not only hospitals, but the State as well with a reduction in spending.

House Bill 1012 – Medicaid expansion

Need stable funding for care transformation

Goal: Healthy North Dakota

The hospitals in North Dakota acknowledge these workforce and demographic challenges and recognize the need to transform care to better address care access and care coordination with community health and social resources. However, the transformation process requires:

- Investment in technologies
- Well trained and stable healthcare workforce
- Access to health facilities and telemedicine capabilities

These initiatives are long term investments that hospitals and health systems around the state have been making. These investments require adequate and stable funding including Medicaid Expansion reimbursement rates that cover costs.

Source: The Robert Graham Center

House Bill 1012 – Medicaid expansion

Need stable healthcare for a stable economy

Business and industry focuses on the availability of high-quality healthcare and education systems for its employees.

"Hospitals are economic anchors in their communities"

North Dakota hospital facts (2016 Health Care Economic Impact Study NDHA):

- Employ 19,942 full time equivalents directly, 33,502 considering indirect jobs.
- According to Job Service North Dakota, the healthcare and social assistance industry represents the State's largest non-governmental employers. This industry employs one out of every seven (14.2%) of all workers in North Dakota.
- $5.7B - Effect of hospital expenditures on total state economic output.
- Each hospital job supports about two additional jobs, and every dollar spent by a hospital supports roughly $2.30 of additional business activity. (American Hospital Association)

House Bill 1012 – Medicaid expansion

Need Stable Healthcare for a Stable Economy

Business and industry focuses on the availability of high-quality healthcare and education systems for its employees.

- A stable source of hospital reimbursement through the Medicaid Expansion program is essential to provide for the economic stability of the hospital industry in the state, which benefits the entire state.
- **North Dakota cannot afford to lose any of its 47 hospitals including 36 critical access hospitals, providing essential healthcare to rural areas of the state.**

Source: American Hospital Association

House Bill 1012 – Medicaid expansion

Medicaid expansion – Learnings to date

- Medicaid expansion enrollment in most states is higher than initial estimates with a correlating reduction in uninsured rates
- Significantly improved healthcare access to low-income individuals
- Evidence of reduced psychological stress due to challenges paying healthcare bills
- Evidence of pent-up demand for care to date – creating higher costs:
  - Significant increase in prescription drug use (diabetes drugs, contraceptives and cardiovascular drugs)
  - Higher use of emergency department services
- Reduced risk of hospital closures especially in rural areas

Source: Kaiser Health News

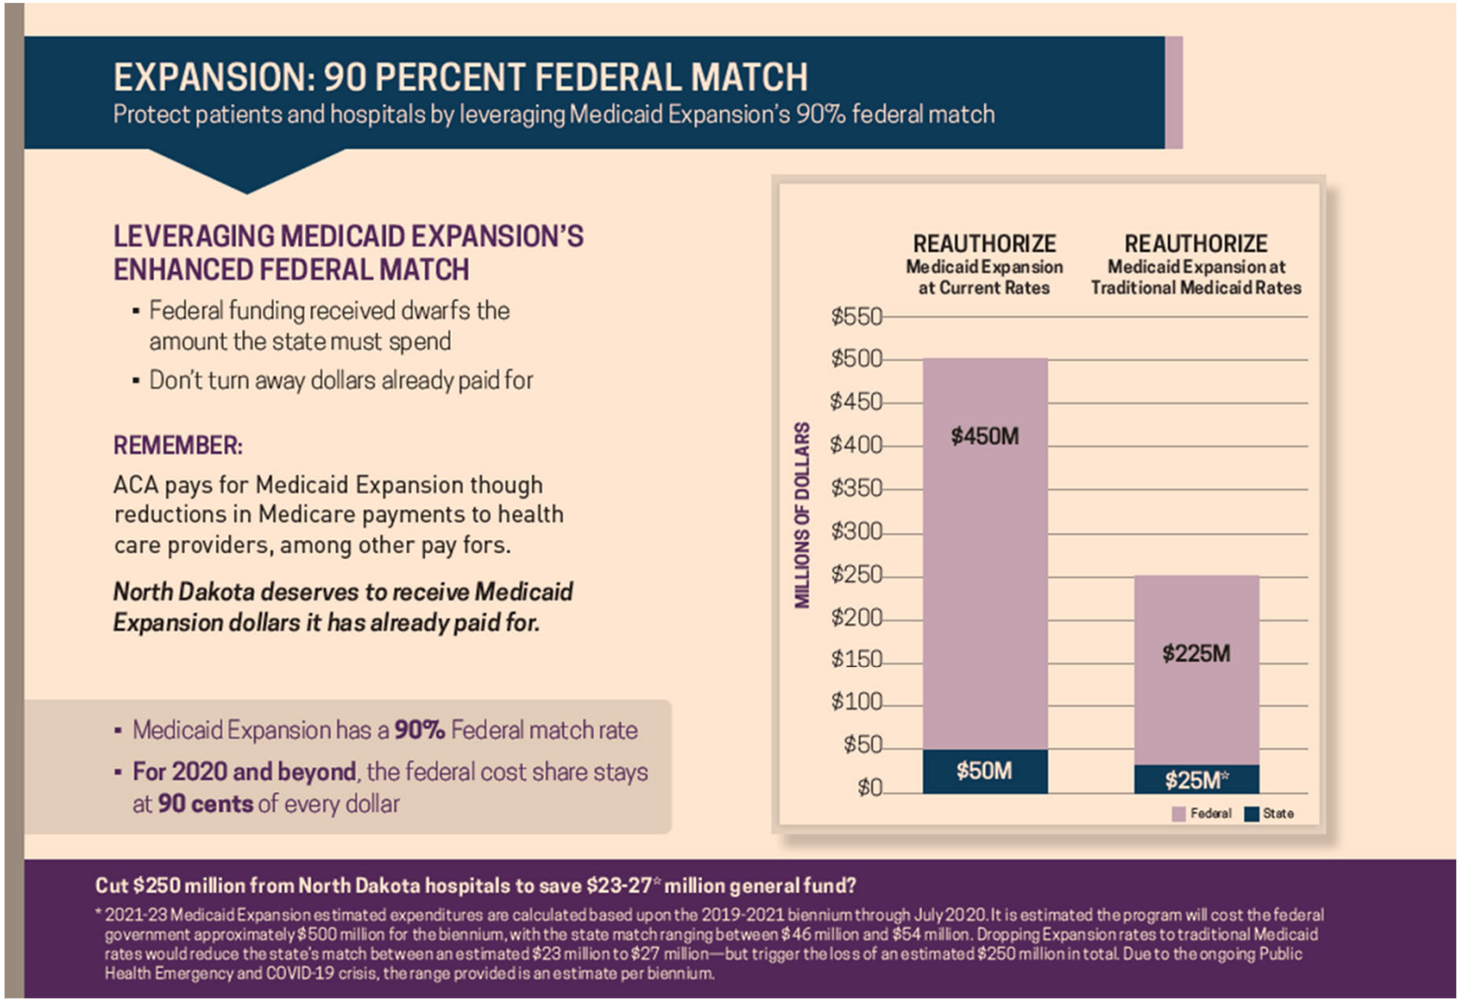
House Bill 1012 – Medicaid Expansion

Medicaid expansion program provides an excellent return on investment for North Dakota

House Bill 1012 – Medicaid expansion

The Return on Investment

North Dakota Medicaid Expansion Estimates (Annual)		
Premium per member	14,107	
Number of members	21,100	
Total reported annual premium payments	297,650,200	
Funded with Federal $	267,885,180	90%
Funded with State $	29,765,020	10%



Source: North Dakota Human Services Report on House Bill 1012

North Dakota Medicaid Expansion Estimates (Annual)	
Funded with State $	29,765,020
Savings on State funding uncompensated care	(5,000,000)
Total State expenditure	24,765,020
Total General Fund budget (annual)	2,420,000,000
% of total General Budget	1.0%

Plus possible savings on:
- Behavioral Health
- Prisoner Health

- Medicaid Expansion is 90% funded with Federal Dollars.
- The State's investment is offset by other savings including savings on uncompensated care funded by the State.
- In total, Medicaid Expansion with offsets represents only 1% of the General Fund Budget.

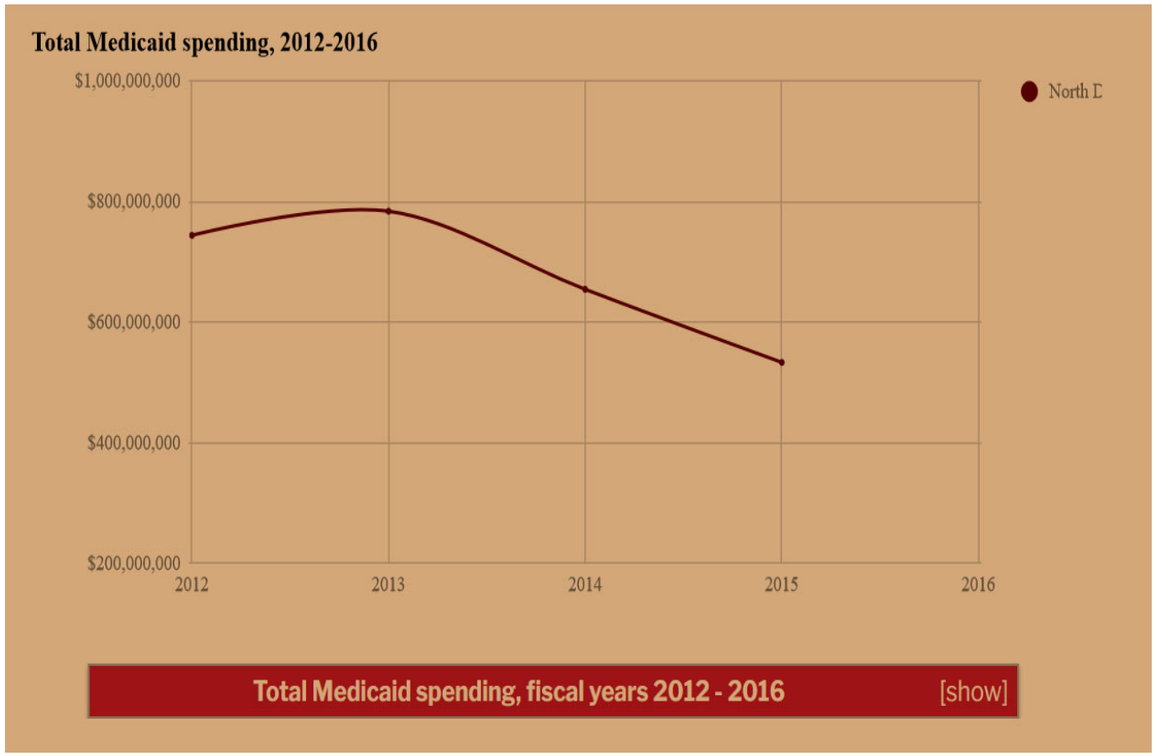
House Bill 1012 – Medicaid expansion

Source: North Dakota Hospital Association

Medicaid expansion funding

- Reauthorization would cost the state $50M per biennium or $25M per year.
- Reducing Medicaid expansion to traditional Medicaid rates would cost the state $25M per biennium or $12.5M per year.
- This difference represents approximately 0.5% of North Dakota's general fund budget.

House Bill 1012 – Medicaid expansion



North Dakota Medicaid Expansion Budget - State Impact on Spending					
Difference in funding - current state and proposed funding	State Medicaid Expansion Obligation - Current	State Medicaid Expansion Obligation - Proposed at Medicaid Rates	Difference in State Funding Level current vs. proposed rates	Total General Fund Budget	Impact on General Fund Budget
Biennial	50,000,000	25,000,000	(25,000,000)	4,840,000,000	-0.52%
Annual	25,000,000	12,500,000	(12,500,000)	2,420,000,000	-0.52%

Source: North Dakota Hospital Association

Medicaid expansion funding at current levels

- Significant impact to healthcare providers to address current healthcare gaps in both medical and mental healthcare.
- Very small impact to the State's General Fund budget.
- Stable funding model is needed to work together on the State's future goals:
  - to create pathways that help people access the right service at the right time
  - to engage proactively with providers to expand access to services.

House Bill 1012 – Medicaid expansion

Source: Ballotpedia

Medicaid in total

- Medicaid spending on North Dakota's Medicaid program **declined** by about 28.3 percent between fiscal years 2012 and 2015.
- This is supported with recently published Commonwealth Fund research paper entitled *The Impact of Medicaid Expansion on States' Budgets* which noted that During 2014–17, Medicaid expansion was associated with a 4.4 percent to 4.7 percent reduction in state spending on traditional Medicaid.

House Bill 1012 – Medicaid expansion

The Possible Alternative Scenario

- Should the Medicaid Expansion funding level decrease to traditional Medicaid rates, hospitals in North Dakota will be providing care even further below cost. Currently, the blend of Medicaid and Medicaid expansion service reimbursement combined is already less than full cost. This considers the facilities, workforce and other investments required to maintain and improve care for the residents of North Dakota.
- The likely scenario would be to shift these unfunded costs to other payors in the State – Commercial Payors that are funded by businesses and residents in the State.
- Rather than supporting 10% of costs for Medicaid Expansion beneficiaries, these State stakeholders would be essentially funding 100% of the unfunded Medicaid costs.

House Bill 1012 – Medicaid expansion

The return on investment – In summary

- After initially fully funded by the federal government, the Medicaid Expansion Program is now 90% federally funded & 10% state funded.
- The cost to the State remains relatively low, compared to the high impact of maintaining a stable healthcare ecosystem with the responsibility of hospitals in the state to shape the future of healthcare in North Dakota as discussed in the previous section of this document.
- There is much to be done to improve access to healthcare for North Dakotans. Given the challenges related to COVID19 and the destabilization this has had on the healthcare industry in North Dakota, this is not the time to change a program that is functioning well, and that has helped to stabilize the health care industry in the state.

House Bill 1012 – Medicaid Expansion

The data used to conclude on the Medicaid program cost is in question

House Bill 1012 – Medicaid expansion

How the data used to conclude on the program cost is in question

- The Medicaid program creates reports on spending on average per beneficiary. The most recent information publicly available is from 2018.
- The Medicaid program classified North Dakota as a "low data quality state" with respect to Medicaid cost and beneficiary information, meaning that some data elements were missing in reporting to enable the data to have a high level of confidence in the data.
- A summary of "low quality data state information" is presented on the following page. *Please note that some states without reported information in Medicaid Expansion have been hidden from this chart.*

House Bill 1012 – Medicaid expansion

2018 Information by State for "low level of data usability states"

Table 3. Per Capita expenditure estimates for states with a low level of data usability (2018)

State	Total	Children	Adult: non-expansion, non-disabled,	Aged	People with disabilities	Adult: ACA Medicaid expansion
Illinois	$6,562	$2,532	$5,586	$17,879	$18,274	$4,027
Indiana	$8,605	$4,096	$7,268	$12,344	$12,321	$12,679
Kentucky	$6,813	$3,637	$6,597	$10,383	$11,986	$6,629
Maine	$10,673	$4,505	$4,520	$14,031	$21,439	$5,038
Michigan	$6,922	$2,787	$4,909	$19,257	$15,912	$5,797
Montana	$7,175	$4,380	$5,661	$19,223	$15,672	$6,341
New Jersey	$9,420	$3,196	$8,028	$24,595	$31,284	$6,103
North Dakota	$14,387	$6,847	$6,931	**$64,964**	**$54,325**	$828
Oregon	$10,920	$6,604	$11,921	$25,176	$23,040	$11,581
Pennsylvania	$11,654	$3,356	$5,774	$37,702	$25,852	$3,757
Rhode Island	$7,928	$3,482	$5,254	$18,272	$15,406	$6,711
Virgin Islands	$3,848	$3,000	$3,849	$3,019	$7,476	$3,823
Washington	$6,934	$2,724	$6,876	$19,748	$20,076	$5,928
Min	$3,848	$1,914	$2,110	$3,019	$7,476	$828
Median	$8,126	$3,482	$5,661	$18,272	$18,274	$5,928
Max	$14,387	$6,847	$11,921	$64,964	$54,325	$12,679

- Note: this table excludes states that did not report dollars for Medicaid expansion.

House Bill 1012 – Medicaid expansion

Let's look at "high quality data states"

Table 3. Per Capita expenditure estimates for states with a high level of data usability (2018)

State	Total	Children	Adult: non-expansion, non-disabled,	Aged	People with disabilities	Adult: ACA Medicaid expansion	Expansion compared to Non Expansion
Alaska	$10,019	$6,066	$7,119	$23,047	$32,615	$8,787	123%
Arizona	$6,258	$3,171	$4,227	$9,590	$20,939	$6,165	146%
California	$6,449	$2,789	$2,812	$14,548	$23,462	$5,545	197%
Connecticut	$8,890	$3,715	$5,446	$18,012	$30,321	$6,917	127%
Delaware	$9,315	$4,603	$8,645	$21,703	$22,799	$7,476	86%
Georgia	$5,356	$2,807	$4,905	$10,333	$10,772	-	
Hawaii	$6,436	$2,997	$4,558	$13,383	$22,397	$5,630	124%
Idaho	$7,349	$2,743	$6,771	$14,468	$19,424	-	
Louisiana	$6,523	$3,531	$6,187	$10,869	$12,086	$6,326	102%
Maryland	$9,132	$3,699	$7,404	$19,733	$24,653	$8,434	114%
Mississippi	$7,556	$4,053	$5,212	$13,486	$12,859	-	
Nevada	$5,854	$2,882	$5,718	$8,472	$14,277	$6,673	117%
New Hampshire	$9,905	$4,007	$6,183	$24,451	$21,609	$9,355	151%
New Mexico	$6,381	$3,757	$3,693	$10,706	$22,184	$5,637	153%
Ohio	$8,248	$3,510	$6,025	$21,536	$16,909	$7,422	123%
South Dakota	$8,286	$3,256	$6,228	$18,188	$20,464	-	
West Virginia	$7,232	$2,869	$4,698	$23,013	$13,983	$5,080	108%
Min	$5,356	$2,743	$2,812	$8,472	$10,772	$5,080	181%
Median	$7,349	$3,510	$5,718	$14,548	$20,939	$6,673	117%
Max	$10,019	$6,066	$8,645	$24,451	$32,615	$9,355	108%

- Almost all states in the high-quality states reported Medicaid Expansion expenditures per beneficiary higher than Non-Expansion expenditures.

House Bill 1012 – Medicaid Expansion

State Medicaid comparison – a deeper dive
Alaska vs. North Dakota

House Bill 1012 – Medicaid expansion

Alaska compared to North Dakota Medicaid data

- Information provided by the North Dakota Department of Human Services indicated that the cost per beneficiary for the Medicaid expansion program was significantly lower than that reported by North Dakota.

	Expansion Group - TOTAL Spending	Expansion TOTAL Group Enrollment	Expansion TOTAL Per Capita Amount	Rank
North Dakota	$297,650,200	21,100	$14,107	1
Alaska	$412,994,600	45,300	$9,117	2
Delaware	$569,892,300	63,100	$9,032	3
New Hampshire	$510,384,900	57,400	$8,892	4
Maryland	$2,699,785,000	313,600	$8,609	5
Minnesota	$1,808,509,000	210,300	$8,600	6
Connecticut	$2,051,390,800	256,200	$8,007	7
Indiana	$3,492,894,100	449,500	$7,771	8
Illinois	$5,434,013,700	752,000	$7,226	9
Montana	$690,420,200	98,600	$7,002	10

North Dakota is **54% higher** than **Alaska**

Source: North Dakota Human Services Report on House Bill 1012

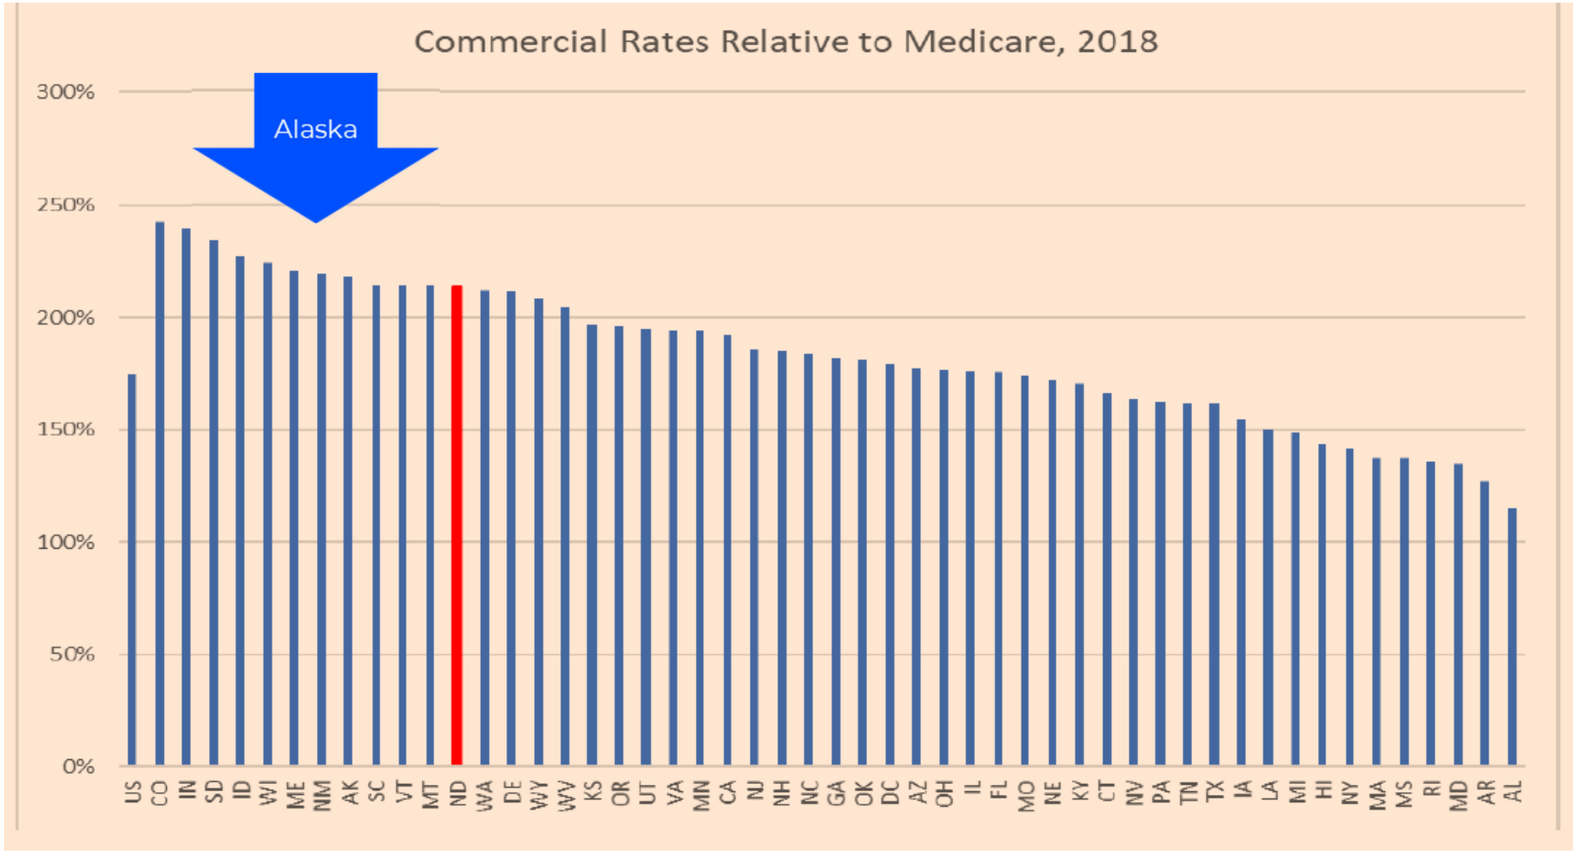
House Bill 1012 – Medicaid expansion

Alaska compared to North Dakota Medicaid data

- **Source and validation of data** - It is unclear is the values in the chart reflected on the previous page is consistently reporting payments made to providers, payments made to Managed Care Organizations for premiums, or other information for comparability purposes.
- **Demographics are key in comparisons** - Information regarding demographics of the Medicaid population would be essential for understanding and comparing level of expenditures including % of the population that are children vs. adults, % of population that have chronic conditions etc.
- **Expense by category information** - It would also be important to understand "spend" by category such as drugs, behavioral health, medical care etc. for a truly meaningful comparison.

House Bill 1012 – Medicaid expansion

Alaska compared to North Dakota Medicaid data



FFS MEDICAID PHYSICIAN INDEX		
ALL MD SERVICES	PRIMARY CARE	OTHER SERVICES
1. Alaska (2.28)	1. Alaska (2.55)	1. Alaska (1.94)
2. Montana (1.56)	2. Montana (1.65)	2. Nebraska (1.45)

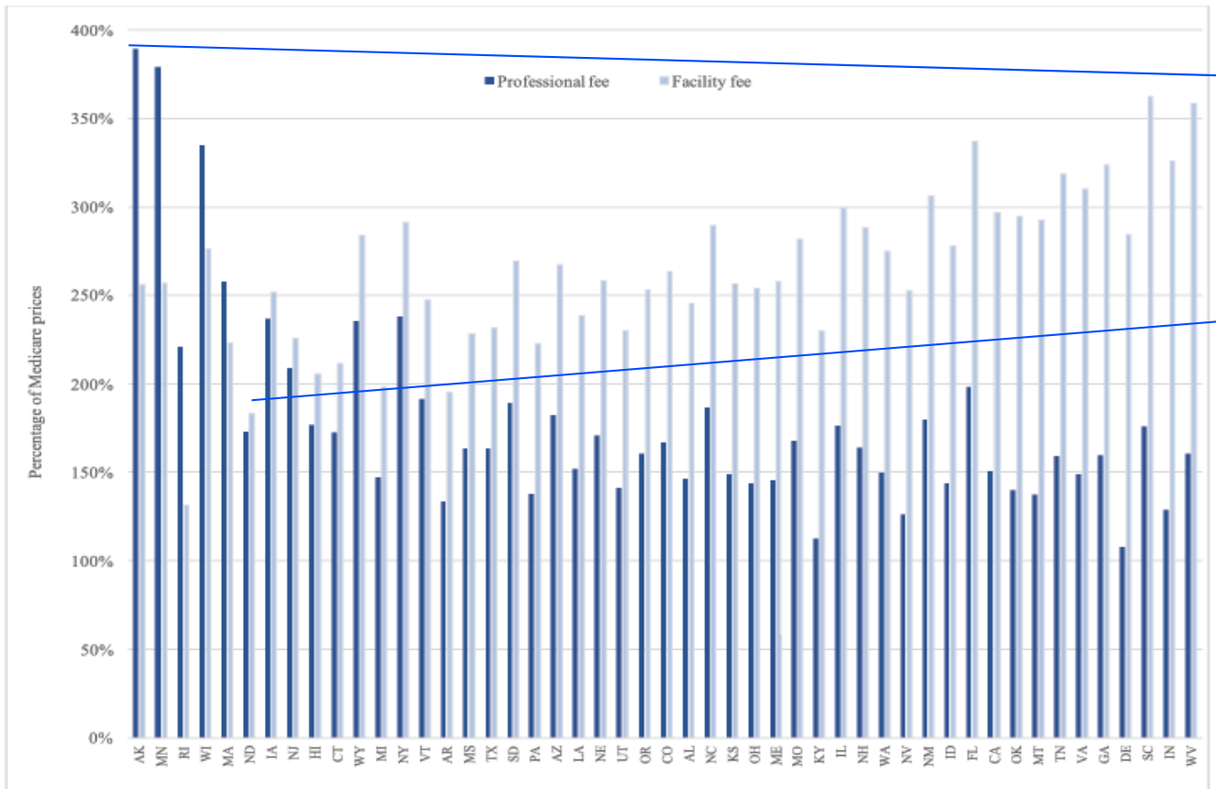
- Question on the data: This table indicates Medicaid physician reimbursement for physician services (all categories)in Alaska is **significantly higher** than North Dakota.

House Bill 1012 – Medicaid expansion

Alaska compared to North Dakota Medicaid data



Source: North Dakota Human Services Report on House Bill 1012

- This table indicates that Alaska's commercial rates for hospital services are also higher than rates in North Dakota, better supporting the healthcare delivery system in general.

House Bill 1012 – Medicaid expansion

Alaska compared to North Dakota commercial reimbursement data

Figure 4.5. Relative Facility and Professional Prices, by State, 2016–2018

Alaska

North Dakota

NOTE: Relative prices equal the ratio of the amounts actually paid divided by the amounts that would have been paid—for the same services provided by the same hospitals—using Medicare's price-setting formulas. For each state, this figure denotes relative prices for facility and professional payments. States are sorted by the percentage-point difference between facility and professional relative prices.

Source: Rand Corporation

- The Rand Corporation study indicated that Alaska's commercial rates were significantly higher than North Dakota's for hospital and physician services.
- Alaska's hospitals would likely have a better chance of "cost shifting" Medicaid losses than hospitals in North Dakota.

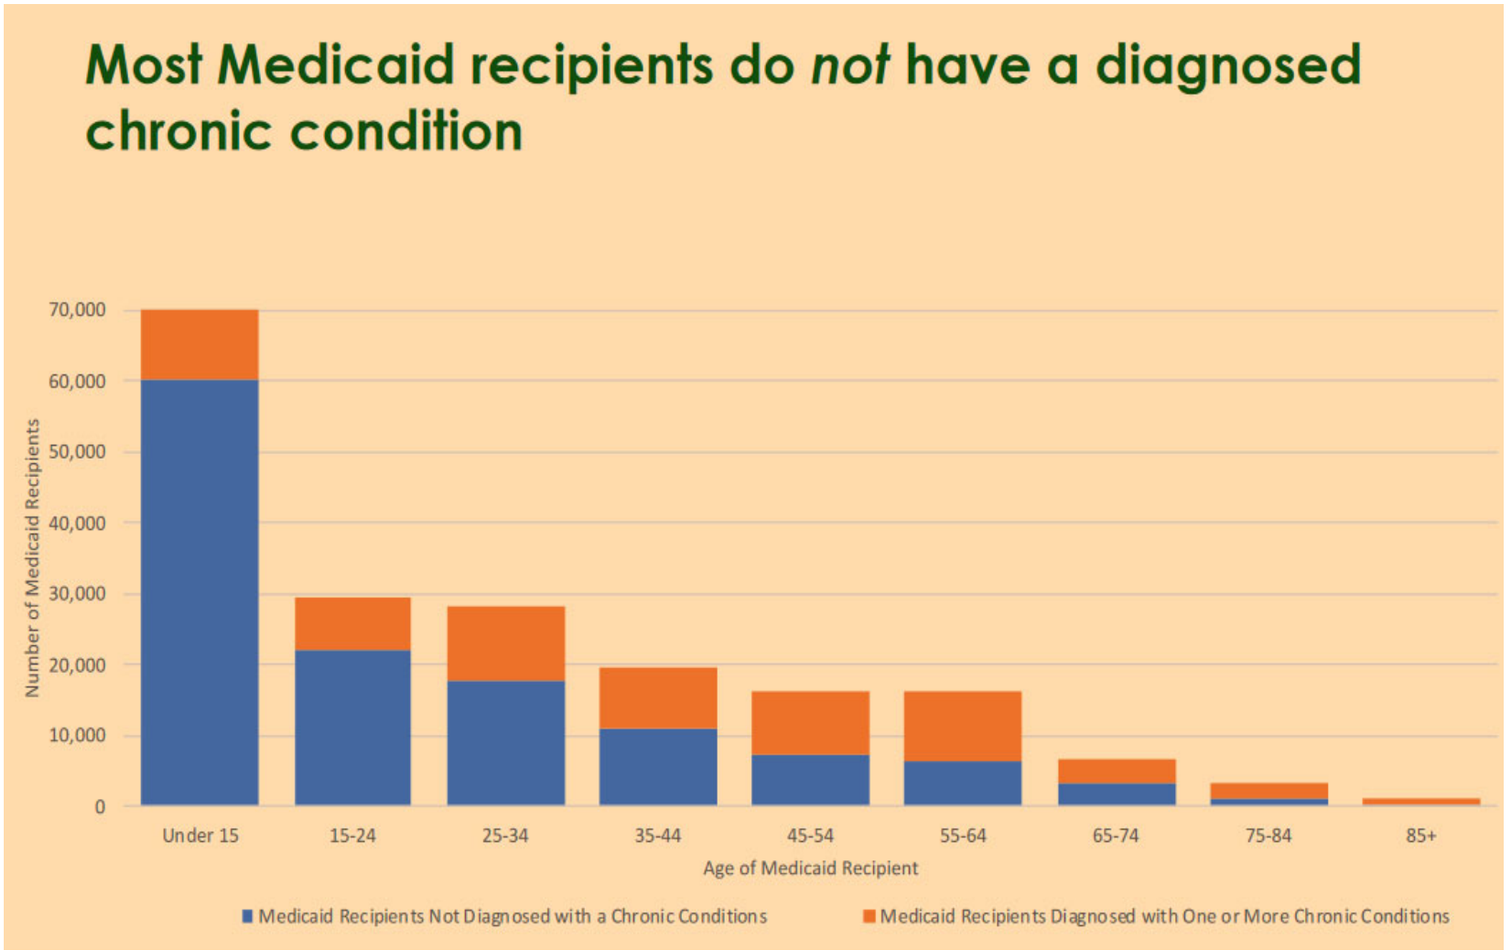
House Bill 1012 – Medicaid expansion

Alaska compared to North Dakota Medicaid data

- The demographics of Alaska Medicaid beneficiaries are significantly different than North Dakota, with children representing 57% of beneficiaries compared to 40% in North Dakota.

Medicaid Enrollees 2014		
	North Dakota	Alaska
Aged	8%	7%
Disabled	12%	13%
Adult	39%	23%
Children	40%	57%
Total	100%	100%

Source: Kaiser Health News



- Per the Congressional Budget Office information, Medicaid spending on children is approximately 52% of the cost related to adult beneficiaries:

Average Federal spending per Medicaid enrollee in 2020 (federal portion only):		
Adult	4740	
Children	2480	52% of adult cost

Source: Congressional Budget Office Report

House Bill 1012 – Medicaid expansion

Alaska compared to North Dakota Medicaid data

- To compare cost per beneficiary between North Dakota and Alaska, it would be important to understand the number of chronic conditions in the Medicaid beneficiary pool.
- In Alaska as noted in the accompanying chart, Most Medicaid recipients in Alaska do not have a diagnosed chronic condition.

Source: Evergreen Economics

House Bill 1012 – Medicaid expansion

- Alaska's Medicaid population is significantly younger than North Dakota's plus…
- The uncertainty of beneficiaries with chronic conditions in Alaska vs. North Dakota could impact the per beneficiary expenditure data between states.

Source: Evergreen Economics Medicaid Spending & Enrollment in Alaska

House Bill 1012 – Medicaid expansion

Alaska compared to North Dakota Medicaid data – in summary

- The Alaska Department of Health Services Annual Medicaid Reform Report from 2020 noted a significant amount of effort at the state level focused on managing the Medicaid program efficiency and effectiveness. Several key initiatives have provided Medicaid program "savings" for Alaska according to this report including:
  - Care management programs and care coordination
  - Coordinated telemedicine programs
  - Pharmacy system reform
  - Behavioral health system reform
  - Enhancement in the Federal Tribal Referral System
- Alaska is focusing on strategies to enhance the effectiveness of the Medicaid program and better coordinate care in a value-based system.

House Bill 1012 – Medicaid expansion

Alaska compared to North Dakota Medicaid data

- In conclusion, without a deeper dive into the data behind the analysis, it is difficult to conclude on the relative overall impact to the State on Medicaid Expansion initiatives by distilling the information into one average cost per beneficiary number.
- We did identify however, active initiatives in Alaska to enhance the effectiveness of the Medicaid Program through several reform measures to better manage the population of the State, taking a longer-term multi-faceted view to improve the health of the population in the State.

Educational & research document

“The Medicaid expansion research project is supported by funding from the North Dakota Medicare Rural Hospital Flexibility Program, administered by the Center for Rural Health at the UND School of Medicine and Health Sciences. Funding is provided through the Federal Office of Rural Health Policy by the U.S. Department of Health and Human Services.”

Chairman Holmberg and members of the Senate Appropriations:

My name is Kurt Snyder, and I am the Executive Director of the Heartview Foundation. Heartview is a drug and alcohol treatment program established in 1964. We have one hundred twenty-five employees including an Opioid Treatment Program, outpatient programming, mental health services, and a 16-bed residential program in both Bismarck and Cando, ND. Heartview is currently offering Medication Assisted Treatment (MAT) to 291 individuals including some at North Dakota State Penitentiary in Bismarck and Dakota Women's Correctional in New England. At any given time, we have over 400 individuals in our care. We employ a psychiatrist, medical providers, psychologists, nurses, addiction counselors, mental health counselors, social workers, peer support specialists, case managers, and residential technicians. Last year we served individuals from 38 of the 53 counties of ND. Of our patient population, 67% are Medicaid or Medicaid Expansion. (20% Medicaid and 47% ME).

I am here today to voice our support for the re-authorization of Medicaid Expansion and The SUD Voucher. More specifically we support the following:

SUD Voucher

The SUD Voucher has been invaluable to providing access and care to so many citizens of North Dakota. And today, the need for substance use services is greater than ever as the opioid epidemic and COVID-19 devastate our communities. Therefore, we request that you fund the SUD Voucher at the level of the Governor's request. We are grateful for this program and we understand that the voucher needs to be the funding of last support. I have added some options for considerable cost savings and strategies to reduce reliance on the SUD Voucher.

- **Presumptive Eligibility** - The patients we serve at Heartview that are eligible for ND Medicaid or Medicaid Expansion currently experience a 3 to 4 month wait time for enrollment through Burleigh County. We estimate that if all Medicaid/ME eligible patients at Heartview were enrolled immediately upon entering services, we would reduce our utilization of the SUD Voucher by $650,000 per year. In addition, those patients would also have benefit coverage for other medical needs. All of which would be federally matched dollars instead of the general fund dollars of the SUD Voucher. Community Medical Services, the opioid treatment program in Minot and Fargo conservatively estimates they would reduce utilization of the SUD Voucher by $720,000 per year. The solution for immediate enrollment of these individuals is by identifying the Opioid Treatment Providers as "qualified entities" for the process of "presumed eligibility". Centers for Medicare & Medicaid Services give states broad discretion to identify "qualified entities". These "qualified entities" are then capable of making presumptive eligibility determinations based on an individual's household income and other requirements. Presumptive eligibility serves a dual purpose of providing immediate access to needed health care services while putting people on a path to ongoing coverage. This system already is utilized by the hospitals in ND. Please consider that Heartview's patient population is 20% ND Medicaid and 47% Medicaid Expansion.

- **One-Million-Dollar Grants** – Heartview Foundation supports the (3) one-million-dollar grant opportunities proposed by the House in HB1012. Heartview sees this as a viable path to develop much needed services in under-served regions of the state. Heartview Foundation-Cando, a 16-

bed residential facility, just celebrated 5 years and is a shining example of meeting the behavioral health needs in a rural community. This effort was made possible by an opportunity much like the proposed one-million-dollar grants. Heartview Cando and Towner County Medical Center have forged a successful partnership in Cando, ND that has resulted in Medication Assisted Treatment Services (Towner County Medical Center is serving over 70 individuals for opioid use disorders), mental health services, outpatient and residential addictions services to a community of 1,100 people in a very rural region of ND. Towner County Medical Center and the community of Cando invited the Heartview Foundation with funding support from Dakota Medical Foundation to purchase and renovate a building for a 16-bed residential unit. This building was formerly a 24-bed residential facility owned and operated by Center for Solutions. Heartview deliberately downsized the bed capacity in order to remain in compliance with the IMD restrictions in order to leverage the coverage of ND Medicaid and Medicaid Expansion. The one-million-dollar grants would allow the SUD providers to expand into underserved areas of the state with a one-time investment but would not substantially increase the reliance on the SUD Voucher.

Removing the Sunset Clause

- I have a number for you, **47**. 47% of our patient population is Medicaid Expansion. Almost ½ of our patient population is covered for only 2 years at a time. How can treatment providers plan expansion efforts into rural or underserved communities with such a vulnerable funding base? How can we be expected to meet the needs and demands of the opioid epidemic without confidence in our funding streams? The one-million-dollar grant opportunities require a 5-year commitment to provide services in that region for the grant to be forgiven. I would remind you that 47% of the Heartview Foundation patient population is only covered 2 years at a time. Any expansion efforts by our agency is complicated by the sunset clause. If the sunset clause is removed from Medicaid Expansion, we have no objection to the 5-year commitment. Please remove the sunset clause!

Retain Medicaid Expansion with a Private Insurance Carrier

We strongly oppose moving Medicaid Expansion under Medicaid for these main reasons:

- **Claims Processing** – If Medicaid Expansion is moved under the ND Medicaid umbrella 67% of our patient population would be subject to ND Medicaid's claims processing. This terrifies me! ND Medicaid has testified on many occasions that clean claims are paid in a timely manner, which we agree upon. The problem, however, is that ND Medicaid denies 33% of Heartview claims, while other commercial payers average under 9%. Furthermore, reprocessing denied claims is extremely difficult with ND Medicaid. We often experience wait times of weeks, and sometimes months to even get a response from Medicaid on a single claim. The reprocessing effort of ND Medicaid is insufficient and continuously results in a backlog of unprocessed claims. In January 2019 ND Medicaid gave us a $450,000 cash advance because we were having cash flow issues due to overwhelming outstanding Medicaid claims.

- **Mental Health Parity and Addiction Equity Act of 2008 (MHPAEA)** - MHPAEA was meant to prevent health insurance plans from imposing less favorable benefit limitations on mental

health or substance use disorder benefits than on medical surgical benefits. Medicaid Expansion fully complies with MHPAEA. ND Medicaid does not. MHPAEA specifically restricts the use of annual limits. ND Medicaid has annual restrictions on Intensive Outpatient, Partial Hospitalization and High Intensity Residential. Parity also insures that "Medical Necessity" be the standard for authorizing services. Again, ND Medicaid does not follow parity in this respect. ND Medicaid does not utilize accepted clinical standards for authorizations but instead providers must request additional days of coverage that sometimes takes months for approval. If Expansion is moved under ND Medicaid over 67% of our patients would not have the important protections of this federal parity law. The law that prevents discrimination and stigma.

We Support an increase of rates for SUD Providers

- Last session there was an amendment that was intended to provide consistent reimbursement rates across providers. However, it turned out that reimbursement rates within substance use providers were not established equitably. ASAM Level 2.5, (which makes up over 50% of our revenue) was given a higher reimbursement rate to hospital-based programs with a lower rate for community-based programs. To give you an idea of the inequity of the amendment from last session, we were initially notified that we would be receiving a 59% increase effective July 1, 2019 (this provided conformity across all SUD providers). The hospital providers complained, and DHS capitulated to carve out a special rate for the hospital SUD providers for ASAM level 2.5. We were subsequently informed that we would not receive the 59% we were promised but rather only a 13% increase. I would argue that the quality of our care exceeds hospital-based programs because we offer all 3 FDA approved medications for opioid use disorder. I would also point out that even within the ND Medicaid Fee structure, there is no difference between hospital-based programs and community-based PHP programs, (Attached). **I would ask that community-based providers of ASAM level 2.5 receive the same current rate as the hospital-based ASAM level 2.5 within the Medicaid Expansion product.** Most Medicaid Expansion enrollees are childless adults working one or more jobs and in much-needed access to chronic disease management, mental health services and addiction treatment programs. As a result of the needs of this population they are overrepresented in our services (47% Medicaid Expansion). **Substance use providers need enhanced rates in order to continue to grow and meet the demands of our state.** The spend for substance use and mental health services when compared to the overall spend is minimal. However, the behavioral health needs of this population are overwhelming.

This concludes my testimony, and I would stand for any questions.

SUD VOUCHER

SUPPORT THE

NORTH DAKOTA
NDATPC
ADDICTION TREATMENT PROVIDERS COALITION

Please Support the SUD Voucher

Chairman Holmberg and Members of the Committee,

The past year has been a challenging one for the Substance Use Disorder (SUD) providers of North Dakota. With the ongoing COVID-19 Pandemic and suspension of acceptance of new patients into the SUD Voucher Program, providers have had to balance an increase in demand for services with a sudden lack of resources.

North Dakota's SUD providers represent one of the most important parts of the overall healthcare and behavioral health systems in North Dakota. With a high prevalence of alcoholism and binge drinking in our state, combined with an Opioid Crisis and Methamphetamine resurgence, these providers work tirelessly to serve those in need. Despite being underfunded and in high demand, these providers save lives while simultaneously saving millions in healthcare, social service, legal, and correctional costs.

The North Dakota SUD Voucher is one of the most important tools in serving North Dakotans who have a Substance Use Disorder. The voucher provides not only the ability of patients to obtain critical services in a timely manner, but it provides provider choice so patients can stay close to home and their families. Additionally, the voucher serves as a tool to keep patients out of emergency rooms, hospital beds, jails, courts, and morgues.

With the suspension of accepting new patients into the program on July 1, 2020, many providers were left with no options for their patients. With countless patients in the process of accessing services, the pipeline to serve those in need was cut off with a twelve hour notice. Though some may look at this as an unfortunate outcome of an expended appropriation, providers have often asked our association what they should tell those patients. Additionally some have wondered if those patients will survive long-term? When we ask providers to take a year off from serving patients, we run the risk of significant damage to patients, communities, and our state.

With an ongoing pandemic, high alcoholism rates, Opioid Crisis, and Methaphetamine resurgence, we respectfully ask you support the original $17 million dollar request for the voucher by Governor Burgum with no restrictive amendments. The residential cap would disqualify thousands of patients from proper services, harm the patients with the greatest need, and not meet parity standards. Additionally the $3,000,000 in grants will only create underfunded facilities away from population centers where there are staff and patients to support them.

Though some may see the original request as a significant budget increase, those of us who serve patients know this represents increased savings to our communities and state, as well as the ability to save more lives.

Sincerely,

Ty Hegland
Chair, North Dakota Addiction Treatment Providers Coalition

Main Points:

- 98% of Licensed Addiction Counselors in North Dakota believe the SUD Voucher saves lives.

- SUD patients are not revenue neutral. Supporting the SUD Voucher saves millions in countless areas. According to the National Institute of Health, one dollar spent in SUD services saves $6.00 in correctional costs and/or $13.00 in primary healthcare costs.

- There should be no cap of residential services. The SUD Voucher should support all levels care across the state of North Dakota and ASAM CUA assessments and treatment plans by licensed clinicians should always lead determinations of level of care. A full continuum of care is vital to our state.

- There are nearly 100 entities and thousands of individuals working to provide SUD services in North Dakota. 70% of providers believe their patients and practices were negatively affected when we stopped accepting new patients into the voucher program on July 1, 2020.

- Patients need a fully funded two year voucher. Passing the $17 million dollar request by Governor Burgum will help the industry get back on track and stop the underfunding of these critical services.

- Due to limited funding, the SUD Voucher should not be extended to providers operating outside the borders of North Dakota unless they reside in an underserved area and complete a Certificate of Need style process.

SUD Voucher - No Residential Limits

Chairman Holmberg and Members of the Committee,

On the behalf of Substance Use Disorder patients, families, and providers, we are respectfully requesting you do not put any residential limitations on the SUD Voucher. As a group of providers representing the thousands of SUD patients and families across the state, we fear the unintended consequences of such a move may kill patients and cause millions of dollars in unnecessary costs.

Residential SUD providers care for some of the sickest patients in our state. Rather than have these patients fill up emergency rooms and jails, providers across our state provide exceptional care for their addiction, physical, and case management needs. Without residential services, we will only compound the costs of the Department of Human Services budget by spending more money in Medicaid through hospital stays, as well as increase the correctional costs across this state in county jails and state prisons.

Legislators across North Dakota need to understand that residential services are not an option. Patients are placed into residential care as a result of licensed clinicians conducting unbiased chemical use assessments based on American Society of Addiction Medicine criteria. Providers do not have the ability to pick and choose levels of care. No matter how much you may want to force a patient into doing outpatient care, thousands of patients across our state will fail in outpatient settings due to the extent of their addiction. Once again, this will only compound the costs of the Department of Human Services.

Finally, without residential level of care at an equal playing level, I fear the state may be in violation of The Mental Health Parity and Addiction Equity Act (MHPAEA). Once again, this may only compound the costs of the Department of Human Services. As a result, we respectfully as the original request of $17,000,000 be reinstated and no restrictive amendments be put on providers/patients so we can properly serve those in need.

The Key Components of Supporting North Dakota SUD Patients & Providers

* The citizens and patients of North Dakota need a fully-funded SUD Voucher for the full two years of a biennium.

* Patients need the support of a full continuum of care. Due to the severity of illness and additional factors clinical assessments, commitments, jail diversion programs, etc., we cannot eliminate support for any levels of care, as it will cause serious harm to thousands of patients across North Dakota. This includes Residential, Outpatient, Medication Assisted Therapy, and Community Based Supports.

* SUD Providers across the state support the efforts of the ND Dept. of Human Services with community based services and social supports. However it is imperative that due to the severity of illness and ASAM clinical standards, Residential and Outpatient Clinical Services continue to be prioritized and supported due to being the core services of SUD treatment for patients.

* The costs of not treating SUD patients is not revenue neutral. NDATPC encourages the state to continue pursuing Medicaid Waivers to offset general funding costs, including pursuit of an IMD Waiver. The 1915i Waiver is a great start in this process, however we cannot continue to deny Residential/High Intensity Care for low-income individuals in North Dakota, as it causes more harm to patients, families, and communities. As a result of not having an IMD waiver, hospitals, jails, and many additional entities experience higher operating costs and patients receive services that are not effective in dealing with Behavioral Health/SUD disorders.

* According to the National Institute of Health, for every dollar spend on SUD services, $6.00 are saved in correctional costs and $13.00 are saved in primary healthcare costs.

* Due to recent budget issues, North Dakota should not enroll providers who are not licensed in the State of North Dakota, unless it is an underserved area and they complete a Certificate of Need process. Given the volume of providers within five miles of the border, the depletion of a SUD Voucher fund will only accelerate if this occurs and we will run into the same issue of the 2020-2021 biennium.

* The State of North Dakota should be in be in compliance with the Mental Health Parity and Addiction Equity Act (MHPAEA) at all times. This includes sufficient access for patients and payments to providers.

* ASAM Assessments carried out by licensed clinicians need to determine levels of care for patients. Other entities should not be involved in influencing service provision and levels of care through policy, as it causes patients to be cared for in inappropriate clinical settings and compounds the Behavioral Health/SUD disorders of a patient.

Opioid Epidemic Worsening in North Dakota

By Maddie Bierftempel
February 23, 2021

Before COVID-19 plunged the world into a global health crisis, an epidemic of a different kind was ravaging communities across America. But the opioid epidemic hasn't disappeared — in fact, it's only gotten worse. "Been doing this, law enforcement, for 28 years. I've never seen anything like what we're seeing now," Bismarck Police Deputy Chief Randy Ziegler said.

In 2020, opioid overdoses were at their highest ever in the country, according to the **CDC**, and in some of North Dakota's biggest cities. "This is a new trend," Minot Police Chief John Klug said. "This is something that, we went from three overdose deaths in 2019 to 18 in 2020, and before that, we didn't have any." That's a sixfold increase in deaths caused by drug overdoses in Minot. Into 2021, the problem continues. "We've already had several this year, it doesn't seem to be slowing," Mandan Police Lt. Patrick Haug said.

In Bismarck, opioid overdoses went from 36 in 2019 to 102 in 2020. Fatalities went up from four to 10. In Mandan, overdoses jumped from 15 to 27. And in Minot, the suspected fentanyl overdose calls went from 28 to 84. Those numbers have kept the Heartview Foundation in Bismarck busy. It's one of just three opioid treatment centers in the entire state. "We oftentimes are operating on waitlists, because people are calling in for services and we have more people calling in than we have the capacity to serve," Heartview's Chief Operating Officer Jessica Brewster said, referring mostly to their residential services.

Jessica Brewster oversees the nonprofit's methadone clinic, which is a medical treatment for people struggling with opioids. She says their services draw patients from all over the state, including rural areas lacking resources. "We absolutely do have people that are driving to us from Beulah, Hazen, Dickinson," Brewster said. The nonprofit's telehealth options have expanded since COVID, but the efficacy of that is less certain. "They're better than nothing," Brewster said.

A program helping provide opioids misuse prevention education in rural areas recently received $800,00 in grant money. Strengthening the Heartland is a collaboration between both North Dakota and South Dakota State Universities to address shortages in services. “One of the big things is that 90 percent of the counties have a mental health care shortage, so getting this knowledge and resources out the counties was this project,” Meagan Scott said. Scott helps lead the project and says it’s a struggle for many to simply ask for help. “In small communities, there’s also a stigma. You don’t always want to admit that you might need help, so that’s also a problem too, that everybody might find out about it,” Scott said.

While it’s well documented the pandemic is correlated with increases in addiction, alcoholism and mental health backslides for many — police say it’s hard to attribute current overdose surges to COVID. “I don’t think there’s any way for anybody to have any indication that it would,” Klug said. But all three did point to a common culprit predating COVID: fentanyl, a synthetic opioid that can be fatal even in tiny amounts. “Now, they’ve introduced these fentanyl pills, which back in the day you’d never seen on the street,” Ziegler said.

Ziegler said pills laced with fentanyl are coming in from out of state, namely Detroit, Michigan. “The street names are 30s or blues. People think they’re getting oxys but they’re actually getting pills that are laced with fentanyl, or they’re straight fentanyl,” Ziegler said. Often, the pills purport to be something else, but pack fatal amounts of the synthetic opioid. “They’re sold as cocaine, but there’s fentanyl in it. They’re sold as a pill, but there’s fentanyl in it,” Klug said.

The deadly drug adds another layer to policing when a user dies from an overdose. If dealers do get tracked down, whether they can be charged for the death is still murky in the law. “It’s very hard to get any sentence that holds somebody responsible for the death because in a typical case you have to prove intent. Well, my intent was to deliver, not to kill you,” Klug said. There’s currently a bill in the legislature aiming to address that by having an enhanced penalty for anyone who “sells, distributes, delivers, or conspires to deliver” drugs that result in death. It passed the State House 77-19 and is awaiting a vote in the Senate. While changes in law might be coming, changes in policing have already taken place at the departments. “Now we combine our investigators at the PD with investigators from the drug task force so they can use their knowledge,” Klug said. “We combine those two teams, it gives us extra support from staffing standpoint.”

All three departments say their officers carry Narcan with them, a non-prescription nasal spray that can reverse overdoses. It’s available at CVS, and with that kind of widespread availability, you might expect to see fewer deaths, but the opposite is happening. “Narcan is probably kind of one of those wonder drugs, but it also has a backside to it, because yes, it’s helping us prevent death in these heroin and fentanyl overdoses. But it’s also giving these people understanding that if I do overdose, there’s Narcan. It can save me,” Haug said.

Though North Dakota’s overdose situation already is bleak, it’s still just a small glimpse of the problem because of underreporting. Still, police gave a reminder of the state’s Good Samaritan law, which says if you call for help and cooperate with law enforcement, you won’t be punished. “If you were there, and there’s drugs there being used and somebody overdoses and you make the call, nothing is going to happen,” Klug said.

The Forum of Fargo-Moorhead

Meth Outpaces Opioids as Leading Cause of Overdose Deaths in Fargo Area

By David Olson
February 21, 2021

Fargo - Drug overdose deaths in Cass County have been on the rise since 2018 and the total number of fatal meth overdoses in 2020 eclipsed the total number of fatal opioid overdoses in 2016, a year notorious for the number of lives lost to opioid addiction.

Comparing the 42 fatal meth overdoses in 2020 to the 31 fatal opioid overdoses in 2016, Robyn Litke Sall, substance abuse prevention coordinator for Fargo Cass Public Health, said she believes the community is "on the cusp" of an even greater fatal drug problem for which there are very few solutions.

She said that is because, unlike opioids, there is no chemical antidote people can use to reverse a meth overdose. Sall made her comments during a meeting of the Fargo City Commission Monday evening, Feb. 8. She said exacerbating the drug overdose problem is the fact that the area is "in the midst of another big surge in trafficking."

While fatal opioid overdoses fell in 2017 and 2018 after the overdose reversal drug Narcan became more widely available to the public through a FCPH program, Sall noted, the number of those types of overdoses crept back up, reaching 19 overdose deaths in 2020. She added, that about 155 opioid overdose reversals using Narcan were reported to Fargo Cass Public Health in the last half of 2020, compared to 200 similar incidents in all of 2019.

According to Sall, FCPH handed out a record 564 doses of Narcan to individuals in January of this year. Commissioner Tony Gehrig questioned why opioid overdose deaths have been rising in number even as the number of Narcan doses being distributed to the community has gone up.

Sall said the number of opioid-related deaths would probably be higher without the Narcan distribution, and she noted that after years of seeing rising numbers of new hepatitis C cases, FCPH saw fewer new cases in 2019 after the Narcan distribution program was put in place. "We're hopeful those hepatitis C numbers have trended downward as a result of this program," she said.

When it comes to fatal drug overdoses, Sall said numbers nationwide show "what's happening here is happening virtually all over the country." And despite the toll taken by drugs like meth and opioids, Sall said the drug responsible for causing the most number of deaths, eclipsing all other drugs combined, continues to be alcohol, via things like alcohol poisoning and injuries linked to alcohol.

Office of the Sheriff
Jesse Jahner, Sheriff

January 13, 2021

North Dakota House Appropriations Committee
ND State Capitol Building
Via electronic submission

I am writing today to express support for the ND SUD Voucher program, and to urge approval of the requested increase in funding for the 2021-2022 biennium.

As the administrator of one of the largest jails in North Dakota, in the county with the greatest population and highest per capita need for services, I can attest to the fact that the SUD program has been one of the most beneficial programs we have ever participated in, and has contributed more significantly to improved outcomes for recipients than any other single program for which I have been a stakeholder.

You may not be aware that persons who are incarcerated are ineligible for Medicaid reimbursements. If a person is enrolled in Medicaid at the time they are arrested, their coverage lapses during the period that they are physically incarcerated. If they have never enrolled, they must wait until after they are released to start the process, as there is no existing support for enrollment navigators, no access to internet, and often persons in jail do not have access to the necessary information needed to enroll for coverage even though they may be eligible.

The SUD Voucher has filled the gaps in our needs continuum in multiple ways. It was instrumental in allowing us to connect defendants afflicted with addiction to immediate treatment for opioids, providing necessary funding to bridge the gap until Medicaid enrollments could be completed by the clinic. The SUD Voucher was also a critical resource for helping to ensure a seamless transition from inmate to patient for dozens of people who entered residential treatment programs. It was devastating to us when the funding ran out, resulting in the elimination of a primary route for immediate access to needed care.

The funding for this program is needed now more than ever, and we all recognize that the amount allocated last time significantly underestimated the actual need. This is a program that pays real dividends for those it serves, and I wholeheartedly support the proposed budget request. The various government units are going to spend this money either way – I believe we should spend it in support of treatment rather than in response to the medical and behavioral consequences of ongoing and un-addressed addiction.

Sincerely,

Capt. Andrew Frobig
Jail Administrator
Cass County Sheriff's Office

Funds Run Dry for North Dakota Addiction Treatment Program — Counselors Say Lives are at Stake

Written By: Patrick Springer | Aug 29th 2020

Dale Lein couldn't shake the hold alcohol had on him. His addiction started in high school and followed him like a shadow throughout life. He found it difficult to hold down a job. He occasionally got into car accidents while driving drunk. He became estranged from his family. Finally, last year, a health crisis forced Lein to reckon with the fact that alcohol was destroying his life. A brain tumor, shoulder surgery and complications from decades of hard drinking put him in the hospital for four weeks. Alcohol, his doctors said, was killing him.

Lein desperately wanted to get sober. But he faced what seemed like an insurmountable problem. He was disabled and couldn't afford treatment. Then Lein got a break. He qualified for a state program that pays for addiction treatment for those who lack health insurance or other means to pay. After failed efforts in the past, Lein has achieved sobriety, thanks to help from counselors at Heartview Foundation and the state payment program.
"I've been sober now a year and five months," Lein said. "That's the longest I've ever been sober." Before getting treatment, "That's all I did my whole adult life was drink and drink and drink."

The payment program, called the substance use disorder voucher program, has provided treatment for 4,200 people struggling to recover from addictions since it started in September 2016. But money for the program is unexpectedly running out, so the North Dakota Department of Human Services was forced to freeze the program, barring new clients from enrolling — cutting off access to a program that addiction treatment advocates say is a lifeline for people who otherwise end up, untreated, cycling through hospital emergency rooms and jails, at much greater cost.

The Forum of Fargo-Moorhead

“They’re going to end up in our jails and emergency rooms — or they’re going to die,” Tonya Sorenson, a licensed addiction counselor and clinical supervisor at First Step Recovery in Fargo said of those who will lack treatment because the program is closed to new clients. “That’s the reality of what we’re dealing with. We see our clients in the paper, in the obituaries.”

Pamela Sagness, director of behavioral health for the state Department of Human Services, said officials have worked to maintain services for those currently in the voucher program. “The continuity of services is just vital,” she said, noting the risk of relapse for anyone battling addiction. Officials have struggled to budget for a new program and, for the current budget, had to make their best estimates of demand for services in December 2018.
“We’re really for the first time getting our arms around the scale of the need,” she said. The program currently is paying to help 1,348 clients.

The state's regional human service centers are aware of the suspension of new voucher clients and can once again serve as the “safety net for addiction service needs” and have expanded access to 24/7 crisis services in all regions, Sagness said. “No services were discontinued or stopped,” she said. “The notification was specific to stopping growth of the program.” Heartview Foundation, First Step Recovery and 20 other addiction treatment centers around the state were abruptly told on June 30 that money was running out, giving them just hours to prepare and try to finish pending applications.

Before the voucher program, those who couldn’t afford addiction treatment from private counselors had to seek treatment at eight regional human service centers around the state, where they often faced long waiting times, addiction treatment advocates said. “They were required to stand in long lines in human service centers around the state,” said Kurt Snyder, executive director of Heartview Foundation. “The beauty of the voucher system is it allows the private providers to open their doors to all comers. It made a real difference for a lot of people.”

Lein started his treatment with an 18-day regimen, with three days of residential service followed by 15 days of outpatient counseling and therapy. He continues to meet with his counselor once weekly, has weekly group therapy and regularly attends Alcoholics Anonymous meetings. “It does wonders,” he said. “It does absolute wonders for people who are in a crisis right now.” Under the voucher program, clients whose treatment is deemed medically necessary can qualify for evidence-based treatment from approved addiction treatment centers located close to home. The funding freeze on new clients — which addiction treatment advocates say could deny services to thousands of people struggling with addictions around the state — comes despite Gov. Doug Burgum’s outspoken support for addiction recovery, which he has made a priority issue since taking office in December 2016.

Yet addiction counseling center executives, including those at Prairie St. John's, ShareHouse and First Step Recovery, said they are unaware of efforts by Burgum to try to come up with money to provide services to new clients. “Under Gov. Burgum’s leadership, DHS is working diligently to pursue federal funding and identify possible rollup dollars in its existing budget to provide additional funding for the SUD voucher program, after attempts to find other sources including CARES Act funding were exhausted,” Burgum spokesman Mike Nowatzki said in a statement.

Human services officials have “consistently asked to increase funding to meet demand” for the voucher program, increases that were incorporated in Burgum’s budget requests last session, and approved by lawmakers, he said. Funding for the program, which enjoys strong bipartisan support in the Legislature, has risen dramatically since the program’s start four years ago.
“Behavioral health and recovery remains a priority of this administration, and to suggest otherwise because of a funding situation related to further expanding a program that has already been significantly expanded under this administration is disingenuous,” Nowatzki said.
'A race against the clock'

Spending in 2015, the voucher progam's first year, totaled $252,294, which mushroomed to almost $8.3 million during the 2017-19 budget. During the current budget for 2019-21, vouchers are budgeted for $7.9 million — but more than $7.1 million had been spent by early August, with almost a year remaining in the biennium. Spending for 2017-19 exceeded the current biennium because the current two-year budget was planned before all of the receipts from the last biennium were in hand, Sagness said. "We want to get services to people in need," she said. "That's our mission. But there are limits to the funding."

To serve clients caught by the voucher funding squeeze, Prairie St. John's and ShareHouse are absorbing some of the costs. "It became a race against the clock to help people," said Ty Hegland, executive director of ShareHouse, adding that the vouchers are a "gap filler for patients who have no other means." ShareHouse will spend $50,000 to $60,000 per month to help fill the void, while Prairie St. John's bad debt and charity care spiked by $100,000 this month, said Jeff Herman, Prairie St. John's chief executive. "It's deplorable," Herman said, referring to the emergency created by the state's abrupt cutoff. "That's embarrassing for the state."

Extending charity care is difficult because treatment centers operate on thin margins, so it can't be sustained indefinitely, Hegland said. Meanwhile, costs elsewhere will spike as people with untreated addictions end up in jails and emergency rooms, he said. "This isn't just going to go away," Hegland said. "It's not going to be revenue neutral, and it's going to be very expensive."

A family member of a client who couldn't be accepted for treatment because voucher funding has been exhausted scolded staff at Summit Counseling Services, which serves western North Dakota, where treatment is scarce. "How can you sleep at night?" an angry family member asked staff, Executive Director Brenda Owen recalled. "It's heartbreaking."

Despite the freeze on adding new voucher clients, funding will be available for new patients receiving methadone treatments for opioid addictions, because federal money can pay for that, Sagness said. But the state general fund is the sole funder of the voucher program.
The rise in funding has been possible because of strong legislative support for the voucher program, said Sen. Judy Lee, R-West Fargo, chairwoman of the Senate Human Services Committee. "This was a legislative-established program," she said, which she views as an investment rather than an expense. "It's been remarkable," she said, adding that budgeting for the new program was an "absolute dartboard deal trying to figure out."

When the Legislature convenes in January, replenishing funds for the substance use disorder voucher program will be a priority, Lee said. But the state's economy has been hammered by the pandemic, which has caused oil revenues to plunge. "We know it's going to be a really challenging budget year," she said. She agrees with addiction counseling advocates that it's better to help people before their lives spiral into crisis. Legislators are convinced that the program pays dividends by helping people lead productive lives.

"Catch people before they fall to the bottom again and get them on track again," she said. Recovering from addiction is a constant struggle, Lein said. He feels grateful that his voucher approval recently was extended. "I'm still fighting alcohol," he said. "There's no doubt about it. I can't imagine what I'd do if I didn't get in. I don't know where I'd be. I don't even know if I'd be alive." As for the lack of funds to accept new clients, he added, "I'm hoping and praying that this will change."

Drug Overdoses On the Increase

Overdose deaths have quadrupled in the Minot area since last year

By Andrea Johnson
September 30, 2020

Overdose deaths in the Minot area have increased dramatically over the past year but police say it is not clear whether the stress of the ongoing coronavirus pandemic is one of the reasons why. "The pandemic's effect on the opioid use is unclear," said Minot Police Department Capt. Dale Plessas, investigations and records commander, in an email interview. "We saw an increase in overdoses prior to the pandemic."

According to the Minot Police Department, police had responded to 67 overdose incidents between Jan. 1 and Sept. 15, with 11 of those incidents resulting in overdose deaths. In all, there have been 13 overdose deaths in Minot through Sept. 15. In 2019 police responded to 31 overdose incidents in Minot, with three official overdose deaths.

Even those numbers may be out of date. On Monday Minot police said they were investigating the apparent overdose deaths of two 24-year-old men and sought help from the public in identifying what type of drugs the men might have taken and from where they might have gotten those drugs. Police said they fear that more people might overdose and die. During an unrelated court hearing on Tuesday, Ward County Deputy State's Attorney Todd Schwarz remarked to Judge Gary Lee that, by Schwarz's count, the area is now up to 14 fentanyl overdose deaths this year and Ward County now has more fentanyl overdose deaths than it does due to COVID-19. He said two more were lost over the weekend.

A woman who has been charged with dealing drugs wrote a letter to Lee this week from the jail and begged to be released to go to a drug treatment program. She told the judge that someone she loved died in her arms of a drug overdose last week. The woman, sober now after spending a few days in jail, wrote that she realizes that she has been battling drug addiction for years, knows that she is very ill, and wants to take the opportunity to get better. The woman is one of many people in the community who has lost a family member or a friend to the tragedy of a drug overdose or have found themselves facing criminal charges that are connected to their own addiction battle.

"Many overdoses and deaths that have occurred in the Minot area are linked directly to fentanyl," wrote Plessas in the emailed interview. "Often, opiate users purchase the drugs under the false pretense that they are receiving heroin or Oxycodone. The only way for drug users to protect themselves is to stop using." Police have said that fentanyl is particularly dangerous, not only to users but also to police officers and other first responders who might be exposed at the scene of an overdose.
"Fentanyl is reportedly up to 50 times more potent than heroin," said Plessas in the email. "As a result, we are concerned about the potential danger to first responders. Our officers are supplied with personal protective equipment to include gloves, N95 masks, and Tyvek ensembles. To date, our officers have not reported any exposures to fentanyl that required treatment."

Officers have also saved the lives of some of the people who have overdosed. “Our officers are equipped with Narcan to protect them from accidental exposure and to administer to victims of opioid overdoses,” said Plessas. Narcan, which is also known as naloxone, is a medication that can temporarily reverse the results of an opioid overdose and restore normal breathing, according to the National Institute on Drug Abuse. It usually works in two to five minutes, but the effects wear off and the person will still always require medical attention after the overdose. Naloxone can be administered via auto injection or nasal spray. Friends, family or others who administer naloxone to reverse an opioid overdose are protected from civil liability under state law.

Plessas said that officers have seen various drugs in overdose cases, but fentanyl is commonly part of the equation.

Plessas said officers want people to know that help is available.

Drug Overdoses, Fatalities on the Rise in Fargo

By Bailey Hurley
January 22, 2021

FARGO, N.D. (Valley News Live)

Drug overdoses are on the rise in Fargo, up over 300 percent compared to this time last year.

Fargo Police say just within the first few weeks of 2021 the department has responded to nine overdoses, two of which were fatal. By this time last year, FPD had responded to two overdoses, one of which was fatal. “And those are just calls that we got sent out to! There’s a lot of people that overdosed and by virtue of Narcan or family members or friends, they’re being revived and the police would never know about that,” Fargo Police Chief David Zibolski said.

Our goal and our mission as a narcotics unit is to identify the people that are supplying the drugs that lead to overdoses. Basically, they’re taking advantage of people suffering from addiction and we’re holding those people accountable,” Narcotics Sergeant Matt Christensen said.

Christensen says most overdose cases in the metro involve mixtures of fentanyl, heroin and meth. He says some of the cases the department is currently investigating have ties to California. Christensen also says more often than not, the ones supplying the deadly drugs in the metro are not local.

ADDICTION TREATMENT PROVIDERS COALITION

3201 Fiechtner Dr. S
Fargo, ND 58103
ndatpcboard@gmail.com

Presentation to Senate Committee: 3.9.2021

Brenda Owen
7795 St. Gertrude Ave
Raleigh, ND 58564
701-659-0490

Chairman: Committee members

Here in support of SUD Voucher portion of Bill 1012
Representing:

Summit Counseling Services: Outpatient Behavioral Health Agency, located in Williston, Dickinson and Bismarck since 2015

Summit Prairie Recovery Center – Residential Treatment Center, Raleigh ND, south of Flasher

I have worked in Behavioral Health for 20 years plus, in the State system for more than 15 years. Prison System 3 Human Service Centers (Jamestown, Devils Lake, Williston)

1 in 8 people with Substance Use Disorder, new state released by SAMSHA
1 out of 5 people utilize Medicaid/Sanford Expansion type of insurance services.

(Forgiveness, passionate about what I do, non- politically correct, going to say some things that disagree with what has been presented to the legislature)

Grieved and Angered.
Testimony conflicts with (Masters Research paper prepared by me in 2012) utilized by the state in their presentations to justify their positions.

1 Initially to justify their spending thousands on their IDDT Program (Dual Diagnosis with University of Ohio) (2010)

2. Manipulated stats to justify their change to Open Access to justify not spending money on Addiction and individual services. (2014-2015)

3. Utilized to justify the 1915 (I) program. (2020)

4. Now manipulated to indicate too much money is being spent on (Long term) term care (This session)
*Stats are specific to those with developmental disabilities/severe substance use that will not get better due to inability to not get better. Included case management, those that can't drive or totally care for themselves, such as nursing home care, those in subsidized housing, vocational rehab individuals that

need support, not those in short term placement such as treatment that were high functioning and are able to return to high functioning.

*Manipulated statistics –

Rosalie (Director of State Hospital) Presented that the recommendations for "residential" treatment are out of fear and are "overstated" because people are afraid.

Absolutely: People are afraid, who would not be fearful of seeing your family member overdose
Group: Month ago, 12 clients, 9 overdosed in 30 days prior to treatment, 1 of them three times

Narcan, Ambulances Services, First Responders, Air Ambulances
*All of them had attempted outpatient services and could not stop their use.
*All the opioid users – had abused the MAT program medications, purchased them on the street and abused them along with fentanyl.

*It's not FEAR – it's NEED.

Treatment recommendations are not made by the families or the patient, they are made by Bachelor's and Master's Level, Licensed Addiction Counselors using the criteria established and recommended nationally by the American Society of Addiction Medicine. These criteria are based on 6 Dimensions. The score of these dimensions determine placement.

It is being said that MAT treatment is "cost effective".
True it is less costly and can be very effective is done in an evidence-based manner.

However, it is a tool and is being abused. It is to be prescribed and the clients are to participate in treatment programming. One cannot just substitute and not deal with the psychological aspects of addiction. (Again, ever person abusing opioids in treatment at SPRC have abused these medications)
*Many do not want the MAT medications – they want to be totally clean.
*Many cannot afford the MAT medications even if they wanted them.
*Many do not have transportation to continue MAT medications.
*Have already abused the MAT medications.
*Feel forced to take the MAT medications because there are not other services to assist with withdrawal and they cannot get into residential or outpatient services.
*MAT medications are harder to wean off then regular opioids.
*Cash cow to some of the providers prescribing as it's easier to dose than do treatment.

*Many MAT providers in state are unregulated and unsupervised, selling prescriptions in the Walmart parking lot in Dickinson, not requiring treatment, over prescribing to the point clients are in a zombie state and no follow up given, only by telehealth and no supervision.

* Peer Support – helpful but again, only a tool. Is only helpful in early stages of addiction with motivated clients and in the maintenance stage after formal treatment is completed.

Some officials are suggesting that "peer support" will take the place of Licensed Addiction Professionals. This is not helpful and untrue. They have limited training, and typically the clients are not invested, the reimbursement is not enough to sustain the positions. Agencies are having to supplement these positions from other areas. Huge liability risks!

*Clients need a full continuum of care. From prevention, outpatient, residential and aftercare services.
*It is suggested that more funding be put in prevention (absolutely) but what do we do with the client on the deep end until that shows effectiveness? We need to continue to treatment those with full blown addiction issues and offer them the opportunities to get well. We do not abandon people medically, why with behavioral health issues?

North Dakota continues to count beds, however there is no process to count needs of those unserved.

SPRC receives 5 to 12 calls a day of clients that are Sanford Expansion, Medicaid, Uninsured or with high deductibles that cannot find services anywhere in the state.

*Last Friday by noon we received 10 calls from people with these issues we could not serve.
*50 calls a week of unserved individuals, 200 a month, just from our agency and people do not even realize we are available.
*People are terrified.

*Typical addicted client.
*May Lack Transportation
*Is couch surfing.
*Cannot afford day care.
* Deep end clients typically cannot hold a job.
*Are not able to access Human Service Center's due to the style of intake (early morning, have to wait – denied and must return – they give up or are unable to secure transportation) Often forced into groups they don't want to be in that are not addiction related (engagement group – 5 or 6 weeks) prior to addiction group, they quit due to the lack of access, success and belief that someone cares, often turned away and referred to other agencies that will not serve them due to the level of care needed and low reimbursement from Medicaid/Sanford Expansion (frustrating and clients will not follow through – too hard)
*Recommendations are to low and not effective, no place to get help.
*struggle maintaining motivation to jump over the barriers.

Typical wait for residential if needed 4 to 6 weeks for people with regular insurance, 6 to 8 weeks for those with Medicaid/Sanford Expansion (if at all) only so many of these beds available due to IMD restriction. Regular insurance people are finding treatment out of state due to lack of services in state,

Arizona, Vegas, California, Florida are their favorites. North Dakota insurance monies are going out of state with no return. Due to not being able to connect with their families and having no after care plan they quickly relapse.

*Yesterday in group, 13 clients, 7 of them said if they weren't safe, they would have relapsed and left treatment because they were so uncomfortable (vomiting, diarrhea, muscle cramps, stomach upset, unable to sleep, tremors, temperature) All were on prescribed medications for withdrawal. What happens to those that do not have the safe environment to recover in? All have tried outpatient and MAT medication in past with no success or limited success.

Covid:
*Federal stats show 30% increase in use of fentanyl since shut down.
*Relapses in those sober/clean 10 and 20 years due to loss of employment, business shut down and not able to care for families.
*Many people were without insurance 60 days after shutting down and unable to secure Medicaid or Sanford Expansion of it they did there was a significant wait time.
*Voucher Disappeared
*Increases in overdose, suicides, other mental health concerns for individuals and families.

Unfortunate time to run out of monies when the need was the highest ever in the history of the United States and North Dakota

*Opioids quickly addictive – so very dangerous sometimes just days. Experimentation is so different with this drug than with alcohol and marijuana.

The poor who suffer, most are never able to receive services, particularly residential.
Even if people can take Medicaid and are within the 16-bed limit, they only reserve a few if any beds for Medicaid due to low reimbursement, delayed reimbursement or having to appeal the reimbursement decisions due to the handling of the claims at the state level.

Calls coming from ER Doctors, Nurses, Families, Ambulance personal but mostly: From the Human Service Centers – it is interesting that it is this agency that is indicating there is no need when they are desperate for placements and services for their clients.

Solutions/Suggestions:
Fund the voucher at is full proposal: Even this amount is not enough.
Propose an IMD Waiver: Cap the limit if you are concerned about too many beds or too much growth for any one agency.
Monitor/Require appropriate documentation to utilize the voucher (Initially when the voucher was proposed the state was not prepared and did little to monitor the financial need of those requesting services, thus some agencies were quick to capitalize with little accountability)

*Restructure Medicaid for that claims are processes and paid in a timely manner. Medicaid reimburses about ½ of other insurance payors. With this problem, no one wants to take these clients. Make it inviting to take Medicaid. When we call you cannot talk to a person, you are forced to email and then often there is no return message, people are rude and often times they do not know the rules, different people tell you different things. It is not uncommon that their website tells you the clients are eligible on a certain day and the services are provided and the checks for services issues only to be recalled because their website is no accurate. Thus, the agencies are not able to obtain payment for those services. Most private providers are not willing to do this or take the risks of serving these clients.

Optional/Available Services

- **Respite Care** to provide primary caregiver(s) with temporary relief from the stress and intensity of caring for a child with special needs
- **Assistive Technology** such as video modeling, DVDs, equipment, language generating devices, etc.
- **Memberships** to community organizations directly related to voucher-funded services
- **Registration** to workshops or training for independent living skills
- **Adaptive sports and activities** related to voucher-funded activities

Optional/Available Services *(continued)*

- **Transportation**
- **Specialized camps**
- **Parent training**
- **Educational materials**
- **Tutoring**
- **Sensory equipment**
- **Safety equipment**
- **Self-care equipment**

NOTE: House Bill 1038, approved during the 2013 North Dakota Legislative Session, created the autism voucher program and specified that vouchers cannot cover behavioral therapies.

Autism Services **Voucher Program**

Who?
What?
Why?
How?

NORTH Dakota | Human Services
Be Legendary.™

Who qualifies for the voucher program?

Families of children ages 3 through 17 *diagnosed with an Autism Spectrum Disorder* that have a gross family income up to 200% of the Federal Poverty level, and are not receiving services through a Medicaid waiver, may qualify for the **Autism Services Voucher Program**. See details at www.nd.gov/dhs/autism.

Why apply?

The goal of the **Autism Services Voucher Program** is to address gaps in non-therapy related services and to provide education and support to families who may not qualify for other help.

What does the program do?

The voucher program helps pay for assistive technology, training, and other approved support services that enhance the quality of life of children with Autism Spectrum Disorders and help meet the unique needs of their families.

The program provides vouchers totaling up to $12,500 per year, per qualifying child, to help eligible families with the cost of supporting a child with autism.

IMPORTANT: Early intervention and therapy services are not covered by the voucher program.

How do families apply?

To apply for voucher services, a family must complete an application, which is online at www.nd.gov/eforms/Doc/sfn60611.pdf or available from the North Dakota Department of Human Services, 600 E. Boulevard Ave., Bismarck, ND 58505.

Families must provide proof of income, proof of ND residency of at least six-months, and a copy of a confirmed diagnosis of Autism Spectrum Disorder.

In addition, professional recommendations are required for approval of all voucher purchases. The application and income chart, as well as other information about autism-related services, are online at www.nd.gov/dhs/autism.

Human Services Committee

(At the request of the Department of Human Services)

A BILL for an Act to create and enact a new subsection to section 50-06-32 of the North Dakota Century Code, relating to the autism spectrum disorder task force; to amend and reenact subsection 17 of section 50-06-05.1 and section 50-06-32.1 of the North Dakota Century Code, relating to financing of welfare programs and housing stabilization supports and rental assistance and the autism spectrum disorder voucher program; to repeal sections 1-02-35 and 50-06-14 of the North Dakota Century Code, relating to obsolete effective date language and financing of welfare programs; to provide a statement of legislative intent; to provide for a legislative management study; and to declare an emergency.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. AMENDMENT. Subsection 17 of section 50-06-05.1 of the North Dakota Century Code is amended and reenacted as follows:

17. To administer, allocate, and distribute any funds made available for the making of direct cash assistance payments, housing ~~assistance payments~~stabilization supports, and rental ~~subsidies under any rental~~ assistance ~~programs initiated by the federal government not otherwise by law made the responsibility of another state agency possessing statewide jurisdiction~~and to promote cooperation and working agreements with public agencies and including the housing finance agency and department of commerce, and private human services agencies.

SECTION 2. A new subsection to section 50-06-32 of the North Dakota Century Code is created and enacted as follows:

The department shall contract with a private, nonprofit entity that does not provide autism spectrum disorder services to facilitate and provide support services to the autism spectrum disorder task force.

SECTION 3. AMENDMENT. Section 50-06-32.1 of the North Dakota Century Code is amended and reenacted as follows:

50-06-32.1. Autism spectrum disorder voucher program ~~pilot project~~ - ~~Legislative management report~~Report to autism spectrum disorder task force - Appeal.

1. The department of human services shall establish a voucher program ~~pilot project beginning July 1, 2014,~~ to assist individuals and the family of such individuals in funding equipment, services, care and ~~general educational needs related to~~social activities or other needs to compensate for a deficit created by an autism spectrum disorder for individuals below two hundred percent of the federal poverty level from age three to under age ~~eighteen~~twenty-five who have been diagnosed with autism spectrum disorder. The program must include funding for in-home supports not to exceed forty hours per month, community activities, and transportation of the individual diagnosed with autism spectrum disorder to and from voucher-funded activities or services. The program may include funding for assistive technology; video modeling videos or equipment; language-generating devices; training and educational material for parents; parenting education; sensory equipment; tutors; safety equipment; travel tools; self-care equipment; timers; visual representation systems; respite care; specialized day care; language comprehension equipment; and registration and related expenses for workshops and training to improve independent living skills, employment opportunities, and other executive or social skills.
2. The department shall adopt rules addressing management of this voucher program ~~pilot project~~ and establishing the eligibility requirements and exclusions for this voucher program ~~pilot project~~. The program may not provide a voucher for early intensive behavioral intervention, including applied behavioral analysis, intensive early interventional behavioral therapy, intensive behavioral intervention, the Lovaas method, the Denver model, LEAP (learning experiences - an alternative program for preschoolers and parents), TEACCH (treatment and education of autistic and related communication handicapped children), pivotal response training, or discrete trial training.
3. The department shall allocate funding for family care navigator services that will assist the autism spectrum disorder voucher-approved individual and family in navigating

systems related to obtaining and coordinating services, equipment, care, and other eligible needs.

4. The department shall conduct ongoing outreach efforts to increase awareness of the voucher program funding available to eligible individuals with autism spectrum disorder and the families of these individuals. Quarterly, the department shall report to the autism spectrum disorder task force.

5. A decision on a voucher application which is issued by the department under this section may be appealed as provided under chapter 28-32.

~~4. The department of human services shall report to the legislative management regarding the autism spectrum disorder program pilot project.~~

SECTION 4. REPEAL. Sections 1-02-35 and 50-06-14 of the North Dakota Century Code are repealed.

SECTION 5. LEGISLATIVE INTENT - AUTISM SPECTRUM DISORDER VOUCHER PROGRAM. The department of human services shall ~~adopt~~draft proposed rules to seek additional flexibility for the administration of the autism spectrum disorder voucher program to ensure families can be served within available appropriations. ~~The administrative code changes should consider changes that include reducing the amount of approved voucher funds available to each household and the amount of time during which a household may use approved voucher funds.~~Before being adopted by the department of human services, the draft rules first must be approved by the autism spectrum disorder task force. The department of human services shall request the legislative assembly to fund the autism spectrum disorder voucher program with one million three hundred and eighty-five thousand dollars.

SECTION 6. LEGISLATIVE MANAGEMENT STUDY - AUTISM SPECTRUM DISORDER WAIVER AND VOUCHER PROGRAMS ~~AND TASK FORCE~~. During the 2021-22 interim, the legislative management shall consider studying the autism spectrum disorder waiver and voucher programs and other programs designed to provide services to children who are impacted by autism spectrum disorder ~~and the elimination of the autism spectrum disorder task force~~. The study may include consideration of the structure of the programs and whether there are any gaps and unmet needs. The legislative management shall report its finding and recommendations, together with any legislation required to implement the recommendations, to the sixty-eighth legislative assembly.

SECTION 7. EMERGENCY. This Act is declared to be an emergency measure.

Testimony
House Bill 1012 – Department of Human Services Budget
Senate Appropriations Committee
Senator Ray Holmberg, Chairman
March 9, 2021

Chairman Holmberg and Members of the Senate Appropriations Committee:

I am Holly Johnson, a Licensed Board Certified Behavior Analyst, and the appointed Behavioral Specialist member of the Governor's Autism Spectrum Disorder Task Force (ASDTF). I live in Minot, and I've been working with children and families in the Autistic community in a variety of capacities over the past 15 years. I am here today on representing the ASDTF to advocate continuation of funding for the Autism Spectrum Disorder (ASD) Voucher.

This program was created 'to address the gaps in non-therapy related services and to provide education and support to families who may not qualify for other help', as disseminated in the DHS program brochure (attached). However, screening eligible for the Voucher indicates that the person is not eligible for the Waiver. Reducing funding for the ASD Voucher now will mean these families will have to compete for slots on the ASD Waiver, which has had a waitlist of 50+ children since its inception.

DHS, through SB 2089, sought to eliminate the ASD Voucher in it's entirety, taking the position that it was "repurposing" the General Fund money from the ASD Voucher to the ASD Waiver, which is matched with Medicaid dollars. This was done with no notice to, or discussion with, the ASDTF. While DHS is tasked with cutting 15% of its General Funds by the Governor, this should not mean a 100% cut of the ASD Voucher, and an overall 50% reduction of the ASD-related service funding. DHS is not only "repurposing" the full amount it stripped from the ASD Voucher into the ASD Waiver, it is also reducing the amount allocated to the ASD Waiver from the 2019-2021 biennium.

As an Autism Task Force, we want to know where that money goes. This should inarguably be reevaluated after the legislative management study, as is currently engrossed in SB 2089. We urge this Committee to put the full prior appropriation amount back ($1.325M). Then, through the study during the 21-23 biennium, determine if the ASD Voucher program's budget needs to be reduced. This "repurposing" will end up excluding children in need from services.

There are issues with the Department's assumption that ASD Voucher-eligible individuals can be served by the ASD Waiver.

- The child must be screened at an ICF/institutional level of care for the ASD Waiver. Many children on the ASD Voucher will not be eligible for the ASD Waiver, leaving them with no services. There is no guarantee they will qualify. Testimony to the Senate Human Services Committee indicated, "people who are eligible for the Voucher are not eligible for Medicaid or a Medicaid waiver," and, "a good portion of them (kids on the Autism Voucher) would (lose services)."
- Diverted ASD Voucher children who actually qualify for ASD Waiver services may lose four years of eligibility for services. Children must be under the age of 13 to qualify for ASD Waiver services, with the hope it will be increased by 2 years this legislative session, in SB 2085. If over this age, they will not qualify for the ASD Waiver. Additionally, there is up to a two year waitlist to access the ASD Waiver, so those being serviced by the ASD Voucher, who manage to meet heightened ASD Waiver eligibility requirements, may be left waiting for services. There is no other safety net.

ASD Waiver/Voucher during the first half of the legislative session:

- The original text of SB 2089, introduced by DHS, repealed the ASD Voucher.
- HB 1012 begins hearing testimony on DHS Budget.
- On 2/8/2021, through amendments to SB 2089, Senate Human Services restored the ASD Voucher along with $300,000 for the 2021-2023 biennium, and included a study of the Autism Voucher, Autism Waiver, and Autism Task Force.
- On 2/12/2021, SB 2089 passed in the Senate.

- On 2/22/2021, DHS' budget (HB 1012) passed the House with the removal of the ASD Voucher. Opposition testimony was provided on 1/25/2021 by the ND Autism Advocacy Coalition during public commentary to House Appropriations – Human Resources Division, and explicitly identified the DHS budget line item regarding the ASD Voucher.
- During amendment discussions between House Appropriations and DHS in mid-February, the budget math was not fully explained. The testimony to House Appropriations was that the Department is not eliminating services for children with autism, they are eliminating a program, but increasing ASD Waiver slots to pick up the people in the ASD Voucher.
- However, in the savings plan document, the word "voucher" is not even identified. It specifically states, 'Eliminate and shift dollars into existing waiver and state plan services for ASD to draw down a match,' is described as 'Programmatic Efficiency Savings,' which is misleading.
    - Total Savings = $425,617
    - General Fund Savings = ($528,706)
    - Federal Fund Savings = $954,323
- In reality, DHS is cutting the ASD Voucher entirely AND reducing the budget for the ASD Waiver by ($356,324). A summary of this diversion can be referenced in the 'Budget & Spending Breakdown' document (attached).

Moving into the second half of legislative session, here's what is happening:

- On 3/3/2021, the ASDTF presented proposed amendments drawn up by Legislative Council (attached) to the House Human Service Committee. The goal with the amendments is to make the ASD Voucher more usable and impactful for children with autism and their families; so the funding is actually spent on services, which include in-home and community-based supports. In order for this to be a reality, the ASD Voucher would have to retain its funding. In this hearing, DHS continued to support the repeal of the ASD Voucher.

Today, the ASDTF wants to educate Senate Appropriations on what “repurposing” means in the DHS savings plan for the ASD Voucher, and that full funding for the ASD Voucher ($1,325,000) should continue along with the Autism Task Force’s proposed amendments provided to House Human Services to improve the program.

- The ASDTF is advocating for the 52 children approved for ASD Voucher funds in 2017-2018, 39 children in 2018-2019, 48 children in 2019-2020, and 42 children in 2020-2021 who would be losing services (~90 children each biennium). Even with the addition this legislative session of 54 slots to the current 96 slots in the ASD Waiver (150 total slots), we will not be able to serve the total number of children currently on the Waiver waitlist (reported at 70 during February 2021 ASDTF meeting). Potentially, we are adding 90 more children each biennium to the ASD Waiver waitlist, that is, if the ASD Voucher recipients are critical enough to qualify for the ASD Wavier based on institutional level of care.
- The budget for the ASD Waiver for the next biennium is less than this biennium, so “repurposing” these General Fund dollars is a surreptitious concept. It is not “budget neutral” as described in other testimony from DHS when discussing adding the 54 slots to the ASD Waiver.
- For the past 4 biennia, DHS has requested full funding or the ASD Waiver and ASD Voucher, with the expectation that because of program limitations, the funding would not be fully expended, and the leftover could be redistributed to other DHS programs. Now, the Department seeks to divert funding for individuals with autism to other budeget areas. The ASDTF urges this committee to not rob Peter to pay Paul.
- ASD Waiver and ASD Voucher funding is necessary for the future vision proposed by DHS, as over 50% of those institutionalized at LSTC (youth and adults) have a diagnosis of autism. DHS is going to realize its program goal of reducing the LSTC census – where each individual costs the state over $400,000 per year – means there must be an alternative set of services established in the community, except they are slashing those in-home and community-based services.

In summary, the ND Autism Spectrum Disorder Task Force, strongly opposes the attempt to repeal and entirely defund the Autism Spectrum Disorder (ASD) Voucher program. The ASD Voucher program should have the intent to reach as many families as possible, filling any gaps left by other ASD programs and services. We are asking for transparency, as we have not been given any chance to discuss this. Timing has not been in our favor, but now that we have the necessary information to work this through in the remainder of this legislative session, we ask the Senate Appropriations Committee to consider this budget item carefully and synchronize both sides. This is our opportunity to improve the ASD Voucher through the proposed amendments, and we appreciate the opportunity to ensure this program stays funded for the next biennium.

This concludes my testimony. This testimony has been provided on my personal time and in no way represents DHS or LSTC. Thank you for your time and consideration. If I can be of assistance during this time of deliberation, please contact me at holly.johnson.bcba@outlook.com. I am happy to answer any questions.

Sincerely,

Holly Johnson, MS, BCBA, LBA

PROPOSED AMENDMENTS TO ENGROSSED HOUSE BILL NO. 1012

Page 11, after line 13, insert:

"**SECTION 20. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER.** The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton fire department. The department of human services may convey a parcel of land, 7.45 acres, more or less, located in part of lot 1, block 1, state school first addition to the city of Grafton, which is located within the southwest ¼ of the southwest ¼ of section 13, township 157 north, range 53 west, on the terms and conditions determined appropriate by the department and attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance."

Testimony on HB 1012
Senate Appropriations Committee
March 9, 2021

Good afternoon Chairman Holmberg and members of the Senate Appropriations Committee. My name is Shelly Peterson, President of the North Dakota Long Term Care Association. We represent 211 assisted living, basic care, and skilled nursing facilities in North Dakota. I am here in support of HB 1012 and ask for your support of basic care and nursing facility funding.

HB 1012

First, just a quick recap of the number of beds and facilities – see the attachments for assisted living, basic care, and nursing facilities.

Second, I want to address basic care funding. Originally the DHS budget proposed a decrease in basic care funding of $7.3 million.

This would have been catastrophic for the facilities caring for residents in basic care. I am happy to say the House restored $5.3 million to the basic care budget.

Before the pandemic hit basic care utilization was growing, more people needing basic care assistance were seeking this living arrangement with services. However, as you can see, basic care occupancy has dropped because of COVID-19, so the money for the increase in caseload/utilization is probably not necessary, and thus the $5.3 million restored by the House may be sufficient except for our request of another $439,126 to increase their annual inflator to 2% rather than the current 1%.

What is basic care and why is it important? Basic care is a congregated residential setting with private and semi-private rooms, providing 24 hour staffing. Basic care provides an all-inclusive rate providing room, meals, personal care services, supervision, activities, transportation, medication administration, nursing assessment and interventions and care planning. Residents range in age from late 30's to over 100 years old, with the average age in the mid 80's. Almost two-thirds of residents living in basic care need assistance to pay for their care. The average basic care assistance rate on July 1, 2020 was $129.69, what a bargain! Twenty-four hour care, all-inclusive rate that covers all of your needs. An independent study commissioned by DHS in 2014 stated in their report, (Myers & Stauffer), "It is therefore in the state's best interest to proactively invest additional resources to further develop it's non-institutional resources, (HCBS, basic care and assisted living) that promote the ability of the elderly and disabled to "Age in place" and be served for as long as possible in their own home or another community residential setting.". Please take a look at Attachment B labeled Basic Care Rates Effective July 1,2020, the average rate is $129.69. North Dakota has a real gem, called basic care and I ask that you support the House restoration of funding.

The next budget item I would like to address is Adult Residential Care. These are licensed basic care providers specializing in head injury services, (two) and in dementia care, (thirteen). These facilities are funded under the Medicaid waiver and the clients they serve screen in need of skilled nursing care. Adult Residential Care is a more independent integrated setting with 24 hour access of staff to support their independence.

Below is the list of the 15 Adult Residential Care facilities and their daily Medicaid rate, their licensed bed capacity and their occupancy as shared on the 1-14-21 HC Standard report.

FACILITY NAME	CITY	DAILY RATE	LICENSED BEDS	OCCUPIED
Maple View	Bismarck	$112.08	36	31
Edgewood Senior Living	Fargo	$108.93	35	33
Maple View Memory Care	Minot	$103.22	43	32

Edgewood Senior Living	Mandan	$107.08	73	48
Maple View Fargo	Fargo	$108.26	36	30
Ecumen – Evergreens	Fargo	$114.72	54	32
Edgewood Senior Living	Minot	$123.77	22	18
Edgewood Senior Living	Minot	$126.38	133	97
Roseadele	Jamestown	$127.47	20	20
Edgewood Senior Living	Bismarck	$133.13	44	36
Maple View	Grand Forks	$125.62	36	25
Edgewood Senior Living	Jamestown	$127.35	61	39
Lakewood Landing	Mandan	$154.94	38	32
Open Door Center	Valley City	$173.00	10	10
Dakota Pointe – HIT INC	Mandan	$198.24	10	10

Besides the daily rate above, a room and board rate of $758.00 per month is allowed. These providers are also in need of at least a two percent rate adjustment per year. The Governor's Budget allows only a one percent adjustment.

The next budget item is nursing facilities. This budget provides an enhancement of $7.2 million for reforming the Nursing Facility Payment System. We support the changes to the Nursing Facility Payment System and ask that you do also.

The study of the payment system was a long grueling process and it challenged us to think differently. The study was mandated in the 2019 legislative session and you directed a revised payment methodology be developed. Not a tweaking of the old system but the creation of a new methodology. That took us awhile to grasp. I believe for the first few meetings, someone in the group would ask, "Are you sure this is necessary? Wouldn't it be better to change our current system and improve it to incentivize efficiency?" Then we would go back, read the legislative language you approved and said no, we need to change the entire payment methodology and thus we did! Many times, during our months of meetings I did not think we would arrive at consensus, but we stuck with the process and in the end at our September 2020 membership meeting, approved the new payment system by a vote of 99-1. At the end we did not get everything we advocated for and neither did the state,

but we believe this system can achieve better efficiency of state resources and a quality service that delivers on our promise of assuring the elderly get quality care at the end of their life.

We could never had completed this study without the knowledge and expertise of two payment experts. Joe Lubarsky, President of Eljay, LLC and Brad DeJong, Senior Partner with Eide Bailly. Brad is an expert in North Dakota's nursing facility payment system and Joe is a national expert in the development and modification of nursing facility payment systems. He has assisted in the design of payment systems in 30 states. Without their expert knowledge this project would have never been successful. Brad DeJong is with us today and he will testify on the details for the new proposed fair rental system.

As you are aware, HB 1090 contains all the policy language to implement the new payment system and HB 1012 contains the money. It is impossible to just talk about the money without talking about the new policy behind it. All policies are based upon a long and sometimes challenging negotiation process. Each detail impacts one another. They are all related and entwined to the overall success of the new payment system. We know you have final approval the as legislature determines policy and the budget. I am hoping you see the value and can support all changes we are bringing to you. To trust the state and national experts who know complex payment systems. There are key components that are vital to the implementation and success of the new system.

Key Features of the New Pricing Model

1. Moves to a hybrid pricing model verses our current cost-based system with limits.

2. Set price levels as a percentage of median, with direct care and other direct care at 120% of median and indirect at 110% of median.
3. The indirect price will be established separately for small nursing facilities, 55 beds and under, and large facilities, greater than 55 beds. Small nursing facilities will have a higher price of approximately $4 dollars in the indirect cost category.

4. The margin cap in all cost centers will be 3.46% of the price. Please do not confuse this with an operating margin under our current system. In our current system, everyone gets an operating margin, that will not be true in our new system. Every facility will have the opportunity to receive a margin, but it will be based on where they are operating relative to the Price Point.

- Facilities that are 3.46% or more under the Price Point will receive the facility specific allowed cost plus the margin.
- Facilities that are within 3.46% of the Price Point will receive the Price.
- Facilities that are at or over the Price Point will only receive the Price, no margin.

5. The new pricing model, (not the property component), would implement on 1-1-22 and the 6-30-21 cost report will be used to set the initial prices.

6. We are proposing a hold harmless provision for two years on the operating side. For the initial year starting 1-1-22 nursing facilities

will be able to select to operate under the existing cost based methodology or the new pricing model. All nursing facilities will receive two sets of rates and they will decide and select the one they want. This two year hold harmless is very important and will help those who may experience rate decreases under the new pricing model to transition more slowly into the new payment model. The House took further action to assist the high cost/high staffed facilities in transition. For the rate years 2022 and 2023 they directed $2.1 million to enhance the operating margin before they transition into the hybrid pricing model.

7. In the second year of implementation, 2023, the hold harmless provision continues. A nursing facility can continue to stay under the existing cost based system or convert to the new payment system. In year three, all must convert to the new pricing model.

8. Rebasing will occur every two years for the first four years and will be examined after that period.

9. The Medicare Skilled Nursing Facility Market Basket will be utilized to increase rates in the non-rebasing years. Item 8 & 9 are really important because we are losing a key component on the payment system. That is called annual rebasing. Under annual rebasing today, if your costs are <u>under</u> the cost limit and your costs increase substantially, you get that full increase in your rate up to the limit. This feature has saved many facilities and has been vital. But we are giving it up. In giving this "annual rebasing up", it is important to get the annual Skilled Market Basket and rebasing of the price every two years.

10. A process has been developed to address atypical cost increases in a non-rebasing year. (i.e., pandemic – national minimum wage) and that will be outlined through the rule promulgation process.

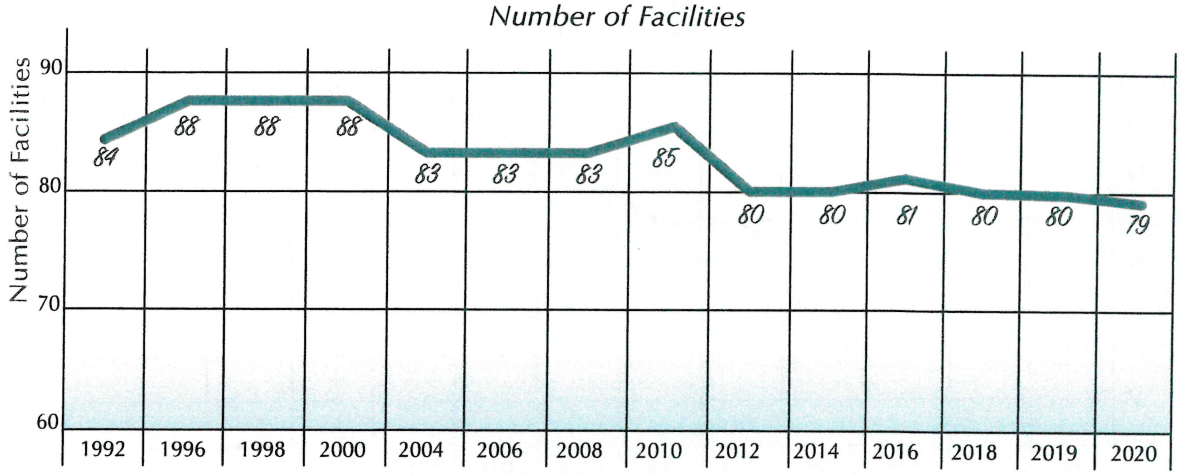
11. Equalization of Rates continues.

12. When the two year transitional hold harmless ends, we would like to see the development of a new quality incentives payment. This is not part of the legislation before you today but something I would like to bring back in 2023 for implementation in 2024.

    Based upon a statistical analysis of costs there is <u>one</u> driver of why it costs more in some North Dakota nursing facilities and that is the number of staff they have. Lower cost facilities have less staff, high cost facilities have more. Under this new system some high staff facilities may need to reduce staffing to be successful under this model. An analysis of cost and quality data in North Dakota shows those with higher costs, (higher staffing), have better overall quality outcomes. We would like to see a system that rewards quality and allows all nursing facilities to earn back dollars in the form of a quality payment to help support the cost of their higher staffing. Today we need the two year hold harmless transition payment, but in the future, we would love to see this as a quality payment. (See two charts on quality)

13. Implement a Fair Rental Value System as the property component on 1-1-23. Implementing this component of the new system is going to take time because to establish your Fair Rental Value the state will need to collect square footage and cost of additions and renovations made on all nursing facilities over their lifetime. This also needs a

hold harmless provision, and this provision will be needed until everyone crosses over into the fair rental system. The hold harmless provision is to help those that have recently undertaken a major construction project or to help those that are planning a major construction project if the financing of the project was in place by 12-31-21. The majority of the new money here are for those nursing facilities that have a low property rate to transition to a higher property value.



Brad DeJong is going to address in detail the fair rental system so I would like to defer any question on that topic to him.

This concludes my testimony and I welcome your questions

Senate Appropriations Committee
House Bill 1012
March 9, 2021
Senator Holmberg, Chair

Chairman Holmberg and Members of the Senate Appropriations Committee. I am Denise Harvey, Director of Program Services with the North Dakota Protection and Advocacy Project (P&A). P&A is an independent state agency that protects people with disabilities from abuse, neglect, and exploitation, and advocates for the civil and legal rights of people with disabilities.

P&A supports the building of a new State Hospital with reduced beds, in conjunction with the establishment of 6 to 10 beds in the western part of the state. While this is not the first request for the building of a new State Hospital, it is time. The institutionalized setting provided through the large older buildings is not conducive to modern treatment and requires additional staffing due to its size. A new facility would be much more efficient, both in cost and serving individuals. Funds that would be spent for costly renovations would be better spent providing services in the western part of the state. There is a tremendous need for beds in the western part of the state, to both serve individuals who require more intensive services and to prevent family members from being separated in times of need. It is expected for persons with medical needs to receive services near their homes, and it is also expected for persons with mental illness to receive services near their homes.

P&A supports the 1915(i) state plan amendment, and the tremendous efforts made to put this into place. P&A appreciates the extensive work done by DHS to expand behavioral health services to meet the needs of people with the right service, at the right time, nearest their home. While there are many positive steps taking place, there are questions about the number of agencies that are ready to provide services through the 1915(i) at this time, and proposed budget reductions related to this. P&A expresses concern about reductions in funding for family support programs to include Family Voices and the Federation of Families. It is our understanding that these programs are marked for significant cuts for the next biennium. The support provided for families through these programs is invaluable. P&A expresses concern about the elimination of the Experienced Parent Program for early intervention. In addition, the large reduction proposed for the Voluntary Treatment Program is concerning. Prior to the establishment of this program, parents were put in situations where they were required to relinquish custody of their child to access needed mental health services, including the use of residential treatment facilities. Reductions in funding for these programs would be very detrimental to families with the highest level of needs.

P&A supports peer support, along with certification and professional supervision for this program. We look forward to hearing of the positive results from consumers using this program. This has been a top priority for the consumers of mental health services for years, and we are very grateful for the support provided for this program and encourage on-going full financial support for this program.

P&A supports full funding for the North Dakota Brain Injury Network. The proposed significant cut in this program, which already has a limited staff of 3 persons, would drastically reduce services provided across the state of North Dakota. Services provided through the North Dakota Brain Injury Network that involve outreach, education and collaboration are not individual specific services and would not be reimbursable through the 1915(i). While the efforts to increase services for individuals with brain injury through the 1915(i) are greatly appreciated, there remains much work to be done beyond this. The knowledge base and services provided by the North Dakota Brain Injury Network are essential for individuals with brain injuries and family members throughout our state. In addition, P&A supports full funding for the facilitation of the ND Brain Injury Advisory Council by the Consensus Council. The work of the Advisory Council is vast and complex. The particularly skilled facilitation provided for meetings with members across the state, along with sub-committees, has been important in assisting the Council to meet targeted goals to best serve individuals with brain injuries and family members.

I am glad to answer any questions.

Denise Harvey, Director of Program Services
Protection & Advocacy

Greater North Dakota Chamber
HB 1012
Senate Appropriations Committee
March 9th, 2021

Mr. Chairman and members of the Senate Appropriations Committee, my name is Arik Spencer, President and CEO of the Greater North Dakota Chamber (GNDC). GNDC is North Dakota's largest statewide business advocacy organization. We stand in support of House Bill 1012, first for continued funding of Medicaid Expansion and second, continued funding at current rates.

The ongoing and steep rise of health insurance costs is of paramount concern to North Dakota's business community. Without continued funding of Medicaid expansion at current rates, Healthcare providers may be forced to shift the cost of care to others, which will have the net effect of increasing health insurance costs, because those with health insurance, in effect, pay for the financial loss hospitals incur when they provide services at a loss and to those without insurance.

Additionally, Medicaid Expansion provides workers, who otherwise would have no health insurance, options which are critical to maintaining a strong and healthy workforce in many industries.

Finally, as North Dakota employers seek to recruit and retain workers increased health insurance costs will only serve to put North Dakota employers at a disadvantage relative to other states.

In conclusion I ask that HB 1012 receive a do pass recommendation with continued funding for Medicaid Expansion at current rates and I will stand for any questions the committee has.

PRAIRIE HARVEST
MENTAL HEALTH
930 N. 3rd St., Grand Forks, ND 58203-2408

March 3, 2021

To: Chairman Ray Holmberg and Members of the Senate Appropriations Committee

HB: 1012 – In Opposition

Good day:

I am Debra Johnson, CEO of Prairie Harvest Mental Health in Grand Forks. Thank you for your work and support of programs that affect our most vulnerable adults – those with serious mental illness. Today I will provide testimony that indicates why Prairie Harvest Mental Health is in opposition to HB1012 which if approved as it stands now will put the safety and wellbeing of consumers who are at risk of losing vital housing and services that support them on their mental health recovery journey.

Prairie Harvest Mental Health provides Therapeutic Services as well as Supported Residential Services under a contract with Northeast Human Service Center.

Since our inception in 1991 Prairie Harvest Mental Health has worked in a unique and successful partnership with Northeast Human Service Center. This structure has allowed us to focus on our respective strengths. Northeast Human Service Center provides the treatment services and along with Prairie Harvest Mental Health in a team approach with the consumer Therapeutic Services as well as Supported Residential Services are delivered in a recovery based, consumer focused manner.

Over the years Prairie Harvest Mental Health has raised over $4 million in grants to build 42 units of permanent supportive housing all at varying levels of support (see attached Exhibit A). These properties were grant funded and currently have zero debt. Development was accomplished by working with Northeast Human Service Center to provide long-term supportive services so that consumers who need long-term support are able to live in an environment that suits their sometimes complex needs. In addition to the bricks and mortar raised to build the Prairie Harvest Mental Health Permanent Supportive Housing revenues are generated in the form of rents (paid by vouchers) to pay the utilities and maintenance as well as funds to replace needed capital expenses (roof, furnace, etc.). There are no remaining funds for programming needs.

The State Contract has historically contracted for the therapeutic needs by establishing a daily rate (Exhibit A).

Our partnership with Northeast Human Service Center has allowed consumers to remain in the community which is, of course healthier as well as cost effective. Our data indicates for example that one young man prior to receiving Prairie Harvest services experienced 193 days in institutional care. He lived in Prairie Harvest Housing beginning in 2004. The Prairie Harvest permanent supportive housing enabled him to work on his recovery, resulting in his hospitalization days decreasing to 46 in 2009, two in 2010 and he has not been in the hospital since. He currently lives and works in the community with minimal staff contact (just brief medication monitoring assistance).

In addition to the Therapeutic Services and Supported Residential Services, Prairie Harvest Mental Health provides:

- Representative Payee (63 consumers) (No State funds)
- Life Skills/Job Development (40 consumers) (No State funds)

Also included in Exhibit A are the costs associated with institutional care, transitional housing and crisis care, as well as the Supportive Services and Therapeutic Services provided by Prairie Harvest Mental Health.

Working with consumers on a daily basis has given us insight of their on-going needs.

During the COVID pandemic Prairie Harvest Mental Health has worked tirelessly to keep the consumers safe and healthy. We implemented policies related to PPE and other precautions immediately. Mask mandates and limited visits from others was required. As a result, we only had two positive individuals with no symptoms and one who was hospitalized and later recovered. Our staff implemented programs and services over Zoom to help keep consumers busy and connected as they work on their recovery journey. Staff helped keep them connected to family and friends using Zoom and Facetime and established telehealth procedures. As this document is being written Prairie Harvest Mental Health consumers and staff have received vaccines. Prairie Harvest Mental Health services are vital to continued success in living in a least restrictive yet supportive environment.

The following is a summary of the recommendation of the Department of Human Services Behavioral Health Department as well as the House Appropriations Human Resource Committee.

In the chart prepared by the Behavioral Health Department and approved by the Human Resources Legislative Appropriations Committee you will note that the Prairie Harvest Mental Health budget reduction is $1,061,100 and an ending contract available for the provider of $1,644, 260. This reduction was made in response to the approval of the 1915(i) Amendment to the State Medicaid Plan. Note that the 1915(i) does not support Therapeutic Services.

Department of Human Services
1915I Contracts reduced in the Executive Budget Request
2021-2023 Biennium

Division	Description	Executive Budget Request Savings	Notes	Remaining Contract Total for Provider	Actual House Restoration	Total Reduction by contract with House Changes

Total DHS Savings Plan		**(4,856,224)**		**5,389,841**	**2,181,271**	**(2,674,953)**

Following the actions taken in the House further analysis allowed Prairie Harvest Mental Health Management to conclude the following:

(1) In the 2019/2021 budget our services are categorized as

a. $1,357,200 Supported Residential

and

b. $1,395,336 Therapeutic Services

$2,752,536 Total Provider Contract

When the Behavioral Health Department calculated the Prairie Harvest Mental Health budget reduction, they used the full $2,752,536.

To properly calculate that budget reduction, they should have used the Supported Residential Services portion amount of $1,357,200. Therapeutic Services of $1,395,336 are not funded by 1915(i).

In this case the budget reduction to Prairie Harvest Mental Health contracted services would be $339,250 (if using 50%) and the total available in the provider contract would be $2,413,286 for 2021/2023.

(2) When the 1915(i) Amendments were considered Prairie Harvest Mental Health was grouped in with Housing First Providers (LaGrave, Cooper House, etc.).

The Prairie Harvest Mental Health services greatly differ in that we operate under the SAMHSA Permanent Supportive Housing Model as well as our array of services available under the Supported Residential Program.

Because we believe our forecasted contract was calculated using incorrect data, I am requesting that if providers are not fully restored that the Prairie Harvest Mental Health calculation is re-visited and corrected.

Prairie Harvest Mental Health is committed to developing the systems necessary to implement 1915(i) and are currently in the application stage as well as attending the on-line trainings as they become available. We are also utilizing technical assistance from the 1915(i) team at the State.

Prairie Harvest Mental Health has a stable supportive Board of Directors and staff. We advocate for individuals living in the least restrictive housing of their choice.

Following are letters of support from family members, consumers, and professionals.

In closing, I am not only the Chief Executive Officer of Prairie Harvest Mental Health, I am also a daughter, sister and mom to people with behavioral health concerns. My late Mom struggled her entire life with schizoaffective disorder and chronic anxiety. Because services such as those provided by Prairie Harvest Mental Health were not available to help, my Mom lived in a nursing home for 12 years beginning when she was 69 years old. I am asking you to help us remain a source of support for those who have long been underserved or overlooked. My true calling is advocacy. The end goal for this advocacy effort is that those we currently serve continue to learn, grow, and recover and that the services are uninterrupted.

A Participating Agency

Exhibit B

January 22, 20221

To whom it may concern,

I would like to express my support for Prairie Harvest Mental Health and the work that they perform in the city of Grand Forks. There is no doubt that the commitment Prairie Harvest Mental Health has shown to our community has improved the lives of many of our citizens suffering from mental illness. The support and services provided by Prairie Harvest Mental Health to the persons they serve is an integral part of the Grand Forks network of support service entities. Furthermore, their services have likely reduced expenses to other entities, such as the shelters, jails, and hospitals.

I have recently learned that Prairie Harvest Mental Health is facing a potential State budget cut of $1,414,800 in the 2021/2023 biennium. It is my understanding that the Department of Human Services believes these cuts could be re-couped through the yet to be finalized Medicaid 1915(i) amendment. Aside from the uncertainty of the 1915(i) amendment, reimbursement under this proposal would require Prairie Harvest Mental Health staff to set up an insurance billing procedure, receive training, and begin the Medicaid billing process. These endeavors take time to accomplish and a temporary loss in funding could vastly impact the services provided by Prairie Harvest Mental Health.

Due to the potential temporary loss in funding and the necessary services provided by Prairie Harvest Mental Health, I would respectfully request restoration of the full $1,414,800 to the 2021/2023 biennium budget to be allocated for their continued efforts. Your continued support, will ensure that the citizens of Grand Forks can continue to depend on them as an important resource and partner. I have no doubt that they have positively impacted the lives of community members and enriched the community as a whole through their efforts.

Sincerely,

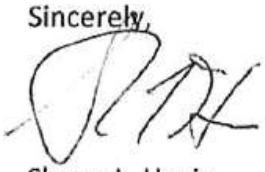
J. Moe #301

Jeremy Moe

Prairie Harvest Board Member

January 22, 2021

Debra Johnson
Prairie Harvest Mental Health
930 N 3RD ST
Grand Forks, ND 58203



Dear Ms. Johnson,

It has been brought to my attention that Prairie Harvest Mental Health is facing a potential State budget cut of $1,414,800 in the 2021/2023 biennium. The Department of Human Services believes that the organization can re-coup this amount from Medicaid under the newly approved 1915(i) amendment.

Prairie Harvest has been providing permanent supportive housing and recovery-based services in Grand Forks since 1992 in a successful public/private partnership with Northeast Human Services. I am very concerned that if these funds are cut many individuals with mental illness will not receive adequate services that enable them to live in permanent supportive housing and/or receive services that allow them to work on their mental health wellness and recovery. This would create a situation where the consumers you serve end up in a more restrictive setting such as in jail, shelters, long term care, etc..

I would like you to ask on my behalf, that the State consider restoring the $1,414,800 back into the budget for 2021/2023.

Sincerely,

Shaun L. Havis

January 26, 2021

Debra Johnson, CEO
Prairie Harvest Mental Health
930 North 3rd Street
Grand Forks, ND 58203

Dear Ms. Johnson:

The City of Grand Forks is home to many agencies that provide innumerable vital services to our community and its residents. Prairie Harvest Mental Health is one of these agencies and, as is the case throughout the state, the work of these agencies has a daily positive impact on the health and wellbeing of our citizens.

At their meeting on January 25, 2021, Grand Forks' City Council expressed their opposition to DHS budget cuts that would endanger your agency and clients. The proposed cuts to the Department of Health and Human Services budget for the 2021/23 biennium have the potential to do serious damage to your agency and the clients you serve. While the 1915(a) amendment is *expected* to provide a welcome source of additional Medicaid funding, there are still many unknowns associated with rolling this out.

Given the recent loss of Lutheran Social Services and the ongoing impacts of Covid-19, now is not the time to put to North Dakota's network of service providers at further risk. While we understand the budgetary challenges that are present to the State of North Dakota at this time, the Grand Forks City Council feels that eliminating DHS funding at this time would be premature.

We are proud of the long and successful partnership that has grown between the City of Grand Forks and Prairie Harvest. Permanent supportive housing providers are a key component of our continuum of care and an essential element of our community. The work that you and similar agencies do is invaluable. Please accept this letter on behalf of the Grand Forks City Council as support for you and your work.

Respectfully,

Brandon Bochenski
Mayor of Grand Forks

High Plains
Fair Housing Center

January 25, 2021

To whom it may concern,

It is my understanding that Prairie Harvest Mental Health is facing a potential State budget cut of $1,414,800 in the 2021/2023 biennium. At this time of public health crisis when social distancing and health protocols are exacerbating people's mental illnesses - this budget cut will negatively impact Grand Forks and likely result in many people with mental illness losing their homes.

In 2016, an estimated 17% of adults aged 18 and older in North Dakota (about 99,199 people) met the criteria for any mental illness. A total of 4.0% of North Dakota adults aged 18 or over (about 23,454 people) in 2016 had a serious mental illness (SMI) in the past year (ND Behavioral Health Systems Study, 2018 pg. 15).

Recently, High Plains began to notice an increase in calls from people who were in the process of being evicted or were evicted as a direct result of behaviors related to their disabilities, in particular mental illness. Many of these clients became homeless. In response to these concerns, High Plains completed a series of housing discrimination testing based on mental disabilities, in particular mental illness. The results of the study showed 25% instances of discrimination based on mental illness. Furthermore, a statewide survey of mental health practitioners revealed that 57% of their clients experienced housing discrimination.

Prairie Harvest Mental Health has absolutely improved the quality of life of the Grand Forks by providing housing, counseling and support services to persons with mental illness. Especially during this pandemic, we need Prairie Harvest's services in our community to remain fully funded or we may end up with a new public health crisis.

Sincerely,

Michelle Rydz

Debra Johnson, CEO
Prairie Harvest Mental Health
930 North Third Street
Grand Forks, ND 58203-2408

Dear Deb:

As I understand it, the proposed DHS budget for the 21-23 biennium includes a cut of $1,414,800 to your contract. While it is suggested that this amount can be recouped from Medicaid through the 1915(i), this is really an unknown as the 1915(i) is not yet being implemented in ND. I'm further concerned that this means it is expected that individuals you serve must be on Medicaid and additionally eligible for services through the 1915(i); that individuals not on Medicaid and otherwise eligible for the 1915(i) will not be able to access services through you without another funding source.

Your organization is essential to the types of Home and Community-Based Services (HCBS) needed in ND, including the provision of permanent supportive housing and recovery-based services. Without these services, individuals will be at a greater risk for institutionalization.

Please consider this is a letter of support for Prairie Harvest Mental Health. State funding for Prairie Harvest Mental Health should not be cut. ND is trying to expand HCBS to try to meet the needs of individuals with behavioral health issues... not cut them.

Sincerely,

Teresa Larsen

January 12, 2021

To Whom It May Concern,

I am writing to express my support for Prairie Harvest Mental Health and the positive impact it has on my brother and my family. My brother has been a client and resident of PHMH for 4 1/2 years and in this time has he greatly improved his mental and physical health.

For 43 years he had lived with our mother in Minot, ND. With age and illness, she became unable to care for him. I took guardianship of him and moved him to Grand Forks in 2016. He moved into Siewert Plains, a group home operated by PHMH that has 24-hour staff. As with the majority of people with mental health illnesses, counseling and the adjustment of medication is an ongoing process. The staff at SP are able to monitor and address any changes that they see in his behavior before it becomes a larger issue. It is a great feeling knowing that he is under such great care in a positive, healthy environment and that he has someone there for him at all times.

PHMH has also provided a social outlet for my brother that he never had before. He enjoys his groups and social activities, such as cooking, games, exercise, and other activities. He has developed social interaction skills that he has never had. All of this has had an amazing impact on the mental health of my brother.

Prairie Harvest has been the perfect fit for my brother and I can't imagine what we would do without the support and care that they provide. My brother is as mentally healthy as he has ever been and has grown so much from the support that PHMH provides.

Sincerely,

Les Moore

Re: Support for Harvest Home in Grand Forks, North Dakota

Date: January 13, 2021

Our family offers our heartfelt support for and thanks to the staff and administrators of Harvest Home in Grand Forks North Dakota where Gene Pelton , our brother and son, has been a client/resident for 15+ years. Without the safety and compassion shown to him, Gene would have been a street person many years ago and may not have survived.

Gene, diagnosed as having paranoid schizophrenia ,relies on medication to stabilize his medical condition; and the staff has monitored his medication which Gene proved not be able to do on his own. This truly has saved his life.

We are impressed that Gene has been taught to take responsibility for his own apartment keeping it clean and orderly. The staff provides support for off-campus needs such as transporting him to medical appointments, grocery shopping and occasional recreational activities.

This safe environment offers companionship when it is desired while providing the privacy dictated by his illness. Gene loves living at Harvest Homes and says often, " This is my home." He enjoys visit with us but is always ready to "get back to my home" .

Our family is so grateful that the state of North Dakota has developed and funded this forward thinking place for adults with mental illness. The caring staff provides a perfect balance of providing support and encouraging appropriate independence. Please continue the fund this life saving concept, safe and facility.

Respectively submitted,

Guardians: Dawn Pelton Malene
Ray Pelton

Sara Vogel's' story:

Hi, my name is Sara Vogel and I live at Siewert Plains. I have been here for over 5 years. Prairie Harvest has helped me to reach my goals and become a better person. I have more confidence in myself then I did before I came here. My mental illness was horrible. Before I came here, I was using drugs, alcohol, hanging out with the wrong people. I was also manic. My symptoms got worse and I could not cope with the stress of my life. It got better for me when I got into Prairie Harvest and got on the right medicine, started attending groups, learned how to cope with stress and how to socialize. I have made a lot of friends through Prairie Harvest. Now that I feel better and able to cope with stress, I am looking for a job with my job coach and would like to get my own place. I would like to thank the staff and nurse at Prairie Harvest for everything that they have done for me.

1/13/21

David Hird
675 N 43RD ST #103
Grand Forks, ND 58203

To Whom it may concern:
PHMH means care for mental illness. My vital medication is given to me and for me.
PHMH means staff support and peer support. for me.
Staff are both friendly and professional. I make connections with peers.
PHMH means security for me. I live in a safe place in and environment that is far better than anywhere else I formerly lived.

PHMK means that my daily needs are taken care of. My mother always asked what I had on the meal plan and she marvels at the variety of the things I eat.

PHMH means improvement in many types of living needs. The groups contribute to many facets of my life. From hypothermia to core-values I get patient education.

Sincerely,
Shavid Hird

I like having Prairie Harvest to lead me during difficult times. I like having hellos and they always find a way to make you feel at home. I like it here at the Lodge and the support it shows me. Prairie Harvest is always involved and helpful.

Thank you,
Danny O.

Kelly – **wishes to remain anonymous**

I just got out of jail. I was in for mental health related reasons. Next, I went to the state hospital in Jamestown, ND. I was there for 8 months and was basically homeless and mentally distraught. Deeply distraught. I was afraid and homeless. My psychologist promised he would let me stay at the hospital until I was safe. The people I worked with at the hospital had never heard of PHMH in Grand Forks, and so, I was the first patient to get a tour of Prairie Harvest facilities.

There was a work sight permanent housing opportunity and programs to help with medication, help getting into school, and hundreds of other clients in my same position, mentally. I liked it. I met with Prairie Harvest staff and they invited me to be a client. I ended up in the Lodge Program, which is permanent housing for clients where we govern most of our own lifestyle without too much interference from staff.

Since I've been with Prairie Harvest, I've gone to college and worked steady for the entire time I've been here. I'm on my medication everyday and feeling much healthier. I made a ton of friends. I quit smoking, drinking, and using drugs for almost 16 years. I've been honored with being made Prairie Harvest client of the year as well as CCL Lodge Member of the Year, which is an award given to one person in the entire Lodge Program nation wide.

My family is so relieved that I'm getting the help from Prairie Harvest staff. They have a person to help me in any cat3egory of help I may need. I'll probably stay a client for the rest of my life. I pray that other with mental health problems are as lucky as I've been to find a place like this.

Mission Statement

We promote independence and an enhanced quality of life for adults with serious mental illness.

PRAIRIE HARVEST
MENTAL HEALTH

Vision

Prairie Harvest Mental Health envisions people with serious mental illness living free from stigma and fully integrated into our community.

Values

Service: Serving people with serious mental illness is our highest value.

Dignity: We treat everyone we serve and each other with courtesy, compassion and respect.

Recovery: We focus on individuals maximizing their fullest potential.

Competence: We strive for excellence and effectiveness in all that we do.

Education: We educate ourselves and the community which decreases stigma and enhances community awareness.

Health: We believe there is no health without mental health.

Parity: We believe that health insurance plans should cover mental health at levels that are equal to any other medical benefits.

Prairie Harvest Mental Health

Who are We?

- A private non-profit organization classified as a 501 (C)(3) by the Internal Revenue Service;
- Concerned citizens serving on a volunteer board of directors;
- Community volunteers;
- Advocates, family and friends of clients;
- Clients;
- Paid Staff

What Do We Do?

Prairie Harvest Mental Health provides community and facility based services to vulnerable adults. Quality of life is greatly enhanced through improved living environment, access to services and programs and the opportunity for employment.

What Are Our Goals?

- To help improve the quality of life for clients;
- To expand housing choices;
- To increase employment opportunities;
- To incorporate peer-support in agency programming;
- To educate the public to a better understanding and acceptance of mental illness and other forms of human needs;
- To reduce stigma for individuals with serious mental illness;
- To encourage community involvement and support for community based programs;
- To develop financial resources to enhance and expand Prairie Harvest Mental Health and its activities;
- To expand delivery to rural communities.

Prairie Harvest Mental Health Programs For Adults with Serious Mental Illness

Community Based Services:

- Supported Residential Program
- Extended Services Program
- Representative Payee
- Life Skills
- Job Development

Facility Based Services:

- Harvest Homes - 12 apartment complex
- Prairie Lodge - Peer-supported 6 bedroom house
- Harvest Lodge - Peer-supported 6 bedroom house.
- Siewert Plains - 8 bedroom 24-hour support house
- Stern Place - 9 apartment complex
- Singe Family Dwelling

One out of five families is affected with mental illness.

Community Based Services

Supported Residential

Daily Living Activities

Under the guidance of Direct Care Workers, clients learn skills that lead to independent living which include:

- Housekeeping
- Laundry
- Hygiene
- Grooming
- Grocery Shopping
- Meal Planning
- Nutrition
- Budgeting

Housing and Subsidies

Direct Care Workers provide assistance to clients in locating independent housing and applying for: Supplemental Security Income, Social Security Disability Income, Medical Assistance, Food Stamps and Fuel Assistance.

In addition, clients are assisted through subsidizing their rental and security deposits until housing assistance is received. Subsidies are also available for utility deposits and grocery allotments to get them on their feet. Through our Home Place Thrift Store, clients receive basic household items to furnish their apartments.

Financial Management: Representative Payee

Upon approval from the Social Security Administration, Prairie Harvest Mental Health provides Representative Payee services to individuals who are unable to manage his or her Social Security benefits. Prairie Harvest Mental Health helps ensure benefits are first used for the basic needs of the individual, providing the beneficiary with a more stable living environment.

Supported Residential - continued

Loan Fund

Clients are eligible to obtain interest free loans to obtain items such as medications, furniture, telephones, DVD players and televisions. Clients make regular payments based on their incomes.

Medication Management

We offer two medication monitoring programs:

1. Under the self administered medication program, a Prairie Harvest Mental Health nurse is available on a weekly basis, or as needed, to review, update and educate clients about medications and medical issues or questions.
2. For those needing closer supervision, a Prairie Harvest Mental Health nurse oversees certified Medication Monitors who go into the client's home up to two times a day to observe that medications are taken correctly and in compliance.

3. Medical Guidance

Prairie Harvest Mental Health nurse assists clients with any medical concerns they have;

- Notifies the appropriate medical staff;
- Schedules appointments;
- Arranges for annual physical, dental and vision exams;
- Compiles medical histories for clients;
- Maintains emergency data forms.

Socialization Activities

Socialization is encouraged through a variety of activities designed for our clients. Coordination and transportation are provided for clients.

- Birthday Club
- Recreational Activities
- Y Family Center - reduced rates
- Peace of Mind

Extended Services

Why is Extended Services Needed?

Extended Services is based on the premise that work should be accessible to everyone, regardless of disability. It offers a vocational solution for many individuals who were, in the past, considered unemployable. Extended Services is a concept that allows all persons with disabilities to work in the community and to ensure that the employer and the employee receive the assistance and support necessary for this to happen.

How Does Extended Services Work?

Extended Services match competent workers with available jobs in the community. Services include a careful matching of worker abilities and interests with specific job requirements. Specialized training is provided to the new employee at the job site by an Employment Training Specialist and follow-up services are available for as long as the worker is employed.

Who Will Benefit From Extended Services?

Employers:

- Will gain a conscientious, punctual, competent worker, receive free screening and training of supported employment workers, receive an opportunity for tax incentives, and reach equal opportunity affirmative action goals and positive public image.

Employees:

- Will gain increased self-esteem and a sense of fulfillment, structure to their daily lives, greater financial security, and have increased involvement in the community.

Who Will Benefit From Extended Services?

Our Community:

- Will have tax dollars redirected to independence and productivity., enhance rights and roles of all people, and expand the number of people looking for entry level positions.

What Does Extended Services Involve?

Job Placement – Qualified individuals are assisted in locating available jobs in the community. Many factors are considered when an individual is matched to a position such as: job duties, job locations and work hours, transportation available to the worker, worker's skills and interests, employer expectations.

Job Training – There is no cost to the company. If needed an Employment Training Specialist provides the new employee with one-on-one training and support at the job site. This on-site assistance is reduced as the employee becomes proficient in completing the job to company standards.

Ongoing Support – The employee's work performance is monitored by the Employment Training Specialist for as long as the individual is employed. Additional training or support, if needed, will be provided at any time.

Life Skills

What is Life Skills?

Life Skills promotes a well-balanced and healthy lifestyle to clients who would be homeless without services by:

- Teaching individuals how to care for their immediate needs,
- Preparing individuals to care for themselves on a long-term basis,
- Encouraging individuals to remain active through participation in various activities and hobbies, and
- Educating individuals, as well as the community, about mental illness.

How Does The Life Skills Program Work?

Prairie Harvest Mental Health clients are referred to the Life Skills Coordinator for Life Skills. Once individuals are referred, the Coordinator determines what assessments need to take place. Based upon those assessments, the Coordinator plans a program with the help of the client. For example, the client and Coordinator might conclude that they need to work on their laundry skills as well as developing a hobby. That client's program would focus on those needs.

Life Skills

Household Chores	Meal Planning	Meal Preparation
Grocery Shopping	Hygiene	Transportation Training
Budgeting	Laundry	Emergency Preparedness
Organization	Scheduling	Social Skills
Safety Training	Health Training	Medication Training
Hobbies	Recreation	Socialization Activities

Skill Groups

Leisure Club	Health & Wellness Group	Exercise Group
Walking Group	Road to Healthy Living Group	

Wellness Club

With health and wellness the primary focus, clients participate by earning points for healthy choices. Points are redeemed at the 'Wellness Store' for merchandise.

Job Development

What is Job Development?

Job Development provides a range of services to the community and clients who, without services would become homeless. This range of service includes: service coordination, client assessment, service monitoring and employment education to clients, businesses and the general public.

The Job Developer will work on expanding job opportunities in the community as well as providing participants with skill building activities so they can return to work. The Job Developer helps work on changing society attitudes about hiring people with disabilities as well as to work with participants in changing their perceptions about working. Social benefits that go along with work are: a reason to get up in the morning, respect from co-workers, improved self-esteem, to name a few. The Job Developer helps educate the community business leaders and citizens about the potential people with mental illness have in working in competitive jobs.

The Job Developer:

1. Provides an assessment of each client in the following areas: need to work, interest in working, ability to work and type of work that the client is interested in doing.
2. Establishes relationships with community employers.
3. Provides direction and assistance to participants in obtaining jobs with livable wages and benefits.
4. Helps to identify, secure and supervise potential work contracts for work teams.
5. Works to create better paying jobs with the opportunity for advancement for participants.
6. Conducts individual and group training sessions on various work related skills such as: Job Searching Skills, Interviewing, Resume Writing, Co-worker Relationships, Appropriate Hygiene and Clothing for Work, Accepting Change in Schedules, SSI and SSDI Benefits.

Employment Groups

- Pathways to Wellness
- Lodge Job Club

Facility Based Services

Harvest Homes

This 24-hour staffed facility is an important addition to the continuum of care for individuals with mental illness. It bridges the gap between living independently in one's own apartment and group home living.

Harvest Homes consists of twelve one bedroom apartments, where one is an accessible dwelling unit.

Facility includes a common area kitchen and recreation room, where meals and socialization can be shared by residents.

Supportive services are provided through the partnership with Prairie Harvest Mental Health and Northeast Human Service Center. Referrals to the facility are through the case management system at Northeast Human Service Center. The services provided are designed to enhance and maintain the individual's level of independence, while improving their quality of life.

These services include:

- Case Management
- Crisis Management
- Nursing
- Medication Monitoring
- Daily Living Activities
- Socialization Opportunities
- Community Involvement
- Employment Groups
- Skill Groups

Opened in1997

Lodge

What is a LODGE?

A Lodge is an affordable dwelling for 6 people who share in running the home, including domestic chores and the purchase and preparation of food. The residents make their own house rules and manage their own activities. In addition, they are employed at a business run by their sponsoring agency, in this case, Prairie Harvest Mental Health. The work is part-time or full-time and organized so that one member can readily substitute for another whenever necessary.

The Lodge program at Prairie Harvest Mental Health is designed to follow the Fairweather Lodge Model. This is a national model developed by Dr. George Fairweather for adults with persistent mental illness. This model is currently implemented in 10 states, including North Dakota. The primary philosophy driving this model is that people that live together and work together can more easily recover and find stability for the long term.

What is a Prairie Harvest Mental Health Lodge like?

Prairie Harvest Mental Health supervises two Lodges in Grand Forks: Prairie Lodge and Harvest Lodge. Each Lodge has the capacity to accommodate 6 individuals in private bedrooms. The Lodge resembles a healthy family, with each member contributing to the maintenance and care of the house and of each other. Staff presences at the Lodge is very minimal. Their role is mainly to mentor, advise, mediate and help out in emergencies.

Prairie Lodge

Opened in 2000

Lodge - continued

How do I refer someone to the Prairie Harvest Mental Health Lodge Program?

Prairie Harvest Mental Health currently contracts with Northeast Human Service Center, located in Grand Forks, North Dakota. All referrals must come through Northeast Human Service Center. For more information on **Northeast Human Service Center,** call **701-795-3000.**

Groups:

- Job Club
- Exercise Group
- Other Groups as needed

Harvest Lodge

Opened In 2001

Siewert Plains

An 8-bed permanent living facility for adults with serious mental illness, Siewert Plains opened in May of 2008. In an effort to bridge the gap between transitional and permanent living, Siewert Plains offers 24-hour support along with educational groups and trainings to augment Prairie Harvest Mental Health's supportive services.

These services include:

- Case Management
- Crisis Management
- Nursing
- Medication Monitoring
- Daily Living Activities
- Socialization Opportunities
- Community Involvement
- Employment Groups
- Skill Groups

Opened in 2008

Stern Place Apartments

Stern Place has been made available through an Economic Stimulus grant through our local Grand Forks Urban Development. Stern Place augments the Grand Forks communities permanent supportive housing with the addition of 9 self-contained apartments. This complex opened March 2012

Supportive services are available on a limited basis. A nurse assures all tenants receive medications in the mornings. Additional staff work four hour shifts from 4:30—7:30 PM. Monday through Friday. Medication monitors ensure medications are taken twice daily over the weekends. Case Management is provided through Northeast Human Service Center. Limited staff support provided through Prairie Harvest Mental Health, includes Life Skills, Job Development and Case Assistance.

Stern Place is suited for independent individuals. With limited support services and staff presence, tenants need to be capable of supporting themselves. Expectations include: independence with self-care, housekeeping, cooking and laundry.

Opened in 2012

Single Family Dwelling

This residence houses one to two people, providing another choice for individuals with serious mental illness who prefer independent community living. All supportive services are available to tenants in this home.

Purchased in 1999

Work Opportunities

Prairie Harvest Mental Health believes that everyone deserves the opportunity to work in competitive employment and to be paid fair wages. Prairie Harvest Mental Health and the Home Place Corporation have various positions for people with disabilities.

Home Place Thrift Store

Clerking, sorting and custodial positions in a retail setting provide opportunities for learning the skills necessary for similar positions in the community.

Community Support

Prairie Harvest Mental Health provides one-on-one support to individuals with serious mental illness to help them succeed in the competitive employment field. Services are individualized and focus on the skills areas needed to strengthen work related activities.

Rag Contract

Prairie Harvest Mental Health cuts clothing into rags to sell to community and state agencies. State agencies can now order goods and services directly from work activity centers. The rags are cotton or cotton blend. We get out of style, stained, or overstock clothing from the Home Place Thrift Store to cut into rags. The rags are sold in 50 pound lots or as requested by customer.

Cleaning Contract

Prairie Harvest Mental Health provides cleaning services at Augustana Lutheran Church.

The Home Place Thrift Store

The Home Place Thrift Store is a division of Prairie Harvest Mental Health, a business in the Grand Forks community. The Home Place Thrift Store exists to provide customers with affordable goods and clothing and to provide resources to Prairie Harvest Mental Health.

The Home Place Thrift Store provides a great shopping experience for any member of the family.

You will find something for everyone at the "Home Place", located at **1811 S. Washington in the Town & Country Mall**. Clothing, furniture, household items and a variety of miscellaneous items make shopping fun at the Home Place. New or like new items at low prices. Affordable shopping for everyone.

Donations are always appreciated. All donations are tax deductible, stay in the community and benefit individuals in the Grand Forks community. The Home Place Thrift Store picks up donations of clothes, furniture, working appliances, computer equipment less than 3 years old, books, household items, etc. at no cost. Also accept ripped, stained or torn cotton/cotton blend clothing for the Prairie Harvest Mental Health work program.

Due to the COVID-19 pandemic, all donations are accepted during business hours. Place your boxed or bagged donations in the back of The Home Place truck parked in front of the store. Accepting furniture donations, please call 701-795-9143 to schedule time to drop off donation.

The Home Place is in need of volunteers to work in the thrift store. Volunteering provides an excellent opportunity to give back to the Grand Forks community. Any time you can give is appreciated.

Thrift Store Hours

Monday - Friday: 10:00 AM—6:00 PM

Saturday: 10:00 AM - 5:00 PM

Sunday: Closed

Board of Directors

Nicole Amsbaugh, MPAS, PA-C - Grand Forks, ND

Client Advisory Board

The Client Advisory Board is a client run entity with a Prairie Harvest Mental Health staff coordinator that reports directly to the Prairie Harvest Mental Health Board of Directors about the needs and wishes of the clients. It will be a way for the voice of the client to be heard as well as a way to better involve Prairie Harvest Mental Health clients in the workings and activities of Prairie Harvest Mental Health. The Client Advisory Board representatives will consist of 1 representative from Harvest Homes, 1 representative from Stern Place, 1 representative from Siewert Plains, 2 representatives from Supported Residential, 1 representative from Prairie Lodge and 1 representative from Harvest Lodge. Meetings will be held on the last Tuesday of the month.

Updated 7/1/2020

United Way

Testimony
House Bill 1012
Senate Appropriations
Senator Ray Holmberg, Chairman
March 9th, 2021

Chairman Holmberg, members of the Senate Appropriations Committee, I am Nancy McKenzie, outgoing Executive Director of Nexus-PATH. Nexus-PATH is a member of Nexus Family Healing, providing child welfare and behavioral health services in ND. I am here today to provide input on HB1012, specifically the Medical Services budget, relating to the equalization of Targeted Case Management (TCM) rates. My co-worker, Heather Simonich, is also providing testimony in this section, but specifically as it relates to school-based services.

We understand the Department's effort to equalize TCM rates within and across state plans. However, I speak to you today out of concern that the decision to equalize rates across all services and state plans, in a short time period, without a cost-based rate-setting process, has tremendous impact on delivery of care. I am referring to targeted case management within treatment foster care, which we provide statewide for youth who need more intensive services.

Treatment foster care is funded by a maintenance rate, with funding that flows through the Child & Family Services Division, and a targeted case management (TCM) rate billed to Medicaid. Roughly 15 years ago, when North Dakota worked to actively leverage more federal funding, those costs of treatment foster care that were eligible for Medicaid funding were shifted to the TCM "bucket" (about 30% of costs); other costs remained in the maintenance "bucket" (making up the remaining 70%.

The two together resulted in the established funding for treatment foster care. Since then, inflationary increases as legislatively allocated have been provided. Formal cost-based rate-setting has not been undertaken.

In mid-December of 2020, our agency received notification from DHS Medical Services Division that an equalization of rates was included in the Department's budget as submitted, and that equalizing all rates might have an impact on services we provide. A look at the proposed change showed a 46% reduction in the rate for our agency, to be implemented effective July 2021. Ours is a calendar year budget, and the impact of that reduction would be $773,000 for the last six months of this year alone, over $1.6 million in a 12-month period. The service is not sustainable with that reduction.

We have entered into discussions with Child & Family Services about starting a cost-based rate-setting process as it relates to the maintenance rate, as this has never been done; however, there are no clear timelines as to when this might be completed, given the need for CFS staff, DHS fiscal staff, and our agency staff to work together during the busy legislative session.

The concept of equalizing rates is not one we don't understand; however, it is not realistic to expect an agency to pivot and shift within a few months' time period to adjust to that large a loss. In addition, this comes at a time when the child welfare system is asking us to provide more intensive services in foster care, which isn't possible at a lower cost.

Nexus-PATH requests that your committee consider an amendment to HB1012 to delay implementation of the new lowered rate for a one-year period, to allow solid cost-based rate-setting to be completed for both the maintenance rate and the case management rate.

Thank you for consideration of this request; I'm happy to answer any questions you may have.

Testimony
House Bill 1012
Senate Appropriations
Senator Ray Holmberg, Chairman
March 9th, 2021

Chairman Holmberg, members of the Senate Appropriations Committee, I am Heather Simonich, Operations Director of Nexus-PATH. Nexus-PATH is a member of Nexus Family Healing, providing child welfare and behavioral health services in ND. I am here today to provide input on HB1012, specifically the Medical Services budget, relating to the equalization of Targeted Case Management (TCM) rates.

We understand the Department's effort to equalize TCM rates within and across state plans. However, as a provider charged with supporting our schools and communities with much needed community-based services now more than ever – we have significant concerns regarding the established targeted case management rate.

Recently, Nexus-PATH creatively partnered with six North Dakota school districts to deliver intensive case management services to students and their families. This is a formal partnership with a signed MOU that places a Nexus-PATH school case manager within the school building. This individual works as a member of the school team serving students with the highest needs as identified by school staff. This partnership offers school professionals and students access to an intensive service not available through traditional school supports.

The Nexus-PATH case manager serves as a bridge between school, home, and the community. An individualized care plan based on a comprehensive assessment of student and family needs and strengths guides service delivery. The case manager routinely visits the family home, assists with transportation, connects the family to services available in the community,

assists with student behavior at school, and works intensively with the student and family to build the skills necessary to overcome their challenges. Importantly, this service is provided throughout the summer and provides the family with access to a 24/7 on-call service staffed by a licensed social worker. Initial feedback from school professionals, students, and families has been overwhelmingly positive.

Currently, the cost of this service is funded by Medicaid Targeted Case Management or BCBSND billing, the school district, and various grants/donations. The cost of this service is not sustainable without a significant contribution by the school district and sustained grant funding. As a provider, it is an ongoing challenge to rely heavily on unstable grant and school funding from one year to the next. The challenges in our rural areas related to the behavioral health workforce shortage and serving clients across expansive geography necessitates a targeted case management rate be established based on true service costs. The service referenced here is an excellent example of the type of service required to meet our most vulnerable families where they are at, build trust, and begin healing while at the same time supporting our educators and improving academic success.

In closing I am reminded of Superintendent Baesler's testimony to the House Appropriations Human Services Division, *"We cannot do this alone".* These words weigh heavy on me as a service provider. I have provided you with an example of one innovative and successful private-public partnership to better meet the needs of our students and their families. North Dakota service providers can do this if provided adequate reimbursement for service. It will take all of us, and your full support, but I believe we can answer the call.

Thank you for the opportunity to testify before your committee today. I am happy to answer any questions you may have.

The individuals listed below provided permission to include their name, email, and school district (or agency) in support of this testimony and welcome any questions you may have regarding their partnership with Nexus-PATH to deliver School Case Management service.

ACS CAN Testimony in Support of North Dakota House Bill 1012
Senate Appropriations Committee

My name is Sara Mannetter and I am the Government Relations Director for American Cancer Society Cancer Action Network – North Dakota.

The American Cancer Society Cancer Action Network (ACS CAN), the nonprofit, non-partisan advocacy affiliate of the American Cancer Society advocates for public policies that reduce death and suffering from cancer including policies supporting Medicaid Expansion.

For the 4,200[i] North Dakotans who will be diagnosed with cancer in 2021, access to affordable, comprehensive care is essential to detecting, treating and surviving the disease. In North Dakota, cancer is the second leading cause of death and an estimated 1,310[ii] state residents will die from the disease this year. Preserving low-income adults and families access to affordable, comprehensive health care coverage is critical in the fight against cancer**.**

ACS CAN strongly supports continued funding for Medicaid Expansion. HB 1012, appropriates funding to the Department of Human Services, to maintain health insurance coverage for thousands of low-income North Dakotans through our state's Medicaid program.

In 2017, Governor Jack Dalrymple made the decision to extend the July 2017 sunset of the state's Medicaid Expansion Program. And Governor Doug Burgum took action that extends the program through July 2019. HB 1012 will reauthorize the program and preserve access to coverage for more than 20,000 individuals, including cancer patients, survivors and those at risk of cancer through July 31, 2023. Medicaid expansion has promoted earlier cancer detection, resulting in fewer cancer deaths and improved outcomes for patients.

- Medicaid expansion was associated with improved rates of colorectal[iii], prostate, and cervical cancer screenings.[iv]
- Individuals enrolled in Medicaid prior to their cancer diagnosis have better survival rates than those who enroll after their diagnosis.[v]
- Medicaid expansion led to an increase in both total and earlier-stage cancer diagnoses in expansion states, while the gap in diagnoses between expansion and non-expansion states widened.[vi]
- Medicaid expansion was associated with decreased cigarette and other tobacco product purchases, as well as increased access, utilization, and coverage of evidence-based smoking cessation medications.[vii]

Sara Mannetter
Sara.manatter@cancer.org
218.343.8365

American Cancer Society Cancer Action Network, Inc.
fightcancer.org/northdakota

Additionally, our state's economy, our hospitals and health systems and provider networks are stronger. In states that have fully expanded Medicaid eligibility:

- Uninsured rates have decreased, which has reduced uncompensated care costs
- Hospitals are 84 percent less likely to close[viii]
- Marketplace premiums that are about 7 percent lower than non-expansion states[ix]
- Expansion has created and protected jobs, which has increased personal incomes and state revenues

The health coverage provided through our state's Medicaid program helps to improve outcomes and reduce the burden of cancer by offering access to prevention services; timely cancer screening and early detection services; as well as affordable treatment services and care. [x,xi,xii]

Maintaining access to comprehensive and affordable health care coverage through state Medicaid programs is a matter of life and survivorship for countless low-income cancer patients, survivors and North Dakotans at risk of cancer. Preventing cancer is much less expensive than treating it and ensuring that low-income individuals and families continue have access to comprehensive, affordable health insurance coverage is one of the most critical ways that we can reduce cancer incidence and mortality and continue making progress to win the fight against cancer.

The American Cancer Society Cancer Action Network urges legislators to support continued funding for Medicaid Expansion in HB 2012.

Thank you for allowing me to submit testimony.

Sara Mannetter, ACS CAN

North Dakota Senate Appropriations Committee

Chairman Holmberg and Committee Members,

My name is Jeff Herman. I serve as the CEO of Prairie St. John's of Fargo. I am also the Chairman of the Board of Directors for the ND Hospital Association and a past member of the State Mental Health Planning Council.

Prairie St. John's offers a continuum of behavioral health care including acute inpatient hospital care, residential treatment and day hospitalization. Our patients come from throughout North Dakota. We are a part of a network of private and public providers.

I am here to ask that you support the $9 million Substance Use Disorder Voucher allocation increase recommended by the Governor in HB1012.

Through my 25+ years in behavioral health, I have come to conclude that for persons who suffer from addiction and mental illness, the best outcomes are correlated with; 1. Immediate attention when there is an openness to care on the part of the patient, 2. Care is provided at the level determined by appropriately trained professionals, and 3. A reliable method of payment for services that exist so patients are not further destabilized and that providers stay viable. No person enters our facility without all these considerations being reviewed. The level of care ranges from individual assessment to acute hospital care (as an aside we provided over $5.5 million dollars of charity care last year, a $1 million increase due to capped SUDS funding).

As you know the allocation that you made last legislative session served our citizens for only about one year of the biennium. The additional $9 million will serve to give the experience for a full biennium and provide evidence as to what is needed and what tweaks we need to make to

stabilize the programs in the next biennium. To change the program now would be making changes before useable information is available.

I also understand that NDDHS needs resources of staff to implement the voucher funding. This past year we were given 2 hours notice that there was going to be a freeze on the funding. The Department sets the criteria (ASAM criteria) to be used for treatment, it sets the process for getting patients approved for funding, then Providers absolutely felt blamed for meeting the demands of the volume of patients that needed the critical service. The full two-year investment will prevent pain and suffering for many individuals and families. The SUD program is also prudent to prevent clogging up our emergency rooms, courts, and prisons systems.

Thank you. Jeffrey A. Herman, MBA, RN

NDMA
Est.1887 NORTH DAKOTA MEDICAL ASSOCIATION

Senate Appropriations

HB 1012

March 9, 2021

Chairman Holmberg and Committee Members, I'm Courtney Koebele and I serve as executive director of the North Dakota Medical Association. The North Dakota Medical Association is the professional membership organization for North Dakota physicians, residents and medical students.

NDMA supports keeping Medicaid Expansion at current rates through a private carrier. Reducing Medicaid Expansion at this point would have a devastating effect on North Dakota's healthcare system.

As the committee knows, Medicaid Expansion is 90% funded by the federal government. Therefore, moving Medicaid Expansion in house would provide a cost savings of $10.7 million, with a loss of $85.9 million to North Dakota's healthcare systems and private providers. There is no doubt that this would have a massive impact on all providers, not just hospitals.

The 2016 allotment was particularly harsh on physicians. Physicians did not receive a 4% cut, or even a 10% cut. According to our calculations, the Department cut traditional Medicaid physician payments by 33%. With reduction of Medicaid rate and the elimination of the budgeted 3% inflationary increase, the total reduction to health care

providers was $30.5 million. The North Dakota Medical Association had serious concerns about these cuts. In short, the already small operating margins of many systems and providers were eliminated.

Medicaid expansion helped cushion the blow of these cuts. Medicaid expansion is a program that is working well for the patients and the providers. NDMA urges this committee to keep the program as it is today.

Expanding Medicaid provided the much-needed coverage to our low-income patients, improved access to care, improved the health and well-being of the newly insured, and improved the financial stability of our clinics and hospitals. Medicaid expansion is not simply a budget issue. You must also consider the real human effects of this decision, including the health and well-being of those who gain coverage under expansion. Medicaid expansion provided coverage to a population who never before had coverage – including behavioral health coverage.

Our physicians provide the safety net medical services for the most vulnerable of our population – a population of Medicaid patients who present unique, and often some of most difficult, challenges. Our Medicaid patients benefit from the services we are able to provide them – from a North Dakota health care system that is recognized nationally as a high-quality, efficient health care system. However, we have unique healthcare workforce recruitment and retention challenges occurring in our state. Our capital needs continue to grow, with aging facilities, technology and equipment. Our costs for medical

equipment, new technology and supplies continue to increase. We must pay the same rates for physicians, nurses and other health care personnel as the rest of the country.

NDMA is very concerned that going back to the trend of poor payment will not bode well for the future of health care in North Dakota. In time, the access and quality in health care enjoyed in the state will deteriorate rapidly as health care resources become increasingly scarce and health care workforce and capital needs are not met. We need to work together on all avenues that provide resources to sustain our health care system.

Physicians in North Dakota continue to do their part in providing good access to quality medical care for Medicaid beneficiaries and showing their ongoing commitment to the long-term sustainability of the Medicaid program. We look forward to working with the Committee in addressing the future needs for Medicaid medical services. Thank you for the opportunity to address this committee. I would be happy to answer any questions.

North Dakota Practicing Physicians by Specialty

Specialty - Primary Care

Of the 1695 total physicians, 34% or 581 physicians are in primary care. For this purpose, we define primary care as family medicine, internal medicine, obstetrics, and pediatrics (first self-designated specialty only).

March 9, 2021

Senate Appropriations Committee
HB 1012

CHAIRMAN HOLMBERG AND COMMITTEE MEMBERS:

My name is Jack McDonald. I'm appearing on behalf of America's Health Insurance Plans or, as it is commonly known, AHIP.

AHIP appreciates that Engrossed HB 1012 reauthorizes North Dakota's Medicaid Expansion program until 2023. As an industry, we are supportive of Medicaid Expansion Programs and Medicaid Managed Care as a mechanism to improve beneficiary outcomes while controlling costs over time. Medicaid managed care plans (MCOs) have a proven record of demonstrating value and addressing the challenges states face in caring for more complex populations.

However, we are concerned that fragmenting North Dakota's expansion population by removing 19 and 20-year-olds will be disruptive and will needlessly deprive this population of the improved beneficiary outcomes that MCOs provide.

The success of these plans has resulted in states increasingly relying on MCOs to provide care management and administrative services. Between fiscal years 2010 and 2018, Medicaid managed care plan enrollment increased by 121%. As of 2018, more than 75% of all Medicaid enrollees were enrolled in an MCO, up from about 50% in 2010.

Achieving budgetary certainty is only one aspect of Medicaid managed care. Research shows that MCOs are improving access and the overall quality of care for Medicaid enrollees. The Menges Group's recent analysis indicates that MCOs improved their performance in 26 of 30 key quality metrics between 2014 and 2018.

In addition to the overall quality improvements, MCOs have been developing innovative, cutting-edge programs that improve care delivery and benefits for enrollees.

Most significantly, regarding the 19 and 20-year-old population, managed care can be an essential tool to ensure that newly insured individuals receive the full spectrum of care they require. For example:

- Medicaid managed care plans are creating and covering telehealth programs that expand access to care and increase doctors' ability to coordinate care for patients. These solutions address rural access to care, behavioral health services, and chronic pain management.
- Medicaid managed care plans are improving the ways enrollees can access provider networks, including creating tools that allow enrollees to locate doctors more easily in their networks, view practice information, and rate their doctors.

For these reasons, we ask that you keep 19 and 20-year-olds in the Medicaid expansion population by adopting the proposed teensy-weensy amendment set out below. Thank you for your time and consideration. I would be happy to answer any questions.

PROPOSED AMENDMENTS TO ENGROSSED HOUSE BILL NO.1012

Page 10, line 22, after the word "services," delete "and coverages for individuals ages nineteen and twenty"

Renumber accordingly

Written Testimony on HB1012 relating to Substance Use Disorder Voucher 1-25-21

Chairman Holmberg and members of the Senate Appropriations Committee, for the record my name is Dave Marion and I have the great fortune of working for the Summit Prairie Recovery Center, located in rural Raleigh, North Dakota and west of the Missouri river. Summit Prairie Recovery Center is a one of kind, committed residential agency working with individuals seeking addiction and mental health services. It provides a short term, quiet, rural environment for recovery with committed staff and therapists experienced in substance use and mental health concerns.

We are in support of:

The re-instatement and full funding of the ND Substance Use Disorder Voucher Program to include acceptance of new providers and participants. The SUD Voucher Program has served as a safety net for those without health insurance or adequate resources to access addiction treatment in ND, however, funding ended in July for people seeking to enroll in the program. We receive around 10-15 calls daily from clients with Medicaid and Sanford expansion looking for intensive outpatient services and residential beds. Many of these individuals are referred to us by the physicians in the Emergency Rooms. Most of these individuals have experienced overdose and their lives are at extreme risk and are referred to us from other professionals that find lack of services for those most extreme needs. One client, who lived 60 miles from the nearest treatment professionals, reported he had no internet access due to rural location and lack of knowledge of technology and the inability to get himself sober enough to begin the learning process. How much more hostile can it get… his life was baron, no transportation or ability to obtain services, but denied by his insurance. He was alone and wanted help, unfortunately this happens so often for too many in ND. These are individuals that could be helped by the SUD Voucher system. The ND SUD Voucher is one the most important tools in serving the increasing need for North Dakotans who have a Substance use disorder. The voucher provides not only the ability of patients to obtain critical services in a timely manner, but it provides provider choice so patients can stay close to home and families. In addition, the voucher serves as a resource to keep patients out of emergency rooms, hospital beds, jails, and courts.

In recent conversations on the House side, the Dept. Of Humans services reps have used residential services as a negative thing. We have always been in support of a full continuum of care and the number of sick individuals that need this level of care and cannot access care is very large. Residential determinations are assessed by licensed clinicians and the critical need for residential care for the most critical individuals needing that level of help. My fear is that the inference of having too many residential beds will decrease even more access for individuals seeks this level of help. The amendments that came out of house human resources seem to add another layer of restrictions for all trying to seek help. It is disheartening that we would create more hurdles to get great quality services, at whatever level that is in the continuum of care. The SUD Voucher was established to address barriers to treatment and increase the ability of people to access treatment and services for substance use disorders. With one of the goals being to allow the individual to choose a provider with objectives to increase the number of providers and service options and those options communicated to individuals. Another Goal being able to improve access to quality services with objectives of SUD providers to provide evidence-based

services on an individual need, in addition to reduce financial barriers for individuals accessing needed services.

So, at the end of the day, it should always be, how we best serve individuals that need and want the help at whatever level that is. With these current amendments being considered, it does not seem that it is about serving people, rather more about restricting providers from accessing funds to help people. These amendments will be hurdles that add another layer, thus, not putting clients first.

With the ongoing pandemic that compounded, high alcoholism rates, Opioid Crisis and Meth resurgence we respectfully ask your support of reinstating the $17-million-dollar request for the voucher. Though some may see a significant budget increase, those of us who serve patients that want better and committed to changing their path know that this will save lives!

Respectfully,

Dave Marion

Testimony for HB 1012

Senate Appropriations Committee

March 10, 2021

Chairman Holmberg and members of the Senate Appropriations Committee, I am Steven Reiser, Director of Dakota Central Human Service Zone. I am also a member of the North Dakota Human Service Zone Association. Please accept this testimony in favor of HB 1012.

The counties of McLean, Mercer, Oliver and Sheridan formed a social service district in 2006 and started operating as district on January 1, 2007. The mission of the district was to provide a better service to the county residents and when possible lower costs. In 2007 Dakota Central employed 36 staff. At the end of 2019 Dakota Central employed 31 staff. There can be cost savings and efficiencies found when counties join together but it takes time. Even though caseloads have grown from 2007 Dakota Central is able to employ fewer staff. If you look at 2020 staff numbers Dakota Central is down to 25 staff because of 4 staff transferring to state employment and reducing two more staff.

Zones have done a lot in one year and are working hard to improve services and find efficiencies but there has to be financial stability to the achieve kind of improvements we all hope for.

The amendments added to the bill by the House Appropriations were positive but fall short of what is needed for zone funding. SB 2086 is the policy bill passed regarding zones. In this bill reserve fund limits were increased to $250,000 in smaller zones. I believe the intent of raising this limit from $100,000 was to allow for more decision making at the local level for administrating human service programs. Using all of the reserve funds that zones have now to replace the dollars that the zone budget is short for the last biennium will not allow for this type of close to the client decision making. If 19 zones were allowed to keep $100,000 this would amount to $1.9 million in additional spending. It would be $4.75 million for $250,000 limits.

Thank you for allowing me to testify and I would answer any questions you might have.

Re: Support of HB 1012 to fund the Cooper House in Fargo, North Dakota

Dear Chairman Holmberg and members of the Committee,

I am the Chief of Police in Fargo, North Dakota, and I am writing you today in strong support of HB 1012, which requests to provide $570,000 in funding to support continued operations of the Cooper House. As you may be aware, the Cooper House has operated in Fargo for nearly ten years, focusing as a Housing First project. In doing so, they provide housing to 42 permanent residents, as well as provide 24/7 service that includes mental health, addiction, and chronic homelessness.

The Cooper House has not only provided housing for 42 individuals who would otherwise be homeless and on the streets of Fargo, but has been an excellent public safety partner for our department to work with in addressing these issues. Their existence and service provide needed options for our department members who encounter chronically homeless individuals, and as such, create a cost savings in both time and resource spending by our department. Their professional staff assist attendants with day-to-day needs, aids them in handling conflicts, and monitors the amount of alcohol brought into the facility, with the goals of acquiring sobriety and better day-to-day functioning. The facility is a joint effort with the Dakota Foundation, the Fargo Housing Authority, the Southeast Human Service Center, Family Health, and Cass County Social Services.

I personally spoke with several of our officers who have day-to-day engagement with the Cooper House and who express the importance of this funding appropriation to ensure its continued operations. The continued support of the Cooper House not only provides necessary and needed service to our homeless community, but also reduces the cost and personnel commitment of other law enforcement interventions, which are often times less effective.

The Fargo Police Department strongly supports the $570,000 appropriation request in HB 1012 and I urge you to vote in favor of this bill. Should you have any additional questions, please feel free to contact my office.

Sincerely,

David B. Zibolski
Chief of Police

North Dakota Senate Appropriations Committee

HB 1012 – Medicaid Expansion

Pass Testimony – March 9, 2021

Testimony of Pat McKone, American Lung Association

Good afternoon,

My name is Pat Mckone. I am the Senior Director for Advocacy and Public Policy for the American Lung Association. Thank you for the opportunity to provide testimony on HB 1012, which would extend North Dakota's Medicaid expansion program until 2023.

The American Lung Association is the oldest voluntary public health association in the United States, currently representing more than 36 million Americans living with lung diseases including asthma, lung cancer and COPD, including more than 103,000 North Dakotans. The Lung Association is the leading organization working to save lives by improving lung health and preventing lung disease through research, education and advocacy.

The American Lung Association believes everyone should have access to quality and affordable health coverage. Medicaid expansion is critical for patients with and at risk for lung disease. For patients with asthma, coverage through Medicaid expansion means access to prescription drugs and visits with their doctor, both necessary to stay healthy and avoid a costly trip to the emergency department. Medicaid expansion is associated with a reduction in preventable hospitalizations, including for asthma and COPD.[i]

Access to preventive services through Medicaid expansion also ensures that people have access to services like tobacco cessation treatment and lung cancer screening at no cost. Research shows an association between Medicaid expansion and early stage cancer diagnosis, when cancer is often more treatable,[ii] as well as decreased mortality, including for lung cancer.[iii] The five-year survival for lung cancer is nearly five times greater for cases caught before the tumor spreads.[iv]

Medicaid expansion ensures that over 20,000 North Dakotans have access to quality healthcare. Medicaid expansion is also playing an important role in addressing health disparities—one recent study found that states that expanded Medicaid under the ACA reduced racial disparities in timely treatment for cancer patients.[v] Medicaid expansion is also associated with improvements in quality measures, including for asthma management, at federally qualified health centers, which are critical healthcare providers for low-income patients.[vi] Clearly, Medicaid expansion is beneficial for patients with lung disease and other serious and chronic conditions.

The Lung Association in North Dakota supports this proposed legislation and encourages North Dakota to continue Medicaid expansion, without imposing any additional barriers to coverage. Thank you for the opportunity to provide testimony.

Sincerely,

Pat McKone, Senior Director
Public Policy and Advocacy

HB 1012
NDACP Testimony
Senate Appropriations Committee
Hon. Ray Holmberg , Chairman
March 9, 2021

Chairman Holmberg and members of the Senate Appropriations Committee, greetings, and thank you for this opportunity. I am Bruce Murry, Executive Director of the North Dakota Association of Community Providers (NDACP.org). NDACP is the membership organization of 30 licensed providers of services to North Dakotans with developmental disabilities (DD). We serve about 90% of people with DD in North Dakota.

As a registered lobbyist (#330) for NDACP, I would like to introduce several board members who will give in-person, video, or written testimony from their respective areas of expertise:

Julie Erickson, CEO of Grand Forks Growth and Support Center, Grand Forks;
Scott Anderson, Program Service Director for Development Homes, Inc., Grand Forks;
Lorena Poppe, CEO of Poppy's Promise, Bismarck, NDACP Vice President;
Scott Burtsfield, CEO of Vocational Training Centers (VTC), Fargo;
Brooke Austin, CEO of Community Living Services, Fargo, who in turn will introduce at least two people currently receiving services proposed for elimination:
Jackie Krei of Fargo, and Jackie Long of Fargo;
Tom Newberger, CEO of Red River Human Services Foundation, Fargo; and
Jon Larson, CEO of Enable, Inc., Bismarck, our NDACP President.

NDACP has a relatively modest legislative platform for the 2021-2023 biennium, in recognition that uncertain times face the energy and agricultural sectors in our state.

- Maintenance of the House's restoration of approximately eleven million dollars ($11,000,000) to provider rates for residential habilitation and intermediate care facilities for people with intellectual and developmental disabilities (ICFID), but also,
  - Maintenance of the Governor's proposed two million, four hundred thousand dollar increase ($2,400,000) to day support services such as individual employment, group employment, and prevocational services, with a matching reduction to Intermediate Care Facilities for people with Intellectual Disabilities (ICFID) and residential habilitation;
- Restoration of $240,000 in funding for mandated DD provider accreditation with the Council on Quality and Leadership (CQL);
- Inflationary increases to DD providers of 3% each year of the 2022 - 2023 biennium, especially due to economic and wage pressures in various communities;

- Maintaining the House's appropriation of up to $250,000 to NDDHS to financially stabilize DD providers disproportionately affected by the COVID-19 emergency — especially In Home Support providers who suffered the greatest losses;
- Restoration of all cuts to Section 11 State General Fund services to people with DD who don't qualify for the DD Medicaid Waiver;
- Fully fund the 1915(i) Medicaid Amendment with special attention paid to ensure it remains accessible to people with DD/ID, and review of the proposed World Health Organization Disability Assessment Schedule threshold score of 50 — a very severe score;
- Fully fund reforms and behavioral health initiatives from the Life Skills and Transition Center;
- Retention of a substantial state tax credit to employers who hire North Dakotans with developmental disabilities and mental illness, in HB 1405 (2021). HB 1405 received a unanimous do-pass recommendation from Senate Finance and Taxation Committee on March 9, 2021.

Many members also support restoration of funding for recreation and leisure centers with consideration of serving additional communities; a close review of the infant development and Part C budgets to ensure timely services can be brought to bear to minimize developmental delays; and strengthening of rates in related home and community based services to North Dakotans with other kinds of disabilities — QSP services under Aging Services and for brain injury, as well as 1915(i) Medicaid Amendment behavioral health services.

NDACP is persuaded that building a new State Hospital as proposed in HB 1012 makes sense to move more mental health services to the community. It is difficult to move beyond brick and mortar legacies built by generations past, but it is probably time.

Many of you know we have welcomed Angela Dinius as Workforce Development Director for NDACP. She and I are both happy to answer any questions that may arise about NDACP, its members' services to people, and our priorities. Our contact information is below.

Thank you for your kind attention.

2021 SENATE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
3/10/2021 AM
Senate Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Holmberg opened the hearing at 8:28 AM covering Human Service Zones, Human Service Centers and the State Hospital.

Senators present: **Holmberg, Krebsbach, Wanzek, Bekkedahl, Poolman, Erbele, Dever, Oehlke, Rust, Davison, Hogue, Sorvaag, Mathern and Heckaman.**

Discussion Topics:

- Foster care vs QRTP (Qualified Residential Treatment Programs)
- FTE positions
- Governance of Human Service Zones & Health Insurance
- Additional Substance Abuse Residential beds
- New State Hospital Study
- Indirect Costs for Human Services
- County Control of Human Service Zones
- Salary inequities
- Spend down of Human Service Zones reserves

Sara Stolt, Chief Operating Officer, Dept. of Human Services testified in favor and submitted testimony #8458.

Rosalie Etherington, Chief Clinic Director/NDSH Superintendent testified in favor and submitted testimony #8456, #8570.

Terry Traynor, Executive Director, ND Association of Counties – testified in favor and submitted testimony #8471.

Taylor Restad, Grand Forks Housing Authority – testified and presented neutral testimony #8537.

Chad Peterson, Chairman, Cass County Commission – testified in favor and submitted testimony #8581.

Kim Jacobson – Agassiz Valley Human Service Zone – testified in favor and submitted testimony #7897.

Steve Reiser, Director, Dakota Central Human Service Zone – testified in favor and submitted testimony #8207.

Senator Holmberg closed the hearing at 11:41 AM.

Rose Laning, Committee Clerk

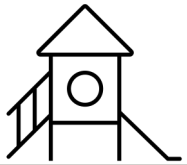
Local + State Partnerships For Effective and Efficient Service Delivery

NORTH Dakota | Human Services



Be Legendary.™

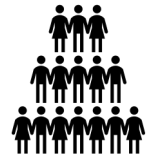
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment

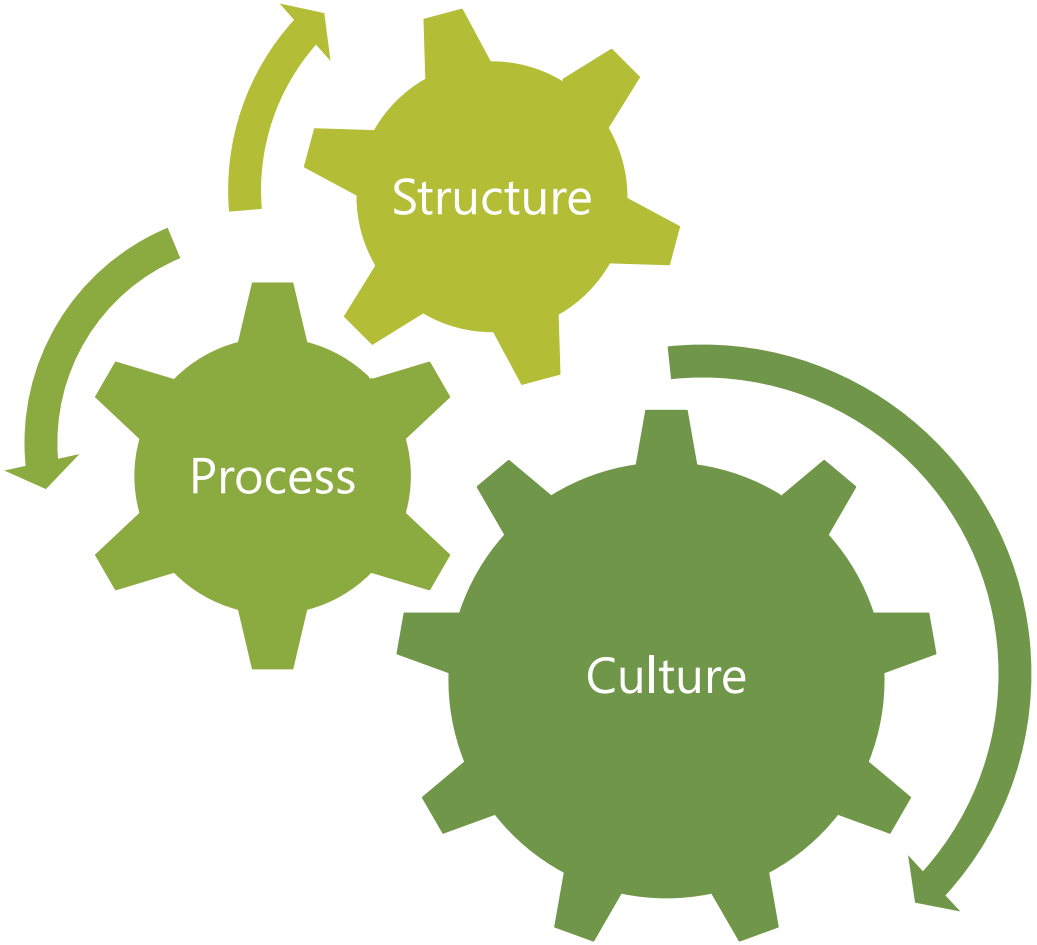


Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service



High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

IMPROVING PROGRAMS IS MORE THAN LOOKING AT STRUCTURE: Process and Cultural Change Must Accompany Structural Change

- 3 Core Areas
  - Process
  - Structure
  - Culture
- Focus is on service delivery to the client in the most effective and efficient way possible
- Seek to remove geographic, political and cultural boundaries to deliver smart, efficient and compassionate human services
- Primary Stakeholders
  - Individuals & Families
  - Taxpayers
  - Employees

HUMAN SERVICE ZONES

Gateway for Human Services

- Child Welfare
- Economic Assistance
- Indigent burials
- General Assistance
- County Supported HCBS
- Locally provided programs

Access Points Across ND

- Formerly known as County Social Services
- 19 Human Service Zones

Works to guide zones, build collaboration and lead zone operations.

Project Manager

Leads the DHS Office of Transformation supporting redesign projects, change management and process improvement across DHS and Human Service Zones.

FTE TRANSITIONS FROM COUNTY TO STATE

HCBS CASE MANAGERS

- Provide case management for older adults & individuals with physical disabilities receiving state and federally funded home and community-based services and basic care
- Became state employees 1/1/2020

Major Initiatives

- Specialized role of HCBS Case Manager
- Standardized training required for position
- Implemented a statewide centralized intake system for HCBS referrals and informed choice visits to ensure consumers understand their long-term service and support options
- 64 FTE provide support to 3057 unduplicated individuals
- Average 283 referrals and 54 new cases per month

CFS QUALITY ASSURANCE UNIT

SUPERVISOR: LEANNE MILLER

Continuous Quality Improvement Efforts (TBD in 2021)

Facility Licensure Visits

Case Record Reviews

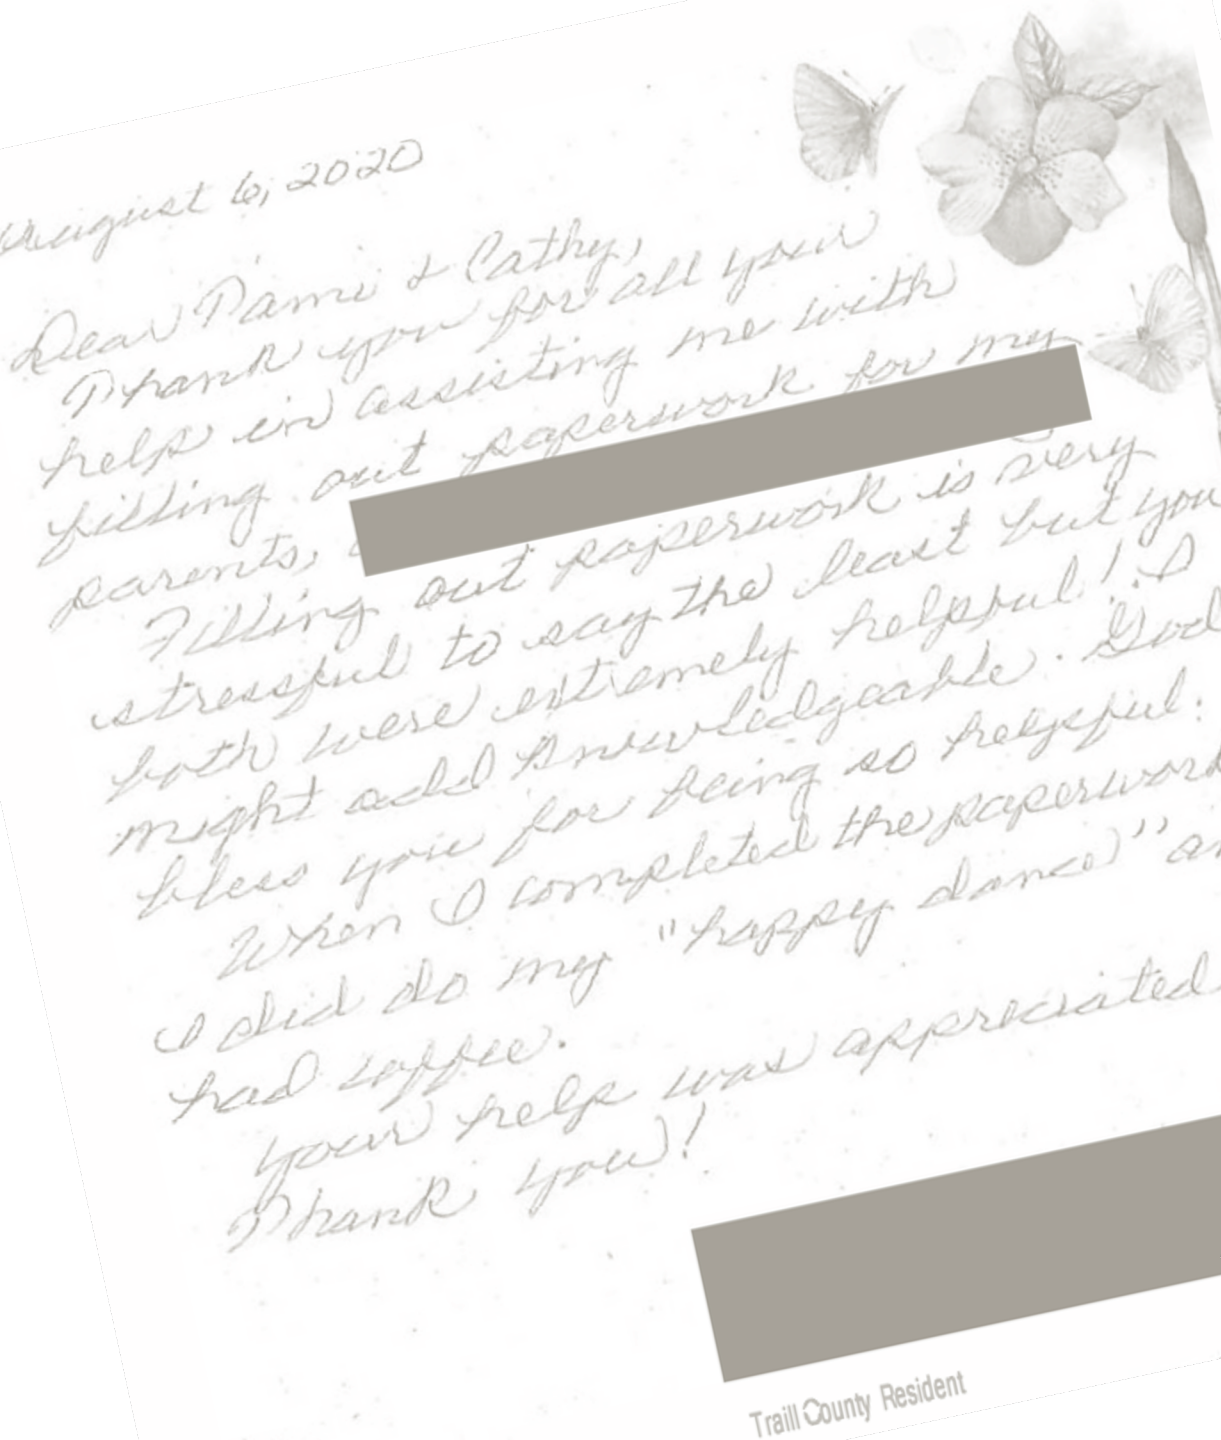
Child & Family Service Reviews

Safety, Permanency, and Well-Being

EARLY CHILDHOOD SERVICES UNIT

2020 Big Wins

- Childcare Licensors are now state employees
- Made progress on the Early Childhood Services (ECS) online application system



Goals for 2021

- Successfully complete the Child Care and Development Fund (CCDF) Monitoring Visit in Spring 2021
- Continue to work towards completion of the Early Childhood Services (ECS) online application system

MEDICAID LONG TERM CARE ELIGIBILITY UNIT

- Processed and maintain LTC Medicaid applications according to federal timeliness standards
- 16 FTE transferred from Human Service Zones
- Established Q1 2020
- Went live May 11, 2020

August 6, 2020

Dear Pami & Cathy,

Thank you for all your help in assisting me with filling out paperwork for my parents, [redacted]

Filling out paperwork is very stressful to say the least but you both were extremely helpful! I might add knowledgeable. God bless you for being so helpful: When I completed the paperwork, I did do my "happy dance" and had coffee.

Your help was appreciated.

Thank you!

[redacted]

Traill County Resident

12-11-20

Dear Ms. Brevik

This is just a quick note to say THANK YOU for your compassionate demeanor in handling our case.

It was a much needed emphatic ear you gave me on the phone at a time of my peak stress over this unexpected "review" matter. Such an attitude is very rare in my experience.

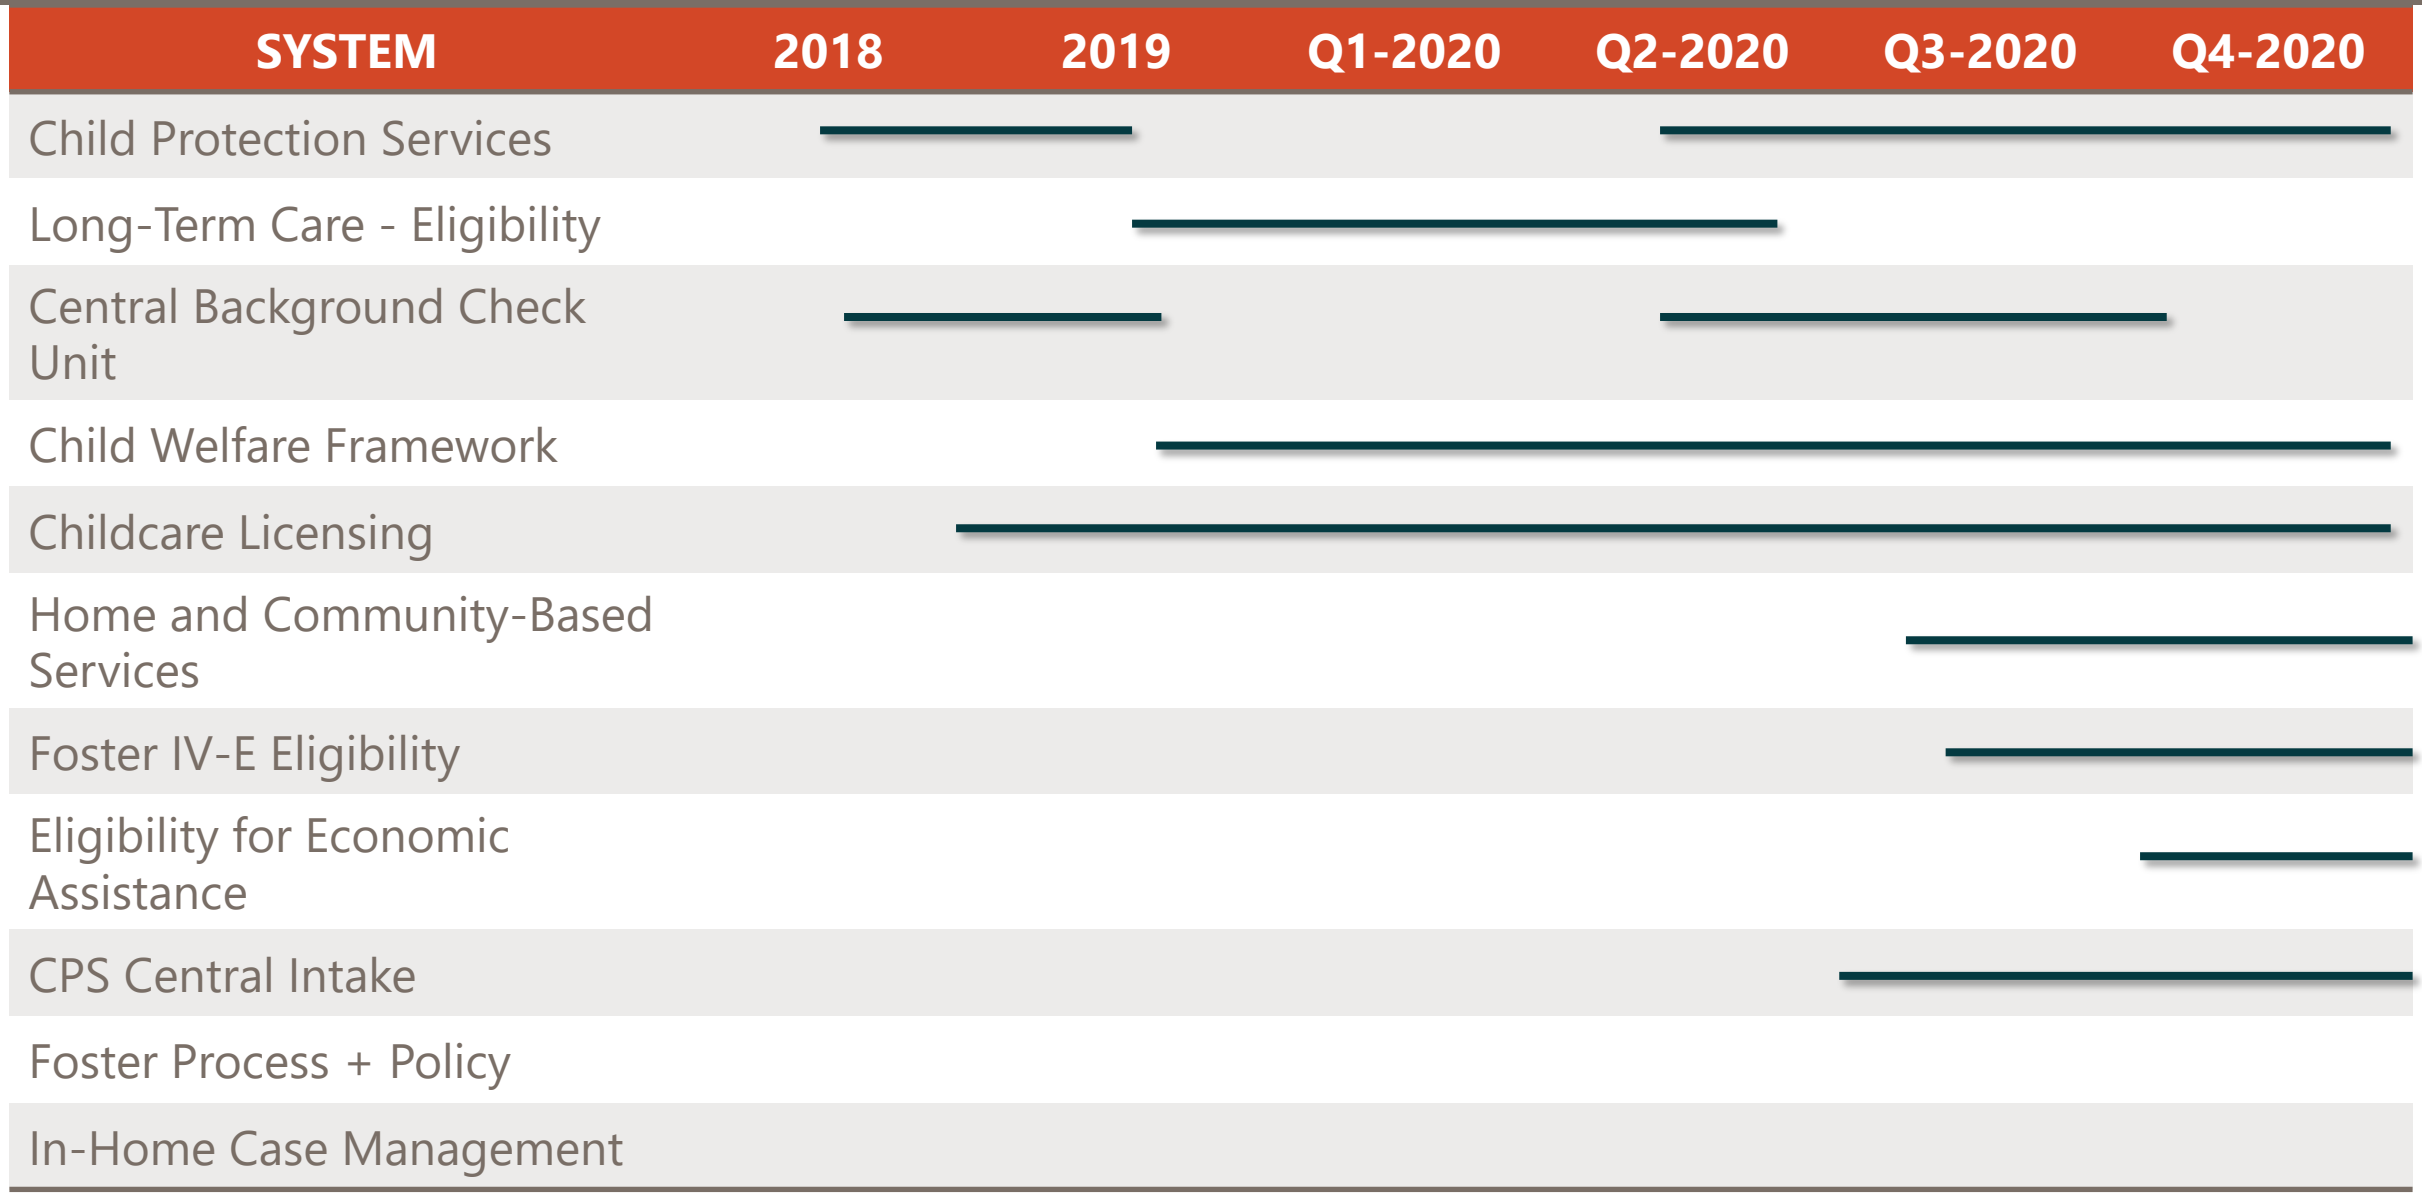
Happy Holidays

Sincerely

Pierce County Resident

FOSTER ELIGIBILITY + SUB ADOPT

- Authorized for 14 FTE to transfer from the HSZ to the State for a specialty foster eligibility unit
- Authorized for 2 FTE to transfer from the HSZ to the state to support subsidized adoption negotiation
- Unit launches in March 2021
- Will process all foster eligibility, Medicaid determinations for all foster and adopted children and negotiate subsidy for special needs adoptions



FOSTER CARE LICENSING

- SB2086 Request for up to 16 FTE to for a specialized foster care licensing unit to provide foster care licensing and renewals to foster homes in ND
- Create consistency and a leveled approach to managing foster licenses

IN PROGRESS

- Request for 16 FTE to transfer from the county to state to form a specialty foster care licensing team
- Consistent indigent burial criteria
- Consistent General Assistance policies, criteria and appeals process
- Study for zones to opt into State employment

SYSTEM REDESIGN TIMELINE

EQUITY ADJUSTMENTS

Zone Directors	Compensation equity to align all zone directors within the range
Zone Employee Benefits	Employees shifting to host county benefits which were often more robust
Zone Transfers to State Team	140 FTE that transferred to state were made whole if moving to state caused them to go backwards in salary and benefits

ZONE FUND BALANCES

- Fund balances are reported in January of each year.
- Anything above the fund balance limitation is reduced in the June payment of the following year. Note there were no fund balance reduction in CY 2020.
- If the payment provided to the HSZ to defray costs to provide Human Services, the HSZ would then utilize fund balances.
- HSZ must utilized the full balance of their human service zone human services fund before requesting additional dollars from the Department.
- It is anticipated fund balances will be exhausted in 21-23.

Estimated Fund Balances	In Millions
CY 2020 Beginning Balances Report by HSZ	$10.30
Estimated Beginning Fund Balances Ending CY 2020	$15.02
Less: Estimated Fund Balance Reduction CY 21	$8.85
Remaining Fund Balance CY 21	$6.18

	19-21	21-23
Expenditures > $2,000,000	$500,000	$500,000
Expenditures < $2,000,000	$100,000	$250,000

WHODAS (World Health Organization Disability Assessment Scale)
Rosalie Etherington, State Hospital Superintendent, Chief Clinics Officer

NORTH Dakota | Human Services
Be Legendary.

1

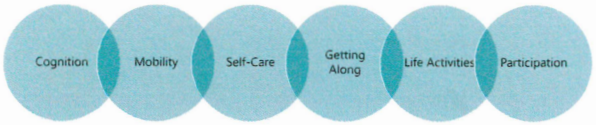
WHODAS (world health organization disability assessment scale)

WHAT IT IS

Generic tool for measuring daily function and how it impacts health and disability across all of medicine and healthcare

WHY USE IT

Excellent measurement precision for all medical and behavioral health disorders across age groups and cultures



Simple, fast, freely available, and reliable over time

WHY DIAGNOSIS ISN'T ENOUGH

A disorder fails to predict service need, treatment outcome, work performance, or social integration

2

WHODAS – What it Measures?

3

Why Does it Seem So Hard?

New Measures
New is often scary
New things takes practice
What if the WHODAS is wrong?

Left Out
WHODAS may leave some out
But how do we assess youth?
What if a person doesn't quality?

Financial Uncertainty
How to become a provider?
Will Medicaid pay?
Will it be enough?

4

STRATEGY

1. Train and Supervise
2. Measure and Monitor
3. Re-Train and Evaluate for Needed Change

5

Testimony Prepared for the
Senate Appropriations Committee
March 10, 2021
By: Terry Traynor, NDACo Executive Director

RE: Engrossed House Bill 1012 – DHS Budget/Zones

Chairman Holmberg and committee members, thank you for the opportunity to briefly address the ongoing process of social service redesign and the budget to support the Human Service Zones across the state. Zones, and particularly zone employees, are very literally the boots on the ground for delivering so many of the state funded services critical to our most vulnerable North Dakotans.

I want to preface my testimony on the bill by thanking this Committee and the Legislature for passing the redesign enabling legislation and funding last session, as well as DHS staff and the many county officials – zone directors, county auditors, state's attorneys, and commissioners – that have devoted so many hours to implementing this monumental change. My conclusion is that the transition, thus far, has gone well considering the short amount of time that we have been at this, but it is not without its difficulties. Some of which are fiscal and will ultimately be addressed by HB1012.

First and foremost, counties very clearly support the funding requested for Zones in the budget that comes to you from the House. I think it is important to note that these funds support not just zone employees, but also former county and zone employees transferred to state employment through the various redesign initiatives – all of which became, and continues to be, property tax relief. As proposed, this will be the third biennium that the Legislature has set aside $200 million in oil tax revenue specifically to make this redesign successful, and thus far, significantly less has been requested and appropriated.

While efforts have been made since formal zone formation, barely a year ago, to achieve some degree of compensation equity, for many zone employees this goal has not been met. As some zones require much greater employee share for benefits, it has been, and will continue to be, challenging. Obviously, the inclusion of sufficient funds to address inflationary costs of salaries and benefits by the House was critical and must be retained.

Because the Property Tax Relief Fund transfer as proposed in HB1012 is insufficient for fully funding the zones, the budget anticipates spending over $15 million in zone reserves (exhausting all reserve accounts in one biennium). These reserves were built up over many years. They, very honestly, include some state reimbursement, however, they are largely dedicated social service property tax levy funds. We are a team – state and county – working together and pooling our resources to make human service redesign work, but the perception that property taxes (although clearly collected specifically for human service purposes) will be used as a one-time harvest of property taxes to offset state general fund dollars is difficult for many zone board and county commission members to accept.

I recognize that reserve funds should not sit unused indefinitely, and the legislature has mandated that DHS fund the human service delivery needs – by transfers from other divisions if necessary – many local officials are (after barely a year) unsure about the potential emergency needs that DHS may not be able to fund, or fund immediately. I also recognize that not utilizing any of those reserve funds would make your job significantly more difficult, but I must raise this issue as those perceptions exist.

The Senate Human Services Committee, in addressing the "social service redesign" technical corrections bill (SB2086), removed the language giving unilateral authority for the Department to use all the reserves to offset a state general fund appropriation, however the budget before you, as adopted by the House, anticipates zeroing out these reserves. It would be our request that the Senate provide sufficient funding to at least preserve the threshold amount of $250,000 in each of the nineteen zones for the future ($4.75 million).

A final point I wish to address is the meager offset to the property taxes supporting the indirect costs of human service zone support. I thank the Department for budgeting to continue the partial funding at the same level as CY2018 (as addressed in SB2086), but only wish to point out that the costs of space, utilities, janitorial, insurance, IT support, state's attorney salaries and benefits, and all the rest are not stagnant. Over the past three years and into the next two, the property tax burden for these costs has, and will continue to, erode the "relief" you as a legislature have provided. This is becoming critical for the counties that have already reached their 60-mill general fund limit. DHS, zones, and counties are working to analyze and hopefully better standardize how these indirect costs are

identified and I sincerely hope we can present a better picture of this property tax supported piece of the puzzle in the future. However, I would respectively request that consideration be given to some sort of multiplier to the total allocated for indirect cost reimbursement. I have copied part of the amended section of law from SB2086, with our suggestion in red for one approach.

Thank you again for the opportunity to address this important bill.

50-35-04. Calculation of ~~formula~~ payment - Expenditures.

4. The director, during the period between January 1, ~~2020~~2021, and December 31, ~~2021~~2023, shall calculate payment for indirect costs ~~according to a formula established by the department, during the period between January 1, 2020, and December 31, 2021~~. Indirect costs of the human service zone may not become direct costs without written approval of the department. The total payment by the department for reimbursement of indirect costs incurred to support human services may not be less than the prorated amount paid to counties for this purpose in state fiscal year 2018 and increased by the percentage allowed for state salary adjustments during the previous biennium, as identified in the indirect cost plan, unless a cost reduction or cost-savings is achieved by the county.

March 10th, 2021

Chairman Holmberg and members of the committee,

My name is Taylor Restad and I work for the Grand Forks Housing Authority as the Program Director at LaGrave on First. Before I begin, it would be remiss of me today if we didn't give thanks to the Department of Human Services, both Medical Services and Behavioral Health, for including individuals with lived experience, families and friends, as well as providers, the opportunity for input during the development of the North Dakota Medicaid 1915(i) State Plan Amendment.

I'm here today to request an increase in the funding for our line item in the Northeast Human Service Center budget to $515,000. We make this request for two main reasons. First, during the last session our request of $550,000 was decreased to $375,000 - $275,000 for the first year and $100,000 for the second year as the 1915(i) was anticipated to be available as of July, 2020. This year, the Executive Budget allocated $187,500 for LaGrave on First, again, we believe, with the intent for the 1915(i) SPA covering the rest. While we are grateful to be in the budget, it is substantially less than what is necessary to provide 24/7 housing support to the tenants at LaGrave on First. The House returned half of our reduction but that is still $233,750 less than our request.

Second, we ask for $515,000 because of the considerable uncertainties with the 1915(i). Of note, the Grand Forks Housing Authority is one of the biggest fans of the 1915(i). In 2016 we brought in national experts, the Corporation for Supportive Housing, to help identify a sustainable funding source to assist individuals with behavioral health conditions remain in their home and communities, and they recommended a Medicaid 1915(i) State Plan Amendment. Unfortunately, we believe there are issues that have already become quite apparent including, but not limited to:

- ➔ In regard to housing support services, the current 1915(i) includes housing support services to be offered in 15-minute units with a maximum of 156 hours per 12 months. This is not sufficient for everyone, and in particular not for those who have experienced chronic homelessness and therefore have had extensive issues with tenancy in the past. Until the 1915(i) provides daily rates for housing support services, we will continue to request additional resources.
- ➔ For individuals who have a behavioral health condition, they may not be able to self-recognize their condition's impairment on their daily functioning, and therefore are not able to score the required 50 on the WHODAS.
- ➔ The lack of time that Human Service Zone Eligibility workers have to complete WHODAS interviews with individuals.

We are big believers in the 1915(i), and have insight into its potential and the possibilities it holds. The Grand Forks Housing Authority is in the process of becoming a Medicaid biller in

order to provide housing support services and take advantage of this sustainable funding opportunity. We have received a Bush Foundation grant to secure capacity building and technical assistance from the Corporation for Supportive Housing in order to do so to the best of our ability and adhere to national best-practices.

In summary, we ask that you increase funding for LaGrave on First until we all have the opportunity to see how the 1915(i) functions and to ensure we don't let some of our states' most vulnerable people fall through the cracks, potentially becoming homeless yet again. I appreciate the opportunity to submit this testimony before you today. I will answer any questions you may have at this time.

Respectfully submitted,

Taylor Restad

Testimony to the
Senate Appropriations Committee
March 10, 2021
Chad Peterson, Cass County Commission Chair

Regarding: House Bill 1012

Chairman Holmberg and members of the Senate Appropriations Committee, I am Chad Peterson, Cass County Commission Chair, and I am writing to share my broad support for House Bill 1012. I appreciate and share the desire to continue the process that started many years ago and finally came to fruition bringing a logical transition of these services to the appropriate level of government. The only remaining struggle is that this takeover didn't take into account the differences, both present and future, between each newly created zone. I would like to touch on a number of these items that relate specifically to the Cass County and the newly formed Cass County Human Services Zone (CCHSZ). Please note, that just because I am referencing the CCHSZ doesn't mean these examples don't also affect other zones.

The CCHSZ is home to more than 20% of North Dakota's population yet serves 30% of the North Dakota social services caseload. With this caseload comes dynamics that create a very different level of complexity when compared to other zones.

One example is our continuous population increase and the trailing potential for increasing caseloads within the CCHSZ. This caseload will require the need for additional staff or reinventing service delivery. When the zone was created the Cass County Social Services Board (CCSSB) put a request for additional staff forward to the Department of Human Services (DHS). Thankfully, between the legislative leadership and the team at DHS some of these requests were met, but more are still needed as our county continues to grow. We are aware of the reinvention of some service delivery (and example would be economic assistance) and look forward to working with DHS to right that need and streamline service delivery in coming years.

Another area of concern would be funding legal service to support the CCHSZ. In CCHSZ we field more child protective service calls, higher levels of foster care support and greater numbers of child removal cases than many of our peers. For these reasons and many others, we are compelled to have a dedicated, specialized legal team to support the CCHSZ. Please note, this support team is the same team that supported social services prior to formation of the zone. And with very little effort the CCHSZ could quantify the dedicated time for the zone legal staff. Currently the county budget for legal services is roughly $573,635. The zone is currently being reimbursed at $439,950. When the transition is made to the 25% formula local tax payers will be subsidizing what is easily identifiable as a CCHSZ expense. This leaves local taxpayers via our general fund to pay for these additional legal services.

As you are aware Cass County taxpayers paid to build a large complex, the Cass County Annex, that continue to house these services. The zone is only reimbursed $472,071 for cost allocation which includes everything from administrative support to building utilities. An example of what could be a large disparity between zones, we are aware of a number of zones that are reimbursed directly for leases that they have entered into. It would be a curious study to see what this facility would cost to rent should Cass County choose to sell the building and then require rental assistance from DHS.

Staff compensation is another area that should be discussed. In Cass we do our best to ensure all staffing skill levels are paid uniformly throughout the county. The salaries are determined using independent consultant surveys that help us determine market rate for each position. The goal for Cass is to never lead nor lag the market and create a stable workforce. This environment helps promote longevity, which in turn increases productivity and saves taxpayers money. With the state takeover, we've seen pay rates within social services fall behind their peer groups. We would welcome the opportunity to discuss how pay levels are established and bring our team back to a uniform level of compensation.

Indirect costs are a growing area of concern. In some zones it is difficult for a zone to segregate these line items because these accessories are shared by many divisions within a courthouse. However, like legal

services, it is easy for the CCHSZ to determine dedicated costs as little 'office infrastructure' (i.e. copiers, phones, etc.) as the zone is housed in a separate building and very little has ever been shared between social services and other divisions. We would welcome the discussion on this item as well.
As mentioned before, the caseload levels are beyond what most of our peers will ever experience. To control costs and deliver unique services that better serve our population, our team has been incredibly innovative. This innovation has created relationships with both public and private entities outside the courthouse. We've been partners with cities and schools in programs like the Jefferson School Project that helps stabilize families and promote school attendance. This family support often helps minimize the need for interactions with social services. We've also been aided by private groups like the Cooper House in Fargo that provides supportive housing for 42 chronically homeless individuals. I would encourage you to look into these programs, provide funding for innovation and to provide funding at or above current levels for those programs that are already established.

From top to bottom, the team that North Dakota inherited from Cass county is amazing on many levels. If you recall, Cass was the baseline for caseload standards. This was done for a good reason. We are good at what we do. We have specialists in every field out of necessity. And we, now North Dakota, are blessed to have that team. We encourage you to support the CCHSZ, work with us to fund innovation and fund the needs of this and other zones now and into the future.

Again, Chairman Holmberg and members of the Senate Appropriations Committee, I am writing to share my broad support for House Bill 1012.

Testimony Prepared for the
Senate Appropriations Committee
March 10, 2021
By: Kim Jacobson, Agassiz Valley Human Service Zone Director

RE: House Bill 1012 – DHS Budget related to Human Service Zones

Chairman Holmberg and committee members, my name is Kim Jacobson. I am the Agassiz Valley Human Service Zone Director, serving the service area of Traill and Steele Counties, a member of the North Dakota Social Service Director Association, and a member of the North Dakota Association of Counties Board of Directors. Please consider my testimony in support of HB 1012.

The last two years have brought many changes for the local human service delivery system. At the end of the 66th Legislative Assembly, county social service agencies and the department together began a fast-paced path towards the formation of human service zones. The teamwork and collaboration leading up to the 66th assembly provided groundwork for system redesign, visioning, and goal setting. However, planning and doing are two very different things.

Today, I am pleased to report that we have together transitioned to 19 human service zones. We have accomplished many great things, including: developing, negotiating, and entering into human service zone agreements and operational plans; combining county-based workforces into human service zone teams; leading the transition to human service zone board structure; developing innovative service and management collaborations between zones; transitioning locally administered services allowing zones to still meet the unique needs of local communities; developing and launching unified human service zone personnel policy which supports merit system/federal/state law compliance while providing opportunity for locally unique policy when appropriate; transitioning the legal custody of all foster children to the human service zone director; and restructuring to a consistent fiscal coding, management and budgeting system. In fact, in prior legislative hearings the transition to human service zones has been referred to as a well-baked and even frosted cake.

It is recognized that the transition to effective and efficient state/human service zone team will take at least eight years. While we have accomplished a lot of initial and visual steps, it is important to note that we are just **one year** into the human service zone and state team system during a time we have also been dealing with COVID19. Our team-based approach is a strong example of government innovation. However, the operational side of service delivery is very complex. Building a responsive state/zone team system is unchartered territory. Working as one with shared decision-making and accountability while demonstrating local responsiveness is hard work that requires time, attention, and nurture. This is critical to continued success and for responsive services for citizens. However, as you know, adequate funding is key to providing service.

Last session's SB 2124 was a comprehensive and sizable bill. I am very grateful for the support of the legislative body from both an appropriations and policy perspective and the investment in local human service delivery. I also express appreciation for the support of the vision - *a state and local team* - working together in a hybrid model of structure. This allows for unique local need to be met, voices to be heard, and a nimble, local response as we work together to provide system effectiveness, efficiency, and quality.

With any system's change it takes time. It was anticipated that there would be need for technical changes, intent clarifications, and parameters for next steps. Therefore, as expected through this year's legislative budgeting process we have learned many lessons. We have learned that there are some financial issues that need to be addressed so that human service zones can continue to effectively serve the entire state. It important to address the issues now or the cake that we have worked so hard to prepare will be missing big pieces and there will not be enough to serve those in need across the state.

Our Lessons Learned:

Initial base funding shortfall:

The approved appropriation for human service zones in 2019 biennium was ~$10 M short of necessary levels to support local human services. Efforts to redesign programs, especially economic assistance programs, was delayed because of the COVID19 pandemic. The benchmark of 985 FTEs for human service zones was not an accurate projection to base funding for our current system and the phase of the redesign process. As prior biennium

approved budget levels are used to base the next budget, we face a critical and concerning trajectory.

HB 1012 compounds this budgeting concern as the 2021 proposed budget was built off the 2019 biennial budget. This puts us at an even greater shortfall. When human service zones formed on January 1, 2020, most zones had a reserve fund balance. However, the department projects that 100% of the reserve funds statewide will be depleted by July 2022.

Human service zones provide critical safety net services to North Dakotans. In essence, no human service zone reserve fund balance means the safety net will no longer have a financial safety net. The department has reassured us that they are legally and morally committed to ensuring adequate funding of human service zone services. However, even with this reassurance, it is very concerning especially as we are so early in our new structural model and will soon have no reserve fund balances. Due to this trajectory, we are faced with uncertainty about how current and future needs will be met and how local access points and services will be preserved to meet the needs our vulnerable citizens.

Salaries, Benefits, and Equity:

During this legislative assembly, *SB 2086* – a policy bill – seeks to address policy points and clarify legislative intent regarding a variety of items including equity, indirect costs, roles and responsibilities, county "*skin in the game*", and other items. SB 2086 calls for several departmental studies along with reports to Legislative Management during interim. Balancing policy along with adequate appropriation is key to a successful product.

As a statewide system, it is key that we have an equitable total compensation system. We have learned that there is great disparity in salaries in human service zones, between human service zones, between human service team members and state employees housed in the zone, and with the Department. This was largely caused by the history of social service financing being tied to property tax. As you know, social service need and mill valuation are not reflective of one another. However, now with our funding for salaries and benefits coming from a common funding stream, the need for equity becomes increasingly important.

We have also learned that there is significant disparity of health insurance package offering within the human service zone system. For example, a family health insurance policy for Agassiz Valley Human Service Zone team members costs employees over $1000 per

month out-of-pocket. Meanwhile, our neighboring zones and state agency, who we compete with for hiring and retention, have much more robust benefit packages.

As we move forward, we realize that both salary and benefits need to be looked at in a comprehensive manner to provide a level of equity but also to prevent service deserts. Adequate base funding is necessary for the system to work as one. Also, budgetary flexibility is also key so that funds, upon availability, can be redirected to meet identified need in areas such as total compensation equity.

Today, I respectfully ask you to ensure adequate funding for local human service zone services and to support our workforce in the provision of those services. Adequate funding is critical in meeting the needs of our citizens and to support the property tax relief efforts gains through our systems change.

I also respectfully request that HB 1012 be amended to prevent the full depletion of human service zone balances and allowing each human service zone to retain up to $250,000 in reserve fund balances. If additional funds are not added in 2021 to offset full depletion of human service zone reserve balance funds, the 2023 budget request will be significantly higher than the 2021 request. If not, critical services may be lost. Simply said, there will not be enough cake to go around. Plus, the 2023 cake will need to be much larger and/or prepared as a multi-layer cake.

Thank you for this opportunity to provide testimony regarding HB 1012. Questions from the committee are welcomed.

Testimony for HB 1012

Senate Appropriations Committee

March 10, 2021

Chairman Holmberg and members of the Senate Appropriations Committee, I am Steven Reiser, Director of Dakota Central Human Service Zone. I am also a member of the North Dakota Human Service Zone Association. Please accept this testimony in favor of HB 1012.

The counties of McLean, Mercer, Oliver and Sheridan formed a social service district in 2006 and started operating as district on January 1, 2007. The mission of the district was to provide a better service to the county residents and when possible lower costs. In 2007 Dakota Central employed 36 staff. At the end of 2019 Dakota Central employed 31 staff. There can be cost savings and efficiencies found when counties join together but it takes time. Even though caseloads have grown from 2007 Dakota Central is able to employ fewer staff. If you look at 2020 staff numbers Dakota Central is down to 25 staff because of 4 staff transferring to state employment and reducing two more staff.

Zones have done a lot in one year and are working hard to improve services and find efficiencies but there has to be financial stability to the achieve kind of improvements we all hope for.

The amendments added to the bill by the House Appropriations were positive but fall short of what is needed for zone funding. SB 2086 is the policy bill passed regarding zones. In this bill reserve fund limits were increased to $250,000 in smaller zones. I believe the intent of raising this limit from $100,000 was to allow for more decision making at the local level for administrating human service programs. Using all of the reserve funds that zones have now to replace the dollars that the zone budget is short for the last biennium will not allow for this type of close to the client decision making. If 19 zones were allowed to keep $100,000 this would amount to $1.9 million in additional spending. It would be $4.75 million for $250,000 limits.

Thank you for allowing me to testify and I would answer any questions you might have.

2021 SENATE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
3/10/2021 PM
Senate Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Holmberg opened the hearing at 2:04 PM.

Senators present: **Holmberg, Krebsbach, Wanzek, Bekkedahl, Poolman, Erbele, Dever, Oehlke, Rust, Davison, Hogue, Sorvaag, Mathern, and Heckaman.**

Discussion Topics:

- Differences between WHODAS and VI-SPDAT screening
- Brain injury accidents or causes

Doreen Eichele, Dacotah Foundation, testified in opposition and submitted #8417.

Kandia Qual, Program Director, Dacotah Foundation, testified in opposition and submitted testimony #8547.

Dan Madler, CEO, Beyond Shelter, Inc. testified in opposition and submitted testimony #8459, #8460, #8461, #8462.

Dwight Barden, Executive Director, Burleigh County Housing Authority – testified in favor and submitted testimony #8274.

Kimberly and Troy Ohlhauser, Bismarck, ND – testified in favor and submitted testimony #8646.

Dave Flohr, Executive Director, North Dakota Housing Finance Agency – testified in favor.

Rebecca Quinn, ND Brain Injury – testified in favor and submitted testimony #8440 and #8441.

Nan Kennelly, ND Brain Injury Advisory Council – testified in favor and submitted testimony #8430 and #8432.

Jill Elliott, Executive Director, Fargo Housing Authority – testified in favor and submitted testimony #8024 and #8025.

Bruce Murry, Exec. Dir. ND Association of Community Providers – testified in favor and submitted testimony #8750.

Christina Sambor, ND Coalition for Homeless People – testified in favor and submitted testimony #8610.

Additional written testimony: #8270

Senator Holmberg closed the hearing at 3:40 PM.

Rose Laning, Committee Clerk

SENATE APPROPRIATIONS COMMITTEE

TESTIMONY

Committee Chair Holmberg and Members of the Committee, my name is Doreen Eichele, Chief Operations Officer for the Dacotah Foundation. I am here today to give testimony in opposition to the budget cuts made to mental health services offered in HB 1012.

We want to extend our support of the efforts of the Department of Human Services and the local human services centers. We understand that finding funds to provide service is not an easy task and that this committee carries a great burden to meet the needs of the citizens of this State. We believe that funding supportive housing provides a tool to provide supports that effectively impact individuals while giving them dignity in housing and offers options and support to address their basic needs. We feel that not funding these services stops the efforts and progress that has been made toward stabilization, working toward recovery and addressing chronic homelessness in our State.

Field services in their testimony noted that chronic disease robs individuals of health, home and community. The proposed budget cuts would affect the delivery of supportive housing services which have historically been a means of housing stability for persons with chronic behavioral health conditions. Supportive housing services have provided and enabled individuals to engage in supportive services like case management, medical services, and medication stabilization. It is also a means to ending a cycle of chronic homelessness. Once individuals have stabilized they are now able to engage in self-sustaining activities such as employment.

The Department of Human Service identified that from March, 2019 through November, 2020 22,972 individuals were served through their regional human service centers. Of those individuals, 47% of their caseload consists of individuals that have a primary diagnosis of serious mental illness and 42% who have a co-diagnosis of mental illness and substance abuse. They have identified their model for service as based on quality services, proven results, person centered and services provided closer to home. It was also identified that housing was part of the behavioral health re-design. We feel that supportive housing fits that model.

When an individual does not have stable housing options, they are more likely to seek higher levels of services such as hospital admissions, find themselves in unsafe environments, involved with law enforcement, incarcerated or accessing other emergency services. These levels of service have a much larger fiscal impact. Cooper House is a 42 bed permanent supportive housing facility. The first half of the current biennium we received reimbursement of $272,200 for this service or approximately $6481/person. If you compare this cost to the US Interagency Council on Homeless figures which identifies the cost to taxpayers for chronically homeless persons being as much as $30,000 to $50,000 per year, you understand our concern of the impact to our state if we do not continue to fund these services.

We would like to share a couple stories of individuals that would be impacted by the loss of supportive services. This male tenant has lived at Cooper House since 2018. Prior to moving to Cooper House he had been staying at Churches United, a local homeless shelter. He had multiple misdemeanor

drug/paraphernalia, simple assault and criminal trespass charges. He stated that the biggest benefit of having housing is that he is now able to prepare his own food and "eat a little every day". "I am able to stay in one place and no one bothers me like when I was homeless, sometimes I even had to sleep on the bus". When asked about the importance of having staff in the facility to provide supervision he stated, "If there was no staff here the neighbors would eat me alive. Staff keeps me safe if anyone gives you a hard time you tell staff." He further stated in response to the question regarding what it would be like without staff in the building, "It would be very dangerous if staff weren't here. Staff help by checking them out before they come in". Since moving into Cooper House, the tenant is no longer engaging in use of illegal substances and does not consume any alcohol. He has had no new criminal charges. His intensive case management team is able to do outreach with him as they are able to find and assist in his coordination of care regarding his physical, medical and mental health needs.

This 69 year old female has lived at Cooper House since 2012. She expressed how living in permanent supportive housing has been beneficial to her not only for safety but also the assistance of staff in meeting her basic needs. She also expressed concern about non tenants staying in Cooper and the fear of crime in the building if there were not staff in the building monitoring the activity. She stated, "You have to look out for vulnerable people of my age who don't drink and need a place, who aren't ready for nursing homes." This tenant struggles stabilizing her mental health. She responds to her delusions or hallucinations which has caused her to be evicted from other housing options. The tenant works with the Copper House staff on emotional coping support, coping skills and distress tolerance. She is seen regularly by Case Management from Southeast Human Services. This is the longest the tenant has been able to maintain housing.

Edwinton Place is a permanent supportive housing project located in Bismarck. It is similar to Cooper House in Fargo and LaGrave in Grand Forks. It has been open since November, 2020. This program is currently providing housing for 42 individuals and is in need of similar funding for supportive services. We are requesting that this bill would be amended to include this program. All three programs were developed based on identified need in their respective communities. All three programs serve an underserved population and provide a very vital infrastructure that allows services to be introduced to individuals that have great need.

Also identified in the budget cuts is a 10 bed harm reduction, long-term supportive housing program for persons with persistent mental illness and/or chemical dependency located in Bismarck, Gerridee's Place. Individuals receiving services and supports at this location have an extensive history of use of emergency services, engagement with law enforcement and the judicial system. It was opened in 2014 to accommodate a request for a need by West Central Human Services. This program serves individuals at any stage of recovery and implements services that would allow more individuals access with fewer barriers to services and housing while maintaining safety. This service meets the individual where they are in their recovery, provides secure shelter, gives encouragement to remain clean and sober and works with their care team on recovery skills, reduction in harmful behaviors and practice healthy living. In addition, this facility has 4 independent living apartments which allow individuals to still receive support in their recovery process while maintaining their independence. Individuals that have or are currently receiving services have experienced a significant reduction in hospitalization and encounters with law enforcement.

An original tenant that entered this program in 2014 has since moved into independent living in the community. They receive 2 hours per week from Community Case Aide services and Case Management supports and have maintained their recovery. Another original tenant has transitioned into an apartment within the facility and receives medication monitoring from the program. When they are experiencing a lapse in recovery, they still have availability of supports through the Mental Health Staff at Gerridee's. Based on current wait lists for housing vouchers, past criminal history and/or past landlord issues, most individuals will have difficulty finding other housing options and will still need intensive supports.

It is our understanding that the 1915i State plan for Home and Community Based Services has been mentioned as a possible source of funding for some of the supportive services. We feel that this will be a very beneficial avenue for funding and contribute to client stability. The information provided regarding reimbursement for services through the plan would require direct service tied to a specific individual and not support the indirect or group services. Staff can assist individuals to become eligible 1915i when and wherever possible. When reviewing our current tenant roster for Cooper House, we believe that only approximately 10 of the 42 individuals will qualify for 1915i services. While this may augment the current services, once they meet the maximum hours of service and/or score less than 50 on the WHOAS that funding will not be available and the program need will remain without the needed funding.

We also know that with all new programs and funding sources there is always a transition period that identifies opportunities but also sometimes does not meet the overall needs of the program as expected. As we walk through this process with the Department of Human Services, we request that the current funding for supportive housing services be maintained. We would offer that based on last biennium's granting process as other funds become available through 1915i, the programs draw-down would be reduced but without the current funding these supportive services cannot be maintained. We understand that budgets are a concern as we live by them as well but we also know that we serve a very vulnerable population that if not served only impact other services.

We are in support of the mission of the Department of Human Services of "Timely and effective behavioral health services to citizens of North Dakota to improve the quality of life through achieving and sustaining recovery". We just need time to transition and get there with them.

Thank you for your time and consideration of our request to fully fund the supportive housing programs of LaGrave, Cooper House, Gerrideee's Place and Edwinton Place.

SENATE APPROPRIATIONS COMMITTEE

TESTIMONY

Committee Chair Holmberg and Members of the Committee, my name is Kandia Qual, Program Director for the Dacotah Foundation in Fargo. I am here to give testimony in opposition to the budget cuts made to mental health services offered in HB 1012.

Cooper House permanent supportive housing is a proven, cost-effective, person-centered, and humane way to provide stable homes to individuals who have difficulty finding and maintaining housing due to their on-going struggles with severe mental illness, substance use, vulnerability, or previous traumas.

Supportive housing creates stability in the lives of its residents, allowing individuals who have often spent years living on the streets to live full, rewarding lives integrated into the community. Supportive housing allows residents to engage in services that previously they may not have engaged in due to being overwhelmed with trying to find where they would safely lay their head that night or where their next meal would come from. It allows service providers to locate individuals on a regular basis to provide engagement and build motivation for change through offering assistance with their mental health and physical health concerns. It provides individuals a safe and secure home, protecting them from being taken advantage of, trafficked, assaulted, or victimized as often occurs with many homeless individuals.

Having staff present 24/7 in supportive housing projects contributes to the overall success in resident's ability to maintain their housing and supports the movement towards larger goals of addressing their mental health or substance use concerns, obtaining employment or educational goals, and eventually moving out to mainstream housing through a variety of services and supports that our staff provides.

Based on my professional involvement with Cooper House since its origination in 2010, I can attest to the essential nature of the services provided by staff within the Cooper House program and how those services directly contribute to the success of the residents.

The 24/7 staff provides a vast array of services to support the safety and well-being of the residents that live at Cooper House. These services occur 24 hours a day, and can not be safely restricted to just certain hours of the day. The residents seek support or need interventions at all hours of the day and night. Some of the specific services the 24/7 staff provide are as follows:

- Welfare checks in the apartments
    - If a resident has not been seen for 24 hours or if there is a concern voiced staff go to the resident's apartment and enter the apartment to check on the well-being of the resident, and provide mental health or medical interventions if necessary
- Front door security and check-in of residents
    - Staff monitor everyone that enters the building for the safety of all. This assures that individuals that are not allowed on the property do not gain access to the building. Staff also conduct belongings searches to assure weapons, drugs or contraband aren't being brought in by residents.
- Managing visitors and interventions with disruptive visitors
    - Staff monitor visitors entering the building to assure they aren't bringing in alcohol or contraband and that they are allowed in the building. If a visitor is disruptive or unruly or putting a resident's housing at risk through their actions the staff intervene and ensure they leave the building.

- Referral and linkage to outside agencies for service options
    - Staff are familiar with and make referrals/contacts to community-based service agencies. Staff also facilitate person-to-person introductions and a warm hand-off to service providers from agencies the resident isn't familiar with. This assists in better engagement and participation in supportive services that will decrease the intensity of their emergency services usage and improve the overall quality of their lives
- Emergency medical interventions
    - Many individuals have complex medical concerns or physical issues that cause falls or injuries. Staff are aware of these concerns and watch for deterioration or falls/injuries, and assist in accessing emergency services if necessary, provide basic first aid when necessary, and coordinate with the part-time on-site nursing as needed.
- Mental health crisis interventions
    - Staff provides on-site, in the moment, mental health support to individuals struggling with the negative symptoms of their illness. Staff are able to model, coach, and prompt coping skills, remind individuals what their recovery plans indicate they should do in a crisis, and assist in accessing outside clinical supports when needed. These interventions often drastically decrease the use of emergency services and placement in higher levels of care.
- De-escalation interventions for aggression and/or violence
    - Situations arise where individuals aren't getting along for various reasons and aggression or violence escalates. During these situations, staff intervene with therapeutic intervention techniques to de-escalate the situation if possible and involve emergency services when needed.
- Coordination to withdrawal management services
    - As part of the harm reduction model Cooper House follows, we assist in coordinating transfer and admission to withdrawal management services when individuals are attempting to obtain sobriety or having substance withdrawal concerns
- Assist in managing noise or disruptive behavior concerns in the building
    - Individuals in this population often do not realize when their behaviors are disrupting to the peaceful living of others, such as loud music, knocking on doors in the middle of the night, shouting down hallways, etc. Staff intervenes when there are situations reported or observed and coaches individuals on appropriate behaviors when living in multi-person housing situations.
- Allocate and distribute donated food items
    - There are several food services such as donated food bank food items, meals on wheels, and community-provided meal nights at Cooper House. Staff assists with coordinating these events when they occur, monitoring the events for disruption, dispersal of donated food items, and dispersal of meal on wheels meals.
- Safety planning with outside entities for residents struggling with symptoms of mental health
    - Cooper House collaborates with many other entities in the Human Services, Social Services, and Medical fields to formulate safety plans and engage individuals in their safety plans for their mental health or physical health concerns. These plans contribute to the overall safety and well-being of each resident.
- Psychosocial support activities
    - Staff facilitate recreational groups to best support each individual's recovery plan or harm reduction steps

- Informal skills training for daily living skills and mental health symptom management
    - As individuals express symptoms, fears, desires, wants, or needs to staff in day-to-day interactions, the staff provide support for those ideas, goals, and coping skills. Staff do this through mentoring, education, and role-playing. They approach this from a skills integration perspective to better prepare residents to meet their goals for social situations, employment, and mainstream housing.
- Support a harm reduction model for substance use
    - Staff educates individuals on the concepts of harm reduction, working together to create plans that support safer living choices while they contemplate their substance usage options.

Cooper House serves a population that is known to be highly vulnerable due to their cognitive disabilities, mental illness, substance use concerns, and or the trauma they have endured at various points throughout their lives. Most individuals have been chronically homeless due to being evicted from previous residences multiple times due to symptoms of their mental health, behaviors from chronic intoxication, a lack of assertiveness skills where others have exploited them, or have even been sex trafficked in their own homes.

This population requires the services of 24/7 staff in the building for the many safety reasons mentioned above. Staff needs to be available 24/7 to provide person-centered services 'in the moment' that will allow residents to maintain their housing despite these reoccurring behaviors and concerns while they learn and develop the skills necessary to transition to and maintain housing in the mainstream community.

The proposed cuts to HB 1012 would directly impact the ability to continue these essential services as we would not be able to sustain the 24/7 staffing pattern that is currently in place. Currently, Cooper House has 1 staff on per shift, 24/7, through utilizing the full DHS budget we are allotted. That 1 individual staff person performs all the duties noted above throughout their shift to provide services and safety to 42 residents. A change in staffing would leave the building without a front door staff for periods of time during the day which would result in increased safety and welfare concerns. It would also potentially decrease resident engagement in other supportive services intended to enhance the quality of their lives. Staff are often the bridging factor to residents accessing and utilizing these services. They often introduce service providers and build engagement and trust towards providers through the staff's relationships with the residents. Staff also remind residents to stay home for in-home appointments if they are attempting to leave the building around an appointment time and staff reach out to the resident when a service provider can't make contact with them. This would not be possible without the staff present to see and engage with the residents on a continuous basis. A decrease in staffing hours would also result in vastly increased demand for emergency services, such as police and ambulance services, as staff would no longer be present in the same capacity to intervene and assist before events reach the level those services are needed.

We know there has been mention of 1915i being a supplement to the funding currently being proposed. However, this is a new funding source that will require eligibility and take time to enroll residents. It is yet to be determined how it may be implemented and assist the Cooper House Program although we have been recently reviewing the service opportunities and eligibility requirements specifically for Cooper House residents.

Within our current population of 42 residents, there are only 10 individuals that meet the WHODAS scoring of 50 or greater that is required to be eligible for services. There are 21 individuals that have a WHODAS score of 25-50, so 74% of the overall population at Cooper House has moderate to high intensity service needs based on WHODAS scoring, but few actually qualify for the services 1915i would provide. The 10 individuals that would potentially be eligible for services would have a limit of 156 hours per calendar year of service time and every service must be dosed and performed for that specific resident so 1915i wouldn't cover most of the day-to-day general safety and procedure tasks the 24/7 staffing completes.

There is also the concern of the resident needing to be willing to participate in the 1915i services. Housing first models such as Cooper House can not require service participation to obtain the housing. Many residents that enter permanent supportive housing programs require intensive engagement strategies even long after they move in to build trust and motivation to engage in services. Even once eligibility and service authorizations have been established, the attendance of the residents at their services would likely be very sporadic based on their mental health, physical health, and substance usage concerns at the time. Most individuals entering this level of supportive housing are in engagement or pre-contemplative stages of change which contributes to why they score as high as they do on the WHODAS. They often aren't considering changes yet and simply want safe housing or they are just beginning to think about making changes. It takes time to build motivation and help them move through to active stages of change where they have the internal desire and commitment to following through on services regularly. With 1915i reimbursement, there is only reimbursement allowed if a resident is present and participates in the prescribed services. It is predictable, based on clinical stage of change and current follow through at other required appointments concerning their housing and medical, there would likely be a high no-show or cancellation rate which would then prohibit any reimbursement for that scheduled staff time.

For example, an individual may be prescribed 2 hours of care coordination 3 times per week based on their WHODAS scoring and the areas of functional needs. That individual could be scheduled for a 2 hour session on Monday, Wednesday and Friday in a particular week. On Monday, the individual left early in the morning to run errands and because of their traumatic brain injury, by noon they didn't remember they had a session so they didn't return to Cooper House until that evening and missed their session. Tuesday night that resident used substances and weren't feeling well on Wednesday and refused to meet when staff came to the door. Friday that individual was home and met with the staff but due to their symptoms of mental health, they became paranoid about the questions being asked while working on their care plan and they ended the session after 30 minutes. For that individual, the staff are able to bill for reimbursement of 30 minutes of services out of the 6 hours that they were scheduled for. This would be a fairly typical example of service or appointment attendance for the population residing at Cooper House and the typical stage of change most individuals that require this intensity of support are in.

1915i will be a very positive support for the expansion and growth of service opportunities for individuals within the program and the long-term benefits and opportunities to residents overall. The added service options will allow more individuals to build skills through intense 1:1 services which would allow them to transition more easily to mainstream housing. However, it is questionable how it will apply to the majority of the Cooper House population or be a secured steady reimbursement for the funds that are proposed to be eliminated from the current funding. Without full funding for 24/7 staffing, which only covers 1 staff person on duty 24/7, the safety, security, and intentions of the program would be immensely compromised.

We are requesting that consideration be given to maintain the current funding for Cooper House. We feel this is essential for the continued operation of Cooper House and the program's ability to serve the intensity of the target population in a safe and effective manner. Thank you for your time and consideration of our request.

Testimony in Opposition of HB 1012
Senate Appropriations
Chairman: Senator Ray Holmberg
March 10, 2021

Submitted by: Dan Madler, Chief Executive Officer - Beyond Shelter Inc. (BSI), 701-730-2734, dmadler@beyondshelterinc.com, Lobbyist #30

Chairman Holmberg and members of the Committee, my name is Dan Madler, I live in ND District 27 and I am the CEO of Beyond Shelter, Inc. (BSI), a mission driven North Dakota nonprofit developer of affordable housing. I would like to express my opposition to House Bill 1012 as it is submitted to the Senate.

As submitted HB 1012:

- Does not adequately fund supportive services for three Housing First Projects; Cooper House, located in Fargo, ND, LaGrave On First, located in Grand Forks, ND, and Edwinton Place, located in Bismarck, ND and without this funding, the three Housing First Projects will not be successful

- Assumes that the 1915i re-alignment will make up the funding shortfalls. As you have heard and will hear others testify, this will not be the case. Currently a majority of the Chronic Homeless individuals/households currently housed at Cooper House, LaGrave On First, and Edwinton Place are not able to score high enough in the six (6) domains of the WHODAS 2.0 assessment to be eligible for Housing Supports offered under the current 1915i State Plan.

Housing First:

- Provides Permanent Supportive Housing to chronic homeless, individuals/households who have complex medical and emotional needs and who create the biggest financial burden on local medical, law enforcement, and service providers (i.e., WCHSC, SEHCS, NEHCS)

- You have the data, and the data and evidence are clear, Housing First saves North Dakota, ND Communities, and ND taxpayer's money (see Housing the Homeless North Dakota's 10-year plan to End Long-Term Homelessness, Cooper House Impact Report, and Cooper House Financial Community Impact handouts submitted online)

- Projects (Cooper House, LaGrave On First, and Edwinton Place) make WCHSC, SEHSC, and NEHSC more efficient and effective when providing services to Chronic Homeless individuals/households

1915i WHODAS 2.0 mismatch to VI-SPDAT:

- The **VI-SPDAT** is a pre-screening, or triage tool that is designed to be used by all providers within a community to quickly assess the health and social needs of homeless persons and match them with the most appropriate support and housing interventions that are available. This is the screening tool most often utilized by Cooper House, LaGrave On First, and Edwinton Place, yet as stated earlier, currently a majority of the Chronic Homeless individuals/households currently housed at Cooper House, LaGrave On First, and Edwinton Place are not able to score high enough in the six (6) domains of the WHODAS 2.0 assessment to be eligible for Housing Supports offered under the current 1915i State Plan. **Question**, is there a mismatch?

In summary I would say that now is not the time to cut supportive services to Cooper House, LaGrave On First, and Edwinton Place and I respectively request that this committee:

- Preserve the **$22.6 Million** in total development costs that have been invested to provide the 124 Housing First homes (Cooper House – 42 homes, LaGrave On First – 42 homes, and Edwinton Place – 40 homes)
- Do no harm and fund Cooper House at **$570,000 for the 2021-2023 biennium**
- Do no harm and fund LaGrave On First at **$515,000 for the 2021-2023 biennium**
- Do no harm and fund Edwinton Place at **$640,000 for the 2021-2023 biennium**
- request that DHS work with the Providers to determine if there is a mismatch between the 1915i WHODAS 2.0 and VI-SPDAT

Note: the above total investment request = **$1,725,000** which is an increase of **$800,000** from the 2019-2021 base level funding, and which allows for a period of transition to utilizing 1915i as a possible funding source for Housing First Projects

Thank you for your time and consideration.

Housing the Homeless

North Dakota's
10 - Year Plan to End
Long-Term Homelessness

Prepared by the
North Dakota Interagency Council on Homelessness

October 31, 2018

Office of Governor Doug Burgum
State of North Dakota
600 East Boulevard Avenue
Bismarck, ND 58505

RE: Final Report—North Dakota 10-Year Plan to End Long Term Homelessness

Dear Governor Burgum,

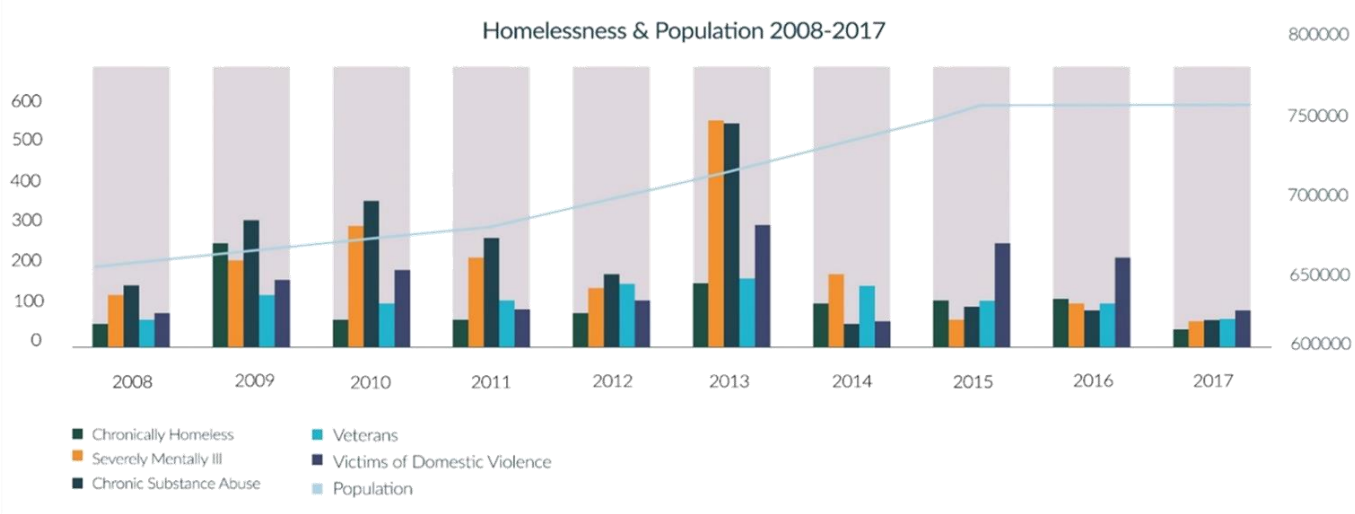
A lot has changed in North Dakota since 2008 when the *North Dakota 10-year Plan to End Long-Term Homelessness* was drafted. The entire state has experienced a catalyst of economic prosperity as people from around the world came to find their fortune, some with nothing more than a few personal belongings and a desire for a better life. As the population and demographics of the state shifted, it remains the North Dakota Interagency Council on Homelessness's belief that every North Dakotan should have the opportunity to succeed in life, and have a safe and stable environment to call home.

The 10-year plan formalized collaborative efforts between seven state agencies, one statewide homeless coalition, and the communities of Bismarck, Fargo and Grand Forks, developing goals and strategies to end chronic homelessness. Creating permanent supportive housing was the primary focus with a secondary focus on providing outreach and prevention services. As improved data provided insight into the multi-faceted challenges vulnerable populations' experience, outreach, prevention and support services became just as critical as housing.

Great strides have been made. However, the efforts to end homelessness continue. Generational poverty must be actively combatted, and youth need stability in order for them to succeed in school and be given the best possibility to grow into self-sufficiency. The chronically homeless need access to more rapid housing projects and customized support services. The safety net also needs to be cast wider for justice-involved individuals, and those facing mental and behavioral health issues. And, we cannot forget about how we can help our senior population age in place and provide resources for families experiencing frequent, short-term homelessness.

The Interagency Council on Homelessness's report highlights the work that was completed over the past decade, it profiles the state most vulnerable populations, and it outlines our recommendations to continue to prevent, reduce and end homelessness.

Respectfully submitted,



Jolene Kline, Chair
North Dakota Interagency Council on Homelessness

Executive Summary

Executive Summary

North Dakota's vulnerable populations require person-centered approaches to address their unique needs based on their current living situation, physical and mental health, and financial stability. In 2008, when the *North Dakota 10-Year Plan to End Long Term Homelessness* was implemented, North Dakota's primary focus was on permanent supportive housing for the chronically homeless. Although housing stability is the foundation of ending homelessness, over the past decade supportive services have become just as essential to prevent and reduce both short-term and chronic homelessness.

Counting the state's homeless populations is extremely difficult due to multiple definitions of homelessness, the mobility of the population, rural isolation, and the cyclical nature of homelessness for many individuals and families. In addition, people experiencing homelessness are often reluctant to identify themselves as such, therefore, many do not seek assistance. The U.S. Department of Housing and Urban Development (HUD) requires local service providers to conduct a Point In Time (PIT) Count every January to track sheltered and unsheltered men, women and children. North Dakota's 2017 PIT count totaled 1,089 homeless men, women and children, of which 45 were chronically homeless.

According to the U.S. Interagency Council on Homelessness, chronically homeless persons cost taxpayers as much as $30,000 to $50,000 per year. The cost is calculated based on services utilized such as hospitals, shelters, jail, psychiatric centers, and alcohol and drug treatment. Using the base national average of $30,000, North Dakota taxpayers spent approximately $1,350,000 million in 2017 on the state's chronically homeless population. Permanent supportive housing is estimated to lower that cost by 40 percent. Currently, two 'Housing First' facilities, where chronically homeless individuals are rapidly housed, exist in Fargo and Grand Forks. Although proven highly successful in conserving community resources, these projects are difficult to construct as conventional financing is not an option. Developers must leverage numerous federal, state and local financing programs, and solicit donations and private sector partnerships to structure the zero-debt financing the projects require. Low- and extremely low-income individuals can receive rental assistance which helps ensure rental income, unfortunately, only about one in four people who qualify for housing assistance actually receive it due to limited availability.

The North Dakota Interagency Council on Homelessness (NDICH) studied vulnerable populations based on their current housing situation, mental and physical wellbeing, family disposition, and justice involvement. Each of these populations can have safety nets in place that would effectively prevent or shorten their experience with homelessness if resources are effectively implemented.

- ***Chronically Homeless***—individuals and families residing in a place not meant for human habitation, in an emergency shelter, and who have been homeless and residing in such a place for at least one year or on at least four separate occasions in the last three years. North Dakota averages 138 documented chronically homeless individuals every year. The greatest concentration of community resources is spent on this population with most self-diagnosed as severely mentally ill or having chronic substance abuse problems.
    - State and federal funding is critical for financing permanent supportive housing.
    - Person-centered services are needed to stabilize these individuals and reintegrate them back into the community.

- ***Justice Involved***—persons with mental illness and substance abuse problems are overrepresented in our jails and prisons as compared to the general population. Deinstitutionalization, along with a failure to develop easily accessible and useful outpatient alternatives for treatment, has led to correctional facilities housing the highest concentrations of people with mental health and substance abuse concerns in the country.
    - Incarcerated individuals do not get the depth of mental health and addiction recovery services needed to become stable and sober after their release.
    - Difficulty finding affordable housing and employment, especially for felons such as sex offenders.

- ***Native Americans***—the magnitude of Native Americans experiencing homelessness on and off of the reservations is more than likely higher than the 21 percent currently reported. Reservations have the highest concentrations of extreme poverty in the state, and approximately half of all Native American children living in North Dakota are impoverished, more than five times the rate of other races. Over-crowding and inadequate housing conditions put stress on quality of life, as the majority of Native Americans will not force members in their household out if they do not have another housing option.
    - Approximately 78 percent of Native Americans live off of reservations to pursue educational and financial stability, however, many of these individuals lack support networks.
    - Historical trauma and assimilation of culture impacts the effectiveness of behavioral health treatment.

- ***Youth***—in 2017, according to the PIT count, there were 178 documented homeless children ages 0 to 18 years. School-age children, ages 5 to 18 years old, experiencing homelessness was reported much higher by the North Dakota Department of Public Instruction with 2,166 students documented as either sheltered, doubled-up with other families, living in a hotel/motel, unsheltered, or unaccompanied by an adult during the 2015-2016 school year. A major contributor to the financial stability and well-being of children is secure parental employment, unfortunately, many working families with children struggle to make ends meet. The poverty threshold considered sufficient for a family of four with two children to afford basic necessities was $24,036. In North Dakota, 21,716 children were living in families whose income was below this threshold.

- Support services in rural and urban areas can help stabilize families and youth lessening the need for relocation and out-patient treatment.
- State and federal funding critical for single-parent housing, providing life-skills support, daycare, after-school care, and career or educational advancement.

- ***Foster Youth***—in a survey of youth that aged out of the state's foster care system, 40 percent will experience homelessness by the time they are 21 years old. Of those experiencing homelessness, one out of every three has been incarcerated. North Dakota has the third highest youth incarceration per capita in the nation. Although the majority of foster youth obtain a GED or high school diploma and are employed, they face many challenges transitioning into adulthood without a strong support network.
    - Explore barriers to short- and long-term housing for unaccompanied, emancipated, and youth aging out of the foster care system.
    - Support services that are trauma, age and developmentally appropriate to mitigate emotional and behavioral deterrents.

- ***Frail Elderly and Disabled***— North Dakota ranks seventh in the nation in the highest proportion of individuals age 85 years and older. Based on the aging population, extended life expectancy, and likelihood of having a disability, it is anticipated that one out of two North Dakotans will need long-term care services such as nursing facilities, basic care, assisted living, swing bed or home- and community-based care in their lifetime. Disabilities includes ambulatory, visual, cognitive and hearing loss. Persons with a disability are more than twice as likely to be living in poverty as individuals without a disability.
    - Explore more options for rural and urban community-based alternatives for persons with disabilities and behavioral health issues.
    - Support grant programs for home modifications allowing people to age in place.

These vulnerable populations are the most housing insecure and cost-burdened, where 30 percent or more of their income is allocated to housing. Employed individuals earning minimum wage need to work 70 hours a week on average to afford a one-bedroom, market-rate apartment in North Dakota, and seniors living on the state's average social security payment alone can afford $400 per month in rent.

Moving Forward

The following recommendations are broad-based and will require dedication and investments from numerous state agencies to ensure vulnerable populations are receiving adequate services to accommodate their unique needs and to reintegrate them back into North Dakota's communities. Some of the recommendations are within the 2018 North Dakota Behavioral Health System Study and the State of North Dakota's Information Technology Department's Citizen Experience Initiative.

Breaking the Cycle of Generational Poverty

To end the cycle of generational poverty, children and their parents both need to be housing stable. Screening mechanisms need to be in place for service providers, primary care providers and school counselors to be able to identify problematic family dynamics and refer them to a case manager based on their current situation and complexity of need.

- Create more wrap-around service based housing programs for single parents with children.
- Expand outpatient and community-based services that are flexible such as peer support, community health workers, in-home and school-based clinical services and substance use disorder treatment services to address the behavioral health needs of children, youth and their families.
- Expand targeted, proactive in-home supports for families with children and youth at risk of foster care placement and justice involvement.
- Develop a streamlined process for homeless liaisons located in school districts across the state to be able to refer a case manager to assist families in accessing housing in both urban and rural communities.

Children that are not housing stable, are within the foster care system, do not graduate from high school, or have mental health or substance issues have a much higher probability of needing public assistance as an adult. Early detection and prevention are the best methods to help youth navigate difficult living situations.

- Explore barriers to create emergency shelters, low barrier housing, host homes and other short- and long-term housing options for youth and young adults who are unsheltered, fleeing an unsafe situation, or experiencing a housing crisis.
- Coordinate entry processes and support services that are trauma, age and developmentally appropriate.
- Review state and federal policies and processes impacting unaccompanied youth as well as youth aging out of the foster care system to determine any barriers that can be eliminated.

Lessening the Cost

Some individuals have complex medical and emotional needs, which prohibits their ability to live on their own without a social network assisting them. These individuals are classified as the chronically homeless and create the biggest financial burden on local medical, law enforcement and service providers.

- Finance more Housing First facilities creating more homes to stabilize the chronically homeless and provide funding for support and operations expenses.
- Explore the cost and benefit of funding "harm reduction" shelters, where residents can consume substances or come into a shelter under the influence of drugs and alcohol.
- Create consistent funding for state housing and service programs such as Housing Incentive Fund and the North Dakota Homeless Grant.

Government Efficiencies

The key to enhancing government efficiencies is to establish a systematic approach of clearly defined and repeatable steps where outcomes can be evaluated to generate consistent, optimum results. State agencies and local service providers are well connected and reach out to one another for assistance for the individuals and families they are helping, but most agencies expressed the need for more collaborative efforts to leverage resources and to be more responsive.

- The NDICH should be expanded to represent more stakeholders within government agencies, service providers and individuals and families that have experienced homelessness.
- Identify barriers preventing state agencies from accessing and leveraging HUD’s Homeless Management Information System (HMIS).
- Map the entry points for vulnerable populations and how they transition throughout state agencies and local service providers.
- Identify local, state and federal policies and regulations that hinder vulnerable populations and prioritize actions for change.

Covering the cost of public assistance is challenging for federal and state government and at the local community level. However, there are ways for the state to access additional federal funding through Medicaid to provide direct support to individuals and families.

- Pursue 1915(i) Medicaid state plan amendments to expand community-based services for vulnerable populations.
- Review long-term care facilities placement policies and explore options for community-based alternatives for persons with disabilities and behavioral health issues.

Client-Focused Delivery System

In order to expedite information gathering and to ensure current and accurate information is available, the state needs a consistent, end-to-end experience across all channels and departments where information can be obtained for any service, on any device and at any time. State agencies and local service providers expressed challenges they have noticed in their specific area and feedback from clients. Below are some of the ideas that were recommended:

- Housing Inventory - create an affordable housing inventory for each community/region
- Housing Forms - create a single form used by all regional housing authorities
- Database - create profiles for each client within a centralized database, so individuals or families applying for state or local benefits do not have to re-enter information
- Privacy Laws - review state privacy laws to ensure clients are protected, but at the same time do not hinder state agencies from accessing the information they need to be able to help a client that is transitioning services from one state agency to another.
- Consent Form - create a consent form signed by the client to release information to all state agencies and case managers
- User Profile - create an app or web portal where clients can enter their information that is stored and they can return at any time to complete.
- Online Chat - through an app or web portal, create an online chat function for clients to ask questions and be directed to the correct state agency or local service
- Services Portal - structure website into user categories and group information based on the client scenario, such as homeless or risk of becoming; searching for housing, employment or daycare, needing social services, youth, tribal, etc.

North Dakota's Plan to End Homelessness

North Dakota's Plan to End Homelessness

In 2004, President George W. Bush established a U.S. Interagency Council on Homelessness (USICH) to develop and implement a comprehensive, national approach to end chronic homelessness in America. That same year, President Bush and USICH issued an unprecedented collaborative effort between the U.S. Department of Housing and Urban Development (HUD), U.S. Department of Human and Health Services (HHS) and the U.S. Department of Veteran Affairs (VA) to make both permanent housing and supportive services funding available in a coordinated effort.[1] This was the initial investment towards developing a comprehensive national strategy to end chronic homelessness in 10 years.

At the state level, Gov. John Hoeven created the Governor's Interagency Council on Homelessness (NDICH) which consists of seven state agencies and one statewide homeless coalition, and the communities of Bismarck, Fargo and Grand Forks.[2] The intent of NDICH was to coordinate government policies, identify best practices, analyze individual and family needs, educate stakeholders, and solicit input from the faith and advocacy communities, businesses and the general public to prevent and end homelessness in North Dakota.[3] In 2008, NDICH finalized *North Dakota's 10-Year Plan to End Long Term Homelessness.*[4] A consortium of hundreds of individuals from state agencies, tribal nations, community and state stakeholders, and planning organizations participated in community forums, research studies and planning sessions.

Emphasis was placed on creating permanent housing and supportive services for the men, women, and children who would experience long-term homelessness during the next 10 years. North Dakota's goal was to assist local communities in providing housing, rent subsidies and supportive services, with a benchmark of creating 50 new permanent supportive housing (PSH) units each year to eliminate homelessness across the state. In order to reach this goal, five strategies were developed:

Strategy 1: Develop Permanent Supportive Housing

- Develop non-federal sources of "soft money"
- Create additional permanent supportive housing units
- Create partnerships between developers and service providers

Strategy 2: Improve the Ability to Pay Rent

- Eliminate barriers to employment
- Identify new sources for rent subsidies
- Improve access to mainstream supports (entitlement programs)

Strategy 3: Expand Supportive Services to Wrap Around Housing

- Connect supportive services to housing
- Prevent individuals from transitioning into homelessness or uncertainty

[4] North Dakota's 10-Year Plan to End Long Term Homelessness. 2008. Retrieved from www.ndhfa.org/Publications/Reports/Partner%20Publications/ndich_finalplan.pdf

Strategy 4: Strengthen Prevention and Outreach Programs

- Emphasize protocols to close front door into homelessness

Strategy 5: Collect and Disseminate Data Relating to Long-Term Homelessness

- Collect information on homeless populations and services provided
- Market and measure progress

NDICH agencies assigned to specific goals within each strategy:

Job Service of North Dakota	JSND
North Dakota Department of Corrections & Rehabilitation	NDDOCR
North Dakota Department of Commerce	NDDOC
North Dakota Department of Human Services	NDDHS
North Dakota Housing Finance Agency	NDHFA
North Dakota Indian Affairs Commission	NDIAC
North Dakota Department of Public Instruction	NDDPI
North Dakota Coalition for Homeless People (private organization)	NDCHP

Progress reports were created in 2010 and 2013 and can be viewed on the NDHFA website.[5] The 2018 report captures the accomplishments over the past decade, lessons learned about the complexities of homelessness, challenges faced by the most vulnerable populations, and recommendations moving forward.

[5] NDICH homelessness reports 2008, 2010 and 2013. Retrieved from www.ndhfa.org/Publications/Resources.html

Accomplishments 2008-2018

Accomplishments 2008-2018

Seven state agencies were assigned to specific goals and strategies in the 10-year plan, but the majority of the accomplishments were achieved through partnerships between the agencies and local service providers consisting of faith-based and non-profit organizations working directly with the homeless and vulnerable individuals and families. The following are highlights of accomplishments achieved through this collaborative initiative.

Strategy 1: Develop Permanent Supportive Housing

Units

In 2008, the original goal was the creation of 50 new permanent supportive housing (PSH) units per year to reach the goal of 461 new PSH units by 2018. Across the state, NDICH members, service providers, and the private sector were involved in the construction or rehabilitation of 1,855 rental units for extremely low-, low-, and moderate-income individuals and families. Twenty-four percent of the units were PSH and 10 percent were allocated specifically for homeless individuals. Table 1 breaks down the type of units constructed or rehabilitated since 2008 by region. Figure 26 on pg. 35 is a map of the eight regions.

Housing Units Constructed or Rehabilitated With State Agency Involvement

	Permanent Supportive Housing Units	Homeless Units	Elderly Units	ADA Units
Region I	37	0	143	15
Region II	52	17	67	34
Region III	12	6	25	9
Region IV	50	42	7	17
Region V	133	60	344	106
Region VI	15	0	130	15
Region VII	96	46	69	36
Region VIII	53	13	211	45
State Total	**448**	**184**	**996**	**277**

Table 1. Housing units constructed or rehabilitated with state agency involvement, 2008-2017. Source: NDHFA

PSH encompasses the 'Housing First' model of rapid placement of homeless individuals into independent and stable housing, and serves as a platform from which they can pursue goals and improve their quality of life. This approach is guided by the belief that people need basic necessities like food and a place to live before attending anything less critical, such as getting a job, budgeting properly, or addressing to mental and behavioral health issues.[6]

Two Housing First, PSH projects were completed and are leased-up. In 2010, the Cooper House in Fargo was the first Housing First complex in the state and was made available exclusively to individuals who were documented as chronically homeless. The 42-unit PSH project was recognized by the National Association of Housing and Redevelopment Officers with a best practices award. The Cooper House become the template

[6] National Alliance to End Homelessness: Housing First. Retrieved from https://endhomelessness.org/resource/housing-first/

for LaGrave on First located in Grand Forks, which also provides 42-units, and opened its doors in 2018. At the time of this report, construction started on the Edwinton Place, a 40-unit complex in Bismarck.

Another proven model deployed is PSH housing for single parents and their children with the intent of transforming families from poverty to prosperity two generations at a time. The Jeremiah Program in Fargo prepares determined single mothers to excel in the workforce, readies their children to succeed in school and reduces generational dependence on public assistance. The Jeremiah Program apartments opened its doors in 2018 to serve 20 low-income families. In West Fargo, ground was broken for Grace Gardens which will provide shelter for 30 women and children seeking refuge from domestic violence. Grace Gardens will assist women to become stable and independent, while providing a safe and nurturing space for the children to attend daycare and after school programs.

Funding PSH

It is virtually impossible for developers to build units that are affordable to low- or extremely low-income individuals with only conventional financing. Lenders loan money for housing development based on the anticipated property income, and when rents are set to affordable levels, there is a huge gap between the money needed to build and the money lenders and investors provide. Most affordable housing financing deals involve a mortgage, tax credits and two or three other sources of money, however, it is not uncommon for developers to rely on upward of 10 financing sources as they try to fill the gap. Low- and extremely low-income individuals can receive rental assistance which helps ensure rental income, unfortunately, only about one in four people who qualify for housing assistance actually receives it.[7]

Funding PSH involves creative financing strategies and invested partners providing federal, state, local and private sector resources. Federal funding administered by NDHFA and NDDOC includes National Housing Trust Fund, Low Income Housing Tax Credits, Neighborhood Stabilization Program, HOME Investment Partnerships Program, Community Development Block Grant, and Emergency Solutions Grants. State funding sources include the North Dakota Homeless Grant and the Housing Incentive Fund (HIF).

HIF is a North Dakota based tax incentive providing critical gap financing for the construction, rehabilitation and preservation of multi-family housing targeted to essential service workers and low- to moderate-income households. HIF has been an instrumental tool in financing housing for individuals with disabilities, who are elderly, and those experiencing homelessness.

In 2011, the North Dakota State Legislature created HIF as a financing tool for taxpayers to receive a state income tax credit and help thousands of people who might otherwise have been priced out of the state's housing market during the peak of energy development. Individuals or corporate contributors received a dollar-for-dollar credit against their state income liability for the year they contributed. Contributions could be targeted to a specific project, community or region when applicable.

Over the course of six years, NDHFA allocated more than $89.6 million in HIF funding to 77 projects to construct or rehab 2,380 units in 26 urban and rural communities across the state.

Figure 1. NDHFA Housing Incentive Fund projects awarded each year comparing HIF award amount and total project costs.
Source: NDHFA

Strategy 2: Improve Ability to Pay Rent

Eliminate Barriers

In addition to PSH, landlords must be willing to rent to individuals and families that have a history of justice involvement and financial instability. NDDHS administers the Money Follows the Person (MFP) program, which includes a housing initiative and regional supportive housing meetings to bring housing and service providers together to create successful transitions for vulnerable populations. MFP housing staff created regionally based landlord and service provider training focusing on fair housing, discrimination and service animals. The training also included presentations on current housing developments and programs that are successfully addressing challenges with tenants, community perception, and short- and long-term effectiveness to implement best practices in each region.

In 2018, NDDHS allocated $150,000 of MFP rebalancing dollars to Opening Doors: Landlord Risk Mitigation Fund which is a statewide program emulating a similar program successfully initiated by the Fargo-Moorhead Homeless Coalition. Opening Doors will provide insurance to landlords who lease to vulnerable populations and includes coverage for excessive damages or lost revenue. NDHFA implemented and is administering the program.

Vulnerable populations who are able to work cannot pay rent without securing reliable and sustainable employment. The NDDOCR authorized the Work Release While Incarcerated program at the Missouri River Correctional Center in Bismarck, ND. The program generated over $250,000 in compensation for inmates to secure funding for future housing and supplied the area with much needed labor in construction and food services.

JSND is leading numerous state- and region-based employment initiatives prioritizing individuals who are low-income, receive public assistance, are basic-skill deficient, incarcerated, or a veteran. On-the-job training, classroom training, trade adjustment assistance and building work experience are critical to assisting

individuals to become more self-sufficient and increase their earning potential. Some of the programs incorporate case managers to create a holistic approach for people to become successful. JSND staff also provide outreach to homeless shelters and correctional facilities on a monthly to quarterly basis if agencies are not able to bring their clients to JSND facilities.

In addition to helping individuals, JSND administers the Federal Bonding Program and the Work Opportunity Tax Credit. Both programs are an employer incentive guaranteeing the job honesty of a harder to employ individual by offering a safety net for employer reimbursement of up to $5,000 to hire ex-offenders, recovering substance abusers, and persons with poor credit or lack of work history.

Seeking and maintaining employment can be challenging, especially without reliable transportation. Many local service providers have funds to assist individuals with public transportation costs, however, public transportation is more accessible in urban areas than in rural areas. The NDDOT administers state and federal funding for transit services in rural, small urban and urban areas for individuals who are low-income, elderly or have disabilities to access employment, medical and educational facilities, and any other locations as needed. Figure 3 outlines the NDDOT's public transit provider service areas.

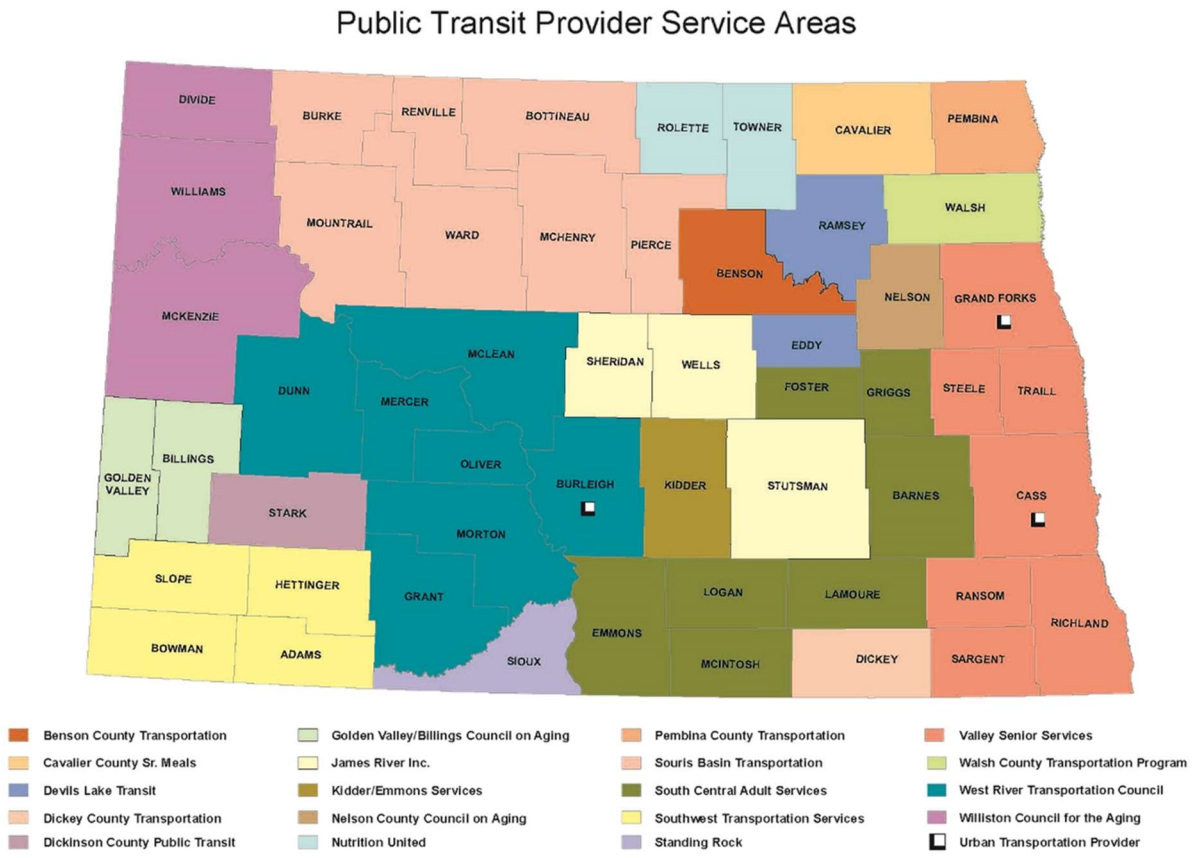

Figure 2. NDDOT Public Transit Provider Service Areas
Source: NDDOT

Rent Subsidies

Regional housing authorities and local service providers have access to funding or housing vouchers issued federally or through state agencies such as NDDOC and NDDHS. The vouchers are intended to assist very low-income, elderly and/or disabled individuals to be able to afford decent, safe and sanitary housing.

NDDOC's Emergency Solutions Grant for emergency shelter and homelessness prevention allows funding to be used for short- and medium-term rental assistance and services to stabilize and rapidly re-house individuals and families. The federal funds are consistently around $450,000 for this program and are distributed annually to more than 20 agencies across the state.

In 2013, the North Dakota legislature appropriated $2 million for the North Dakota Homeless Grant to be administered by NDDOC. The grant was designed after the federal Emergency Solutions Grant, but allowed for more flexibility to address the needs of homeless individuals and provide more rental assistance targeted to PSH. The grant also funds shelter operations, stabilization services, and rapid re-housing. The following biennium, the grant was appropriated $1.5 million and reduced to $300,000 during the 2017-2019 biennium.

HOME Investment in Partnerships program is another federal program administered by NDDOC that has provided subsidies to 666 households, totaling $1.1 million. Tenants can receive security deposit assistance, which contributed $1.2 million to 4,828 households over the past decade.

The U.S. Department of Health and Human Services awarded NDDHS for the Project for Assistance in Transition from Homelessness (PATH) grant. The program provides case management; one-time rental assistance to prevent eviction; security deposit assistance; and representative payee services. Recipients are those who are suffering from mental illness or co-occurring serious mental illness and substance abuse disorders and who are homeless or at imminent risk of becoming homeless. As a preventative measure, the program assists with one to three month's rent. Each of the state's eight regional Human Services Centers share the $300,000 PATH grant funds each year.

Strategy 3: Expand Supportive Services to Wrap Around Housing

Providing supportive wrap-around services is just as important as creating short- and long-term housing options for those in need. Services must address each person's and families' unique needs based on their current and historic housing and personal situations. Free Through Recovery, created in 2017, is a two-year, state-funded $7.5 million initiative administered by NDDOCR. The program pays for addiction counseling and behavioral health services delivered through social service, mental health, religious and cultural organizations throughout the state. The initial focus is on individuals on probation with a higher risk of recidivism. The program will require extensive local partnerships to meet urban and rural community needs creating on-going and consistent wrap-around services.

NDDOCR also has re-entry teams in Bismarck, Fargo, Grand Forks and Devils Lake consisting of community stakeholders that provide wrap around case management and supervision of offenders who are re-entering society. NDDHS, JSND, housing authorities, judges, tribal entities, local law enforcement and others are also involved. Among the outcomes tracked are housing status and this effort has improved housing stability for offenders and has been particularly successful in the Devils Lake area.

Finding employment is critical to becoming self-sustainable. JSND and NDDOCR host *Second Chance Job Fairs* in Bismarck, Grand Forks and Fargo for employers considered "felon friendly" to be able to interview individuals. In addition to job fairs, JSND actively provides workforce updates like job openings, recruitment efforts, and hiring events in communities across the state.

The Fargo area has successfully implemented a medical respite program to provide acute and post-acute medical care for homeless persons who are too ill or frail to recover from a physical illness or injury on the streets but are not ill enough to be in a hospital. Medical Respite is short-term residential care that allows the homeless individuals the opportunity to rest in a safe environment while accessing medical care and other supportive services. More than 20 community partners are providing funding for medical supplies, equipment, nursing services, case management, housing and living supplies for both men and women. Individuals can receive rapid housing and case management for six months after securing permanent housing if they agree to the program rules, are medically and behaviorally stable, and will comply with scheduled follow-up appointments. The average cost of Medical Respite care is $25 per day and the cost of acute care is $4,500 per day. Since 2016, the program has saved the Fargo region almost $3 million in acute care costs.

Navigating the process for support programs such as social security, SNAP benefits, Medicaid and Medicare can be challenging to understand the forms and program requirements in addition to the logistical barriers of accessing all of the agencies. NDDHS has designated PATH coordinators to assist helping individuals transitioning out of homelessness to apply for programs to promote recovery and wellness.

MFP is administered by NDDHS and is an $8.9 million grant from the Centers for Medicare and Medicaid Services to help approximately 110 Medicaid clients who are older adults or people with developmental disabilities transition from nursing homes or institutions and reintegrate them into the community. A full year of case management is provided in addition to $3,000 for one-time transition costs.[8]

MFP staff also created two pocket resource guides for six areas in the state providing contact information for supportive services and affordable housing providers. More than 25,000 guides have been disseminated across the state. Another publication created through the Supportive Housing Collaborative is The *Housing Resource Guide,*[9] which was created in partnership between state and federal agencies to bridge information and communication gaps for agencies, individuals and families needing to address the unique needs of persons with disabilities, who are elderly, and are experiencing economic hardship.

Strategy 4: Strengthen Prevention & Outreach Programs

State agencies assigned roles in the plan have worked together through programs such as MFP, Free Through Recovery, Opening Doors and PATH to assist those at risk of long-term homelessness to be able to find housing and successfully reintegrate back into the community. Another example of partnerships is Project Homeless Connect, which was an annual event in communities across the state. The Fargo-Moorhead Homeless Coalition transformed the event into a more on-going, holistic approach through a new endeavor, CARES (coordinated assessment referral and evaluation system). The regional system is a partnership between the Western Central Minnesota Continuum of Care (CoC), North Dakota CoC, Fargo-Moorhead Homeless Coalition, and White Earth Nation located in Minnesota. CARES streamlines access to services and makes the system client-centered.

Focusing on school-aged youth, NDDPI oversees approximately 150 district homeless liaisons to identify students experiencing homelessness, ensure their educational rights and provide a referral for the families or unaccompanied minors. Addressing the needs of homeless youth is a collaborative effort with state agencies and local service providers to determine a process for referring families to case managers.

[8] N.D. Money Follows the Person Grant. Retrieved from www.nd.gov/dhs/info/pubs/mfp/overview.html
[9] North Dakota Supportive Housing Collaborative: Housing Resource Guide. Retrieved from www.ndhfa.org/RentalAssistance/HousingResourceGuide0817.pdf

Project Service Connect has become an annual event in communities across the state. Homeless/Hunger Awareness Week activities have also been initiated. In most of the larger cities in North Dakota and the faith community has taken on an expanded outreach and emergency mission during winter months. These church sheltering operations have been crucial in providing a warm place to sleep for homeless individuals when weather conditions are life threatening.

Strategy 5: Collect & Disseminate Data Relating to Long-Term Homelessness

NDCHP organizes statewide collaborative meetings to share information pertaining to best practices, federal, state and tribal regulations, and serves as a connector between state and federal agencies and the local service providers. NDCHP also organizes the annual HUD Point in Time Count (PIT) with assistance from NDDOC to ensure homeless data counts for urban and rural areas.

Each state agency in addition to NDCHP works closely with the local media to promote program successes and to keep the public informed about the current homeless situation across North Dakota. In times of urgent response, such as severe winter weather, it is essential for the service providers to be able to communicate their needs and provide accurate information about homeless populations.

NDHFA sponsored a Statewide Housing Needs Assessment in 2012 and 2016 conducted by North Dakota State University's Center for Social Research to analyze population and housing trends. The 2016 housing assessment dove into the special needs of the state's subpopulations, which had not been analyzed before. Once the assessments were completed, NDHFA held regional forums with NDSU research staff to discuss the data and what the future looked like for each region. Economic developers, community leaders, legislators, service providers and the general public were engaged through the assessment process.

What We Learned

What We Learned

Counting homeless populations is extremely difficult due to multiple definitions of homelessness, the mobility of the population, rural isolation, and the cyclical nature of homelessness for many individuals and families. In addition, homeless people are often reluctant to be identify themselves as homeless, and many of them remain invisible even to the most diligent social workers. There is no uniform method for counting the homeless, instead indirect estimation, single-contact census, and capture-recapture studies are used to quantify this population.[10]

Local service providers use HUD's PIT methodology to conduct the annual PIT count for the state. The PIT focuses on counting sheltered and unsheltered homeless people. HUD requires communities receiving federal funds from the McKinney-Vento Homeless Assistance Grants program to conduct an annual count of all sheltered people in the last week of January. Electronic administrative records are used to enumerate people living in emergency shelters and transitional housing. Unsheltered counts are required every other year, although most communities conduct an unsheltered count annually. During the PIT counts, communities are required to identify whether a person is an individual, a member of a family unit, or an unaccompanied youth under the age of 18 or age 18 to 24. In addition, communities must identify if a person is chronically homeless, indicating long-time or repeated homelessness and the presence of a disability.[11]

In North Dakota, the homeless PIT count numbers have fluctuated as have the subpopulations. Figure 3 is a breakdown of the North Dakota's homeless subpopulations compared to the state's overall population growth. The subpopulations depict the complex issues surrounding homelessness that extends beyond not being able to afford housing. Local service providers and state agencies were unprepared for the magnitude of homelessness experienced across the state. When the 2008 plan was drafted, energy development catapulted North Dakota's economic development opportunities into the national spotlight attracting tens of

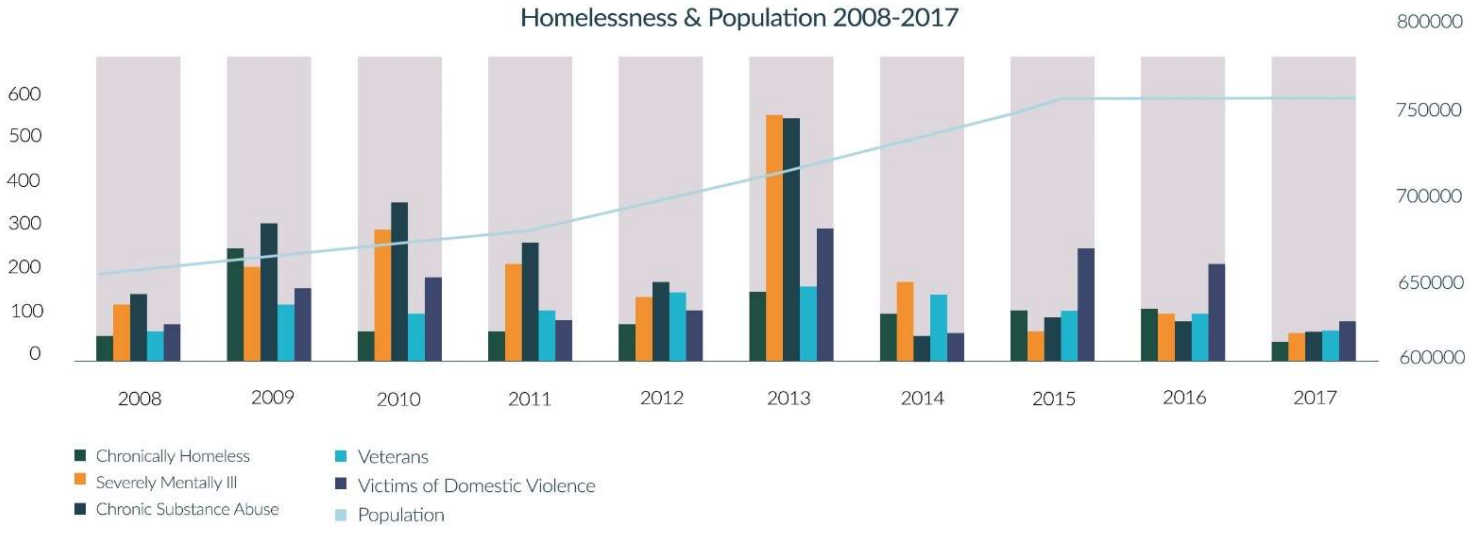

Figure 3. North Dakota's Homeless PIT Count and Population from 2008-2017
Source: North Dakota Homeless Coalition and U.S. Census Bureau

[10] The Methodology of Counting the Homeless. Retrieved from www.ncbi.nlm.nih.gov/books/NBK218229/
[11] What is a Point-In-Time Count? Retrieved from https://endhomelessness.org/resource/what-is-a-point-in-time-count/

thousands of people to the state, some without living arrangements. A statewide housing shortage forced people into homelessness even if they could afford to pay rent or purchase housing due to the limited housing stock available. People were doubling up, living in vehicles, and sleeping in churches. Some employers provided traditional housing options in addition to recreational vehicles or man camps. Along with the population influx and housing shortages, service providers were responding to increased domestic violence, human trafficking, substance abuse and incarcerations, which can be the cause as to why individuals experience homelessness.

Discrepancies between definitions of homelessness is evident based on NDDPI's school-aged youth homeless counts, which includes housing insecure and doubling-up. In 2016, NDDPI reported 2,166 children ages 5-18 either living in shelters, doubled-up, in a hotel/motel, unsheltered or unaccompanied by an adult. NDDPI's 2015-16 homeless student count is two times more than the state's PIT count; however, NDDPI tallies the count over the school year and has more consistent access to this vulnerable population resulting in more thorough identification and reporting.

North Dakota Department of Instruction Data
Homeless Youth Ages 5-18

School Year	Number of Students Identified as in Transition	Sheltered	Doubled Up	Hotel/Motel	Unsheltered	Unaccompanied
2012-2013	2,122	239	975	189	719	
2013-2014	2,395	236	1,096	256	807	171
2014-2015	2,715	196	1,397	246	876	150
2015-2016	2,230	151	1,440	151	371	193
2016-2017	2,166	228	1,186	107	179	223

Source: NDDPI

How Much Does Homelessness Cost

According to the U.S. Interagency Council on Homelessness, chronically homeless persons cost taxpayers as much as $30,000 to $50,000 per year. The cost is calculated based on public services utilized such as hospitals, shelters, jail, psychiatric centers, alcohol and drug treatment, and living on the street. PSH is estimated to lower that cost by 40 percent.[12]

The Cooper House, North Dakota's first Housing First project, opened in 2010 and a benefit-cost-analysis was conducted after 12 months of operation. Preliminary assumptions determined that the 66 tenants who lived in the Cooper House cost the public $552,895 the previous year. After being rapidly rehoused the public expense dropped to $348,755 a savings of $204,140 or 41.5 percent.[13] The savings were realized in the following cost centers: healthcare and medical, law enforcement and legal, detox, administration, and emergency shelters.

[12] Ending Chronic Homelessness in 2017. Retrieved from www.usich.gov/resources/uploads/asset_library/Ending_Chronic_Homelessness_in_2017.pdf

[13] Cooper House Impact Report. Retrieved from http://fargohousing.org/files/pdf/Cooper%20House/Impact%20Reports/Cooper_House_Impact_Report_June_2013.pdf

In Fargo, healthcare facilities, housing providers, and case managers collaborated to create a medical respite program in response to the healthcare gap for homeless individuals. Respite care provides recuperative services for those who many not meet criteria for hospitalization, but are too sick or vulnerable to be discharged on the streets. National trends have documented lower mortality rates as well as a reduction in the inpatient length of stay, emergency department visits, outpatient clinic visits and readmissions to the hospital for homeless individuals who are discharged to medical respite compared to those that are discharged to the streets. In 2016, an analysis of the Fargo Medical Respite program demonstrated a savings of $2,658,150 in acute care costs in less than two years. The Fargo program is a hybrid of a traditional respite program, where patients are recommended to stay for approximately 45 days allowing medical staff to treat the individual and develop a plan to transfer them to housing with support services in place. The MFP Housing Program also gives each participant a small stipend to help them set up their new home as they transition into permanent housing.

Although there is data showing the successful implementation of housing and medical intervention for homeless individuals, much of the national data focuses on large metropolitan areas and does not represent the smaller urban centers and rural communities of North Dakota.

Vulnerable Populations

Progress has been made over the past 10 years to end homelessness, however, certain populations are still at a higher-risk of experiencing both short- and long-term homelessness. Housing, case management and healthcare needs to be customized to each of these groups to ensure the greatest level of stability and long-term success.

Chronically Homeless

Chronically homeless is defined as an individual or family that is homeless and resides in a place not meant for human habitation, in an emergency shelter, and has been homeless and residing in such a place for at least one year or on at least four separate occasions in the last three years. Chronically homeless families include the head of household with a diagnosable substance use disorder, serious mental illness, developmental disability, post-traumatic stress disorder, cognitive impairments resulting from a brain injury, or chronical physical illness or disability.[14]

The median number of chronically homeless individuals in North Dakota over the past decade has been 75.5. The lowest count occurred in 2017 at 45, but averaged 138 annually from 2013-2016. The HUD PIT count is the only active means to document all chronically homeless individuals across the state, and it is conducted in January making it difficult to locate and document the unsheltered homeless.

North Dakota's chronically homeless population has more than likely experienced trauma in their childhood and have on-going mental health issues and substance abuse. For example, in 2017 of the 1,089 homeless and 45 chronically homeless individuals, 69 reported themselves as severely mentally ill, and 70 diagnosed themselves as having chronic substance abuse. The numbers for each category would probably be higher if they were medically diagnosed or if a case manager was able to document their condition instead of relying on self-reporting.

[14] HUD Defining "Chronically Homeless," 2015. Retrieved from www.hudexchange.info/resources/documents/Defining-Chronically-Homeless-Final-Rule.pdf

Housing the chronically homeless is challenging, and there is no one size fits all solution. Across the state, numerous partnerships have formed between federal and state agencies and local service providers to find housing models that best serve each community. Housing First is a rapid housing approach; homeless shelters are a temporary solution; and "harm reduction" shelters have been discussed in numerous circumstances as an alternative to dry shelters that are more prevalent and accepted by the general public. However, these housing models benefit urban areas and not rural communities. Rural-based homeless individuals and families are more "hidden" as they occupy tents, campers, abandoned houses, barns and ice fishing houses. Homeless individuals and families in rural areas have a more difficult time accessing services provided in urban communities.

Justice Involved

Persons with mental illness and substance use problems are overrepresented in jails and prisons as compared to the general population. Across the United States, deinstitutionalization, along with a failure to develop easily accessible and useful outpatient alternatives for treatment, has led to correctional facilities housing the highest concentrations of people with mental health and substance abuse concerns in the country. National data has shown that nearly 70 percent of adults entering jails and more than 50 percent in state prisons have a substance use disorder. Additionally, the number of mentally ill inmates in America's jails and prisons is reported to have quadrupled over the past 20 years. Research suggests that up to 50 percent of jail and prison inmates may have a mental health concern in addition to substance use disorders. Estimates of severe and persistent mental illnesses among incarcerated adults range from 15 to 25 percent, as compared to 5 to 8 percent in the general population.[15]

Data for North Dakota prison facilities in 2015 shows that over 70 percent of individuals entering prison have an active substance use disorder diagnosis. Beyond that, 41 percent of male inmates have a mental health diagnosis in addition to substance use disorders, and around six percent meet criteria for a severe and persistent mental illness. About 50 percent of female inmates have a mental health diagnosis in addition to substance use disorders, with 14 percent diagnosed with a severe and persistent mental illness.[16]

Individuals with behavioral health issues and criminal justice involvement have increased hardship in finding housing as many landlords are allowed to choose whether or not they lease to those with criminal records. If these individuals were treated for their behavioral health issues and not incarcerated as a form of treatment, they would have one less barrier to obtaining housing.

Significantly more robust, wrap around services available to individuals within the community is critical, as individuals with justice involvement experience multiple barriers to accessing services. A common theme was that, in general, community-based treatment providers are resistant to serving individuals with criminal justice histories. Unfortunately, it is common for individuals to "burn bridges" with community treatment providers, which further limits their options. Another scenario described a "caste system" in both inpatient and community-based services, in which people who are justice involved face greater difficulty accessing services, receive lower-quality treatment, and are generally considered "less deserving" than those with no justice involvement.[17]

Another frequently cited challenge was access to housing. Felony convictions bar individuals from accessing HUD-funded and other publicly funded affordable housing options, and many private landlords are unwilling to consider renting to this population, especially if an individual is a registered sex offender. The instability of finding housing puts individuals at a higher probability of participating in activities that led to their incarceration. Justice involved individuals are not protected under the Fair Housing Act; therefore, landlords can reject their housing applications.

Even when individuals are able to find housing, they may have difficulty supporting themselves financially. Many have lingering justice involved issues as well as chemical dependency that needs to be addressed before being work-ready. As they address their behavioral and mental issues, seeking full-time employment may not be an immediate option as they need time and case management to adjust to life back in the community.

Another significant barrier to successful reintegration to the community concerns Medicaid eligibility. North Dakota is one of 19 states in which an individual's Medicaid benefits are terminated—rather than merely suspended—as soon as the person is incarcerated. This means that instead of activating coverage upon the

[17] 2018 North Dakota Behavior Health Study. 2018. p 83.

person's release, the person must reapply, impeding their successful transition back into the community. Since individuals are not eligible until they are officially released, prison staff assist individuals on what they need to do to get re-enrolled, but the individual themselves has to enroll again within 30 days of release.[18]

Behavioral Health

In 2016, almost 100,000 North Dakotans aged 18 and older met the criteria for a mental illness diagnosis, and an additional 23,454 people had a serious mental illness. The remaining 83 percent who have not received a diagnosis are nonetheless an important population for consideration, as this population includes young adults who may have behavioral health needs in the future, individuals from hard-to-reach populations who may be struggling with undiagnosed behavioral health challenges, and others for whom low-cost, proactive prevention strategies could prevent mental health conditions from occurring.[19]

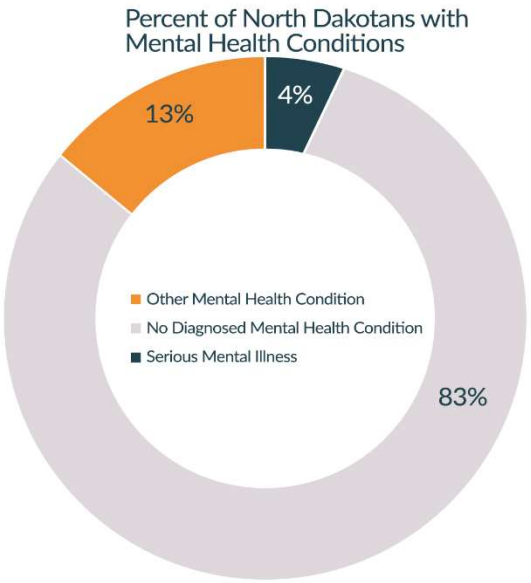

Figure 4. Percent of North Dakotans With and Without a Mental Health Diagnosis
Sources: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2015 and 2016, and U.S. Census Bureau, Population Division Release Date: June 2017

Among children and youth, the prevalence of mental health conditions is similar to national estimates. An estimated 12 to 25 percent of North Dakotan students have an emotional or behavioral disorder. In 2016, the annual average proportion of adolescents aged 12 to 17 with a major depressive episode in the past year was 11 percent, slightly lower than the corresponding national yearly average percentage of 12.8 percent.[20]

Table 4 presents numbers and characteristics of individuals who reported living in a homeless shelter or who received a health center service related to homelessness.[21] Table 4 likely underestimate the number of individuals with behavioral health needs who are homeless as the information only focused on recipients of some outpatient treatment.

Access to safe, adequate, and affordable housing is a critical element in supporting individuals with behavioral health needs to live independently in their communities. Unmet housing needs are obstacles to recovery and reduce the effectiveness of behavioral health treatment especially in rural areas. Most PSH units are based in Fargo and Bismarck, and other higher-population locations within the state and individuals will more than likely be relocated to these communities to be housed as part of their discharge plan from a mental health or substance use treatment facility. The lack of PSH in rural areas further complicates the accessibility for individuals seeking help outside of urban areas.

Within the Fargo-Moorhead area, three out of four homeless adults have serious health conditions, including mental and physical health problems, substance abuse disorder or evidence of a traumatic brain injury.[22] Based on an independent 2015 PIT survey commissioned by the Fargo-Moorhead Coalition for Homeless Persons, more than half of those surveyed were told by a doctor or nurse within the last two years that they had a serious mental illness, another 40 percent stated they had chronic physical health problems, and 30 percent considered themselves chemically dependent. These behavioral, mental and physical health issues impacted the respondents' ability to work, perform daily activities, manage finances and make sound decisions. Undiagnosed and untreated brain injuries may be an underlying cause of these issues. [23]

Native Americans

Native American's are the largest racial group other than whites in North Dakota, and in 2017 Native Americans totaled 21 percent of the state's total homeless population.[24] The amount of Native Americans experiencing homelessness is likely greater than then numbers reported due to the magnitude of homelessness both on and off of Reservations.

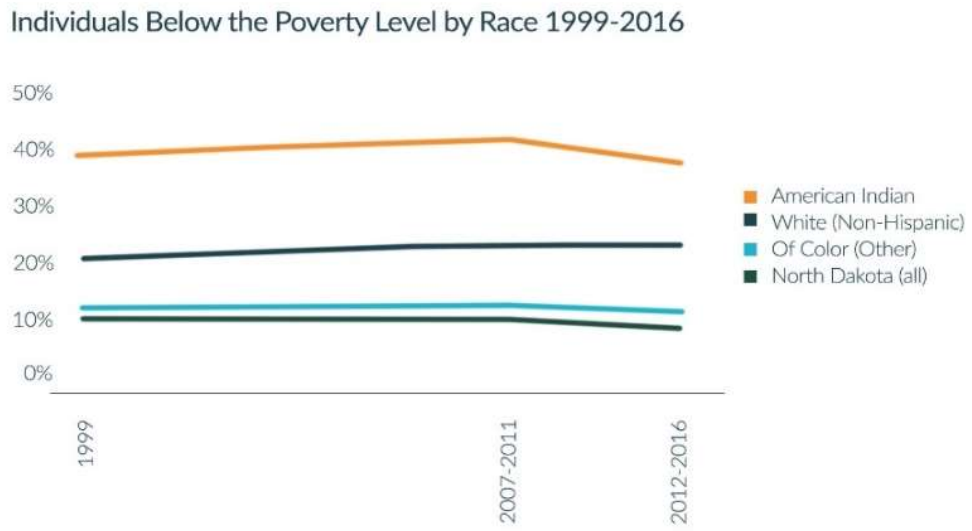

Figure 5. Individuals Below the Poverty Level by Race, North Dakota, 2012-2016
Sources: U.S. Census Bureau, Decennial Census and American Community Survey

The foundation of Native American culture emphasizes taking in family members and other tribal members who need a place to stay results in long-term doubling up of households. Therefore, the number of Native American's that would be considered homeless is more than likely higher than reported in the PIT count. Over-crowding and inadequate housing conditions put stress on quality of life, as the majority of Native Americans will not force members in their household out without another housing option.

Native American's face the highest percentage of poverty across all races in North Dakota, but the severity of poverty varies amongst the state's four Reservations.

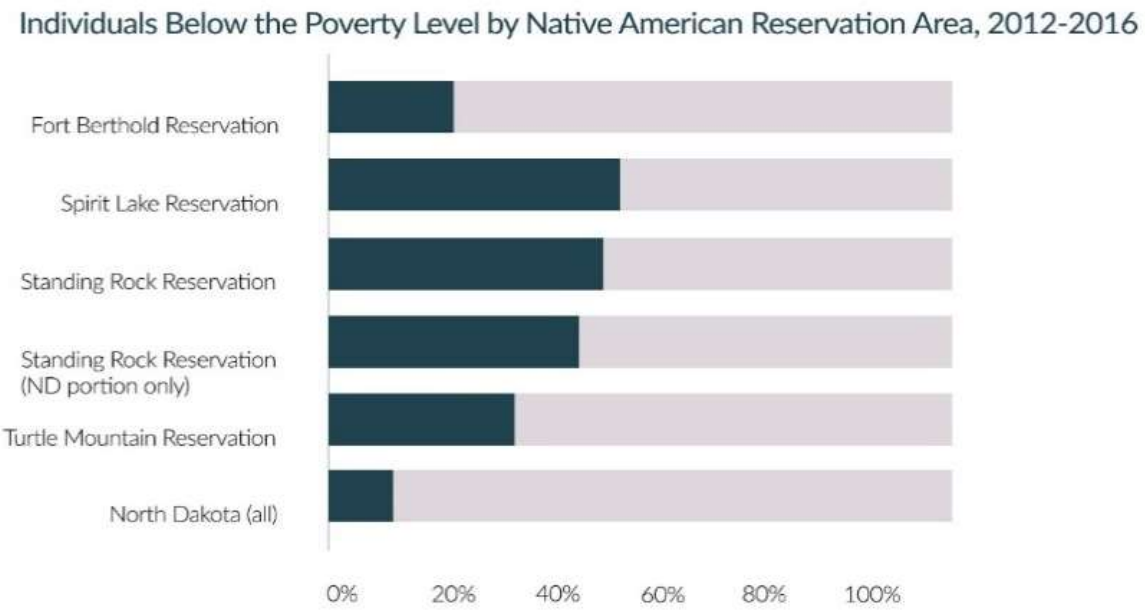

Figure 6. Individuals below the Poverty Level by Native American Reservation Area, North Dakota, 2012-2016
Sources: U.S. Census Bureau, American Community Survey

The poverty rate on the Fort Berthold Reservation is lowest due to the energy development that occurred on the reservation and surrounding area during the last decade. Other reservations do not have the same level of economic development opportunities which is exemplified by the percentage of cost-burdened households.

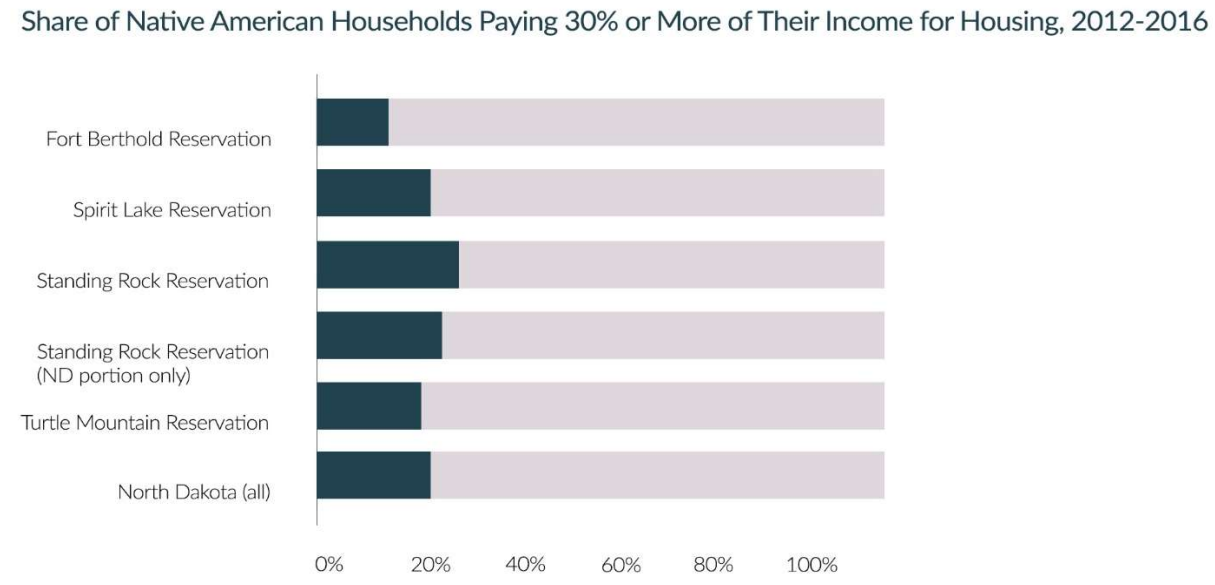

Figure 7. Share of Households Paying 30 percent or More of Their Income for Housing
Sources: U.S. Census Bureau, American Community Survey

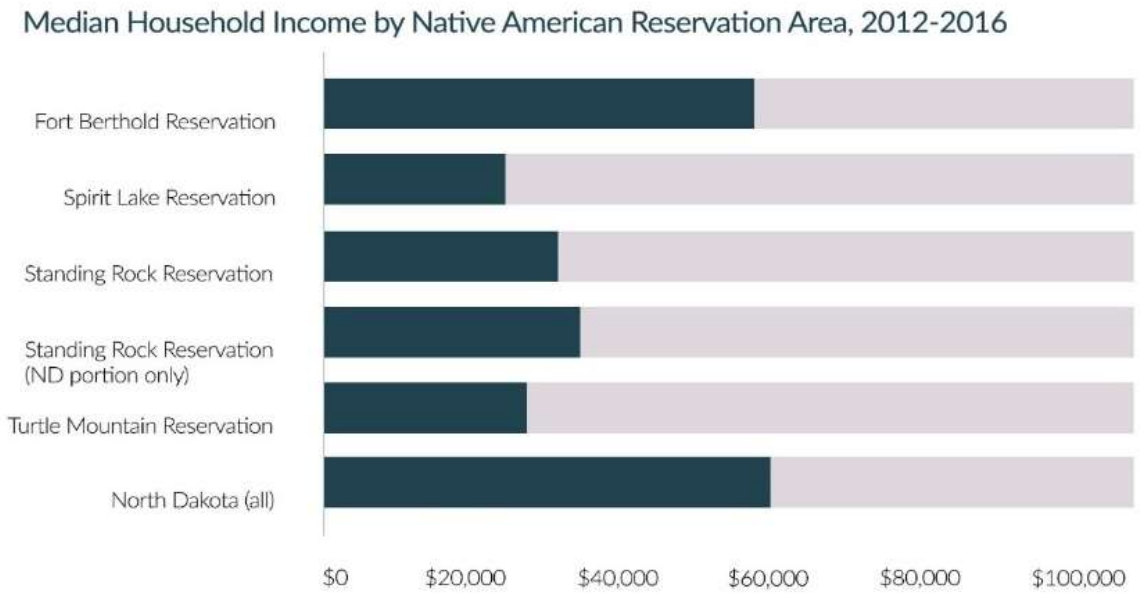

Figure 8. Median Household Income by Native American Reservation Area, North Dakota, 2012-2016
Sources U.S. Census Bureau, American Community Survey

Although there have been increased housing developments on the reservations, affordable housing options for homeownership and rental units is difficult to obtain. Construction of housing developments are usually smaller in total units and infrequent due to funding availability and fluctuating community needs; therefore, it is more challenging to access competitively priced building supplies and contractors willing to complete the project in a timely manner.

More than 40 percent of Native Americans are homeowners; however, mortgage lending on tribal land is an underserved market with unique challenges such as trust land, fractioned land ownership, and limited access to financial institutions. While tribal trust land status is no longer considered a major barrier since the implementation of Section 184 of the Indian Home Loan Guarantee Program, the volume of mortgage lending on tribal trust land is still quite small. Rental property managers on the Reservation deal with the same issues as properties off of the Reservation when renting to vulnerable populations: higher percentage of damaged the units, on-going criminal activity, and the tenants not paying rent on time.[25]

It is estimated that 78 percent of Native Americans live off of the Reservation, and poverty remains one of the most challenging aspects of urban Indian life. Whether or not Native Americans have financial stability off of the reservation, they have either experienced poverty themselves or know a family member who is living in poverty. Housing and homelessness remain at the top list of challenges they face.[26] The outmigration of youth and young families moving to more urbanized areas away from the reservations seeking higher educational and economic opportunities continues to increase. However, many Native Americans transition on and off the Reservation as they struggle to find support networks, fit in culturally, or they are not able to achieve financial stability.

YOUTH

In 2017, there were 178 documented homeless children ages 0 to 18 years old living in an emergency shelter, transitional living facility, or unsheltered according to the HUD PIT count.[27] School-age children, ages 5 to 18 years old, experiencing homelessness was reported much higher by NDDPI with 2,166 students documented as either sheltered, doubled-up with other families, living in a hotel/motel, unsheltered, or unaccompanied by an adult during the 2015-2016 school year.

Limitations in data collection and self-reporting may have resulted in a lower total number of homeless children or those at risk of homelessness across the state, as the U.S. Census estimated nearly 50,000 North Dakotan children are living in families with an income below 200 percent of the federal poverty level. Half of all Native American children living in North Dakota were impoverished in 2015, more than five times the rate for white children at nine percent.[28]

Further complicating the wellbeing of children is the state's rise above the national average for child maltreatment, which encompasses both abuse and neglect. In 2015, 1,760 North Dakota children were victims of maltreatment; specifically for every 1,000 children ages 0 to 17 in the state, 10.4 were abused or neglected. Of these victims, 77 percent were neglected, 32 percent were psychologically abused, 12 percent were physically abused, and four percent were sexually abused.[29] Physical, sexual and mental abuse during childhood are the leading causes for long-term homelessness as adults.

Juvenile delinquency has potentially high stakes for both individuals and society as a whole. Delinquency is linked to higher crime rates in adulthood and other adverse outcomes such as homelessness. One estimate suggests that between 50 and 75 percent of adolescents who have spent time in juvenile detention centers are incarcerated later in life. A total of 3,471 North Dakota juveniles ages 10 through 17 were referred to court at least once for delinquent or unruly behavior in 2016. [30] Following a national downward trend, the number of North Dakota juveniles referred to court has decreased an average of five percent annually since 2003. [31]

Local service providers have expressed their concern about assisting youth with opioid addiction and the difficulties in getting this population help and housing to keep them off of the streets. Youth with trust issues towards adults is extremely difficult to convince to seek help.

A major contributor to the financial stability and well-being of children is secure parental employment; however, many working families with children struggle to make ends meet. In 2015, the poverty threshold considered insufficient for a family of four with two children to afford basic necessities, was $24,036. In North Dakota, 21,716 children were living in families whose income was not meeting this threshold. Younger children, ages 0 to 4 in the state had a higher poverty rate than older children ages 5 to 17, 16 percent compared to 13 percent respectively. In eight North Dakota counties, at least one in five children was living in poverty. Children living on Native American reservations tend to have the highest child poverty rates in North

Dakota. Data from 2015 indicate that about half of all children in Rolette and Benson counties were impoverished, 49 percent and 48 percent respectively.[32]

The Temporary Assistance to Needy Families Program (TANF), designed to help families in need to achieve self-sufficiency, assisted 4,649 North Dakota children ages 0 through 19 in 2016, down five percent from 4,887 in 2015.[33] The Supplemental Nutrition Assistance Program (SNAP) provided food to 37,758 North Dakota children ages 0 through 18 in 2016, 21 percent of children statewide. In North Dakota public schools, 37,928 children were eligible for free or reduced-price lunches in 2016, 33 percent of total school enrollment. In five of North Dakota's 53 counties, Sioux, Rolette, Benson, Sheridan and Mountrail, at least half of students were eligible for free or reduced-price lunches in 2016.[34]

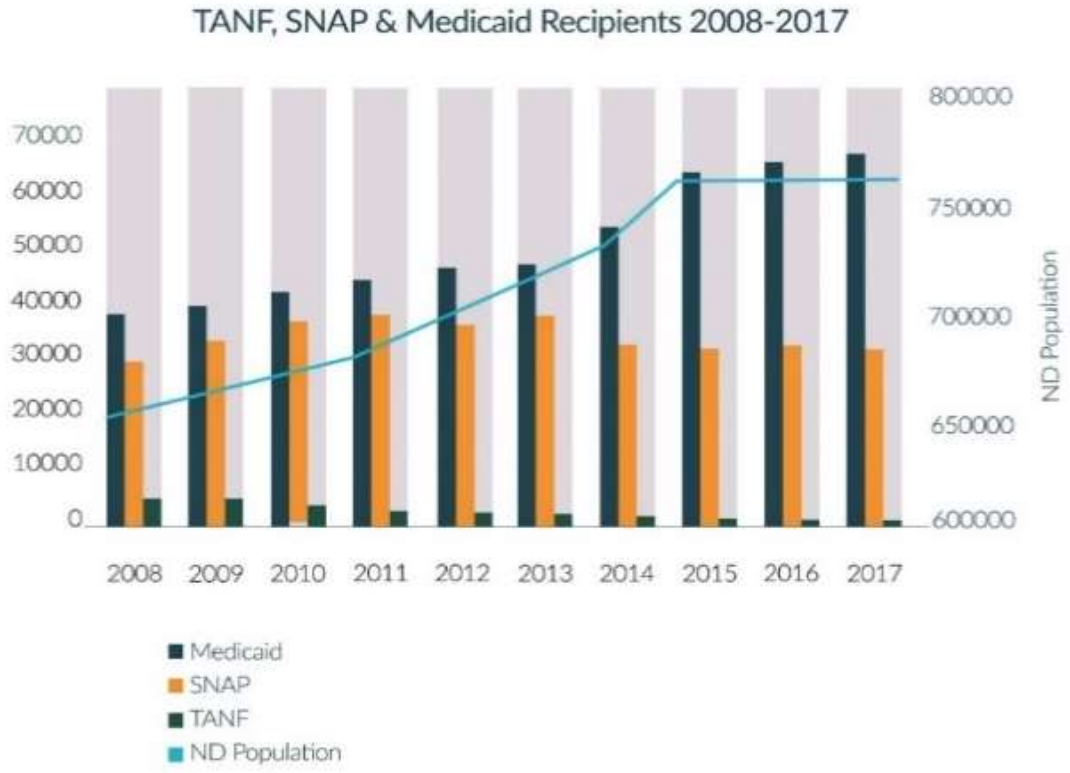

Figure 9. TANF, SNAP and Medicaid Recipients 2008-2017
Source: NDDHS

However, taking care of young children while holding down a job can be challenging. This is especially true for single parents who may have as many child-related demands on their time as married parents, but half as many adults in the household to meet them. To allow parents to work or attain the education necessary to become employed and self-sufficient, 6,610 children benefited from the North Dakota Child Care Assistance program in 2016, 5 percent of all children ages 0 through 13 statewide.[35]

High-quality child care nurtures, stimulates and supports children as they build the confidence and critical thinking capacities they need to thrive in school and life.[36] In North Dakota, single parents pay 34.2 percent of their income for infant-center care. Married parents of two children living at the poverty line pay 66.9 percent of their household income for center-based child care. The cost of infant care in North Dakota is more than the annual cost of college tuition at a four-year college. The average price of center-based child care for an infant costs nearly a year of mortgage in North Dakota.[37]

Foster Youth

In 2017, 2,048 youth were placed in foster care with the median annual increase over the past decade at six percent.[38] Often youth in the foster care system have lived through multiple traumas and disruptive events such as abuse and/or neglect, multiple foster home placements, lack of continuity in education, and an array of lost relationships such as friends, families, and/or siblings by the time they begin their transition into adulthood. Their life experiences can create additional problems resulting in mental illness and substance abuse, and an increased likelihood of incarceration and homelessness.

On average, 130 foster care youth turn 18 years old each year in North Dakota. At this point, youth can either age-out of the system or enroll in the 18+ Continued Care Program, which allows youth to remain in foster care until they turn 21 years old as long as they are enrolled in higher education. Of those turning 18, approximately 37 percent utilize the 18+ program annually.[32]

Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

In 2015, NDDHS – Children and Family Services Division completed the National Youth in Transition Data Base (NYTD) Cohort Survey, which surveyed current and former foster youth at ages 17, 19 and 21 to measure outcomes for youth following their discharge from foster care. By engaging these individuals at three different ages, the state can better understand the experiences of foster youth following their release from the program. The survey compares North Dakota to the national average in homelessness, substance abuse, incarceration, giving birth to or fathering a child, employment, public assistance, and education. The following five outcomes are outlined in the survey report.[39]

Outcome 1: Experiences with Homelessness

Leaving foster care unprepared to live on their own, puts youth at risk of becoming homeless soon after discharge. At each age level surveyed, North Dakota foster youth experience homelessness more than the national average. These youth have more than likely been homeless before age 17 and will more than likely remain homeless for an extended period then youth not in foster care.

[38] North Dakota Department of Human Services-Children and Family Services Division.
[39] National Youth in Transition Data Base. North Dakota Department of Human Services-Children and Family Services Division.

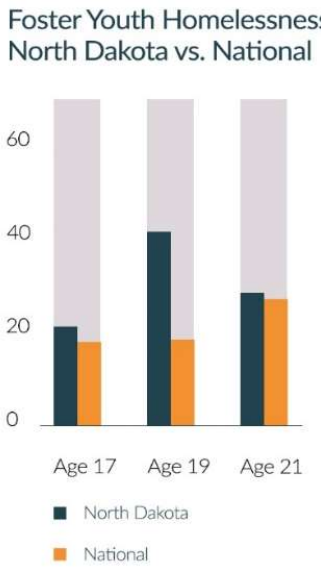

Figure 12. North Dakota Homeless Foster Youth vs. National Average
Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

Outcome 2: High-Risk Behaviors

North Dakota youth percentages are higher than the national average for substance abuse, incarceration and giving birth or fathering a child. These three scenarios hinder successful transition into adulthood among youth in foster care.

At age 17, almost half of the survey respondents had at some point during their lifetimes been referred for substance abuse assessment or counseling, and 20 percent of age 19 respondents and 14 percent of the age 21 survey respondents reported having had a referral to substance abuse assessment or counseling within the past two years. Youth incarceration rates in North Dakota are the third highest per capita in the nation. The data indicate that one out of every three homeless young adults surveyed has been in either foster care or correctional care as a juvenile. Youth emancipating from the Youth Correctional Center pose a particular challenge. Former foster youth continue to find themselves homeless at a significantly higher rate than their peers.

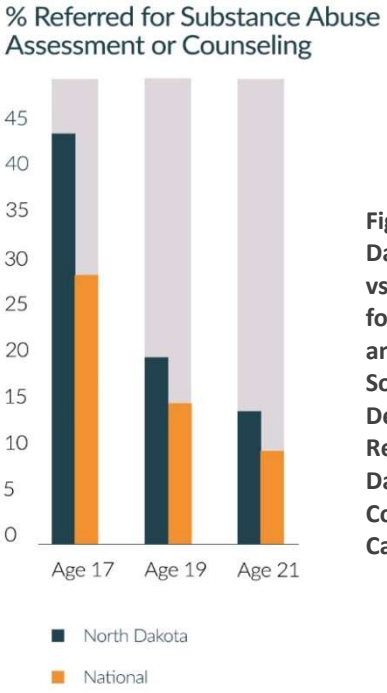

Figure 13. North Dakota Foster Youth vs. National Average for Substance Abuse and Counseling
Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

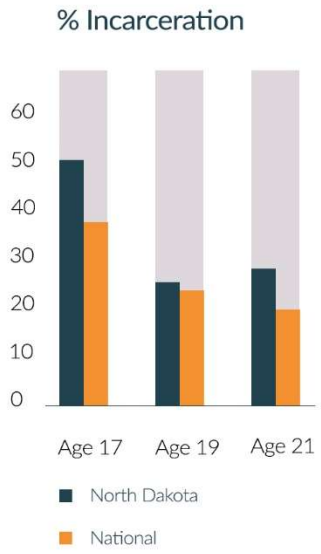

Figure 14. North Dakota Foster Youth Incarceration vs. National Average
Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

Outcome 3: Access to Health Insurance

Access to health care can help ensure that youth receive the prevention and treatment services they need to remain healthy and manage behavioral health issues or substance abuse. Youth in title IV-E foster care are categorically eligible to receive Medicaid. Additionally, some provisions under the Patient Protection and Affordable Care Act increased access to health care for youth formerly in foster care, including the extension of Medicaid coverage to young people up to age 26 in certain circumstances.

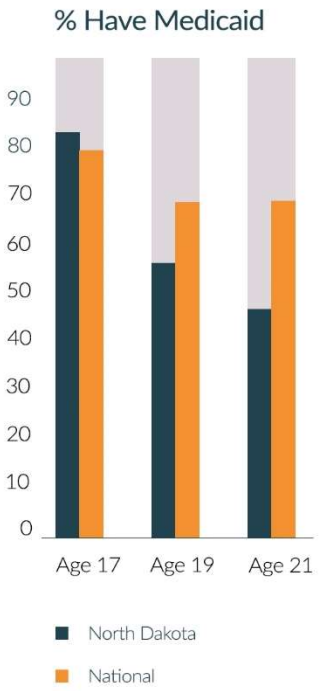

Figure 15. North Dakota Foster Youth with Medicaid vs. National Average
Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

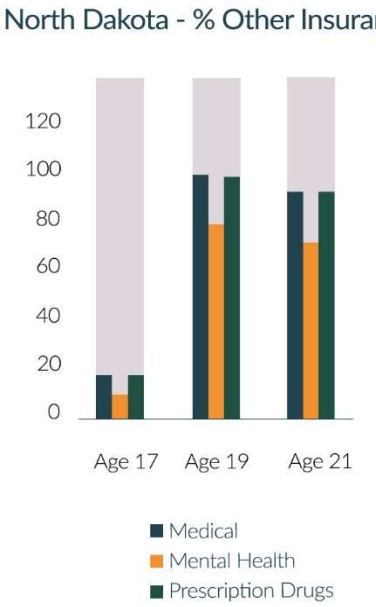

Figure 16. North Dakota Foster Youth with Insurance Coverage
Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

Outcome 4: Financial Self-Sufficiency

As youth age and make decisions about whether or not to remain in or return to foster care, financial stability becomes a crucial indicator of their readiness for independence. Over 18 percent of age 17 respondents reported working either full- or part-time; at age 19, 43 percent were working full- or part-time, and at age 21, 61 percent were working full- or part-time. By age 21, 24 percent of North Dakota respondents reported receiving public assistance compared to 38 percent nationally. Fewer respondents reported receiving educational, financial assistance than those responding on the national level.

Outcome 5: Educational Attainment

Achieving a high school diploma or General Equivalency Degree (GED) can be considered a minimal requirement for self-sufficiency and can assist in establishing a solid educational foundation that will prepare youth for future educational pursuits. Respondents were asked to report their current enrollment status in an educational program, and the highest educational certification received. Ninety-seven percent of age 17 survey respondents had not yet received any educational certification, but 91 percent of them indicated they were currently enrolled in and attending some type of educational program. By age 19, 65 percent of survey respondents had received a high school diploma or GED, and by age 21 the percentage had increased to 67 percent.

Frail Elderly

The number of elderly households is projected to increase substantially as a result of the baby boom cohorts aging forward into the next age category. Such households on limited or fixed incomes can be vulnerable to becoming burdened by housing costs. Nearly half of all North Dakota renter-occupied households ages 65 and older were cost-burdened in 2014, and 17 percent of owner-occupied households ages 65 and older were cost-burdened.[40] Increased healthcare costs put additional pressures on housing-burdened households forcing many elderly individuals to abstain from medical treatments and medications resulting in declined heath, eventually forcing them out of their homes and into assisted living and nursing home facilities.

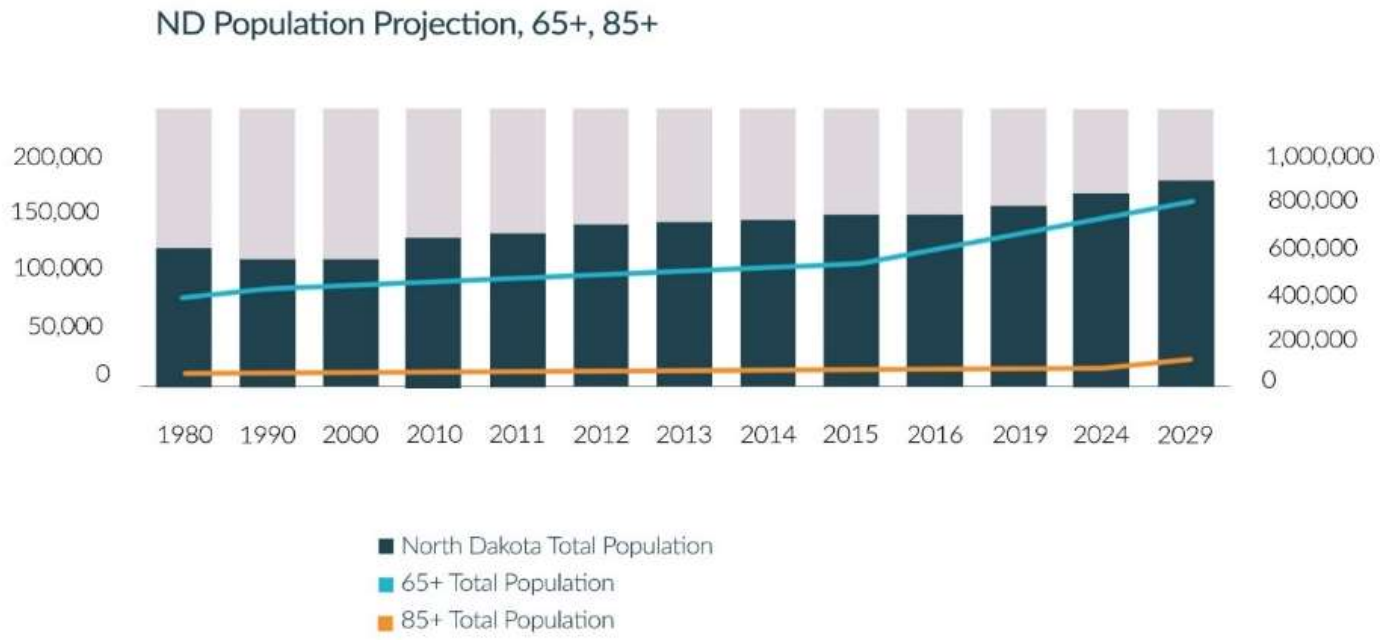

Figure 17. North Dakota Population Projections for the total state, 65+ and 85+, 2029

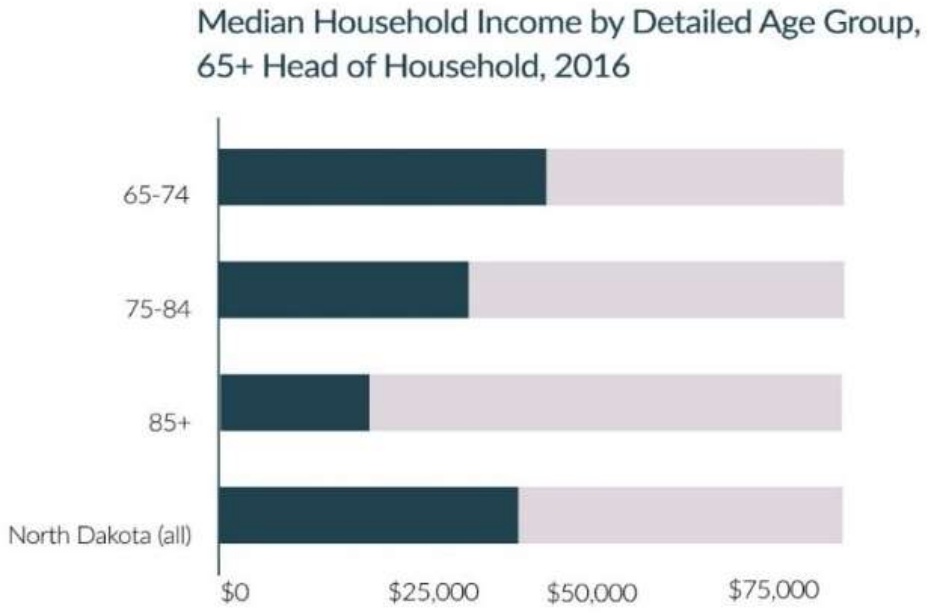

Figure 18. Median Household Income by Detailed Age Group, 65+ Head of Household
Source: Integrated Public Use Microdata Series from the U.S. Census Bureau, American Community Survey

North Dakota ranks seventh in the nation in the highest proportion of individuals age 85 years and older. Based on the aging population and extended life expectancy, it is anticipated that one out of two North Dakotans will need long-term care services such as nursing facilities, basic care, assisted living, swing beds or home- and community-based care in their lifetime. In 2017, there were more than 16,000 individuals in basic care, assisted living or skilled nursing facility. The state has the oldest nursing home residents with 47 percent aged 85-95 years, which is the highest in the nation and is the second highest in the nation with 9.2 percent over the age of 95.[41]

Table 6 below is an overview of the level of care North Dakotans receive outside of their home. Elderly households that are able to retrofit their homes to address mobility challenges are the least cost-burden solution for the individual and the state.

Disabled

In North Dakota, 11 percent of the total population, or 72,674 people reported having a disability including ambulatory, visual, cognitive, and hearing to needing assistance with self-care and independent living. The employment rate for persons with a disability is much lower than for those without a disability. The disparity in employment between individuals with a disability and those without is illustrated by the difference in mean annual earnings. In 2014, mean annual earnings for the non-institutionalized population ages 16 and older with a disability in North Dakota was $22,377 compared to $31,754 for persons without a disability. Considering the lower rates of employment and lower mean annual earnings among individuals with a disability in North Dakota, the higher prevalence of poverty among those with a disability is not unexpected. Individuals with a disability were more than twice as likely to be living in poverty as individuals without a disability. Twenty-four percent of persons with a disability lived in poverty compared to 10 percent of persons without a disability.[42]

[42] 2016 North Dakota Statewide Housing Needs Assessment: Component 2-Special Housing Topics. p 16-8.

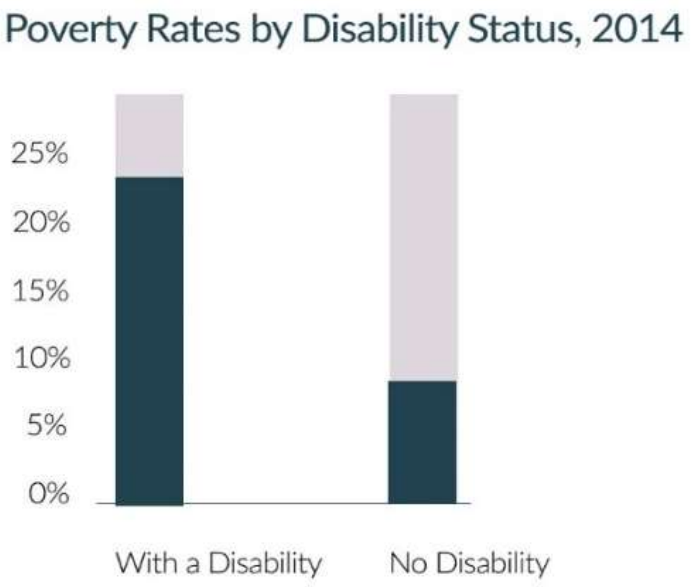

Figure 19: Poverty Rates by Disability Status in North Dakota, 2014
Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Persons less than 65 years old with disabilities are projected to increase by 6,108 by 2029, a 15 percent increase. The number of individuals with a disability ages 65 and older is projected to increase by 17,092, a 52 percent increase by 2029. Disability rates were assumed to remain the same until 2029, 6.7 percent for the 0 to 64 age category and 34.4 percent for the 65 and older age group. However, future trends on the proportion of the population with a disability should be monitored. In recent years, the number of people with a disability increased faster than the increase in the number of people without a disability.[43]

The North Dakota State Hospital provides inpatient and residential care for substance abuse and severe mental illness. Individuals served by the State Hospital often have multiple needs and diagnoses—they may struggle with both mental illness and substance abuse, have developmental or cognitive disabilities, traumatic brain injuries, or other conditions that render them unable to care for themselves. Most patients treated at the State Hospital were discharged to their residence. Nearly all other patients were discharged to some other type of group-living or institution. Of all the discharges from 2010 to 2014, 60 percent were discharged to a personal residence, 14 percent were discharged to intermediate care facilities, 13 percent to correctional facilities, and 12 percent to another inpatient facility. While a majority of state hospital patients were discharged to known locations, a small percentage of discharges were classified as housing insecure. Examples of housing insecure discharge types include homeless shelters, left against medical advice, discharged after a court appearance, and unknown. The number of housing insecure discharges have increased since 2010. In 2010, 12 discharges were categorized as housing insecure. In 2015 the number of housing insecure discharges per year had doubled to 24. Put into another context, in 2015, on average, two discharges per month were housing insecure discharges. [44]

Veterans

In the past decade, the North Dakota Department of Veterans Affairs and the Fargo VA Health Care System's Homeless Veterans Program has worked with 1,200 veterans experiencing homelessness across the state. North Dakota's VA has 275 HUD-VA Supportive Housing (VASH) Program vouchers that are available to veterans and their families to live in market-rate rental units with the VA providing case management services. Utilization of the vouchers across the state is 90 percent, and no veterans are on a waiting list.[45]

Since 2006, the mortality rate among homeless veterans in North Dakota has dropped from 20 percent to 1.46 percent in 2016. Predominantly the cause of death is medically and age-related. Less than one percent is reported as suicides. Community Action of North Dakota is in the process of submitting data to HUD-VA to have North Dakota declared at "Functional Zero" for homeless veterans.[46]

Challenges of Affording a Home

Affordable housing is a function of both the supply of low-cost housing and the income levels of residents. Table 7 provides a benchmark of income levels for residents in the state and is designed to align closely with various federal housing programs. The benchmark of $69,600 in 2014 is based on median family income (MFI) of North Dakota residents as reported by HUD. Six categories of income are provided for program purposes and are based on a percentage below or above the state's MFI. Monthly affordable housing costs were estimated at 30 percent of the corresponding income category while affordable purchase price was based on a more complex formula that is typical of those used by lenders. The main assumptions include a 30-year loan fixed at 4 percent interest, 5 percent down payment, property taxes at 1.25 percent of the loan, property insurance at 0.6 percent of the loan, and total debt at no more than 20 percent of income.[47]

Income Categories Based on Income as a Percentage of the Median Family Income (MFI) FY 2014 (FY 2014 MFI = $69,600 in North Dakota)

Characteristic	Extremely Low: 0 to 30% MFI		Very Low: 31% to 50% MFI		Low: 51% to 80% MFI		Lower Moderate: 116% to 140% MFI		Upper: Above 140% MFI	Tax Credit: 0% to 60% MFI	
	From:	To:	From:	To:	From:	To:	From:	To:		From:	To:
Annual Income Ranges ($)	$0	$20,880	$20,881	$34,800	$34,801	$55,680	$55,681	$80,040	$97,441 and above	$0	$41,760
Monthly Affordable Housing Costs ($)	$0	$522	$523	$870	$871	$1,392	$1,393	$2,001	$2,437 and above	$0	$1,044
Affordable Purchase Price ($)	$40,351		$67,504		$108,612		$189,313		$227,168	$80,734	
Percent of Owner-Occupied Housing Units that Are Affordable	15.4%		22.1%		43.0%		63.3%		81.7%	29.9%	
Percent of Renter-Occupied Housing Units that Are Affordable	27.9%		69.8%		87.3%		90.2%		91.1%	75.7%

Based on these assumptions, the purchase price of a home for a family below 30 percent of the MFI would be $40,351. At present, only 15 percent of the owner-occupied housing units in the state are affordable for people in this income circumstance. Similarly, only 28 percent of the rental units in the state are affordable to those below 30 percent of the state's MFI. In contrast, those in the moderate income bracket have a much greater inventory of appropriately priced housing; 70 percent of the current owner-occupied housing stock and 91 percent of rental units would be affordable for moderate-income households.[48]

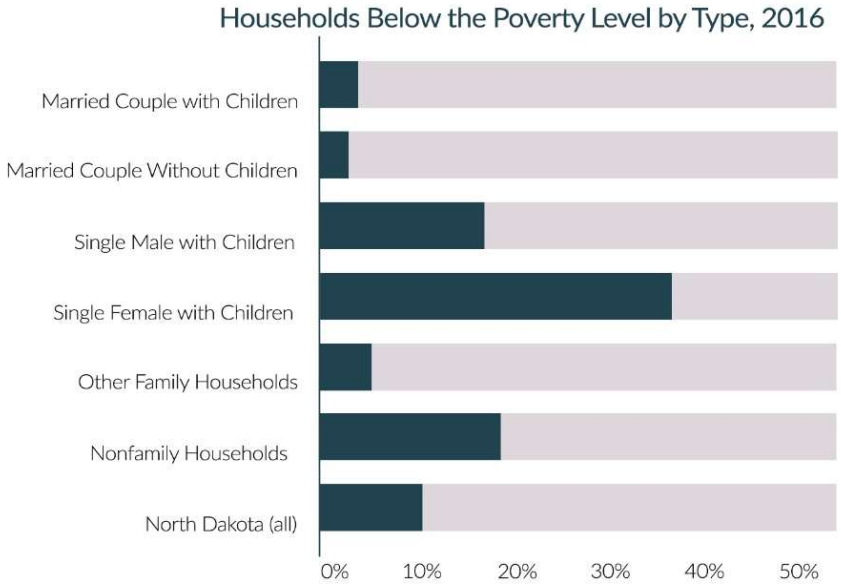

Figure 21. North Dakota Household Below Poverty Level by Type, 2016
Source: U.S. Census Bureau, American Community Survey

It is assumed that renting a home or apartment is more accessible than owning one; however, North Dakotans face extreme challenges to be able to afford an apartment. The state-set minimum wage is $7.25 an hour, and a person earning minimum wage would need to work 70 hours per week to afford a one-bedroom rental at the Fair Market Rent rate. Tenants would need to earn more than twice the minimum wage to only have to work 40 hours a week and be able to afford the Fair Market Rent for a two-bedroom rental home without paying more than 30 percent of their income. In addition to the income challenge, the number of rental housing units available in the state as of 2016 was only 40 per 100 extremely low-income renters.[49]

North Dakota is divided into eight housing and planning regions as shown in Figure 24 and each have unique strengths and challenges concerning housing stock, population growth and aging, economic development, and rural, urban and tribal reservations communities. Projected change in the number of households by income is an indicator of potential future housing needs. Double-digit growth is anticipated across all household income levels statewide as shown in Figure 25. Projected change is higher in the lower income brackets than the higher income brackets, and change in households is the greatest for extremely low and very low-income households with projected increases of 24 and 25 percent, respectively. Region I will experience the highest increase across all income groups while the most disparity in growth rates among household income levels is in Region VII where growth in the extremely low- and very low-income categories is double that of the higher income brackets at 31 percent. [50]

Housing Development & Voucher Programs

State and federal programs provide assistance through various mechanisms to assist extremely low, very low and low-income households. Several programs are project-based for finite periods, and a substantial number of those housing units will come to the end of the program participation period by 2029. The potential loss of housing units in both rural and urban areas could present substantial challenges for low-income households, especially considering the projected statewide increase in the number of such households. Planning to address the effects of the potential loss of this inventory will be critical to assuring that the state's most vulnerable citizens have adequate access to affordable housing.[51]

The U.S. Department of Agriculture (USDA) Rural Residential Housing Program makes loans to qualified housing developers as an incentive to build multi-family rental properties that meet the needs of low-income, elderly and disabled individuals and families in communities with a population of 35,000 or less. In addition to low-interest loans for development, USDA also provides rental assistance for low-income households. In 2015, USDA had 2,477 housing units in 146 multi-family properties in 99 communities around North Dakota. Three-fourths of USDA's housing units receive rental assistance. By 2029, 635 units or 26 percent of USDA housing will reach maturity and no longer be enrolled in the program. While the number of properties set to expire appears to be relatively small, the loss of even a few low-income housing units could have substantial impacts, especially in communities with low inventories of rental properties.[52]

HUD's Low-Income Housing Tax Credits (LIHTC) provides federal income tax credits to individuals, partnerships, LLCs or other entities, such as housing authorities and other legal entities, for the construction or renovation of properties that serve the needs of low- income households. Currently, there are 5,683 housing units in the LIHTC program. Like USDA's low-income housing, a substantial portion of the LIHTC properties, 37 percent or 2,124 units, in North Dakota will reach maturity by the end of 2029. Most of the maturing properties are located in the state's largest cities. Given the projected increase in the number of low-income households in the state's five largest urban centers, the need for affordable housing for such households is likely to increase making the potential loss of this housing inventory problematic. [53]

HUD's Housing Choice Voucher program, administered by public housing agencies, assists very low-income, elderly and disabled individuals and families. During the first quarter of 2016, 6,514 housing units in North Dakota were supported by the program. HUD's Public Housing program is administered by local housing authorities, which also owns and manages the rental housing for eligible low-income, elderly and disabled individuals and families. There are 1,709 units of public housing in North Dakota managed by 15 public housing authorities.[54]

NDHFA provides rental assistance with project-based programs known as Section 8 Performance-Based Contract Administration (PBCA). Currently, NDHFA has project-based assistance contracts with 98 properties with a total of 2,964 housing units. When contracts expire, properties may opt out of the program. NDHFA also administers the HUD Moderate Rehabilitation (Mod Rehab) program, and as of 2016, there were 10 properties with 157 units. The Mod Rehab program was repealed in 1991, and no new projects are allowed, therefore, once a property opts out, it cannot reapply. Because both programs are closed, properties in the PBCA program and the Mod Rehab program will likely decrease over time.[55]

HIF was authorized by the North Dakota Legislative Assembly in 2011 and has become one of the most successful tools to create affordable housing in the state. Housing units in the program are to benefit low- to moderate-

[51] 2016 North Dakota Statewide Housing Needs Assessment: Component 2-Special Housing Topics. p 9.

[55] 2016 North Dakota Statewide Housing Needs Assessment: Component 2-Special Housing Topics. p 31-2.

income households or below 140 percent of area median family income. Like the LIHTC program, units are income- and rent-restricted to the target households. NDHFA has allocated more than $89.6 million to 77 projects to support 2,380 new units in 26 communities across the state. HIF was reauthorized in 2017 by the North Dakota Legislature, but no funding was allocated to the program.[56]

MFP is administered by NDDHS and is an $8.9 million grant from the Centers for Medicare and Medicaid Services to help approximately 110 Medicaid clients who are older adults or people with developmental disabilities transition from nursing homes or institutions and reintegrate them into the community. A full year of case management is provided in addition to up to $3,000 for one-time transition costs.[57] Funding for the program will no longer be available after 2019 and operation of the program will cease in 2020.

Moving Forward

Moving Forward

The North Dakota 10-Year Plan to End Long-Term Homelessness focused on the immediate need for PSH and affordable housing as the cornerstone of ending homelessness. In order to prevent, reduce and end homelessness, a more systematic and collaborative approach to early intervention is needed to identify individuals that need short-term, assistance-based solutions and those that need more intensive, ongoing care to conserve local, state and federal resources.

According to the U.S. Interagency Council on Homelessness, in 2017 a chronically homeless person costs taxpayers as much as $30,000 to $50,000 per year.[58] That same year North Dakota counted 1,089 homeless individuals, of which 45 were chronically homeless. Using the base national average of $30,000, North Dakotan taxpayers spent $1,350,000 on emergency medical care, inpatient bed visits, detox programs, jails, prisons and psychiatric institutions for those chronically homeless individuals.

After reflecting on progress and roadblocks at the state and local level to address homelessness, members of the NDICHP and local service providers identified specific groups that are more vulnerable and would benefit the most from concentrated efforts. The following recommendations are broad-based and will require dedication and investments from numerous state agencies to ensure vulnerable populations are getting adequate services to accommodate their unique needs and help them be functioning and contributing members of North Dakota's communities. Some of the recommendations are within the 2018 North Dakota Behavioral Health System Study[59] and the State of North Dakota's Information Technology Department's Citizen Experience Initiative.

Breaking the Cycle of Generational Poverty

To end the cycle of generational poverty, children and their parents both need to be housing stable. Screening mechanisms need to be in place for service providers, primary care providers and school counselors to be able to identify problematic family dynamics and refer them to a case manager based on their current situation and complexity of need.

- Create more wrap-around service based housing programs for single parents with children. The Jeremiah Program and Grace Gardens, both located in Fargo, provide safe and affordable housing, support for continued education, quality early childhood education, life skills training and a supportive community. Parents can focus on personal and professional development to become self-sufficient. During the day, young children are enrolled in reliable daycare, receiving early childhood education opportunities so they are school ready. School-aged children are in a controlled environment where they feel safe and receive the support they need to succeed in school. Research conducted for the Jeremiah Program determined that every dollar spent on the Program resulted in a $4 savings in public services across two generations.[60]

- Expand outpatient and community-based services that are flexible such as peer support, community health workers, in-home and school-based clinical services and substance use disorder treatment services to address the behavioral health needs of children, youth and their families. Stabilizing the

[58] Ending Chronic Homelessness in 2017. Retrieved from https://www.usich.gov/resources/uploads/asset_library/Ending_Chronic_Homelessness_in_2017.pdf

[59] 2018 North Dakota Behavioral Health System Study. Retrieved from http://www.nd.gov/dhs/info/pubs/docs/mhsa/2018-4-nd-behavioral-health-system-study-final-report-hsri.pdf

[60] Jeremiah Program-Our Impact. Retrieved from https://jeremiahprogram.org/our-impact/

family in their home in their community will lessen the need for relocation and out-patient treatments.

- Expand targeted proactive in-home supports for families with children and youth at risk of foster care placement and justice involvement. There is a need for targeted support for children and youth as well as for parents whose children are at risk of out-of-home placement and justice involvement. Parental behavior is the main barrier to family reunification, therefore if more services were provided, youth may not need to enter the foster care system. Many youth who are justice involved also have a parent or close relative with justice-involvement.

- Develop a streamlined process for NDDPI homeless liaisons located in school districts across the state to be able to refer a case manager to assist families in accessing housing both in urban and rural communities.

Children that are not housing stable, are within the foster care system, do not graduate from high school, or have mental health or substance issues have a much higher probability of needing public assistance as an adult. Early detection and prevention are the best methods to help youth navigate difficult living situations.

- Explore barriers to create emergency shelters, low-barrier housing, host homes and other short- and long-term housing options for youth and young adults who are unsheltered, fleeing an unsafe situation, or experiencing a housing crisis. There is an unfilled gap for those ages 16 to 24 that need refuge in a safe space without being housed with chronically homeless adults.

- Coordinate entry processes and support services that are trauma, age and developmentally appropriate. Ensuring youth are housing stable is critical to their overall well-being especially for them to be able to create permanent and healthy connections with adults and continue to pursue educational or employment opportunities.

- Review state and federal policies and processes impacting unaccompanied youth as well as youth aging out of the foster care system to determine any barriers that can be eliminated. Unaccompanied and emancipated youth experience legal barriers that prevent them from accessing housing, employment, and government documents.

Lessening the Cost

Some individuals have complex medical and emotional needs, which prohibits their ability to live on their own without some sort of social network assisting them. These individuals are classified as the chronically homeless and create the biggest financial burden on local medical, law enforcement and service providers.

- Finance more Housing First facilities creating more homes to stabilize the chronically homeless. When basic needs are taken care, residents can focus on treating their issues, ultimately saving lives and reducing costs. The Cooper House in Fargo and LaGrave on First in Grand Forks provide permanent housing to the chronically homeless. Residents are charged rent, can have limited access to alcohol and receive services at their request. This housing model helps control public service costs these residents would have used for emergency shelter, emergency room visits, incarceration, and

detox centers. An independent study from Eide Bailly reported housing 66 individuals in the Cooper House saved the public $204,140 in service costs over 12 months.[61]

- Provide funding for support services and operational expenses. If service providers are not able to staff the facility and provide onsite, person-centered treatment, individuals living at the facility will not be successful in their recovery, stabilization, and integration back into the community.

- Explore the cost and benefit of funding "harm reduction" shelters, where residents can consume substances or come into a shelter under the influence of drugs and alcohol. Traditional homeless shelters have strict sobriety rules. If individuals are not sober or if they want to continue to consume substances, their only option is to do so in public. Individuals in the harm reduction shelter may form a pattern of consistency and service providers can develop relationships to help them reduce substance use or focus on sobriety and find more permanent housing options. Studies have identified the effectiveness of harm reduction shelters to curb consumption by creating a stable environment, therefore reducing the cost of public resources.
  - Withdrawal Management Unit also referred to as a Detox Shelter have proven successful in the city of Fargo and is adjacent to the Gladys Ray Shelter and the Veterans Drop-In Center. The Unit provides short-term residential and social (non-medical) detoxification services in a clean, supportive and calm environment designed to assist individuals through the difficulties and dangers from substances in a non-medical setting.[62] This format is more cost effective when it can be leveraged instead of seeking emergency medical treatment.

- Create consistent funding for state housing and service programs such as HIF and the North Dakota Homeless Grant. Developers and local service providers can leverage the funding with private investments and charitable donations to create customized local solutions based on community needs in rural and urban areas. The upfront investment in state funding is critical in delivering upstream and midstream services to vulnerable populations.
  - Explore the cost and benefit of state funded housing vouchers to be leveraged in emergency situations.

Government Efficiencies

The key to enhancing government efficiencies is to establish a systematic approach of clearly defined and repeatable steps where outcomes can be evaluated to generate consistent, optimum results. State agencies and local service providers are well connected and reach out to one another for assistance for the individuals and families they are helping, but most agencies expressed the need for more collaborative efforts to leverage resources and to be more responsive.

- NDICH consists of seven state agencies, one state-wide homeless coalition, and the communities of Fargo, Grand Forks and Bismarck. Moving forward it is recommended that the same state agencies be a part of NDICH; however, involvement is expanded to engage multiple people from each agency especially if the agency has more than one division involved in any aspect of preventing, reducing or ending homelessness.

[61] Cooper House Impact Report 2010. Retrieved from http://fargohousing.org/files/pdf/Cooper%20House/Impact%20Reports/Cooper_House_Impact_Report_June_2013.pdf

[62] Gladys Ray Shelter & Veteran's Drop-In Center. Retrieved from http://fargond.gov/city-government/departments/fargo-cass-public-health/gladys-ray-shelter-veteran-s-drop-in-center

- The NDICH would convene twice a year fostering an environment where each agency thinks and works beyond specific duties of their agency/department to achieve services and results that are broader in scope. The goal is to have more of the "right" people at the table to rethink processes that restrict developing new perspectives without hindering innovation or opportunity development. Each agency needs to critically think about the programs offered to be able to develop synergies and identify gaps that impact vulnerable populations. Engaging a diverse stakeholder group from the vulnerable populations and their family members will be insightful in creating comprehensive solutions.
- Develop a communication process to inform other state agencies and the public pertaining to the focus areas, tasks, and progress made through NDICH endeavors.

- Identify barriers preventing state agencies from accessing and leveraging HUD's Homeless Management Information System (HMIS). HMIS is a software application designed to record and store client-level information on the characteristics and service needs of homeless persons throughout a Continuum of Care (CoC) jurisdiction. Service providers currently utilize HMIS to coordinate service provisions, manage their operations and better serve vulnerable populations.

- Map the entry points for vulnerable populations and how they transition throughout state agencies and local service providers. The intent is to streamline the intake/assessment process and ensure they have access to the services they need at a specific point in time. The map will diagram how people and information are shared, gaps, overlapping functions and where efficiencies can be made.
  - Minnesota Department of Human Services – Housing and Supports Division created the Housing Benefits 101 website as tool to assist people who need affordable housing and support systems to maintain their housing, and understand the range of housing and support services available. The website allows each person to identify their current housing situation whether they are looking for a home; moving out of a facility, group home or foster care; need to relocate; are at risk of losing their home; or are experiencing homelessness. The client-centered focus streamlines research and resources that each person needs.[63]

- Identify local, state and federal policies and regulations that hinder vulnerable populations and prioritize actions for change. For instance, the definition of homelessness, case manager, and youth creates issues. Felony convictions inhibit individuals from acquiring housing as well as other social services and create a stigma when employers are reviewing employee applications.

Covering the cost of public assistance is challenging for federal and state government and at the local community level. However, there are ways for the state to access additional federal funding through Medicaid to provide direct support to individuals and families.

- Pursue 1915(i) Medicaid state plan amendments to expand community-based services for vulnerable populations. The 1915(i) state plan amendment has been the most common avenue for states to pursue funding for community-based services that include a wide range of home and community-based services as a state plan option. Adding services through 1915(i) could significantly reduce demand for emergency, inpatient, and long-term care services that are not reimbursed by Medicaid, which could reduce overall system costs in the long run.

[63] Minnesota Housing Benefits 101. Retrieved from https://mn.hb101.org

- Review long-term care facilities placement policies and explore options for community-based alternatives for persons with disabilities and behavioral health issues. In a recent study, it was documented that approximately one in four individuals under the age of 65 were receiving behavioral health-related services in long-term care facilities, which can cost $96,000 per year. With the right supportive services, these individuals could live in community-based PSH units, which are more cost effective solutions.

Client-Focused Delivery System

In order to expedite information gathering and to ensure current and accurate information is available, the state needs a consistent, end-to-end experience across all channels and departments where information can be obtained for any service, on any device and at any time. State agencies and local service providers expressed challenges they have noticed in their specific area and feedback from clients. Below are some of the ideas that were recommended:

- Housing Inventory - create an affordable housing inventory for each community/region
- Housing Forms - create a single form used by all regional housing authorities
- Database - create profiles for each client within a centralized database, so individuals or families applying for state or local benefits do not have to re-enter information
- Privacy Laws - review state privacy laws to ensure clients are protected, but at the same time do not hinder state agencies from accessing the information they need to be able to help a client that is transitioning services from one state agency to another.
- Consent Form - create a consent form signed by the client to release information to all state agencies and case managers
- User Profile - create an app or web portal where clients can enter their information that is stored and they can return at any time to complete.
- Online Chat - through an app or web portal, create an online chat function for clients to ask questions and be directed to the correct state agency or local service
- Services Portal - structure website into user categories and group information based on the client scenario, such as homeless or risk of becoming; searching for housing, employment or daycare, needing social services, youth, tribal, etc.

COOPER HOUSE, FARGO, ND
PERMANENT SUPPORTIVE HOUSING
Financial Community Impact

Per a Cooper House Impact Report & Cost Study completed by Eide Bailly:

- Cooper House saves taxpayers money. There was a total of $204,140 savings in costs for those who lived at Cooper House for the time period that study was conducted, through October 31, 2011
- Costs tied to emergency shelters virtually disappeared once individuals moved into Cooper, dropping 98% from $139,200 to $3,200
- Detox costs also dropped dramatically, falling 71%, from $75,360 to $21,840
- Jail expenses fell 48% from $169,455 to $87,768

COOPER HOUSE, FARGO, ND
PERMANENT SUPPORTIVE HOUSING
Community & Tenant Impact

Cooper House has made a positive impact to the Community of Fargo and in the lives of the Tenants

---

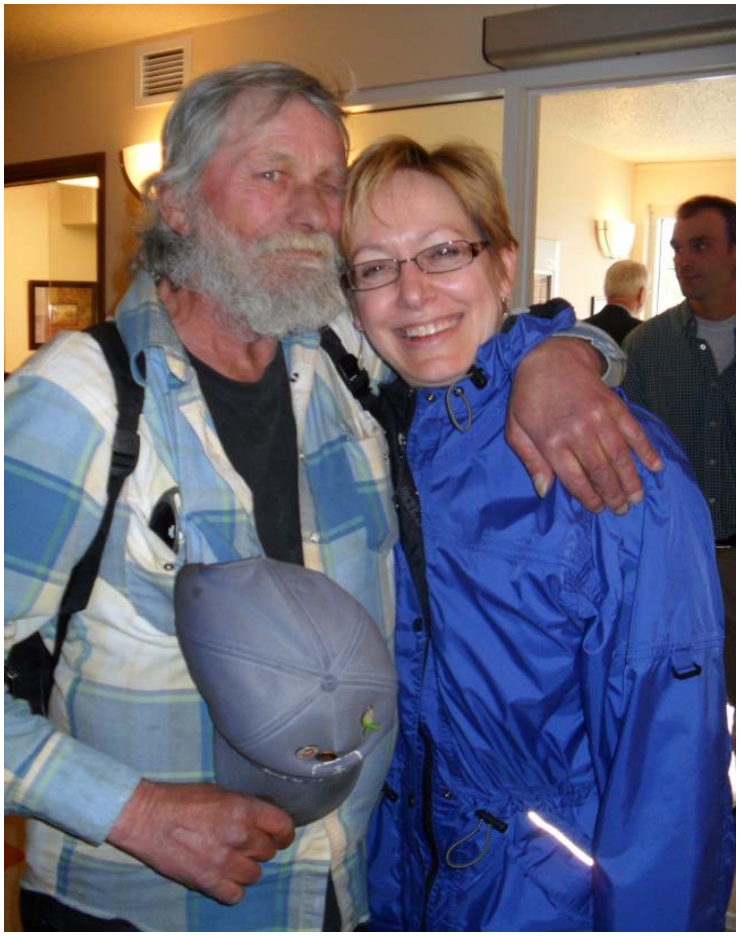
The RIGHT THING for "GI JANE" – Veteran, Chronically Homeless & Dually Diagnosed:

- Periodic episodes of homelessness for 3 years; Has successfully maintained housing at Cooper House for 24 months
- 1 Year Prior to moving to Cooper House: Hospital/Emergency Room Charges $38,500
- 1st year at Cooper House: Hospital/Emergency Room Charges $1,000
- Now engaged with case management and Veterans Administration Services

COOPER HOUSE, FARGO, ND
PERMANENT SUPPORTIVE HOUSING
Community & Tenant Impact

The RIGHT THING for "Pete" - Chronically Homeless & Dually Diagnosed

- Homeless for 20 years; Has successfully maintained housing at Cooper House for 25 months
- 1 Year Prior to moving to Cooper House: 201 days in Detox at a cost of nearly $30,000, Emergency Room/Hospital Charges 30,000
- By 2nd year at Cooper: 0 days in Detox, Emergency Room/Hospital Charges approximately $6,000
- Newly engaged in Case Management



Note: CY2013 Vacancy Rate was 2.3% which equals an average of 1-unit per month.

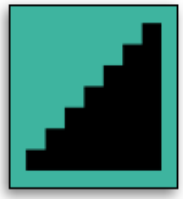
COOPER HOUSE, FARGO, ND
PERMANENT SUPPORTIVE HOUSING
Project Description

- ❑ No expectation of sobriety, however there is an expectation of mutual respect

- ❑ Relies on strong partnerships with community-based service providers to meet the varied needs of tenants

- ❑ Front Desk is Staffed 24/7
  - ➔Check Tenants & Guests In and Out
  - ➔Monitor the Security Cameras
  - ➔Perform Wellness Checks
  - ➔Work to Link Tenants with appropriate services

COOPER HOUSE, FARGO, ND
PERMANENT SUPPORTIVE HOUSING
Project Description



- Employs a "Housing First" model, which recognizes a home as a stable platform for delivering supportive services to help the tenant stabilize their life and keep them housed.

"We give people A HOME FIRST, then offer a variety of services to help them improve their lives."

Our **On-Site Nurse** breaks down barriers and builds trust with tenants to help them manage their chronic health conditions BEFORE they escalate to an Emergency Room visit or a hospital stay.

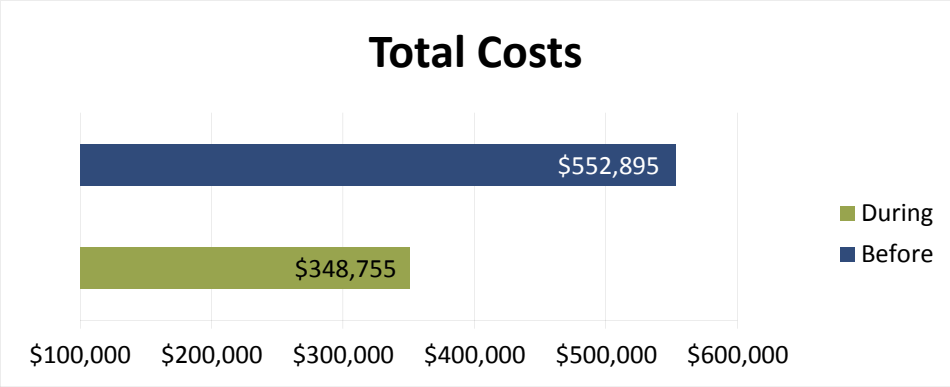
Cooper House Impact Report

A Study of the Impact of Housing
North Dakota's Chronically Homeless Population

EideBailly®

CPAs & BUSINESS ADVISORS

Cooper House Impact Report & Cost Study



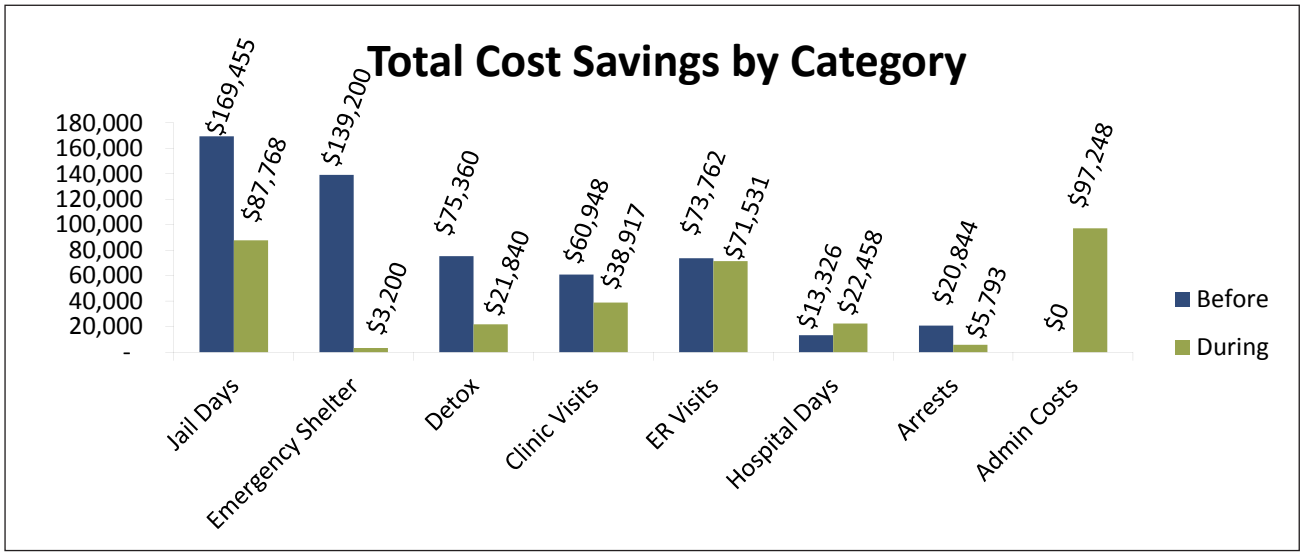
Eide Bailly was engaged by the Fargo Housing & Redevelopment Authority (FHRA) to compile cost data for a group of residents of Cooper House, a supportive housing for the homeless project managed by FHRA. We have compiled data showing the costs to society prior to when these people secured housing at Cooper House and then 12 months during their time housed at Cooper House. Because people move in and out not all dates line up over the same time frame. We have attempted to collect data showing 12 months prior to being housed at Cooper House and during their stay at Cooper House. We have not audited, reviewed or tested this information beyond simple due diligence while collecting it.

Background:

Cooper House opened in Fargo, ND in May of 2010. The Cooper House apartment's provide permanent supportive housing for homeless persons and is a stabilizing next step in the lives of people coming out of shelters or transitional housing programs. It consists of 42 apartments, 32 of which are efficiencies and 10 are one bedroom units. The apartments are rented exclusively to individuals who are documented as homeless. Preferences are given to those experiencing chronic or long-term homelessness, veterans, and people with disabilities. Homeless is defined as an individual or family who lacks a fixed, regular, and adequate nighttime residence. Chronic or long-term homelessness is considered to be anyone being homeless for 12 consecutive months or 4 times in the past 3 years.

Mental Health Technicians are on staff 24 hours, seven days a week at Cooper House, and a part time Licensed Addiction Counselor and a full time Case Manager are in the building daily, working with the clients and offering needed services. Family Health Care Center provides a part time nurse on site who provides medication management, infection control, health assessment, and referrals and follow up.

Cooper House employs a "Housing First" hybrid model, where people are provided a home first and then are offered a variety of services to help improve their lives and keep them in housing.



Conclusion:

Based on the results from the cost study, it is evident that housing the chronically homeless is "the smart way to do the right thing." There was a total of $204,140 savings in costs for those who lived at Cooper House for the time period that this study was conducted, through October 31, 2011. Being proactive in helping the homeless population is shown to help save the tax payers money and to make the community a better place to live.

The Study:

This study is meant to be a snapshot of the impact of housing North Dakota's chronically homeless population. The data of this study was collected with the consent of 66 tenants (the Study Group) who have lived at Cooper House at various times since it opened. Area service providers, shelters, law enforcement, the court system, and healthcare providers have all cooperated in providing the information gathered throughout this study. Once the information was consolidated then an average per person per month cost was calculated and this was used to calculate the group average.

Below is an overview of the costs comparisons for a one year period prior to being housed and a one year period ending October 31, 2011.

Note: There are two significant public cost drivers not captured by this study. Those of the judicial system which includes all costs related to court processing, arrests, and those costs related to state hospital days attributed to court ordered rehab. For some individuals this was up to dozens of times prior to living at Cooper House.

Healthcare & Medical Costs:

Based on the information received from Sanford Hospital, the Cost Study Group, costs went from $148,036 to $132,906 for a 10% decrease in costs or a savings of $15,130. The healthcare and medical cost data was compiled through October of 2011.

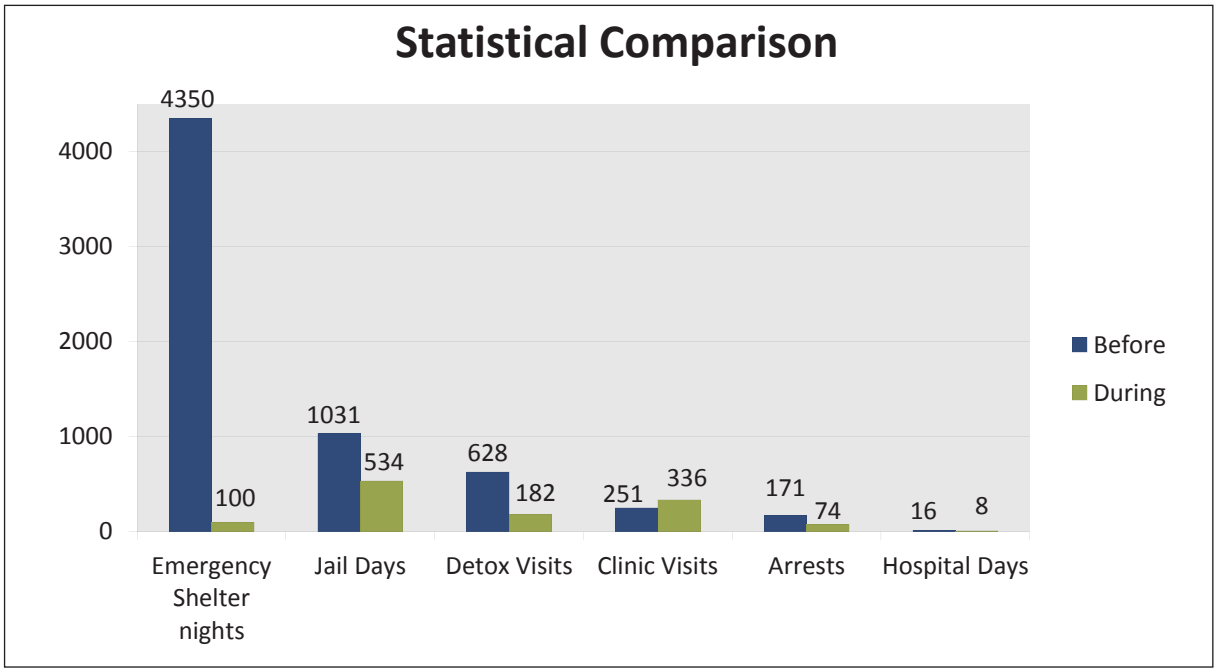
Law Enforcement & Legal costs:

Based on the information received from the Fargo Police Department, the cost associated with arrests declined from $21,000 to $6,000, which resulted in a decrease of $15,000, or 72%. The jail day costs were reduced from $170,000 to $87,800 for an $81,687 or 48% decrease.

Overall, legal and law enforcement saw a cost savings of $96,738 for those living at Cooper House, with some individuals having 100 less jail days than before they were homeless. The law enforcement and legal cost data was compiled through October of 2011.

Detox Costs:

Based on the information received from the Fargo Police Department, the average cost per detox visit is $120, not accounting for police officers time to collect and transport individuals to the facility. The total cost for detox visits decreased from $75,360 to $21,840. For the Cost Study Group, this is a cost savings of 71% or $53,520. In addition, this particular Study Group has seen 446 fewer visits. The detox cost data was compiled through October of 2011.



Administration Costs:

The capital outlay of the administration costs is $97,248. This service is provided by Dacotah Foundation through a contract with Southeast Human Services. The front desk is staffed 24/7 and these individuals are considered key to the success and integration back into the community. They staff check tenants and guests in and out of the building, monitor the security system, help with wellness checks, and work to link tenants to appropriate services.

Emergency Shelter:

Based on the information provided by only one of several homeless shelters in Fargo, the Study Group costs were reduced from $139,200 to $3,200, for a total cost savings of $136,000 or 98%. The number of emergency shelter nights was reduced from 4,350 to 100. The emergency shelter cost data was taken from averaging the costs for 2010 and 2011 to determine the average cost per year. The number of times accessed was taken compiled through October 2011.

Below is a statistical comparison of the number of times a service was accessed for the Cost Study Group before and during their residency at the Cooper House:

Places of Birth:

Many of the participants in the cost study call North Dakota their home and have lived here their entire life. Below, the red stars indicate where a portion of the Cost Study Group individuals are originally from.

Please note that not all costs were captured during the study. Some services accessed are not accounted for here and the cost of working with these individuals on the street is understated. For example, only one of several homeless shelters and one of the two hospitals were contacted for this study. Meals from community based organizations are also not accounted for here. In addition, costs accumulated here are only based on the individuals costs accumulated while living in Fargo and do not account for costs incurred in other locations.

Written Testimony pursuant to House Bill 1012 (2021)
Appropriations – Human Resources Division
Senate Appropriations
Chairman: Senator Ray Holmberg
March 9, 2021

Submitted by: Dwight Barden, Executive Director – Burleigh County Housing Authority (BCHA)
701-255-2540
Dwight@bchabis.com

Burleigh County Housing Authority has partnered with Beyond Shelter, Inc. in Fargo to develop a permanent supporting housing project for the homeless in Bismarck called Edwinton Place. It is located at 1121 S. 11th Street, Bismarck just south of Cash Wise on Expressway. This project has 40 – one bedroom apartments. This was developed under the Federal Housing First model. The intent is to get these homeless individuals housed and in a stable environment. Most of these tenants, coming from homeless situations are dealing with mental illness and/or drug/alcohol addictions and are in need of supportive services. BCHA is the landlord we are not a service provider. But without the services, this type of project could not survive.

Edwinton Place has been open for just over one year. We have served 45 individuals during that time. 67% of the individuals are age 45 or older with 83% White, 12% American Indian/Alaska Native and 5% Black. Persons identifying as having a disabling condition due to mental health is 74% and alcohol and drug abuse is 76%. Over half the individuals identified as having 3 or more disabling conditions. 100% came from emergency shelters or unsafe housing environments. 56% identified as having no income at move in. All individuals have extremely low income which means an annual income of less than $20,200.

Our first tenant that moved in was a Veteran and he moved in on Veterans Day 2019. Another tenant has been able to reconnect with her daughters because she has been clean and sober for several months and living in a stable environment.

We have contracted with the Dacotah Foundation to provide 24/7 Housing Support Specialist staff. They are Mental Health Technicians, certified by DHS, and they provide year-around 24/7 front door coverage, as well as the necessary tenancy supports and interventions to create and maintain a safe and supportive environment for tenants. They screen visitors, track tenants coming and going, establish limits and monitor alcohol being brought in, do wellness checks if they haven't been seen each day, engage with tenants and give staff updates on behaviors that may need some attention, de-escalate situations when they can and call for back up when they need it.

In addition to the 24/7 support, we have also provided space for support services to come in such as West Central Human Services, Housing and Employment Specialists from Community Options, Sanford Health provides case management and assists the tenants in accessing and maintaining health insurance. On-site staff coordinate food bank drop offs from Great Plains Food Bank and meals on wheels.

Edwinton Place is housing for tenants that are similar to the ones that live at Cooper House in Fargo and LaGrave on 1st in Grand Forks. In the 2019 legislative session, you were supportive and funded the 24/7

staff at Cooper House and LaGrave on 1st with Section 22 of SB 2012. Edwinton Place has not received any of this funding due to not being under construction at that time.

With Edwinton Place, we did expect that the Medicare provision of section 1915i, which you passed last legislative session, would be available to cover these qualified costs. At this time the funds are still not available and these costs are no longer part of the State 1915i plan. These would be eligible costs only if the housing supports are made available through a daily rate rather than 15 minute units with a maximum of 8 hours daily, for a total of 78 hours per 6 month period. The other issue to this is that the housing crises do not always happen from 8 to 5 therefore providing tenancy supports is needed 24/7.

The tenants do receive housing assistance. But due to the restrictions on the Federal Voucher Program and allowable rents from some of the funding sources that were used to develop this project, there is not enough funding available to pay for the 24/7 support services that are needed.

I do not have the funding numbers for Cooper House and LaGrave on 1st but the Cost at Edwinton is $640,000 per biennium or $667.00 per individual per month.

Thank you for your time and support. This funding investment truly helps those most in need and the most vulnerable of our States population.

I also reach out and offer if you have questions or would like to see Edwinton Place to please contact me.

I oppose HB1012 as it currently is written as it does not include funding for these much needed supports.

HB 1012 Testimony
Senate Appropriation Committee
Senator Ray Holmberg, Chairman
March 10, 2021

Good afternoon Chairman Holmberg and Members of the Committee. My name is Kimberly Ohlhauser, and this is my husband Troy Ohlhauser. We are from Bismarck, ND living in district 30. We are here to share our story regarding our daughter, Chloe.

Our story started back in October 2014 when our daughter was sexually assaulted. She was 8 years old. She was already diagnosed with ADHD and she had a learning disability in relation to social skills, reading and English.

We have done three residential treatment facilities in ND and UT between 2016 and June 2020. The first residential placement my husband and I had to do a no-fault deprivation and give up custody of our daughter to Burleigh County to get her the help she so needed. After going to the second residential treatment facility, we learned that Chloe has autism and is developmentally disabled, along with PTSD, mood dysregulation disorder, and social issues with family, school, and any person of authority.

For the last six and half years this has impacted not only Chloe but my husband and I as well. We have dealt with being physically assaulted by our daughter, her taking off from the house, threatening self-harm which she has a history of. Stealing our credit cards and shopping online due to poor impulse control and breaking our personal property. Our daughter acts like an addict and always wants that immediate gratification. This is the only way we can describe how she is at times. We have had to deal with many let downs after Chloe has been discharged from the residential treatment facilities without going to a step-down program after her second residential placement and a therapeutic foster home after the third residential placement, none of which happened. My husband and I have been in counselling for our mental health and learning how to cope with a special needs child who also has PTSD which can be exhausting physically, mentally, and emotionally. The best way to describe our situation is most of the time we feel like a hostage in our own home and there is literally nothing we can do about it.

We currently have the following services: Case Management, Developmentally Disability program at West Central, Pride respite, counseling once a week, occupational therapy, and speech therapy weekly. We work closely with her case manager in high school, and she sees a psychiatrist once a month but still this is not enough and does not help us when we are in crisis.

We had PATH for respite care, however, Medicaid will only pay for one year per lifetime. Chloe also has done partial hospitalization at CHI St. Alexius as well.

Between July 2020 and November 2020, we as well as her respite workers at Pride have had to call the police on Chloe at least 20 or more times. We were told by some police officers that they cannot continue to chase after her, pick her up when she takes off from our home. This creates a much bigger problem because if we do not call the police when she takes off from our home, my husband and I could be charged with child neglect due to her diagnosis of being developmentally disabled. Chloe mentally is unable to make good decisions most of the time and she doesn't know her own physical strength when she is angry and emotionally unable to control her impulses.

The police youth bureau has also been involved with Chloe since coming home in June of 2020. Each time my husband and I have had her cited by Bismarck Police Department we receive a letter from the Police Youth Bureau within two to three days stating they are not going to do anything due to it being a mental health issue and to follow up with the programs we are involved with.

We have now reached a point where there is nothing any of the agencies can do for us when we are in crisis, which is not their fault.

When Bismarck had a safe bed my husband and I utilized it when in crisis. When Chloe would go to safe bed for 48-72 hours it gave Chloe a chance to calm down and self-regulate. My husband and I got the rest we needed to recharge from the constant abuse we received from our daughter, off and on, the past six and half years.

The head of psychiatry at CHI St Alexius will no longer admit Chloe to the hospital due to it being behavioral issues.

Youth Works will not let her come there during a crisis due to Chloe needing a higher level of care than they can provide.

We had respite care through PATH which Medicaid will only pay for one year per lifetime. We have exhausted that.

We are going through a vicious cycle like many other families are currently going through.

Our wish is for North Dakota to have safe bed again and extensions of coverage for the PATH support program to assist other families like us while we are in crisis.

It would be more cost effective to have safe bed in place rather than going to the hospital or calling the Police and having them tell us there is nothing they can do and wasting their resources and time.

My husband and I will continue to advocate for the mental health services needed in our state for our children and children's children.

We want to thank you Chairman Holmberg and committee members for your time and patience in letting us share our story.

67th Legislative Session

Senate Appropriations

Chairman Holmberg and other members of the Committee. I am Rebecca Quinn and serve as program director at the Center for Rural Health at the University of North Dakota School of Medicine and Health Sciences. The Center for Rural Health is contracted by the Department of Human Services to operate the North Dakota Brain Injury Network. My testimony today is on behalf of all the individuals and families impacted by brain injury in North Dakota.

Throughout the development of North Dakota's brain injury services, there has been identified the need for a centralized brain injury hub to provide information, support, and training. The North Dakota Brain Injury Network meets these needs by providing a centralized, statewide source of information regarding brain injury and delivers resource facilitation services to individuals with brain injury. In order to continue to serve as the central source of information and support for brain injury in the state, I ask that you please restore the funding for NDBIN.

There has been discussion about the use of the 1915i Medicaid State Plan Amendment and the possibility of services being shifted to be provided under this program. While 1915i may be a newly available service, it may not be the best fit for many individuals. Depending on the age of the individual, financial eligibility, level of impairment, and functional need there is a need to have available numerous different service options and combinations that can be tailored to meet an individual's needs. 1915i may be able meet the needs of one individual, another individual may have needs that cannot be met by it or they may not qualify. However, we would be remiss to think these services will meet the needs of individuals with brain injury without the ongoing training, guidance, and support of NDBIN.

Respectfully submitted

Rebecca Quinn
Center for Rural Health
University of North Dakota, School of Medicine and Health Sciences

NDBIN Activities July 2019-January 2021

- Resource Facilitation
  - Resource facilitation for brain injury is an evidenced based service that assists individuals along the path of recovery and increasing independence. This vital service has been adopted by over 40 states and is seen as a core for state brain injury service development by the Federal TBI grant program.
  - This biennium NDBIN has provided resource facilitation to a total of 266 individuals, received 92 new referrals, and had contacts with more than of 1,600 individual or family members
  - A few quotes from our satisfaction survey:
    - *Felt supported and understood.*
    - *Always prompt in answering questions and providing support and assist.*
    - *Keep on Keepin on with how you are doing your work! Thank you for all your support for those who need and are searching for others to help them in their daily lives.*
    - *I had no problem whenever I called Rebecca to ask a question. She always got back to me and either asked further questions to clarify or gave me answers to what I was seeking.*
    - *You do I & R services and help individuals get connected to a service. This is a great need.*

- Mind Matters Conference
  - Unfortunately, had to cancel in 2020, but plan to host a 2-day virtual event: March 25&26th
  - Past conference attendee quotes:
    - *I like having the information to share with clients that struggle with TBI*
    - *Love the Mind Matter conferences*
    - *We are fortunate to have such an important conference in ND.*
    - *Oh my-all speakers were amazing! Connecting with everyone and sharing what works-what does not.*
    - *Well organized-good job and thank you!*
    - *I thought the conference was great. I enjoyed all the speakers-nice variety and topics and good information.*

- Online Brain Injury Training
  - June of 2019 NDBIN launched 5 online training courses
  - Courses included:
    - Introduction to Brain Injury
    - Cognitive and Behavioral Consequences of TBI in Adults
    - Primary Care and TBI
    - Pediatric TBI
    - Substance Use and TBI
  - 1,287 individuals enrolled, 625 having completed, 412 evaluations

- Certified Brain Injury Specialist (CBIS) Training
    - Nationally recognized credential for professionals working in brain injury services. This certification is administered by the Brain Injury Association of America and involves formal coursework and a written examination.
    - NDBIN provided CBIS training in ND in July of 2019, Dec 2019, June 2020, Dec 2020
    - Total of 65 officially certified CBIS in ND as of 1/19/2021.
    - NDBIN hosts a quarterly call for all CBIS to share information and collaborate.

- Webinar Wednesdays
    - These FREE webinars cover a range of brain injury topics and are designed to meet the needs whether you are a brain injury/stroke survivor, caregiver, or provider. Variety of continuing education credits are offered and they are archived online.
    - Total of 26 webinars, 251 total evaluations.

- Virtual Support Groups
    - Facilitated 22 support groups, including 15 virtual.
    - Began partnership with University of Mary Occupational Therapy program to have students co-lead groups.

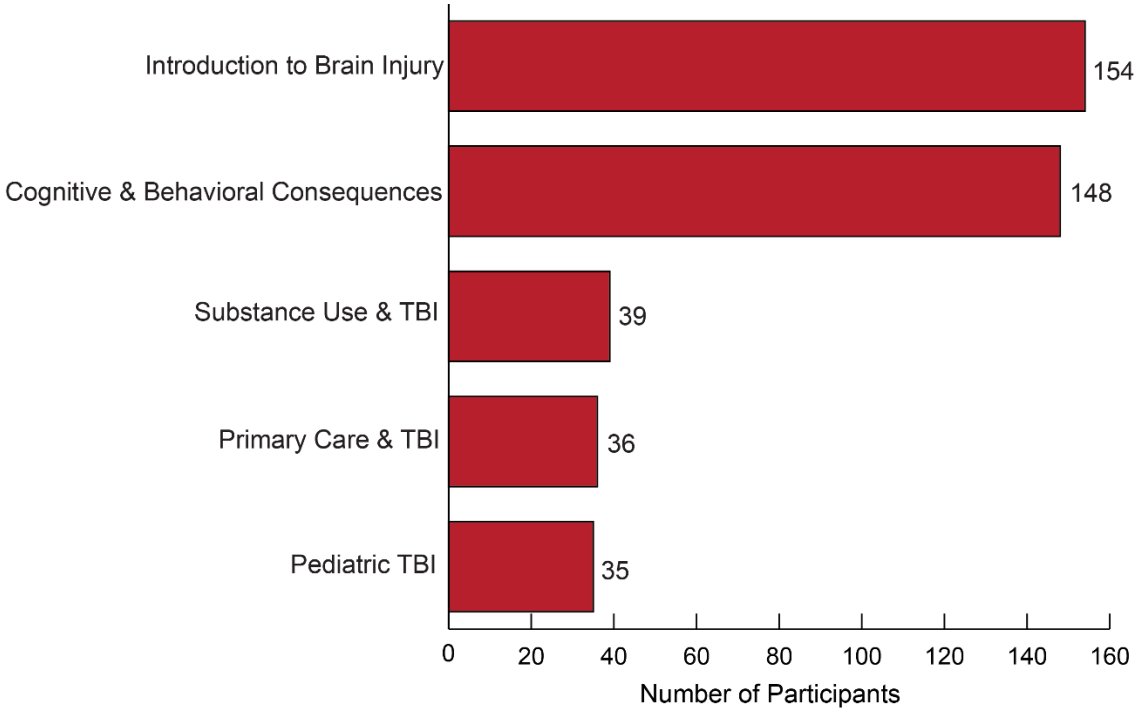
- Adapted the REAP for ND
    - This is an evidenced based return to learn guide developed by CO and adapted to over 20 states.
    - What is REAP?
        - R = Remove/Reduce physical and cognitive demands
        - E = Educate the student athlete families, educators, coaches, and medical teams of the potential symptoms
        - A = Adjust/Accommodate for the student athlete academically
        - P = Pace the student athlete back to learning, activity, and play
- Virtual Concussion Symposium
    - Hosted a Concussion Symposium with over 100 attendees
    - Keynote by the author of REAP

- Website
    - Maintained a comprehensive website with over 34,780 unique page views
    - Searchable online resource guide, maintained events calendar
    - Developed new content regarding caregivers, special education, and related services

- North Dakota Brain Injury Guide
    - Partnered with the North Dakota Stroke Association to publish a new North Dakota Brain Injury Guide for new survivors. In process of being distributed to hospitals, clinics and private providers.

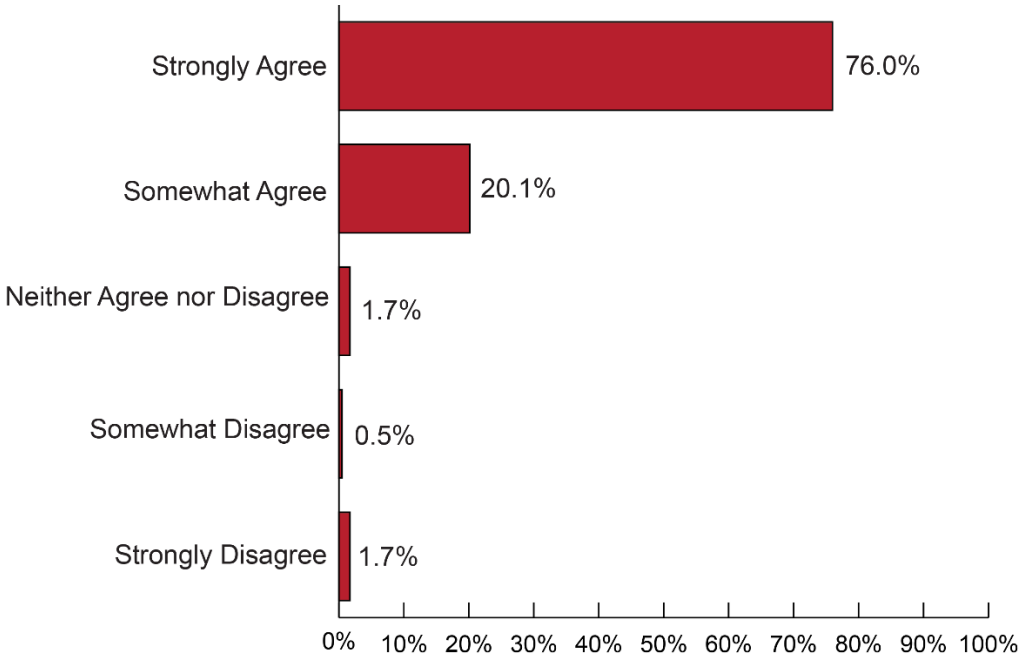
Upcoming Programs:

- Survivor Connections
    - New program to be launched spring of 2021.
    - Phone based program for new individuals with brain injury to connect them with trained volunteers to provide support for those new to the injury.
    - So far have developed program, recruited & trained 3 survivor volunteers.



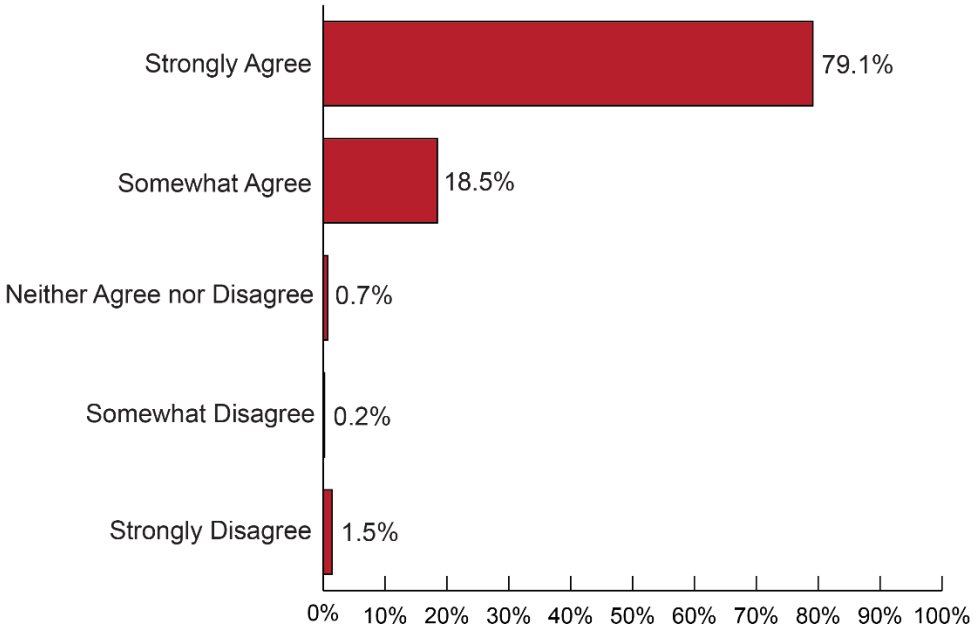
- Brain Injury Basics Training
    - 1st training to be held February 19th, 2021.
    - New training developed to be less intensive than the Certified Brain Injury Specialist, but more engaging than the online courses.
    - This training is based on an interactive approach and will provide direct care staff, peer support specialists and caregivers of individuals with brain injury a general knowledge of brain injury and what that means for the individuals they serve, practical techniques for handling difficult behaviors of individuals with brain injury, as well as building rapport for the individuals within their care.

- Book Club
    - Launched January 2021.
    - A virtual brain injury book club on the first Thursday of every month.

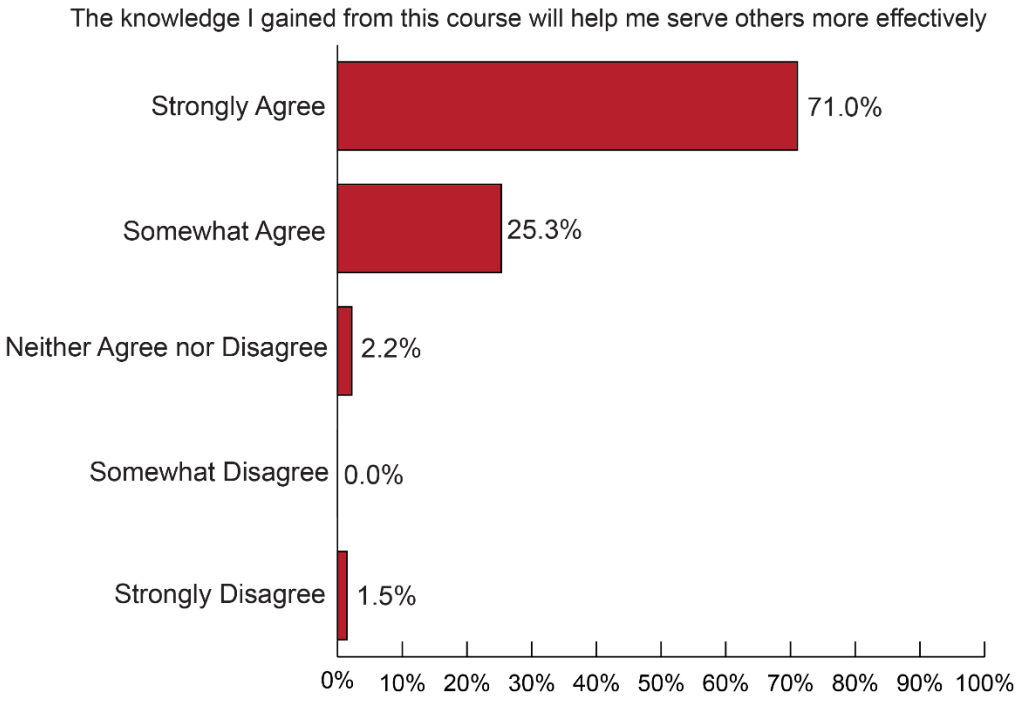


- Virtual Office Hours
    - Launching February 2021.
    - Anyone with questions or needs related to brain injury can join NDBIN for these virtual office hours.

Online Brain Injury Courses-412 total evaluations completed

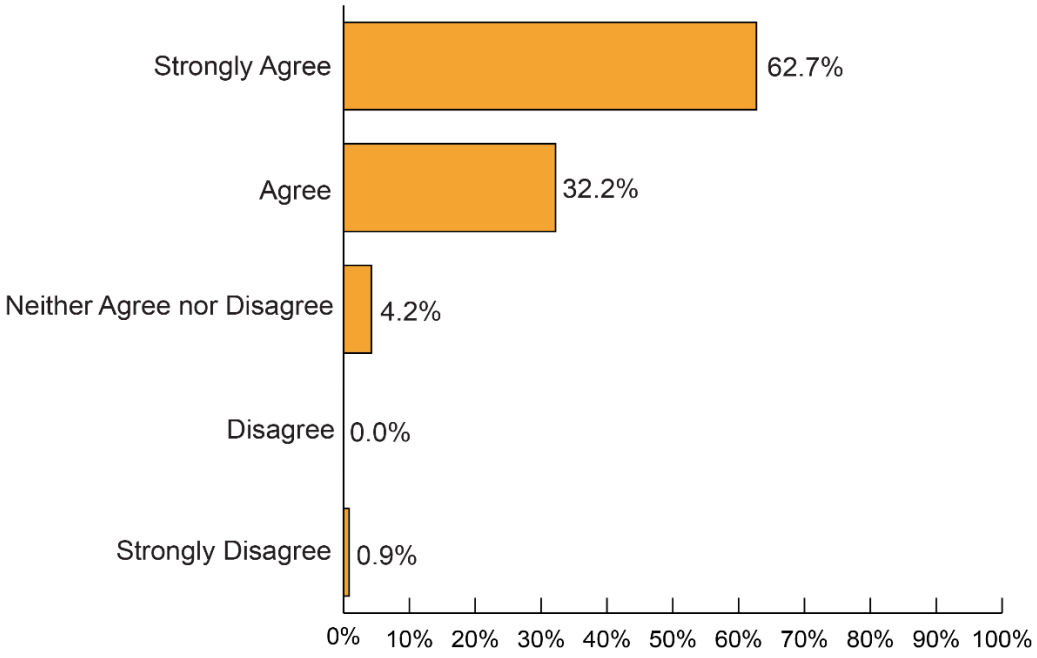


Course Attended:

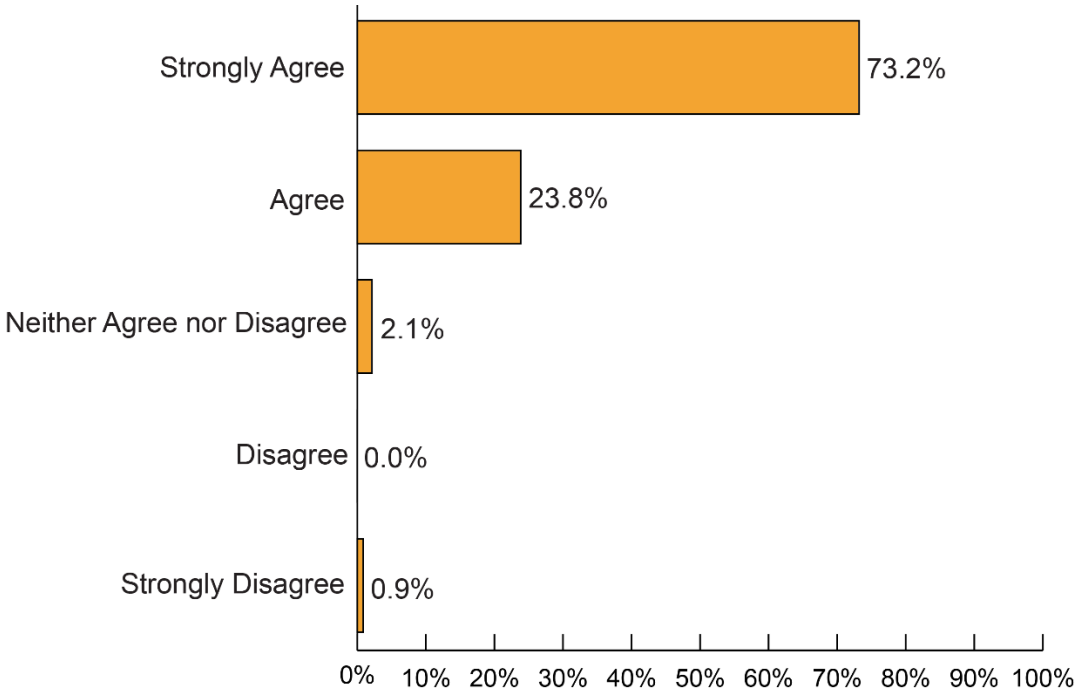


I found the course information to be helpful:

The material presented was appropriate for the intended audience:



The knowledge I gained from this course will help me serve others more effectively:



Webinar Wednesdays-26 total webinars, there were 251 total evaluations completed

Teva Lange
4444 97th Ave SE
Ypsilanti, ND 58497
tjlange@nd.gov
701-320-8382

My name is Teva Lange. I was born and raised in North Dakota and work as a Licensed Addiction Professional for the ND Department of Corrections. This letter finds you in efforts to show my support for the North Dakota Brain Injury Network (NDBIN) organization and its impact for my family and myself. My first experience with brain injury (BI) comes from a caregiver/family member role. I married a wonderful man in 2004 who at the age of 23 suffered from an aneurysm as a result from a rupture of an arteriovenous malformation (AVM) within his brain. He underwent a cerebral surgery and as a result experienced a stroke needing intensive speech and physical therapy in 2001. I did not know him at the time of his injury, and by the time I met him he was working full time and appeared "normal." His injury was invisible to me, but not to him. My lack of knowledge and empathy to his daily struggles caused conflict and frustration early in our marriage. NDBIN for me started for personal reasons; however, this organization has fostered my desire to learn and helped me professionally bring resources and awareness to clients I work with, coworkers, peers, family and friends.

NDBIN provides a wealth of resources to our state. Of these resources, I would like to provide a brief summary of how I have personally utilized and gained from this program/organization.

- Since 2016, I have subscribed and received educational newsletters on brain injury, which I use as a personal and professional resource to provide to family members, colleagues, and clients in the DOCR.
- NDBIN has personally come into the Department of Corrections and provided presentations on brain injury to residents housed there.
- In 2019, I was part of the first Certified Brain Injury Specialist Training and received my CBIS certificate. Since then I have access to network and refer out to at least 60 or more certified professionals because of their trainings.
- In 2020, staff within the NDBIN encouraged myself and other colleagues to apply for a scholarship to attend the National Association of State Head Injury Administrators (NASHIA) Conference. With their encouragement, I submitted an application and awarded the scholarship.
- Lastly and most importantly. **I have referred countless clients to this support network.** I work with a high percentage of clients in the prison setting that are impacted by brain injury. Some of the times, they do not even consider their brain as injured or have not been informed. Overdose (lack of oxygen), being knocked out in a fight, extreme drug use, any risk behavior where their head was jarred, or even the reality of them falling as a child. All these could be a factor causing a ripple impact of impulsiveness decisions, struggle in school/comprehension, or difficulty in managing emotion. This understanding and pairing up with their history is the awareness needed to start the process of learning to manage how to live with a brain injury.

The ability to refer clients that are getting out of prison to resources in their community (print off support group meetings, provide a phone number to someone who understands brain injury and provide basic understanding/information about brain injury to spark their awareness) is priceless.

The North Dakota Brain Injury Network (NDBIN) has been a great resource for personal and professional reasons. With education and awareness I have been able to be a better spouse and a better professional to the clients I work with. My hope is to continue to grow in my understanding and to help others be more aware of expectations/management strategies that will assist both the BI survivor and those that care for them.

Therefore, here is where I need your help and support. It is my understanding that there is a proposal to reduce the North Dakota Brain Injury Network funding by 50%. **I ask that you reconsider this proposal and restore the brain injury funding in HB 1012.** Governor Burgum has made such a strong initiative in our great state with fighting for awareness, decreasing stigma and more resources for people that suffer from the disease of addiction. A high percentage of those people to live in "RECOVERY" means coping/managing and getting support. I encourage you to read and speak with NDBIN on the impact of Brain Injury not only on the person but on their family/care givers. You will see that *a person who suffers from brain injury is not just suffering acutely, but **chronically***. If you are a supporter of RECOVERY please understand that NDBIN offers support to those striving to live in RECOVERY and again, **I ask that you reconsider this proposal and restore the brain injury funding in HB 1012.**

Thank you for your time and consideration in addressing this concern. This organization means a lot to me. In 2015, my husband Rick, was found to have another AVM located his brain and since has gone through two radio knife surgeries without success. He is now on disability at the age of 42. He actively is being treated for seizures, migraines, and anxiety. He underwent testing scoring below functioning level within physical and mental means. He is stable, however we are going to be addressing in the near future a cerebral surgery to remove his AVM. The amount of effort and support needed as a caregiver has been all encompassing. NDBIN and their staff have been an outlet in allowing me to understand how to best help my husband. For the clients I work with that may not have the support my husband has NDBIN is there for them. Please help me in advocating for continued APPROPRIATE funding for them to maintain the work they do. If you have any questions feel free to contact me in the future.

Sincerely,

Teva Jo Lange, LCAC CBIS
Licensed Clinical Addiction Counselor
Certified Brain Injury Specialist

To Whom it May Concern,

It has come to my attention that funding cuts are having a drastically amount of the needed funding being considered for the ND Brain Injury Network.

I have had the impacts of several different types of head injuries in my 70 years. In the beginning of my injuries at the age of 15 or 16 it has been a psychological nightmare to live with. The struggles I had growing through the different injuries and not having any type of help for healing and recovering. There are still struggles I live with daily, for instance trying to write this letter so that you can understand or realize how greatly this funding is needed to be able to continue its guiding me with resources that are not available. Especially in this rural western part of the state, on our reservations and to reach other people who have no knowledge of what life has been or is like for me or others who live with this.

I am telling you about how their programs help support me. I am one of North Dakota's American Indians who uses their online support groups, and the webinars of their education for people who have experienced, lived through and struggle living with these very difficult traumatic brain injuries(concussions) that people, doctors, hospitals, educators, legal systems, schools and a whole list of other offices, programs that haven't any knowledge of how to help us. I have been a part of this Brain Injury Network since it has begun. Since Rebecca Quinn has been in the office I have seen this program expand enormously and hoping for it to continue for me and it's reaching onto the reservations and other American Indians that live off the reservations, including the educating of all the legal and legislative systems.

I am asking for your consideration of the greatly needed funding of this Brain Injury Network.

Sincerely,

Skipp Miller

Still alive and functional

North Dakota Legislators,

My name is Carma Hanson and I am the Coordinator of Safe Kids Grand Forks, an injury prevention coalition based out of Altru Health System in Grand Forks. Our mission is to reduce the number of unintentional injuries and deaths to children under age 19 – their leading cause of death. Safe Kids Grand Forks has a coverage area that includes northeast North Dakota and northwest Minnesota and through our efforts, we partner with many agencies that conduct like-type work. Together, we have over 250 parents and colleagues that assist in our work to keep kids safe at home, at school, at play and on the way.

The North Dakota Brain Injury Network (NDBIN) is one of our partner agencies and together, we collaborate on many projects related to brain injuries. As you can imagine, brain injuries in children can occur in a number of ways, including preventable injuries such as sports concussions, falls from playground equipment or bike and car crashes. Our work as Safe Kids Grand Forks is to prevent those injuries from happening and we share that mission with the NDBIN. Once an injury has occurred, they then take over with the wonderful work that they do to assist clients with services, provide support for living with a brain injury, assist with support for the caregivers of those with brain injuries and connect the client with support and resources to help them in their recovery process.

The work that this group does is outstanding and I would encourage you to reconsider the funding allocation that has been presented in the DHS Funding Bill 1012. This proposal suggests a 50% reduction in funding for the NDBIN. While we are in a time when all funding needs to be carefully considered, I would caution that this drastic cut could have significant impacts on those suffering from brain injuries. This type of injury is complicated and careful intervention and rehabilitation is critical to those inflicted with this type of trauma. Safe Kids Grand Forks and our team have benefited greatly from the work of the NDBIN as they educate providers on concussion and brain injury management and help set protocols for coaches, teachers, athletic trainers and others involved with kids with TBI's. They also provide direct services to clients across the state as they navigate the very complicated world of living with a brain injury.

Rebecca Quinn, the Program Director for the NDBIN can speak eloquently about the services that are provided from kids – adults in their program. She has established a network of care and resources across the state that assists people of all ages, injury severities and income levels. The impact of a financial cut to the extent suggested would significantly impact their programming abilities and I would challenge you to reconsider that proposal.

I thank you for your time to read this letter of support for the North Dakota Brain Injury Network. Please do not hesitate to reach out to me should you have further questions that I can address.

Sincerely,

Carma Hanson

Carma Hanson, MS, RN

University of North Dakota (UND)

Thank you! I also wanted to thank you for all the work you are doing across our state for those with brain injury and providers. Really helpful and impressive, thanks so much!!~ It has been crazy. We are still seeing everyone by telemedicine, which has proven quite effective. Also great to be able to address initiation, planning and really all areas of cognitive and executive functioning in patients natural environments. Anyway, we are fortunate to be able to carry one, even in this bizarre times. Have a happy and healthy Holiday!! Thanks,

Janet Grove, MS CCC-SLP, CBIS

Progressive Therapy Associates

During these trying COVID times of stress and negativity, the Pollyanna in me wants to spread cheer!

Thank you for all that you do to elevate the lives of those with BI. Each time I am on calls with you I am SO impressed. You show genuine compassion, insight and kindness to those you talk to. I have wondered if people treat me kindly because I'm "brain damaged", but I truly believe that you treat everyone kind because that is who you are.

Thank you,

Sandi

I continue to see how active NDBIN is in this crazy time. I keep hoping that hospital admissions will slow down but like the entire State of ND hospitals, we are overrun. I was still working last night and already know today will be no different. You continue to have great topics and meetings. I just have not been able to attend. Just wanted you to know it is not due to lack of interest or support.

Marie Brekken, PA-C

67th Legislative Session

Senate Appropriations

Chairman Holmberg and other members of the Committee. My name is Nan Kennelly. I am speech-language pathologist and certified brain injury specialist from Fargo, and a provider for cognitive and communication disorders related to brain injury. I serve as the current Chair of the North Dakota Brain Injury Advisory Council.

I am providing testimony on behalf of the Brain Injury Advisory Council, a statutory-defined (NDCC 50-06.4-10) and Governor-appointed state advisory council. The Mission of the North Dakota Brain Injury Advisory Council is to improve the quality of life for all individuals with brain injury and their families through brain injury identification, awareness, prevention, research, education, collaboration, support services and advocacy.

A 2016 North Dakota Brain Injury Needs Assessment found that for people with brain injury in North Dakota, services and supports for the condition are **few, are disparate, and are disjointed.**

The Brain Injury Advisory Council has serious concerns about the proposed budget reductions for brain injury in the Department of Human Services budget. These programs have been slowly built over the last 10 years and represent the *only state funded programs exclusively* dedicated to brain injury in the state. With services for this complex population being *already so limited* it would be a disservice to ND residents and families living with brain injury.

It is particularly concerning that the DHS budget reductions appear to be made with the mistaken assumption that the programing could shift to federally funded programs, with an expectation that the Medicaid 1915(i) program will provide offsetting benefits.

Members expressed concern for these shifting DHS budget priorities, including:

- The restrictive definition of brain injury within the Medicaid 1915(i) program, focusing on neuro-cognitive disorder diagnoses at the elimination of other brain injury diagnosis, will limit brain injury services to certain individuals.
- Since Medicaid 1915(i) services requires financial eligibility for Medicaid, economic means testing will greatly restrict the number of individuals eligible for brain injury services, compared to current practices.
- The reduction of NDBIN program funding will limit the level of technical assistance support and service coordination statewide, compared to current service levels. The NDBIN is not a direct service agency and should not be conflated within discussions concerning Medicaid 1915(i) service programming.
- The reduction of technical and facilitative support to the operations of the ND Brain Injury Advisory Council.

In summary, the ND Brain Injury Advisory Council has serious concerns about proposed budget cuts to existing programming, as well as the mistaken rationale that the 1915i services will duplicate NDBIN, which they do not. The Advisory Council feels these budget cuts and reduction of service go against our mission to improve the quality of life for all individuals with brain injury and their families.

Thank you for your time and I welcome any questions.

Respectfully submitted,

Nan Kennelly

Chairman Holmberg and other members of the Committee. My name is Nan Kennelly. I am a speech-language pathologist and certified brain injury specialist from Fargo, and a provider for cognitive and communication disorders related to brain injury. I serve as the current Chair of the North Dakota Brain Injury Advisory Council. I own a private practice in Fargo, ND, Onword Therapy. I lead a support group for individuals and families living with brain injury, and I am a vendor for the Social and Recreation program through the Department of Human Services.

I am providing testimony today as a provider who serves ND residents and families living with brain injury, and to object to proposed budget cuts for brain injury programming in ND, and to the North Dakota Brain Injury Network (NDBIN). Many of my patients attend our support group and participate in the social and recreation program funded by DHS. The benefit of this program runs deep, as social engagement is one of the biggest changes after brain injury. Additionally, our staff and patients attend the ND Brain Injury Conference put on by NDBIN each year for professional continuing education and supportive education for our patients. I see firsthand the benefit that ND brain injury programming has on those I serve.

I am especially concerned with a justification provided to me for budget reductions for brain injury programming. I have been told that since 1915i was approved for ND, the budget cuts were hoping to avoid duplication of service. I am here to tell you that this is a misconception. To qualify for 1915i services, an individual must qualify for Medicaid. This does not represent most of ND residents living with brain injury. In my 15 years of private practice, I can count on one hand the number of brain injury patients we served that had Medicaid. That is a very small percentage compared to the thousands of patients I have treated with brain injury. In my experience, the vast majority of ND residents living with brain injury have commercial insurance, Medicare or Workforce Safety. Additionally, the definition for brain injury for 1915i varies from the ND definition of brain injury, leaving out a large percentage of people that would otherwise qualify for service and support. While the 1915i is a victory to add to services that were lacking for Medicaid recipients, it does not benefit most of ND residents living with brain injury who are currently being served through DHS and NDBIN funding.

Please consider this testimony a request to **maintain the brain injury funding in HB 1012 restored by the House including the funding for the North Dakota Brain Injury Network.** Any further reduction would have detrimental effects on our patients, the programming our practice provides, the support we can refer from NDBIN, and the overall progress we have made in recent years in ND brain injury programming and support.
Thank you for your time and I welcome any questions.

Sincerely,

Nan Kennelly, MS CCC-SLP, CBIST

Testimony of Jill Elliott, Chief Deputy, Fargo Housing & Redevelopment Authority

In opposition to HB1012 and requesting full funding of Dacotah Foundation

for supportive services at Cooper House in Fargo

March 10, 2021

Senate Appropriations

Human Resources Division

Good Afternoon, Senator Ray Holmberg, committee members, and guests,

My name is Jill Elliott, and I serve as Executive Director & CEO for the Fargo Housing & Redevelopment Authority. I have had the pleasure of "living my mission disguised as a job" with the FHRA since 1978. I have been part of the planning, development, and management of Cooper House for almost two decades.

Thank you for reconsidering the severe cuts to the Dacotah Foundation Supportive Services budget for Cooper House. I thank you for previously fully funding the 24/7 front door staff for Cooper House, since it opened in 2010 up to this point. It is indeed the "secret sauce" that makes this project work. I feel that without 24-hour service we could not safely house our most vulnerable tenants as we do now. This service is imperative to continue housing chronically homeless, dually diagnosed individuals that really have no other options. I respectfully ask that full funding for the next biennium be restored to $570,000. This covers one front desk person for 24 hours a day seven days a week. I believe we will go back 15 years without this needed service.

As a brief background to my testimony, the Fargo Housing & Redevelopment Authority witnessed countless homeless persons causing chaos downtown and suffering unimaginable circumstances on the streets. Every year we would add many names to the list that had succumbed outside in the elements. We knew as a state and community we could do better. In 2001, our community began researching ways to meet the needs of chronically homeless, dually diagnosed individuals. We had an active group called Street Smart comprised of Downtown Business owners, our local police, Sanford Hospital, the City of Fargo, our Housing Authority, and area human service agencies. Jessica Thomasson, Fargo's City Planner at the time, was an integral leader for our team visiting different sites in the region during the development of a long-term plan to address the growing need to address homelessness. Out of this determined group came Cooper House that was built in 2010. It serves only chronically homeless, disabled persons that score the highest on the vulnerability index, called VI-SPDAT. Simply put: the index identifies those individuals most likely to die on the street.

Our tenants have survived years or even decades of homelessness, suffer from one-to-three disabling conditions, have suffered sexual and physical abuse, and have lost their vital connections to most family and friend years ago. These are not choices; they are the inevitable result of these many factors in their unique and individual lives. There is hope if the structures are in place and supported.

Cooper House is based on a harm reduction model. Severe chronic health issues are handled right away with the onsite part time nurse. Long standing diabetes, liver failure, kidney failure, head injuries, dental decay, blood pressure and amputation issues are treated compassionately with our nurse paid thru

homeless health and a Continuum of Care grant. Service providers are connected if the tenant is willing. Tenants are assisted in signing up for Eligible benefits such as traditional Social Security, SSI, Medicaid, food stamps. A meal is served daily. Prior to the COVID pandemic, we had on site help groups for mental health, an "Ask a Cop" program, and an active resident council – opportunities impossible to access without an address.

I have always determined worthy housing projects as appealing to both the head and the heart. The heart: All people deserve to live in a safe environment out of the elements where they can address long standing issues. The Head: Homelessness is extremely expensive to city, state and federal funds with no real move to a solution. This population are very high-end users of Emergency Rooms, hospitals, police, detox centers, ambulances, and court systems. After the first year opened, the Fargo Housing & Redevelopment Authority, police, Sanford, BSI and Department of Human Services completed an impact study of the impact of housing 66 Cooper tenants. These tenants were tracked on actual ER visits and hospitalizations, police intervention, jail stays, detox stays, and emergency shelter stays. We were not able to get statistics from the court system but know this would add much. The following year we hired Eide Bailly to complete this report. I have attached the results with a resounding savings to taxpayers.

Cooper House is the smart way to do the right thing. Leaving the funding as proposed is inconsistent with other established priorities and programs, like Governor Burghum' s Main Street North Dakota initiative. Leaving our most vulnerable folks unhoused will certainly hurt the ideals and goals that he's established and fighting for.

All Cooper House tenants and guests must check in through the front office staff and are checked in a logbook. Let me repeat that: no one has access to their apartment except through the 24-hour front desk staff. This is one person for 42 residents 24/7. It is a very economical way to serve a very difficult population. Since May, and due to the ongoing pandemic, we have not allowed guests. At one point early last spring, Cooper House had a 62% COVID positivity rate. Two residents died from the virus, despite a part-time nurse and detailed COVID protocols. Since banning guests, however, the positivity rate has been exceptionally low.

Homeless folks all seem to have a code that once homeless you are bound to help your homeless friends and allow them to stay with them against all house rules. Cooper has visiting hours and all guests are escorted out at 8 pm. Many evictions are caused by actions of guests who have nothing to lose with bad behavior. Tenants often remark that I really didn't want them here, but I could not say no. I am so appreciative that the staff escorted them out before they caused any more trouble. Front staff watch numerous cameras on every floor and watch for tenant issues that may need intervention.

Cooper House could not continue serving this tremendously vulnerable population with 24/7 front desk staff. I have heard the justification that 1915i program would fill in the void. We are all thrilled with the approval of the 1915i program, however that is a tenant-based program matching a case manager to a tenant. Their services are billed in 15-minute increments for very specific services that are approved by the state. No 1915i funds could be diverted to staffing the front entry system and cameras for a facility. There are no hours that the front office desk cannot be staffed. No one could enter the building then. Or if left unstaffed with the building unlocked, we would have mass chaos. I do not believe this building could be managed without this team. That will turn the most vulnerable out to the streets. Nursing Homes typically reject them as patients, landlords reject them as tenants. State hospital stays are not

the best route to live out your life and extremely expensive. Please reconsider these cuts to send us back into early 2000. As Paul Wellstone often said, “We all do better, when we all do better.”

Perhaps even more to the point, one of our residents once said to me, after sharing his story of his years of troubles, “Cooper House is the only place I’ve ever had hope.”

That hope remains a possibility only if places like Cooper House have your support, so I ask that you restore full funding to Dacotah Foundation’s critical supportive services.

Thank you.

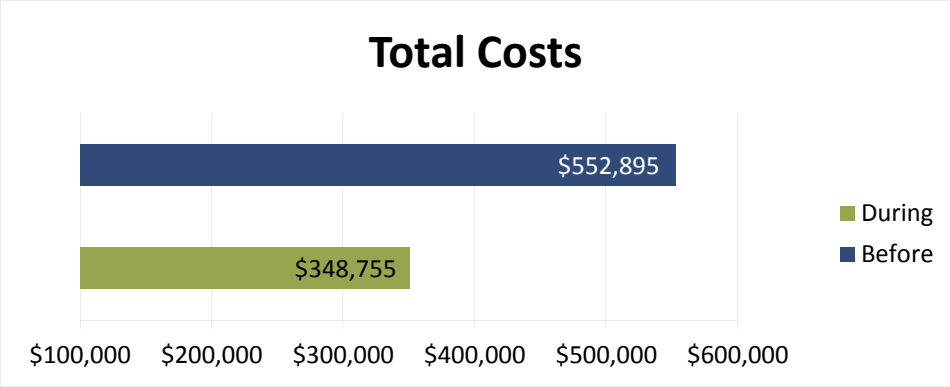
Cooper House Impact Report

A Study of the Impact of Housing
North Dakota's Chronically Homeless Population

EideBailly®

CPAs & BUSINESS ADVISORS

Cooper House Impact Report & Cost Study



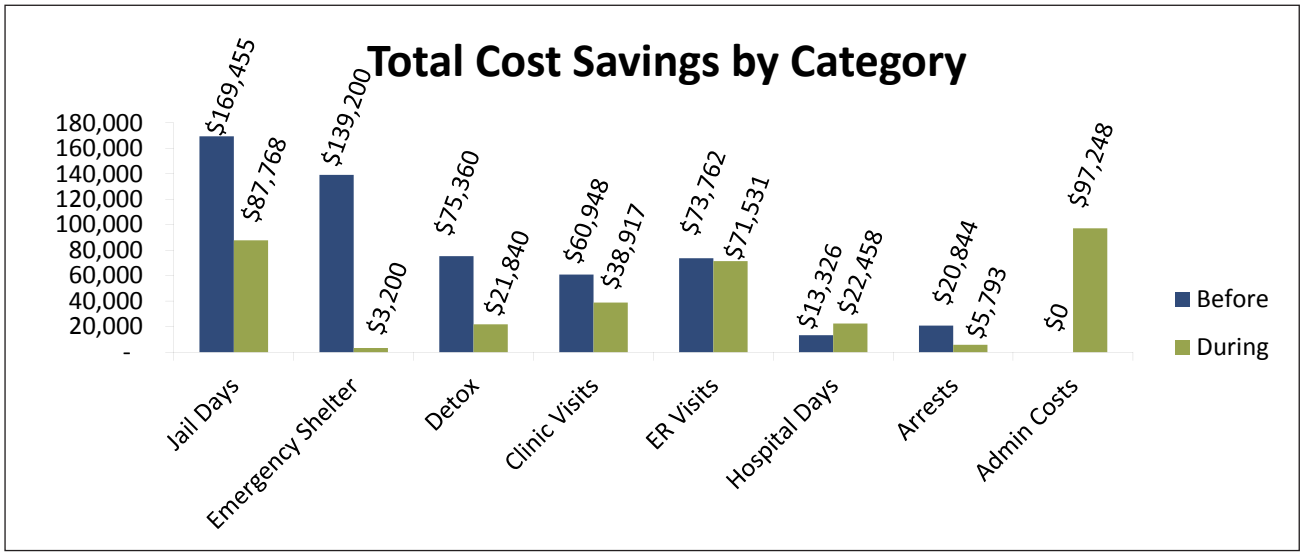
Eide Bailly was engaged by the Fargo Housing & Redevelopment Authority (FHRA) to compile cost data for a group of residents of Cooper House, a supportive housing for the homeless project managed by FHRA. We have compiled data showing the costs to society prior to when these people secured housing at Cooper House and then 12 months during their time housed at Cooper House. Because people move in and out not all dates line up over the same time frame. We have attempted to collect data showing 12 months prior to being housed at Cooper House and during their stay at Cooper House. We have not audited, reviewed or tested this information beyond simple due diligence while collecting it.

Background:

Cooper House opened in Fargo, ND in May of 2010. The Cooper House apartment's provide permanent supportive housing for homeless persons and is a stabilizing next step in the lives of people coming out of shelters or transitional housing programs. It consists of 42 apartments, 32 of which are efficiencies and 10 are one bedroom units. The apartments are rented exclusively to individuals who are documented as homeless. Preferences are given to those experiencing chronic or long-term homelessness, veterans, and people with disabilities. Homeless is defined as an individual or family who lacks a fixed, regular, and adequate nighttime residence. Chronic or long-term homelessness is considered to be anyone being homeless for 12 consecutive months or 4 times in the past 3 years.

Mental Health Technicians are on staff 24 hours, seven days a week at Cooper House, and a part time Licensed Addiction Counselor and a full time Case Manager are in the building daily, working with the clients and offering needed services. Family Health Care Center provides a part time nurse on site who provides medication management, infection control, health assessment, and referrals and follow up.

Cooper House employs a "Housing First" hybrid model, where people are provided a home first and then are offered a variety of services to help improve their lives and keep them in housing.



Conclusion:

Based on the results from the cost study, it is evident that housing the chronically homeless is "the smart way to do the right thing." There was a total of $204,140 savings in costs for those who lived at Cooper House for the time period that this study was conducted, through October 31, 2011. Being proactive in helping the homeless population is shown to help save the tax payers money and to make the community a better place to live.

The Study:

This study is meant to be a snapshot of the impact of housing North Dakota's chronically homeless population. The data of this study was collected with the consent of 66 tenants (the Study Group) who have lived at Cooper House at various times since it opened. Area service providers, shelters, law enforcement, the court system, and healthcare providers have all cooperated in providing the information gathered throughout this study. Once the information was consolidated then an average per person per month cost was calculated and this was used to calculate the group average.

Below is an overview of the costs comparisons for a one year period prior to being housed and a one year period ending October 31, 2011.

Note: There are two significant public cost drivers not captured by this study. Those of the judicial system which includes all costs related to court processing, arrests, and those costs related to state hospital days attributed to court ordered rehab. For some individuals this was up to dozens of times prior to living at Cooper House.

Healthcare & Medical Costs:

Based on the information received from Sanford Hospital, the Cost Study Group, costs went from $148,036 to $132,906 for a 10% decrease in costs or a savings of $15,130. The healthcare and medical cost data was compiled through October of 2011.

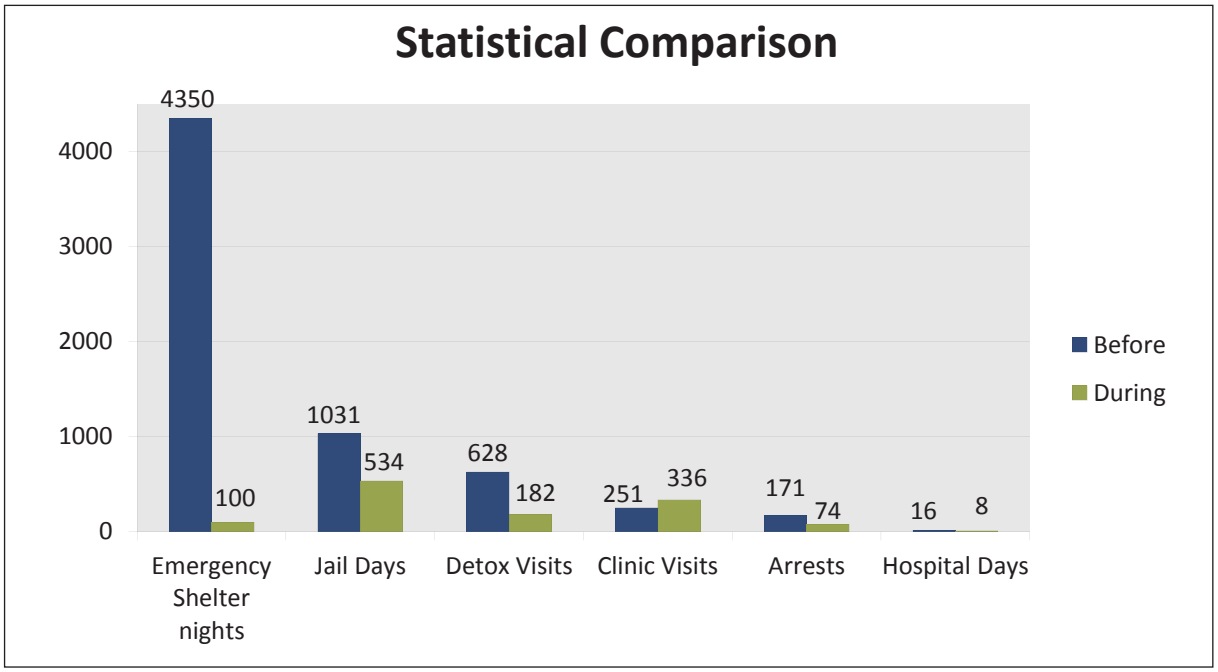
Law Enforcement & Legal costs:

Based on the information received from the Fargo Police Department, the cost associated with arrests declined from $21,000 to $6,000, which resulted in a decrease of $15,000, or 72%. The jail day costs were reduced from $170,000 to $87,800 for an $81,687 or 48% decrease.

Overall, legal and law enforcement saw a cost savings of $96,738 for those living at Cooper House, with some individuals having 100 less jail days than before they were homeless. The law enforcement and legal cost data was compiled through October of 2011.

Detox Costs:

Based on the information received from the Fargo Police Department, the average cost per detox visit is $120, not accounting for police officers time to collect and transport individuals to the facility. The total cost for detox visits decreased from $75,360 to $21,840. For the Cost Study Group, this is a cost savings of 71% or $53,520. In addition, this particular Study Group has seen 446 fewer visits. The detox cost data was compiled through October of 2011.



Administration Costs:

The capital outlay of the administration costs is $97,248. This service is provided by Dacotah Foundation through a contract with Southeast Human Services. The front desk is staffed 24/7 and these individuals are considered key to the success and integration back into the community. They staff check tenants and guests in and out of the building, monitor the security system, help with wellness checks, and work to link tenants to appropriate services.

Emergency Shelter:

Based on the information provided by only one of several homeless shelters in Fargo, the Study Group costs were reduced from $139,200 to $3,200, for a total cost savings of $136,000 or 98%. The number of emergency shelter nights was reduced from 4,350 to 100. The emergency shelter cost data was taken from averaging the costs for 2010 and 2011 to determine the average cost per year. The number of times accessed was taken compiled through October 2011.

Below is a statistical comparison of the number of times a service was accessed for the Cost Study Group before and during their residency at the Cooper House:

Places of Birth:

Many of the participants in the cost study call North Dakota their home and have lived here their entire life. Below, the red stars indicate where a portion of the Cost Study Group individuals are originally from.

Please note that not all costs were captured during the study. Some services accessed are not accounted for here and the cost of working with these individuals on the street is understated. For example, only one of several homeless shelters and one of the two hospitals were contacted for this study. Meals from community based organizations are also not accounted for here. In addition, costs accumulated here are only based on the individuals costs accumulated while living in Fargo and do not account for costs incurred in other locations.

HB 1012
NDACP Testimony
Senate Appropriations Committee
Hon. Ray Holmberg , Chairman
March 10, 2021

Chairman Holmberg and members of the Senate Appropriations Committee, greetings, and thank you for this opportunity. I am Bruce Murry, Executive Director of the North Dakota Association of Community Providers (NDACP.org). NDACP is the membership organization of 30 licensed providers of services to North Dakotans with developmental disabilities (DD). We serve about 90% of people with DD in North Dakota.

As a registered lobbyist (#330) for NDACP, I would like to introduce several board members who will give in-person, video, or written testimony from their respective areas of expertise:

- Julie Erickson, CEO of Grand Forks Growth and Support Center, Grand Forks;
- Scott Anderson, Program Service Director for Development Homes, Inc., Grand Forks;
- Lorena Poppe, CEO of Poppy's Promise, Bismarck, NDACP Vice President;
- Scott Burtsfield, CEO of Vocational Training Centers (VTC), Fargo;
- Brooke Austin, CEO of Community Living Services, Fargo, who in turn will introduce at least two people currently receiving services proposed for elimination:
  - Jackie Krei of Fargo, and Jackie Long of Fargo;
- Donna Byzewski, LBSW, MS, Guardianship Division – Intellectual Disabilities Director, Catholic Charities North Dakota, Fargo
- Tom Newberger, CEO of Red River Human Services Foundation, Fargo; and
- Jon Larson, CEO of Enable, Inc., Bismarck, our NDACP President.

NDACP has a relatively modest legislative platform for the 2021-2023 biennium, in recognition that uncertain times face the energy and agricultural sectors in our state.

- Maintenance of the House's restoration of approximately eleven million dollars ($11,000,000) to provider rates for residential habilitation and intermediate care facilities for people with intellectual and developmental disabilities (ICFID), but also,
  - Maintenance of the Governor's proposed two million, four hundred thousand dollar increase ($2,400,000) to day support services such as individual employment, group employment, and prevocational services, with a matching reduction to Intermediate Care Facilities for people with Intellectual Disabilities (ICFID) and residential habilitation;
- Restoration of $240,000 in funding for mandated DD provider accreditation with the Council on Quality and Leadership (CQL);
- Inflationary increases to DD providers of 3% each year of the 2022 - 2023 biennium, especially due to economic and wage pressures in various communities;

- Maintaining the House's appropriation of up to $250,000 to NDDHS to financially stabilize DD providers disproportionately affected by the COVID-19 emergency — especially In Home Support providers who suffered the greatest losses;
- Restoration of all cuts to Section 11 State General Fund services to people with DD who don't qualify for the DD Medicaid Waiver;
- Fully fund the 1915(i) Medicaid Amendment with special attention paid to ensure it remains accessible to people with DD/ID, and review of the proposed World Health Organization Disability Assessment Schedule threshold score of 50 — a very severe score;
- Fully fund reforms and behavioral health initiatives from the Life Skills and Transition Center;
- Retention of a substantial state tax credit to employers who hire North Dakotans with developmental disabilities and mental illness, in HB 1405 (2021). HB 1405 received a unanimous do-pass recommendation from Senate Finance and Taxation Committee on March 9, 2021.

Many members also support restoration of funding for recreation and leisure centers with consideration of serving additional communities; a close review of the infant development and Part C budgets to ensure timely services can be brought to bear to minimize developmental delays; and strengthening of rates in related home and community based services to North Dakotans with other kinds of disabilities — QSP services under Aging Services and for brain injury, as well as 1915(i) Medicaid Amendment behavioral health services.

NDACP is persuaded that building a new State Hospital as proposed in HB 1012 makes sense to move more mental health services to the community. It is difficult to move beyond brick and mortar legacies built by generations past, but it is probably time.

Many of you know we have welcomed Angela Dinius as Workforce Development Director for NDACP. She and I are both happy to answer any questions that may arise about NDACP, its members' services to people, and our priorities. Our contact information is below.

Thank you for your kind attention.

North Dakota Association of Community Providers

Testimony on HB 1012
Christina Sambor, North Dakota Coalition for Homeless People
Senate Appropriations
March 10, 2021

Mr. Chairman and Members of the Committee:

On behalf of the North Dakota Coalition for Homeless People, I testify today requesting that the Senate Appropriations committee restore funding to supportive housing services. HB 1012 contains a reduction in vital funds for these services and has already passed the North Dakota House of Representatives with those cuts intact. The requisite funding needed for the projects impacted are as follows: $570,000 for Cooper House, Fargo | $640,000 – for Edwinton Place, Bismarck | $515,000 – for LaGrave on First, Grand Forks.

These projects provide permanent supportive housing for people who have experienced chronic homelessness and are a vital asset in addressing homelessness. Permanent supportive housing is effective and is an investment that provides cost savings to the community. The DHS budget assumes the reduction in funds for supportive housing services can be replaced by North Dakota Medicaid 1915(i) reimbursement. This raises the following concerns:

- The 1915(i) plan has not been in existence long enough to be a proven or adequate replacement for these funds. The 1915(i) plan is a positive thing for ND and for homeless services, but it is too soon to tell if it will be an effective funding strategy for permanent supportive housing.
- It is unknown if enough residents of these projects will qualify to make up the gap in funding.
- Without these funds, supports and other components such as 24/7 security would be dramatically reduced or eliminated. Two major concerns from this loss of funding:
    - Reduced services would lead to decreased chances of long-term housing stability.
    - Reduced security would impact resident safety and could increase police calls/interaction at these locations (a costly community resource).

Overall, this loss of funding without a guaranteed replacement will likely bring unintended harm to the vulnerable people it is meant to serve. Housing advocates are appreciative of DHS being a collaborative partner in permanent supportive housing and it is desired for this to continue and increase. Full funding is needed for the next biennium to ensure long term solutions to services for addressing chronic homelessness can continue, including use of the 1915(i).

In summary: The 1915(i) may provide a savings to the DHS budget in the future and may even prove to increase/improve services long term—however, it is too soon to tell. Funding for the next biennium is important to continue services while determining how 1915(i) may be beneficial moving forward.

THE CITY OF Fargo FAR MORE

CITY OF FARGO POLICE DEPARTMENT

Chief David B. Zibolski

March 3, 2021

Senate Appropriations Committee
Senator Ray Holmberg, Chair
600 E Boulevard Avenue
Bismarck, ND 58505

Re: Support of HB 1012 to fund the Cooper House in Fargo, North Dakota

Dear Chairman Holmberg and members of the Committee,

I am the Chief of Police in Fargo, North Dakota, and I am writing you today in strong support of HB 1012, which requests to provide $570,000 in funding to support continued operations of the Cooper House. As you may be aware, the Cooper House has operated in Fargo for nearly ten years, focusing as a Housing First project. In doing so, they provide housing to 42 permanent residents, as well as provide 24/7 service that includes mental health, addiction, and chronic homelessness.

The Cooper House has not only provided housing for 42 individuals who would otherwise be homeless and on the streets of Fargo, but has been an excellent public safety partner for our department to work with in addressing these issues. Their existence and service provide needed options for our department members who encounter chronically homeless individuals, and as such, create a cost savings in both time and resource spending by our department. Their professional staff assist attendants with day-to-day needs, aids them in handling conflicts, and monitors the amount of alcohol brought into the facility, with the goals of acquiring sobriety and better day-to-day functioning. The facility is a joint effort with the Dakota Foundation, the Fargo Housing Authority, the Southeast Human Service Center, Family Health, and Cass County Social Services.

I personally spoke with several of our officers who have day-to-day engagement with the Cooper House and who express the importance of this funding appropriation to ensure its continued operations. The continued support of the Cooper House not only provides necessary and needed service to our homeless community, but also reduces the cost and personnel commitment of other law enforcement interventions, which are often times less effective.

The Fargo Police Department strongly supports the $570,000 appropriation request in HB 1012 and I urge you to vote in favor of this bill. Should you have any additional questions, please feel free to contact my office.

Sincerely,

David B. Zibolski
Chief of Police

HB 1012
3/11/2021 AM
Senate Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Holmberg opened the hearing at 8:30 AM.

Senators present: **Holmberg, Krebsbach, Wanzek, Bekkedahl, Poolman, Erbele, Dever, Oehlke, Rust, Davison, Hogue, Sorvaag, Mathern, and Heckaman.**

Discussion Topics:

- Transition Center residents
- New Fire Station and fire tower on Grafton property
- Origination of resident's disability
- Signers on DOJ agreement
- Long term care requirements
- Child abuse and neglect
- Ombudsman program
- Cost of home-delivered meals

Chris Jones, Director, Dept. of Human Services publicly thanked Sue Forester for her 40 years at DHS.

Sue Forester, Superintendent, Life Skills Transition Center – testified in favor and submitted testimony #8744.

Nancy Nikolas Maier, Director, Aging & Adult Services, DHS – testified in favor and submitted testimony #8745.

Jessica Thomasson, Executive Policy Director, DHS – testified in favor and submitted testimony #8746.

Cory Pedersen, Director, Children and Family Services, DHS – testified in favor.

Senator Holmberg closed the hearing at 11:52 AM.

Rose Laning, Committee Clerk

House Bill 1012

Senate Appropriations

Senator Ray Holmberg, Chairman

Life Skills and Transition Center

Providing supports and services so people can move back to homes of their choice.

Be Legendary.™

LIFE SKILLS TRANSITION CENTER
What we do

Traditional (ICF/IID) Services

- Residential Services
- Vocational Services

Home and Community-Based Waiver Services

- Residential Habilitation Services
- Vocational Habilitation Services
  - Day Habilitation
  - Pre-vocational Services
  - Small Group Employment
  - Individual Employment

Statewide Crisis and Support Services

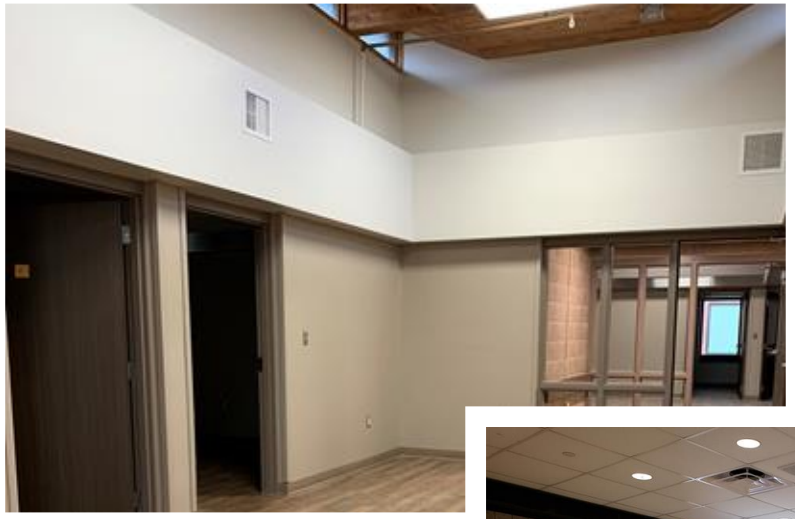
- Applied Behavioral Analysts
- CARES Crisis Coordinators
- CARES Services
- Transition to the Community Supports

LSTC Residential Crisis Units

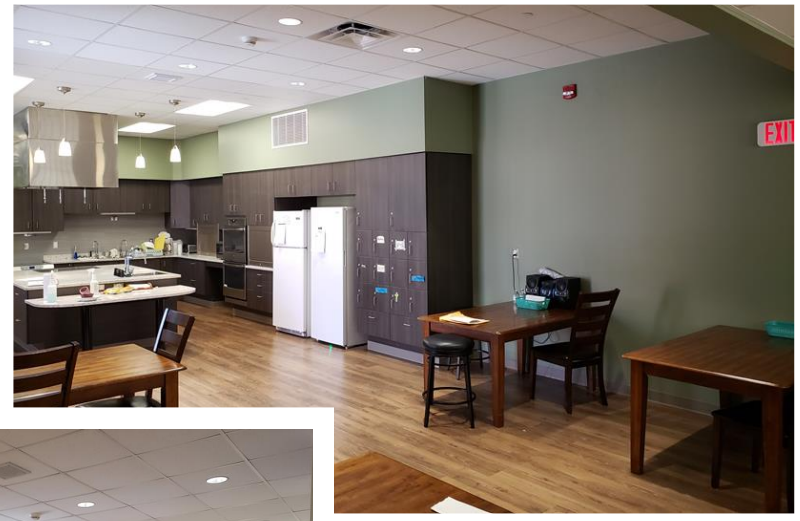
- Adult Crisis Beds
- Youth Crisis Beds

LIFE SKILLS TRANSITION CENTER
Accreditation

Dec. 2019 - LSTC achieved accreditation by Council on Quality Leadership (CQL) for **Person-centered excellence**



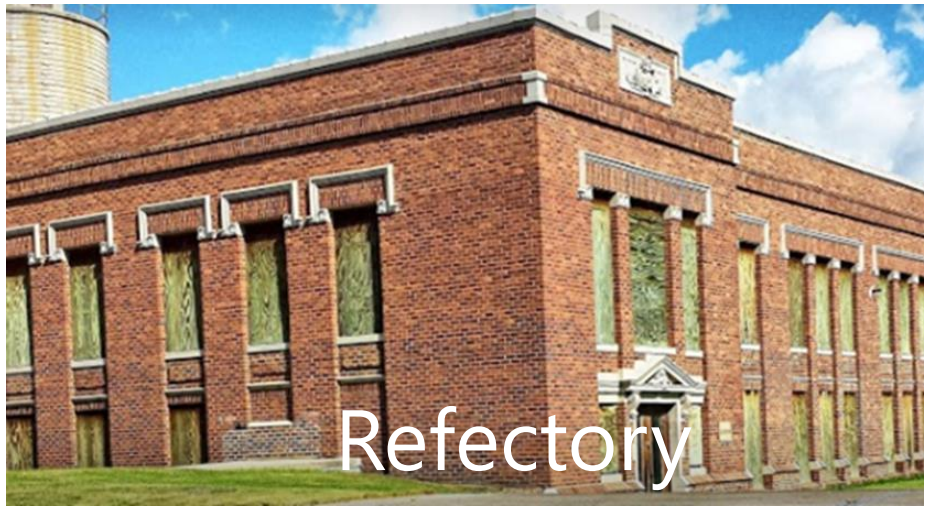
From the report:



"LSTC recognizes its value as a safety net … aims to arm people with supports and resources, they need to be supported in a less restrictive environment."

LIFE SKILLS TRANSITION CENTER
Our space

Reduced footprint
The LSTC is in the process of consolidating residences and services to become more efficient in resource utilization and delivery of services.



LIFE SKILLS TRANSITION CENTER
Our space

Other Capital Projects

- Window replacement (April 2021)
- Transfer switch replacement (March 2020)
- Roofing (Aug. 2020 and Nov. 2021)
- Demolition (Oct. 2020) (at right)

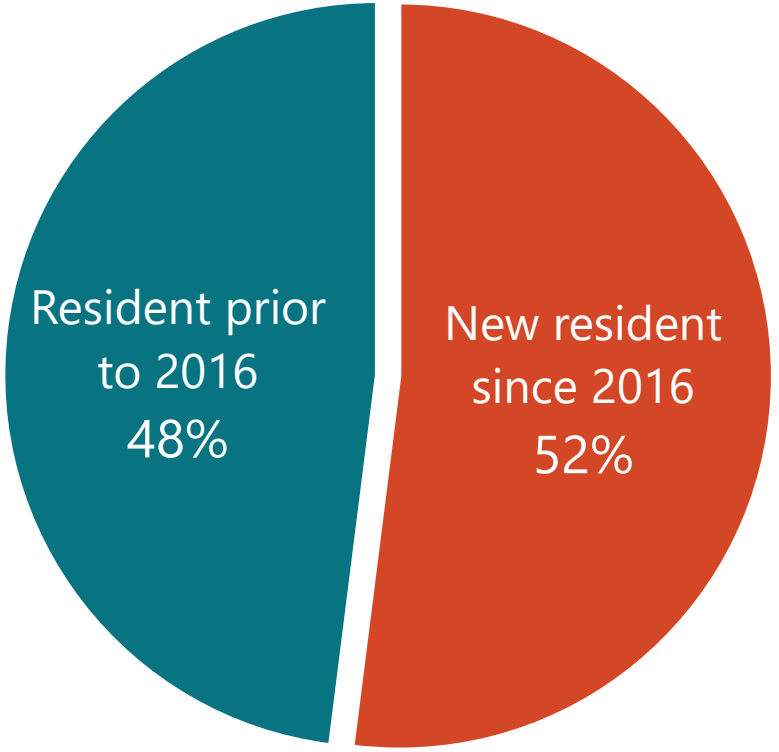
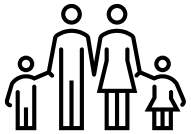
2019	7	2	5	3
2020	5	5	11	7

Reasons for Admission to LSTC

- Physical aggression within the family home or residential setting (towards family, employees, or other vulnerable people that they live with)
- Significant property destruction
- Self-abuse
- Other unsafe behaviors



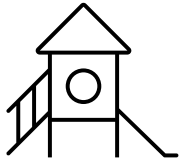
Increase in admissions with higher cognitive abilities (13 of 15 with mild/moderate IDD)



LIFE SKILLS TRANSITION CENTER
Residential Turnover

Transition Planning begins upon admission to LSTC

Care Team works together to identify long-term solutions for individual that reflect their choice and their needs



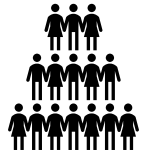
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

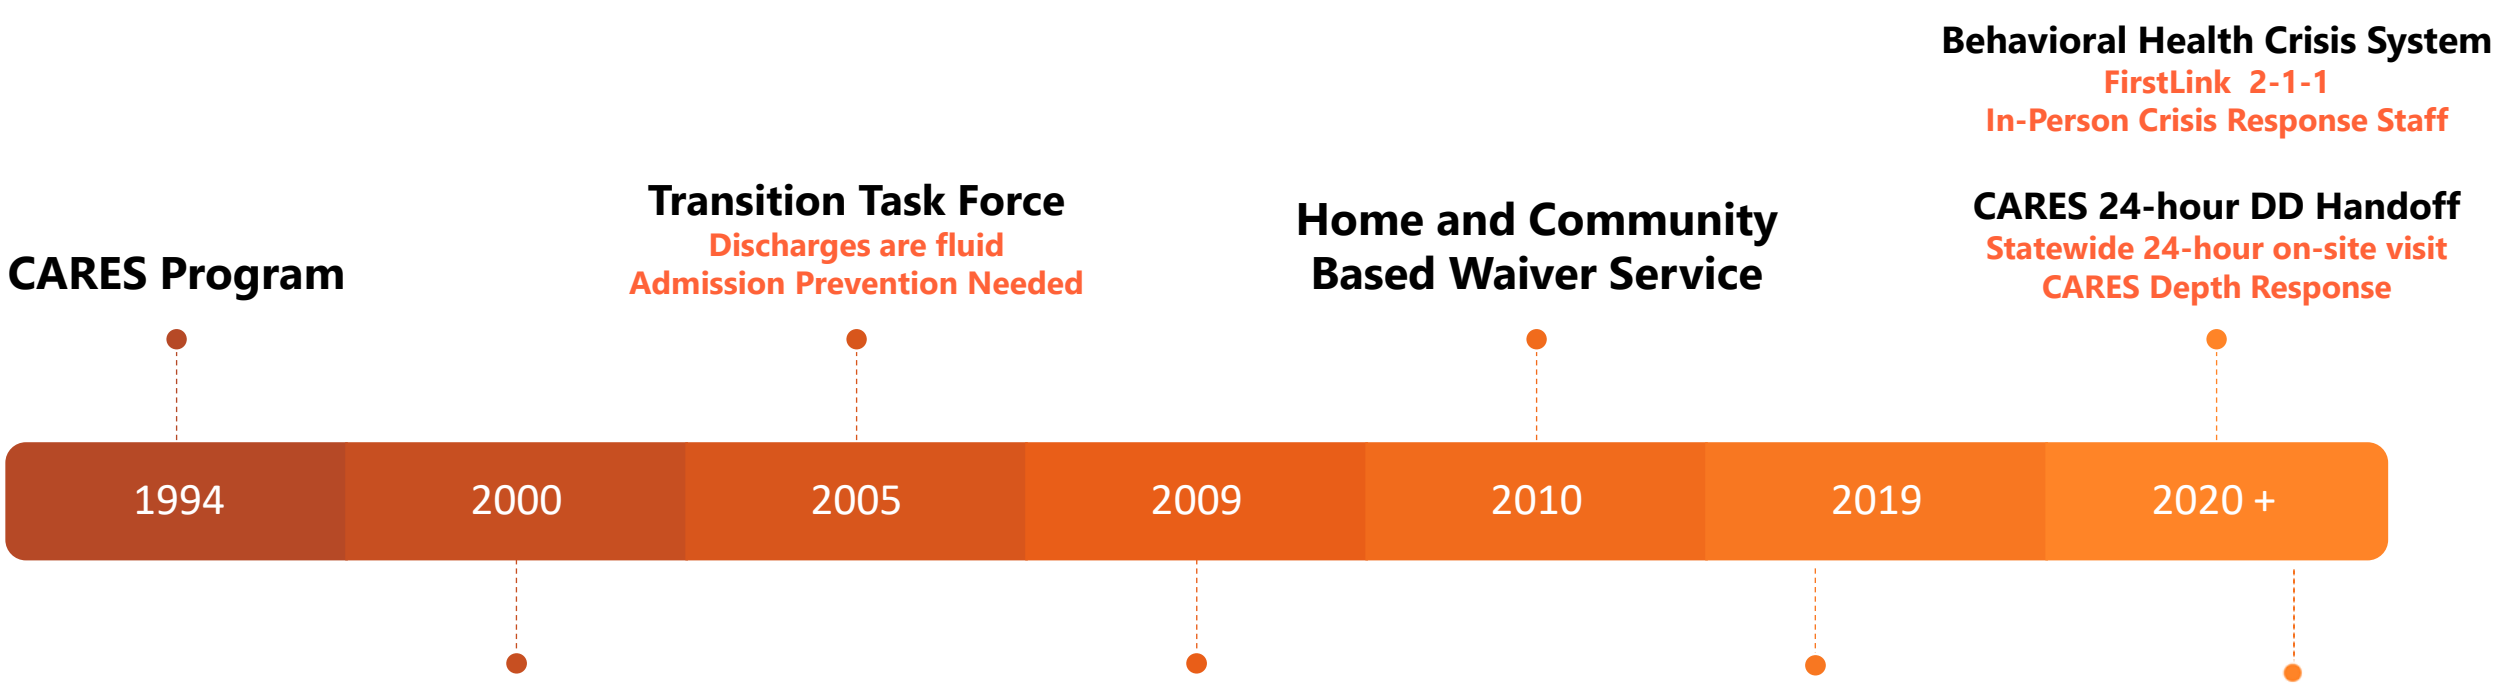
High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

Services Closer to Home



- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

DHS Key Priority

BIG Idea

Accelerate our efforts to transition adults and youth to smaller community settings.

OVERVIEW OF BUDGET CHANGES (IN MILLIONS)

15% Savings Plan

- LSTC Savings
  - Operational ($0.2) million
  - FTE ($1.4) million
- Net Savings ($3.2) million

Transitions to DD ($7.9) million

- Budget incrementally as people move to the community

The Net Savings DHS will realize from the 15% Savings Plan and Transition to DD Budget will be $3.3 million.

House Changes ($.1) million

- Includes $100,000 for Temp Psychiatrist

Other budget impacts

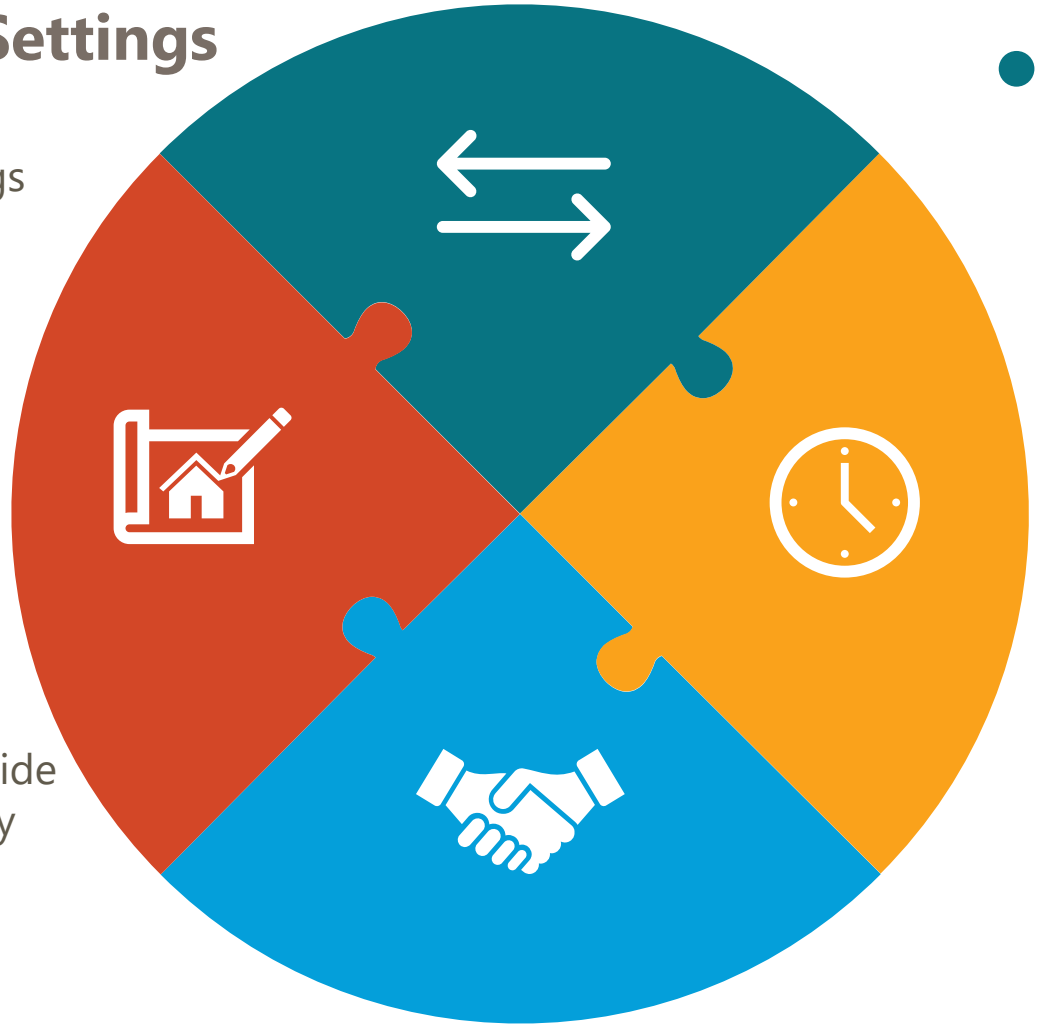
Permission to convey a portion of two parcels of land commonly referred to as “the bowl” to the Grafton Park Board

Senator Fors has presented an amendment on behalf of the Grafton Fire Department requesting permission for the LSTC to covey a portion of land for a new Fire tower and Fire Station.

Additional unanticipated budget request: $183,040

- Unanticipated retirement of psychiatrist from Northeast Human Service Center
- Added to amendment that administration-fiscal will present before the committee.
- Critical need due to Behavioral Health diagnosis and acuity

Keys to successful acceleration of transition to community



Marshalling our resources to support a person's ability to make an informed choice about the most integrated setting that is right for them

New Community Settings

Create new small scale specialized residential settings (behavioral focus) in 2-3 communities

Shared Understanding of LSTC Role

Re-establish LSTC as a setting that specializes in crisis and stabilization services

Community Crisis Support

Continue to build LSTC crisis support team capacity to provide on-site response to emergency crisis in various community settings within 24-hours

Crisis Stabilization

Build staffing model and operational processes to support admission to LSTC within 48-hour

LSTC Net Budget Savings Plan Requires Partnership

Collaboration between LSTC, DD, and Children Family Services as well as ND community providers.

Census reduction of 16 youth and 10 adults to homes in their community.

The transition of people will occur gradually throughout the biennium as appropriate settings are developed by community providers.

Each person and their family/guardian will be involved in the development of their Person-Centered Transition Plan.

The LSTC is recognized as a setting that specializes in crisis and stabilization services.

Meet Janie.

Meet Janie's Family.

Janie is 14. Janie is on the Autism Spectrum. She receives services through the Medicaid DD waiver.

She was living at home in Velva with her parents and two sisters, attending school part time.

Things at home were escalating. Her intensifying behaviors became too much for the family to handle. Everyone was exhausted.

Janie's family received in-home support (40-60 hrs/wk).

As things escalated, they worked with their DD case manager and DD diversion coordinator to identify options.

In-community options were limited. A crisis placement at LSTC was approved.

- Mom works part time at the elevator. Dad works full time at the nursing home.
- All three girls attend the local school (ages 7, 9 and 14).

A young girl is struggling. So is her family. What do we do?

Understanding how systems can help families find stability amidst crisis

Service Continuum

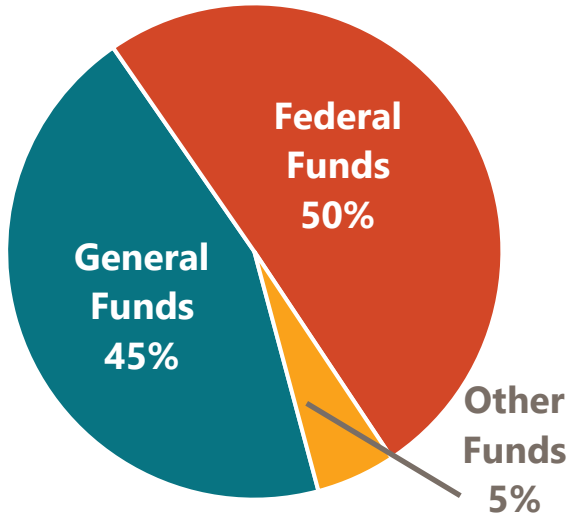
LIFE SKILLS TRANSITION CENTER

Successful stabilization happens with comprehensive support

- **Interdisciplinary team** to review, assess, case plan, and support
- Implementation of **Positive Supports** by professionals with expertise in both developmental disabilities and mental illness
- Professional **assessment of functional communications**/behavior
- Accessible, regular **interdisciplinary healthcare** consultations
- **Consistent structure and routine**
- Services and **supports to re-integrate** into family home, community group home, school and vocational environments



LSTC Budget Summary

19-21 Budget	**$58,794,948**
21-23 Budget (exec)	**$48,619,605**

Reduction of 14.5 FTEs; $10,175,343 budget reduction (50% in federal funds)

- Reduce census by 26 (16 youth, 10 adults) via both transitions and diversions
- Shift operations to re-orient toward crisis and stabilization service
- Reduce general fund contribution to adaptive equipment service, seeking alternate revenue sources

NOTE: Interconnection between LSTC, CFS and DD budgets as service models shift

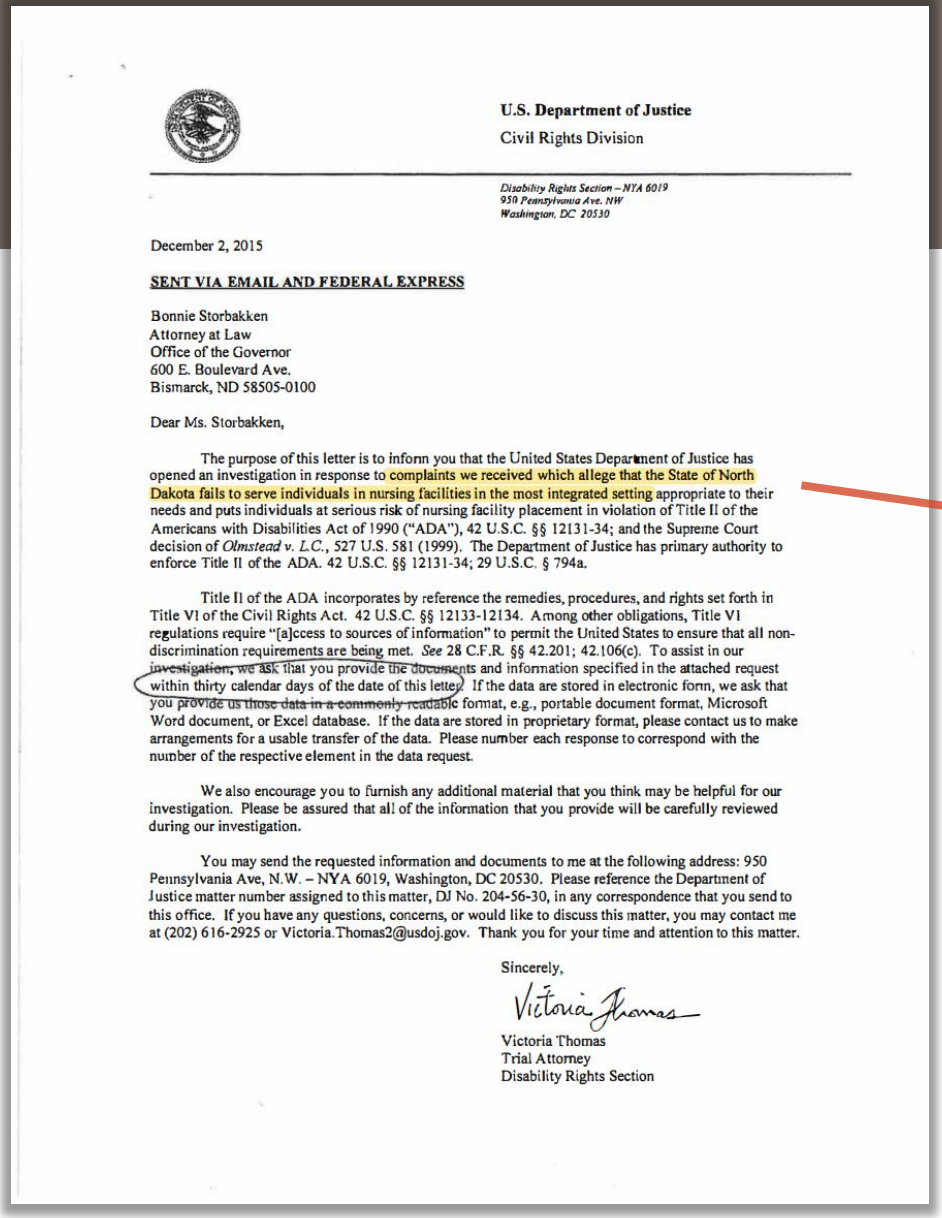
DOJ SETTLEMENT
AGREEMENT SUMMARY
SENATE APPROPRIATIONS SENATOR HOLMBERG, CHAIRMAN

March 11, 2021

NORTH Dakota
Be Legendary.™

SETTLEMENT AGREEMENT BETWEEN U.S. DOJ & STATE OF ND



Purpose is to ensure that the State will meet the ADA requirements by providing services, programs, and activities for individuals with physical disabilities in the most integrated setting appropriate to their needs.

Effective December 14, 2020

Agreement will terminate eight years after effective date if Parties agree that the state has attained substantial compliance with all provisions and maintained that compliance for a period of one year.

NOTIFICATION FROM DOJ

U.S. Department of Justice
Civil Rights Division

Disability Rights Section – NYA 6019
950 Pennsylvania Ave. NW
Washington, DC 20530

December 2, 2015

SENT VIA EMAIL AND FEDERAL EXPRESS

Bonnie Storbakken
Attorney at Law
Office of the Governor
600 E. Boulevard Ave.
Bismarck, ND 58505-0100

Dear Ms. Storbakken,

The purpose of this letter is to inform you that the United States Department of Justice has opened an investigation in response to complaints we received which allege that the State of North Dakota fails to serve individuals in nursing facilities in the most integrated setting appropriate to their needs and puts individuals at serious risk of nursing facility placement in violation of Title II of the Americans with Disabilities Act of 1990 ("ADA"), 42 U.S.C. §§ 12131-34; and the Supreme Court decision of *Olmstead v. L.C.*, 527 U.S. 581 (1999). The Department of Justice has primary authority to enforce Title II of the ADA. 42 U.S.C. §§ 12131-34; 29 U.S.C. § 794a.

Title II of the ADA incorporates by reference the remedies, procedures, and rights set forth in Title VI of the Civil Rights Act. 42 U.S.C. §§ 12133-12134. Among other obligations, Title VI regulations require "[a]ccess to sources of information" to permit the United States to ensure that all non-discrimination requirements are being met. *See* 28 C.F.R. §§ 42.201; 42.106(c). To assist in our investigation, we ask that you provide the documents and information specified in the attached request within thirty calendar days of the date of this letter. If the data are stored in electronic form, we ask that you provide us those data in a commonly readable format, e.g., portable document format, Microsoft Word document, or Excel database. If the data are stored in proprietary format, please contact us to make arrangements for a usable transfer of the data. Please number each response to correspond with the number of the respective element in the data request.

We also encourage you to furnish any additional material that you think may be helpful for our investigation. Please be assured that all of the information that you provide will be carefully reviewed during our investigation.

You may send the requested information and documents to me at the following address: 950 Pennsylvania Ave, N.W. – NYA 6019, Washington, DC 20530. Please reference the Department of Justice matter number assigned to this matter, DJ No. 204-56-30, in any correspondence that you send to this office. If you have any questions, concerns, or would like to discuss this matter, you may contact me at (202) 616-2925 or Victoria.Thomas2@usdoj.gov. Thank you for your time and attention to this matter.

Sincerely,

Victoria Thomas
Trial Attorney
Disability Rights Section

DECEMBER 2015

> "...complaints we received which allege that the **State of North Dakota fails to serve** individuals in nursing facilities in the most integrated setting..."

49
PER 1000

PEOPLE OVER 65 IN CERTIFIED NURSING FACILITIES

HIGHEST RATE IN THE U.S.

Sources: Henry J Kaiser Foundation, US Census Bureau (2016)

VARIETY OF CONCERNS

EXAMPLES PROVIDED BY DOJ

- **Unnecessary segregation** of disabled individuals in skilled nursing facilities
- Adults in skilled nursing facilities who would **rather be in their community**
- **Imbalance of funds** to skilled nursing facilities and community-based services
- **Lack of awareness** about existing transition services and available tools

KEY TERMS | DOJ SETTLEMENT
Americans with Disabilities Act

The Americans with Disabilities Act (ADA) requires public agencies to **eliminate unnecessary segregation** of persons with disabilities and provide services in the **most integrated setting appropriate** to the needs of the individual.

In **1999** the Federal Supreme Court **Olmstead** decision **affirmed** the **ADA** requirements.

KEY TERMS | DOJ SETTLEMENT
Most Integrated Setting

A *living environment* that allows individuals with disabilities to interact with non-disabled persons to the fullest extent possible.

December 2020 U.S. Dept of Justice
Settlement with State of North Dakota

For Example

Single Family Home
Apartment
Townhome
Condominium
Farm or Ranch
Adult Foster Care
Living with family

KEY TERMS | DOJ SETTLEMENT
Community Integration Mandate

Public entities are required to provide **community-based services** when:

- Community-based services are **appropriate** for the individual; and
- The individual **does not oppose** community-based treatment; and
- Community-based treatment can be **reasonably accommodated**, taking into account:
  - Resources available to the entity and
  - Needs of others receiving disability services.

BENEFITS OF DOJ AGREEMENT

1. **Expands and raises awareness** about community-based care options available to adults with physical disabilities

2. Allows individuals to make **informed choices**, including the option to receive care while enjoying the benefits of community living in the least restrictive setting

3. Builds upon the investments made by the 2019 Legislature and our **shared goal** of improving services to citizens

KEY TERMS | DOJ SETTLEMENT
Informed Choice

The process by which the State ensures that Target Population members have an opportunity to make an informed decision about where to receive services.

December 2020 U.S. Dept of Justice
Settlement with State of North Dakota

For Example

- Person-centered planning
- Info about benefits of integrated settings
- Facilitated visits or other experiences in integrated settings
- Opportunity to meet with peers (other individuals with disabilities who are living, working and receiving services in integrated settings)
- Reasonable efforts to identify and address concerns

What do we need to do to help someone make an informed choice about how they may want to access services in the most integrated setting that is right for them?

AGREEMENT VISION

- Long-term care system & supports reform
- Increase access to community-based services
- Increase awareness about service options
- Increase provider capacity & training

Builds upon **shared goal** of improving services to citizens providing care closer to home

AGREEMENT COMPONENTS

I. Introduction
II. Jurisdiction
III. Definitions
IV. Target Population
V. Subject Matter Expert
VI. Implementation Plan
VII. Case Management
VIII. Person Centered Plans
IX. Access to Community Based Svc
X. Information, Screening & Diversion
XI. Transition Services
XII. Housing Services
XIII. Community Provider Capacity & Training
XIV. In-reach, Outreach, Education & Natural Supports
XV. Data Collection & Reporting
XVI. Quality Assurance & Risk Management
XVII. Enforcement
XVIII. General Provisions

IV. TARGET POPULATION MEMBERS (TPM)

COMMUNITY MEMBERS

- Adults with disabilities living in an integrated community setting, but at risk of Medicaid-funded nursing facility care.
- Adults with disabilities in need of additional community-based services to continue living in an integrated community setting.

NURSING FACILITY MEMBERS

- Adults with disabilities who reside in a nursing facility and receive Medicaid-funded long-term care services.
- Adults with disabilities who reside in a nursing facility who are at risk of becoming eligible for Medicaid-funded services.

Who are we trying to reach?

Target population

Basic Eligibility

- Individual with physical disability
- Over age 21
- Eligible or likely to become eligible to receive Medicaid long-term services and supports (LTSS)
- Is likely to require LTSS for at least 90 days.

IF in skilled nursing setting

- Receive Medicaid-funded nursing facility services AND
  - Likely to require long term services and supports
- Receive nursing facility services AND
  - Likely to become eligible for Medicaid within 90 days, have submitted a Medicaid application, and have approval for a long-term nursing facility stay

IF in hospital or home setting

- Referred for a nursing facility level of care determination AND
  - Likely to need services long term
- Need services to continue living in the community AND
  - Currently have a HCBS Case Manager or have contacted the ADRL

KEY TERMS | DOJ SETTLEMENT
Physical Disability

"Physical Disability" – means an impairment that substantially limits major life activity, including one or more major bodily functions, see 42U.S.C 12102: 28 C.F.R 33.108 such that the individuals meets ND's Nursing Facility Level of Care (LOC) by requiring for example, assistance with activities of daily living such as toileting, eating, or mobility.

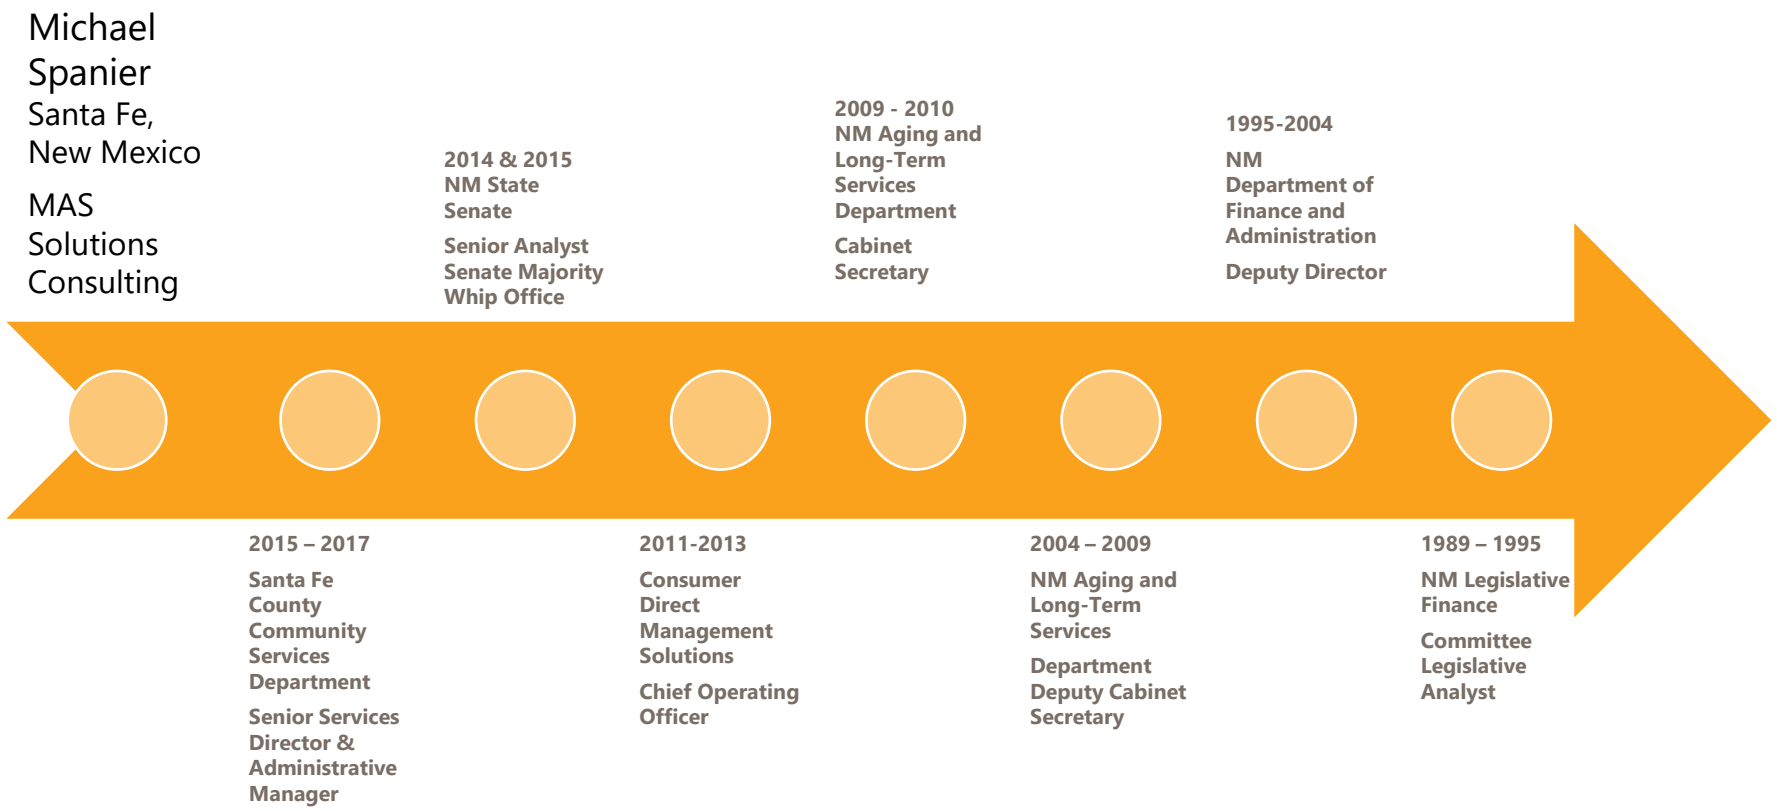
ND Admin code 75-02-09, as may be amended.

WHO IS NOT A MEMBER OF THE "TARGET POPULATION"

Individuals under age 21

Individuals who are not Medicaid eligible

Individuals who are not expected to need services for at least 90 days

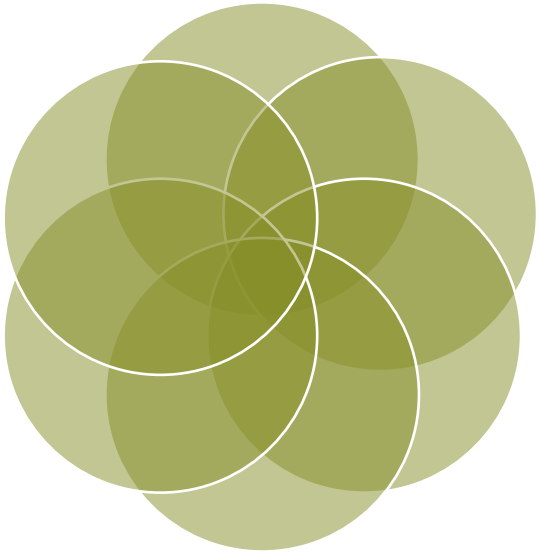


Individuals with an intellectual disability or mental illness who do not screen at a nursing facility level of care

V. SUBJECT MATTER EXPERT

Individual chosen by the parties with expertise in management, administration and finance of HCBS

Provide technical assistance and compliance reviews



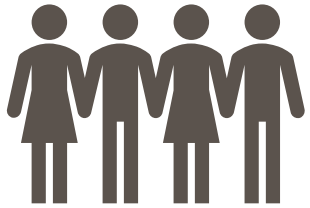
VI. IMPLEMENTATION PLAN

Within 120 days of effective date produce draft plan

Establish a method to address challenges to implementation

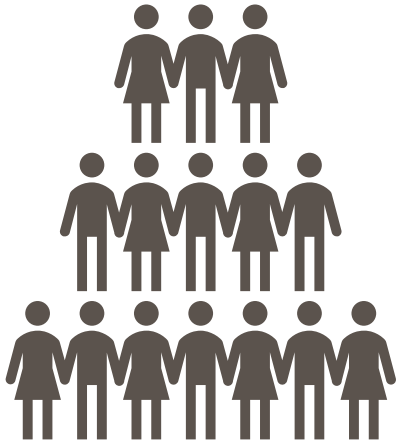
Review relevant services, capacity and barriers

Assign agency and division responsibility for achieving benchmarks



Engage Stakeholders

Identify benchmarks and timelines for meeting Agreement's requirements



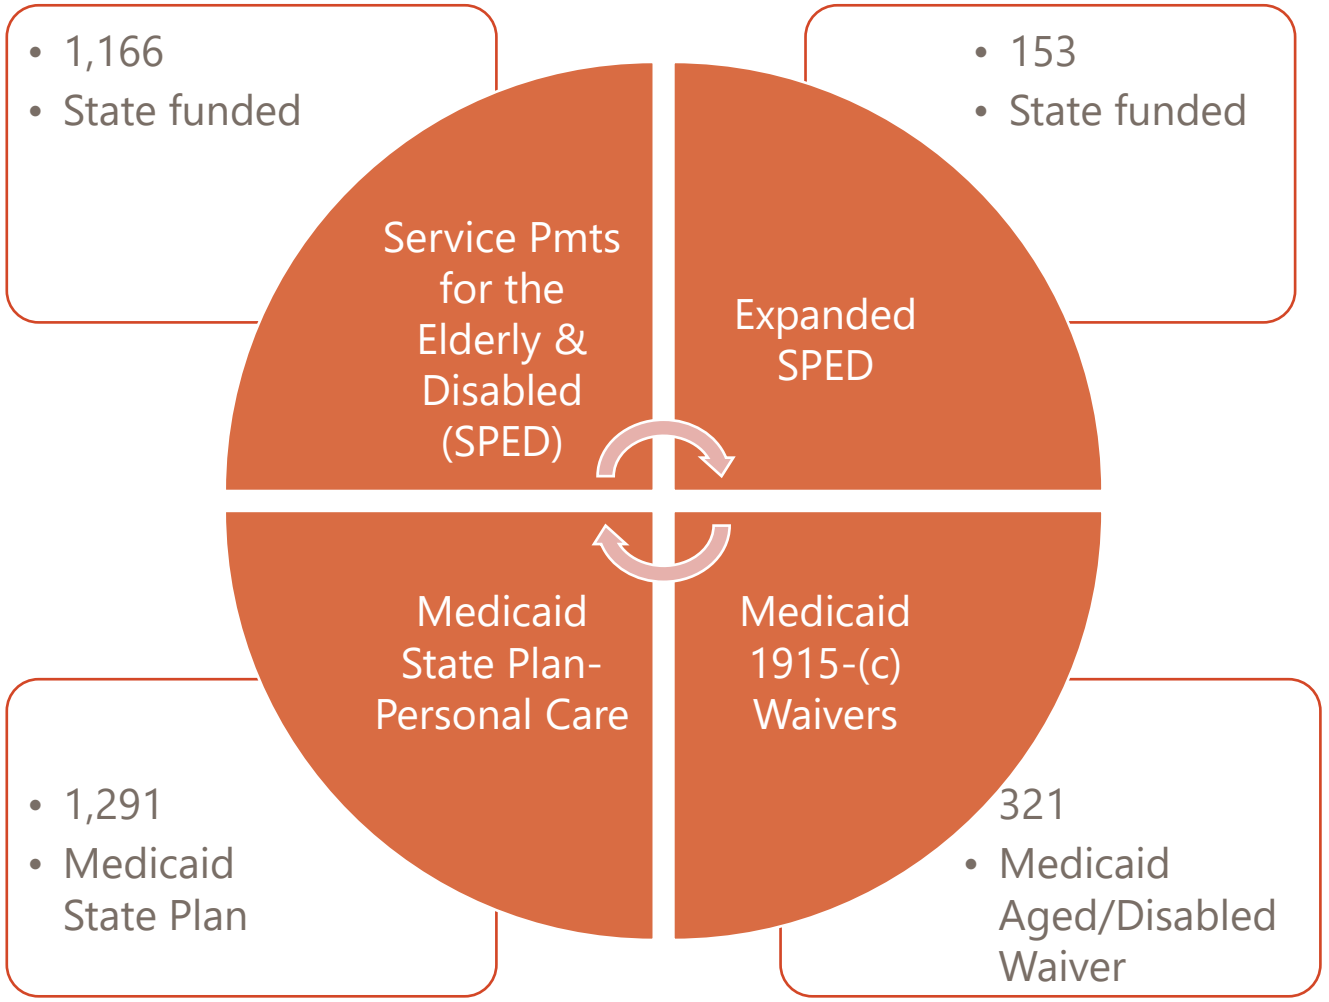
State received approval from DOJ to extend deadline 45 days.

Plan due 5.28.21

VII. CASE MANAGEMENT

64 HCBS Case Managers

Served 2300 individuals
(Nov 2020)

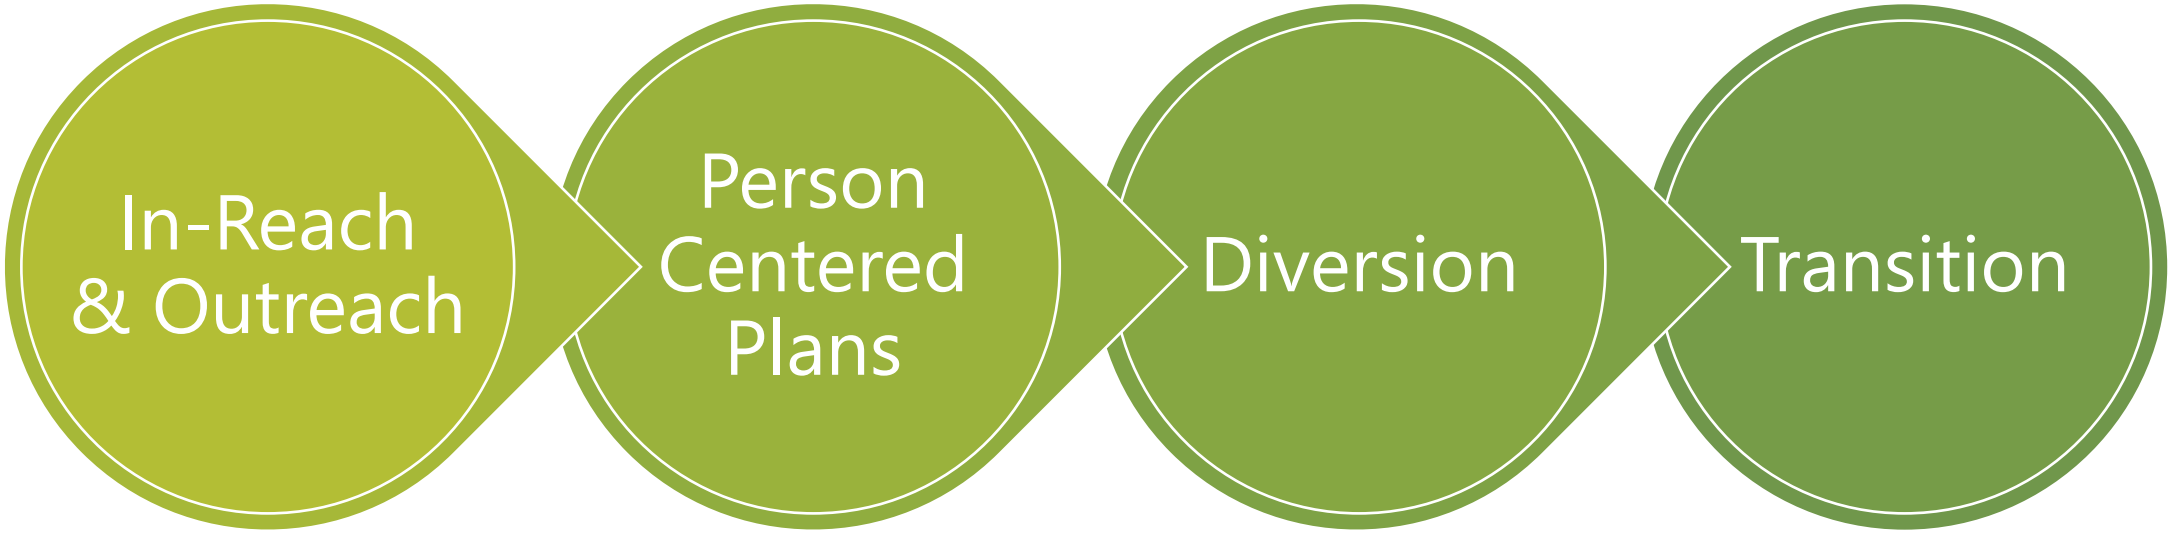


- Provide case management for older adults & individuals with physical disabilities receiving:
  - Service Payments for the Elderly and Disabled (SPED)
  - Expanded SPED (Ex-SPED)
  - Medicaid 1915-(c) Waivers
    - Aged and Disabled
    - Tech Dependent
  - Medicaid State Plan Personal Care (MSP-PC) in community
- Conduct informed choice referral visits

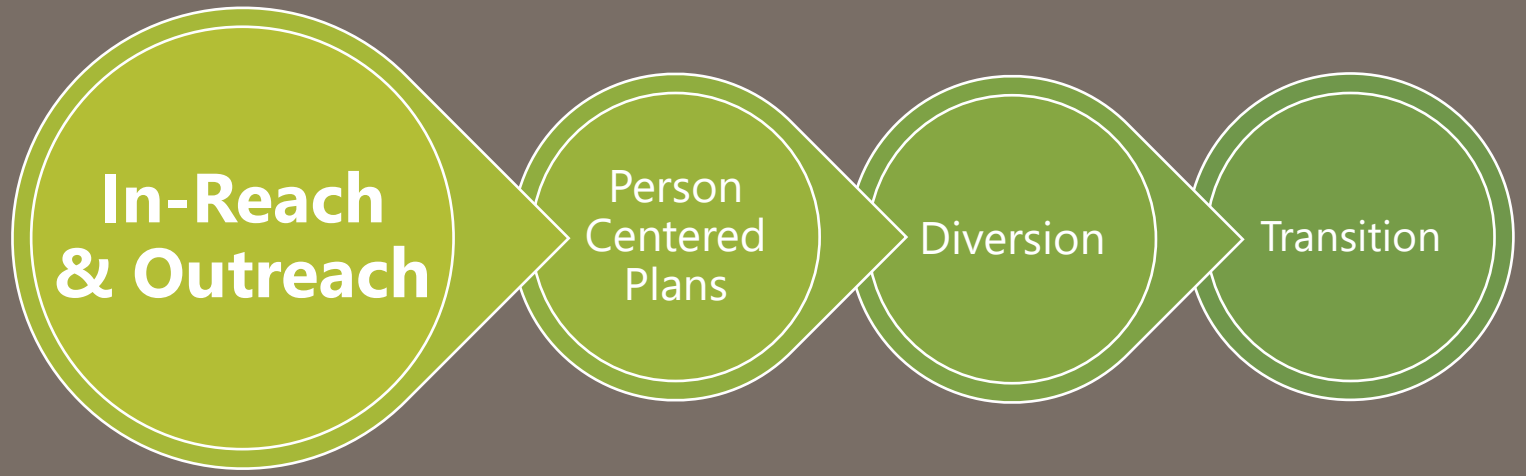
AGING & ADULT SERVICES
Home and Community Based Services

2,300

HCBS supported 2,300 unduplicated recipients



- Primarily serves older adults and individuals with physical disabilities
- Recipients must be both functionally and financially eligible
- May have client cost share based on income
- Federal and state funds



AGING & ADULT SERVICES
Types of *Support Services* available via HCBS

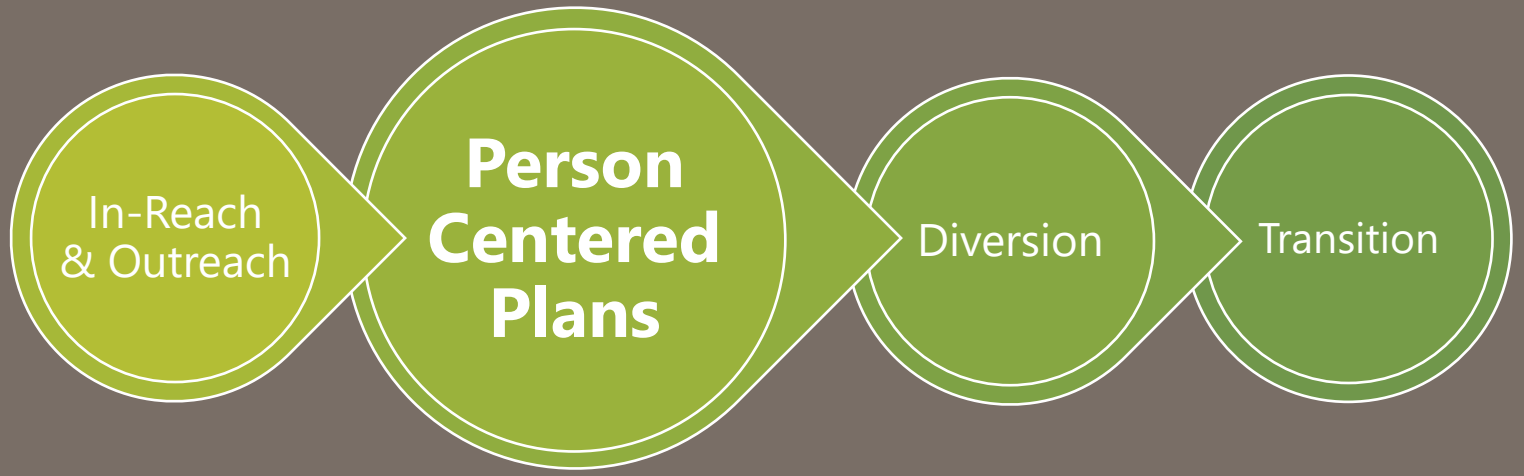
- Adult Day Care
- Adult Foster Care
- Adult Residential Care
- Attendant Care
- Case Management
- Chore Service
- Community Support Services / Residential Habilitation
- Community Transition Services
- Companionship
- Emergency Response System
- Environmental Modification
- Extended Personal Care
- Family Home Care & Family Personal Care
- Home Delivered Meals
- Homemaker Services
- Non-Medical Transportation
- Personal Care Services
- Respite Care
- Specialized Equipment
- Supervision
- Supported Employment
- Transitional Living

ND / DOJ AGREEMENT STRATEGY

XIV. STRATEGY

IN-REACH

Informing individuals in skilled nursing facilities and hospitals of their care options



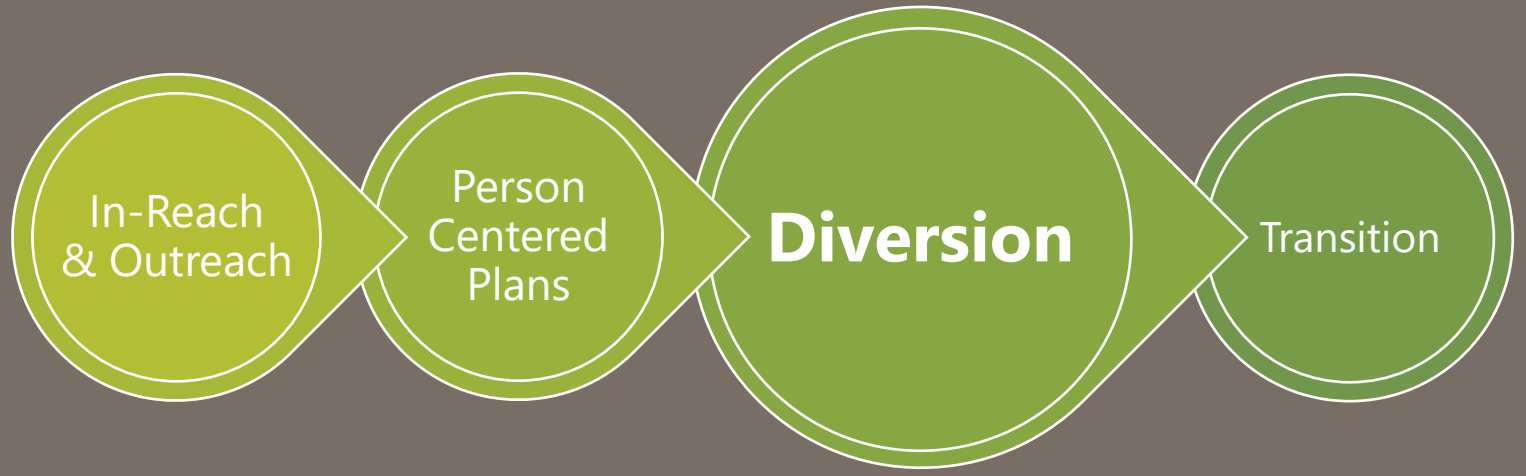
OUTREACH

Informing individuals and stakeholders in the community about their care options

GOALS

Within 9 months	Year 2	Year 4	Year 5 and after
•Individual or group in-reach to all skilled nursing facilities	•Develop peer support system	•Individual in-reach to at least 1,000 Skilled Nursing Facility target population members	• In-reach to all newly admitted or identified Skilled Nursing Facility target population members

VIII. STRATEGY



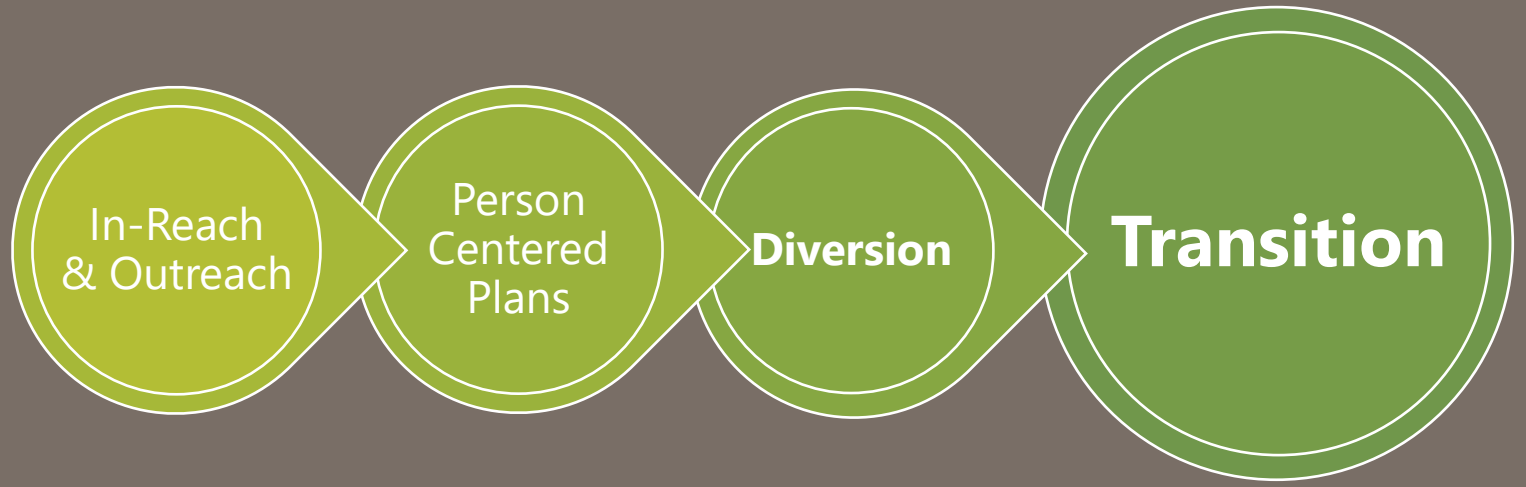
PERSON CENTERED PLANNING

Medicaid mandated process, developed by individual and case manager to identify supports and services that are necessary to meet the individual's needs in the most integrated setting

GOALS

Year 1	Year 2	Year 4	Year 6	Year 8
•290 Target Population Members (TPM)	•Additional 290 TPM	•Additional 650 TPM	•Additional 670 TPM	•Additional 670 TPM

X. STRATEGY



DIVERSION: COMMUNITY LIVING

Set of activities that allow a target population member to avoid placement in a skilled nursing facility and remain living in their home and community

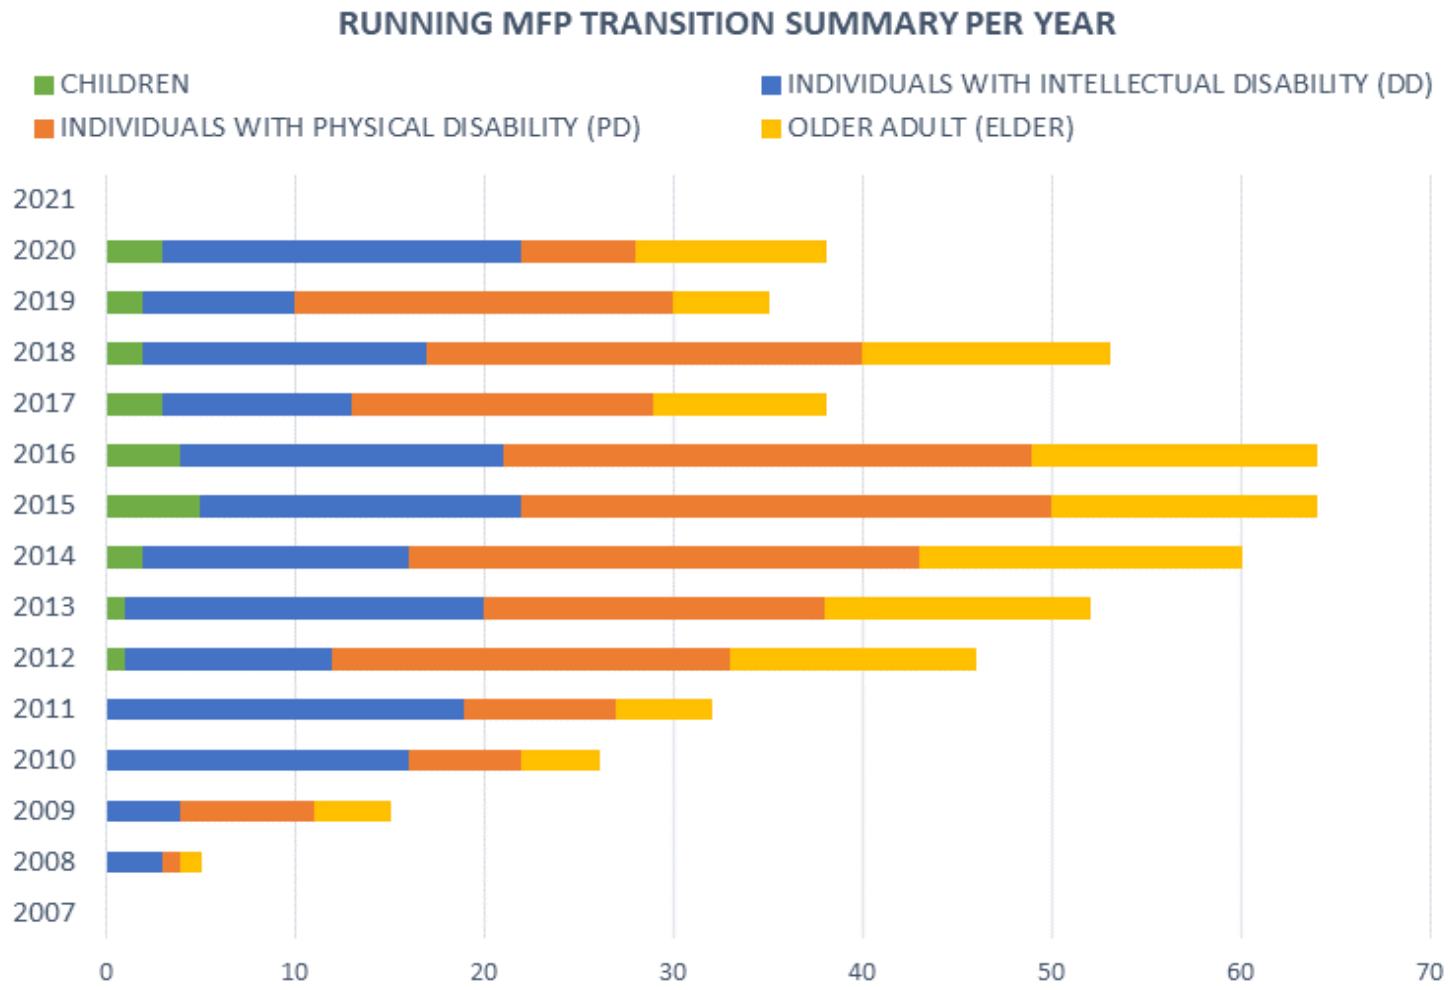
GOALS

Year 2	Year 4	Year 6	
•100 Target Population Members (TPM)	•150 additional TPM	•150 additional TPM	Total 400 diverted

XI. STRATEGY

TRANSITION TO COMMUNITY

Services to prepare an individual currently residing in a skilled nursing facility to return to an integrated community setting



GOALS

Year 2	Year 4	Year 6	Year 8
•Transition 100	•Transition 60% identified through person centered planning (PCP)	•Transition 70% identified through PCP	•Transition all remaining individuals identified PCP

AGING & ADULT SERVICES
Money Follows the Person

Federal Grant designed to assist states to increase the use of home and community-based services (LTSS System Rebalancing)

- Eliminate barriers that prevent individuals from receiving LTSS in the settings of their choice
- Original award - $8.9 million (2007)
- Award through 2020 - $29 million (fed) and $1.7 million (state)
- Transitioned 528 individuals from institutional settings back to the community

XII. HOUSING SUPPORTS

INTEGRATED HOUSING

Federal, state, or local assistance to TPM who need help accessing available integrated housing and support for TPM where lack of housing has been identified as a barrier to community-based services

GOALS			
Year 1	**Year 2**	**Year 3**	**Year 4-8**
•Assist 20 Target Population Members (TPM)	•Assist additional 30 TPM	•Assist additional 60 TPM	•Assist additional number of TPM based on aggregate need

KEY TERMS | DOJ SETTLEMENT
Permanent Supported Housing

Affordable, permanent housing coupled with housing supports and other community-based services. Individual lives in a private home alone, with family, significant other, or roommates of their choosing.

December 2020 U.S. Dept of Justice
Settlement with State of North Dakota

Notes

- Tenants must have access to community provider for intermittent on-call, planned and back up community-based services
- Must be scattered site housing

KEY TERMS | DOJ SETTLEMENT
Integrated Housing

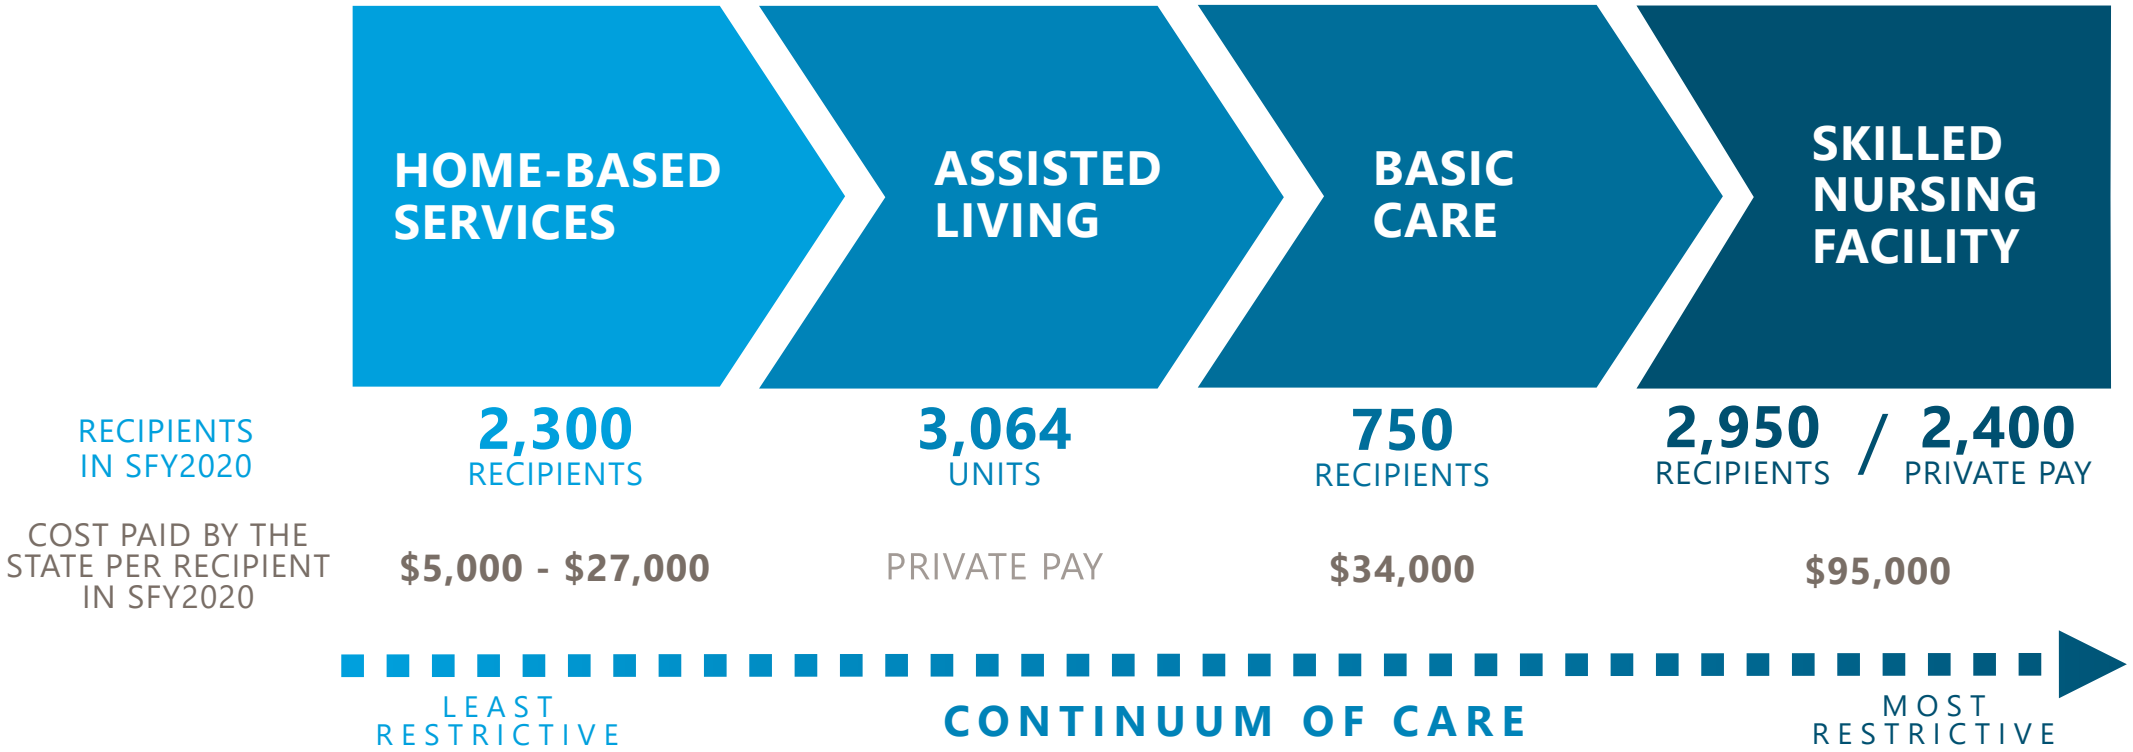
Housing **cannot be provided in** group homes, nursing facilities, boarding homes, residential care facilities or assisted living residences; or any building where more than 25% of the occupants are TPM.

Requires state to **provide** funding for **rental assistance** including reasonable expansion of existing capacity by funding and providing rental assistance to support permanent housing for TPM.

Requires state to **provide** for **assistance** with **identifying** housing, **coordinating** housing modifications, applying for subsidized housing, as well as help **preserving** tenancy if temporarily admitted to a Nursing Home.

XIII. PROVIDER CAPACITY AND TRAINING

State will ensure an adequate supply of qualified trained community providers to enable target population members to transition and live in most integrated setting

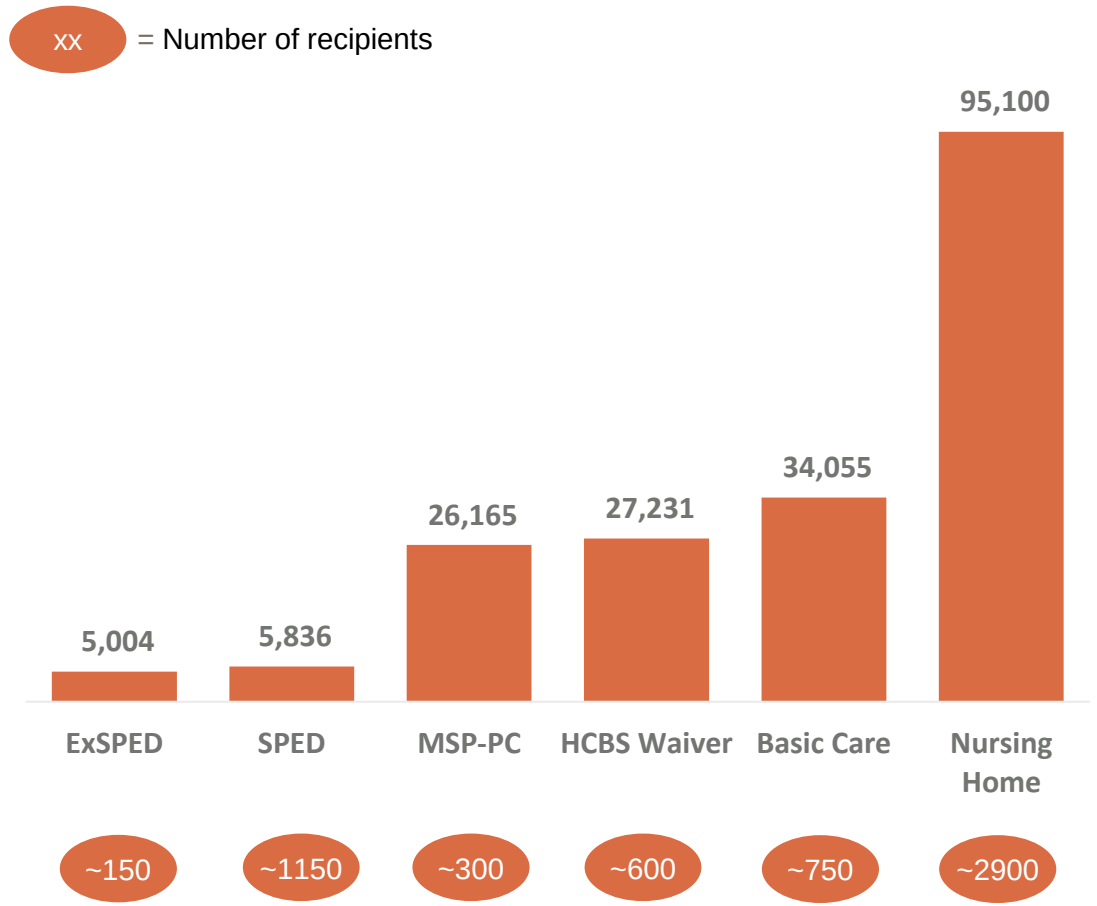


Provide guidance and training to nursing homes and other community providers who make a commitment to provide community-based services

Draft plan to addresses provider capacity, reimbursement rates, incentives to serve individuals with significant medical/supervision needs, those living on Native American reservations and in rural areas

CONTINUUM OF CARE

LONG-TERM CARE SERVICES & SUPPORTS



DHS FUNDED LONG TERM CARE AND HCBS SERVICES

Total cost by type of service

Cost Per Recipient Per Year

Cost paid by state by service in $ in State Fiscal Year 2020

Program Descriptions / Detail

- Service Payments for the Elderly and Disabled (SPED): Provides services for people who are older or physically disabled, have limited assets, and who have difficulty completing tasks that enable them to live independently at home.
- Expanded SPED (Ex-SPED): Pays for in-home and community-based services for people who would otherwise receive care in a licensed basic care facility.
- Home and community-based services (HCBS) waiver: This waiver from the federal government allows the state to use Medicaid funds to provide services enabling eligible individuals who would otherwise require nursing home services to remain in their homes or communities.
- Medicaid State Plan personal care (MSP-PC): Personal care services available under the Medicaid state plan and enable persons with disabilities or chronic conditions accomplish tasks they would normally do for themselves if they did not have a disability.
- Basic Care: Room and board and personal care services for persons eligible for Medicaid.

OPPORTUNITIES FOR COLLABORATION

Internal and external partners

SECTION XVII. ENFORCEMENT

- The Agreement was entered in good faith between the United State and the State. The state agreed to implement the terms of the Agreement and fulfill the requirements under Title II of the ADA.
- After receipt of each of the State's data reports, the United States and State will confer to assess the State's compliance with this Agreement.
- If the United States believes that the State has violated this Agreement, it will notify the State and include reasonably specific information regarding the violation.
- The United States and the State will negotiate in good faith to resolve any dispute.
- If the United States and the State are unable to agree on a resolution within 90 days of the United States' notice of violation, the United States may commence a civil action in the U.S. Court for the District of North Dakota to enforce the terms of this Agreement or the ADA.
- The Agreement will terminate eight years after the Effective Date if the Parties agree that the State has attained substantial compliance with all provisions and maintained that compliance for a period of one year.

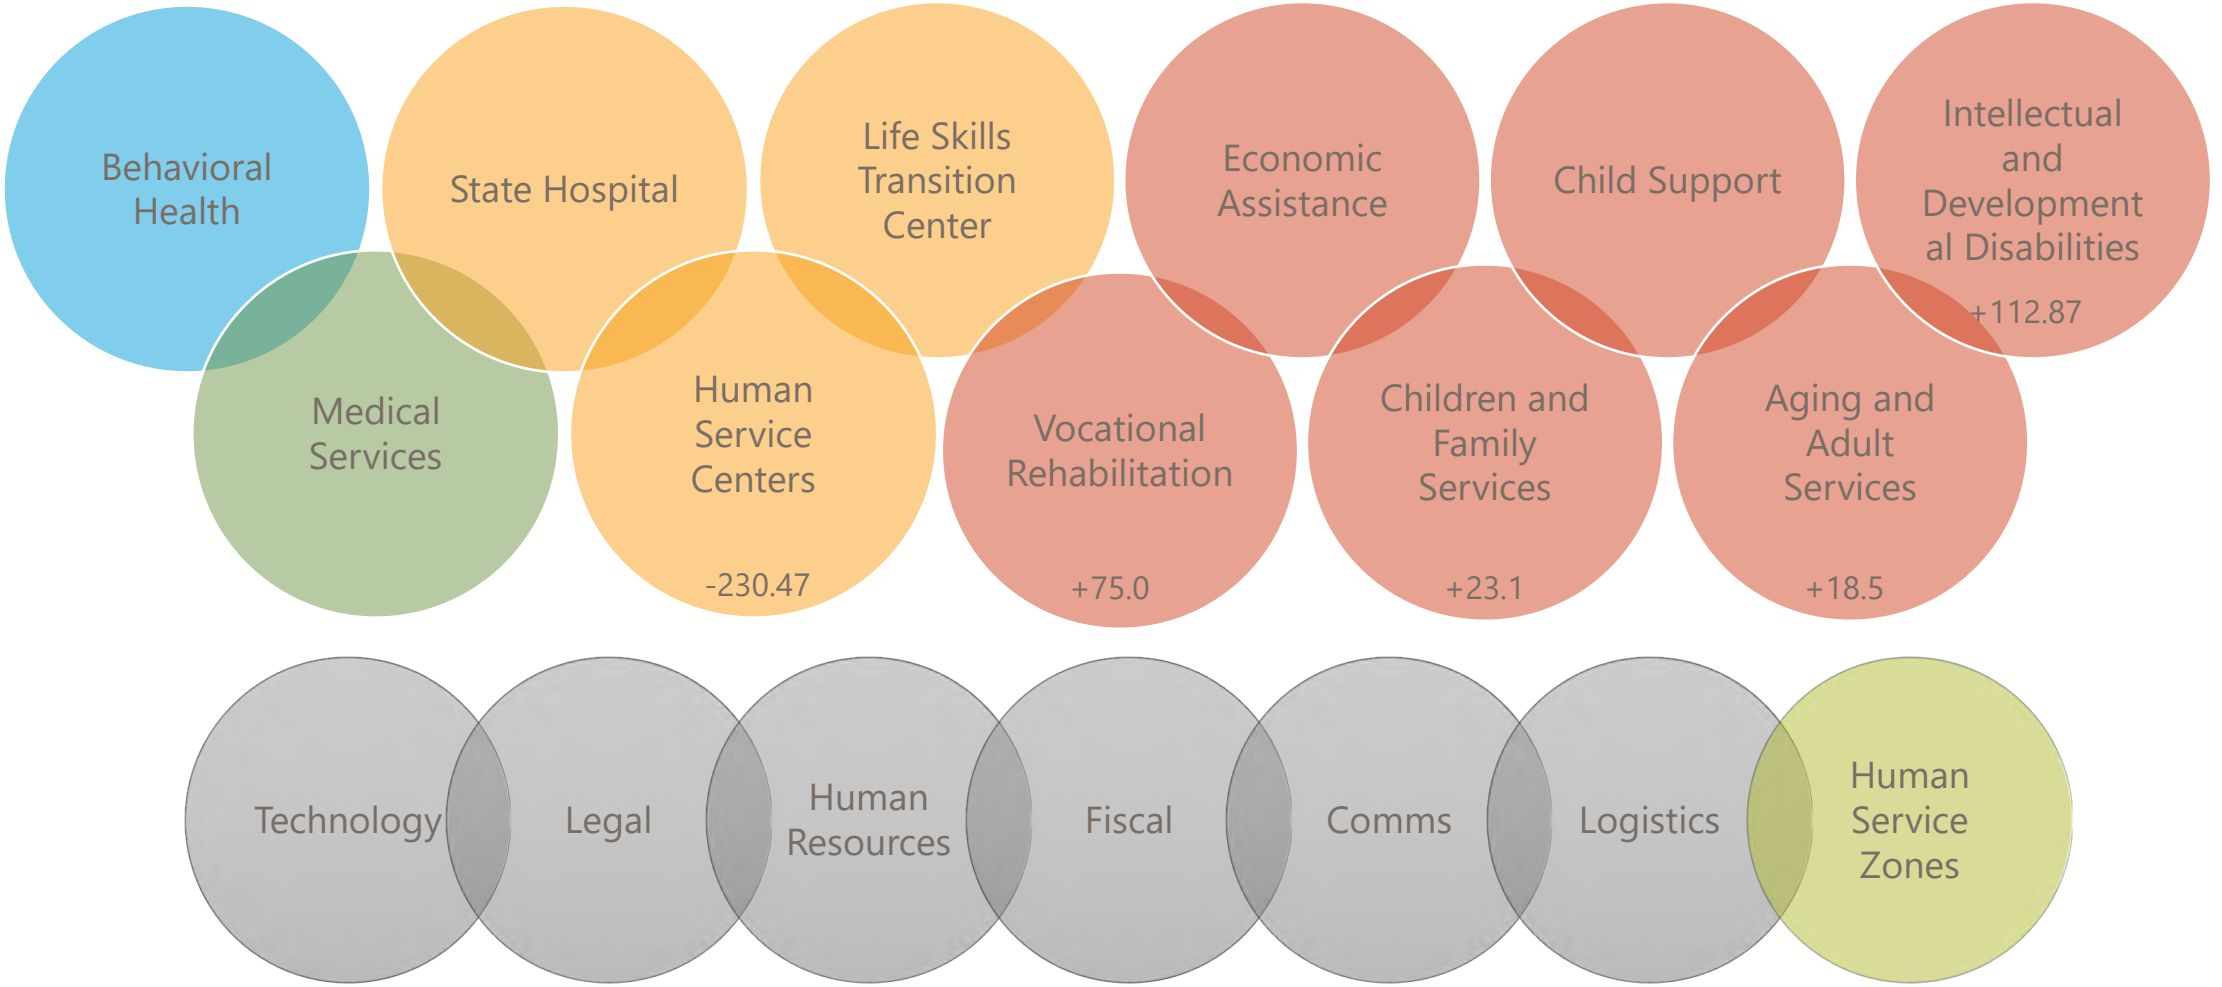
NORTH Dakota | Human Services

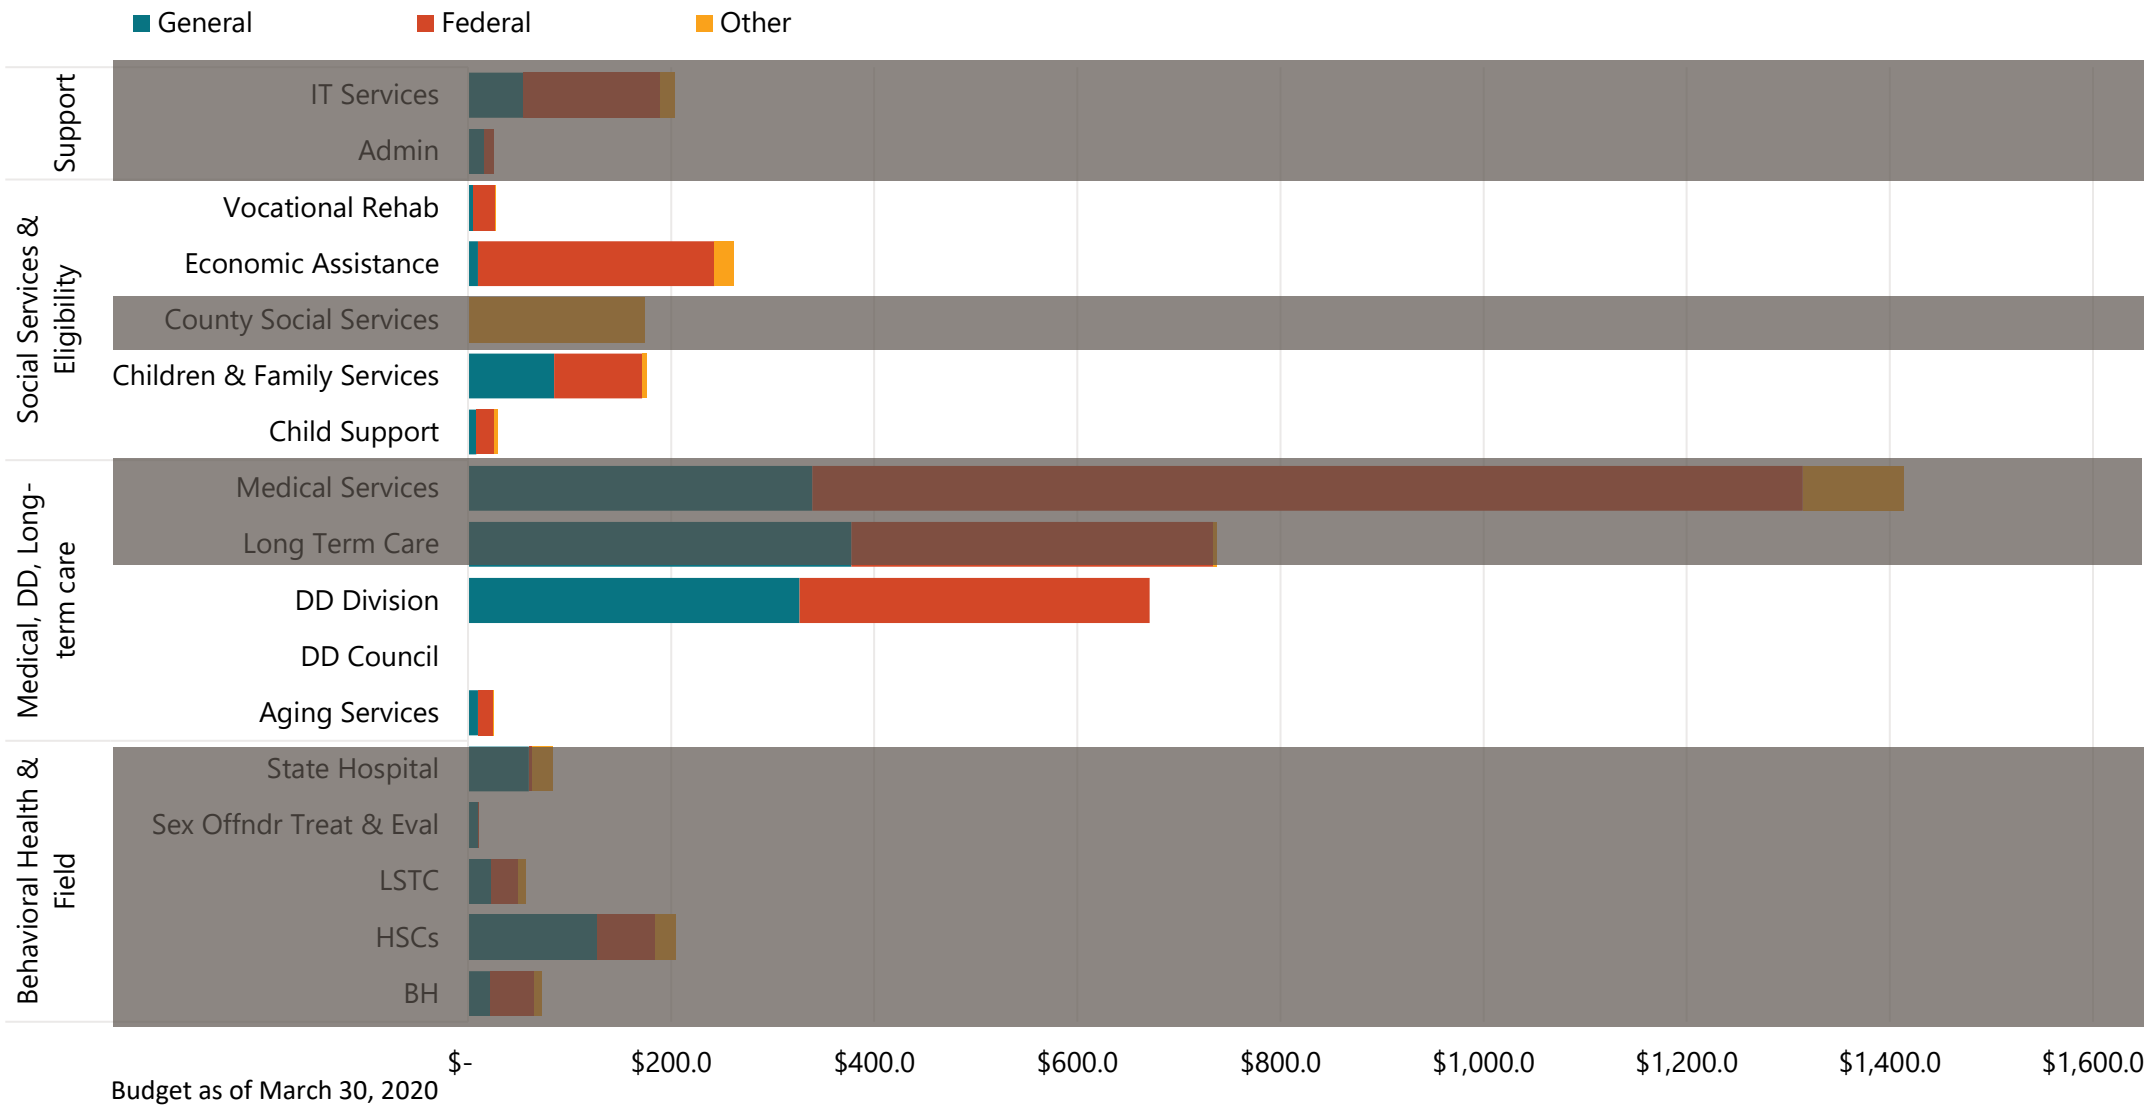
Be Legendary.™



House Bill 1012 | Program & Policy Budget Overview

Senate Appropriations

Senator Ray Holmberg, Chairman



ND DEPARTMENT OF HUMAN SERVICES

Helping North Dakotans realize their potential through targeted, evidence-based interventions that deliver meaningful results

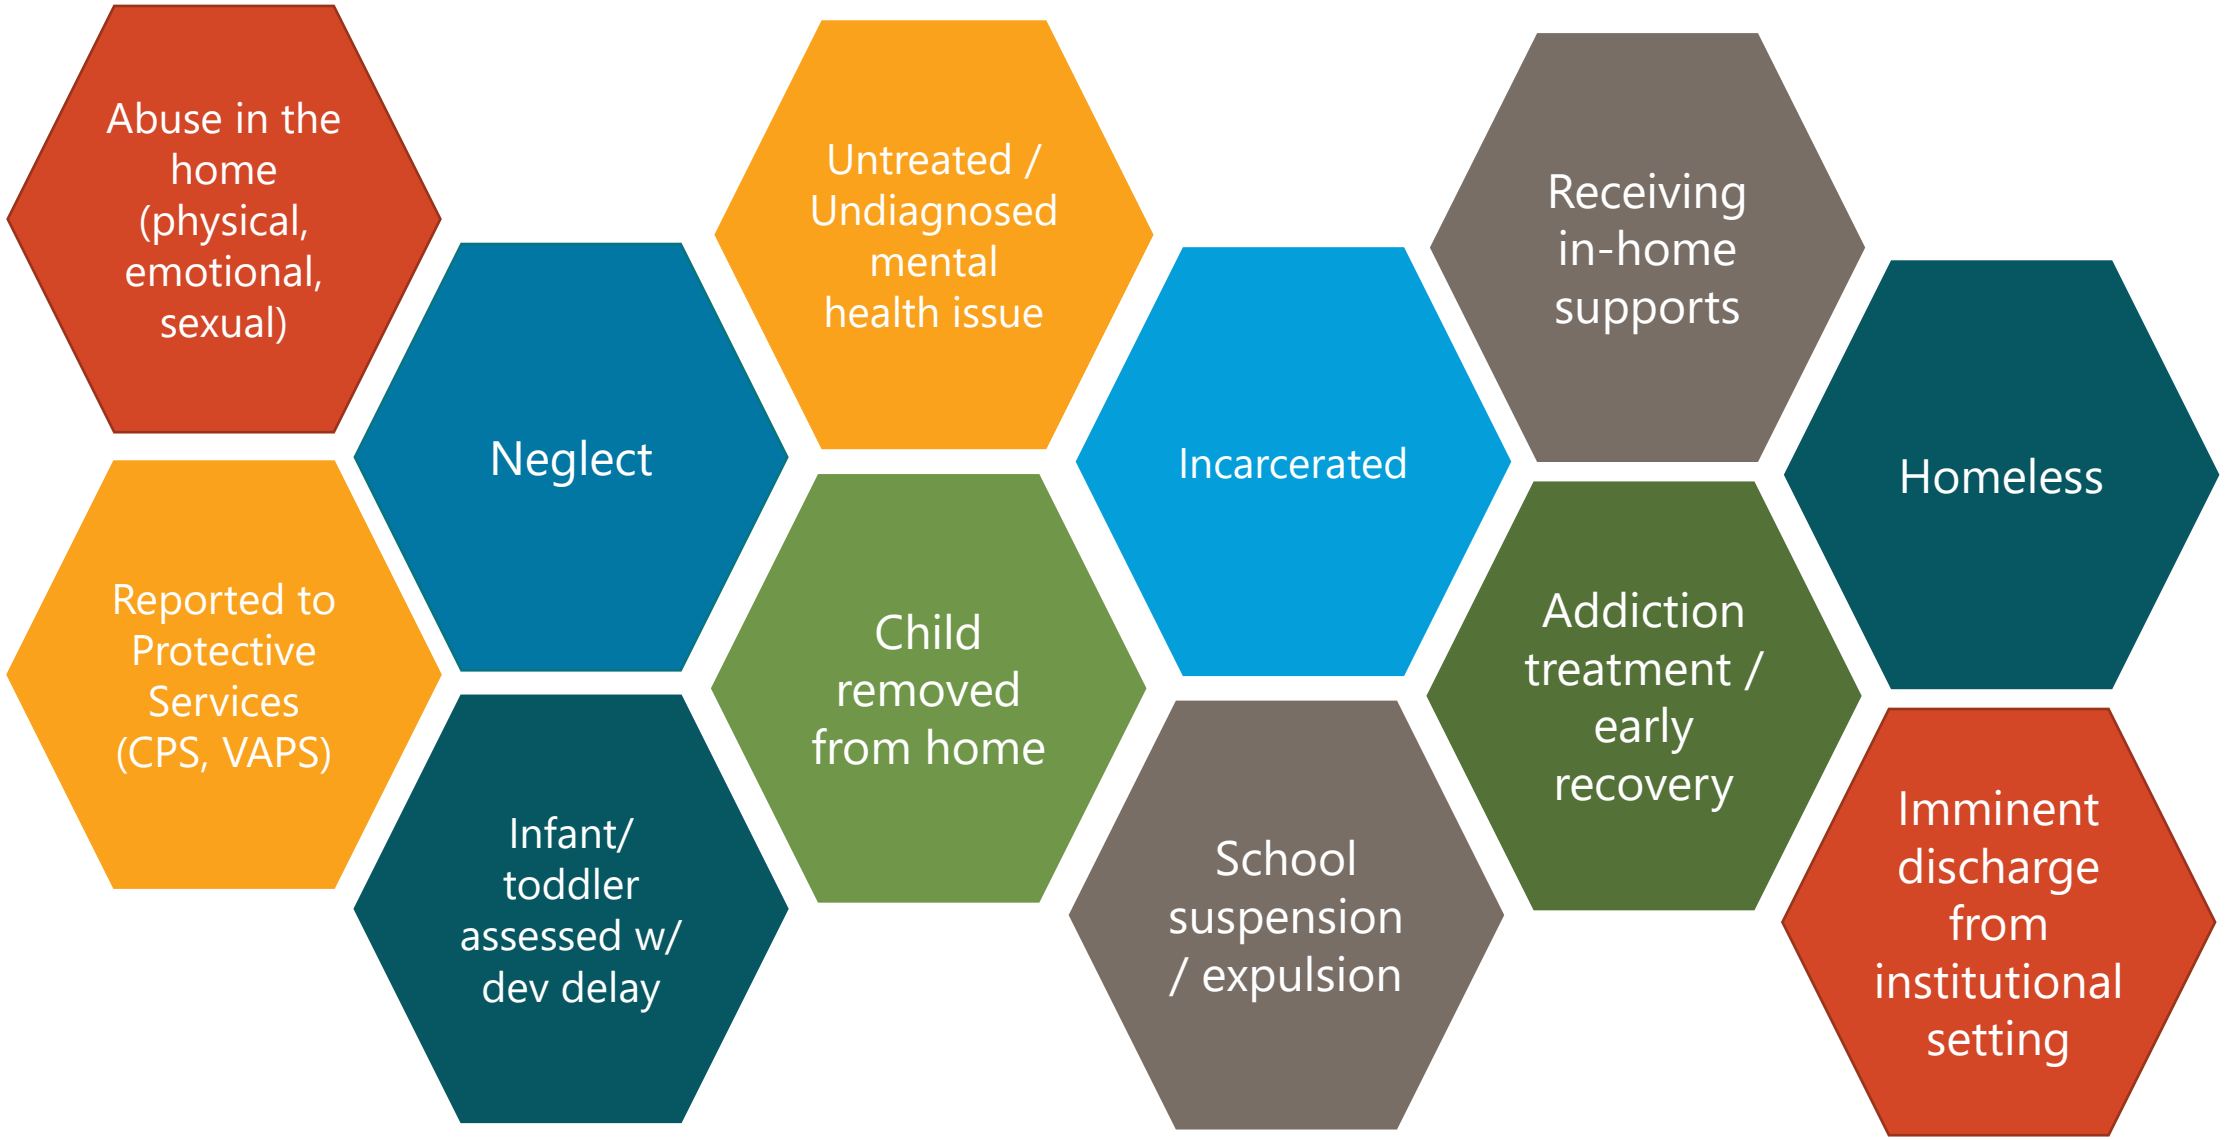
2019-2021 LEGISLATIVELY APPROVED BUDGET

Total budget (millions) by division

Budget as of March 30, 2020

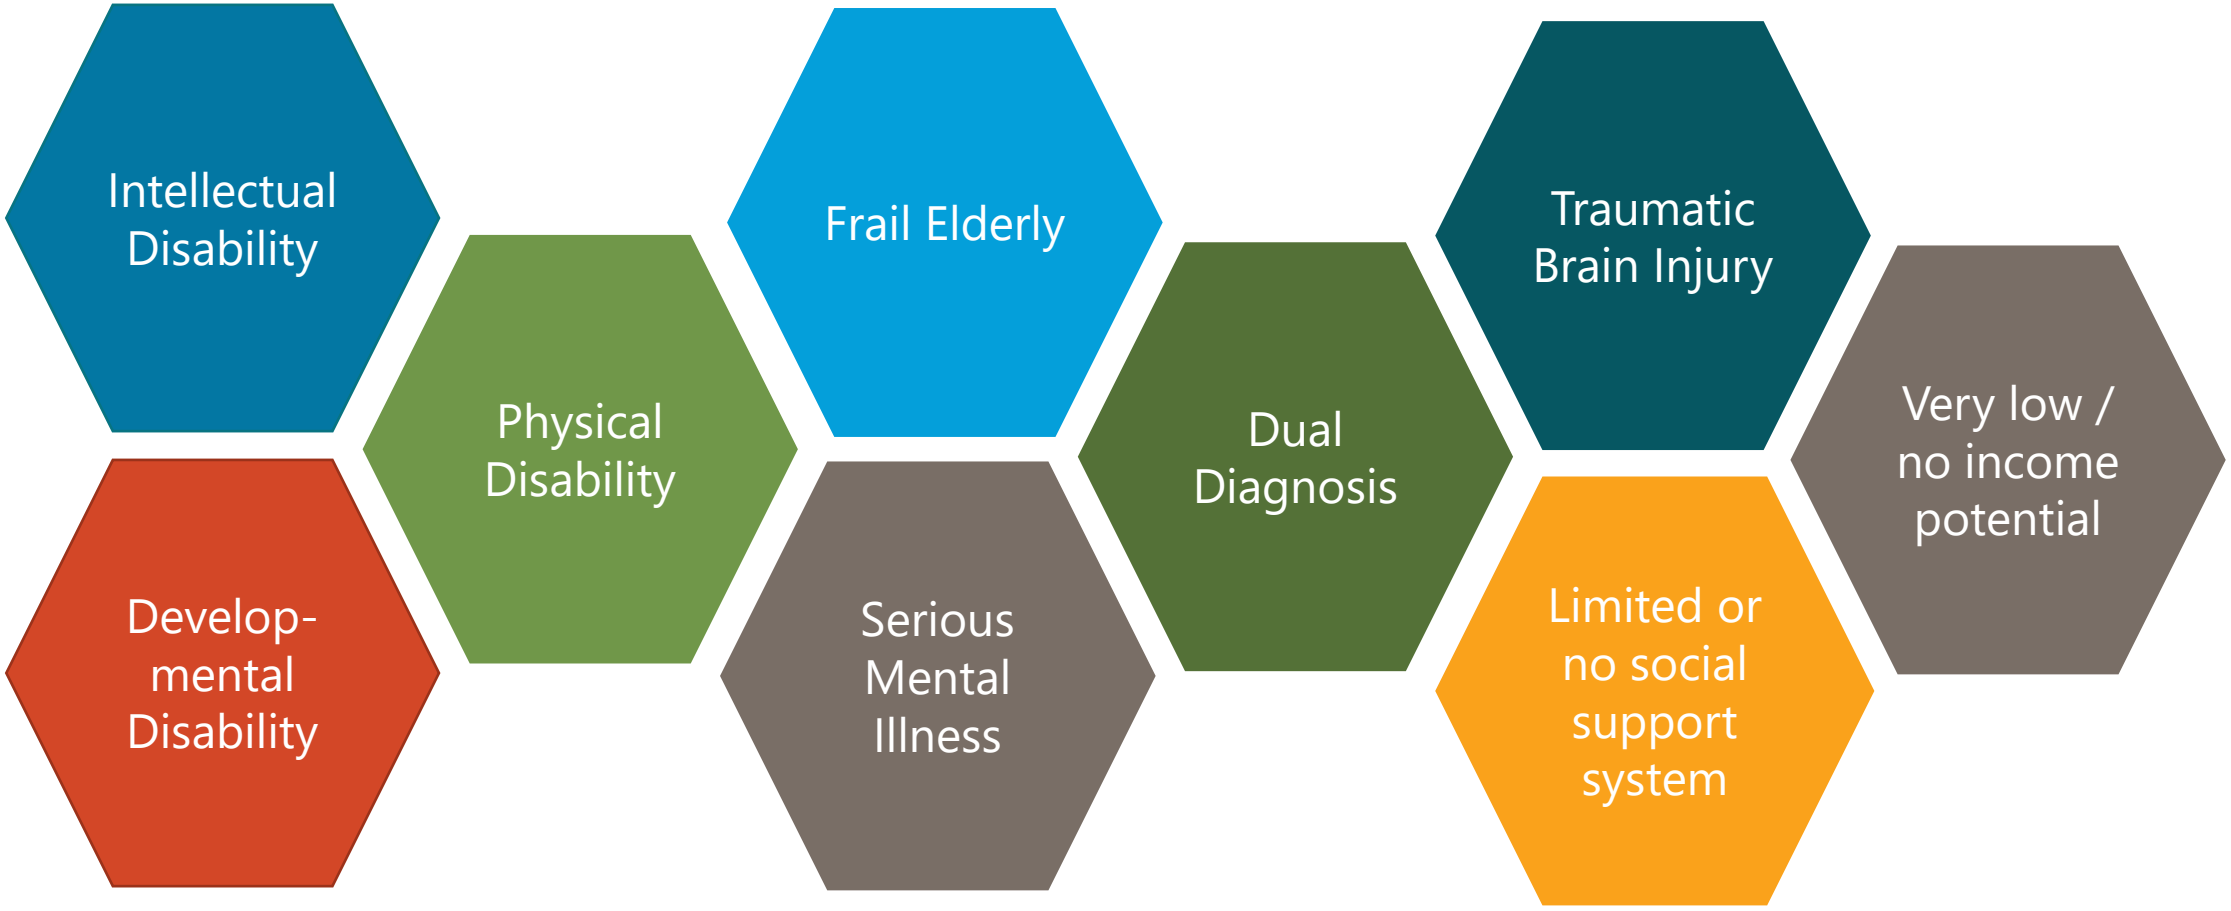
Helping people realize their potential

Who We Serve



Who we serve: Who's At risk of disruption/instability?

Individuals who have not previously engaged with a human service provider or who may be experiencing an instability-triggering event



Who we serve: Who needs help restoring stability?

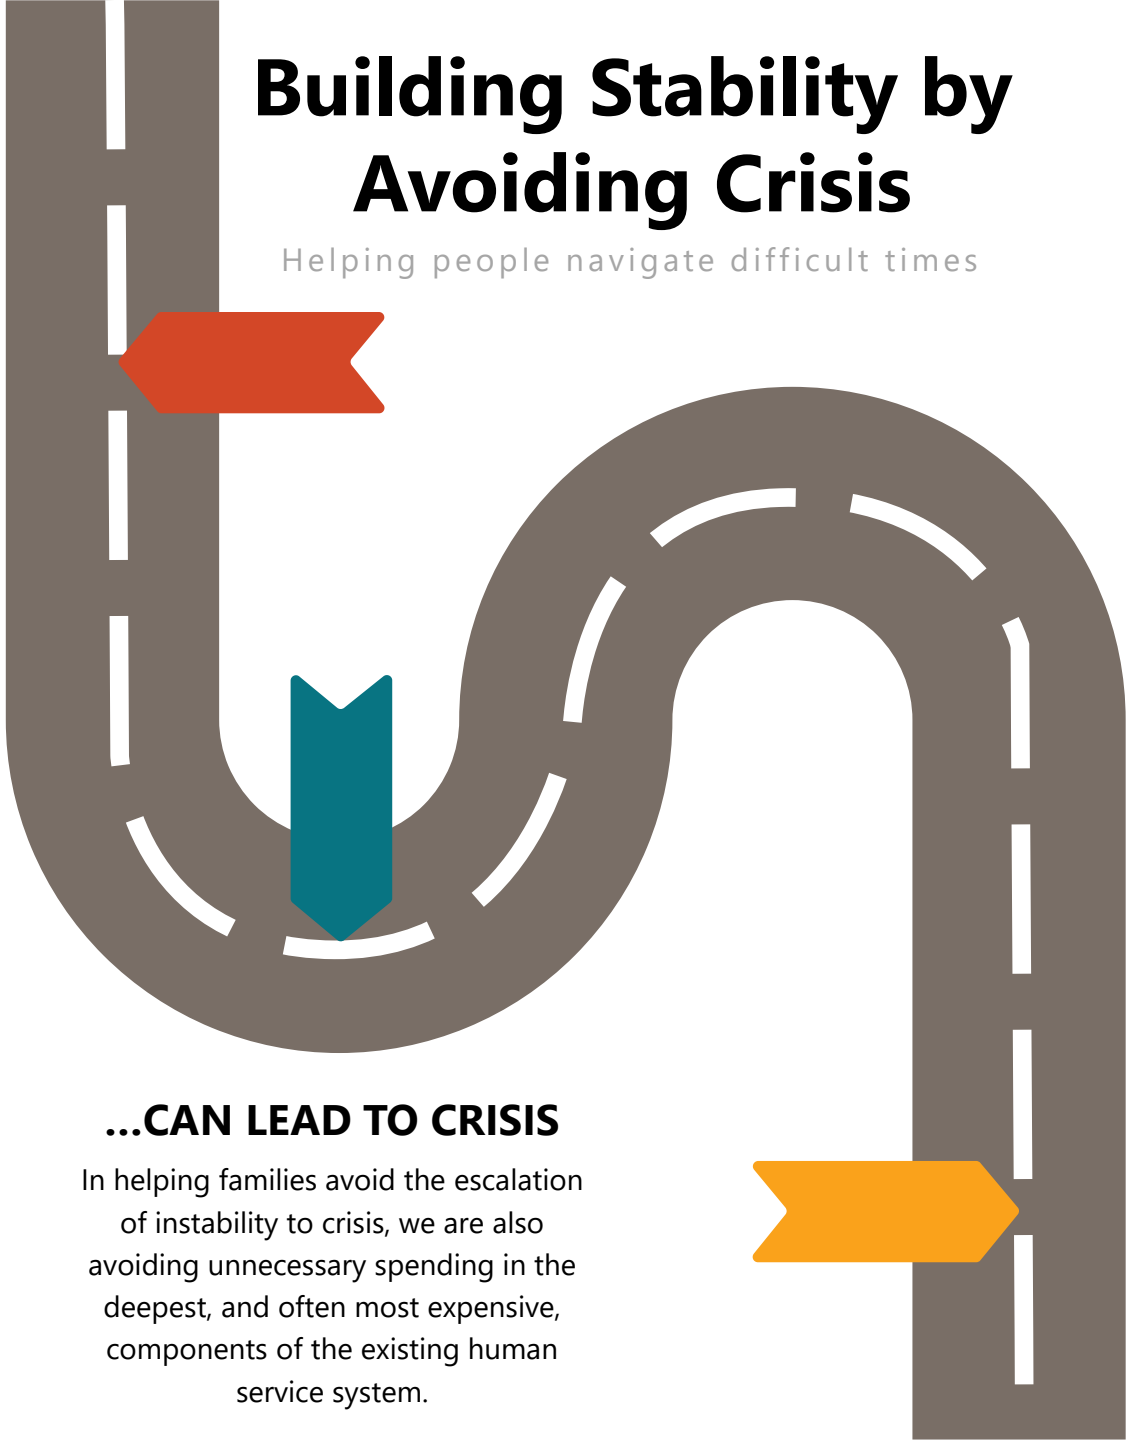
Individuals who have engaged with services provided by the Zones, DHS and/or private providers or contracted partners, but who may not have a long-term need

Who we serve: Who needs supportive services to live as independently as possible?

Individuals who have a chronic health and/or disabling condition that will indicate long-term service needs

Human Services is the infrastructure for wellbeing

Prevention | Early Intervention | Crisis Intervention | Long term supports



Building Stability by Avoiding Crisis

Helping people navigate difficult times

DISRUPTION

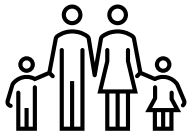
When families experience disruption, their ability to be a fully engaged, productive member of the community and the workforce is compromised.

...CAN LEAD TO CRISIS

In helping families avoid the escalation of instability to crisis, we are also avoiding unnecessary spending in the deepest, and often most expensive, components of the existing human service system.

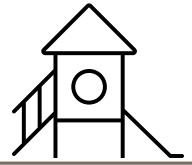
SERVICES SUPPORT STABILITY

Intervening early will both save money and strengthen families. It will allow us to reserve deep end services for the times when they are truly needed, and help people avoid deepening their journey into crisis by diverting from institutions, keeping families together, and helping and sure that people have a place to call home.



Communities are stronger when everyone has the opportunity to realize their full potential

What do we need to do to help someone find their way through a situation that threatens to push them into crisis, and instead help them find their way to stability.



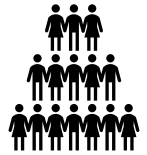
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

The threads that run through every person's life

Foundations of Wellbeing are Interconnected

Economic Health

Having the resources you need to meet basic needs contributes to stability and is a foundation you can build on

Behavioral Health

Having good mental health and a healthy relationship with substances boosts your ability to weather life's storms

Physical Health

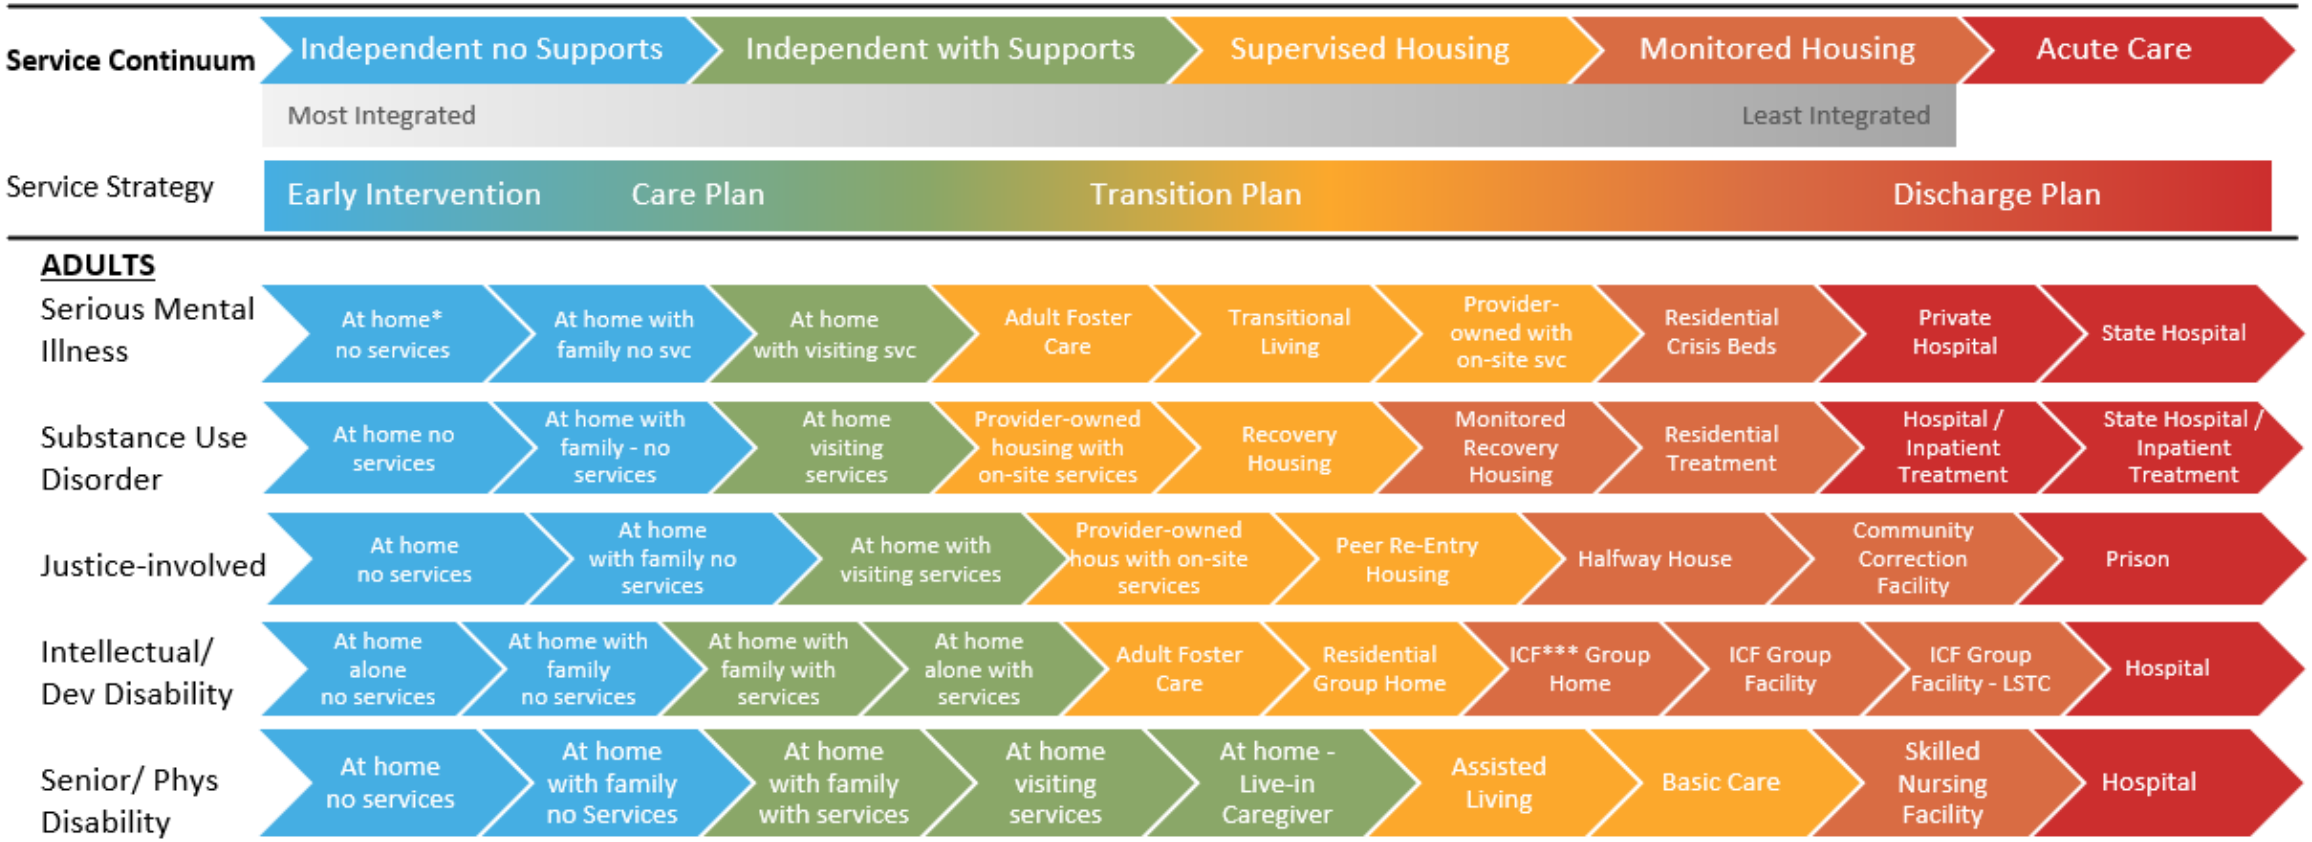
When you are in good physical health you can better navigate the activities of daily and community life

The stability that comes from good **economic** health can **improve behavioral** health.
The stability that comes from good **physical** and **behavioral** health **enables economic** health.

What do we need to do to help someone make an informed choice about how they may want to access services in the most integrated setting that is right for them?

KEY CONCEPTS

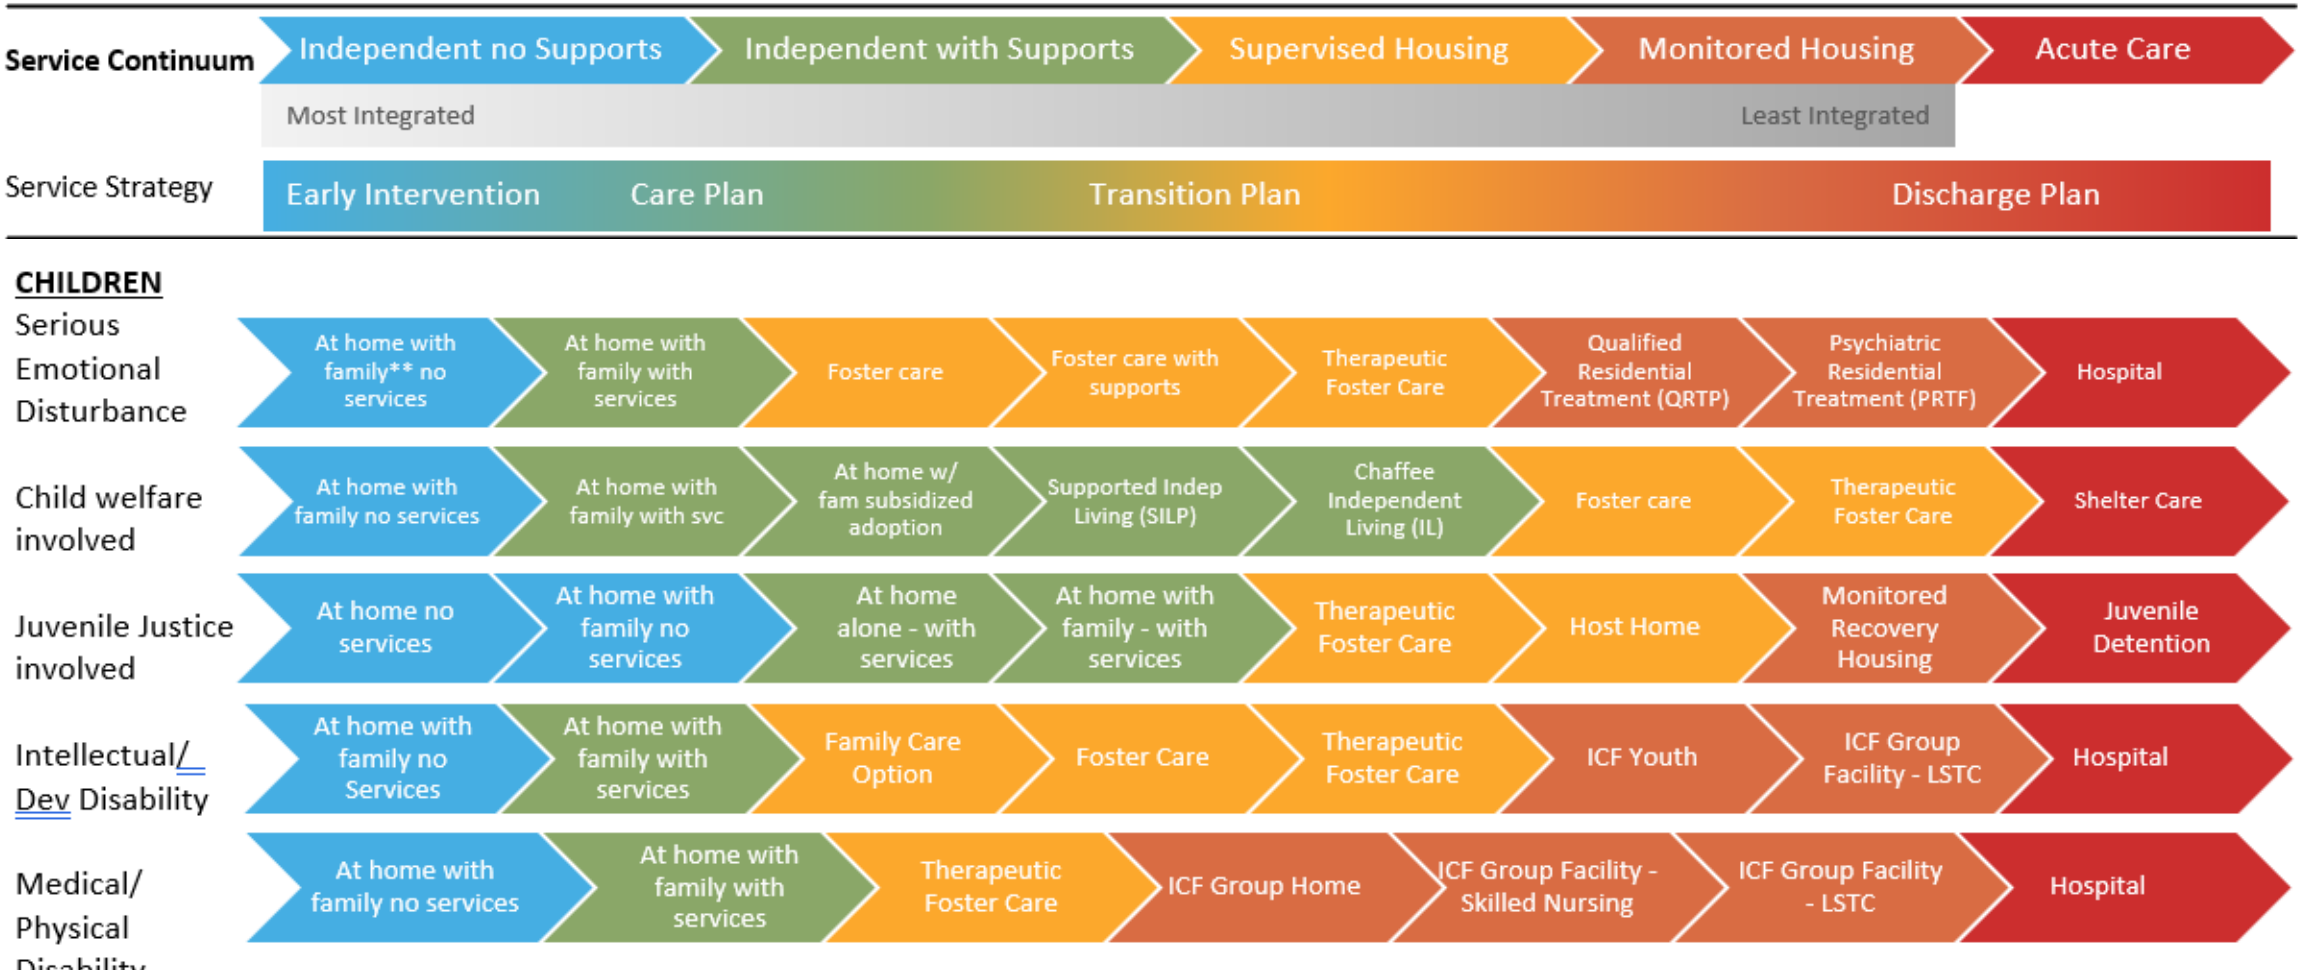
- Most Integrated Setting
- Informed Choice
- Diversion
- Transition
- Level of Care
- Stability
- Evidence Based
- Redesign
- Quality
- Person-centered



What do we need to do to make sure we are delivering the right service in the right place at the right time?

The Service Continuum - Adults

A critical concept defined



**Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)*

***Family = includes birth family, kin-caregiver, adopted family*

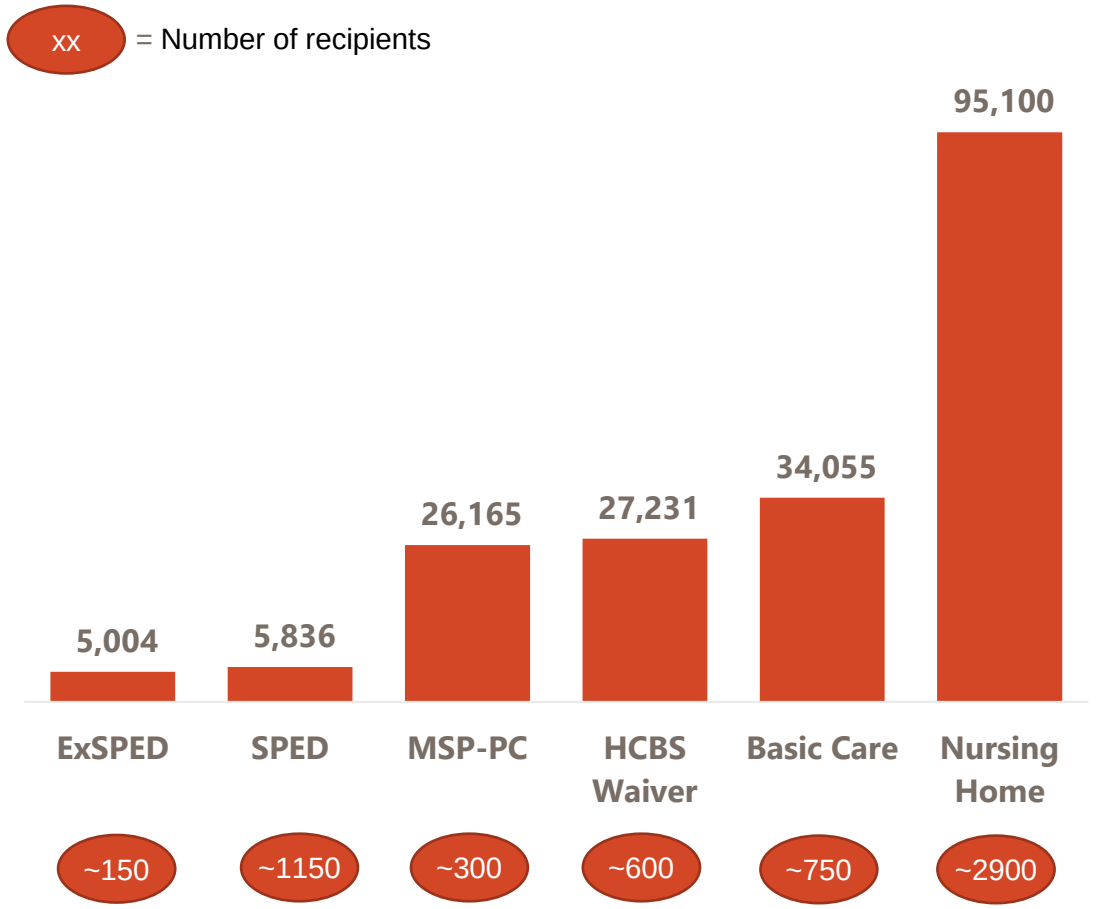
****ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)*

The Service Continuum - Children

Illustrating the work of transition and diversion

**Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)*

***Family = includes birth family, kin-caregiver, adopted family*

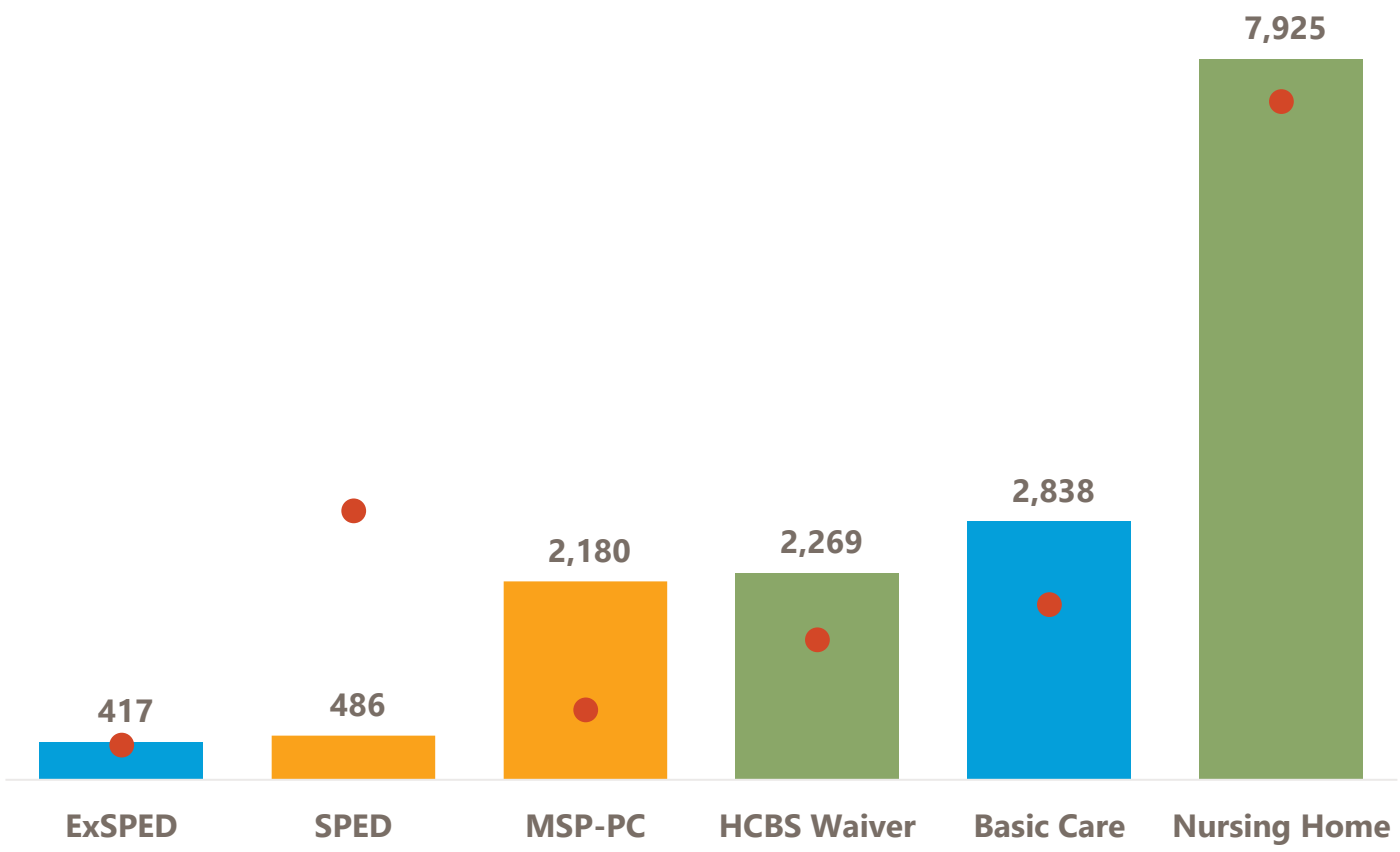


****ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)*

DHS FUNDED LONG TERM CARE AND HCBS SERVICES

Total cost by type of service

Cost Per Recipient Per Year



Cost paid by state by service in $ in State Fiscal Year 2020

Program Descriptions / Detail

- **Service Payments for the Elderly and Disabled (SPED):** Provides services for people who are older or physically disabled, have limited assets, and who have difficulty completing tasks that enable them to live independently at home.
- **Expanded SPED (Ex-SPED):** Pays for in-home and community-based services for people who would otherwise receive care in a licensed basic care facility.
- **Home and community-based services (HCBS) waiver:** This waiver from the federal government allows the state to use Medicaid funds to provide services enabling eligible individuals who would otherwise require nursing home services to remain in their homes or communities.
- **Medicaid State Plan personal care (MSP-PC):** Personal care services available under the Medicaid state plan and enable persons with disabilities or chronic conditions accomplish tasks they would normally do for themselves if they did not have a disability.
- **Basic Care:** Room and board and personal care services for persons eligible for Medicaid.

AGING & ADULT SERVICES
Cost per month per person per type of service – SFY20

Types of Care with same criteria for eligibility *(level of care, assets, income)*

Expanded SPED = Basic Care

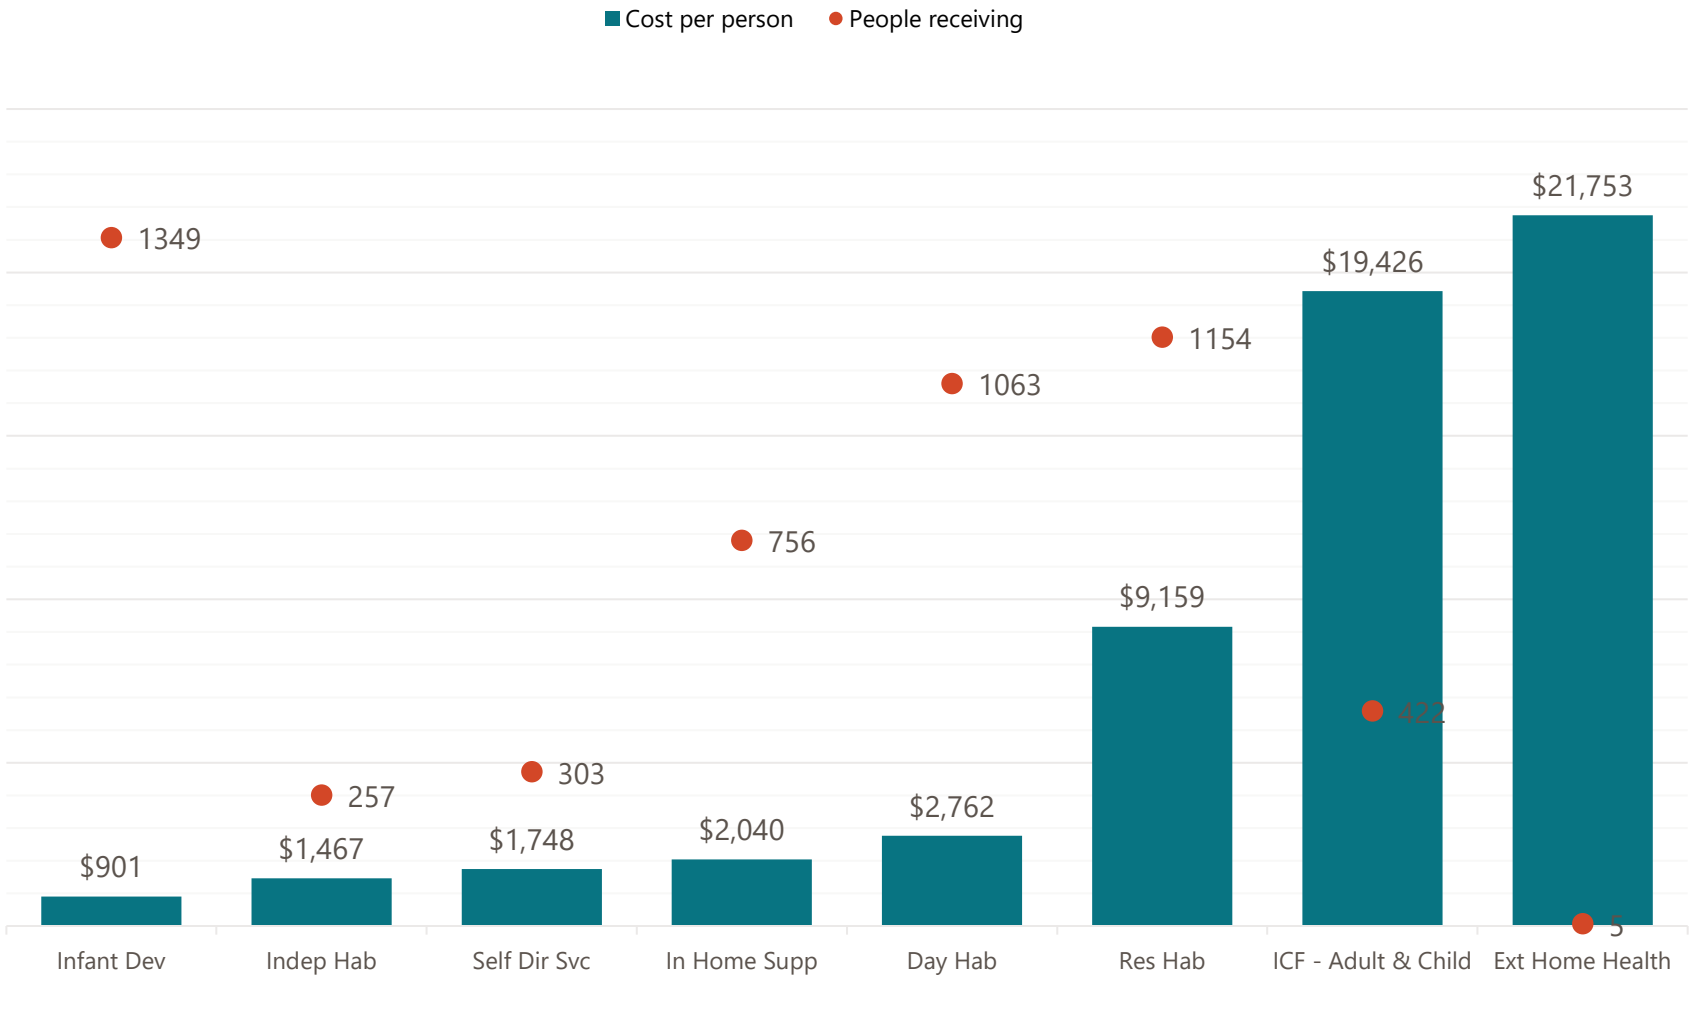
$417 / mo v $2,838 / mo

DIFFERENCE IN COST : $2,421

DIFFERENCE IN SVC :

Rent, Meals, Supervision, Medication Administration

HCBS Waiver = Nursing Home



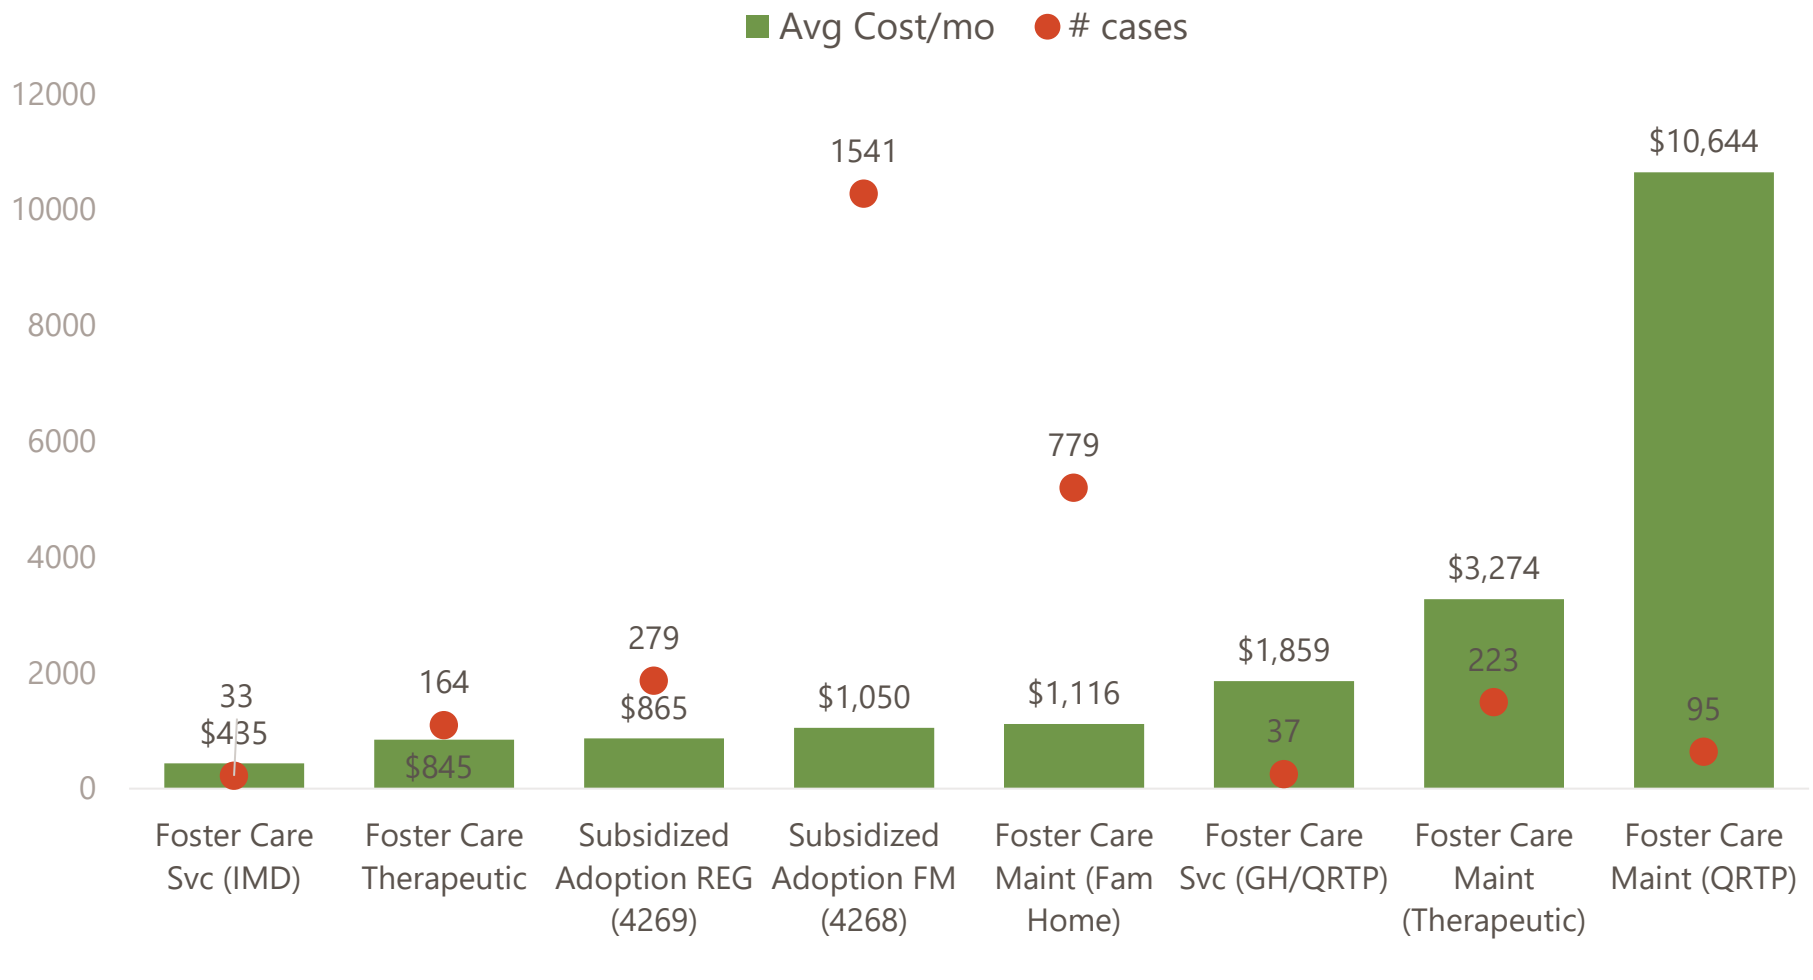
$2,269 / mo v $7,925 / mo

DIFFERENCE IN COST : $5,656

DIFFERENCE IN SVC :

Rent, Meals, Supervision, 24/7 Nursing

DEVELOPMENTAL DISABILITIES
Cost per month per person per type of service – SFY20



CHILDREN & FAMILY SERVICES
Cost per month per person per type of service – SFY20

CHILDREN AND FAMILY SERVICES
Program Purpose

The purpose of the Children and Family Services division is to help families who are struggling avoid disruption by having access to the help they need to build stability and well-being together.

CHILDREN AND FAMILY SERVICES
What we do

Safety

- Child protective services
- Child fatality review panel
- State Child protection team
- Parent Resource Centers
- Alliance for Children's Justice

Permanency

- Foster Care
- Adoption
- Guardianships
- Interstate compacts for the placement of children
- Unaccompanied minor services
- Independent living services
- Licensing for QRTPs and LCPAs

Well-being

- Family preservation services
- Intensive In-home therapy
- Nurturing Parent programs
- Parent aides
- In-home case management
- Respite care
- Family centered engagement

Early Childhood

- Early childhood coaching and quality
- Child care licensing
- Home Visiting
- Early childhood inclusion supports

CHILDREN AND FAMILY SERVICES

In ND child welfare services are delivered by local, state, tribal and private providers using both federal and state funds

Dept of Human Services

- **Human Service Centers**
  - Crisis teams
  - Intensive In-home services (therapy & treatment, skills training, behavior mod)
  - Targeted case management
- **Children & Family Services**
  - Training and coaching of field staff
  - Oversee quality service delivery
  - Administration of policy

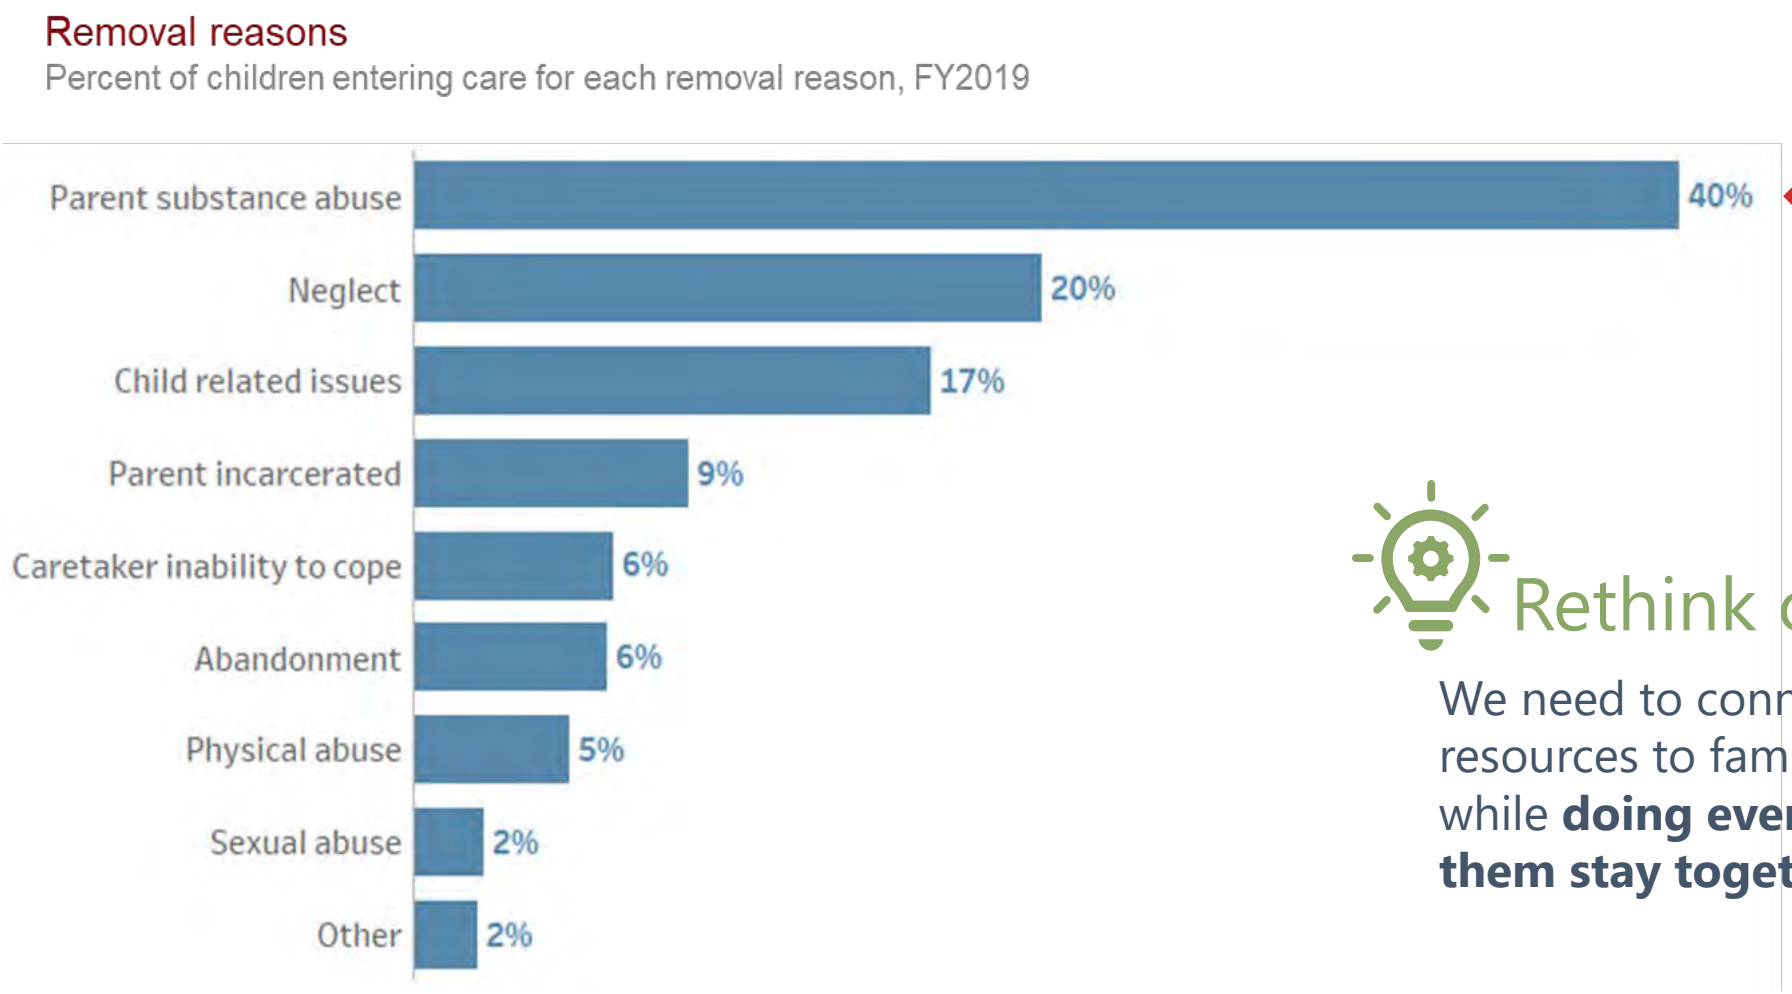
Private Human Service Providers

- Safe shelter for crisis
- Human trafficking supports and safe beds
- Unaccompanied minor services
- Foster homes, including therapeutic
- Targeted case management

Tribal Social Services

- FRAME entry and foster eligibility determinations
- Joint practice model and ICWA training
- Native American Training Institute supports (training, billing, svc delivery)
- New FMAP service contracting
- IV-E agreements boost access to funding

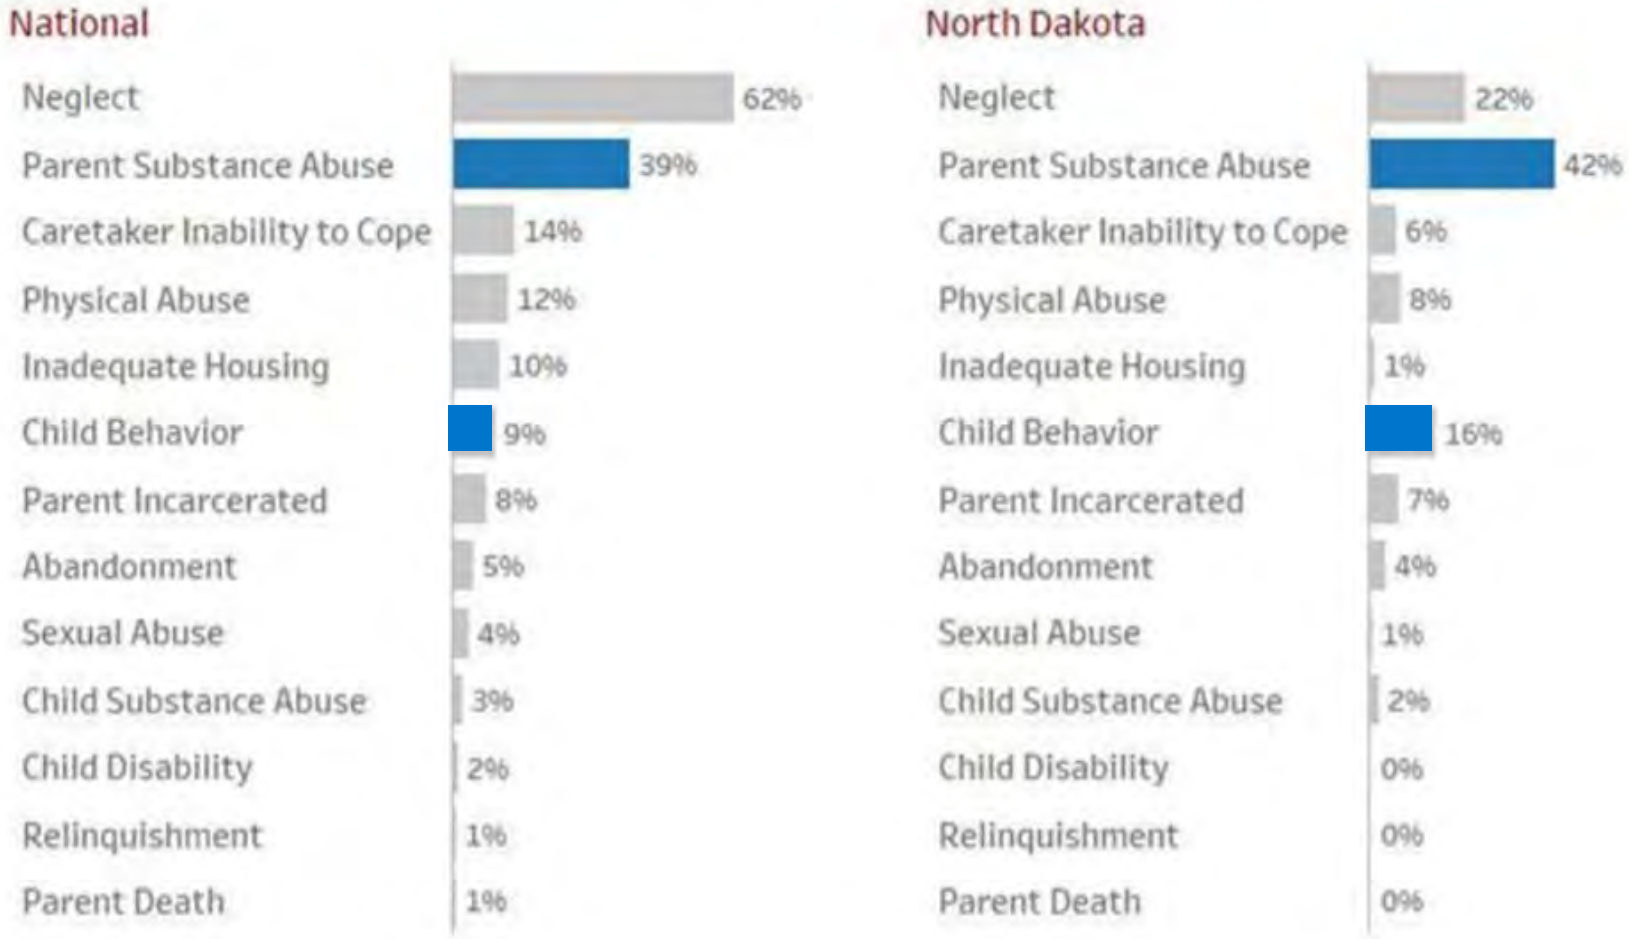
Human Service Zones



- Assess present and impending danger
- Safety planning
- Case management
- Assess and build parent capacities
- Provide safe supports for children and families
- Refer and broker services needed for families
- In home supports
- Parent aides
- License foster homes
- Intake for child abuse and neglect reports

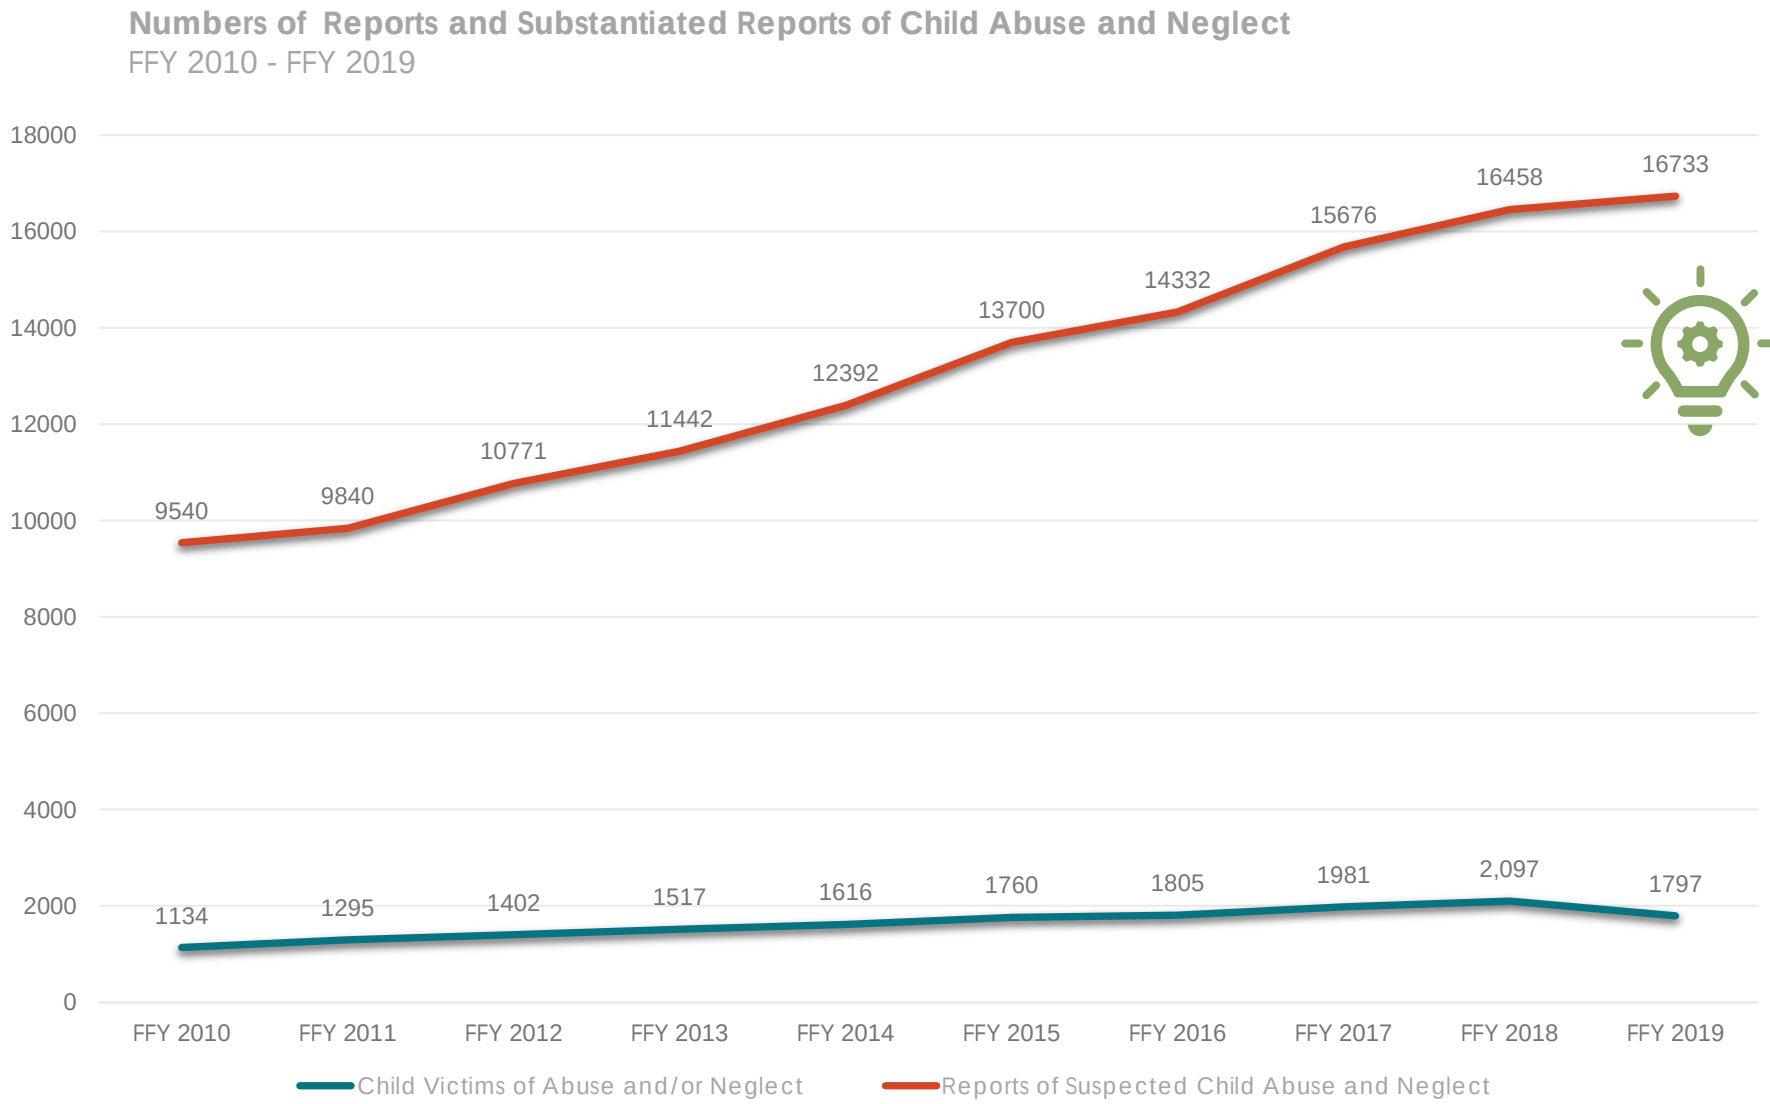
What's driving us

- Abuse and neglect related to substance abuse in families
- Increasing challenging behaviors in K-3
- Adolescent suicides
- Inconsistencies in child protection practices
- Delays in completion of child safety assessments
- Clear return on investments made early



Substance abuse and unaddressed mental health needs are major de-stabilizing forces in families

Rethink child welfare

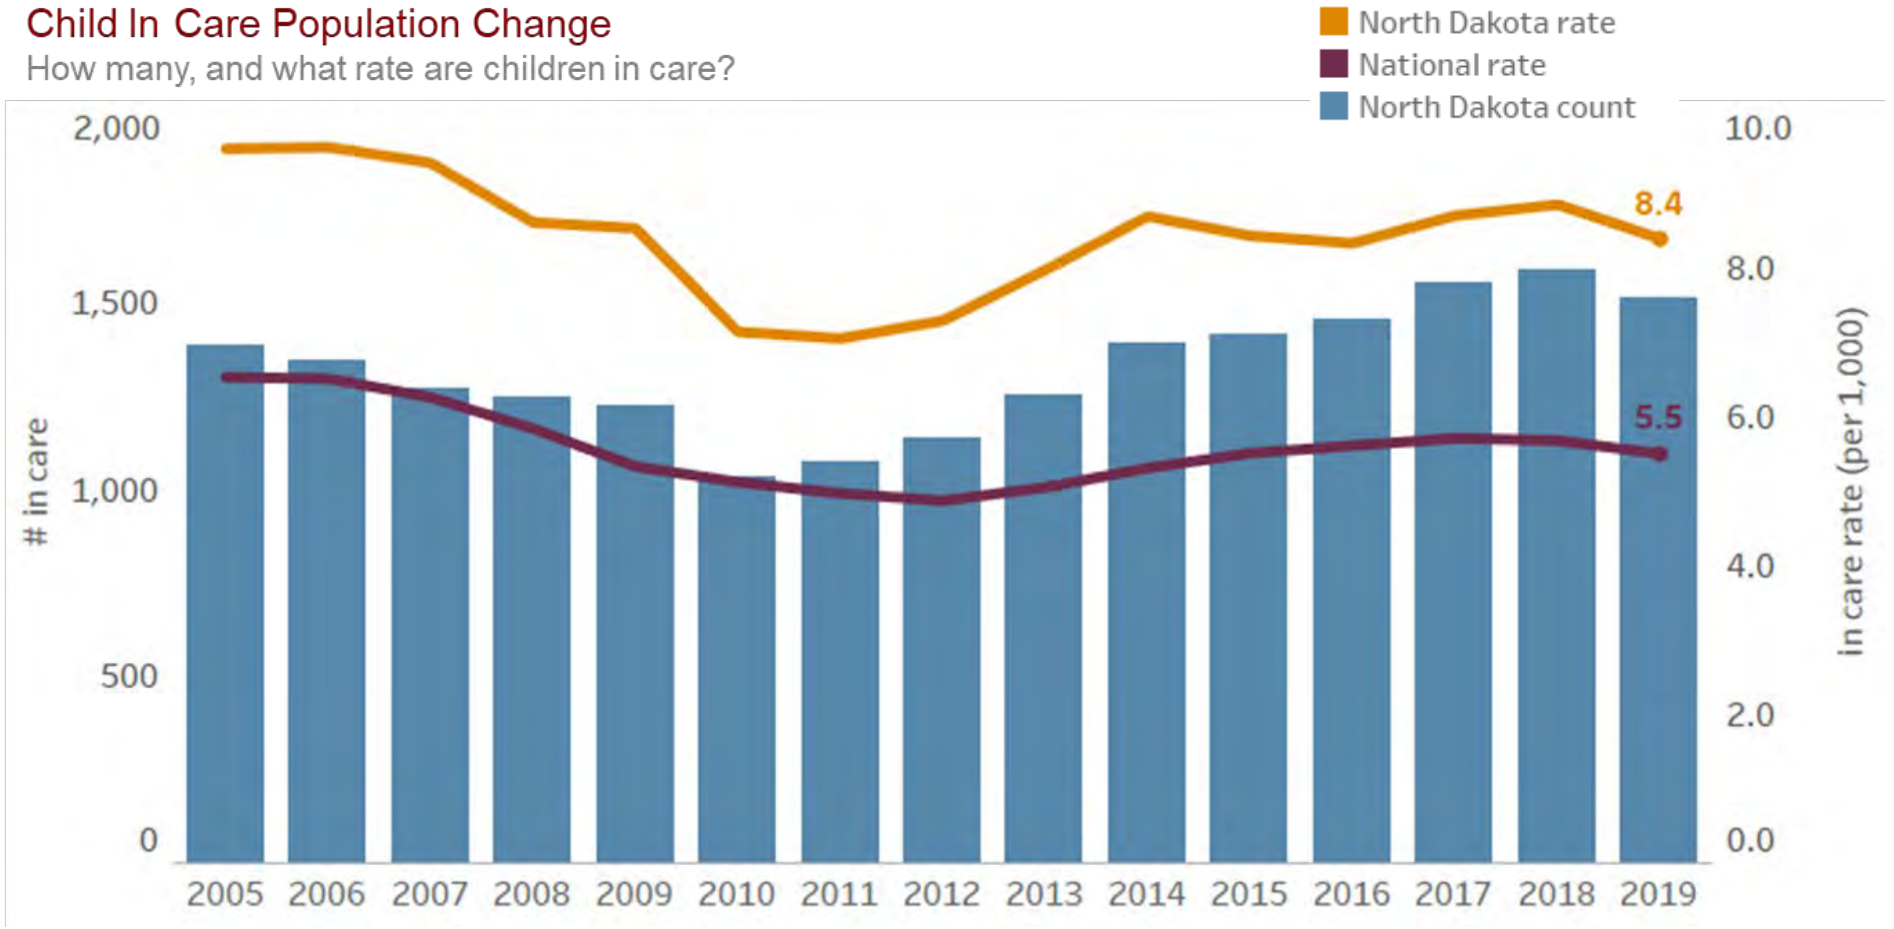


We need to connect behavioral health resources to families who are struggling while **doing everything we can to help them stay together safely.**

Parental Substance Abuse and Child Behavior are cited more often as reasons for removal in North Dakota than in the U.S.

Data source: FFY 2017 state-submitted AFCARS data. Denotes percent of children entering foster care for each removal reason; multiple reasons may be selected for a single child.

10-12 percent of child abuse/neglect calls are ultimately substantiated as abuse/neglect

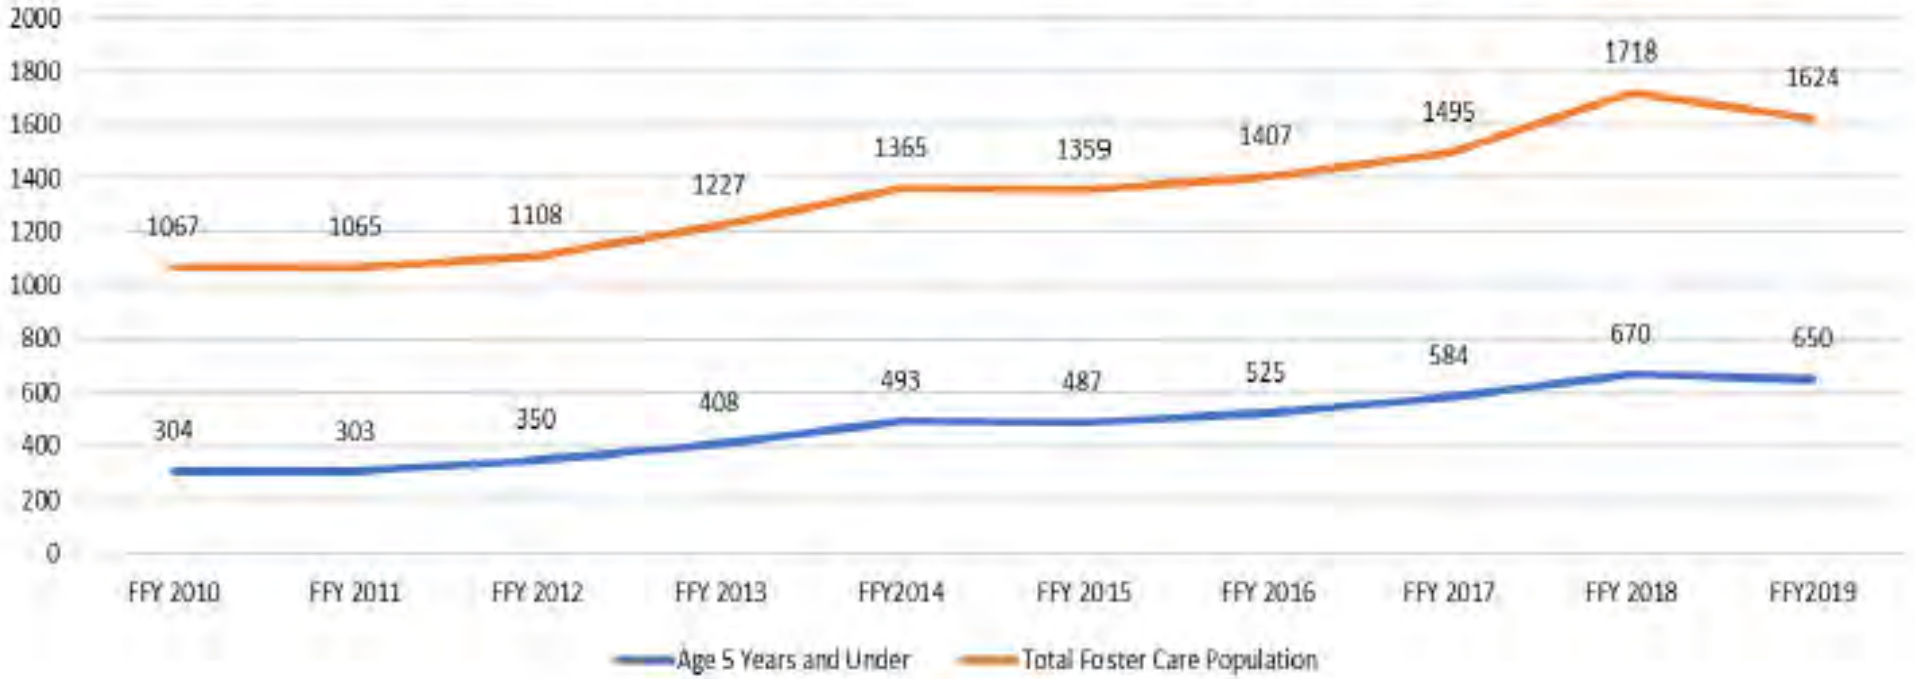


Rethink child welfare

People who call to report a suspicion of abuse or neglect are seeing something that causes them to be concerned about a child's (and their family's) well-being.

We need a different response for those often valid concerns.

The rates at which children are placed in foster care is 52 percent higher in North Dakota than in the U.S. overall



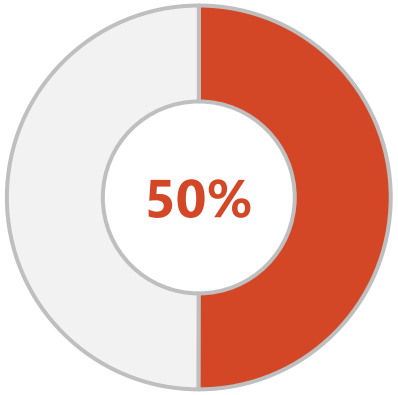
Rethink child welfare

We need to shift resources from removal to family strengthening and preservation.

The percentage of children in foster care under age 5 has risen steadily from 28% to 40% since 2010

The number of children in foster care in ND has risen by 52% over the last 10 years

ND Foster Care census and those age 54 years and under, FFY 2010-2019



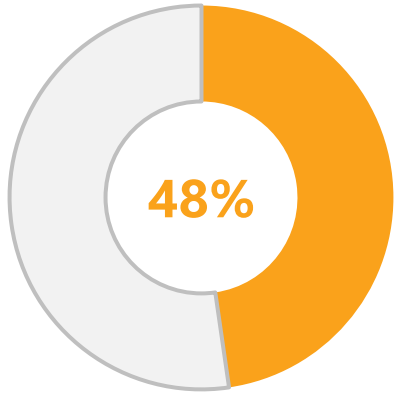
Rethink child welfare

Early interventions with young families are they key to reducing foster care placement for the youngest children.

CHILDREN & FAMILY SERVICES
Foster Care in ND – 2020 Snapshot

796

1 in 2 age 0-7



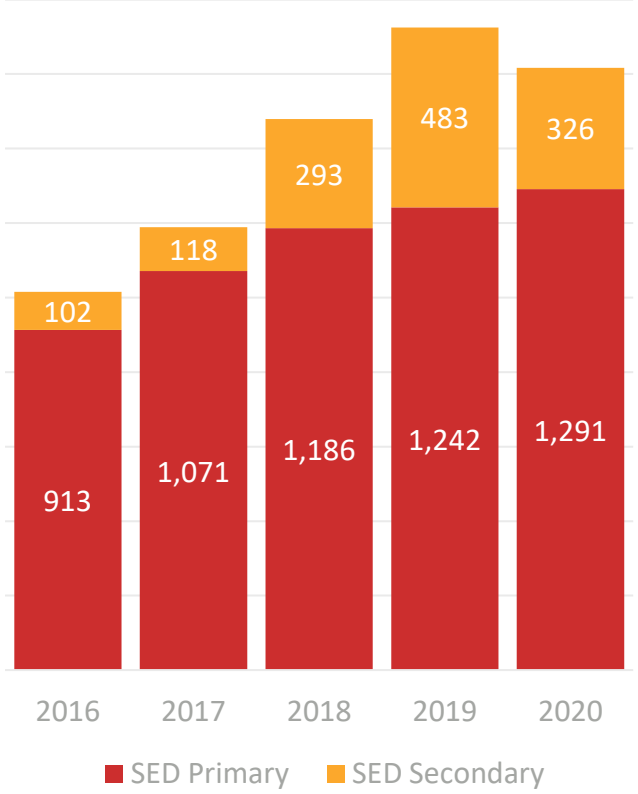
Half of the 1,591 children in foster care in North Dakota are age 7 or younger. (2020)

34%

Intense level of care

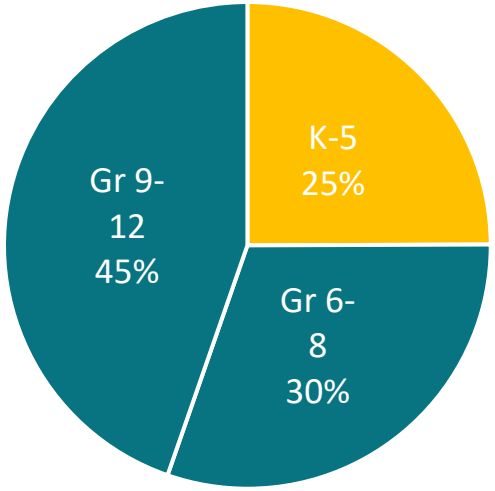
Of the 189 kids receiving therapeutic foster care in 2020, 65 (34%) were younger than 7 years old.

759



5x more likely

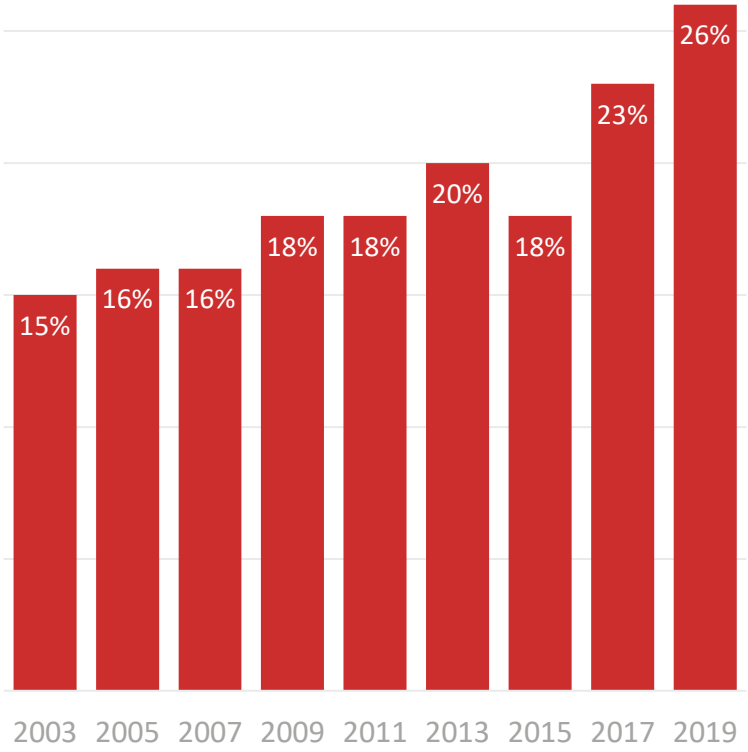
Native American children make up 48% of the total number of children in foster care in ND (759 of 1,591).



Native American children make up 8.7% of kids under age 18 in ND.

Trends in services for emotional disturbance, age of incidents and rates of chronic absence point to increasing behavioral health needs for kids and families

Students receiving services for "emotional disturbance" in Grades K-12



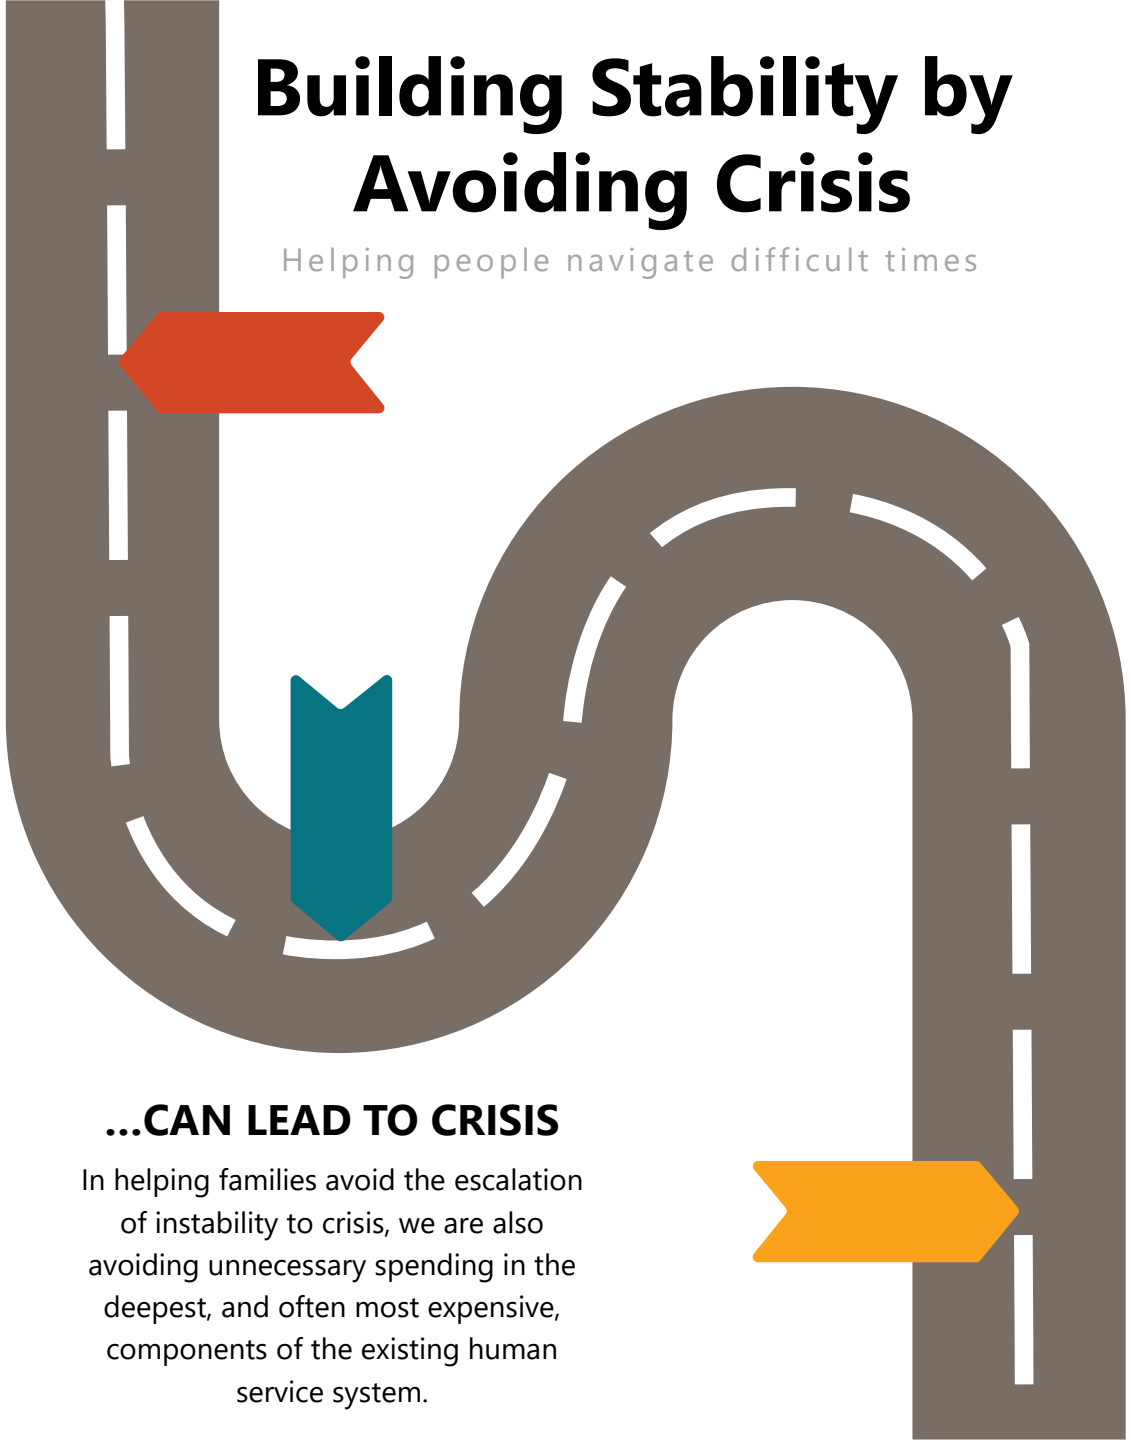
"Incidents" in school setting by grade level (2019-20 school year)

Rethink child welfare

Supporting behavioral health needs in families can prevent disruptions at home and in school.

4th graders counted as chronically absent by academic year

"Everyone would agree that children should not be exposed to abuse or neglect.



"The process of being removed from one's home and placed in foster care has consequences as well and can have negative effects that last a lifetime."

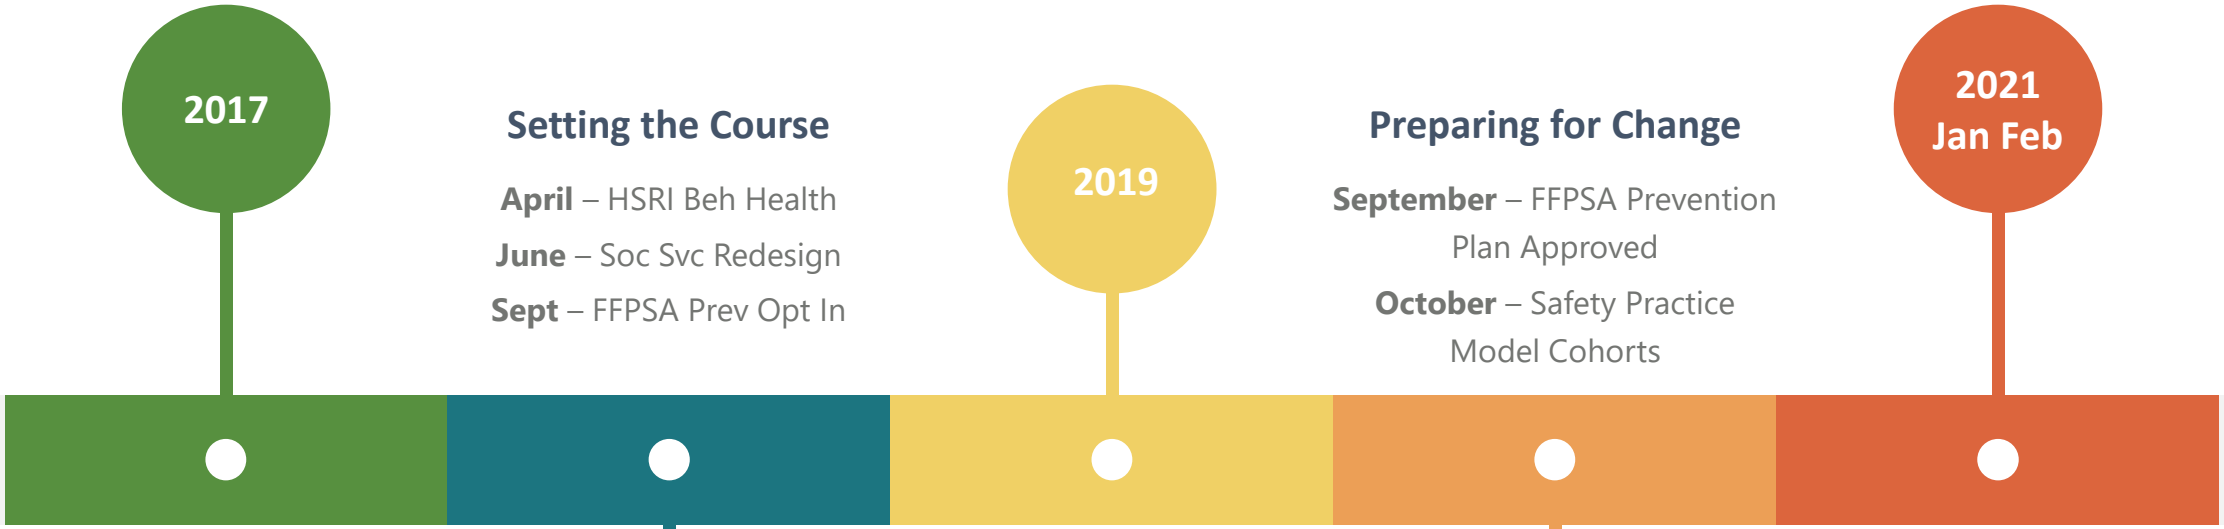
Building Stability by Avoiding Crisis

Helping people navigate difficult times

DISRUPTION

When families experience disruption, their ability to be a fully engaged, productive member of the community and the workforce is compromised.

...CAN LEAD TO CRISIS



In helping families avoid the escalation of instability to crisis, we are also avoiding unnecessary spending in the deepest, and often most expensive, components of the existing human service system.

SERVICES SUPPORT STABILITY

Intervening early will both save money and strengthen families. It will allow us to reserve deep end services for the times when they are truly needed, and help people avoid deepening their journey into crisis by diverting from institutions, keeping families together, and helping and sure that people have a place to call home.

"North Dakota's Child Welfare System is focusing on efforts to **ensure availability and access** to a broad, flexible array of **effective community-based services and supports**

for children and their families

that address their emotional, social, educational and physical needs,

including traditional and nontraditional services as well as natural and informal supports."

ND 2020-2024 Title IV-E Prevention Services and Programs Plan

Children considered a "Candidate for Foster Care"

Have access to →

Under 18 years of age	Significant interference or limitations of the child's functioning in home, school or community	Child is pregnant or parenting a child(ren)	Siblings in foster care
Inadequate supervision based on family and youth circumstances	Currently involved in 2 or more community services or agencies	DSM diagnosis for emotional, behavioral, or mental health disorder	Child whose adoption or guardianship arrangement is at risk of disruption
Prior out of home placement	Reunification has occurred	Difficulties are interfering or limiting achievement or maintenance in 1 or more developmentally appropriate skills	Parent/custodian/guardian has limited capacity to meet educational, medical, safety or basic needs of child due to parental need*

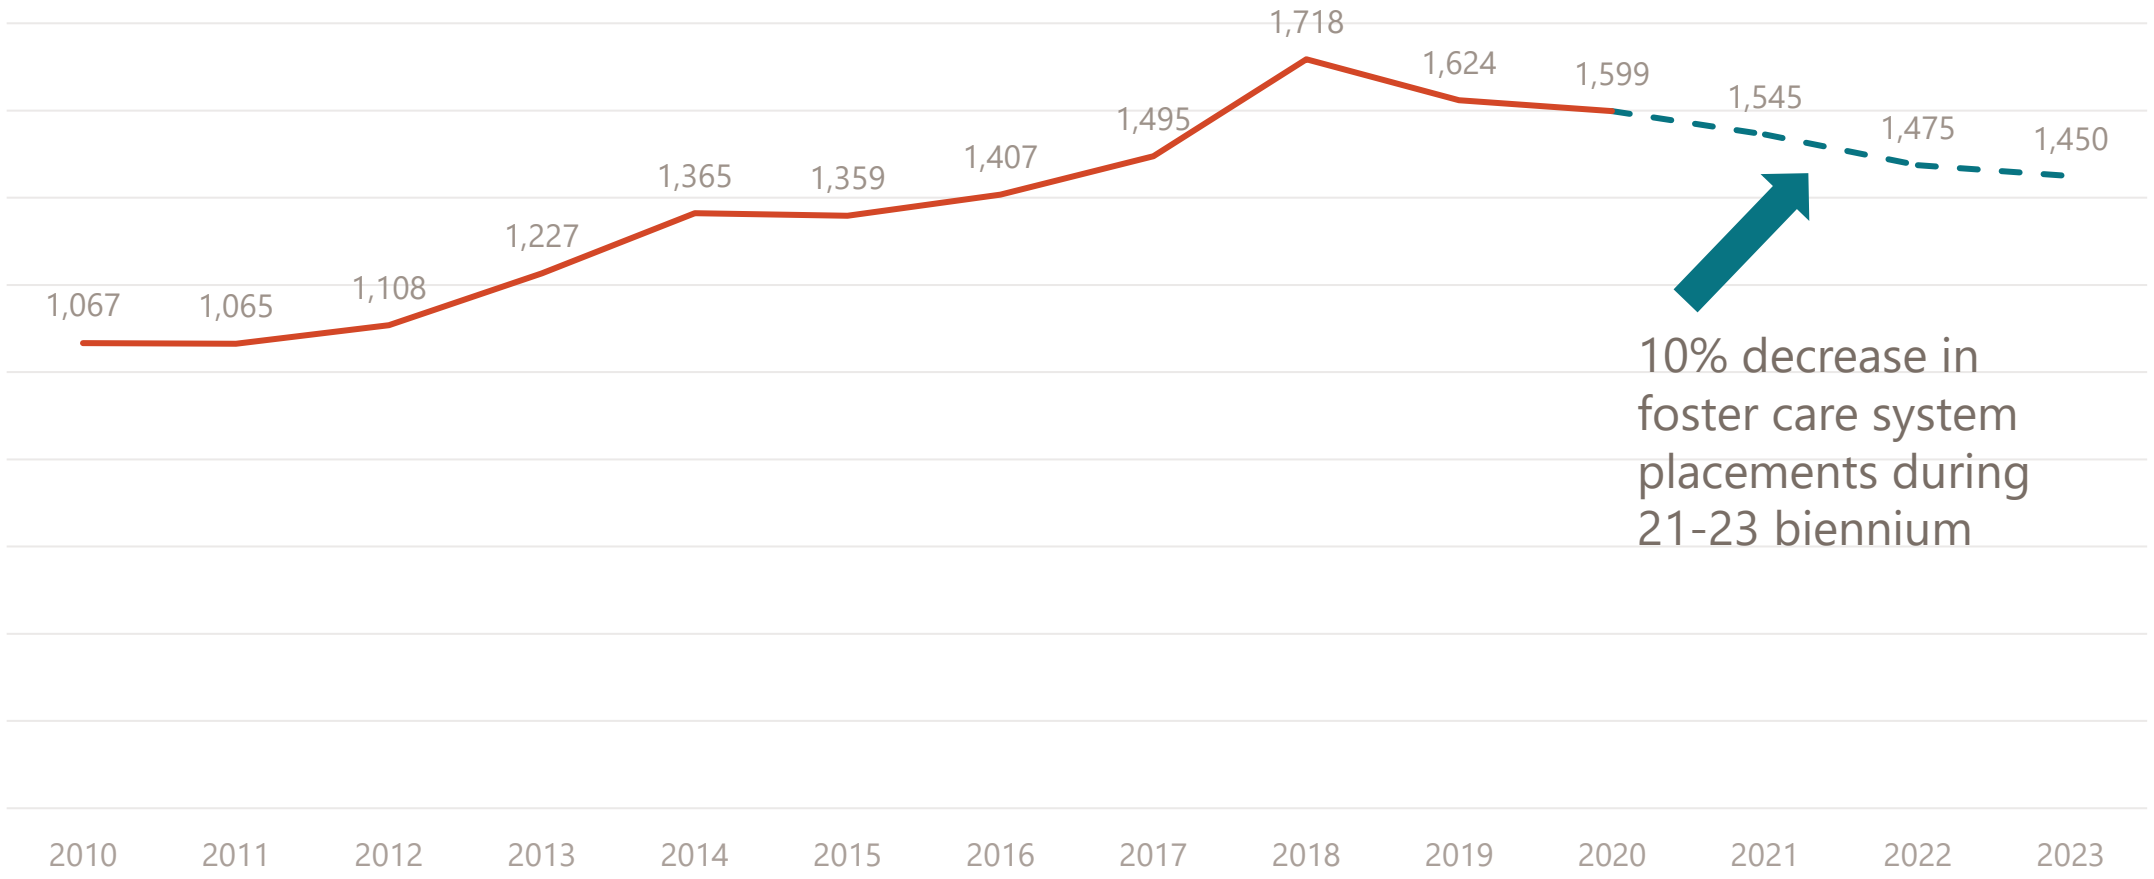
*Parental inability to meet needs of child could be due to parent(s)' behavioral health, incarceration, physical or intellectual disability, debilitating or life-threatening medical needs, homelessness or substandard living conditions, verbalization of no longer wanting their child, or substance exposed newborns.

Evidence-based Prevention Services

In home parent skill-based programs

Mental health programs

Substance abuse prevention and treatment



Our goals

- Reduce Foster Care Numbers
- Reduce Institutional Placements
- Reduce Out of State Placements
- Reduce Substance Abuse as Abuse/Neglect factor
- Increase Kids receiving evidence-based supports
- Reduce severity of school-based behaviors

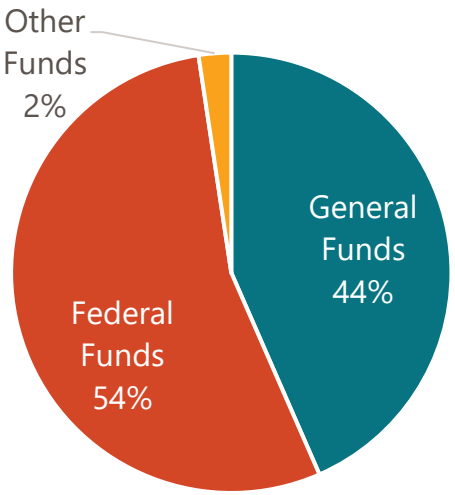
CHILDREN AND FAMILY SERVICES

The 21-23 budget anticipates a modest but steady reduction in foster care and residential placements

SHIFTING RESOURCES TO SUPPORT WHAT RESEARCH INDICATES WILL WORK FOR CHILDREN AND FAMILIES

De-scale investment in **approaches** that are **not proven effective**

Invest in approaches with **proven results** for the populations being served



Children & Family Services Budget Summary

19-21 Budget	**$181,171,041**	**41.6 FTE**
21-23 Budget (exec)	**$165,637,720**	**41.6 FTE**
21-23 Budget (House)	**$171,815,985**	**48.3 FTE**

+6.7 FTE and $6.2 million related to early childhood policy bills (HB1416 and HB1466)

21-23 EBR proposed $15.5 million decrease in total budget (7% of reduction is from federal funds)

- Reduce foster care and residential placements, accomplished in part by investing in evidence-based parent skill building and mental health services to families
- Implement equity in payments for services to families (QRTP, subsidized adoption, targeted case mgmt)
- Technology infrastructure investments in early childhood integrated data system and replacement of child welfare technology platform

DEVELOPMENTAL DISABILITIES
Program Purpose

Maximize community inclusion, independence and self-sufficiency to prevent institutionalization, and to enable individuals to transition from institutions to community living.

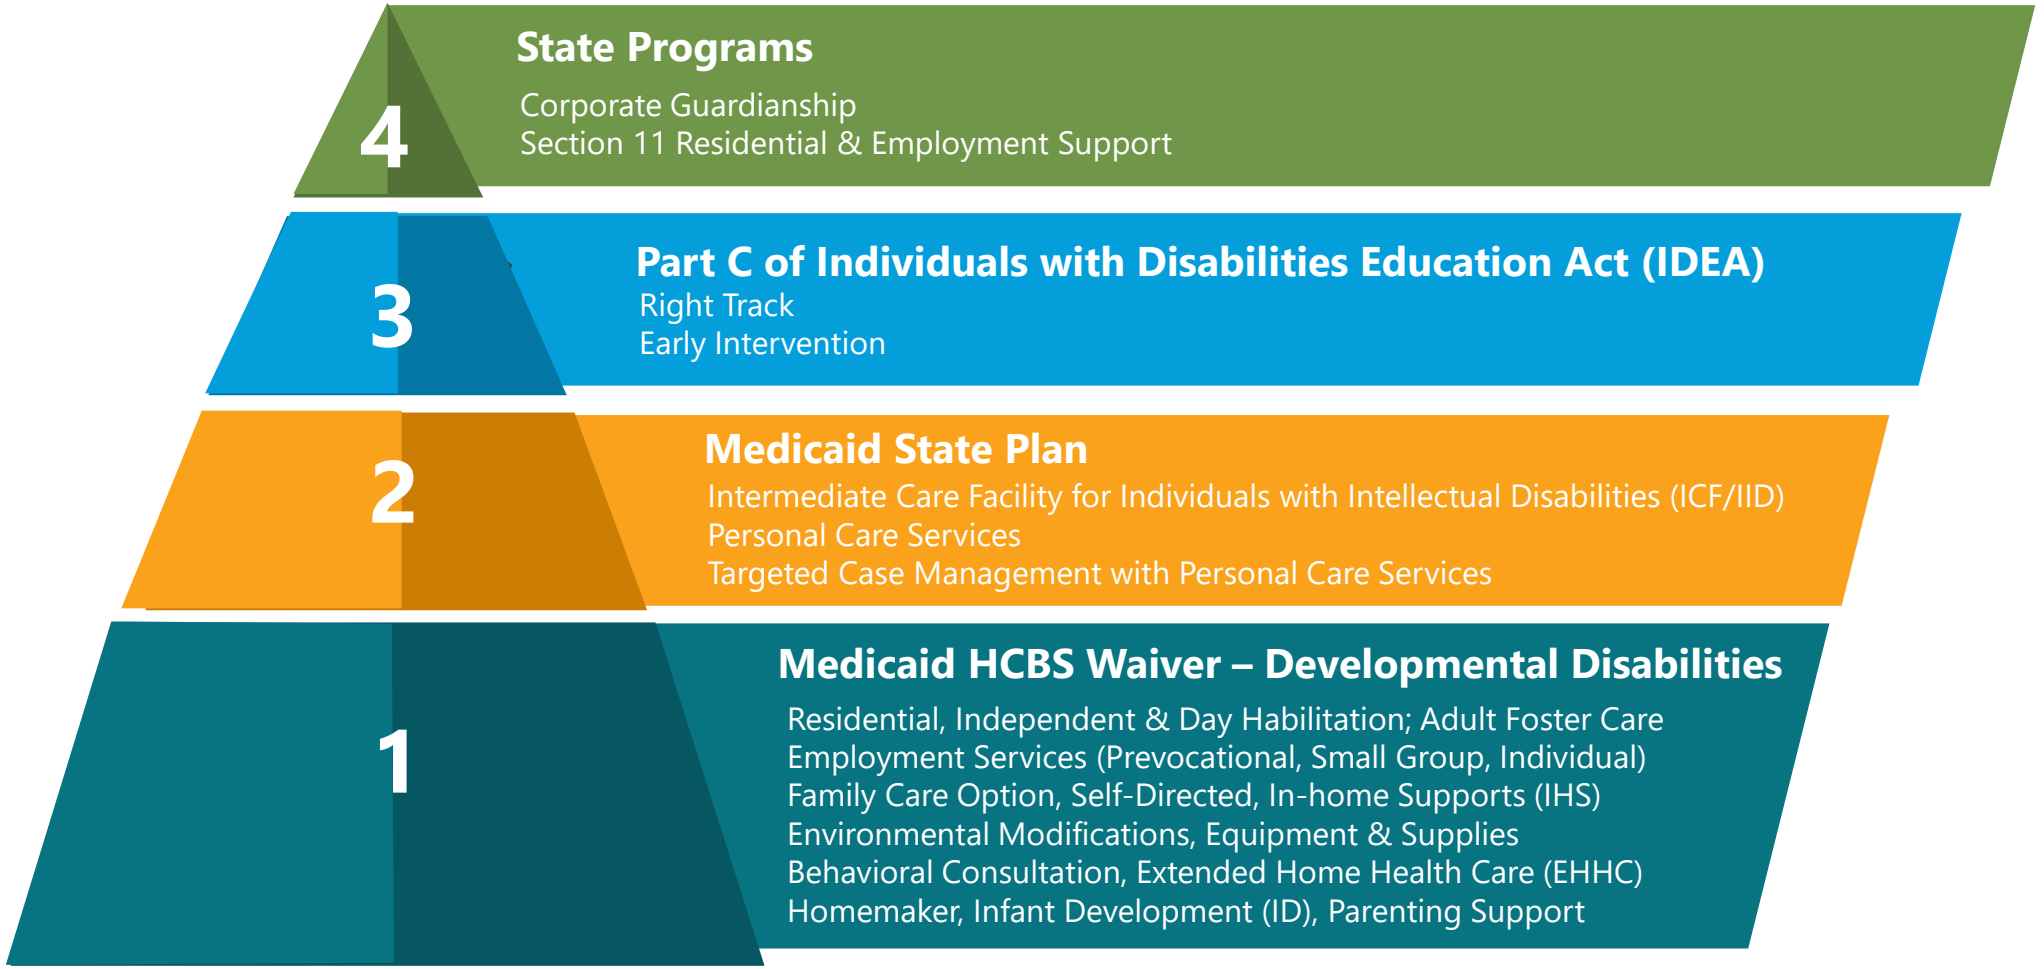
DEVELOPMENTAL DISABILITIES
What we do

Case Management

- Case management provided by DD Program Managers to individuals and families
- Eligibility review
- Person centered planning
- Service authorization

Administration

- Provider licensing
- Training & TA
- Policy Development
- Contract Management
- Provider Enrollment
- Part C and Infant Development



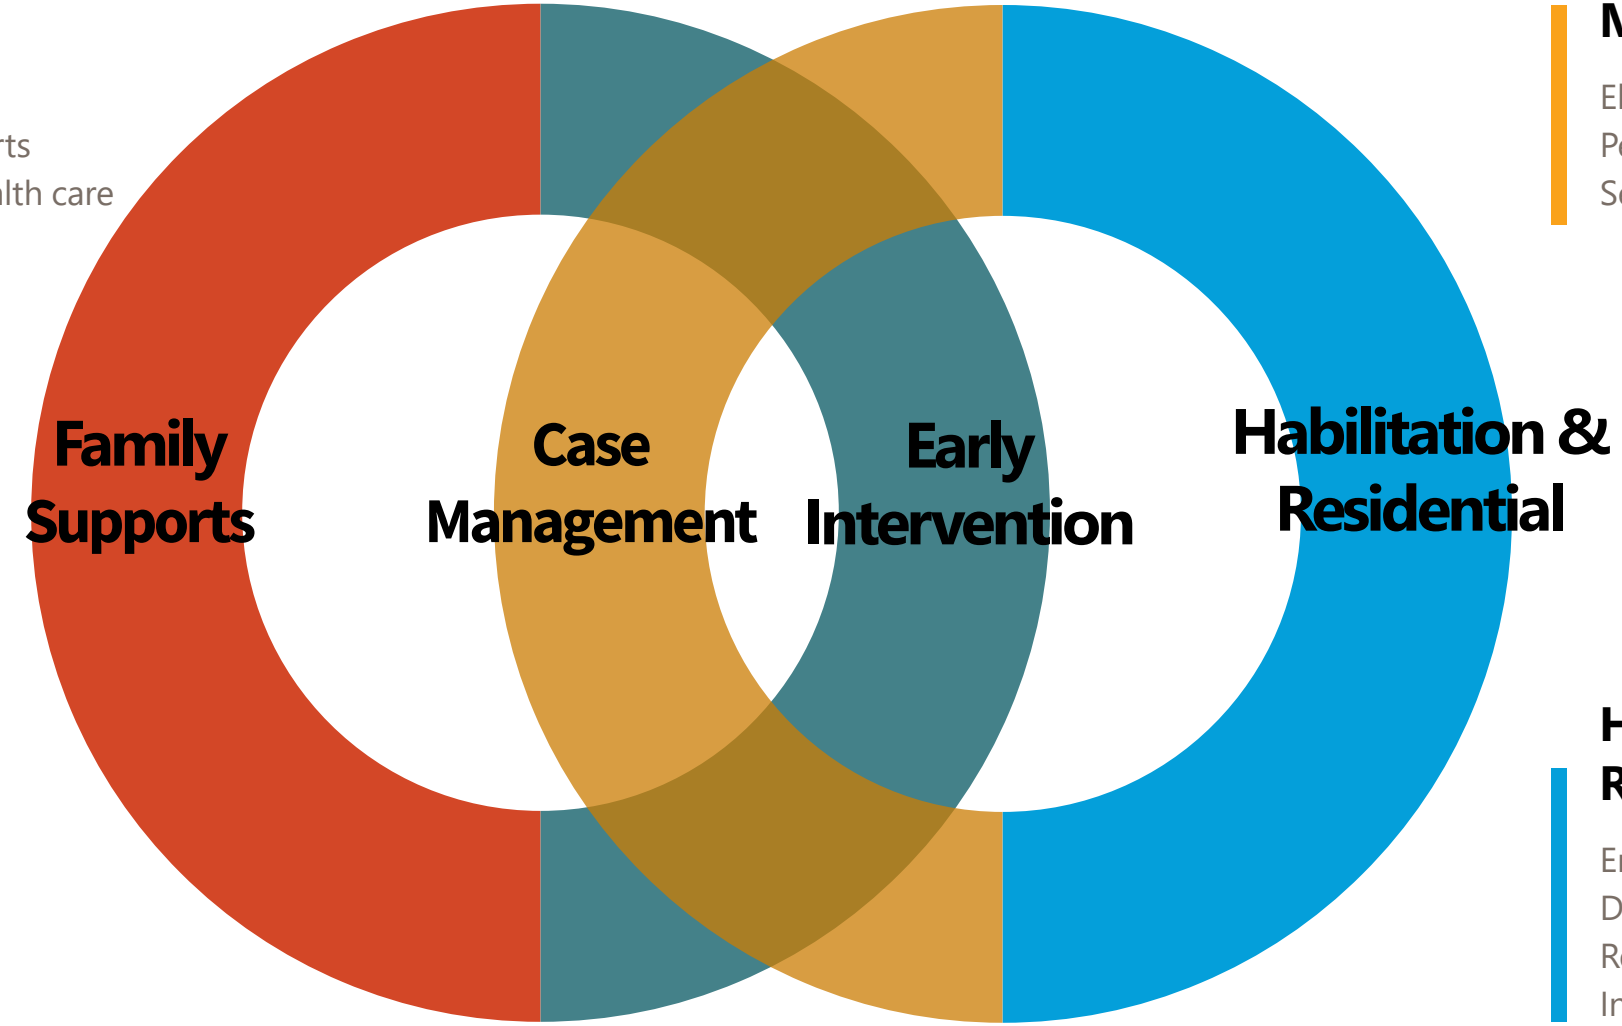
Program Integrity

- Regulatory compliance
- Provider Audits
- Case Reviews
- Federal & State Audits
- Quality Assurance

Partnerships

- North Dakota Interagency Coordinating Council
- State Rehabilitation Council
- Transition Task Force
- Money Follows the Person

DEVELOPMENTAL DISABILITIES
Service Array by Funding Authority



Case management and early intervention are a key intersection within the continuum of services available to people with Developmental Disabilities

Developmental Disabilities Budget Summary

19-21 Budget	**$689,016,522**	**125.87 FTE**
21-23 Budget (exec)	**$739,269,819**	**125.87 FTE**
21-23 Budget (House)	**$739,217,501**	**125.87 FTE**

21-23 EBR proposed $50.3 million increase in total budget

- Cost to continue services
- Diversion/Transition initiative with LSTC
- Provider inflation
- Payment system adjustments for ICF and Residential Group Homes
- Elimination of supplemental recreational and Section 11 grants
- Transitioning accreditation to provider program cost
- Operating efficiencies related to travel and occupancy

AGING & ADULT SERVICES
Program Purpose

Help older adults and individuals with physical disabilities to remain in their own homes and communities.

Protect the health, safety, welfare and rights of residents of long-term care settings and vulnerable adults in the community.

AGING & ADULT SERVICES
What we do

Aging & Disability Resource Link (ADRL)

- Toll free resource line for people with questions about how to access services
- Centralized intake for HCBS services
- Proactive in-reach and out-reach to build awareness of HCBS options

HCBS Case Management

- HCBS case management provided to consumers
- Eligibility review
- Care Team planning
- Service authorization

Protective Services

- Vulnerable Adult Protective Services delivered statewide
- Ombudsman services for long term care residents

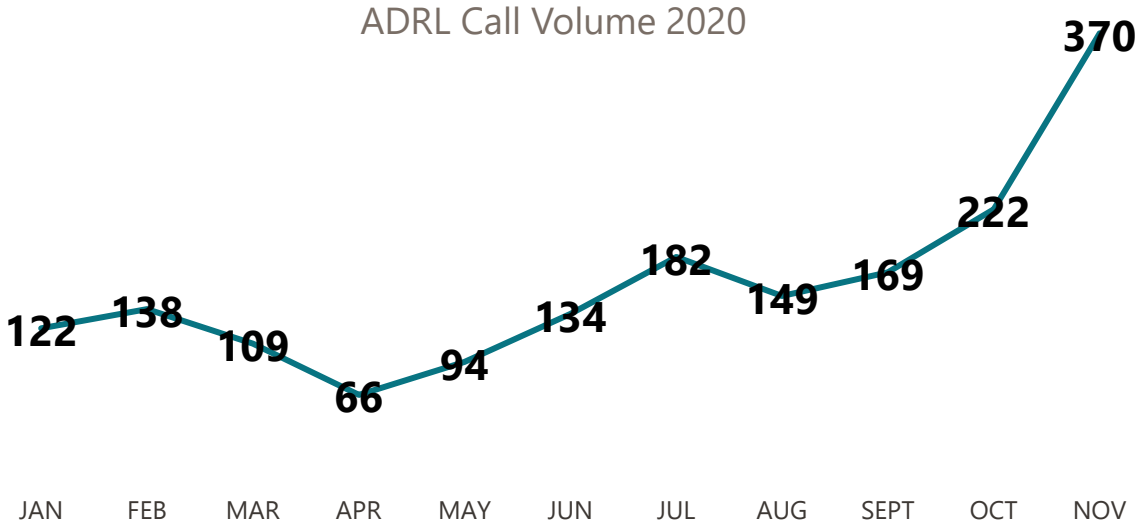
Senior Nutrition & Community Supports

- Administration of Older Americans Act
- Senior nutrition program
- Support for Family Caregivers
- Lifespan Respite grant

Administration HCBS and Partnerships

- HCBS 1915(c) Medicaid waiver
- Medicaid State Plan – Personal Care
- SPED / Expanded SPED
- Money Follows the Person

AGING & ADULT SERVICES
Aging & Disability Resource Link (ADRL)



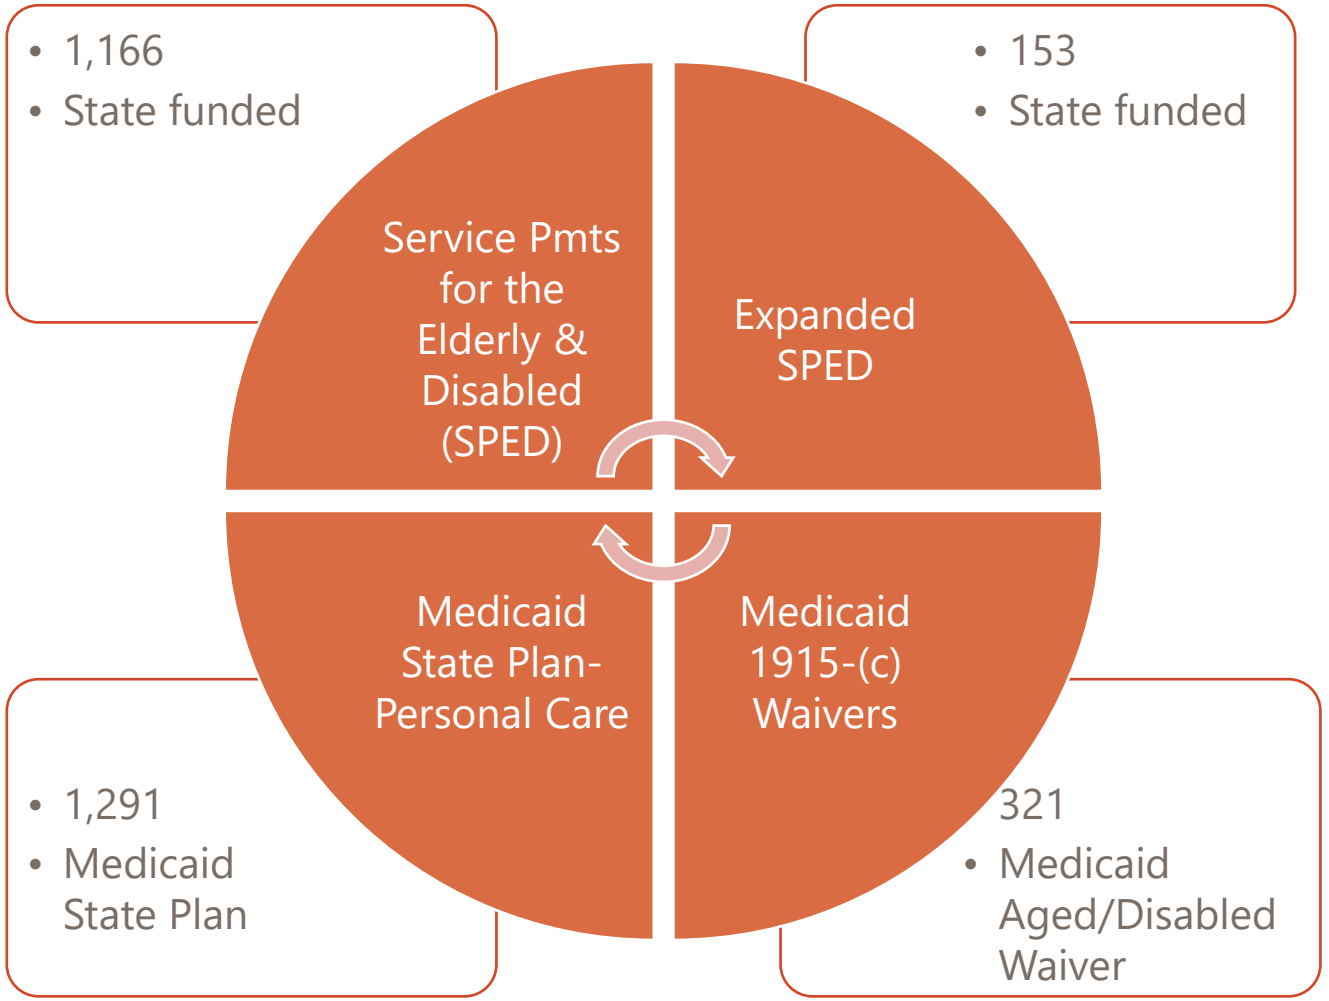
Top 5 Information Requests

- In-home assistance
- Adult protective services
- Medicaid information
- Family caregiver support program (FCSP)
- Older adults/aging Issues

AGING & ADULT SERVICES
ADRL Centralized Intake

- Process to receive HCBS referrals
- Based on no wrong door (NWD) approach
- Network built to support individuals needing LTC services by simplifying and streamlining access to information and services
- 6 FTE dedicated to centralized intake
- Fully implemented January 2021

7 in 10



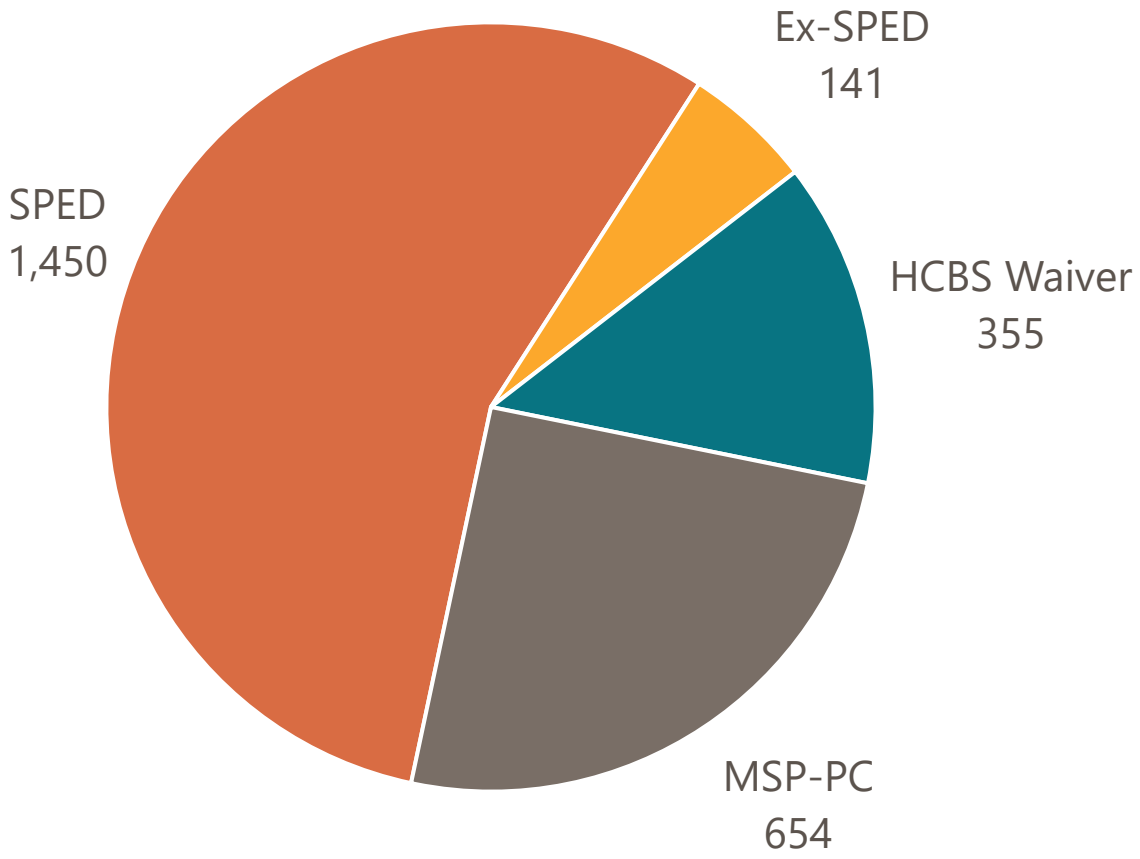
Americans 65+ will need LTC services for an average of 3 years

AGING & ADULT SERVICES
Home and Community Based Services

2,300

HCBS supported 2,300 unduplicated recipients

- Primarily serves older adults and individuals with physical disabilities
- Recipients must be both functionally and financially eligible
- May have client cost share based on income
- Federal and state funds



AGING & ADULT SERVICES
Types of *Support Services* available via HCBS

- Adult Day Care
- Adult Foster Care
- Adult Residential Care
- Attendant Care
- Case Management
- Chore Service
- Community Support Services / Residential Habilitation
- Community Transition Services
- Companionship
- Emergency Response System
- Environmental Modification
- Extended Personal Care
- Emergency Response System

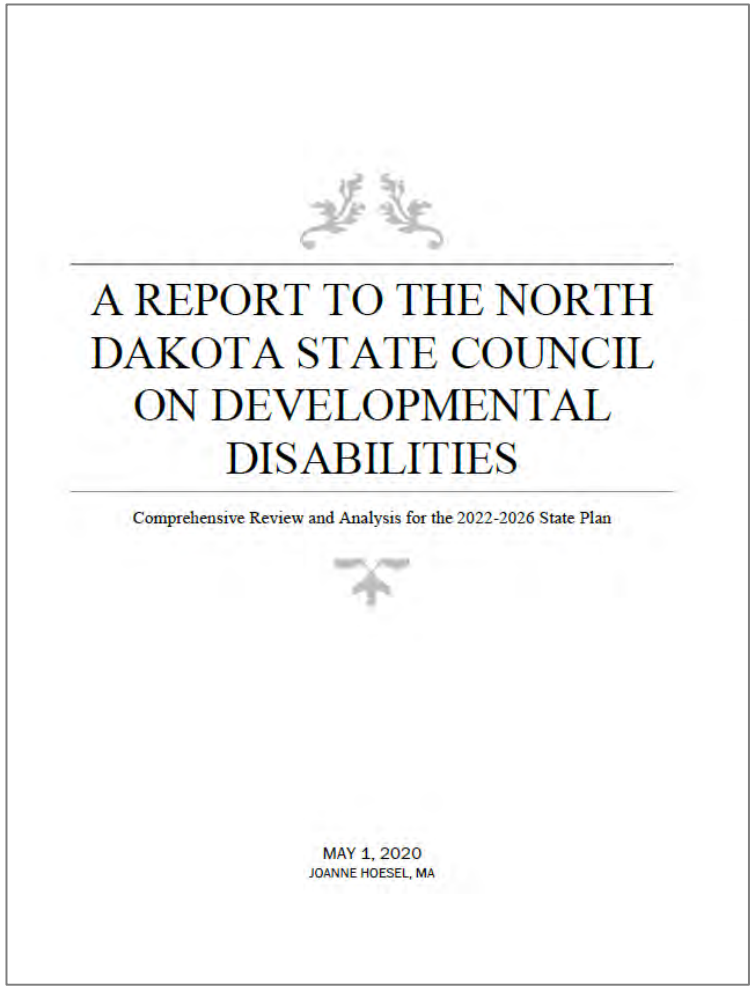
- Various programmatic and operating efficiencies

ND STATE COUNCIL ON DEVELOPMENTAL DISABILITIES

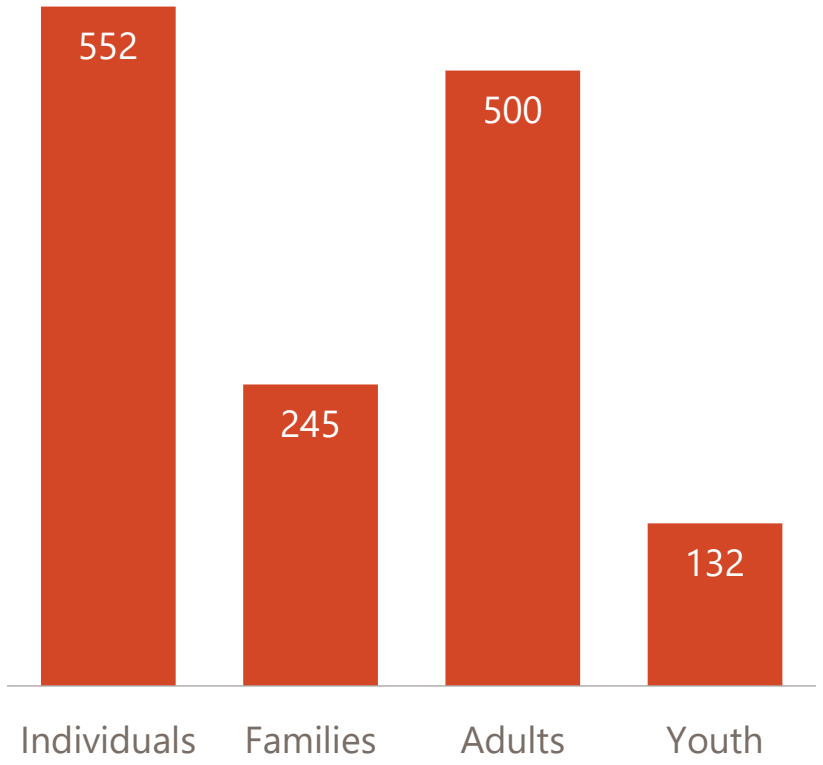
Purpose / Mission

The Council advocates for policy changes that promote choice, independence, productivity and inclusion for all North Dakotans with developmental disabilities. The Council provides funding for and supports projects and activities that maximize opportunities in these areas for consumers and families.



ND STATE COUNCIL ON DEVELOPMENTAL DISABILITIES

Key Findings: 2022-26 State Plan Comprehensive Review and Analysis



The following recommendations are offered as a roadmap for system improvement and present a range of possible options for consideration.

1. Fetal Alcohol Syndrome
2. Immunizations
3. Telehealth for IDD
4. Money Follows the Person
5. Culturally appropriate services
6. Infant Development services
7. Rental Assistance
8. Supported Decision-Making
9. Special Needs child care

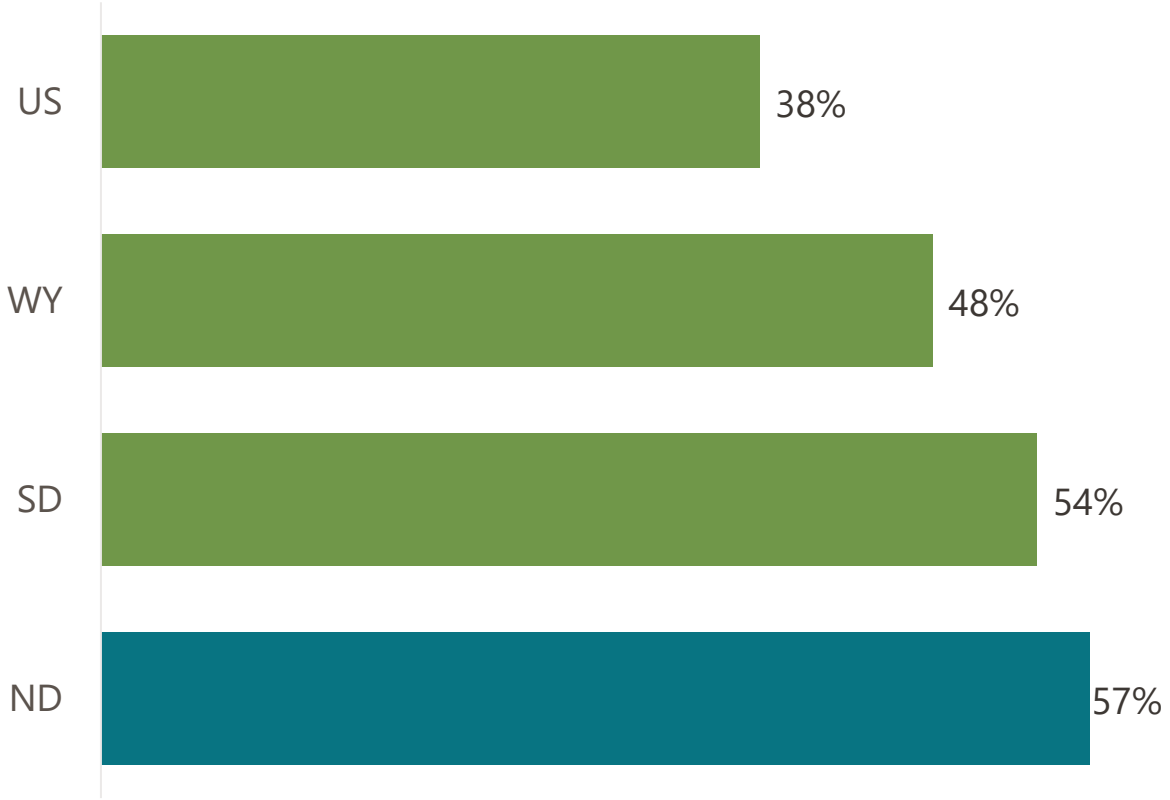
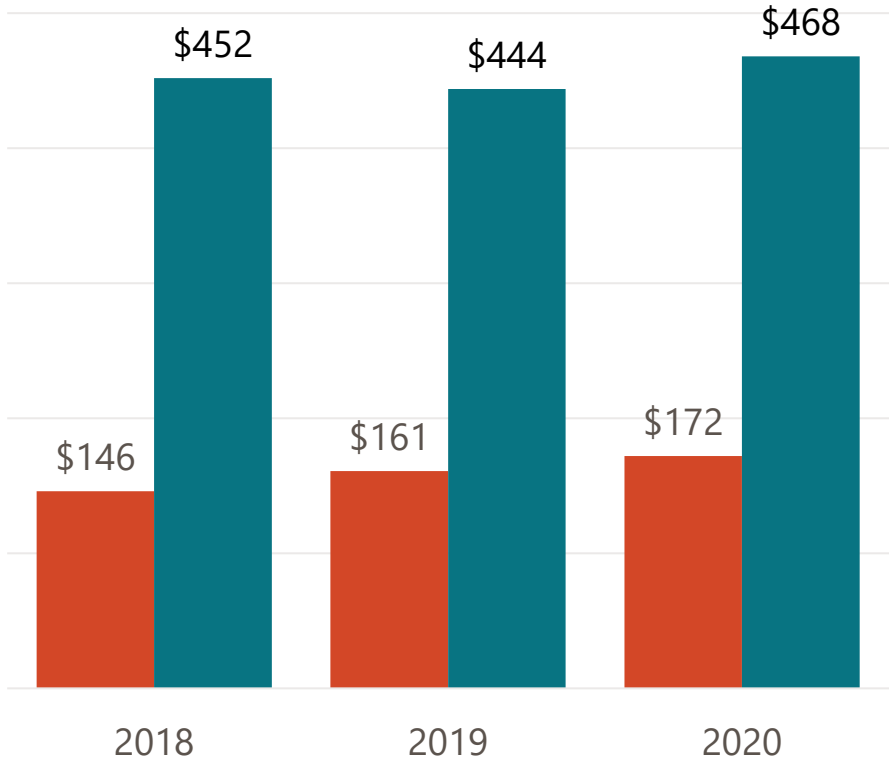
VOCATIONAL REHABILITATION DIVISION
Program Purpose



Assists North Dakotans with disabilities to enter or re-enter the workforce through individualized services

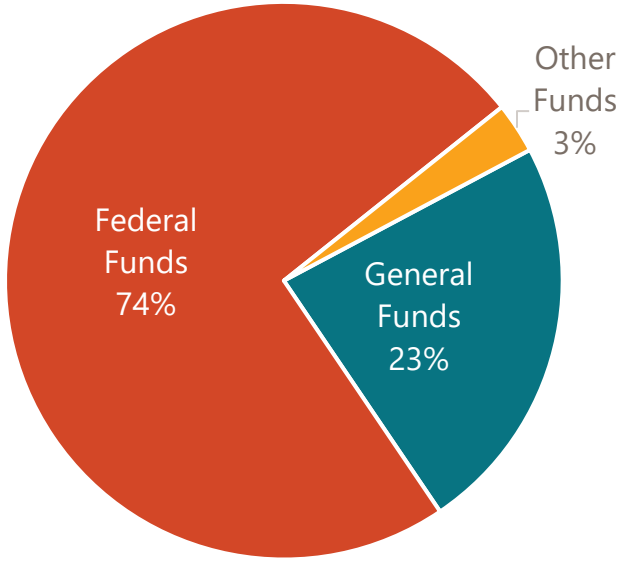
- Assess skills and abilities
- Identify a vocational goal
- Develop an individualized plan to achieve employment
- Provide services that result in competitive integrated employment



VOCATIONAL REHABILITATION DIVISION
What's driving us

ND is 1st in the US in terms of % of people with disabilities who are employed

Average Weekly Wage of VR Clients at Application vs. Placement



Vocational Rehab Budget Summary

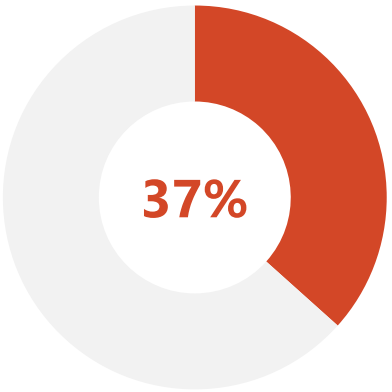
19-21 Budget	**$31,853,039**	**85.0 FTE**
21-23 Budget (exec)	**$30,528,323**	**85.0 FTE**
21-23 Budget (House)	**$32,420,755**	**85.0 FTE**

- Restoration of grant to recreational facility and to Centers for Independent Living
- Operating efficiencies related to travel and occupancy

CHILD SUPPORT
Program Purpose

The purpose of the Child Support program is to help parents meet the needs of their children by securing appropriate and sustainable child support.

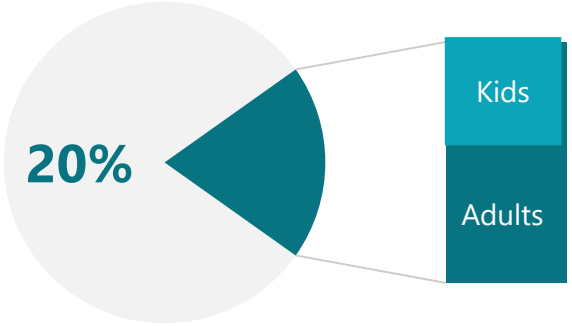
CHILD SUPPORT
Return on Investment



Every **$1.00 spent** on Child Support generated **$6.58 for family recipients**

Every **$1.00 in state General Funds spent** on Child Support generates **$20.00 in support for family** recipients

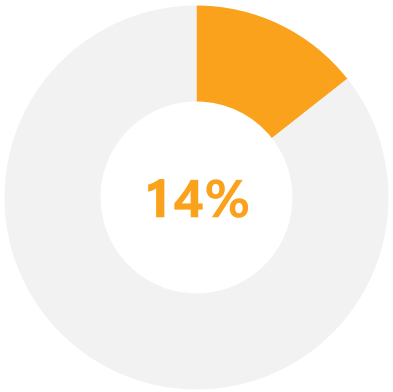
CHILD SUPPORT
Who we serve



65,999

1 in 3 ND kids

In 2020, 65,999 children received child support services. That is more than 1 of every 3 children under age 18 in the state.



149,720

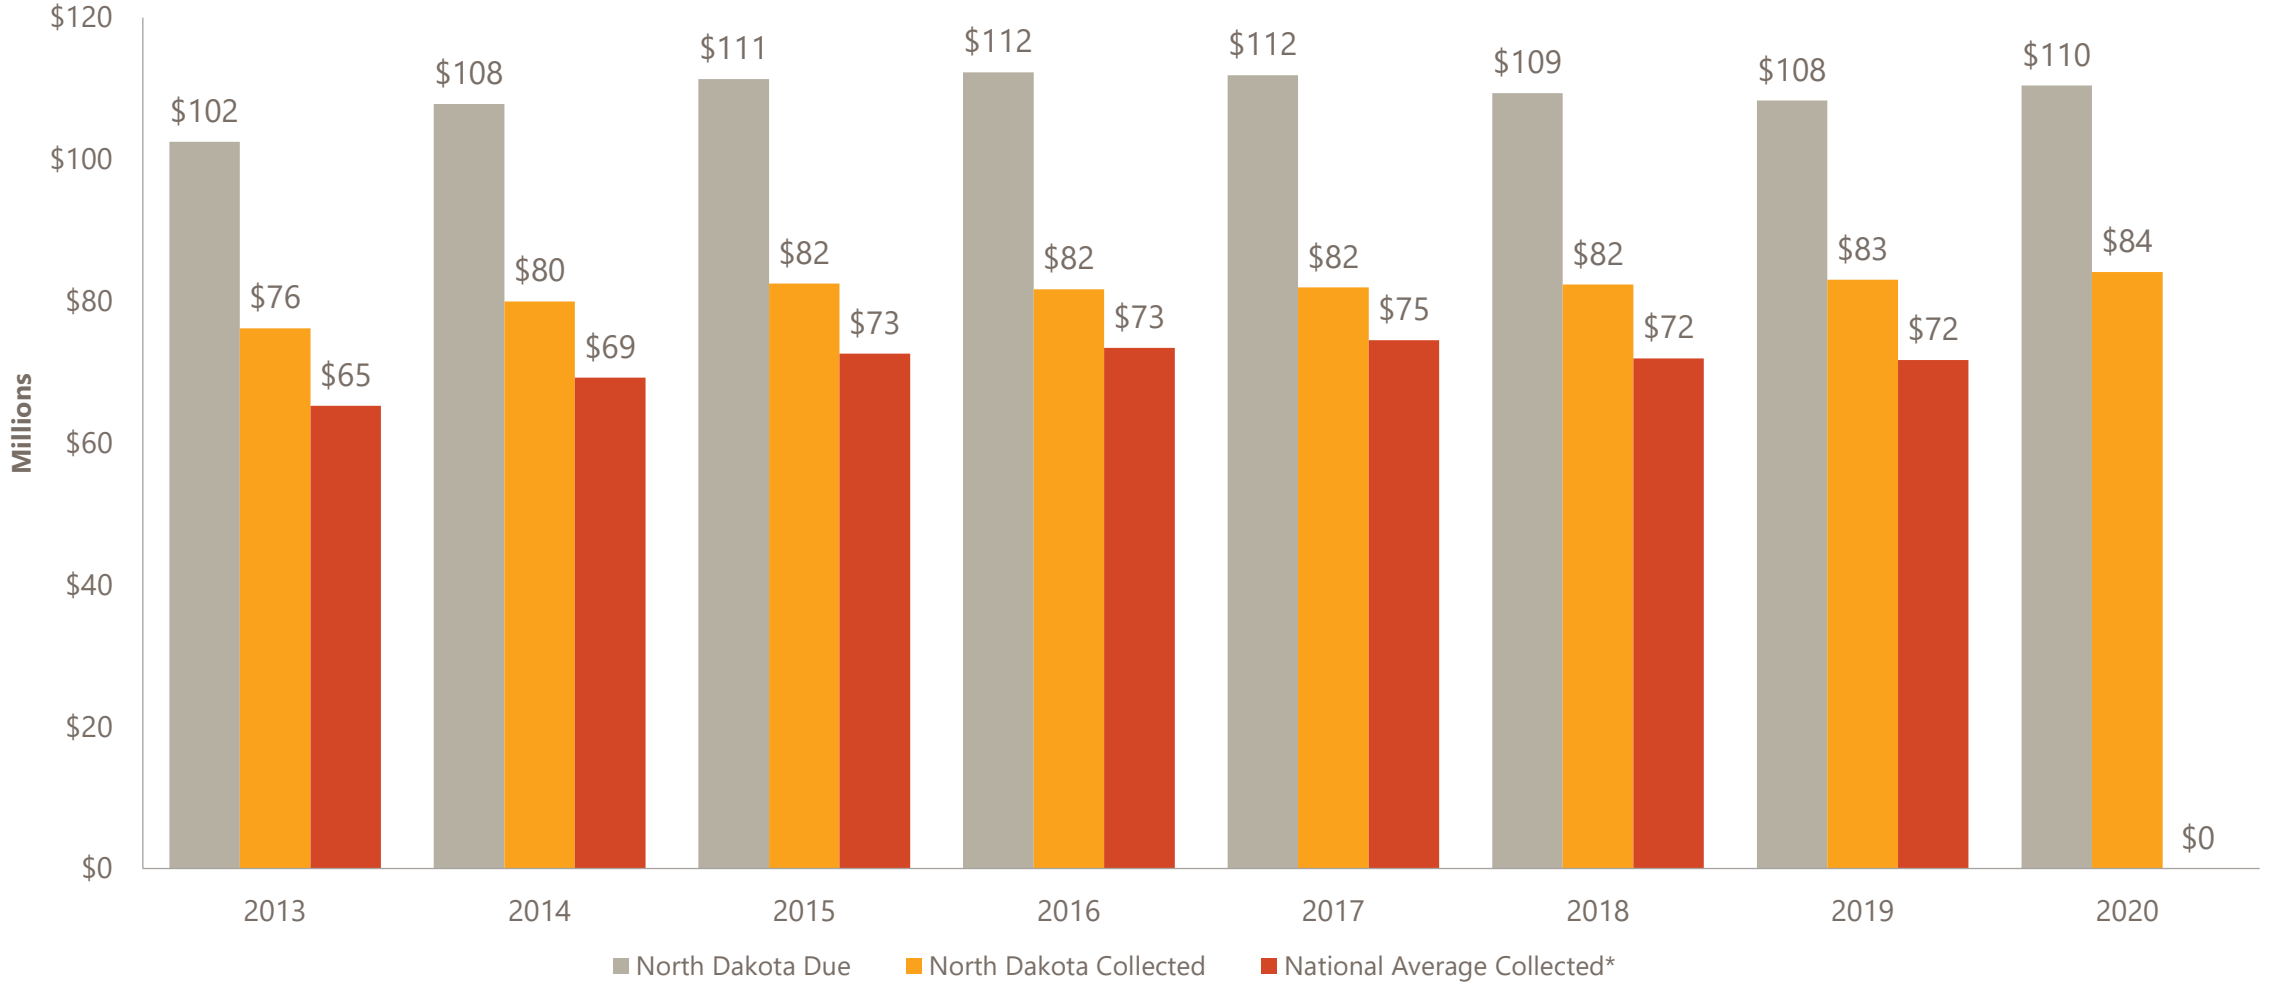
1 in 5 North Dakotans

149,720 people received child support services in North Dakota in 2020.

83,721

1 in 7 ND adults

In 2020, 83,721 parents received child support services. That means 1 of every 7 adults (age 18+) in the state has a connection to the child support division.



CHILD SUPPORT DIVISION

Supporting Family Stability & Economic Health

When child support is received, a child is able to grow up in a more secure and stable environment.

ND CHILD SUPPORT COLLECTIONS TYPICALLY EXCEED NATIONAL AVERAGES BY ABOUT 10%

	2013	2014	2015	2016	2017	2018	2019	2020
North Dakota	74.3%	74.2%	74.1%	72.8%	73.2%	75.3%	76.7%	76.2%
National Average	63.7%	64.2%	65.2%	65.4%	66.6%	65.8%	66.2%	N/A

**National average performance applied to North Dakota's current support due.*

CHILD SUPPORT
Supporting Family Stability & Economic Health

18,000

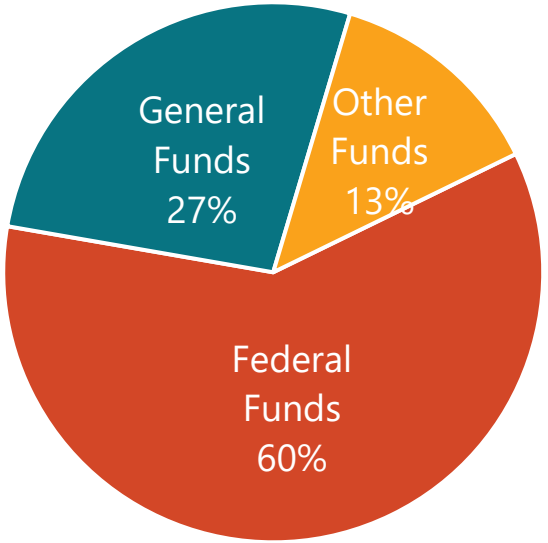
More than 18,000 families who are owed child support are not receiving the program's services

$25 million

More than $25 million in child support per year is not received in the month when it is due

$250 million

More than $250 million is owed in past-due support in full-service cases and nearly $400 million total in all cases



Child Support Budget Summary

19-21 Budget	**$29,805,507**	**157.7 FTE**
21-23 Budget (exec)	**$30,539,102**	**157.7 FTE**
21-23 Budget (House)	**$30,477,361**	**157.7 FTE**

- Operating efficiencies related to travel and occupancy

NOTE:

SB2002 includes shift in responsibility for entry of various child support information into the shared computer system from Clerks of Court to Child Support. Requesting consideration of DHS need for resources to accept responsibility for the work.

ECONOMIC ASSISTANCE

Program Purpose

The Economic Assistance team **helps** lower income **North Dakotans when they are struggling to make ends meet** by **connecting** them **to resources** that can **help meet** their **basic needs**, **preventing** greater and more damaging **crises.**

ECONOMIC ASSISTANCE
Federal Programs

Child Care Assistance Program (CCAP)

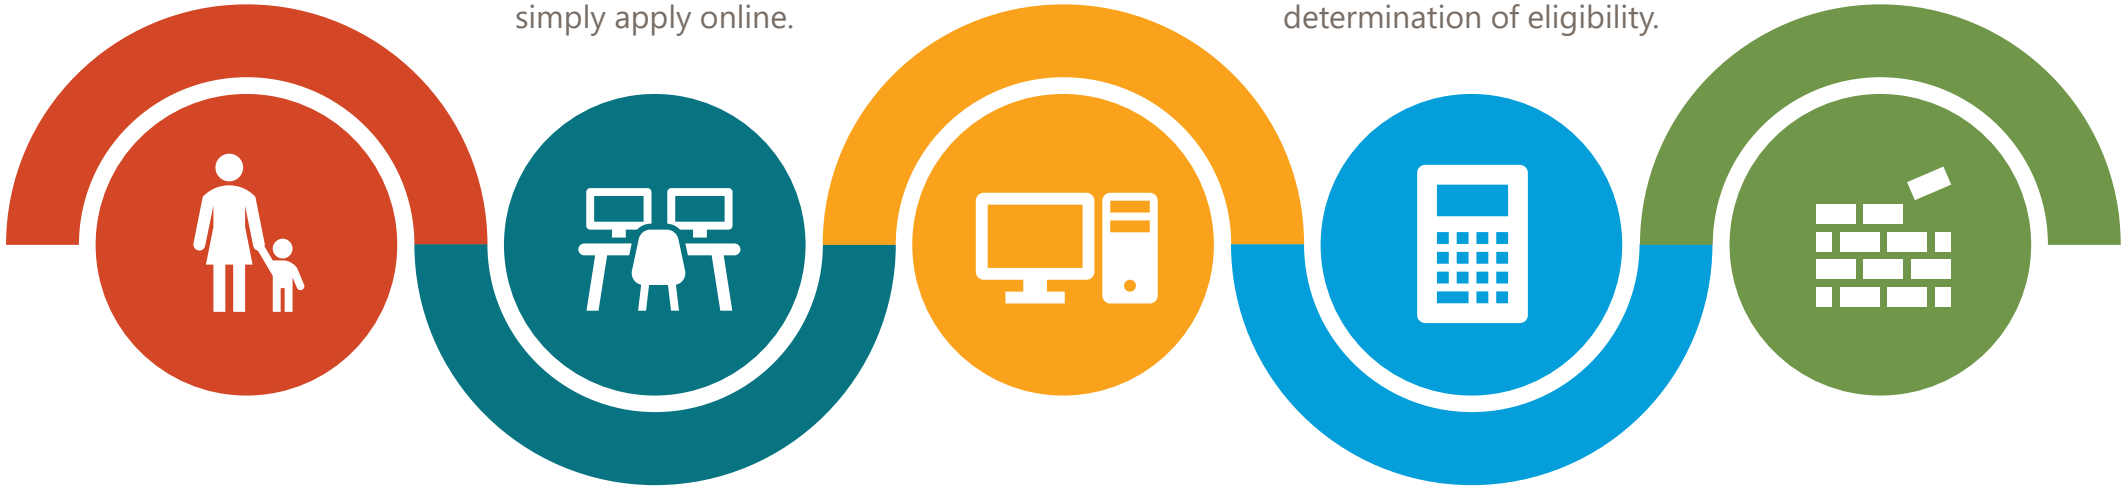
- Federal and State Quality Reviews
- Federal and State Audits
- Performance Improvement

Connecting North Dakotans to economic assistance is a partnership



The state and Human Service Zones work together to deliver help to low and moderate-income families

Contact Human Service Zone

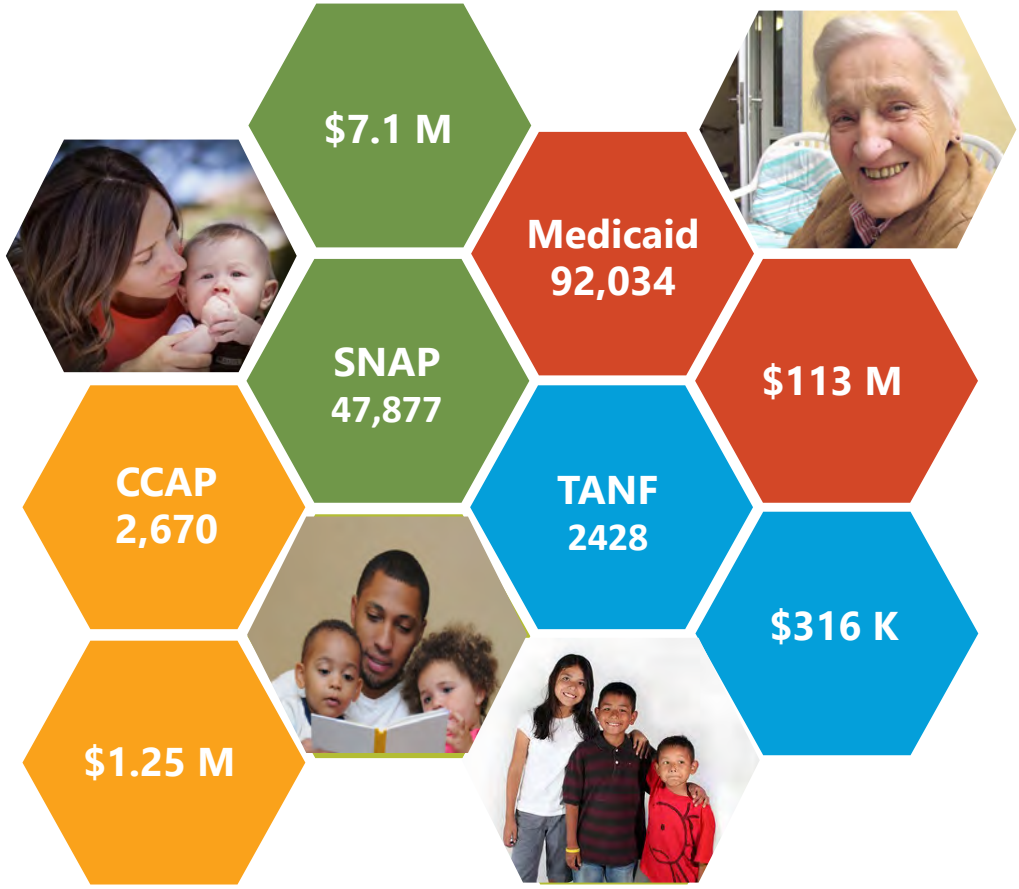
The local applicant can contact their human service zone directly or they can simply apply online.

Determine eligibility

An eligibility worker will review the information, reach out if needed, and make a determination of eligibility.

Person decides to apply

Making ends meet is getting more difficult every month so the applicant makes the decision to reach out for help.



Gather information

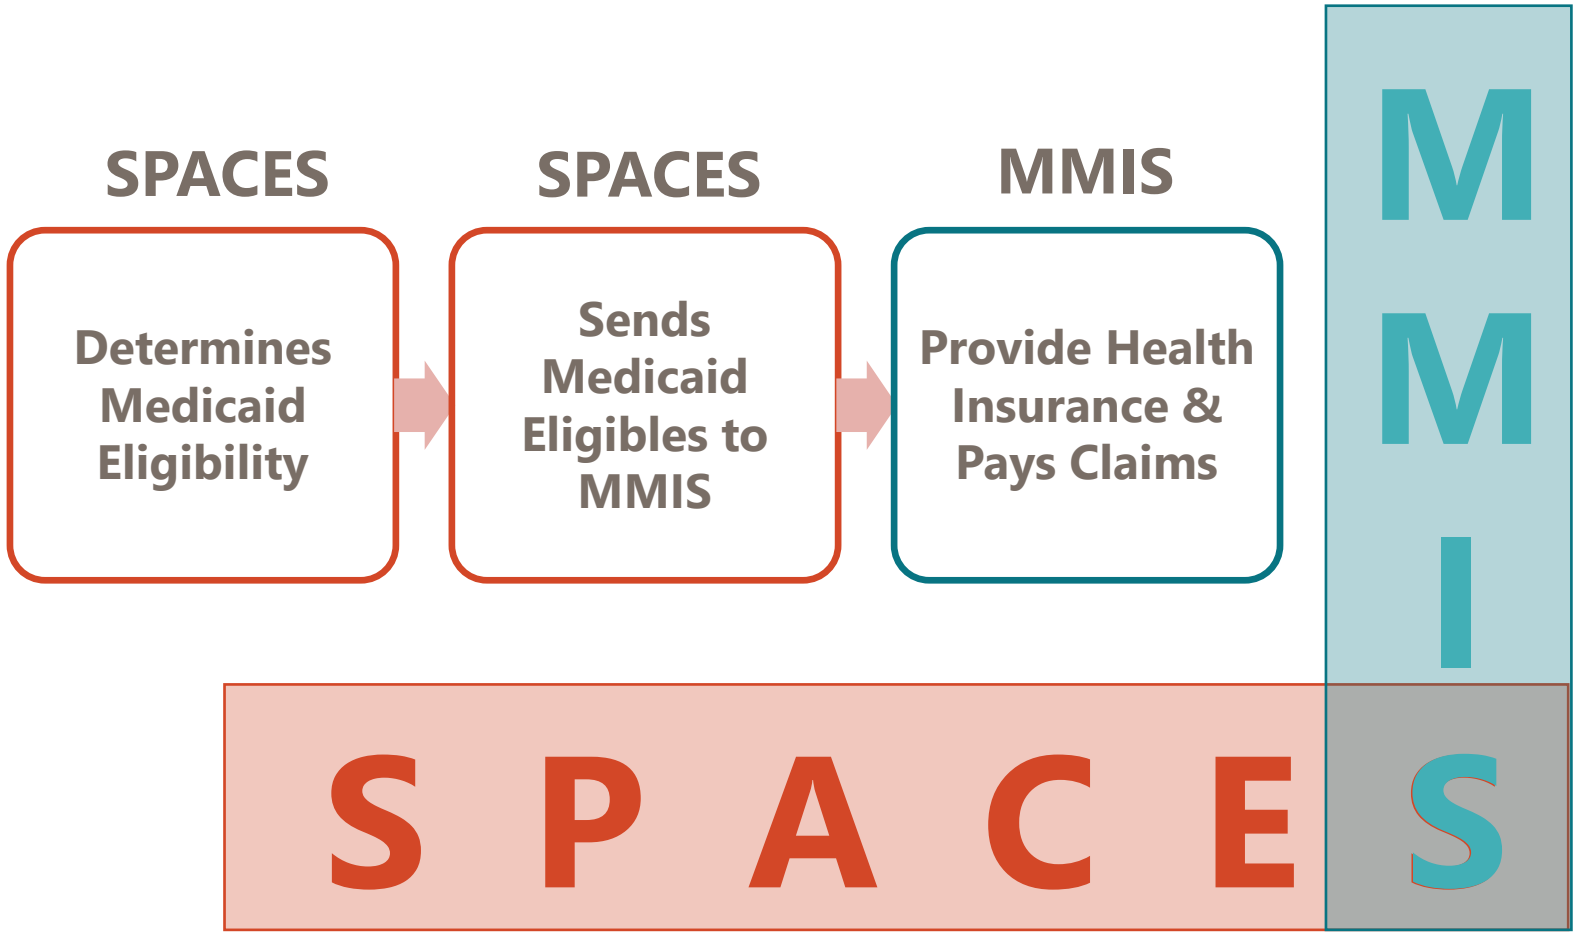
The applicant can enter as much info as they can in the SPACES self-service portal.

Issue benefits

If the applicant is eligible to receive assistance, the state will issue the benefit in the appropriate manner.

140,000 - 150,000 North Dakotans utilize SPACES to access economic assistance in North Dakota each year

Average Monthly Individuals/Benefits (FY20)



M 119,763 people in 68,287 households have a Medicaid record in SPACES

S 73,262 people in 34,795 households have a SNAP record in SPACES

T 5,124 people in 1,981 households have a TANF record in SPACES

C 4,946 people in 2,960 households have a CCAP record in SPACES

Two major technology platforms work together to connect low-income North Dakotans to resources

SPACES **interfaces with more than 50 systems**, including:

- Child Support
- Social Security
- Vital Records
- IRS
- EBT & EPC Systems
- ND PeopleSoft

145,000

North Dakotans

$1,472,000,000

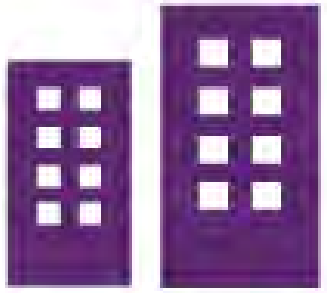
- Administer federal COVID relief funds for low and moderate-income households
- Integrate department's housing assistance initiatives into the administration of economic assistance resources



SOCIAL DETERMINANTS OF HEALTH

The social determinants of health are the conditions in which we are born, we grow and age, and in which we live and work. The factors below impact on our health and wellbeing.

Childhood experiences

Housing

Education

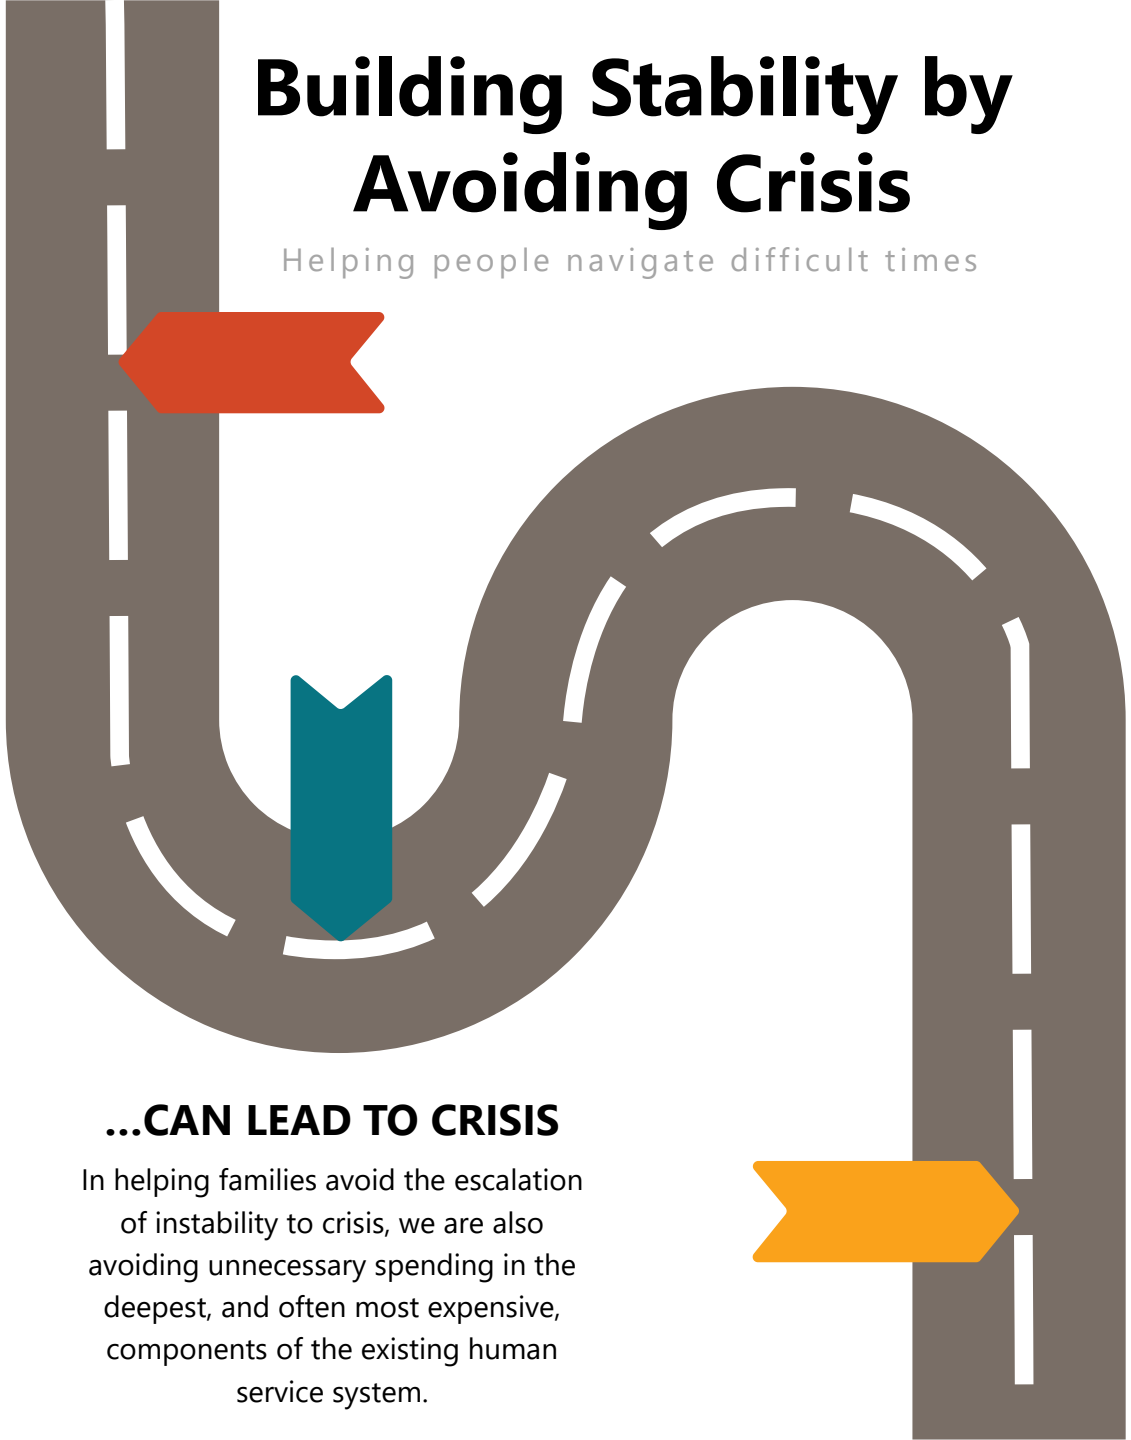
Social support

Family income

Employment

Our communities

Access to health services



Source: NHS Health Scotland

Building Stability by Avoiding Crisis

Helping people navigate difficult times

DISRUPTION

When families experience disruption, their ability to be a fully engaged, productive member of the community and the workforce is compromised.

...CAN LEAD TO CRISIS

In helping families avoid the escalation of instability to crisis, we are also avoiding unnecessary spending in the deepest, and often most expensive, components of the existing human service system.

SERVICES SUPPORT STABILITY

Intervening early will both save money and strengthen families. It will allow us to reserve deep end services for the times when they are truly needed, and help people avoid deepening their journey into crisis by diverting from institutions, keeping families together, and helping and sure that people have a place to call home.

Senator Holmberg closed the hearing at 4:08 PM.

Rose Laning, Committee Clerk

Testimony
House Bill 1012 – Amber Moen, Devils Lake, North Dakota
Senate Appropriations Committee
Senator Ray Holmberg, Chairman
March 11, 2021

Mister Chair and members of the committee, my name is Amber Moen, and I am from Devils Lake, North Dakota. I was a caregiver for 7 years for my mother who had Early Onset Alzheimer's.

My mother's name is Susan. Growing up, she was just your average mom. She somehow found the perfect balance of parent and friend, being just strict enough but always there for you if you needed someone. She ran an in-home daycare for 17 years while also raising my younger sister and myself. She was creative and artistic, often working on beautiful cross stitching's that she would donate and were always a high-priced item at our Catholic School fundraisers. She had so many wonderful qualities about her, her laugh was infectious, and her strong Catholic faith guided her through the most difficult times in her life.

In 2008, we celebrated her 50th birthday, I had turned 21 and my sister graduated from high school. It was also that year that she confided in me that something wasn't quite right. She was losing her speech. It started gradually but was getting noticeably worse. Her handwriting and the ability to do simple math was also declining. As a business owner and caregiver for small children she was genuinely concerned. It was this phone call that would begin our 2-year journey of trying to figure out what was going on.

By the time 2010 came, she could hardly speak. We had tried everything. We were referred to Mayo Clinic in Rochester. After 2 weeklong stays and 1 follow up visit, we received the diagnosis of Early Onset Alzheimer's Disease. She was 52 years old.

After that, we went home. We didn't know what to do next. My parents were divorced and with my sister and I both trying to find our own paths in life, my mother was living alone trying to process this unbelievable information. She started on medication that would help to slow the progression, but she would never get any of her speech back eventually losing it completely.

In 2011, her disease progressed to the point where she had to close her daycare and stop driving. Realizing she needed more help I decided to move back to Devils Lake to become her primary caregiver. Even though it had been a year since we received her diagnosis, we were still in a sort of limbo. I was trying to figure everything out basically on my own and had no idea where to start. Then one day I heard of an education series being held at the college by the Dementia Care Services Program. It was at this time that I met my care consultant, Ashley who would change things for our family tremendously.

It was Ashley who was finally able to give me some sort of direction. She provided resources on everything from general information about the disease to certain programs that she knew my mom could qualify for. More importantly, she was the support that I needed as a caregiver. She did not live in Devils Lake but was always willing to find time to meet. Through the Dementia Care Services Program, I was able to become a better caregiver which in turn gave my mother a better quality of life.

This is why the Alzheimer's Association is asking you to increase funding, so that more families like mine can receive these critical services. So, we are asking today to increase funding for the Dementia Care Services Program to $1,332,000.

As for my mother, it was decided in 2017 that it would be best to move her into a Memory Care Unit. On January 11, 2018, my mother passed away, 3 days later, I gave birth to my daughter, Finley Sue, who would have been my mother's first grandchild. It is now for my children that I continue to advocate and fight to end this terrible disease.

Thank you so much for taking the time to hear my story today. Please let me know if you have any questions.

Testimony
House Bill 1012 – Department of Human Services
Aging Services Budget
Senate Appropriations
March 11, 2021

Chairman Holmberg and members of the committee, my name is Brian Arett. I am the executive director of Valley Senior Services providing services for senior citizens in the six counties of southeastern North Dakota. I am also a member of the North Dakota Senior Service Providers, an association of agencies that provide Older Americans Act Services to the senior population of this state.

Attached to my testimony is a copy of a booklet entitled Feeding Grandma 2021. This is the fifth booklet in a series that we have provided during the legislative session. Each session we have updated it to provide the most current and in-depth data on senior hunger, how our programs help prevent this from happening in North Dakota and why it is one of the most cost-effective methods for keeping seniors in their homes.

The basic premise behind this booklet is that providing a stable source of healthy, nutrient dense meals is a key factor in successful aging. And because this service is very cost effective - the cost of providing senior

meals for a year equals two days in the hospital or five days in a nursing home - it makes good fiscal sense for our state and for the people we serve.

But the Senior Nutrition Program is so much more than just a meal. At senior centers, it is a chance for our seniors to engage and socialize with other seniors. And our “Meals on Wheels” programs provide meals to our most vulnerable seniors, those that are unable to leave their homes. Home delivered meals also provide our homebound seniors with a daily well-ness check. Many times, this might be the only human contact our seniors have throughout their day. This happens every day in our most rural communities and in our largest cities.

In the state of North Dakota 49% of our seniors live alone, 67% live in rural areas, 61% are women and 20% live in poverty. Inadequate nutrition and /or limited social contact has direct health consequences that affect the healthcare system and the economy.

The agency I work for – Valley Senior Services – provides about 1,400 Meals a day to the seniors of southeastern North Dakota. The average age

of the people we serve is just over 82. For many of the people that we deliver meals to, their only contact with another person during the day is the volunteer making that delivery. We feel that this connection combined with an incredibly healthy meal provides invaluable support that allows many of these people to continue living independently much later in life than they otherwise would. And the partnership that we have with the state of North Dakota through funding provided by the Department of Human Services Aging Services Division is critical in making this happen.

Over the past few sessions, our senior meal programs have had great support from legislators in adding state dollars to the Aging Services budget to work toward our Associations' goal - to have enough combined Federal Title III and State Funds so that ALL senior meals provided by Title III agencies receive the unit rate reimbursement. The $4.60 unit rate reimbursement is NOT intended to cover the full cost of the meal. The total cost, estimated to be $11.02/meal, are covered with participants' program income contributions, required local match, NSIP (Nutrition Services Incentive Program) dollars and additional funds raised locally.

In testimony provided by Nancy Nikolas-Maier, Division Director for the Aging Services Division, she presented a proposed budget for the biennium for Senior Nutrition Services of $12,036,132. A portion of these funds, the NSIP dollars of $1,693,820, are distributed to providers separate from the $4.60/meal reimbursement we receive for the meals we provide to seniors. This leaves a balance of $10,342,312 in funds designed for reimbursement to providers. Her testimony also noted that meal counts increased dramatically during the pandemic and that we served 103,672 meals in the month of November 2020. If we continue to serve that number of meals it would require funding of $11,445,389 to provide reimbursement for every meal served – an increase of $1,103,079 over the budgeted amount. Our first request of this committee is to add this amount to the budget to reimburse providers for every meal served through this program.

It is also important to point out that the unit reimbursement rate of $4.60/meal has not been increased since July of 2015 – a period of six years at the conclusion of the current biennium. At the same time, costs connected to providing this service have grown by 28.3% (from $8.59/meal to $11.02/meal). With that in mind, our second request of this committee is to increase the per meal unit rate to $5.60/meal. This request would

recognize the impact that inflation has on the cost of maintaining this service and would add an additional $2,448,128 for the 2021-23 biennium.

These additional funds will help us to continue to keep up with the growth in demand for our services brought on by the ever-growing senior population. It will also assist us to keep up with rising food costs, and the costs associated with attracting, and retaining the employees required for providing our services.

North Dakota Senior Service Provider agencies are dedicated to making our state the best place possible to grow old. We feel that the State of North Dakota is a natural partner in helping us to accomplish this goal and ask that you add $3,551,207 in state funds to the 2021-23 biennium budget.

Thank you for your time in consideration of this testimony. I would be happy to answer any questions you might have.

Feeding Grandma 2021

A 2021 Legislative Document

Provided by North Dakota
Senior Service Providers (NDSSP)
www.ndseniorservices.org

We Feed Seniors So They Can Remain Healthy and Independent

North Dakota Senior Service Providers (NDSSP) is a group of agencies that provides services to older adults across the entire state of North Dakota. Older Americans Act Title III Nutrition Programs are some of the services we provide. Funding for this program flows to the state from the federal Administration for Community Living and consists of two primary components:

- **Congregate Nutrition Services** - providing nutritious meals for seniors in a social, group setting
- **Home Delivered Nutrition Services** - providing meals for homebound seniors, also known as Home Delivered Meals and Meals on Wheels

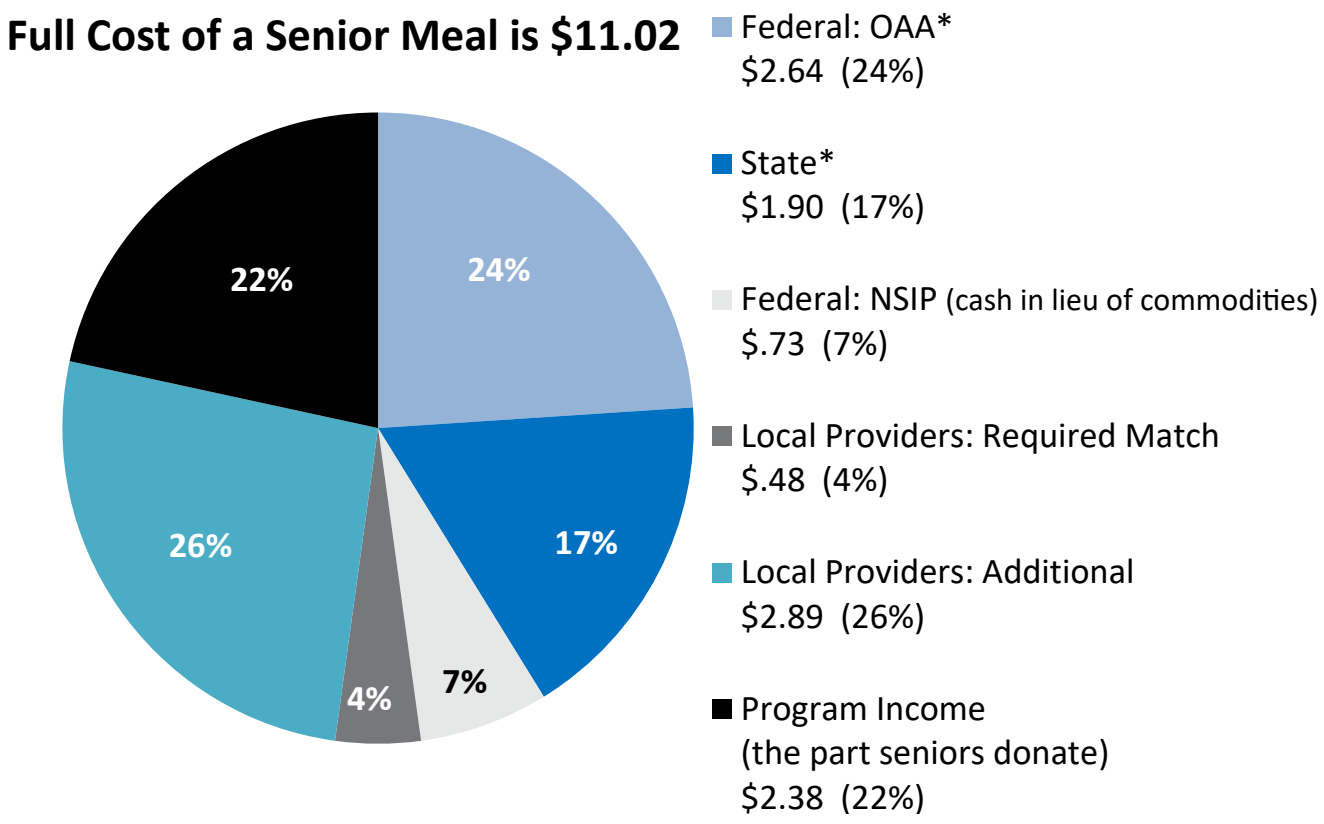
This document provides the highlights and updated usage and cost information for Federal Fiscal Year 2019. Research citations for this "Feeding Grandma 2021" document can be found in the "2015 Feeding Grandpa" document available at www.ndseniorservices.org.

Congregate & Home Delivered Meals Are Cost Effective

Many of the chronic health conditions that result in frailty and disability, loss of independence, and reduced quality of life in older adults are preventable through low-cost lifestyle interventions, incorporating proper nutrition and physical activity. Clearly these meals save valuable health and long-term care dollars.

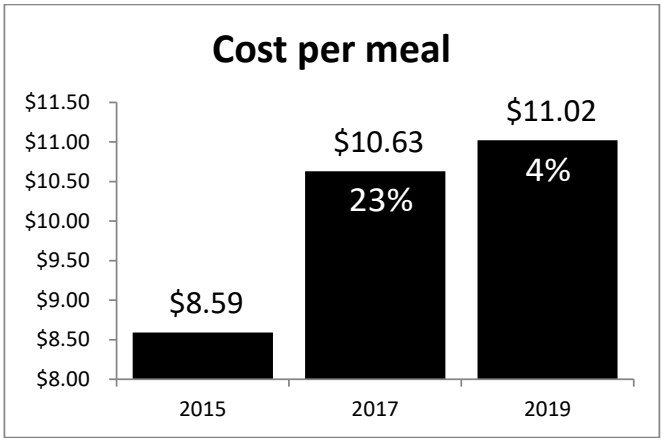
Source: Meals on Wheels America, 2019.

Congregate & Home Delivered Meals Promote Good Health



Nutritional status is closely associated with an older person's ability to function and remain independent. Hospitalized older adults suffer from many adverse effects when malnourished. Nutritious meals, tailored to older adults, reduce the risk of chronic diseases and related disabilities, prevent nutritional deficiency, and improve health over the long term.

Congregate & Home Delivered Meals Save the State Medicaid Money



These older adults who participate in our nutrition programs have many of the characteristics that make them nursing home-eligible. In federal fiscal year 2019, 172 of the 4,801 home-delivered meal clients scored with 3+ ADL (Activities of Daily Living) limitations AND were Medicaid eligible. This is a conservative estimate of the nursing home-eligible clients receiving home delivered meals. According to the 2019 Genworth Financial cost of care survey, the average annual cost in a North Dakota nursing home is $132,324. **This means the Medicaid cost to the state for nursing home care for these 172 people would have been over $22.76 million in 2019 alone.**

Congregate & Home Delivered Meals Funding is Lagging Behind Ever-increasing Costs and the Long-term Aging of the Population

In federal fiscal year 2019, the average full cost to provide a senior meal was $11.02. Below is a chart identifying where the money came from in FFY 2019 for these senior meals.

IMPORTANT NOTE: The Federal OAA and State monies are the funds that reimburse agencies the unit rate for the meal.* ***These two categories sum to only $4.54 a meal and not the unit rate of $4.60 per meal because there was not enough funding for all of the meals to be reimbursed* *at the unit rate in 2019. If 100% of the meals were reimbursed at the unit rate, these two figures would add up to $4.60.*

The average cost of a senior meal continues to increase. While the state has provided additional funding in past sessions, it has not been enough to keep up with inflation. In federal fiscal year 2019, a total of 1,087,541 meals (546,066 congregate and 541,475 home-delivered meals) were provided across the state.

COVID-19 Response

Mid-March 2020, the COVID-19 pandemic shut down ALL congregate meal sites in North Dakota, per ND Aging Services mandate. Providers were deemed "essential" and stepped up to provide grab-n-go meals, take-out meals, and drive-thru meals, as well as adding many people to the Home Delivered Meals programs. Meals during the COVID-19 pandemic have increased over 40% over pre-pandemic times in some areas. While federal COVID-19 stimulus funds were allocated to help pay for these meals, the funding did not cover the full cost of the meal and will be spent out by 12/31/2020. Until there is an effective vaccine and all have been vaccinated, many of the state's older adults will continue to utilize these safe methods of getting food. **The average cost of a senior meal continues to increase. 2020 has seen food shortages, increased costs for both food and supplies, and the need for Personal Protective Equipment for staff and meal volunteers. All of these things have caused a spike in meal costs across the state; however these costs are not reflected in the graphs, which only show data through June 30, 2019.**

The basic unit rate of $4.60/meal has not changed since 2015. We are asking to be included with other Department of Human Services programs, which receive annual cost of living increases. Additionally, agencies are only allocated federal and state funding for a portion of the meals they provide. NDSSP is asking to be treated the same as other Department of Human Services providers. We request that we be paid a basic unit rate, with annual cost of living increases, for ALL of the Title III meals provided across the state - not just a portion of them.

Meal providers need to be able to depend on stable, basic rate funding for food, supply, and staffing costs. We try to utilize volunteers as best as we can for our meal programs, but we still have staffing costs. As our senior population continues to grow, we need to work collaboratively in a proactive way so essential services, such as senior meals, will not suffer as the state budget fluctuates. **These meals help seniors remain in their homes and out of costly nursing homes.**

Take action to save Medicaid dollars and support an increased basic unit rate for ALL Title III senior meals. Thank you!

Written by Colette Iseminger, MS, RD, LRD of the Grand Forks Senior Center for North Dakota Senior Service Providers, 620 4th Ave South, Grand Forks, ND 58201 c/o Brian Barrett, APT Solutions brian@aptnd.com Cell: 701-471-5104

HB 1012

House Judiciary Committee

Testimony of Christine Webster, Junior Undergraduate Student, Social Work, University of Mary Social Work program in support

January 25, 2021

Mr. Chairman and Members of the Committee:

My name is Christine Webster, I am a student at the University of Mary in Bismarck, North Dakota and I am testifying in support of House Bill 1012. My family have been the caregivers in the last 8 months for my grandmother, Barbara, who is living with dementia. She is a dear soul who is both spunky and cute. Even when she is in a bad mood you can't help but giggle. She is about 5 foot 5 inches, 85 years old and still walking outside to feed our goats in the morning. Our family has definitely experienced the highs and lows of caring for a person living with dementia. Dementia has always seemed like a distant issue to me—like a disease that only happened to people once in a blue moon. Unfortunately, it's more common than I thought. I started working as a caregiver at an assisted living facility where several of the residents were suffering from dementia. It was difficult for me to understand at first, but then I began to sympathize with their situation and I enjoyed working with those particular residents.

My family is caring for my grandmother in a beautiful way, but there are hard times when I have encouraged my mother to hire a direct care service provider to come a few times a week. The provider would maybe make breakfast for my grandma and do activities with her so that not all of the pressure would be on my mother and two highschool brothers. It is difficult for my mom to finish raising kids while also caring for her mother in this way. Among Alzheimer's and

dementia caregivers in North Dakota, *more than half* provide care to their parent or their parent-in-law. My mom's experience as a caregiver is shared with many other families. There are, of course, online groups and activities for elderly with dementia through the Alzheimer's Association, but my grandmother has a hard time understanding technology and doing activities over a computer would be too confusing for her. I think it is really important that we keep funds enabling caregivers to provide care at home, including the services that the Alzheimer's Association is providing through the Dementia Care Services Program. They are experts that meet with families to help guide and support them through this journey, educate them about the type of dementia they are dealing with and help connect them with available resources.

Thank you for your time and attention, I would be happy to answer any questions that you may have at this time.

North Dakota Dementia Care Services Program

Our state's residents affected by Alzheimer's and other dementia can receive support through the North Dakota Dementia Care Services Program (DCSP), a contract program through the Department of Human Services, Aging Services Division. For many families, the DCSP services are a lifeline when they need it most.

Since 2015, Lisa Millsap of Minot has been living with Alzheimer's disease. Her husband, Mel, has been caring for her in their home. Before the pandemic, Lisa was able to go to adult day care while Mel worked. Now, Mel is a 24/7 caregiver. Lisa and Mel have benefited from the support of the Alzheimer's Association through the DCSP, including care consultations with an on-staff dementia care expert. "Lisa was not properly diagnosed when she first developed early-onset," Mel says. "I'm grateful for the programs and support Lisa and I have received from the Alzheimer's Association and their staff through the state-funded Dementia Care Services Program.

Mel is one of the estimated 30,000 unpaid Alzheimer's caregivers in North Dakota. He wants people to understand that his wife Lisa "is still Lisa."

North Dakota Dementia Care Services Program

The Alzheimer's Association has served North Dakota residents through the Dementia Care Services Program (DCSP) since 2010 to improve disease management and increase family support to people living with dementia and their caregivers. Services include:

Care Consultation

Individuals with memory loss, family members, or concerned professionals meet with Alzheimer's Association Care Consultants. Consultants provide a customized road map including information about the diseases, care plans, resources for housing, financial and legal planning, referrals to community resources and support for caregivers. Meetings generally take place via phone, at the individual's home or at their preferred location.

Physician Outreach

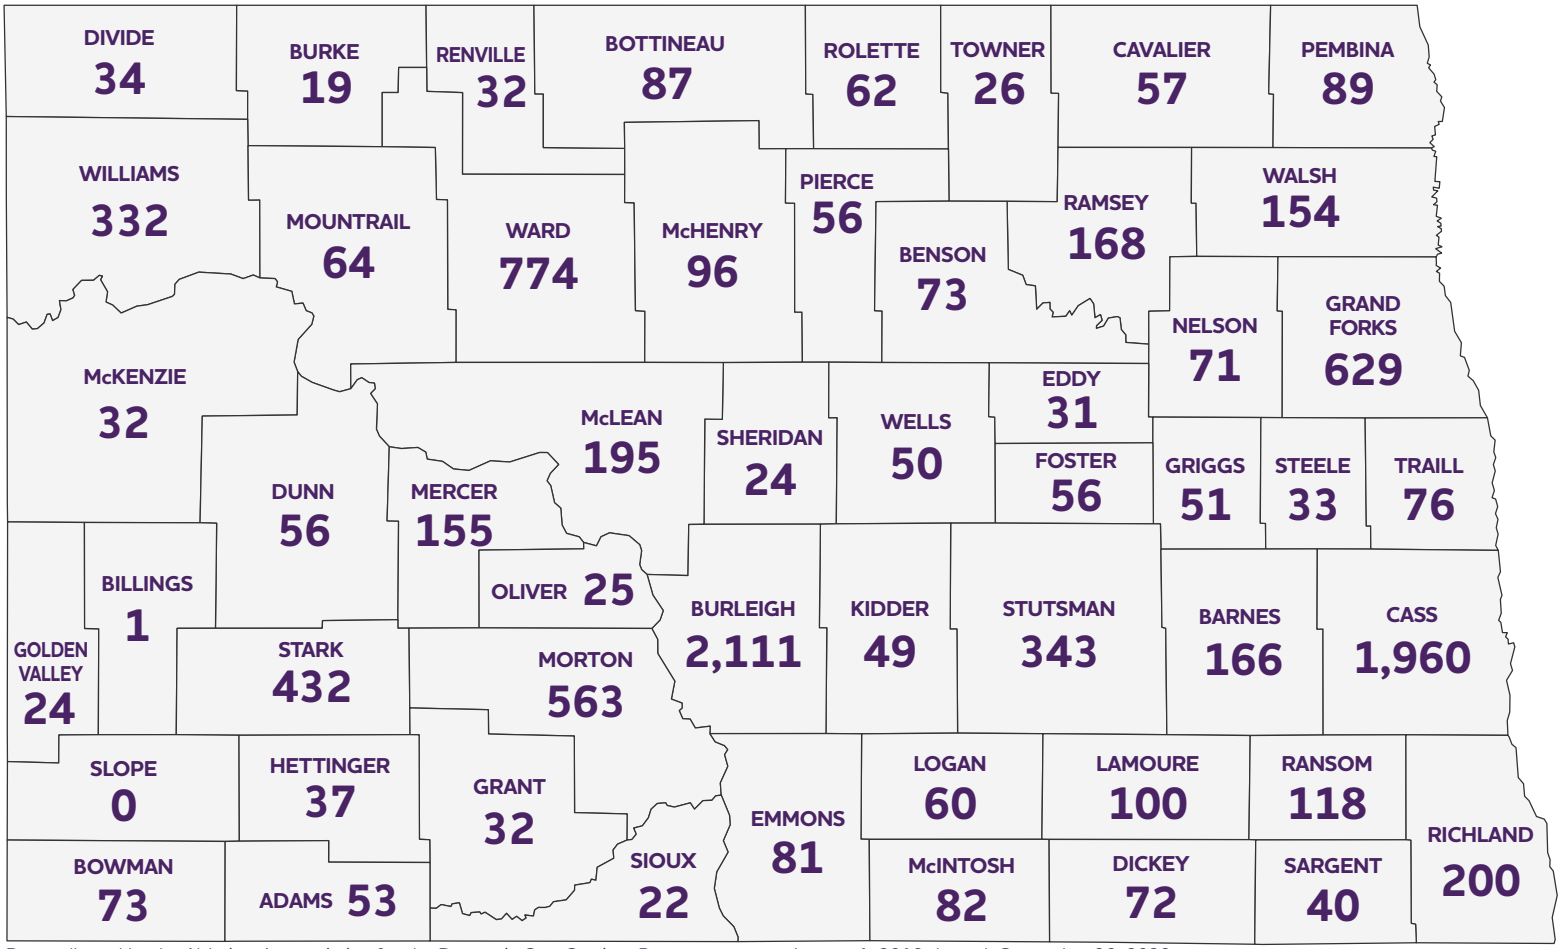
Health care setting outreach informs medical staff in clinics, hospitals and public health agencies about the importance of Alzheimer's early detection and diagnosis, as well as how to make referrals for family education and support.

Education - General Public & Professional Development

Community outreach offers education on dementia-related topics, such as understanding memory loss, brain health, partnering with one's doctor, and understanding communication. Classes are available for the general public, professionals, care partners, medical professionals, and law enforcement.

COVID-19 Update

Fortunately, COVID-19 has not disrupted the services provided by the DCSP. Without any delay and with the support of staff across the country, the Association has found innovative and creative ways to continue to reach constituents virtually. Depending on the client's preference, care consultations have been conducted via video conference or phone.



We have seen an increase in interest for professional dementia training, both from organizations as well as individuals. Our North Dakota long-term care and community-based providers that previously have not participated are now joining. Also, individual direct care workers, who previously would travel to receive training are now able to participate from their workplace or home. Although we still believe in-person training is the most effective way to improve quality care, interactive training from virtual locations has proven useful during the pandemic.

alzheimer's association®

North Dakota Dementia Care Services Program

The Alzheimer's Association has supported the families of 3,328 people living with dementia, including providing 11,896 care consultations for 6,898 caregivers.

Individuals Served by County[1] January 1, 2010 - September 30, 2020

Data collected by the Alzheimer's association for the Dementia Care Services Program contract January 1, 2010 through September 30, 2020.

We have also educated **44,018** people across the state, to increase awareness of community resources, to understand the disease process, and to improve the quality of care of people living with dementia in North Dakota.

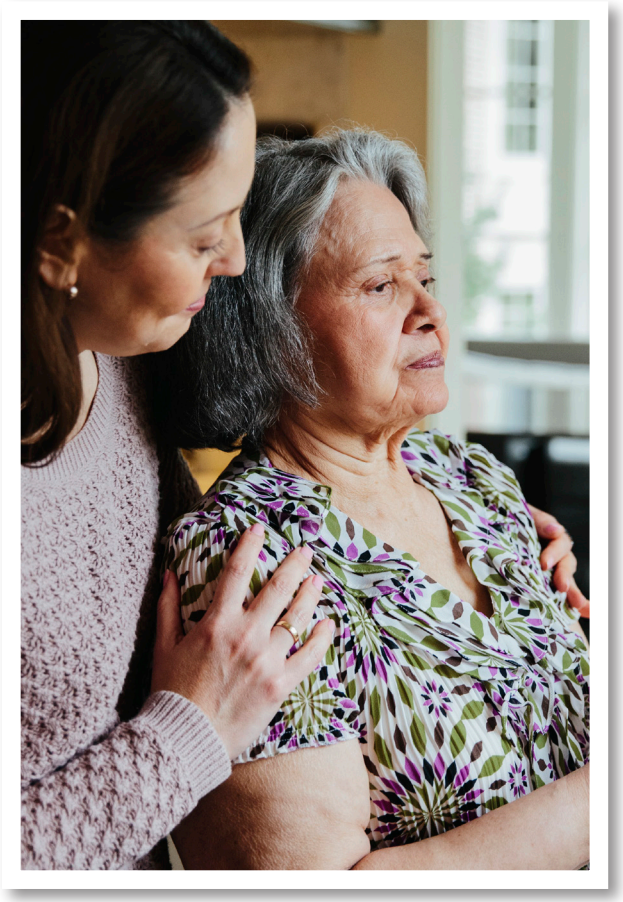
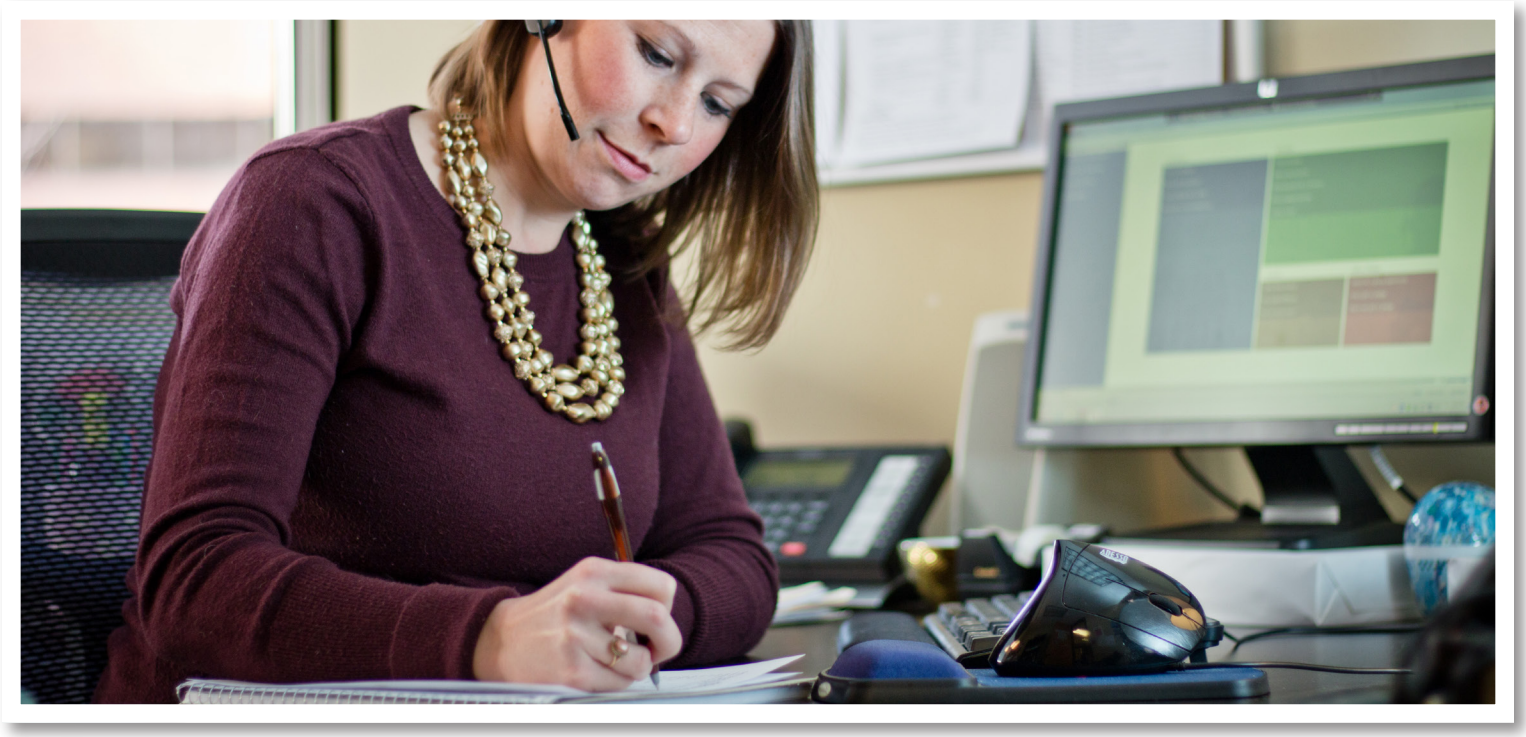
alzheimer's association®



North Dakota Dementia Care Services Program

What is the value of the Dementia Care Services Program?

Recent research has demonstrated that two types of programs have potential for reducing avoidable health care and premature nursing home placement. One is the DCSP's caregiver support programs, and the other focuses on the care delivery team. Studies indicate that resources assisting caregivers have promise for reducing unnecessary emergency department visits and hospitalizations, and reducing transitions to residential care for individuals with Alzheimer's disease and other dementias.



An evaluation from the Center for Rural Health at the University of North Dakota School of Medicine and Health Sciences found:

- Over a 42-month program period, the legislature appropriated an investment of $2.2 million for the contract and has estimated results of long-term care cost saving of $39.2 million, such as those incurred through hospital or emergency related services and delays in placing a person with dementia in long-term care facilities.
- Caregivers who were more engaged in DCSP activities had greater hospital and rural ambulance cost savings compared to caregivers who were not.
- Caregivers who participated were more likely to complete important dementia care-related tasks like establishing a power of attorney and instituting health care directives.
- Caregivers who received DCSP services were twice as likely to either delay nursing home placement or decrease their likelihood of placement. The total cost avoided was $3,007,147 (based on 46 people who indicated an increase in the amount of time to place a person with the disease in an institution).

Additional Services Provided Outside of the North Dakota Care Services Program

24/7 Helpline (800.272.3900)

Staffed in 200 languages, this resource serves people with memory loss, their caregivers, healthcare professionals and the public by providing information and referrals to local community programs and services; dementia-related education; crisis assistance; and emotional support.

Support Groups

More than thirty support groups are held each month in various North Dakota locations and are led by trained volunteer facilitators to provide support, assistance, and encouragement to individuals and their care partners impacted by dementia.

Testimony
House Bill 1012 – Nikki Wegner, Alzheimer's Association, ND/MN Chapter
Senate Appropriations Committee
Senator Ray Holmberg, Chairman
March 11, 2021

Chairman Holmberg and members of the committee, my name is Nikki Wegner and I am the Western North Dakota Program Manager for the Alzheimer's Association. I am one of six staff who provide programs and supports to North Dakota residents impacted by Alzheimer's and other dementia.

Thank you for the opportunity to speak with you today on House Bill 1012.

We appreciate the continued funding included in this bill for the Dementia Care Services Program (DCSP), however we are opposed to the cut of $168,000 that was passed by the House. In fact, we are asking the committee to consider an increase of $132,000. I will explain why we believe this funding increase is necessary to meet the growing needs of North Dakota residents.

This longstanding partnership between the State and the Alzheimer's Association has provided a life-line for thousands of North Dakota families when they need it most, when they are faced with a dementia diagnosis and growing care needs for their family member. This program has also provided dementia education for tens of thousands of community members and professionals across the state.

I encourage you to read the written testimony from Denise Fettig-Loftesnes. Her family was shocked by back-to-back dementia diagnoses of her father and mother. Denise and her siblings have received critical assistance through our program. And you will hear from Amber Moen today as well, who also received support that allowed her and a network of caregivers to provide care for her mother at home for years before making the hard decision to place her mother in a long term care facility.

With the recent Olmstead Settlement Agreement, we understand that the legislature and the administration are looking carefully at how North Dakota can transform its long-term care system, so that people can remain at home with access to the care that they need. The DCSP supports and encourages access to available home and community-based services.

The UND Center for Rural Health studied the first few years of the DCSP at the request of the legislature. **Over a 42-month period, with an investment of $2 million, the state saved an**

estimated $39 million in long-term care costs from reduced hospital and emergency related services and *delays in placing a person with dementia in long-term care facilities*.[1] You can see more details on that study in the document submitted with my written testimony. This document also includes a full overview of the DCSP, has a more in-depth explanation of our services, the total numbers of people-served, as well as a map of North Dakota showing our service numbers by county.

The goals of the DCSP are 1) to improve care, quality of life, and health outcomes, and 2) to reduce total cost of care associated with the disease for individuals, families and ultimately the state budget.

In the current contract for the DCSP[2], the Alzheimer's Association has:

- Delivered 1,744 Care Consultations – for 1,229 caregivers on behalf of 640 people living with dementia.
- Educated 2,054 community members across the state.
- Trained 135 law enforcement and 1,198 health care professionals.
- Referred 120 people to Family Care Services Program.

While professional training across the state is a valuable asset, it does not represent the largest impact of this program.

The greatest value of the DCSP remains supporting people directly impacted by dementia. We educate, support and provide resources to individuals living with dementia, their caregivers and families. The innovative services provided promote early detection and diagnosis, care coordination, effective caregiver training, support groups, and planning for the future.

Dementia that is unmanaged negatively impacts the individual diagnosed, their caregivers and ultimately creates a costly toll for communities and on the economy. Consider a few facts from our research:

State Costs

North Dakota's 2020 Medicaid costs for people living with dementia were $190 million – and that cost is expected to rise 13.2% by 2025.[3]

---

[1] Center for Rural Health Assessment of North Dakota Dementia Care Services Program July 2013, p. 6

[2] Data collected by the Alzheimer's Association for the Dementia Care Services Program contract July 1, 2019 through November 30, 2020

[3] 2020 North Dakota Alzheimer's Statistics

The average annual per person Medicaid cost for someone without dementia is $374, versus $8,779 for someone with dementia – that means that a person with dementia costs Medicaid ***23 times more*** than a person without dementia.[4]

Family Costs

Out of pocket costs for an individual with dementia are 3.5 times greater than for those without. [5]

We estimate that the value of care provided by North Dakota's 30,000 unpaid dementia caregivers is $454 million.[6]

Why are these costs so high?

1. Dementia complicates the management of other conditions,
2. People with dementia have more hospitalizations, in fact, twice as many as other older adults,[7]
3. And people with dementia have more emergency room visits.

The DCSP can help reduce these high costs. For example, studies have consistently shown that active management of dementia can improve the quality of life of affected individuals and their caregivers.[8] And that is where the Dementia Care Services Program enters the equation for North Dakota.

Growing Need

The need for care and support across North Dakota is growing. One in 10 people age 65 and older are living with Alzheimer's.[9] In 2017, we estimated there were 14,000 North Dakotans living with Alzheimer's. Today, we estimate that number to be 15,000. We expect those numbers to rise to 16,000 by 2025, an increase of 14% in just 8 years.[10]

Additionally, the Department of Human Services has indicated a need for a self-paced, online professional dementia education program to train Qualified Service Providers (QSPs). We support this because we know that staff training is an important determinant of quality

[8] Alzheimer's Association 2020 Alzheimer's Disease Facts and Figures, p. 12
[9] *ibid*, p. 18
[10] 2020 North Dakota Alzheimer's Statistics

dementia care across the long-term care spectrum.[11] The Alzheimer's Association has developed a program to deliver evidence-based online dementia training based on our nationally recognized Dementia Care Practice Recommendations.

Request for Funding Increase

To respond to this growing need, we are seeking an 11% increase in funding from $1,200,000 to $1,332,000. Please note that this program has never received a funding increase since it began in 2010.

Without these dollars, we will be unable to meet the increased demand for care consultation, professional training and community education, leaving residents with less access to these vital services that help to keep those living with dementia at home in the community.

We look forward to the continued partnership with the State to better support North Dakota residents and reduce long-term costs to the State. With the State's continued support, the Alzheimer's Association aims to ensure that everyone in North Dakota has access to the services proven to improve disease management and increase family support. We ask this committee to support the funding necessary to continue these vital services and expand our ability to serve the growing need.

Thank you for your consideration. I would be happy to answer any questions you may have.

Testimony
House Bill 1012 – Denise Fettig-Loftesnes, Bismarck, North Dakota
Senate Appropriations Committee
Senator Ray Holmberg, Chairman
March 11, 2021

Mister Chair and members of the committee, my name is Denise Fettig-Loftesnes and I am from Bismarck, North Dakota. Thank you for this opportunity to testify. I am a caregiver for my parents, who were both recently diagnosed with Alzheimer's. I have a sister who also lives in Bismarck and serves as a caregiver, and we have seven other siblings living around the country who do everything they can to help. Here is a picture of my mom and dad, Agnes and Matt, and all of their children and grandchildren.

Three months ago, we learned that our father has dementia, and soon after that we received a similar diagnosis for our mother. We were devastated. With all of our life experience, me and my eight siblings knew almost nothing about Alzheimer's. Our parents live together independently in a wonderful community here in Bismarck, Marillac Manor, and we were desperate to ensure that they could stay there and live safely for as long as possible with their many friends. But what could we do? How do we help our parents? Who do we turn to?

Beginning with helpful guidance from staff at Marillac, and continuing through a number of phone calls, we were directed to Nikki Wegner at the Western North Dakota Alzheimer's Association. That is when our lives, and the lives of our parents, changed forever—and for the better. Nikki immediately put us in touch with health care providers, including an occupational therapist, Megan Dooley of Bismarck, who transformed our parents' apartment into a safe and comfortable home. Nikki also connected us with local experts who recommended and provided important products—such as door alarms and identification bracelets—to enhance our parents' safety.

Most importantly, though, Nikki became a guiding light for our family, holding multiple zoom meetings to answer questions, providing detailed emails, and just generally providing

invaluable counsel. From our first meeting with Nikki we knew that there was hope for our parents. She not only provided the information that we needed to address our parents' needs, but she delivered it in a helpful and caring way that put all of us at ease.

Time and time again my siblings—who live in states from coast to coast—have marveled at the assistance that North Dakota's Dementia Care Services Program provides its elderly citizens. We feel so lucky and so blessed that our parents are growing old in this great state. And we are not alone. My parents' generation—that Great Generation to whom we all owe so much—is getting older, and there are families from Williston to Wahpeton, and from Bowman to Bathgate, that need your help.

My parents are proud, but they want you to know their story. They were both raised on North Dakota farms and educated in rural schoolhouses and worked hard—together—to raise a family and to give their children a chance to live an even better life than they had. They never asked for anything, from anyone. But they need your help now. After giving so much, they—and so many other elderly North Dakotans—need the crucial support that the DCSP provides.

And that is why I am here today—to ask you to please support the services provided by the North Dakota Alzheimer's Association and to increase funding for the Dementia Care Services Program to $1,332,000. Alzheimer's is a cruel fate, and families are desperate for help. Your support of this bill is a small return for all that my parents, and your parents, and all of our elderly friends and neighbors, have done for North Dakota. Please vote Yes.

Thank you. I would be happy to answer any questions.

Denise Fettig-Loftesnes

Testimony
House Bill 1012 – Funding DD Recreational & Social Centers
Senate Appropriations
Senator Ray Holmberg, Chairman
March 11, 2021

Chairman Holmberg and members of the Senate Appropriations Committee, for the record, my name is Tom Newberger. I am the Chief Executive Officer for Red River Human Services Foundation. We provide services to people with Intellectual and Developmental Disabilities (IDD) in Fargo, West Fargo and Wahpeton, North Dakota. I am here today to ask you to restore the $150,000 that was removed from the Governor's budget in the "Budget Account Code 712000" for the 2021-2023 budget. These funds are for Recreational and Social activities for people with IDD in Fargo, Wahpeton and Grand Forks.

I will now explain why these funds are so critical and needed. First, our agency is a licensed and accredited provider for services. One of our programs is the Activity Center that has existed since 1972 and has 425 members. During this time period, the Activity Center has provided Recreational and Social services to people not only from our agency, but from the community and other IDD service providers. We provide services in the afternoons, evenings and on week-ends so people with disabilities can live better lives. Examples of what our Activity Center offers for people with disabilities is hosting dances, playing pool, darts and air hockey, ceramics, safety training classes, such as how to stay safe while walking or riding bikes, providing food for those who cannot afford it, going to people's homes or apartments if they are sick and buying them medications if they cannot afford it. We also support camping during the summer which they really enjoy. These are just a few examples of what we do to give people with disabilities better lives.

A question I received during the 2017-2019 legislative session from the Appropriations Committee was "Do other licensed residential providers do these services too?" This was a great question and really helped all the legislators at that hearing understand our critical services. My response to the question was yes, the residential providers do their best to give people in their programs options, but it is generally very difficult to do based on the limited number of FTEs they

have. For example, if everyone on this committee lived in the same group home and I am the only staff working with you in the late afternoon and evening, and one of you wants to stay home and watch television, another one of you wants to go out and get an ice cream cone, another one of you wants to go the park and another one of you wants to go bowling while someone else wants to play pool and the last one of you wants to do ceramics. The question is how can I as your only staff keep you all happy when everyone wants to do something different? The way to keep you all happy is to bring you to the Activity Center which our non-profit operates and our staff will meet your dreams and desires. The Activity Center promotes social connections and helps prevent mental health issues and reduces anxiety and possible physical aggression. So briefly, this is what our services do.

From a financial perspective, our annual budget for the Activity Center is $221,000 and the State has supported our services with $37,500 per year or seventeen percent (17%) of our budget. From an Activity Center member's perspective, the $37,500 from the State equates to just below twenty-five cents per member per day. This is a very low cost. We previously implemented membership dues of $8.00 per month and then reduced it to $6.00 per month to make it more affordable. Most of the members could not afford it, so now have no membership dues.

I kindly and strongly recommend that this committee re-instate the funding for the two Recreational and Social Centers in our State and consider increasing it to fifty-cents per day per member or a total of $300,000 per Biennium as a good portion of our other funding has been lost.

Thank you and I will be happy to answer any questions you may have.

Testimony
House Bill 1012
Development Homes, Inc. by Scott Anderson
Senate Appropriations – Hon. Ray Holmberg, Chairman
March 11, 2021

Good afternoon Chairman Holmberg and other distinguished Committee members;

My name is Scott Anderson, Program Service Director for Development Homes, Inc. (DHI) from Grand Forks, ND. I am honored and grateful to have his opportunity to speak with you on behalf of DHI, other ND Community Providers, and all the people we serve and support. The focus of my testimony will be to speak to the importance of the quality support and services we as Community Providers do each and every day, seven days a week and 365 days a year. We are fortunate to have the opportunity to serve and support others in the great state of ND.

Development Homes, Inc.(DHI) was established in 1974 supporting children and 46 years later we continue to serve children, along with adults and families as well. Our mission: "Development Homes, Inc. is committed to the provision of quality community based support services to person with disabilities, enabling them to maximize their individual potential, and fulfill their personal dreams.". DHI provides a variety of services to about 170 unique individuals and we employ about 500 staff. DHI is currently the 8th largest employer in our Grand Forks community. The people we support, our organization and our staff, have a significant financial impact on our community. With the continued support from this legislature, DHI and every other provider will continue to provide opportunities for people to have the quality lives that we all aspire to have.

In March of 2020, the impact COVID-19 In ND reached a level that impacted each and every community across the state. Our schools were closed to all in-school education and the all too familiar term of "distance learning" was established and implemented. For all parents and those providers who support children, of which DHI is one, the impact was immediate and without precedent. The announcement was made on March 15, 2020 that kids would not be going to their school building for education starting the very next day, March 16, 2020. The determination and dedication of parents and providers to forge ahead with providing immediate educational support to our children was remarkable. At DHI, we were supporting 12 kids in placements living outside the family home. Most of the kids we support in that environment are in need of significant staff support, with most receiving a staff designated to support each child individually. The needed support, just within DHI, would be 10-12 staff working an additional eight(8) hours per day, five(5) days per week for the next 11 weeks. This totals approximately 4,000 to 5000 hours of unscheduled staffing time and the task of providing that support started the very next day. Several other providers across the state were also thrust into "stepping up" immediately to support many children during daytime, school hours. With the very common and prevalent "can-do" attitude, providers across the state were able to meet this challenge and provide the needed support for our kids. This event truly exemplifies the caring and quality of the organizations ND has providing services to people with disabilities. And one more lingering issue, not one provider has been given a dime of reimbursement for providing this support to our kids over these 11 weeks from March 16, 2020 through May 28, 2020. For providers in the state of ND, it is about the quality of services and being there

when we are needed, no matter the circumstances. We believe that efficiency is important but quality is essential. We need to be good stewards of the resources we have, but above all else, when needed, we need to be prepared to the best we can be, and deliver each and every time. But now that we have spent our hard won reserves to provide these services, our providers are less able to face the next crisis.

In November 2019, DHI opened a new Children's ICF-IDD in Grand Forks. This was a special project in collaboration with the DD Division, Life Skills and Training Center (LSTC) and DHI for the purpose of residential services for four children that were currently at LSTC. This ICF-IDD (5509) became fully operational on 2/24/2020 when the fourth of four boys moved in. This endeavor was certainly going to be challenging enough without COVID-19 but COVID-19 and school closings happened just three weeks later. Each of the four boys DHI was serving at 5509 had behavioral and mental health concerns. As was stated earlier, DHI has been around 46 years and has always served children. The difficulties we encountered and still encounter today are the lack of community resources to help support people, especially children, with higher behavioral needs when they present these difficulties. Sue Forester and the LSTC staff have been excellent to work with and been extremely supportive. The most significant issue with LSTC is logistics. Grafton is an hour away from Grand Forks. When behavioral issues arise, they can escalate very quickly, and any support LSTC can offer will not be timely enough to assist with resolving the event.

DHI has its' own "crisis team", made up of mostly administrative professionals with years of experience and all are Therapeutic Response trainers. DHI has this team so that we can respond with in-person support quickly during our most difficult behavioral events. Even with this timely support, sometimes events reach the intensity that mental health professionals are needed to assess the person having difficulty, for safety for themselves and others. When these calls are made, the first responders are the Grand Forks Police officers. Most times, the police officers arrive and just their presence will de-escalate the event, but not always. We have had events involving both children and adults we serve that have involved the need for physical, chemical, as well as mechanical(handcuffs) restraints with police officers and our staff intervening to try and keep everyone safe. In cases such as these, the paramedics arrive and we ask that the person be transported to the hospital for a psychiatric evaluation. The Grand Forks Police Department has been very professional, responsive and supportive during each of these intense events. The police are sometimes unsure of what their role is at times, as we are not looking for criminal charges against those struggling. Because of this, they can be frustrated with us and ask why did we call them. To be clear, when we make a call for emergency services, we are really looking for a safe transport to the hospital so that person struggling can be assessed.

Once at the hospital, it may take 30 minutes to several hours for psychiatric services to get involved and the assessment completed. Often there is lab work to insure medication levels are within therapeutic range. To be clear, the individuals having difficult have most times presented physical aggression toward others, including staff, others we support and even police officers. Property damage such as making holes in walls, throwing objects, slamming doors with enough force to dislodge the door or the door frame, and breaking windows are common during these intense events. The people are also most times, self-injurious and an elopement risks as well. The hospital in Grand Forks has been very unwilling to admit people presenting these types of difficulties. In my conversations with the on-call psychiatrists assessing, especially when assessing children, they will not admit. I have been told that "We(the

hospital) cannot admit this person as we are not equipped to handle them as they are just too violent." In an ironic twist, soon after they say that, they discharge the person and say that they are calm enough to return to their home. This is not just a DHI or Grand Forks issue. Providers across our state can tell you very similar stories about the frustration of taking on people with significant challenges, without adequate community support from others to assist the person in being successful in their community. As you are all well aware the behavioral and mental health support systems in ND, as well as in our country, are overwhelmed and under-staffed. There are more people in need of this type of support than there is support available. If providers are going to be successful with reducing the number of people at LSTC. We are going to need to be fully-funded to provide the support needed, creative with our approaches (like our own response teams), collaborative with LSTC and our home regions, and have adequate and responsive community support and services that will be of assistance when that assistance is needed most. The net result of not having the supports and resources needed, is a failed placement. When we are working to help those who pose the greatest need, efficient is important but quality is essential. Success means allowing people to thrive in an environment where we learn and grow every day. When people are able to maximize their full potential and live the life they dream of, that is definitely success!

I want to thank each of you for your time and attention today. It has been an honor and privilege to have this opportunity to share on behalf of Development Homes, Inc. as well as the many wonderful and dedicated providers in the great state of North Dakota.

Respectfully,

Scott Anderson, Program Services Director
Development Homes, Inc.

Testimony
House Bill 1012 – Department of Human Services Budget
Senate Appropriations Committee
Senator Ray Holmberg, Chairman

March 11, 2021

Chairman Holmberg and Members of the Senate Appropriations – Committee:

My name is Lorena Poppe. I am the owner and executive director of Poppy's Promise, a Bismarck-based provider of In-Home Support services through the Developmental Disabilities traditional Home and Community Based Waiver. The focus of my testimony today is the impact the Department of Human Services budget, particularly that of the Developmental Disabilities Division, will have on new and small providers of services.

I started Poppy's Promise in the Fall of 2017 in response to families of kids with disabilities expressing there was a shortage of providers to be available to meet the needs of their children and families. My goals were to 1) be another option as families seek out services that will best meet the needs of their children, and 2) meet kids and families where they are at on their unique journeys to full inclusion and participation in home and community life. We believe strongly in designing supports that will help to keep kids in their family homes and communities and minimize the need for institutionalization in a place that is unfamiliar to the child. In our short existence, we have seen the difference a small provider organization can make and are proud that we have been part of keeping families together in their home communities.

I am the sole owner of Poppy's Promise. I started my business by getting a Small Business Administration loan and taking a leap of faith. I knew there was a need, but understand now more than ever, 3 ½ years later, how critical it is that DD providers be supported to do the important work of helping people with disabilities achieve maximum health, happiness and freedom of choice across their lifetimes. At Poppy's Promise, we operate on a month-to-month basis without having a large financial reserve to fall back on. Since opening the doors at Poppy's Promise, I have been excited to see other new provider organizations popping up across the state. This is an exciting thing for North Dakota and I believe there is definitely a place for new organizations that can work together with longstanding providers to assure gaps in services are filled and people can receive supports and services in the least restrictive setting.

I am concerned that new providers and those that are smaller and more specialized are not being fully considered by the Developmental Disabilities Division. Specifically regarding In-Home Supports, that program had the largest drop in utilization over the course of the Covid-19 pandemic (27%). And yet, In-Home Supports was left out of the Appendix K option to receive retainer payments to help providers stay in business during the pandemic. For providers of services that were eligible to receive retainer payments, those payments were an important part of keeping the doors of those businesses open. With the current extension of the Appendix K, there is an opportunity for the Department to extend the retainer payment option to those providers most in need and help to assure the services families rely upon don't disappear.

Another area of concern for all providers of DD services, but especially small providers, is the intention of the Department of Human Services to require providers to absorb the cost of accreditation necessary to maintain DD licensure. Because DHS contracts with one organization for accreditation, the Council on Quality and Leadership (CQL), providers would be forced to pay several thousands of dollars toward the accreditation process. This includes travel and lodging expenses of CQL reviewers coming to North Dakota from across the country. There is no reimbursement for accreditation built into the DHS budget. Poppy's Promise does not have the ability to cover that cost. I believe strongly in review processes being in place to assure quality of services, but also know the reality of trying to maintain a business that does not have the ability to set aside thousands of dollars for unreimbursed licensure requirements.

I come before you today to ask that you consider the current state of services for people with disabilities during an ongoing pandemic, the financial vulnerability of new and small providers, and the addition or preservation of funds to assure all providers who are relied on heavily by the citizens of North Dakota are able to survive and stand strong in continuing to provide supports and services.

Thank you for your time today, and I would be happy to answer any questions you may have.

Testimony on HB 1012
Jon Larson, Enable, Inc.
Senate Appropriations Committee
Hon. Ray Holmberg, Chairman
January 25, 2021

Chairman Holmberg and members of the committee, my name is Jon Larson and I am the executive director of Enable Inc., a licensed developmental disabilities provider here in Bismarck. I also currently serve as the president of our provider association, NDACP.org.

On April 01, 2018 North Dakota implemented a long-awaited new payment system for developmental disability providers. This new payment system was developed by consultants who worked in close consultation with a steering committee that consisted of personnel from the Department of Human Services and DD providers. That steering committee began in the Spring of 2011 and continues to work on issues that arise with this still new system. I have been a member of this steering committee since its implementation.

Although not perfect, the new payment system has done a good job of achieving its objective of fairly allocating resources based on individual needs as measured by a nationally recognized assessment tool and utilizing the existing allocation of resources. This new process involves the use of scores from the Supports Intensity Scale (SIS), a mathematical multiplier to connect the scores to authorized support hours, and a unit rate matrix with standardized rates for defined services, which result in a unique annual Individual Budget Allocation for every client. This new system took years to develop and prior to implementation there were fears expressed by some providers, advocates, and consumers about the viability of continued provision of the same quality services that everyone has come to expect. Upon implementation on April 01, 2018 services continued as expected without drastic alterations to service delivery and providers have adapted to the changes created by the new system. The steering committee continues to meet on a regular basis to address issues that have arisen since the implementation of this new system.

A central component of the new system is the Supports Intensity Scale or SIS. The SIS is a nationally normed tool that is used to identify the unique needs of the individual we support in our programs. North Dakota contracts with an independent organization, The Rushmore Group, to administer these assessments. Each individual supported is to have a new assessment every three years unless there is a significant life changing event that would require a new assessment. The Department hired a consultant in the fall of 2019 who found a trend of rising SIS scores from the assessments that occurred three years previously. A rise in

the SIS score results in a higher payment to the provider. There are many reasons a SIS score would change including a deteriorating health or behavioral condition or an inaccurate score in the initial assessment or subsequent one. The information Optimus used in that conclusion is now nearly one and a half years old. They also noted at the time that they were seeing a leveling off of the increasing scores and it may indicate a stabilization of scores or even a U-shaped curve in the data that would result in a return to scores more closely related to the original.

NDACP has collected data from our members that compares the SIS score resulting from an assessment done in 2020 to the previous score and this data indicates that in aggregate the new scores are slightly lower than the previous scores resulting in lower payments to providers. The executive budget proposes a reduction in rates to residential providers based on the trends they saw prior to 2020. This new payment system is still very new and 2020 interrupted everything making data analysis difficult. The House of Representatives accommodated the position of our association that the rates in this new system not be reduced at this time to allow for the system to have time to stabilize. Adjustments to rates may be necessary but should be done in consultation with the steering committee and should be done in a manner that is cost neutral to the appropriation.

Accreditation by the Council on Quality and Leadership, CQL, has been required for licensure since the days we were operating under a lawsuit. This cost has been paid by the Department either through rate setting and cost settlement prior to the new system or directly after the new payment system. This cost is proposed to go back to providers in the executive budget. CQL accreditation is quite expensive, especially for smaller providers. This was not a cost recognized when developing rates in the new payment system and we feel that this required cost should continue to be paid by the Department.

The last area I want to address is the loss of funding for service under section 11. You have testimony from Brooke Austin, from Community Living Services in Fargo, and two people they serve, that explains it in more detail than I will at this time. Section 11 uses state dollars at a very reasonable cost to provide a much-needed service to people who otherwise fall through the cracks. Providers receive a payment of $7.00 a day for people in this program, far less than it actually costs to provide the service. Without this service, the people in this program will likely struggle and require more urgent services that will cost more and be less appropriate to meet their needs.

In summary, I am requesting that the rates in the new payment system not be reduced as proposed in the executive budget, that accreditation costs continue to be paid by the Department and that section 11 funding be restored. In addition I recommend inflationary increases of 3% and 3% for state fiscal years 2022 and 2023. Thank-you for your consideration and I would be happy to answer any questions you may have.

Jon Larson
Executive Director,
Enable, Inc.

Senate Appropriations

Sixty-seventh Legislative Assembly of North Dakota

House Bill No. 1012

March 11, 2021

Good afternoon, Chairman Holmberg, and Members of Senate Appropriations. I am Pam Mack, Director of Program Services for the Protection & Advocacy Project (P&A).

P&A is an independent state agency. Its mission is to advocate for the human, civil, and legal rights of individuals with disabilities. P&A strives to ensure that every individual with a disability is treated with the same dignity and respect as all other ND citizens.

P&A is here today to support HB 1012 and the funding for services for individuals with developmental disabilities. P&A concurs with the long-range goal of the Department of Human Services to purposefully focus on the need for crisis services at the Life Skills & Transition Center (LSTC). At the same time, DHS is working on transitioning many of the current residents to the community, ultimately operating with a lower census. This is consistent with the Transition to the Community Task Force goals that have been established and the state's requirement to ensure that individuals with disabilities are able to live and work in the least restrictive environment. P&A encourages the Committee to thoroughly examine the transfer of funds

through this process to ensure that adequate funding is provided to community providers in this process.

P&A has been involved in the steering committee to collaboratively implement the reimbursement system for DD providers. The current budget, as presented by the DD Division, includes a decrease in reimbursement rates for providers relative to the array of residential services. P&A recommends that the DD Division further determine whether the recommended residential reimbursement rates in the DD budget are adequate to provide for the level of acuity and support needs of the individuals who are transitioning out of the LSTC. This may require a need to compare the daily rate at the LSTC with current rates within community providers, the outlier process, and perhaps the establishment of tiers of service. For example, the per diem at LSTC is $1,200. The average daily reimbursement for community ICF's/IDD is just over half that amount. We cannot set up the community providers to fail by not giving them sufficient resources to serve the same client. The Committee may also need to examine the intent to create a cost-neutral budget a number of years ago when this process started and whether the level of acuity and whether the needs of the current clients served in the community have changed. The rate adjustments that are proposed as part of the current budget may not be appropriate if the acuity needs are creating increasing costs versus a reimbursement rate that needs to be adjusted.

The current budget proposal eliminates the Section 11 grant funds from the DHS budget. These monies provide program management services, and in some cases limited services, for individuals with developmental disabilities who are not eligible for other DD services. This is concerning as this helps to ensure all individuals with developmental disabilities receive appropriate treatment, services, and habilitation consistent with NDCC 25-01.2-02[1]. P&A does recommend that these funds be reinstated fully in the Department's budget to ensure that we do not have people with developmental disabilities that are falling through the cracks.

P&A is aware that the proposed budget for the DD Division shifts the cost for Accreditation with The Council on Quality Leadership, which is required for all DD providers, to the providers. This is a valuable mechanism to ensure that quality services are provided and is not a duplication of other quality assurance efforts. The cost associated with this may be difficult for providers that are smaller and do not have the array of revenue options to cover this cost with CQL Accreditation.

P&A is also concerned with the intended cuts in funding for early intervention supports through the Experienced Parent and Family Support programs. These early intervention supports provide valuable services to parents and families who are beginning to navigate the complex system within our state. P&A would recommend that the $260,000 be restored to the Department's budget to continue these early intervention services.

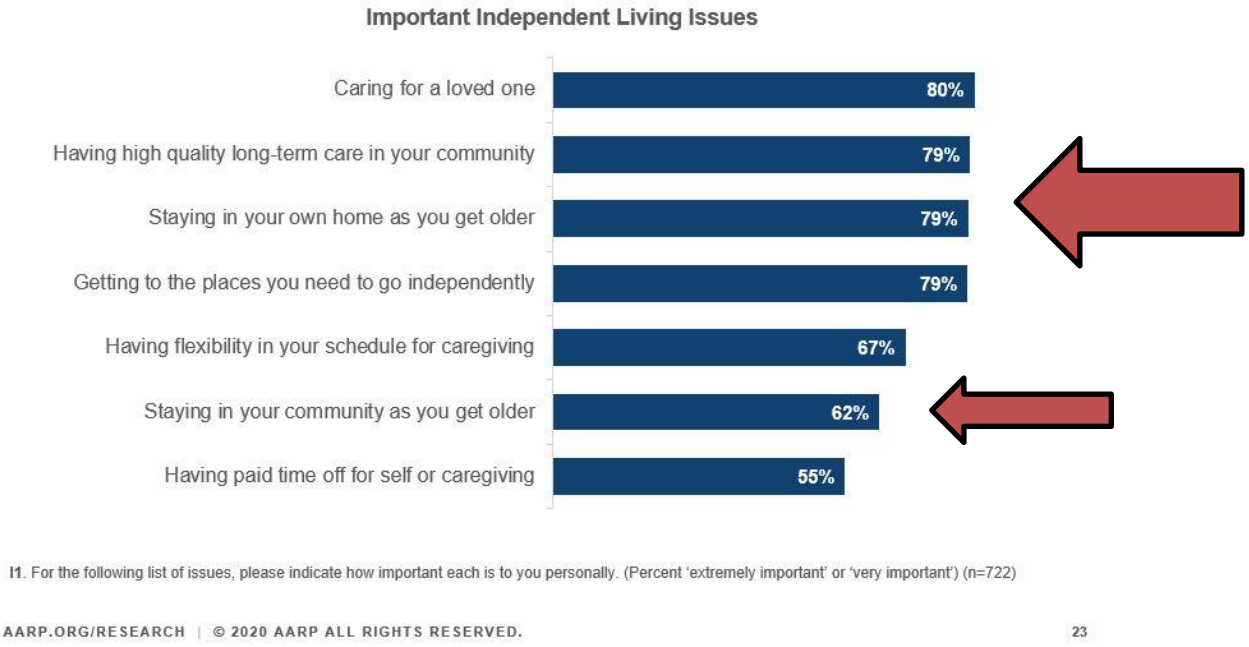
---

[1] **https://www.legis.nd.gov/cencode/t25c01-2.pdf**

Lastly, P&A would encourage the Committee to consider increasing the funding for corporate guardianship for individuals with disabilities. Currently, the contract with Catholic Charities of ND (CCND) provides for valuable services for individuals who do not have other supports available and require a guardian to assist with personal decision making. P&A is concerned about the waiting list for these services and encourages increased funding to CCND to address this need.

Thank you for your consideration. I'm happy to answer questions. You are also welcome to contact me at **pmack@nd.gov** or by phone at (701) 328-3975.

Senate Appropriations Committee
IN SUPPORT – HB 1012 – DHS Budget – Aging Services
March 11, 2021
Josh Askvig, AARP North Dakota
jaskvig@aarp.org
(701) 355-3642

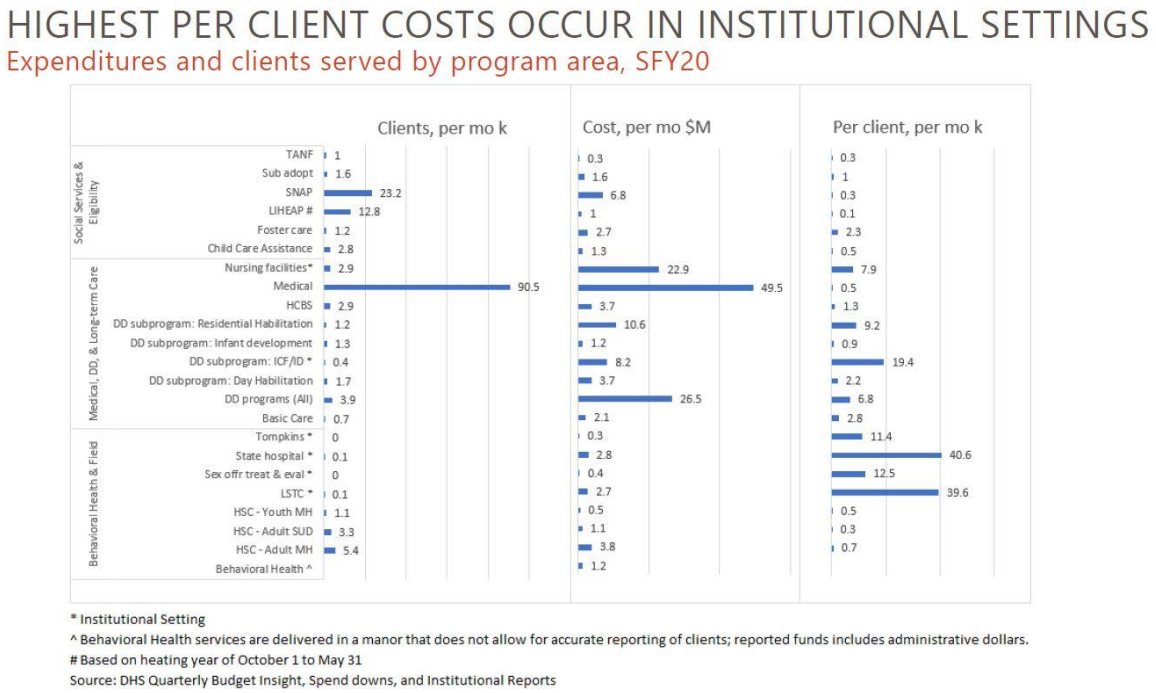


Chairman Holmberg and members of the Senate Appropriations Committee, I am Josh Askvig, State Director at AARP North Dakota.

AARP is a non-profit, non-partisan membership organization with more than 84,000 members in North Dakota. Our mission is to empower people to choose how they live as they age.

Our story began when our founder, Dr. Ethel Percy Andrus discovered a former colleague of hers living in a chicken coop. She had run out of money and couldn't find anywhere to get the help she needed. Dr. Andrus decided she would make it her life's work to ensure older adults were given the opportunity to have dignity and purpose and founded what today is AARP.

We appreciate this committee's work to dig into issue important to older North Dakotans and this need will continue to grow. Today our population age 50+ is almost 256,000 and 50% of those households are age 65 or older. Today in North Dakota over 9 counties have a mean age of over 50 and a number of others are right on their heels.



AARP North Dakota supports the intent that DHS Director Chris Jones stated in his budget overview that the Department's effort is to provide services and care as close to home as possible. Below is a chart from our 2020 North Dakota Vital Voices Survey, a state specific survey of issues that impact North Dakotan's 45+ conducted every three years. In our survey last year, 79% indicated that staying in their own home as they got older, getting to the places they need to go and having access to quality long term care in their community was extremely or very important. Also, 62% said staying in their community as they got older was extremely or very important. It was no surprise to us and I am sure it doesn't surprise you.

I1. For the following list of issues, please indicate how important each is to you personally. (Percent 'extremely important' or 'very important') (n=722)

AARP.ORG/RESEARCH | © 2020 AARP ALL RIGHTS RESERVED.

Knowing this the work to continue to move resources, supports and efforts into delivering services through an HCBS model is commonsense. It also makes dollars and cents. If you look at the chart that was shared during the House overview of HB 1012 it is very clear that serving individuals in home and community based settings is not only preferred it is cost effective. The chart appears to show about 1/7th of the cost ($7.9k per client per month for Nursing facilities vs $1.3k per client per month for HCBS).

* Institutional Setting
^ Behavioral Health services are delivered in a manor that does not allow for accurate reporting of clients; reported funds includes administrative dollars.
# Based on heating year of October 1 to May 31
Source: DHS Quarterly Budget Insight, Spend downs, and Institutional Reports

Additionally, in line with the efforts to intervene early to stave off long term costs, the changes made last session to access the state funded Service Payments for the Elderly and Disabled (SPED), adding Expanded SPED and centralizing ADRL intake are already paying dividends.

Attached you will find the *North Dakota: 2020 Long-Term Services and Supports (LTSS) State Scorecard*. This is the 4th time the Commonwealth Fund, The Scan Foundation and AARP have teamed up to provide a state LTSS assessment with apples to apples comparisons. If you look at the card you will see North Dakota made substantial improvement in 7 of the 21 indicators. And two of those were in the area of Choice of Setting and Provider dimension. In fact, North Dakota was recognized nationally during the roll out of the 2020 Scorecard for the work it has done to make improvements.

But let's be clear, while we have done good work, we still have plenty of work to do. Specifically, look at the indicators on the back related to Nursing Home Cost, Medicaid LTSS Balance: Spending and Medicaid LTSS Balance: Users, and Successful Discharge to Community where we continue to rank low. Investments in HCBS like those in the Aging and Adults Services area including the additional FTE to administer the DOJ settlement, increasing QSP rates, and capacity for awareness and education of HCBS services only aid in moving those measures. Again, for AARP and the thousands of North Dakotans we represent, it's about choice. Older North Dakotans deserve to know they have options for care as they age. Overwhelmingly they prefer to stay in their homes and communities and the budget should continue the state moving in a direction that prioritizes Home and Community Based care.

A couple of other notes related to the Aging and Adults Services portion of the DHS budget. The importance of the Long Term Care Ombudsman should be highlighted. During the pandemic, Karla Backman and her team were a critical component to ensuring that the rights of residents and their families were respected and honored. The Ombudsman program was an often needed referral for our team at AARP as the pandemic unfolded.

Finally, we would be remiss not to mention Senior Nutrition funding. The meals programs funded through the Aging and Adults services budget are a critical life line for older adults. They promote good health and as evidenced during the pandemic a critical component to keeping individuals at home and in their communities. The North Dakota Senior Service Providers put together a document every legislative session about their meals funding. I was reading through the 2021 document and understand that it is estimated that 1 year of meals funding is equal to 5 days in a nursing home. And in too many instances malnourishment leads to hospitalization and increased LTC needs. It should also be noted that meals programs also help to combat isolation and loneliness.

Combine these factors with the idea that it appears many of these senior providers will be losing some additional federal supports they received during the pandemic and knowing they have seen a significant shift in their costs as they have moved to almost exclusively pick up or to go meals, and there is a need for a funding increase. We would encourage you to increase the meals funding to ensure that this critical service can meet the needs.

Again, we appreciate the time to raise issues important to North Dakotans 50+ and would be happy to answer any questions. Thank you.

North Dakota: 2020 Long-Term Services and Supports (LTSS) State Scorecard

The fourth edition of the *LTSS State Scorecard*, released in fall 2020, takes a multi-dimensional approach to measure state-level performance of LTSS systems that assist older adults, people with physical disabilities, and family caregivers. Unlike many other rankings that focus on a particular aspect of LTSS system performance, the *Scorecard* compares state LTSS systems across multiple dimensions, reflecting the importance and interconnectedness each has on the overall LTSS system. The full report is available at www.longtermscorecard.org

Data used for this *Scorecard* was analyzed in 2019, prior to the COVID-19 outbreak. Therefore, performance on this *Scorecard* does not include the impact of the pandemic on the LTSS system, which is considerable. Nevertheless, the *Scorecard* indicators continue to be highly relevant, both in the current environment and in a future post-COVID world.

Purpose: The *Scorecard* aims to empower state and federal policy makers and consumers with information they need to effectively assess their state's performance across multiple dimensions and indicators, learn from other states, and improve the lives of older adults, people with physical disabilities, and their families.

Results: The *Scorecard* examines state performance, both overall and along five key dimensions. Each dimension comprises 4 to 7 data indicators, for a total of 26 indicators. The *Scorecard* also measures changes in performance over the previous three years wherever possible (reference data available for 21 of the 26 indicators). The table below summarizes current performance and change in performance at the dimension level. Indicator data appear on the next page.

Dimension	Rank	Number of indicators with trend*	Number of indicators showing:		
			Substantial improvement	Little or no change	Substantial decline
OVERALL	**28**	**21**	**7**	**13**	**1**
Affordability & Access	**30**	6	1	4	1
Choice of Setting & Provider	**25**	6	2	4	0
Quality of Life & Quality of Care	**20**	2	1	1	0
Support for Family Caregivers**	**34**	4	2	2	0
Effective Transitions	**22**	3	1	2	0

* Trend cannot be shown if data are missing for either the current or baseline data year.
** The support for family caregivers dimension comprises 12 policy areas, organized into four broad categories. Change is shown at the category level in the table above. Policy data are shown on the next page.

North Dakota: 2020 Long-Term Services and Supports State Scorecard Data

Dimension and Indicator (Current Data Year)	Current Rate	Baseline Rate	Rank	Change	National Average	Top State Rate
OVERALL RANK			**28**			
Affordability and Access			**30**			
Nursing Home Cost (2018-19)	**328%**	333%	**48**	▬	245%	168%

DESIGNER GENES
A·DOWN·SYNDROME·SUPPORT·NETWORK

HB 1012
Senate Appropriations
Thursday, March 11, 2021
Senator Ray Holmberg - Chairman

Chairman Holmberg and Members of the Senate Appropriations:

My name is Roxane Romanick and I'm representing Designer Genes of ND, Inc., as their Executive Director. Designer Genes' membership represents 260 individuals with Down syndrome that either live in our state or are represented by family members in North Dakota. Designer Genes' mission is to strengthen opportunities for individuals with Down syndrome and those who support them to earn, learn, and belong.

Individuals with Down syndrome have made many strides in living in their homes, schools, and communities because of educational and medical advances, public policy, and advocacy efforts. Public investments in early intervention, family support, public schools and special education, post-secondary school options, and home and community-based services do make a real difference for people with Down syndrome. The vast majority of our membership are living in home and community-based settings. Thank you for your important part in opening up these opportunities.

My daughter, Elizabeth, and our family are an example of the positive outcomes of this investment. Elizabeth has been a consumer of services from the first day of her life when her Early Intervention staff visited her in the hospital until the present with support from Vocational Rehabilitation and the Minot State Access Disability Services and the ASTEP program. Her education was supported by special education and general education from 2002 to 2018. A number of her job experiences have been supported by Vocational Rehabilitation. As a family, we have been supported by Family Voices of ND as well as the connections we've made through Designer Genes and the rest of the Down syndrome community across a wide arena of areas. All of these services and supports poured into a reservoir that she is depending on as she works on an Early Childhood Paraprofessional Associates from Dakota College of Bottineau. Who would have thought?

Our organization has interest in a number of areas of HB 1012 and this single piece of testimony is presented to draw your attention to those areas:

1. **Developmental Disabilities Division**
    a. **Restore the Experienced Parent Program Funding**
    The Experienced Parent Program has been a part of the North Dakota Part C Early Intervention system for close to 25 years. The program provides funding to hire parents who had children in Early Intervention to support and mentor other parents in

the Early Intervention system. Originally, the funding was contracted out through our Human Service Centers.

In the current baseline budget, the program was been funded with $100,000 of state general funds and $160,000 of the federal Part C grant through the Department of Education. This funding was secured in the 65th session. This past December, Tina Bay, Director of the Developmental Disabilities Division, informed the North Dakota Interagency Coordinating Council that the $100,000 of state general funds would be cut. This was understood to be part of the Department's savings plan. In addition, it became known that the $80,000 was no longer included in the budget for the federal Part C grant, nor is it in the one for FFY '21. This leaves the program unfunded and thus eliminated. **I am asking that this loss of $260,000 for family support in our state be restored**.

Family-to-family support, parent support, peer support – call it what you want - is a critical element in sustaining the confidence and competence for families who have children with special health care needs. While we don't receive any state and/or federal funds, to offer an example, Designer Genes is designed expressly with that purpose in mind. In a 2005 research study of postnatal support of mothers of children with Down syndrome (mere_43_304.196_212.tp (brianskotko.com), the vast majority of mothers reported a desire to be connected to their local down syndrome organization "which can provide practical knowledge in addition to establishing the beginnings of a long term support relationship."

Our families who are raising children with special health care needs depend on connecting with peers who have lived experience either through their own experiences or through helping other families. We need structured approaches to matching families with other families like Family Voices of North Dakota does through their Parent-to- Parent program.

In this same spirit, we are asking for a full restoration of funding for family support that are in Children and Families as well as Behavioral Health. A total of $30,000 is being cut from agreements with Family Voices of North Dakota and Federation of Families. In total, this would be a loss of almost $300,000 for the very programs that keep many of our families on requiring deeper end services.

b. **Payments for Developmental Disability Services** – We stand in support with other advocacy efforts and the DD provider system to ensure that HB 1012 has the necessary funding for Developmental Disability Services. Our individuals across the life span from infants and toddlers in our Early Intervention (Infant Development) to our oldest individuals with Down syndrome rely on this system. We agree that a 3%/3% provider

increase is needed to address wage pressures and workforce shortage. Every dollar makes a difference in our communities, so we also ask that the Department continues to pay the accreditation costs.

2. **Vocational Rehabilitation**
    a. **Restore state general funds for the Centers for Independent Living –** If anyone should be testifying on this section, it's my daughter, Elizabeth. Through Dakota Center for Independent Living (DCIL), she was able to get her driver's permit. DCIL's active engagement on the Bismarck-Mandan Mayor's Committee on People with Disabilities helped her to know about their scholarship program, of which she's been awarded funding the last 3 years. Probably what she would tell you about the most though is their Youth Empowering Social Status (YESS) movement and the opportunities that she's had to develop leadership, speak publicly, and connect to other youth and young adults with disabilities and without. Sustaining our four Centers for Independent Living is another piece if assuring individuals with disabilities in our state live quality lives.

Thank you for your time and I will take any questions that you may have.

Testimony House Bill 1012
Senate Appropriation
March 11, 2021

Chairman Holmberg and members of the Committee, my name is Kirsten Dvorak. I am the executive director of The Arc of North Dakota, which includes all six Arc chapters in North Dakota: Bismarck, Bowman, Dickinson, Fargo, Grand Forks, and Valley City. Our mission is to improve people's quality of life with intellectual and developmental disabilities and actively support their full inclusion and community participation.

According to the Developmental Disabilities Assistance and Bill of Rights Act (DD Act) and other federal legislation, "disability is a natural part of the human experience…". Prevention activities do not diminish the value of individuals with intellectual and/or other developmental disabilities (I/DD) but instead strive to maximize independence and enhance people's quality of life with I/DD.

Individuals with intellectual and/or other developmental disabilities deserve the opportunity for a full life in their community where they can live, learn, work, and socialize. To achieve this goal, they need a comprehensive, person-centered and directed, system of appropriate high-quality long-term supports and services (LTSS), a well-trained, fairly compensated workforce of providers, and direct support professionals.

The quality and effectiveness of LTSS for people with I/DD depends upon qualified providers of supports and services with adequate skills and training. Inadequate compensation hampers both recruitment and retention of direct support professionals (DSP). Insufficient funding would negatively impact the quality of support available to people with I/DD and the success that individuals have in living the life they choose in the community.

It has been over 40 years since The Arc of North Dakota began the task of eliminating the state institution at Grafton. In 1980, The Arc was called the ARC, and the Life Skills and Transition Center (LSTC) was named the Grafton State School. When the lawsuit to close San Haven and the Grafton State School was dismissed in 1995, it was with the understanding that the state would continue to work to keep our citizens in their homes and communities. The Arc of North Dakotas' vision of closing LSTC has not changed. The Arc of North Dakota supports the census reduction and is a provider that specializes in crisis and stabilization services. We also support the need for a new state hospital for specialized care, as they cared for 18 clients diagnosed with I/DD in 2020.

However, we have concerns about the decrease in the disability services budget. The reduction would jeopardize the promise of keeping our citizens in the programs to participate fully in their communities, where they experience personal independence. We ask that you reinstate the 11 million dollars of funding. Funding is used for person-centered home and community supports delivered in natural community environments for individuals that don't qualify for waiver services.

I urge you to help us look for answers to a problem that has troubled us well over the 40 years.

North Dakota Centers for Independent Living

To: North Dakota Senate Appropriations
From: North Dakota's Four Centers for Independent Living
Subject: Funding for Independent Living Programing in HB 1012
Date: 3/11/21

Chairmen Holmberg and Members of the Committee,

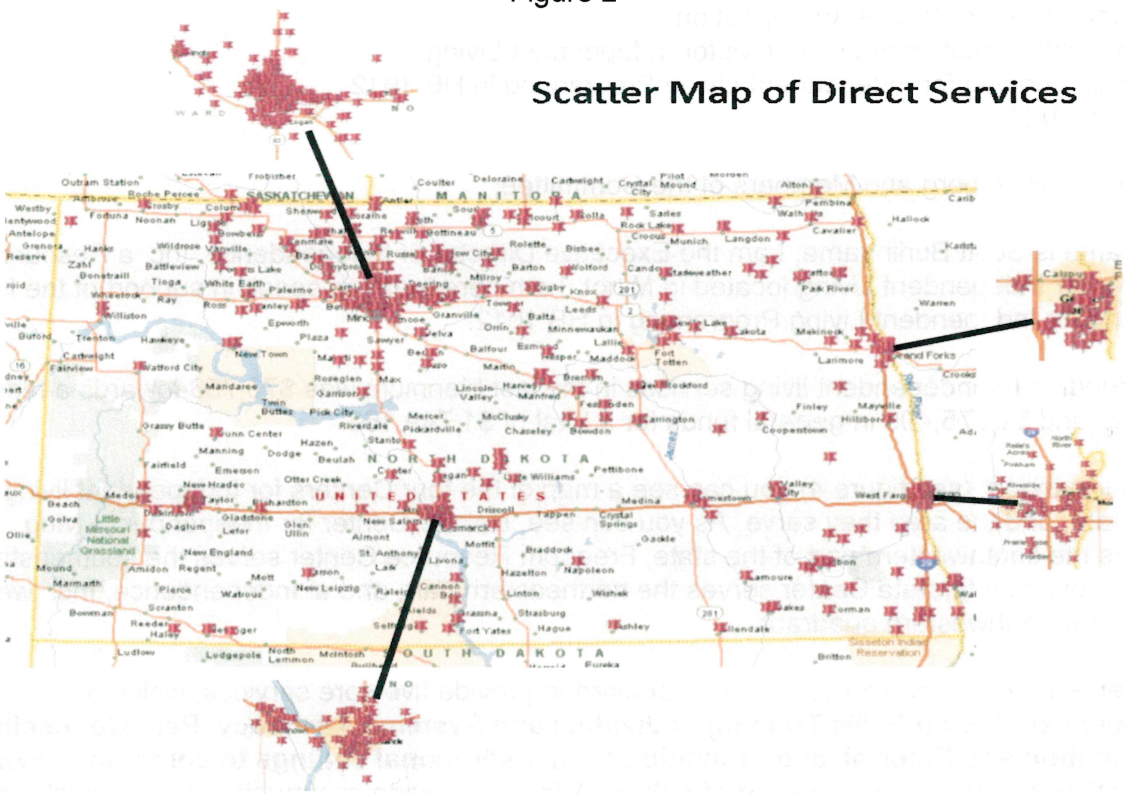
My name is Scott Burlingame, I am the Executive Director of Independence, Inc. a Resource Center for Independent Living located in Minot. I am here today to speak in support of the full funding for Independent Living Programing in HB 1012.

The funding for independent living services in the last biennium was $73,756 towards a federal match, and $1,675,406 in general funds for a total of $1,749,163.

In your handout (see figure 4) you can see a map of the four Centers for Independent living in our state, and the area they serve. As you can see, Dakota Center for Independent Living serves the southwestern part of the state, Freedom Resource Center serves the southeastern area, Options Interstate Center serves the northeastern part, and at Independence, Inc., we serve the northwestern quadrant.

All Centers for Independent Living are required to provide five core services, which are: **Independent Living Skills Training, Individual and Systems Advocacy, Peer Counseling, Information and Referral, and Transition from institutional settings to community living, as well as for youth who are out of school**. We also provide community services such as **systems advocacy, community education, accessibility consultations and outreach.**

One of the most important things to understand about the value of Independent Living is we are, at our core, people with disabilities serving other people with disabilities. Over half of our staff are persons with disabilities. We are people who have faced obstacles and barriers, fought back, overcame them, and have now dedicated our lives to doing our part to help others achieve their dreams.



Centers for Independent Living are peer driven and peer led. In addition to our staff, over half of our management and board of directors are also persons with disabilities. Our disabilities are as varied as those of the people we serve, but make no mistake, our staff are also trained and capable professionals. The average Independent Living staff in North Dakota has 11 years of experience. Our staff have college degrees in areas like Social Work, Education, Rehabilitation Counseling, Vocational Evaluation, Developmental Disabilities, Psychology, Communication and more.

As we talk about our need for funding, please remember our network has never been fully funded. According to a study we commissioned back in 2015, it would take over $8,000,000 to fully fund our network and meet the needs of every person with a disability in our state. The fact that we are so far from that number means each of our local Centers must make decision on how best to spend our limited resources and to provide the best impact for our investment in our individual communities.

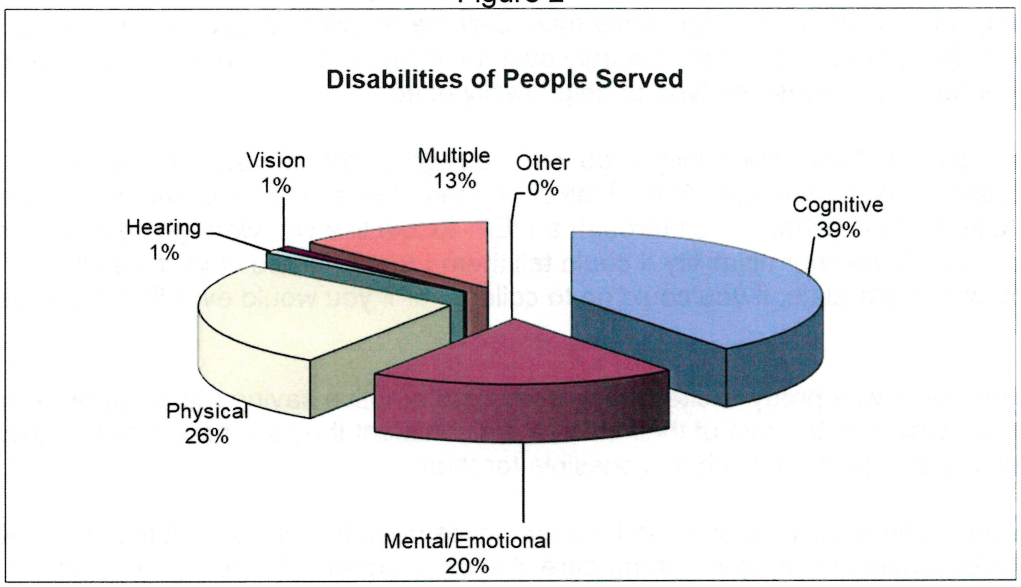
The funding provided by the state of North Dakota has been a game changer in our ability to serve North Dakotans with disabilities. We have presented you with a map with a pin showing the address of each of the people served by a Center in the past two years (see figure 1). As you can see, despite our limited funding, we have been able to provide a variety of services across the state.

Without the state funding, most of those pins will disappear.

Figure 2

Our local Centers have the ability to respond to our unique community needs. This means we can help a senior in High School with a learning disability in Crosby to pass his driver's test, or we can help a Senior Citizen from Grand Forks County who wants a ramp for their church. We can help a woman with a new physical disability in Wahpeton to find accessible housing or we can help a 40-year-old with a brain injury in Bismarck to learn to pay his bills,

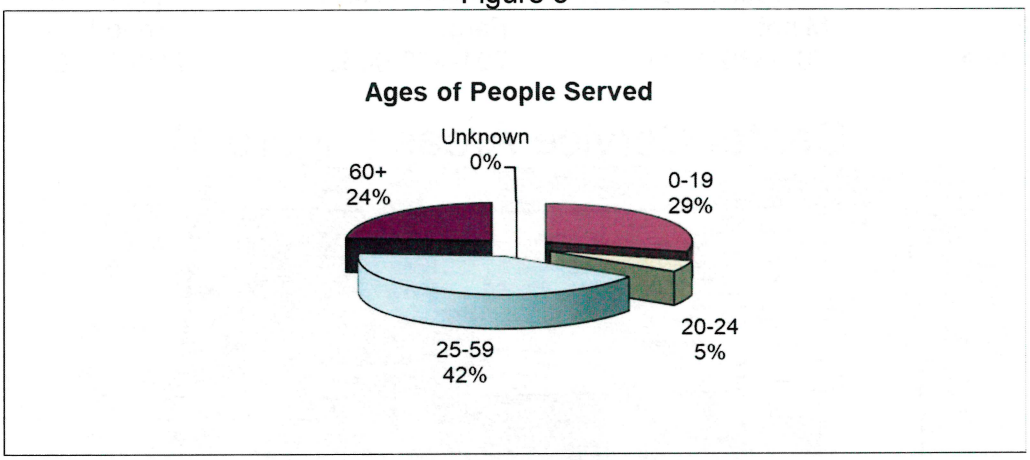
Our local controls mean we can be partners in building local communities as well. A few of the many things we have done is helped the Grand Forks and Jamestown Airports to accommodate people with disabilities in their emergency preparedness, provided trainings to landlords on accessible housing, taught disability awareness to elementary age students, and held a public forum on overcoming the stigma around mental health and addiction.



In the past two federal fiscal years, our CIL's have prevented 41 persons from entering nursing homes or other institutions and assisted in relocating 54 people from institutional care. According to our estimates (see figure 5), this outcome has the potential to save the state $6,239,505.00, and even more the longer people are able to stay in their own home.

As you listen to the testimony on all the programing in HB 1012 it has to seem overwhelming and at times be difficult to understand all the programs and services available to North Dakotans. As I am sure you have discovered, the services and supports available to people with disabilities vary greatly depending on age and medical diagnosis.

That is not true at Centers for Independent Living.



At Centers, we serve and all types of disabilities (see figure 2). In the past two years, 39% of the people we serve have cognitive disabilities, such a learning disabilities or autism, 26% people are people with physical disabilities, such as spinal cord injury, arthritis, or cerebral palsy, 20% are people with mental health type disabilities, like depression, substance abuse disorder, or bipolar disorder, and about 1% each are who are Deaf/hard of hearing or Blind/visually impaired. Around 13% of the people we served reported multiple disabilities.

Figure 2

We also serve all ages (see figure 3). This includes 29% under the age of 19, 5% age 20-24, 42% between the ages of 25-59, and 24% age 60 or over.

Figure 3

Eligibly for Independent Living is not based on disability type or age. It is based on very simple criteria:

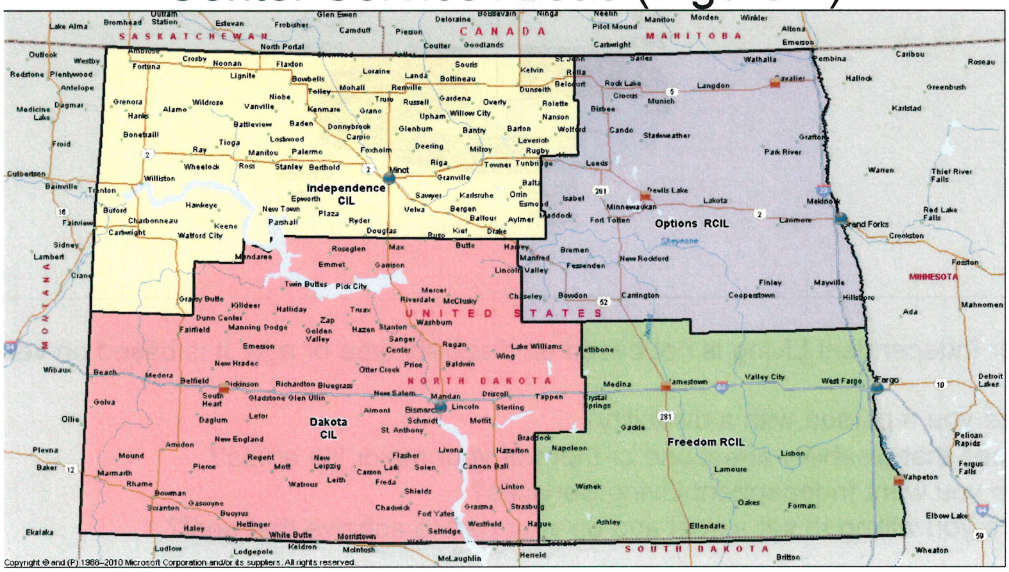
- Are you a person with a disability?
- Does that disability affect one or more of your major life areas?
- Do you want Independent Living Services?
- Are you willing to set a goal and do your part to achieve that goal?

It is the self-determination that is inherent in how we do things that makes our programing so successful. There is much focus on Person Centered planning as a best practice in today's service delivery model, however, without solid self-determination, Person Centered planning will never succeed.

Here is an example, a long time ago, I was a student on an Individualized Education Plan (IEP). I went to meetings at my school, with my parents, teachers, special education teachers, school counselors, and other professionals. As a student who was struggling with how to write, that was a pretty intimidating room. You could have built the programing around my needs, and it may have helped, but I was not able to truly overcome my disability until I accepted it and was confident enough to request the type of help I really need.

Two years ago, I had the opportunity to go into the High School in Velva and work with kids who were a lot like I was at their age. When I talked to them, I was able to tell them I knew what it was like to struggle in school, to sit through an IEP, to feel like you were going to be defined for the rest of your life by your disability. I could tell them I remembered what it was like to not be sure if you would graduate, if you could go to college, or if you would ever find a successful career.

I have to tell you; I was pretty excited when I received a notice saying these students had graduated on time with the rest of their class. I am confident they are now entering adulthood with a better understanding of what is possible for them.



Independent Living is cost effective and a smart investment for the state. It is part of the solution to the ever-increasing costs of long-term care, it is an alternative to the high cost of dependency, and it is the right thing to do. People who live independently live longer, they are happier, and it saves the taxpayer money.

I would gladly answer any questions you may have.

Center Service Areas (Figure 4)

(Figure 5)

POTENTIAL INSTITUTIONAL CARE COSTS SAVED BY NORTH DAKOTA CENTERS FOR INDEPENDENT LIVING

Part of the Core Services of Independent Living Centers is to assist persons with disabilities in either leaving or preventing their placement in institutions. This effort by the four Centers for Independent Living in North Dakota has the potential to save the state $6,239,505.00. This potential savings is the difference between what it costs for individuals to live independently using the average monthly cost rate compared to institutional care average rates. Nursing Home cost rates were reported by CMS, for Older Adults and people with disabilities, (CMS Data by State & Waiver Program Page 1 table 43, 2015) compared to the average nursing home cost, (personal communication ND DHS, Aging Division, Money Follows the Person Program) The institutional care rate was adjusted for room and board. The information is for the time period FYs 19 and FY 20.

$	**9,523.00**	**AVERAGE NURSING HOME COST PER MONTH**

$ 6,239,505.00 TOTAL POTENTIAL SAVINGS

Note: Centers for Independent Living reported Independent Living Services prevented 41 persons from entering nursing homes or other institutions during the last budget period and assisted in relocating 54 people from institutional care.

Testimony Regarding House Bill 1012
Scott Burtsfield, The Vocational Training Center
Senate Appropriations Committee
Senator Ray Holmberg, Chairman
March 11, 2021

Good Afternoon. My name is Scott Burtsfield, and I am extremely honored and privileged to serve as the Executive Director for the Vocational Training Center (VTC), a licensed service provider for people with intellectual and developmental disabilities, located in Fargo, North Dakota. I want to first thank you for the opportunity to speak to you about House Bill 1012.

As most of you are aware, in 2018 a new payment system was implemented that forever changed the landscape regarding how North Dakota pays for services to those providing care and support for individuals with Intellectual and Developmental Disabilities. Now, a couple of years into the new system, we realize our task is not quite completed.

We still have work to do - and we are doing it. Community providers, working diligently and collaboratively with Developmental Disabilities Division leadership, have recently rebalanced deficiencies pertaining to inadequate reimbursement rates for day-time services. Essentially, whether supported individuals attend their Day programs or not, providers of those Day Services remain responsible for providing 100 percent of the staffing, resources, etc. without compensation for the services and expenses they incur based on the expected attendance. Though the issue was evident at the onset of our payment system over two years ago, it has only worsened over time.

These issues compounded with increasing regulatory requirements, escalating operational costs, and rising employment related expenses have forced many provider organizations to be looking at ways of doing much more with much less.

As you can see, in our industry, there is no shortage of trials, tribulations, transformations and reforms. However, through it all, there has been one fundamental element to the success of the individuals we support. This has always been our Direct Support Professionals (DSPs).

For most of the state's providers of I/DD programs, well over 80% of budgets go directly to the salaries and benefits of Direct Service Professionals, and rightfully so. They are undeniably invaluable as the core personnel providing direct care services for North Dakota's most vulnerable citizens.

The incredible Direct Support Professionals in our state literally give their blood, sweat and tears to provide support and care for the state's most vulnerable population. Their jobs are often demanding, stressful, and physically and emotionally exhausting. At times, their work is even dangerous or harmful. But they also form bonds of trust and companionship that transcends stereotypical "worker/client" relationships, often becoming like family members.

However, our DSPs are increasingly held to much higher standards in terms of what is expected of them in their day-to-day work. In the last nearly three years there has been heightened standards, training requirements, data collection and entry…the list goes on. These expectations have been imposed upon them with implementation of many of the new rules, policies, and mandates since the implementation of the new payment system.

As a show of appreciation for DSPs increasing roles, responsibilities, expectations, and hazardous job duties, the Governor is recommending our DSPs and our services for individuals with disabilities be treated as "less than." "Less than" his recommendations for increases in other industries, "less than" his support for other professionals, and "less than" state employees who do not face being hit, bit, kicked, covered in human excrement daily.

The Governor's recommendation of a 1% living adjustment comes at a time when it is increasingly difficult to retain current employees and attract potential candidates, a time when our DSPs keep seeing the cost of living continues to rise while their spending power decreases, a time in which it much easier and tempting to find employment outside of our field, and a time when most major retailers and other local industries such as service jobs, warehouse and fast-food positions are offering better pay with much less pressure, responsibility and regulatory requirements. For example:

- A local manufacturing company's starting pay is $2.00 per hour more for an entry level position.
- Average Administrative assistant salaries statewide are over $1 per hour more than our DSP's and don't even come with the added benefit of the potential for bodily harm our DSPs face every day!

- Recently, our organization actually placed 2 individuals in entry level jobs making more than the DSPs that are supporting them in that job!!

- McDonald's, Walmart, COSTCO and many others have starting wages greater than the DSPs in those communities.

I've spent over well over 25 years working in the nonprofit world. I believe I speak for many when I proclaim that we're used to making do and having to just get by. We're used to

balancing priorities based on budget restrictions. We're used to stretching the dollar as much as we can. It's truly a shame the things you get used to. But the supported individuals and DSPs in our state deserve better.

Therefore, I am asking you to not compromise services to the state's most vulnerable adults or jeopardize the workforce that supports them. Please cast aside the Governor's recommendation and support NDACP's request to leave provider services rates unscathed and support a 3% increase for each year of the biennium for service providers and the Direct Support Professionals we employ.

Again, I wish to thank you for the opportunity to speak to you about House Bill 1012.

Scott Burtsfield, Executive Director
The Vocational Training Center

scott@fargovtc.org (701) 551-3149

Testimony on HB 1012
2021 Legislative Session
March 11, 2021
Sen Holmberg Senate Appropriations Chairperson

Senator Holmberg and Members of the Committee

My name is Donene Feist, I am the Director for Family Voices of North Dakota. I come before you today regarding HB 1012.

Family Voices of North Dakota is statewide family to family health information and education center who serves families of children with special health care needs in ND. Each state in the country and our territories has one family organization that has been designated as a family to family health information and education center by HRSA federally. We are that entity for ND. We provide emotional and informational support to many families across North Dakota who have a child who has a chronic health condition and/or disability. In addition to the support and 1:1 assistance we provide to families, we also provide various trainings and workshops, which help families understand how systems work so that they can also be good stewards of state dollars and the programs of which their children are enrolled. Our staff, who all are parents to children with special health care needs, provides assistance to families by helping them access and navigate services; explaining what the services mean, how systems work, and where the funding comes from; by providing emotional support to assist with their unique and individual needs.

FVND follows the Maternal and Child Health definition of children with special health care needs, which is those children and youth who have a chronic condition of at least one year, a physical disability or mental health/behavior health diagnosis. Additionally, there are many children and youth who may have a physical disability and a chronic health illness but also may have a co-occurring mental health diagnosis. Because of many families have a co-occurring condition, it often leaves families having to understand and navigate many systems and complicated silos. We receive our referrals through agencies, physician offices, out of state hospitals where a child/youth may be receiving services.

All of our services under the auspices of the statewide health information and education center are performed through parent-to-parent mechanisms through our staff. In addition, we run a parent-to-parent matching program called North Dakota Parent-to-Parent which provides connection of one parent to another as a mentor for emotional support. This program mirrors the "peer support" program that you may be familiar with in the behavioral health system; of which the Federation of Families provides to families. However funding for peer support outside of the behavioral health system has not been prioritized.

In partnership with Designer Genes since 2012, we provide support through a project called Project Carson. Project Carson provides emotional and informational support to families who may receive a ***prenatal diagnosis or an at birth diagnosis***.

We continue to experience an increase in the number of calls and requests for assistance from families and providers. On the last few pages of my testimony I have included the data we collect on the calls we receive and the help that is provided.

We are requesting that the dollars described be fully funded and placed back into HB 1012. The need for family support is not going away. Dollars for family support sadly have been reduced for the Federation of Families for Children's Mental Health and Family Voices of ND. Sadly, dollars for family support through the Experienced Parent program have been eliminated in the 1012 budget.

Families desperately need a place to go to get the help that they need. Through funds appropriated in the 2015 session and 2017 session, we have been able to increase staff time. We often encounter families who are in crisis and experiencing difficulty accessing services because of denials and ineligibilities. Current staff are assisting families across ND. Funds allocated, not only help meet increase in demands for assistance to families and professionals 1:1, but also for ongoing training, and development of educational materials. Our mailing list has steadily increased to nearly 7394 across the state.

FVND does have concerns regarding the 1915i, and how many children will be screened eligible. We are also very concerned about the Department eliminating the autism voucher and moving those funds to the autism waiver. Some of the children and youth that were served through the voucher will not be transferred to the waiver

which will again cause a gap for those with an autism diagnosis. This would be a travesty for some families. There continues to be a wait list for the autism waiver, in my opinion, this would not be eliminated by moving voucher funds to the waiver and again, what happens to those children and youth who are already being served.

In addition to the proposed change to the autism voucher, I do want to mention in SB2256, Senator Dever a sponsor, would approve a study to be done on children and youth with a developmental disability, identifying the gaps in services and how they are being served. Many children do not qualify for the DD waiver, unless they have an ID diagnosis which leaves many children behind. Diagnosis such as Down syndrome, Spina Bifida, cerebral palsy, muscular dystrophy and autism etc. to name a few. While we have done well in trying to gap fill with the medically fragile waiver, hospice waiver and autism waiver, we have not gotten to the meat and potatoes to look at the system as a whole and how to best serve all children and youth with a developmental delay. This has been a vital need for a long time as many families continue to not receive any services.

What we know through prevalence data for ND from the Data Resource Center 2018-2019 is there are approx. 30,244 children and youth who have a special health care need in ND. One in five families in North Dakota has a child with special health care needs.

That data also indicates that:

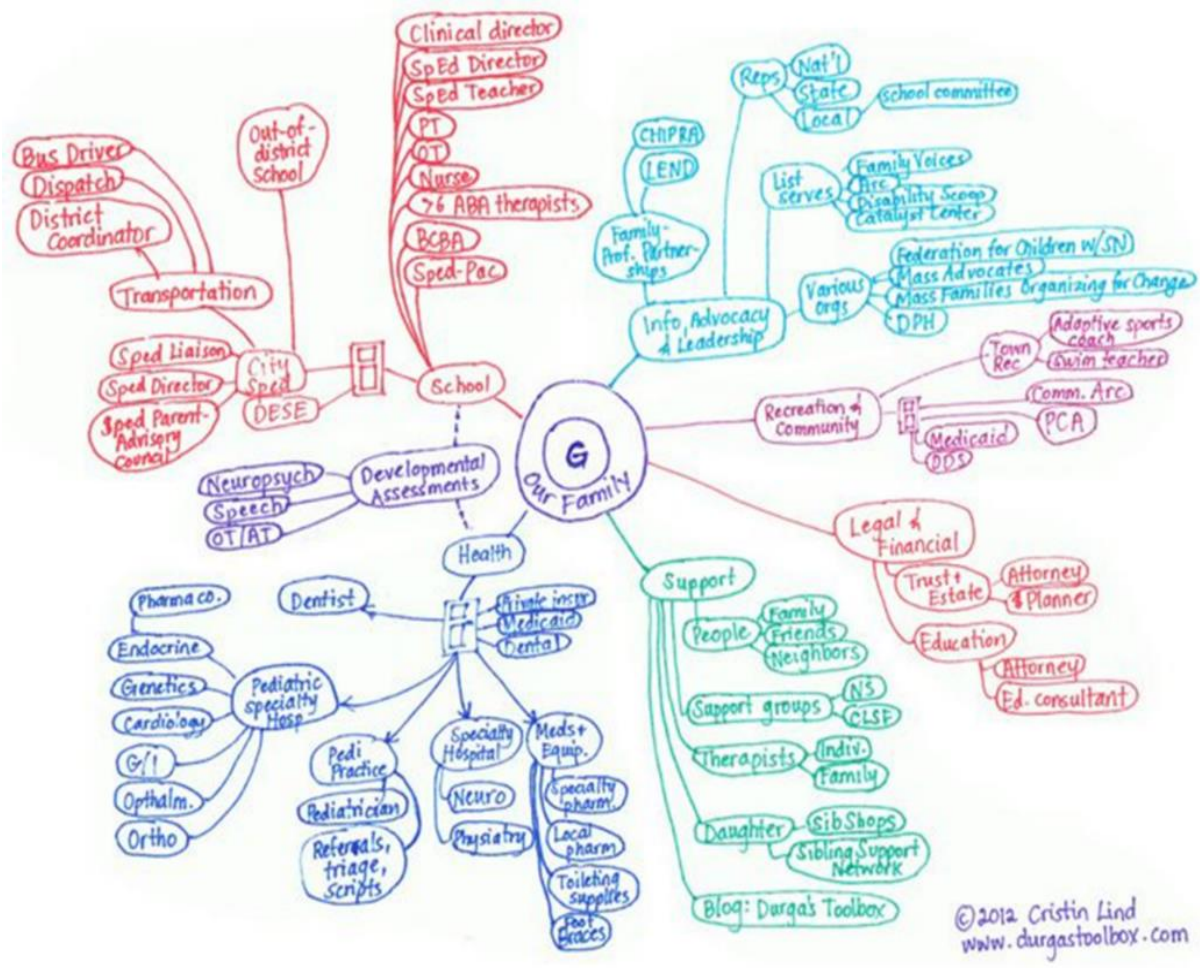
32.4% of this population utilize public insurance (this may include income eligible Medicaid and waivered Medicaid
12.6% use only private insurance
52.4% of this population use both private and public
21.7% of this population were currently at the time of the survey uninsured.
For those who may use the 1915i state plan amendment would fall into a very narrow category.

In previous years ND Kids Count Data indicates that 86% of parents with children eligible to receive services are not aware of available programs. We feel that this is still an issue five years later. ***People cannot access what they do not know exists*.** In essence, we do the work to help families, one of our most vulnerable population the how to access the provider networks they will need in raising their child with a chronic illness and disability. Who then would provide this service to families?

Most recently, through focus groups to identify family's needs through the Money Follows the Person initiative, we learned families needed assistance in navigating and understanding the various systems and silos, a streamlined approach, need to connect with others, application assistance and help coordinating services. We also know through a survey that we completed with DD Program Managers which revealed many of them do not know local resources and this is where FVND plays a very valuable part to systems of care.

Our data collected below and on the final sheets of this testimony, is information that all staff collect and is aggregated. I share the information to help you understand the magnitude of information that we collect daily.

The included table identifies the ongoing increase in the number of calls that are received by our office. We are on our 20th anniversary as a nonprofit. Eighteen years ago, our total contacts were 518 families and 427 providers. As you can see we have had a steady increase in the number of contacts to staff from families and professionals. Our federal fiscal year is July 1 through June 30 of which this data is reflective.



Total Encounters of all calls	**2015**	**2016**	**2017**	**2018**	**2019**	**2020**	**June 1, to Dec 31, 2020**
Families	**2865**	**3260**	**3712**	**4026**	**4172**	**4233**	**2296**
Professionals	**2339**	**2499**	**2893**	**3076**	**3158**	**3273**	**2173**
Totals	**5204**	**6059**	**6605**	**7102**	**7330**	**7506**	**4469**

As stated earlier, many times, our encounters with families are heightened because the family is in crisis. We have noted that the issues being presented by families today are being increasingly complex. This year with the Covid pandemic, many of our families were in crisis.

Our staff work with a large number of families who experience gaps in service, have difficulty understanding the complexities of our Medicaid systems and Medicaid

waivers, and their private insurance who have children with very complex medical issues. Many providers contact us to make a referral or to assist them in locating resources for families they are working with. Families often do not know where to begin. We will partner with them in making those connections to community resources, possible eligibility criteria and programs, assist them with the application process, follow up with them to assure their family needs are being met, and provide ongoing emotional and informational support.

In the diagram below you will see children with a chronic condition or disability utilize many services. Most services that families encounter are in silos.

We know and can identify as best practice that families thrive when supported by others with lived experience. We also know that families build capacity, strength and confidence through support and coaching from another parent. Active engagement with families through responsive listening from others who have walked

in the same shoes assists families in a manner that allows them to receive services necessary to meet their family and child's needs.

Families across North Dakota have repeatedly shared the difficulty in locating and accessing services when they call our offices. Raising a child or youth with special health care needs, accessing quality services and paying for them while still meeting the needs of the entire family and maintain employment is stressful.

Senator Holmberg and members of the committee, I have stood before you all for many years. The needs for families to live, thrive and survive in their community has also increased. We often **hope for the best, but don't know what the future holds in a world and system that wasn't built for our children.** There is no handbook or parenting book about raising a child with special health care needs and disabilities.

Most of our children don't fit a mold. All are uniquely their own, and many have multiple diseases or disorders so rare that often doctors have never seen. Early on families realize with a heavy heart, the world we live in isn't built for our children. Each and every day families are fighting someone about some aspect of their care. It could be a doctor, nurse, therapist, educator, or an insurance company. Every day families launch battles for what we know our children need to thrive, and sometimes our fight ends in defeat.

Every day many families are fighting a battle against a disability, disease or chronic illness that we will never beat. Most of families know the very real implications of what can happen to our children at any given time.

Our role is not only to provide support, assistance in navigating and connecting to services to families, but through or various trainings and workshops, help families understand how systems work so that they can also be good stewards of state dollars and the programs of which their children are enrolled. A valued provider has stated "It is important to ensure that there are adequate supports for families, as these strengthen the family unit as a whole. This results in a decreased demand for providers as you are creating lasting change within the family unit."

Again, we are requesting that the dollars described and removed above be placed back into the budget for HB 1012. The need for family support is not going away. Do the most vulnerable families in the state not deserve assistance?

In closing, let us remember as each of us makes decisions that will affect children—whether we are parents, educators, health professionals, or government officials—it is our duty to consider if that decision either affirms or denies a child's most basic human rights. **Families are not looking for handouts, but they do often need a rope to hang on to, to keep from drowning in an every changing system. Family support is vital, to help them live, thrive and survive in an every changing world.**

The data shared on the last few pages are from federal fiscal year July 2019-June 2020 is to illustrate not only the number of calls but the type of information families and providers call us about. Additionally, several families we have assisted have shared information with you. I have also included a document that was done by the Federation of Families, Designer Genes, Protection and Advocacy, Family Voices regarding the importance of family support.
We thank you for your consideration.

To the Members of the Senate Appropriations,

Three years ago, my six year old daughter, Addilynn, was fighting for her life in PICU in Minnesota after seizures nearly took her from us.

Four years ago, I attended the Parent Leadership Institute through Family Voices of North Dakota. I have also reached out to their staff on numerous occasions for guidance and support.

Both of these moments have changed my life and my daughter's. Addilynn has a very rare genetic disorder that causes developmental delays and difficult to treat epilepsy. My ability to advocate for her changed dramatically after attending the Parent Leadership Institute. It has helped Addilynn get the medical treatment, equipment and therapies she needs to thrive. It has helped me insure that she has qualified and competent individuals caring for her when her family cannot. Without the services that Family Voices of North Dakota provides, I would not be able to advocate for her in the manner in which I do now…which would have a great effect on her quality of life.

I urge you to reconsider the budget cuts made to the Family Voices of North Dakota programs. Family of children with special health care needs NEED agencies like Family Voices to help them navigate a confusing and sometimes scary system for their children.

I know that my daughter would not be thriving today without the advocacy skills and support that I have received from Family Voices of North Dakota.

toby.jean.carlson@gmail.com

To the Members of the Senate Appropriations,

I would just like to give due praise to Family Voices of North Dakota. This particular program has been so helpful to my family on many levels.

I have a son who is now 18 his name is Kaden and he has a rare disease called leukodystrophy. He is totally dependant on us for all his care. Being a parent of a child with special healthcare needs can be very overwhelming, which is why programs like Family Voices are absolutely vital to families in ND.

I have many stories I could share of the help they have delivered, but I will tell the one that really introduced us to them and what they stand for. In 2010 my son Kaden suffered a brain hemorrhage and needed brain surgery along with months of recovery. It was the most afraid and overwhelmed I ever have been. In that moment I called Family Voices for guidance and support and they were there for my family.

They went above and beyond in support and pointing me in the direction I needed to go. They were amazing in their ability to jump in and really be there. I have used their services for many things from emotional support, help in guidance through the medical system, training me to be a better parent to my son, and help in general questions.

I have worked with many non-profit organizations, and Family Voices has been the most efficient and caring. I can't express enough how much FVND has meant to our family. I know if I call them tomorrow with a question it will be answered. In a world with a lot of runaround that means so much. They are worth every bit of funding and need to stay as a big presence in our state. As a parent I am so grateful for them!!

Amanda Burner

Minot ND

amanda.burner@outlook.com

To the Members of the Senate Appropriations,

We are so thankful for Heather Wheeler staff of Family Voices of ND in Williston.

Our family has been blessed with a beautiful little boy who is now 6 years old who faces many challenges due to his disabilities, including Fetal Alcohol Syndrome, Autism Spectrum Level 2, ADHD and anxiety.

As we embrace these challenges along side him we have often felt lost, afraid and very alone. This path will never be easy, but after my first phone call with Heather, I realized that we will never be alone. There will always be someone there to help us navigate through this uncharted path and help us get back up if we fall.

In the world of FAS they say that if you know one child with FAS, you only know one which with FAS. This is because FAS is so different due to the brain damage to each child.

Heather and Family Voices of North Dakota, although she may only know Jaxson; Jaxson is who she knows well. Jaxson needs her and so do we. Thank you so much for putting this support in our lives

The Kostad family

Williston ND

kostadcrew@hotmail.com

To Members of the Senate Appropriations Committee,
HB 1012

I would just like to speak for a few moments regarding Family Voices of North Dakota. This particular program has been so helpful to my family on many levels. My son was diagnosed at 3 with Autism, he will be 13 yrs old by the time you read/hear this.

Being a parent of a child with special needs can be very overwhelming, which is why programs like Family Voices are absolutely vital to families in ND. They have been there for us guiding us thru process's and listening to frantic calls on how to deal with behaviors, schools, and helping guide us into therapies for our son. Even though he is almost 13 now and we are in a groove they are still there for us. They went above and beyond in support and pointing me in the direction I needed to go. They were amazing in their ability to jump in and really be there. I have used their services for many things from emotional support, help in guidance through the medical system, training me to be a better parent to my son, and help in general questions.

They aren't just there for the family member with a disability, they are there for the whole family. Specifically, recently my husband ended up in the hospital on a ventilator for 45 days with Covid. They were there thru my tears and my heartache and my joys. They listen and guide without judgement. Without them we would have been lost in the shuffle of the system. We need them so more families do not get lost in the system. They aren't just a vital part of my family; they are my family.

Family Voices is the most efficient and caring for the whole family. I could go on and on but there are truly a million reasons why need them. Please restore their funding because without them the state would feel a great loss. As a parent I am so grateful for them!!

Testimony HB 1012

Mr. Chairman and members of the committee:

My name is Stephanie Orr and I am asking you to please protect the general fund dollars that Family Voices receives in HB1012.

My family is one among many, many families within North Dakota that has been helped by Family Voices of North Dakota. I have a 10-year-old son that was diagnosed with Pediatric Acute-onset Neuropsychiatric Syndrome (PANS) in 2015. I was referred to Family Voices during one of the darkest years of our lives. I felt absolutely alone and unsure about how to move forward with this rare diagnosis. My son had been kicked out of two separate daycares for violent outbursts that he could not control. Family Voices helped me navigate my childcare options and later pointed me in the direction of Bismarck Early Childhood Education Program (BECEP), which I had never heard of before. Vicki Peterson, from Family Voices, came to our meetings with BECEP staff to help support us. We would have been completely lost without her! She ensured that my son was evaluated for services and, once he qualified, she helped make sure that his needs were covered in an IEP.

Before Family Voices stepped in, I was in way over my head. I had no experience whatsoever with disability and special education services. There are services in place to help families, but when a family is facing a new and scary diagnosis, there is no way for families to find out about those services if someone isn't there to guide them. Family Voices is that someone. Not only were they there to fight for us, but they taught me how to advocate for myself and my child. They have helped me grow in ways I could have never imagined.

Family Voices also supports parents thru their Parent Leadership Institute each year. Every parent that has attended will tell you the same thing – it changed their life. Not only have I learned a ton about advocacy and how our government and healthcare systems work, but I have made life-long friends. I now have a whole network of people in my life that are always there to help, support and encourage me.

I don't know where we would be without Family Voices. I have gained more from them than I could ever put into words. When I look back, it is really scary to think what would have happened had we been on our own. We just did not have the tools or knowledge to navigate what we were going thru. I know other families dealing with the same diagnosis across the nation that have not been so lucky and have had to institutionalize their children because they didn't know there was any other option. Family Voices has played a huge part in getting us where we are today – happy, healthy, together.

I am asking you to please help protect the funding for Family Voices in HB1012 so that more families have a success story like ours!

Thank you for your time and consideration.

Steph Orr, Bismarck stephanie_orr@hotmail.com

Testimony on HB 1012
2021 Legislative Session
January 26, 2021
Sen Holmberg Appropriations Chairperson

Chairman Holmberg and members of the Committee

Hello, my name is Beth Larson-Steckler and I am writing in opposition to HB1012 specifically the cut to Family Voices. I am writing as a health advocate, as an individual that worked in mental health and as well as a parent whose children have complex chronic conditions. I submit this letter with the permission of our two children: Ellyse Steckler and Josh Steckler.

My husband had a genetic condition, PRSSI, or hereditary pancreatitis. We were unaware that he carried this gene or the high rate of transmission to our children. His disease advanced and he died of pancreas cancer. Unfortunately, the gene was passed to our two children. This disease is extremely painful. There is no cure, only treatment for symptoms. Our children's health deteriorated to the point where they were constantly in the hospital. We were provided one option. The treatment was a radical treatment called Auto Islet Transplant, pancreatomy with splenectomy.

Navigating the systems of care when you have a child with any health conditions much less complex chronic health condition is overwhelming and quite honestly brutal. The number of children with chronic health conditions has been rising nationally. Internationally and nationally, it has been recognized that organizations such as Family Voices are vital to families whose children have chronic and or complex health conditions for multiple reasons.

When a child is diagnosed with a chronic or complex condition it is overwhelming, frightening, and often isolating for parents. The medical system as well as other systems that one becomes involved in when a child receives a diagnosis can be very dismissive of families. Professionally, I worked at navigating systems of care for families whose children experienced significant mental health challenges. I saw firsthand the barriers they faced. Those barriers were often erected by those working in the mental health system, as well as systematic barriers. Many in the field had no idea what these families were dealing with. They were provided categorical services that were available, not that met their needs. Their concerns often dismissed. When I met families, they often were overwhelmed, and felt they had no voice and that their concerns did not matter. I always provided information on entities such as Family Voices that could provide support and navigation as well as connection to other parents that had similar life experiences. Family Voices advocated for these families, attended meetings with them. Educated them on their rights and made them aware of supports that those in the system had not made them aware of. With the support of Family Voices, parents found their voice; they felt empowered, they felt supported. They were assisted in navigation of a complex system. They were provided educational opportunities to learn to advocate for their child and other children. This is critical. This is NOT a 'fluff' service. What Family Voices provide is necessary and should be accessible to all families. I believe to this day, that entities are

still not providing this information to family consistently and families often must find out about this through other channels.

When our children started becoming sicker, I thought that because of my previous professional positions and knowledge I would be able to successfully navigate the health care system as well as other systems that my children needed. The sicker they became the harder it became. When my husband passed, I had no support. My children both underwent multiple transplants. The outcomes were poor. My daughter has chronic pain, brittle diabetes, malabsorption issues, gastroparesis, dysautonomia, eating issues as she was starved (per her specialists' recommendation) severe medical trauma, depression, and anxiety among other health issues. My son had chronic pain, battled C-diff for three years, tachycardia, dysautonomia, asthma, medical trauma (PTSD), malabsorption. Neither has a spleen, pancreas and they only have half a stomach. I was overwhelmed. There are only seven places that does this transplant and often those that have complications are on their own to find answers. While prior to their transplant I had support of this medical team, after with their complications, they were unsure what to do. I was on my own. Multiple specialists provided conflicting recommendations, my concerns as well as my children often were dismissed, and their education was suffering. Their mental health issues became worse because of medical trauma which impacted their health and behaviors. I continued to reach out to organizations, supports and services that I was aware of and yet no assistance was provided. Our lives became about literally fighting to survive. I was ashamed that I was failing my children.

The school filed an abuse and neglect on me. Obviously, this is not something I like to discuss as it is embarrassing. I worked in the mental health system. Again, I want to reiterate that I have asked my children's permission to share what I am sharing today. My kids missed school and a lot of it. My daughter had chronic pain as well as my son. They also had GI issues. My son fought C-diff for three years. During this period, I would struggle to get him to school. I did call the police on him several times. They would question why I was sending my son to school when he would have constant accidents. I reached out myself to social services. My daughter started not taking care of her health issues. I should have been cognizant that this was a result of medical trauma but at the time I was unaware. Even though I reached out to social services, abuse and neglect reports were filed. I was doing everything in my power to assist my kids. I had reached out to social services and asked for assistance, I had gone to the top specialists, I had accessed treatment for my daughter. Finally, at this point I reached out to Family Voices. I was lost. I was exhausted and felt I was losing my children I was afraid that they would be taken away or that they would die. Family Voices provided me support at my son's school meetings. They encouraged my voice when it was silenced. Family Voices provided me information about supports and services. They provided me training. I believed that with my education, knowledge of the system that I would be able to navigate the care my children needed. I was not. Family Voices provided me the support that many others did not. This is not uncommon. The more I have become involved in advocacy nationally and internationally I have listened to the stories of many families had multiple resources at their fingertips and they often express how marginalized they were when they advocated for their

children's health. It was organizations such as Family Voices that empowers. As parents, we are the main caregivers of our children. We have expertise in our children and our voices should be heard. We are partners.

My kids are young adults now. We still have numerous health and mental health battles, but things are better. I am Co-Founder of National Childhood Pancreatitis Foundation, state chair of North Dakota National Pancreas Foundation, member of other various national and international advocacy groups focused on treatment of chronic pain, medical trauma and other issues related to health care.

The health care and mental health care systems are becoming more and more complex. As stated, before it can be an enormous undertaking for parents to navigate systems to ensure their child is getting the necessary care. It is overwhelming, it is frightening and isolating. Family Voices is staffed with individuals who understand the experience of parents. They can truly empathize and understand the journey of a new diagnosis, navigating the systems. Family Voices has considerable expertise in the system – not as an untouched medical provider or educational provider- but someone who has experienced and knows the barriers that seem invisible to many that work in the health care system. It has been demonstrated that one of the most effective aspects for parents are organizations such as Family Voices. By eliminating funds, you are essentially eliminating the voices of parents whose children have chronic and complex needs. We need Family Voices. As a parent with a Masters in Sociology of health, a BS in psychology and criminal justices and years working to assist other families to navigate care, when I found myself in a similar position, I struggled with that navigation. Not, that I did not have the skills. The system is brutal and complex, I began to not trust myself, I became overwhelmed and depressed. Family Voices honestly, helped me get my voice back. Quite honestly, we need more funds allocated to Family Voices and more staff. As parents, we provide most of the care to our children. We ARE partners and should be treated as such. Cutting Family Voices is not only inconsistent with national and international steps working to increase organizations like Family Voices, it is silencing the voices of North Dakota caregivers, parents, and patients. Cutting allocations is cutting a lifeline of support from parents, children, and youth. This would be extremely detrimental.

If you would like to speak to me more, please do not hesitate to contact me. My phone number is 701-202-1522. You can also e-mail me at socnavigations@yahoo.com

Sincerely,

Beth Larson-Steckler

Supporting Families in North Dakota: Through the Lens of Lived Experience

Family Story

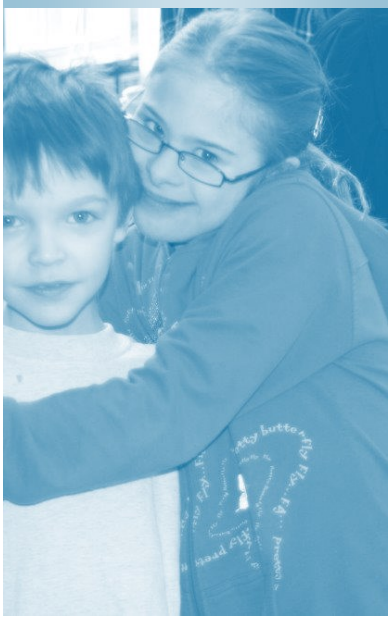
Family Voices of ND has been a valuable resource for me and my family. They have provided me with valuable training and knowledge about resources networking in my community and areas around me. My husband and I now have a better understanding of how "the system" that our child, with special health care needs, is in. Everything can be so confusing, but this knowledge has better equipped us. There have been topical calls to further enhance our learning. This is extremely beneficial to us and other families, so we can understand what everything is all about in this world that we must now live in, that we were so totally unprepared for. Also, a big thing I am so thankful for, about FVND is that their line is always open. Sometimes, I just don't know where to begin. I know I need something for my child, I know something just isn't right, but where do I start, where do I go from here? One call is all it takes. This is immensely valuable. FVND usually doesn't just give me the number and say, "try this." Often, the call is made for me, and things get going. Then, I get a call from someone if I needed a referral to another place. I don't end up spending an hour or more on the phone trying to get to where/who I need to. What a relief.

The Parent to Parent program has been an excellent resource as well. I was matched with another parent when I wanted to talk to another parent close in my area who had a child similar in diagnosis to mine. It was very nice not to be paired with someone in another state away. We could discuss what works, what doesn't, and things like local providers and state resources. I felt reassuring to have someone near by to talk with. Then, I was paired with a parent to who wanted to talk to me about their child and I was going to support them. Interestingly, it worked both ways. We enjoyed talking with each other and were able to learn from each other. What kind of things had worked and providers we had found. We actually both benefited and were able to improve the care for both our children!

Supporting families *involves the connection to another person who has also raised a child/youth with a special health care need and/or disability and who has a shared life experience. This connection assures that families get resources and services in ways that are respectful, relevant, and honor their unique choices and perspectives so that they can make informed decisions to achieve the best possible outcomes for their children and/or youth.*

Families are big, small, extended, nuclear, multi-generational, with one parent, two parents, and grandparents. We live under one roof or many. A family can be as temporary as a few weeks, as permanent as forever. We become part of a family by birth, adoption, marriage, or from a desire for mutual support. As family members, we nurture, protect, and influence each other. Families are dynamic and are cultures unto themselves, with different values and unique ways of realizing dreams. Together, our families become the source of our rich cultural heritage and spiritual diversity. Each family has strengths and qualities that flow from individual members and from the family as a unit. Our families create neighborhoods, communities, states, and nations.

Developed and adopted by the New Mexico Legislative Young Children's Continuum and New Mexico Coalition for Children, June 1990.



Family Driven

Family-driven means families have a primary decision making role in the care of their own children as well as the policies and procedures governing care for all children in their community, state, tribe, territory and nation. This includes:

- Choosing supports, services, and providers;
- Setting goals;
- Designing and implementing programs;
- Monitoring outcomes;
- Participating in funding decisions; and
- Determining the effectiveness of all efforts to promote the mental health and well-being of children and youth.

Osher, Osher, & Blau, 2006

Fidelity is trust, accountability, and predictability across the systems of care between all stakeholders within an established and accepted practice. Families of children and youth need fidelity from the people in their lives; teachers, providers, support team, and others. The expectation of fidelity to family driven or centered practices is a fundamental value in family support.

Background

There are an estimated 27,000 children and youth with special health care needs and another 23,000 children and youth with an emotional, behavioral, or mental health condition in ND; 13,000 of these children receive special education.

Research and experience shows that there is much more to meeting the needs of children and youth with special needs than those services offered by providers. Most services are provided according to guidelines that dictate the eligibility, type of service, and access. Because of this, families of children and youth with special needs often serve in a variety of roles to ensure the well-being of their children and youth, such as care management, transportation services, social support, socialization, advocacy, medical treatment, therapies, and other necessary services. And, because family caregivers are generally the primary and/or sole caregivers to their children and youth with special needs, their own physical, mental, and emotional health and wellbeing can impact how they provide that care. As a result, parents of a child or youth with special needs may also experience increased stress, guilt, blame, or reduced self confidence in parenting, which can divert attention from other aspects of family functioning. In turn, this can effect the physical, mental, and emotional health and wellbeing of all of their children and youth.

Children and youth with special health needs include all children who have, or are at increased risk for, chronic physical, developmental, behavioral, or emotional conditions and who also require health and related services of a type or amount beyond that required by children generally.

Further...

Researchers and leaders across the nation agree that key to this support is:

-**Connections** to others who have lived experience in successfully navigating the system of care for their own child or youth;

-**Access** to formal and informal information and resources that are family and youth driven/ centered and culturally responsive; and

-Family and youth **choice** based upon their interpretation of that information.

Each component is essential as the foundations of family and youth driven/centered care and support. Family driven/ centered care assures the health and well-being of children and their families through a respectful family professional partnership. Family driven/centered means that families have a primary decision-making role in the care of their children, as well as in the policies and procedures governing care for all children in their community, state, tribe, territory, and nation. Family-driven/centered care is the standard of practice which results in high quality services.

Current State of Supporting Families

Historically, until the past decade, families, youth, and consumers of services had to fight to secure a place at the decision-making table, and typically served in a volunteer advisory capacity. Later, some were paid a "stipend" to cover childcare costs, travel related expenses, and income lost due to missed work. As organizations and individuals became more experienced and skilled, and as programs and service providers saw the value of ongoing support, some agencies contracted with family run organizations and leaders as providers of lived experience, peer to peer support for families of children and youth with special needs. States and their communities have taken the task of developing sustainable support as a critical component to the provision of a continuum of services for families of children and youth with special needs. Many are offering funds and resources for family run organizations to provide support services.

Using representatives from lived experience populations has been on an upward evolutionary process for over three decades. Federal, State, and private funding sources require family, consumer, and youth representatives and a shift towards a more family, consumer, and youth driven approach to serving vulnerable populations. Aside from organizational and funding requirements, the inclusion of a lived experience representative to provide family support has multiple benefits.

Across the Country

In **Arkansas** a community based, family run organization was awarded a contract from the state to provide peer to peer home visiting for targeted families of young children at risk for special needs. The organization was given enough funding to train the trainers of home visitors, hire and supervise home visitations, and to manage the program within nonprofit business practices.

In **North Carolina**, the statewide, family run organization for children and youth with mental health needs received a large, state contract to hire, train, and supervise Family Support Specialists with lived experience across the state to work with providers and ensure a family driven approach to service delivery and evaluation.

Lived Experience

The term "lived experience" has been used to characterize consumer and family members whose experiences are likely to match up to individuals currently receiving services. The term can be used to describe the first-hand accounts and impressions of living as a member of a group, such as those who have used mental health services, families who have been involved in the child welfare system or families who received services through a federal or state program. The core concept of supporting families is based upon an embedded lived experience and a peer to peer approach. One or more of the following might describe an individual with lived experience:

- A parent, family member, caretaker who has raised or is raising a child or youth with special needs;
- Willing to share life experiences in a positive manner;
- Has been involved in and understands multiple service delivery systems;
- Can separate both the good and bad experiences and use them to improve the system response to the families they serve;
- Can use experiences to help other families move beyond perceived limitations;
- Can transfer knowledge to build the capacity of the families served/supported;
- Builds their knowledge of systems through interactions with different families and their needs;
- Has an understanding of where and how to get answers regarding identified needs; and
- Persistence in securing necessary resources and information.

Guiding Principles of Supporting Families

The following Guiding Principles were developed to serve as a foundation for supporting families across the state with special needs.

- **Lived Experience:** Support evolves from lived experience, where families have access to persons familiar with the road who understand the questions, worries, joys, heartache, and celebrations that are a part of the journey;
- **Coactive Navigation:** Families build their capacity, confidence, and strength through support and coaching from another parent who can share their experiences when traveling new paths with their child's or youth's diagnosis.
- **Meaningful Connections**: Families build their capacity, confidence, and strength in navigating systems through active support and coaching from another parent.
- **Active Engagement:** Responsive listening and translation is provided through shared experience and serves as a vital component to assist families in a manner that allows them to receive the services necessary to meet their authentic needs.
- **Critical Partnerships:** The system promotes and models family-professional partnerships as a predictable aspect in establishing family identified needs and services.
- **Unbiased Respect:** ALL support recognizes and builds on the strengths of each family member and respects their choices, culture, and beliefs in an impartial and nonjudgmental manner.
- **Sense of Belonging:** Families have peers with similar experiences standing with them as they identify and use their natural networks to promote a sense of belonging.
- **Ongoing Sustainability:** Adequate efforts and resources are identified and available to ensure the continuity and longevity of supporting families for the duration of need.

Supporting Families: A Sampling of Services

Some of the supporting families services that could be offered to families and the systems that serve them includes:

- Serving on care planning teams with families;
- Building the capacity of families to identify and express their needs;
- Advocating and sharing information on the needs of families;
- Developing or editing material that builds the knowledge, capacity, and skills of families;
- Creating special programs or activities to meet family needs;
- Evaluating the program's response to the principles of family, consumer, and youth driven-centered;
- Creating and collecting satisfaction surveys;
- Discussing with families their specific needs and guiding them to resources;
- Serving as a trainer for in-service trainings;
- Representing the families served on workgroups, taskforces, and/or interagency councils;
- Reviewing program policy to ensure sensitivity to the needs and experiences of families served;
- Creating and facilitating family advisory committees;
- Serving as an family advocate or voice at service planning meetings; and
- Serving as a peer mentor to those served when partnering with professionals or navigating the system of care.

Recommendations

In light of the previous discussion, the following recommendations emerged from the group.

- **Families must have access to organizations that represent the lived experience through:**
    - Referrals to supporting family organizations by all child and youth serving agencies and programs within a specified period of time;
    - Systems that use available evidence based, parent to parent models and family driven principles to connect families; and
    - Family run organizations that provide family support through a memorandum of agreement and within the guiding principles of this paper.
- **Support to families must be accessible on all levels of planning, treatment, and evaluation and feature the following:**
    - Statewide coverage without gaps;
    - Transparency that allows families to make choices on what will work best for them;
    - 24/7 availability;
    - Family driven and centered approaches;
    - Opportunities to access culturally competent support that is respectful and responsive to their own beliefs, values, and customs; and
    - Adequate provisions for urgent and emergency support needs.
- **Families are engaged and have opportunities to build their skills as a parent of a child or youth with special needs through:**
    - Agencies and programs that are committed to assisting family run organizations in identifying families that could benefit from additional training and support;
    - Utilization of family run organizations and their expertise to develop and manage training programs for families that are responsive to their identified needs;
    - Annual trainings within the state to build the leadership capacity of families; and the
    - Availability of a formal career ladder for families with lived experience through a rigorous training and certification program.
- **Family support is viewed as a critical and professional service to the well-being of families of children and youth with special needs and demonstrated through:**
    - An examination of the extent to which current supports are aligned with these principles;
    - Ongoing opportunities for funding and resources to ensure that family run organizations have the capacity to sustain the support they offer;
    - Family leaders have regular opportunities to meet with the Governor, policymakers, and agency management to discuss and review the state of the state in family support;
    - During budget discussions, family support will be considered as a viable alternative to more costly interventions;
    - Regular, consistent, and predictable funding from the state; and the
    - Recognition that program management does not constitute family support in itself.

"Overall, there have been fabulous things going on in the state of North Dakota to support families with children with special health care needs. At the beginning of our diagnosis of our daughter, I felt disconnected, afraid, and outnumbered by children who seemed to live lives as "usual." I have felt quite thankful for the groups that I have been a part of and believe they are a vital part of our system."

Next Steps

In an effort to promote the principles and intent of this paper and promote the fidelity of supporting families, we have agreed to the following next steps:

1. Development of a short and long term strategic plan that will outline goals, activities, outcomes, and accountability;
2. Meet with stakeholders and policymakers to establish direction and resource options to finance and sustain family support;
3. Work collaboratively to align our organizations with responsibilities; and
4. Create memorandums of agreement between organizations to minimize competition, repetition, and confusion.

Changing the future,

one family at a time

Executive Summary

North Dakota Family Support;
Sharing Through the Lens of Lived Experience

Research and experience indicates that there is much more to meeting the needs of children and youth with special needs than those services offered by providers. Most services are provided according to strict funding guidelines that dictate the eligibility, type of service, and access; leaving huge gaps to fill in the pursuit of the wellbeing of children and youth with special needs and their families. Meeting the unique and diverse needs of families and their children and youth with special needs can only be accomplished by maximizing contributions of all stakeholders. Family leaders from across North Dakota gathered to discuss how to maximize the capacity of the system and families they serve and their role in targeted support activities that promote the well-being of children and youth with special needs. Through intense strategic planning, the group emerged with a definition, guiding principles, recommendations, and next steps that they feel are critical components of elevating the focus on ensuring and improving the well-being of children and youth with special needs and their families.

Definition of Supporting Families

Supporting families involves the connection to another person who has also raised a child/youth with a special health care need and/or disability and who has a shared life experience. This connection will assure that families get resources and services in ways that are respectful, relevant, and honor their unique choices and perspectives so that they can make informed decisions to achieve the best possible outcomes for their children and/or youth.

Guiding Principles

The following Guiding Principles were developed to serve as a foundation for supporting families across the state with special needs.

- **Lived Experience:** Support evolves from lived experience, where families have access to persons familiar with the road who understand the questions, worries, joys, heartache, and celebrations that are a part of the journey;
- **Coactive Navigation:** Families build their capacity, confidence, and strength through support and coaching from another parent who can share their experiences when traveling new paths with their child's or youth's diagnosis.
- **Meaningful Connections**: Families build their capacity, confidence, and strength in navigating systems through active support and coaching from another parent.
- **Active Engagement:** Responsive listening and translation is provided through shared experience and serves as a vital component to assist families in a manner that allows them to receive the services necessary to meet their authentic needs.
- **Critical Partnerships:** The system promotes and models family-professional partnerships as a predictable aspect in establishing family identified needs and services.
- **Unbiased Respect:** ALL support recognizes and builds on the strengths of each family member and respects their choices, culture, and beliefs in an impartial and nonjudgmental manner.
- **Sense of Belonging:** Families have peers with similar experiences standing with them as they identify and use their natural networks to promote a sense of belonging.
- **Ongoing Sustainability:** Adequate efforts and resources are identified and available to ensure the continuity and longevity of supporting families for the duration of need.

Recommendations

The following recommendations emerged as critical components of advancing family support across the state.

- *Families must have access to necessary connections* though organizations that represent the lived experience, including referrals to supporting family organizations by all child and youth serving agencies and programs within a specified period of time; the use of evidence based, parent to parent models and principles to connect families; and family run organizations will provide family support through a memorandum of agreement and within the guiding principles of this paper.
- *Family support must be made accessible on all levels* of planning, treatment, and evaluation and minimally feature statewide coverage without gaps; transparency that allows families to make choices on what will work best for them; 24/7 availability; family driven and centered approaches; opportunities to access culturally competent support that is respectful and responsive to their own beliefs, values, and customs; and adequate provisions for urgent and emergency support needs.
- *Families are engaged and have opportunities to build their skills* as a parent of a child or youth with special needs through agencies and programs that are committed to assisting family run organizations in identifying families that could benefit from additional training and support; utilization of family run organizations and their expertise to develop and manage training programs for families that are responsive to their identified needs; annual trainings within the state to build the leadership capacity of families; and availability of a formal career ladder for family support providers through a rigorous training and certification program.
- *Family support is viewed as a critical and professional service* to the well-being of families of children and youth with special needs and demonstrated through an examination of the extent to which current supports are aligned with these principles; ongoing opportunities for funding and resources to ensure that family run organizations have the capacity to sustain the support they offer; family leaders have regular opportunities to meet with the Governor, policymakers, and agency management to discuss and review the state of the state in family support; during budget discussions, family support will be considered as a viable alternative to more costly interventions; regular, consistent, and predictable funding from the state; and the recognition that program management does not constitute family support in itself.

Next Steps

In an effort to promote the principles and fidelity of sound family support to ensure the wellness of North Dakota's families of children and youth with special needs, we will develop a short and long term strategic plan that will outline goals, activities, outcomes, and accountability; meet with stakeholders and policymakers to establish direction and resource options to finance and sustain family support; and work collaboratively to align our organizations with responsibilities.

March 11th, 2021
67th Assembly—Senate Appropriations Committee – HB 1012: Section 11 DD funding

Hello Chairman Holmberg and members of the committee,

My name is Jackie Long and I've been getting Section 11 services from Community Living Services for about 9 years now and they have helped me out a lot. My case manager Janice comes every week and helps me with my pills and helps me with my money. If I have appointments she will help bring me to those too. It is difficult for me to make my own appointments—I need a reminder, and Janice makes sure I make it to my appointments and helps me understand my doctor's orders. I've been working at NDSU since 2014, and Janice also helps me with work and financial stuff, and with my benefits when I need it.

My staff Angie helps me go to Walmart, get groceries, and helps me with keeping up my apartment. It's hard for me to get on my knees and scrub the floors, so this helps me out a lot.

Being involved with CLS has helped me get connected with other activities even though I don't have "Day Hab" hours—For example I go to TNT Fitness every Mondays and Wednesdays to exercise.

In the past when I did not have this support, I had an ex-boyfriend take advantage of me with my credit cards and got me into lots of problems. I went into debt, I lost my job, I lost my home and my housing assistance. My DDPM switched me to CLS and it has helped me so much.

I feel secure and better that I know where my finances are at, and that I have someone to help me make decisions about big purchases when I need them. It's helpful to have someone to help guide me in the right direction, and to help me in making good choices and better decisions, and the Section 11 program has done that for me. It would be too much for me on my own; I don't think I could handle it.

I do hope that CLS can continue this service because the people using Section 11 really do need the help. It would be much harder for us if we were on our own and it would be very difficult to manage things. We do need that support and do need you the keep going with these services. If I did not have this service I would probably be so overwhelmed I might have a nervous breakdown, because it would to so hard for me to manage everything on my own.

Thank you for your time, I appreciate all you do.

March 11th, 2021
67th Assembly – Senate Appropriations Committee -- HB 1012: Section 11 DD funding

Hello Chairman Holmberg and members of the committee,

My name is Jackie Krei and I just started receiving Section 11 services in the last year. Before that, I mostly relied on my family to help me with things. My family likes to help me out when they can, but my mom is now 82 and my dad is in his late seventies so it is not as easy for them to help me out as much these days. I have brothers too, but they have to work, and one has a son with disabilities so it can be tough for him too.

With Section 11, my staff Lashelle helps me with groceries and running errands. She also helps me with coordinating my doctor's appointments and helping me get to them. When things settle down with COVID, she is also going to help me find a job.

In high school I was what some would call a "slow learner" and I was in classes for people with learning disabilities. I also have epilepsy, which can be difficult for me to manage on my own. Sometimes I have trouble explaining things, and sometimes I forget things. When I go to doctor's appointments, and I don't know what to say, Lashelle backs me up, and helps me feel more comfortable and more understood.

I ask you to please continue the Section 11 program to help me better stand up on my own, and to accomplish what needs to be done.

Thank you for your time.

Jackie Krei

HB 1012 : Developmental Disabilities Section 11 funding

March 11th, 2021

Good afternoon Chairman Holmberg and members of the Committee,

Thank you for the chance to speak with you all today. Upon hearing that the funding for Section 11 is under consideration to be eliminated, I wanted to share with you what I have experienced in my role as Executive Director at Community Living Services about the necessity for Section 11 services, and I wanted to ensure that you had the opportunity to hear from those most impacted by the decision. Of the 77 people in North Dakota that receive services from the Section 11 program, CLS supports 33 of them. These are individuals that have developmental disabilities, but they do not qualify for other DD waiver services.

In most cases, these are people that would otherwise fall through the cracks, and the minimal services that they receive through Section 11 are a lifeline to health, safety, and community integration. The specific needs of Section 11 program participants may not be related to mental health or physical disability, and therefore those currently served in this program, in many cases, would not be eligible for other supports, like QSP or Behavioral Health Supports.

Many of the people we support in Section 11 have been in the program for many years, and the services each person needs vary based on their individual circumstances. For some, the services include assistance with medical appointments and health care supports. For others, it may be money management and budgeting supports. Sometimes it is help accessing grocery stores and pharmacies. In some cases, they need supports to find and maintain employment. Sometimes it is helping with applications for housing and benefits. Additionally, supports have been needed to assist with the impact of the Covid-19 pandemic. In all cases, Section 11 services improve the quality of life for the people receiving it.

Although the current funding for the Section 11 program does not cover the total expense of the providing these supports, we recognize that this program is so significant to its participants, that we are happy to advocate to maintain the current level of funding, so that these individuals are not left without support.

One or two hours of support a week might seem insignificant or dispensable, but to people in the Section 11 program these are crucial. They can protect people with developmental disabilities from unemployment, homelessness, hospitalization, institutionalization, food insecurity, and discrimination.

I urge you to maintain funding for the Section 11 program, so that North Dakotans with disabilities do not lose the supports that mean so much to them.

I greatly appreciate your time and am open to any questions you may have.

Brooke Austin
Executive Director of Community Living Services, Fargo

Senate Appropriations Committee

Testimony on House Bill 1012

Senator Ray Holmberg – Chairman

March 11, 2021

Chairman Holmberg and members of the Senate Appropriations Committee, my name is Donna Byzewski and I am the Program Director of the corporate guardianship program at Catholic Charities North Dakota. I am respectfully asking your committee to approve funding as detailed in the Developmental Disabilities Division budget for corporate guardianship services for people with intellectual disabilities. To continue providing quality services to meet the needs of current and future clients, we respectfully ask for a cost of living increase of 3% for the first year of the biennium and 3% for the second year.

The court appoints a guardian when a person's capacity to make decisions is compromised and he or she is at risk of neglect, abuse and exploitation. It is important to note that many adults with intellectual disabilities are their own decision maker. However, there are critical times when the person may need the services of a guardian, and if no one else is available or appropriate, a corporate guardianship is a necessity. Corporate guardianship is the guardian of last resort. Our contract specifies that Catholic Charities ND can only accept referrals from Developmental Disabilities Program Managers from the regional human service centers in North Dakota.

In the past 20 months, we have admitted 71 individuals to our program. We have made great strides reducing our waiting list for services. One year ago, our waiting list was at an all-time high of 126 people and our current list has the names of 92 persons. The reduction is primarily due to the additional legislative funding we received for 20 new slots/openings on 7/1/19. This has had a tremendous impact on the lives of people who were on the waiting list and I sincerely thank you for making this happen!

Our request for the next biennium is as follows:

7/1/21 to 6/30/22	489 wards x $8.37 x 365 days = $1,493,919 489 wards x $0.25 (3% COL) x 365 days = $44,621	$1,538,540
7/1/22 to 6/30/23	489 wards x $8.62 x 365 days = $1,538,540 489 wards x $0.26 (3% COL) x 365 days = $46,406	$1,584,946
7/1/21 to 6/30/23	Petitioning costs	$89,555
	Total for FY 2021 & FY 2022	**$3,213,041**

The request that we are submitting is bare bones, allowing us the capacity to meet the needs of 489 wards during the next biennium. We realize that the Department of Human Services' budget is tight but the requested funding will help assure that we have the staff and resources to meet the complex health and safety needs of the individuals we serve. Thank you for the opportunity to stand before you today and I would be happy to answer any questions you may have.

Testimony for the Older Individuals Who Are Blind (OIB) Program Appropriation within HB1012.

To: Chair Ray Holmberg, and Members of the Senate Appropriations Committee, North Dakota 67th Legislative Assembly.

From: Allan Peterson, Legislative Committee, North Dakota Association of the Blind (NDAB).
Home address: 7009 Horseshoe Bend, Horace, ND 58047.
Home: (701) 282-4644; cell: (701) 429-7209; Email address: allan.c.peterson@gmail.com

Re: Testimony in support of the state Appropriation for the Older Individuals Who Are Blind (OIB) Program within the Division of Vocational Rehabilitation, North Dakota Department of Human Services

Greetings Chairman Holmberg, and members of the Senate Appropriations Committee,

We are testifying on our own behalf, as well as to help represent the advocacy goals of the North Dakota Association of the Blind (NDAB). Our testimony is directed in support of the Appropriation for the Older Individuals Who Are Blind Program within the Division of Vocational Rehabilitation for its operation during the next biennium of 2021 - 2023.

In North Dakota, the Older Individuals Who Are Blind Program is administrated by the Division of Vocational Rehabilitation within the Department of Human Services. Funding for the program is generated through a 90% grant from the federal government which requires a minimum state appropriation of 10%. Federal funding for the program is authorized under the U.S. Rehabilitation Act.

Federal funding for the Older Individuals Who Are Blind program is allocated to the states on the basis of population size. Because North Dakota's population base is small in comparison to other more populated states, it receives what is termed a minimal allocation. Minimal federal funding is a problem for the program here in North Dakota because our state is geographically large in relation to its population size, which necessitates a lot of travel to meet with clients in their homes. Also, our state has a higher proportion of people in the older age ranges, which experience a much higher incidence of sight loss. The Older Individuals Who Are Blind Program is specifically directed to serve individuals who are 55 years of age and older.

Although there have been many significant advances in eye care, sight problems such as macular degeneration, diabetic retinopathy, glaucoma, and cataracts continue to be primary sources of vision impairments and blindness, particularly, for persons who are 55 and older.

The professional staff which are trained to provide the services for the Older Blind Program are classified as vision rehabilitation specialists. In North Dakota there are 6 vision rehabilitation specialists assigned to work in each of the state's 8 defined Human Service regions. Vision specialists, employed in the older blind program, travel to a client's home to do an assessment of needs and provide the services and counseling that is needed in that person's home environment and is individualized to meet client needs. The services of this program have helped thousands of our older citizens who have experienced severe sight impairments to become more independent and enjoy a more productive and fulfilled life in spite of having lost some or all of their eyesight.

The skills and aids that the vision rehabilitation specialists provide to older citizens with sight loss, is often quite an (pardon the pun) "an eye opener" which does much to help them stay in their own homes and postpone or avoid institutionalized nursing home care. The cost savings that are gained by postponing or avoiding institutionalized care and the increased sense of wellbeing and dignity that are realized by being more independent are compelling reasons for the state to provide the appropriation needed for this program in North Dakota. In most instances, the clients served are elderly and live on very fixed incomes so for them to purchase a vision aid that would help them is difficult or impossible.

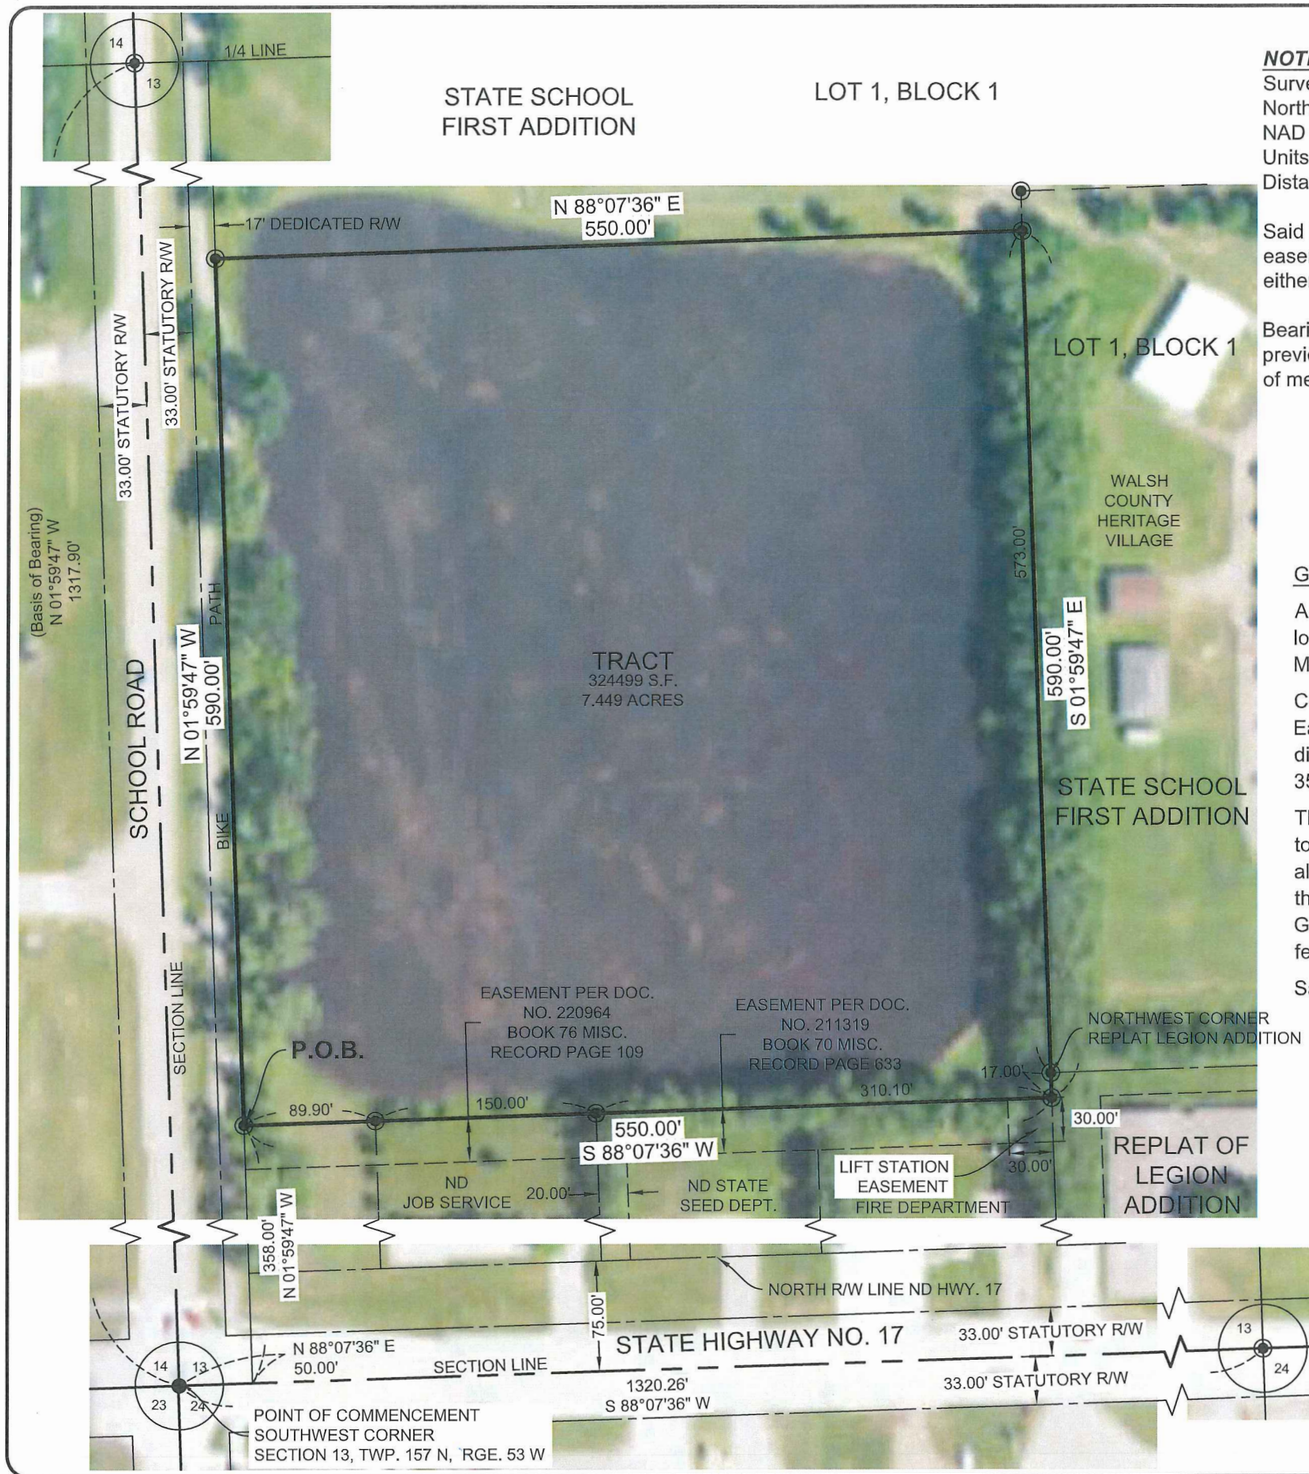
The rural character of our state and limitations on access to public transportation can mean those who experience severe sight loss are isolated and very dependent on others.

You might ask, among us in ND, **how many today have a loss of eyesight**? The U.S. Senses Bureau estimates that presently there are approximately 762,062 residents in North Dakota. Many credible studies have demonstrated that, conservatively, that **3.3%** among the general population, will have conditions that mildly, moderately, or severely medically compromise their eyesight – this means that more than 20,000 individuals in North Dakota are affected by uncorrectable sight loss - a quarter of whom (5,000) have significant sight loss and/or are "legally blind".

About North Dakota Association of the Blind (**NDAB**): You could say that NDAB is an organization of and for people who are blind or sight impaired. We are a statewide membership organization founded 85 years ago in 1936, a majority of our members are blind or sight impaired.

LEGAL DESCRIPTION

GRAFTON FIRE DEPARTMENT PARCEL



A parcel of land located in part of Lot 1, Block 1, State School First Addition to the City of Grafton, which is located in the SW ¼ of the SW ¼ of Section 13, Township 157 North, Range 53 West, 5th Principal Meridian, more particularly described as follows.

Commencing at the Southwest corner of Section 13, Twp. 157 N., Rge. 53 W., 5th P.M.; thence in an Easterly direction, along the South line of said Section 13, on an assumed bearing of N 88° 07' 36" E, a distance of 50.0 feet; thence N 1° 59' 47" W, and parallel to the West line of said section 13, a distance of 358.0 feet, to the point of beginning [P.O.B.]

Thence continuing N 1° 59' 47" W, a distance of 590.0 feet; thence N 88° 07' 36" E, a distance of 550.0 feet, to a point on the West line of land owned by the Walsh County Heritage Village; thence S 1° 59' 47" E, along said west property line, a distance of 590.0 feet, to a point 17.0 feet south of the Northwest corner of the Replat of Legion Addition to the City of Grafton; thence S 88° 07' 36" W, along the North lines of City of Grafton, North Dakota State Seed Department & North Dakota Job Service properties, a distance of 550.0 feet, to the point of beginning. [P.O.B.]

Said parcel of land contains 7.45 acres, more or less.

Grafton, ND 58237

RE: Report for the Grafton Fire Department Study

Dear Chief Popiel, Board Members, and Firefighters:

We enjoyed working with you to evaluate your current fire stations and plan for the long-term needs of your department. The attached report shows our findings. This report should allow the City and Department leadership to make informed decisions about the most appropriate course of action for the community.

The goal of the study was to identify multiple planning options that will support efficient and highly-functional operations for current and future staffing, that compare appropriately to projects that nearby communities have undertaken, that are economically responsible, and that are in-line with the broader planning goals for the City of Grafton.

The process included the following steps:

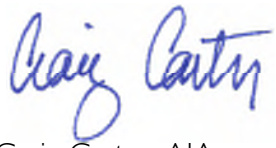
Existing Conditions Review – We studied the original construction documents and physically toured the existing spaces being utilized by the department and developed a list of physical and functional deficiencies, including deficiencies with regards to NFPA Compliance and a list of functional concerns.

Programming – We met with the department to discuss the rooms and spaces required to function effectively. We looked at demographic trends to understand the impact that future development might have, and we created a program of spaces for the project based on national standards, the stated needs of the Department, and our professional experience..

Potential Site Review – We reviewed the community for potential station locations, including existing locations, new downtown locations, and a parcel north of Station 102.

Masterplanning Concepts – We produced three building program options (a large, a medium, and a small footprint) and examined each to understand impacts of size and functionality on the department and the potential project budget.

Project Implementation Review – We provided conceptual level review of the project schedule and project budget.



This report lays of the results of each of these steps for public record and provides the basis for informed decision making as the project moves forward. Thank you again for the opportunity to serve the Grafton Fire Department. Please feel free to contact us should you have any questions about this report.

Sincerely,

BKV Group, Inc.

Executive Summary

BKV Group was retained in early 2016 to review the conditions of the Grafton Fire Department facilities, assess the future needs of the Department, and recommend how to move forward.

There is very limited space at both Station 101 and 102 and both buildings are showing their age. Station 101 was built sturdily, but the size and configuration of the spaces are not consistent with a modern fire department and cannot be easily modified. Station 102 has exceeded the expected lifespan of a pre-engineered metal building. Both buildings would require significant investment into physical repairs to remain reliably operational over the next ten years.

There are several operational issues at each location that put firefighters at risk of injury or illness. Most concerning are as follows:

- The lack of proper decontamination/ shower facilities to allow firefighters to remove contaminants before bringing them home to their families.
- The tight physical spaces which, combined with backing into the apparatus bays, poses risk of a firefighter getting pinned by a truck.
- The lack of compartmentalization between apparatus bays and office/ living areas, which allows diesel pollutants to permeate the buildings.
- The location of the man door into Station 101 requires that responding firefighters cross the path of apparatus leaving the station.
- The lack of dedicated space for exterior prop training adjacent to classroom training.
- The lack of a physical conditioning room for cardiovascular and strength training exercise.
- The lack of modern electronic safety sensors for CO monitoring, stopping overhead doors due to obstruction, etc.

In addition to these operational concerns, there are code deficiencies (e.g. lack of separate restroom facilities for women), accessibility issues (e.g. wheelchair clearances, protruding objects), and risk management concerns (e.g. storage in apparatus bays, lack of sprinkler systems).

Finally, there are operational complications associated with the Department operating out of two locations. There are duplicated expenses, duplicated equipment, transfer time back and forth, and concerns about enough staff responding to the station with the appropriate equipment for the emergency in question, delaying response when seconds count.

Based on national standards, interviews with the Fire Department, and our experience, BKV Group assembled three potential building programs for consideration.

- Program A, at 34,379 square feet, represents a 9 bay fire station with training and fitness spaces, amenity spaces for the firefighters to aid recruitment and retention, and a new 800-person community hall facility with associated storage, kitchen, restrooms, and mechanical spaces.
- Program B, at 24,809 square feet, represents an 8 bay fire station with classroom training, physical training, and fitness spaces in line with national standards.
- Program C, at 18, 628 square feet, represents an 8 bay fire station with tighter bays and only the minimal functional elements to support the workflows of the firefighters and to provide for their safety and welfare.

BKV Group looked at potential expansion at each existing station location, but the sites are poorly suited to the size of a combined station. A combined station could be placed downtown if a full city block could be acquired,

but stormwater detention would need to be accommodated underground and some building elements might move to a second floor, which increases project costs significantly. A combined station would easily fit on the State-owned land directly north of Station 102, including space for a future training tower and a Community Hall with associated parking.

A new station would take approximately 9 months to design and another 12 months to bid and construct. Construction costs could vary depending on the materials used. A pre-engineered metal building might cost ~$113 per square foot while brick over CMU with metal roofs and high-performance building systems might cost ~$308 per square foot. Assuming a new station of 25,000 square feet (Program B) that starts construction in 2017 and that the department elects to pursue a middle-of-the-road construction quality, BKV Group recommends planning for a construction cost around $5,400,000. Total project costs would be on the order of $6,500,000 which includes a healthy contingency. Construction costs escalate over time, so we recommend planning for an additional 4% of costs each year.

Until the Department can define a project budget, these numbers remain somewhat arbitrary. Both the size of the station and the quality of construction can be adjusted to accommodate funding realities once those are known. BKV Group recommends working with the City of Grafton, Walsh County, and the State of North Dakota for potential funding assistance. We also recommend investigating low-interest loans through the USDA and any local sources of grant funding. An understanding of the cash flows that can be used to pay down the loan is the first step to understanding the budget capacity of the Department.

A project such as this is dauntingly expensive, but an architect experienced in fire station projects can help limit costs, separate elements for grant funding, plan for phasing the project over time, and provide advice about self-performing some of the work if volunteers want to help construct the facility.

While BKV Group has not met with the Grafton Police Department to perform a study similar to this one, we are aware of space concerns in the building the Police share with the County Sheriff. If the Police were interested in moving into a combined public safety building, we roughly estimate an additional 8,000 square feet of building, which translates into $1,800,000 of additional total project cost. By constructing a combined facility as opposed to two separate buildings, the citizens of Grafton would save ~$750,000 of project costs.

Next steps for the Fire Department should include:

- Meet with the City about the combined public safety concept and any potential City financial contributions to the project.
- Make this report available for the general public and set up times for the public to visit the Stations and observe the conditions firsthand.
- Examine the likelihood of being able to acquire a full city block downtown without displacing residents or businesses and without taking on any environmental contamination liability.
- Meet with the State to determine availability of the land north of Station 102 and the disposition of the Station 102 property once the Department moves out.
- Obtain an architect's sketch of the potential project for use in a public awareness campaign.
- Meet with a financial advisor to determine the ultimate capacity of the Department given all funding sources.

Existing Conditions Assessment

The purpose of this section of the Study is to document the condition of the two Grafton Fire Department buildings. This information provides the necessary data to enable the City to make informed decisions regarding how to best address any repairs, upgrades and/or replacements as part of the City's long range planning. There are two components to the Existing Conditions Assessment:

An on-site *Physical Condition Assessment* of the building was performed to determine maintenance issues, safety and code concerns, remaining useful life for the building systems and finishes, and to review how current conditions affect building system operations and energy costs.

A *Functional Assessment* was performed through observations and discussions with key staff. It determined how existing building conditions are affecting staff operations and the ability to serve the community. The Functional Assessment also examined how present operations and workflows compare to current recommended best practices in the industry.

The assessments are intended to provide an indication of the capital maintenance requirements, potential code and regulatory required upgrades, and other building conditions which should be considered as part of the facility's general upkeep as well as part of any building project. It is beyond the scope of this study to provide detailed cost estimates of these interventions, nor does this study address areas of the building that are concealed behind walls or locked doors.

Fire Station 101 Building Description

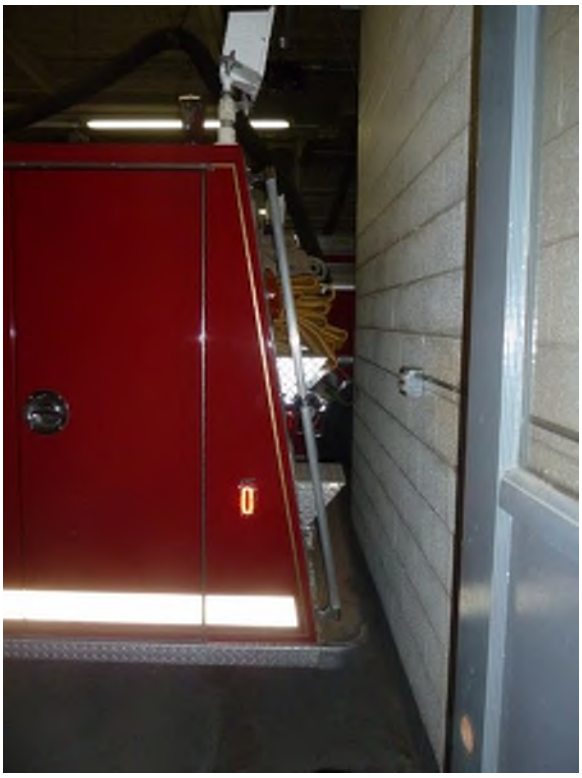
Station 101 is located in the City Hall building at 5 East 4th Street. The City Hall was constructed in 1938 as an addition to the existing Fire Hall and Power Plant. The portion of the building currently occupied by the fire department is the pre-1938 portion. The fire department occupies ~4,125 square feet on the ground level and has ~1,400 square feet on the second floor for their "Firemen's Hall." The exterior walls are constructed of brick masonry with plaster on the interior face. Most of the original window and door openings have been bricked up. The roof is wood plank decking over metal joists. The fire station has hydronic unit heaters and an air filtration system for exhaust extraction. The Firemen's Hall has radiator heat.

Fire Station 102 Building Description

Station 102 is located at 845 West 12th Street. It was constructed in 1984 and totals 4,500 square feet on the ground floor with a storage mezzanine of approximately 1,000 square feet. The building is constructed as a typical pre-engineered metal building with girts and purlins spanning between the main steel members. Exterior metal wall panels are fastened over a layer of 4" fiberglass batt insulation with exposed fasteners. The standing seam roof is fastened to the purlins through a layer of 4" fiberglass batt insulation. The building has a 200 amp electrical service and is heated with electric resistance unit heaters and in-floor electric radiant heating installed in the 12" sand base below the slab.

No sprinkler system

Flammable cabinet bent, no longer able to contain fumes



No photo-eyes on bay doors, creating pinning/ crushing hazard

SCBA repair and cleaning area takes place in dirty environment

No exhaust removal system in maintenance bay

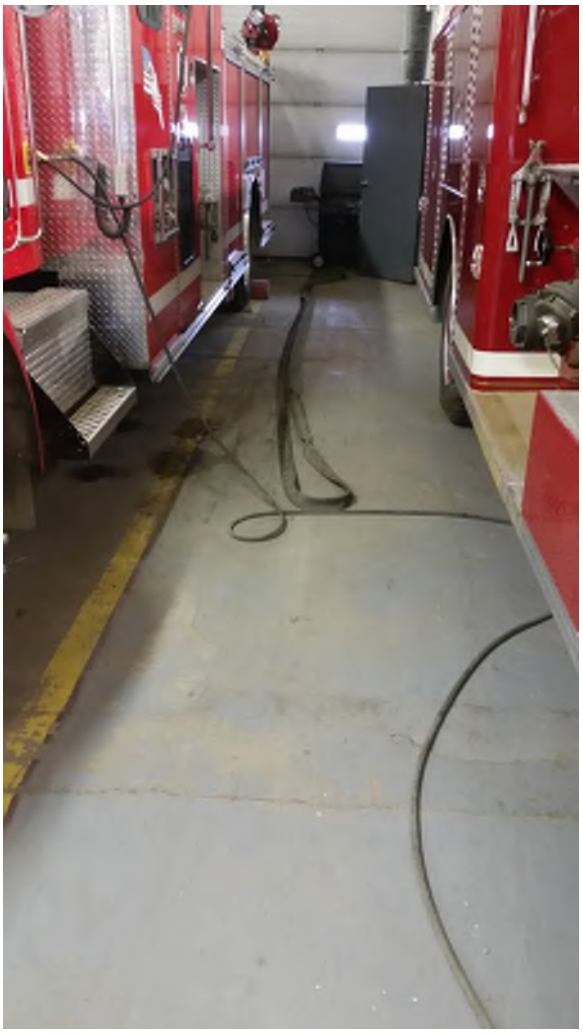
Insufficient walking space around apparatus

Insufficient space for maintenance shop, too close to fire apparatus

Insufficient decontamination space for SBCA masks and equipment

Pedestrian entry into station during a call crosses apparatus response path

Only one means of egress from Firemen's Hall



Unseated electrical cover plates

Limited floor drains and insufficient slope results in pooling water and slip hazards

Equipment stored in front of electrical panels

Shore lines laying on floor create tripping hazard

Turnout gear stored on bay walls too close to apparatus. Solid panels at gear lockers restrict evaporative drying of turnout gear

Ladder to hose drying not secured

Station 101 Repair/ Maintenance Issues

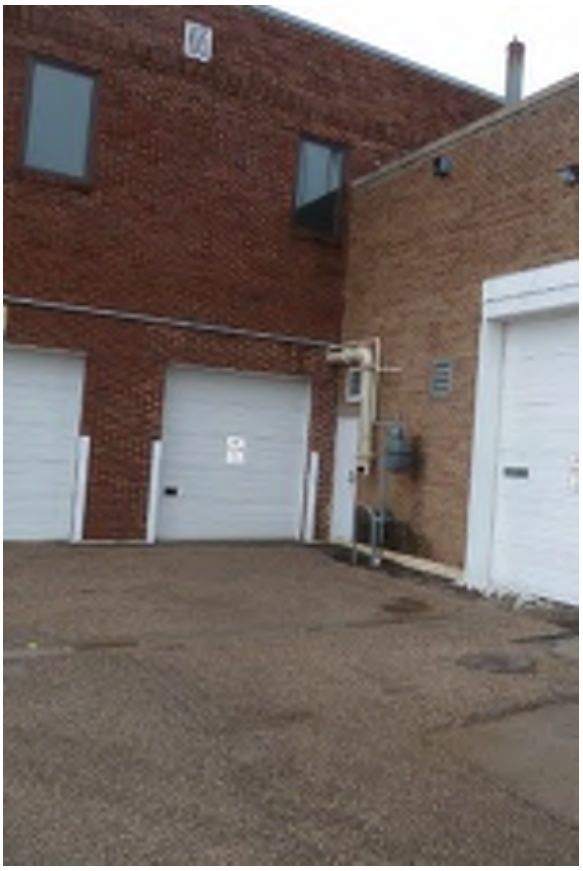
Roof due to be replaced next year

Cracks in floor, some down to rebar

Weatherstripping at rear apparatus door needs replacement

Mechanical exhaust system motor needs maintenance

Exterior needs tuck pointing at parapet above the bay doors



Exterior needs tuck pointing along the north wall

Apparatus door jambs need to be re-caulked

Kitchen casework in Firemen's Hall past the end of its useful service life

Client reported leak under window of Firemen's Hall

Roof drain discharges water at building wall, creating environment for molds and lichen and causing brick to spall and deteriorate

Grading at rear apparatus door slopes towards building

Wood framing below shower pan not protected from moisture and shows evidence of disintegration

Asphalt past the end of its useful service life. Exhibiting potholes, cracks, disintegrating top layer

Fixtures and finishes in toilet room past the end of their useful life

Plaster cracking and falling off interior walls

Ceiling tiles loose at Firemen's Hall

Carpet at Watch Office past the end of its useful service life

Shower area degraded to the point of uselessness

Station 101 Building Code Issues

Fuse box serving Firemen's Hall no longer code compliant

Access to fire boat in basement through door directly onto ramp

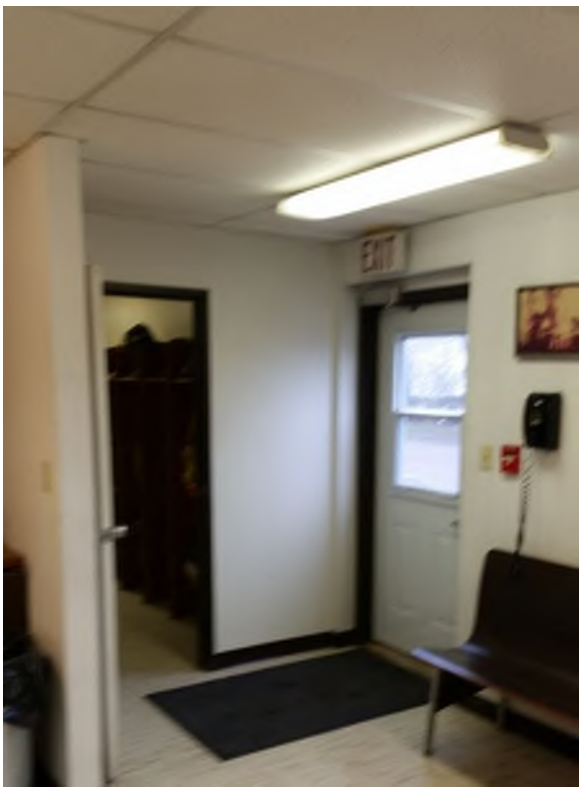
No separate restroom facilities for men and women

No evidence of code required sand trap/ oil separator from apparatus bay drains

No code required ventilation in office

Station 101 Accessibility Code Issues

Kitchen appliances, casework, and fixtures not accessible



Toilet room not accessible due to step

No wheelchair maneuvering clearance at the doors to/ from corridor

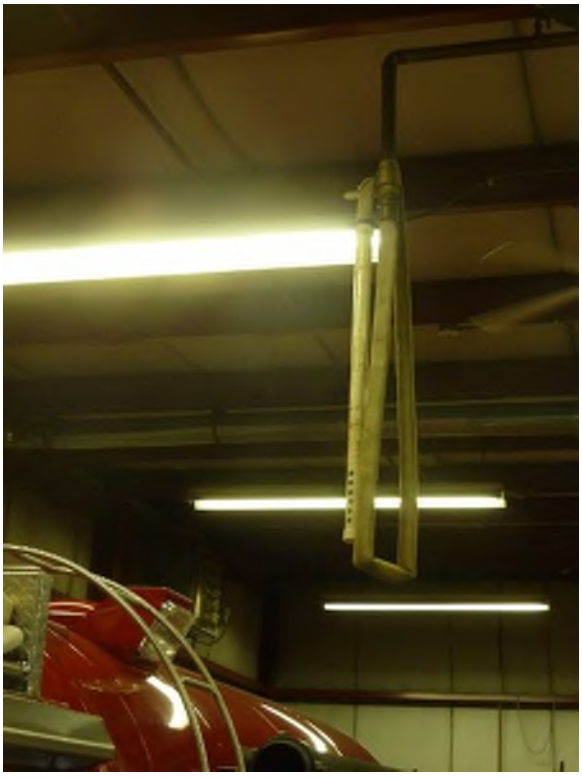
Station 102 Occupant Safety Issues

Exit lights are not operational throughout the facility

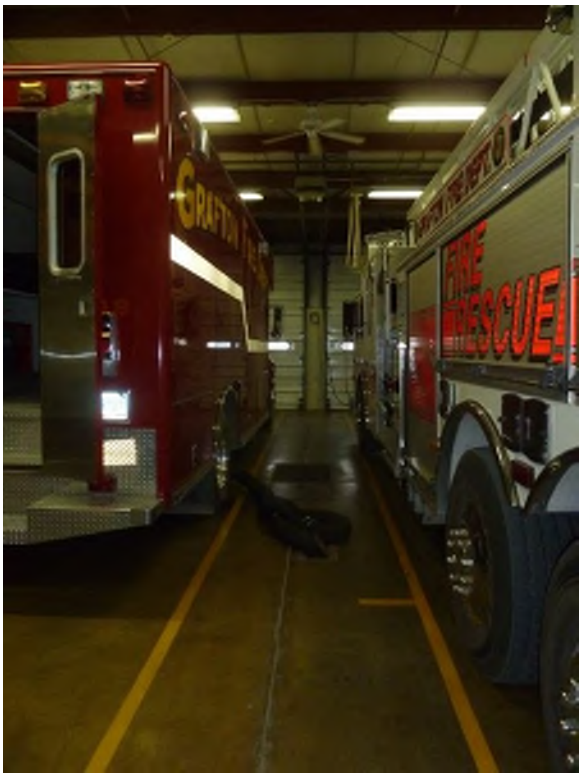
No exhaust provided in turnout gear storage room to capture off-gassing toxins

Solid panels at gear lockers restrict evaporative drying of turnout gear

Insufficient space for maintenance shop, too close to fire apparatus



Direct capture tailpipe exhaust requires climbing over apparatus to attach, and lack of seal at attachment point allows some exhaust to escape into the space



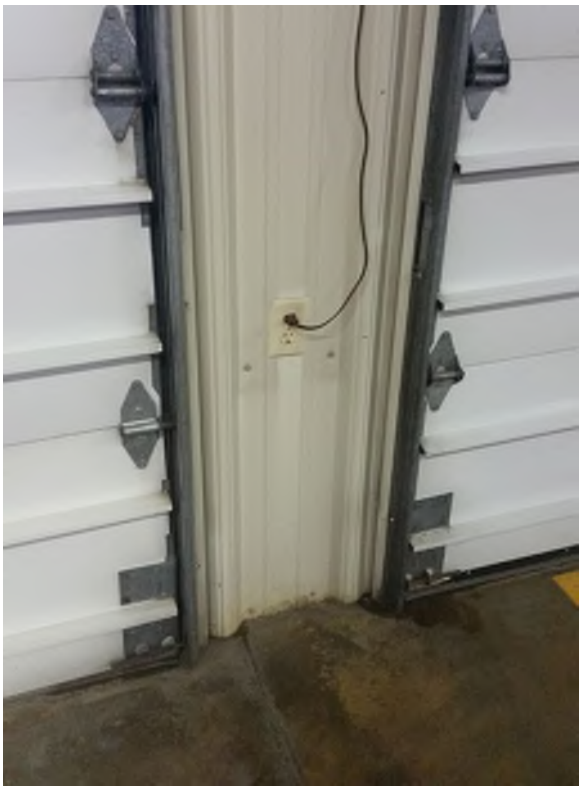
Limited floor drains and insufficient slope results in pooling water and slip hazards

Center column in apparatus bay creates pinning/ crushing hazard by backing apparatus

Overhead truck fill requires climbing on apparatus to operate

Underslab exhaust hose creates a tripping hazard

Oil pit grating not flush with surrounding concrete, creating a trip hazard



No sprinkler system

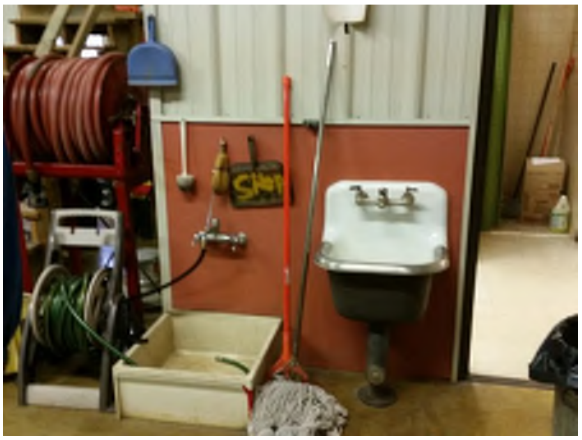
Rear door stoop has separated from building

Concrete has cracked and settled in apparatus bays, creating trip hazard at joints

No photo-eyes on bay doors, creating pinning/ crushing hazard

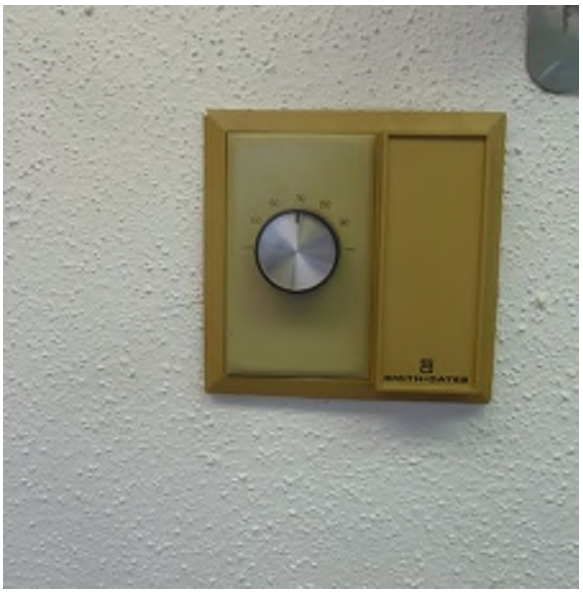
Sidewalks heaving/ settling compared to stoops, creating trip hazard

Southwest downspout discharges across sidewalk, creating potential for ice formation



Insufficient walking space around apparatus

Electrical equipment not protected from vehicle traffic by bollards



Apparatus apron is too flat, creating water ponding issues that may freeze and create slippery conditions for apparatus exiting

Insufficient decontamination space for SBCA masks and equipment

Station 102 Repair/ Maintenance Issues

Client reports that in-floor radiant heat system broken

Cracked light fixture lens in watch office

Evidence of roof leaks at ceiling tiles. Client reports having repaired roof several times.

VCT showing signs of distress with gapping at joints and crushing at turnout locker partitions, nearing end of useful service life

Exhaust fan needs maintenance, rebalancing

Stove and cabinets at end of useful service life

Ceiling tiles exhibit significant sag and are at end of useful service life

Shower needs re-grouting and new curtain

Water valve broken at street, creates water hammer problems inside building

Concrete floor in apparatus bay showing signs of deterioration

Spray foam insulation exposed on exterior

Grade slopes towards footing at north wall

Southwest downspout damaged and leaking down face of building

Asphalt at parking lot past the end of its useful service life. Exhibiting potholes, cracks, disintegrating top layer

Glazing panels in sectional overhead doors have large gaps at seals

Bottom of metal wall panels beginning to deteriorate

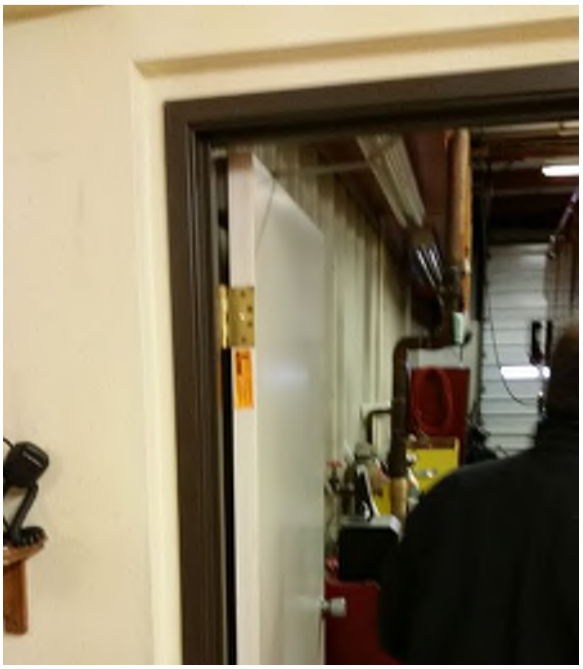
Spalling at concrete footing wall at northeast corner of building

The west side of apparatus door closest to the office is damaged

No visible flashing at base of wall condition - allowing water into wall system

Sealant failing at all locations – needs to be re-caulked

Weatherstripping at overhead doors damaged and needs replacement



Station 102 Building Code Issues

No separate locker and toilet facilities for females

No code required ventilation in office

Fire rated doors held open by door stops

Staircase has open risers and non-compliant handrails/ guardrails

Exterior stoop at west side not flush with interior floor slab

Exterior electrical outlets do not comply with current Electrical Code

Exterior electrical outlet missing weather protection cover

Station 102 Accessibility Code Issues

Door knobs not ADA accessible

No wheelchair maneuvering clearance at the four doors to/ from corridor

Kitchen appliances, casework, and fixtures not accessible

Fire alarm panel is protruding object

Radio shelf is protruding object

No detectible warning features between sidewalk and parking spaces

Lavatory, shower, urinal, and toilet not accessible

No 5'x5' pad at entry doors

Station 102 Energy Use Issues

T12 fluorescent light fixtures are inefficient compared to T8 fluorescent fixtures or LED fixtures

Roof and wall insulation compressed at each girt and purlin, rendering it less efficient at resisting each transfer

Frequent tears in vapor barrier at ceiling/ walls throughout facility allows moisture into batt insulation, rendering it much less efficient at resisting heat transfer

No make-up-air for exhaust system requires exterior doors to be propped open when exhaust is operating

Functional Issues

Responding to Calls

The flow of responders from the parking lot to the turnout gear storage room is arranged well at Station 102, but the tight spaces and trip hazards within the apparatus bays makes getting to the apparatus difficult and unsafe. At Station101, there is no parking dedicated to firefighters and once parked, they must pass in front of the apparatus doors to access the station, putting them at risk of being hit by a truck hurrying out to a call. Once inside the bays, firefighters have to stand uncomfortably close to the apparatus to don their turnout gear.

Responding to certain calls takes extra time because apparatus are stacked in the bays and the vehicle in front must be moved first. At Station 101, most of the apparatus has to maneuver within the apparatus bay to head out the one overhead door. Once out the door, there is not enough depth to the apron to allow the truck to pull completely out of the building before stopping at the curb to wait for traffic to clear. The fire boat is stored in the basement of City Hall. To retrieve it, a pickup truck must be backed down a steep ramp, connected to the boat trailer, and then driven back up. This adds minutes to response times.

Upon returning from a call, the trucks must be carefully backed into the buildings. This process comes with real danger to the personnel assigned to stand outside the vehicle and guide it into place. In many cases, there are inches between the rigs and the rear walls of the building because there simply isn't enough length. The proximity within which the vehicles are parked to each other, the walls, the center column at Station 102, and other functional spaces creates significant risk to for getting personnel or equipment accidentally pinned by the apparatus. At Station 102, the apparatus doors are only 12' wide, which increases the likelihood that backing apparatus will contact the door jambs. At Station 101, the apparatus are forced to block the street, then back in at an angle before finally cutting the wheels and straightening out. The direct tailpipe exhaust capture systems, which are provided for some but not all parking spaces within the bays, require clambering up the side of the rigs, reaching for the exhaust hose, and manually sleeving it over the hot exhaust pipe. This process creates a risk for falls and burns, and since it cannot be completed until the vehicle is parked, does not prevent the first few minutes of diesel exhaust from flooding the room.

Low apparatus door heights at both stations will prevent the Department from purchasing the next generation of Aerial vehicles without expensive customizations to reduce heights.

Cleaning and Decontamination

There is no dedicated decontamination space for cleaning equipment after a call and there are insufficient facilities for the entire crew to shower within a reasonable time frame. There are no accommodations for female firefighters to use the restroom or shower at Station 102, and the single restroom at Station 101 is in such bad repair that it is seldom used. There are no personal lockers to allow storage of a clean set of clothes at the station, and there are no laundry facilities to wash the clothes worn under the turnout gear.

Washing the fire apparatus is important to extend the lifespan of the vehicles. Unfortunately, it is very difficult to wash when there is little clearance between trucks, and soapy water pooling on the floor due to lack

of drains and proper slopes makes the process risky.

Currently firefighters are putting themselves and their families at risk by bringing contaminants home from the fire scene. There is no separation between "dirty" and "clean" areas at Station 101, and in fact the only spaces that aren't directly open to the exhaust and fire ground toxins of the apparatus bays are the unused restroom and the watch office, which sits inside the apparatus bays, has no separate mechanical system, and has carpet on the floor that absorbs all of those harmful chemicals and transfers them to the shoes of the firefighters. The separation between "dirty" and "clean" at Station 102 has been defeated by door hold-opens, which are used because the doors swing the wrong direction or are in space to narrow to use comfortably.

Storage space at both buildings is insufficient, as evidenced by the amount of equipment on the perimeter of the apparatus bays. This makes cleaning the Apparatus Room very difficult and results in accumulation of harmful diesel particulates on the wall and floor surfaces, as well as on the equipment itself. Some storage rooms require shuffling sideways along the shelves to get access to items at the far end of the room. Maintenance shop spaces are undersized for the types of tasks required to keep the small equipment running smoothly.

Modern turnout gear is extremely effective at protecting firefighters from heat, smoke, and water. However, it must be well-cared for to be effective. This requires storing it apart from diesel exhaust contamination, away from all sources of UV light and especially sunlight, exhausting the space to prevent off-gassing toxins from resettling on the gear, being properly washed and dried, and allowing for final drying with specially designed locker systems.

Gathering and Training

There is an assembly space at Station 102 where firefighters can gather to wait for the next truck to leave or after a call to debrief, but there is no similar space at Station 101. Instead, firefighters gather around the Watch Office, standing in the apparatus bays.

Training space is sufficient at Firemen's Hall, but there is little space for exterior hands-on training after a classroom-style session. When inviting neighboring departments for a joint training session, the Hall is difficult to find, gets crowded quickly, and parking is inconvenient.

The Department runs a very successful Steak and Lobster dinner every year as a fundraiser, but is forced to host this event at the Winter Sports Arena because there is no other space in town large enough. This artificially restricts ticket sales and suggests that there may be a demand in town for a larger community banquet hall.

There is no physical conditioning space at either fire station. The majority of line-of-duty deaths in the fire service are due to heart attacks while on a call or shortly after returning. Preparing for the stress and physical exertion required for the job is critical to the long term health and safety of the firefighters. A dedicated room for fitness equipment is also an excellent amenity to aid recruitment.

Locations

Station 101 is located in close proximity to active railroad tracks. A derailment might seriously damage the building and the apparatus within, preventing the department from effectively responding to the incident. Station 101 is also located within the flood zone and has needed sandbagging to protect it from water damage. This effectively takes

the station out of service until the floodwaters recede. It is recommended that any new facility be located above the flood elevation and a safe distance away from the railroad tracks.

Station 102 was built because the department was out of space at Station 101, not because the community size dictated two stations for response time coverage. That decision bought the department another 30+ years, but now both stations are out of compliance with NFPA and OSHA standards, with building codes, and with fire service industry standards intended to improve firefighter health and safety.

The fact of two stations has created some functional issues for the department. Hose and gear drying can only be accomplished at Station 101, for instance. All hose cleaning occurs at Station 101, and it is transported back to Station 102 later. In some cases, having two stations has necessitated a doubling of equipment – multiple washer/ extractors, workshop tools, office furniture, backup generators, kitchen appliances, traffic control signalization, lawn mowers, snow blowers, etc.

Perhaps most critically for a small volunteer department, there are situations where the minimum number of firefighters to staff a truck might not be met at either station, but if the firefighters were all responding out of the same station, the minimums would be exceeded.

NFPA Compliance

The National Fire Protection Association (NFPA) creates and updates the national standards addressing many aspects of the fire service industry. The standards are developed through an open and consensus based process, and represent the collected knowledge of the nation's firefighters and allied industries. Many of the standards have an impact on the physical space that fire departments occupy. Both Station 101 and Station 102 are non-compliant with several of these national standards.

NFPA 1500 requires that fire stations be in full compliance with all applicable health, safety, building, and fire codes. The stations do not achieve that, as previously discussed.

The stations are non-compliant with NFPA 1500 in several ways. They lack CO monitors in the living areas, they do not prevent exposure to exhaust emissions, they do not have space for effective central record keeping for written policies, standard operating procedures, risk management plans, occupational safety and health plans, incident records, meeting minutes, etc.

The stations lack a fitness room in support of the Health-Related Fitness Program required by NFPA 1583. Access to fitness equipment can be provided out-of-house.

The stations lack in-house training capabilities to address the requirements of NFPA 1500, NFPA 1720, and various other NFPA standards. These can be addressed at fire school or other offsite locations, but annual training of each skill set is required and can be difficult for volunteers to achieve without local training options.

The stations are non-compliant with NFPA 1581. The stations lack facilities for effectively drying PPE, PPE storage areas are not well-ventilated, and Station 101 does not comply with the prohibition of natural light exposure for PPE.

The stations lack adequate space for performing SCBA maintenance and inspections per NFPA 1852. This service can be performed by a third-party if the budget allows.

The stations lack testing assemblies for the required annual checks of various equipment - hose and nozzles per NFPA 1962, ladders per NFPA 1932, power rescue tools per NFPA 1936, apparatus mounted pumps per NFPA 1901, and SCBA fit testing per NFPA 1852 and 29 CFR 1910.134. These services can be performed by a third-party if the budget allows.

The stations are non-compliant with NFPA 1581 in several ways. Both lack appropriate handwashing facilities for decontamination before entering the living areas. The kitchenette in Station 102 does not have functional appliances, a double basin sink, or a sprayer attachment. Neither kitchen area has appropriately non-porous surfaces for storage of kitchenware. The restrooms provided for firefighters at each station do not meet plumbing code standards. There are no dedicated and physically separated decontamination spaces in either station for the cleaning of PPE, portable equipment, and other clothing. Neither station has a PPE dryer to go along with its PPE washer/ extractor.

Space Requirements Study

BKV Group conducted a planning workshop to understand the current policies and procedures of the department and identify the goals a new station should achieve. Based on this information, BKV Group prepared three Program options that show appropriate rooms and spaces based on national standards, current staffing, and current equipment levels.

Goals

Safety around apparatus, whether moving or parked

Turnout gear protected from diesel exhaust, UV light, and weather

Adequate space to change into turnout gear

Safe path of travel from parking into building

Functional kitchen with modern equipment

Sufficient storage for critical supplies and equipment

Physical Conditioning Room to support firefighter health and safety

Safe apparatus doors

Training opportunities designed into facility

Current Staffing

40 maximum volunteers

Current Apparatus

7 pumpers/ tankers

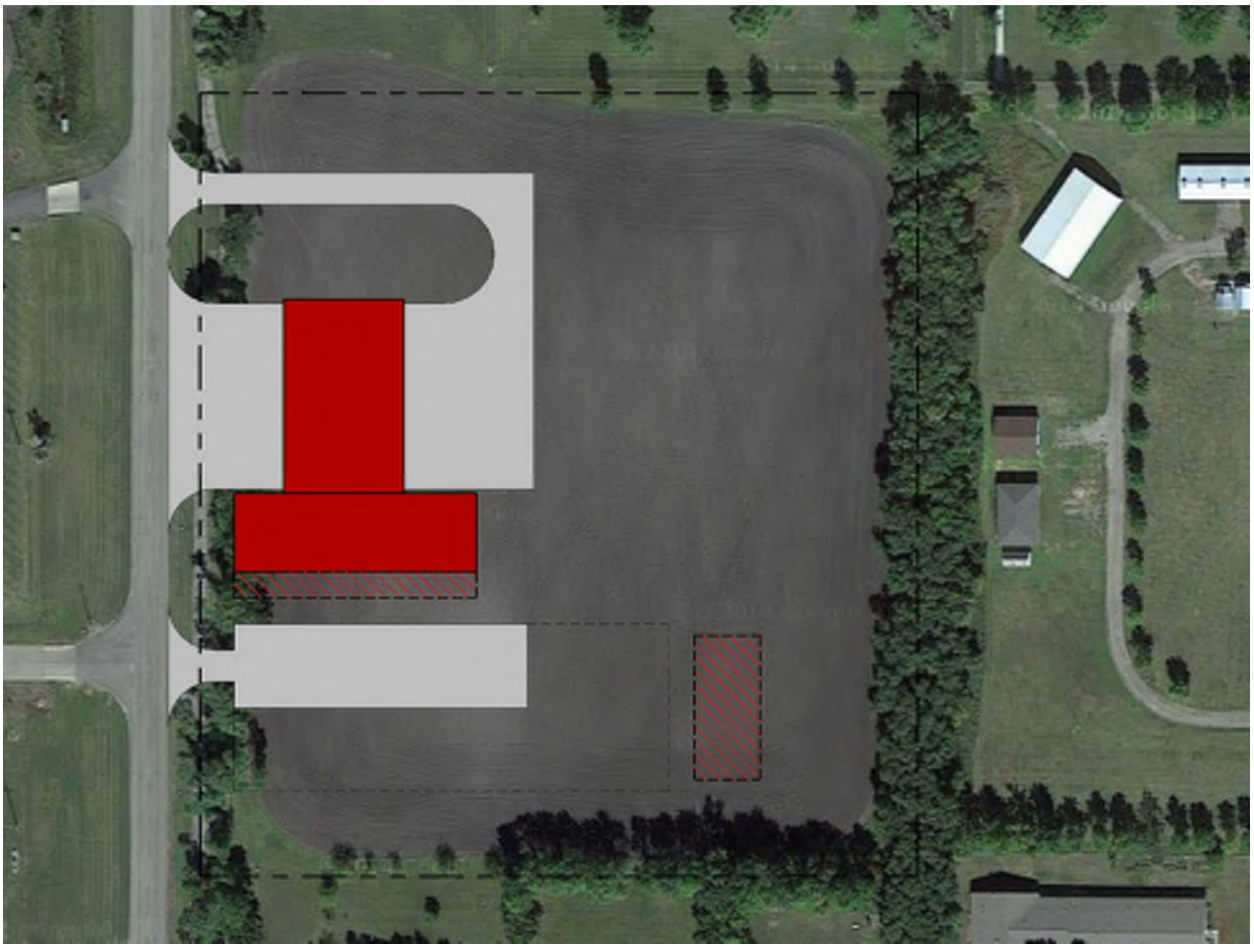
1 aerial platform

1 rescue

1 grass rig

1 pickup

1 van



1 16' boat trailer

1 parade truck

Site Feasibility Analysis

While it is not within the scope of this study to determine the optimal location of a new fire station, BKV Group did examine some potential options. One potential site that BKV Group has been made aware of is on State-owned property along School Road. The parcel is directly north of Station 102 and backs up to Heritage Village. The site appears to be very near the flood elevation but the building pad could be elevated with material removed for stormwater detention.

This parcel is approximately 7.5 acres, and would be sufficient to contain the entire footprint of the proposed project. The above figure shows the area required for program Option B in red, with the areas necessary for Option A shown dashed. The community room and associated spaces are shown here as a separate building with additional parking area indicated with dashed lines.

The site permits separate traffic movement for apparatus and personal vehicles with comfortable maneuvering clearances while leaving ample space for stormwater detention. The site allows for significant future expansion to both the apparatus bays and support spaces, as well as phased construction for the community room spaces and/or a potential live-burn training tower.

BKV Group also examined locating the new building in the center of Grafton, where the blocks are 300' square and there are few vacant parcels. Drive through apparatus bays with appropriate concrete aprons on each side would occupy half of a block (150'x300'), with the remaining building area and associated

parking filling the remaining portion. Stormwater detention would likely be underground in this scenario, and it is likely that some portions of the facility would end up on a second story, necessitating an elevator and staircases. Assembling land for a full block would likely force at least one existing business and/or multiple single-family homes to relocate.

The existing fire station sites are not large enough to accommodate the proposed facility. At Station 101, the new facility would need to overcome the proximity to the railroad tracks and the floodplain issue, and would require moving the water tower. Drive through apparatus bays would still be impossible to arrange. This figure shows the size of the apparatus bays *only* in comparison with the existing site boundaries.

At Station 102, the site width is not sufficient to accommodate enough bays across the front of the lot, nor is it sufficient to align the bays parallel with the street and provide the minimum apron depth to turn the aerial apparatus out of the station. This figure shows the size of the apparatus bays *only* in comparison with the existing site boundaries. If the adjacent parcel could be acquired, the station could fit, but it would require alternative stormwater accommodations, would be unable to support enough parking for the community room, and would exclude the possibility for future expansion.

Masterplanning Concepts

Early in the conceptualization process, most departments are unsure of their fundraising capabilities and their optimal facility size. To provide an idea of the spectrum of facility sizes found in fire stations across the country, BKV Group is showing three options. The final list of spaces in the facility will likely differ from these.

Option A: New Facility with Community Banquet Hall

Building area: 34,379 sf

Provides space for a fully functional fire station as well as space for a banquet hall to seat 800 people (with all associated restrooms, kitchens, mechanical, and storage elements). Amenities intended to help recruitment of new firefighters include a larger dayroom and a game room.

Option B: New Facility with Training Facility

Building area: 24,809 sf

Provides space for a fully functional fire station with a classroom to accommodate all staff, allowing the department to move out of the City Hall building. Provides space for hands-on training as well as physical fitness.

Option C: New Facility

Building area: 18,628 sf

Provides space for minimum functionality. Apparatus bays would have less maneuvering clearance so future apparatus would not be able to increase in size. Classroom training would still need to occur at City Hall, and there would be no build-in provisions for hands-on training. No fitness space would be provided.

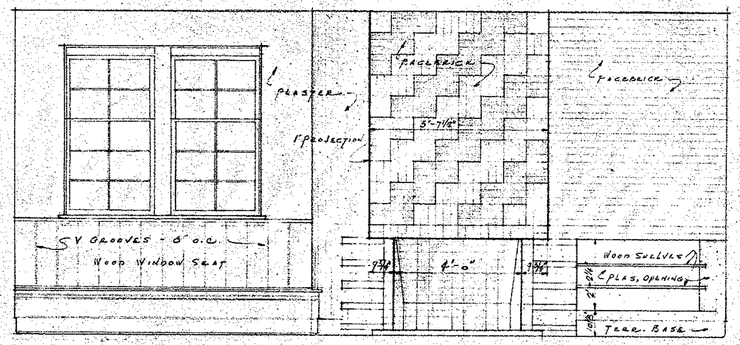
Conceptual Project Schedule

Due to winter conditions, construction projects in North Dakota almost always start as the ground thaws in the spring. The following schedule durations may need to be adjusted depending upon what time of year the design effort gets underway.

Phase	Duration
Schematic Design	3 months
Design Development	2 months
Construction Documents	4 months
Bidding and Permitting	2 months
Construction	10 months

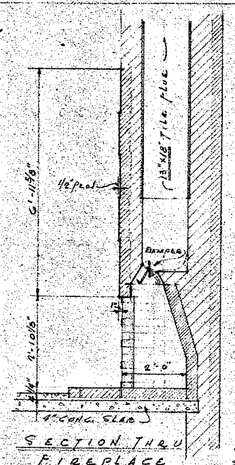
Conceptual Project Budget

Construction costs for fire stations vary regionally and based on construction type. The new fire station in Manvel is a simple metal building with virtually no site work. That station cost $113 per square foot ($950,000; 8,400 sf). Grand Forks Fire Station #5 is brick over concrete masonry and designed to blend with nearby houses. It cost $308 per square foot ($2,800,000; 9,092 sf).



For the purposes of this cost estimate, we have assumed a new station located on the School Road site with a building area accommodating program Option B (24,809 sf) and a construction cost of $200 per square foot. This assumes construction starts in 2017. Escalation of 4% per year should be added if project will commence in later years.

Description of Expense	Estimated Cost
Land Acquisition and Sale (net)	$ 1
Demolition of Existing Structures	$ 0
Building Construction Cost	$ 5,000,000
Site Construction Cost	$ 400,000
Design Fee	$ 432,000
Site Survey	$ 5,000
Environmental Report	$ 2,500
Geotechnical Report	$ 7,500
Utilities Extension	$ 0
Furniture, Fixtures and Equipment	$ 80,000
Materials Testing	$ 18,000
Permitting and Approvals	$ 20,000
Owner's Project Contingency (~9%)	$ 535,000
TOTAL PROJECT	$ 6,500,000



Appendix A – Existing Drawings

BKV Group was provided with existing drawings of Stations 101 and 102. These do not necessarily reflect the current conditions of the facility, but are attached to this report for informational purposes.

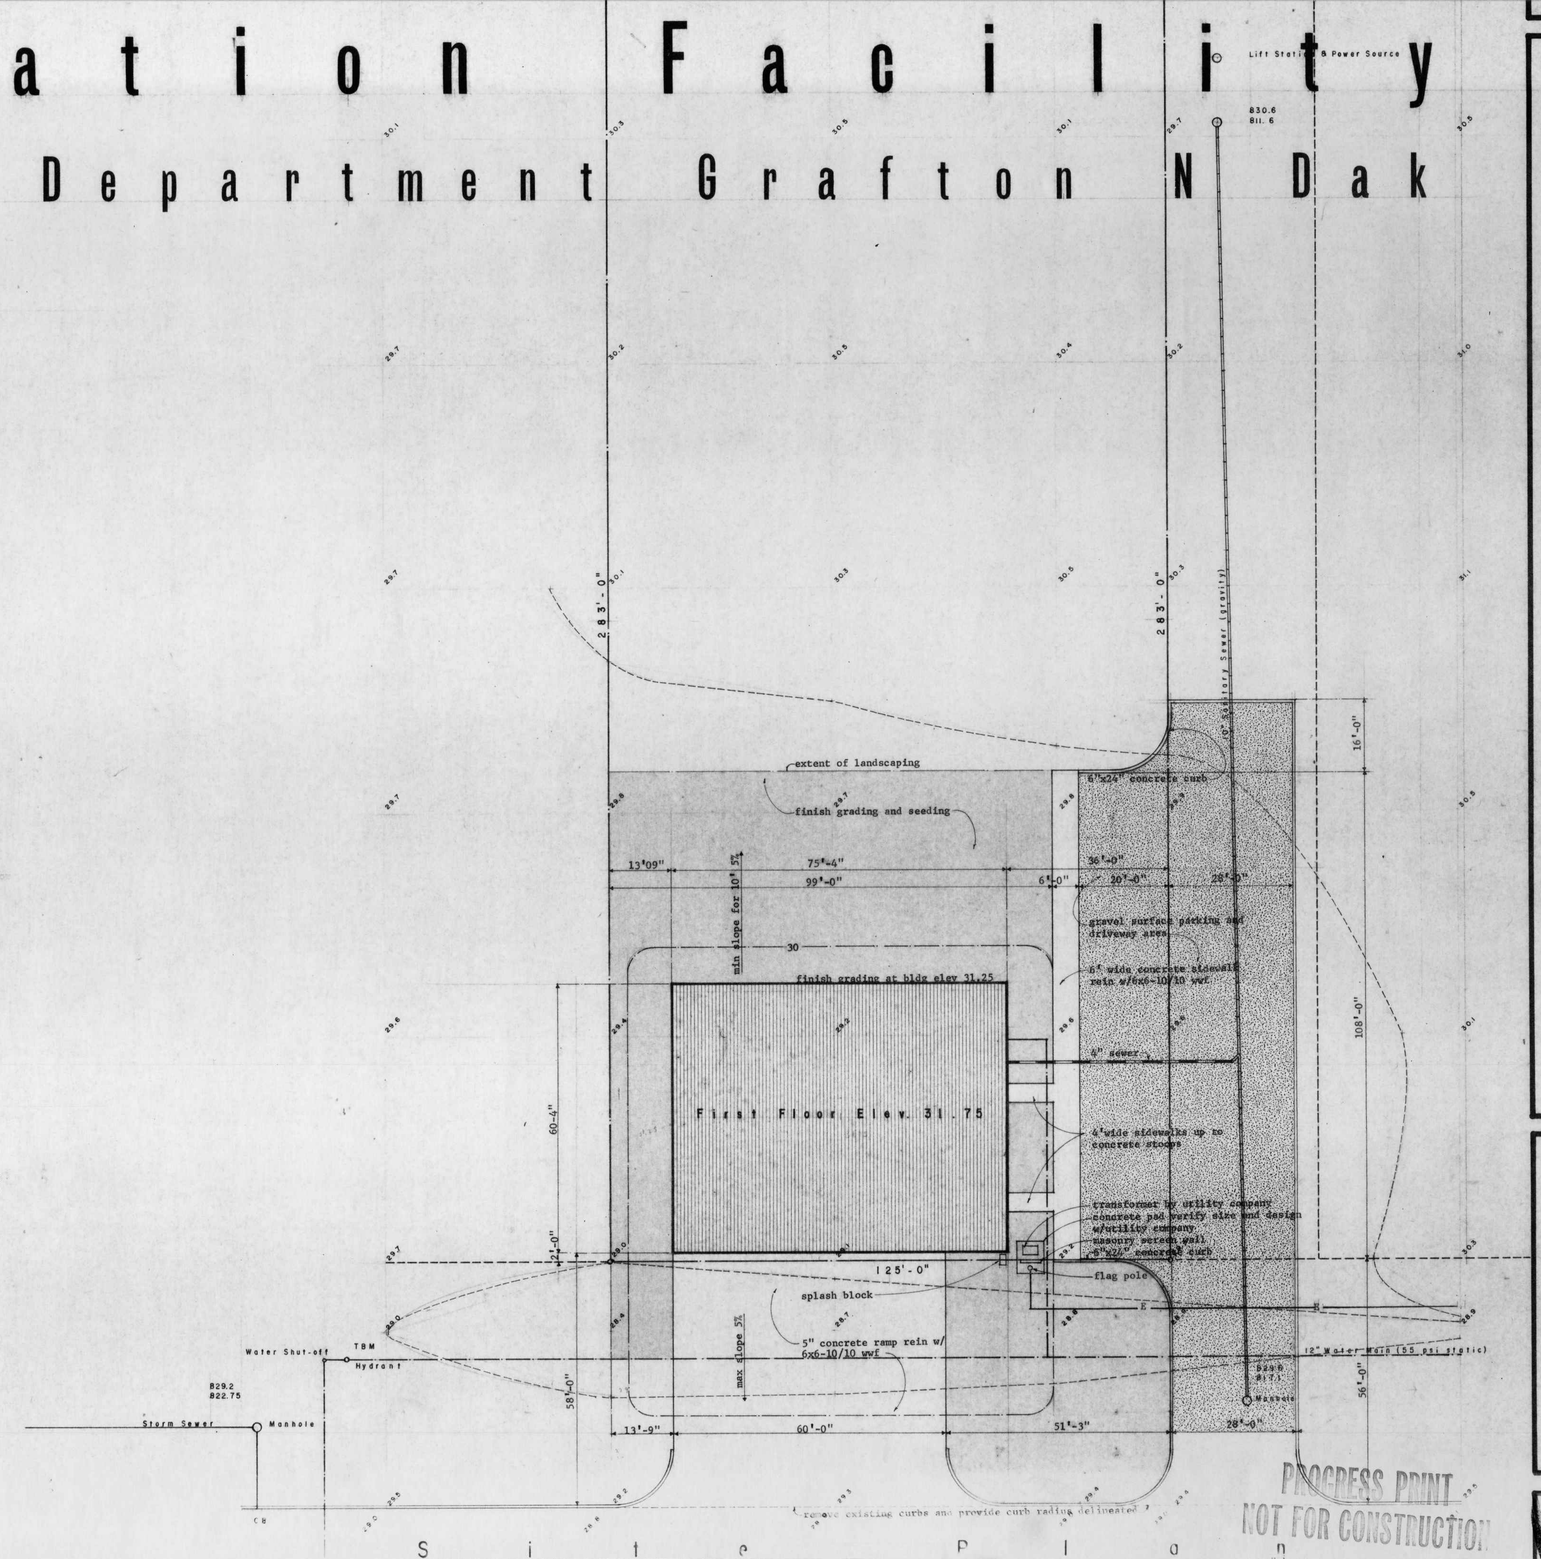
Construction Notes

1. The CONTRACTOR shall employ a Registered Land Surveyor to establish Property corners,Building location and first floor elevations in reference to the established bench marks and site design

2. The CONTRACTOR shall verify prior to submitting the proposal,with the appropriate municipal authority,locations of city sewer line(existing and proposed),water lines and stub-ins, and shall determine depths of sewer lines for verification of slope to drainfor the project. Municipal requirements relating to connections to city utilities shall be determined and any costs to be incurred shall be reflected in the proposal.

3. The CONTRACTOR shall verify prior to submitting the proposal with the appropriate utility authority,including the Telephone Company,locations of electric service lines,transformers,telephone lines,gas service lines,and meter locations and secure the necessary approvals and reflect in the proposal any costs to be incurred relating to utility company requrements for connection



4. The CONTRACTOR shall employ a soil testing company for any necessary observations and reccommendations relative to exposed slab and footing bearing strata after excavation work has been completed. Fill for slab bearing shall be approved and compacted to a density of 95% of the maximum dry density and be substantiated by test reports

5. The CONTRACTOR shall reveiw and compliment with appropriate allowances if necessary all Sub Contractor and Supplier quotations to insure that proposal are all inclusive to provide the necessary components and servicesrequired by the Contract

6. The CONTRACTOR shall bring to the ARCHITECTS attention any discrepancies in the construction documents or code violations called for in the documents prior to submitting the proposal.

7. The CONTRACTOR shall provide finish grading to accomodate slope to drain and for pedestrian and vehicular access as follows

Paved Areas	1.5% Min	Sidewalks	5.0% Max
Seeded Areas	2.0% Min	Slope away from bldg	5.0% Max

CONSTRUCTION NOTES

1. Conduct electrical continuity test on heat cable as follows
   a. When cables are removed from the carton
   b. After cables have placed in position
   c. After slab has been poured but prior to concrete setting
2. Maintain a minimum 3" cable spacing and distance from any building components
3. Install cable in sand base 8" below the underside of the concrete slab
4. Rough-in control thermostat capillary tube extended 6' horizontally in concrete slab
5. Extend thermo-cut off capillary tube 10' horizontally in sand base directly over heating cables

DAKOTA
Center for Independent Living

3111 E Broadway Avenue, Bismarck, North Dakota 58501

Chairman Holmberg and members of the Senate Appropriations Committee,

My name is Vicki L. Laraway, and I am a Systems Community Advocate with the Dakota Center for Independent living. I am writing in support of the funding for ND Council for Developmental Disabilities. They have helped with grants for our Youth Empowering Social Status Group, (YESS) which is a group formed in 2019 for youth with and without disabilities. Without their support I don't believe that we would have seen the success that we have with this group. The testimonies of these young people are truly amazing as to how this YESS group has changed their lives. They have said that they felt alone, depressed, and like they had no purpose.

The funding that they have through their grant program has allowed us to host a yearly conference for youth called, "Embrace Your Disability". They have been able to pay for taxi rides for our youth to attend our events and our Advisory Board Meetings. They play a very important part of our success.

I am asking again, that you will pass HB 1012.

Thank you.

Vicki L. Laraway

7864

DAKOTA
Center for Independent Living

3111 E Broadway Avenue, Bismarck, North Dakota 58501

Chairman Holmberg and members of the Senate Appropriations Committee.

My name is Vicki L. Laraway and work at the Dakota Center for Independent Living as a Systems Community Advocate. While I wear many hats here, I will tell you that my whole life has trained me to be at this position. I will list a few of the opportunities that I have had the privilege of participating in while working here the past 6 years.

- Helped start a Youth Empowering Social Status Group (YESS) which is a group for youth with and without disabilities. This group goes into the community to educate people first hand what it is like living with a disability. They also volunteer in the community for other non-profits, giving back to their community.
- YESS has helped when I go into the local Senior Centers to teach our elderly how to use their electronic devices.
- We teach disability etiquette to the elementary schools and have joined in with the Morton/Mandan Library in their Bookworm program, reading books online that help young people understand people with disabilities.
- We teach people with disabilities how to get involved in the testimony to local and state governments.
- We teach self-advocacy to people of all ages.
- We teach leadership skills to people of all ages.
- We go into the schools as a surrogate parent for IEP meetings.
- We teach Drivers Education to people of all ages that want to get a drivers permit.
- We help people of all ages to apply for Social Security.

These are just a few things that we do with out consumers. I have heard so many testimonies from people that have reached the goals that they have set for themselves here at DCIL and how very thankful that they are for our agency.

I am asking you to pass HB 1012, so that we can continue to carry on with helping our community of people that need a hand up, be successful in reaching the goals that they set for themselves, and learn to be self-advocates and be independent.

Thank you.

Vicki L Laraway

Bismarck Police Department

February 25,2021

From: Dave Draovitch
Chief of Police

To: Senate Appropriations
chairman: Senator Ray Holmberg

Subj: HB 1012

I write you today to seek your support of HB 1012 particularly related to funding needs of Edwinton Place which is located in Bismarck. Edwinton Place serves a segment of our population that was homeless with addiction issues. Before Edwinton Place existed, our department spent a lot of time and resources dealing with this population. Since Edwinton Place has begun operating (November 2019) our interactions with this population has greatly diminished which has allowed us to focus our efforts on law enforcement matters rather than social matters this population usually needs e.g. intoxication management, housing etc.

Our department still has interactions with this population but they are much different than before Edwinton Place. Most oftentimes the interaction is to help them with a law enforcement issue rather than a social issue.

A major component that makes Edwinton Place successful in serving this population is having staff present 24 hours a day / 7 days a week. The reason this is needed, particularly at night, is to keep the residents in check and to ensure non-resident bad influencers are kept out. I fear that without staff 24/7 Edwinton Place fails in its mission and our department will once again have to devote significant resources to this population. I have been told the funding Edwinton Place is seeking regarding HB 1012 will help them ensure the capability of having staff on-site 24/7.

Thank you for considering this information as this bill moves through the committee. We would respectfully request that you add the $640,000 to this bill in support of the front door monitoring service as these costs are not covered by the 1915i Medicare amendment that the State approved last legislative session. This is a much-needed service for this population.

If you have any questions feel free to contact me at your convenience. I may be reached at ddraovitch@bismarcknd.gov or 701-223-1212.

Respectfully,

Dave D

DAVE DRAOVITCH
Chief of Police

Dave Draovitch, Chief of Police
Phone: 701-223-1212 ★ FAX: 701-355-1861 ★ Tdd: 701-221-6820 ★ 700 S. Ninth Street ★ Bismarck, ND 58504-5899

EQUAL HOUSING OPPORTUNITY

House Bill 1012
Appropriations – Human Resources Division
Senate Appropriations
Chairman: Senator Ray Holmberg
March 9, 2021

Written Testimony submitted by: Keith J. Hunke, Bismarck City Administrator

Burleigh County Housing Authority has partnered with Beyond Shelter, Inc. in Fargo to develop a permanent supporting housing project for the homeless in Bismarck called Edwinton Place. It is located at 1121 S. 11th Street, Bismarck just south of Cash Wise on Bismarck Expressway. This project has 40 – one bedroom apartments. This project was developed under the Federal Housing First model. Most of the Edwinton Place tenants have come from homeless situations and are dealing with mental illness and/or drug/alcohol addictions and are in need of supportive services.

Edwinton Place has been open for just over one year, serving 45 individuals during that time. Persons identifying as having a disabling condition due to mental health is 74% and alcohol and drug abuse is 76%. Edwinton Place has been very beneficial for the Bismarck Police Department serving a population that had frequent interactions with law enforcement in the past. Edwinton Place contracts with the Dacotah Foundation to provide 24/7 Housing Support Specialist staff. They are Mental Health Technicians, certified by DHS, and they provide year-around 24/7 front door coverage, as well as the necessary tenancy supports and interventions to create and maintain a safe and supportive environment for tenants. They screen visitors, track tenants coming and going, establish limits and monitor alcohol being brought in, do wellness checks if they haven't been seen each day, engage with tenants and give staff updates on behaviors that may need some attention, de-escalate situations when they can and call for back up when they need it. Services provided by Dacotah foundation at Edwinton Place have greatly reduced the need for any involvement of the Bismarck Police Department with tenants of Edwinton Place.

In addition to the 24/7 support, Edwinton Place also provides space for support services to come in such as West Central Human Services, Housing and Employment Specialists from Community Options, Sanford Health provides case management and assists the tenants in accessing and maintaining health insurance. On-site staff coordinate food bank drop offs from Great Plains Food Bank and meals on wheels.

Edwinton Place is housing for tenants that are similar to the ones that live at Cooper House in Fargo and LaGrave on 1st in Grand Forks but Edwinton place has not received funding for 24/7 front door service. Edwinton Place also expected that the Medicare provision of section 1915i, which you passed last legislative session, would be available to cover these qualified costs. At this time the funds are still not available.

I oppose HB1012 as it currently is written as it does not include funding for the much needed 24/7 front door coverage and additional service supports required for the ongoing success of Edwinton Place. I respectfully request that you include the $640,000 for these service supports for Edwinton Place.

Thank you for your time and support. This funding investment provided in HB 1012 truly helps those most in need and the most vulnerable of our States population.

Dear Senate Appropriations Committee,

I am writing this letter to you to **maintain the brain injury funding in HB 1012 restored by the House including the funding for the North Dakota Brain Injury Network.** As a speech-language pathologist and certified brain injury specialist at Onward Therapy in Fargo, ND, we work closely with the NDBIN to best support our brain injury population throughout the state of North Dakota. Working with survivors of brain injury is one of the most rewarding areas in my field. Their lives have significantly and unexpectantly changed, which requires me to create a plan of care to best meet their daily functional needs. This journey is very challenging for most and it is my pleasure to walk with them, encourage them, and educate them as they strive to reach therapeutic and functional goals.

The NDBIN is extremely valuable to us as providers, as well as survivors and families. This network places great emphasis on educating about brain injury by providing valuable resources for education and awareness, as well as hosting continuing education opportunities to stay updated on the current research to best serve our patients. The NDBIN is much appreciated and is unlike any other service offered in our state. Reducing funding for the NDBIN would be detrimental to the brain injury population-the population that desperately needs us to advocate for them as they demonstrate resilience and grit in their journey to a "new normal".

Please reconsider funding the **NDBIN** so they can continue their mission to support and educate providers, survivors, and family members. Thank you for your time and consideration of this request. Please contact me with any questions you may have.

Sincerely,

Whitney Johnson, MS. CCC-SLP, CBIS

March 9, 2021

Re: HB 1012

Chairman Holmberg and committee members,

I am disappointed to hear of the proposed plan to discontinue Section 11 supports for individuals with disabilities in North Dakota. As the previous Executive Director of Community Living Services from 1983 through 2019, I supervised the provision of services for approximately 33 of the people with intellectual disabilities that would be denied services if this proposal is enacted. Approximately 20 years ago the Division of Developmental Disabilities proposed the discontinuation of funding for this same group of individuals, arguing that, despite their documented limited intellectual abilities and the great challenges they face in dealing with daily life issues, these people were not disabled enough to require state support. At that time, we provided testimony to the legislature and an agreement was made that the ND Division of Developmental Disabilities would fund 50% of the cost of services for these folks and that service providers would cover the other 50%. Community Living Services has provided that match since that time and, in fact, because the amount being funded by the State of North Dakota has not increased over those 20 years, Community Living Services' share of the costs has risen to 60%-70%.

CLS felt at that time and continues to feel today, that those individuals require some level of support in order to survive in the community. We believe that, without some level of support, these people are at great risk of homelessness, incarceration, or health decline. I have always felt that the type of service provided for these Section 11 people is one of the best, most economical, financially responsible uses of state funding. Generally, these individuals live in their own homes, many have jobs, and most require only help in some specific parts of their lives, like paying bills, following through with health issues, dealing with personal concerns, and maintaining their housing. The costs per individual are very limited and with the providers covering the great percentage of the total costs, the states commitment is minimal.

Our fear, again, is that if supports are terminated, other parts of the system will necessarily be required to step in. These would include housing assistance, the police department and the medical system.

I am requesting that your committee does not support the proposal to discontinue funding for the Section 11 for individuals with disabilities in North Dakota.

James Berglie

March 9, 2021

RE: HB 1012 – Section 11 Developmental Disability Program

Dear Chairman Holmberg and members of the committee,

As a caregiver of a person receiving Developmental Disability Services, I am writing to express my opposition to eliminating Section 11 funding as outlined in HB 1012. This program serves individuals who would otherwise "fall through the cracks" without the support provided by this program.

The individuals receiving Section 11 services continue to need these services to live normally in the community as viable, employed and self-reliant citizens. We provide money management services, medical appointment assistance, in-home and self-care services to them. These services are the only services they qualify for, and without them they cannot function properly in the community.

I strongly urge you to continue to fund this program and to provide continuity to those receiving Section 11 supports. Thank you for your continued service to the people of North Dakota and for your consideration of continuing this service that supports people with disabilities to be as independent as possible in their communities.

Sincerely,

Bonnie Lein

Printed Name: Bonnie Lein

North Dakota address: 1815 5th St N, Fargo, ND 58102

I *am writing to you to make you aware of the termination of a program under the Department of Human Services in the Developmental Disabilities Budget, the Experienced Parent program. This program allows for the hiring of parents with lived experience of having a child who receives our Part C Early Intervention services (birth to 3). Experienced parents have been in existence for close to 25 years working in conjunction with the North Dakota Early Intervention system.*

This loss of the Experienced Parent program is not showing up in the detail from the Department and is not reflected on the Savings Plan. The reason we were given is that: the funds used for it have been repurposed for direct services. In the 2017 session, this also happened, and advocates worked with legislators to get $100,000 of state general funds reinstated and $160,000 of the federal Part C grant dedicated to the program.

I gave testimony then as well, with my baby daughter in the room (and on my hip at one point), reminding representatives that North Dakota takes great pride in the claims to be "pro-life" while a woman is pregnant, yet limits the support she and her child receive once that child is born. It is confusing and disheartening, for the government of North Dakota to claim it cares for children and families as there is active voting to reduce budgets that directly support them. Having a child with a disability teaches you a lot of things, but after learning how to love everyone, it's how to budget, because therapy is expensive. I know you can find the money for these positions. I would not be where I am today, finding the resources and specialists necessary for my daughter to thrive if it were not for the help I received from the Experienced Parent program. The support of the parents who came before me, walking this path and know who to reach out to and how to ask questions to make sure my daughter receives the care that she needs has been invaluable. They are there for you on a personal level, walking with you hand in hand, leading the way all while reminding you that it will be okay; and when it's not, that your family will be okay.

I support the Experienced Parent program whole-heartedly. Think of the statistics of childhood disabilities, and sleep better knowing that when someone in your family needs them, they will be there.

We would like the funding fully restored. Because we have fought this battle as little as 4 years ago, we are open to what other avenues are available to get this funding out to be used ASAP.

Thank you for your attention.

Layla Ligutom

Testimony in on HB1012
Requesting Full Funding of Permanent Supportive Housing Services
Cody J. Schuler, Executive Director, Fargo-Moorhead Coalition to End Homelessness, NDL#367
North Dakota Senate Appropriations Committee
March 10, 2020

Mr. Chairman, members of the Committee, I offer testimony in opposition to the inadequate level of funding in HB 1012 for permanent supportive housing facilities in Bismarck, Fargo, and Grand Forks. Permanent supportive housing provides vital services for our state's citizens experiencing chronic homelessness. Permanent supportive housing creates housing and provides services for some of our most vulnerable citizens. While bringing dignity to those experiencing chronic homelessness, supportive housing is also an investment that is proven to reduce costs to the community at large.

In our community, Cooper House has been an essential asset in our work to end homelessness (a goal of making homelessness a rare, brief, and one-time experience). In its initial year of existance, a study showed that Cooper House helped realize over $200,000 of saving to the community. Since that time, other programs in the Fargo area, similarly serving formerly chronic homeless, has demonstrated over $1 million over the past three years.

Now is not the time to reduce funding for Cooper House and other permanent supportive housing in the state. The 1915(i) is a new and important resource in addressing homelessness in our state. However, as a new opportunity, there are several unknowns about how many residents at Cooper House will qualify or if the reimbursements will be enough to cover the proposed reduction in funds. It is imperative that this funding be restored for another biennium, giving the Department of Human Services and local service providers the opportunity to ensure the 1915(i) is implemented without any gaps in services.

Should gaps in services occur, it is likely that the stability, safety, and security of the residents of Cooper House would be compromised. Furthermore, there is a real concern that calls to and interventions by law enforcement would increase. This is both unnecessary, costly, and preventable.

Thank you in advance for your support of restoring adequate funding of permanent supportive housing in the Department of Human Services budget and providing adequate services to vulnerable citizens.

Experience the Eide Bailly Difference

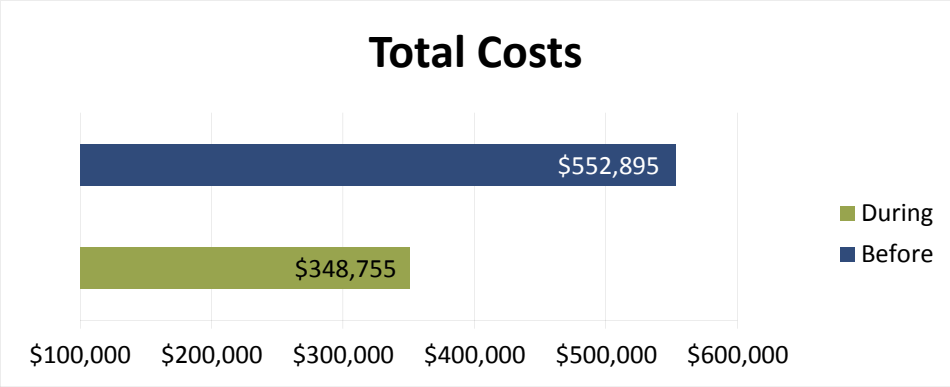
Cooper House Impact Report

A Study of the Impact of Housing North Dakota's Chronically Homeless Population

EideBailly®

CPAs & BUSINESS ADVISORS

Cooper House Impact Report & Cost Study



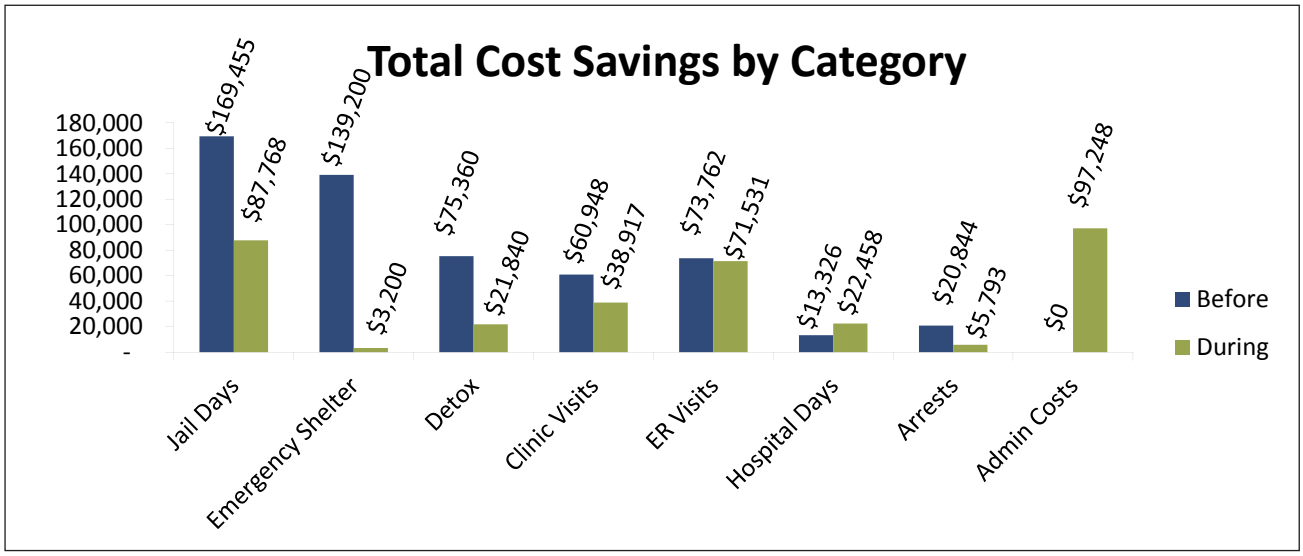
Eide Bailly was engaged by the Fargo Housing & Redevelopment Authority (FHRA) to compile cost data for a group of residents of Cooper House, a supportive housing for the homeless project managed by FHRA. We have compiled data showing the costs to society prior to when these people secured housing at Cooper House and then 12 months during their time housed at Cooper House. Because people move in and out not all dates line up over the same time frame. We have attempted to collect data showing 12 months prior to being housed at Cooper House and during their stay at Cooper House. We have not audited, reviewed or tested this information beyond simple due diligence while collecting it.

Background:

Cooper House opened in Fargo, ND in May of 2010. The Cooper House apartment's provide permanent supportive housing for homeless persons and is a stabilizing next step in the lives of people coming out of shelters or transitional housing programs. It consists of 42 apartments, 32 of which are efficiencies and 10 are one bedroom units. The apartments are rented exclusively to individuals who are documented as homeless. Preferences are given to those experiencing chronic or long-term homelessness, veterans, and people with disabilities. Homeless is defined as an individual or family who lacks a fixed, regular, and adequate nighttime residence. Chronic or long-term homelessness is considered to be anyone being homeless for 12 consecutive months or 4 times in the past 3 years.

Mental Health Technicians are on staff 24 hours, seven days a week at Cooper House, and a part time Licensed Addiction Counselor and a full time Case Manager are in the building daily, working with the clients and offering needed services. Family Health Care Center provides a part time nurse on site who provides medication management, infection control, health assessment, and referrals and follow up.

Cooper House employs a "Housing First" hybrid model, where people are provided a home first and then are offered a variety of services to help improve their lives and keep them in housing.



Conclusion:

Based on the results from the cost study, it is evident that housing the chronically homeless is "the smart way to do the right thing." There was a total of $204,140 savings in costs for those who lived at Cooper House for the time period that this study was conducted, through October 31, 2011. Being proactive in helping the homeless population is shown to help save the tax payers money and to make the community a better place to live.

The Study:

This study is meant to be a snapshot of the impact of housing North Dakota's chronically homeless population. The data of this study was collected with the consent of 66 tenants (the Study Group) who have lived at Cooper House at various times since it opened. Area service providers, shelters, law enforcement, the court system, and healthcare providers have all cooperated in providing the information gathered throughout this study. Once the information was consolidated then an average per person per month cost was calculated and this was used to calculate the group average.

Below is an overview of the costs comparisons for a one year period prior to being housed and a one year period ending October 31, 2011.

Note: There are two significant public cost drivers not captured by this study. Those of the judicial system which includes all costs related to court processing, arrests, and those costs related to state hospital days attributed to court ordered rehab. For some individuals this was up to dozens of times prior to living at Cooper House.

Healthcare & Medical Costs:

Based on the information received from Sanford Hospital, the Cost Study Group, costs went from $148,036 to $132,906 for a 10% decrease in costs or a savings of $15,130. The healthcare and medical cost data was compiled through October of 2011.

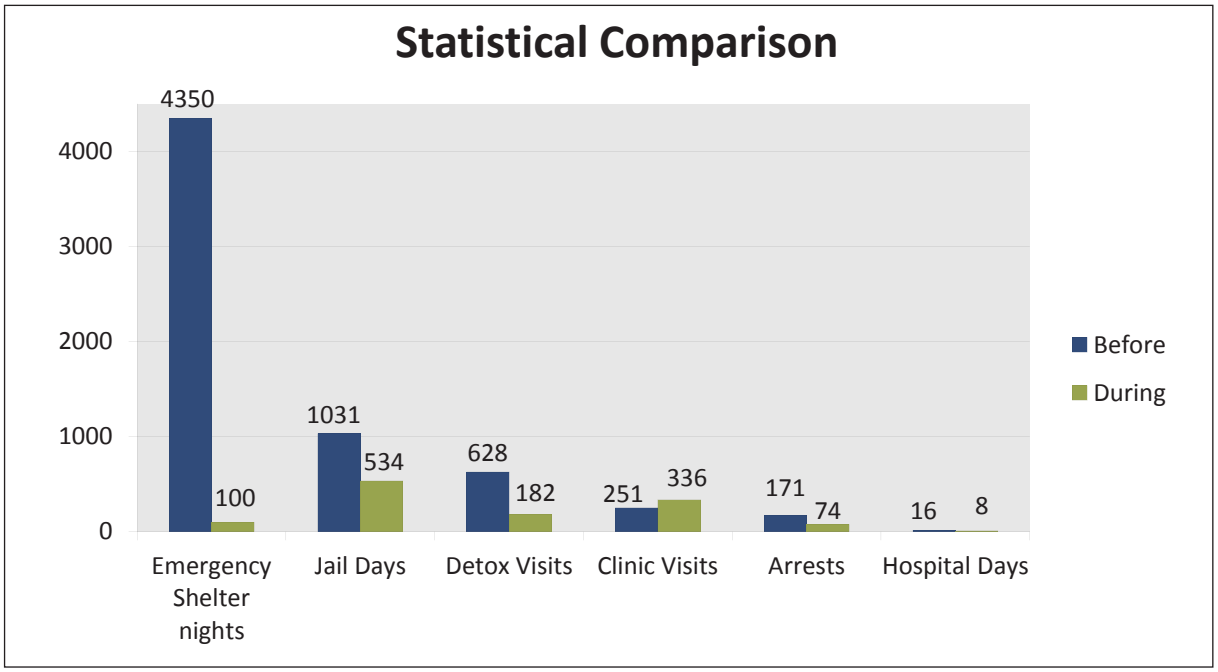
Law Enforcement & Legal costs:

Based on the information received from the Fargo Police Department, the cost associated with arrests declined from $21,000 to $6,000, which resulted in a decrease of $15,000, or 72%. The jail day costs were reduced from $170,000 to $87,800 for an $81,687 or 48% decrease.

Overall, legal and law enforcement saw a cost savings of $96,738 for those living at Cooper House, with some individuals having 100 less jail days than before they were homeless. The law enforcement and legal cost data was compiled through October of 2011.

Detox Costs:

Based on the information received from the Fargo Police Department, the average cost per detox visit is $120, not accounting for police officers time to collect and transport individuals to the facility. The total cost for detox visits decreased from $75,360 to $21,840. For the Cost Study Group, this is a cost savings of 71% or $53,520. In addition, this particular Study Group has seen 446 fewer visits. The detox cost data was compiled through October of 2011.



Administration Costs:

The capital outlay of the administration costs is $97,248. This service is provided by Dacotah Foundation through a contract with Southeast Human Services. The front desk is staffed 24/7 and these individuals are considered key to the success and integration back into the community. They staff check tenants and guests in and out of the building, monitor the security system, help with wellness checks, and work to link tenants to appropriate services.

Emergency Shelter:

Based on the information provided by only one of several homeless shelters in Fargo, the Study Group costs were reduced from $139,200 to $3,200, for a total cost savings of $136,000 or 98%. The number of emergency shelter nights was reduced from 4,350 to 100. The emergency shelter cost data was taken from averaging the costs for 2010 and 2011 to determine the average cost per year. The number of times accessed was taken compiled through October 2011.

Below is a statistical comparison of the number of times a service was accessed for the Cost Study Group before and during their residency at the Cooper House:

Places of Birth:

Many of the participants in the cost study call North Dakota their home and have lived here their entire life. Below, the red stars indicate where a portion of the Cost Study Group individuals are originally from.

Please note that not all costs were captured during the study. Some services accessed are not accounted for here and the cost of working with these individuals on the street is understated. For example, only one of several homeless shelters and one of the two hospitals were contacted for this study. Meals from community based organizations are also not accounted for here. In addition, costs accumulated here are only based on the individuals costs accumulated while living in Fargo and do not account for costs incurred in other locations.

FM COALITION TO END HOMELESSNESS

United Way of Cass-Clay

THE 2020 STATE OF HOMELESSNESS

IN THE FARGO–MOORHEAD METRO AREA

A REPORT OF THE FM COALITION TO END HOMELESSNESS IN COLLABORATION WITH UNITED WAY OF CASS-CLAY

ABOUT THE FM COALITION TO END HOMELESSNESS

For 30 years, the FM Coalition to End Homelessness (the Coalition) has been working to address the concerns surrounding homelessness in the Fargo-Moorhead Metro. In response to a growing concern to a local rise in homelessness, four local emergency shelters came together in 1989 to form the Fargo-Moorhead Coalition for Homeless Persons to improve service delivery. As the Coalition became a forum for discussion about the particular circumstances related to working with those experiencing poverty and homelessness, the Coalition grew to include other organizations serving homeless and low-income populations. The Coalition's purpose was to coordinate and improve service delivery in the most humane and efficient manner possible, and it grew to become an active force to provide, expand, and obtain new services. In 2007, the Coalition became a 501(c)(3) nonprofit corporation, hired its first director, and became the key leader in implementation of the City of Fargo's Ten-Year Plan to End Homelessness.

Today, more than 70 partners from service areas related to housing, physical and behavioral health, recovery, law enforcement, community action, disability, and veterans' issues, as well as faith-based groups and individual community members concerned about homelessness, come together with a unified mission: working in partnership to find permanent solutions to prevent and end homelessness in Fargo, Dilworth, Moorhead, and West Fargo. Through unified advocacy, partner education and trainings, and community and regional collaboration, the Coalition strives to fulfill its mission and live up to its recently refreshed name and make homelessness rare, brief, and one-time for individuals and families in this community.

Brett Lysne, Sandwich Club Design Co.

For the purpose of this report, we will refer to our geographic location as Fargo-Moorhead Metro (FM Metro). In 2018, the most recent data available, the US Census Bureau's American Community Survey (ACS) estimates the population for the Fargo-Moorhead Metropolitan Statistical Area at 245,471 individuals (source.)

This includes the population in Cass County, North Dakota, and Clay County, Minnesota, who are primarily located in the cities of:

- Dilworth, MN
- Fargo, ND
- Moorhead, MN
- West Fargo, ND

Throughout this report we will use FM Metro as our general location, or specifically Cass County, ND, and Clay County, MN, if there is a difference based on the state boundaries.

Additionally, some of the data and processes included in this report are by established Continuums of Care (CoCs). A CoC is a regional planning body of stakeholders designed to promote a shared commitment to the goal of ending homelessness.

CoC planning includes:

- Gathering and analyzing information to understand homelessness in the region;
- Understanding and supporting compliance with HUD and other funders;
- Implementing strategic plans to end homelessness based on data;
- Operating a regional Coordinated Entry System;
- Measuring results of regional planning and performance; and
- Prioritizing limited resources.

The West Central Minnesota CoC includes the following counties: Becker, Clay, Douglas, Grant, Pope, Otter Tail, Stevens, Traverse, Wadena, and Wilkin, along with the White Earth Reservation. It is one of ten CoCs in the state of Minnesota.

North Dakota operates as one CoC for the entire state.

PLANNING AND ADVOCACY ORGANIZATIONS

The FM Coalition to End Homelessness (the Coaltion) is a principle leader for ending homelessness in the FM Metro and serves as the official North Dakota Region 5 Coalition, the six-county southeastern part of the state. The Coalition is in close partnership with the West Central Minnesota CoC and North Dakota CoC as a platform for cross border collaboration between our two cities, two counties, and two states.
www.fmhomeless.org

The Minnesota Coalition for the Homeless (MCH) is a public policy and advocacy organization working to ensure statewide housing stability and economic security. Working with partners across the housing continuum in direct service to state agencies, MCH generates policies, community support, and local resources for housing and services to end homelessness in Minnesota.
www.mnhomelesscoalition.org

The West Central Minnesota CoC is tasked with developing, implementing, aligning, and monitoring regional planning related to preventing and ending homelessness. Through broad collaboration and planning, the CoC utilizes data, training, information sharing, and planning meetings to move towards making homelessness in West Central MN rare, brief, and one-time.
www.homelesstohoused.com

The North Dakota Coalition for Homeless People (NDCHP) brings together partners across the state to lead the effort in ending homelessness in the state through coordination, education, and advocacy. NDCHP's vision is for ND to have safe, decent, and affordable housing that is available to all. www.ndhomelesscoalition.org

The North Dakota CoC is tasked with developing, implementing, aligning and monitoring regional planning related to ending homelessness. The CoC is composed of representatives of relevant public and private organizations that come together to plan for and provide a homeless response system that is dedicated to preventing and ending homelessness in the state of North Dakota. North Dakota Housing Finance Agency is the collaborative applicant for the North Dakota CoC.

MESSAGE FROM THE EXECUTIVE DIRECTOR

June 23, 2020

As this report is released to our community, we are living through a global pandemic and our nation is facing the most significant conversation about race since the Civil Rights movement. It would be an understatement to say that 2020 is shaping up to be a year few could have imagined. Over the past months, homeless services have had to make a major pivot in response to COVID-19. Providing emergency shelter, moving people into housing, and providing key stabilization services without spreading a dangerous virus has tested our homeless response system and our providers on a personal level. But, the partners of the Fargo-Moorhead Coalition to End Homelessness have demonstrated the creativity, perseverance, and resilience they have shown time and time again. Our partners keep moving forward getting the day to day work done while not losing the vision that homelessness can be ended in our community.

That vision is rooted in social justice and human rights. Our mission to end homelessness relies on vital collaboration as we work together to strategically respond to systems of oppression and injustice that hinder people from thriving so that everyone has a safe place to call home. People of color experience homelessness disproportionate to the population. This calls upon us as a coalition to step up to address racial injustice. Healthcare remains out of reach to many who find themselves in a housing crisis. Therefore we need to get health care providers to see housing as a prescription. Affordable housing is out of reach for many in our community. So, we must step up to address costs and income inequality. This is why this State of Homelessness report is so important: to identify issues, celebrate successes, and use data as a key for finding solutions. This report is more than numbers and charts, this document tells a story and provides a map we can use to chart a new course.

In partnership,

Cody J. Schuler
Executive Director

FM COALITION TO END HOMELESSNESS

The purpose of this document is to provide our community with a comprehensive report of available data related to homelessness in the FM Metro. The writers have made the decision to lay out this report in four sections:

Who are our neighbors experiencing homelessness in our community?

What are the needs of those experiencing homelessness in our community?

What are we doing as a community to address homelessness?

What is next for our community?

In each section, you as the reader should have a better understanding of the answer for each question posed. Additional information can be found in the Appendixes related to the data sources and references used in the creation of this report, as well as definitions for some of the terms used throughout the report and additional resources available.

WHO ARE OUR NEIGHBORS EXPERIENCING HOMELESSNESS IN OUR COMMUNITY?

ESTIMATE OF THE NUMBER OF INDIVIDUALS EXPERIENCING HOMELESSNESS

To estimate the number of individuals experiencing homelessness in our community on any given night, we need to look at the estimates of those:

- sheltered in emergency shelter and transitional housing programs
- staying in a place that is not a regular or permanent place to stay, such as outdoors, in a car, vacant building, or a place of business, and
- doubled up with a friend or family member on a temporary basis because they have nowhere else to go.

Below is an overview of the housing inventory count, which provides a snapshot of the number of individuals homeless service programs can serve at any given time. For more on available programs and services, see the section entitled "What are we doing as a community to address homelessness?".

Project Type	Cass County	Clay County	Both
Emergency Shelter	210	74	284
Transitional Housing	36	73	109
Rapid Re-Housing	36	79	115
Permanent Supportive Housing	168	457	625
Other Permanent Housing	0	0	0
Total	450	683	1,133

With this current inventory we see on any given night there are 246 individuals in Cass County, ND, and 147 individuals in Clay County, MN, who are experiencing homeless in a sheltered location (either in emergency shelter or in a transitional housing program).

We can estimate, through the Emergency Shelter Bed Prioritization list which is managed by all Emergency Shelters in partnership, as of the beginning of April 2020, there are a total of 113 individuals staying in a place that is not a regular or permanent place to stay and actively looking for access to a shelter bed. This could include places such as outdoors, in a car or vacant building, or in a place of business. These 113 individuals include 98 adults, 6 school aged children (ages 5 to 18), and 9 children under the age of 5.

Those currently doubled up continues to be much more difficult number to gather, as those individuals are often the most unseen. As of April 2020, 555 students were identified as homeless in our metro school districts. At this same point, there were 33 school aged children were staying at the two emergency shelters that serve families and 6 school aged children were actively seeking shelter with their parents. The remaining 516 students identified as homeless are most likely to be doubled up. However, we believe that is a significant under-representation of those who are currently doubled up in our community.

Pulling this all together, on any given night, there are 1,022 individuals estimated to be experiencing homelessness in the FM Metro.

Sheltered	393
Unsheltered	113
Doubled Up	516
Total	1,022

This is consistent with last year's estimate of 1,075 individuals estimated to be experiencing homelessness in the FM Metro. While we must rely on an estimate for this number, the rest of this report includes more details and data collected on those in our community that received services to overcome their housing crisis and resolve their homelessness.

DEMOGRAPHICS OF INDIVIDUALS AND HOUSEHOLDS EXPERIENCING HOMELESSNESS

According to data available in the Homeless Management Information System (HMIS), in 2019, 3,322 individuals received homeless services either in Cass County, ND, or Clay County, MN. We need to acknowledge there is a level of duplication in these numbers as Minnesota and North Dakota do operate in separate information systems; for example, if an individual received services in both Fargo and Moorhead, they would be counted twice in the data below.

A majority of individuals experiencing homelessness are working age adults, with 61% of those who received services being between the ages of 18 and 54. Additionally, of those served, 23% were children under the age of 18 and 15% were older adults ages 55 and older.

Ages	Clay	Cass	Total	
Under 5	179	96	275	8%
5 to 12	218	114	332	10%
13 to 17	74	87	161	5%
18 to 24	118	186	304	9%
25 to 34	287	389	676	20%
35 to 44	239	317	556	17%
45 to 54	203	283	486	15%
55 to 61	112	221	333	10%
62+	47	117	164	5%
Don't know or refused	1	3	4	0%
Did not collect	29	2	31	1%
Total	1,507	1,815	3,322	

When looking at gender along with age, adult males make up the majority of the homeless population at 49%. Overall, 61.5% of the total homeless population identify as male and 37.5% as female. Additionally, 13 individuals identify as trans female (male to female), 5 individuals identify as trans male (female to male), and 6 individuals identify as gender non-conforming.

Gender by Age	Male	Female	Trans Female (Male to Female)	Trans Male (Female to Male)	Gender Non-Conforming	Client Doesn't Know/Client Refused	Data Not Collected
Adults	1,639	854	13	4	5	0	4
Percent of Total	49%	26%	0%	0%	0%	0%	0%
Children	382	383	0	1	1	0	1
Percent of Total	11%	12%	0%	0%	0%	0%	0%
Unknown Age	21	10	0	0	0	0	4
Total	2,042	1,247	13	5	6	0	9
Percent	61.5%	37.5%	0.4%	0.2%	0.2%	0%	0.3%

In total, this is an increase of only 39 individuals compared to the number of individuals who received homeless services either in Cass County, ND, or Clay County, MN in 2018. There is no major difference in age distribution or gender. Although, there was an increase in the number of individuals identifying as transgender or gender non-conforming. In 2019, a total of 24 individuals (roughly 1% of all individuals served) identified as transgender or gender non-conforming compared to only 15 in 2018.

In 2019, just under half of individuals who received homeless services identified their race as White, showing a significant racial disparity which exists among the homeless population compared to the general population in the FM Metro. As of 2018, US Census Bureau's American Community Survey (ACS) estimates show 87.1% of the total population in the FM Metro identify as White alone. With 19% of the homeless population identifying as Black or African American and 20% identifying as American Indian, we see significant racial disparities as these populations are overrepresented compared to the general population. The US Census estimates show only 6.1% of the general population identify as Black or African American alone and 1.4% as American Indian and Alaska Native alone (Census Estimates).

Race	Total	Percent of Total
White	1,620	49%
Black or African American	627	19%
Asian	9	0%
American Indian or Alaska Native	669	20%
Native Hawaiian or Other Pacific Islander	25	1%
Multiple races	277	8%
Client Doesn't Know/ Client Refused	26	1%
Data Not Collected	69	2%
Total Persons	3,322	

This is a slight increase in the rate of individuals of color who are experiencing homelessness. In 2018, 50% of individuals experiencing homelessness identified as White alone.

Additionally, 10% of individuals experiencing homelessness identify their ethnicity as Hispanic/Latino. Again, this is an overrepresentation compared to the general population, which is currently estimated at only 3.2% (Census Estimates).

Ethnicity	Total	Percent of Total
Non-Hispanic/Non-Latino	2,918	88%
Hispanic/Latino	324	10%
Client Doesn't Know/Client Refused	10	0%
Data Not Collected	70	2%
Total Persons	3,322	

The 3,322 individuals served throughout 2019 make up a total of 2,325 separate households. A vast majority (84%) of the households do not include children.

Household Type	Total	Percent of Total
Singles: Adults without children	1,943	84%
Families: Adults with children	313	13%
Youth: Youth only, no adults, with or without their own children	43	2%
Unknown Household Type	26	1%
Total Households	2,325	

This is a very consistent breakdown of households, from 2018, although there was an increase of 44 households served from last year.

Chronically Homeless

Individuals who are considered chronically homeless are typically more vulnerable and have significantly higher barriers, meaning they require more supportive services and longer-term support to be successful in ending their continued homelessness episode or episodes.

To be classified as chronically homeless, individuals must meet all the following:

- Currently experiencing homelessness,

- Been homeless for at least one year during the current episode OR homeless for less than one year in the current episode, but homeless at least four times in the previous three years, and
- Disabled (those who have a physical, mental, or other health condition that limits the kind of work they can do OR those who have a physical, mental, or other health condition that makes it hard for them to bathe, eat, get dressed, get in and out of bed or chair, or get around by themselves).

In HMIS, 22% (720) of individuals served in 2019 were considered chronically homeless. They make up 25% of all the households served. We must acknowledge that 10% of individuals served throughout 2019 did not have data collected on this classification, and thus results may differ if we had access to this information. Although, this does show improvement in data collection from last year, as in 2018, 30% of individuals served did not have data collected on this classification.

Like the overall homeless population, a majority of the chronically homeless individuals are working age adults. Of the individuals who are considered chronically homeless, 68% are between the ages of 18 and 54, with only 14% under 18. Aging adults are classified as chronically homeless at a higher rate compared to the general homeless population, with 18% of the chronically homeless population age 55 and older (compared to 15% of the general homeless population).

Age	Total	Percent of Total
Age 0-17	102	14%
Age 18-24	42	6%
Age 25-34	146	20%
Age 35-44	141	20%
Age 45-54	161	22%
Age 55-61	91	13%
Age 62 and above	37	5%
Client Doesn't Know/ Client Refused	0	0%
Data Not Collected	0	0%
Total Persons	720	

Like the general homeless population, a majority (65.8%) of the chronically homeless identify as male, followed by 33.5% identifying as female. Three individuals who are considered chronically homeless identify as trans female (male to female) and one individual identifies as gender non-conforming.

Gender	Total	Percent of Total
Male	474	65.80%
Female	241	33.50%
Trans Female (Male to Female)	3	0.40%
Trans Male (Female to Male)	0	0.00%
Gender Non-conforming	1	0.10%
Client Doesn't Know/ Client Refused	0	0.00%
Data Not Collected	1	0.10%
Total Persons	720	

Overall, compared to last year's data, the chronically homeless population is slightly younger with a 3% increase in those under the age of 18 and a 3% decrease in those over the age of 55. This may be due to better data regarding this sub-population.

In 2019, the 720 individuals considered chronically homeless made up a total of 591 separate households. A vast majority (93%) of the households do not include children.

Household Type	Total	Percent of Total
Singles: Adults without children	547	93%
Families: Adults with children	44	7%
Youth: Youth only, no adults, with or without their own children	0	0%
Unknown Household Type	0	0%
Total Households	591	

Youth

Youth homelessness is often harder to track. According to data available in HMIS, in 2019, 324 youth received homeless services either in Cass County, ND, or Clay County, MN. These are young adults 24 years old or younger, living without parents or guardians and may be parenting themselves.

Age	Total	Percent of Total
Age 12-17	60	19%
Age 18-24	264	81%
Client Doesn't Know/ Client Refused	0	0%
Data Not Collected	0	0%
Total Persons	324	

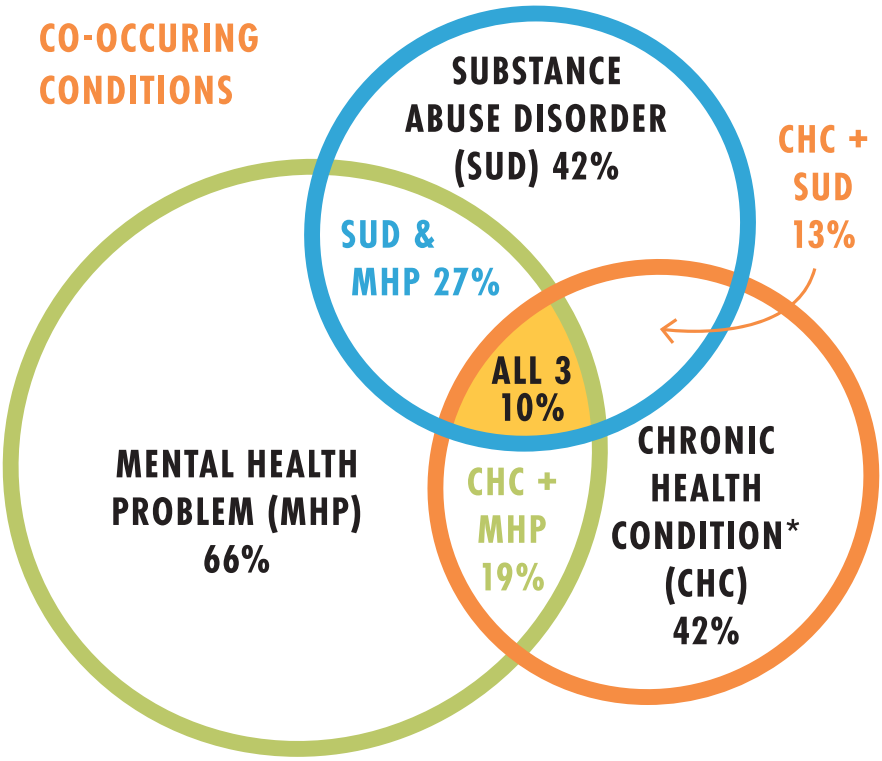
Unlike the general homeless population, youth are more diverse in their gender identity, with only 46% identifying as male. In addition to 48% identifying as female, 2% identifying as trans female (male to female), 2% as trans male (female to male), and 2% as gender non-conforming.

Gender	Total	Percent of Total
Male	150	46%
Female	157	48%
Trans Female (Male to Female)	6	2%
Trans Male (Female to Male)	5	2%
Gender Non-conforming	6	2%
Client Doesn't Know/ Client Refused	0	0%
Data Not Collected	0	0%
Total Persons	324	

LGBTQ+ youth experience homelessness at a high rate than their peers. As part of the 2021 State of Homelessness Report, we hope to include more data on this and the unique experiences of youth homelessness in our community.

Of the 324 youth served in 2019, 31 youth are parents themselves and between the ages of 18 and 24 years old. They have a combined total of 49 children in their care.

Youth are assessed for housing services utilizing a specialized tool geared towards those under 24 years of age. Within this assessment, 56% of youth answered that their lack of housing was because of an unhealthy relationship, either at home or elsewhere (emotional, physical, psychological, or sexual).



Health Conditions & Co-occurring Conditions

Physical health, mental health, and substance abuse are significant concerns and barriers among the people experiencing homelessness in our community. According to data available in HMIS, 44% of the individuals served in 2019 have a disability of long duration. This includes any disability that is ongoing, continued, or for an indefinite duration.

Of individuals diagnosed with a disability:

- 42% have been diagnosed with a chronic health condition, physical disability, or developmental disability.
- Two thirds (66%) have been diagnosed with a mental health problem.
- 42% have a substance abuse disorder (to either drugs, alcohol, or both).

Often individuals experiencing homelessness also experience co-occurring conditions. When looking at those who reported being diagnosed with a chronic health condition, serious mental health problem, and/or substance abuse disorder, 41% of respondents have been diagnosed with more than one of these conditions and 10% report all three.

These results differ from the numbers published last year because last year's data was based on self-responses as part of the Everyone Counts survey administered in October 2018 by homeless

service providers. Due to the different data sources from this year to last, we are unable to compare the annual results.

Overall, most individuals with a chronic health condition, substance abuse disorder, mental health problems, or a combination of these conditions in our community are housed. Individuals experiencing homelessness are not experiencing their housing crisis because of these conditions alone – rather it is due to a unique combination of experiences, traumas, lack of support networks, and access to services or supports. This section is included to highlight the fact that many individuals in our homelessness response system need access to additional services, in addition to housing support. Moving from homeless to housed looks different for each individual and each household; and often includes many other aspects of our community social services network.

Prior Living Arrangements

In HMIS, shelter and supportive housing programs in the FM Metro collect information regarding prior living arrangements for individuals who entered services. In 2019, almost half (46%) of individuals stated they were homeless, meaning they were staying at a shelter, transitional housing, or place not meant for human habitation.

Another 11% of individuals came from an institutional setting, including psychiatric hospital/facility, substance abuse facility, hospital, jail, prison, long-term care facility, or halfway house. 14% identified they were living in their own apartment or home with or without subsidies or support, and 21% were staying with a friend or family member.

Prior Living Arrangements - All Clients	Total	Percentage
Homeless	1,196	46%
Institutional Settings	288	11%
Permanent Housing/Own/ Rental	365	14%
Doubled Up (Staying with Friends or Family)	532	21%
Hotel or Motel without Voucher	77	3%
Client Doesn't Know/Refused	19	1%
Data Not Collected	114	4%
Total	2,591	

As a community, we are very concerned with the percentage of individuals and families entering homelessness from permanent housing. This intensifies when we look at families with children and youth experiencing homelessness.

With families entering services, 31% are coming from permanent housing, previously living in their own apartment or home with or without subsidies or support. This is a significant increase compared to the overall population.

Prior Living Arrangements - Families	Total	Percentage
Homeless	162	39%
Institutional Settings	7	2%
Permanent Housing/ Own/Rental	130	31%
Doubled Up (Staying with Friends or Family)	93	22%
Hotel or Motel without Voucher	18	4%
Client Doesn't Know/Refused	1	0%
Data Not Collected	3	1%
Total	414	

With youth experiencing homelessness, we see a significant increase in the percentage of individuals previously doubled up or staying with friends or family prior to entering homelessness, 37% compared to 21% with the general homeless population.

Prior Living Arrangements - Youth	Total	Percentage
Homeless	96	30%
Institutional Settings	22	7%
Permanent Housing/ Own/Rental	37	11%
Doubled Up (Staying with Friends or Family)	121	37%
Hotel or Motel without Voucher	9	3%
Client Doesn't Know/Refused	8	2%
Data Not Collected	31	10%
Total	324	

Prior Experiences

According to data collected in HMIS, of the 3,322 individuals served, 2,591 individuals entered programming or began receiving services in 2019. Almost a fourth (24%) of these new entries had a history of Domestic Violence. We must acknowledge 21% of individuals who entered services throughout 2019 did not have data collected on their domestic violence history, and thus results may differ if we had access to this information.

Of those with a history of Domestic Violence, 34% identified fleeing domestic violence as the reason for their current homeless situation.

Domestic Violence History	Total	Percent of Total
Fleeing Domestic Violence	207	34%
Not Fleeing Domestic Violence	361	59.30%
Client Doesn't Know/ Client Refused	3	0.50%
Data Not Collected	38	6.20%
Total Households	609	

This data does not capture the full impact and history of violence for many individuals experiencing homelessness. Violence may often be the primary reason why someone is experiencing homelessness but may not reported as the immediate cause. Additionally, research shows for many chronically homeless individuals, one of their first times experiencing homelessness was as a victim of violence. However, this is not captured in this data as it only reflects their current episode of homelessness.

According to agency specific data, 80% of the individuals who stay with YWCA of Cass Clay (YWCA), are seeking services due to violence. This is in line with national research which has shown being a victim of violence is the number one reason that woman become homeless (Source). To get a more accurate number the YWCA has changed how they ask clients about their history of violence. Previously, those seeking shelter were asked, "why are you checking into the shelter". However, many who had initially fled an unsafe situation may have temporarily sought shelter with a family, friend or elsewhere, leading them to select that they were homeless. In recognizing the low response in initial reporting of fleeing violence as women entered the shelter, YWCA staff were coached on how to ask probing questions on what lead to the woman's homelessness.

Of those who had been assessed for housing programs utilizing the VI-SPDAT tool, a staggering 58% of participants responded that their current period of homelessness had been caused by an experience of emotional, physical, psychological, sexual, or other type of abuse, or by any other trauma they have experienced. In addition, approximately 34% of people experiencing homelessness, who were assessed for housing services, identified that they had been attacked or beaten up since becoming homeless.

As part of the Everyone Counts Survey conducted in October 2018, 243 respondents were asked about adverse childhood experiences and traumatic events in their lives. Among the adverse childhood experiences inquired about in the survey, those experienced the most were:

- Living with a substance user (54%)
- Witnessing abuse of other family member (44%)
- Being physically abused as a child (36%)
- Living with a parent or guardian who struggled with mental health issues (32%)

Additionally, as children, about one-fourth of respondents (28%) lived in a foster home and 18% lived in a group home. About 30% were held for more than a week in a juvenile detention center or other juvenile facility or camp.

WHAT ARE THE NEEDS OF THOSE EXPERIENCING HOMELESSNESS IN OUR COMMUNITY?

INCOME, EMPLOYMENT, AND EDUCATION

Income and employment data were collected for the 2,519 adults served throughout 2019. Income and sources were collected at the start of their services along with when they exited services (Leavers) or at an annual check point if they remained in services (Stayers).

In 2019, only 48% of individuals who started services had a known source of income (one or more). Of those who left services in 2019, only 43% had one or more sources of income.

Number of Adults with Income	Start		Stayers		Leavers	
Total Adults	2,519		830		1,689	
1 or More Source of Income	1,217	48%	77	9%	719	43%

Below is a breakdown of cash income sources.

Cash Income Sources	Start	Stayers	Leavers
Earned Income	423	18	290
Unemployment Insurance	8	0	5
Supplemental Security Income (SSI)	267	32	168
Social Security Disability Insurance (SSDI)	166	16	104

Breakdown of cash income sources, continued:

Cash Income Sources	Start	Stayers	Leavers
VA Service - Connected Disability Compensation	69	1	28
VA Non-Service Connected Disability Pension	25	2	13
Private Disability Insurance	3	0	2
Worker's Compensation	61	9	22
Temporary Assistance for Needy Families (TANF)	68	10	25
General Assistance (GA)	196	9	46
Retirement Income from Social Security	19	0	10
Pension or retirement income from a former job	8	2	6
Child Support	46	6	22
Alimony and other spousal support	1	0	0
Other Source	38	14	21

Below is the breakdown of cash income ranges for all adults on a monthly basis.

Breakdown of Monthly Income Range	Start		Stayers		Leavers	
No Income	1,070	42%	34	4%	739	44%
$1 - 150	158	6%	5	1%	39	2%
$151 - $250	73	3%	5	1%	43	3%
$251 - $500	88	3%	9	1%	49	3%
$501 - $1000	361	14%	30	4%	220	13%
$1001 - $1500	148	6%	10	1%	90	5%
$1501 - $2000	122	5%	7	1%	69	4%
$2001 +	136	5%	8	1%	105	6%
Client Doesn't Know/Refused	3	0%	0	0%	4	0%
Data not collected	360	14%	0	0%	331	20%
Adult stayers not yet required to have an annual assessment			427	51%		
Adult stayers without required annual assessment			295	36%		
Total Adults	2,519		830		1,689	

In 2019, the federal poverty guidelines were set as a single adult making $12,490 annually or about $1,040 per month. Noting most individuals experiencing homelessness are not in family units, you can see that 68% are below that $1,000 per month threshold. Additionally, if we factor in family units, a family of four making $25,750 per year or less is within the 2019 poverty guidelines – this is roughly $2,145 per month (Source).

In addition to employment and cash income, data is collected on non-cash benefits individuals are receiving. A majority of individuals when starting and leaving services had no sources of non-cash benefits.

Non-Cash Benefit Sources	Start		Stayers		Leavers	
No Sources	1,343	53%	18	2%	928	55%
1 + Source(s)	846	34%	86	10%	463	27%
Client Doesn't Know/ Client Refused	3	0%	0	0%	2	0%
Data Not Collected/ Not stayed long enough for Annual Assessment	327	13%	726	87%	296	18%
Total	2,519		830		1,689	

Of those who receive non-cash benefits, most are enrolled in Supplemental Nutrition Assistance Program or SNAP (previously known as Food Stamps).

Type of Non-Cash Benefit Source	Start	Stayers	Leavers
Supplemental Nutrition Assistance Program (SNAP)	812	81	447
Supplemental Nutrition Program for Women, Infants, and Children (WIC)	68	7	37
TANF Child Care Services	9	1	5
TANF Transportation Services	0	0	0
Other TANF-Funded Services	4	0	2
Other Source	145	51	57

For more details on the benefits programs included in this section along with benefit eligibility, please visit:

- Cass County, ND Human Services Website: https://www.casscountynd.gov/our-county/human-services/economic-assistance-division
- Clay County, MN Social Services Website: https://claycountymn.gov/207/Financial-Assistance-Services

As part of the Everyone Counts Survey conducted in October 2018, respondents currently experiencing homelessness were asked about their education and employment. Almost two-thirds (63%) of respondents had at least a high school diploma or some level of college education.

Educational Attainment	Total	Percentage
8th grade or less	10	4%
Some high school but did not finish 12th grade	78	32%
12th grade (high school graduate)	69	28%
Some college but no degree	49	20%
Completed any college degree (2-year Associate or higher)	36	15%
Refused	1	0%
Don't know	0	0%
Total Individuals Surveyed	243	

Additionally, while in grade school, 31% of individuals surveyed had an Individualized Education Plan or required some level of Special Education.

While 48% of adults entering services this past year had some level of income and 34% were enrolled in non-cash benefits, they still experienced a housing crisis that resulted in them becoming homeless. In later sections of this report, there are more details on additional barriers to housing that many individuals experience, along with how our system works to help move these individuals from homelessness to housing regardless of income or employment.

BARRIERS TO SUSTAINABILITY

Individuals experiencing homelessness in our community face many barriers to sustainability or the ability to lead a stable life, specifically when it comes to gaining and maintaining livable-wage employment and safe, stable housing. Poor credit and rental history, access to employment and livable-wages, transportation, and affordable housing are the common themes individuals self-identified as the reasons why they are experiencing homelessness.

According to 5-year estimates by the Census Bureau, as of 2018, in the FM Metro 43% of occupied housing units are rented. Rent prices and low income are causing many renters to be cost burdened. This is when housing costs require more than 30% of a household's income each month. 42% of renters

in our community are considered cost burdened. This is significantly higher than those who own their home at 14%. (Census Estimates)

The rate of cost burdened households changes drastically based on the household's income. Below is a breakdown of those who are housing cost burdened by income level.

Percentage of households who are housing cost burdened by income level	Overall		Owners		Renters	
Less than $20,000	11,991	90%	2,064	81%	9,927	92%
$20,000 to $34,999	7,308	59%	1,782	45%	5,526	66%
$35,000 to $49,999	3,284	27%	1,483	29%	1,801	26%
$50,000 to $74,999	2,113	12%	1,756	17%	357	5%
$75,000 or more	861	2%	689	2%	172	2%
Total Housing Cost Burdened Households	25,557	26%	7,774	14%	17,783	42%

For more information on our region's access to affordable housing, check out:

- The National Low Income Housing Coalition's "Out of Reach" report: https://reports.nlihc.org/oor
- Minnesota Housing Partnership "State of the State's Housing" report for Clay County: https://www.mhponline.org/images/stories/images/research/coprofs/2019/Clay.pdf

The top reasons why people are experiencing homelessness, from respondents of the Everyone Counts Survey conducted in October 2018, included:

- Eviction or did not have leases renewed,
- Not able to afford rent or house payments, and
- Loss of job or work hours cut.

These situations compound when we consider the barriers these individuals face in being able to rent an apartment or getting housing. The top barriers to accessing housing were identified as:

- Credit problems,
- No affordable housing,
- Criminal backgrounds,
- Bad rental history or past evictions, and
- No local rental history or references.

When respondents were asked about supports they felt they needed to access housing, they identified:

- Available affordable housing,
- Deposit assistance,
- Ongoing case management/support services,

- Reliable and affordable transportation,
- Increased income or employment, and
- Ongoing rental subsidies.

When asked about what would help them to maintain stable housing, survey respondents identified employment, affordable housing, and transportation as the top three.

PUBLIC HOUSING ASSISTANCE

Public Housing Agencies (PHA's) are the largest mainstream providers of affordable housing for local communities. In Cass and Clay Counties, three PHA's have made it part of their mission to prioritize families experiencing homelessness and people with disabilities for housing resources. Fargo Housing & Redevelopment Authority (FHRA), Moorhead Public Housing (MPHA), and Clay County HRA (CCHRA) are all active participants in the Coordinated Access, Referral, Entry, and Stabilization (CARES) System and work towards the goals of ending family, youth, veteran, and chronic homelessness in our region. More details about the CARES System can be found in the next section, "What are we doing as a community to address homelessness?".

In 2019, the United States Department of Housing and Urban Development (HUD) allowed PHA's to apply for additional Mainstream Housing Choice Vouchers, commonly called Section 8 vouchers. These vouchers are meant to target adults with disabilities who are experiencing homelessness, initialization, or housing insecurities. Due to their work in showing the great need for additional affordable housing resources in our community, FHRA and CCHRA were able to apply for and were awarded new vouchers for Cass and Clay counties. This was the largest new allotment of vouchers given to CCHRA since its inception. The amount awarded FHRA and CCHRA together was larger than those awarded to other larger metropolitan areas across the nation.

In 2019:

- Moorhead Public Housing reported 83% of new admissions were exiting homelessness.
- Fargo HRA had 480 new admissions listed as previously being homeless throughout their programs.
- Clay County HRA served 360 households in their homeless programs and reported 93% of new admissions to Housing Choice Vouchers had experienced homelessness.

Even with the new vouchers, waiting lists for these programs remain long. The waiting lists for tenant-based Housing Choice Voucher at FHRA and CCHRA are both closed, as the waiting list grew too extreme for new applications. Those on the list can expect to wait two or more years before receiving

vouchers. Other site-based programs such as Public Housing or units for people who are elderly and/or disabled have various waiting lists, with larger units for families having the longest.

NEEDS ASSESSMENT

CAPLP (Lakes & Prairies Community Action Partnership, Inc.) completed a needs assessment for Clay County, MN, in 2018. SENDCAA (Southeastern North Dakota Community Action Agency) completed the same needs assessment in March 2019 for Cass County, ND. There were three parts to this needs assessment:

- A survey for people currently seeking housing services
- A survey for homeless related service providers
- A survey for people previously served by a homeless prevention and assistance program at CAPLP and SENDCAA

Clay County, MN:

Results indicated the top contributor to respondents' housing crisis was not being able to afford their rent. A mental health symptom or chemical use was the second highest contributor to their current housing crisis (50%). Roommate/neighbor issues, and poor credit/poor criminal history were also noted as causes to a current housing crisis.

When asked what would help the most to solve the current housing crisis, the top three responses were case management or other support services (44%), ongoing rent assistance (41%) and credit repair/budgeting (41%). Deposit assistance (35%) and transportation (38%) were also of note (respondents were able to check all that applied).

The provider survey was sent out via an online surveying tool to the Housing Advisory Committee made up of homeless service providers, the FM Coalition to End Homelessness, and various community partners.

- For prevention and homeless assistance, providers felt housing search assistance, landlord/tenant relationships, and financial assistance were most important.
- For families, providers felt the biggest barriers to housing stability were domestic violence, affordable child care, and lack of affordable housing.
- For singles, providers felt criminal history, substance use, and lack of affordable housing were the biggest contributors to housing instability.

- For youth, providers felt youth most often face barriers with little or no rental history, lack of affordable housing options, and employment.

Additionally, a survey was administered via phone for past clients served by Family Homeless Prevention and Assistance Program (FHPAP) at CAPLP in September of 2018. 100% of responding individuals indicated the FHPAP assistance and case management they received from CAPLP helped to stabilize their housing crisis. Rental assistance, utilities, and deposit assistance were stated as being the most helpful to resolving the housing crisis (96%). A third (33%) of people indicated case management was also beneficial (respondents could check all that applied).

Throughout the surveys, multiple themes emerged showing a significant need for affordable housing in our community. Also of note, there is a commonly identified need for supportive services to help find housing, mediate with landlords, and navigate employment and mental health/substance use services.

To gain a deeper understanding of the needs of people who have or are currently experiencing a housing crisis, CAPLP staff conducted two focus groups in January of 2019. The first was with 8 individuals at Micah's Mission, a shelter for families in Moorhead. Respondents were of varying races and ages consistent with shelter population and households served in FHPAP. The top three areas identified as concerns were finding housing, employment, and transportation. Many stated they had barriers on their background that were keeping them from finding housing and employment. They shared that additional case managers to support people with these barriers would be helpful.

An additional focus group was held with clients who are currently housed on CAPLP programs in Clay County, MN. The commonly identified needs by this group included affordable housing options, living-wage jobs, and transportation options to get to important appointments such as apartment viewings or jobs. Respondents felt the services that worked well included Supplemental Nutrition Assistance Program (SNAP), Minnesota Family Investment Program (MFIP), housing search assistance, landlord mediation with their case manager, and general case management services.

Cass County, ND:

Individuals seeking housing services were asked to identify what contributed to their current housing crisis. Of those surveyed, 42% reported the primary cause to their current housing crisis was that they could not afford rent. Other responses included physical health issues (21%), roommate or neighbor issues (18%), and violence or concerns for safety (13%). Less prevalent responses included chemical or substance usage, mental health symptoms, criminal history, and loss of a job or difficulty finding work.

The top three responses for what would help individuals find and keep stable housing included help with past due rent (48%), on-going rental assistance (38%), and deposit assistance (33%). The top non-financial related support is credit repair and budgeting (23%). Other responses which were noted in the respondents' comments were obtaining and maintaining employment, affordable housing, and sufficient income.

All clients who received rent or deposit assistance in March or April of 2019 were called and asked to complete a survey. Out of the 6 clients, 100% reported the assistance they received helped them stabilize their housing and all clients reported they were satisfied with the services they received.

Thirty-nine providers responded to a survey about resources needed to prevent homelessness.

- Providers reported short-term financial assistance, case management, landlord/tenant relationships, housing search assistance, and transportation assistance were the most important in ending and preventing homelessness.
- For families, providers felt the biggest barriers to housing stability were lack of affordable housing options, affordable child care, and poor credit.
- For singles, providers felt mental health, lack of affordable housing options, and criminal history were the biggest contributors to housing instability.
- For youth, providers felt youth most often face barriers with poor or limited rental history, life skills/financial fitness, and lack of affordable housing options.

WHAT ARE WE DOING AS A COMMUNITY TO ADDRESS HOMELESSNESS?

CARES: OUR HOMELESS RESPONSE SYSTEM

The Coordinated Access, Referral, Entry, & Stabilization (CARES) System is our region's approach to the Department of Housing and Urban Development (HUD) mandate that each Continuum of Care (CoC) operate a Coordinated Entry System. HUD defines coordinated entry as a process developed to ensure that all people experiencing a housing crisis have fair and equal access and are quickly identified, assessed for, referred, and connected to housing and assistance based on their strengths and needs. CARES follows this mandate but also includes prevention, diversion, and stabilization services. Research shows that to end homelessness, we need to reduce the number of individuals entering our system, and that while housing ends homelessness, some people also need ongoing supports to continue to remain housed.

CARES includes partner agencies interested in assuring a more coordinated, effective, streamlined, and consumer friendly system. Our system operates in partnership between the ND CoC, West Central MN CoC, FM Coalition to End Homelessness, and White Earth Nation.

As a system, CARES strives to manage scarce system resources in a streamlined, transparent, planful, data-driven, and consumer center manner. The CARES System starts when a person seeks crisis services (ACCESS), first attempting to prevent homelessness when possible through connection with mainstream and prevention resources. If homelessness cannot be prevented, persons are prioritized for emergency shelter and supportive housing programs based on vulnerability, client choice, and program openings and eligibility (ASSESSMENT/ASSIGNMENT). The most vulnerable households are assisted with nav-

igation services. Those offered supportive housing are assisted with identifying and working on goals to obtaining and retaining stable housing (STABILIZATION).

A centralized and coordinated system allows us to have current data on the specific needs and characteristics of those experiencing homelessness or at imminent risk of homelessness. This data is valuable for system planning and analysis; including distribution of resources (to agencies and households seeking services), measuring effectiveness of services and programs, equity analysis, and identification of trends and current housing needs by type and population. Recently, both CoCs committed to transitioning how data is entered into Homeless Management Information System (HMIS) to improve data accuracy and usability.

PROGRAMS AVAILABLE

This section includes an inventory of shelter, transitional housing, rapid re-housing, permanent supportive housing, street outreach, and other homeless support services available for individuals experiencing homelessness in the FM Metro along with an estimated breakdown of funding sources for each type of homeless services.

These estimates are based on program self-reporting which was available at the time of publication. This may not be a comprehensive breakdown of all funding sources.

Cass County, Project Type	Federal Funding (ESG, CoC, etc.)	State Funding	Local Funding	Totals	2019 Total Beds
Shelter	$129,833	$185,500	$301,000	$616,333	210
Transitional Housing	$96,396	$0	$40,000	$136,396	36
Rapid Re-Housing	$18,000	$22,000	$286,813	$326,813	36
Permanent Supportive Housing	$677,376	$0	$18,750	$696,126	168
Street Outreach	$0	$0	$25,000	$25,000	NA
Homeless Supportive Services (including Prevention)	$0	$0	$25,000	$25,000	NA
Total	$921,605	$207,500	$696,563	$1,825,668	450

Clay County, Project Type	Federal Funding (ESG, CoC, etc.)	State Funding	Local Funding	Totals	2019 Total Beds
Shelter	$364,578	$82,284	$288,653	$735,515	74
Transitional Housing	$0	$268,700	$0	$268,700	73
Rapid Re-Housing	$0	$574,776	$44,042	$618,818	79
Permanent Supportive Housing	$841,157	$2,103,741	$0	$2,944,898	457
Street Outreach	$0	$568,306	$0	$568,306	NA
Homeless Supportive Services (including Prevention)	$0	$197,702	$72,500	$270,202	NA
Total	$1,205,735	$3,795,509	$405,195	$5,406,439	683

Definitions for each type of program type:

Shelter:

- Offers temporary shelter (lodging) for homeless households.

Transitional Housing (TH):

- Participants must enter into a lease agreement (sublease or occupancy agreement) for at least one month. Leases must automatically renew upon expiration, except with prior notice by either party, up to a max of 24 months.
- Participants receiving rental assistance may be required to live in a specific structure.
- Support services must be available during entire participation in TH.

Rapid Re-Housing (RRH):

- Provides short-term to medium-term assistance (up to 24 months).
- Lease between households and landlord.
- Household's able to select their unit.
- Providers can restrict max length of financial assistance but not length of time in unit.
- Support services must be offered during entire participation in RRH.

Permanent Supportive Housing (PSH):

- Long-term housing.
- Homeless households with a member who has a disability.
- Support services provided that are designed to meet the needs of participants.

Other Permanent Housing (PH):

- Long-term housing not otherwise considered PSH or RRH.
- PH Housing with Services provides long-term housing and supportive services for homeless per-

sons but does not limit eligibility to persons with a disability.

- PH Housing Only projects provide long-term housing for homeless persons but does not make supportive services available as part of the project.

PREVENTION/DIVERSION

For the past three years, the Homeless Prevention Project (HPP) has continued to provide client-centered homeless prevention services. The HPP includes CAPLP, SENDCAA, Presentation Partners in Housing, and The Salvation Army. The goal of the HPP is to ensure low-barrier access for prevention services in line with coordinated entry to prevent and end homelessness.

Households experiencing a housing related crisis apply at one access point. The HPP reviews all applications and prioritizes available resources based on vulnerability of the household. Resources are matched to households to provide the minimum assistance necessary for the shortest time possible in order to stabilize a household. The HPP maximizes community resources in order to assist as many households as possible. In addition to housing focused case management, the HPP can provide rent, utility, and security deposit assistance for households experiencing homelessness or likely to become homeless.

In 2019, the HPP provided $556,751 in financial assistance to prevent 544 households from eviction:

Payment Type	Payments
Rent/Mortgage Payments	443
Security Deposit Payments	324
Utility Bill Payments	177

Looking towards the future, the HPP intends to expand services to include diversion. Diversion is a service that guides households to safe and appropriate alternative housing options without utilizing emergency shelters. This ensures shelter beds are available for those who truly have no other option.

HMIS data shows the number of individuals who entered a shelter and/or housing support program from an institution setting, permanent housing, or a doubled-up situation. This is a target population for diversion and in 2019 this includes 1,185 individuals.

Prior Living Arrangements	Total Individuals
Institutional Setting	288
Permanent Housing/Own/Rental	365
Doubled Up (Staying w/ Friends or Family)	532
Total	1,185

The HPP is working closely with shelters, housing providers, supportive services, and funders to ensure an end to homelessness where it already occurs, prevention of homelessness where it is on the verge, and prioritization of services to the most vulnerable households. See the later section "Process Highlight – Moving towards a Homeless Prevention and Diversion Orientation" for more details.

SHELTER ENTRY

In 2019, 2,057 individuals, 9 adult couples without children, and 485 families inquired about seeking shelter at one of the FM Metro's emergency shelters.

Household Type	Numbers
Single Men	1,346
Single Female	710
Single Other	1
Single Female with Children	403
Single Male with Children	21
Married/Couple with children	61
Married/Couple with no children	9
Total Households	2,551

The 485 families include a combined total of 975 children. Of those children, 44% are ages 0-5. Below is the breakdown of age for the children included in these families.

Total Children	Number	Percentage
Age 0-5	430	44.10%
Age 6-12	369	37.80%
Age 13-17	94	9.60%
Age 18+	37	3.80%
Unknown	45	4.60%
Total Children	975	

In total, this was an increase of 394 households (both singles and family units) compared to 2018.

This data is tracked through the Shelter Entry List, which is a list shared by all the emergency shelters in the FM Metro and was designed to get the most vulnerable people experiencing homelessness a shelter bed when spaces become available. Prior to this coordinated process, those in the community who were searching for a shelter bed would have to check each shelter daily to see if there was any availability. This prevented some of the most vulnerable in our community from getting a shelter bed, while those with more resources were able to access shelter.

Of the 2,551 unique households seeking services, 76% only sought shelter once throughout 2019. The remaining households sought shelter multiple times throughout the year resulting in a total of 3,343 duplicated households who sought shelter throughout 2019.

Number of Times Households Sought Shelter	Number of Households	Percentage
Sought Shelter 1 Time	2,541	76.00%
Sought Shelter 2 Time	547	16.40%
Sought Shelter 3 Times	177	5.30%
Sought Shelter 4 Times	59	1.80%
Sought Shelter 5 Times	14	0.40%
Sought Shelter 6 Times	4	0.10%
Sought Shelter 7 Times	1	0.00%
Total Duplicated Households Who Sought Shelter in 2019	3,343	

Of those seeking shelter, 953 households or 28.5% were able to receive services and a shelter bed. Only 27 households were diverted, or able to find an alternative place to stay rather than entering an emergency shelter. As of the last two weeks in 2019, there were 86 individuals and 21 families still seeking a shelter bed. The remaining households have dropped off the Shelter Bed List either because shelter staff were unable to contact them, or they were no longer in need of a shelter bed.

As part of the coordinated entry process, households seeking shelter are screened for vulnerabilities and needs. Of those households who sought shelter in 2019:

- 41% self-reported criteria that classifies the household as chronically homeless
- 35% self-reported having a disabling condition
- 21% self-reported a history of domestic violence
- Of those with a history of domestic violence, 24% experienced violence within the last 30 days

COORDINATED ASSESSMENT

Households who present as homeless are assessed for appropriate homeless interventions to assist with their current crises. The tool used to assist with assessing those who are homeless is the Vulnerability Index-Service Prioritization Decision Assistance Tool (VI-SPDAT). A VI-SPDAT is a survey administered to individuals who meet United States Department of Housing and Urban Development's (HUD) definition of homeless. Under the HUD definition, a person is homeless if they are living in a place not meant for habitation, in an emergency shelter, in transitional housing, or exiting an institution where they currently reside and were homeless before entering. Individuals can also complete a VI-SPDAT if they do not meet these definitions but are fleeing domestic violence, are a veteran, or youth. The VI-SPDAT is used to determine risk and assist with the prioritization of services for individuals who are experiencing homelessness. There are also specific VI-SPDAT tools utilized for families with children and single youth.

Once an assessment is complete and it is identified which housing program is appropriate, individuals and families are placed on the HMIS Priority List to await a housing program opening. The following chart is the breakdown of the Cass County, ND, and Clay County, MN, list as of the end of 2019.

Household Type	Cass County, ND	Clay County, MN	Totals
Singles: Adults without Children	200	437	637
Youth Singles: Age 18-24 without Children	31	41	72
Families: Adults with Children	60	118	178
Youth Families: Youth with Children	7	19	26
Totals	298	615	913

This data was collected in HMIS, and both North Dakota and Minnesota have a coordinated assessment report which collects these assessment referrals. Due to protection regulation, Domestic Violence providers are unable to use HMIS. YWCA of Cass-Clay (YWCA) is the FM Metro's Domestic Violence emergency shelter provider. The data provided by YWCA from a separate report was integrated with these numbers.

From this list we can see there are more families identified and assessed in Clay County, MN. This may be due to Minnesota having additional homeless programs which consider individuals who are doubled up as homeless. Since Minnesota assesses those who are doubled up and because families are more likely to be in these situations, this may explain why there are more families in Clay County, MN. North Dakota does not have any programs for doubled up households; therefore, these individuals are not assessed in North Dakota.

Below is the breakdown of the Priority List at the end of 2019 where housing intervention was recommended for those who were assessed.

- Those who are recommended for PSH (Permanent Supportive Housing programs) would best be assisted with non-time limited, permanent support or a housing first program.
- Households who were assessed as needing TH/RRH (Transitional Housing or Rapid Rehousing programs) would best be assisted with a program that offers more temporary assistance including rental assistance and case management for around 3-6 months, up to maximum of 2 years.
- The housing assessment also determines if a household would be more appropriate for mainstream services to assist with their housing crisis rather than a housing intervention program. These households would be referred to SNAP, MFIP, Section 8, or other programs not designated for individuals experiencing homeless exclusively.

Cass County, ND Breakdown	Adult Head of Household	Youth Head of Household	Total
PSH Single	159	21	180
PSH Family	48	6	54
TH/RRH Single	41	9	50
TH/RRH Family	16	0	16
Total	264	36	300

Clay County, MN Breakdown	Adult Head of Household	Youth Head of Household	Total
PSH Single	234	18	252
PSH Family	81	12	93
TH/RRH Single	180	17	197
TH/RRH Family	31	7	38
Total	526	54	580

COORDINATED ENTRY

When a housing provider has an opening in a program, they will request a referral of a family or individual on the Priority List. The Systems Specialist, who is employed by the FM Coalition to End Homelessness, is responsible for making these referrals and maintaining the Priority List for the FM Metro. The Systems Specialist accepts requests and pulls referrals from the Priority List, guided by the program's eligibility as well as the Prioritization Policies from CARES. The referrals are taken from the list and given to the housing provider. The housing provider then contacts the household and offers them entry into the housing program.

The West Central CoC recently conducted a major data clean-up effort that resulted in a significant decrease in the number of persons on our Priority List. Having accurate data is essential to CoC planning and helps ensure clients are served in a more rapid manner. The North Dakota CoC will conduct a similar process in June 2020.

The West Central MN CoC was recently awarded funding from HUD that will allow for the expansion of Coordinated Entry data management and training. This role will help assure the CoC is able to ensure data remains accurate and current, as well as provide a more accurate understanding of the demand for homeless services at a more detailed level. This position is targeted to start July 1, 2020.

Referrals provided for Cass County Housing Providers:

Household Type	Referrals Reports Processed	Number of Openings
Single	12	50
Single Youth	8	12
Family	16	46
Family Youth	4	5
Total	40	113

Referrals provided for Clay County Housing Providers:

Household Type	Referrals Reports Processed	Number of Openings
Single	18	37
Single Youth	0	0
Family	15	46
Family Youth	1	1
Total	34	84

EQUITY OF OUR SYSTEM

As mentioned in the demographic overview of those receiving services throughout 2019, homelessness disproportionately impacts people of color and those who identify as Hispanic. Equity in our system is something we are beginning to focus on as a community, really looking into the parts of our system that may be causing individuals and families of color barriers to receiving services to help best resolve their housing crisis and current episode of homelessness.

The West Central CoC conducted an Equity Review in August of 2019. For more details on how this study was conducted or key findings, visit:
https://www.homelesstohoused.com/homeless-information-data

Overall, this study found for individuals experiencing homelessness in West Central MN (including Clay County, MN):

- Persons of color had a disproportionately lower number of entries into transitional and permanent housing.
- Race played little role in who got into shelter.
- Overall, the likelihood of a positive or negative leave from a homeless program does not appear to be related to the following variables: race, ethnicity, or gender.
- Persons who have experienced domestic violence are statistically likely to experience a more positive leave.
- Persons over age 50 are statistically more likely to experience a negative leave.
- Native Americans/Alaskans have a slightly higher likelihood of returning to homelessness.

Additionally, the North Dakota CoC conducted an Equity Review as well in early 2020. At the time this report was published, this review was not publicly available. In next year's report we hope to have better equity data specific to the FM Metro, as we see this as an important measure of the success of our system.

PRESSURE ON OUR SYSTEM

This report includes an overview of each part of the CARES System and our community's response to ending homelessness. In order to achieve this ambitious goal, each part of our system and each partner needs to focus on reducing the number of individuals entering our system and effectively serving those in our system to prevent them from returning unnecessarily.

To judge our progress on this, we need to look at our system's flow. In 2019, there were 2,591 individuals who entered into services or entered our system. This is our system's inflow. During the same time, there were 2,166 leavers or individuals who exited from services or our system. This is our system's outflow.

Over the past three years, with access to better data for our community, we have seen the trend of more entries than exits.

Year	Inflow (Entries)	Outflow (Exits)	System Flow
2017	2,249	2,056	+ 193
2018	2,517	2,118	+ 399
2019	2,591	2,166	+ 425

This means while more individuals and families are exiting homelessness, an even greater number are entering homelessness.

EXIT DESTINATION

One vital data point the CoCs and FM Coalition to End Homelessness utilize to monitor project and system performance is exit destination of clients leaving services. The goal is to increase the percentage of individuals who leave homeless programs (street outreach, emergency shelter, transitional housing, rapid re-housing, or permanent housing) and exit to positive destinations versus temporary destinations, institutional settings, or other destinations.

While the CoCs track outcomes by program type (see the next section for more details and more system metrics), listed below are the 2019 cumulative outcomes for all program types operating in Cass and Clay counties, as well as the definitions of each destination category.

This first graph shows all exit destinations for all client populations. We would like to note that outcomes for individuals exiting permanent housing are typically much higher than those exiting shelter or outreach, which lead to the average shown below.

Exit Destination - All Clients	Total	Percentage
Permanent Destinations	716	33%
Temporary Destinations	290	13%
Institutional Settings	72	3%
Other Destinations	63	3%
Client Doesn't Know/Refused	347	16%
Data Not Collected	678	31%
Total Individuals	2,166	

Below are the exit destinations for families who exited from services in 2019. There is a significant increase in the percentage of households who exit to a permanent destination. We attribute this to the larger number of singles in outreach and emergency shelter. In shelter, singles are often more likely to leave without notifying staff of their plans after exit or declining to complete an exit interview, account-

ing for the high percentage of Data Not Collected and Client Doesn't Know/Refused seen in the chart above.

Exit Destination - Families	Total	Percentage
Permanent Destinations	441	72%
Temporary Destinations	83	14%
Institutional Settings	16	3%
Other Destinations	7	1%
Client Doesn't Know/Refused	0	0%
Data Not Collected	64	10%
Total Individuals	611	

With youth exiting services, there is an increase in the percentage of youth exiting into a temporary destination. This is mainly as youth exit services to stay or live with family or friends on a temporary basis. This is not uncommon for youth in general, as this is a very transitional period in most people's lives.

Exit Destination - Youth	Total	Percentage
Permanent Destinations	70	30%
Temporary Destinations	74	32%
Institutional Settings	16	7%
Other Destinations	6	3%
Client Doesn't Know/Refused	24	10%
Data Not Collected	43	18%
Total Individuals	233	

Exit destination definitions:

- **Permanent Destinations** include houses or apartments that are owned or rented by clients with or without any form of subsidy, rental by clients in a public housing unit, permanent supportive housing programs for formerly homeless persons, or living with family or friends on a permanent basis.
- **Temporary Destinations** include emergency shelter, transitional housing programs for homeless persons, hotel or motel, place not meant for habitation (a vehicle, abandoned building, bus/train/subway station/airport, or anywhere outside), or living with family or friends on a temporary basis.
- **Institutional Settings** include foster care homes or group home, psychiatric hospital or other psychiatric facility, substance abuse treatment facility or detox center, hospital or other residential non-psychiatric medical facility, jail, prison, juvenile detention facility, or long-term care facility or nursing home.

- **Other Destinations** include residential project or halfway house with no homeless criteria, deceased, or other.

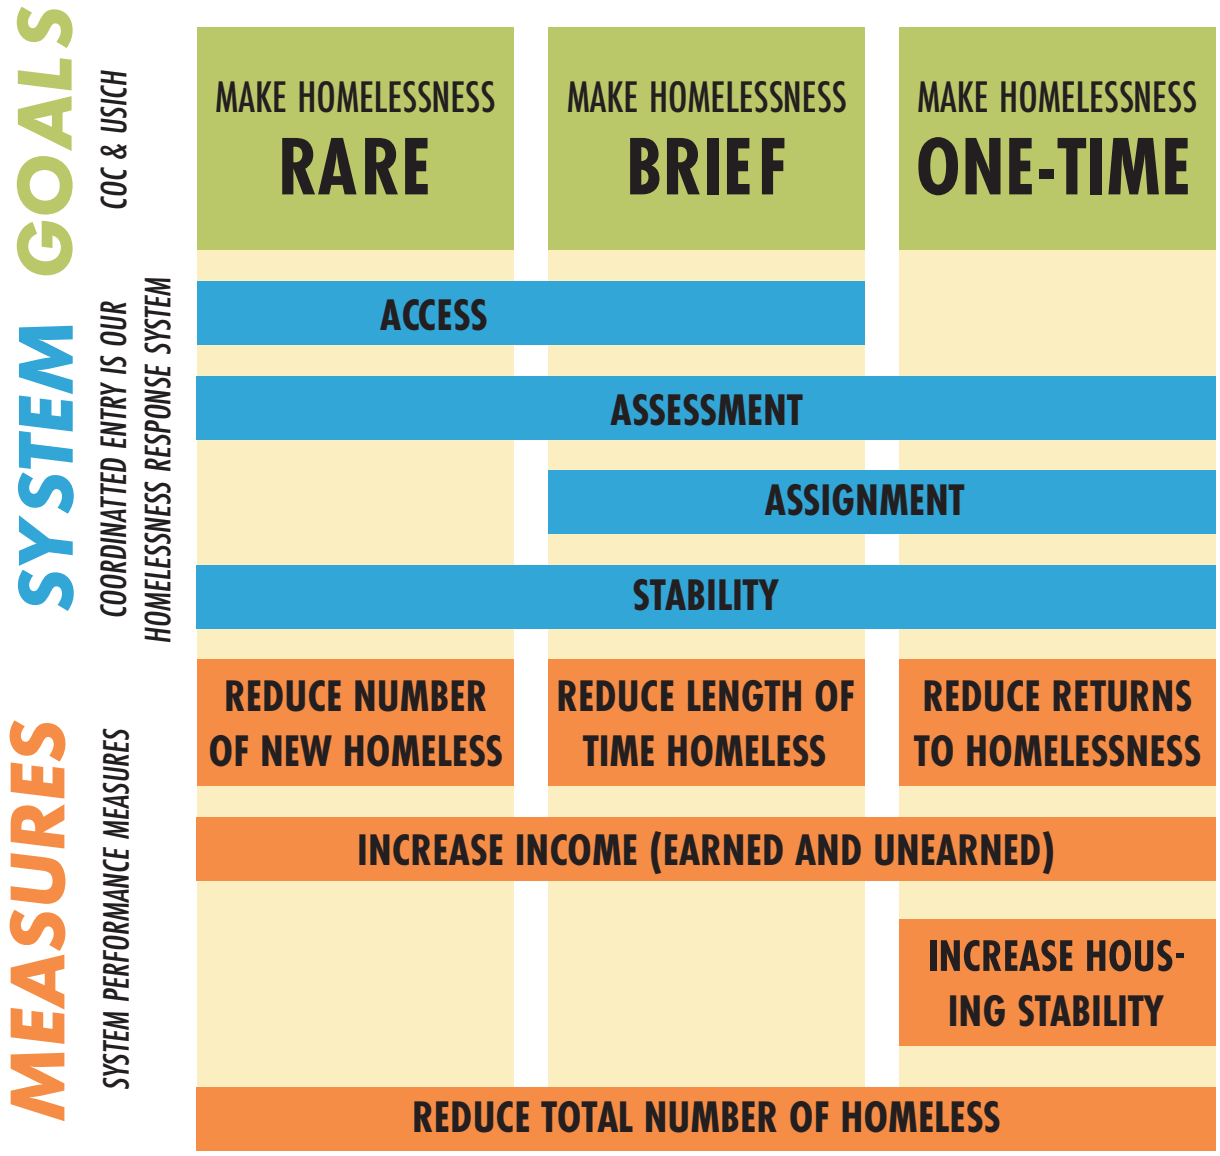
OUTCOME REPORTS

HUD, with the updated McKinney-Vento Homeless Assistance Act (the Act), views the local homeless response as a coordinated system as opposed to homeless programs and funding sources that operate independently in a community. To facilitate this perspective, the Act now requires communities to measure their performance as a system, in addition to analyzing performance by specific projects or project types.

The intent is for CoCs to regularly measure their progress in meeting the needs of people experiencing homelessness in their community and to report this progress to HUD. Since 2015, CoCs submit their Performance Measures to HUD annually. These include:

1. Length of Time Homeless
2. Number of persons returning to homelessness once housed
3. Number of Total Homeless
4. Change in income (earned and total income)
5. Number of New persons entering homelessness
6. Number of persons retaining permanent housing or exiting to permanent housing

This data is only available for the entire CoC compared to the rest of the report which is specific for the FM Metro. At this point, we are unable to pull these metrics for local communities.



North Dakota CoC

Measures	2015 Baseline Performance	2016 Performance	2017 Performance	2018 Performance	2019 Performance
1. Length of time homeless	205 days ES	**350 days ES**	**405 days ES**	71 days ES	55 days ES
	192 days ES + TH	**360 days ES + TH**	339 days ES + TH	81 days ES + TH	71 days ES + TH

2. Number of persons returning to homelessness once housed	8% in PH in 2 years	6% in PH in 2 years	6% in PH in 2 years	5% in PH in 2 years	5% in PH in 2 years
	6% Total in 2 years	6% Total in 2 years	**8% Total in 2 years**	8% Total in 2 years	8% Total in 2 years
3. Number of total homeless	1,220 HMIS	1,215 HMIS	1,047 HMIS	938 HMIS	**978 HMIS**
	242 PIT	211 PIT	**215 PIT**	**246 PIT**	216 PIT
4. Change in income	35% Stayers	41% Stayers	**40% Stayers**	45% Stayers	**40% Stayers**
	50% Leavers	**42% Leavers**	47% Leavers	50% Leavers	64% Leavers
5. Number of new persons entering homelessness	881	**1,081**	927	824	**985**
6. Number of persons re-taining permanent housing or exiting to perm. housing	54% All	**53% All**	**43% All**	**40% All**	**38% All**
	91% PH	91% PH	94% PH	**92% PH**	95% PH

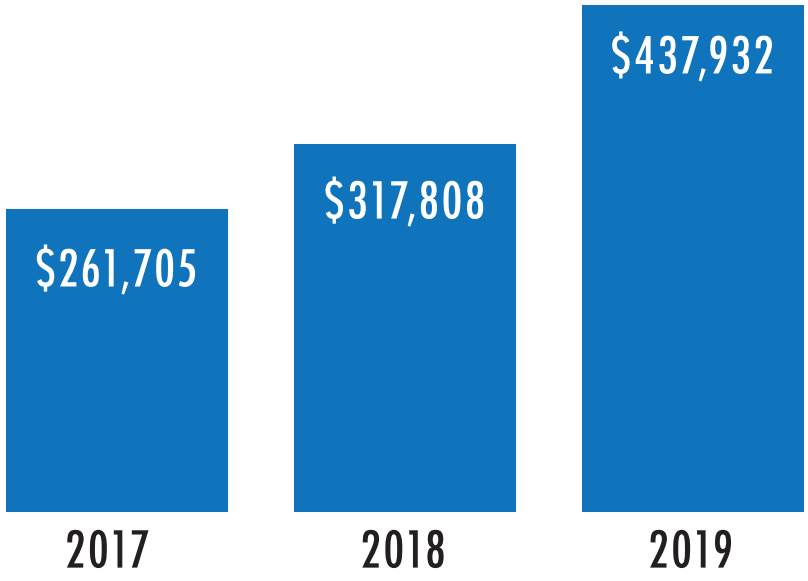
Ultimately, to achieve our community's goals of making homelessness rare, brief, and one-time, we need to monitor our homeless response system through these system performance measures.

Data Highlight: Housing Navigation cost savings from reduced use of costly community services pre- and post-housing

In 2015, United Way of Cass-Clay, in conjunction with members of the FM Coalition to End Homelessness, convened a Design Team of dedicated professionals with a wealth of experience and knowledge spanning nearly 200 years from multiple areas of homeless services. Over the course of three half-day meetings using a consensus model of decision making, the Design Team assessed and developed a Project Summary according to needs based on demographic and geographic populations. Valuing a high level of collaboration and transparency, the Design Team distributed meeting notes and solicited feedback via survey from collaborative stakeholders throughout the process.

This process resulted in a pilot where three new client-centered Housing Navigators would set to work on creating holistic links between existing resources and case management, thus closing gaps and removing barriers in order to achieve housing stability. The goal of this project is to create a new culture of service delivery and enhance collaboration and partnerships among homeless service providers, rooted in the Housing First Philosophy, a proven method of ending all types of homelessness, which offers individuals and families experiencing homelessness immediate access to permanent affordable or supportive housing with a low threshold for entry.

In 2016, Presentation Partners in Housing was selected as the agency to launch this pilot and hired three Housing Navigators. Since the program's inception, Presentation Partners in Housing has hired an additional two Housing Navigators.



In 2017, after the first complete year of services, 23 active Housing Navigation Program participants were able to attain housing, with 80% stably housed for at least 6 months. Additionally, 20 participants had been enrolled in the program for at least 12 months and had sufficient data to compare their pre- and post-housing usage of costly community services, such as detox admissions, ambulance transports, jail time, emergency room visits, and emergency shelter stays. These 20 participants reduced the usage of these costly services for an estimated cost savings to the community of **$261,705**.

Each of the 20 participants, whose personal data was collected as part of this program, voluntarily agreed to disclose their usage of these community services both while participating in the program and prior to being housed. To calculate the estimated cost savings, actual usage of each community service by each individual participant was collected and compared to the average annual usage of these same services by the same individual participant while homeless in our community.

In 2018, 36 active Housing Navigation Program participants were able to attain housing, with 88% stably housed for at least 6 months. Again, there were 20 participants who had been enrolled in the program for at least 12 months and had sufficient data to compare their pre- and post-housing usage of costly community services. These participants reduced the usage of these costly services for an estimated cost savings to the community of **$317,808**.

In 2019, 47 active Housing Navigation Program participants were able to attain housing, with 100% stably housed for at least 6 months. There were 24 participants who had been enrolled in the program for at least 12 months and had sufficient data to compare their pre- and post-housing usage of costly community services. These participants reduced the usage of these costly services for an estimated cost savings to the community of **$437,932**.

Over the past three years of this program, there has been a combined cost savings estimated at **$1,017,445** for our local community!

THE COST SAVINGS OF HOUSING

Process Highlight:
Moving towards a Homeless Prevention and Diversion Orientation

Historically, community responses to homelessness have focused primarily on addressing the needs of those who have already lost their housing – and our community has been no different. This model has led to communities 'managing' homelessness and, as a result, 'institutionalized' the homeless response system. An effective homeless response will always include providing emergency services and moving people into housing with appropriate supports as rapidly as possible. However, there is a crucial third component to an effective response: homeless prevention and shelter diversion. This third piece has often been under-emphasized and under-resourced in many communities including ours.

Following the lead of exciting new research and evidence-based approaches from communities across the nation, the FM Metro is shifting to a comprehensive, community-based preventative approach to ending homelessness. In designing the local prevention and diversion approach, the FM Metro proactively sought training and guidance from nationally recognized industry experts like OrgCode and the National Alliance to End Homelessness. Additionally, compassionate local providers and incredibly resilient and honest persons with lived experience have continually provided influence and direction on the design of a more robust prevention and diversion system.

No single agency or program can prevent and/or end homelessness. Success of a robust prevention and diversion system requires multi-agency commitment with key collaborations across the local CoCs including social services, public schools, the VA, youth providers, domestic violence providers, mental health and recovery programs, emergency shelters, and many more.

Beginning January 1, 2021, "211" through FirstLink will serve as the primary first point of contact for all households experiencing a housing crisis. Those currently experiencing homelessness and those most at-risk of homelessness will be referred to the Homeless Prevention and Diversion Program at Presentation Partners in Housing (PPiH). Following this referral, a highly trained Homeless Prevention and Diversion Specialist from PPiH will conduct a screening and assessment and work with each household to determine what resources and supports are needed to rapidly resolve their unique housing crisis. The goal is to immediately connect the household to resources as well as develop a housing stability plan that meets their individualized needs. Light touch case management and advocacy are provided along with supports from CAPLP, PPiH, SENDCAA, The Salvation Army, and other important mainstream resources to end homelessness where it occurs and prevent homelessness when it is on the verge. The end outcome is that all households remain housed or have a path to stable housing!

Erin Wixsten from OrgCode spent three days in the FM Metro in February 2020 training local providers and community stakeholders on the framework of successful prevention and diversion programs, in

partnership with FM Coalition to End Homelessness and United Way of Cass-Clay. Erin shared research and examples of communities that have been able to prevent shelter entry for up to 80% of households experiencing a housing crisis, CoCs that were able to close an emergency shelter for good, and high rates of evictions that were prevented as a result of a robust response to homelessness. Erin further stated there is "literally no way" these interventions do not work, and many communities that now embrace these approaches experience guilt that they did not implement prevention and diversion strategies sooner.

The FM Metro is ready to shift to a prevention and diversion orientation and approach to ending homelessness. Support from local city officials, CoCs, FM Coalition to End Homelessness, United Way of Cass-Clay, other local funders, service providers, and consumers have aligned in order to launch this project. We look forward to sharing data and outcomes from the launch of the Homeless Prevention and Diversion Program as part of next year's State of Homelessness Report.

WHAT DOES ENDING HOMELESSNESS LOOK LIKE?

Reasons people find themselves without a home will always exist. But with enough affordable housing in our community, increased employment and income, equity in services and programs, and coordinated service delivery systems, we can make homelessness rare, brief, and one-time for individuals and families in our community—virtually ending long-term homelessness. How do we do that? Our Coalition of service providers, funders, and community members advances our mission through advocacy, education, and collaboration. Our Coalition stands strong that this vision can become a reality.

WHAT IS NEXT FOR OUR COMMUNITY?

Looking to the remainder of 2020 and beyond, the FM Coalition has declared a priority for ending homelessness for youth and families with children. This data based priority was made primarily because it addresses the needs of some of the most vulnerable members of our community while doing the important upstream work needed to prevent future generations of chronic homelessness. We believe it will also work to address other concerns, such as the persistent fact that people of color experience homelessness disproportionate to the rest of the population. Demographic data of individuals experiencing homelessness suggest that early interventions in the lives of children of color will reduce future homelessness in adulthood.

This does not mean we are not working to address all types of homelessness, but making such priorities is how we make the incremental progress to reach audacious goals and accomplish systemic change. 2020–2021 planning and implementation include:

- Leveraging funding support of United Way Cass-Clay, which shares an emphasis on ending homelessness for youth and families with children.
- Create a campaign to increase public awareness about homelessness and efforts being taken to end homelessness.
- Increase awareness of homeless data and issues for local elected leaders as part of a comprehensive policy and funding strategy to advance our work.
- Developing and implementing comprehensive diversion and prevention systems and strategies.
- Developing specific strategies concerning youth and child homelessness.
- Renewed focus on developing strategies to address larger societal and systemic issues such as race, income inequality, and food insecurity.
- Strengthening partnerships with County and State partners in North Dakota and Minnesota.

Our Coalition remains committed to aligning resources and programs to create opportunities for people to thrive so that everyone in Fargo-Dilworth-Moorhead-West Fargo has a safe place to call home.

APPENDIX 1: DATA SOURCES, REFERENCES, AND RESOURCES

Main data sources as they appear:

Homeless Management Information System (HMIS) is the database that many state and federal funders require to be utilized by all homeless service providing agencies and programs.

Fargo-Moorhead Homeless Everyone Counts Survey (Everyone Counts Survey) is based on data provided by the FM Coalition to End Homelessness collected through face-to-face interviews and recorded into an online medium. A total of 243 individuals were surveyed on October 25, 2018, in the FM Metro.

United States Census Bureau Data is the leading source of quality data about the nation's people and economy.

Community Action Needs Assessments were completed by CAPLP and SENDCAA, respectively, in the form of focus groups and interviews. In Clay County, MN, the survey for people currently seeking housing services was administered to anyone that presented to CAPLP offices between the predetermined dates of October 22, 2018, to November 2, 2018. A total of 34 surveys were collected. In Cass County, ND, the survey was conducted for three weeks for anyone who presented at SENDCAA from March 5, 2019, to March 26, 2019. 40 clients applying for deposit or rent assistance completed the needs assessment survey over a three-week time span in March of 2019.

Shelter Entry List the list shared by all the shelters in the FM Metro designed to get the most vulnerable people experiencing homelessness a shelter bed when shelter bed spaces become available.

Coordinated Entry Priority List the active list of households who present as homeless who have been assessed for appropriate homeless interventions utilizing the Vulnerability Index-Service Prioritization Decision Assistance Tool (VI-SDPAT) to await a housing program opening.

West Central Minnesota CoC Equity Review a summary of three separate equity reviews compiled by the West Central Minnesota CoC.

APPENDIX 2: KEY TERMS AND DEFINITIONS

For the purpose of this report, **homeless** refers to people who lack a fixed, regular, and adequate night-time residence, including those whose residence is a shelter or transitional housing program, those living in unstable and non-permanent situations, and those forced to stay on a temporary basis with a family member because they have no other place to stay, specifically:

- **Sheltered** includes individuals who are sheltered in emergency shelter and transitional housing programs.
- **Unsheltered** includes individuals who are staying in a place that is not a regular or permanent place to stay, such as outdoors, in a car, vacant building, or a place of business.
- **Doubled up** includes individuals who are staying or living with a friend or family member on a temporary basis because they have nowhere else to go.

Chronically homeless includes individuals who meet all of the following:

- Currently experiencing homelessness,
- Been homeless for at least one year during the current episode OR homeless for less than one year in the current episode, but homeless at least four times in the previous three years, and
- Disabled (those who have a physical, mental, or other health condition that limits the kind of work they can do OR those who have a physical, mental, or other health condition that makes it hard for them to bathe, eat, get dressed, get in and out of bed or chair, or get around by themselves).

Continuum of Care is a regional planning body of stakeholders designed to promote a shared commitment to the goal of ending homelessness.

For the purpose of this report, **exits out of homelessness** are defined by the individuals' destination once they leave services:

- **Permanent Destinations** include houses or apartments that are owned or rented by clients with or without any form of subsidy, rental by clients in a public housing unit, permanent supportive housing programs for formerly homeless persons, or living with family or friends on a permanent basis.
- **Temporary Destinations** include emergency shelter, transitional housing programs for homeless persons, hotel or motel, place not meant for habitation (a vehicle, abandoned building, bus/train/subway station/airport, or anywhere outside), or living with family or friends on a temporary basis.

- **Institutional Settings** include foster care homes or group home, psychiatric hospital or other psychiatric facility, substance abuse treatment facility or detox center, hospital or other residential non-psychiatric medical facility, jail, prison, juvenile detention facility, or long-term care facility or nursing home.
- **Other Destinations** include residential project or halfway house with no homeless criteria, deceased, or other.

Individuals with a disability of long duration are those who have any disability that is ongoing, continued, or for an indefinite duration.

Individuals with a chronic health condition are those who have been diagnosed with a chronic health condition, physical disability, or developmental disability.

Individuals with a mental health problem are those who have been diagnosed with a mental health condition or disorder.

Individuals with a substance abuse disorder are those who have an addiction to alcohol, drugs, or both types of substances.

Youth Homelessness includes young adults 24 years old or younger, living without parents or guardians and may be parenting themselves, who lack a fixed, regular, and adequate night-time residence, including those whose residence is a shelter or transitional housing program, those living in unstable and non-permanent situations, and those forced to stay on a temporary basis with a family member because they have no other place to stay.

Project Type Definitions

Shelter:

- Offers temporary shelter (lodging) for homeless households.

Transitional Housing (TH):

- Participants must enter into a lease agreement (sublease or occupancy agreement) for at least one month. Leases must automatically renew upon expiration, except with prior notice by either party, up to a max of 24 months.
- Participants receiving rental assistance may be required to live in a specific structure
- Support services must be available during entire participation in TH.

Rapid Re-Housing (RRH):

- Provides short-term to medium-term assistance (up to 24 months).
- Lease between household and landlord.
- Household's able to select their unit.
- Providers can restrict max length of financial assistance but not length of time in unit.
- Support services must be offered during entire participation in RRH.

Permanent Supportive Housing (PSH):

- Long-term housing.
- Homeless household with a member who has a disability.
- Support services provided that are designed to meet the needs of participants.

Other Permanent Housing (PH)

- Long-term housing not otherwise considered PSH or RRH.
- PH Housing with Services provides long-term housing and supportive services for homeless persons but does not limit eligibility to persons with a disability.
- PH Housing Only projects provide long-term housing for homeless persons but does not make supportive services available as part of the project.

APPENDIX 3: FM COALITION TO END HOMELESSNESS APPROVED STATEMENT ON ENDING HOMELESSNESS FOR YOUTH AND FAMILIES

To: Members & Partners of the FM Coalition to End Homelessness
From: Cody J. Schuler, Executive Director
Date: August 8, 2019
Re: Approved Statement on Ending Homelessness for Youth and Families

A key component of pursuing strategies to end homelessness in the Fargo-Moorhead Metro area is to identify particular populations where resources can be aligned and timelines established towards a goal of "functional zero" where systemically homelessness is rare, brief, and one-time. At the May 28, 2019 meeting of the general membership of the Coalition, a discussion was held about consideration of a focus population following the successes of previous emphasis on ending Veteran homelessness.

On July 18, 2019 the Board of Directors of the FM Coalition to End Homelessness approved a proposal to create a statement to be distributed to the members of the Coalition to End Homelessness designating a priority on ending homelessness for youth and families with children without distraction from efforts to end homelessness for other populations. The statement and key rational was reviewed (with no action) at the July 23, 2019 meeting of the general membership of the Coalition. **The statement was approved by vote of the membership of the FM Coalition via electronic ballot that closed August 7, 2019.**

Any timelines, strategies, and goals will be identified in the future as the Coalition approves strategies.

Ending Homelessness for Youth and Families with Children Statement

The Fargo-Moorhead Coalition to End Homelessness designates a priority for developing strategies for ending youth homelessness and homelessness among families with children in the Fargo-Moorhead Metro area. This priority includes aligning existing community resources and advocating for new resources. By emphasizing homelessness impacting youth and children, the FM Coalition aims to address root causes, break cycles of poverty, and end future instances of homelessness. While prioritizing youth and families with children, the FM Coalition pledges continued vigilance in seeking strategies and aligning resources for all populations experiencing homelessness, including chronic, veteran, and those fleeing domestic violence.

This designation stands until the FM Coalition states otherwise.

Key rationale for this designation:

- Addressing youth and child homelessness strategically addresses future chronic homelessness.
- Adult homelessness is often rooted in youth/child homelessness and childhood trauma.
- Ending homeless for youth/children is achievable in the near future for our community.
- Placing a priority on this population locally is in line with priorities set by Minnesota's Action
- Plan and the US Interagency Council on Homelessness (USICH).
- Improved services for these populations benefits all populations.
- Public awareness concerning these populations raises awareness about the wider issue of homelessness.
- Prioritizing these populations will not reduce urgency or efforts towards ending homelessness for other populations.

THANK YOU TO:

The State of Homelessness Task Force for expertly preparing this report

United Way of Cass-Clay for partnering in this report and making homelessness part of their bold community goals

Institute for Community Alliances for assisting with data reporting

Sandwich Club Design for layout and design

FM COALITION TO END HOMELESSNESS

United Way of Cass-Clay

RE: HB 1012 – Section 11 Developmental Disability Program

Dear Chairman Holmberg and members of the committee,

As a long distance sister of a person receiving Developmental Disability Services, I am writing to express my opposition to eliminating Section 11 funding as outlined in HB 1012. This program serves individuals who would otherwise "fall through the cracks" without the support provided by this program.

Greetings: My name is Carol Sipsock (DPOA) writing this letter in behalf of my sister, Phyllis Teich, who has been a client of CLS Fargo since 1990. Phyllis is 72 years old and has intellectual disability / cognitive issues. Phyllis also has many chronic health conditions(heart and kidney) which are progressing . I am happy to share any medical information if necessary.

CLS services for my sister include(but not limited to) :

1. Total money management. Phyllis is unable to manage her finances, and there would be problems paying her rent/other expenses of having an apartment. This would cause eviction and more expenses to "the system".
2. Assistance in managing health related issues by accompanying Phyllis into the physician offices to aid with communication and executing the care plan. For Phyllis this would mean she would not be taking the appropriate medication/physician visits/costs of additional of Emergency Room/Hospital admissions. There is no immediate family in the area to bridge the gaps.
3. CLS has made it possible for Phyllis to live independently in a safe environment; making sure food, medicine, and other basic necessities are available to Phyllis. Without these services, there could be injury to herself, going without food, medicine etc. because she doesn't understand the impact and magnitude this would have.
4. CLS assisted Phyllis with a "job coach" such that Phyllis could work part time. Without these services, Phyllis would not be able to obtain employment on her own/stay employed her and she would have lost out on additional spending money. COVID/loss of employment/health issues have added more challenges in getting employment. Currently loss of job due to business closing.
5. CLS has also intervened on Phyllis behalf on disputes to stop further escalation. Without CLS there would be legal fees and court costs on "the system".

With the loss of these services, Phyllis would “fall through the cracks”.

Phyllis is a lifelong North Dakota resident. CLS has been a driving force for Phyllis to be able to be a contributing member of society. It would be a travesty to take these services away from her.

Thank you for your attention to this matter. I do live in the Detroit, MI area and would be happy to provide any additional information needed.

I strongly urge you to continue to fund this program and to provide continuity to those receiving Section 11 supports. Thank you for your continued service to the people of North Dakota and for your consideration of continuing this service that supports people with disabilities to be as independent as possible in their communities.

Sincerely,

Carol Sipsock

SANFORD HEALTH

March 10, 2021

Re: North Dakota Dementia Services Program Funding

Dear Mister/Madam Chair and Members of the Committee,

My name is Lindsay Hines and I am a clinical neuropsychologist practicing at Sanford Health in Fargo, North Dakota. I am engaged in evaluation, diagnosis, and treatment planning with individuals with changes in memory, including Alzheimer's disease and other forms of dementia.

As a clinician, I rely on the North Dakota Dementia Care Services Program (DCSP), including the Alzheimer's Association, to facilitate optimal patient care after the dementia diagnosis is made. The services provided by the DCSP are integral to the health and well-being of North Dakotans with dementia, and their families. The services provided by the Alzheimer's Association have helped my patients to effectively decrease number of hospitalizations amongst individuals with dementia, prolong independent living (i.e. decrease length of time needing state-funded skilled nursing services), and decrease "crisis events," such as those involving police or paramedics to manage dementia-associated behaviors that pose a threat to self or others. It is clear that services provided through adequate North Dakota DCSP funding are associated with decreased state expenses and increased quality of life amongst North Dakotans.

I am writing this letter in support of increased state funding for the North Dakota DCSP. I am requesting that funding be increased, so that the Alzheimer's Association can continue to provide the high quality, necessary aspect of patient care to North Dakotans with dementia, and their families. Please vote yes, in support of the bill requesting increase funding for the DCSP to $1,332,000.

Sincerely,

Lindsay J. Hines, Ph.D.
Neuropsychologist | Sanford Brain and Spine Center, Fargo ND
Clinical Investigator | Sanford Imagenetics
Assistant Professor | University of North Dakota Department of Psychology
Phone: 701-234-4021

Chairman Holmberg & Members of the Committee,

My name is Ty Hegland and I serve as the President/CEO of ShareHouse in Fargo, ND. Since 1975, ShareHouse has been the Upper Midwest's leader in Substance Use Disorder (SUD) and Mental Health services. ShareHouse operates two residential facilities, three outpatient clinics, and employees 145 individuals annually. However today I am going to address you as the volunteer chair of the North Dakota Addiction Treatment Providers coalition, which is the association tasked with representing private SUD providers from across the state.

I stand to respectfully ask for your support of the SUD Voucher and restoration of the full $17,000,000 request by the governor . Behavioral Health providers represent one of one of the most critical sectors of the healthcare continuum. Currently we sit at the crossroads of multiple crises which are plaguing our state including a continued Opioid Epidemic, resurgence of Methamphetamines, and the long-term effects of the COVID-19 Pandemic and the toll it has took on the Mental Health of our region.

The SUD Voucher is one of the most important tools for treating addiction patients in North Dakota in three distinct ways;

1) The voucher helps patients get timely access in settings away from the social and environmental areas that fuel their addiction.
2) The voucher allows for provider choice, which creates competition and ultimately leads to better patient care.
3) The voucher supports clinicians in a sector of healthcare which has been traditionally underfunded, but affects everything.

The SUD Voucher represents one of the best opportunities to serve more patients, while also reducing overhead costs for the State of North Dakota. Where some see an increased line item appropriation, providers see the opportunity dramatically reduced the dollars we spend in corrections and healthcare costs. Studies by the National Institute of Health have show that for every $1.00 spent on SUD services, saves $6.00 in corrections costs and/or $13.00 in healthcare costs. The voucher represents less than 1% of the overall DHS Budget, but as the ability to save the state hundreds of millions of dollars in costs. The voucher is an investment in North Dakota which has the ability provide significant return on investment.

We all know the voucher has had its challenges the past year, but it is still one of the most important tools providers have to treat patients. The timing of the suspension of new patients could not have come at a worst time. Though as an association we've pushed providers to do charity care where possible, every company has their limits. I can tell you anecdotally that places like Prairie St. Johns does over $5,000,000 in charity care alone annually, while places like ShareHouse provide multimillions in charity care annually as well.

SHAREHOUSE
Recovery is possible.

Coming off the House Appropriations process, providers are eager to engage in a robust hearing process, as many of the amendments had no feedback from providers on the ground. Providers respectfully ask for consideration for the following;

1) Restoration of the full $17,000,000 request by the governor. Our patient demand will tell you $12,000,000 for direct care will not be enough.

2) Providers adamantly oppose the 30% cap to residential providers. Not only may it violate the federal Mental Health Parity & Addiction Equity Act, it would it provide less resources for the sickest patients in our state and cause carnage in our communities. These are patients that come from ER's, ICU's, jails, and psychiatric facilities. Without residential care they will die.

3) Providers understand the need to be flexible and creative. Whether it may be studies, potential moratoriums, or grant making processes, we simply ask for caution, since certain proposals have put forth spending 24% of the SUD Voucher appropriation in areas that represent less 10% of the state's population.

With the $17,000,000 governors request, we have an opportunity to get ahead of some of the longstanding Alcoholism issues in our state, as well as combat the concurrent Opioid Crisis and the Mental Health effects of the COVID-19 pandemic. Patients and providers need your support, but we are also here to provide guidance on the voucher as we move forward.

Thank you for your time,

President/CEO

Testimony on HB 1012

2021 Legislative Session

March 11th, 2021

Chairman Senator Holmberg, Vice Chair Senator Krebsbach and Members of the Senate Appropriations Committee:

My name is Vicki Peterson, and I am testifying to restore the 15% dollars cut to Family Voices of ND, which has been eliminated from the Department of Human Services in the budget for the Department of Human Services flow-through dollars per request of the Governor's Budget. I am requesting to restore the original dollars also to ND Federation of Families.

I am a Family Consultant for Family Voices of ND. I have been a Family Consultant for nearly 18 years. I first gained knowledge of Family Voices of ND through my son's Early Intervention Experienced Parent, (also a vital program that is having funding eliminated). My son, Aaron has Autism with an Intellectual Disability and chronic health conditions. At the time, my son was non-verbal but did not have a diagnosis yet, and our insurance was denying speech therapy. I was angry, how could they deny a child who was non-verbal, speech therapy. I spoke with Donene, the director of Family Voices of ND, she guided me to the resources I needed, and I got two bonuses, the first was help with insurance covering speech therapy and I had a connection to another parent who also had a child with an intellectual disability and turned out as well a diagnosis of autism which my son soon received. This started my path to help other families as well and I was immensely proud when I was asked to be a part of this most wonderful family, Family Voices of ND. Over these years I know I have helped many families just as I was helped.

Family Voices of ND is the Family-to-Family Health Information Center in ND. We navigate all systems of care, including those families who have children and youth with special health care needs, chronic health conditions and disabilities. All systems of care mean physical health, mental and behavioral health, navigation of health programs and insurance both private and public. We offer a unique component, lived experience. All staff has a unique connection to other families who have children with special needs as we all have children with special needs, or young adults now with special needs. This is essential for making those connections, not only with families but providers as well.

I would like to briefly describe what a referral to Family Voices of ND and specifically to me may look like.

- Referrals come from providers, schools, lead agencies, could be anywhere that had connections to families that have children and youth with special needs.
- I contact the family within 72 hrs. of receiving the referral and I pride myself that I stick to that rule, as families many times are connected to us when the family may be experiencing some crisis.
- I first need to listen to the issue, or crisis, and need. It is extremely important that the family knows I understand that I too have had some of the same experiences.
- There may be financial issues, they may need resources to find programs that will be of support to their child, they may need and most often do, emotional support, the need to speak with another parent that has some same experiences, maybe they lost health insurance, maybe there are family members with mental health issues and might need referrals to programs, maybe a child's school plan is not working and need support. Many times, they need multiple resources to, multiple programs, the care coordination and navigation of systems, many systems.
- Average calls are around 35 to 45 minutes. I must make sure to follow-up and follow-through for families, as they are counting on the support.
- Typically, there will be referrals to programs and or other resources, often there are many referrals and research as well to make sure we are looking for all resources.
- A call may come from a provider who already has a family on a case load but does not know how to connect them to informal or other formal supports.
- We are not a 1 call and done. I have families I have and continue to help navigate systems of care for over many years, as their child becomes a teenager, and teenager becomes a young adult.
- I am there to listen, I am there to navigate, I am there to support.

I would like to share a recent referral. Single Dad, 13yr old son has Acquired Traumatic Brain Injury, Mental Health Issues, Physical Disabilities attributed to the TBI. Currently in desperate need for services, and most of all respite, so he can go to his job to try and support his son. If he goes back full time, he will have income over the limit for almost all programs for his son; maybe education services when he returns to school, he goes to parttime, he will not be able to afford to pay for all the needs his son has and afford living expenses and most of all the respite services

he so desperately needs. The 1915i State Plan Amendment, meet some criteria as he does have a TBI, but cannot meet the income criteria. The son does not meet the ID criteria for another waiver program, then we have another Home and Community Based Waiver but even though he cannot currently walk unassisted, does not seem to meet Nursing Care Level to qualify for this program. This family needs support to make sure the programs that should have covered services for this child are being looked at properly and then searching everywhere for the needed support, formal and informal supports. Families need this support, as they are not able to find the services they need and when there may be one, the access to this service is so daunting, when all you can do as a parent is worry about what will happen to your child without the needed supports.

In ND, the need for Family Support for children and youth with Special Health Care Needs, is more than ever. Many families due to Covid-19, or terrible accidents as mentioned above, or loss of job, or divorce of parents, or finding out your unborn child will have an exceedingly rare disorder requiring enormous medical attention; Family Voices of ND is there to navigate this confusing system of care.

Family Voices of ND helps train many family members to become strong advocates for their children, a voice. We help families with positive communication with the providers. We help providers communicate with families.

You will hear many times throughout this session, about Person- Centered Planning, keeping children and youth from being institutionalized, more focus on home and community-based services, juvenile justice reform, family-centered care. Family Voices of ND is a part of this, we are all about family-centered care. We focus on the family with children with special needs. Wrap-around services must be in place for the families. If the family is not healthy, the child will not be healthy.

You will be hearing testimony on the ND Autism Voucher Program, where the Department of Human Services is eliminating funding for the program entirely and stating dollar will be added to the ND Autism Waiver to cover the waitlist that exists. In the 2013-2014 ND Legislative Session, HB 1038 passed, and the Governor signed a bill to create an autism voucher program that ND advocates came together to bring forward. This program allows person with autism spectrum diagnosis to access funding for an array of services such as assistive technology, respite service, safety equipment, sensory items and more. Eliminating this program will create a new gap, again, for families who have children and youth with autism without access to any other program. Most of these children will be unable to meet the criteria of Institutionalize Level of Care that is required for the ND Autism Waiver. Once again,

the 1915i will also be out of reach for most. The proposed slots that will be opened by moving the dollars from the Autism Voucher to the waiver will not cover the current waitlist and so even if a child would be able to meet the criteria, would be faced with a waitlist, which has been sometimes 2 years in ND. This program can prevent the very topic you are hearing about in this legislative session which is juvenile justice and keep people out of institutions. The Autism Voucher program needs to be amended to serve the families properly instead of allowing dollars you as legislators allocated for this program be moved to areas of the ND Department of Human Services choosing. There are proposed amendments to SB2089, and I hope you take all of those in consideration. I am a former member of the ND Autism Task Force and for all the years I served as an appointed member the dollars for this program have not been utilized to support the families, just that, the support needs to be for the family, as having a child with autism, effects the whole family. The subject of addressing this was shut down many times. Please consider restoring all funding for this very vital program.

Being a part of Family Voices of ND, has changed my life. It has made me a better communicator and better person. I have opportunities to make a difference in the lives of families with children and youth with disabilities and chronic health, because someone made that difference for me and my family. Family Voices of ND is reaching out to the 1 in 5 children in ND that have those special needs.

I am requesting to restore the full funding of dollars that were cut from the Department of Human Services Budget so that we can continue to do what we need to for those families that need us the most, the most vulnerable.

Thank you for your time and consideration.

Testimony
House Bill 1012
Grand Forks Growth and Support Center by Julie Erickson
Senate Appropriations – Hon. Ray Holmberg, Chairman
March 11, 2021

My experience with the developmental disability field over the past 15 years has been unique, challenging at times, and very passion filled. For you to best understand my perspective, I will share the trifold areas of different roles in my life that have shaped this view. First, I am the executive director for a Day Support program in Grand Forks called Grand Forks Growth and Support Center. Secondly, I had the privilege of teaching at the University of North Dakota in the rehabilitation and human services Undergraduate program. Lastly, and what I believe to be my most important role, I have the honor of being the mother to an amazing 14-year-old boy named Ryan.

Ryan is my third child and I knew he was a little bit different from my other children almost immediately after he was born. He did not meet his milestones at the same rate as my other two children and would often learn a skill and then lose that skill such a smiling or sitting up. We started Ryan in the infant development program to start tracking his progress and laying the foundation for services to help him thrive. At seven months old, Ryan began having severe seizures that ranged from 2 to 10 minutes long. There were periods of time where all Ryan did was seizure or sleep. He tried and failed seven different seizure medications before we were sent to Saint Paul Children's Hospital for further help. Ryan underwent a left functional hemispherectomy at the age of 11 months old. As his parents, we were very aware that the removal of the left hemisphere of Ryan's brain would have many impacts on his functioning and skills throughout his whole life. We also knew the other option is that he would probably die from his seizures if we did not choose this surgery. Ryan had two major brain surgeries within a week of each other to remove the tissue that was causing the seizure activity. The surgery was successful but left him with many major deficits. His right peripheral vision field is cut and will never be repaired, he can use his right arm but his hand is not functional to do skills with. He walks and gallops with a limp and an uneven gait pattern. And lastly, since they removed his speech center, Ryan has many challenges with communicating. Intellectually, he functions at about a three or four-year-old level. He can understand anything and everything that people say to him and is able to talk in small phrases that are sometimes hard to understand. He is the most loving, sensitive, caring, and exceptional boy I have ever met. He values the small things in life like his family teachers and those around him and just really likes to be with people. He is in eighth grade at Schroeder Middle School in Grand Forks and is surrounded by a wonderful staff and also has a wonderful medical team. Ryan has received

services through North Dakota Medicaid since he was nine months old. He has been through five brain surgeries, three orthopedic surgeries, months and months of hospital stays filled with uncomfortable tests and procedures. He has been through more hours of therapy than I can count. He is a fighter! He is my why! I tell you about my son Ryan not for your pity or for you to admire me for surviving the tough times that I have been through, but to show you the credibility of my testimony not only as a developmental disabilities provider but as the mother of a child with very severe disabilities.

The skills I gained navigating through the years of raising a special needs child actually was the greatest experience I could have had to become the director of Grand Forks Growth and Support which was formally known as Agassiz Enterprises. Agassiz enterprises was a developmental disability provider that started in the late 1970s. When I took over as their director in 2017, I most definitely had my hands full and many challenges against me. In a nutshell, I took a place that was basically functioning as a bland institution type center. A place that needed tremendous updates to be accessible, ethical, and most of all a place that I would even feel comfortable bringing my son for care someday. This set the bar very high for all employees that worked at our center. After seven weeks as the executive director, we rebranded and changed our business name to begin a new start. I couldn't be more proud of the team that I have and how far we have come in 3 1/2 years. This experience gave me the perspective to know that the disability field still needs so much work and it needs to come from multiple entities who come together to work for the greater good of this community.

I will speak now to what I have seen in the last 3 1/2 years of being a provider of developmental disabilities services. As a standalone day support program our agency relies solely on the funds of Medicaid. We do not get paid for the services if the individuals that we support do not attend day program. During the Covid pandemic, We have faced major financial challenges from the decrease in attendance of those who attend our day program due to obstacles that were outside of our control. We were fortunate to apply and receive the PPP loan funding in April which eventually turned into a grant. This funding however was not enough. Myself and a few other smaller providers gathered and asked for more financial assistance from the state. We were able to Apply and received four separate retainer payments which have helped us maintain our staff and stay open. We have 36 people who attend our day program close to 40 hours a week and there were days in November when we only had nine of these people present for services due to many Covid related reasons. Somehow, we survived 2020 and have started to return back to more of a normal attendance rate in the new year. Although we survived this challenging time, we do not have much left in our reserve fund going

forward and any cuts to developmental disability providers would severely impact us. I fully believe that people should have options for their services in their life. Without smaller providers these options would be taken away. I think it is important to look at a smaller providers as the small town businesses. We have heart, integrity and passion for our work and those we support at our agencies. We are the directors and staff who go above and beyond to make sure that people are receiving the best services that they can. Throughout the Covid pandemic, we had multiple testing events at our agency to decrease Covid risk on our staff and those supported. You could find me, dressed in full PPE climbing in and out of the vehicles to assist, calm, and hold the hands of the individuals we support while they were getting their Covid test.This is just one example of the small provider flavor I was speaking of. North Dakota needs providers with these qualities and if we face more financial strain there may be many of these providers who can no longer keep their doors open.

I would like to talk briefly about why it is so important that the House remedied the proposed $11 million cuts in the area of developmental disabilities would have on the agencies that provide services and those that receive services in the state of North Dakota. As a whole, developmental disability providers struggle to find a workforce that will bring high-quality care to the people that we support. Direct support professional‘s are the biggest group of staff that we struggle to hire and maintain. Although it is a rewarding job at times, it is also a very physical and stressful job. Cuts in our budget would present us with many more challenges when hiring, training and maintaining these employees. With low paid or not enough direct support professional staff, agencies are unable to provide high-quality care! High quality care is the most important thing. I can tell you right now, I struggle as Ryan’s mother to think about it would be like to put him in a residential facility. My husband and I hope to keep him at home with us as long as we can, and we also hope and pray that the quality of services continues to grow and increase in the years to come.

People with intellectual and developmental disabilities need the highest care possible. They have already experienced so much hardship and struggle in their life and often times don’t even know that they have actually faced those hard times and struggle. This is shown by the love, smiles and happiness that many of the people who receive DD services display every day of their lives. Plain and simple, they deserve the very best from the developmental disabilities industry.

Thank you again for the opportunity to stand before you and give my testimony. I welcome any questions that you may have.

House Appropriations Committee
IN SUPPORT – HB 1012 – DHS Budget – Economic Assistance
March 11, 2021
Janelle Moos, Associate State Director- Advocacy
jmoos@aarp.org
(701) 355-3641

Chairman Holmberg and members of the Senate Appropriations Committee, I am Janelle Moos, Associate State Director of Advocacy at AARP North Dakota.

AARP is a non-profit, non-partisan membership organization with more than 84,000 members in North Dakota. Our mission is to empower people to choose how they live as they age.

We wanted to take a moment to weigh in on a couple of important economic assistance issues.

First, SNAP is an important program that ensures older adults and families get the nutrition needed. We have closely monitored the food crisis more Americans and North Dakotans faced during the pandemic. SNAP benefits are an important tool that addresses this crucial problem. It is an especially important program for Americans over 50 because many face challenges to employment, live on fixed incomes, live alone, and have limited financial resources to pay for necessities like food, housing, and essential medicine. To people struggling to put food on the table, hunger is not a political issue, it is a daily reality. SNAP is a vital lifeline that feeds 23, 840 North Dakota households. 35% of those recipients are either elderly or disabled. Also remember, participants generally spend their SNAP dollars locally, soon after receiving them, boosting local economies. An important benefit in this time.

Also, LIHEAP has served as a lifeline for low-income families. As you may know, AARP believe utility issues and rates are a key pocketbook issue. We have intervened in various cases in front of the North Dakota Public Service Commission on behalf of older adults and consumers and know the struggle of families to afford their utility payments. Having a safety net for families especially in our climate is not only the right thing it is the moral thing to do.

We encourage you to continue to support these programs to ensure no North Dakotan goes hungry or without heating or cooling assistance when they need it.

Again, we appreciate the time to raise issues important to North Dakotans 50+ and would be happy to answer any questions. Thank you.

RE: HB 1012 – Section 11 Developmental Disability Program

Dear Chairman Holmberg and members of the committee,

As a caregiver of a person receiving Developmental Disability Services, I am writing to express my opposition to eliminating Section 11 funding as outlined in HB 1012. This program serves individuals who would otherwise "fall through the cracks" without the support provided by this program.

I PROVIDE PROGRAM MANAGEMENT SERVICES FOR AN INDIVIDUAL IN SECTION 11. THEY HAVE BEEN RECIEVING THESE SERVICES FOR THE PAST 30 YEARS. IT MAY NOT LOOK LIKE MUCH ON PAPER, BUT IT'S WHAT HAS PROVIDED THEM WITH A SUPPORT SYSTEM TO FUNCTION FROM DAY TO DAY. WITHOUT THESE SERVICES MANY OF THE INDIVIDUALS WOULD BE FACING HOMELESSNESS, GREATER HEALTH ISSUES, JOB LOSS, EARLY NURSING HOME PLACEMENT, OR WORSE, DEATH. ALL OF WHICH WILL COST THE STATE MORE FINANCIALLY IN THE LONG TERM, AS THESE SERVICES ARE CRITICAL FOR THOSE IN THE PROGRAM.

I strongly urge you to continue to fund this program and to provide continuity to those receiving Section 11 supports. Thank you for your continued service to the people of North Dakota and for your consideration of continuing this service that supports people with disabilities to be as independent as possible in their communities.

Sincerely,

RE: HB 1012 – Section 11 Developmental Disability Program

Dear Chairman Holmberg and members of the committee,

As a caregiver of a person receiving Developmental Disability Services, I am writing to express my opposition to eliminating Section 11 funding as outlined in HB 1012. This program serves individuals who would otherwise "fall through the cracks" without the support provided by this program.

I have worked at Community Living Services for the past 35 years as a Case Manager. I have worked with several individuals through the years under the Section 11 program from the very beginning of when Section 11 funding was initially used to support the individuals we provided services to that "fell through the cracks" at that time. Through the years I have personally witnessed that nothing has changed in that regard, as we continue to still have this group of individuals we serve that direly need supports and continuity in the community. We continue to provide these vital services to individuals who without these supports would be homeless, vagrant, malnourished, mentally and physically ill and worst case scenario wouldn't be here at all or dead. We would like to think that were are humane society and that everyone matters and makes a difference, right? I have knowledge and professional experience in how vital the Section 11 supports are for the individuals we serve, as I have two individuals that I have worked with for almost 30 years. This includes providing services to prevent homelessness and vagrancy, rep payee assistance to establish residency, secure benefits, assistance with paying bills and maintaining their benefits. Other supports include assistance with procuring and maintaining employment, providing referrals, residential supports to maintain them living independently within the community and participating as an active member in society and monitoring and maintaining their health which include supports assisting with doctor appointments and follow through with medical recommendation's so they can remain living independently in their own apartments instead of being housed or institutionalized at the State hospital or in a nursing home, which is blatantly more expensive for the State of North Dakota in the end. CLS has almost half of the Section 11 individuals that are served in the State of North Dakota and unfortunately they will be left without these supports and on their own, as they will not qualify for or be able to transfer to a different program or funding source if this proposal is approved. I beg you to please reconsider. Thank you for your time and attention.

I strongly urge you to continue to fund this program and to provide continuity to those receiving Section 11 supports. Thank you for your continued service to the people of North

Dakota and for your consideration of continuing this service that supports people with disabilities to be as independent as possible in their communities.

Sincerely,

RE: HB 1012 – Section 11 Developmental Disability Program

Dear Chairman Holmberg and members of the committee,

As a caregiver of a person receiving Developmental Disability Services, I am writing to express my opposition to eliminating Section 11 funding as outlined in HB 1012. This program serves individuals who would otherwise "fall through the cracks" without the support provided by this program.

I have been employed by Community Living Services for over 33 years, providing supports to individuals with disabilities in Fargo. As such, I have had long-standing relationships and understanding of people with disabilities. CLS provides support to 33 of the individuals who would be affected by the elimination of Section 11 services. I can attest to the fact that these individuals definitely require some level of supports in order to live in the community. For example, some the things I assist with include applying for and maintaining benefits, such as Social Security, Housing, Medicaid and SNAP. Without my help, the people I support would like lose their housing and healthcare coverage, and would end up homeless, costing the State and Fargo community even more money. I also serve as Representative Payee for some for their Social Security benefits, which ensures these benefits are used to pay essential bills, such as rent. I often hear from landlords in the area that they wish all of their tenants had such support, as having a payee and a service provider means the rent is paid and they have someone to work with if there are problems. I also assist people to maintain their health. For example, one individual who receives Section 11 was due this summer for her first colonoscopy. She was worried and wanted to complete this, as her mom died from colon cancer, and she understood that her risk of developing colon cancer was higher. However, when she received the instructions for the test prep, she panicked; she did not understand any of it. With my help, she was able to complete the test prep and complete the colonoscopy (she had several polyps removed). Without assistance, she probably would have had to repeat the test several times, costing Medicaid even more money—or possibly the polyps would have been missed and she would have developed cancer. The Section 11 program serves people who have no other options for services, and provides very essential services at a very low cost. The cost to the local community and the State of North Dakota would likely be much higher without these services.

I strongly urge you to continue to fund this program and to provide continuity to those receiving Section 11 supports. Thank you for your continued service to the people of North

Dakota and for your consideration of continuing this service that supports people with disabilities to be as independent as possible in their communities.

Sincerely,

Testimony House Bill 1012
Senate Appropriations Committee
March 11, 2021

Chairman Holmberg and members of the Senate Appropriations Committee. My name is Judith Martin and I am a consumer of The Dakota Center for Independent Living in Bismarck. I am asking you to please consider full funding for the Dakota Center for Independent Living (DCIL) in HB 1012.

Through the Dakota Center for Independent Living I have learned how to maintain a positive attitude. Staff at the center helped me to learn how to live a more independent lifestyle and assisted in preparing a budget that, in the past, had been completely overruled by others. I did have an idea of what my budget would look like, I just needed some money management skills which were provided by staff. I was shown how to seek out coupon savings for over-the-counter medications. I was able to attend Better Choice, Better Health and Pain Management classes through the center. These classes have helped me to understand and manage physical, healthier choices along with managing my long-term health conditions.

DCIL staff has assisted me in getting subsidized medical insurance for myself and which ones were out there for me. I was told, "Yes, you can. Even you can stand up for yourself!" Through DCIL I have learned to become empowered with confidence in speaking up for myself as a person with a disability.

Again, I would ask that you provide full funding to this government agency, the Dakota Center for Independent Living. Thank you so much for your time.

Sincerely,

Judith Martin

Testimony House Bill 1012
Senate Appropriations Committee
March 11, 2021

Chairman Holmberg and members of the Senate Appropriations Committee. My name is Deland DeCoteau and I am a consumer of The Dakota Center for Independent Living in Bismarck.

Before I came to the DCIL I was lost and hopeless. My physical and mental health were at an all-time low and I was frustrated, empty, and afraid. I felt like I had been abandoned by everyone, that I had nothing to look forward to, and I didn't have any reason for living. That all changed when I became a part of the DCIL. They have provided the support, education, direction, and assurance that I needed to regain my physical and mental health. I was treated with warmth, care, and understanding and I met with staff who helped me to examine and find a positive direction for my life.

DCIL provided classes, training, and activities which helped me to address mental health issues and find peace of mind. I regained contact with survival skills, leisure skills, and activities that brought joy into my heart and hope into my life. I also attended groups and classes which helped me to live a healthy lifestyle and to deal with chronic physical issues. The Staff's appreciation and dedication to each consumer along with the support and social interaction provided by the program has been extremely helpful in my recovery.

I thank you for supporting and funding the DCIL and I look forward to a bright future.

Sincerely,

Deland G. DeCoteau

Senate Appropriate Committee

Senator Ray Holmberg

Senator Holmberg and Committee my name is Denise Kitson and I am asking you to please restore funding in the HB 1012 for Dakota Center for Independent Living and other CIL'S in ND.

I was in a car accident and suffer from a Traumatic Brain Injury and ever since then I have needed assistance with organizing my home, bills and sometimes daily life struggles. DCIL has assisted me in applications for Medicaid, SNAP, Housing and help me to get out and socialize with others. DCIL has monthly TBI support group, cooking classes, crafts and other activities are available to help me get out into the community. DCIL provides me with encouragement and support I need through my ongoing health risks. Without these resources I do not know where I would be now. Please remember the people who cannot help themselves and the people who are willing to help others.

Sincerely,

HB 1012 March 11, 2021
Senate Appropriations Committee
Senator Ray Holmberg, Chair

Chairman Holmberg and members of the Senate Appropriations Committee. My name is Tonia Johnston and I am writing to support bill HB 1012 for funding Dakota Center for Independent Living. I have been with them for almost 13 years now and without their help I would not be where I am today. I have Bipolar Disorder and when I first started with them I refused to stay on my medications, I was required to have a payee by the VA and I was very angry. My mind was not in a good place. I had tremors in my hands and I was trying to take care of my kids. Life was very difficult. I was not able to keep jobs since I was medically discharged from the Navy. DCIL is all about helping you stay independent. They wanted me to be as involved in my budget as I wanted to be. They go above their job because they also helped me to see that I really needed to help myself too. With their support I slowly was able to seek the help I needed through the VA to get therapy and stay on my medication. My mind became clearer and with that I wanted to be more involved with my money. DCIL supported that little by little I was able to take charge of handling my money. I have become very secure in my life now. I have now become my own payee for my social security account and soon I will take over my VA account. It is only because of DCIL that I was able to do that. They helped me not only with managing my money and learning how to handle that but in learning that I am not my disability. I am more than that. I have learned to be okay with the fact that in order to stay healthy mentally I can not work. DCIL also helped me deal with my anxiety with the different activities they offer to people. You never feel judged and can just be yourself. Thank you for taking the time to read my testimony.

Sincerely,
Tonia Johnston

2021 SENATE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
3/15/2021
Human Services Subcommittee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Dever opened the hearing at 2:04 pm.

Senators present: **Dever, Erbele, Hogue, Oehlke and Mathern.**

Discussion Topics:

- Foster children, DD Waiver
- Fee for Service
- FMAP
- Uniform Payment System
- 1915i

Medicaid Expansion -
Caprice Knapp, Director, Medical Services – testified and answered questions of the sub-committee. She submitted testimony #9314, #9313, #9335.

Krista Fremming, Medical Services Division – testified in favor and answered questions of the sub-committee

Erik Elkins, Medical Services Division – testified in favor and answered questions of the sub-committee.

Brendon Joyce, Medical Services Division – testified in favor and answered questions of the sub-committee.

LeeAnn Thiel, Medical Services Division – testified in favor and answered questions of the sub-committee.

Behavioral Health –
Pam Sagness, Director, Behavioral Health – testified in favor and submitted testimony #9309, #9272, #9278, #9284, #9312, #9334.

Senator Mathern handed out Proposed Changes to HB 1012 – testimony #9270.

Senator Dever closed the hearing at 4:11 pm.

Rose Laning, Committee Clerk

THE FMAP 9314

The Federal Medical Assistance Percentage

WHAT IS THE FMAP?

The Federal Medical Assistance Percentage (FMAP) rates are used in determining the amount of federal matching funds for state expenditures for assistance payments for certain social services, and state medical and medical insurance expenditures.

AT DHS, THESE RATES APPLY TO:

- Traditional Medicaid Services
- Long-Term Care Services*
- Medicaid Wavier Services**
- Child Welfare/ IV-E Foster Care & Subsidized Adoption

**Excluding state programs SPED (Service Payments to Elderly and Disabled) and expanded SPED.*

***Including Home and Community Based Services, Developmental Disabilities Services and 1915(i) Services.*

BY THE NUMBERS

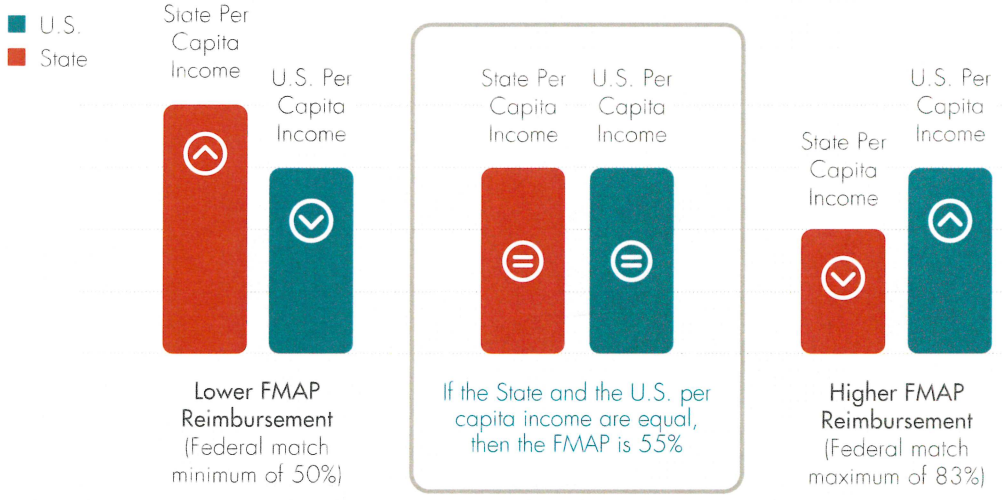
Federal Matching Assistance Percentage (N.D.)

FMAP follows the federal fiscal year from Oct-Sept	Rate
Oct. 1, 2015 - Sept. 30, 2019	50%
Oct. 1, 2019 - Sept. 30, 2020	50.05%
Oct. 1, 2020 - Sept. 30, 2021	52.4%
Oct. 1, 2021 - Sept. 30, 2022	53.59%

COVID FMAP Increase of 6.2% to FMAP	Rate
Jan. 1, 2020 - Sept. 30, 2020	56.25%
Oct. 1, 2020 - June 30, 2021***	58.60%

****This date may change pending extension of public health emergency.*

FEDERAL FISCAL YEAR EFFECTIVE DATES:



OCT. 1 — SEPT. 30

2020 ⊙ 2021

The FMAP is calculated each federal fiscal year and is effective Oct. 1 through Sept. 30 each year.

HOW FMAP WORKS...

The FMAP formula compares a state's three year average per capita income relative to the U.S. three year average per capita income.

Lower FMAP Reimbursement (Federal match minimum of 50%)

If the State and the U.S. per capita income are equal, then the FMAP is 55%

Higher FMAP Reimbursement (Federal match maximum of 83%)

Date: December 18, 2020

Re: Pharmacy Savings Analysis

Background and Scope

Beginning in January 2020, the State of North Dakota carved the pharmacy services out of the managed care program for the Medicaid Expansion population and started to deliver those services in fee-for-service (FFS). **Optumas** was tasked with determining if there were savings that result from the delivery system change. During the review, **Optumas** performed a risk analysis utilizing the UCSD Medicaid Rx tool to normalize any changes in acuity of the underlying data to ensure that potential savings between the two time periods were not distorted.

Data Sources

Detailed Data

As the State's actuary for the development and certification of the Medicaid Expansion Capitation Rates, **Optumas** relied on the latest CY19 Managed Care encounter data that was validated and used during the CY21 rate development. The State additionally provided emerging FFS pharmacy data from January 1, 2020 through November 19, 2020 and the October 2020 State eligibility Roster.

Supplemental Resources

Since costs contained in the Managed Care and FFS data provided by the State included total costs, gross of rebates, the State provided pharmacy rebate information by quarter from CY19 through Q3CY20. **Optumas** relied on this information to benchmark the CY19 encounter data as well as remove all Federal and supplemental rebates in order to ensure that the results reflect the State's final cost.

Results

Since the analysis was done before the end of 2020, **Optumas** relied on comparing the complete first three quarters of data from CY19 and CY20. Because of differences in FMAP for the IHS and 340b providers, **Optumas** limited the review to exclude the IHS/340b providers so that the results were not distorted. In addition, to ensure that the CY19 Q1-3 data was on a comparable time

Optumas Risk • Strategy • Reform

period as the CY20 Q1-3 data, **Optumas** used a 7.3% trend as a projection factor. The trend was developed based on a number of years of pharmacy data from the Medicaid Expansion program.

Figure 1 below summarizes the findings from the raw detailed data and trending historical CY19 date to the CY20 time periods. Under this approach, **Optumas** estimates that there is a 13.9% savings switching delivery systems from Managed Care to FFS.

Figure 1. Estimated Savings of Delivery System Change (excluding risk adjustment)

Managed Care CY19 Q1-3				Fee-for-Service CY20 Q1-3		
Raw Data	Federal and Supplemental Rebate Removal	Trend	Trended to CY20 Q1-3	Raw Data	Federal and Supplemental Rebate Removal	Estimated Savings
$132.22	$43.52	7.3%	$46.69	$136.77	$40.20	-13.9%

*Excludes IHS and 340b

Figure 2 below summarizes the findings from the raw detailed data, normalizing the data sets for risk, and trending historical CY19 data to the CY20 time periods. After all appropriate normalization steps, **Optumas** estimates that there is a 13.0% savings switching delivery systems from Managed Care to FFS.

Figure 2. Estimated Savings of Delivery System Change (including risk adjustment)

Managed Care CY19 Q1-3					Fee-for-Service CY20 Q1-3			
Raw Data	Federal and Supplemental Rebate Removal	Medicaid Rx Adjusted	Trend	Trended to CY20 Q1-3	Raw Data	Federal and Supplemental Rebate Removal	Medicaid Rx Adjusted	Estimated Savings
$132.22	$43.52	$43.19	7.3%	$46.34	$136.77	$40.20	$40.30	-13.0%

*Excludes IHS and 340b

Please note that the analyses above only reflect pharmacy claims and do not reflect administration and profit that gets built into the managed care rates. In calendar year 2019, the administrative and profit loads were 3.2% and 1.0%, respectively. If those amounts were included, the savings shown in the tables above would increase even further.

If you have any questions or feedback regarding this memo, please feel free to contact us.

MEDICAL SERVICES
Medicaid Expansion In-House Strategic Plan

NORTH Dakota | Human Services
Be Legendary.

Overview
The North Dakota Department of Human Services, Medical Services Division, aims to restructure its Medicaid programs to promote better care and quality for members, reduced burden on providers, and continual attention to better stewardship of taxpayer dollars. This document contains detailed information about the goals, objectives, action steps, timelines, and indicators for the restructuring. This is a living document and will be revised and updated as restructuring activities continue to progress.

Vision Statement
All North Dakota Medicaid members have access to the same core services, delivered by health care providers who are incentivized to provide member-centered, comprehensive, high quality care.

Relevant Stakeholders
Because this is a large-scale program redesign effort, progress toward each goal will involve coordination and collaboration between a range of entities whose activities and missions are relevant to that goal. These agencies might include (but are not limited to):

North Dakota Department of Human Services (DHS)
- Behavioral Health Division (BHD)
- Aging Services Division
- Child and Family Services (CFS)
- Developmental Disabilities Division (DD)
- Division of Vocational Rehabilitation
- Field Services Division (FS)

Behavioral health service providers
Community Healthcare Association of the Dakotas (CHAD)
Family Voices of North Dakota
Federally Qualified Health Centers (FQHCs)
Human Service Zones (formerly Social Services)
Indian Health Services
Local Public Health Units
North Dakota Academy of Family Physicians (NDAFP)
Mental Health America of North Dakota
North Dakota Association of Community Providers (NDACP)
North Dakota Brain Injury Network (ND BIN)
North Dakota Chapter of the American Academy of Pediatrics (NDAAP)
North Dakota Dental Association (NDDA)
North Dakota Department of Health (NDDoH)
North Dakota Hospital Association (NDHA)
North Dakota Medical Association (NDMA)
North Dakota Optometric Association (NDOA)
Private health systems
Tribal Nations

Aim #1: Transition Medicaid Expansion from Managed Care to Managed Fee-for-Service.

1.1 Propose changes to state law that will enable DHS to administer the Medicaid Expansion program.

Objective	Action Step	Complete By
1. Develop a budget that outlines the cost savings and benefits that will be achieved through DHS administration of the Medicaid Expansion program.	1.1 Calculate savings that will be achieved through paying Medicaid Expansion providers the same rates as fee-for-service (FFS) Medicaid providers.	July 2020
	1.2 Calculate increases in expenditures for additional services that Medicaid Expansion members will receive once their benefit plan is the same as FFS (dental, vision, long term care, etc.).	July 2020
2. Develop communication materials for legislative session.	2.1 Develop PowerPoint presentation, handouts and talking points to explain the rationale for moving Medicaid Expansion to DHS administration.	December 2020
3. Present information to the Governor, legislature and stakeholders.	3.1 Present information to the Governor.	November 2020
	3.2 Present information to the House Appropriations committee.	January 2021
	3.2 Present information to the Senate Appropriations committee.	March 2021

1.2 Implement a well-defined, timely process that transitions Medicaid Expansion from Managed Care to Managed Fee-For-Service.

Objective	Action Step	Amount of Time Needed
1. Develop a timeline and action steps to transfer administration of Medicaid Expansion to DHS administration.	1.1 Develop timeline and action steps in coordination with the Medicaid Expansion managed care organization.	2 months
	1.2 Hold weekly meetings with managed care organization to ensure completion of timelines and benchmarks.	12 months
2. Provide progress updates to the Governor and interim legislative committees.	2.1 Provide regular progress updates to the Governor and interim legislative committees on the transition of Medicaid Expansion to DHS administration.	18 months

Aim #2 Implement a comprehensive quality strategy for North Dakota Medicaid.

2.1 Develop a primary care value based purchasing program for North Dakota Medicaid members with chronic conditions.

Objective	Action Step	Complete By
1. Develop a timeline and action steps to implement the Medicaid health homes program, as authorized by Section 1945 of the Social Security Act.	1.1 Develop timeline and action steps to implement a health homes program.	6 months
	1.2 Consult with CMS regarding health homes program requirements, including the 90 percent federal match that is available for health homes services for the first eight quarters of the program and the planning funds that may be available to states.	12 months
	1.3 Convene partner workgroups to provide input and direction for health homes program. Solicit input on: • Tiering system for members. • Provider payments. • Attributing members to a health home. • Quality measures and reporting. • How the program should be structured for children as compared to adults.	12 months
	1.4 Develop and submit state plan amendment to CMS for health homes program.	12 months
	1.5 Enroll members and providers with the health homes program and begin services.	6 months

2.2 Develop a hospital value-based payment program.

Objective	Action Step	Complete By
1. Develop a timeline and action steps to implement a value-based payment program for North Dakota hospitals.	1.1 Convene stakeholders to learn about three different value-based payment models that are used by other states.	2 months
	1.2 Convene partner workgroups to provide input and direction for value-based payment program. Input is needed on: • The model that is best suited for North Dakota hospitals. • Payment structure and quality incentives. • Quality measures and reporting.	12 months
	1.3 Develop timeline and action steps to implement a value-based payment program.	6 months

Critical Access Hospital Pricing Analysis

NORTH Dakota | Human Services
Be Legendary.™

Optumas
Risk • Strategy • Reform

Memorandum

To: Caprice Knapp, Erik Elkins

CC: Elrycc Berkman, ASA, MAAA

From: Tim Doyle, FSA, MAAA

Date: January 7, 2021

Re: Critical Access Hospital (CAH) Pricing Analysis

Background and Scope

Optumas was tasked with reviewing the cost of hospital services at North Dakota Critical Access Hospitals (CAHs) for the State's Medicaid Expansion population. **Optumas** performed a repricing analysis of detailed claims data to price the utilization commensurate with the reimbursement of the State's traditional Medicaid program. The corresponding results show the difference in reimbursement between the actual incurred costs in the Medicaid Expansion program and the costs that otherwise would have been incurred under the State's traditional Medicaid program.

Data Sources

As the State's actuary for the development and certification of the Medicaid Expansion capitation rates, **Optumas** relied on detailed claims and enrollment data for January 1, 2017 – December 31, 2018 (CY17 and CY18) with claims paid dates through June 30, 2019. This data was summarized and validated against reported financials during the development of the CY20 Medicaid Expansion capitation rates. Specifically, for this analysis, the data was limited to inpatient and outpatient claims incurred at any of the 36 CAHs in the State of North Dakota. These facilities are listed in the table below:

State of North Dakota CAHs	
Ashley Medical Center	Nelson County Health System
Carrington Health Center	Northwood Deaconess
Cavalier County Memorial Hospital	Oakes Community Hospital
Community Memorial Hospital	Pembina County Memorial Hospital
Cooperstown Medical Center	Presentation Medical Center
First Care Health Center	Sakakawea Medical Center
Garrison Memorial Hospital	Sanford Hillsboro Medical Center
Heart of America Medical Center	Sanford Mayville
Jacobson Memorial Hospital	Southwest Healthcare Services
Jamestown Hospital	St. Aloisius Hospital
Kenmare Community Hospital	St. Andrew's Health Center
Linton Hospital	St. Joseph's Hospital
Lisbon Area Health Services	St. Luke's Hospital
McKenzie County Medical Center	Tioga Medical Center
Mercy Hospital - Devils Lake	Towner County Medical Center
Mercy Hospital - Valley City	Unity Hospital

Critical Access Hospital Pricing Analysis

NORTH Dakota | Human Services
Be Legendary.

Optumas
Risk • Strategy • Reform

Methodology and Results

Optumas used historical reimbursement information from the State's traditional Medicaid program to reprice each claim in the CY17 and CY18 experience. Inpatient claims were repriced using per diems multiplied by the length of the inpatient stay in days. Outpatient claims were repriced using a cost-to-charge ratio multiplied by the charge amount for the claim. The overall results of the analysis are displayed in the table below:

Calendar Year	Incurred Dollars[1]	Repriced Dollars[2]	Implied % of State Traditional Medicaid Reimbursement
CY17	$22,941,857	$15,859,492	144.7%
CY18	$23,948,522	$16,662,009	143.7%
Two-Year Total	$46,890,379	$32,521,502	144.2%

1 – CAH Medicaid Expansion Program Reimbursement
2 – Repriced using State Traditional Medicaid Reimbursement

The results show, that on average over the two-year period, the CAH incurred dollars reflected reimbursement that was 144.2% times that of the reimbursement of the State's traditional Medicaid program. For CY17 this is a difference of approximately $7.1 million and for CY18 this is a difference of approximately $7.3 million.

Results do vary at the individual hospital level. There are hospitals where the Repriced Dollars are lower than the Incurred dollars. This typically occurs at hospitals that experience a lower volume of overall services. The tables below display the number and portion of hospitals by each year where the Repriced Dollars are Greater than or Less than the Incurred Dollars, and the volume and portion of Incurred Dollars by each of those categories:

	Number of Hospitals		Portion of Hospitals	
	CY17	CY18	CY17	CY18
Repriced Dollars Greater than Incurred Dollars	16	14	44.4%	38.9%
Repriced Dollars Less than Incurred Dollars	20	22	55.6%	61.1%

	Total Incurred Dollars[1]		Portion of Incurred Dollars[1]		Implied % of State Traditional Medicaid Reimbursement	
	CY17	CY18	CY17	CY18	CY17	CY18
Repriced Dollars Greater than Incurred Dollars	$2,479,638	$2,104,588	10.8%	8.8%	79.0%	68.6%
Repriced Dollars Less than Incurred Dollars	$20,462,220	$21,843,934	89.2%	91.2%	160.9%	160.7%
Total	$22,941,857	$23,948,522	100.0%	100.0%	144.7%	143.7%

1 – CAH Medicaid Expansion Program Reimbursement

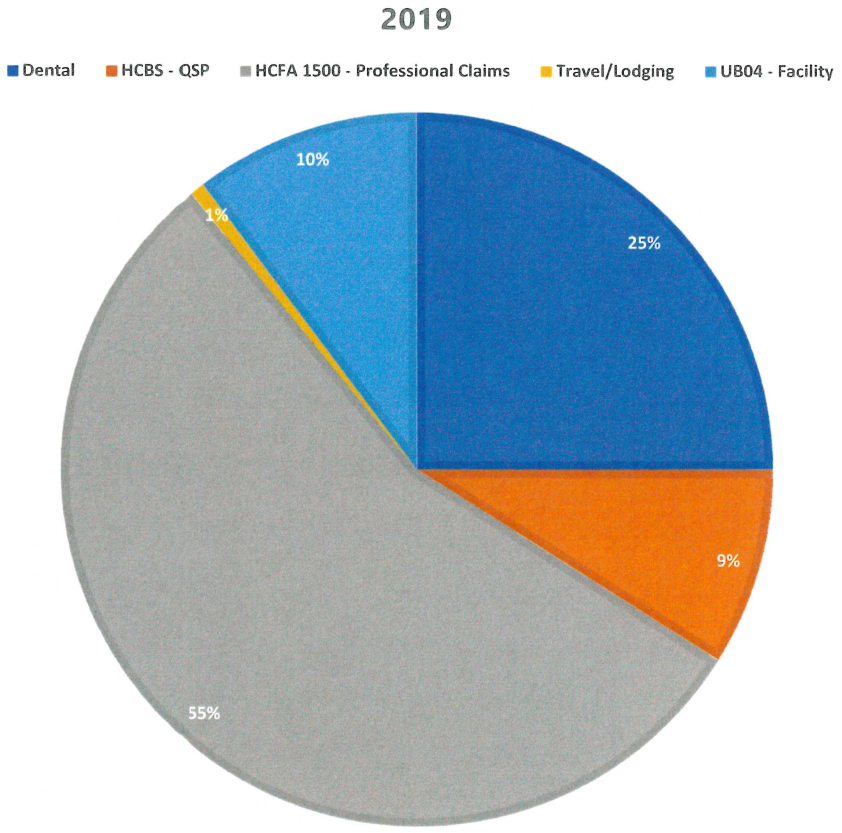
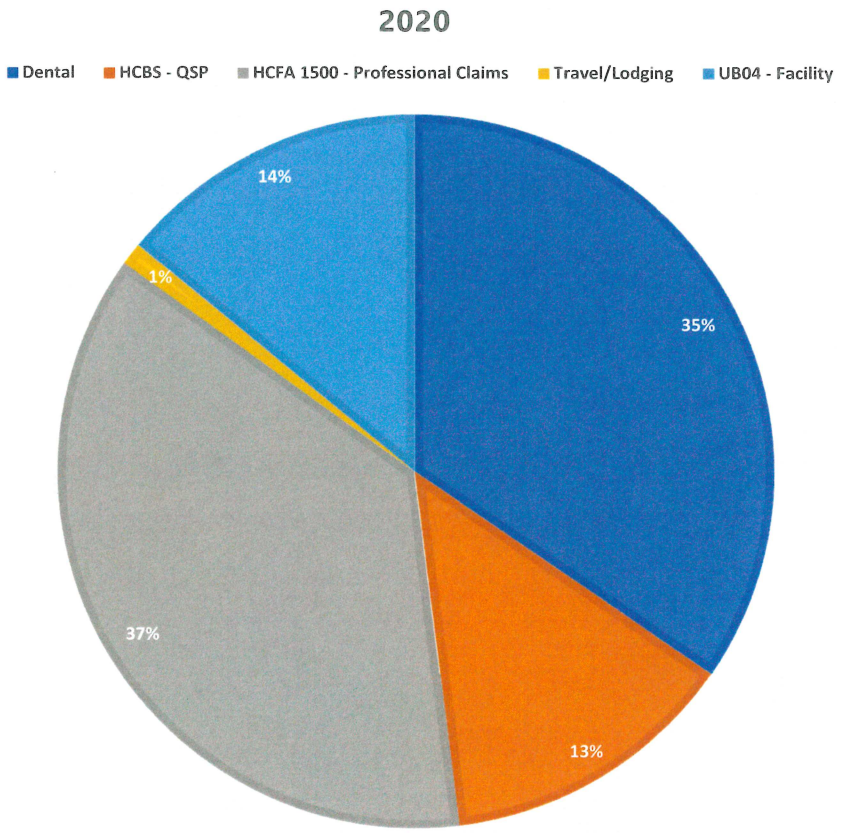
PAPER CLAIMS SUBMISSIONS



NORTH Dakota | Human Services
Be Legendary.™



- As of April 15, 2020, paper claims are no longer being accepted by the department unless an exemption had been automatically granted or approved by North Dakota Medicaid.
- Exceptions were given to providers submitting less than 25 claims in a calendar year.
- LTC facilities where Medicaid is not the primary payer or PRTFs.
- Individual QSP providers and those providers that do not bill with an ICD-10 diagnosis code.
- 2019=125,944 paper claims
- 2020=63,829
- Decrease of 50.68%

North Dakota's Quality Strategy for Medicaid

I. Introduction and Overview

A. History of North Dakota Medicaid

Medicaid was established in 1965, authorized by Title XIX of the Social Security Act. The Centers for Medicare and Medicaid Services (CMS) administers and oversees Medicaid at the federal level. The Department of Human Services administers and oversees Medicaid in North Dakota.

Over the years, CMS and Congress have strengthened and enhanced Medicaid to ensure recipients would have access to cost-effective, high quality health care. Access has been expanded through legislative action. For example, in 1997 the Children's Health Insurance Program (CHIP) was created to provide health insurance and preventive care to millions of uninsured American children whose family's income are slightly higher than the Medicaid income levels. In 2013, North Dakota opted to accept federal funding to expand access under the Patient Protection and Affordable Care Act (ACA), which allowed for coverage to low-income adults without dependent children. In 2014, Medicaid Expansion coverage became effective through a private managed care organization in North Dakota.

Medicaid and CHIP offer health insurance and preventative care to low-income families, pregnant women, people of all ages with disabilities, and people who need long-term care. Table 1 provides historical enrollment information for the total North Dakota Medicaid population.

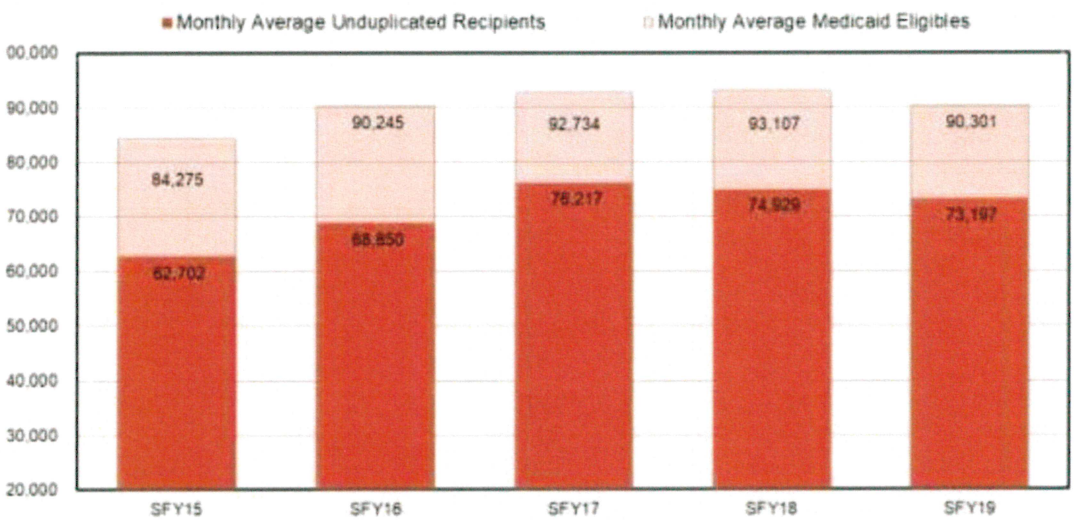

Table 1: *Total Eligible Medicaid Populations for FY 2020*

Funding for Medicaid is shared between states and the federal government. In North Dakota, the funding is approximately equal.

B. History of Medicaid Quality

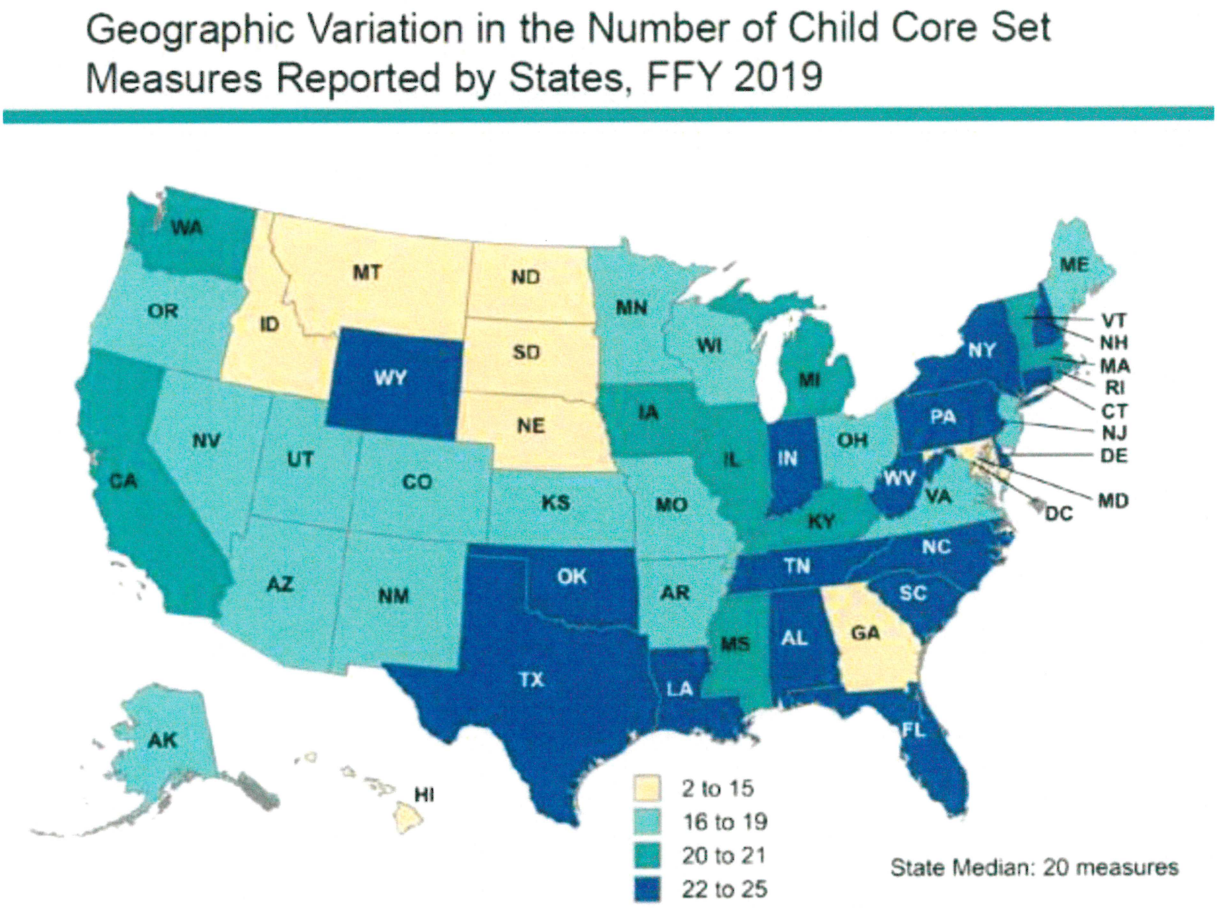
Although states may have been addressing quality in their Medicaid programs, the first foray to address quality comprehensively at the national level occurred in 2009. The Children's Health Insurance Program Reauthorization Act of 2009 required CMS to develop a core set of children's health care quality measures to monitor the quality of care and health outcomes for children enrolled in Medicaid and CHIP. States were asked to voluntarily report on these measures. By 2010, an initial Child Core Set of measures were developed and published using existing quality of care measures, specifically focusing on:

- availability and effectiveness of preventive services,
- treatment and management of chronic conditions, and
- patient experiences with care.

The ACA required CMS to develop a core set of adult health care quality measures in

Medicaid. States were asked to voluntarily report on these measures. The initial Adult Core Set included quality of care measures that focused on:

- preventative care,
- management of chronic conditions,
- behavioral health treatment, and
- patient experiences with care.



Since 2009 the number of measures, and sometimes the specifications for the measures, have been refined. Currently, for federal fiscal year (FFY) 2020, there are 24 measures in the Child Core Set and 33 measures in the Adult Core Set (Appendix 1). The Child and Adult Core Sets are reviewed and updated annually for reporting feasibility and clinical relevance. The goals of the Child and Adult Core Sets are to facilitate standardized reporting by states on a uniform set of performance measures and encourages states to use results to drive quality improvements. The Child and Adult Core Sets also allow states, the public, and CMS to monitor trends in performance on standardized indicators of quality of care provided to Medicaid and CHIP members under both fee-for-service (FFS) and managed care arrangements and examine performance across states.

As part of the Balanced Budget Act of 2018 and the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act of 2018, states will be required to report on all measures in the Child Core Set for children enrolled in Medicaid and CHIP and on all the behavioral health measures in the Adult Core Set for adults enrolled in Medicaid. The behavioral health measures evaluate the quality of substance use disorder treatment services.

In 2018, CMS launched the Medicaid and CHIP Scorecard initiative to provide greater public transparency about the Medicaid and CHIP program administration and quality of care performance. The Scorecard aligns states' and CMS' efforts to drive quality improvements that improve health outcomes for Medicaid and CHIP members using standardized performance measures. The Scorecard is comprised of three pillars: (1)

State Health System Performance, (2) State Administrative Accountability, and (3) Federal Administrative Accountability.[1] Like the Child and Adult Core Sets, the Scorecard measures will continue to evolve over time.

From 2014 to 2018 North Dakota submitted one quality measure: access to preventive dental services for children aged 1 to 20. In 2019, North Dakota submitted 13 Child Core Set measures.

Sources: Mathematica analysis of MACPro reports for the FFY 2019 reporting cycle as of May 31, 2020; Form CMS-416 reports for the FFY 2019 reporting cycle as of July 1, 2020, and Centers for Disease Control and Prevention Wide-ranging ONline Data for Epidemiologic Research (CDC WONDER) for calendar year 2018.

Figure 1: *Geographic variation in the number of Child Core Set measures reported by States, FFY 2019*

In 2020, North Dakota reported on 21 Child Core Set measures, 14 Adult Core Set

[1] https://www.medicaid.gov/state-overviews/scorecard/index.html

measures for Traditional Medicaid and 22 Adult Core Set measures for Medicaid Expansion.

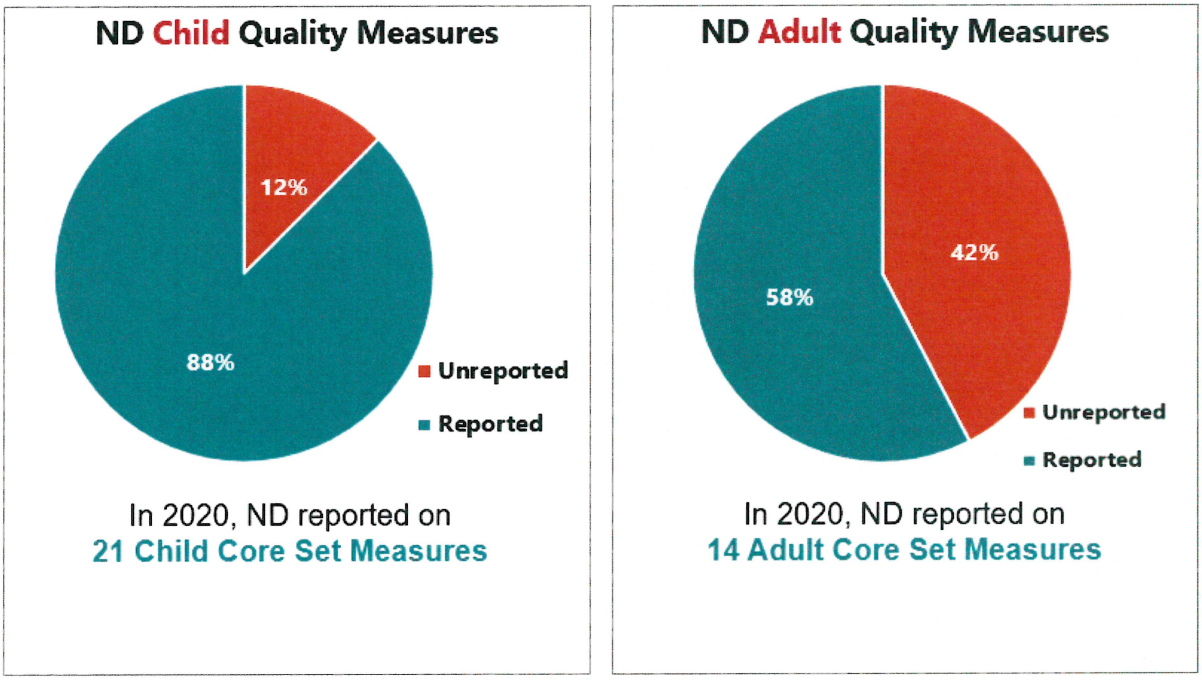

Figure 3: *North Dakota FFY 2020 Reported Measures*

C. North Dakota's Medicaid Quality Strategy

North Dakota's Medicaid Quality Strategy is designed to build healthier communities focusing on the health outcomes of target populations. Medicaid addresses both

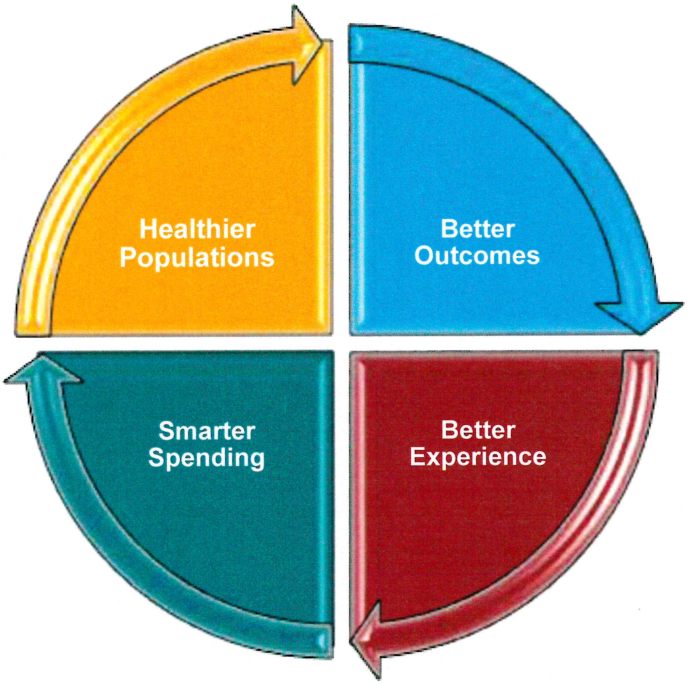

Figure 2: *Quadruple Aim for North Dakota Medicaid*

medical and non-medical health drivers to promote health equality by using the Quadruple Aim: (1) Healthier Populations, (2) Better Outcomes, (3) Smarter Spending, and (4) Better Experience.

Included in each of these four aims is a series of five goals and 10 objectives. As shown in Figure 2, these aims, goals, and objectives create the framework through which North Dakota defines the overall vision for improving quality of care for Medicaid members.

AIMS	GOALS	OBJECTIVES

Healthier Populations	**Goal 1:** **Promote wellness and prevention** **Goal 2:** **Improve Chronic Condition management**	**Objective 1.1:** Promote child health, development, and wellness **Objective 1.2:** Promote maternal health **Objective 2.1:** Improve behavioral health care **Objective 2.2:** Improve asthma management
Better Outcomes	**Goal 3:** **Ensure appropriate access to care**	**Objective 3.1:** Ensure timely access to care **Objective 3.2:** Link patients to appropriate care management services
Smarter Spending	**Goal 4:** **Pay for Value**	**Objective 4.1:** Report Medicaid Quality Measures **Objective 4.2:** Ensure high-value, appropriate care
Better Experience	**Goal 5:** **Enhance experience of care**	**Objective 5.1:** Promote patient engagement in care **Objective 5.2:** Maintain Medicaid provider engagement

Figure 3: *North Dakota's Quality Strategy Aims, Goals, and Objectives*

The development of the Quality Strategy aims, goals, and objectives reflect the opportunity for targeted quality improvement activities for Medicaid members. The Quality Strategy and objectives recognize that significant processes are aligned closely with the quality measures and activities that will drive improvement in the health of Medicaid members.

The objectives aligned with **Goal 1** (promote wellness and preventions) reflect an emphasis on improving the health of children and maternal health.

The objectives aligned with **Goal 2** (improve chronic condition management) focus on chronic conditions that significantly impact the North Dakota Medicaid populations, including asthma and behavioral health.

Many objectives tie to **Goal 3** (ensure appropriate access to care) which recognizes the need to maintain and expand access to appropriate care in a timely manner.

The objectives aligned with **Goal 4** (pay for value) reflect the importance of data transparency with public reporting of the quality measures and recognizes the importance of provider accountability to help drive high quality care to improve population health.

The objectives related to **Goal 5** (enhance experience of care) focus on member engagement in their health care, member satisfaction, provider engagement that drives patient-centered care, and ensuring members are linked to needed care management.

D. North Dakota's Quality Strategy for Medicaid

North Dakota Medicaid's Quality Strategy is based on a framework that can be used to facilitate the transformation of North Dakota's traditional fee-for-service Medicaid program to a value-based purchasing program. The Quality Strategy was designed and refined with stakeholder consideration, involvement, and feedback. The Quality Strategy is grounded in population health, which allows the Medicaid population to be categorized into targeted sub-groups and highlight specific care areas including: (1) prevention, (2) prenatal and postnatal care, (3) behavioral health, and (4) management of chronic conditions. The Quality Strategy is meant to be overarching. Individual

divisions within DHS such as Aging, Developmental Disabilities, and Behavioral Health might develop their own specific goals and objectives that fit into the overarching framework.

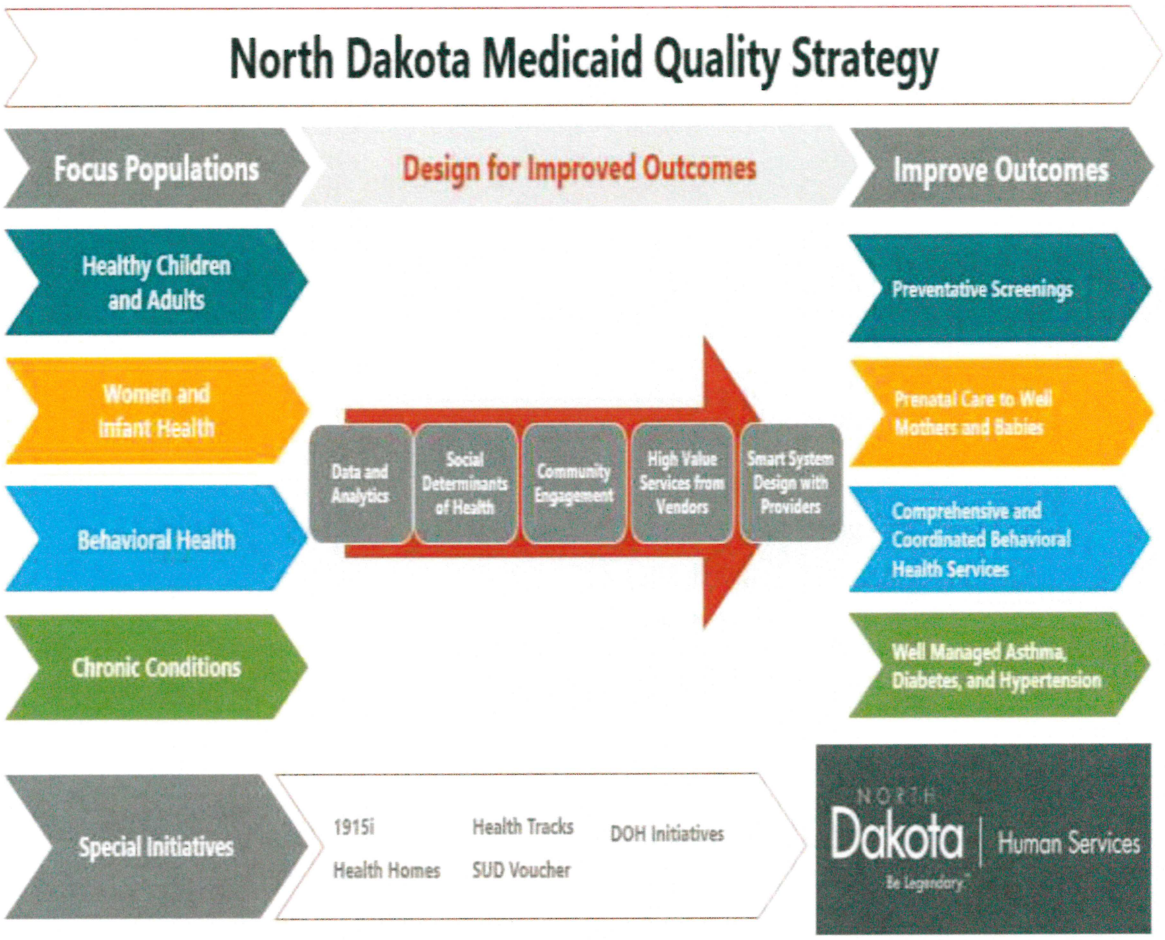

Figure 4: *North Dakota Medicaid Quality Strategy*

Through an emphasis on quality, North Dakota Medicaid aims to improve patient safety, health care outcomes, and add value in all care settings. North Dakota Medicaid aims to accomplish these through a collaborative process in which key stakeholders work together with Medicaid to promote strategies that:

- implement quality measures at the provider level.
- collect, aggregate, and report data in the most transparent way.
- report meaningful information to members, providers, and other stakeholders that can be used to inform decision-making and improve health outcomes.

Figure 5: *Medical Services Division Values*

Medicaid Expansion Quality Strategy

As part of the federal Managed Care Rule, Medicaid managed care organizations are required to have a quality strategy. North Dakota Medicaid has one managed care plan for the Medicaid expansion population. The quality strategy can be found in the Medicaid dashboard at http://www.nd.gov/dhs/services/medicalserv/medicaid/data.html. In addition to a quality strategy, the managed care plan is required to report on quality of care measures annually as well as engage in a performance improvement project. Highlights from the most recent quality of care data show that North Dakota Medicaid performs above the National Median on Child and Adolescent Immunizations.

The North Dakota Medicaid Quality team applied to participate in the Center for Medicaid and CHIP Services (CMCS) Oral Health affinity group. North Dakota Medicaid applied to participate in the Medicaid and CHIP Oral Health Affinity Group CMCS's Advancing Prevention and Reducing Childhood Caries in Medicaid and CHIP members. The Medicaid Quality and Health Tracks teams have formed a workgroup that is collaborating with CMCS to develop a performance improvement project that focuses on improving oral health through prevention that will reduce childhood caries. This project is in the development phase, that will focus on improving North Dakota Medicaid's

performance in the following two Child Quality measures: (1) Sealant Receipt on Permanent First Molars and (2) Percentage of Eligibles Who Received Preventive Dental Services.

Other Quality Information: Nursing Facilities

In addition to the Child and Adult Core Sets and the Medicaid expansion quality of care measures, North Dakota Medicaid has other quality of care information. Consumers can compare the quality of care in long-term services and supports or specifically for nursing facilities (NF). For general state comparisons consumers can use the long-term care services and supports scorecard as produced by the SCAN Foundation.[2] Based on the SCAN scorecard, North Dakota ranks 37th in the country on its performance in measures for affordability and access; choice of setting and provider; quality of life and quality of care; support for family caregivers; and, effective transitions. The scorecard measures specific to NFs are presented in Table 2 below.

Performance Measures	North Dakota rank out of 50 states **2017**	North Dakota rank out of 50 states **2020**
Median annual nursing home private pay cost as a percentage of median household income age 65+	**48**	**48**
Percent of high-risk nursing home residents with pressure sores	**8**	**1**
Percent of nursing home residents who are receiving antipsychotic medication	**37**	**44**
Percent of nursing home residents with low care needs	**38**	**41**
Percent of long-stay nursing home residents hospitalized within a 6-month period	**17**	**22**
Percent of people with 90+ day nursing home stays successfully transitioned back to community	**50**	**48**

[2] http://www.longtermscorecard.org/~/media/Microsite/State%20Fact%20Sheets/North%20Dakota%20Fact%20Sheet.pdf

Percent of nursing home residents with one or more potentially burdensome transitions at end of life	**9**	**5**

Table 2: *North Dakota's rank on performance measures*

For more NF specific quality of care information consumers can utilize Nursing Home Compare, a website sponsored by Medicare.[3] The website provides information on all Medicare and Medicaid certified NFs and on state survey agencies, ombudsman, and guidance for consumers. ND NFs are rated on a 5-star continuum for overall rating (5 is the highest), health inspections, staffing, and quality measures. Data comes from state surveys conducted by DOH, payroll-based journal, MDS, and Medicare claims. Medicare recently added a new feature to the website to denote facilities that have been cited for potential issues related to abuse.

Nationally, the percentage of NFs with a 5-star rating has increased over time indicating that the program is having a positive impact.[4] Table 3 shows the percentage of 1- and 5-star facilities for ND and surrounding states from 2009 to 2013.[5]

	Percent of 1-star facilities in 2009	Percent of 1-star facilities in 2013	Percent of 5-star facilities in 2009	Percent of 5-star facilities in 2013
North Dakota (n=80)	**8.4%**	**3.7%**	**14.5%**	**33.3%**
South Dakota (n=104)	**14.7%**	**6.4%**	**15.6%**	**24.5%**
Minnesota (n=367)	**14.5%**	**5.0%**	**16.0%**	**29.4%**
Wyoming (n=36)	**20.5%**	**7.9%**	**12.8%**	**31.6%**
Montana (n=70)	**14.3%**	**4.8%**	**15.4%**	**24.1%**

Table 3: *The percentage of 1- and 5-star facilities*

On Nursing Home Compare quality of care is reported separately for short and long stay

[3] https://www.medicare.gov/nursinghomecompare/search.html
[4] https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/CertificationandComplianc/Downloads/NHC-Year-Five-Report.pdf
[5] Ratings for January 2009 and December 2013 by state. https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/CertificationandComplianc/Downloads/NHC-Year-Five-Report.pdf

residents. Short stay residents typically have a goal to improve their health and return to their homes whereby long stay residents will likely stay in the facility. Short stay quality measures used to calculate the star rating include:

- Percentage of residents re-hospitalized
- Percent of residents with an outpatient emergency department visit
- Percentage of residents who got an antipsychotic medication
- Percent of residents with new or worsened pressure ulcers
- Percent of residents whose ability to move improved

Long stay quality measures used to calculate the star rating include:

- Number of hospitalizations per 1,000 days
- Number of outpatient emergency department visits per 1,000 days
- Percentage of residents who got an antipsychotic medication
- Percent of residents with 1 or more falls
- Percent of residents with pressure ulcers
- Percent of residents with urinary tract infection
- Percent of residents with a catheter
- Percent of residents whose inability to move worsened
- Percent of residents whose need for help with daily living increased

There are several other quality measures that do not contribute to the star ratings for short- and long-term stays.

Other Quality Information: Hospitals

Hospitals in North Dakota each have an overall star rating on the Hospital Compare website. The Hospital Compare website is a consumer-oriented website that allows consumers to compare hospitals' data on patients' experiences, outcome of care measures, use and overuse of medical procedures, and the volume of Medicare payments. The Overall Hospital Compare Star Rating is a 5-star rating that summarizes hospital performance based on indicators of quality, patient satisfaction survey, and volume of Medicare payments. Table 4 represents the Overall Star Rating for North

Dakota hospitals.

Star Rating	Hospital
★★★★	CHI St. Alexius Health Bismarck
★★★★	Essentia Health Fargo
★★	Altru Hospital Grand Forks
★★	Sanford Medical Center Bismarck
★★	Sanford Medical Center Fargo
★★	Trinity Hospital Minot

*Rating based on current data collection periods from Hospital Compare, last updated on July 22, 2020

Table 4: *Overall Star Rating for North Dakota Hospitals*

Finally, North Dakota Medicaid does collect and report on several quality of care measures for hospitals through a contracted quality improvement organization (QIO) vendor. The QIO's annual report reviewed the volume of Medicaid claims payment per hospital, reported the highest billed Diagnosis-Related Group (DRG) claims for Medicaid, and reviewed prior authorization claims.

II. Value-Based Purchasing Models and Payment Reform

A. Value-Based Purchasing

Developing a quality strategy and documenting quality of care through reporting helps to provide a clearer picture of where the Medicaid program can target areas for improvement. States use different approaches to improve quality of care including

Category 1	•fee-for-service with no link to payment quality
Category 2	•fee-for-service with a link of payment to quality and value
Category 3	•alternative payment models build on a fee-for-service architecture
Category 4	•population-based payment

performance improvement plans, public-private quality collaboratives, and value-based purchasing models. There are several value-based purchasing models Medicaid programs can implement. These are best described in the U.S. Department of Health and Human Services (DHHS) and the Health Care Payment Learning and Action Network (LAN) framework for value-based purchasing. The framework describes Alternative Payment Models (APM) that are meant to align with public and private stakeholders in the shared goal of shifting away from the current Fee-For-Service (FFS), volume-based payment system to a model that pays for value. Figure 6 describes the LAN APM categories. Currently, North Dakota Medicaid is in Category 1.

Figure 6: *LAN APM Model*

A 2018 Health Care Payment LAN APM study revealed the following:

- 39.1% of health care dollars in Category 1
- 25.1% of health care dollars in Category 2
- 35.8% of health care dollars in a composite of Categories 3 & 4

The results highlight a continued movement away from a fee-for-service system that reimburses only on volume, and towards value-based purchasing APMs. In North Dakota, commercial insurers as well as Medicare have made more progress moving to higher categories than Medicaid. For example, Blue Cross Blue Shield of North Dakota has the Blue Alliance program which is a tiered APM system and there are seven areas in the State that participate in a Medicare ACO program.[6]

B. North Dakota Medicaid Current Models

The current delivery of care model for the traditional North Dakota Medicaid population is generally a FFS payment model. The Medicaid agency establishes the FFS reimbursement rates for covered services and pays participating providers directly for each service provided to Medicaid members. In a FFS payment model the providers do not bear any finical risk and they receive full payment for delivering the service regardless of the outcome. In the FFS delivery of care model, there is no organized

[6] http://www.longtermscorecard.org/~/media/Microsite/State%20Fact%20Sheets/North%20Dakota%20Fact%20Sheet.pdf

provider network or coordinating entity.

North Dakota's Medicaid Expansion population receives care though a private managed care organization (MCO). The MCO is a health plan that contracts with the State to provide members with a set of Medicaid benefits for a prospectively set per member per month premium. The MCO is a comprehensive risk-based MCO that has both clinical and financial accountability for covered services provided to its members during their period of enrollment. The flow of funds in a risk based MCO arrangement is the State agency pays the MCO the negotiated per member per month premium times the number of enrollees then the health plan negotiates and pays providers directly through a FFS arrangement or a APM. Currently, the contracted managed care organization pays FFS.

In fall 2020, North Dakota Medicaid along with its stakeholders began exploring different value-based purchasing models. A working group of primary care providers is investigating the Health Homes model for beneficiaries with chronic conditions.

A working group of inpatient providers, including large hospitals and three large critical access hospitals, are investigating the following value-based purchasing delivery of care models through presentations and discussions.

C. Value-Based Purchasing Program for Hospitals

1. Episodes of Care

Episodes of Care is a value-based purchasing model that focuses on the total cost of care related to an episode. Providers or facilities that can deliver an episode below the benchmark cost can share in the realized savings. Providers or facilities that deliver an episode above the benchmark cost may be required to reimburse the State for the loss. Episodes are defined by a triggering event and may include services that are delivered pre and post the triggering event. Examples of triggering events are knee replacement surgery or emergency department visit related to asthma. Episodes are defined by the timeframe and settings. Building on the knee replacement example, the episode could

include post-acute rehabilitation provided by a physical therapist who may or may not be employed by the same health system as the physician financially responsible for the bundle. Clinical expertise is required to define an episode and several state Medicaid programs have their defined bundles available online such as Arkansas and Tennessee.

Benchmarks are needed for each episode so that facilities and providers understand not only what the clinical expectations are, but also the expected total costs. Providers bill the Medicaid program like they normally do under fee-for service. They are not paid in advance for the episode. At the end of the reporting period, typically one year, a reconciliation occurs, and the facility's total costs are compared to the benchmark. If the facility or provider manages the patient's care well and provides full care for less than the benchmark than the facility or provider can share the upside savings. If the cost of care exceeds the benchmark, no additional reimbursement will be received from Medicaid and in some states the facility or provider must pay the state back for the loss. To ensure patient care does not decline in the Episode of Care model, facilities or providers are required to meet specific minimum quality thresholds to ensure cost is not the only consideration while managing members' care.

2. Pay-for-Performance

Pay-for-Performance (P4P) is a delivery of care model that focuses on improving the quality and efficiency of care by incentivizing providers to report on and in some cases improve their performance. The P4P payment model attaches financial incentives and disincentives to provider performance by tying reimbursements to metric-driven outcomes, proven best practice, and patient satisfaction. This allows payers to align payments with outcomes and provider performance. P4P is the most common payment model used to drive quality and add value to health care programs across all types of payers. As a result, providers are often subject to more than one set of performance measures that may or may not conflict with one another. Additionally, P4P programs need to address the social determinant of health by including health equity measures to produce fair provider comparisons and reward providers who performance will among socioeconomically disadvantaged patient populations to offset the additional financial

risk associated with care for these groups.

During value-based discussions with hospitals, Wisconsin Medicaid presented on its P4P program. For instance, the goal for the measurement year 2020, is to reduce FFS Potentially Preventable Readmissions (PPR) in the Wisconsin Medicaid Program by 7.5 percent. A withhold of 3 percent of inpatient, FFS claims will be applied for the Withhold P4P, which will apply to claims with dates of service from 1/1/2020 to 12/31/2020. Withheld funds will be returned to hospitals consistent with the incentive/penalty methodology, and payouts will occur based on 2020 performance.

3. Accountable Care Organizations

An Accountable Care Organization (ACO) is a network of doctors and hospitals that share financial and medical responsibility for the health care delivery and outcomes to a defined attributed population. Providers in an ACO are expected to coordinate care for their shared patients to enhance quality and efficiency. In an ACO there is a shared risk arrangement that includes both incentives payments based on quality performance, as well as shared savings. The structure of an ACO requires significant time, energy, and resources to develop. For rural areas, providers may need to seek out appropriate partnerships to participate fully in ACO models.

During value-based discussion with hospitals, Caravan Health presented on its ACO program that is operational in seven areas in North Dakota. This program is financed through Medicare.

4. Value-Based Purchasing Models: Pros and Cons

Based on the presentations and a review of literature, the following table describes the pros and cons for each value-based purchasing program that was reviewed.

VBP Programs	Pros	Cons
Episode of Care	▪ Potential to improve coordination among multiple caregivers ▪ Ability to support flexibility in how and where care is delivered ▪ Incentive to efficiently	▪ Need clinical input on episodes ▪ Patient behavior could impede results ▪ Providers may not want to coordinate pre and post trigger care

	manage an episode (reduce treatment/manage costs) ▪ Simplicity from a billing perspective and no provider reporting required ▪ Clear accountability for care for a defined episode ▪ Can be done with small facilities/ populations	
P4P	▪ Potential to improve coordination among multiple caregivers ▪ Ability to support flexibility in how and where care is delivered ▪ Incentive to efficiently manage an episode (reduce treatment/manage costs) ▪ Simplicity from a billing perspective (one bill instead of many) ▪ Clear accountability for care for a defined episode	▪ Difficulty of defining the boundaries of an episode (what care falls within and outside of the episode) ▪ Potential to increase barriers to patients' choice of provider and/or geographic preferences for care accountability for care for a defined episode
ACO	▪ It creates better communication throughout the entire exchange ▪ There are cost advantages to consider when joining an ACO ▪ It provides an opportunity to offer more comprehensive care ▪ Physician-driven treatment ▪ There is already evidence to suggest that the ACO model can be successful It can eliminate extra expenses for the patient ▪ There is full availability of a patient's medical history	▪ The cost of the IT infrastructure can be daunting to medical providers ▪ Sharing everything means that you also concede some decision-making opportunities ▪ There can be challenges with data security for your patients ▪ Medical providers must start to adapt to new ways of doing things ▪ There will be more patients that come through your medical practice ▪ ACOs do not offer a guarantee of success ▪ There is a time element to consider with ACOs ▪ Difficult implementation;

		for organizations that are already using some sort of EMR this task could be easier, but for those who have not then the financial and resource cost could prove to be more than a practice is willing to incur

Table 4: *Pros and Cons Table for VBP Models*

4. Survey Results

North Dakota Medicaid administered a Value-Based Purchasing (VBP) Model Survey to North Dakota Hospital Association (NDHA) members who attended the three VBP presentations that were hosted by North Dakota Medicaid. NDHA members were informed during the presentations that States that incorporate a VBP model into their Medicaid program can increase quality and possibly reduce or maintain costs. DHS administered the survey to understand NDHA member's preferred VBP model. DHS received a total of seven surveys from both Prospective Payment System (PPS) Hospitals and Critical Access Hospitals (CAHs). The six PPS Hospitals that submitted the survey were: Essentia, CHI St. Alexius, Altru, and Trinity. Sanford Bismarck and Sanford Fargo did not complete the survey. The three participating CAHs responded to the survey.

VBP Models	Top Pro	Top Con
Episode of Care	No changes to current billing procedures	If cost is above an acceptable threshold, the provider owes a payment back to the state.
Pay-For-Performance	Simplicity from a billing perspective (one bill instead of many).	Any non-claims based measures will take additional funds to calculate.
Accountable Care Organization	Provides an opportunity to offer more comprehensive care.	Number of patients in the ACO - fewer Medicaid patients can mean more difficulty for providers to manage care and spread risk.

Table 5: *VBP survey results for Top Pros and Top Cons*

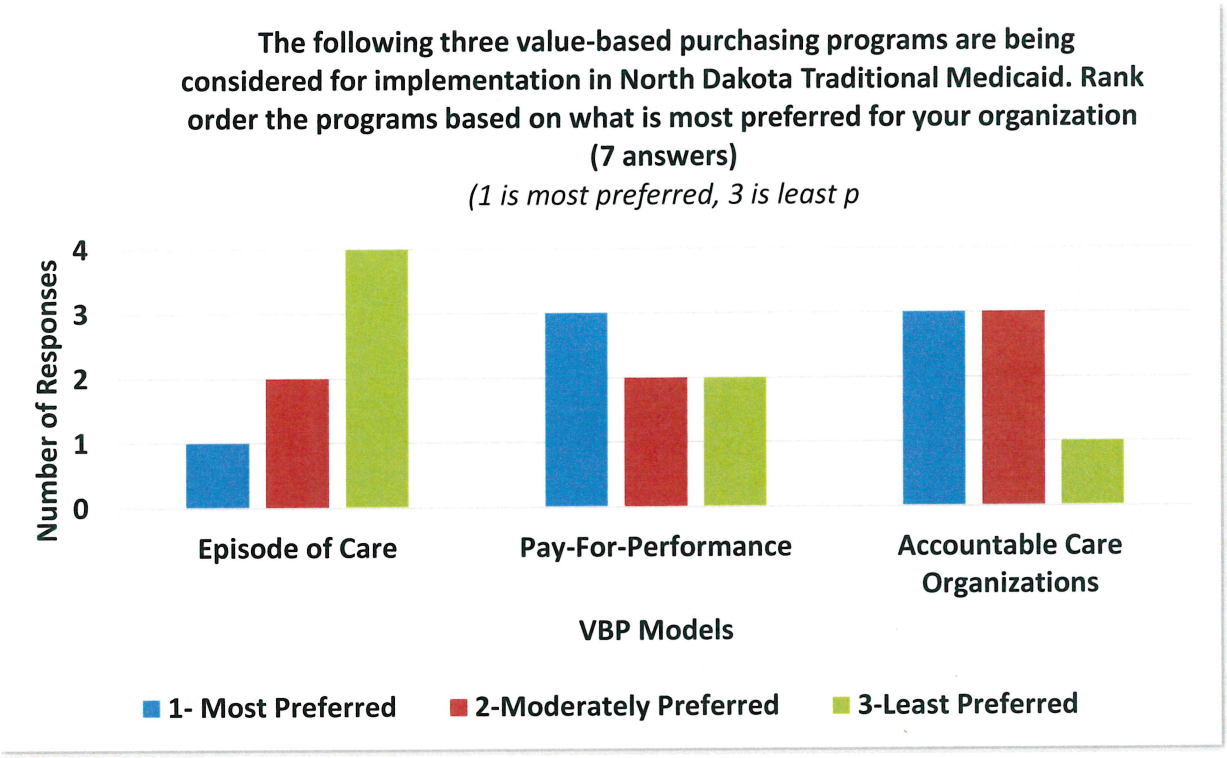

Figure 7: *VBP survey result for Question 1*

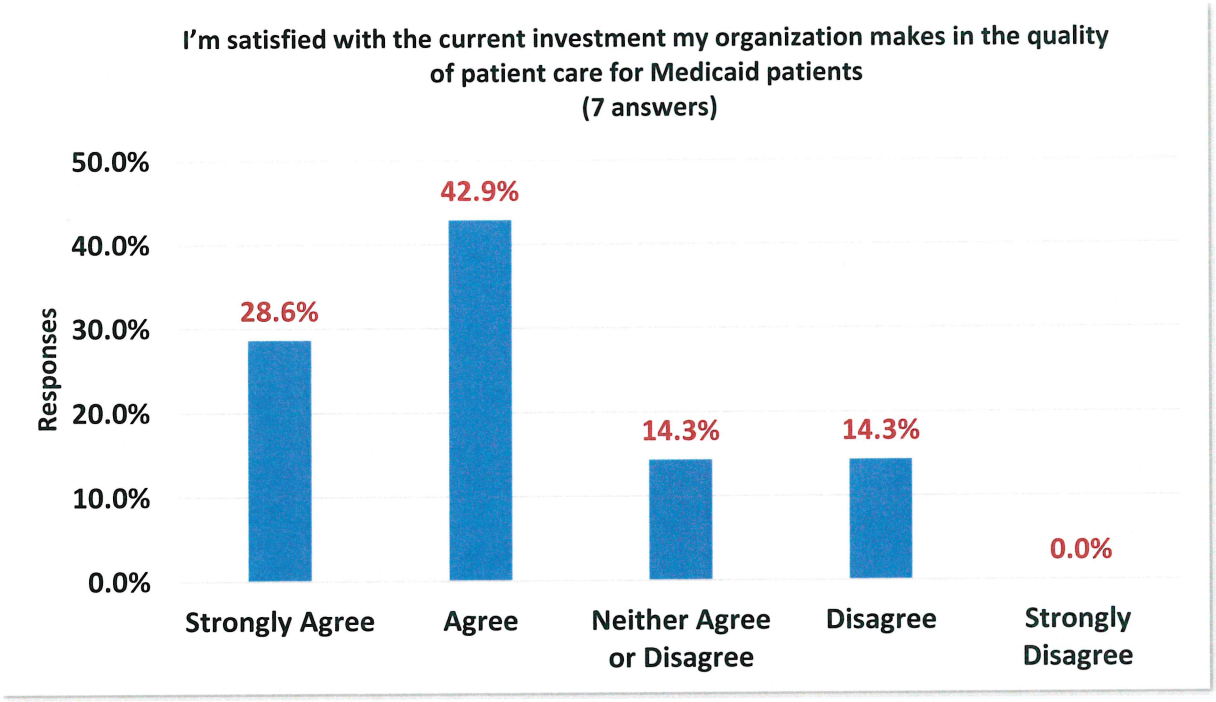

Figure 8: *VBP survey result for Question 10*

D. Value-Based Purchasing Model for Primary Care

The current delivery of care model using for primary care services in North Dakota Medicaid is the Primary Care Case Management (PCCM), which is a managed FFS arrangement with an additional $2 per member per month management fee. The PCCM model requires primary care providers to provide, locate, coordinate and monitor primary care service for Medicaid members.

PCCM requires each traditional Medicaid member to choose a primary care provider, or if they do not, one is chosen for them. Primary care providers must provide referrals and approve acute, non-emergency care in inpatient settings. Although the PCCM program has been in place for some time, there is concern with the $2 incentive, the rules related to attribution, and the lack of effectiveness. In 2020 North Dakota Medicaid hosted presentations from several states on models for primary care other than PCCM. South Dakota, Connecticut, and Alabama presented on their programs and stakeholder feedback indicated that Health Homes which were presented by South Dakota were a model that North Dakota Medicaid should further explore. A working group was established to discuss the model, the parameters that need to be decided, and possible chronic conditions to target.

1. Health Homes

The Health Homes model, authorized in Section 1945 of the Social Security Act, is designed to coordinate healthcare and social services for Medicaid members with chronic conditions, including behavioral health conditions. Health Homes emphasize a whole-person approach for high-risk Medicaid members with chronic conditions through the integration and coordination of primary, acute, behavioral health, and long-term services and support. The Health Home services include: (1) Comprehensive Care Management, (2) Care Coordination, (3) Health Promotion, (4) Comprehensive Transitional Care and Follow-Up, (5) Patient and Family Support, and (6) Referral to Community and Social Support Services. The goals of Health Homes are to reduce the cost of care and improve quality. This is typically accomplished by reducing emergency department use, hospital admissions, and re-admissions of member with chronic conditions through improved disease management. Medicaid members eligible for the

Health Home program are those who: (1) Have two or more chronic conditions, (2) Have one chronic condition and are at risk for a second, and (3) Have one serious and persistent mental health condition. Participation is voluntary for members and providers. Participating providers need to consider their available and/or existing resources to appropriately care for this complex high-risk member population. Providers who are able to provide one of the core services on a routine basis and meet quality benchmarks are eligible to receive a supplemental per member per month payment. The payments usually increase based on the complexity of the member and are paid out quarterly or semi-annually. Evidence from South Dakota shows that the costs avoided to the Medicaid program far outweigh the monthly payments and costs of the health home services. In the first five years of the South Dakota program, there were $7.3 million in avoided costs. Avoided costs were calculated by comparing the expenditures for the health homes group to other Medicaid members who were similar in terms of conditions and demographics but who were not enrolled in the program.

The Health Homes model has a Health Homes Core Set that consist of 12 quality measures that are reported annually to ensure quality performance for this high-risk and high-cost Medicaid population.

2. Health Homes Core Set Cross Walk

Crosswalk Medicaid Quality Measures

Figure 7: *North Dakota Medicaid's Roadmap to Drive Quality*

E. The Future of Quality in North Dakota Medicaid

The purposes of this document are to outline North Dakota Medicaid's current quality of care, present Medicaid's Quality Strategy, and describe models that can be pursued in the future that will transition the State from fee-for-service to value based purchasing. The figure below depicts this journey to improve the quality of care for Medicaid members and ensure that the State is a good steward of taxpayer dollars by purchasing the highest value care.

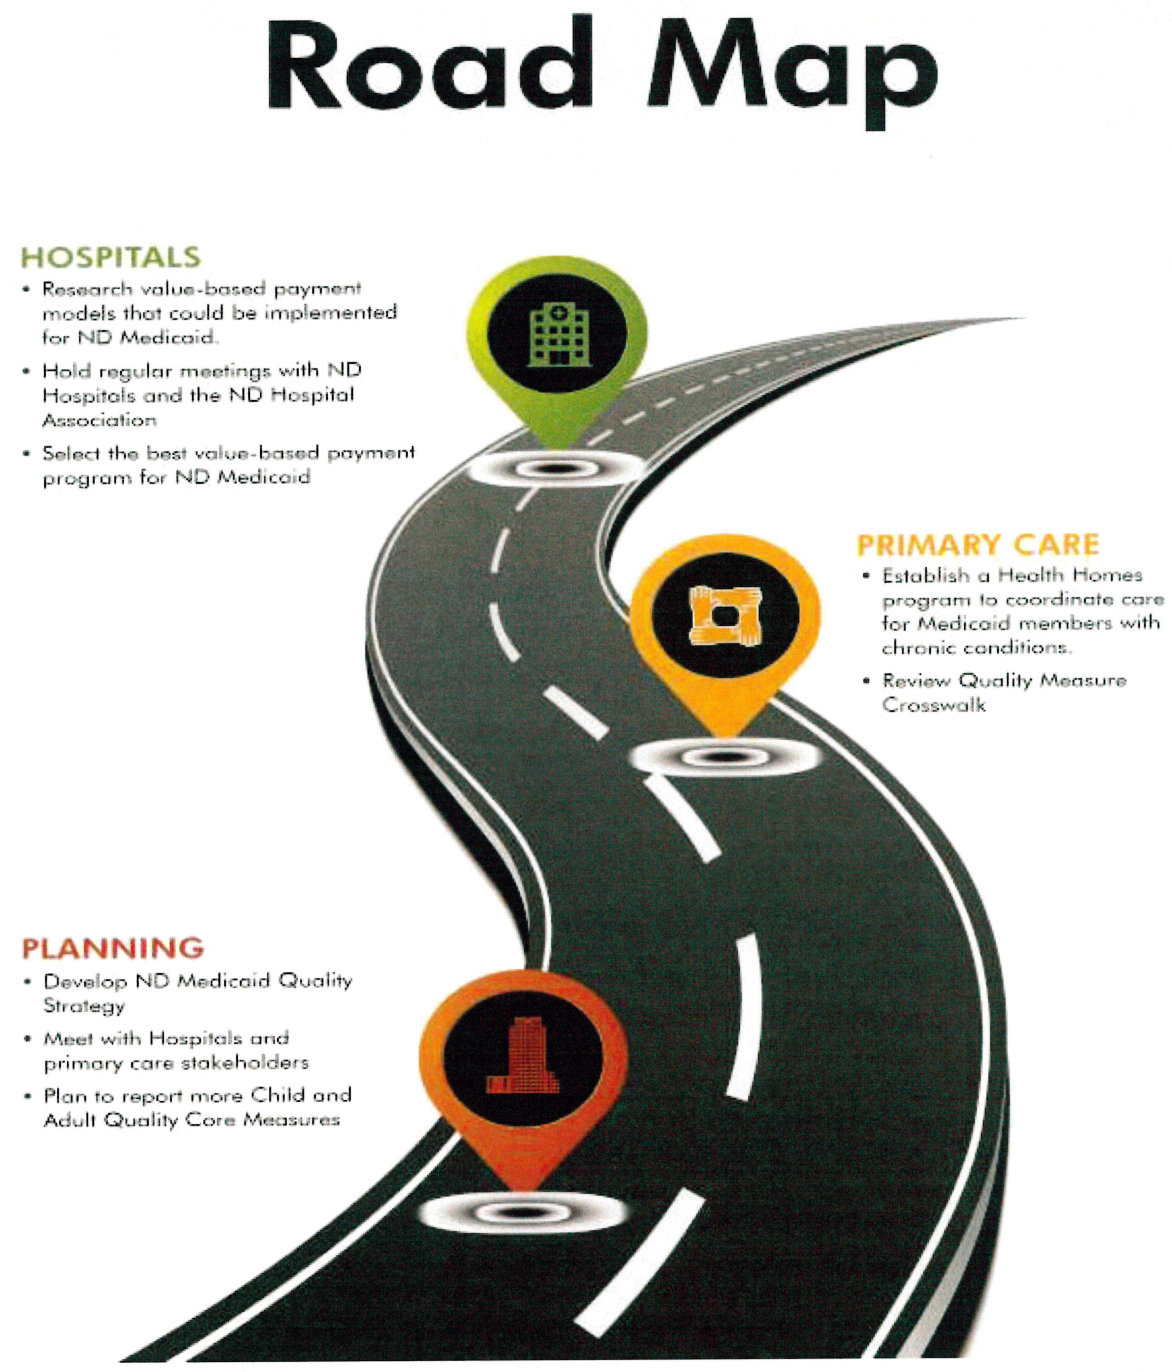

Figure 8: *North Dakota Medicaid's Roadmap to Drive Quality*

III. Conclusion

The North Dakota Quality Strategy is a living document that will continue to evolve as key health care stakeholders, as well as the executive and legislative branches, invest in and insist on high quality of care for Medicaid members. North Dakota can realize high quality for Medicaid members through cross-sector collaboration as multiple agencies and providers serve the same population. This critical collaboration will lead to investments and results that build a comprehensive quality program that will drive better health outcomes and promote a healthier population. North Dakota Medicaid, along with its partners, is committed to the quadruple aims of healthier populations, better outcomes, smarter spending, and better experiences.

Appendix 1: Child and Adult 2020 Core Sets

2020 Core Set of Children's Health Care Quality Measures for Medicaid and CHIP (Child Core Set)

CMS
CENTERS for MEDICARE & MEDICAID SERVICES

Region VIII

December 31, 2013

Julie Schwab, Director
North Dakota Department of Human Services
600 East Boulevard Avenue Department 325
Bismarck, ND 58505-0250

Dear Ms. Schwab:

This letter is to inform you that the Centers for Medicare and Medicaid Services (CMS) approves Federal Financial Participation (FFP) for the managed care organization (MCO) contract between the North Dakota Department of Human Services and Sanford Health Plan, State contract # 415-09524. This new MCO contract and rates are effective on January 1, 2014 through December 31, 2014. CMS approves this managed care contract with the understanding that additional contract amendments may be warranted based on the final approval of relevant benefit State Plan Amendments (SPAs).

This new MCO contract operates under North Dakota's new 1915(b) Waiver for Managed Care Enrollment of Medicaid Expansion of the New Adult Group, Waiver number ND-04.

CMS found that the submitted contract met the requirements in federal regulations at 42 CFR 438, and that the rates met the requirements at 42 CFR 438.6(c). This approval for the contracted rates is limited to the period for which the rates were actuarially certified, beginning January 1, 2014 and ending December 31, 2014. CMS received an actuarial certification establishing that the rate ranges were developed in accordance with accepted actuarial principles and practices, and were appropriate for the Medicaid populations covered, and Medicaid services included in the contract.

As you know, CMS has been providing technical assistance and consultation to the State since October, 2013. We identified a number of concerns about the State's rate-setting approach, including:

- Original assumptions that an MCO delivery system would cost more than unmanaged fee-for-service – even though national studies show that managed care delivery systems result in cost savings;
- Assumptions of provider payments rates that reflect commercial rates rather than Medicaid fee-for-service rates; and
- Unusually large adjustments for adverse health status of the newly eligible population – one of the largest in the country

Taken together, these assumptions and adjustments are estimated to lead to managed care rates for the newly eligible adults that are roughly twice as large as the fee-for-service costs of current adult enrollees. In response to these concerns, you and your staff have worked with us to address them to the maximum extent possible. Specifically, your actuaries have modified the 'managed care savings' assumptions to reflect a slight savings off current costs, and used Current Population Survey (CPS) data and appropriate benefit costs to modify the acuity assumptions in the capitation rates.

While the rates continue to reflect what you expect your MCO to pay their providers, we have required you to gather actual paid claims, utilization and financial data from your MCO in 2014 so that those assumptions can be tested and revised, as necessary, in the 2015 rates. We have also required you to implement a risk corridor with narrow risk bands to provide protection for all parties involved.

We expect to engage in additional consultations when you are beginning the rate-setting process for 2015. We would like to thank you and your staff for the cooperation we received during the review process. If you have any questions regarding this approval please contract Sophia Hinojosa at Sophia.Hinojosa@cms.hhs.gov or (303) 844-7129.

Sincerely,

Richard C. Allen
Associate Regional Administrator
Division of Medicaid and Children's Health Operations

Notes: DSH is disproportionate share hospital. SPRY is state plan rate year, which often coincides with state fiscal year and may not align with the federal fiscal year. This analysis includes 44 states and the District of Columbia and excludes Hawaii, Massachusetts, Maine, New Hampshire, South Dakota, and West Virginia. Institutions for mental diseases were also excluded. Base Medicaid payments include fee-for-service as well as managed care payments for services. Non-DSH supplemental payments include upper payment limit payments in fee-for-service Medicaid, graduate medical education payments, and supplemental payments authorized under Section 1115 demonstrations (except for delivery system reform incentive payments, which are not reported on DSH audits). DSH payments and non-DSH supplemental payments may also be used to offset non-Medicaid costs, such as unpaid costs of care for uninsured patients. Costs for uninsured patients are uncompensated care costs for uninsured patients, net of payments received from them. Payment levels shown do not account for provider contributions to the non-federal share; these contributions may reduce net payments. Numbers do not sum due to rounding.

TABLE 3A-10. (continued)

— Dash indicates zero; 0 indicates a non-zero amount less than 0.5 percent.

[1] California public hospitals are eligible to receive DSH payments up to 175 percent of the hospital's Medicaid uninsured costs.

[2] Illinois and North Dakota reported SPRY 2014 DSH payments that exceeded hospital uncompensated care costs for Medicaid and uninsured patients on their as-filed DSH audits. Because DSH payments to an individual hospital cannot exceed hospital uncompensated care costs, some of these payments may be recouped when these states' DSH audits are finalized.

[3] Two DSH hospitals in Minnesota, all DSH hospitals in New Hampshire, three DSH hospitals in Tennessee, one DSH hospital in Virginia, and all DSH hospitals in West Virginia did not include payments from third-party payers when calculating Medicaid shortfall, so they are excluded from this analysis.

Source: MACPAC, 2019, analysis of SPRY 2014 as-filed Medicaid DSH audits.

Institutions for Mental Diseases (IMDs) – Concept and Process Overview

Senate Appropriations

Medical Services Division, Caprice Knapp – Director

March 15, 2021

NORTH Dakota | Human Services

Be Legendary.™

Background

An institution for mental diseases (IMD) is defined in section 1905(i) of the Social Security Act to mean a "hospital, nursing facility, or other institution of more than 16 beds, that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases, including medical attention, nursing care, and related services."

Under section 1905(a) of the Act, there is a general prohibition on Medicaid payment for any services provided to any individual who is under age 65 and who is residing in an IMD. There are two exceptions to the IMD exclusion: 1) inpatient hospital services, nursing facility services, and intermediate care facility services for individuals age 65 and older in IMDs (42 CFR § 440.140), and 2) inpatient psychiatric hospital services for individuals under age 21, furnished by a psychiatric hospital, a general hospital with a psychiatric program that meets the applicable conditions of participation, or an accredited psychiatric facility that meets certain requirements, commonly referred to as a "Psychiatric Residential Treatment Facility" (PRTF) (42 CFR § 440.160).

IMDs in North Dakota

In North Dakota, the following facilities are classified as IMDs: The State Hospital in Jamestown (140 beds); Prairie St. John's in Fargo (110 beds); ShareHouse in Fargo (87 beds); and Summit Prairie Recovery Center in Raleigh (36 beds).

'Waiving' the Prohibition of Medicaid Payment for IMD Services

Section 1115 of the Social Security Act gives the Secretary of the U.S. Department of Health and Human Services authority to approve experimental, pilot, or demonstration projects that promote the objectives of Medicaid and Children's Health Insurance Program (CHIP). Under this authority, the Secretary may waive certain provisions of Medicaid law to give states additional flexibility to design and improve their programs.

Some states have received approval from CMS for 1115 waivers related to substance abuse disorder (SUD) treatment services provided in IMDs. In November 2018, CMS clarified that they will also approve 1115 waivers for services provided in IMDs that focus primarily on treatment for individuals with serious mental illness (SMI) or serious emotional disturbance (SED)[1]. States may choose to focus their 1115 waivers on SUD treatment, SMI/SED treatment, or both at the same time.

States have the flexibility to design 1115 demonstrations aimed at making significant improvements over the course of a five-year period. Compliance with the following goals and milestones is required.

Required Goals for SUD 1115 waiver:

- Increased rates of identification, initiation, and engagement in treatment;
- Increased adherence to and retention in treatment;
- Reductions in overdose deaths, particularly those due to opioids;

[1] https://www.medicaid.gov/federal-policy-guidance/downloads/smd18011.pdf

- Reduced utilization of emergency departments and inpatient hospital settings for treatment where the utilization is preventable or medically inappropriate through improved access to other continuum of care services;
- Fewer readmissions to the same or higher level of care where the readmission is preventable or medically inappropriate; and
- Improved access to care for physical health conditions among beneficiaries.

Required Milestones for SUD 1115 waiver:

- Access to critical levels of care for opioid use disorder (OUD) and other SUDs;
- Widespread use of evidence-based, SUD-specific patient placement criteria;
- Use of nationally recognized, evidence-based SUD program standards to set residential treatment provider qualifications;
- Sufficient provider capacity at each level of care;
- Implementation of comprehensive treatment and prevention strategies to address opioid abuse and OUD; and
- Improved care coordination and transitions between levels of care.

Required Goals for SMI/SED 1115 waiver:

- Reduced utilization and lengths of stay in EDs among Medicaid beneficiaries with SMI or SED while awaiting mental health treatment in specialized settings;
- Reduced preventable readmissions to acute care hospitals and residential settings;
- Improved availability of crisis stabilization services including services made available through call centers and mobile crisis units, intensive outpatient services, as well as services provided during acute short-term stays in residential crisis stabilization programs, psychiatric hospitals, and residential treatment settings throughout the state;
- Improved access to community-based services to address the chronic mental health care needs of beneficiaries with SMI or SED including through increased integration of primary and behavioral health care; and
- Improved care coordination, especially continuity of care in the community following episodes of acute care in hospitals and residential treatment facilities.

Required Milestones for SMI/SED 1115 waiver:

Ensuring Quality of Care in Psychiatric Hospitals and Residential Settings

- Participating hospitals and residential settings are licensed or otherwise authorized by the state to primarily provide treatment for mental illnesses and are accredited by a nationally recognized accreditation entity including the Joint Commission or the Commission on Accreditation of Rehabilitation Facilities (CARF) prior to receiving FFP for services provided to beneficiaries;
- Establishment of an oversight and auditing process that includes unannounced visits for ensuring participating psychiatric hospitals and residential treatment settings meet state licensure or certification requirements as well as a national accrediting entity's accreditation requirements;

- Use of a utilization review entity (e.g., a managed care organization or administrative service organization) to ensure beneficiaries have access to the appropriate levels and types of care and to provide oversight to ensure lengths of stay are limited to what is medically necessary and only those who have a clinical need to receive treatment in psychiatric hospitals and residential treatment settings are receiving treatment in those facilities;
- Participating psychiatric hospitals and residential treatment settings meet federal program integrity requirements, and the state has a process for conducting risk-based screening of all newly enrolling providers, as well as revalidating existing providers (specifically, under existing regulations, states must screen all newly enrolling providers and reevaluate existing providers pursuant to the rules in 42 CFR Part 455 Subparts B and E, ensure treatment providers have entered into Medicaid provider agreements pursuant to 42 CFR 431.107, and establish rigorous program integrity protocols to safeguard against fraudulent billing and other compliance issues);
- Implementation of a state requirement that participating psychiatric hospitals and residential treatment settings screen enrollees for co-morbid physical health conditions and SUDs and demonstrate the capacity to address co-morbid physical health conditions during short-term stays in these treatment settings (e.g., with on-site staff, telemedicine, and/or partnerships with local physical health providers);

Improving Care Coordination and Transitions to Community-Based Care

- Implementation of a process to ensure that psychiatric hospitals and residential treatment settings provide intensive pre-discharge, care coordination services to help transition beneficiaries out of these settings and into appropriate community-based outpatient services - as well as requirements that community-based providers participate in these transition efforts (e.g., by allowing initial services with a community-based provider while a beneficiary is still residing in these settings and/or by hiring peer support specialists to help beneficiaries make connections with available community-based providers, including, where applicable, plans for employment);
- Implementation of a process to assess the housing situation of individuals transitioning to the community from psychiatric hospitals and residential treatment settings and connect those who are homeless or have unsuitable or unstable housing with community providers that coordinate housing services where available;
- Implementation of a requirement that psychiatric hospitals and residential treatment settings have protocols in place to ensure contact is made by the treatment setting with each discharged beneficiary within 72 hours of discharge and to ensure follow-up care is accessed by individuals after leaving those facilities by contacting the individuals directly and by contacting the community-based provider the person was referred to;
- Implementation of strategies to prevent or decrease the lengths of stay in EDs among beneficiaries with SMI or SED (e.g., through the use of peers and

psychiatric consultants in EDs to help with discharge and referral to treatment providers);
- Implementation of strategies to develop and enhance interoperability and data sharing between physical, SUD, and mental health providers with the goal of enhancing care coordination so that disparate providers may better share clinical information to improve health outcomes for beneficiaries with SMI or SED;

Increasing Access to Continuum of Care Including Crisis Stabilization Services

- Annual assessments of the availability of mental health services throughout the state, particularly crisis stabilization services and updates on steps taken to increase availability;
- Commitment to a financing plan approved by CMS to be implemented by the end of the demonstration to increase availability of non-hospital, non-residential crisis stabilization services, including services made available through crisis call centers, mobile crisis units, coordinated community crisis response that involves law enforcement and other first responders, and observation/assessment centers as well as on-going community-based services, e.g., intensive outpatient services, assertive community treatment, and services in integrated care settings such as the Certified Community Behavioral Health Clinic model as well as consideration of a self-direction option for beneficiaries;
- Implementation of strategies to improve the state's capacity to track the availability of inpatient and crisis stabilization beds to help connect individuals in need with that level of care as soon as possible;
- Implementation of a requirement that providers, plans, and utilization review entities use an evidence-based, publicly available patient assessment tool, preferably endorsed by a mental health provider association, to help determine appropriate level of care and length of stay;

Earlier Identification and Engagement in Treatment Including Through Increased Integration

- Implementation of strategies for identifying and engaging individuals, particularly adolescents and young adults, with serious mental health conditions, in treatment sooner including through supported employment and supported education programs;
- Increasing integration of behavioral health care in non-specialty care settings, including schools and primary care practices, to improve identification of serious mental health conditions sooner and improve awareness of and linkages to specialty treatment providers; and
- Establishment of specialized settings and services, including crisis stabilization services, focused on the needs of young people experiencing SMI or SED.

Other 1115 Waiver Requirements:

- Demonstrations must be "budget neutral" to the Federal government, which means that, during the project, federal Medicaid expenditures will not be more

than federal spending without the demonstration[2]. Calculations are based on per member, per month expenditures pre- and post-implementation for the targeted population [PMPM*Member Months]. Other methodologies may be accepted by CMS.

- Demonstrations must have implementation and evaluation plans approved by CMS.
- 1115 waivers do not allow for room and board payments unless the facility qualifies as an inpatient facility under section 1905(a) of the Social Security Act.
- States are required to have staff and/or contractual resources necessary to conduct independent and robust interim and final evaluations.

Other Considerations:

- Even if ND was approved for an 1115 waiver that would allow Medicaid to reimburse for treatment within an IMD, there would still be limits on the number of days that can be reimbursed (15 days per year for inpatient IMD; 30 days per year for residential IMD[3]). An 1115 waiver would apply only to traditional fee-for-service Medicaid.
- IMD reimbursement for the Medicaid Expansion group, which is currently operated as managed care, would not be included in an 1115 waiver. Federal managed care rules allow capitation payments to be made to a managed care organization (MCO) for a member aged 21 through 64 receiving inpatient treatment in an IMD if it is for psychiatric or SUD crisis residential services and the length of stay is no more than 15 days during the month of the capitation payment[4]. These services must also meet the requirements for 'in lieu of' services, meaning that the state has determined the IMD is medically appropriate and a cost effective substitute, the member is not required by the MCO to choose the IMD setting and the approved in lieu of services are considered in developing the component of the capitation rates that represents the covered services[5].
- There are a targeted number of IMD beds in the state that a waiver would open to Medicaid reimbursement. Also, since Medicaid is the only health care payer with a restriction on paying for IMD services and is the payer of last resort, other payers would pay before Medicaid.
- A waiver for IMDs would not expand eligibility or services. SUD and SMI/SED treatment can already be accessed by Medicaid members in settings not classified as IMDs. The only SUD treatment service that would be offered by an IMD is medically managed detoxification, which is a higher level of SUD treatment than most people need.
- Budget neutrality may be difficult to achieve, given the complex needs of the population who would be eligible for the waiver services, the infrastructure development requirements associated with the required goals and milestones, and the assumptions that are used to generate cost estimates. CMS monitors

[2] https://www.medicaid.gov/federal-policy-guidance/downloads/smd18009.pdf
[3] https://www.medicaid.gov/federal-policy-guidance/downloads/smd15003.pdf
[4] https://www.law.cornell.edu/cfr/text/42/438.6
[5] https://www.law.cornell.edu/cfr/text/42/438.3

budget neutrality throughout the demonstration period and performs a formal adjudication at the end of the demonstration period to determine whether a state's actual spending has remained within the specified limit. During demonstration approval, the state must agree to limit their receipt of federal financial participation to the amounts indicated in the budget neutrality test and to return any funds they receive above those limits to CMS[6].

- In two Human Services Research Institute studies pursuit of an IMD waiver was not a recommendation.
- The milestones required to be addressed by states that implement 1115 waivers are broad and would require significant development of the behavioral health continuum.
- The US Government Accountability Office (GAO) found[7] that selected states' evaluations of these demonstrations had widespread, significant limitations that affected their usefulness in informing policy decisions. The limitations included gaps in reported evaluation results for important parts of the demonstrations. CMS is attempting to strengthen evaluation requirements and hold states accountable for meaningful and timely 1115 evaluation requirements.

Examples

Colorado's SUD 1115 waiver

- 2018 started the process, 2021 completed the process
- 2 FTEs allocated; unclear others that contribute to supporting roles.
- ~$500,000 year 1 and year 2; year 1 of implementation $174 million (inpatient and residential treatment)
- Post-implementation $1.58 million for consultants and IT systems (annually)

Virginia's 1115 waiver on Community Engagement, Premiums and Wellness Accounts, Housing and Employment Supports for High Need Enrollees

- 3 FTEs working 100%; 9 total from Compass Division chart (housing analyst, employment analyst, data analyst, wellness accounts analyst, finance analyst, Senior Advisor, Senior Program Analyst, Senior Policy Analyst)
- Manatt as a consultant to write the waiver; cost $3.495 million for Manatt
- Timeline- 2018 to December 2019 but an added 6 months after that to implement. Negotiate with CMS on budget neutrality, implementation plan, and evaluation plan.

Peer Support and 1915i break down of criteria, services and expenditures.

2019-2021 Biennium

These estimates do not expand Medicaid eligibility levels, and assume Expansion is administered as Fee for Service. Must be eligible for Medicaid or Medicaid Expansion to be screened for Peer Support or 1915i services.

Offered to all Eligible individuals that meet qualifying criteria. Such as individuals with SUD, SMI and TBI who need suport to manage their condition. People with SUD, SMI and TBI can be difficult to connect with and reach by traditional health care providers, due to their living arrangements, distrust of traditional health care providers and other factors.

Available to individuals aged 18 and older and diagnosed with a mental health condition and/or substance use disorder and/or brain injury and currently experiencing one or more of the following needs-based criteria:

* Housing instability as demonstrated by homelessness or being at risk of homelessness
* Intensive service needs as demonstrated by past year use of:
  - Behavioral health-related inpatient hospital, State hospital, Behavioral health or brain injury-related long-term care facility/nursing home; Residential treatment services; Repeated (more than one) behavioral health-related emergency department in the past year; or Adults age 18 and older who were in treatment foster care in the past year
* Intensive forensic service needs as identified by criminal justice system involvement:
  - Repeated law enforcement contacts, Parole and probation, Jail and prison;
  - or Adults 18 and older involved in the juvenile justice system in the past year
* Any other significant functional limitations expected to result in homelessness, intensive service need, or justice involvement

The service offered through the **Peer Support** OAR is Peer Support and is not as comprehensive as the 1915i State Plan OAR proposed.

The services offered through the 1915i OAR are **service coordination, employment and education supports, housing supports, peer support, and wraparound supports**.

Peer Support OAR ONLY Funded

	Total	Peer Support for those not eligible for 1915i Services	1915i Peer support "Crossover"

HB 1012 – Behavioral Health

March 15, 2021

*See attachment dated 3.1.21
** See long sheet from 2019 Session

EPSDT Study

We are requesting an amendment for the North Dakota legislature to conduct a study to determine if North Dakota is fully implementing the Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) benefit under Medicaid, or as it is known in North Dakota, "Health Tracks." EPSDT provides comprehensive and preventive health care services for children under age 21 who are enrolled in Medicaid. EPSDT is key to ensuring that children and adolescents receive appropriate preventive, dental, mental health, and developmental, and specialty services. When EPSDT is fully implemented, it can provide children and families vital services, including access to medically necessary treatment.

Safe Beds

We would like safe beds to return to the Bismarck region. Safe beds are a safe place for a child to deescalate and function as an alternative to costly hospitalization. In the last year, safe beds were no longer available for children with mental health disorders in a mental health crisis. As a result, the only options many families have are: a) do nothing, b) hospitalize their child, c) call law enforcement.

Peer Support**

In the 2019 Session, Maggie Anderson presented information on peer support and the 1915(i) for SB 2012. As passed by the Legislature, the budget included peer support "for those not eligible for 1915(i) services" (a total of $304,784, half federal and half State) as well as separate funds for those 1915(i) eligible. While things are "moving" for the 1915(i), per Caprice Knapp, nothing is happening to implement peer support for those not 1915(i) eligible. When I asked her about this, she said, "I have no staff, no money, and no time". Individuals with mental illness have been advocating for peer support for years. This is a priority for them. Questions for DHS: 1) why has this not happened? 2) where is the money

money that was allocated? 3) what is funded for next biennium for peer support for non-1915(i) eligible individuals? 4) what about Legislative intent?

Family Support*

Contracts were reduced significantly in the executive version of HB 1012 for the Federation of Families for Children's Mental Health and Family Voices of ND. Some funds were restored by the House but these contracts are skimpy to begin with as is one of the Early Intervention programs, "Experienced Parents". This one is in the DD budget and was cut completely. All of these programs should be prioritized for continued full funding into 21-23. Families would be lost without them.

Supported Housing*

In the executive version of HB 1012, DHS decreased funding for Cooper House, LaGrave on First, Prairie Harvest, and Gerridee's. We believe DHS thought the individuals served would be eligible for the 1915(i) and could then draw down a federal match. The House restored some of the money. It has come to light that many, if not most, of these individuals will not be 1915(i) eligible. Without supported housing, many will be at risk and will not be successful living in the community. Full funding should be considered for these programs.

Autism Voucher

DHS put in a bill (SB 2089) to repeal the ASD Voucher with no discussion with the Governor's ASD Task Force. It removed all monies for the Voucher from HB 1012. Senate Human Services turned SB 2089 into a study but replaced the ~ $1.3 million with only $300,000. The Task Force opposes the repeal and submitted amendments to House Human Services to make the Voucher more family-friendly (also shared with Senate Appropriations - testimony by Holly Johnson). The Voucher should be funded at $1.3 million with the amendments from the Task Force. [NOTE: The population at the LSTC is now over 50% adults and youth with a diagnosis of autism.]

Supported Employment

We would like Supported Employment services for people with mental illness to have their budgets restored from the cuts that were slated under "1915(i) Savings." Supported Employment (SEP) services assist individuals to obtain and keep competitive employment at or above the minimum wage. Ongoing follow-along support is available for an indefinite period as needed by the individual to maintain their paid

competitive employment position. Individuals with serious mental illness rely on supported employment services so that they can maintain employment and can maintain living in the community. The proposed budget made significant cuts to those program areas, with some initial requests to eliminate entire programs. While some has been discussed to be restored to allow providers time to become Medicaid providers, it does not account for the fact that some of those individuals with serious mental illness will not meet the eligibility requirements of the 1915(i). We also want to make sure that individuals who receive supported employment services under the 1915(i) continue to receive ongoing and continuous SEP services as they earn and maintain their employment wages.

Voluntary Placement Dollars

We would like a restoration of the dollars allocated to the Voluntary Treatment program. The Governor's proposed budget cuts the voluntary treatment program from its previous budget of $533,440 to a proposed 2021-2023 budget of $453,424. With the creation of the voluntary treatment program, parents were no longer required to relinquish custody of their children in order to receive treatment that would be provided in that residential treatment facility. During the last legislative session, the voluntary treatment program was given the flexibility to provide services to children in order to prevent an out-of-home placement. The voluntary treatment program is essential in families being able to maintain custody of their children and provide linkages to community-based services.

State Hospital

As Dr. Etherington has shared, many studies have already been completed regarding building of a new State Hospital (see binder she gave Sen. Appropriations). All advocacy organizations that have taken a position on this matter are supporting the building of a new State Hospital in conjunction with 8-10 new behavioral health beds in the western part of the State. Dr. Etherington has shared a funding plan that does not require new monies for this however, if a new facility is not built, there will be significant monies needed for repair and maintenance of existing buildings. Action is recommended to move forward with authorization of a new State Hospital.

1915(i) – Legis. intent language re WHODAS score (future)

We would like there to be legislative intent raised regarding the WHODAS score that is used to determine eligibility for services under the 1915(i) State Plan Amendment. We would like that the legislature direct the Department of Human Services to conduct multi-stakeholder

meetings (that include consumers and family members) to evaluate the WHODAS score threshold used to determine eligibility for services under the 1915(i) and lower the score, if necessary, to ensure individuals with Serious Mental Illness (SMI) and Serious Emotional Disturbance (SED) are not losing the invaluable services to meet their needs. This would also serve to benefit North Dakota as it seeks to maximize federal dollars in providing services to those in need.

Definition of Serious Emotional Disturbance (SED):

> A diagnosable mental, behavioral, or emotional disorder in the past year, which resulted in functional impairment that substantially interferes with or limits the child's role or functioning in family, school, or community activities.

-Approximate number of North Dakotans with SED (2019): 18,125.

Definition of Serious Mental Illness (SMI):

> Someone over 18 having (within the past year) a diagnosable mental, behavior, or emotional disorder that causes serious functional impairment that substantially interferes with or limits one or more major life activities.

-Approximate number of North Dakotans with SMI (2019): 30,258

-North Dakota 1915(i) Application set eligibility at a WHODAS score of 50 or above. With those parameters, the Department of Human Services anticipated that the number served between SUD, SED, SMI, TBI was 11,150.

Brain Injury Network*

Brain injury services and programs were cut significantly in the executive budget, some related to expected federal matches through the 1915(i). The House restored some of the funds noting the 1915(i) may not provide funding for many of the individuals. Still, ND has little in the way of services for individuals with a brain injury – any reductions will mean even less for supports. Relevant are the NDBIN, pre-vocational program, and the return to work program with a total reduction, after HB 1012 was passed by the House, of over a $¼ million. Consideration is requested to restore all of the funds cut for brain injury services and support.

It is suggested that, while giving DHS flexibility with funding items, there is also accountability for Legislative intent. Examples include the ASD Voucher; ASD training funds (the ASD Task Force did not know

there was $90,000+ for this); and peer support. Where has the money gone that was authorized for these things?

The Arc North Dakota

HOUSE 1012-DHS BUDGET PUBLIC TESTIMONY FUNDING REQUESTS

HOUSE BILL 1012 – 67TH LEGISLATIVE ASSEMBLY OF NORTH DAKOTA

The information provided below was given during public testimony.

The Arc of North Dakota: The Arc of ND is asking for funding for the state hospital. Restore the 11 million for section 11 and continue the Life Skills and Transition Center's downsizing. Contact: Kirsten Dvorak –k.dvorak@thearcofbismarck.org

Designer Genes: Asked for the following Restore $260,000 ($100,000 State General Funds and $160,000 from Federal Part C grant) for Experienced Parent Program. Contact: Roxane Romanick- romanick@bis.midco.net

Family Voices of North Dakota (family Support): Restore the 15% (26,250) to $175,000 funding. Reinstate experience parent funding, do not move the autism voucher money to the autism waiver. Keep the independent living center funding as it passed in the house. In addition to restoring the North Dakota Federation of Families for Children's Mental Health to $11,250. Contact Donene Feist- fvnd@drtel.net

North Dakota Association of Community Providers (NDACP):

•Maintenance of the House's restoration of approximately eleven million dollars ($11,000,000) to provider rates for residential habilitation and intermediate care facilities for people with intellectual and developmental disabilities (ICFID), but also,

• Maintenance of the Governor's proposed two million, four hundred thousand dollar increase ($2,400,000) today support services such as individual employment, group employment, and prevocational services, with a matching reduction to Intermediate Care Facilities for People with Intellectual Disabilities (ICFID) and residential habilitation;

•Restoration of $240,000 in funding for mandated DD provider accreditation with the Council on Quality and Leadership (CQL);

•Inflationary increases to DD providers of 3% each year of the 2022 - 2023 biennium, especially due to economic and wage pressures in various communities;

•Maintaining the House's appropriation of up to $250,000 to NDDHS to financially stabilize DD providers disproportionately affected by the COVID-19 emergency — especially In-Home Support providers who suffered the most significant losses;

•Restoration of all cuts to Section 11 State General Fund services to people with DD who don't qualify for the DD Medicaid Waiver;

•Fully fund the 1915(i) Medicaid Amendment with special attention paid to ensure it remains accessible to people with DD/ID, and review of the proposed World Health Organization Disability Assessment Schedule threshold score of 50 — a very severe score;

•Fully fund reforms and behavioral health initiatives from the Life Skills and Transition Center;

•Retention of a substantial state tax credit to employers who hire North Dakotans with developmental disabilities and mental illness, in HB 1405 (2021). HB 1405 received a unanimous do-pass recommendation from Senate Finance and Taxation Committee on March 9, 2021.

Many members also support the restoration of funding for recreation and leisure centers with consideration of serving additional communities; a close review of the infant development and Part C budgets to ensure timely services can be brought to bear to minimize developmental delays; and strengthening of rates in related home and community-based services to North Dakotans with other kinds of disabilities — QSP services under Aging Services and for brain injury, as well as 1915(i) Medicaid Amendment behavioral health services.

NDACP is persuaded that building a new State Hospital as proposed in HB 1012 makes sense to move more mental health services to the community. It is challenging to move beyond brick and mortar legacies built by generations past, but it is probably time. NDACP Contact Bruce Murry-brucemurry@ndacp.org

Prepared by the Legislative Council staff
for Senator Mathern
March 12, 2021

ENGROSSED HOUSE BILL NO. 1012
LISTING OF PROPOSED CHANGES TO BILL REGARDING SUBSTANCE USE

Department of Human Services

Proposed funding changes:

	Description	FTE	General Fund	Special Funds	Total
* 1	Increase funding for substance use disorder programs from $15 million to $17 million as provided in the executive budget recommendation		$2,000,000		$2,000,000
	Total proposed funding changes		$2,000,000	$0	$2,000,000

Other proposed changes:

2 Create a DHS working group that includes substance use disorder providers to develop a program to establish residential substance use disorder programs utilizing up to $3 million of legacy fund earnings for substance use disorder residential programs in regions 1 and 8 which are eligible to utilize traditional Medicaid and Medicaid Expansion funding.

* 3 Provide for DHS to seek approval from the Centers for Medicare and Medicaid Services to allow substance use disorder programs to serve as qualified entities for the purpose of Medicaid presumptive eligibility under the traditional Medicaid and Medicaid Expansion programs. Require DHS to provide a report to the Legislative Management regarding the status of the approval and the adoption of administrative rules relating to the change.

* 4 Provide for community-based providers of ASAM level 2.5 services be increased to the same rate as hospital-based ASAM level 2.5 service providers within the Medicaid Expansion program.

5 Establish a moratorium for the 2021-23 biennium on residential substance use disorder providers that are not currently licensed in the state or have not been approved for voucher residential services.

* 6 Require DHS to apply for a Medicaid waiver to allow individuals between 21 and 65 years of age to be served in an institution for mental disease and be eligible for Medicaid funding. This may permit Medicaid payments for patients that receive treatment at the State Hospital.

7 Remove provisions added by the House to limit the amount of funding that may be distributed to residential substance use disorder service providers.

* 8 Declare items 2, 3, 5, and 6 to be an emergency measure.

* Items of agreement with providers that offer full range.

2021 SENATE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
3/25/2021
Department of Human Service Sub-Committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Dever opened the hearing at 3:59 PM.

Senators present: **Dever, Erbele, Hogue, Oehlke and Mathern.**

Discussion Topics:

- Public Private Partnerships (P3)
- Contracts for State Hospital
- Life Skills Transition Center management

Rosalie Etherington, Superintendent, North Dakota State Hospital – testified in favor and submitted testimony # 10777 and #10776.

Jake Terzo – JCI – testified in favor on Public Private Partnerships.

Sue Foerster, Director, Life Skills Transition Center – testified in favor.

Senator Dever closed the hearing at 5:06 PM.

Rose Laning, Committee Clerk

NEW TREATMENT CAMPUS

SENATE APPROPRIATIONS SUB-COMMITTEE

SENATOR DEVER, CHAIRMAN

NORTH DAKOTA STATE HOSPITAL

Rosalie Etherington, NDSH Superintendent

NORTH Dakota | Human Services

Be Legendary.™

PATHWAY TO A NEW TREATMENT CAMPUS

- Completed comprehensive asset assessment
- Identified deferred maintenance backlog costs
- Identified square footage requirements for new campus
- Identified financing options

STATE HOSPITAL DOWNSIZING

- 1950s – State Hospital size begins to reduce
- 1990s – Strategic measures to reduce state hospital size
- 1997 – 4 buildings transferred to prison
- 2001 – 4 buildings and function transferred to prison
- 2015 – 1 building and function transferred to prison
- 2019 – 1 building and function transferred to prison

COMPREHENSIVE BUILDING ASSESSMENTS

- 2017 – Unesco Facility Conditions Assessment
- 2019 – Prairie Engineering MEPS Replacement Costs
- 2020 – Sitelogiq Facilities Condition Update

ARCHITECTURAL ASSESSMENTS

- 2019 – BWBR Architect New Hospital Cost Estimates
- 2020 – BWBR Architect New Hospital Cost Estimates

MAINTENANCE COSTS EXCEED BENEFIT

- $148M deferred maintenance backlog for at-risk systems
- $38M immediate deferred maintenance for failing systems

PUBLIC/PRIVATE PARTNERSHIP

- P3 provides more staff savings
- P3 provides guaranteed building maintenance
- P3 reduces time between design, bid, and build
- P3 provides penalties for non-performance

North Dakota State Hospital Top Issues

Below is a list of assets that are at, or past, their useful life and are in need of replacement.

This list, although not comprehensive, highlights the majority of assets in **Alarm** conditions.

LaHaug Building

- Chiller, Cooling Tower, and Chilled Water pumps
- (11) Air Handling Units, original to 1982, serving the majority of the facility
- Electrical Distribution in the entire facility
- Security cameras throughout entire facility
- Carpet tiles and VCT flooring through most of the facility

GM Building

- Steam and condensate piping throughout entire facility
- Multiple Air Handling Units original to 1965
- Multiple Unit Ventilators original to 1965
- Temperature controls through entire facility
- Electrical Distribution in the entire facility
- Security cameras throughout entire facility

New Horizons Building

- Steam and condensate piping throughout entire facility
- Chiller, Cooling Tower, and Chilled Water pumps
- Domestic hot water heaters
- All Air Handling Units original to 1971, 1985, and 1987
- All Unit Ventilators original to 1968, 1971, and 1985
- Temperature controls through entire facility
- Electrical Distribution in the entire facility
- Exterior doors and windows for entire facility
- Interior carpet in hallways and offices
- Security cameras throughout entire facility

Learning Resource Center

- Temperature controls in rooms
- Exterior Doors
- Exterior bricks and mortar for the entire facility
- Security cameras throughout entire facility
- Carpet tiles and VCT flooring through most of the facility
- Interior doors through most of the facility

North Dakota State Hospital Issues (Caution)

Below is a list of assets nearing the end of their useful life and soon needing replacement.

This list, although not comprehensive, highlights the majority of assets in **Caution** conditions.

LaHaug Building

- (4) Air Handling Units, original to 1994 and 1997, serving isolation suites and basement
- Exterior doors, window, exterior bricks, and exterior concrete
- Roofs on the majority of the facility
- Interior carpet, doors and ceilings throughout entire facility
- Security cameras throughout entire facility

GM Building

- Hot water pumps and distribution piping
- Chilled water piping through entire facility
- Exterior doors, window, exterior bricks, and exterior concrete
- Fire alarm system serving the entire facility

New Horizons Building

- Chilled water piping through entire facility
- Roofs on the majority of the facility
- Exterior bricks, and exterior concrete
- Fire alarm system serving the entire facility
- Security cameras throughout entire facility

Learning Resource Center

- (2) Air Handling Units, original to 1991, serving 3rd floor
- Hot water pumps and distribution piping
- Steam distribution piping
- Chilled water piping through entire facility
- Electrical Distribution in the entire facility
- Roofs on the majority of the facility
- Exterior windows, and exterior concreate
- Fire alarm system serving the entire facility

The State Conducted Six Infrastructure Studies During the 2019-2021 Biennium for the North Dakota State Hospital

Key findings and take away are as follows:

The current State Hospital campus has disintegrated and surpassed maintenance efforts

$148 MILLION There is $148M of deferred maintenance backlog

Some buildings are condemned, and many are beyond repair

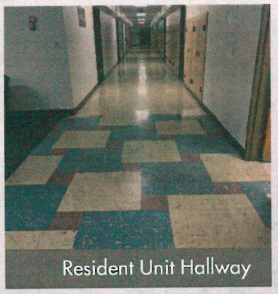
Current deferred maintenance funds are insufficient to keep up with demand

Three patient care buildings are old and inefficient and not designed for state-of-the-art care

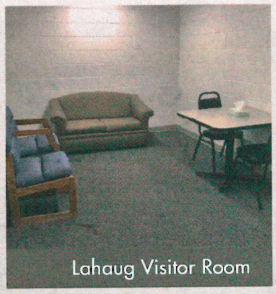
Underground tunnels are crumbling and require demolition

A new treatment campus designed to modern, healing standards improves patient safety and outcomes

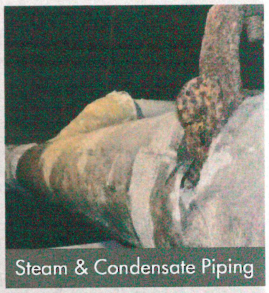
Speed healing and shorten hospital stays



Reduce physical barriers and improve safety technology for patients and team members



Provide for a more peaceful, tranquil setting and increase satisfaction for patients and team members



Create a one-building hospital, reducing total staff needed and improving energy efficiencies

The ND State Hospital
EST. 1885

ND Statehood
EST. 1889

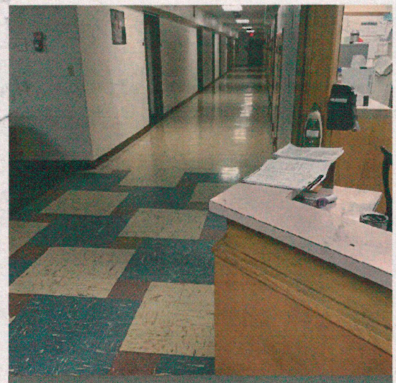
Resident Unit Hallway

Lahaug Visitor Room

Steam & Condensate Piping

The State Hospital plays a singular role in patient care as the only facility in North Dakota to serve as a:

- Psychiatric hospital
  - Serving jail inmates
  - Providing forensic assessment for court competency and criminal responsibility
  - Providing care to individuals found Not Guilty by Reason of Insanity
- Residential treatment facility for Sexually Dangerous Individuals
- Psychiatric hospital and residential facility providing court-ordered services as condition of bond or in lieu of prison
- Acute psychiatric hospital for the Jamestown and Devils Lake regions



The DOCR is interested in taking ownership of LaHaug. Collaboration with DOCR (Department of Corrections and Rehabilitation) is underway to conduct an architectural analysis of Lahaug for repurpose to a prison.

DID YOU KNOW?

The state hospital also serves as the secondary hospital for six ND regions, accepting patients from other hospitals for specialized treatment response.

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
3/31/2021
Department of Human Services Sub-committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Dever opened the hearing at 10:38 AM.

Senators present: **Dever, Erbele, Hogue, Oehlke and Mathern**.

Discussion Topics:

- One-year extension on resolution – CFS
- Foster Care
- Target Case Management – Maintenance rates
- Eligibility for services

Blair Thoreson, representing Nexus-PATH – testified in favor.

Clete Winkelmann, Executive Director, Nexus-PATH – testified in favor.

Rachel Allison, Foster Parent – Nexus-PATH – testified in favor and submitted testimony #11182.

Jodi – Nexus-PATH director – testified in favor.

Arnie Strebe, CFO, DHS – introduced Caprice Knapp.

LeeAnn Thiel, Medicaid Payment and Reimbursement Services Division, Medical Services, DHS – testified in favor.

Cory Peterson, Children and Family Services, DHS – testified in favor.

Senator Dever submitted testimony #11194.

Trina Gress, Vice President, Community Options, Bismarck – testified in favor.

Rosalie Etherington, Superintendent, ND State Hospital – testified in favor and answered sub-committee questions.

Senator Dever closed the hearing at 11:53 AM.

Rose Laning, Committee Clerk

Testimony
House Bill 1012
Senate Appropriations Subcommittee
Senator Dick Dever, Chairman
March 31, 2021

Chairman Dever, members of the Senate Appropriations Subcommittee, I am Rachel Allison, a Foster Parent with Nexus-PATH in Minot, ND. Nexus-PATH is a member of Nexus Family Healing, providing child welfare and behavioral health services in ND. I am providing this testimony on HB 1012, and asking for delayed implementation of equalized Targeted Case Management (TCM) rates. This will ensure uninterrupted services for some of the most vulnerable children in our state.

I have been a foster parent with Nexus-PATH for the last 5 years. Over that time, I have worked with many children and their families. I have experienced the changing treatment needs of these children as well. We are being informed as the child welfare system changes and progresses in the state of North Dakota and we are working hard to provide our services where they are needed.

When a youth is placed in foster care with Nexus-PATH, there are many supports we as foster parents require due to the treatment needs the kids present. As foster parents, we rely heavily on our Nexus-PATH case managers for these supports. Not only do they help with the placement of the youth in our home, but they are aiding in the placement of this youth in a community. The case managers are often working to connect these youth with school districts, to connect them with medical and mental health services, to arrange family reunification activities such as visits, and to make sure they are receiving any and all services necessary for their treatment. The case managers are also providing support to us as foster parents by being available 24/7 for any emergency situations, helping us to arrange respite care so that we are able to attend trainings or just rejuvenate so we

can continue with our important work, as well as helping us stay current with all foster parent licensing requirements.

I understand that in mid-December of 2020, our agency received notification from DHS Medical Services Division that an equalization of rates was included in the Department's budget as submitted, and that equalizing all rates might have an impact on services we provide. I am here to tell you that the economic impact our agency would have would significantly impact the types of services I as a foster parent could provide. Our case managers would not be able to provide the level of services we have grown accustomed to if they were to be stretched thinner due to more demands, such as higher caseloads, which could be what Nexus-PATH has to do to respond to the lower TCM rate.

In addition, this comes at a time when the child welfare system is asking us to provide more intensive services in foster care, which isn't possible at a lower cost. As foster parents, we are always aware of the many youth awaiting placement in a Nexus-PATH home. Many of us look at foster parent recruitment as part of our calling, as we know more of us are always needed. I fear that if the support starts to look different, we could risk the retention of the homes we already have, meaning the youth would wait even longer for the services they need.

I am here to support the request of Nexus-PATH that your committee consider an amendment to HB1012 to delay implementation of the new lowered rate for a one-year period, to allow Nexus-PATH the opportunity to adjust its services in a way that will not negatively affect the services we provide or the retention of foster parents and staff.

Thank you for consideration of this request.

Treatment Foster Care

CURRENT STATE

Nexus-PATH
FAMILY HEALING

MAINTENANCE RATE
$7.8 MILLION

TCM $3.4 MILLION

$11.2 MILLION

2020 • 291 monthly average number of foster homes • 324 youth served

Treatment Foster Care

PROPOSED

Nexus-PATH
FAMILY HEALING

MAINTENANCE RATE
$7.8 MILLION

46% decrease

TCM $1.2 MILLION

$9,055,898

IMPACT

- Increase in the number of children our case workers are assigned to serve.
- Fewer supervisors to support social workers.
- Less resources to recruit new foster parents.
- Less resources to train and support current foster parents.

The foster parents below provided permission to list their name, address, email, and telephone number in support of this testimony and welcome questions you may have regarding their needs in order to maintain their service provision.

2021 SENATE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
4/1/2021
Department of Human Services Sub-committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Dever opened the hearing at 2:49 PM.

Senators present: **Dever, Erbele, Hogue, Oehlke and Mathern**.

Discussion Topics:

- Providers/Provider rates
- Moratorium
- ASAM Level
- Sunset clause on Medicaid expansion
- Presumptive Eligibility

Senator Dever presented the committee with testimony #11307 and #11305.

Pam Sagness, Director, Mental Health Division, Dept. of Human Services – testified in favor and answered questions of the sub-committee.

Senator Mathern presented amendment [LC 21.0271.02010] - #11308.

Caprice Knapp, Director, Medical Services, Dept. of Human Services – testified in favor and answered sub-committee questions.

Senator Mathern presented testimony #11311.

Jonathan Alm, Legal Advisor, Dept. of Human Services – testified neutrally and presented testimony #11314 and #11313.

Senator Dever closed the hearing at 4:32 PM.

Rose Laning, Committee Clerk

To: Dever, Dick D.
Subject: SUD Voucher Notes

SUD Voucher:

SUD Voucher total $17 million

- $2 million CARES Funds (expires Dec 2021)
- $4 million American Rescue Funds (expires 2024?)
- $11 million general fund (increase of $3 million from 19-21 biennium)

SUD Grants to expand service in underserved areas

- $3 million CARES funds to expand non-IMD services in underserved areas (expires Dec 2021)

SUD Voucher – other considerations

- Moratorium on new IMD residential providers and beds
- Cap on SUD Voucher IMD residential payments (House 30% on $12 million, DHS provided numbers for $17 million – 50% cap to cover 24 months)

These are the notes discussed in the meeting today. If you need any further numbers for consideration please let me know.

Page 11, after line 6, insert:

"**SECTION 17. SUBSTANCE USE DISORDER PROGRAM GRANTS - REPORT TO LEGISLATIVE MANAGEMENT.** Subdivision 2 of section 1 of this Act includes the sum of $3,000,000 for substance use disorder treatment grants. The department of human services shall develop an implementation plan for the distribution of the grant funding. The executive director of the department of human services shall appoint a committee that includes substance use disorder providers to advise the department on the development of the implementation plan. The implementation plan shall provide for the following:

1. A licensed substance abuse treatment program may apply for a competitive substance use disorder treatment voucher system grant.

2. To receive a grant, a licensed substance abuse treatment program must:

a. Submit an application in the form and manner prescribed by the department;

b. Enter a grant agreement with the department;

c. Use grant funds for a licensed substance abuse treatment program with fewer than seventeen beds in an underserved area, as determined by the department, in the state's substance abuse treatment system;

d. Use the grant funds to support the provision of substance use disorder treatment in underserved areas of the state's substance abuse treatment system;

e. Provide and disclose information needed to comply with the department's data collection requirements; and

f. Operate in compliance with grant requirements.

3. The department, within legislative appropriations, may distribute up to three grants under this section to licensed substance abuse treatment programs.

4. The department may recapture grant funds distributed to a licensed program found by the department to be out of compliance with the requirements established by the grant program.

Before January 1, 2022, the department shall report to the legislative management regarding the plan to distribute substance use disorder treatment grants."

Page 14, line 7, replace "17" with "15"

Page 14, remove lines 9 and 10

Renumber accordingly

STATEMENT OF PURPOSE OF AMENDMENT:

This amendment:

- Increases funding for the substance use disorder program from $15 million to $17 million.
- Adjusts the funding source for the program to provide that $14 million is from the general fund and $3 million is from federal funds.
- Provides for $3 million of program funding to be used for substance use disorder treatment grants.
- Provides for the department to appoint a committee that includes substance use disorder providers to advise the department on the distribution of substance use disorder treatment grants.
- Removes sections added by the House relating to substance use disorder voucher treatment grants and the amount of substance use disorder voucher funding that may be used for residential services.

Presumptive Eligibility & Medicaid Expansion PHP Rates

Chairman Dever & Members of the Committee,

On the behalf of non-hospital based providers in North Dakota, we are seeking parity with patient access and financial reimbursement in regards to presumptive eligibility and Medicaid Expansion 2.5/PHP Rates.

First, there are numerous providers throughout the state whom experience unnecessary 3-4 month wait times for enrollment in Medicaid and Medicaid Expansion. For example, providers like Heartview Foundation estimate that if all Medicaid and Medicaid Expansion eligible patients were enrolled immediately upon entering services, they would reduce their utilization of the SUD Voucher by $650,000 per year. Meanwhile Community Medical Services, the opioid treatment program in Minot and Fargo conservatively estimates they would reduce utilization of the SUD Voucher by $720,000 per year. By identifying the Opioid Treatment Providers as qualified entities for the process of presumptive eligibility, these entities are then capable of making enrollment determinations based on an individual's household income and other requirements. Presumptive eligibility serves a dual purpose of providing immediate access to needed health care services while putting people on a path to ongoing coverage.

Second, we ask for the Medicaid Expansion Amendment from the 2019 Legislative Session be enforced when it comes to consistent reimbursement rates across SUD providers. This was set to happen in 2019, but at the last minute the Department of Human Services subjectively adjusted the payment methodology and provided community based Partial Hospitalization Program/ASAM 2.5 with a different rate. Given there is no difference between hospital-based and community-based PHP programs in the North Dakota Medicaid Fee Structure, we would ask all community based programs be paid at the same rate as the hospital based programs within Medicaid Expansion.

We understand the Senate Appropriations Committee has many items to discuss, but these two simple changes have the opportunity to make a significant impact throughout the SUD industry.

Thank you for your time,

Ty Hegland

Page 9, after line 13, insert:

"**SECTION 16. AMENDMENT.** Section 50-11.1-14 of the North Dakota Century Code is amended and reenacted as follows:

50-11.1-14. Workforce development.

1. The department may establish a statewide system to build systematic early childhood workforce voluntary training which may include distance learning formats, a professional registry, certificates, and specializations.
2. The department may charge reasonable fees for all training and development courses to offset costs. All fees collected under this section must be paid to the department or the department's authorized agent and must be used to defray the cost of providing training and development courses to providers and staff members of early childhood services.

SECTION 17. A new subparagraph to subdivision l of subsection 1 of section 50-11.1-22 of the North Dakota Century Code as created by section 8 of House Bill No. 1416, as approved by the sixty-seventh legislative assembly, is created and enacted as follows:

A special education director;"

Page 11, line 2, remove the overstrike over "~~section is~~"

Page 11, line 4, after "~~section~~" insert "an open record"

Page 11, line 4, remove the overstrike over the period

Page 13, replace lines 13 through 28, with:

"**SECTION 33. EXEMPTION.** The sum of $750,000 from the general fund appropriated to the department for the purpose of providing suicide prevention grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the suicide prevention grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 34. EXEMPTION. The sum of $3,000,000 from the general fund appropriated to the department for the purpose of providing community behavioral health program to provide comprehensive community-based services for individuals who have serious behavioral health conditions in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the community behavioral health program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 35. EXEMPTION. The sum of $335,000 from the general fund appropriated to the department for the purpose of providing a grant to an entity to develop a hyperbaric oxygen therapy pilot program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the grant to an entity to develop a hyperbaric oxygen therapy pilot program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 36. EXEMPTION. The sum of $572,000 from the strategic investment and improvement fund appropriated to the department for the purpose of a roof replacement project at the state hospital in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the roof replacement project at the state hospital during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 37. EXEMPTION. The amount appropriated for the development of the electronic visit verification project in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the electronic visit verification project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 38. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly for any expenditures that exceed appropriated amounts as a result of utilization rates or reductions made in estimated reimbursement during the biennium beginning July 1, 2021, and ending June 30, 2023, if funding is not sufficient to pay actual expenses.

SECTION 39. STATE HOSPITAL TREATMENT CAMPUS.

1. The department of human services is authorized to contract for the construction of a new treatment campus on the property owned by the state of North Dakota, in Stutsman County, through a public-private partnership only if:
   a. The department of human services utilizes chapter 48-02.1 and have a private operator to build, transfer, and operate the facility through a development agreement on property owned by the state of North Dakota;
   b. It does not result in an identified net budget increase based on the appropriated amount received during the 2019-21 biennium for the state hospital and south central regional human service center;
   c. The department of human services retains the cottages for students and staff housing;
   d. The state of North Dakota retains the title to the buildings and real estate under the development agreement; and
   e. The department of human services retains the state hospital cemetery.
2. The treatment campus must include space for the operation of the south central regional human service center."

Page 14, after line 6, insert:

"**SECTION 41. REVISED PAYMENT METHODOLOGY FOR BASIC CARE FACILITIES - REPORT TO INTERIM COMMITTEE.** The department of human services shall develop a report for payment methodology revisions for basic care facilities that must include recommendations for:

1. Methods of reimbursement for basic care facility cost categories including direct care, indirect care, room and board, and property; and
2. The feasibility of standardizing payments for basic care facilities in the same peer group.

Before October 1, 2022, the department shall present the report to the assigned interim committee. The estimated costs related to the implementation of the payment methodology revisions must be included in the department's 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 42. FOUR-YEAR OLD PROGRAM – EARLY CHILDHOOD GRANTS - REPORT TO INTERIM COMMITTEE. Before October 1, 2022, the department of human services shall present a progress report to the assigned interim committee on four-year old program approvals, North Dakota early childhood council, and the early childhood grant for best in class four-year old experiences.

SECTION 43. TRANSFER OF EMPLOYEES. The department of human services may use the identified twenty-seven full-time equivalent child care licensing positions of the human service zone transferred to the department pursuant to chapter 391 of the 2019 Session Laws for child care licensing, quality control, and early childhood administration."

Page 14, line 7, replace "17" with "19"

Page 14, after line 10, insert:

"**SECTION 44. EXPIRATION DATE.** Section 6 of this Act is effective through June 30, 2029, and after that date is ineffective."

Page 14, line 11, replace "Section" with "Sections"

Page 14, line 11, after "3" insert "and 39"

Page 14, line 11, replace "is" with "and section 22 of Senate Bill No. 2086, as approved by the sixty-seventh legislative assembly, are"

Page 11, line 2, remove the overstrike over "~~section is~~"

Page 11, line 4, after "~~section~~" insert "an open record"

Page 11, line 4, remove the overstrike over the period

Page 13, replace lines 13 through 28, with:

"**SECTION 33. EXEMPTION.** The sum of $750,000 from the general fund appropriated to the department for the purpose of providing suicide prevention grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the suicide prevention grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 34. EXEMPTION. The sum of $3,000,000 from the general fund appropriated to the department for the purpose of providing community behavioral health program to provide comprehensive community-based services for individuals who have serious behavioral health conditions in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the community behavioral health program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 35. EXEMPTION. The sum of $335,000 from the general fund appropriated to the department for the purpose of providing a grant to an entity to develop a hyperbaric oxygen therapy pilot program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the grant to an entity to develop a hyperbaric oxygen therapy pilot program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 36. EXEMPTION. The sum of $572,000 from the strategic investment and improvement fund appropriated to the department for the purpose of a roof replacement project at the state hospital in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the roof replacement project at the state hospital during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 37. EXEMPTION. The amount appropriated for the development of the electronic visit verification project in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the electronic visit verification project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 38. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly for any expenditures that exceed appropriated amounts as a result of utilization rates or reductions made in estimated reimbursement during the biennium beginning July 1, 2021, and ending June 30, 2023, if funding is not sufficient to pay actual expenses.

SECTION 39. STATE HOSPITAL TREATMENT CAMPUS.

1. The department of human services is authorized to contract for the construction of a new treatment campus on the property owned by the state of North Dakota, in Stutsman County, through a public-private partnership only if:
   a. The department of human services utilizes chapter 48-02.1 and have a private operator to build, transfer, and operate the facility through a development agreement on property owned by the state of North Dakota;
   b. It does not result in an identified net budget increase based on the appropriated amount received during the 2019-21 biennium for the state hospital and south central regional human service center;
   c. The department of human services retains the cottages for students and staff housing;
   d. The state of North Dakota retains the title to the buildings and real estate under the development agreement; and
   e. The department of human services retains the state hospital cemetery.
2. The treatment campus must include space for the operation of the south central regional human service center."

Page 14, after line 6, insert:

"**SECTION 41. REVISED PAYMENT METHODOLOGY FOR BASIC CARE FACILITIES - REPORT TO INTERIM COMMITTEE.** The department of human services shall develop a report for payment methodology revisions for basic care facilities that must include recommendations for:

1. Methods of reimbursement for basic care facility cost categories including direct care, indirect care, room and board, and property; and
2. The feasibility of standardizing payments for basic care facilities in the same peer group.

Before October 1, 2022, the department shall present the report to the assigned interim committee. The estimated costs related to the implementation of the payment methodology revisions must be included in the department's 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 42. FOUR-YEAR OLD PROGRAM – EARLY CHILDHOOD GRANTS - REPORT TO INTERIM COMMITTEE. Before October 1, 2022, the department of human services shall present a progress report to the assigned interim committee on four-year old program approvals, North Dakota early childhood council, and the early childhood grant for best in class four-year old experiences.

SECTION 43. TRANSFER OF EMPLOYEES. The department of human services may use the identified twenty-seven full-time equivalent child care licensing positions of the human service zone transferred to the department pursuant to chapter 391 of the 2019 Session Laws for child care licensing, quality control, and early childhood administration."

Page 14, line 7, replace "17" with "19"

Page 14, after line 10, insert:

"**SECTION 44. EXPIRATION DATE.** Section 6 of this Act is effective through June 30, 2029, and after that date is ineffective."

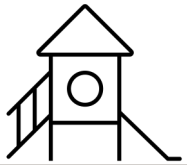
NORTH Dakota | Human Services



Be Legendary.™

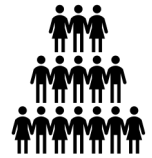
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment

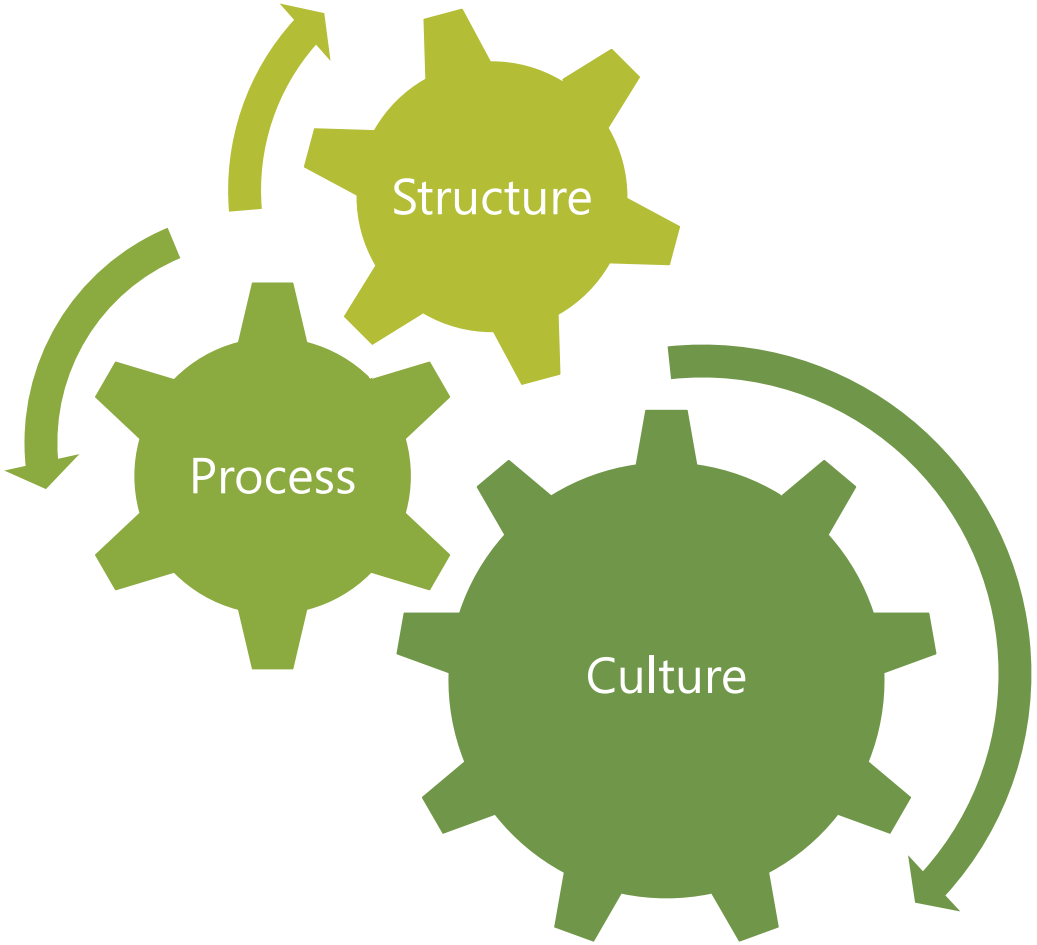


Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service



High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

IMPROVING PROGRAMS IS MORE THAN LOOKING AT STRUCTURE: Process and Cultural Change Must Accompany Structural Change

- 3 Core Areas
  - Process
  - Structure
  - Culture
- Focus is on service delivery to the client in the most effective and efficient way possible
- Seek to remove geographic, political and cultural boundaries to deliver smart, efficient and compassionate human services
- Primary Stakeholders
  - Individuals & Families
  - Taxpayers
  - Employees

FTE TRANSITIONS FROM COUNTY TO STATE

HCBS CASE MANAGERS

- Provide case management for older adults & individuals with physical disabilities receiving state and federally funded home and community-based services and basic care
- Became state employees 1/1/2020

Major Initiatives

- Specialized role of HCBS Case Manager
- Standardized training required for position
- Implemented a statewide centralized intake system for HCBS referrals and informed choice visits to ensure consumers understand their long-term service and support options
- 64 FTE provide support to 3057 unduplicated individuals
- Average 283 referrals and 54 new cases per month

CFS QUALITY ASSURANCE UNIT

SUPERVISOR: LEANNE MILLER

Continuous Quality Improvement Efforts (TBD in 2021)

Facility Licensure Visits

Case Record Reviews

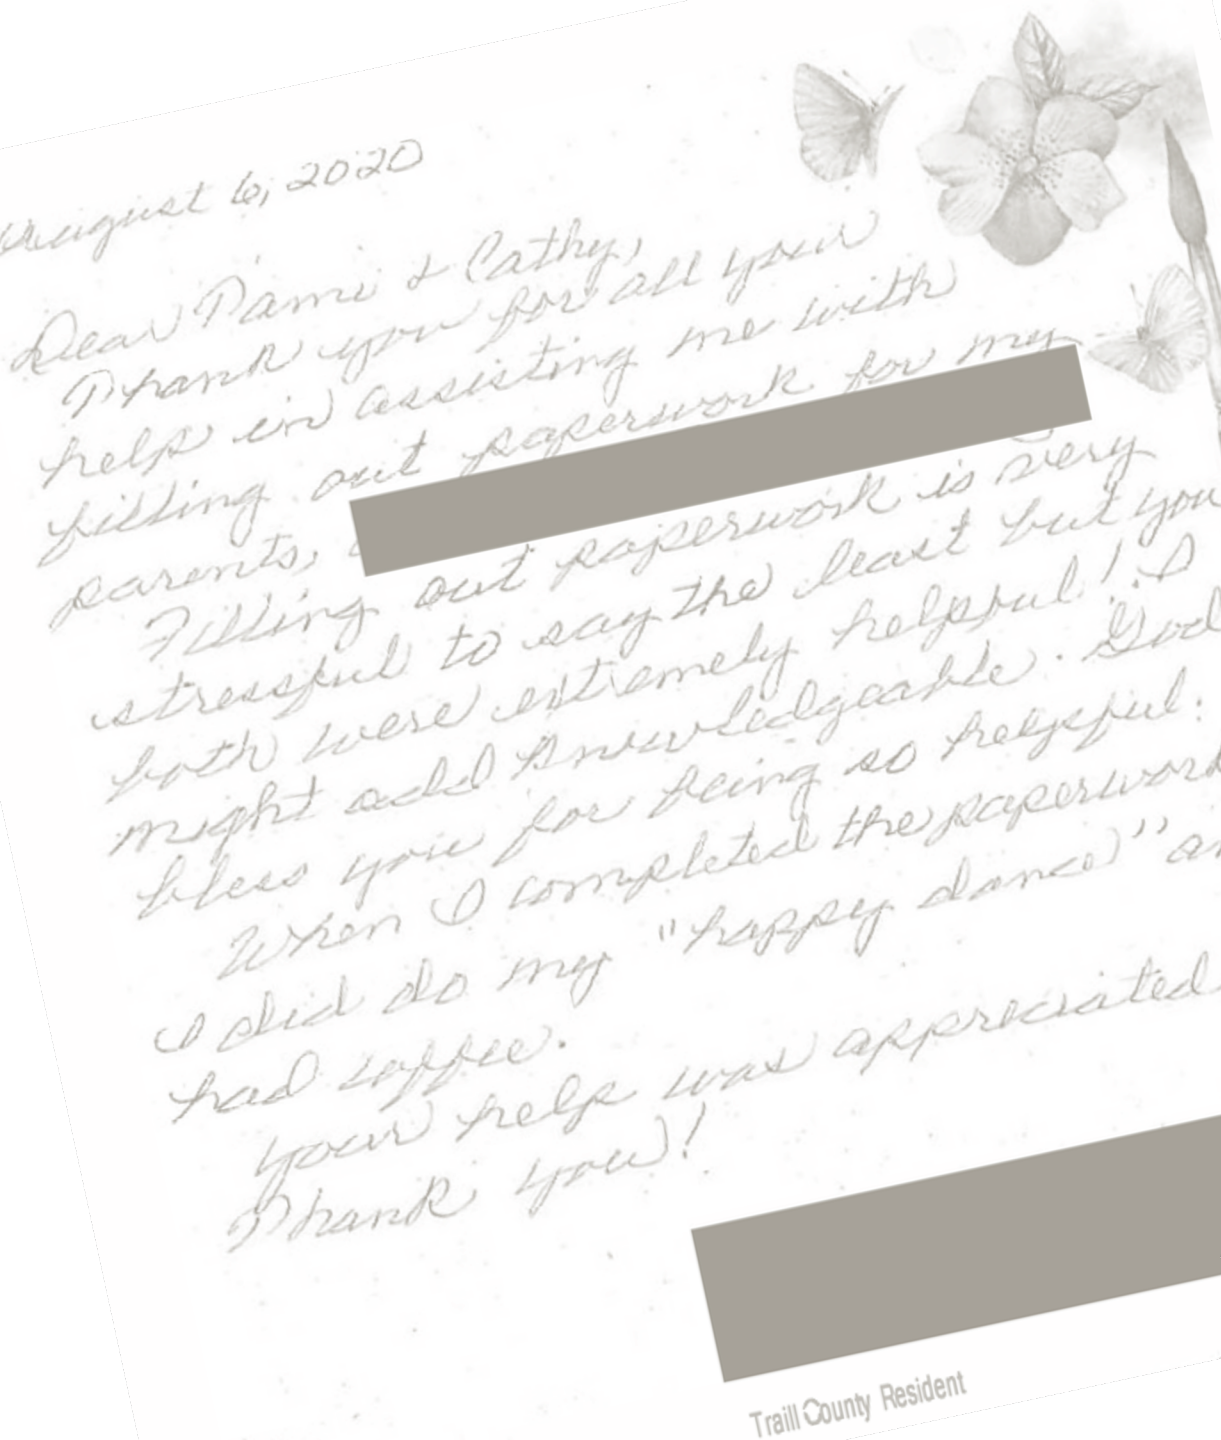
Child & Family Service Reviews

Safety, Permanency, and Well-Being

EARLY CHILDHOOD SERVICES UNIT

2020 Big Wins

- Childcare Licensors are now state employees
- Made progress on the Early Childhood Services (ECS) online application system



Goals for 2021

- Successfully complete the Child Care and Development Fund (CCDF) Monitoring Visit in Spring 2021
- Continue to work towards completion of the Early Childhood Services (ECS) online application system

MEDICAID LONG TERM CARE ELIGIBILITY UNIT

- Processed and maintain LTC Medicaid applications according to federal timeliness standards
- 16 FTE transferred from Human Service Zones
- Established Q1 2020
- Went live May 11, 2020

August 6, 2020

Dear Pami & Cathy,

Thank you for all your help in assisting me with filling out paperwork for my parents, [redacted]

Filling out paperwork is very stressful to say the least but you both were extremely helpful! I might add knowledgeable. God bless you for being so helpful: When I completed the paperwork, I did do my "happy dance" and had coffee.

Your help was appreciated.

Thank you!

[redacted]

Traill County Resident

12-11-20

Dear Ms. Brevik

This is just a quick note to say THANK YOU for your compassionate demeanor in handling our case.

It was a much needed emphatic ear you gave me on the phone at a time of my peak stress over this unexpected "review" matter. Such an attitude is very rare in my experience.

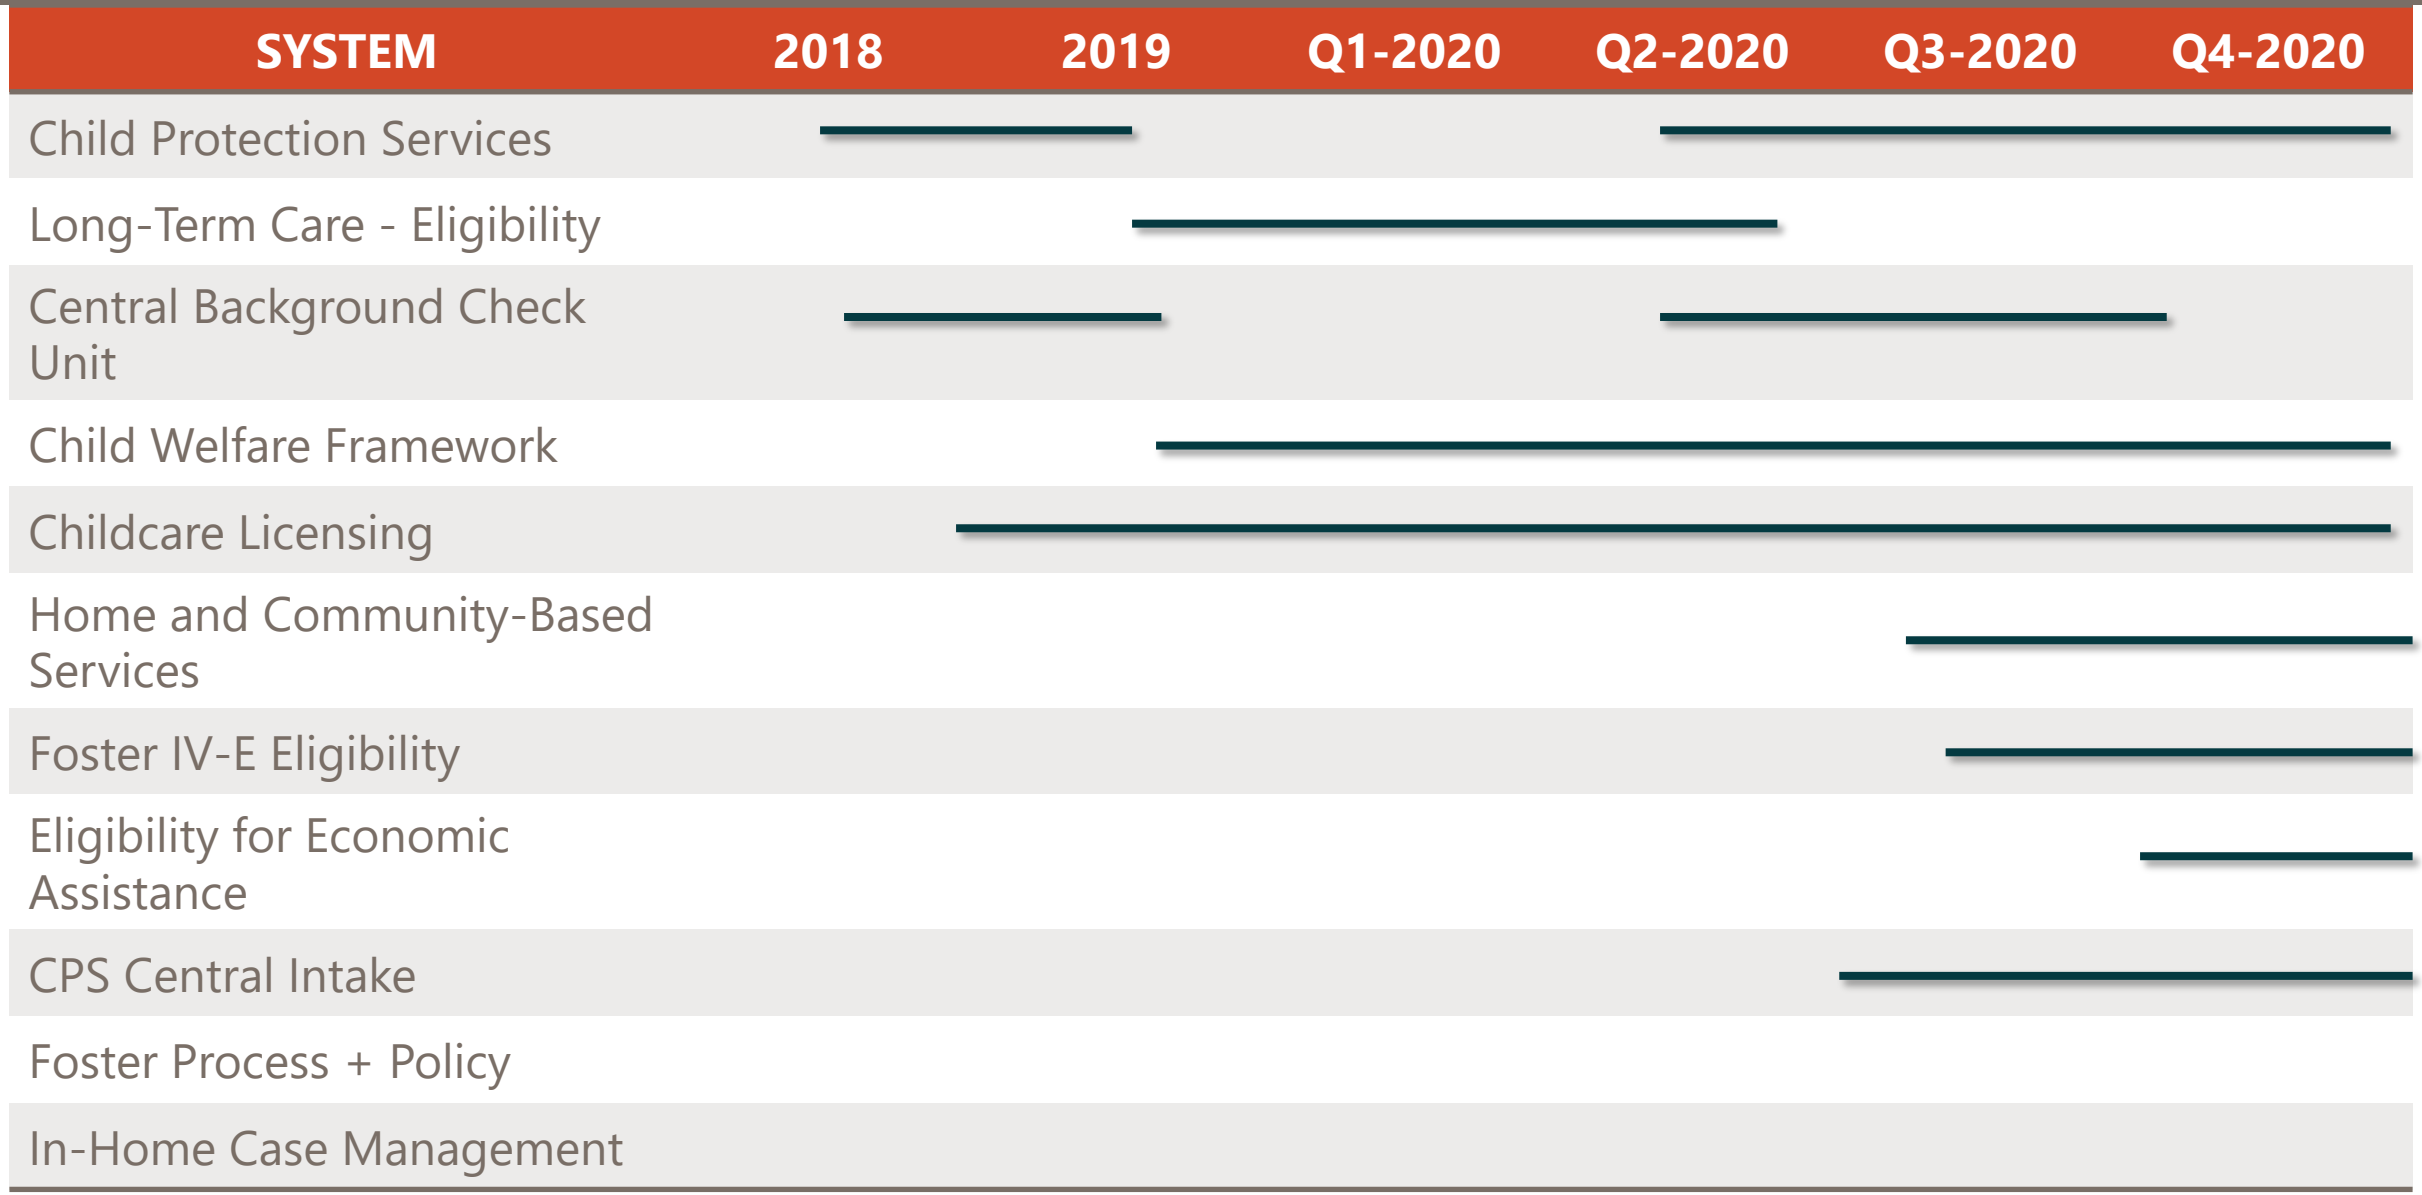
Happy Holidays

Sincerely

Pierce County Resident

FOSTER ELIGIBILITY + SUB ADOPT

- Authorized for 14 FTE to transfer from the HSZ to the State for a specialty foster eligibility unit
- Authorized for 2 FTE to transfer from the HSZ to the state to support subsidized adoption negotiation
- Unit launches in March 2021
- Will process all foster eligibility, Medicaid determinations for all foster and adopted children and negotiate subsidy for special needs adoptions



FOSTER CARE LICENSING

- SB2086 Request for up to 16 FTE to for a specialized foster care licensing unit to provide foster care licensing and renewals to foster homes in ND
- Create consistency and a leveled approach to managing foster licenses

IN PROGRESS

- Request for 16 FTE to transfer from the county to state to form a specialty foster care licensing team
- Consistent indigent burial criteria
- Consistent General Assistance policies, criteria and appeals process
- Study for zones to opt into State employment

SYSTEM REDESIGN TIMELINE

EQUITY ADJUSTMENTS

Zone Directors	Compensation equity to align all zone directors within the range
Zone Employee Benefits	Employees shifting to host county benefits which were often more robust
Zone Transfers to State Team	140 FTE that transferred to state were made whole if moving to state caused them to go backwards in salary and benefits

HUMAN SERVICE ZONES
Overview of Budget Changes

Description	2019-2021 Budget	Increase/ (Decrease)	2021-2023 Executive Budget	Increase/ (Decrease)	2021 - 2023 budget to Senate
Salaries and Benefits	24,186,262	2,934,739	27,121,001	(72,545)	27,048,456
Operating	4,621,302	(432,412)	4,188,890	-	4,188,890
Grants	144,892,436	956,411	145,848,847	13,065,322	158,914,169
Total	173,700,000	3,458,738	177,158,738	12,992,777	190,151,515

Federal Funds	-	1,176,874	1,176,874	-	1,176,874
Other Funds	173,700,000	958,641	174,658,641	13,004,276	187,662,917
Total	173,700,000	3,458,738	177,158,738	12,992,777	190,151,515
Full Time Equivalent (FTE)	140.00	0.00	143.00	0.00	143.00

ZONE FUND BALANCES

- Fund balances are reported in January of each year.
- Anything above the fund balance limitation is reduced in the June payment of the following year. Note there were no fund balance reduction in CY 2020.
- If the payment provided to the HSZ to defray costs to provide Human Services, the HSZ would then utilize fund balances.
- HSZ must utilized the full balance of their human service zone human services fund before requesting additional dollars from the Department.
- It is anticipated fund balances will be exhausted in 21-23.

Estimated Fund Balances	In Millions
CY 2020 Beginning Balances Report by HSZ	$10.30
Estimated Beginning Fund Balances Ending CY 2020	$15.02
Less: Estimated Fund Balance Reduction CY 21	$8.85
Remaining Fund Balance CY 21	$6.18

	19-21	21-23
Expenditures > $2,000,000	$500,000	$500,000
Expenditures < $2,000,000	$100,000	$250,000

Krista Fremming, Deputy Director, Medical Services, Dept. of Human Services – testified in favor.

Kirsten Dvorak, Executive Director, The Arc of ND – testified in favor.

Pam Sagness, Director, Behavioral Health, Dept. of Human Services – testified in favor.

Senator Dever closed the hearing at 11:03 AM.

Rose Laning, Committee Clerk

	Topic	Division	Has Sub-committee had discussion?	Follow-up provided (as of 4-5-21)	Further Sub-Committee action needed?	Notes
4	Dementia Services	Aging			Comm preference	DHS requires no further discussion; nothing further has been provided
9	Senior Nutrition Funding	Aging			Comm preference	Watch for overlap with HB1395
6	Experienced Parent	DD			Comm preference	DHS requires no further discussion; nothing further has been provided
10	Section 11 Funding – Residential & Vocational Supports	DD			Comm preference	
11	Accreditation costs for DD Licensure – Council on Quality Leadership	DD			Comm preference	
13	Corporate Guardianship – 10 additional slots	DD			Comm preference	
26	Recreation and Leisure Center funding restoration	DD			Comm preference	
15	COVID – 19 Emergency Funds for DD providers	DD			DHS follow up needed	Jess/Tina will follow up with a summary of this issue
35	Crisis beds in Region 7	HSC			DHS follow up needed	Rosalie gathering info re safe beds (utilization, options)
7	Autism Voucher – SB 2089	Med Svc	x		DHS follow up needed	Need to provide Brady with info on how to reflect in budget; Still need $300,000 reflected on the appropriation line for the voucher as all the money is in the waiver
5	Provider Rates	Med Svc			DHS follow up needed	Still need to provide Brady with numbers based on 1.5% and 2%; Ready to send to Brady
19	SUD Voucher Funding	BHD	x		Need direction from committee	
12	Brain Injury – Pre-Voc & Return to Work	BHD / HSC	x		Need direction from committee	
34	Family voices	CFS			Need direction from committee	Previous testimony restored to 85% (contract)
29	Interpreter Services for Medicaid Providers	Med Svc			Need direction from committee	SB 2205 failed to pass, cost would have been 249,600 general funds and 249,600 other funds
30	Additional FTE for Behavioral Health	Med Svc / BHD / EA			Need direction from committee	External request for BHD grant writer; DHS will provide estimate

	Topic	Division	Has Sub-committee had discussion?	Follow-up provided (as of 4-5-21)	Further Sub-Committee action needed?	Notes
16	Simle Middle School Pilot Project	BHD	x		No action needed / Done	
18	Moratorium on new SUD Providers	BHD	x	amendment provided to Brady	Ready for Vote	
20	Funding for new SUD providers in rural areas	BHD	x		Ready for Vote	
21	Sunset clause on SUD Vouchers (Medicaid Expansion)	BHD	x		Ready for Vote	Completed, there is no sunset clause. Committee removed sunset clause on Medicaid expansion
8	Early Childhood Education – HB 1416 & 1466	CFS	x		Ready for Vote	
28	Child Support – funding & FTE's	CS	x		Ready for Vote	
32	Zone reserve funds	HSZ	x		Ready for Vote	
33	Zone employee compensation	HSZ	x		Ready for Vote	
14	Decreased census at LSTC – Need for additional transition funding?	LSTC	x		Ready for Vote	
25	Transfer of land at LSTC for Fire Training Center	LSTC	x		Ready for Vote	DHS reviewed language in amendment; language is appropriate
27	Funding for Psychiatrist for LSTC	LSTC	x		Ready for Vote	
22	ASO Study	Med Svc	x		Ready for Vote	Removed section from EHB 1012
17	ASAM Level 2.5 Services reimbursement	Med Svc / BHD	x	amendment provided to Brady	Ready for Vote	
23	Presumptive Eligibility	Med Svc / BHD / EA	x	DHS provided est to add FTE	Ready for Vote	
1	Therapeutic Foster Care TCM Rates	Med Svc / CFS	x	DHS provided est of delayed rate adj	Ready for Vote	
24	State Hospital	SH	x		Ready for Vote	Have info needed in the Amendment
3	Supported Employment	HSC	x		Tues/Thurs (preferred)	Rosalie has further analysis on funding sources; working on mtg with CommOpt (Mon?)
2	Permanent Supportive Housing	BHD / HSC	x	DHS provided requirement language to Brady	Tuesday	Requested conversation from Rosalie on Gerridee/Prairie Harvest; considering two funding formulas
31	Centers for Independent Living	VR			No action needed / Done	No further information from DHS; funds were restored in House

2021 SENATE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
4/8/2021
Department of Human Services Sub-committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Dever opened the hearing at 9:08 AM.

Senators present: **Dever, Erbele, Hogue, Oehlke and Mathern**.

Discussion Topics:

- Overview of the Legislative Council Amendments
- Demolishing Buildings
- Developmental Disabilities Waivers
- Firetruck at State Hospital

Senator Dever gave an overview of the bill.

Brady Larson, Legislative Council – handed out a Listing of Proposed Changes to Engrossed Bill HB 1012 - #11446 and #11448.

Senator Mathern presented testimony #11447. He also presented and explained amendment LC 21. 0271.02020 - #11453.

Rosalie Etherington, Superintendent, ND State Hospital – answered sub-committee questions.

Tina Bay, Medical Services, DHS – answered sub-committee questions and submitted #11459.

Jonathan Alm, Legal Services, DHS – providing neutral testimony

Caprice Knapp, Director, Medical Services, DHS – answered sub-committee questions and submitted testimony #11460.

Bruce Murry, Executive Director, ND Association of Community Providers – answered sub-committee questions.

Theresa Larsen, Director, Protection and Advocacy Project – answered sub-committee questions.

Arnie Strebe, Chief Administrative Officer, DHS – answering sub-committee questions.

Senator Dever closed the hearing at 11:24 AM.

Rose Laning, Committee Clerk

The suggestion would be to replace Section 22 with:

SECTION 22. EMERGENCY STABILIZATION GRANTS – DEVELOPMENTAL DISABILITIES WAIVER.

1. Subdivision 2 of subsection 1 of this Act includes the sum of $125,000 from the general fund for the purpose of providing emergency stabilization grants to developmental disability in-home support providers to support the sustainability of newly licensed providers within the developmental disability provider network. To be eligible to receive an emergency stabilization grant, a licensed developmental disability in-home support provider must be in operation as of October 1, 2020, with an initial license date of October 15, 2015 or later, and comply with grant requirements established by the department of human services. The requirements of chapter 54-44.4 do not apply to the selection of a grantee, the grant award, or payments made under this section.
2. The department of human services shall include in-home support providers in future appendix K applications, to allow eligibility for retainer payments in a manner equivalent to day support services.

Fire Truck Amendment

SECTION 3. APPROPRIATION - 2019-21 BIENNIUM - DEPARTMENT OF HUMAN SERVICES - FIRE PROTECTION AGREEMENTS - EXEMPTION. There is appropriated out of any moneys in the department of human services operating fund in the state treasury, not otherwise appropriated, the sum of $333,333, or so much of the sum as may be necessary, to the department of human services for the purpose of providing a grant to a ~~political subdivision for the state share of costs relating to the purchase of a fire truck~~city that is located in a county of less than 25,000 individuals and provides prevention and extinguishment of fires at the North Dakota state hospital, for the period beginning with the effective date of this Act and ending June 30, 2021. The funding appropriated in this section is a one-time funding item. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section. The department of human services ~~shall discontinue any agreement with a political subdivision for fire protection services and~~ may not enter any future agreement with a political subdivision for fire protection services.

11448 & 11447

Prepared by the Legislative Council staff
for the HB 1012 Subcommittee
April 6, 2021

HOUSE BILL NO. 1012

Cost of Services for People with Intellectual and Developmental Disabilities

The North Dakota Department of Human Services pays for a continuum of services for individuals with intellectual and developmental disabilities. Costs reflect the statewide average cost of the continuum of care, from institutional level of care at the Life Skills and Transition Center (LSTC), which serves people whose needs exceed community capacity, to community-based services.

Life Skills and Transition Center (LSTC)

The LSTC is a service provider in the North Dakota Developmental Disabilities Provider continuum of services.

- LSTC Services include: Traditional (ICF) Services, Home and Community-Based Services and Statewide Crisis and Support Services.
- All other community living options are explored prior to an admission to the LSTC.
- The future role of the LSTC is to be the crisis and stabilization center for people with DD/ID.

Current Daily Cost: $1,123.78/day

Costs include:

- Room
- Board
- Therapies provided on-site by staff (physical therapy, occupational therapy, speech/language therapy)
- Psychiatric services
- Clinical psychology and Applied Behavior Analysis services
- Pharmacy
- Lab and x-ray
- Medical services on site provided by a medical provider
- Dental services
- Nutrition services
- Recreational therapy
- Adaptive equipment
- Day activities
- Transportation
- Vocational activities
- Clothing and incidentals
- Staff supervision and direct support services

DEVELOPMENTAL DISABILITIES SERVICES IN THE COMMUNITY

The following services are provided by private licensed developmental disability service providers.

Intermediate Care Facility ICF/IID

- Highest level of services provided outside of the state institution and is still considered an institutional setting.
- Provides comprehensive and individualized health care and rehabilitation services to participants to promote their functional status and independence. This is for people who need 24-hour care.

Current average daily rate:

- Adult: $605.19/day
- Child: $713.99/day

Costs include:

- Room
- Board
- Day programs (day supports or employment services), and some medical items
- Therapies provided on-site by staff (occupational therapy, speech/language therapy)
- Staff time to provide supervision and habilitative care
  - NOTE: Rate does NOT include direct health-related costs (i.e. dental, pharmacy…)

Residential Services (waiver program)

- Designed to assist participants with socialization, self-help and adaptive skills that improve the participants ability to independently reside and participate in an integrated community.

Current average daily rate: $298.64/day

Cost include:

- Staff time to provide supervision and habilitative care

Cost DOES NOT INCLUDE:

- Room
- Board
- Day programs (day supports or extended services) and medical items
- Direct health-related costs (i.e. dental, pharmacy…)

In-Home Supports (waiver program)

- Designed to assist participants with activities of daily living, supervision and provide support to the primary caregiver while living in their family home.

Current rate: $36.41/hour

Cost include:

- Staff time to provide supervision and habilitative care

Cost <u>DOES NOT</u> INCLUDE:

- Room
- Board
- Day programs (day supports or extended services) and medical items
- Direct health-related costs (i.e. dental, pharmacy…)

Day Services (waiver program)

- Provides formalized training and staff support in a non-residential setting to promote skill development. Services should facilitate and foster community participation as identified in the participants plan.

Current average rate: $23.80/hour

Cost include:

- Staff time to provide supervision and habilitative care

2021 SENATE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
4/9/2021
Department of Human Services Sub-committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services.

Senator Holmberg opened the committee work at 8:33 AM.

Senators present: **Holmberg, Krebsbach, Wanzek, Bekkedahl, Poolman, Erbele, Dever, Oehlke, Rust, Davison, Hogue, Sorvaag, Mathern, and Heckaman.**

Discussion Topics:

- Explanation of the amendment
- Building new State Hospital
- Application of Federal match for IMD dollars

Senator Dever presented and moved amendment LC 21.0271.02001 - #11478.
Senator Oehlke second.

Brady Larson, Legislative Council – providing neutral testimony.

"**SECTION 13. PERMANENT SUPPORTIVE HOUSING GRANTS.** Subdivision 2 of section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department, and authorize the department to conduct onsite visits to review program operations.

SECTION 14. EMERGENCY STABILIZATION GRANTS - DEVELOPMENTAL DISABILITIES WAIVER.

1. Subdivision 2 of subsection 1 of this Act includes the sum of $125,000 from the general fund for the purpose of providing emergency stabilization grants to developmental disability in-home support providers to support the sustainability of newly licensed providers within the developmental disability provider network. To be eligible to receive an emergency stabilization grant, a licensed developmental disability in-home support provider must be in operation as of October 1, 2020, with an initial license date of October 15, 2015, or later, and comply with grant requirements established by the department of human services. The requirements of chapter 54-44.4 do not apply to the selection of a grantee, the grant award, or payments made under this section.

2. The department of human services shall include in-home support providers in future appendix K applications, to allow eligibility for retainer payments in a manner equivalent to day support services.

SECTION 15. REFUGEE RESETTLEMENT SERVICES. Subdivision 2 of section 1 of this Act includes the sum of $6,069,408 of federal funds for the refugee resettlement program. The department of human services shall establish and implement a plan that resettles at least twenty-five percent of new refugees in locations in the state outside of the three most populous counties. If the department, in consultation with applicable federal and private placement agencies, determines the goal of resettling at least twenty-five percent of refugees outside the three most populous counties is not achievable, the department shall discontinue the resettlement process for refugees and the federal funds identified in this section may not be expended for any purpose.

SECTION 16. TRANSITION OF INDIVIDUALS FROM LIFE SKILLS AND TRANSITION CENTER. Subdivision 2 of section 1 of this Act includes the sum of $5,200,000 from federal or other funds made available to the department for the transition of individuals from the life skills and transition center to community-based providers. To be eligible to receive funding under this section, a provider must accept an individual who has a regular admission to the life skills and transition center and is being discharged, must ensure that all service needs are met including vocational services, and must implement a policy to not decline to provide services in the future to any individual being served under this section."

Page 7, replace lines 15 through 19 with:

"SECTION 18. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:

   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.

   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.

   c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the

addition of coverage consistent with the traditional Medicaid 1915i state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care."

Page 8, remove lines 19 through 31

Page 9, replace lines 1 through 13 with:

"**SECTION 20. AMENDMENT.** Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, ~~and~~ hospital- or medical clinic-based programs for medical management of withdrawal, and any institution for mental diseases in accordance with subsection 2.

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular

emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

SECTION 21. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, hospital- or medical clinic-based programs for medical management of withdrawal, and any institution for mental diseases in accordance with subsection 2.

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

4. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. No more than fifty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 22. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Behavioral health bed management system.

The department shall establish and maintain a behavioral health bed management system to improve utilization of behavioral health bed capacity. Public and private providers of residential or inpatient behavioral health services shall participate in and report daily to the department the information and documentation necessary to maintain the behavioral health bed management system in the form and manner prescribed by the department.

SECTION 23. AMENDMENT. Section 50-11.1-14 of the North Dakota Century Code is amended and reenacted as follows:

50-11.1-14. Workforce development.

1. The department may establish a statewide system to build systematic early childhood workforce voluntary training which may include distance learning formats, a professional registry, certificates, and specializations.

2. The department may charge reasonable fees for all training and development courses to offset costs. All fees collected under this section must be paid to the department or the department's authorized agent and must be used to defray the cost of providing training and development courses to providers and staff members of early childhood services.

SECTION 24. A new paragraph to subdivision I of subsection 1 of section 50-11.1-22 of the North Dakota Century Code as created by section 8 of House Bill No. 1416, as approved by the sixty-seventh legislative assembly, is created and enacted as follows:

A special education director;"

Page 11, line 4, remove the overstrike over the period and insert immediately thereafter:

"**SECTION 27.** A new section to chapter 50-24.1 of the North Dakota Century Code is created and enacted as follows:

Interpreter services.

Medical assistance coverage, including Medicaid expansion, must include payment for sign and oral language interpreter services for assistance in providing covered health care services to a recipient of medical assistance who has limited English proficiency or who has hearing loss and uses interpreting services. The department shall adopt rules to implement this section."

Page 11, after line 13, insert:

"**SECTION 30. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER.** The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton fire department. The department of human services may convey a parcel of land, 7.45 acres, more or less, located in part of lot 1, block 1, state school first addition to the city of Grafton, which is located within the southwest ¼ of the southwest ¼ of section 13, township 157 north, range 53 west, on the terms and conditions determined appropriate by the department and attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance."

Page 11, remove lines 23 through 28

Page 12, line 3, replace "4" with "5"

Page 13, replace lines 13 through 18 with:

"**SECTION 41. EXEMPTION.** The sum of $750,000 from the general fund appropriated to the department of human services for the purpose of providing suicide prevention grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the suicide prevention grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 42. EXEMPTION. The sum of $3,000,000 from the general fund appropriated to the department of human services for the purpose of providing a community behavioral health program to provide comprehensive community-based services for individuals who have serious behavioral health conditions in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the community behavioral health program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 43. EXEMPTION. The sum of $335,000 from the general fund appropriated to the department of human services for the purpose of providing a grant to an entity to develop a hyperbaric oxygen therapy pilot program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the grant to an entity to develop a hyperbaric oxygen therapy pilot program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 44. EXEMPTION. The sum of $572,000 from the strategic investment and improvements fund appropriated to the department of human services for the purpose of a roof replacement project at the state hospital in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the roof replacement

project at the state hospital during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 45. EXEMPTION. The amount appropriated for the development of the electronic visit verification project in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the electronic visit verification project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 46. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly for any expenditures that exceed appropriated amounts as a result of utilization rates or nursing home costs associated with the establishment of the new rate structure as provided in House Bill No. 1090 during the biennium beginning July 1, 2021, and ending June 30, 2023, if funding is not sufficient to pay actual expenses.

SECTION 47. REPORT TO LEGISLATIVE MANAGEMENT - EARLY AND PERIODIC SCREENING, DIAGNOSTIC, AND TREATMENT PROGRAM. During the 2021-22 interim, the department of human services shall conduct a study of the early and periodic screening, diagnostic, and treatment program and prepare a report. The department of human services may contract with a consultant to assist in the study and the preparation of the report. The report shall include data on the number, ages, and geographic locations of children receiving screening, diagnostic, and treatment services; the capacity of the program to ensure all children who require screening, diagnostic, and treatment services are identified and receive services; data on the disposition of referrals of children who are screened and eligible for diagnostic and treatment services, including how many receive services and how many do not receive those services by county; an assessment of the program's efforts to provide comprehensive screening and treatment for children as required by federal law; an assessment of the deficits of the program's efforts to provide comprehensive screening and treatment as required by federal law; recommendations to ensure or expand services so that all eligible children are adequately served by the program; and additional data needed to assess the program accountability and efficiency. Before October 1, 2022, the department of human services shall provide the report to the legislative management."

Page 13, line 22, remove "conduct a study and"

Page 13, line 22, remove ". The report must provide"

Page 13, remove line 23

Page 13, line 24, replace "closing the state hospital, renovating the state hospital, or building" with ", including an architectural review and cost estimate to construct"

Page 13, line 26, replace "a" with "the"

Page 13, line 26, remove "regarding the results of the study"

Page 13, line 27, replace "$300,000" with "$3,000,000"

Page 13, line 28, replace "the report and recommendation" with "preparing the report and to develop detailed design plans for the construction of a new treatment campus"

Page 13, remove lines 29 through 31

Page 14, replace lines 1 through 6 with:

"**SECTION 49. REPORT TO LEGISLATIVE MANAGEMENT - REVISED PAYMENT METHODOLOGY FOR BASIC CARE FACILITIES.** The department of human services shall develop a report for payment methodology revisions for basic care facilities that must include recommendations for:

1. Methods of reimbursement for basic care facility cost categories, including direct care, indirect care, room and board, and property; and

2. The feasibility of standardizing payments for basic care facilities in the same peer group.

Before October 1, 2022, the department shall present the report to the legislative management regarding the revised payment methodology. The estimated costs related to the implementation of the payment methodology revisions must be included in the department's 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 50. LEGISLATIVE MANAGEMENT REPORT - FOUR-YEAR OLD PROGRAM - EARLY CHILDHOOD GRANTS. During the 2021-22 interim, the department of human services shall provide reports to the legislative management regarding the status of four-year old program approvals, the North Dakota early childhood council, and the early childhood grant for best in class four-year old experiences.

SECTION 51. TRANSFER OF EMPLOYEES. The department of human services may use the identified twenty-seven full-time equivalent child care licensing positions of the human service zone transferred to the department pursuant to chapter 391 of the 2019 Session Laws for child care licensing, quality control, and early childhood administration.

SECTION 52. RETROACTIVE APPLICATION. Section 20 of this Act applies retroactively to July 1, 2020."

Page 14, line 7, replace "Section 17" with "Sections 18 and 26"

Page 14, line 7, replace "becomes" with "become"

Page 14, line 9, replace "14" with "19"

Page 14, line 11, replace "is" with "and section 22 of Senate Bill No. 2086, as approved by the sixty-seventh legislative assembly, are"

Renumber accordingly

STATEMENT OF PURPOSE OF AMENDMENT:

House Bill No. 1012 - Other Changes - Senate Action

This amendment also:

- Adjusts the amount of funding being provided from the human service finance fund for the county social and human services program.
- Provides that DHS develop a funding methodology to distribute permanent supportive housing grants.
- Adds a section to provide for an emergency grant allocation program for developmental disabilities providers and removes a section relating to DHS applying for an Appendix K waiver.
- Provides for DHS to settle a certain number of refugees outside of the three most populous counties.
- Provides funding and requirements to transfer individuals from the Life Skills and Transition Center to community providers.
- Provides legislative intent regarding future appropriations for the federal Department of Justice lawsuit settlement.
- Provides for certain substance use disorder providers to be reimbursed at similar levels, provides for a moratorium on new substance use disorder residential providers, and provides for no more than 50 percent of substance use disorder vouchers be allocated for residential substance use disorder services administered by programs with more than 16 beds.
- Adds a section to authorize DHS to collect fees for early childhood services training and development courses.
- Removes the sunset clause on the Medicaid Expansion program and adjusts language regarding provider reimbursement rates being open records.
- Adds a section to provide for interpreter services to be covered under the Medicaid program.
- Provides for DHS to establish a behavioral health bed management system.
- Authorizes the conveyance of land at the Life Skills and Transition Center to the Grafton Fire Department.
- Authorizes exemptions to continue appropriation authority into the 2021-23 biennium. The exemptions will reduce general fund turnback by $4,085,000.
- Provides for DHS to conduct a study of the Early and Periodic Screening, Diagnostic, and Treatment Program.
- Removes a section providing for a DHS study of using an Administrative Services Organization for behavioral health services in the Medicaid Expansion program.
- Provides for DHS to develop a new payment methodology for basic care facilities.
- Provides for a DHS report to the Legislative Management regarding the early childhood four-year old grant program.
- Authorizes positions for child care licensing to be used for other purposes.

REPORT OF STANDING COMMITTEE

HB 1012, as engrossed: Appropriations Committee (Sen. Holmberg, Chairman) recommends **AMENDMENTS AS FOLLOWS** and when so amended, recommends **DO PASS** (14 YEAS, 0 NAYS, 0 ABSENT AND NOT VOTING). Engrossed HB 1012 was placed on the Sixth order on the calendar.

"**SECTION 13. PERMANENT SUPPORTIVE HOUSING GRANTS.** Subdivision 2 of section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department, and authorize the department to conduct onsite visits to review program operations.

SECTION 14. EMERGENCY STABILIZATION GRANTS - DEVELOPMENTAL DISABILITIES WAIVER.

1. Subdivision 2 of subsection 1 of this Act includes the sum of $125,000 from the general fund for the purpose of providing emergency stabilization grants to developmental disability in-home support providers to support the sustainability of newly licensed providers within the developmental disability provider network. To be eligible to receive an emergency stabilization grant, a licensed developmental disability in-home support provider must be in operation as of October 1, 2020, with an initial license date of October 15, 2015, or later, and comply with grant requirements established by the department of human services. The requirements of chapter 54-44.4 do not apply to the selection of a grantee, the grant award, or payments made under this section.

2. The department of human services shall include in-home support providers in future appendix K applications, to allow eligibility for retainer payments in a manner equivalent to day support services.

SECTION 15. REFUGEE RESETTLEMENT SERVICES. Subdivision 2 of section 1 of this Act includes the sum of $6,069,408 of federal funds for the refugee resettlement program. The department of human services shall establish and implement a plan that resettles at least twenty-five percent of new refugees in locations in the state outside of the three most populous counties. If the department, in consultation with applicable federal and private placement agencies, determines the goal of resettling at least twenty-five percent of refugees outside the three most populous counties is not achievable, the department shall discontinue the

resettlement process for refugees and the federal funds identified in this section may not be expended for any purpose.

SECTION 16. TRANSITION OF INDIVIDUALS FROM LIFE SKILLS AND TRANSITION CENTER. Subdivision 2 of section 1 of this Act includes the sum of $5,200,000 from federal or other funds made available to the department for the transition of individuals from the life skills and transition center to community-based providers. To be eligible to receive funding under this section, a provider must accept an individual who has a regular admission to the life skills and transition center and is being discharged, must ensure that all service needs are met including vocational services, and must implement a policy to not decline to provide services in the future to any individual being served under this section."

Page 7, replace lines 15 through 19 with:

"**SECTION 18. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.**

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:

   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.

   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.

   c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915i state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care."

Page 8, remove lines 19 through 31

Page 9, replace lines 1 through 13 with:

"**SECTION 20. AMENDMENT.** Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, ~~and~~ hospital- or medical clinic-based programs for medical management of withdrawal, and any institution for mental diseases in accordance with subsection 2.

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

SECTION 21. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, hospital- or medical clinic-based programs for medical

management of withdrawal, and any institution for mental diseases in accordance with subsection 2.

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

4. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. No more than fifty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 22. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Behavioral health bed management system.

The department shall establish and maintain a behavioral health bed management system to improve utilization of behavioral health bed capacity. Public and private providers of residential or inpatient behavioral health services shall participate in and report daily to the department the information and documentation necessary to maintain the behavioral health bed management system in the form and manner prescribed by the department.

SECTION 23. AMENDMENT. Section 50-11.1-14 of the North Dakota Century Code is amended and reenacted as follows:

50-11.1-14. Workforce development.

1. The department may establish a statewide system to build systematic early childhood workforce voluntary training which may include distance learning formats, a professional registry, certificates, and specializations.

2. The department may charge reasonable fees for all training and development courses to offset costs. All fees collected under this section must be paid to the department or the department's authorized agent and must be used to defray the cost of providing training and development courses to providers and staff members of early childhood services.

SECTION 24. A new paragraph to subdivision I of subsection 1 of section 50-11.1-22 of the North Dakota Century Code as created by section 8 of House Bill No. 1416, as approved by the sixty-seventh legislative assembly, is created and enacted as follows:

A special education director;"

Page 11, line 2, remove the overstrike over "~~section is~~"

Page 11, line 4, after "~~section~~" insert "an open record"

Page 11, line 4, remove the overstrike over the period and insert immediately thereafter:

"**SECTION 27.** A new section to chapter 50-24.1 of the North Dakota Century Code is created and enacted as follows:

Interpreter services.

Medical assistance coverage, including Medicaid expansion, must include payment for sign and oral language interpreter services for assistance in providing covered health care services to a recipient of medical assistance who has limited English proficiency or who has hearing loss and uses interpreting services. The department shall adopt rules to implement this section."

Page 11, after line 13, insert:

"**SECTION 30. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER.** The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton fire department. The department of human services may convey a parcel of land, 7.45 acres, more or less, located in part of lot 1, block 1, state school first addition to the city of Grafton, which is located within the southwest ¼ of the southwest ¼ of section 13, township 157 north, range 53 west, on the terms and conditions determined appropriate by the department and attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance."

Page 11, remove lines 23 through 28

Page 12, line 3, replace "4" with "5"

Page 13, replace lines 13 through 18 with:

"**SECTION 41. EXEMPTION.** The sum of $750,000 from the general fund appropriated to the department of human services for the purpose of providing suicide prevention grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the suicide prevention grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 42. EXEMPTION. The sum of $3,000,000 from the general fund appropriated to the department of human services for the purpose of providing a community behavioral health program to provide comprehensive community-based services for individuals who have serious behavioral health conditions in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the community behavioral health program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 43. EXEMPTION. The sum of $335,000 from the general fund appropriated to the department of human services for the purpose of providing a grant to an entity to develop a hyperbaric oxygen therapy pilot program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the grant to an entity to develop a hyperbaric oxygen therapy pilot program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 44. EXEMPTION. The sum of $572,000 from the strategic investment and improvements fund appropriated to the department of human services for the purpose of a roof replacement project at the state hospital in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the roof replacement project at the state hospital during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 45. EXEMPTION. The amount appropriated for the development of the electronic visit verification project in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the electronic visit verification project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 46. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly for any expenditures that exceed appropriated amounts as a result of utilization rates or nursing home costs associated with the establishment of the new rate structure as provided in House Bill No. 1090 during the biennium beginning July 1, 2021, and ending June 30, 2023, if funding is not sufficient to pay actual expenses.

SECTION 47. REPORT TO LEGISLATIVE MANAGEMENT - EARLY AND PERIODIC SCREENING, DIAGNOSTIC, AND TREATMENT PROGRAM. During the 2021-22 interim, the department of human services shall conduct a study of the early and periodic screening, diagnostic, and treatment program and prepare a report. The department of human services may contract with a consultant to assist in the study and the preparation of the report. The report shall include data on the number, ages, and geographic locations of children receiving screening, diagnostic, and treatment services; the capacity of the program to ensure all children who require screening, diagnostic, and treatment services are identified and receive services; data on the disposition of referrals of children who are screened and eligible for diagnostic and treatment services, including how many receive services and how many do not receive those services by county; an assessment of the program's efforts to provide comprehensive screening and treatment for children as required by federal law; an assessment of the deficits of the program's efforts to provide comprehensive screening and treatment as required by federal law; recommendations to ensure or expand services so that all eligible children are adequately served by the program; and additional data needed to assess the program accountability and efficiency. Before October 1, 2022, the department of human services shall provide the report to the legislative management."

Page 13, line 22, remove "conduct a study and"

Page 13, remove lines 29 through 31

Page 14, replace lines 1 through 6 with:

"**SECTION 49. REPORT TO LEGISLATIVE MANAGEMENT - REVISED PAYMENT METHODOLOGY FOR BASIC CARE FACILITIES.** The department of human services shall develop a report for payment methodology revisions for basic care facilities that must include recommendations for:

1. Methods of reimbursement for basic care facility cost categories, including direct care, indirect care, room and board, and property; and

2. The feasibility of standardizing payments for basic care facilities in the same peer group.

Before October 1, 2022, the department shall present the report to the legislative management regarding the revised payment methodology. The estimated costs related to the implementation of the payment methodology revisions must be included in the department's 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 50. LEGISLATIVE MANAGEMENT REPORT - FOUR-YEAR OLD PROGRAM - EARLY CHILDHOOD GRANTS. During the 2021-22 interim, the department of human services shall provide reports to the legislative management regarding the status of four-year old program approvals, the North Dakota early childhood council, and the early childhood grant for best in class four-year old experiences.

SECTION 51. TRANSFER OF EMPLOYEES. The department of human services may use the identified twenty-seven full-time equivalent child care licensing positions of the human service zone transferred to the department pursuant to chapter 391 of the 2019 Session Laws for child care licensing, quality control, and early childhood administration.

SECTION 52. RETROACTIVE APPLICATION. Section 20 of this Act applies retroactively to July 1, 2020."

One-time funding is added for heat pump and carpet replacement projects at the Southeast Human Service Center		724,000		724,000
Total one-time funding changes	0.00	$3,424,000	$0	$3,424,000
Total changes to base level funding	0.00	$5,548,922	$329,283	$5,878,205

House Bill No. 1012 - Other Changes - Senate Action

This amendment also:

- Adjusts the amount of funding being provided from the human service finance fund for the county social and human services program.
- Provides that DHS develop a funding methodology to distribute permanent supportive housing grants.
- Adds a section to provide for an emergency grant allocation program for developmental disabilities providers and removes a section relating to DHS applying for an Appendix K waiver.
- Provides for DHS to settle a certain number of refugees outside of the three most populous counties.
- Provides funding and requirements to transfer individuals from the Life Skills and Transition Center to community providers.
- Provides legislative intent regarding future appropriations for the federal Department of Justice lawsuit settlement.
- Provides for certain substance use disorder providers to be reimbursed at similar levels, provides for a moratorium on new substance use disorder residential providers, and provides for no more than 50 percent of substance use disorder

vouchers be allocated for residential substance use disorder services administered by programs with more than 16 beds.

- Adds a section to authorize DHS to collect fees for early childhood services training and development courses.
- Removes the sunset clause on the Medicaid Expansion program and adjusts language regarding provider reimbursement rates being open records.
- Adds a section to provide for interpreter services to be covered under the Medicaid program.
- Provides for DHS to establish a behavioral health bed management system.
- Authorizes the conveyance of land at the Life Skills and Transition Center to the Grafton Fire Department.
- Authorizes exemptions to continue appropriation authority into the 2021-23 biennium. The exemptions will reduce general fund turnback by $4,085,000.
- Provides for DHS to conduct a study of the Early and Periodic Screening, Diagnostic, and Treatment Program.
- Removes a section providing for a DHS study of using an Administrative Services Organization for behavioral health services in the Medicaid Expansion program.
- Provides for DHS to develop a new payment methodology for basic care facilities.
- Provides for a DHS report to the Legislative Management regarding the early childhood four-year old grant program.
- Authorizes positions for child care licensing to be used for other purposes.

Page 5, after line 29, insert:

"**SECTION 13. PERMANENT SUPPORTIVE HOUSING GRANTS.** Subdivision 2 of section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department, and authorize the department to conduct onsite visits to review program operations.

SECTION 14. EMERGENCY STABILIZATION GRANTS - DEVELOPMENTAL DISABILITIES WAIVER.

1. Subdivision 2 of subsection 1 of this Act includes the sum of $125,000 from the general fund for the purpose of providing emergency stabilization grants to developmental disability in-home support providers to support the sustainability of newly licensed providers within the developmental disability provider network. To be eligible to receive an emergency stabilization grant, a licensed developmental disability in-home support provider must be in operation as of October 1, 2020, with an initial license date of October 15, 2015, or later, and comply with grant requirements established by the department of human services. The requirements of chapter 54-44.4 do not apply to the selection of a grantee, the grant award, or payments made under this section.

2. The department of human services shall include in-home support providers in future appendix K applications, to allow eligibility for retainer payments in a manner equivalent to day support services.

SECTION 15. REFUGEE RESETTLEMENT SERVICES. Subdivision 2 of section 1 of this Act includes the sum of $6,069,408 of federal funds for the refugee resettlement program. The department of human services must establish and implement a plan that resettles at least twenty-five percent of new refugees in locations in the state outside of the three most populous counties. If the department, in consultation with applicable federal and private placement agencies, determines the goal of resettling at least twenty-five percent of refugees outside the three most populous counties is not achievable, the department shall discontinue the resettlement process for refugees and the federal funds identified in this section may not be expended for any purpose.

SECTION 16. TRANSITION OF INDIVIDUALS FROM LIFE SKILLS AND TRANSITION CENTER. Subdivision 2 of section 1 of this Act includes the sum of $5,200,000 from federal or other funds made available to the department for the transition of individuals from the life skills and transition center to community-based providers. To be eligible to receive funding under this section, a provider must accept an individual who has a regular admission to the life skills and transition center and is being discharged, must ensure that all service needs are met including vocational services, and must implement a policy to not decline to provide services in the future to any individual being served under this section."

Page 7, replace lines 15 through 19 with:

"SECTION 18. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:

   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.

   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.

   c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the

addition of coverage consistent with the traditional Medicaid 1915i state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization shall reimburse all North Dakota substance use providers of American society of additional medicine Level II.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care."

Page 9, replace lines 1 through 13 with:

"**SECTION 20. AMENDMENT.** Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, ~~and~~ hospital- or medical clinic-based programs for medical management of withdrawal, and any institution for mental diseases in accordance with subsection 2.

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular

emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

SECTION 21. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, hospital- or medical clinic-based programs for medical management of withdrawal, and any institution for mental diseases in accordance with subsection 2

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

4. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. No more than fifty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 22. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Behavioral health bed management system.

The department shall establish and maintain a behavioral health bed management system to improve utilization of behavioral health bed capacity. Public and private providers of residential or inpatient behavioral health services shall participate in and report daily to the department the information and documentation necessary to maintain the behavioral health bed management system in the form and manner prescribed by the department.

SECTION 23. AMENDMENT. Section 50-11.1-14 of the North Dakota Century Code is amended and reenacted as follows:

50-11.1-14. Workforce development.

1. The department may establish a statewide system to build systematic early childhood workforce voluntary training which may include distance learning formats, a professional registry, certificates, and specializations.

2. The department may charge reasonable fees for all training and development courses to offset costs. All fees collected under this section must be paid to the department or the department's authorized agent and must be used to defray the cost of providing training and development courses to providers and staff members of early childhood services.

SECTION 24. A new subparagraph to subdivision I of subsection 1 of section 50-11.1-22 of the North Dakota Century Code as created by section 8 of House Bill No. 1416, as approved by the sixty-seventh legislative assembly, is created and enacted as follows:

A special education director;"

Page 11, line 4, after "~~section~~" insert "an open record"

Page 11, line 4, remove the overstrike over "~~the period~~"

SECTION 27. A new section to chapter 50-24.1 of the North Dakota Century Code is created and enacted as follows:

Interpreter services.

Medical assistance coverage, including Medicaid Expansion, must include payment for sign and oral language interpreter services for assistance in providing covered health care services to a recipient of medical assistance who has limited

English proficiency or who has hearing loss and uses interpreting services. The department shall adopt rules to implement this section."

Page 11, after line 13, insert:

"**SECTION 30. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER.** The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton fire department. The department of human services may convey a parcel of land, 7.45 acres, more or less, located in part of lot 1, block 1, state school first addition to the city of Grafton, which is located within the southwest ¼ of the southwest ¼ of section 13, township 157 north, range 53 west, on the terms and conditions determined appropriate by the department and attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance."

Page 11, remove lines 23 through 28

Page 12, line 3, replace "4" with "5"

Page 13, replace lines 13 through 18 with:

"**SECTION 41. EXEMPTION.** The sum of $750,000 from the general fund appropriated to the department for the purpose of providing suicide prevention grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the suicide prevention grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 42. EXEMPTION. The sum of $3,000,000 from the general fund appropriated to the department for the purpose of providing a community behavioral health program to provide comprehensive community-based services for individuals who have serious behavioral health conditions in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the community behavioral health program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 43. EXEMPTION. The sum of $335,000 from the general fund appropriated to the department for the purpose of providing a grant to an entity to develop a hyperbaric oxygen therapy pilot program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the grant to an entity to develop a hyperbaric oxygen therapy pilot program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 44. EXEMPTION. The sum of $572,000 from the strategic investment and improvements fund appropriated to the department for the purpose of a roof replacement project at the state hospital in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the roof replacement project at the state hospital during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 45. EXEMPTION. The amount appropriated for the development of the electronic visit verification project in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21

biennium are available for the completion of the electronic visit verification project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 46. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly for any expenditures that exceed appropriated amounts as a result of utilization rates or nursing home costs associated with the establishment of the new rate structure as provided in House Bill No. 1090 during the biennium beginning July 1, 2021, and ending June 30, 2023, if funding is not sufficient to pay actual expenses.

SECTION 47. REPORT TO LEGISLATIVE MANAGEMENT - EARLY AND PERIODIC SCREENING, DIAGNOSTIC, AND TREATMENT PROGRAM. During the 2021-22 interim, the department of human services shall conduct a study of the early and periodic screening, diagnostic, and treatment program and prepare a report. The department of human services may contract with a consultant to assist in the study and the preparation of the report. The report shall include data on the number, ages, and geographic locations of children receiving screening, diagnostic, and treatment services; the capacity of the program to ensure all children who require screening, diagnostic, and treatment services are identified and receive services; data on the disposition of referrals of children who are screened and eligible for diagnostic and treatment services, including how many receive services and how many do not receive those services by county; an assessment of the program's efforts to provide comprehensive screening and treatment for children as required by federal law; an assessment of the deficits of the program's efforts to provide comprehensive screening and treatment as required by federal law; recommendations to ensure or expand services so that all eligible children are adequately served by the program; and additional data needed to assess the program accountability and efficiency. Before October 1, 2022, the department of human services shall provide the report to the legislative management."

Page 13, remove lines 29 through 31

Page 14, replace lines 1 through 6 with:

"**SECTION 49. REPORT TO LEGISLATIVE MANAGEMENT - REVISED PAYMENT METHODOLOGY FOR BASIC CARE FACILITIES.** The department of human services shall develop a report for payment methodology revisions for basic care facilities that must include recommendations for:

1. Methods of reimbursement for basic care facility cost categories, including direct care, indirect care, room and board, and property; and

2. The feasibility of standardizing payments for basic care facilities in the same peer group.

Before October 1, 2022, the department shall present the report to the legislative management regarding the revised payment methodology. The estimated costs related to the implementation of the payment methodology revisions must be included in the department's 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 50. LEGISLATIVE MANAGEMENT REPORT - FOUR-YEAR OLD PROGRAM - EARLY CHILDHOOD GRANTS. During the 2021-22 interim, the department of human services shall provide reports to the legislative management regarding the status of four-year old program approvals, the North Dakota early childhood council, and the early childhood grant for best in class four-year old experiences.

SECTION 51. TRANSFER OF EMPLOYEES. The department of human services may use the identified twenty-seven full-time equivalent child care licensing positions of the human service zone transferred to the department pursuant to chapter 391 of the 2019 Session Laws for child care licensing, quality control, and early childhood administration.

SECTION 52. RETROACTIVE APPLICATION. Section 20 of this Act applies retroactively to July 1, 2020."

Total changes to base level funding	0.00	$5,548,922	$329,283	$5,878,205

House Bill No. 1012 - Other Changes - Senate Action

This amendment also:

- Adjusts the amount of funding being provided from the human service finance fund for the county social and human services program.
- Provides that DHS develop a funding methodology to distribute permanent supportive housing grants.
- Adds a section to provide for an emergency grant allocation program for developmental disabilities providers and removes a section relating to DHS applying for an Appendix K waiver.
- Provides for DHS to settle a certain number of refugees outside of the three most populous counties.
- Provides funding and requirements to transfer individuals from the Life Skills and Transition Center to community providers.
- Provides legislative intent regarding future appropriations for the federal Department of Justice lawsuit settlement.
- Provides for certain substance use disorder providers to be reimbursed at similar levels, provides for a moratorium on new substance use disorder residential providers, and provides for no more than 50 percent of substance use disorder vouchers be allocated for residential substance use disorder services administered by programs with more than 16 beds.
- Adds a section to authorize DHS to collect fees for early childhood services training and development courses.
- Removes the sunset clause on the Medicaid Expansion program and adjusts language regarding provider reimbursement rates being open records.
- Adds a section to provide for interpreter services to be covered under the Medicaid program.
- Provides for DHS to establish a behavioral health bed management system.
- Authorizes the conveyance of land at the Life Skills and Transition Center to the Grafton Fire Department.
- Authorizes exemptions to continue appropriation authority into the 2021-23 biennium. The exemptions will reduce general fund turnback by $4,085,000.
- Provides for DHS to conduct a study of the Early and Periodic Screening, Diagnostic, and Treatment Program.
- Removes a section providing for a DHS study of using an Administrative Services Organization for behavioral health services in the Medicaid Expansion program.
- Provides for DHS to develop a new payment methodology for basic care facilities.
- Provides for a DHS report to the Legislative Management regarding the early childhood four-year old grant program.
- Authorizes positions for child care licensing to be used for other purposes.

21.0271.02001

Sixty-seventh
Legislative Assembly
of North Dakota

FIRST ENGROSSMENT

ENGROSSED HOUSE BILL NO. 1012

Introduced by

Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an appropriation to the state department of health; to create and enact ~~a~~two new ~~section~~sections to chapter 50-06 and a new section to chapter 50-24.1 of the North Dakota Century Code, relating to substance use disorder treatment voucher system grants, a behavioral health bed management system, and medical assistance coverage of interpreter services; to create and enact a new subparagraph to subdivision l of subsection 1 of section 50-11.1-22 of the North Dakota Century Code as created by section 8 of House Bill No. 1416, as approved by the sixty-seventh legislative assembly, relating to the North Dakota early childhood council membership; to amend and reenact sections 50-06-42, 50-11.1-14, and 50-24.1-37 of the North Dakota Century Code, relating to the substance use disorder voucher program, the early childhood workforce development fees, and the Medicaid expansion program; to repeal section 50-24.1-18.1 of the North Dakota Century Code, relating to consumer-directed health maintenance services; to provide an exemption; to provide a statement of legislative intent; to provide for a report; to provide for a study; to provide for a transfer; to provide for the conveyance of land; to provide an application; to provide for retroactive application; to provide an effective date; to provide an expiration date; and to declare an emergency.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from special funds derived from federal funds and other income, to the department of human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2021, and ending June 30, 2023, as follows:

SECTION 2. ONE-TIME FUNDING - EFFECT ON BASE BUDGET - REPORT TO SIXTY-EIGHTH LEGISLATIVE ASSEMBLY. The following amounts reflect the one-time funding items

approved by the sixty-sixth legislative assembly for the 2019-21 biennium and the one-time funding items included in the appropriation in section 1 of this Act:

One-Time Funding Description	2019-21	2021-23
Technology projects	$13,785,658	$67,641,747
Capital projects - life skills and transition center	4,277,165	0
Capital projects - state hospital	2,493,500	0
Capital projects - southeast human service center	0	724,000
Life skills and transition center transition costs	0	5,200,000
Developmental disabilities provider stabilization grants	0	125,000
Medically complex children provider funding	977,603	0
Hyperbaric oxygen therapy grant	335,000	0
~~State hospital study~~	~~200,000~~	~~300,000~~
~~Medicaid system consultant~~	~~0~~	~~300,000~~
State hospital study	200,000	3,000,000
Nursing facility payment methodology	0	7,200,000
~~Total all funds~~	~~$22,068,926~~	~~$75,441,747~~
~~Less estimated income~~	~~20,556,323~~	~~51,607,531~~
~~Total general fund~~	~~$1,512,603~~	~~$23,834,216~~
Total all funds	$22,068,926	$83,890,747
Less estimated income	20,556,323	56,657,531
Total general fund	$1,512,603	$27,233,216

The 2021-23 biennium one-time funding amounts are not a part of the entity's base budget for the 2023-25 biennium. The department of human services shall report to the appropriations committees of the sixty-eighth legislative assembly on the use of this one-time funding for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 3. APPROPRIATION - 2019-21 BIENNIUM - DEPARTMENT OF HUMAN SERVICES - FIRE PROTECTION AGREEMENTS - EXEMPTION. There is appropriated out of any moneys in the department of human services operating fund in the state treasury, not otherwise appropriated, the sum of $333,333, or so much of the sum as may be necessary, to the department of human services for the purpose of providing a grant to a ~~political subdivision for the state share of costs relating to the purchase of a fire truck~~city located in a county of

fewer than 25,000 individuals and provides prevention and extinguishment of fires at the North Dakota state hospital, for the period beginning with the effective date of this Act and ending June 30, 2021. The funding appropriated in this section is a one-time funding item. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section. The department of human services ~~shall discontinue any agreement with a political subdivision for fire protection services and~~ may not enter any future agreement with a political subdivision for fire protection services.

SECTION 4. APPROPRIATION - STATE DEPARTMENT OF HEALTH. There is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of $281,715, or so much of the sum as may be necessary, and the sum of $281,715 from special funds derived from grants, donations, and other income, to the state department of health for the purpose of providing a grant to the task force on the prevention of sexual abuse of children for staff and programming materials focused on primary prevention activities, for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 5. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021, and ending June 30, 2023, as requested by the department of human services. The department of human services shall notify the legislative council of any transfer made pursuant to this section. The department shall report to the budget section after June 30, 2022, any transfer made in excess of $50,000 and to the appropriations committees of the sixty-eighth legislative assembly regarding any transfers made pursuant to this section.

SECTION 6. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority from line items within subdivisions 1, 2, and 3 of section 1 of this Act to subdivision 4 of section 1 of this Act for the biennium beginning July 1, 2021, and ending June 30, 2023, as requested by the department of human services. The department of human services shall notify the legislative council of any transfer made pursuant to this section. The department shall report to the budget section after June 30, 2022, any transfer made in excess

of $50,000 and to the appropriations committees of the sixty-eighth legislative assembly regarding any transfers made pursuant to this section.

SECTION 7. FULL-TIME EQUIVALENT POSITION - AGING SERVICES - LEGISLATIVE INTENT. Section 1 of this Act includes one full-time equivalent position for the administration of services resulting from a federal department of justice lawsuit settlement. This position is authorized only for the biennium beginning July 1, 2021, and ending June 30, 2023, and may not be included in the department's base budget for the biennium beginning July 1, 2023, and ending June 30, 2025. It is the intent of the sixty-seventh legislative assembly that future legislative assemblies retain and exercise unfettered discretion to appropriate funds as they deem appropriate without regard to the federal department of justice lawsuit settlement.

SECTION 8. ESTIMATED INCOME - HUMAN SERVICE FINANCE FUND. The estimated income line item in subdivision 4 of section 1 of this Act includes the sum of ~~$187,385,888~~$187,223,092 from the human service finance fund for state-paid economic assistance and social and human services.

SECTION 9. ESTIMATED INCOME - COMMUNITY HEALTH TRUST FUND. The estimated income line item in subdivision 2 of section 1 of this Act includes the sum of $24,000,000 from the community health trust fund for defraying expenses in the medical services division.

SECTION 10. ESTIMATED INCOME - HEALTH CARE TRUST FUND. The estimated income line item in subdivision 2 of section 1 of this Act includes the sum of $1,000,000 from the health care trust fund and $1,150,538 from federal funds for nursing facility operating margin adjustments.

SECTION 11. CAPITAL PAYMENTS. During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to expend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 12. CAPITAL PROJECTS - ~~STATE HOSPITAL -~~ EMERGENCY COMMISSION APPROVAL. During the biennium beginning July 1, 2021, and ending June 30, 2023, the department of human services is authorized to proceed with the demolition of the chapel, administrative building, and employee building and associated tunnels at the state hospital. Pursuant to section ~~45~~ of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act. The department may transfer funds for the demolition of the identified buildings and

associated tunnels and for emergency capital projects. Notwithstanding section 54-27-12, the department of human services may spend up to $5,000,000 for emergency projects under this section and may seek emergency commission approval to spend more than $5,000,000 under this section.

SECTION 13. PERMANENT SUPPORTIVE HOUSING GRANTS. Subdivision 2 of section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department, and authorize the department to conduct onsite visits to review program operations.

SECTION 14. EMERGENCY STABILIZATION GRANTS - DEVELOPMENTAL DISABILITIES WAIVER.

1. Subdivision 2 of subsection 1 of this Act includes the sum of $125,000 from the general fund for the purpose of providing emergency stabilization grants to developmental disability in-home support providers to support the sustainability of newly licensed providers within the developmental disability provider network. To be eligible to receive an emergency stabilization grant, a licensed developmental disability in-home support provider must be in operation as of October 1, 2020, with an initial license date of October 15, 2015, or later, and comply with grant requirements established by the department of human services. The requirements of chapter 54-44.4 do not apply to the selection of a grantee, the grant award, or payments made under this section.
2. The department of human services shall include in-home support providers in future appendix K applications, to allow eligibility for retainer payments in a manner equivalent to day support services.

SECTION 15. REFUGEE RESETTLEMENT SERVICES. Subdivision 2 of section 1 of this Act includes the sum of $6,069,408 of federal funds for the refugee resettlement program. The department of human services must establish and implement a plan that resettles at least twenty-five percent of new refugees in locations in the state outside of the three most populous counties. If the department, in consultation with applicable federal and private placement

agencies, determines the goal of resettling at least twenty-five percent of refugees outside the three most populous counties is not achievable, the department shall discontinue the resettlement process for refugees and the federal funds identified in this section may not be expended for any purpose.

SECTION 16. TRANSITION OF INDIVIDUALS FROM LIFE SKILLS AND TRANSITION CENTER. Subdivision 2 of section 1 of this Act includes the sum of $5,200,000 from federal or other funds made available to the department for the transition of individuals from the life skills and transition center to community-based providers. To be eligible to receive funding under this section, a provider must accept an individual who has a regular admission to the life skills and transition center and is being discharged, must ensure that all service needs are met including vocational services, and must implement a policy to not decline to provide services in the future to any individual being served under this section.

SECTION 17. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:
   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.
   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.
   c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid

program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915i state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

6. The department of human services and the Medicaid expansion managed care organization shall ensure the appropriate contract amendment is adopted for coverage through December 31, 2021. The contract amendment shall stay within the appropriation and the requirements of chapter 54-44.4 do not apply.

~~**SECTION 16. EXPENDITURES MAY NOT EXCEED APPROPRIATION - NURSING HOME RATES.** Subdivision 2 of section 1 of this Act includes the sum of $621,362,568, of which $288,313,216 is from the general fund, for nursing home payments for the biennium beginning~~

~~July 1, 2021, and ending June 30, 2023. The expenditures for nursing homes may not exceed this amount.~~

SECTION 18. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:
   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.
   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.
   c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.
2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915i state plan.
3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care

organization shall reimburse all North Dakota substance use providers of American society of additional medicine Level II.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

SECTION 19. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Substance use disorder treatment voucher system grants.

1. A licensed substance abuse treatment program, excluding regional human service centers and hospital or medical clinic-based programs for medical management of withdrawal, may apply for a competitive substance use disorder treatment voucher system grant. A licensed substance abuse treatment program is eligible for a one-time grant award. To receive a grant, a licensed substance abuse treatment program shall:
   a. Submit an application in the form and manner prescribed by the department;
   b. Enter a grant agreement with the department;
   c. Use grant funds for a licensed substance abuse treatment program with fewer than seventeen beds in an underserved area, as determined by the department, in the state's substance abuse treatment system;
   d. Use the grant funds to support the provision of substance use disorder treatment in underserved areas of the state's substance abuse treatment system;

e. Provide and disclose information needed to comply with the department's data collection requirements; and

f. Operate in compliance with grant requirements.

2. The department, within legislative appropriations, may distribute up to three grants under this section to licensed substance abuse treatment programs.

3. The department may recapture grant funds distributed to a licensed program found by the department to be out of compliance with the requirements established by the grant program, including ending or reducing the operation of the substance use disorder treatment services in the underserved area.

4. The department may not collect property, equipment, or supplies purchased with grant funds from the licensed substance abuse treatment program after successful completion of the terms of the grant.

5. The grant term must be for five years.

~~**SECTION 17. AMENDMENT.** Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:~~

~~**50-06-42. Substance use disorder treatment voucher system.**~~

~~1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, and hospital- or medical clinic-based programs for medical management of withdrawal. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.~~

~~2. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:~~

~~a. No more than thirty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.~~

~~b. The remaining appropriation must be allocated for nonresidential outpatient and ancillary substance use disorder services administered by licensed substance abuse treatment programs.~~

SECTION 20. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, ~~and~~ hospital- or medical clinic-based programs for medical management of withdrawal, and any institution for mental diseases in accordance with subsection 2.
2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.
3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting

vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

SECTION 21. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, hospital- or medical clinic-based programs for medical management of withdrawal, and any institution for mental diseases in accordance with subsection 2
2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.
3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.
4. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:
   a. No more than fifty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

b. The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 22. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Behavioral health bed management system.

The department shall establish and maintain a behavioral health bed management system to improve utilization of behavioral health bed capacity. Public and private providers of residential or inpatient behavioral health services shall participate in and report daily to the department the information and documentation necessary to maintain the behavioral health bed management system in the form and manner prescribed by the department.

SECTION 23. AMENDMENT. Section 50-11.1-14 of the North Dakota Century Code is amended and reenacted as follows:

50-11.1-14. Workforce development.

1. The department may establish a statewide system to build systematic early childhood workforce voluntary training which may include distance learning formats, a professional registry, certificates, and specializations.
2. The department may charge reasonable fees for all training and development courses to offset costs. All fees collected under this section must be paid to the department or the department's authorized agent and must be used to defray the cost of providing training and development courses to providers and staff members of early childhood services.

SECTION 24. A new subparagraph to subdivision l of subsection 1 of section 50-11.1-22 of the North Dakota Century Code as created by section 8 of House Bill No. 1416, as approved by the sixty-seventh legislative assembly, is created and enacted as follows:

A special education director;

SECTION 25. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (~~Effective through July 31, 2021~~2023 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.
2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.
3. Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.
4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.
5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.

SECTION 26. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010

[Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.

3. Except for pharmacy services and coverages for individuals ages nineteen and twenty, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.

4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even-numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. ~~This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.~~

5. Provider reimbursement rate information received by the department under this section is ~~confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section~~an open record.

SECTION 27. A new section to chapter 50-24.1 of the North Dakota Century Code is created and enacted as follows:

Interpreter services.

Medical assistance coverage, including Medicaid Expansion, must include payment for sign and oral language interpreter services for assistance in providing covered health care services to a recipient of medical assistance who has limited English proficiency or who has hearing loss and uses interpreting services. The department shall adopt rules to implement this section.

SECTION 28. REPEAL. Section 50-24.1-18.1 of the North Dakota Century Code is repealed.

SECTION 29. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER. The state of North Dakota, by and through the department of human services, may

convey real property associated with the life skills and transition center in Grafton to the Grafton parks and recreation department. The department of human services may convey a portion of two parcels of land commonly referred to as "the bowl" on the terms and conditions determined appropriate by the department and the attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance.

SECTION 30. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER. The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton fire department. The department of human services may convey a parcel of land, 7.45 acres, more or less, located in part of lot 1, block 1, state school first addition to the city of Grafton, which is located within the southwest ¼ of the southwest ¼ of section 13, township 157 north, range 53 west, on the terms and conditions determined appropriate by the department and attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance.

SECTION 31. LEASE OF LAND - STATE HOSPITAL. The department of human services and national guard may enter an agreement to lease up to twenty acres of real property associated with the state hospital for the national guard to construct a new training and storage facility.

SECTION 32. PROVIDER PROCESS AND OUTCOME MEASURES. Providers that receive funding from the department of human services shall submit process and outcome measures, as required by the department, to the department of human services for programs and services supported by state funding during the biennium beginning July 1, 2021, and ending June 30, 2023.

~~**SECTION 29. IN-HOME SUPPORT SERVICES - DEVELOPMENTAL DISABILITIES WAIVER.** The department of human services shall add in-home support services to the appendix K application submitted by the department to the centers for Medicare and Medicaid services for the developmental disability services waiver for the COVID-19 emergency. Funding for in-home support services under the appendix K application may not exceed $250,000 during the COVID-19 emergency.~~

SECTION 33. QUALIFIED RESIDENTIAL TREATMENT PROVIDERS. The department of human services shall adopt rules, on or before October 1, 2021, establishing a new ratesetting

process and requirements for foster care maintenance rates for qualified residential treatment providers based on the appropriation approved by the sixty-seventh legislative assembly.

SECTION 34. COMMUNITY BEHAVIORAL HEALTH PROGRAM. Pursuant to section 45 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021, and ending June 30, 2023, as requested by the department of human services. The department may transfer funds for the continuation of the community behavioral health program pursuant to subsection 2 of section 54-23.3-10.

SECTION 35. EXEMPTION. The amount appropriated for the Medicaid management information system technology stack upgrade in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the Medicaid management information system technology stack upgrade during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 36. EXEMPTION. The amount appropriated for the modification of the department of human services' eligibility systems in chapter 578 of the 2011 Special Session Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2013-15 biennium, then the 2015-17 biennium, then the 2017-19 biennium, and then the 2019-21 biennium are available for the completion of the modification of the eligibility systems project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 37. EXEMPTION. The amount appropriated for the development of the child care licensing and data system in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the child care licensing and data system during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 38. EXEMPTION. The amount appropriated for the development of the health information network in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the

health information network during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 39. EXEMPTION. The sum of $200,000 from the general fund appropriated for the department's operating expenses for the school behavioral health program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the school behavioral health pilot projects during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 40. EXEMPTION. The sum of $150,000 from the general fund appropriated for the department's operating expenses for behavioral health recovery home grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation may be used for behavioral health recovery home grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

~~**SECTION 35. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITY RATES.** The appropriation in section 1 of this Act includes adjustments to reimbursement rates for developmental disability service providers. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly if funding provided for developmental disability provider payments is not sufficient to pay actual expenses.~~

SECTION 41. EXEMPTION. The sum of $750,000 from the general fund appropriated to the department for the purpose of providing suicide prevention grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the suicide prevention grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 42. EXEMPTION. The sum of $3,000,000 from the general fund appropriated to the department for the purpose of providing a community behavioral health program to provide comprehensive community-based services for individuals who have serious behavioral health conditions in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the community behavioral health program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 43. EXEMPTION. The sum of $335,000 from the general fund appropriated to the department for the purpose of providing a grant to an entity to develop a hyperbaric oxygen therapy pilot program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the grant to an entity to develop a hyperbaric oxygen therapy pilot program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 44. EXEMPTION. The sum of $572,000 from the strategic investment and improvements fund appropriated to the department for the purpose of a roof replacement project at the state hospital in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the roof replacement project at the state hospital during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 45. EXEMPTION. The amount appropriated for the development of the electronic visit verification project in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the electronic visit verification project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 46. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly for any expenditures that exceed appropriated amounts as a result of utilization rates or nursing home costs associated with the establishment of the new rate structure as provided in House Bill No. 1090 during the biennium beginning July 1, 2021, and ending June 30, 2023, if funding is not sufficient to pay actual expenses.

SECTION 47. REPORT TO LEGISLATIVE MANAGEMENT - EARLY AND PERIODIC SCREENING, DIAGNOSTIC, AND TREATMENT PROGRAM. During the 2021-22 interim, the department of human services shall conduct a study of the early and periodic screening, diagnostic, and treatment program and prepare a report. The department of human services may contract with a consultant to assist in the study and the preparation of the report. The report shall include data on the number, ages, and geographic locations of children receiving

screening, diagnostic, and treatment services; the capacity of the program to ensure all children who require screening, diagnostic, and treatment services are identified and receive services; data on the disposition of referrals of children who are screened and eligible for diagnostic and treatment services, including how many receive services and how many do not receive those services by county; an assessment of the program's efforts to provide comprehensive screening and treatment for children as required by federal law; an assessment of the deficits of the program's efforts to provide comprehensive screening and treatment as required by federal law; recommendations to ensure or expand services so that all eligible children are adequately served by the program; and additional data needed to assess the program accountability and efficiency. Before October 1, 2022, the department of human services shall provide the report to the legislative management.

SECTION 48. STATE HOSPITAL TREATMENT CAMPUS - REPORT TO LEGISLATIVE MANAGEMENT. During the 2021-22 interim, the department of human services, with the assistance of the state hospital's governing body, stakeholders, members of the legislative assembly, and consultants, shall ~~conduct a study and~~ prepare a report~~. The report must provide a cost-benefit analysis and available options and address the feasibility and desirability of closing the state hospital, renovating the state hospital, or building~~, including an architectural review and cost estimate to construct a new treatment campus to meet the health care needs of the state. Before October 1, 2022, the department of human services shall provide a~~the report to the legislative management~~ regarding the results of the study~~. Subdivision 3 of section 1 of this Act includes the sum of ~~$300,000~~$3,000,000 for the purpose of contracting with a consultant to assist in ~~the report and recommendation~~preparing the report and to develop detailed design plans for the construction of a new treatment campus.

~~**SECTION 35. BEHAVIORAL HEALTH SERVICES - REPORT TO LEGISLATIVE MANAGEMENT.** During the 2021-22 interim, the department of human services shall study the feasibility and desirability of implementing behavioral health services for the medical assistance expansion program through an administrative services organization. Subdivision 2 of section 1 of this Act includes the sum of $300,000 for the purpose of contracting with a consultant to assist in the study and to develop a plan to implement behavioral health services for the medical assistance expansion program through an administrative services organization. The~~

~~department of human services shall provide reports to the legislative management regarding the status and results of the study.~~

SECTION 49. REPORT TO LEGISLATIVE MANAGEMENT - REVISED PAYMENT METHODOLOGY FOR BASIC CARE FACILITIES. The department of human services shall develop a report for payment methodology revisions for basic care facilities that must include recommendations for:

1. Methods of reimbursement for basic care facility cost categories, including direct care, indirect care, room and board, and property; and
2. The feasibility of standardizing payments for basic care facilities in the same peer group.

Before October 1, 2022, the department shall present the report to the legislative management regarding the revised payment methodology. The estimated costs related to the implementation of the payment methodology revisions must be included in the department's 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 50. LEGISLATIVE MANAGEMENT REPORT - FOUR-YEAR OLD PROGRAM - EARLY CHILDHOOD GRANTS. During the 2021-22 interim, the department of human services shall provide reports to the legislative management regarding the status of four-year old program approvals, the North Dakota early childhood council, and the early childhood grant for best in class four-year old experiences.

SECTION 51. TRANSFER OF EMPLOYEES. The department of human services may use the identified twenty-seven full-time equivalent child care licensing positions of the human service zone transferred to the department pursuant to chapter 391 of the 2019 Session Laws for child care licensing, quality control, and early childhood administration.

SECTION 52. RETROACTIVE APPLICATION. Section 20 of this Act applies retroactively to July 1, 2020.

SECTION 53. EFFECTIVE DATE. ~~Section 17~~Sections 18 and 26 of this Act ~~becomes~~become effective January 1, 2022.

SECTION 54. EXPIRATION DATE. Section ~~14~~19 of this Act is effective through July 1, 2027, and after that date is ineffective.

SECTION 55. EMERGENCY. Section 3 of this Act ~~is~~and section 22 of Senate Bill No. 2086, as approved by the sixty-seventh legislative assembly, are declared to be an emergency measure.

2021 CONFERENCE COMMITTEE

HB 1012

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
4/19/2021 am
Conference Committee

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Chair Nelson Opened the meeting at 10:00 a.m.

Representative / Senator	Present	Absent
Rep Nelson	P	
Rep Kreidt	P	
Rep Mitskog	P	
Sen Dever	P	
Sen Hogue	P	
Sen Mathern	P	

Discussion Topics:

- **Changes to the House Version**

Chairman Nelson (10:01 am) introduced the bill

Senator Dever (10:02 am) went through the senate changes #11558

Representative Kreidt (10:05 am) explained the house changes

Senator Mathern (10:07 am) testified

Chair Nelson closed the meeting at 10:35 a.m.

Cole Fleck, Committee Clerk

- **Amendment Review**
- **Brain Injuries**
- **Supportive Housing**
- **Refuge Resettlement**
- **State Hospital Study**

Senator Mathern (9:30 am) testified #11575

Senator Dever (9:34 am) testified #11558

Additional Written Testimony: #11574

Chair Nelson closed the meeting at 10:02 a.m.

Cole Fleck, Committee Clerk

#11575

Prepared by the Legislative Council staff
for Senator Mathern
April 14, 2021

HOUSE BILL NO. 1012
LISTING OF PROPOSED CHANGES TO ENGROSSED BILL

1. Brain Injury - Mathern

Department of Human Services

Proposed funding changes:

	Description	FTE	General Fund	Special Funds	Total
1	Restore full funding removed in agency savings plan for brain injury services for 1915i realignment (The House restored $366,986 of the $622,274 reduction for brain injury services)		$255,288		$255,288
	Total proposed funding changes		$255,288	$0	$255,288

Other proposed changes: Add elimination of Sunset

2 Adjust a section added by the Senate relating to permanent supportive housing grants as detailed in Appendix A.

2. Housing – Mathern

SECTION 13. PERMANENT SUPPORTIVE HOUSING GRANTS.

Subdivision 2 of section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of human services shall ~~develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department, and authorize the department to conduct onsite visits to review program operations~~ distribute the funding with an equalizing per unit per month rate to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department, and authorize the department to conduct onsite visits to review program operations.

3. Refugee - Mathern

SECTION 15. REFUGEE RESETTLEMENT SERVICES. Subdivision 2 of section 1 of this Act includes the sum of $6,069,408 of federal funds for the refugee resettlement program. The department of human services shall work with the federal partners to explore adding more resettlement locations to the state with a goal of resettling 25% of refugees outside of the existing resettlement locations.

4. State Hospital - Mathern

21.0271.02024
Title.

Prepared by the Legislative Council staff for
Senator Mathern
April 19, 2021

PROPOSED AMENDMENTS TO ENGROSSED HOUSE BILL NO. 1012

That the Senate recede from its amendments as printed on pages 1650-1665 of the House Journal and pages 1375-1390 of the Senate Journal and that Engrossed House Bill No. 1012 be amended as follows:

Page 13, replace lines 19 through 28 with:

"**SECTION 32. REPORT TO LEGISLATIVE MANAGEMENT - STATEWIDE ACUTE PSYCHIATRIC AND RESIDENTIAL CARE NEEDS.** During the 2021-22 interim, the department of human services, with the assistance of the state hospital's governing body, stakeholders, members of the legislative assembly, and consultants, shall review the acute psychiatric and residential needs of the state and prepare a report. The report must include a fifty-year plan for acute psychiatric and residential care in the state that includes options to contract with private acute care facilities to provide services in at least the four largest cities in the state and options to replace the existing state hospital facility with a new sixteen-bed treatment campus focused on forensic psychiatric evaluation and treatment. Before October 1, 2022, the department of human services shall present the report to the legislative management. Subdivision 3 of section 1 of this Act includes the sum of $300,000 to develop architectural plans and for other planning costs for the construction of a new sixteen-bed state hospital treatment campus. The department of human services shall seek Medicaid plan amendments or Medicaid waivers to allow federal funding reimbursement for services provided in institutions for mental diseases to Medicaid beneficiaries between the ages of twenty-one and sixty-four."

Renumber accordingly

Department of Human Services - House Bill No. 1012 Other Sections

	House Version	Senate Version
Deficiency appropriation	Section 3 appropriates $333,333 from the DHS operating fund during the 2019-21 biennium for a grant to a political subdivision for a portion of the cost of purchasing a firetruck.	Section 3 appropriates $333,333 from the DHS operating fund during the 2019-21 biennium for a grant to a political subdivision for a portion of the cost of purchasing a firetruck.
State Department of Health appropriation	Not included	Section 4 appropriates $281,715 from the general fund and $281,715 from other funds to the State Department of Health for a grant to the Task Force on Prevention of Sexual Abuse of Children.
Line item transfers	Section 4 allows DHS to transfer appropriation authority between line items within subdivisions 1 through 3 of Section 1. Section 5 allows DHS to transfer appropriation authority from line items within subdivisions 1 through 3 of Section 1 to subdivision 4 of Section 1.	Section 5 allows DHS to transfer appropriation authority between line items within subdivisions 1 through 3 of Section 1. Section 6 allows DHS to transfer appropriation authority from line items within subdivisions 1 through 3 of Section 1 to subdivision 4 of Section 1.
Aging Services FTE position	Section 6 identifies 1 FTE position in the Aging Services program is for the administration of services resulting from a federal Department of Justice lawsuit settlement and the position is authorized only for the 2021-23 biennium.	Section 7 identifies 1 FTE position in the Aging Services program is for the administration of services resulting from a federal Department of Justice lawsuit settlement and the position is authorized only for the 2021-23 biennium.
Human service finance fund	Section 7 identifies $187,385,888 of the appropriation for the county social and human service project is from the human service finance fund.	Section 8 identifies $187,223,092 of the appropriation for the county social and human service project is from the human service finance fund.
Community health trust fund	Section 8 identifies $24 million of the appropriation for the Medical Services Division is from the community health trust fund.	Section 9 identifies $24 million of the appropriation for the Medical Services Division is from the community health trust fund.
Health care trust fund	Section 9 identifies $1 million of the appropriation for long-term care is from the health care trust fund for nursing facility operating margin adjustments.	Section 10 identifies $1 million of the appropriation for long-term care is from the health care trust fund for nursing facility operating margin adjustments.
Capital projects and payments	Section 10 authorizes the payment of special assessments at the State Hospital and Life Skills and Transition Center. Section 11 authorizes the demolition of the chapel and employee building at the State Hospital. The section also allows DHS to transfer funds from other line items to pay for the demolition of the buildings and other emergency capital projects.	Section 11 authorizes the payment of special assessments at the State Hospital and Life Skills and Transition Center. Section 12 authorizes the demolition of the chapel, administrative building, and employee building at the State Hospital. The section also allows DHS to transfer funds from other line items to pay for the demolition of the buildings and other emergency capital projects.
Permanent supportive housing grants	Not included	Section 13 identifies funding to be provided for permanent supportive housing grants and requires DHS to develop a funding methodology to distribute the funds.
Emergency stabilization grants	Not included	Section 14 identifies $125,000 from the general fund to be used for emergency stabilization grants for newly licensed developmental disability providers.
Refugee resettlement	Not included	Section 15 identifies funding to be used for refugee resettlement and provides for at least 25 percent of new refugees to be resettled in areas of the state outside of the three most populous counties.
Life Skills and Transition Center transition of individuals	Not included	Section 16 identifies funding from federal or other sources that is to be used to assist in the transition of individuals from the Life Skills and Transition Center to private providers.

Legislative intent - Provider rates	Section 31 provides legislative intent that DHS seek a deficiency appropriation from the 68th Legislative Assembly if developmental disability provider funding is not sufficient to pay actual expenses.	Section 46 provides legislative intent that DHS seek a deficiency appropriation from the 68th Legislative Assembly if provider funding is not sufficient to pay actual expenses.
Early and Periodic Screening, Diagnostic, and Treatment Program	Not included	Section 47 provides for DHS to study the Early and Periodic Screening, Diagnostic, and Treatment Program.
State Hospital complex study	Section 32 provides for DHS to conduct a study of the State Hospital complex and to provide a report to the Legislative Management regarding the results of the study.	Section 48 provides for DHS to conduct a study of the State Hospital complex and to develop detailed design plans for a new State Hospital.
Medicaid Expansion behavioral health services	Section 33 provides for DHS to conduct a study of the feasibility and desirability of implementing behavioral health services for the Medicaid Expansion program through an administrative services organization.	Not included
Basic care facility rates	Not included	Section 49 requires DHS to develop a new payment methodology for basic care payment rates.
Four-year old program	Not included	Section 50 provides for DHS to report to the Legislative Management regarding the status of the implementation of the new four-year old program.
Transfer of employees	Not included	Section 51 authorizes DHS to utilize child care licensing employees for other duties.
Human services zone funds	Not included	Section 55 declares Section 22 of Senate Bill No. 2086, relating to human service zone fund balances, to be an emergency measure.

HB 1012 – Behavioral Health
April 20, 2021

EPSDT Study

We are requesting an amendment for the North Dakota legislature to conduct a study to determine if North Dakota is fully implementing the Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) benefit under Medicaid, or as it is known in North Dakota, "Health Tracks." EPSDT provides comprehensive and preventive health care services for children under age 21 who are enrolled in Medicaid. EPSDT is key to ensuring that children and adolescents receive appropriate preventive, dental, mental health, and developmental, and specialty services. When EPSDT is fully implemented, it can provide children and families vital services, including access to medically necessary treatment.

Safe Beds

We would like safe beds to return to the Bismarck region. Safe beds are a safe place for a child to deescalate and function as an alternative to costly hospitalization. In the last year, safe beds were no longer available for children with mental health disorders in a mental health crisis. As a result, the only options many families have are: a) do nothing, b) hospitalize their child, c) call law enforcement.

Children and Family Services has agreed to take on the responsibility for providing safe bed services through the use of shelter beds throughout the state.

Peer Support

In the 2019 Session, Maggie Anderson presented information on peer support and the 1915(i) for SB 2012. As passed by the Legislature, the budget included peer support "for those not eligible for 1915(i) services" (a total of $304,784, half federal and half State) as well as separate funds for those 1915(i) eligible. While things are "moving" for the 1915(i), per Caprice Knapp, nothing is happening to implement peer support for those not 1915(i) eligible. When I asked her about this, she said, "I have no

staff, no money, and no time". Individuals with mental illness have been advocating for peer support for years. This is a priority for them. Questions for DHS: 1) why has this not happened? 2) where is the money that was allocated? 3) what is funded for next biennium for peer support for non-1915(i) eligible individuals? 4) what about Legislative intent?

The Department recently agreed they were funded for non-1915(i) peer supports in Medicaid and that they will move forward with this activity this biennium (2019-2021).

Family Support

Contracts were reduced significantly in the executive version of HB 1012 for the Federation of Families for Children's Mental Health and Family Voices of ND. Some funds were restored by the House but these contracts are skimpy to begin with as is one of the Early Intervention programs, "Experienced Parents". This one is in the DD budget and was cut completely. All of these programs should be prioritized for continued full funding into 21-23. Families would be lost without them.

Supported Housing

In the executive version of HB 1012, DHS decreased funding for Cooper House, LaGrave on First, Prairie Harvest, and Gerridee's. We believe DHS thought the individuals served would be eligible for the 1915(i) and could then draw down a federal match. The House restored some of the money. It has come to light that many, if not most, of these individuals will not be 1915(i) eligible. Without supported housing, many will be at risk and will not be successful living in the community. Full funding should be considered for these programs.

Autism Voucher

DHS put in a bill (SB 2089) to repeal the ASD Voucher with no discussion with the Governor's ASD Task Force. It removed all monies for the Voucher from HB 1012. Senate Human Services turned SB 2089 into a study but replaced the ~ $1.3 million with only $300,000. The Task Force opposes the repeal and submitted amendments to House Human Services to make the Voucher more family-friendly (also shared with Senate Appropriations - testimony by Holly Johnson). The Voucher should be funded at $1.3 million with the amendments from the Task Force. [NOTE: The population at the LSTC is now over 50% adults and youth with a diagnosis of autism.]

Supported Employment
We would like Supported Employment services for people with mental illness to have their budgets restored from the cuts that were slated under "1915(i) Savings." Supported Employment (SEP) services assist individuals to obtain and keep competitive employment at or above the minimum wage. Ongoing follow-along support is available for an indefinite period as needed by the individual to maintain their paid competitive employment position. Individuals with serious mental illness rely on supported employment services so that they can maintain employment and can maintain living in the community. The proposed budget made significant cuts to those program areas, with some initial requests to eliminate entire programs. While some has been discussed to be restored to allow providers time to become Medicaid providers, it does not account for the fact that some of those individuals with serious mental illness will not meet the eligibility requirements of the 1915(i). We also want to make sure that individuals who receive supported employment services under the 1915(i) continue to receive ongoing and continuous SEP services as they earn and maintain their employment wages.

Voluntary Placement Dollars
We would like a restoration of the dollars allocated to the Voluntary Treatment program. The Governor's proposed budget cuts the voluntary treatment program from its previous budget of $533,440 to a proposed 2021-2023 budget of $453,424. With the creation of the voluntary treatment program, parents were no longer required to relinquish custody of their children in order to receive treatment that would be provided in that residential treatment facility. During the last legislative session, the voluntary treatment program was given the flexibility to provide services to children in order to prevent an out-of-home placement. The voluntary treatment program is essential in families being able to maintain custody of their children and provide linkages to community-based services.

Maintenance of this program is in keeping with an *Olmstead*-savvy behavioral health system in North Dakota.

State Hospital
As Dr. Etherington has shared, many studies have already been completed regarding building of a new State Hospital (see binder she gave Sen. Appropriations). All advocacy organizations that have taken a position on this matter are supporting the building of a new State Hospital in conjunction with 8-10 new behavioral health beds in the western part of the State. Dr. Etherington has shared a funding plan

that does not require new monies for this however, if a new facility is not built, there will be significant monies needed for repair and maintenance of existing buildings. Action is recommended to move forward with authorization of a new State Hospital.

1915(i) – Legis. intent language re WHODAS score (future)
We would like there to be legislative intent raised regarding the WHODAS score that is used to determine eligibility for services under the 1915(i) State Plan Amendment. We would like that the legislature direct the Department of Human Services to conduct multi-stakeholder meetings (that include consumers and family members) to evaluate the WHODAS score threshold used to determine eligibility for services under the 1915(i) and lower the score, if necessary, to ensure individuals with Serious Mental Illness (SMI) and Serious Emotional Disturbance (SED) are not losing the invaluable services to meet their needs. This would also serve to benefit North Dakota as it seeks to maximize federal dollars in providing services to those in need.

Definition of Serious Emotional Disturbance (SED):

> A diagnosable mental, behavioral, or emotional disorder in the past year, which resulted in functional impairment that substantially interferes with or limits the child's role or functioning in family, school, or community activities.

-Approximate number of North Dakotans with SED (2019): 18,125.

Definition of Serious Mental Illness (SMI):

> Someone over 18 having (within the past year) a diagnosable mental, behavior, or emotional disorder that causes serious functional impairment that substantially interferes with or limits one or more major life activities.

-Approximate number of North Dakotans with SMI (2019): 30,258

-North Dakota 1915(i) Application set eligibility at a WHODAS score of 50 or above. With those parameters, the Department of Human Services anticipated that the number served between SUD, SED, SMI, TBI was 11,150.

Brain Injury Network
Brain injury services and programs were cut significantly in the executive budget, some related to expected federal matches through the 1915(i). The House restored some of the funds noting the 1915(i) may not provide funding for many of the individuals. Still, ND has

little in the way of services for individuals with a brain injury – any reductions will mean even less for supports. Relevant are the NDBIN, pre-vocational program, and the return to work program with a total reduction, after HB 1012 was passed by the House, of over a $¼ million. Consideration is requested to restore all of the funds cut for brain injury services and support.

It is suggested that, while giving DHS flexibility with funding items, there is also accountability for Legislative intent. Examples include the ASD Voucher; ASD training funds (the ASD Task Force did not know there was $90,000+ for this); and peer support. Where has the money gone that was authorized for these things?

IMD Exclusion Waiver

MHAN stands opposed to any attempts to move forward with an IMD Exclusion Waiver for behavioral health services. Since the Goodrick, Daniels, and Goodrick report of 1988, the state of North Dakota has been repeatedly advised by its own consultants to reduce our reliance on institutional placements to provide mental health services to the citizens of North Dakota. North Dakota has had a consistent record of spending most of its mental health dollars on institutional settings instead of providing community-based services.

As institutional facilities are far more expensive than community-based programs, funding that goes to institutional placements is ultimately funding that inhibits the creation and maintenance of a functioning community-based service delivery system.

After the 1999 *Olmstead* decision, states have been required to give citizens access to community-based services before requiring that they seek only institutional care. The Schulte Report of 2014 and the HSRI Report of 2018 have warned that North Dakota is not meeting federal requirements in providing community-based mental health services under *Olmstead* and the Americans with Disabilities Act.

In 1976, the state of North Dakota said that its vision for mental health services was that every citizen of North Dakota have access to the right services, at the right time, and nearest their home as possible. The citizens of North Dakota agree with that vision, and that vision is also required under the Americans with Disabilities Act. As we continue to advocate for the state of North Dakota to meet its

requirements under federal law, we also strenuously object to any effort to further incentivize institutionalization.

PROPOSED AMENDMENTS TO ENGROSSED HOUSE BILL NO. 1012

That the Senate recede from its amendments as printed on pages 1650-1665 of the House Journal and pages 1375-1390 of the Senate Journal and that Engrossed House Bill No. 1012 be amended as follows:

Page 1, line 4, replace the second "and" with ", 50-24.1-02.7, 50-24.1-31, and"

Page 1, line 5, replace "and" with a comma

Page 1, line 5, after the second "program" insert ", and Medicaid coverage for workers with disability coverage and families of children with disabilities"

Page 9, after line 13, insert:

"**SECTION 16. AMENDMENT.** Section 50-24.1-02.7 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-02.7. Workers with disabilities coverage.

The department shall establish and implement a buyin program to provide medical assistance to an individual who, except for substantial gainful activity, meets the definition of disabled under the supplemental security income program under title XVI of the federal Social Security Act, who is at least sixteen but less than sixty-five years of age, and who is gainfully employed. The program must:

1. Be made available to an individual with a disability who is a member of a household with a net income less than two hundred twenty-five percent of the most recently revised official poverty line published by the federal office of management and budget applicable to the household size;

2. Allow up to an additional ten thousand dollars in assets;

3. Require the payment of a premium that is based upon a sliding scale which may not be less than two and one-half percent nor more than seven and one-half percent of the individual's gross countable income;

4. Include a one-time program enrollment fee of one hundred dollars; ~~and~~

5. Provide that the failure of an enrolled individual to pay premiums for three months may result in the termination of enrollment in the program; and

6. Not require the payment of a premium or enrollment fee or disenroll an individual for failure to pay a premium or enrollment fee for workers with disabilities coverage during a federally declared emergency if collection of the premium or enrollment fee may impact the receipt of federal funds.

SECTION 17. AMENDMENT. Section 50-24.1-31 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-31. Optional medical assistance for families of children with disabilities.

1. The department shall establish and implement a buyin program under the federal Family Opportunity Act enacted as part of the Deficit Reduction Act of 2005 [Pub. L. 109-171; 120 Stat. 4; 42 U.S.C. 1396] to provide medical assistance and other health coverage options to families of children with disabilities and whose net income does not exceed two hundred fifty percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department may not require the payment of a premium or disenroll an individual for failure to pay a premium for families of children with disabilities coverage during a federal declared emergency if collection of the premium may impact the receipt of federal funds."

That the Senate recede from its amendments as printed on pages 1650-1665 of the House Journal and pages 1375-1390 of the Senate Journal and that Engrossed House Bill No. 1012 be amended as follows:

Page 13, replace lines 19 through 28 with:

"SECTION 32. APPROPRIATION - LEGISLATIVE MANAGEMENT STUDY - STATEWIDE ACUTE PSYCHIATRIC AND RESIDENTIAL CARE NEEDS.

1. During the 2021-22 interim, the legislative management shall study the acute psychiatric hospitalization and related step down residential treatment and support needs of individuals with mental illness. As part of the study, the legislative management shall gather input from stakeholders and other groups, including private hospitals, the department of human services, and mental health advocates. The legislative management shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-eighth legislative assembly.

2. The study must review options for a long-term plan for acute psychiatric hospitalization and related step down residential treatment and support needs in the state and short-term options during the next two bienniums to contract with private provider acute psychiatric care facilities to provide treatment services in four or more cities in the state, workforce needs of such specific locations, and options to replace the existing state hospital facility with one or more sixteen-bed treatment facilities focused on forensic psychiatric evaluation and treatment in a manner that the facility be exempt from the federal institutions for mental diseases exclusion.

3. The legislative management may obtain consulting services to develop recommendations for private provider contracts, treatment requirements and outcome measures, locations in the state including private and public facilities, disposition and changes of the present state hospital, draft architectural plans and planning costs for the construction of one new sixteen-bed state hospital forensic evaluation treatment facility, and narrative description of a future facility should the need for one be projected.

4. The department of human services shall provide to the consultants and a legislative management committee a complete description of other outpatient and inpatient private and public behavioral health services, including substance use disorder facilities, existing in the state to prevent acute behavioral health hospitalization and to support patients following discharge from psychiatric hospitalization and related residential care.

5. The department of human services shall seek Medicaid plan amendments or Medicaid waivers to allow federal funding reimbursement for services

provided in institutions for mental diseases to Medicaid beneficiaries between the ages of twenty-one and sixty-four.

6. There is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of $200,000, or so much of the sum as may be necessary, to the legislative management for consulting services for the study identified in this section, for the biennium beginning July 1, 2021, and ending June 30, 2023."

PROPOSED AMENDMENTS TO ENGROSSED HOUSE BILL NO. 1012

That the Senate recede from its amendments as printed on pages 1650-1665 of the House Journal and pages 1375-1390 of the Senate Journal and that Engrossed House Bill No. 1012 be amended as follows:

Page 13, after line 18, insert:

"**SECTION 32. REPORT TO LEGISLATIVE MANAGEMENT - REVISED PAYMENT METHODOLOGY FOR BASIC CARE FACILITIES.** The department of human services, in collaboration with basic care providers and other representatives of the basic care industry, shall develop a report for payment methodology revisions for basic care facilities that must include recommendations for:

1. Methods of reimbursement for basic care facility cost categories, including direct care, indirect care, room and board, and property; and

2. The feasibility of standardizing payments for basic care facilities in the same peer group.

Before October 1, 2022, the department shall present the report to the legislative management regarding the revised payment methodology. The estimated costs related to the implementation of the payment methodology revisions must be included in the department's 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly."

Renumber accordingly

Information Supplement to Childcare Aware, Bright & Early and Growing Futures

The purpose of the document is to provide supplementary informant to the discussion on adding 33 full-time FTE's to the state payroll. These employees are currently temporary employees contracted through Human Services. They were previously employed by Lutheran Social Services in Fargo, until their bankruptcy/reorganization.

As you move forward in the decision there are three additional pieces to the puzzle which are important:

1) **HB 1416 (passed & signed)** – allows for the following:
    a. A school board / district to set-up a four-year old program that is approved by the department of human services.
    b. Defines four-year old program approval process
    c. Eliminates current early childhood education program in Dept. of Commerce
    d. Makes changes in early childhood council
2) **HB 1466 (passed & signed)** – allows for the following:
    a. Allows for the submission of an application for **"best in class four-year old experience"** grant.
    b. The annual award for grant is $120,000 per approved group size (14) and there is a $20,000 matching component for this grant.
    c. It requires the department to assign a program support coach to each approved program.
    d. Allows for any program including church, business or organization that operates a four-year-old program.
    e. Fiscal not provides for the following:
        i. 4.8 million for 20 programs at $120,000 (3.3 million from DPI fed funds and 1.5 million from the Commerce department)
        ii. Provides $120,000 for evaluation or data and outcome analysis
        iii. .2 FTE for administration of grant funding ($28,000)
        iv. 3 FTE to support approved 4-year old program ($510,00)
3) **SB 2018 (In House with changes)** allows for the following:
    a. The current 1.5 million moves from Commerce to the Department of Human Services

Full-time Employee summary from LSS to DHS

There are two components to these 33 FTE's which DHS would like to make permanent.

Regulatory four-year old program:

The first component is **regulatory**. The **4 staff** from **Bright and Early** are the individuals who will do the accreditation for the $120,000 in "best in class 4-year old experiences" grant.

In addition to the Bright and Early **regulatory component** is the **Growing Futures database/registry**. This group manages the workforce registry that tracks training and qualifications of childcare providers, as a component of licensing.

Technical Supports to Childcare Providers (Coaching, Training and various Supports)

Childcare Aware has 26 temporary positions and currently 24 are filled. The two vacant positions are CCA positions. There are a variety of positions including coaches, inclusion specialists that serve providers and families. This could include a variety of health and safety resources.

Questions to be asked:

Why should the Regulatory organization (DHS) do the technical support for these agencies too?

In HB 1466 there is an allocation for $510,000 and 3 FTE to support approved four-year old programs. Isn't that what Bright & Early (4 FTE) and the Growing Futures (3 FTE) would do? According the Dept. of Public Instruction, that's what Bright & Early does is the accreditation. They would continue to do that for the best-in class 4-year old grant.

There is between $600,000 -$800,000 left over from previous 4 year old program? How is that added back into budget at DHS?

How do all the administration fees, office rental etc... Tie into current budget submitted to DHS?

I could ask about 10 more questions.... But will wait until after I visit with the both of you...

ENGROSSED HOUSE BILL NO. 1012
APPROVED CONFERENCE COMMITTEE CHANGES TO SENATE VERSION

Department of Human Services

Approved changes to Senate version:

	Description	FTE	General Fund	Special Funds	Total
1	Reduce the amount restored for developmental disability provider rates to $4.2 million, of which $4 million is from the general fund.		($3,240,000)	($3,710,000)	($6,950,000)
2	Adjust SUD voucher funding to provide a total of $15 million and reduce SUD grant funding to $2 million.		(3,000,000)		(3,000,000)
3	Reduce operating expenses by $2 million rather than $8.4 million as provided in the House version.		(2,000,000)		(2,000,000)
4	Remove other funds authority added by the Senate for costs to transition individuals from the Life Skills and Transition Center. Replace Section 16 with a section of legislative intent that DHS seek an appropriation from any available funds at a future special legislative session for transition costs.			(5,200,000)	(5,200,000)
5	Reduce funding for the State Hospital study to $500,000 and provide for the study to be a Legislative Management study.		(2,500,000)		(2,500,000)
6	Appropriate funding from the capitol building fund to the Office of Management and Budget for an Americans with Disabilities Act consultant.			25,000	25,000
7	Add funding from coronavirus relief fund for community behavioral health ($1,750,000) and senior nutrition services ($2,457,638) including a general fund offset of $1 million.		(1,000,000)	4,207,638	3,207,638
	Total approved funding changes		($11,740,000)	($4,677,362)	($16,417,362)

Other approved changes:

8 Adjust section 46 to provide for DHS to seek a deficiency appropriation if funding for developmental disability provider payments is not sufficient under the new payment system.

9 Amend section 21 to adjust the amount of SUD voucher payments that may be allocated to residential providers to forty-five percent and adjust section 19 to reduce the number of SUD grants from 3 to 2.

10 Add a section for quarterly Budget Section reports regarding SUD vouchers.

11 Amend two sections of statute to provide that an individual may not be disenrolled from specific programs during a federal emergency. Declare the sections to be an emergency measure.

12 Add a section to provide for DHS to reduce developmental disability provider reimbursement rates for the 2021-23 biennium by $6.95 million.

13 Add a section to provide for person-first language to be used in legislative drafting.

14 Adjust language added by the Senate relating to refugee resettlement services.

15 Adjust language added by the Senate relating to the development of a revised payment methodology for basic care to include representatives of the basic care industry.

16 Add a section to restrict DHS from spending any general fund savings resulting from any enhancements to the federal medical assistance percentage during the 2021-23 biennium.

17 Add a section that supported employment funding is to be used during the 2021-23 biennium to continue contracts with existing evidence based supported employment providers and that any available 1915(i) funding is to be utilized before general fund appropriations.

"**SECTION 4. APPROPRIATION - STATE DEPARTMENT OF HEALTH.** There is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of $281,715, or so much of the sum as may be necessary, and the sum of $281,715 from special funds derived from grants, donations, and other income, to the state department of health for the purpose of providing a grant to the task force on the prevention of sexual abuse of children for staff and programming materials focused on primary prevention activities, for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 5. APPROPRIATION - LEGISLATIVE MANAGEMENT STUDY - STATEWIDE ACUTE PSYCHIATRIC AND RESIDENTIAL CARE NEEDS.

1. During the 2021-22 interim, the legislative management shall study the acute psychiatric hospitalization and related step down residential treatment and support needs of individuals with mental illness. The legislative management shall create an acute psychiatric treatment committee consisting of eight members to conduct the study. The legislative management chairman shall designate the committee chairman and vice chairman and the legislative council shall provide staff services for the committee. The committee must complete the study by October 1, 2022.

2. As part of the study, the committee shall gather input from stakeholders and other groups, including private hospitals, the department of human services, and mental health advocates.

3. The study must review options for a long-term plan for acute psychiatric hospitalization and related step down residential treatment and support needs in the state and short-term options during the next two bienniums to contract with private provider acute psychiatric care facilities to provide treatment services in four or more cities in the state, workforce needs of such specific locations, and options to replace the existing state hospital facility with one or more treatment facilities focused on forensic psychiatric evaluation and treatment.

4. The committee, with the approval of the legislative management, may obtain consulting services to determine the total number of acute care beds needed in the state and to develop recommendations for private provider contracts, treatment requirements and outcome measures, locations in the state, including private and public facilities, the future use of facilities at the state hospital campus including the LaHaug building, and other items identified in subsection 3. The consulting services may also develop conceptual drawings for recommendations for a new state hospital.

DE
4 of 24
4/29/21

5. The department of human services shall provide to the consultants and the committee a complete description of other outpatient and inpatient private and public behavioral health services, including substance use disorder facilities, existing in the state to prevent acute behavioral health hospitalization and to support patients following discharge from psychiatric hospitalization and related residential care.

6. The department of human services shall seek Medicaid plan amendments or Medicaid waivers to allow federal funding reimbursement for services provided in institutions for mental diseases to Medicaid beneficiaries between the ages of twenty-one and sixty-four.

7. The legislative management shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-eighth legislative assembly.

8. There is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of $500,000, or so much of the sum as may be necessary, to the legislative council for consulting services for the study identified in this section, for the period beginning with the effective date of this section, and ending June 30, 2023. The funding appropriated in the section is considered a one-time funding item.

SECTION 6. APPROPRIATION - OFFICE OF MANAGEMENT AND BUDGET - CAPITOL BUILDING FUND. There is appropriated out of any moneys in the capitol building fund in the state treasury, not otherwise appropriated, the sum of $25,000, or so much of the sum as may be necessary, to the office of management and budget for the purpose of utilizing a consultant to determine the compliance of the capitol building with 2010 Americans with Disabilities Act standards, for the biennium beginning July 1, 2021, and ending June 30, 2023. The funding appropriated in this section is considered a one-time funding item.

SECTION 7. SPENDING RESTRICTION - 2021-23 BIENNIUM - FEDERAL MEDICAL ASSISTANCE PERCENTAGE. The department of human services may not spend any general fund savings resulting from federal enhancements or adjustments that cause the federal medical assistance percentage to exceed the rates used by the sixty-seventh legislative assembly for budgeting purposes for the biennium beginning July 1, 2021, and ending June 30, 2023."

Page 5, line 1, after "**SERVICES**" insert "**- LEGISLATIVE INTENT**"

Page 5, line 5, after the period insert "It is the intent of the sixty-seventh legislative assembly that future legislative assemblies retain and exercise unfettered discretion to appropriate funds as they deem appropriate without regard to the federal department of justice lawsuit settlement.

SECTION 11. TRANSFER OF APPROPRIATION AUTHORITY. Section 1 of this Act includes appropriation authority for the department of human services for the biennium beginning July 1, 2021, and ending June 30, 2023. On September 1, 2022, in accordance with provisions of House Bill No. 1247, as approved by the sixty-seventh legislative assembly, the office of management and budget shall transfer remaining appropriation authority contained in section 1 of this Act, and any remaining appropriation authority for the department of human services in other bills approved by the sixty-seventh legislative assembly, to the department of health and human services. The appropriation authority in section 1 of this Act and appropriation authority for the

DA
5 of 24
4/29/21

department of human services from any other bill that is transferred to the department of health and human services must be maintained and reported separately from other appropriation authority transferred to the department of health and human services.

SECTION 12. ESTIMATED INCOME - FEDERAL CORONAVIRUS RELIEF FUND. The estimated income line item in subdivision 2 of section 1 of this Act includes the sum of $2,457,638 from the federal coronavirus relief fund for senior nutrition services and the sum of $1,750,000 from the federal coronavirus relief fund for the community behavioral health program."

Page 5, line 7, replace "$187,385,888" with "$187,223,092"

Page 5, line 11, replace "$24,000,000" with "$31,500,000"

Page 5, line 20, remove "**STATE HOSPITAL -**"

Page 5, line 22, after "chapel" insert ", administrative building,"

Page 5, line 23, replace "4" with "8"

Page 5, after line 29, insert:

"**SECTION 18. PERMANENT SUPPORTIVE HOUSING GRANTS.** Subdivision 2 of section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department, and authorize the department to conduct onsite visits to review program operations.

SECTION 19. EMERGENCY STABILIZATION GRANTS - DEVELOPMENTAL DISABILITIES WAIVER.

1. Subdivision 2 of subsection 1 of this Act includes the sum of $125,000 from the general fund for the purpose of providing emergency stabilization grants to developmental disability in-home support providers to support the sustainability of newly licensed providers within the developmental disability provider network. To be eligible to receive an emergency stabilization grant, a licensed developmental disability in-home support provider must be in operation as of October 1, 2020, with an initial license date of October 15, 2015, or later, and comply with grant requirements established by the department of human services. The requirements of chapter 54-44.4 do not apply to the selection of a grantee, the grant award, or payments made under this section.

2. The department of human services shall include in-home support providers in future appendix K applications, to allow eligibility for retainer payments in a manner equivalent to day support services.

SECTION 20. REFUGEE RESETTLEMENT SERVICES - LEGISLATIVE MANAGEMENT REPORT. Subdivision 2 of section 1 of this Act includes the sum of $6,069,408 of federal funds for the refugee resettlement program. The department of human services shall collaborate with applicable federal and private placement agencies to develop a plan to resettle refugees in at least five geographically diverse communities in the state outside of the existing resettlement communities with a goal of resettling twenty-five percent of new refugees outside of existing resettlement

communities. During the 2021-22 interim, the department of human services shall provide a report to the legislative management regarding refugee resettlement services."

Page 7, replace lines 15 through 19 with:

"SECTION 22. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:

   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.

   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.

   c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915(i) state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers,

DA 7034 4/29

federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

SECTION 23. A new section to chapter 1-02 of the North Dakota Century Code is created and enacted as follows:

Person-first language

The provisions of this code, unless the context otherwise requires, must be construed in person-first language and any new enactments of this code must be written in person-first language."

Page 8, line 9, replace "three" with "two"

Page 8, remove lines 19 through 31

Page 9, replace lines 1 through 13 with:

"**SECTION 25. AMENDMENT.** Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, ~~and~~ hospital- or medical clinic-based programs for medical management of withdrawal~~.~~, and any institution for mental diseases in accordance with subsection 2.

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting

vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

DA 80824 4/29/21

SECTION 26. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, hospital- or medical clinic-based programs for medical management of withdrawal, and any institution for mental diseases in accordance with subsection 2.

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

4. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. No more than forty-five percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 27. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Behavioral health bed management system.

The department shall establish and maintain a behavioral health bed management system to improve utilization of behavioral health bed capacity. Public and private providers of residential or inpatient behavioral health services shall participate in and report daily to the department the information and documentation necessary to maintain the behavioral health bed management system in the form and manner prescribed by the department.

SECTION 28. AMENDMENT. Section 50-11.1-14 of the North Dakota Century Code is amended and reenacted as follows:

50-11.1-14. Workforce development.

1. The department may establish a statewide system to build systematic early childhood workforce voluntary training which may include distance learning formats, a professional registry, certificates, and specializations.

2. The department may charge reasonable fees for all training and development courses to offset costs. All fees collected under this section must be paid to the department or the department's authorized agent and must be used to defray the cost of providing training and development courses to providers and staff members of early childhood services.

SECTION 29. A new paragraph to subdivision l of subsection 1 of section 50-11.1-22 of the North Dakota Century Code, as created by section 8 of House Bill No. 1416, as approved by the sixty-seventh legislative assembly, is created and enacted as follows:

A special education director;

SECTION 30. AMENDMENT. Section 50-24.1-02.7 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-02.7. Workers with disabilities coverage.

The department shall establish and implement a buyin program to provide medical assistance to an individual who, except for substantial gainful activity, meets the definition of disabled under the supplemental security income program under title XVI of the federal Social Security Act, who is at least sixteen but less than sixty-five years of age, and who is gainfully employed. The program ~~must~~:

1. ~~Be~~Must be made available to an individual with a disability who is a member of a household with a net income less than two hundred twenty-five percent of the most recently revised official poverty line published by the federal office of management and budget applicable to the household size;

2. ~~Allow~~Must allow up to an additional ten thousand dollars in assets;

3. ~~Require~~Must require the payment of a premium that is based upon a sliding scale which may not be less than two and one-half percent nor more than seven and one-half percent of the individual's gross countable income;

4. ~~Include~~Must include a one-time program enrollment fee of one hundred dollars; ~~and~~

5. ~~Provide~~Must provide that the failure of an enrolled individual to pay premiums for three months may result in the termination of enrollment in the program; and

6. May not require the payment of a premium or enrollment fee or disenroll an individual for failure to pay a premium or enrollment fee for workers with disabilities coverage during a federally declared emergency if collection of the premium or enrollment fee may impact the receipt of federal funds.

SECTION 31. AMENDMENT. Section 50-24.1-31 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-31. Optional medical assistance for families of children with disabilities.

1. The department shall establish and implement a buyin program under the federal Family Opportunity Act enacted as part of the Deficit Reduction Act of 2005 [Pub. L. 109-171; 120 Stat. 4; 42 U.S.C. 1396] to provide medical assistance and other health coverage options to families of children with disabilities and whose net income does not exceed two hundred fifty percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department may not require the payment of a premium or disenroll an individual for failure to pay a premium for families of children with disabilities coverage during a federally declared emergency if collection of the premium may impact the receipt of federal funds."

SECTION 48. EXEMPTION. The sum of $750,000 from the general fund appropriated to the department of human services for the purpose of providing suicide prevention grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the suicide prevention grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 49. EXEMPTION. The sum of $3,000,000 from the general fund appropriated to the department of human services for the purpose of providing a community behavioral health program to provide comprehensive community-based services for individuals who have serious behavioral health conditions in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the community behavioral health program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 50. EXEMPTION. The sum of $335,000 from the general fund appropriated to the department of human services for the purpose of providing a grant to an entity to develop a hyperbaric oxygen therapy pilot program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the grant to an entity to develop a hyperbaric oxygen therapy pilot program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 51. EXEMPTION. The sum of $572,000 from the strategic investment and improvements fund appropriated to the department of human services for the purpose of a roof replacement project at the state hospital in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the roof replacement project at the state hospital during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 52. EXEMPTION. The amount appropriated for the development of the electronic visit verification project in chapter 11 of the 2017 Session Laws is not subject

DA
12084
4/29/2

to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the electronic visit verification project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 53. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly for any expenditures that exceed appropriated amounts as a result of utilization rates, nursing home costs associated with the establishment of the new rate structure as provided in House Bill No. 1090, or developmental disability provider reimbursement rate adjustments, during the biennium beginning July 1, 2021, and ending June 30, 2023, if funding is not sufficient to pay actual expenses.

SECTION 54. DEVELOPMENTAL DISABILITY PROVIDER RATES. By July 1, 2021, the department of human services, in consultation with the developmental disabilities payment steering committee, shall identify $6,950,000 in reductions to be made to payment rates for intermediate care facilities and residential services for individuals with developmental disabilities, for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 55. LEGISLATIVE INTENT - STATE FISCAL RECOVERY FUND OR OTHER FUNDS - TRANSITION OF INDIVIDUALS FROM LIFE SKILLS AND TRANSITION CENTER. It is the intent of the sixty-seventh legislative assembly that the department of human services seek an appropriation during any special session of the sixty-seventh legislative assembly from the state fiscal recovery fund received through H.R. 1319 of the 117th Congress, also known as the federal American Rescue Plan Act, or from any eligible federal or other funds made available to the department, for the purpose of transitioning individuals from the life skills and transition center to community-based providers.

SECTION 56. LEGISLATIVE INTENT - SUPPORTED EMPLOYMENT FUNDING. It is the intent of the sixty-seventh legislative assembly that funding appropriated from the general fund for supported employment in section 1 of this Act be used to continue contracts with existing evidence-based supported employment providers during the biennium beginning July 1, 2021, and ending June 30, 2023, and that any funding available through the federal Medicaid 1915(i) state plan amendment be utilized before funding appropriated from the general fund.

SECTION 57. LEGISLATIVE INTENT - CONSULTANTS. It is the intent of the sixty-seventh legislative assembly that the department of human services and state department of health utilize federal funds available to the departments to obtain consulting services to facilitate the merger of the department of human services and state department of health as provided for in House Bill No. 1247 as approved by the sixty-seventh legislative assembly for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 58. LEGISLATIVE INTENT - PROVIDER RATE INCREASE. Section 1 of this Act includes funding for human service provider inflation increases of two percent the first year and one-quarter of one percent the second year of the biennium beginning July 1, 2021, and ending June 30, 2023. It is the intent of the sixty-seventh legislative assembly that future special sessions of the sixty-seventh legislative assembly consider an additional second year inflationary increase during the 2021-23 biennium based on any extensions of the enhanced federal Medicaid assistance

DF
1308
4/29/2

percentage and a review of budget needs of all areas of the department of human services.

SECTION 59. REPORT TO LEGISLATIVE MANAGEMENT - EARLY AND PERIODIC SCREENING, DIAGNOSTIC, AND TREATMENT PROGRAM. During the 2021-22 interim, the department of human services shall conduct a study of the early and periodic screening, diagnostic, and treatment program and prepare a report. The department of human services may contract with a consultant to assist in the study and the preparation of the report. The report shall include data on the number, ages, and geographic locations of children receiving screening, diagnostic, and treatment services; the capacity of the program to ensure all children who require screening, diagnostic, and treatment services are identified and receive services; data on the disposition of referrals of children who are screened and eligible for diagnostic and treatment services, including how many receive services and how many do not receive those services by county; an assessment of the program's efforts to provide comprehensive screening and treatment for children as required by federal law; an assessment of the deficits of the program's efforts to provide comprehensive screening and treatment as required by federal law; recommendations to ensure or expand services so that all eligible children are adequately served by the program; and additional data needed to assess the program accountability and efficiency. Before October 1, 2022, the department of human services shall provide the report to the legislative management.

SECTION 60. REPORT TO LEGISLATIVE MANAGEMENT - REVISED PAYMENT METHODOLOGY FOR BASIC CARE FACILITIES. The department of human services, in collaboration with basic care providers and other representatives of the basic care industry, shall develop a report for payment methodology revisions for basic care facilities that must include recommendations for:

1. Methods of reimbursement for basic care facility cost categories, including direct care, indirect care, room and board, and property; and

2. The feasibility of standardizing payments for basic care facilities in the same peer group.

Before October 1, 2022, the department shall present the report to the legislative management regarding the revised payment methodology. The estimated costs related to the implementation of the payment methodology revisions must be included in the department's 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 61. LEGISLATIVE MANAGEMENT REPORT - FOUR-YEAR OLD PROGRAM - EARLY CHILDHOOD GRANTS. During the 2021 22 interim, the department of human services shall provide reports to the legislative management regarding the status of four-year old program approvals, the North Dakota early childhood council, and the early childhood grant for best in class four-year old experiences.

SECTION 62. SUBSTANCE USE DISORDER TREATMENT VOUCHERS - REPORT TO BUDGET SECTION. During the 2021-22 interim, the department of human services behavioral health division shall submit quarterly reports to the budget section on the status of the substance use disorder treatment voucher system program, including data on the utilization of the program, data on program

DA
1/10/24
1/29/24

expenditures, and an estimate of the number of months of funding remaining in the program.

SECTION 63. TRANSFER OF EMPLOYEES. The department of human services may use the identified twenty-seven full-time equivalent child care licensing positions of the human service zone transferred to the department pursuant to chapter 391 of the 2019 Session Laws for child care licensing, quality control, and early childhood administration.

SECTION 64. RETROACTIVE APPLICATION. Section 25 of this Act applies retroactively to July 1, 2020.

Total changes to House funding	0.00	$2,444,433	$329,283	$2,773,716

House Bill No. 1012 - Other Changes - Conference Committee Action

This amendment also:

- Adjusts the amount of funding being provided from the human service finance fund for the county social and human services program, the same as the Senate.
- Provides that DHS develop a funding methodology to distribute permanent supportive housing grants, the same as the Senate.
- Adds a section to provide for an emergency grant allocation program for developmental disabilities providers and removes a section relating to DHS applying for an Appendix K waiver. Neither the House nor Senate versions included this adjustment.
- Adjusts a section added by the Senate for DHS to work with applicable federal and private partners to resettle new refugees in communities in the state where resettlement efforts are not already occurring.
- Provides legislative intent regarding DHS seeking funding to transition individuals from the Life Skills and Transition Center to private providers. The Senate included funding to transfer individuals to providers.
- Provides legislative intent regarding future appropriations for the federal Department of Justice lawsuit settlement, the same as the Senate.
- Provides for certain substance use disorder providers to be reimbursed at similar levels, provides for a moratorium on new substance use disorder residential providers, and provides for no more than 45 percent of substance use disorder vouchers be allocated for residential substance use disorder services administered by programs with more than 16 beds. The House provided for a limit of 30 percent of substance use disorder voucher may be used for residential services and the Senate increased the limit to 50 percent.
- Adds a section to authorize DHS to collect fees for early childhood services training and development courses, the same as the Senate.
- Removes the sunset clause on the Medicaid Expansion program and adjusts language regarding provider reimbursement rates being open records, the same as the Senate. The House extended the expiration date by 2 years.
- Adds a section to provide for interpreter services to be covered under the Medicaid program, the same as the Senate.
- Provides for DHS to establish a behavioral health bed management system, the same as the Senate.
- Authorizes the conveyance of land at the Life Skills and Transition Center to the Grafton Fire Department. The Senate also authorized this conveyance.
- Authorizes exemptions to continue appropriation authority into the 2021-23 biennium. The exemptions will reduce general fund turnback by $4,085,000. The Senate also authorized the exemptions.
- Provides for DHS to conduct a study of the early and periodic screening, diagnostic, and treatment program, the same as the Senate.
- Removes a section providing for a DHS study of using an administrative services organization for behavioral health services in the Medicaid Expansion program. The Senate also added this section.
- Adjusts a section added by the Senate for DHS to develop a new payment methodology for basic care facilities

in collaboration with the basic care industry.

- Provides for a DHS report to the Legislative Management regarding the early childhood 4-year old grant program. The Senate also added this report.
- Authorizes positions for child care licensing to be used for other purposes, the same as the Senate.
- Adds a section not included in the House or Senate versions to use person-first language in statute.
- Adds two sections not included in the House or Senate versions to prohibit the disenrollment of individuals in certain programs during federal emergencies if it would affect the receipt of federal funds. The sections are declared to be an emergency measure.
- Adds a section not included in the House or Senate versions to provide for DHS to reduce developmental disability provider rates by $6.95 million for the 2021-23 biennium.
- Adds a section not included in the House or Senate versions to require DHS to submit quarterly reports to the Budget Section regarding substance use disorder treatment vouchers.
- Adds a section not included in the House or Senate versions to provide for DHS appropriation authority to transition to the Department of Health and Human Services on September 1, 2022, as provided in House Bill No. 1247.
- Adds a section not included in the House or Senate versions to prohibit DHS from spending any general fund savings resulting from federal enhancements to the federal medical assistance percentage above budgeted rates.
- Adds a section not included in the House or Senate versions to provide guidelines for supported employer funding.
- Adds a section not included in the House or Senate versions to transfer DHS appropriation authority to the Department of Health and Human Services on September 1, 2022.
- Adds a section not included in the House or Senate versions to provide intent that DHS and the State Department of Health utilize consulting services to facilitate the merger of the departments.
- Adds a section not included in the House or Senate versions to provide intent that future special sessions of the 67th Legislative Assembly consider providing an additional inflationary increase the 2nd year of the 2021-23 biennium.

SECTION 5. APPROPRIATION - LEGISLATIVE MANAGEMENT STUDY - STATEWIDE ACUTE PSYCHIATRIC AND RESIDENTIAL CARE NEEDS.

1. During the 2021-22 interim, the legislative management shall study the acute psychiatric hospitalization and related step down residential treatment and support needs of individuals with mental illness. The legislative management shall create an acute psychiatric treatment committee consisting of eight members to conduct the study. The legislative management chairman shall designate the committee chairman and vice chairman and the legislative council shall provide staff services for the committee. The committee must complete the study by October 1, 2022.

2. As part of the study, the committee shall gather input from stakeholders and other groups, including private hospitals, the department of human services, and mental health advocates.

3. The study must review options for a long-term plan for acute psychiatric hospitalization and related step down residential treatment and support needs in the state and short-term options during the next two bienniums to contract with private provider acute psychiatric care facilities to provide treatment services in four or more cities in the state, workforce needs of such specific locations, and options to replace the existing state hospital facility with one or more treatment facilities focused on forensic psychiatric evaluation and treatment.

4. The committee, with the approval of the legislative management, may obtain consulting services to determine the total number of acute care beds needed in the state and to develop recommendations for private provider contracts, treatment requirements and outcome measures, locations in the state, including private and public facilities, the future use of facilities at the state hospital campus including the LaHaug building, and other items identified in subsection 3. The consulting services may also develop conceptual drawings for recommendations for a new state hospital.

5. The department of human services shall provide to the consultants and the committee a complete description of other outpatient and inpatient private and public behavioral health services, including substance use disorder facilities, existing in the state to prevent acute behavioral health hospitalization and to support patients following discharge from psychiatric hospitalization and related residential care.

6. The department of human services shall seek Medicaid plan amendments or Medicaid waivers to allow federal funding reimbursement for services provided in institutions for mental diseases to Medicaid beneficiaries between the ages of twenty-one and sixty-four.

7. The legislative management shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-eighth legislative assembly.

8. There is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of $500,000, or so much of the sum as may be necessary, to the legislative council for consulting services for the study identified in this section, for the period beginning with the effective date of this section, and ending June 30, 2023. The funding appropriated in the section is considered a one-time funding item.

SECTION 6. APPROPRIATION - OFFICE OF MANAGEMENT AND BUDGET - CAPITOL BUILDING FUND. There is appropriated out of any moneys in the capitol building fund in the state treasury, not otherwise appropriated, the sum of $25,000, or so much of the sum as may be necessary, to the office of management and budget for the purpose of utilizing a consultant to determine the compliance of the capitol building with 2010 Americans with Disabilities Act standards, for the biennium beginning July 1, 2021, and ending June 30, 2023. The funding appropriated in this section is considered a one-time funding item.

SECTION 7. SPENDING RESTRICTION - 2021-23 BIENNIUM - FEDERAL MEDICAL ASSISTANCE PERCENTAGE. The department of human services may not spend any general fund savings resulting from federal enhancements or adjustments that cause the federal medical assistance percentage to exceed the rates used by the sixty-seventh legislative assembly for budgeting purposes for the biennium beginning July 1, 2021, and ending June 30, 2023."

Page 5, line 1, after "**SERVICES**" insert "**- LEGISLATIVE INTENT**"

Page 5, line 5, after the period insert "It is the intent of the sixty-seventh legislative assembly that future legislative assemblies retain and exercise unfettered discretion to appropriate funds as they deem appropriate without regard to the federal department of justice lawsuit settlement.

SECTION 11. TRANSFER OF APPROPRIATION AUTHORITY. Section 1 of this Act includes appropriation authority for the department of human services for the biennium beginning July 1, 2021, and ending June 30, 2023. On September 1, 2022, in accordance with provisions of House Bill No. 1247, as approved by the sixty-seventh legislative assembly, the office of management and budget shall transfer remaining appropriation authority contained in section 1 of this Act, and any remaining appropriation authority for the department of human services in other bills approved by the sixty-seventh legislative assembly, to the department of health and human services. The appropriation authority in section 1 of this Act and appropriation authority for the department of human services from any other bill that is transferred to the department of health and human services must be maintained and reported separately from other appropriation authority transferred to the department of health and human services.

SECTION 12. ESTIMATED INCOME - FEDERAL CORONAVIRUS RELIEF FUND. The estimated income line item in subdivision 2 of section 1 of this Act includes the sum of $2,457,638 from the federal coronavirus relief fund for senior nutrition services and the sum of $1,750,000 from the federal coronavirus relief fund for the community behavioral health program."

Page 5, line 11, replace "$24,000,000" with "$31,500,000"

Page 5, line 20, remove "**STATE HOSPITAL -**"

Page 5, line 22, after "chapel" insert ", administrative building,"

Page 5, line 23, replace "4" with "8"

Page 5, after line 29, insert:

"**SECTION 18. PERMANENT SUPPORTIVE HOUSING GRANTS.** Subdivision 2 of section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department, and authorize the department to conduct onsite visits to review program operations.

SECTION 19. EMERGENCY STABILIZATION GRANTS - DEVELOPMENTAL DISABILITIES WAIVER.

1. Subdivision 2 of subsection 1 of this Act includes the sum of $125,000 from the general fund for the purpose of providing emergency stabilization grants to developmental disability in-home support providers to support the sustainability of newly licensed providers within the developmental disability provider network. To be eligible to receive an emergency stabilization grant, a licensed developmental disability in-home support provider must be in operation as of October 1, 2020, with an initial license date of October 15, 2015, or later, and comply with grant requirements established by the department of human services. The requirements of chapter 54-44.4 do not apply to the selection of a grantee, the grant award, or payments made under this section.

2. The department of human services shall include in-home support providers in future appendix K applications, to allow eligibility for retainer payments in a manner equivalent to day support services.

SECTION 20. REFUGEE RESETTLEMENT SERVICES - LEGISLATIVE MANAGEMENT REPORT. Subdivision 2 of section 1 of this Act includes the sum of $6,069,408 of federal funds for the refugee resettlement program. The department of human services shall collaborate with applicable federal and private placement agencies to develop a plan to resettle refugees in at least five geographically diverse communities in the state outside of the existing resettlement communities with a goal of resettling twenty-five percent of new refugees outside of existing resettlement communities. During the 2021-22 interim, the department of human services shall provide a report to the legislative management regarding refugee resettlement services."

Page 7, replace lines 15 through 19 with:

"**SECTION 22. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.**

1. Subdivision 2 of section 1 of this Act includes the sum of $703,317,464, of which $80,934,488 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021, and ending

June 30, 2023. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:

a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $10,184,568 included in subdivision 2 of section 1 of this Act.

b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $29,460,720 included in subdivision 2 of section 1 of this Act.

c. Expenditures do not include coverage for individuals ages nineteen and twenty for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $12,705,466 included in subdivision 2 of section 1 of this Act.

2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915(i) state plan.

3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.

4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.

5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

SECTION 23. A new section to chapter 1-02 of the North Dakota Century Code is created and enacted as follows:

Person-first language

The provisions of this code, unless the context otherwise requires, must be construed in person-first language and any new enactments of this code must be written in person-first language."

Page 8, line 9, replace "three" with "two"

Page 8, remove lines 19 through 31

Page 9, replace lines 1 through 13 with:

"**SECTION 25. AMENDMENT.** Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, ~~and~~ hospital- or medical clinic-based programs for medical management of withdrawal~~.~~, and any institution for mental diseases in accordance with subsection 2.

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

SECTION 26. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services provided by licensed substance abuse treatment programs, excluding regional human service centers, hospital- or medical clinic-based programs for medical management of withdrawal, and any institution for mental diseases in accordance with subsection 2.

2. The department shall deny a licensed substance abuse treatment program's substance use disorder treatment voucher system application and deny reimbursement by the substance use disorder treatment voucher system if the licensed substance abuse treatment program is an institution for mental diseases and reimbursement is requested for residential beds added on or after July 1, 2020.

3. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

4. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. No more than forty-five percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

SECTION 27. A new section to chapter 50-06 of the North Dakota Century Code is created and enacted as follows:

Behavioral health bed management system.

The department shall establish and maintain a behavioral health bed management system to improve utilization of behavioral health bed capacity. Public and private providers of residential or inpatient behavioral health services shall participate in and report daily to the department the information and documentation necessary to maintain the behavioral health bed management system in the form and manner prescribed by the department.

SECTION 28. AMENDMENT. Section 50-11.1-14 of the North Dakota Century Code is amended and reenacted as follows:

50-11.1-14. Workforce development.

1. The department may establish a statewide system to build systematic early childhood workforce voluntary training which may include distance learning formats, a professional registry, certificates, and specializations.

2. The department may charge reasonable fees for all training and development courses to offset costs. All fees collected under this section must be paid to the department or the department's authorized agent and must be used to defray the cost of providing training and development courses to providers and staff members of early childhood services.

SECTION 29. A new paragraph to subdivision l of subsection 1 of section 50-11.1-22 of the North Dakota Century Code, as created by section 8 of House Bill No. 1416, as approved by the sixty-seventh legislative assembly, is created and enacted as follows:

A special education director;

SECTION 30. AMENDMENT. Section 50-24.1-02.7 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-02.7. Workers with disabilities coverage.

The department shall establish and implement a buyin program to provide medical assistance to an individual who, except for substantial gainful activity, meets the definition of disabled under the supplemental security income program under title XVI of the federal Social Security Act, who is at least sixteen but less than sixty-five years of age, and who is gainfully employed. The program ~~must~~:

1. ~~Be~~Must be made available to an individual with a disability who is a member of a household with a net income less than two hundred twenty-five percent of the most recently revised official poverty line published by the federal office of management and budget applicable to the household size;

2. ~~Allow~~Must allow up to an additional ten thousand dollars in assets;

3. ~~Require~~Must require the payment of a premium that is based upon a sliding scale which may not be less than two and one-half percent nor more than seven and one-half percent of the individual's gross countable income;

4. ~~Include~~Must include a one-time program enrollment fee of one hundred dollars; ~~and~~

5. ~~Provide~~Must provide that the failure of an enrolled individual to pay premiums for three months may result in the termination of enrollment in the program; and

6. May not require the payment of a premium or enrollment fee or disenroll an individual for failure to pay a premium or enrollment fee for workers with disabilities coverage during a federally declared emergency if collection of the premium or enrollment fee may impact the receipt of federal funds.

SECTION 31. AMENDMENT. Section 50-24.1-31 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-31. Optional medical assistance for families of children with disabilities.

1. The department shall establish and implement a buyin program under the federal Family Opportunity Act enacted as part of the Deficit Reduction Act of 2005 [Pub. L. 109-171; 120 Stat. 4; 42 U.S.C. 1396] to provide medical assistance and other health coverage options to families of children with disabilities and whose net income does not exceed two hundred fifty percent of the federal poverty line published by the federal office of management and budget applicable to the household size.

2. The department may not require the payment of a premium or disenroll an individual for failure to pay a premium for families of children with disabilities coverage during a federally declared emergency if collection of the premium may impact the receipt of federal funds."

Interpreter services.

Medical assistance coverage, including Medicaid expansion, must include payment for sign and oral language interpreter services for assistance in providing covered health care services to a recipient of medical assistance who has limited English proficiency or who has hearing loss and uses interpreting services. The department shall adopt rules to implement this section."

Page 11, after line 13, insert:

"**SECTION 37. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER.** The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to the Grafton fire department. The department of human services may convey a parcel of land, 7.45 acres, more or less, located in part of lot 1, block 1, state school first addition to the city of Grafton, which is located within the southwest ¼ of the southwest ¼ of section 13, township 157 north, range 53 west, on the terms and conditions determined appropriate by the department and attorney general. Sections 54-01-05.2 and 54-01-05.5 do not apply to this conveyance."

Page 11, remove lines 23 through 28

Page 12, line 3, replace "4" with "8"

Page 13, remove lines 13 through 31

Page 14, replace lines 1 through 6 with:

SECTION 48. EXEMPTION. The sum of $750,000 from the general fund appropriated to the department of human services for the purpose of providing suicide prevention grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation

are available for the suicide prevention grants during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 49. EXEMPTION. The sum of $3,000,000 from the general fund appropriated to the department of human services for the purpose of providing a community behavioral health program to provide comprehensive community-based services for individuals who have serious behavioral health conditions in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the community behavioral health program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 50. EXEMPTION. The sum of $335,000 from the general fund appropriated to the department of human services for the purpose of providing a grant to an entity to develop a hyperbaric oxygen therapy pilot program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the grant to an entity to develop a hyperbaric oxygen therapy pilot program during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 51. EXEMPTION. The sum of $572,000 from the strategic investment and improvements fund appropriated to the department of human services for the purpose of a roof replacement project at the state hospital in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the roof replacement project at the state hospital during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 52. EXEMPTION. The amount appropriated for the development of the electronic visit verification project in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the electronic visit verification project during the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 53. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-seventh legislative assembly that the department of human services seek a deficiency appropriation from the sixty-eighth legislative assembly for any expenditures that exceed appropriated amounts as a result of utilization rates, nursing home costs associated with the establishment of the new rate structure as provided in House Bill No. 1090, or developmental disability provider reimbursement rate adjustments, during the biennium beginning July 1, 2021, and ending June 30, 2023, if funding is not sufficient to pay actual expenses.

SECTION 54. DEVELOPMENTAL DISABILITY PROVIDER RATES. By July 1, 2021, the department of human services, in consultation with the developmental disabilities payment steering committee, shall identify $6,950,000 in reductions to be made to payment rates for intermediate care facilities and residential services for individuals with developmental disabilities, for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 55. LEGISLATIVE INTENT - STATE FISCAL RECOVERY FUND OR OTHER FUNDS - TRANSITION OF INDIVIDUALS FROM LIFE SKILLS AND TRANSITION CENTER. It is the intent of the sixty-seventh legislative assembly that the department of human services seek an appropriation during any special session of the sixty-seventh legislative assembly from the state fiscal recovery fund received through H.R. 1319 of the 117th Congress, also known as the federal American Rescue Plan Act, or from any eligible federal or other funds made available to the

department, for the purpose of transitioning individuals from the life skills and transition center to community-based providers.

SECTION 56. LEGISLATIVE INTENT - SUPPORTED EMPLOYMENT FUNDING. It is the intent of the sixty-seventh legislative assembly that funding appropriated from the general fund for supported employment in section 1 of this Act be used to continue contracts with existing evidence-based supported employment providers during the biennium beginning July 1, 2021, and ending June 30, 2023, and that any funding available through the federal Medicaid 1915(i) state plan amendment be utilized before funding appropriated from the general fund.

SECTION 57. LEGISLATIVE INTENT - CONSULTANTS. It is the intent of the sixty-seventh legislative assembly that the department of human services and state department of health utilize federal funds available to the departments to obtain consulting services to facilitate the merger of the department of human services and state department of health as provided for in House Bill No. 1247 as approved by the sixty-seventh legislative assembly for the biennium beginning July 1, 2021, and ending June 30, 2023.

SECTION 58. LEGISLATIVE INTENT - PROVIDER RATE INCREASE. Section 1 of this Act includes funding for human service provider inflation increases of two percent the first year and one-quarter of one percent the second year of the biennium beginning July 1, 2021, and ending June 30, 2023. It is the intent of the sixty-seventh legislative assembly that future special sessions of the sixty-seventh legislative assembly consider an additional second year inflationary increase during the 2021-23 biennium based on any extensions of the enhanced federal Medicaid assistance percentage and a review of budget needs of all areas of the department of human services.

SECTION 59. REPORT TO LEGISLATIVE MANAGEMENT - EARLY AND PERIODIC SCREENING, DIAGNOSTIC, AND TREATMENT PROGRAM. During the 2021-22 interim, the department of human services shall conduct a study of the early and periodic screening, diagnostic, and treatment program and prepare a report. The department of human services may contract with a consultant to assist in the study and the preparation of the report. The report shall include data on the number, ages, and geographic locations of children receiving screening, diagnostic, and treatment services; the capacity of the program to ensure all children who require screening, diagnostic, and treatment services are identified and receive services; data on the disposition of referrals of children who are screened and eligible for diagnostic and treatment services, including how many receive services and how many do not receive those services by county; an assessment of the program's efforts to provide comprehensive screening and treatment for children as required by federal law; an assessment of the deficits of the program's efforts to provide comprehensive screening and treatment as required by federal law; recommendations to ensure or expand services so that all eligible children are adequately served by the program; and additional data needed to assess the program accountability and efficiency. Before October 1, 2022, the department of human services shall provide the report to the legislative management.

SECTION 60. REPORT TO LEGISLATIVE MANAGEMENT - REVISED PAYMENT METHODOLOGY FOR BASIC CARE FACILITIES. The department of human services, in collaboration with basic care providers and other representatives of the basic care industry, shall develop a report for payment methodology revisions for basic care facilities that must include recommendations for:

1. Methods of reimbursement for basic care facility cost categories, including direct care, indirect care, room and board, and property; and

2. The feasibility of standardizing payments for basic care facilities in the same peer group.

Before October 1, 2022, the department shall present the report to the legislative management regarding the revised payment methodology. The estimated costs related to the implementation of the payment methodology revisions must be included in the department's 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 61. LEGISLATIVE MANAGEMENT REPORT - FOUR-YEAR OLD PROGRAM - EARLY CHILDHOOD GRANTS. During the 2021 22 interim, the department of human services shall provide reports to the legislative management regarding the status of four-year old program approvals, the North Dakota early childhood council, and the early childhood grant for best in class four-year old experiences.

SECTION 62. SUBSTANCE USE DISORDER TREATMENT VOUCHERS - REPORT TO BUDGET SECTION. During the 2021-22 interim, the department of human services behavioral health division shall submit quarterly reports to the budget section on the status of the substance use disorder treatment voucher system program, including data on the utilization of the program, data on program expenditures, and an estimate of the number of months of funding remaining in the program.

SECTION 63. TRANSFER OF EMPLOYEES. The department of human services may use the identified twenty-seven full-time equivalent child care licensing positions of the human service zone transferred to the department pursuant to chapter 391 of the 2019 Session Laws for child care licensing, quality control, and early childhood administration.

SECTION 64. RETROACTIVE APPLICATION. Section 25 of this Act applies retroactively to July 1, 2020.

Page 14, line 7, replace "Section 17" with "Sections 22 and 33"

Total ongoing funding changes	0.00	$2,020,433	$329,283	$2,349,716
One-Time Funding Items				
Funding for a State Hospital study is removed and instead appropriated to the Legislative Council for a Legislative Management study. The House provided $300,000 for a DHS study of the State Hospital complex and the Senate provided $3 million for architectural reviews and the development of detailed plans for the construction of a new State Hospital.		($300,000)		($300,000)
One-time funding is added for heat pump and carpet replacement projects at the Southeast Human Service Center, the same as the Senate.		724,000		724,000
Total one-time funding changes	0.00	$424,000	$0	$424,000
Total changes to House funding	0.00	$2,444,433	$329,283	$2,773,716

House Bill No. 1012 - Other Changes - Conference Committee Action

This amendment also:

- Adjusts the amount of funding being provided from the human service finance fund for the county social and human services program, the same as the Senate.

- Provides that DHS develop a funding methodology to distribute permanent supportive housing grants, the same as the Senate.
- Adds a section to provide for an emergency grant allocation program for developmental disabilities providers and removes a section relating to DHS applying for an Appendix K waiver. Neither the House nor Senate versions included this adjustment.
- Adjusts a section added by the Senate for DHS to work with applicable federal and private partners to resettle new refugees in communities in the state where resettlement efforts are not already occurring.
- Provides legislative intent regarding DHS seeking funding to transition individuals from the Life Skills and Transition Center to private providers. The Senate included funding to transfer individuals to providers.
- Provides legislative intent regarding future appropriations for the federal Department of Justice lawsuit settlement, the same as the Senate.
- Provides for certain substance use disorder providers to be reimbursed at similar levels, provides for a moratorium on new substance use disorder residential providers, and provides for no more than 45 percent of substance use disorder vouchers be allocated for residential substance use disorder services administered by programs with more than 16 beds. The House provided for a limit of 30 percent of substance use disorder voucher may be used for residential services and the Senate increased the limit to 50 percent.
- Adds a section to authorize DHS to collect fees for early childhood services training and development courses, the same as the Senate.
- Removes the sunset clause on the Medicaid Expansion program and adjusts language regarding provider reimbursement rates being open records, the same as the Senate. The House extended the expiration date by 2 years.
- Adds a section to provide for interpreter services to be covered under the Medicaid program, the same as the Senate.
- Provides for DHS to establish a behavioral health bed management system, the same as the Senate.
- Authorizes the conveyance of land at the Life Skills and Transition Center to the Grafton Fire Department. The Senate also authorized this conveyance.
- Authorizes exemptions to continue appropriation authority into the 2021-23 biennium. The exemptions will reduce general fund turnback by $4,085,000. The Senate also authorized the exemptions.
- Provides for DHS to conduct a study of the early and periodic screening, diagnostic, and treatment program, the same as the Senate.
- Removes a section providing for a DHS study of using an administrative services organization for behavioral health services in the Medicaid Expansion program. The Senate also added this section.
- Adjusts a section added by the Senate for DHS to develop a new payment methodology for basic care facilities in collaboration with the basic care industry.
- Provides for a DHS report to the Legislative Management regarding the early childhood 4-year old grant program. The Senate also added this report.
- Authorizes positions for child care licensing to be used for other purposes, the same as the Senate.
- Adds a section not included in the House or Senate versions to use person-first language in statute.
- Adds two sections not included in the House or Senate versions to prohibit the disenrollment of individuals in certain programs during federal emergencies if it would affect the receipt of federal funds. The sections are declared to be an emergency measure.
- Adds a section not included in the House or Senate versions to provide for DHS to reduce developmental disability provider rates by $6.95 million for the 2021-23

biennium.

- Adds a section not included in the House or Senate versions to require DHS to submit quarterly reports to the Budget Section regarding substance use disorder treatment vouchers.
- Adds a section not included in the House or Senate versions to provide for DHS appropriation authority to transition to the Department of Health and Human Services on September 1, 2022, as provided in House Bill No. 1247.
- Adds a section not included in the House or Senate versions to prohibit DHS from spending any general fund savings resulting from federal enhancements to the federal medical assistance percentage above budgeted rates.
- Adds a section not included in the House or Senate versions to provide guidelines for supported employer funding.
- Adds a section not included in the House or Senate versions to transfer DHS appropriation authority to the Department of Health and Human Services on September 1, 2022.
- Adds a section not included in the House or Senate versions to provide intent that DHS and the State Department of Health utilize consulting services to facilitate the merger of the departments.
- Adds a section not included in the House or Senate versions to provide intent that future special sessions of the 67th Legislative Assembly consider providing an additional inflationary increase the 2nd year of the 2021-23 biennium.

Engrossed HB 1012 was placed on the Seventh order of business on the calendar.
