Attached as an appendix is a detailed comparison of the executive budget to the agency's base level appropriations.

Executive Budget Highlights

DEPARTMENTWIDE

1. Provides funding for state employee salary and benefit increases, of which $9,368,646 is for salary increases, $108,150 is for health insurance increases, and $1,908,797 is for retirement contribution increases	$8,737,712	$2,647,881	$11,385,593
2. Underfunds salaries and wages by $4,694,730 from the general fund in anticipation of savings from **vacant positions and employee turnover**	($4,694,730)	$0	($4,694,730)
3. Adjusts funding to reduce general fund support for traditional Medicaid ($50,919,245) and increase general fund support for Medicaid Expansion ($3,916,989) and the children's health insurance program ($1,222,892) due to changes in the state's federal medical assistance percentage (FMAP)	($45,779,364)	$45,779,364	$0

4. Adds funding for **cost, caseload, and utilization changes,** including $156,789,851 for medical services, $77,698,712 for long-term care, and $41,567,021 for developmental disabilities (DD)	$124,345,846	$174,944,195	$299,290,041
5. Provides a 1 percent **inflationary increase** for human service providers during each year of the 2021-23 biennium	$13,883,837	$14,417,097	$28,300,934
6. Reduces ongoing funding appropriated during the 2019-21 biennium from the community health trust fund from $32.4 million to $24 million and replaces ongoing funding provided from the tobacco prevention and control trust fund ($6 million) and health care trust fund ($1 million)	$15,400,000	($15,400,000)	$0
7. Adds funding for the Capitol grounds agency rent proposal	$474,286	$0	$474,286
8. Adds funding for Microsoft Office 365 expenses	$200,315	$50,079	$250,394
9. Adds ongoing funding to develop an early childhood integrated data system	$500,000	$0	$500,000
10. Provides **one-time funding** to replace the child welfare management and payments system	$15,000,000	$15,000,000	$30,000,000
11. Provides **one-time funding** to modernize the Medicaid management information system	$4,326,686	$30,673,314	$35,000,000
PROGRAM AND POLICY			
Medical services			
12. Provides $1,477.4 million for medical services, of which $385.2 million is from the general fund, an increase in total of $63.7 million, or 4.5 percent, compared to the 2019-21 biennium appropriation of $1,413.7 million. The executive budget:			
• Provides $623.8 million for Medicaid Expansion grants, of which $73.5 million is from the general fund, a decrease in total of $10.9 million, or 1.7 percent, compared to the 2019-21 biennium appropriation of $634.7 million, of which $64.1 million is from the general fund. The executive budget adds 12 FTE positions to transfer the administration of Medicaid Expansion to the department and changes the payment rates from commercial rates to fee-for-service rates.	$9,400,000	($20,300,000)	($10,900,000)
• Underfunds Medicaid grants	($9,580,913)	($9,955,925)	($19,536,838)
Long-term care			
13. Provides $822.6 million for **long-term care**, of which $404.2 million is from the general fund, an increase in total of $85.2 million, or 11.6 percent, compared to the 2019-21 biennium appropriation of $737.4 million. The executive budget:			
• Reprioritizes agency special funds by transferring $2.3 million from the basic care program to information technology services			
• Adds **one-time funding** to transition to a new nursing facility payment methodology	$3,348,000	$3,852,000	$7,200,000
• Adds **one-time funding** for a nursing bed buyback program to buy back approximately 250 licensed nursing home beds	$3,300,000	$0	$3,300,000
Developmental disabilities			
14. Provides $739.3 million for DD, of which $344.8 million is from the general fund, an increase in total of $68.1 million, or 10.1 percent, compared to the 2019-21 biennium appropriation of $671.2 million. The executive budget:			
• Adds funding for **equipment over $5,000**, which includes tymp machines ($10,000)	$979	$9,021	$10,000
• Adjusts department budget reporting by transferring certain FTE positions and funding relating to DD duties from the human service centers to the Developmental Disabilities Division			

Vocational rehabilitation

15. Provides $37.7 million for vocational rehabilitation services, of which $7.3 million is from the general fund, an increase in total of $11 million, or 41.2 percent, compared to the 2019-21 biennium appropriation of $26.7 million. The executive budget:

    - Adjusts department budget reporting by transferring certain FTE positions and funding relating to vocational rehabilitation duties from the human service centers to the Vocational Rehabilitation Division

Aging services

16. Provides $34.5 million for aging services, of which $12.4 million is from the general fund, an increase in total of $9.3 million, or 36.9 percent, compared to the 2019-21 biennium appropriation of $25.2 million. The executive budget:

    - Adjusts department budget reporting by transferring certain FTE positions and funding relating to aging services duties from the human service centers to the Aging Services Division

Behavioral health services

17. Provides $85 million for behavioral health services, of which $36.7 million is from the general fund, an increase in total of $12.6 million, or 17.4 percent, compared to the 2019-21 biennium appropriation of $72.4 million. The executive budget:

    - Increases funding for the substance use disorder voucher program from $8 million to $17 million — $9,000,000 | $0 | $9,000,000

Economic assistance

18. Provides $275 million for economic assistance, of which $11.9 million is from the general fund, an increase in total of $13.1 million, or 5 percent, compared to the 2019-21 biennium appropriation of $261.9 million. Major program changes include:

    - Provides $34.7 million for **child care assistance**, of which $5.6 million is from the general fund, an increase of $6.9 million, or 24.8 percent, compared to the 2019-21 biennium appropriation of $27.8 million — $2,952,579 | $3,970,653 | $6,923,232
    - Increases federal funding for the **supplemental nutrition assistance program (SNAP)** or food stamp benefits to provide a total of $168 million, an increase of $2.8 million, or 1.7 percent, compared to the 2019-21 biennium appropriation of $165.2 million — $0 | $2,760,000 | $2,760,000
    - Increases federal funding for the **low-income home energy assistance program (LIHEAP)** to provide a total of $36.1 million, an increase of $1.6 million, or 4.6 percent, compared to the 2019-21 biennium appropriation of $34.5 million — $0 | $1,634,000 | $1,634,000

Children and family services

19. Provides $165.6 million for children and family services, of which $72 million is from the general fund, a decrease in total of $10.6 million, or 6.0 percent, compared to the 2019-21 biennium appropriation of $176.2 million. The executive budget:

    - Transfers certain FTE positions and funding relating to children and family services duties from the human service center budget to the Children and Family Services Division

INSTITUTIONS

20. Provides $126.7 million for institutions, of which $84.3 million is from the general fund, a decrease in total of $17.7 million, or 24.2 percent, compared to the 2019-21 biennium appropriation of $144.4 million. Major items in the executive budget relating to institutions are as follows:

State Hospital

21. Authorizes the construction of a new **state behavioral health hospital and clinic** through a public-private partnership

22. Provides funding for **extraordinary repairs** as follows: $1,292,499 $0 $1,292,499

Sidewalk repairs	$35,000
Roof repairs	28,000
Door lock replacement	85,000
Auto shop oil interceptor	18,000
Oil control and steam valves	45,800
Water main valve replacement	6,500
Flooring updates	197,672
Paint client rooms	29,750
Sewer line cleanout	7,750
Penal fixture hook and cleanout pins	18,000
Boiler control upgrade	209,000
Remove water treatment loop	85,000
Automation control upgrades	235,750
Tuck pointing	291,277
Total	$1,292,499

23. Provides funding for **equipment over $5,000**, which includes: $60,800 $0 $60,800

Utility vehicle	$28,000
Pressure washer	6,800
Floor scrubber	7,500
Camera equipment replacement	18,500
Total	$60,800

Life Skills and Transition Center

24. Provides funding for **extraordinary repairs**, as follows: $637,106 $0 $637,106

Asbestos abatement	$30,000
Concrete work and repairs	156,760
Cottage repairs	25,000
Level cemetery markers	20,000
Painting	30,000
Skylight repairs	76,500
Parking lot maintenance	60,000
Tunnel repairs	25,000
Door repair and replacement	65,000
Flooring	90,000
Elevator pit coating	19,096
Colette fitness building roof	39,750
Total	$637,106

25. Provides funding for **equipment over $5,000**, which includes: $208,055 $0 $208,055

Dishwasher	$90,000
Security cameras	38,727
Mower/blower	31,765
Utility vehicle	22,135
Floor scrubber	5,200
Washing machines	14,228
Gym divider	6,000
Total	$208,055

HUMAN SERVICE CENTERS

26. Provides $167.5 million for human service centers, of which $96.2 million is from the general fund, a decrease in total of $37.2 million, or 18.2 percent, compared to the 2019-21 biennium appropriation of $204.7 million. The executive budget:

- Adds funding to contract with a private service provider for civil sex offender treatment $917,004 $0 $917,004
- Adds funding for **extraordinary repairs** at the southeast human service center, which includes $80,000 for an air unit replacement $80,000 $0 $80,000

• Transfers 238.12 FTE positions to program and policy and management to adjust the budget reporting for the department			
COUNTY SOCIAL SERVICES			
27. Transfers $174.4 from the tax relief fund to the human service finance fund and appropriates the funding, along with funding from the general fund and other funds, for costs associated with the state takeover of county social services expenses. The transfer from the tax relief fund is an increase of $680,767 from the 2019-21 biennium transfer.	$1,323,223	$2,135,515	$3,458,738
28. Adds 3 FTE home- and community-based case management staff	$0	$498,673	$498,673

Other Sections Recommended to be Added in the Executive Budget (As Detailed in the Attached Appendix)

Medicaid Expansion - Section 3 would amend North Dakota Century Code Section 50-24.1-37 to extend the expiration date for the Medicaid Expansion program to June 30, 2022. Section 4 would provide for the Medicaid Expansion program to be a fee-for-service program administered by DHS effective July 1, 2022.

Personal care - Section 5 would repeal Section 50-24.1-18.1 relating to personal care services for eligible medical assistance recipients.

Transfers - Section 6 would allow DHS to transfer appropriation authority between line items within subdivisions 1 through 3 of Section 1.

Transfers - Section 7 would allow DHS to transfer appropriation authority from line items within subdivisions 1 through 3 of Section 1 to subdivision 4 of Section 1.

Community health trust fund - Section 8 would identify $24 million of the recommended appropriation for the Medical Services Division is from the community health trust fund.

Human service finance fund - Section 9 would identify $174,380,767 of the recommended appropriation for the county social and human service project is from the human service finance fund.

Nursing home bed reduction - Section 10 would appropriate $3.3 million from the general fund to provide incentives to nursing facilities to reduce licensed bed capacity. This amount is also appropriated in Section 1 of the bill.

Medicaid Expansion appropriations - Section 11 would provide DHS may not spend more for the Medicaid Expansion program than the amount appropriated in the bill with certain exceptions. Section 27 would provide this section is effective through June 30, 2022.

Nursing facility appropriations - Section 12 would provide DHS may not spend more for nursing facility payments than the amount appropriated in the bill.

Health home for individuals with chronic conditions - Section 13 would require DHS to develop a plan to implement a state Medicaid option to provide coordinated care through a health home for individuals with a chronic condition.

Carryover authority - Sections 14 through 19 would allow DHS to continue unexpended appropriations for various projects into the 2021-23 biennium.

Conveyance of land - Section 20 would authorize DHS to convey land at the Life Skills and Transition Center to the Grafton Parks and Recreation Department.

Capital projects and payments - Section 21 would authorize the payment of special assessments at the State Hospital and Life Skills and Transition Center and would authorize the demolition of the chapel and employee building at the State Hospital. The section would also allow DHS to transfer funds from other line items to pay for the demolition of the buildings and other emergency capital projects.

State Hospital facility - Section 22 would authorize DHS to enter a public-private partnership for the purpose of constructing a new State Hospital facility.

Provider outcomes - Section 23 would require providers that receive funding from DHS to submit process and outcome measures.

Residential treatment providers - Section 24 would require DHS to adopt rules establishing a ratesetting process and other requirements for foster care maintenance rates for qualified residential treatment providers.

Legislative intent - Section 25 would provide legislative intent that DHS and the Adjutant General enter an agreement to lease up to 20 acres of property at the State Hospital for a National Guard training and storage center.

Continuing Appropriations

Child support collection and disbursement - Section 14-09-25 - Allows the department to receive child support payments and provide the funds to the custodial parent or appropriate governmental entity for those custodial parents receiving governmental assistance.

Child support improvement account - Section 50-09-15.1 - Allows the department to receive federal child support incentive funds and spend the funds in accordance with its business plan to improve the child support collection process.

Child support cooperative agreements - Section 50-09-33 - Allows the department to accept federal funds and other income generated by the department under a cooperative agreement with an Indian tribe for child support enforcement services for hiring staff and payment of other expenses as necessary for carrying out the department's duties under the agreement.

Transition to independence - Section 50-06-34 - Allows the department to receive grants and other sources of funding for the development of a program for services to transition-aged youth at risk.

Deficiency Appropriation

There are no deficiency appropriations requested for this agency.

Estimated Unspent General Fund Appropriation Authority (Turnback)

The 2021-23 executive budget recommendation includes estimated unspent general fund appropriation authority of $92.5 million for DHS for the 2019-21 biennium.

Significant Audit Findings

The June 30, 2019, State Auditor report for the Department of Human Services identified the following audit findings:

- Payments after death (prior audit finding) - A total of $108,425 may have been paid in Medicaid benefits for medical services billed for services dated after a beneficiary's date of death.
- Child care correction orders not resolved (prior audit finding) - Child care providers are operating without proper reinspection of correction orders, potentially jeopardizing the health and safety of children.
- Monitoring child care providers with memorandums of understanding (prior audit finding) - The department is not properly monitoring child care providers operating under a memorandum of understanding agreement resulting in increased risks to the health and safety of children when in child care.
- Failure to timely contact suspected victims of child abuse and neglect (prior audit finding) - Prior audit recommendations have not been implemented which may cause a child to stay in an at-risk environment susceptible to abuse or neglect for an additional amount of time.
- Not performing quality assurance for child protection services (prior audit finding) - Without sufficient monitoring procedures the department is unable to ensure that services will protect the health and welfare of children.
- Confirmed child abusers not listed on index (prior audit finding) - Background check search results of the child abuse and neglect index may be inaccurate.
- Financial errors - The department reported incorrect financial information for the state's comprehensive annual financial report.
- Medicaid drug rebate system errors (prior audit finding) - There is increased potential for fraud and errors to occur and be undetected within the Medicaid drug rebate program.

Major Related Legislation

House Bill No. 1065 - Nursing Home Operating Costs - Amends Section 50-24.4-10 relating to nursing home payment rates and determination of occupancy rates.

House Bill No. 1066 - Accreditation of human service centers - Amends Section 50-06-05.2 to require DHS to request appropriations to ensure maintenance of the accreditation of human service centers and allows accreditation to be used as a basis for licensing in lieu of adopted rules for the operation of the centers.

House Bill No. 1076 - Children's Cabinet membership - Amends Section 50-06-43.1 to allow the chairman of the Legislative Management to appoint a member of the Legislative Assembly as the presiding officer of the Children's Cabinet.

House Bill No. 1090 - Nursing home payment methodology - Amends various sections to adjust the payment methodology of nursing homes.

Senate Bill No. 2083 - Child abuse - Amends various sections relating to reporting and duties relating to child abuse.

Senate Bill No. 2084 - Treatment facility capacity - Amends various sections to provide public treatment facilities are required to receive involuntary treatment patients only if below capacity.

Senate Bill No. 2085 - Medical services program adjustments - Amends various sections relating to the medical assistance program, including eligibility of Medicaid waivers for in-home services, services provided by advanced practice nurses, and payment methods for medical assistance providers.

Senate Bill No. 2086 - County social and human service project - Amends various sections relating to the county social and human service project, including the duties of counties and human service zones, payments to human service zones, and the process to inform county commissioners regarding options to transition zone employees to state employment, and transfers 16 FTE foster care licensing positions from zone employment to state employment.

Senate Bill No. 2087 - Medical assistance prior authorization - Amends Section 50-24.6-04 relating to prior authorization of medications for the medical assistance program.

Senate Bill No. 2088 - Adoption assistance - Amends Sections 50-28-02 and 50-09-02.2 relating to adoption assistance for children with special needs and payments to adoptive parents.

Senate Bill No. 2089 - Housing stabilization assistance and autism spectrum disorder voucher program - Amends Section 50-06-05.1 relating to housing stabilization assistance and repeals Section 50-06-32.1 to eliminate the autism spectrum disorder voucher program.

Department of Human Services - Budget No. 325
House Bill No. 1012
Other Sections

	Executive Budget Recommendation
Medicaid Expansion	Section 3 would amend North Dakota Century Code Section 50-24.1-37 to extend the expiration date for the Medicaid Expansion program to June 30, 2022. Section 4 would provide for the Medicaid Expansion program to be a fee-for-service program administered by DHS effective July 1, 2022.
Personal care	Section 5 would repeal Section 50-24.1-18.1 relating to personal care services for eligible medical assistance recipients.
Line item transfers	Section 6 would allow DHS to transfer appropriation authority between line items within subdivisions 1 through 3 of Section 1. Section 7 would allow DHS to transfer appropriation authority from line items within subdivisions 1 through 3 of Section 1 to subdivision 4 of Section 1.
Community health trust fund	Section 8 would identify $24 million of the recommended appropriation for the Medical Services Division is from the community health trust fund.
Human service finance fund	Section 9 would identify $174,380,767 of the recommended appropriation for the county social and human service project is from the human service finance fund.
Nursing home bed reduction	Section 10 would appropriate $3.3 million from the general fund to provide incentives to nursing facilities to reduce licensed bed capacity.
Medicaid Expansion appropriations	Section 11 would provide DHS may not spend more for the Medicaid Expansion program than the amount appropriated in the bill with certain exceptions. Section 27 would provide this section is effective through June 30, 2022.
Nursing facility appropriations	Section 12 would provide DHS may not spend more for nursing facility payments than the amount appropriated in the bill.
Health home for individuals with chronic conditions	Section 13 would require DHS to develop a plan to implement a state Medicaid option to provide coordinated care through a health home for individuals with a chronic condition.
Carryover authority	Sections 14 through 19 would allow DHS to continue unexpended appropriations for various projects into the 2021-23 biennium.
Conveyance of land	Section 20 would authorize DHS to convey land at the Life Skills and Transition Center to the Grafton Parks and Recreation Department.
Capital projects and payments	Section 21 would authorize the payment of special assessments at the State Hospital and Life Skills and Transition Center and would authorize the demolition of the chapel and employee building at the State Hospital. The section would also allow DHS to transfer funds from other line items to pay for the demolition of the buildings and other emergency capital projects.
State Hospital facility	Section 22 would authorize DHS to enter a public-private partnership for the purpose of constructing a new State Hospital facility.
Provider outcomes	Section 23 would require providers that receive funding from DHS to submit process and outcome measures.
Residential treatment providers	Section 24 would require DHS to adopt rules establishing a ratesetting process and other requirements for foster care maintenance rates for qualified residential treatment providers.
Legislative intent	Section 25 would provide legislative intent that DHS and the Adjutant General enter an agreement to lease up to 20 acres of property at the State Hospital for a National Guard training and storage center.

Major Increases (Decreases) in Ongoing General Fund Appropriations

2015-17 Biennium

1.	Added state matching funds due to changes in FMAP	$3,584,150
2.	Added funding for the state's share of Medicaid Expansion costs	$8,187,466
3.	Provided a 3 percent inflationary increase for providers for the 1st year of the biennium	$24,727,201
4.	Added funding of $19,312,165 for property tax relief to counties for costs previously paid by counties for child welfare programs, the SPED programs, and technology costs; and $3.9 million for grants to counties that have imposed an emergency human service levy	$23,212,165
5.	Transferred the high-risk sex offender treatment program to the Department of Corrections and Rehabilitation	($2,290,297)
6.	Added funding for physical, occupational, and speech therapy service provider rate increase to a 50 percent fee schedule	$468,629
7.	Added funding for Medicare drug clawback payments to reflect a premium rate increase	$2,183,214
8.	Added funding for basic care provider payment changes	$704,148
9.	Added funding for senior meals program	$502,300
10.	Added funding to establish and administer a substance abuse voucher system	$375,000

2017-19 Biennium

1.	Removed 33 FTE positions from the department	($3,127,902)
2.	Reduced funding for staff overtime	($1,082,857)
3.	Adjusted funding for child care assistance eligibility	($2,160,357)
4.	Adjusted the professional fee schedule to 100 percent of Medicare and provided other policy changes	($10,612,966)
5.	Added funding to continue Medicaid Expansion for 19 and 20 year olds as managed care	$1,653,008

6. Changed a portion of funding sources for various programs from the general fund to the community health trust fund ($18,000,000) and the tobacco prevention and control trust fund ($22,175,000)	($40,175,000)
7. Added funding for nursing home operating margin, rebasing, and incentives	$1,783,181
8. Added funding for money follows the person grants	$527,954
9. Added funding to increase the autism waiver maximum age to 11 years old	$183,609
10. Reduced funding for vacant positions and employee turnover at institutions	($3,250,499)

2019-21 Biennium

1. Added funding for provider inflationary increases of 2 percent the 1st year of the biennium and 2.5 percent the 2nd year of the biennium	$30,155,090
2. Adjusted funding for anticipated changes in the regular FMAP	($25,682,840)
3. Adjusted funding for anticipated changes in the FMAP for Medicaid Expansion ($20,254,376) and the children's health insurance program ($6,152,757)	$26,407,133
4. Added funding for grant cost and caseload changes	$51,128,377
5. Replaced funding provided in the 2017-19 biennium from the tobacco prevention and control trust fund	$34,175,000
6. Replaced one-time funding provided in the 2017-19 biennium for Medicaid Expansion commercial rates	$13,300,000
7. Adjusted funding sources to use funding from the community health trust fund rather than the general fund	($32,400,000)
8. Added funding for the free through recovery program to provide services to individuals outside of the corrections system	$4,000,000
9. Added funding to expand crisis services	$4,096,174
10. Added funding for the substance use disorder voucher program	$3,053,523

2021-23 Biennium (Executive Budget Recommendation)

1. Adds funding for cost, caseload, and utilization changes, including $156,789,851 for medical services, $77,698,712 for long-term care, and $41,567,021 for developmental disabilities	$124,345,846
2. Underfunds salaries and wages by $4,694,730 from the general fund in anticipation of savings from vacant positions and employee turnover	($4,694,730)
3. Reduces ongoing funding appropriated during the 2019-21 biennium from the community health trust fund from $32.4 million to $24 million and replaces ongoing funding provided from the health care trust fund ($1 million)	$9,400,000
4. Provides a 1 percent inflationary increase for human service providers during each year of the 2021-23 biennium	$13,883,837
5. Increases funding for the substance use disorder voucher program from $8 million to $17 million	$9,000,000
6. Adjusts funding to reduce general fund support for traditional Medicaid ($50,919,245) and increase general fund support for Medicaid Expansion ($3,916,989) and the children's health insurance program ($1,222,892) due to changes in the state's FMAP	($45,779,364)
7. Underfunds Medicaid grants	($9,580,913)
8. Adds funding to contract with a private service provider for civil sex offender treatment	$917,004
9. Adds funding for the Capitol grounds agency rent proposal	$474,286
10. Adds ongoing funding to develop an early childhood integrated data system	$500,000

GOVERNOR'S RECOMMENDATION FOR THE DEPARTMENT OF HUMAN SERVICES AS SUBMITTED BY THE OFFICE OF MANAGEMENT AND BUDGET

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from special funds derived from federal funds and other income, to the department of human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2021, and ending June 30, 2023, as follows:

Subdivision 1.

MANAGEMENT

SECTION 2. ONE-TIME FUNDING - EFFECT ON BASE BUDGET - REPORT TO SIXTY-EIGHTH LEGISLATIVE ASSEMBLY. The following amounts reflect the one-time funding items approved by the sixty- sixth legislative assembly for the 2019-21 biennium and the 2021-23 biennium one-time funding items included in section 1 of this Act:

One-Time Funding Description	2019-21	2021-23
Technology Projects	$13,785,658	$ 0
Capital Projects – Life Skills and Transition Center	4,277,165	0
Capital Projects – State Hospital	2,493,500	0
Medically Complex Children Provider Funding Adjustment	977,603	0
Hyperbaric Oxygen Therapy Grant	335,000	0
State Hospital Study	200,000	0
MMIS Modernization	0	35,000,000
Nursing Facility Payment Reform	0	7,200,000
Nursing Home Bed Buy Back	0	3,300,000
Frame/CCIPS Replacement	0	30,000,000
Total All Funds	$22,068,926	$75,500,000
Less Estimated Income	20,556,323	49,525,314
Total General Fund	$1,512,603	$25,974,686

The 2021-23 biennium one-time funding amounts are not a part of the entity's base budget for the 2023-25 biennium. The department of human services shall report to the appropriations committees of the sixty-eighth legislative assembly on the use of this one-time funding for the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 3. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion - Legislative management report. (Effective ~~January~~August 1, ~~2020~~2021, through ~~July 31~~June 30, ~~2021~~2022 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.
2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.
3. Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.
4. The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even- numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.

5. Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.

SECTION 4. AMENDMENT. Section 50-24.1-37 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-37. Medicaid expansion ~~- Legislative management report~~. (Effective ~~January~~July 1, ~~2020~~2022, through July 31, ~~2021~~2023 - Contingent repeal - See note)

1. The department of human services shall expand medical assistance coverage as authorized by the federal Patient Protection and Affordable Care Act [Pub. L. 111-148], as amended by the Health Care and Education Reconciliation Act of 2010 [Pub. L. 111-152] to individuals under sixty-five years of age with income below one hundred thirty-eight percent of the federal poverty line published by the federal office of management and budget applicable to the household size.
2. The department shall inform new enrollees in the medical assistance expansion program that benefits may be reduced or eliminated if federal participation decreases or is eliminated.
3. ~~Except for pharmacy services, the department shall implement the expansion by bidding through private carriers or utilizing the health insurance exchange.~~
4. ~~The contract between the department and the private carrier must provide the department with full access to provider reimbursement rates. The department shall consider provider reimbursement rate information in selecting a private carrier under this section. Before August first of each even- numbered year, the department shall submit a report to the legislative management regarding provider reimbursement rates under the medical assistance expansion program. This report may provide cumulative data and trend data but may not disclose identifiable provider reimbursement rates.~~
5. ~~Provider reimbursement rate information received by the department under this section is confidential, except the department may use the reimbursement rate information to prepare the report to the legislative management as required under this section.~~

SECTION 5. REPEAL. Section 50-24.1-18.1 of the North Dakota Century Code is repealed.

SECTION 6. FUNDING TRANSFERS - EXCEPTION - AUTHORIZATION. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021 and ending June 30, 2023, as requested by the department of human services. The department of human services shall notify the legislative council of any transfer made pursuant to this section. The department shall report to the budget section after June 30, 2022, any transfer made in excess of $50,000 and to the appropriations committees of the sixty-eighth legislative assembly regarding any transfers made pursuant to this section.

SECTION 7. FUNDING TRANSFERS - EXCEPTION - AUTHORIZATION. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority from line items within subdivisions 1, 2, and 3 of section 1 of this Act to subdivision 4 of section 1 of this Act for the biennium beginning July 1, 2021 and ending June 30, 2023, as requested by the department of human services. The department of human services shall notify the legislative council of any transfer made pursuant to this section. The department shall report to the budget section after June 30, 2022 any transfer made in excess of $50,000 and to the appropriations committees of the sixty-eighth legislative assembly regarding any transfers made pursuant to this section.

SECTION 8. ESTIMATED INCOME - COMMUNITY HEALTH TRUST FUND. The estimated income line item in subdivision 2 of section 1 of this Act includes the sum of $24,000,000 from the community health trust fund for defraying expenses in the medical services division.

SECTION 9. ESTIMATED INCOME - HUMAN SERVICE FINANCE FUND. The estimated income line item in subdivision 4 of section 1 of this Act includes the sum of $174,380,767 from the human service finance fund for state-paid economic assistance and social and human services.

SECTION 10. APPROPRIATION – NURSING HOME BED REDUCTION. There is appropriated the sum of $3,300,000, from the general fund or so much of the sum as may be necessary, to the department of human services for the purpose of providing incentives to nursing homes to reduce licensed nursing facility bed capacity for the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 11. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM.

1. Subdivision 2 of section 1 of this Act includes the sum of $325,521,229, of which $36,606,115 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2021 and ending June 30, 2022. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount. For purposes of this section:
   a. Expenditures do not include those made for individuals identified as medically frail and who receive services through the traditional Medicaid program administered by the department of human services for which there is a separate appropriation of $5,120,064 included in subdivision 2 of section 1 of this Act.
   b. Expenditures do not include prescription drugs for the medical assistance expansion program population which is administered by the department of human services through its fee-for-service Medicaid program for which there is a separate appropriation of $34,364,628 included in subdivision 2 of section 1 of this Act.
2. The department of human services may exceed appropriations for increases in medical assistance expansion program caseload and for the addition of coverage consistent with the traditional Medicaid 1915i state plan.
3. The managed care organization under contract with the department to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department. The managed care organization may consider urban and rural providers as different provider types. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs.
4. The managed care organization and the department of human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement.
5. The department of human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.
6. The department of human services and the Medicaid expansion managed care organization shall ensure the appropriate contract amendment is adopted for coverage through June 30, 2022. The contract amendment shall stay within the appropriation and the requirements of chapter 54-44.4 do not apply.

SECTION 12. EXPENDITURES MAY NOT EXCEED APPROPRIATION – NURSING HOME RATES. Subdivision 2 of section 1 of this Act includes the sum of $635,373,451, of which $296,019,558 is from the general fund, for nursing home rates for the biennium beginning July 1, 2021 and ending June 30, 2023. The expenditures for nursing homes may not exceed this amount.

SECTION 13. HEALTH HOMES - REPORT TO LEGISLATIVE MANAGEMENT. During the biennium beginning July 1, 2021 and ending June 30, 2023, the department of human services shall develop a plan to implement, in accordance with section 1945 of the Social Security Act, health homes to coordinate care for people with Medicaid who have chronic conditions during the biennium beginning July 1, 2023 and ending June 30, 2025. Prior to October 1, 2022, the department shall report to the legislative management on the implementation plan.

SECTION 14. EXEMPTION. The amount appropriated for the Medicaid management information system technology stack upgrade in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54- 44.1-11. Any unexpended funds from these appropriations approved under section 54-44.1-11 are available for the completion of the Medicaid management information system technology stack upgrade during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 15. EXEMPTION. The amount appropriated for the modification of the department of human services' eligibility systems in chapter 578 of the 2011 Special Session Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54- 44.1-11 for continuation into the 2013-15 biennium, then the 2015-17 biennium, then the 2017-19 biennium, and then the 2019-21 biennium are available for the completion of the modification of the eligibility systems project during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 16. EXEMPTION. The amount appropriated for the development of the childcare licensing and data system in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under section 54-44.1-11 for continuation into the 2019- 21 biennium are available for the completion of the childcare licensing and data system during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 17. EXEMPTION. The amount appropriated for the development of the health information network in chapter 11 of the 2017 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation approved under 54-44.1-11 for continuation into the 2019-21 biennium are available for the completion of the health information network during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 18. EXEMPTION. The sum of $200,000 from the general fund appropriated for the department's operating expenses for the school behavioral health program in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation are available for the completion of the school behavior health pilot projects during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 19. EXEMPTION. The sum of $150,000 from the general fund appropriated for the department's operating expenses for behavioral health recovery home grants in chapter 37 of the 2019 Session Laws is not subject to the provisions of section 54-44.1-11. Any unexpended funds from this appropriation may be used for behavioral health recovery home grants during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 20. CONVEYANCE OF LAND AUTHORIZED - LIFE SKILLS AND TRANSITION CENTER. The state of North Dakota, by and through the department of human services, may convey real property associated with the life skills and transition center in Grafton to Grafton Parks and Recreation. The department may convey a portion of two parcels of land commonly referred to as “the bowl” on the terms and conditions determined appropriate by the department and the attorney general. Section 54-01-05.2 and 54-01-05.5 do not apply to this conveyance.

SECTION 21. CAPITAL PROJECTS AND PAYMENTS. During the period beginning with the effective date of this Act, and ending June 30, 2023, the department of human services is authorized to expend funds for the following capital projects and payments:

1. The payment of special assessments at the state hospital and life skills and transition center; and
2. The demolition of the chapel and employee building and associated tunnels at the state hospital.

Notwithstanding sections 54-16-04 and 54-27-12, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021 and ending June 30, 2023, as requested by the department of human services for the department to expend funds on the demolition of the identified buildings and associated tunnels and for emergency capital projects. The department of human services shall notify the legislative council of any transfer made pursuant to this section. The department of human services shall report to the

budget section after June 30, 2022 any transfer made in excess of $50,000 and to the appropriations committees of the sixty-eighth legislative assembly regarding any transfers made pursuant to this section.

SECTION 22. STATE HOSPITAL BUILDING PROJECTS. The department of human services is authorized to construct a new state hospital on the property owned by the state of North Dakota, in Stutsman County, near or on state hospital's current campus. The new state hospital may include space for the operation of the regional human service center. The department of human services shall utilize chapter 48-02.1 and have a private operator to build, transfer, and operate the facility through a development agreement on leased property owned by the state of North Dakota. The continuing cost to support the new state hospital through a development agreement must be included in the department of human services' 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 23. PROVIDER PROCESS AND OUTCOME MEASURES. Providers that receive funding from the department of human services shall submit process and outcome measures, as required by the department, to the department of human services for programs and services supported by state funding during the biennium beginning July 1, 2021 and ending June 30, 2023.

SECTION 24. QUALIFIED RESIDENTIAL TREATMENT PROVIDERS. The department of human services shall adopt rules, on or before October 1, 2021, establishing a new rate setting process and requirements for foster care maintenance rates for qualified residential treatment providers based on the appropriation received by the sixty-seventh legislative assembly.

SECTION 25. LEGISLATIVE INTENT – CONVEYANCE OF LAND. It is the intent of the sixty-seventh legislative assembly that the department of human services and national guard enter into an agreement to lease up to twenty acres of real property associated with the state hospital for the national guard to build a new training and storage center.

SECTION 26. EFFECTIVE DATE. Section 4 of this Act becomes effective on July 1, 2022.

SECTION 27. EXPIRATION DATE. Sections 3 and 11 of this Act is effective through June 30, 2022 and after that date is ineffective.

SECTION 28. EMERGENCY. Sections 21 and 22 of this Act are declared to be an emergency measure.

Presentation to House Appropriations Committee

Chris D. Jones, Director

January 7, 2021

DEPARTMENT OF HUMAN SERVICES

Quality services, Proven results, Closer to home

1. Base decisions on **quality**, **efficiency**, and **effectiveness**.

   Find success in a resource-constrained environment.

   Make **reductions** in some areas **and investments** in others to optimize outcomes.

2. The state has **enough treatment beds**. Investing in **earlier interventions** can help **avoid crisis**.

   Right service. Right place. Right time.

   Serving people in **lowest level of care necessary** will return **better outcomes**.

   To deliver services closer to home, **all** have to be **willing to change** how they do business – DHS can't do this alone.

3. How we **pay** for services should be **fair** and **equitable** across systems.

   Inequity in rates **affects** people's ability to **access** services - providers often prioritize more lucrative payment opportunities

   Demonstrate value to taxpayers. **Value** equals **high quality cost efficient care**.

#1

DHS in NDCC, with major statutory responsibilities

DHS AUTHORITY ESTABLISHED IN NDCC 50-06

Administration of human services programs related to:

- Children and families
- Individuals with developmental disabilities
- Aging services
- Behavioral health
- Economic assistance
- Medical service
- General assistance
- Child support

CHAPTER 50-06
DEPARTMENT OF HUMAN SERVICES

50-06-01. Definitions.
As used in this chapter, unless the context otherwise requires:

1. "Behavioral health" means the planning and implementation of preventive, consultative, diagnostic, treatment, crisis intervention, rehabilitative, and suicide prevention services for individuals with mental, emotional, or substance use disorders, and psychiatric conditions.
2. "Behavioral health provider" means any licensed or accredited behavioral health provider in this state.
3. "Department" means the department of human services.
4. "Human services" means:
   a. A service or assistance provided to an individual or an individual's family in need of services or assistance, including child welfare services, economic assistance programs, medical services programs, and aging services programs, to assist the individual or the individual's family in achieving and maintaining basic self-sufficiency, including physical health, mental health, education, welfare, food and nutrition, and housing.
   b. A service or assistance provided, administered, or supervised by the department in accordance with chapter 50-06.
   c. Licensing duties as administered or supervised by the department or delegated by the department to a human service zone.

50-06-01.1. Department of human services to be substituted for public welfare board of North Dakota and social service board of North Dakota, members of board, and executive director.

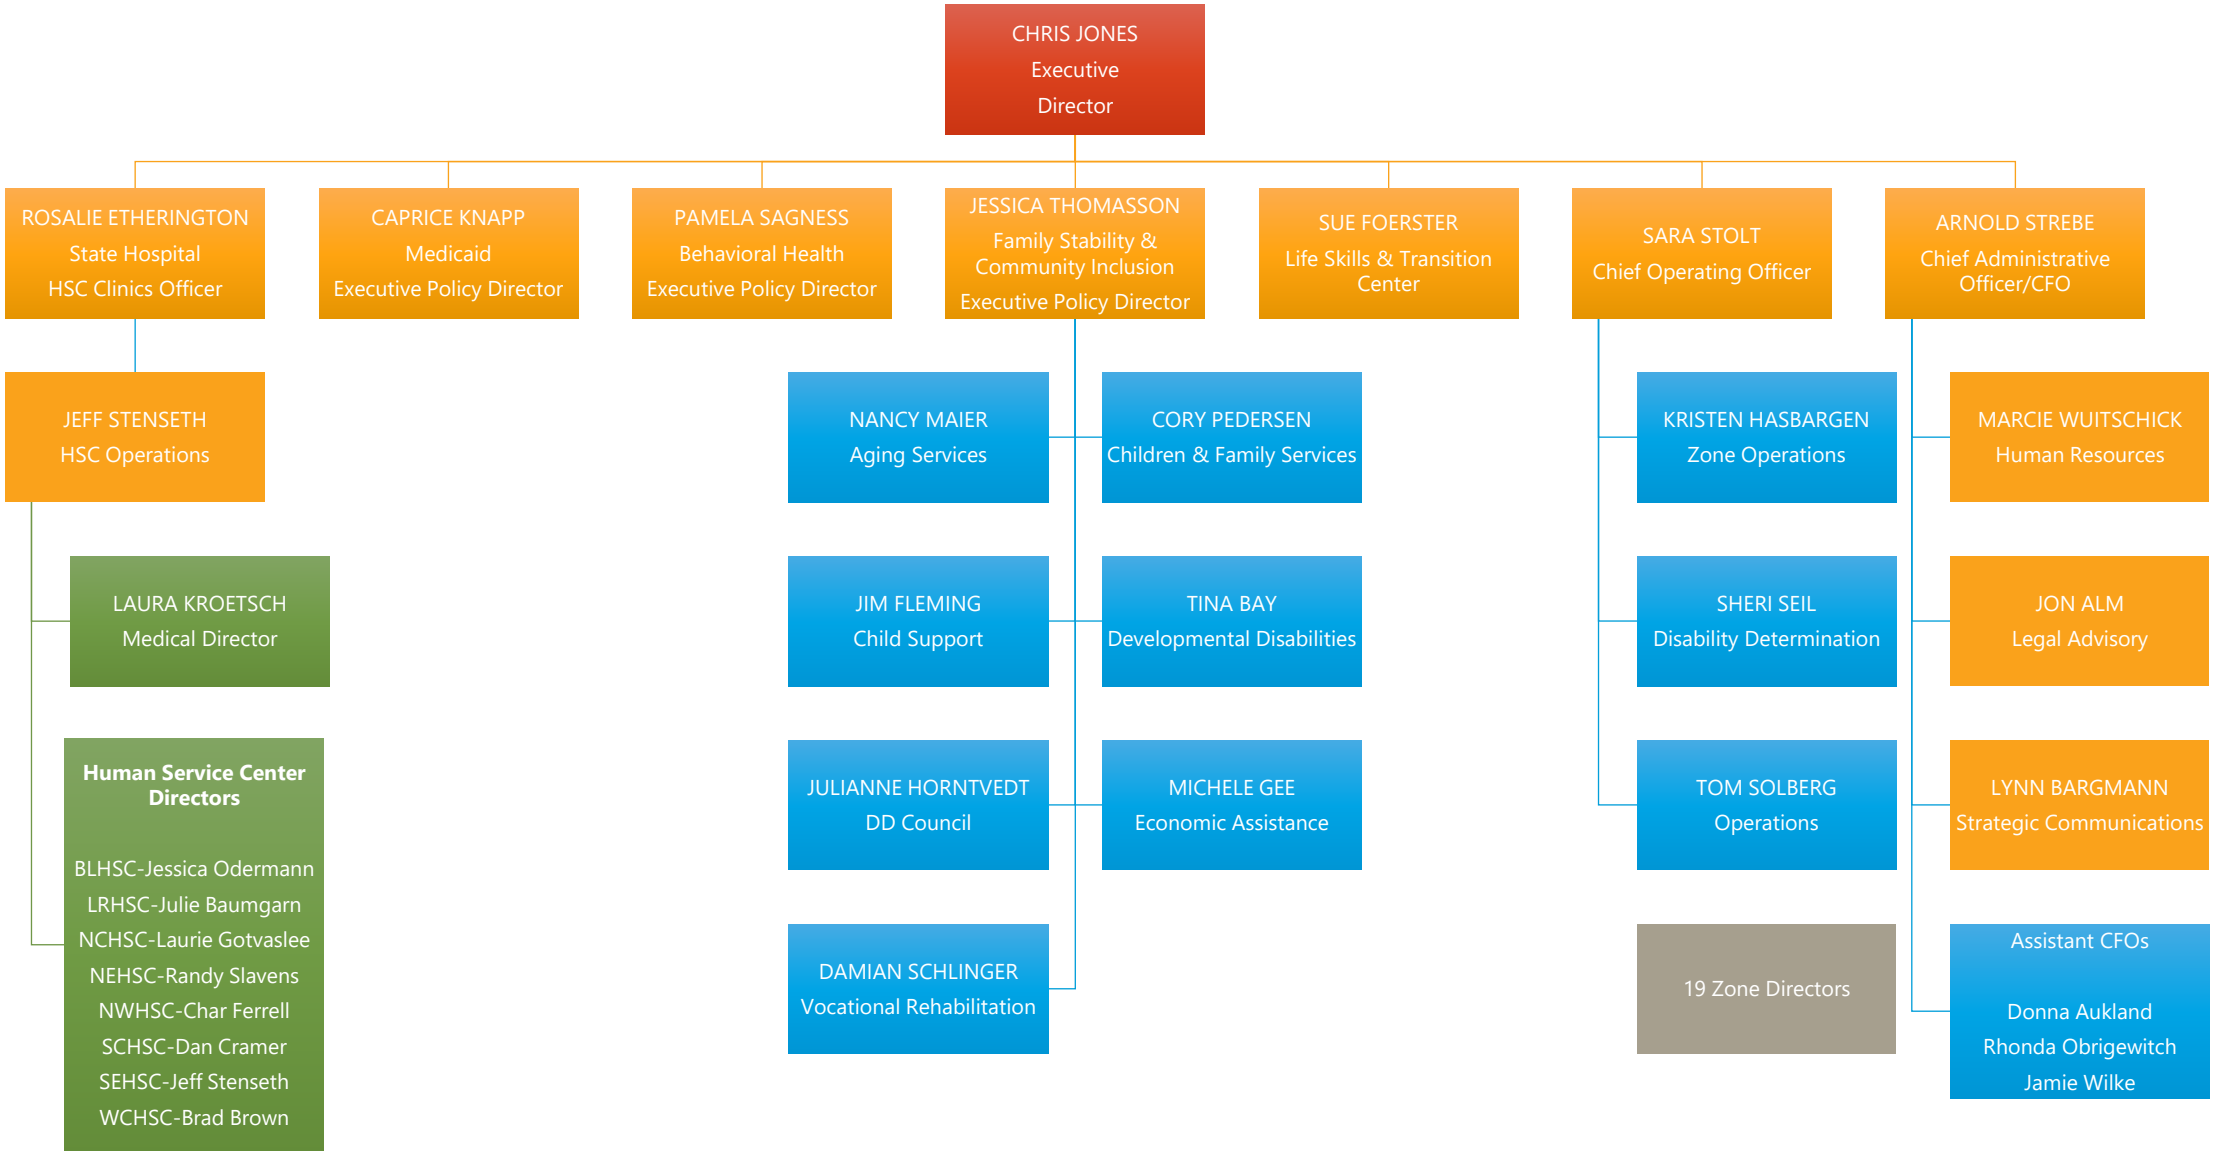
When the terms "public welfare board of North Dakota", "social service board of North Dakota", "executive director of the public welfare board", "executive director of the social service board", "member of the public welfare board", or "member of the social service board", or any derivative of those terms which, when used in context indicates an intention to refer to those persons or that board, appear in the North Dakota Century Code, the term "department of human services", or the term "executive director of the department of human services", as the case may be, must be substituted therefor. It is the intent of the legislative assembly that the department of human services must be substituted for, shall take any action previously to be taken by, and shall perform any duties previously to be performed by the public welfare board of North Dakota or by the social service board of North Dakota.

#2

Purpose of Agency divisions, including organizational chart

DHS Mission and Operating Principles

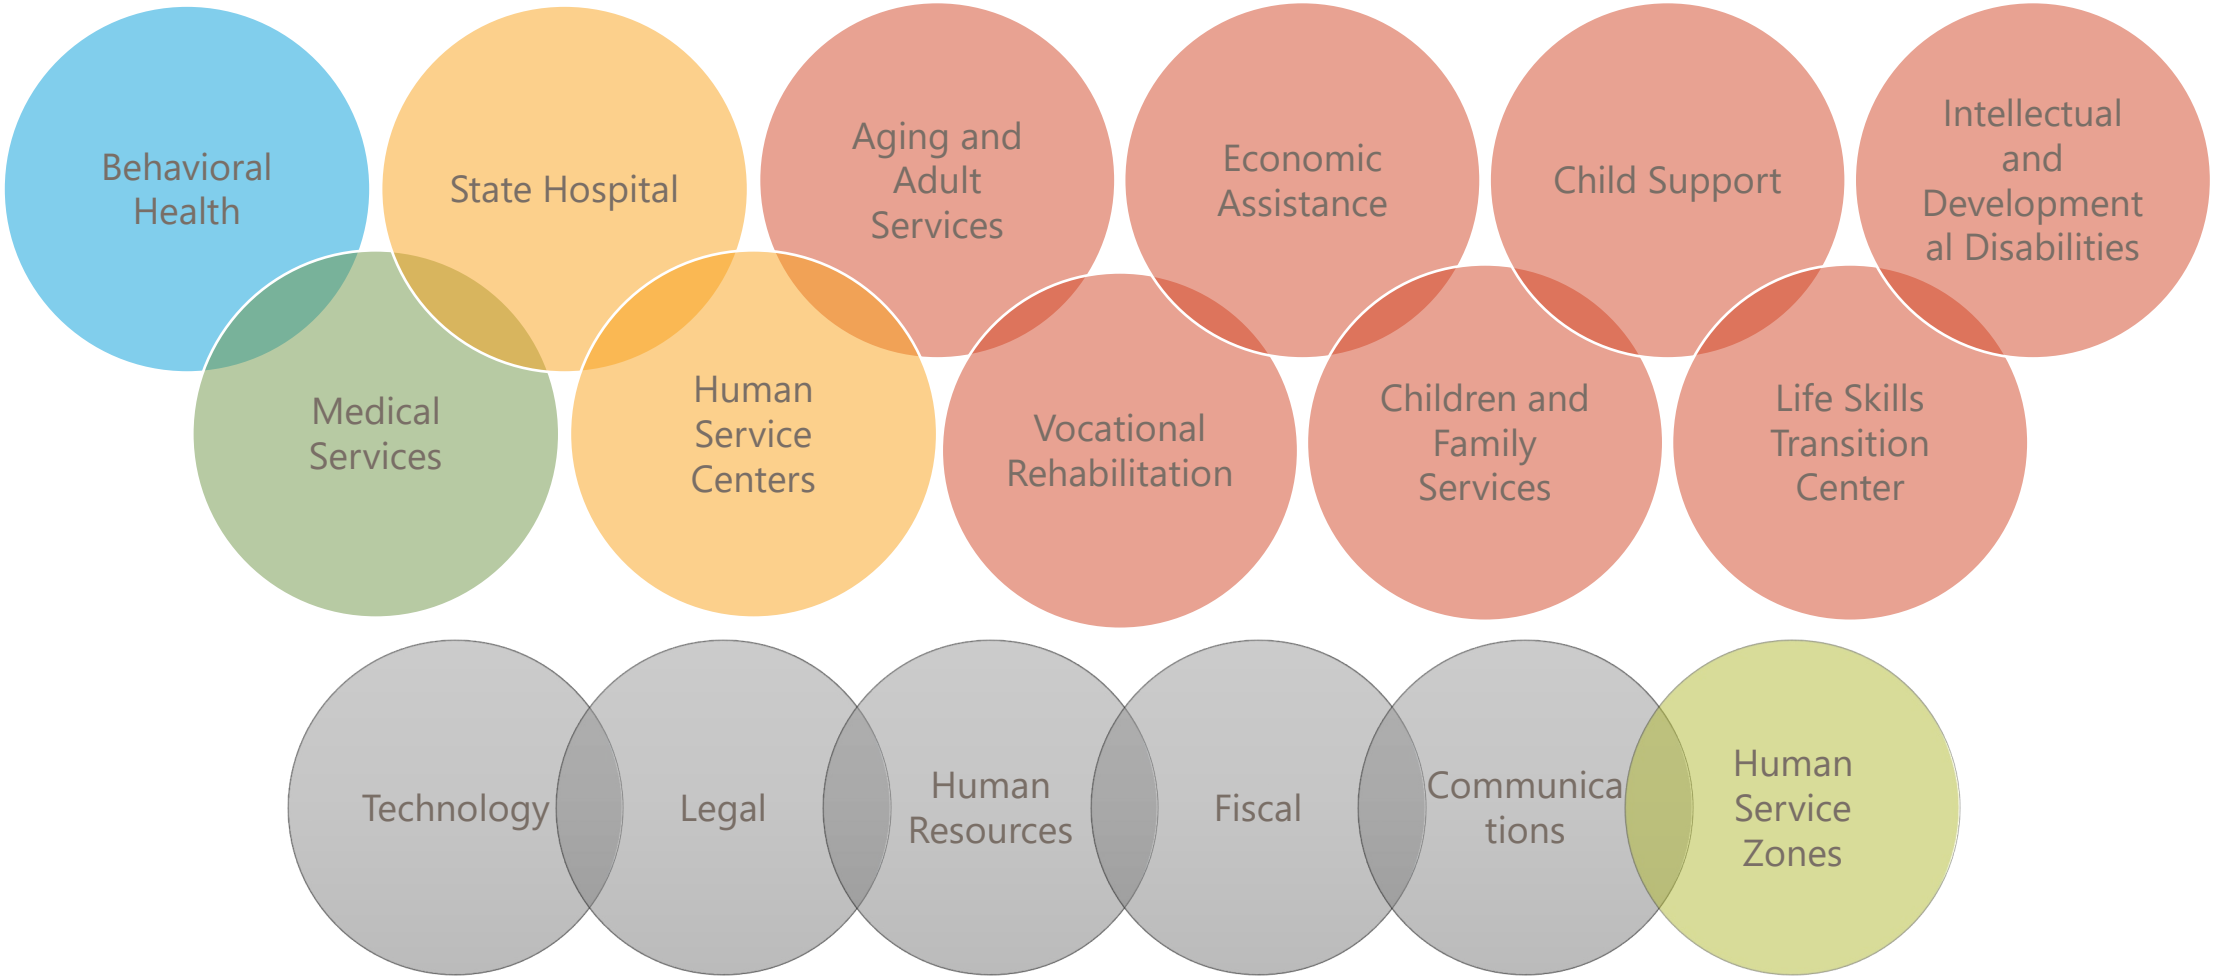
Provide quality, efficient, and effective human services, which improve the lives of people



- Services and care should be provided **as close to home as possible**
- Services should be **provided consistently across service areas** to promote equity of access and citizen focus of delivery

- Services should be administered to **optimize** for a given cost **the number served** at a service **level aligned to need**
- Investments and funding in DHS should **maximize ROI for the most vulnerable** through safety net services
- Cost-effectiveness should be considered holistically, acknowledging **potential unintended consequences** and **alignment between state and federal priorities**

- Services should help vulnerable North Dakotans of all ages maintain or enhance quality of life by:
- Supporting **access to the social determinants of health**: economic stability, housing, education, food, community, and health care
- **Mitigating threats** to quality of life such as lack of financial resources, emotional crises, disabling conditions, or inability to protect oneself



NORTH Dakota | Human Services

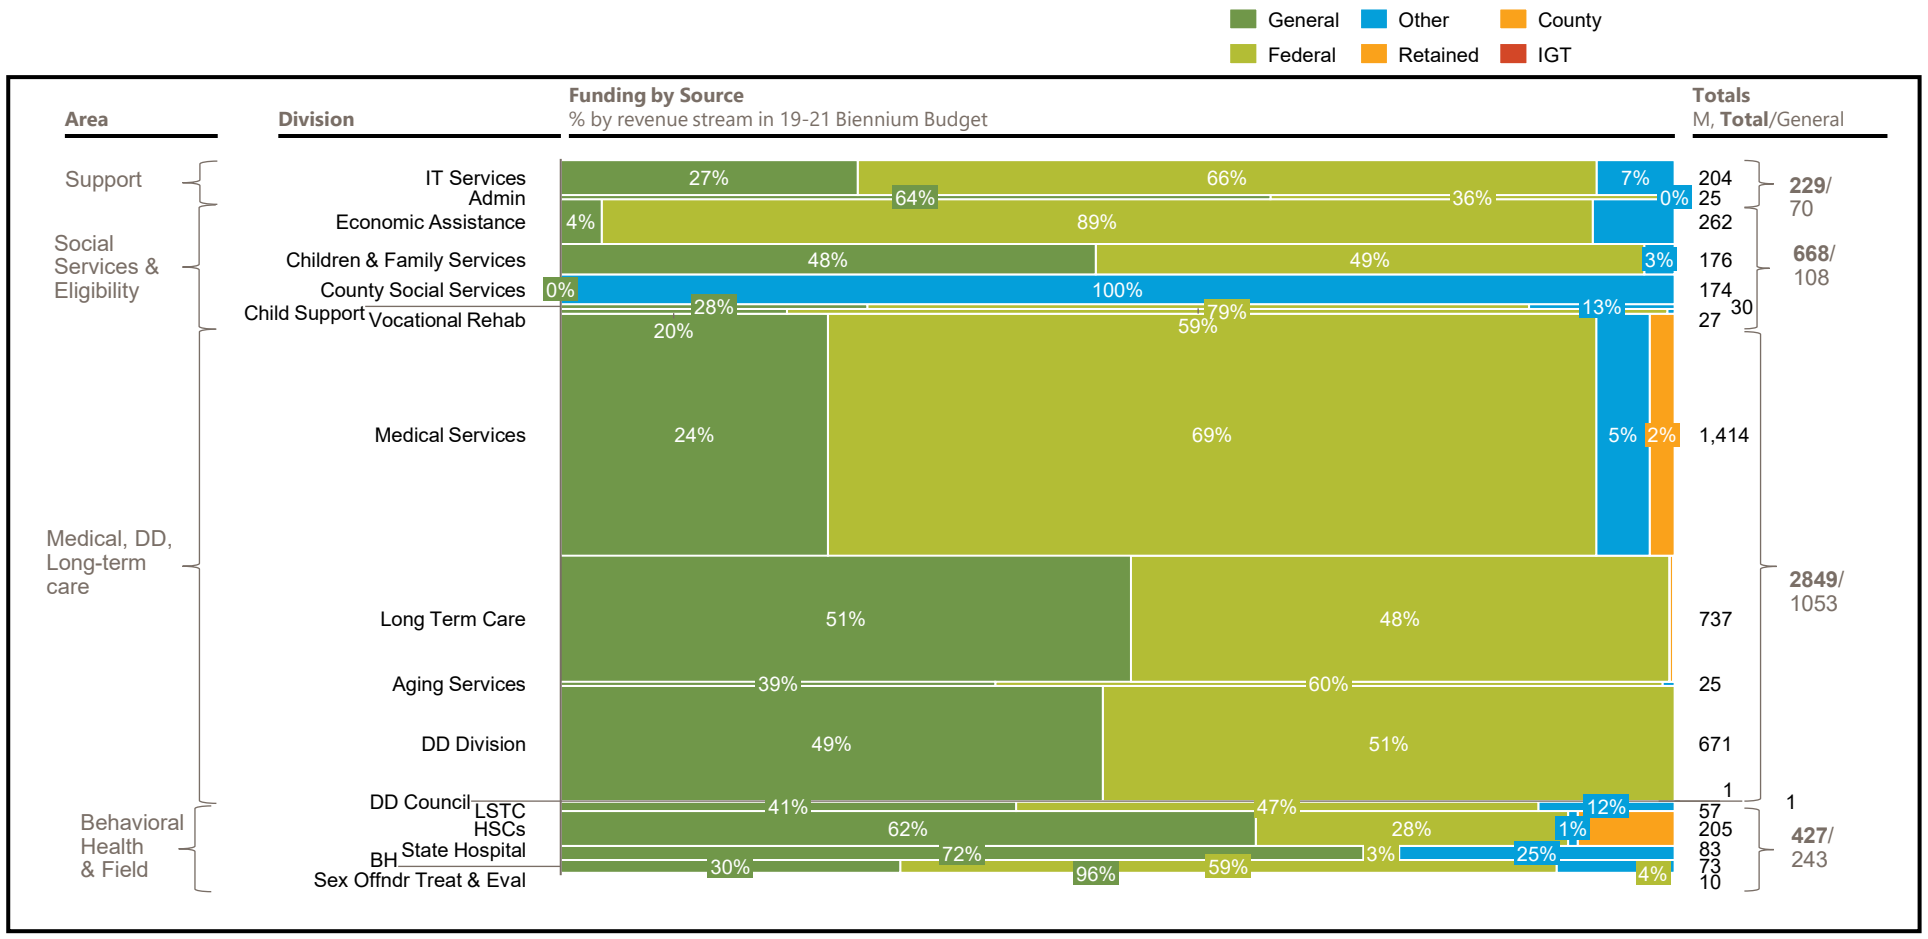
ND DEPARTMENT OF HUMAN SERVICES

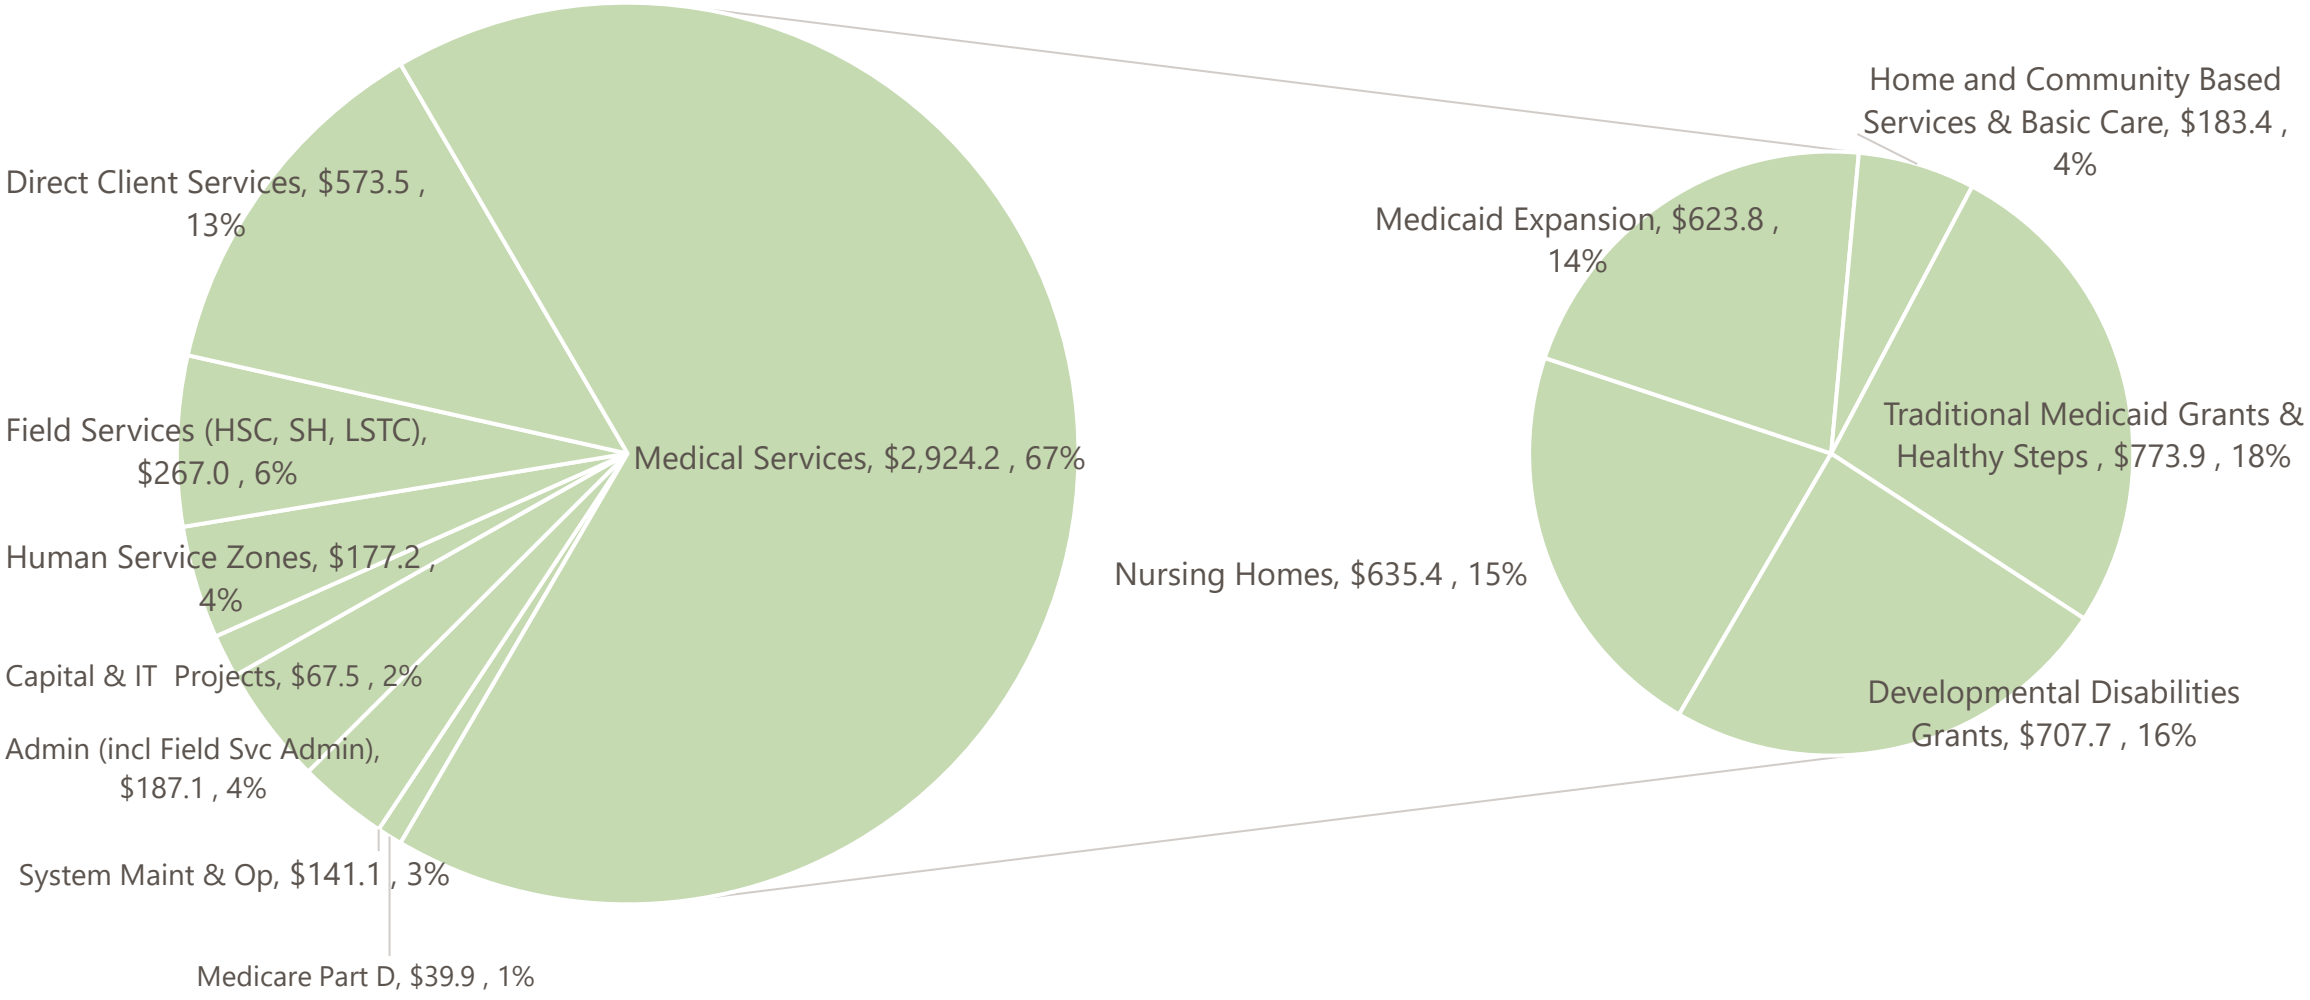
Helping North Dakotans realize their potential through targeted, evidence-based interventions that deliver meaningful results



2021-2023 EXECUTIVE BUDGET

Total budget by agency / group

DHS BY FUNCTIONAL AREA



The majority of DHS funds are spent on medical, DD, & long-term care services

March 2020

2021-2023 EXECUTIVE BUDGET DHS

Total budget $4.378 billion, by category of expenditure

Direct Client Services include Economic Assistance Programs, Child Welfare Programs, and grants and service contracts for Aging, Behavioral Health, Vocational Rehabilitation, Medical Services, and Developmental Disability.

#3

Financial Audit findings and corrective actions

SFY19 AUDIT OF DHS
Findings and Programmatic Recommendations

MEDICAID AND SNAP

- Payments After Death. Ensure payments are not made for the benefit of deceased individuals. *New system to be implemented April 2021*
- Child Care Correction Orders Not Resolved. Improve procedures to ensure child care correction orders are resolved at the end of each allowed correction period. *Updated tracking system; new early childhood database to be implemented April 2021*
- Not monitoring child care facilities with MOUs. Perform additional monitoring of child care providers to ensure compliance with memorandum of understanding agreements. *Department no longer uses MOUs*

CHILD PROTECTION SERVICES

- Failure to timely contact suspected victims of child abuse and neglect. Ensure timely face-to-face contact with suspected victims of child abuse and neglect. *Redesign of CPS in process*
- Not performing quality assurance for child protection svc. Ensure consistent and complete quality assurance procedures surrounding reports of child abuse and neglect, investigations, and decisions. *Redesign of QA for CPS implemented Dec 2019; regional field specialists joined QA efforts SFY20*
- Confirmed child abusers not listed on index. Ensure individuals with confirmed child abuse or neglect are properly listed on the Child Abuse and Neglect Index. *Implemented new system reporting March 2019*

OTHER RESULTS

- Financial errors. Strengthen procedures surrounding the CAFR reporting process to ensure accurate amounts are reported to the Office of Management and Budget. *Continued collaboration with OMB and SAO.*
- Medicaid drug rebate system errors. Strengthen controls surrounding the Drug Rebate and Analysis Management System (DRAMS) to ensure receivables balances are properly calculated and interest is properly calculated for overdue drug rebate balances. *System updates in process*

#4

Current Biennium accomplishments and challenges; next biennium goals and plans

DHS 19-21 BIENNIUM ACCOMPLISHMENTS

Optimizing Return on Investment by helping avoid crises

- North Dakotans now receive 50 percent of their behavioral health services from a human service center within a community versus a clinic setting.

Behavioral Health Embedded in Community

- Over the last year, behavioral health clients who received services at a human service center experienced a 53 percent reduction in arrests.

Positive Results from Effective Treatment Delivery

- North Dakotans now have access to 24/7 mobile crisis response. We've provided 5,628 crisis services in the last year, with crisis psychotherapy and triage services doubling in the last three months.

24/7 Crisis Response

- Since updating eligibility criteria for home and community-based services in January 2020, 730 individuals have been able to access services in their home, which is a 25 percent increase from CY2019.

Increased community services to older adults

- We've provided increased access to Medicaid services for pregnant women (increased eligibility from 138 percent to 147 percent of poverty) and children with disabilities (from 225 percent to 250 percent of poverty).

More pregnant women and children with access to health care

- HSC accreditation: The agency's human service centers received four-year national accreditation from the Council on Accreditation for its outpatient behavioral health services.

Accreditation for HSC behavioral health team

- Peer support specialists: DHS provided training to more than 460 individuals, and 30 people are newly certified in delivering behavioral health peer support services.

Peer supports available to more people in more places

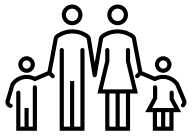
DHS 19-21 BIENNIUM ACCOMPLISHMENTS & WORK IN PROGRESS

Improved access to effective services

Process Improvement & Redesign Efforts

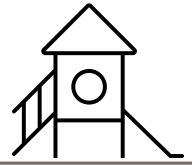
- Long term care eligibility team
- Child Protective Service Redesign
- Human Service Zones
- Centralized approach to childcare licensing
- Move to functional teams for child support
- Electronic Visit Verification & case management systems

Treatment & Recovery Supports



- Medication Assisted Treatment
- Expanded use of SUD voucher
- Behavioral health crisis services

In-Community Services



- Peer supports, Companionship, and Adult Foster Care
- Social Determinants of Health via Medicaid (1915i)
- Centralized connection point for home & community-based svc (ADRL)
- Extended Free Through Recovery

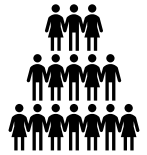
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

#5

Compare agency's request/ recommendation totals, including FTE for next biennium, compared to current biennium

DHS IN THE 21-23 BIENNIUM

Quality services, Proven results, Closer to home

1. Invest resources in **prevention** and **early intervention** resulting in a **reduction in foster care** and facility-based placements of children.

2. Support for new **small-scale settings** for **children and adults** with **complex needs**.

3. Continued investment in **behavioral health** initiatives that **expand access** to vital services.

4. Expansion of **home and community-based services** to older adults and people with disabilities.

5. Focus on **efficiency and effectiveness** in contracting and service delivery.

6. **Expansion** of peer support, supported housing, supported employment, and other **community-based support services**.

7. Across the board **cost savings** related to changes in travel, space utilization, and discretionary grant programs.

DHS FUNDED LONG TERM CARE AND HCBS SERVICES

Total cost by type of service

Cost Per Recipient Per Year

Cost paid by state by service in $ in State Fiscal Year 2020

Program Descriptions / Detail

- **Service Payments for the Elderly and Disabled (SPED):** Provides services for people who are older or physically disabled, have limited assets, and who have difficulty completing tasks that enable them to live independently at home.
- **Expanded SPED (Ex-SPED):** Pays for in-home and community-based services for people who would otherwise receive care in a licensed basic care facility.
- **Home and community-based services (HCBS) waiver:** This waiver from the federal government allows the state to use Medicaid funds to provide services enabling eligible individuals who would otherwise require nursing home services to remain in their homes or communities.
- **Medicaid State Plan personal care (MSP-PC):** Personal care services available under the Medicaid state plan and enable persons with disabilities or chronic conditions accomplish tasks they would normally do for themselves if they did not have a disability.
- **Basic Care:** Room and board and personal care services for persons eligible for Medicaid.

MEDICAL SERVICES

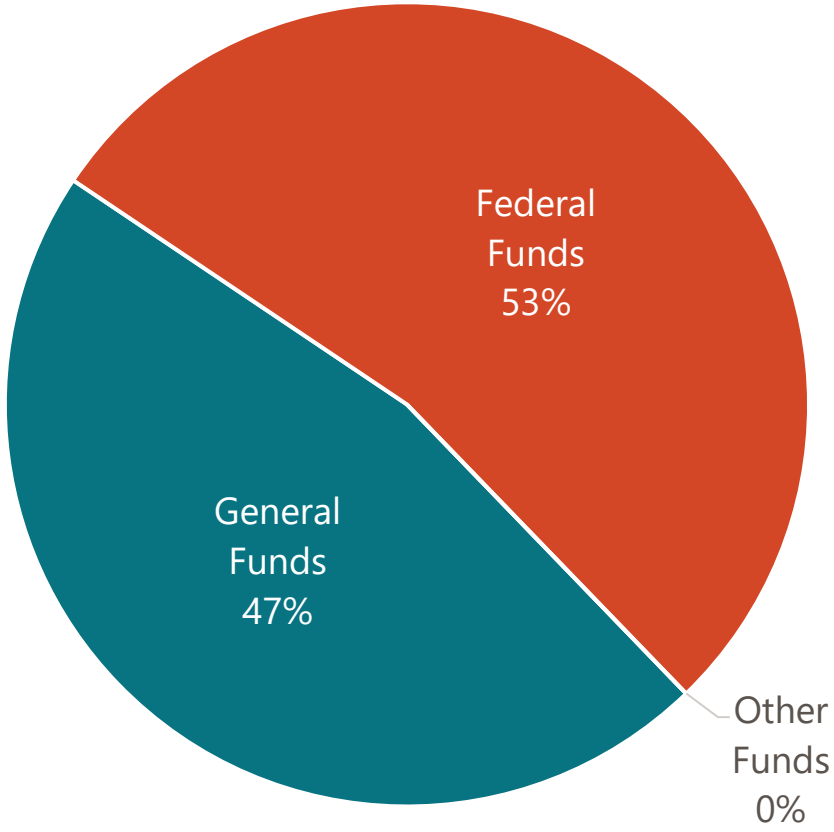
21-23 Budget (exec) **$34,452,766**

44 FTEs; no change in FTEs projected; $3,238,471 budget increase (98% in federal funds)

- Implementation of in-reach and out-reach and centralized intake for home and community based services
- Continuation of Money Follows the Person
- Eliminate Tech Dependent Waiver
- Various programmatic and operating efficiencies

21-23 Exec Budget

DEVELOPMENTAL DISABILITY SERVICES
Budget Highlights



19-21 Budget **$689,016,522**

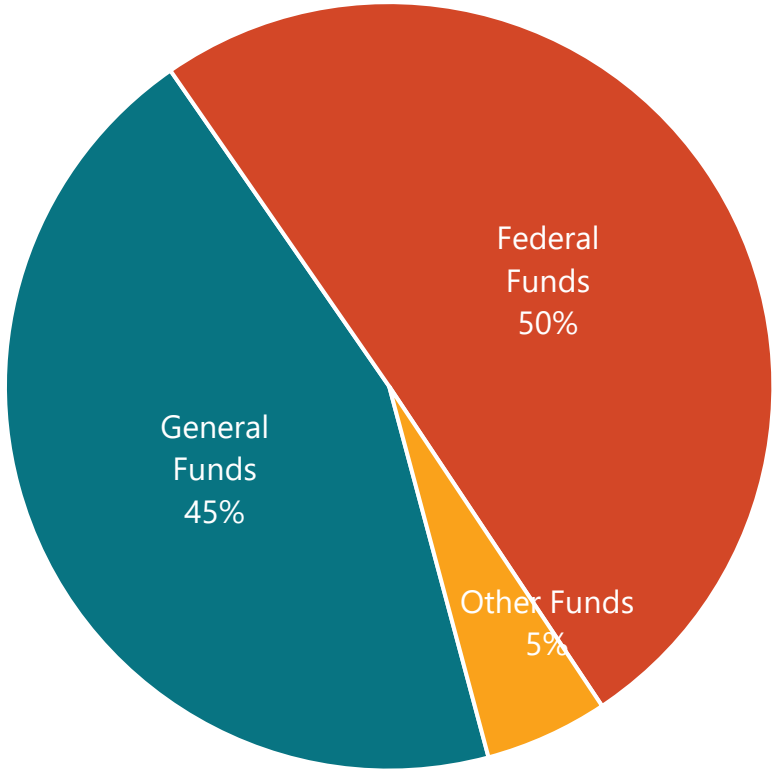
21-23 Budget (exec) **$739,269,819**

125.87 FTEs; no change in FTEs projected; $50.2 million increase in total budget (83% of increase is from federal funds)

- Diversion/Transition initiative with LSTC
- Payment system adjustments for ICF and Residential Group Homes
- Elimination of recreation and Section 11 grants
- Operating efficiencies related to travel and occupancy

21-23 Exec Budget

LIFE SKILLS TRANSITION CENTER
Budget Highlights



19-21 Budget	**$58,794,948**
21-23 Budget (exec)	**$48,619,605**

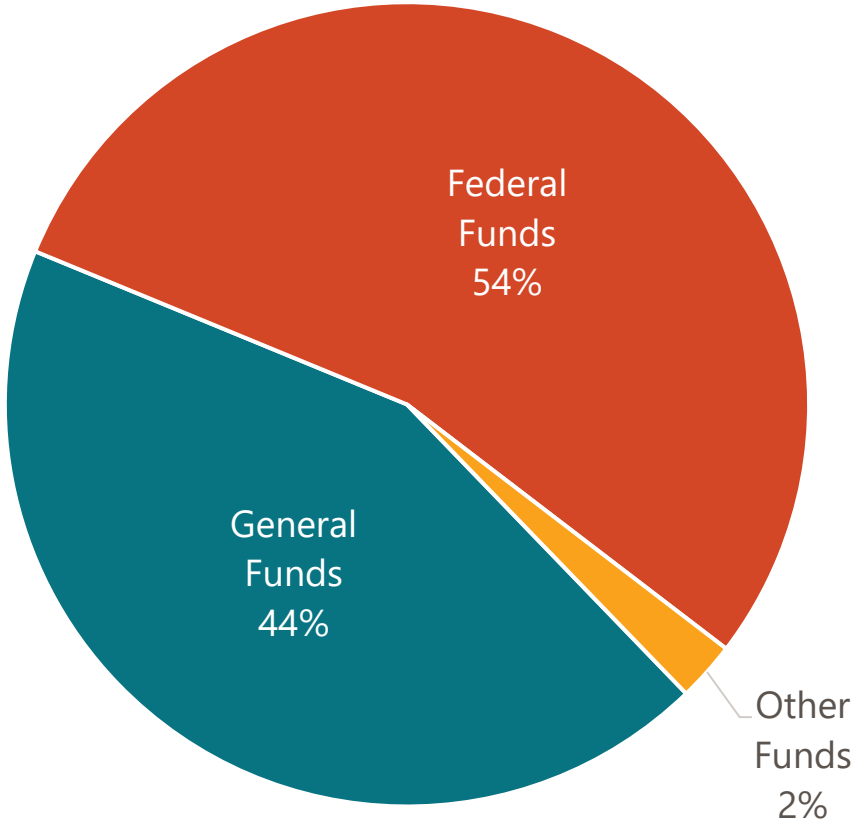
308.34 FTEs projected, includes reduction of 14.5 FTEs; $10,175,343 budget reduction (50% in federal funds)

- Reduce census by 26 (16 youth, 10 adults) via both transitions and diversions
- Shift operations to re-orient toward crisis and stabilization service
- Reduce general fund contribution to adaptive equipment service, seeking alternate revenue sources

NOTE: Interconnection between LSTC, CFS, and DD budgets as service models shift

21-23 Exec Budget

CHILDREN & FAMILY SERVICES
Budget Highlights



19-21 Budget **$181,171,041**

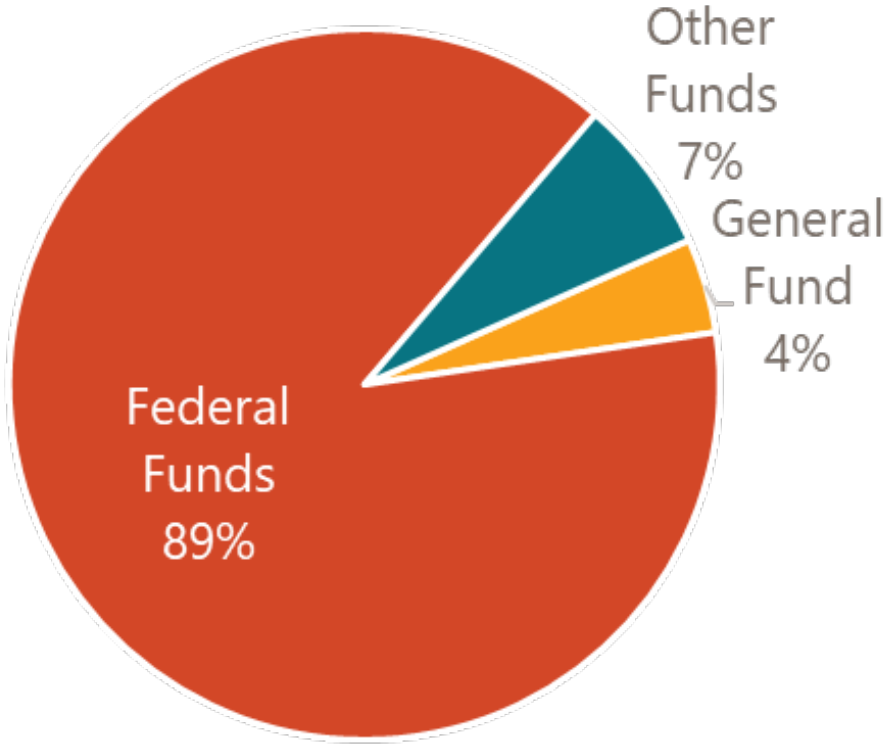
21-23 Budget (exec) **$165,637,720**

41.6 FTEs; no change in FTEs projected; $15.5 million decrease in total budget (7% of reduction is from federal funds)

- Reduce foster care and residential placements, accomplished in part by investing in evidence-based parent skill building and mental health services to families
- Implement equity in payments for services to families (QRTP, subsidized adoption, targeted case mgmt.)
- Investment in early childhood integrated data system
- Replacement of child welfare technology platform

21-23 Exec Budget

ECONOMIC ASSISTANCE
Budget Highlights



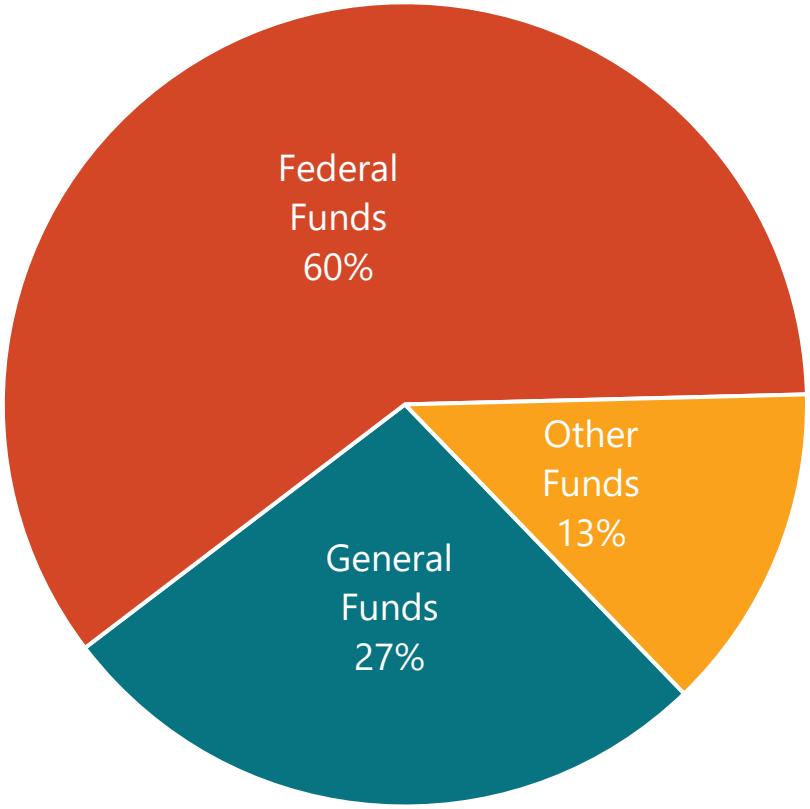
19-21 Budget **$259,846,264**

21-23 Budget (exec) **$274,998,084**

39.8 FTEs; no change in FTEs projected; $15.1 million increase in total budget (77% from federal funding)

- Complete the integration of LIHEAP into integrated eligibility platform
- Finish converting cases from legacy mainframe systems to SPACES
- Administer federal COVID relief funds for low and moderate income households
- Integrate department's housing assistance initiatives into the administration of economic assistance resources

21-23 Exec Budget



CHILD SUPPORT
Budget Highlights

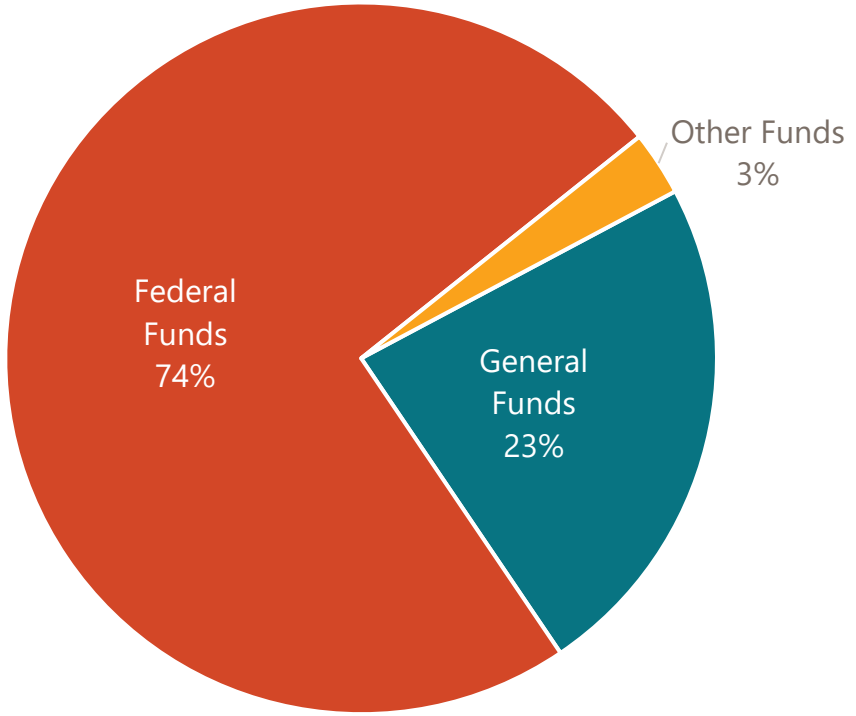
19-21 Budget	**$29,805,507**
21-23 Budget (exec)	**$30,539,102**

157.7 FTEs; no change in FTEs projected; $733,595 increase in total budget (60% federal funds)

- Operating efficiencies related to travel and occupancy

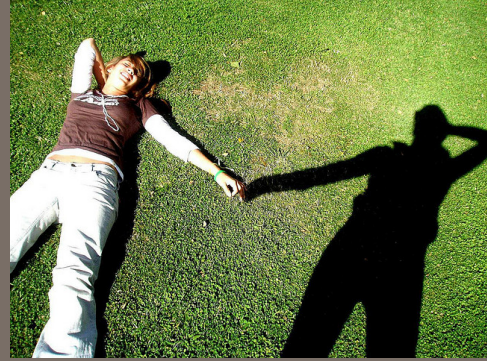
21-23 Exec Budget

VOCATIONAL REHABILITATION SERVICES
Budget Highlights



19-21 Budget **$31,853,039**

21-23 Budget (exec) **$30,528,323**

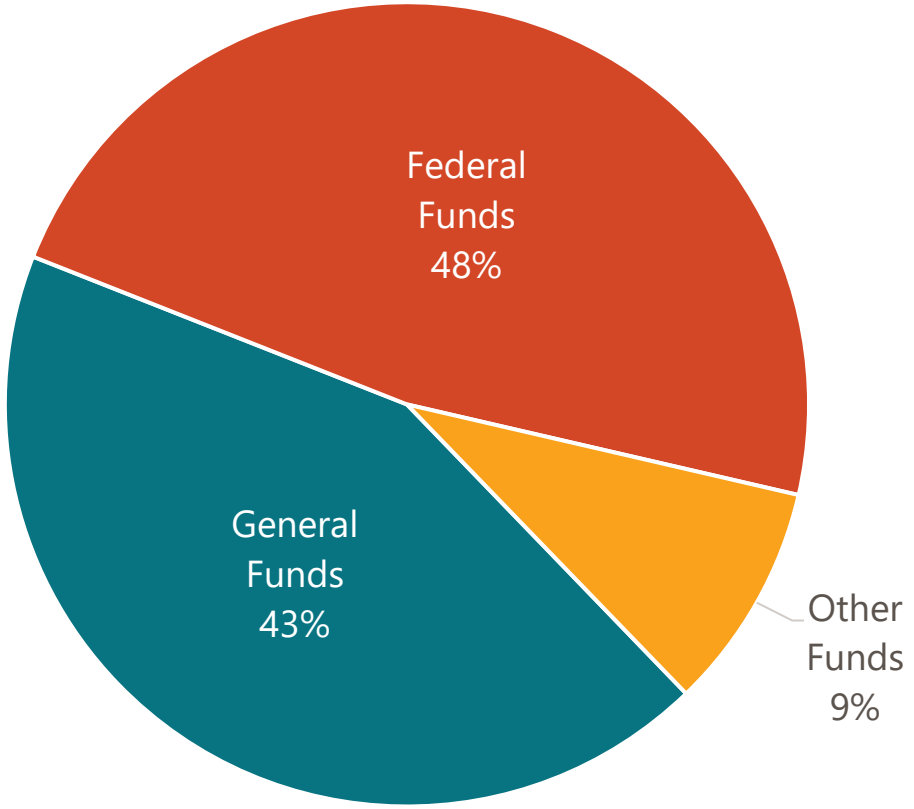


85 FTEs; no change in FTEs projected; $1.3 million decrease in total budget (0% federal funds)

- Operating efficiencies related to travel and occupancy
- Discontinuation of grant to private recreational facility

21-23 Exec Budget

BEHAVIORAL HEALTH
Budget Highlights



19-21 Budget **$72,069,770**

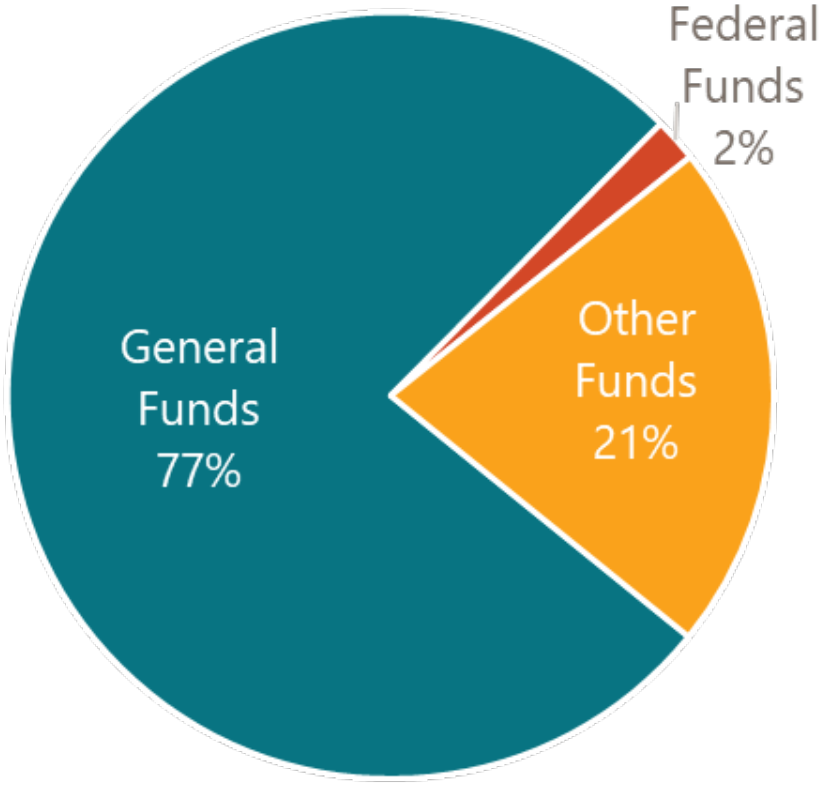
21-23 Budget (exec) **$85,003,305**

36 FTE; no change in FTEs projected; $12.9 million increase in total budget (0% of reduction from federal funds)

- Substance Use Disorder Voucher
- Expanded Free Through Recovery for non-justice involved families
- Behavioral Health in schools

21-23 Exec Budget

STATE HOSPITAL
Budget Highlights



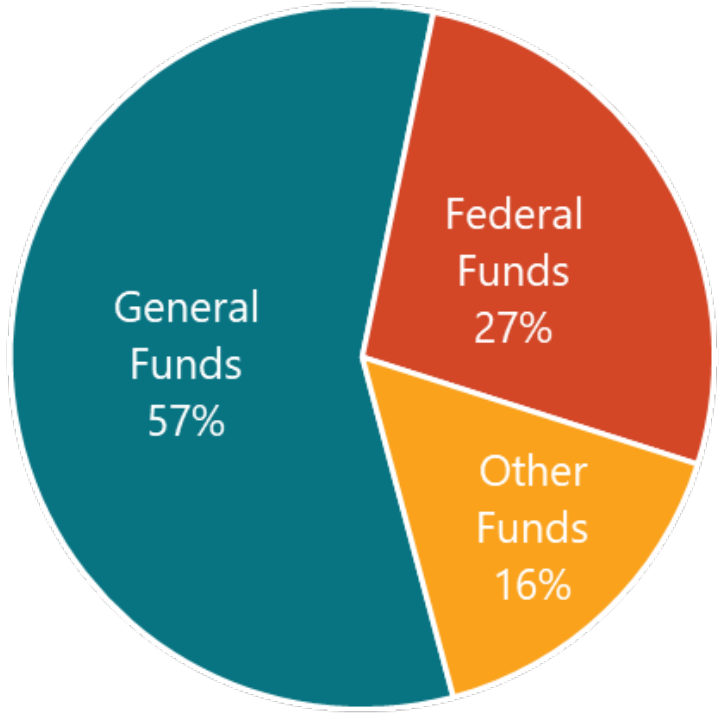
19-21 Budget **$68,801,489**

21-23 Budget (exec) **$65,954,923**

310.52 FTEs; includes reduction of 20.1 FTEs; $2.8 million budget reduction (19% in federal funds)

- Construction of new treatment campus, utilizing operating savings to retire debt service
  - Requires addition of 6-10 hospital beds in western North Dakota
  - Statutory authority to decline admissions when full
  - Reduction of state hospital inpatient services to 75 beds
- Various operating efficiencies at current campus
- Discontinuation of DOCR treatment contract

21-23 Exec Budget



HUMAN SERVICE CENTERS
Budget Highlights

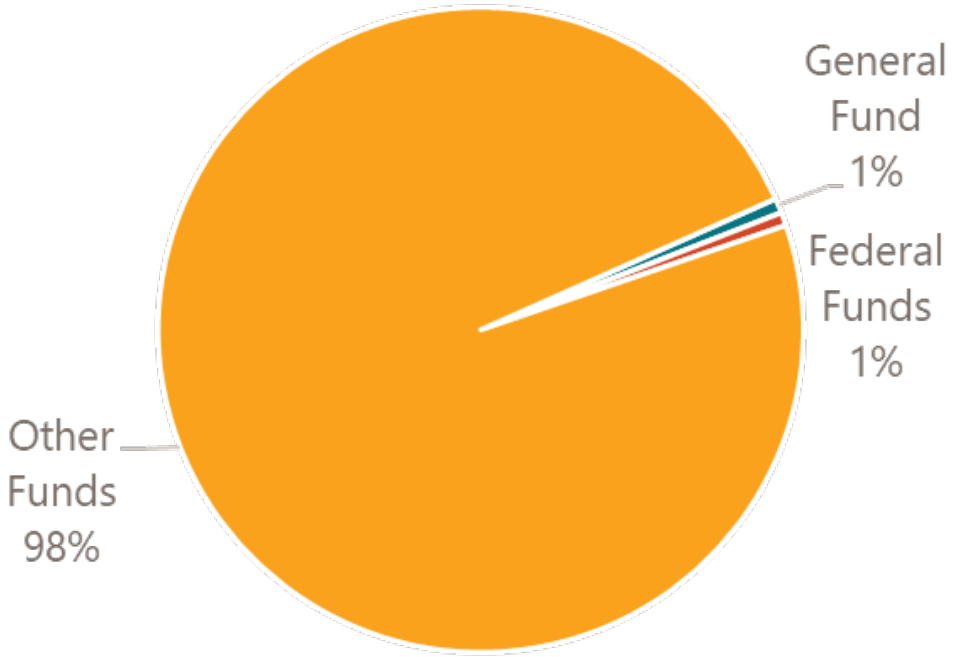
19-21 Budget	**$162,984,547**
21-23 Budget (exec)	**$167,518,311**

637.95 FTEs; no change in FTEs projected; $4.5 million budget increase (27% in federal funds)

- Operating efficiencies across the network of human service centers
- Reduction in various supported housing and employment contracts to facilitate a shift in payment from general fund to 1915i for services delivered to eligible individuals
- Program efficiencies involving transition of case aid and related service contracts

21-23 Exec Budget

HUMAN SERVICE ZONES
Budget Highlights



19-21 Budget **$173,700,000**

21-23 Budget (exec) **$177,158,738**

143 FTEs; includes 3 additional FTEs; $3.5 million increase in total budget (34% from federal funding)

- Adding authority to include targeted case management in HSZ budgets
- Redesign eligibility processes to improve customer experience and level workloads

21-23 Exec Budget

#7

Purpose and use of one-time funding items for current biennium

DHS ONE TIME FUNDING

Strategic infrastructure investments support delivery of service

One-Time Funding Description	2019-21	2021-23
Technology Projects	$13,785,658	$ 0
Capital Projects – Life Skills and Transition Center	4,277,165	0
Capital Projects – State Hospital	2,493,500	0
Medically Complex Children Provider Funding Adjustment	977,603	0
Hyperbaric Oxygen Therapy Grant	335,000	0
State Hospital Study	200,000	0
MMIS Modernization	0	35,000,000
Nursing Facility Payment Reform	0	7,200,000
Nursing Home Bed Buy Back	0	3,300,000
Frame/CCIPS Replacement	0	30,000,000
Total All Funds	$22,068,926	$75,500,000
Less Estimated Income	20,556,323	49,525,314
Total General Fund	$1,512,603	$25,974,686

#8

Identify and justify the need for any one time funding being requested / recommended

DHS ONE TIME FUNDING
Replacement of FRAME/CCWIPS

DIVISION
Children & Family Services

BUDGET AMOUNT
$30,000,000
- $15 M general fund
- $15 M federal funds

PURPOSE
Develop and deploy system to manage child protection, foster care, in-home supports to families, and adoption

Supports administrative efficiencies, retirement of mainframe, and requirements for continued federal program compliance

DHS ONE TIME FUNDING

Nursing Home Bed Buyback

DIVISION
Medical Services

BUDGET AMOUNT
$3,300,000
- $3.3 M general fund
- $0 M federal funds

PURPOSE
Right size and support nursing facilities due to COVID and other changes in state regarding HCBS.

DHS ONE TIME FUNDING

Nursing Home Payment Reform

DIVISION
Medical Services

BUDGET AMOUNT
$7,200,000
- $3.35 M general fund
- $3.85 M federal funds

PURPOSE
Modify the nursing home payment system to reward and promote efficiency and support renovation of properties

DHS ONE TIME FUNDING

State Hospital

DIVISION
State Hospital

BUDGET AMOUNT
$0

- $0 M general fund
- $0 M federal funds

PURPOSE
Build new treatment campus is Jamestown to replace aging infrastructure and realize operational savings; finance via public private partnership that applies operational savings to debt service

#9

Agency collections deposited in the general fund or a special fund, and anticipated changes from 2019-21

DHS AGENCY COLLECTIONS

Anticipating increase in fee for service collections at HSCs

2019-21
$20,556,323

2021-23
$26,659,485

$6.1 million

#10

Discuss need for other sections that are included or recommended to be included in agency appropriation bill

SECTIONS IN AGENCY BUDGET BILL

References support quality and efficient service delivery

1. Amendment to section 50-24.1-37 to extend Medicaid expansion and to transition administration of Medicaid expansion to DHS
2. Repeal section 50-24.1-18.1 relating to consumer-directed health maintenance service.
3. Nursing home bed reduction authorization and appropriation
4. Medicaid expansion and nursing home rates expenditures may not exceed appropriation language.
5. Develop a plan to implement health homes and report to legislative management
6. Exemptions to carry-over 2019-23 funds
7. Authorization to convey land at Life Skills and Transition Center and to enter into an agreement to lease state hospital land to the national guard
8. Capital projects and payment language, including authorization to construct a new state hospital
9. Provider process and outcome measures
10. A requirement to the department to establish a new rate setting process and requirements for qualified residential treatment providers

#11

Any other bills being considered by legislative assembly and their potential budgetary impact on agency

OTHER DHS-RELATED BILLS
As of 1-5-21

HB1015 – OMB's appropriation; guardianship grants

HB1034 – Preliminary treatment and involuntary treatment hearings

HB1035 – Juvenile Justice reform bill

HB1048 – Allowance for guardians to be required by Court to furnish a bond

HB1065 – Nursing home operating costs

HB1066 – Accreditation of Human Service Centers

HB1089 – Seclusion, restraint, and prohibition of shock treatment and aversive reinforcement

HB1090 – Nursing home rates

HB1091 – Use of ACH for foster care and shelter care payments

OTHER DHS-RELATED BILLS
As of 1-5-21

SB2004 – Dept of Health appropriation; prevention and behavioral health

SB2015 – DOCR's appropriation; Free Through Recovery / community behavioral health program

SB2082 – Transferring Child Support responsibilities from Court to Department

SB2083 – Child abuse and neglect

SB2084 – Involuntary treatment and emergency detention

SB2085 – Utilization of ACH for medical assistance providers

SB2086 – Operation and financing of Human Service Zones

SB2087 – Medical assistance prior authorization program

SB2088 – Adoption assistance and utilization of ACH for adoptive parents

SB2089 – DHS authority and housing stabilization

OTHER DHS-RELATED BILLS
Un-assigned bills (DHS pre-filed)

- Bill relating to the repeal of section 50-06-32.1 regarding autism spectrum disorder voucher program; and
- Bill relating to the remedial eye care (within limits of legislative appropriation) and Medicaid waivers – In-home services (extending the waiver by two additional years - up to the age of sixteen).

#12

Impact of any budget changes made to meet the Governor’s budget guidelines

2021-2023 Budget Development Framework

DHS asked to provide a 15% reduction in general fund spending

Identified total of $218 million in reductions to achieve targeted general fund savings
- 30% general fund
- 70% federal/other

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

21-23 Executive Budget

- Reduced utilization of out-of-home placements, including foster care
- Utilize and support Kinship care for at-risk kids
- Redesign child welfare processes to incorporate improved safety planning practices
- Intensive in-home and evidence-based behavioral health supports for kids and families
- Care coordination for families struggling with mental health and substance abuse
- Optimize opportunity for Title IV-E to become a means to upstream reinvestment
- Substance Use Disorder voucher
- Free Through Recovery

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment

21-23 Executive Budget

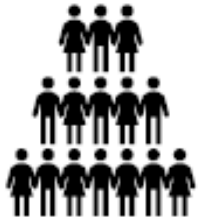
- Integrate data sets to facility decision making via Early Childhood Integrated Data System
- Evidence based in-home support for young families through Families First Prevention Plan implementation
- Maintenance of state investment in infant development and early intervention services for children with developmental delays
- Maintenance of child care inclusion specialists to support access to child care for children with special needs

Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

21-23 Executive Budget

- Connect in-reach/out-reach with timely follow up to connect individuals to services that can be provided outside of institutional settings
- Centralized intake for home and community based services
- Develop non-institutional residential options for behaviorally complex and medically fragile children and adults
- Build HCBS provider capacity for private pay, MA, waivers and SPED
- Streamline provider enrollment processes
- Connect housing and support services to create scattered site supported housing
- Integrate Social Determinants of Health into Medicaid model via 1915i and other Medicaid



Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

21-23 Executive Budget

- Re-design eligibility model from policy through determination, focusing on the systemic changes that will improve both access and quality
- Incorporate Tech Dependent and Autism waivers into existing MA framework
- Re-focus HSCs as Community Behavioral Health
- Create focused TANF statewide eligibility team
- Embed HSC behavioral health staff in community settings
- Replace technology platform that supports child welfare and child protective services
- Invest in modernization of MMIS
- Integrate LIHEAP into integrated eligibility platform

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

21-23 Executive Budget

- Reduce our agency's physical footprint
- Integrate person-centered practices into DHS administrative framework
- Increase Leadership Everywhere by 50%,
- Deploy Gallup Employee Engagement Survey and improve scores by .25 in the second year
- Develop DHS Succession plan

Safety Net Services & System Supports

- Operate Medicaid as public health insurance provider
- Deliver behavioral health services to hardest-to-serve populations
- Support service delivery infrastructure
- Administer federal programs, contracts and payment systems

21-23 Executive Budget

- Administer programs that are delivered privately via contract
- Reform Long Term Care payment system to create incentives toward home and community-based services
- Shift contractual services to 1915i
- Transition administration of Medicaid Expansion to DHS
- Reduce extended services contracts
- Rate and payment adjustments for PACE services, telehealth, targeted case management, and I/D Disability services
- Eliminate PCCM provider payment
- Quality Initiative in Medicaid fee for service

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
1/11/2021 am
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Chair Nelson called the meeting to order at 9:00 a.m.

Representative	Present	Absent
Nelson	x	
Kreidt	x	
Andersen	x	
Mitskog	x	
Schobinger	x	
Strinden	x	

Discussion Topics:

- DHS Overview
- Child Support Budget
- Vocational Rehabilitation Eligibility
- Disability Determination Statistics

Rep Jon Nelson (9:03 am) introduced the bill

Chris Jones, DHS (9:13 am) testified about strategy and overview #1149

Jessica Thomasson, DHS Policy Director (9:27 am) testified about DHS overview #1149

Jim Fleming (9:50 am) testified about child support budget overview #1151

Damian Schlinger, Vocational Rehab (11:15 am) testified about vocational rehab budget overview #1150

Sheri Seil, Disability Determination Services (11:46 am) testified about DDS Budget Overview #1152

Chair Nelson closed the hearing at 12:03 p.m.
Cole Fleck, Committee Clerk

Presentation to House Appropriations Committee

Chris D. Jones, Executive Director

January 7, 2021 #1149

DEPARTMENT OF HUMAN SERVICES

Quality services, Proven results, Closer to home

1. Base decisions on **quality**, **efficiency**, and **effectiveness**.

   Find success in a resource-constrained environment.

   Make **reductions** in some areas **and investments** in others to optimize outcomes.

2. The state has **enough treatment beds**. Investing in **earlier interventions** can help **avoid crisis**.

   Right service. Right place. Right time.

   Serving people in **lowest level of care necessary** will return **better outcomes**.

   To deliver services closer to home, **all** have to be **willing to change** how they do business – DHS can't do this alone.

3. How we **pay** for services should be **fair** and **equitable** across systems.

   Inequity in rates **affects** people's ability to **access** services - providers often prioritize more lucrative payment opportunities

   Demonstrate value to taxpayers. **Value** equals **high quality cost efficient care**.

#1

DHS in NDCC, with major statutory responsibilities

DHS AUTHORITY ESTABLISHED IN NDCC 50-06

Administration of human services programs related to:

- Children and families
- Individuals with developmental disabilities
- Aging services
- Behavioral health
- Economic assistance
- Medical service
- General assistance
- Child support

CHAPTER 50-06
DEPARTMENT OF HUMAN SERVICES

50-06-01. Definitions.
As used in this chapter, unless the context otherwise requires:

1. "Behavioral health" means the planning and implementation of preventive, consultative, diagnostic, treatment, crisis intervention, rehabilitative, and suicide prevention services for individuals with mental, emotional, or substance use disorders, and psychiatric conditions.
2. "Behavioral health provider" means any licensed or accredited behavioral health provider in this state.
3. "Department" means the department of human services.
4. "Human services" means:
   a. A service or assistance provided to an individual or an individual's family in need of services or assistance, including child welfare services, economic assistance programs, medical services programs, and aging services programs, to assist the individual or the individual's family in achieving and maintaining basic self-sufficiency, including physical health, mental health, education, welfare, food and nutrition, and housing.
   b. A service or assistance provided, administered, or supervised by the department in accordance with chapter 50-06.
   c. Licensing duties as administered or supervised by the department or delegated by the department to a human service zone.

50-06-01.1. Department of human services to be substituted for public welfare board of North Dakota and social service board of North Dakota, members of board, and executive director.

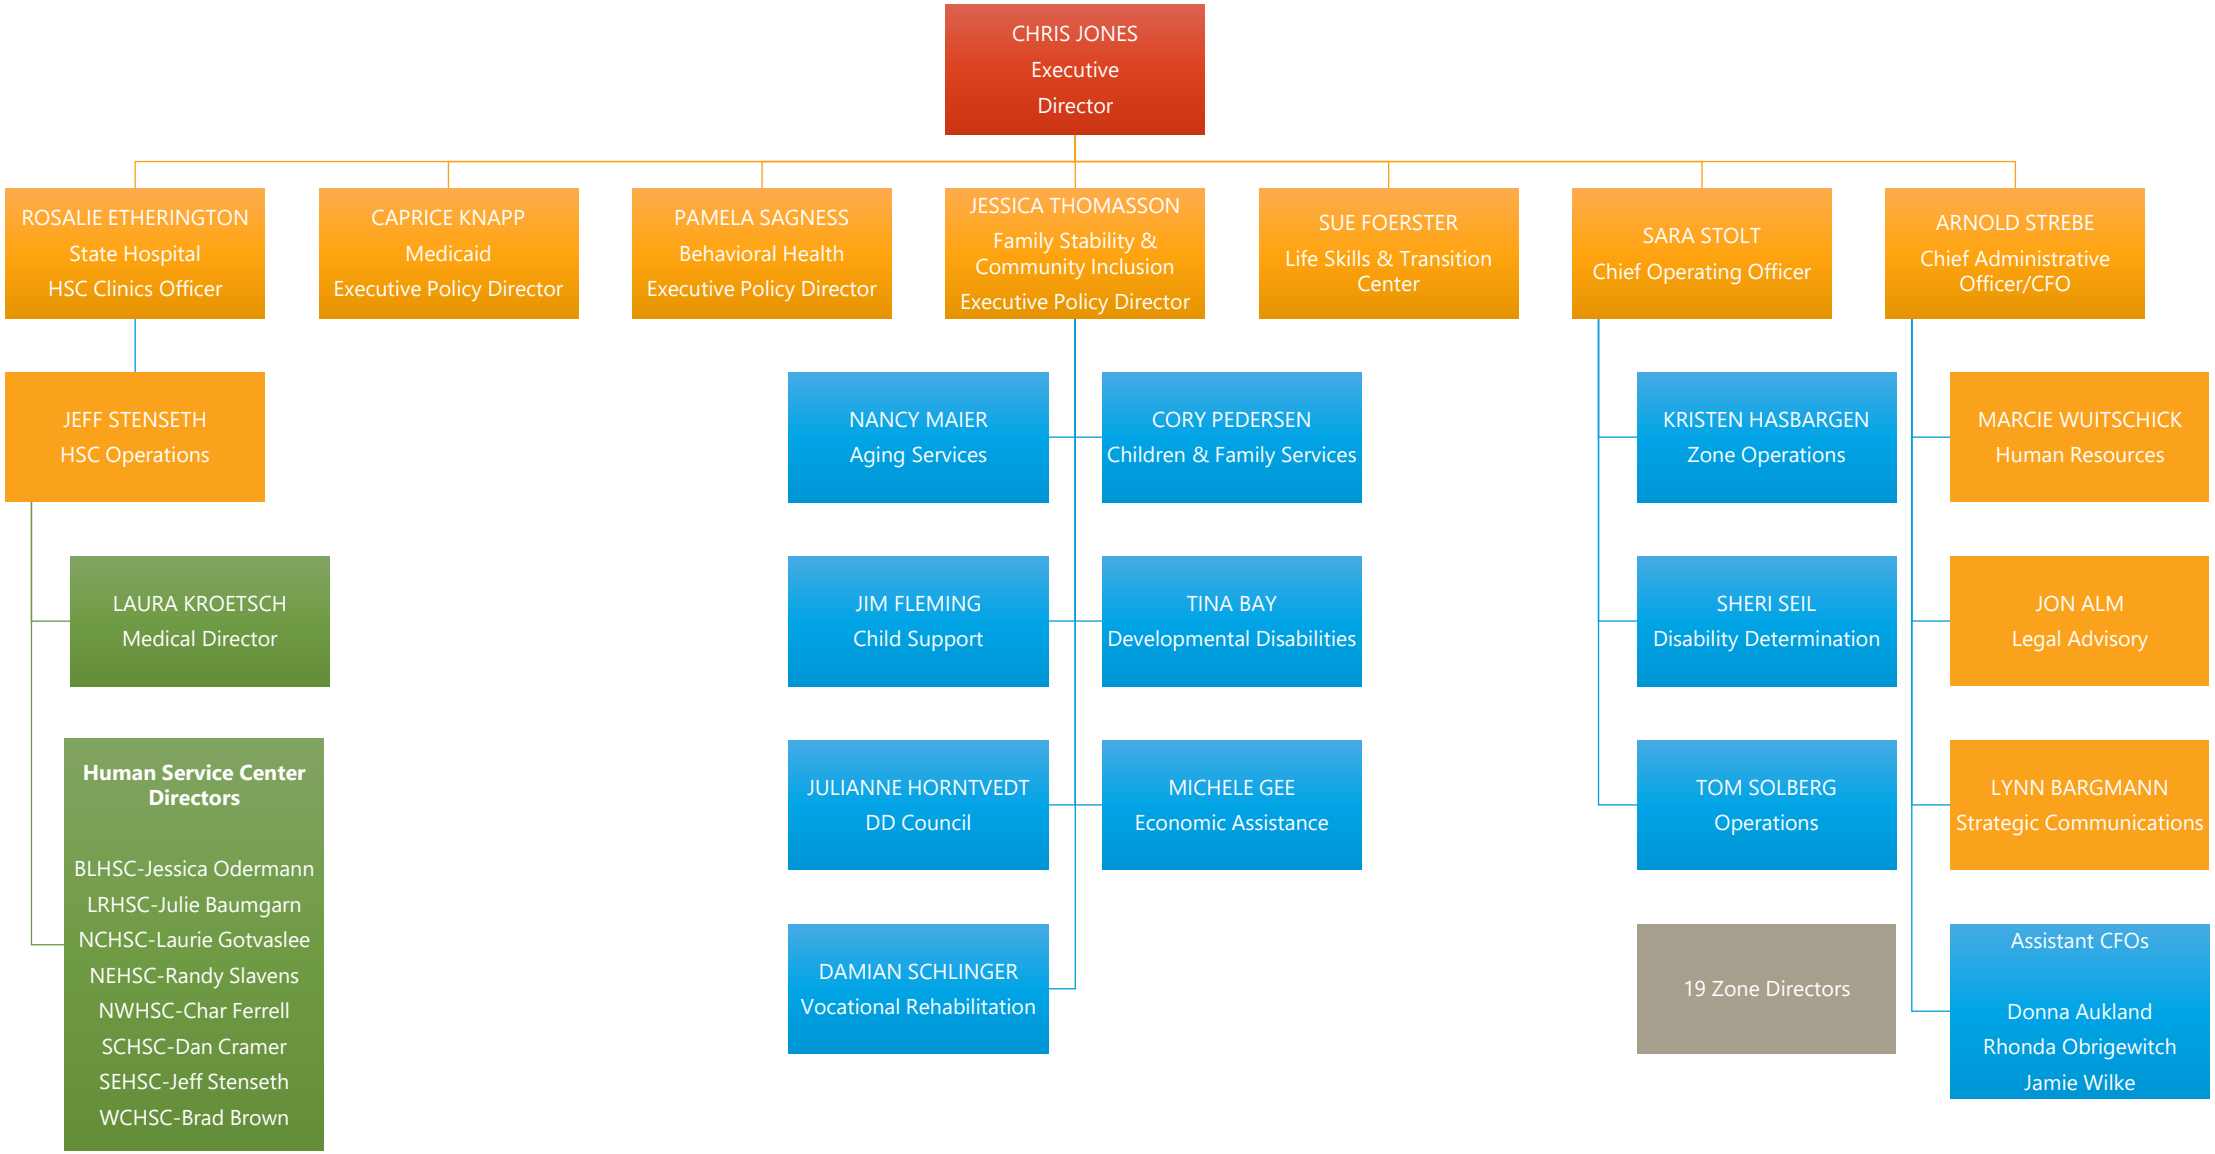
When the terms "public welfare board of North Dakota", "social service board of North Dakota", "executive director of the public welfare board", "executive director of the social service board", "member of the public welfare board", or "member of the social service board", or any derivative of those terms which, when used in context indicates an intention to refer to those persons or that board, appear in the North Dakota Century Code, the term "department of human services", or the term "executive director of the department of human services", as the case may be, must be substituted therefor. It is the intent of the legislative assembly that the department of human services must be substituted for, shall take any action previously to be taken by, and shall perform any duties previously to be performed by the public welfare board of North Dakota or by the social service board of North Dakota.

#2

Purpose of Agency divisions, including organizational chart

DHS Mission and Operating Principles

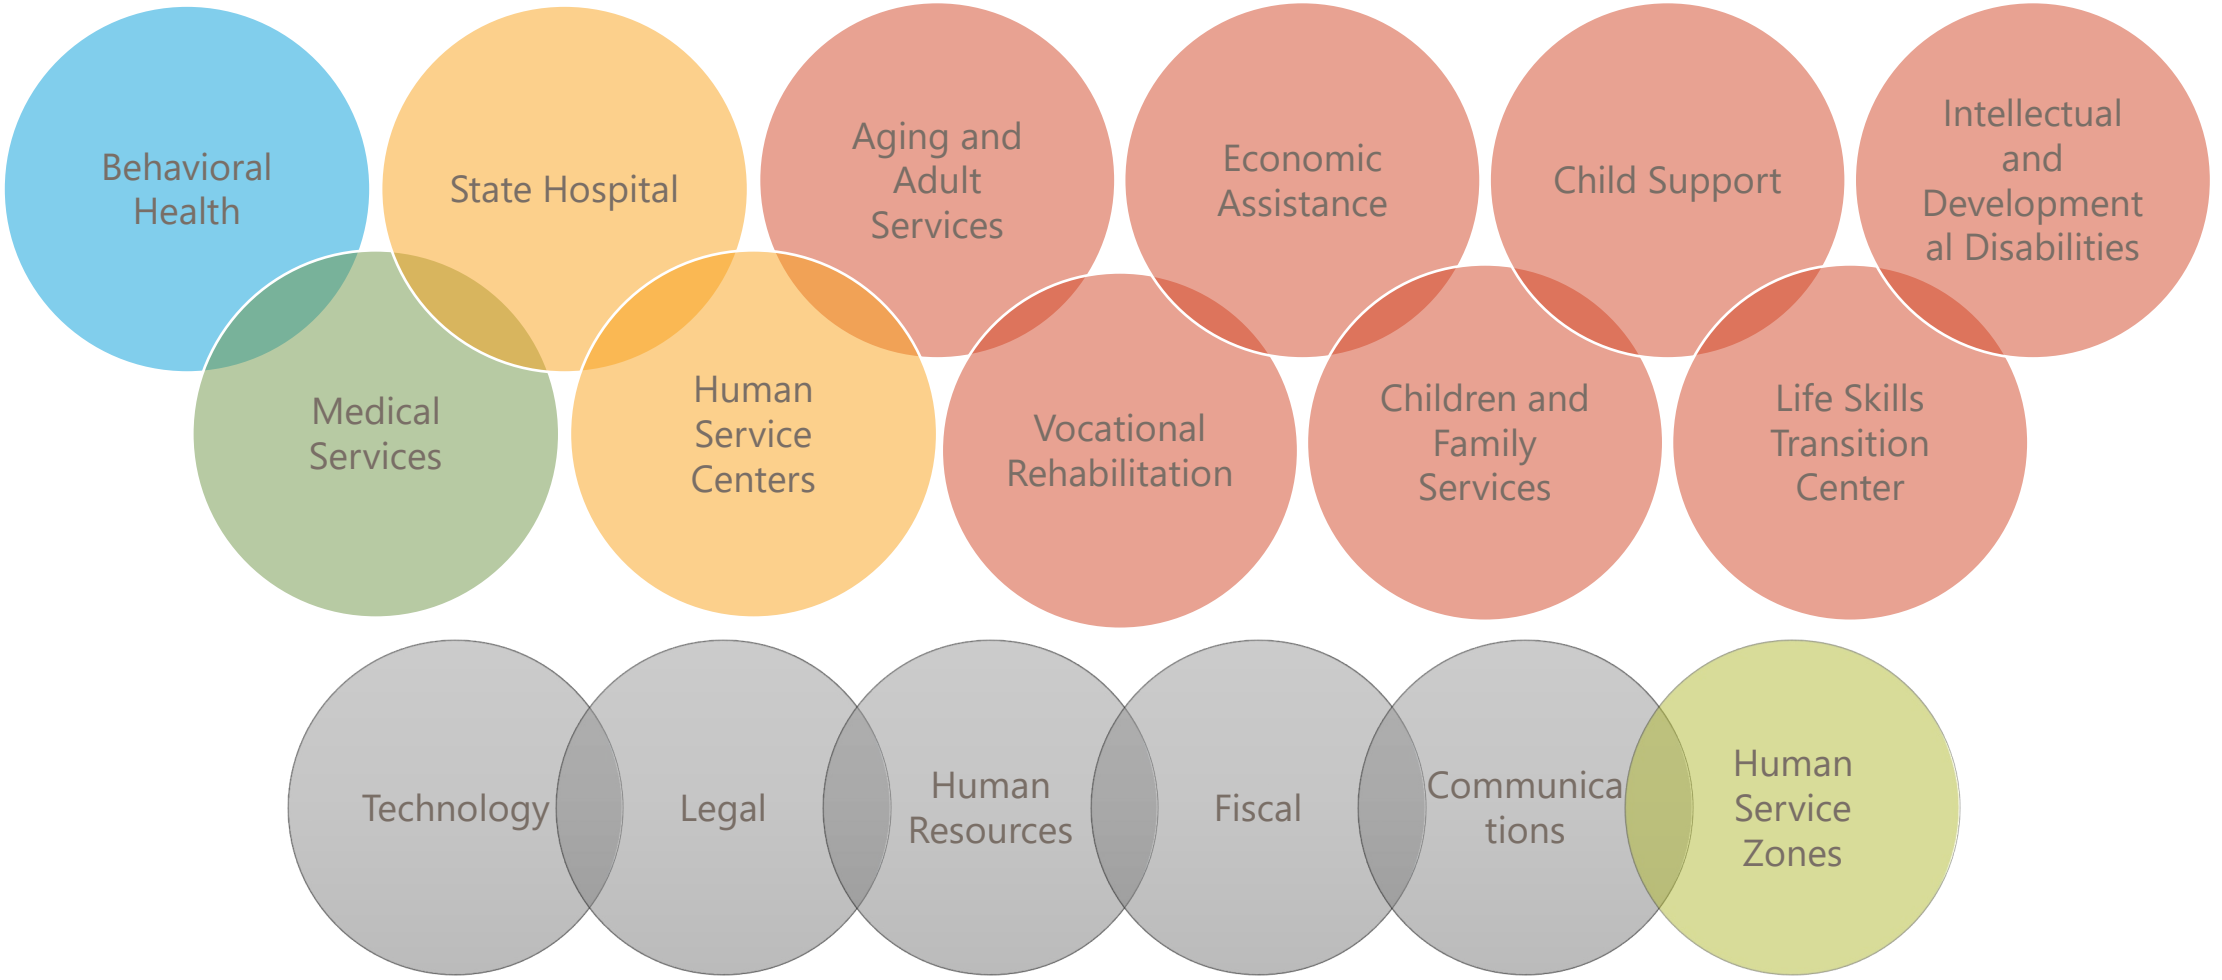
Provide quality, efficient, and effective human services, which improve the lives of people



- Services and care should be provided **as close to home as possible**
- Services should be **provided consistently across service areas** to promote equity of access and citizen focus of delivery

- Services should be administered to **optimize** for a given cost **the number served** at a service **level aligned to need**
- Investments and funding in DHS should **maximize ROI for the most vulnerable** through safety net services
- Cost-effectiveness should be considered holistically, acknowledging **potential unintended consequences** and **alignment between state and federal priorities**

- Services should help vulnerable North Dakotans of all ages maintain or enhance quality of life by:
- Supporting **access to the social determinants of health**: economic stability, housing, education, food, community, and health care
- **Mitigating threats** to quality of life such as lack of financial resources, emotional crises, disabling conditions, or inability to protect oneself

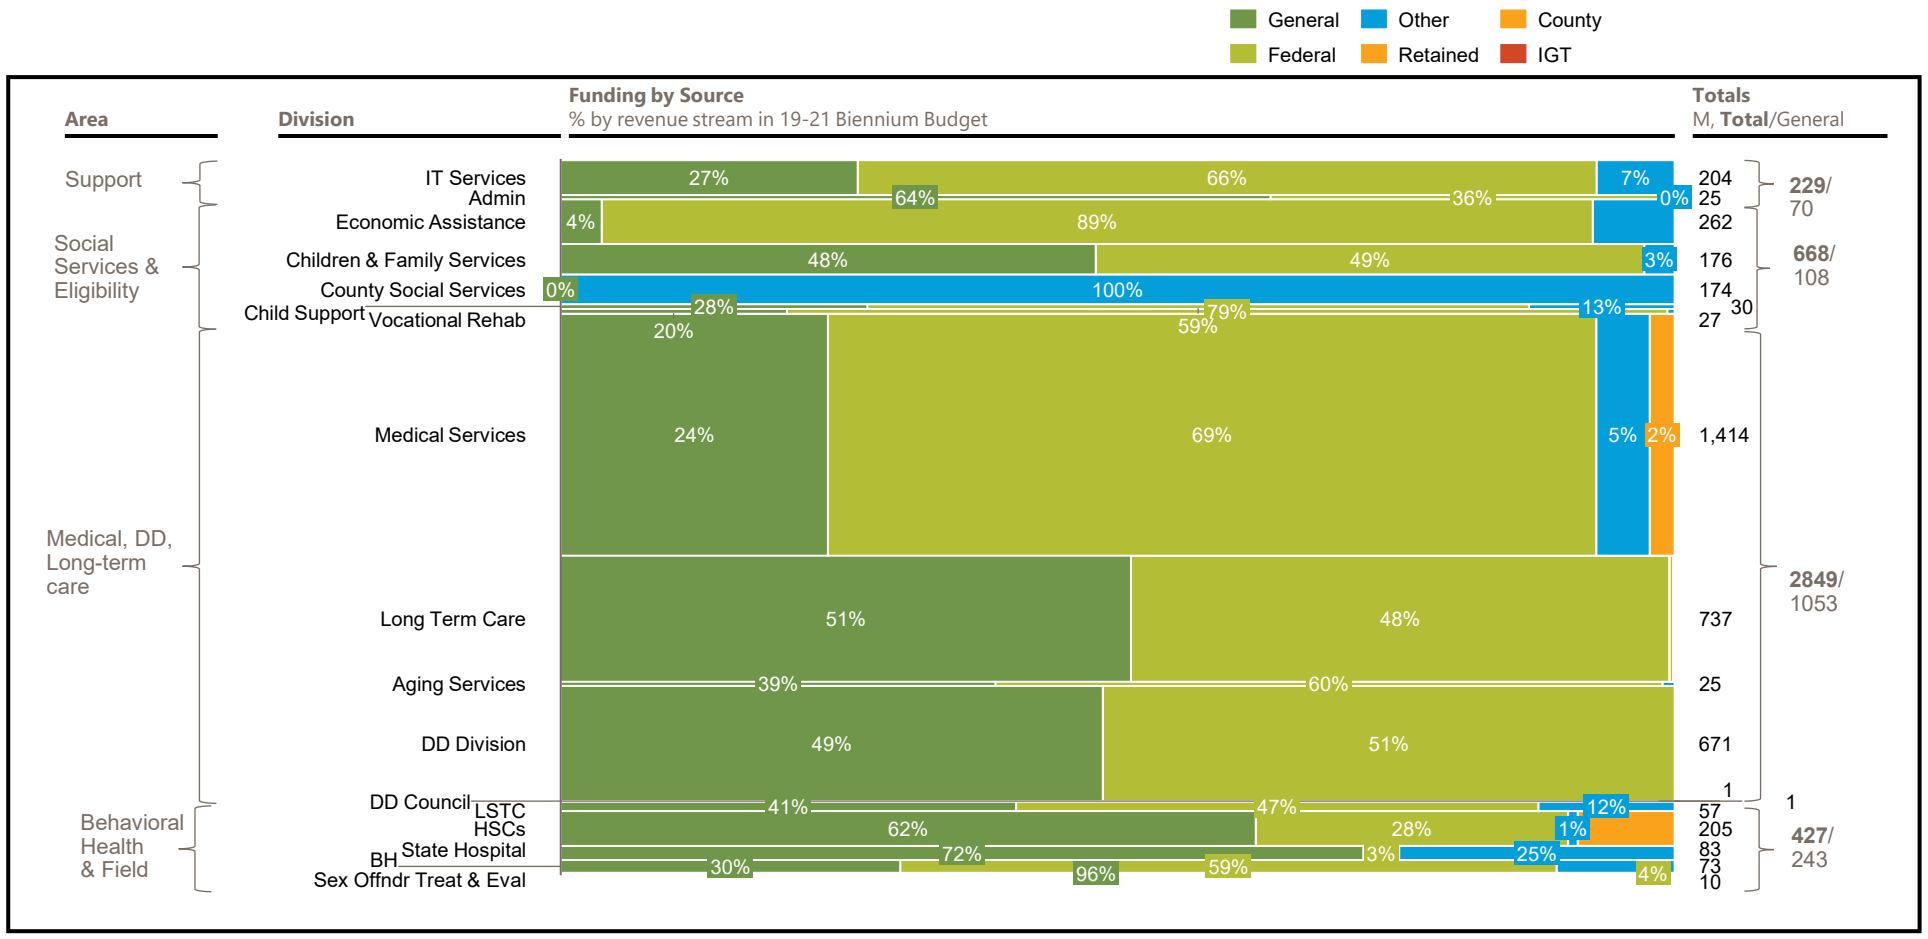


NORTH Dakota | Human Services

Be Legendary.™

ND DEPARTMENT OF HUMAN SERVICES

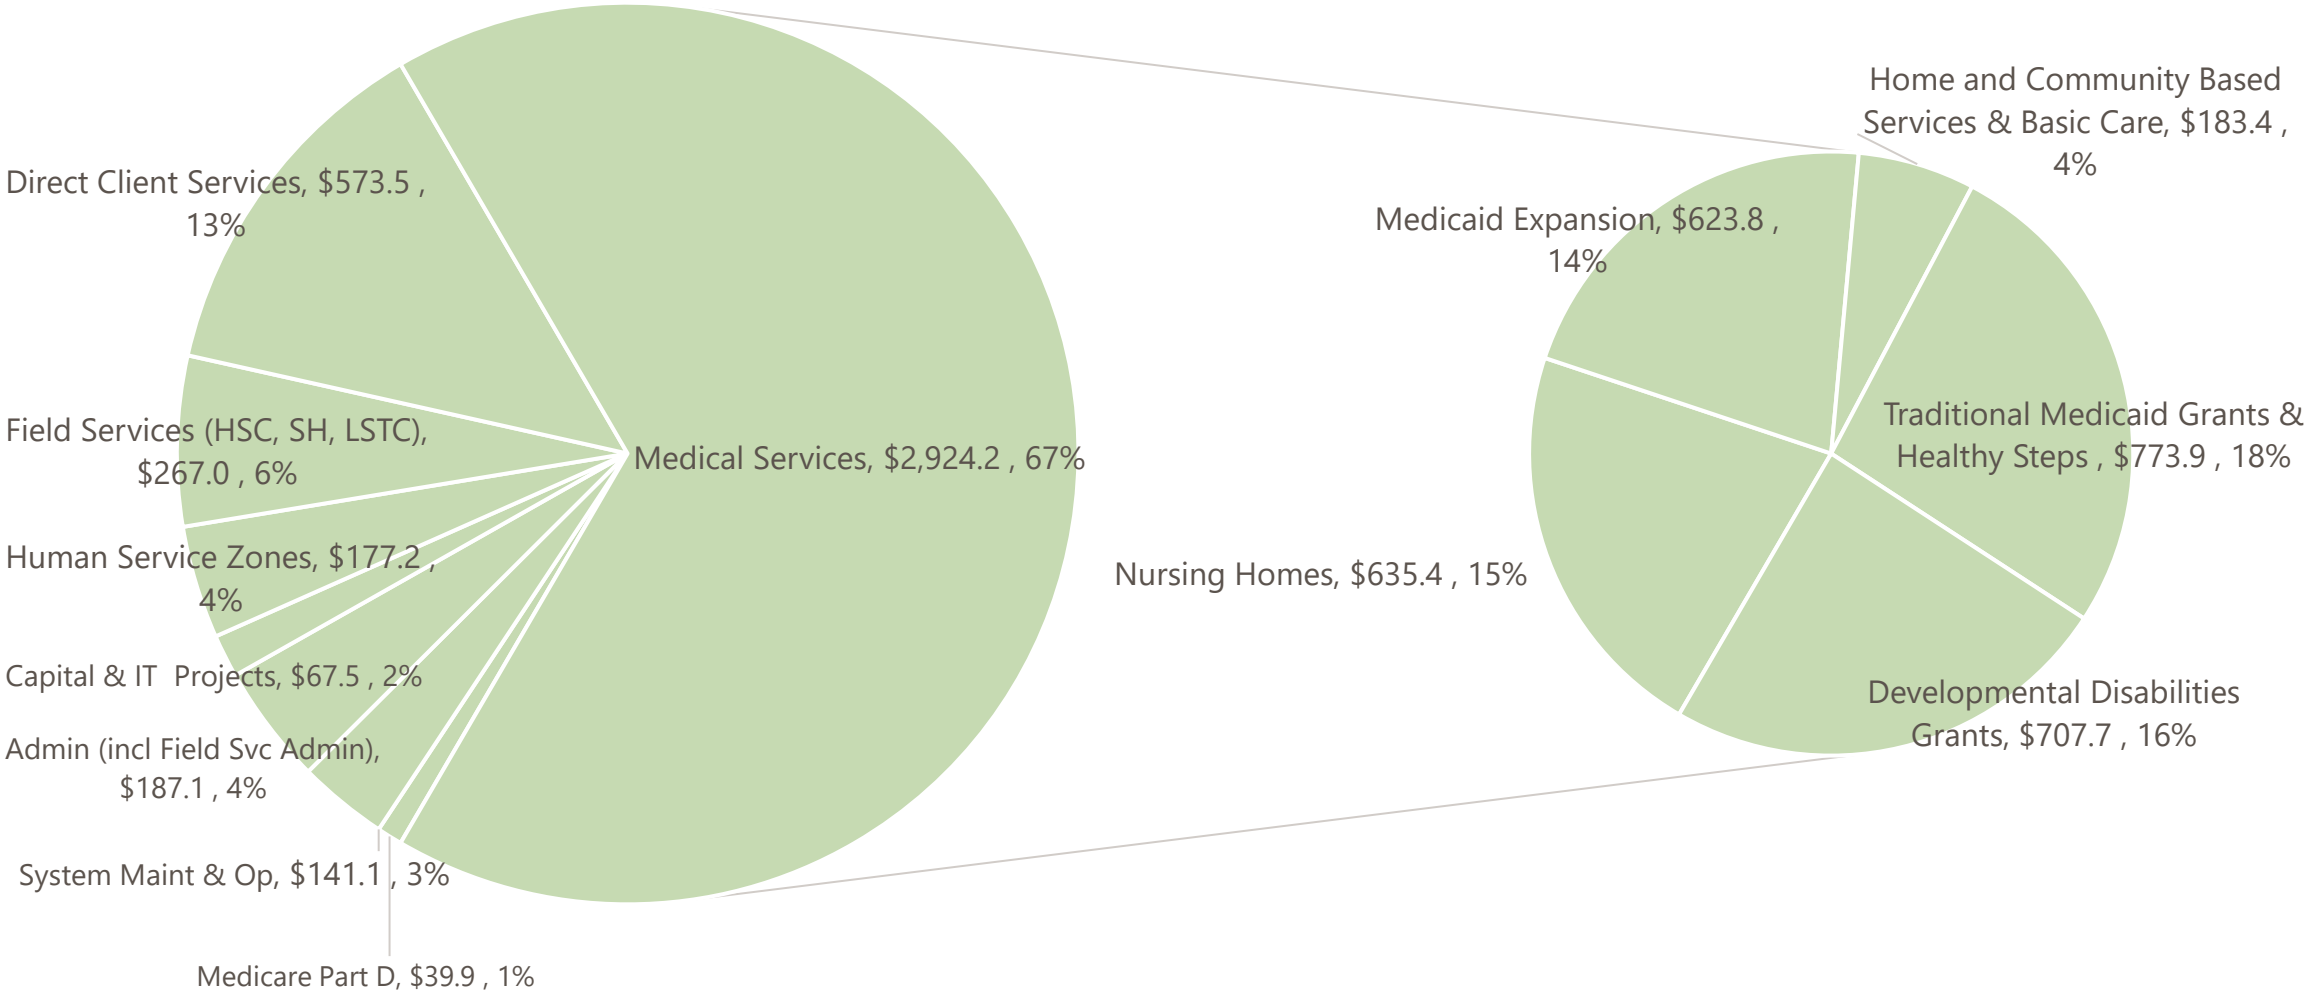
Helping North Dakotans realize their potential through targeted, evidence-based interventions that deliver meaningful results



2021-2023 EXECUTIVE BUDGET

Total budget by agency / group

DHS BY FUNCTIONAL AREA



The majority of DHS funds are spent on medical, DD, & long-term care services

March 2020

2021-2023 EXECUTIVE BUDGET DHS

Total budget $4.378 billion, by category of expenditure

Direct Client Services include Economic Assistance Programs, Child Welfare Programs, and grants and service contracts for Aging, Behavioral Health, Vocational Rehabilitation, Medical Services, and Developmental Disability.

#3

Financial Audit findings and corrective actions

SFY19 AUDIT OF DHS
Findings and Programmatic Recommendations

MEDICAID AND SNAP

- Payments After Death. Ensure payments are not made for the benefit of deceased individuals. *New system to be implemented April 2021*
- Child Care Correction Orders Not Resolved. Improve procedures to ensure child care correction orders are resolved at the end of each allowed correction period. *Updated tracking system; new early childhood database to be implemented April 2021*
- Not monitoring child care facilities with MOUs. Perform additional monitoring of child care providers to ensure compliance with memorandum of understanding agreements. *Department no longer uses MOUs*

CHILD PROTECTION SERVICES

- Failure to timely contact suspected victims of child abuse and neglect. Ensure timely face-to-face contact with suspected victims of child abuse and neglect. *Redesign of CPS in process*
- Not performing quality assurance for child protection svc. Ensure consistent and complete quality assurance procedures surrounding reports of child abuse and neglect, investigations, and decisions. *Redesign of QA for CPS implemented Dec 2019; regional field specialists joined QA efforts SFY20*
- Confirmed child abusers not listed on index. Ensure individuals with confirmed child abuse or neglect are properly listed on the Child Abuse and Neglect Index. *Implemented new system reporting March 2019*

OTHER RESULTS

- Financial errors. Strengthen procedures surrounding the CAFR reporting process to ensure accurate amounts are reported to the Office of Management and Budget. *Continued collaboration with OMB and SAO.*
- Medicaid drug rebate system errors. Strengthen controls surrounding the Drug Rebate and Analysis Management System (DRAMS) to ensure receivables balances are properly calculated and interest is properly calculated for overdue drug rebate balances. *System updates in process*

#4

Current Biennium accomplishments and challenges; next biennium goals and plans

DHS 19-21 BIENNIUM ACCOMPLISHMENTS

Optimizing Return on Investment by helping avoid crises

- North Dakotans now receive 50 percent of their behavioral health services from a human service center within a community versus a clinic setting.

Behavioral Health Embedded in Community

- Over the last year, behavioral health clients who received services at a human service center experienced a 53 percent reduction in arrests.

Positive Results from Effective Treatment Delivery

- North Dakotans now have access to 24/7 mobile crisis response. We've provided 5,628 crisis services in the last year, with crisis psychotherapy and triage services doubling in the last three months.

24/7 Crisis Response

- Since updating eligibility criteria for home and community-based services in January 2020, 730 individuals have been able to access services in their home, which is a 25 percent increase from CY2019.

Increased community services to older adults

- We've provided increased access to Medicaid services for pregnant women (increased eligibility from 138 percent to 147 percent of poverty) and children with disabilities (from 225 percent to 250 percent of poverty).

More pregnant women and children with access to health care

- HSC accreditation: The agency's human service centers received four-year national accreditation from the Council on Accreditation for its outpatient behavioral health services.

Accreditation for HSC behavioral health team

- Peer support specialists: DHS provided training to more than 460 individuals, and 30 people are newly certified in delivering behavioral health peer support services.

Peer supports available to more people in more places

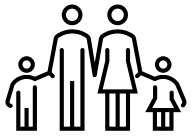
DHS 19-21 BIENNIUM ACCOMPLISHMENTS & WORK IN PROGRESS

Improved access to effective services

Process Improvement & Redesign Efforts

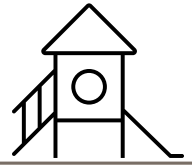
- Long term care eligibility team
- Child Protective Service Redesign
- Human Service Zones
- Centralized approach to childcare licensing
- Move to functional teams for child support
- Electronic Visit Verification & case management systems

Treatment & Recovery Supports



- Medication Assisted Treatment
- Expanded use of SUD voucher
- Behavioral health crisis services

In-Community Services



- Peer supports, Companionship, and Adult Foster Care
- Social Determinants of Health via Medicaid (1915i)
- Centralized connection point for home & community-based svc (ADRL)
- Extended Free Through Recovery

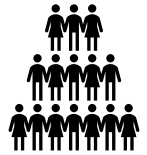
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

#5

Compare agency's request/ recommendation totals, including FTE for next biennium, compared to current biennium

DHS IN THE 21-23 BIENNIUM

Quality services, Proven results, Closer to home

1. Invest resources in **prevention** and **early intervention** resulting in a **reduction in foster care** and facility-based placements of children.

2. Support for new **small-scale settings** for **children and adults** with **complex needs**.

3. Continued investment in **behavioral health** initiatives that **expand access** to vital services.

4. Expansion of **home and community-based services** to older adults and people with disabilities.

5. Focus on **efficiency and effectiveness** in contracting and service delivery.

6. **Expansion** of peer support, supported housing, supported employment, and other **community-based support services**.

7. Across the board **cost savings** related to changes in travel, space utilization, and discretionary grant programs.

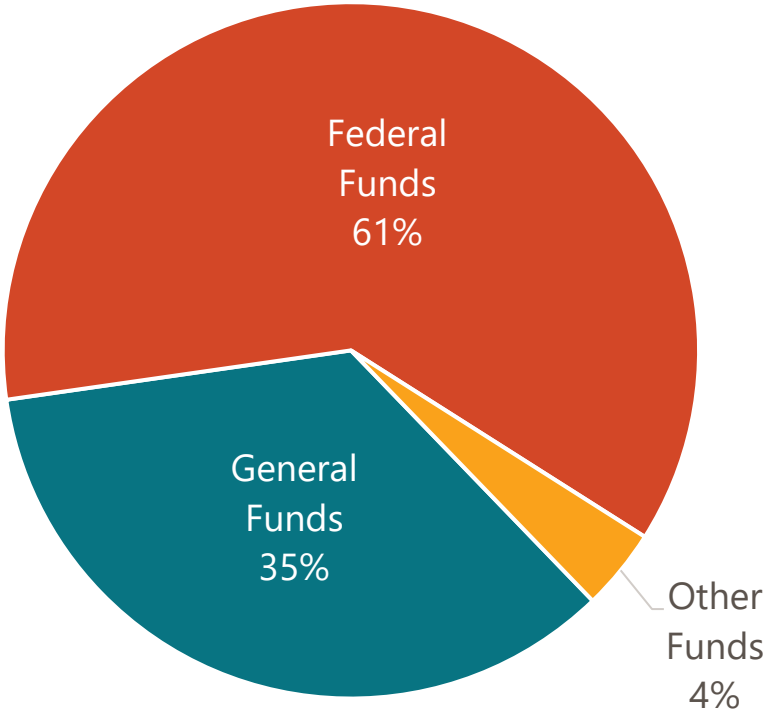
Program Descriptions / Detail

- **Service Payments for the Elderly and Disabled (SPED):** Provides services for people who are older or physically disabled, have limited assets, and who have difficulty completing tasks that enable them to live independently at home.
- **Expanded SPED (Ex-SPED):** Pays for in-home and community-based services for people who would otherwise receive care in a licensed basic care facility.
- **Home and community-based services (HCBS) waiver:** This waiver from the federal government allows the state to use Medicaid funds to provide services enabling eligible individuals who would otherwise require nursing home services to remain in their homes or communities.
- **Medicaid State Plan personal care (MSP-PC):** Personal care services available under the Medicaid state plan and enable persons with disabilities or chronic conditions accomplish tasks they would normally do for themselves if they did not have a disability.
- **Basic Care:** Room and board and personal care services for persons eligible for Medicaid.

MEDICAL SERVICES
Budget Highlights



19-21 Budget **$2,155,696,220**

21-23 Budget (exec) **$2,238,065,931**

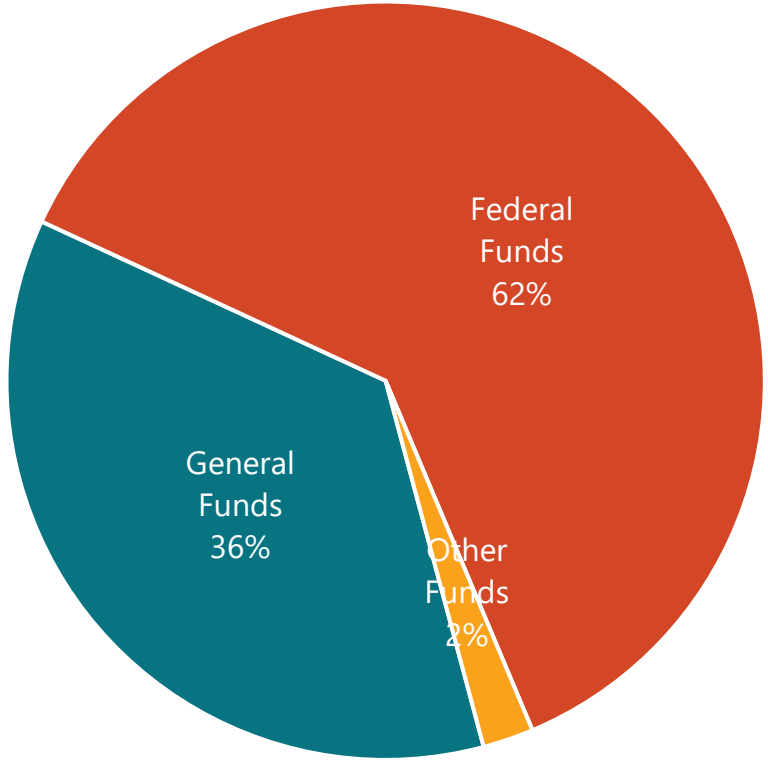
Includes Traditional, LTC & Expansion

98.5 FTE projected (increase of 12 FTEs); $82.4 million increase in total budget

- Nursing home payment reform and bed buyback
- Reduction in basic care utilization (support study) and increase in HCBS
- Transition administration of Medicaid Expansion to department
- Quality initiative in Medicaid fee for service
- Transition autism voucher to Medicaid program

21-23 Exec Budget

AGING & ADULT SERVICES
Budget Highlights



19-21 Budget **$31,214,295**

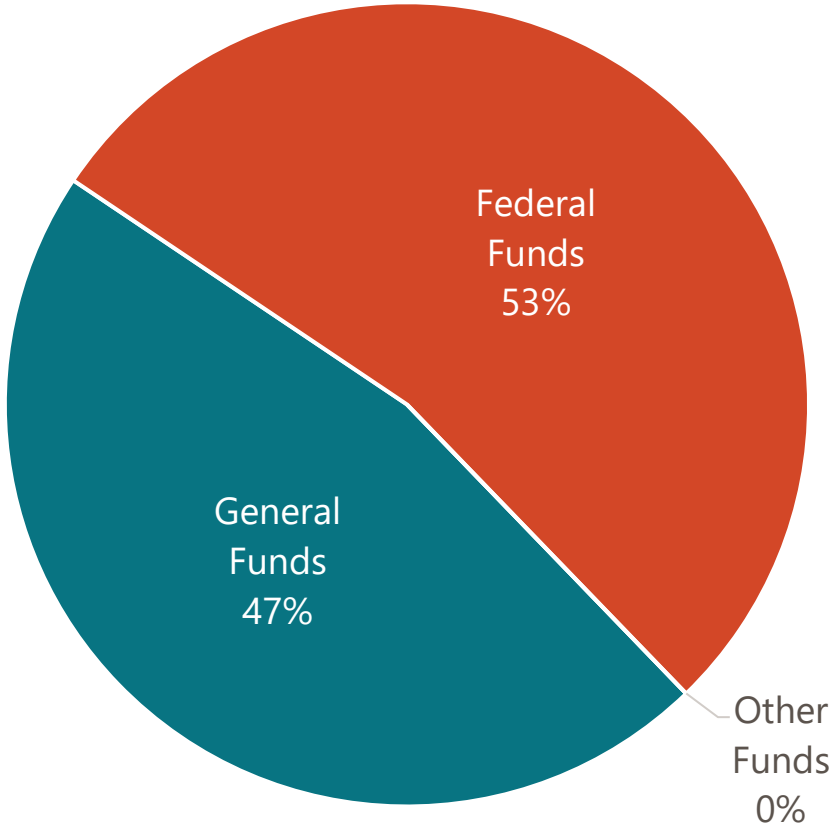
21-23 Budget (exec) **$34,452,766**

44 FTEs; no change in FTEs projected; $3,238,471 budget increase (98% in federal funds)

- Implementation of in-reach and out-reach and centralized intake for home and community based services
- Continuation of Money Follows the Person
- Eliminate Tech Dependent Waiver
- Various programmatic and operating efficiencies

21-23 Exec Budget

DEVELOPMENTAL DISABILITY SERVICES
Budget Highlights



19-21 Budget **$689,016,522**

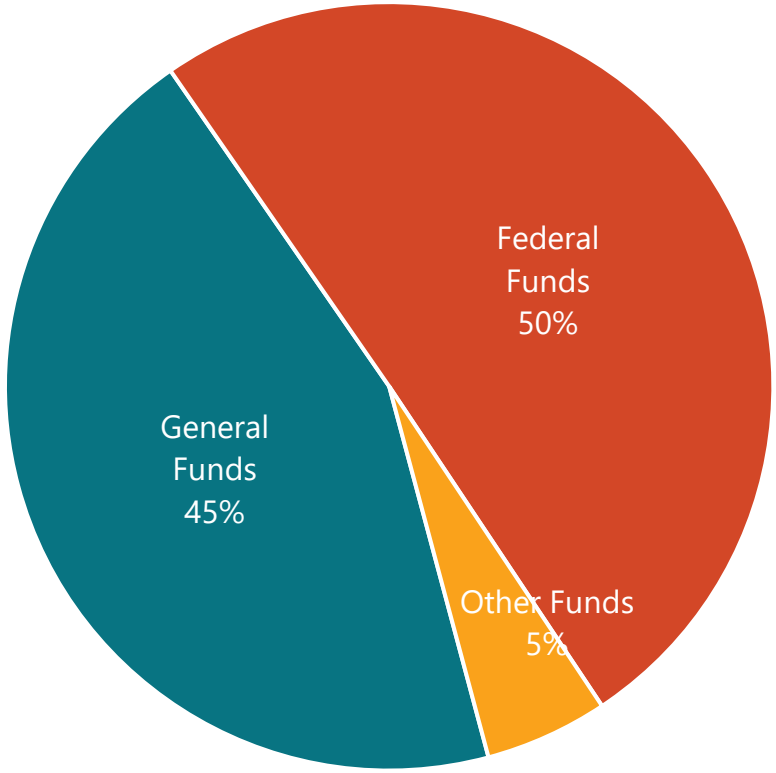
21-23 Budget (exec) **$739,269,819**

125.87 FTEs; no change in FTEs projected; $50.2 million increase in total budget (83% of increase is from federal funds)

- Diversion/Transition initiative with LSTC
- Payment system adjustments for ICF and Residential Group Homes
- Elimination of recreation and Section 11 grants
- Operating efficiencies related to travel and occupancy

21-23 Exec Budget

LIFE SKILLS TRANSITION CENTER
Budget Highlights



19-21 Budget	**$58,794,948**
21-23 Budget (exec)	**$48,619,605**

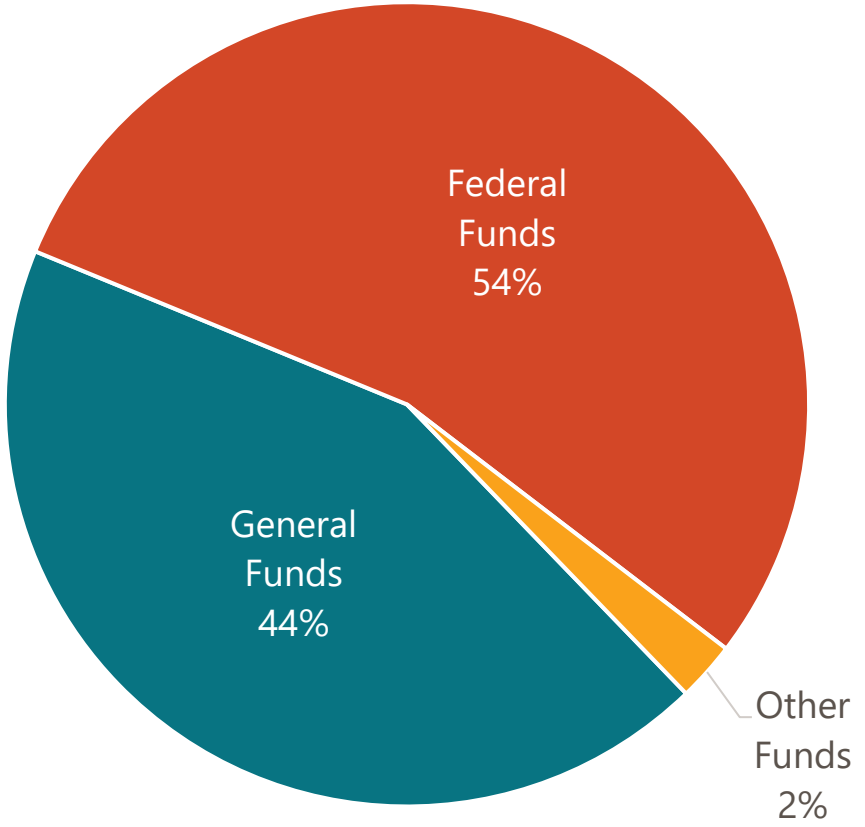
308.34 FTEs projected, includes reduction of 14.5 FTEs; $10,175,343 budget reduction (50% in federal funds)

- Reduce census by 26 (16 youth, 10 adults) via both transitions and diversions
- Shift operations to re-orient toward crisis and stabilization service
- Reduce general fund contribution to adaptive equipment service, seeking alternate revenue sources

NOTE: Interconnection between LSTC, CFS, and DD budgets as service models shift

21-23 Exec Budget

CHILDREN & FAMILY SERVICES
Budget Highlights



19-21 Budget **$181,171,041**

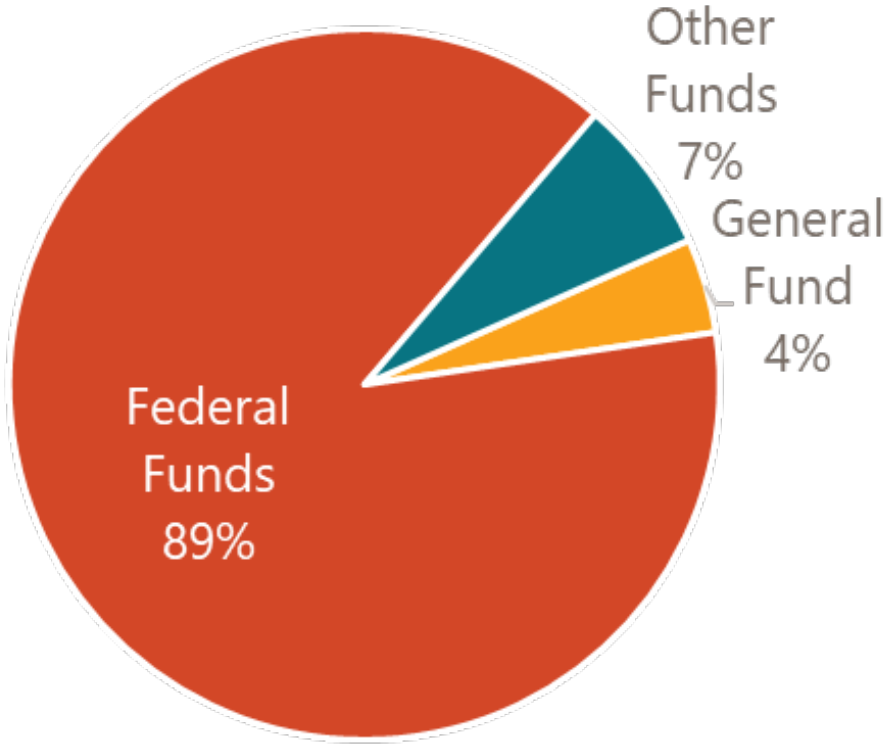
21-23 Budget (exec) **$165,637,720**

41.6 FTEs; no change in FTEs projected; $15.5 million decrease in total budget (7% of reduction is from federal funds)

- Reduce foster care and residential placements, accomplished in part by investing in evidence-based parent skill building and mental health services to families
- Implement equity in payments for services to families (QRTP, subsidized adoption, targeted case mgmt.)
- Investment in early childhood integrated data system
- Replacement of child welfare technology platform

21-23 Exec Budget

ECONOMIC ASSISTANCE
Budget Highlights



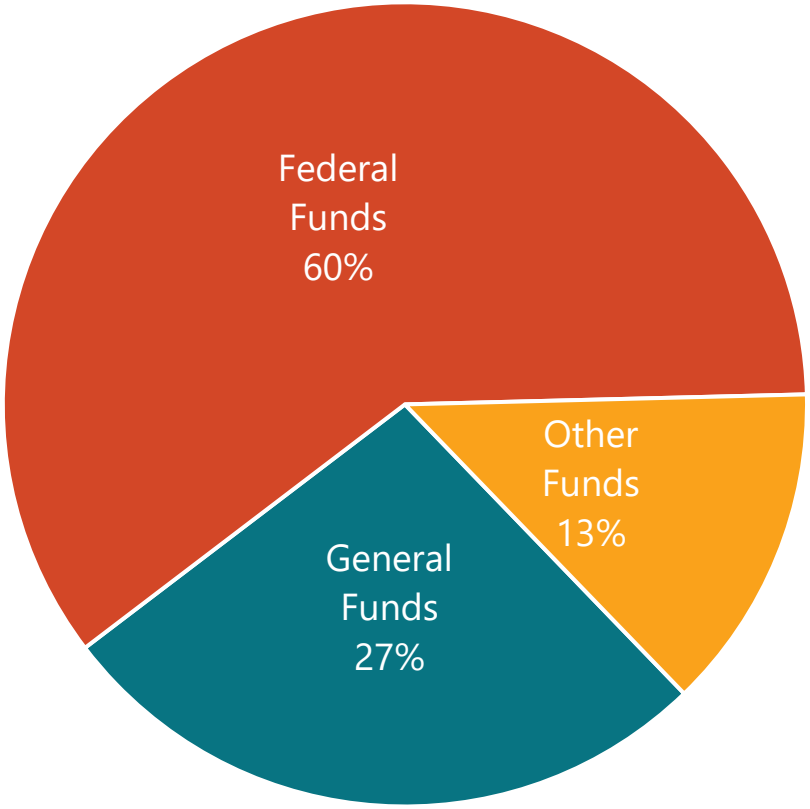
19-21 Budget **$259,846,264**

21-23 Budget (exec) **$274,998,084**

39.8 FTEs; no change in FTEs projected; $15.1 million increase in total budget (77% from federal funding)

- Complete the integration of LIHEAP into integrated eligibility platform
- Finish converting cases from legacy mainframe systems to SPACES
- Administer federal COVID relief funds for low and moderate income households
- Integrate department's housing assistance initiatives into the administration of economic assistance resources

21-23 Exec Budget



CHILD SUPPORT
Budget Highlights

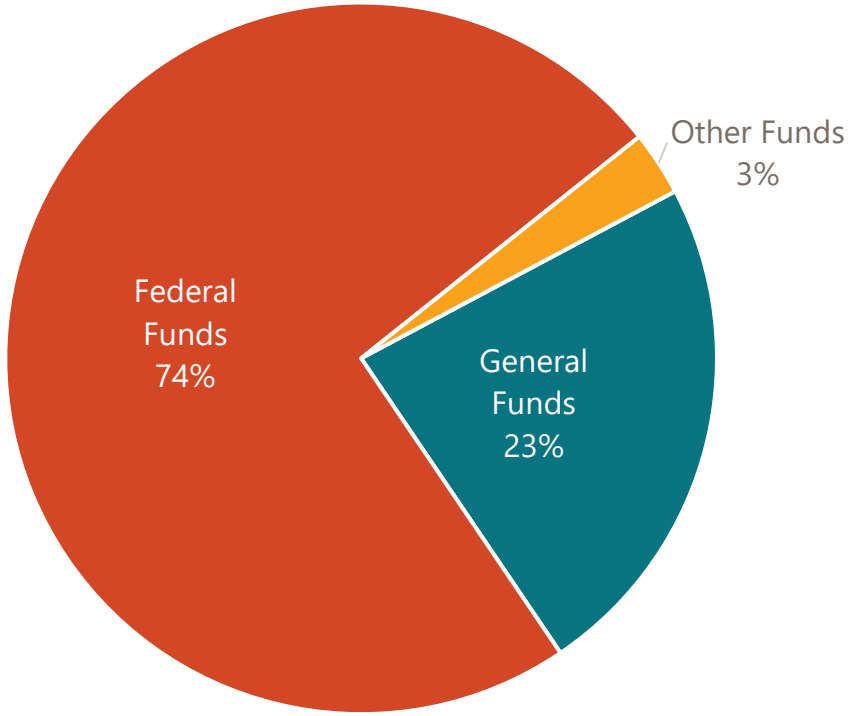
19-21 Budget	**$29,805,507**
21-23 Budget (exec)	**$30,539,102**

157.7 FTEs; no change in FTEs projected; $733,595 increase in total budget (60% federal funds)

- Operating efficiencies related to travel and occupancy

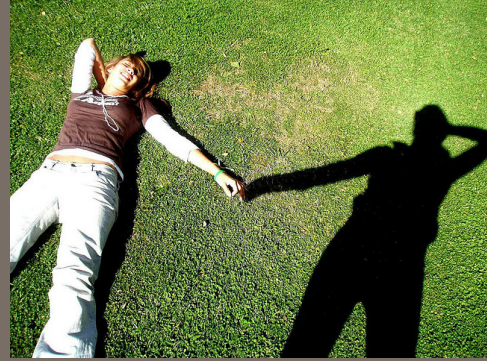
21-23 Exec Budget

VOCATIONAL REHABILITATION SERVICES
Budget Highlights



19-21 Budget **$31,853,039**

21-23 Budget (exec) **$30,528,323**

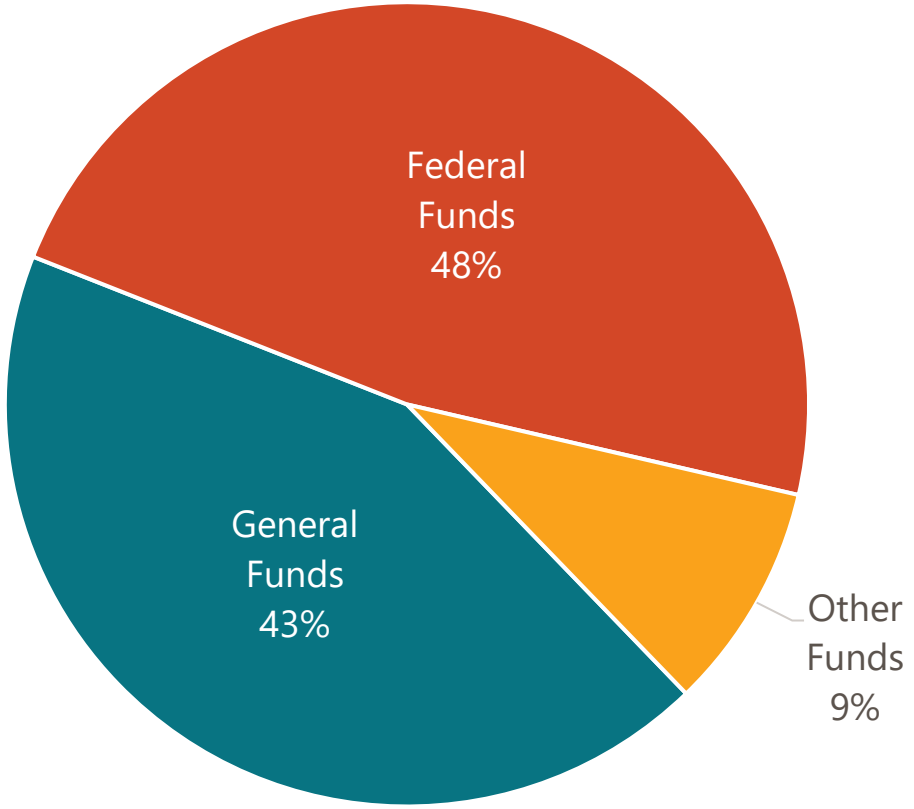


85 FTEs; no change in FTEs projected; $1.3 million decrease in total budget (0% federal funds)

- Operating efficiencies related to travel and occupancy
- Discontinuation of grant to private recreational facility

21-23 Exec Budget

BEHAVIORAL HEALTH
Budget Highlights



19-21 Budget **$72,069,770**

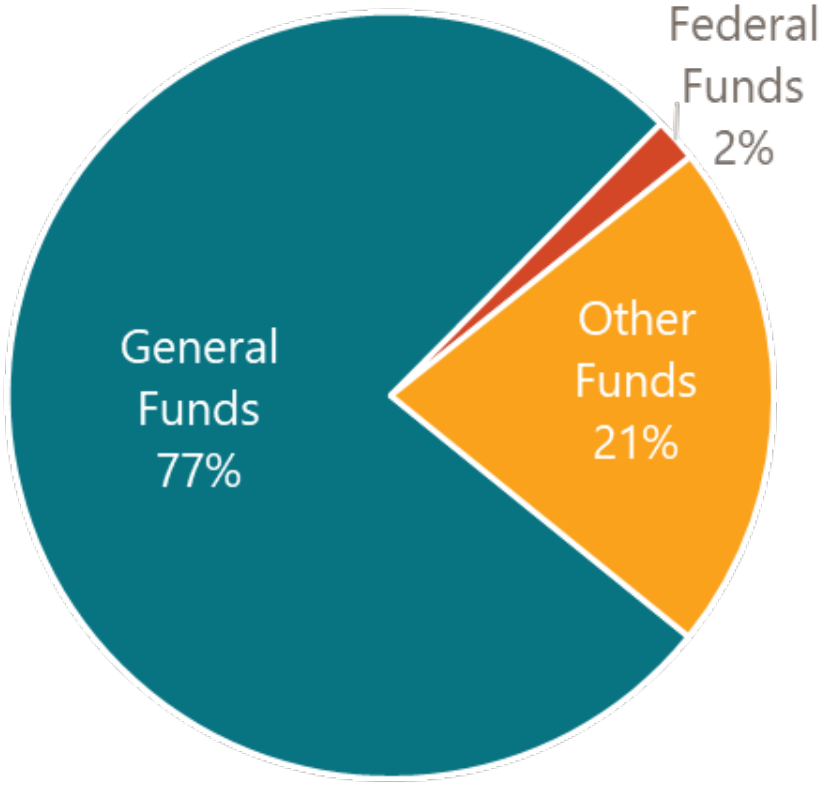
21-23 Budget (exec) **$85,003,305**

36 FTE; no change in FTEs projected; $12.9 million increase in total budget (0% of reduction from federal funds)

- Substance Use Disorder Voucher
- Expanded Free Through Recovery for non-justice involved families
- Behavioral Health in schools

21-23 Exec Budget

STATE HOSPITAL
Budget Highlights



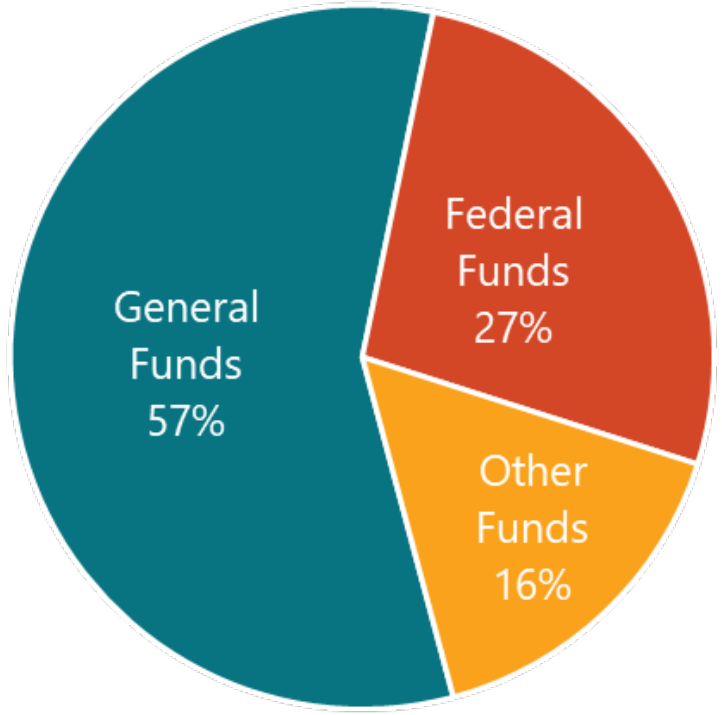
19-21 Budget **$68,801,489**

21-23 Budget (exec) **$65,954,923**

310.52 FTEs; includes reduction of 20.1 FTEs; $2.8 million budget reduction (19% in federal funds)

- Construction of new treatment campus, utilizing operating savings to retire debt service
  - Requires addition of 6-10 hospital beds in western North Dakota
  - Statutory authority to decline admissions when full
  - Reduction of state hospital inpatient services to 75 beds
- Various operating efficiencies at current campus
- Discontinuation of DOCR treatment contract

21-23 Exec Budget



HUMAN SERVICE CENTERS
Budget Highlights

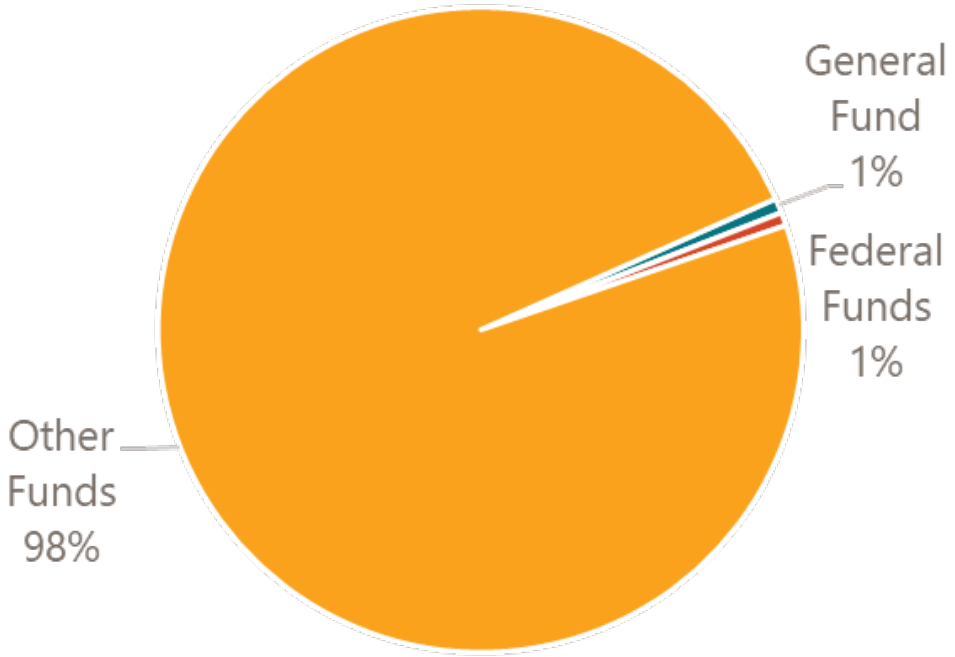
19-21 Budget	**$162,984,547**
21-23 Budget (exec)	**$167,518,311**

637.95 FTEs; no change in FTEs projected; $4.5 million budget increase (27% in federal funds)

- Operating efficiencies across the network of human service centers
- Reduction in various supported housing and employment contracts to facilitate a shift in payment from general fund to 1915i for services delivered to eligible individuals
- Program efficiencies involving transition of case aid and related service contracts

21-23 Exec Budget

HUMAN SERVICE ZONES
Budget Highlights



19-21 Budget **$173,700,000**

21-23 Budget (exec) **$177,158,738**

143 FTEs; includes 3 additional FTEs; $3.5 million increase in total budget (34% from federal funding)

- Adding authority to include targeted case management in HSZ budgets
- Redesign eligibility processes to improve customer experience and level workloads

21-23 Exec Budget

#7

Purpose and use of one-time funding items for current biennium

DHS ONE TIME FUNDING

Strategic infrastructure investments support delivery of service

One-Time Funding Description	2019-21	2021-23
Technology Projects	$13,785,658	$ 0
Capital Projects – Life Skills and Transition Center	4,277,165	0
Capital Projects – State Hospital	2,493,500	0
Medically Complex Children Provider Funding Adjustment	977,603	0
Hyperbaric Oxygen Therapy Grant	335,000	0
State Hospital Study	200,000	0
MMIS Modernization	0	35,000,000
Nursing Facility Payment Reform	0	7,200,000
Nursing Home Bed Buy Back	0	3,300,000
Frame/CCIPS Replacement	0	30,000,000
Total All Funds	$22,068,926	$75,500,000
Less Estimated Income	20,556,323	49,525,314
Total General Fund	$1,512,603	$25,974,686

#8

Identify and justify the need for any one time funding being requested / recommended

DHS ONE TIME FUNDING
Replacement of FRAME/CCWIPS

DIVISION
Children & Family Services

BUDGET AMOUNT
$30,000,000
- $15 M general fund
- $15 M federal funds

PURPOSE
Develop and deploy system to manage child protection, foster care, in-home supports to families, and adoption

Supports administrative efficiencies, retirement of mainframe, and requirements for continued federal program compliance

DHS ONE TIME FUNDING

Nursing Home Bed Buyback

DIVISION
Medical Services

BUDGET AMOUNT
$3,300,000
- $3.3 M general fund
- $0 M federal funds

PURPOSE
Right size and support nursing facilities due to COVID and other changes in state regarding HCBS.

DHS ONE TIME FUNDING

Nursing Home Payment Reform

DIVISION
Medical Services

BUDGET AMOUNT
$7,200,000
- $3.35 M general fund
- $3.85 M federal funds

PURPOSE
Modify the nursing home payment system to reward and promote efficiency and support renovation of properties

DHS ONE TIME FUNDING

State Hospital

DIVISION
State Hospital

BUDGET AMOUNT
$0

- $0 M general fund
- $0 M federal funds

PURPOSE
Build new treatment campus is Jamestown to replace aging infrastructure and realize operational savings; finance via public private partnership that applies operational savings to debt service

#9

Agency collections deposited in the general fund or a special fund, and anticipated changes from 2019-21

DHS AGENCY COLLECTIONS

Anticipating increase in fee for service collections at HSCs

2019-21
$20,556,323

2021-23
$26,659,485

$6.1 million

#10

Discuss need for other sections that are included or recommended to be included in agency appropriation bill

SECTIONS IN AGENCY BUDGET BILL

References support quality and efficient service delivery

1. Amendment to section 50-24.1-37 to extend Medicaid expansion and to transition administration of Medicaid expansion to DHS
2. Repeal section 50-24.1-18.1 relating to consumer-directed health maintenance service.
3. Nursing home bed reduction authorization and appropriation
4. Medicaid expansion and nursing home rates expenditures may not exceed appropriation language.
5. Develop a plan to implement health homes and report to legislative management
6. Exemptions to carry-over 2019-23 funds
7. Authorization to convey land at Life Skills and Transition Center and to enter into an agreement to lease state hospital land to the national guard
8. Capital projects and payment language, including authorization to construct a new state hospital
9. Provider process and outcome measures
10. A requirement to the department to establish a new rate setting process and requirements for qualified residential treatment providers

#11

Any other bills being considered by legislative assembly and their potential budgetary impact on agency

OTHER DHS-RELATED BILLS
As of 1-6-21

HB1015 – OMB's appropriation; guardianship grants

HB1034 – Preliminary treatment and involuntary treatment hearings

HB1035 – Juvenile Justice reform bill

HB1065 – Nursing home operating costs (DHS pre-file)

HB1066 – Accreditation of Human Service Centers (DHS pre-file)

HB1085 - Remedial eye care; Medicaid waivers In-home services (DHS pre-file)

HB1089 – Seclusion, restraint, and prohibition of shock treatment and aversive reinforcement (DHS pre-file)

HB1090 – Nursing home rates (DHS pre-file)

HB1091 – Use of ACH for foster care and shelter care payments (DHS pre-file)

OTHER DHS-RELATED BILLS
As of 1-6-21

SB2004 – Dept of Health appropriation; prevention and behavioral health

SB2015 – DOCR's appropriation; Free Through Recovery / community behavioral health program

SB2082 – Transferring Child Support responsibilities from Court to Department

SB2083 – Child abuse and neglect (DHS pre-file)

SB2084 – Involuntary treatment and emergency detention (DHS pre-file)

SB2085 – Utilization of ACH for medical assistance providers (DHS pre-file)

SB2086 – Operation and financing of Human Service Zones (DHS pre-file)

SB2087 – Medical assistance prior authorization program (DHS pre-file)

SB2088 – Adoption assistance and utilization of ACH for adoptive parents (DHS pre-file)

SB2089 – DHS authority re housing stabilization; autism voucher (DHS pre-file)

OTHER DHS-RELATED BILLS
Un-assigned bills (DHS pre-filed)

None as of 1-6-21

#12

Impact of any budget changes made to meet the Governor’s budget guidelines

2021-2023 Budget Development Framework

DHS asked to provide a 15% reduction in general fund spending

Identified total of $218 million in reductions to achieve targeted general fund savings
- 30% general fund
- 70% federal/other

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

21-23 Executive Budget

- Reduced utilization of out-of-home placements, including foster care
- Utilize and support Kinship care for at-risk kids
- Redesign child welfare processes to incorporate improved safety planning practices
- Intensive in-home and evidence-based behavioral health supports for kids and families
- Care coordination for families struggling with mental health and substance abuse
- Optimize opportunity for Title IV-E to become a means to upstream reinvestment
- Substance Use Disorder voucher
- Free Through Recovery

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment

21-23 Executive Budget

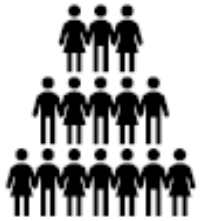
- Integrate data sets to facilitate decision making via Early Childhood Integrated Data System
- Evidence based in-home support for young families through Families First Prevention Plan implementation
- Maintenance of state investment in infant development and early intervention services for children with developmental delays
- Maintenance of child care inclusion specialists to support access to child care for children with special needs

Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

21-23 Executive Budget

- Connect in-reach/out-reach with timely follow up to connect individuals to services that can be provided outside of institutional settings
- Centralized intake for home and community based services
- Develop non-institutional residential options for behaviorally complex and medically fragile children and adults
- Build HCBS provider capacity for private pay, MA, waivers and SPED
- Streamline provider enrollment processes
- Connect housing and support services to create scattered site supported housing
- Integrate Social Determinants of Health into Medicaid model via 1915i and other Medicaid



Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

21-23 Executive Budget

- Re-design eligibility model from policy through determination, focusing on the systemic changes that will improve both access and quality
- Incorporate Tech Dependent and Autism waivers into existing MA framework
- Re-focus HSCs as Community Behavioral Health
- Create focused TANF statewide eligibility team
- Embed HSC behavioral health staff in community settings
- Replace technology platform that supports child welfare and child protective services
- Invest in modernization of MMIS
- Integrate LIHEAP into integrated eligibility platform

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

21-23 Executive Budget

- Reduce our agency's physical footprint
- Integrate person-centered practices into DHS administrative framework
- Increase Leadership Everywhere by 50%,
- Deploy Gallup Employee Engagement Survey and improve scores by .25 in the second year
- Develop DHS Succession plan

Safety Net Services & System Supports

- Operate Medicaid as public health insurance provider
- Deliver behavioral health services to hardest-to-serve populations
- Support service delivery infrastructure
- Administer federal programs, contracts and payment systems

21-23 Executive Budget

- Administer programs that are delivered privately via contract
- Reform Long Term Care payment system to create incentives toward home and community-based services
- Shift contractual services to 1915i
- Transition administration of Medicaid Expansion to DHS
- Reduce extended services contracts
- Rate and payment adjustments for PACE services, telehealth, targeted case management, and I/D Disability services
- Eliminate PCCM provider payment
- Quality Initiative in Medicaid fee for service

Child Support

Connecting children to resources that improve well-being

NORTH Dakota | Human Services

Be Legendary.℠

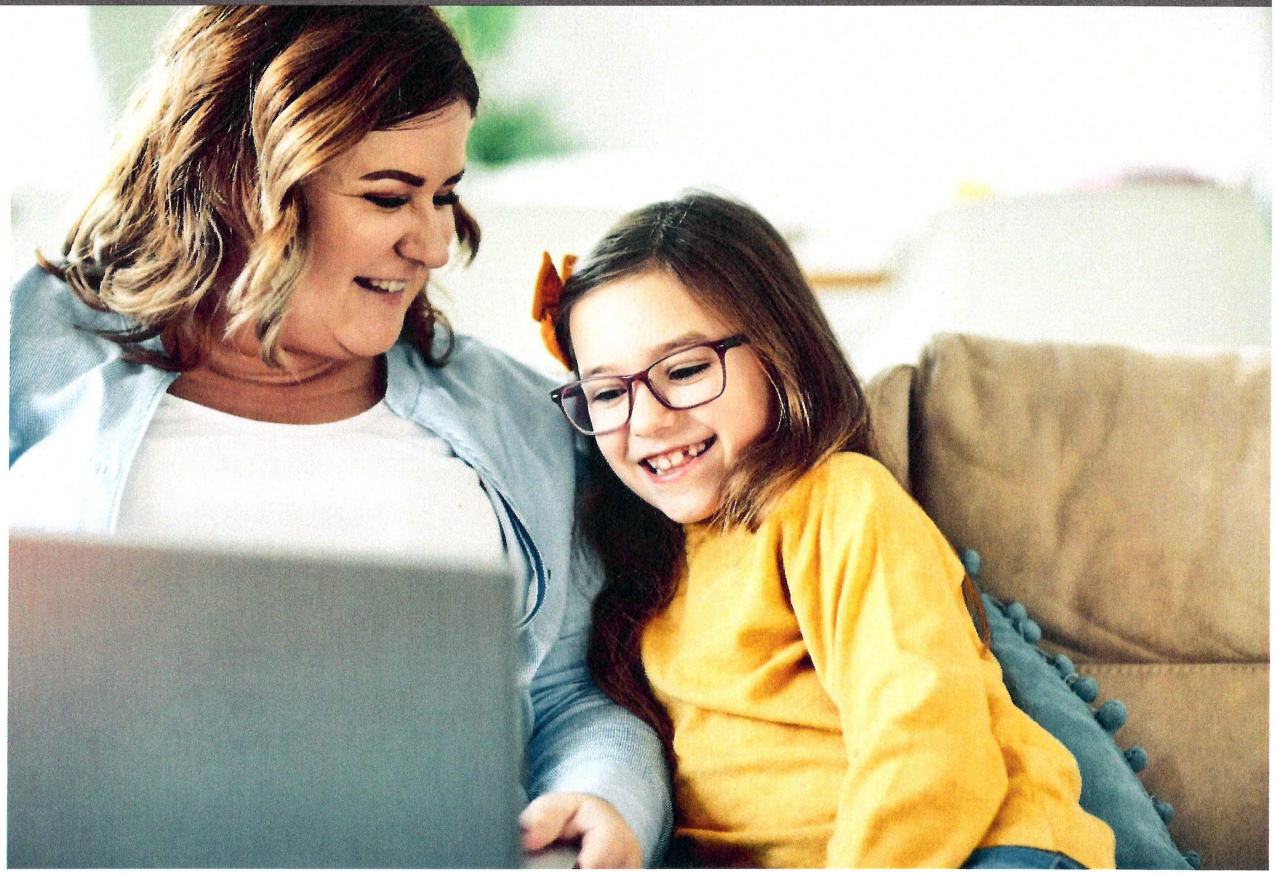
CHILD SUPPORT
Program Purpose

The purpose of the Child Support program is to help parents meet the needs of their children by securing appropriate and sustainable child support.

CHILD SUPPORT
What we do – Full Service and Limited Service

- Customer service
- Establishment of paternity
- Establishment of a child support and medical support order
- Income withholding
- Other enforcement actions such as tax refund offset and license suspension
- Employment services
- Periodic review and modification of child support obligation
- Payment processing

CHILD SUPPORT
Opening a Full-Service case



- TANF Referral
- Medicaid Referral
- Foster Care Referral
- Referral from another state or tribal or international child support program
- Application by a parent

CHILD SUPPORT
Return on Investment

Every **$1.00 spent** on Child Support generated **$6.58 for family recipients**

Every **$1.00 in state General Funds spent** on Child Support generates **$20.00 in support for family** recipients

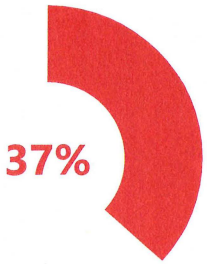
CHILD SUPPORT
Partners

- Employers
- Judges
- Clerks of court
- Sheriffs
- ND state and local government agencies
- Other state and tribal child support programs
- Private attorneys
- Car dealers
- Gaming operators

CHILD SUPPORT
Tribal Partnerships

- Partnership with Three Affiliated Tribes and Standing Rock Sioux Tribe child support programs
- Bring actions in Turtle Mountain and Spirit Lake tribal courts
- Host Tribal Offset Partnership so tribes can access federal offset services
- "Lack of jurisdiction" cases are excluded from federal performance measures

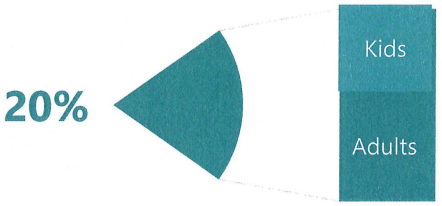
CHILD SUPPORT
Who we serve



In 2020

- 65,999 children
- 83,721 parents
- 53,243 cases
  - Full service – 34,075
  - Limited service – 19,168

CHILD SUPPORT
Who we serve



65,999

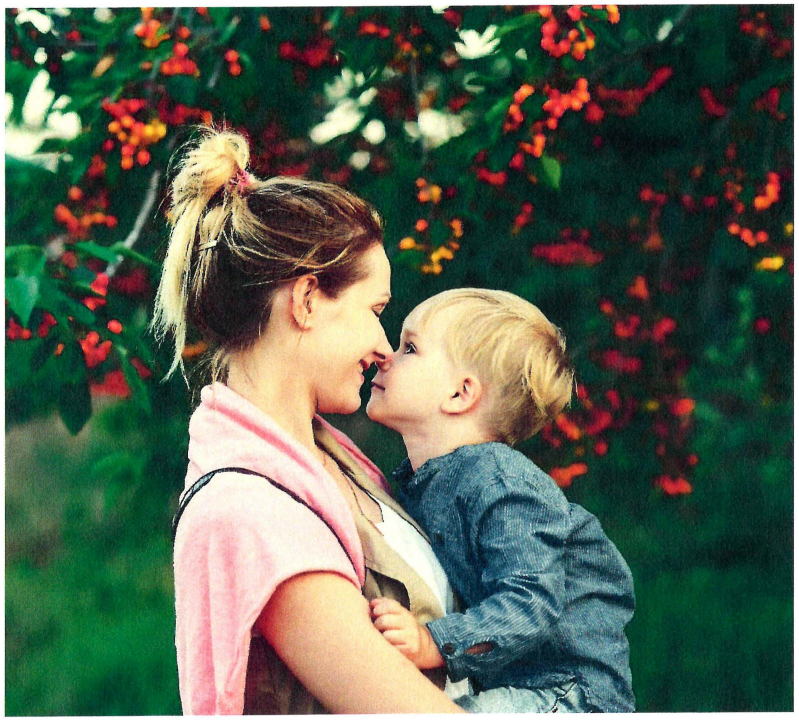
1 in 3 ND kids

In 2020, 65,999 children received child support services. That is more than 1 of every 3 children under age 18 in the state.

149,720

1 in 5 North Dakotans

149,720 people received child support services in North Dakota in 2020.

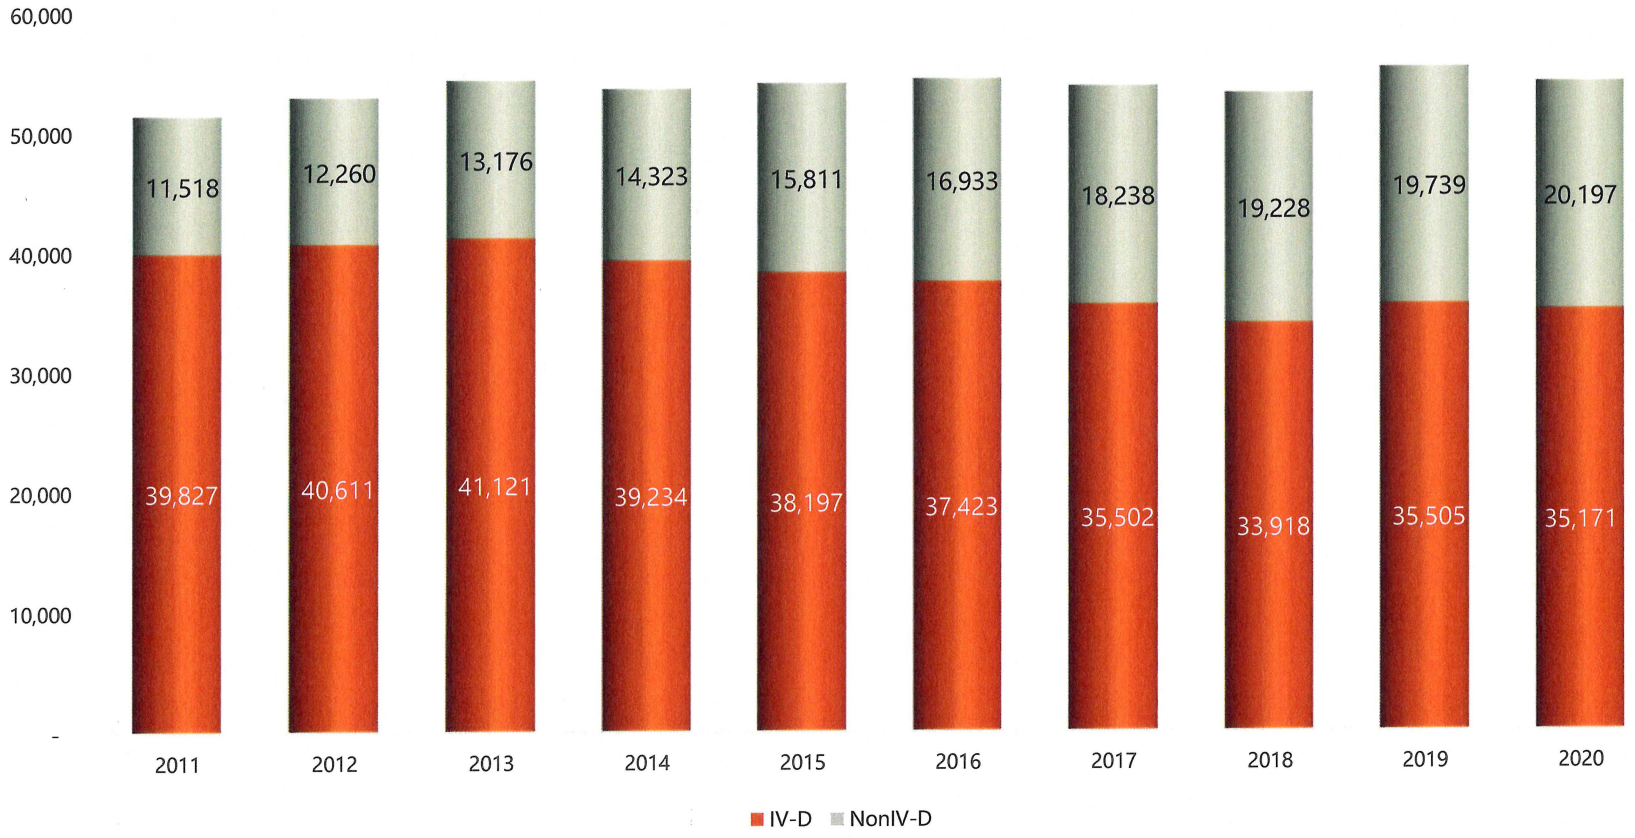


83,721

1 in 7 ND adults

In 2020, 83,721 parents received child support services. That means 1 of every 7 adults (age 18+) in the state has a connection to the child support division.

Meet Bobbi Jo & Tanner

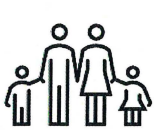


Bobbie Jo is 22 years old and lives in Devils Lake. She used to live with the father of her two-year old son Tanner.

Tanner's father acknowledged his paternity in the hospital when Tanner was born but broke up with Bobbie Jo when Tanner was a baby.

Bobbie Jo has a part-time job at a local convenience store. She is receiving health coverage for herself and Tanner under the Medicaid program.

She is struggling to make ends meet, but currently makes too much income to be eligible for SNAP or TANF.



CASELOAD IS STABLE

IV-D case = Full Svc

Non-IV-D case = Limited Svc

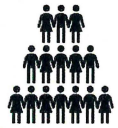
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



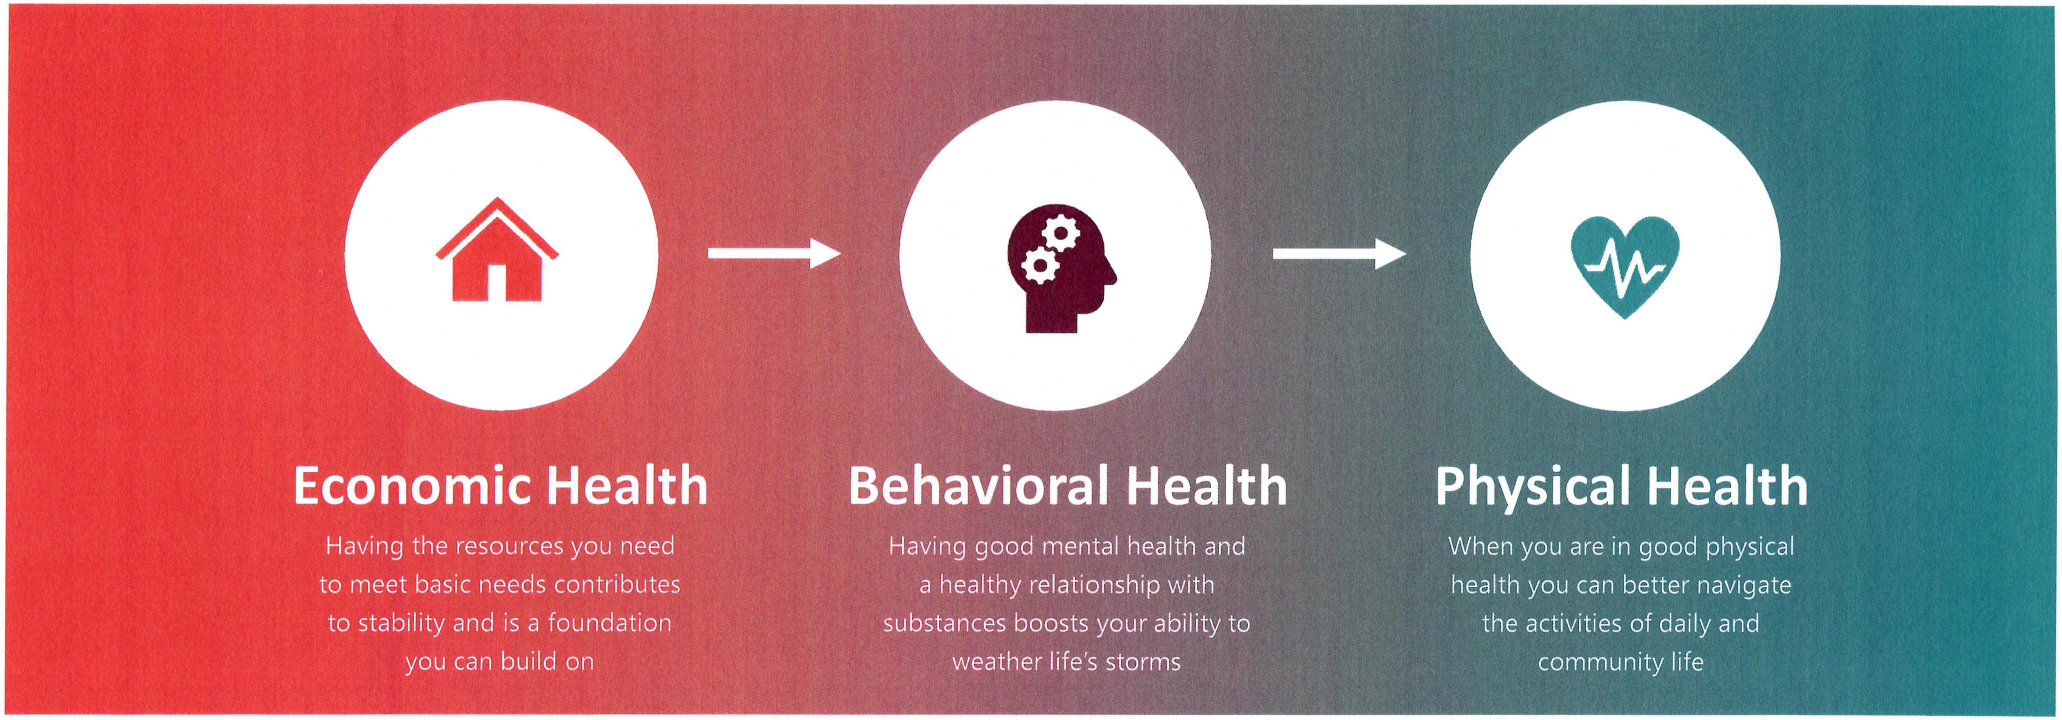
Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team



- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

The threads that run through every person's life

Foundations of Wellbeing are Interconnected

The stability that comes from good **economic** health can **improve behavioral** health.
The stability that comes from good **physical** and **behavioral** health **enables economic** health.

CHILD SUPPORT DIVISION
Supporting Family Stability & Economic Health

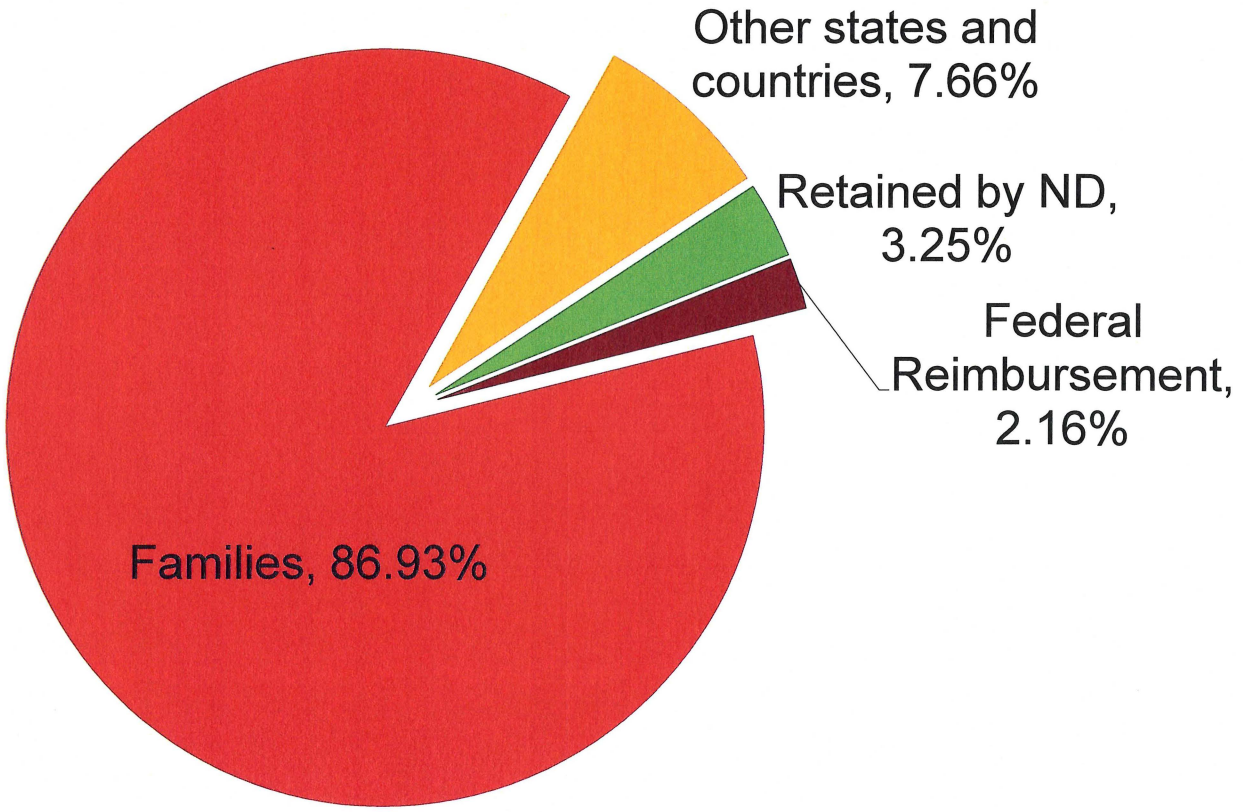
When child support is received, a child is able to grow up in a more secure and stable environment.

CHILD SUPPORT
Supporting Family Stability & Economic Health

18,000

More than 18,000 families who are owed child support are not receiving the program's services

$25 million



More than $25 million in child support per year is not received in the month when it is due

$250 million

More than $250 million is owed in past-due support in full-service cases and nearly $400 million total in all cases

COLLECTIONS - WHERE THE MONEY GOES

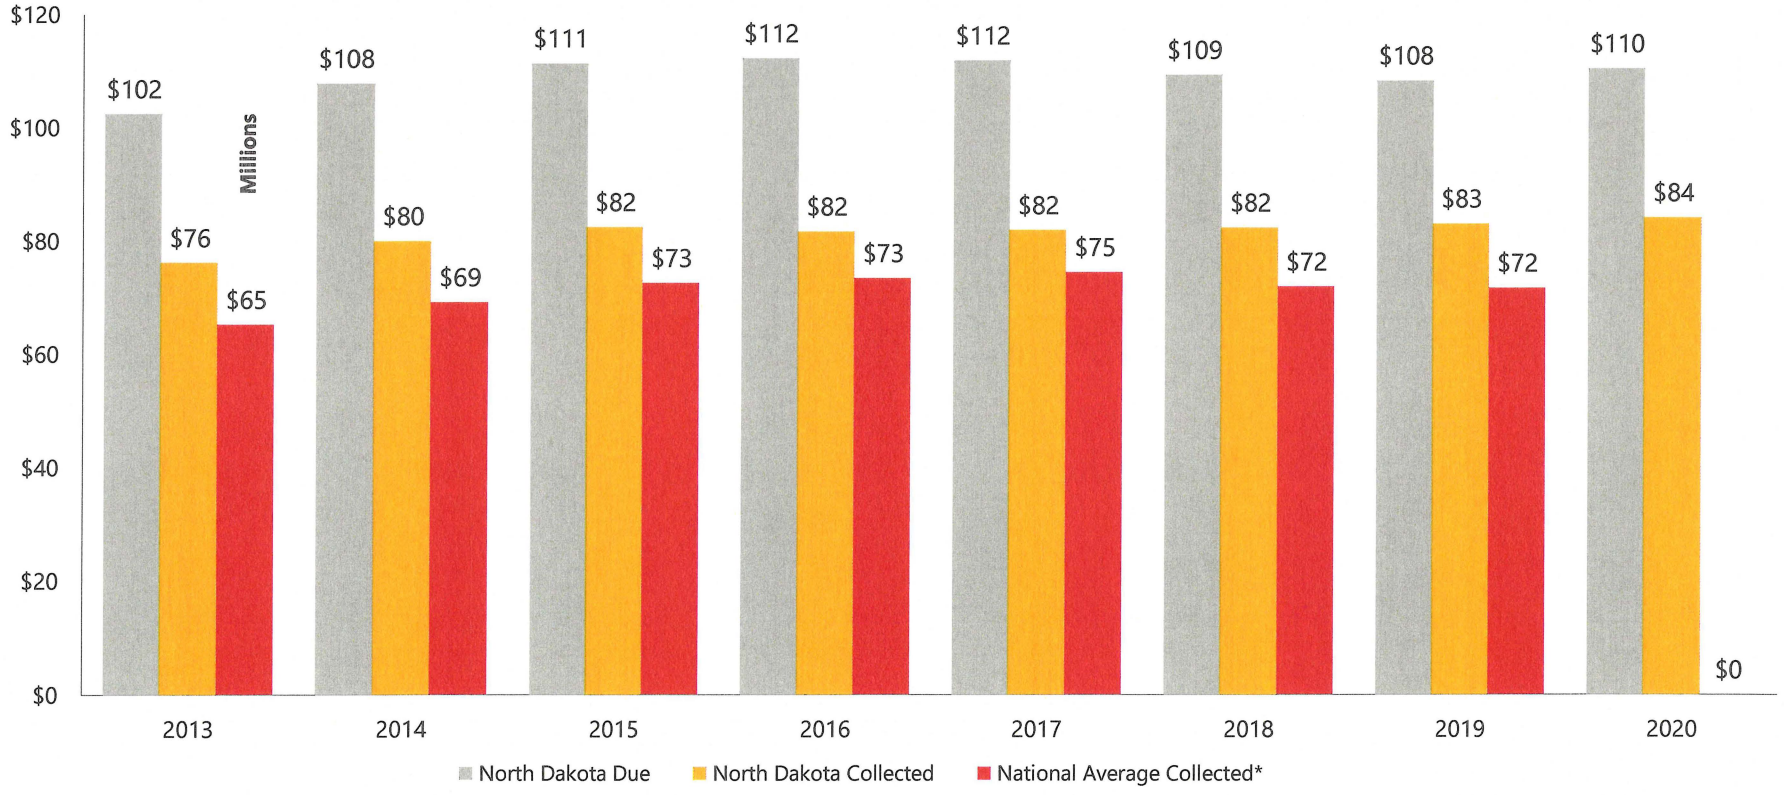
Child support agencies work collaboratively, across state lines, to ensure that families receive the child support they are owed regardless of where they live.

HOW WE MEASURE SUCCESS
Establishing Paternity

If needed, Child Support will help with establishing paternity for the child, using the in-hospital paternity acknowledgment program and court actions.

HOW WE MEASURE SUCCESS
Collection of payments owed

When child support is received, the child is able to grow up in a more secure and stable environment.



Studies have shown that for every $1 a family receives in child support, $0.19 is saved in reduced need for TANF, SNAP, Medicaid and other programs.

CHILD SUPPORT
Performance Measures

	Orders Established	Paternity Established	Current Support	Cases with Arrears Collection	Cost Benefit

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

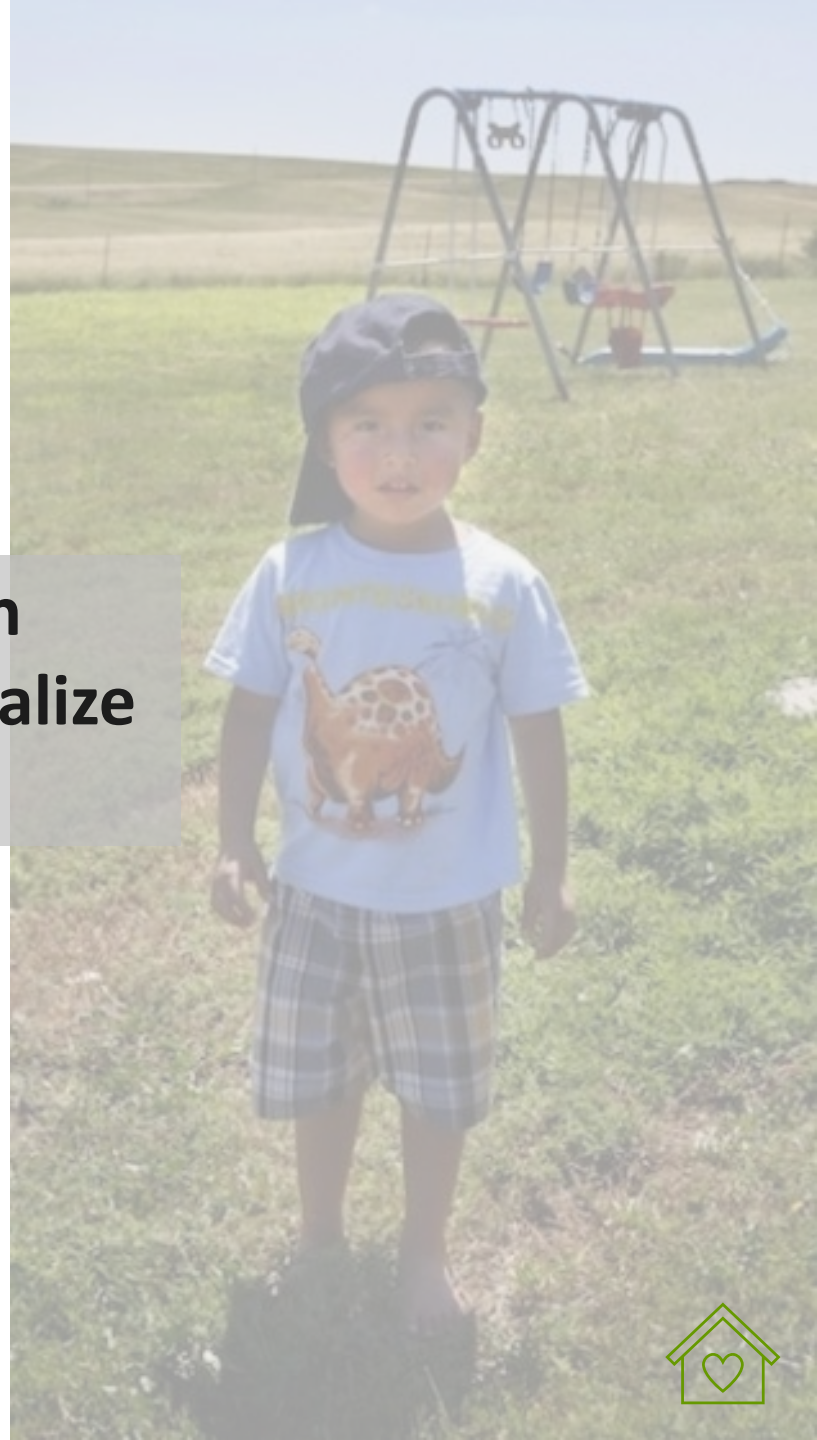
The threads that run through every person's life

Foundations of Wellbeing are Interconnected

Economic Health

Having the resources you need to meet basic needs contributes to stability and is a foundation you can build on

Behavioral Health



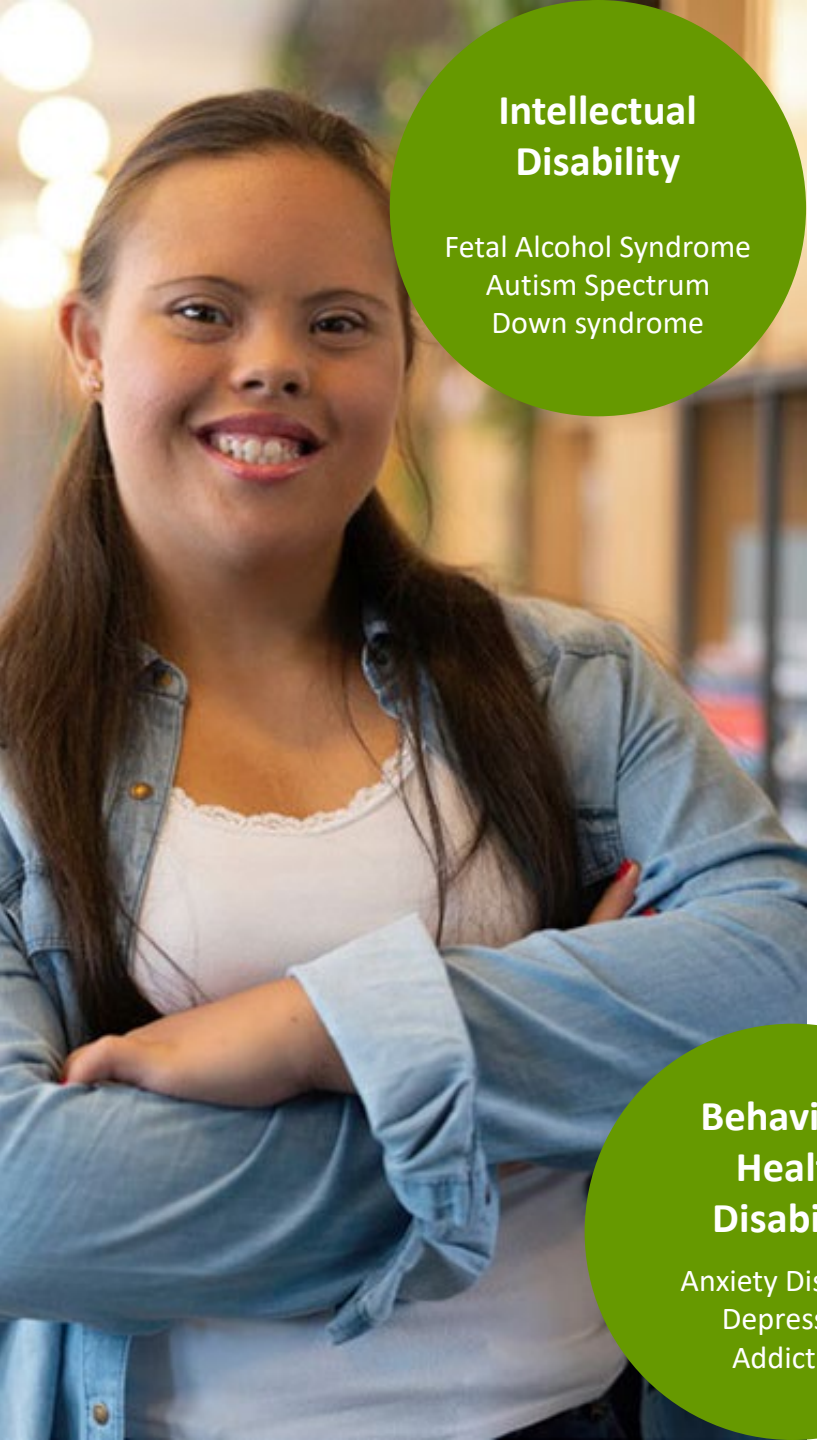
Having good mental health and a healthy relationship with substances boosts your ability to weather life's storms

Physical Health

When you are in good physical health you can better navigate the activities of daily and community life

The stability that comes from good **economic** health can **improve behavioral** health.
The stability that comes from good **physical** and **behavioral** health **enables economic** health.

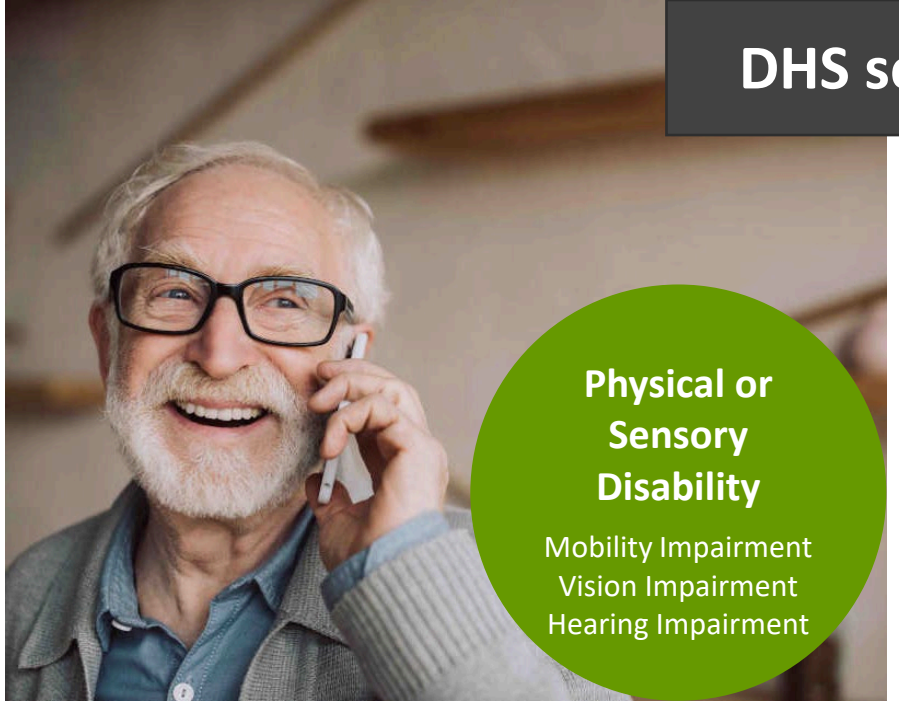
Communities are stronger when everyone has the opportunity to realize their full potential



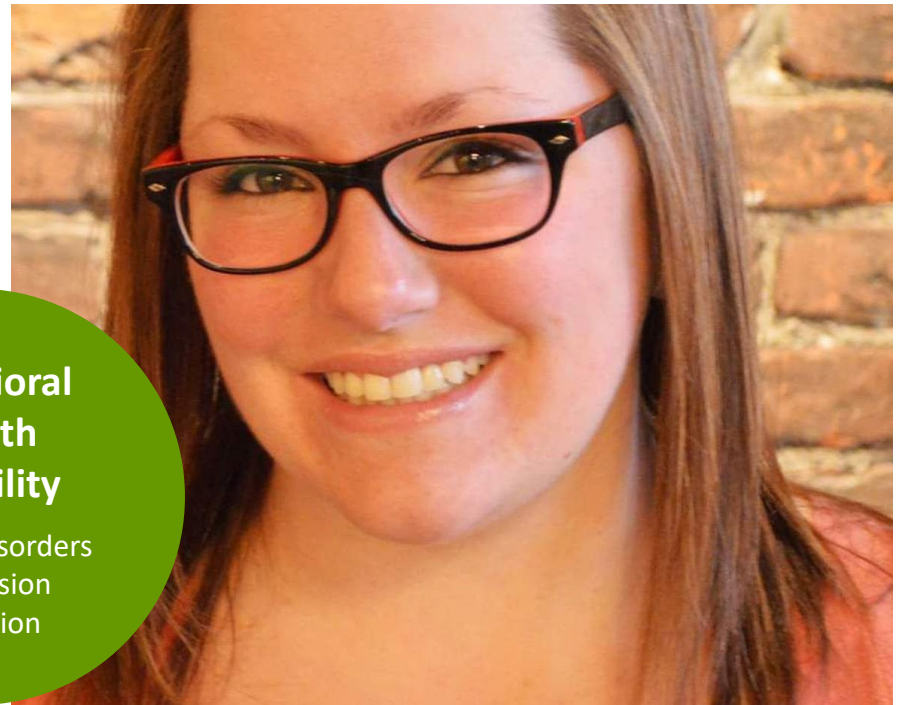
VOCATIONAL REHABILITATION DIVISION
Program Purpose

Assists North Dakotans with disabilities to enter or re-enter the workforce through individualized services

- Assess skills and abilities
- Identify a vocational goal
- Develop an individualized plan to achieve employment
- Provide services that result in competitive integrated employment



DHS serves people with Disabilities



Intellectual Disability

Fetal Alcohol Syndrome
Autism Spectrum
Down syndrome

Physical or Sensory Disability

Mobility Impairment
Vision Impairment
Hearing Impairment

Behavioral Health Disability

Anxiety Disorders
Depression
Addication

Cognitive or Neurological Disability

Learning Disability
Acquired Brain Injury
Multiple Sclerosis

VOCATIONAL REHABILITATION DIVISION
Eligibility

- Physical or mental disability
- Barrier to seeking, maintaining, or advancing in employment due to disability
- Individual requires and will benefit from VR services

VOCATIONAL REHABILITATION DIVISION
Services

- Vocational Counseling and Guidance
- Pre-employment Transition Services to Students with Disabilities
- Vocational Training
- Assistive Technology
- Hearing and Vision Services
- ADA Consultation to Businesses
- Placement Site Recruitment
- Job Placement

CONNECTING IN SCHOOL: PRE-EMPLOYMENT TRANSITION SERVICES (PRE-ETS)

Assists students with disabilities in making the transition from high school to post secondary education programs and/or competitive integrated employment

(age 21 or younger and 9th grade or above)

STATE PLAN FOR INDEPENDENT LIVING (SPIL)

Chapter 1, Title VII of the Rehabilitation Act of 1973, as Amended

STATE INDEPEN

CENTERS FOR

FISCAL YEARS 2017-2019

OMB NUMBER: 1820-0527

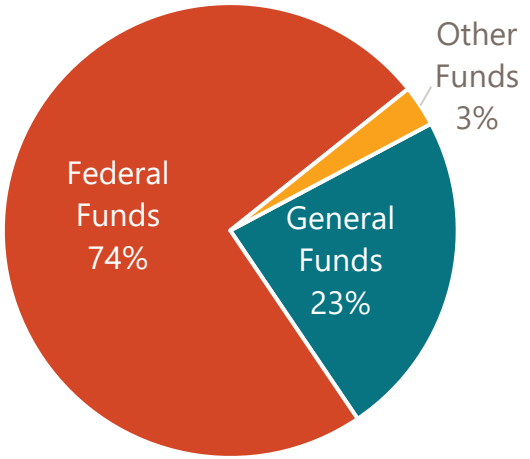
CHAPTER 50-06.5
INDEPENDENT LIVING CENTERS AND SERVICES

50-06.5-01. Definitions.
As used in this chapter, unless the context otherwise requires:

1. "Center for independent living" means a consumer-controlled, community-based, cross-disability, nonresidential, private, nonprofit agency that is designed and operated within a local community by individuals with a disability, which can provide an array of independent living services and complies with the standards and assurances in accordance with section 796f-4 of the federal Rehabilitation Act of 1973, as amended [Pub. L. 93-112; 29 U.S.C. 701 et seq.].
2. "Consumer control" means power and authority vested in individuals with a disability and, when applied to a center for independent living, means more than fifty percent of the principal governing board and management staff are individuals with a disability.
3. "Council" means the statewide independent living council.
4. "Designated state entity" means the vocational rehabilitation division of the department of human services as defined in the state plan for independent living.
5. "Director" means the director of the designated state entity.
6. "Independent living core services" means information and referral services; independent living skills training; peer counseling, including cross-disability peer counseling; individual and systems advocacy; services that facilitate the transition of an individual with a significant disability from a nursing home and other institutions to a home and community-based residence, with the requisite supports and services; to provide assistance to an individual with a significant disability who is at risk of entering an institution so the individual may remain in the community; and to facilitate the transition of youth who are individuals with a significant disability, who were eligible for an individualized education program and who have completed their postsecondary education or otherwise left school, to postsecondary life or have reached the age of eighteen and are still receiving services in accordance with an individualized education program and have not completed their postsecondary education.
7. "Independent living services" includes independent living core services and other services as described in section 705 of the federal Rehabilitation Act of 1973, as amended [Pub. L. 93-112; 29 U.S.C. 701 et seq.].
8. "Individual with a disability" means an individual with a physical or mental impairment that substantially limits one or more of the major life activities of such individual, with a record of impairment, or who is regarded as having such an impairment.
9. "Individual with a significant disability" means an individual with a severe physical or mental impairment whose ability to function independently in the family or community or whose ability to obtain, maintain, or advance in employment is substantially limited and for whom the delivery of independent living services will improve the ability to function, continue functioning, or move toward functioning independently in the family or community or to continue in employment, respectively.

50-06.5-02. Statewide independent living council.
A council is established. The council shall adopt bylaws governing operations of the council. The council shall meet at least quarterly.

50-06.5-03. Requirements of the statewide independent living council.



VR Budget Summary

19-21 Budget	**$31,853,039**
21-23 Budget (exec)	**$30,528,323**

85 FTEs; no change in FTEs projected; $1.3 million decrease in total budget (0% federal funds)

- Operating efficiencies related to travel and occupancy
- Discontinuation of grant to private recreational facility
- Exec budget included reduction in state match to Title VII federal funds allocated to Centers for Independent Living; DHS requests restoration of these funds to preserve state's access to federal funds to support independent living

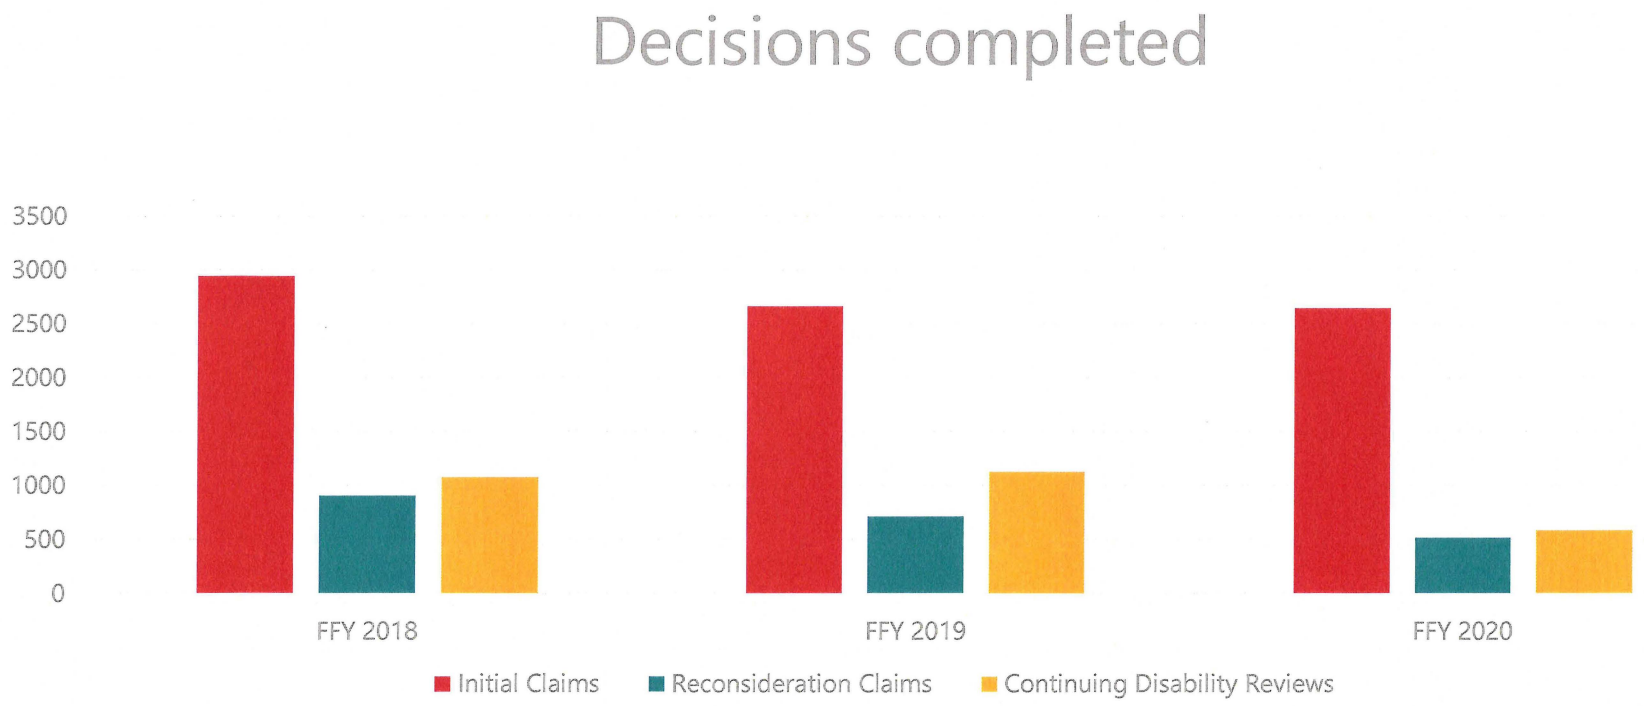
DDS MISSION

To improve the quality of life for North Dakotans with disabilities who apply for or receive Social Security Administration disability benefits, by making timely, consistent and accurate disability determinations.

THE DISABILITY DETERMINATION SERVICES (DDS) PROGRAM



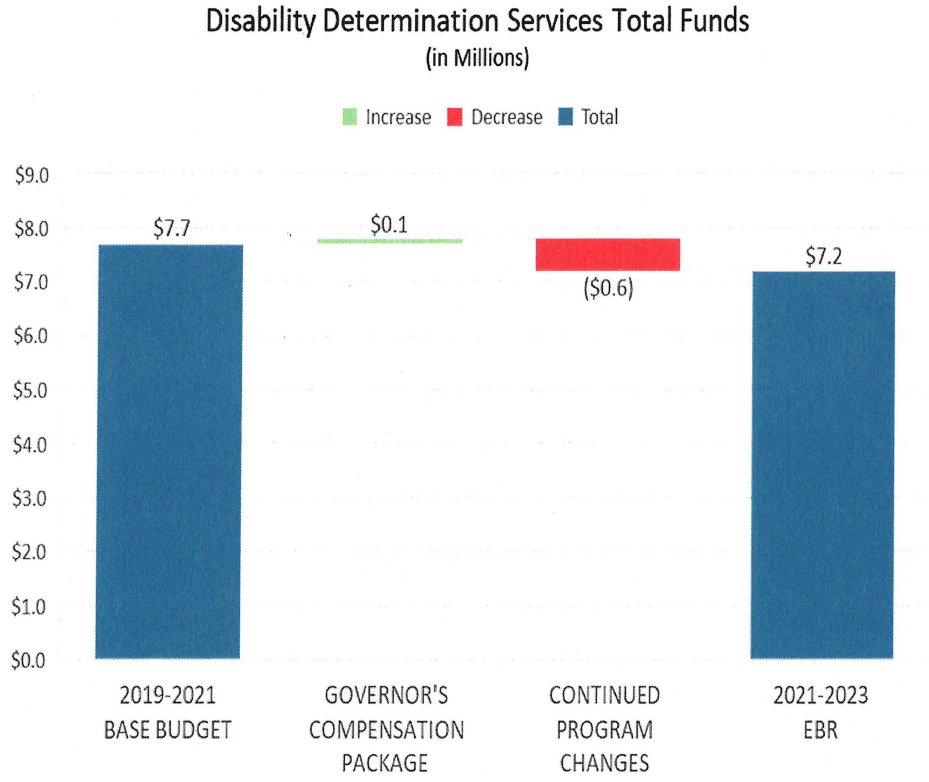
- 100% federally funded
- DDS staff make medical disability determinations using Social Security Administration (SSA) guidelines
- The Social Security disability program provides Social Security Disability Insurance (SSDI) and/ or Supplemental Security Income (SSI) benefits to persons with disabilities who are unable to work

DISABILITY DECISIONS

- The DDS processes disability determinations for the Social Security Administration for 3 main claim levels:
  - Initial claims
  - Reconsideration claims
  - Continuing Disability Reviews (CDR)
- The number of disability decisions that the DDS makes each year is determined by the Social Security Administration

DISABILITY DECISION STATISTICS

COVID-19 IMPACTS



- The DDS was directed by the SSA to temporarily suspend some service delivery activities due to the pandemic
- Those activities were focused on avoiding certain adverse actions that would result in a reduction, suspension or termination of Social Security or Supplemental Security Income benefits.
- Safety considerations were also of chief concern, so we did not:
  - Schedule consultative examinations
  - Schedule in-person disability hearings

Economic Assistance

Connecting people to resources that help meet basic needs

NORTH Dakota | Human Services

Be Legendary.™

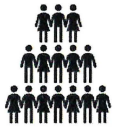
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



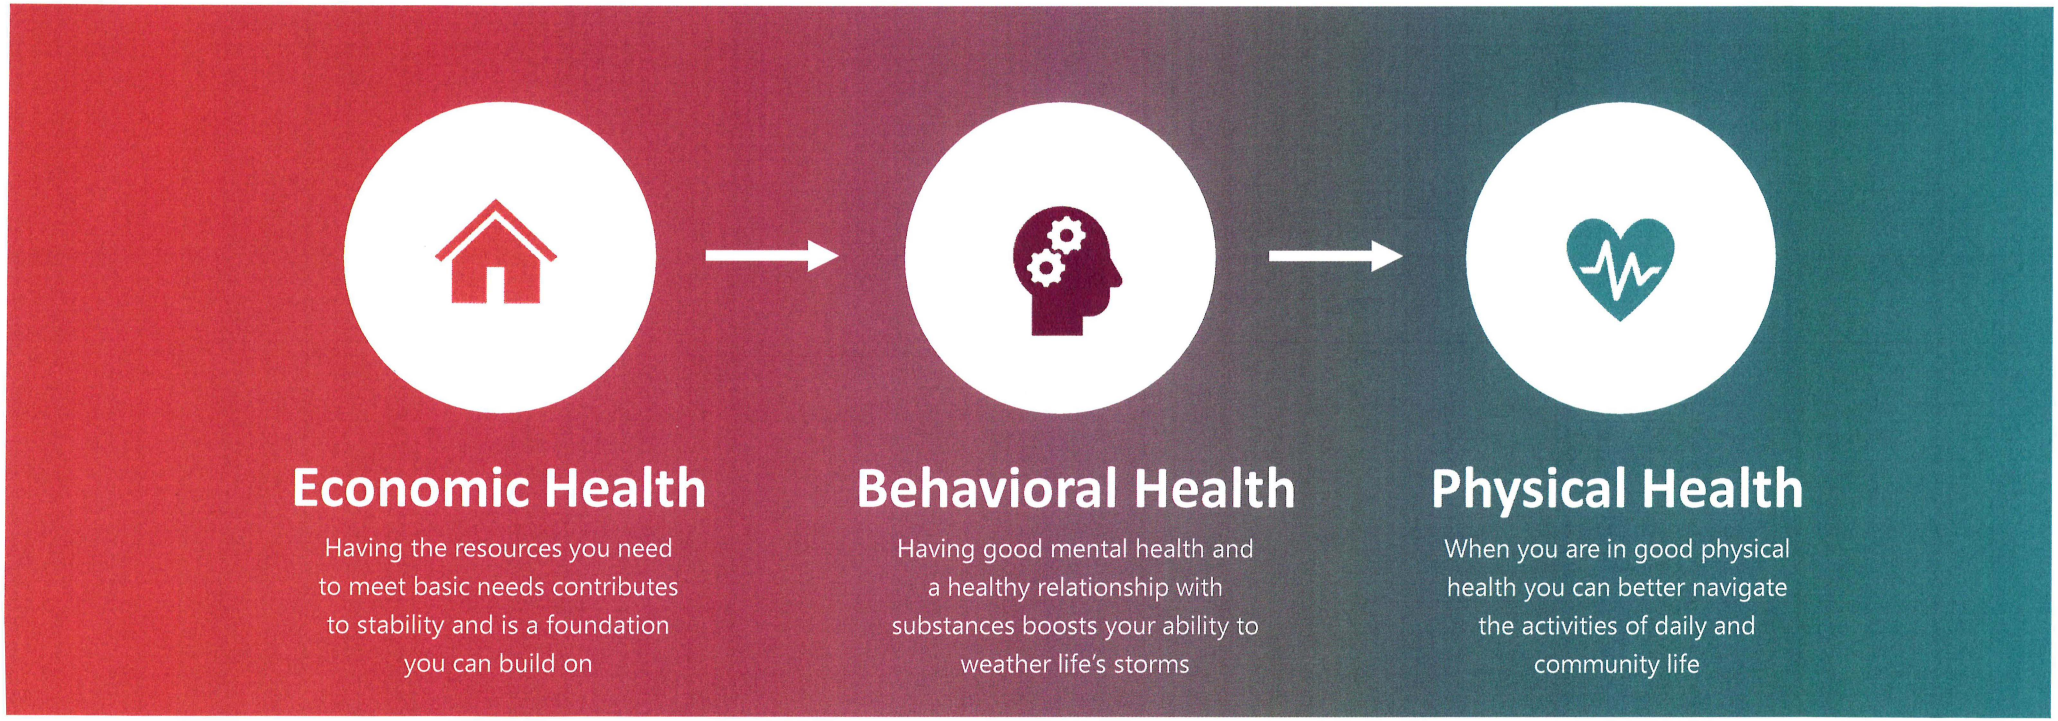
Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team



- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

They are thread running through every person's life

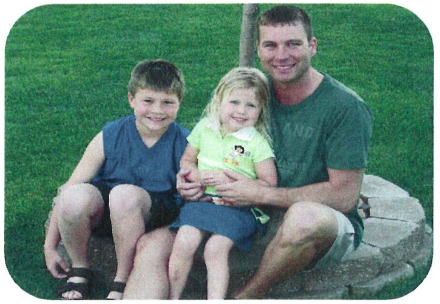
Foundations of Wellbeing are Interconnected

The stability that comes from good **economic** health can **improve behavioral** health.
The stability that comes from good **physical** and **behavioral** health **enables economic** health.

ECONOMIC ASSISTANCE
Program Purpose

The Economic Assistance team **helps** lower income **North Dakotans when they are struggling to make ends meet** by **connecting** them **to resources** that can **help meet** their **basic needs**, **preventing** greater and more damaging **crises.**

ECONOMIC ASSISTANCE
Federal Programs



Child Care Assistance Program (CCAP)

Low-Income Home Energy Assistance Program (LIHEAP)

Supplemental Nutrition Assistance Program (SNAP)

Temporary Assistance for Needy Families (TANF) Program

ECONOMIC ASSISTANCE
What We Do

Program Administration

- Federal Compliance
- State Plan
- State Law & Administrative Rules
- Federal Reporting
- Federal & State Agreements

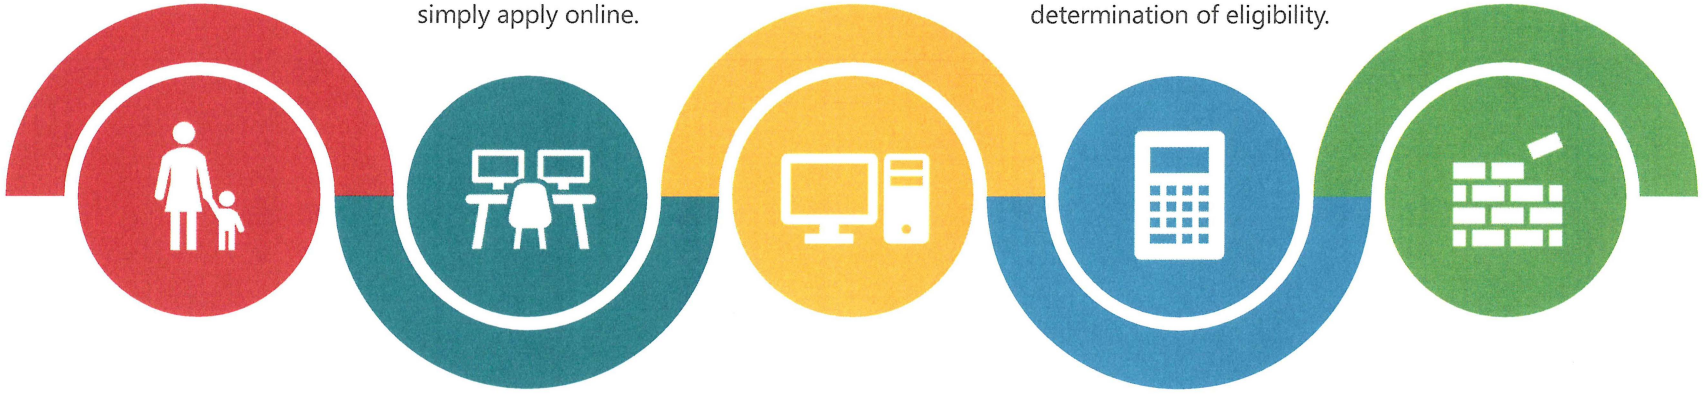
Eligibility System Support

- Program and Policy Support
- Training
- Benefit Issuance
- Integrated Eligibility System Development and Maintenance

Program Integrity and Performance

- Program Monitoring
- Federal and State Quality Reviews
- Federal and State Audits
- Performance Improvement

Connecting North Dakotans to economic assistance is a partnership



The state and Human Service Zones work together to deliver help to low and moderate-income families

Contact Human Service Zone

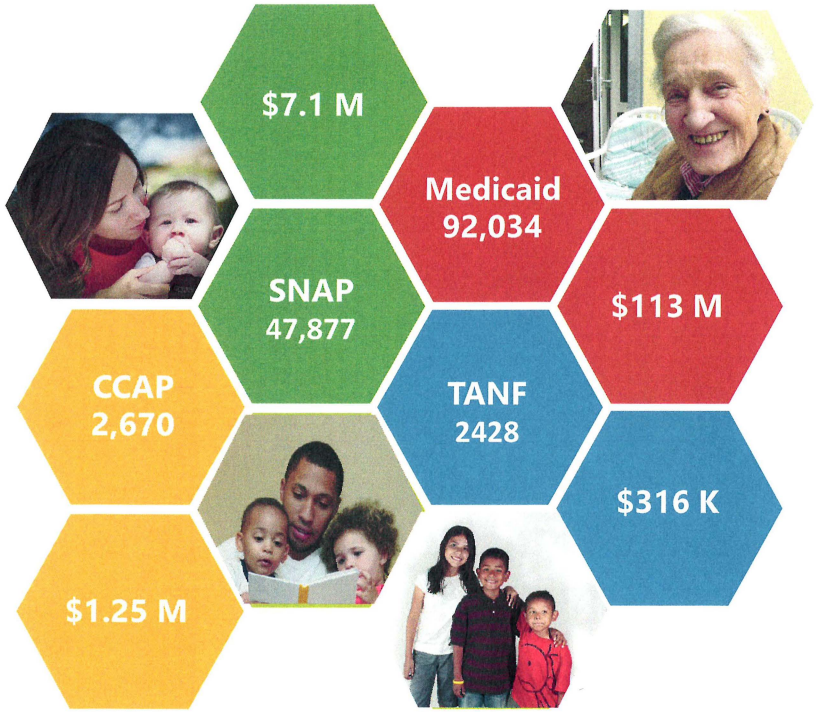
The local applicant can contact their human service zone directly or they can simply apply online.

Determine eligibility

An eligibility worker will review the information, reach out if needed, and make a determination of eligibility.

Person decides to apply

Making ends meet is getting more difficult every month so the applicant makes the decision to reach out for help.



Gather information

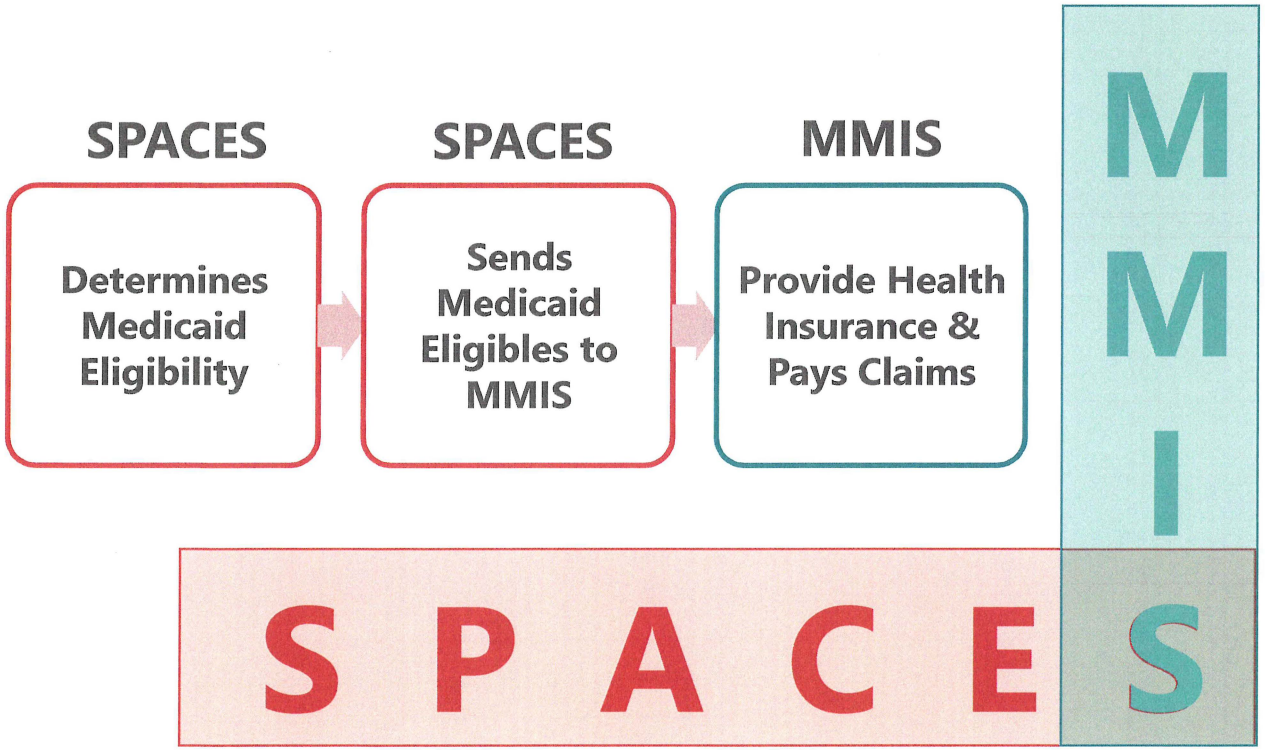
The applicant can enter as much info as they can in the SPACES self-service portal.

Issue benefits

If the applicant is eligible to receive assistance, the state will issue the benefit in the appropriate manner.

140,000 - 150,000 North Dakotans utilize SPACES to access economic assistance in North Dakota each year

Average Monthly Individuals/Benefits (FY20)



M — 119,763 people in 68,287 households have a Medicaid record in SPACES

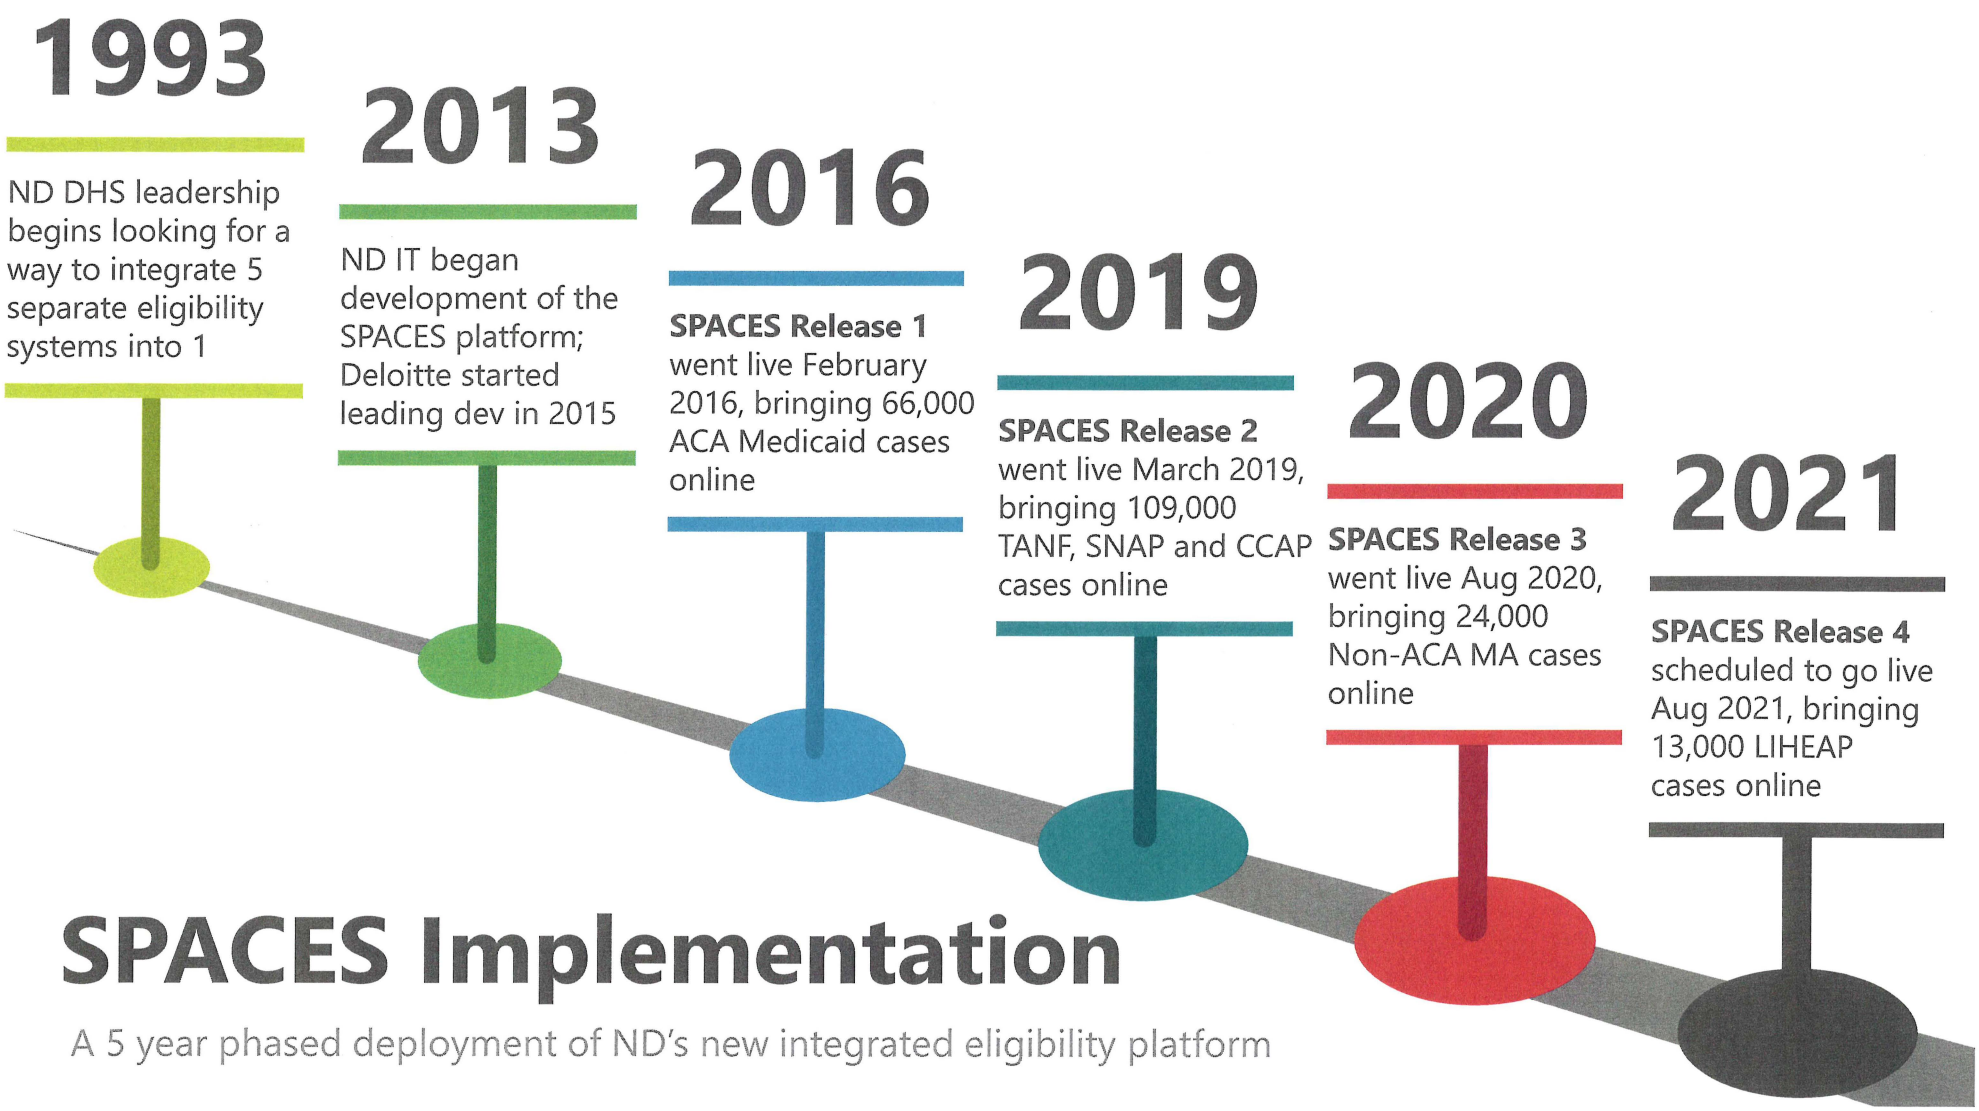
S — 73,262 people in 34,795 households have a SNAP record in SPACES

T — 5,124 people in 1,981 households have a TANF record in SPACES

C — 4,946 people in 2,960 households have a CCAP record in SPACES

Two major technology platforms work together to connect low-income North Dakotans to resources

SPACES **interfaces with more than 50 systems**, including:



- Child Support
- Social Security
- Vital Records
- IRS
- EBT & EPC Systems
- ND PeopleSoft

145,000

North Dakotans

$1,472,000,000

Economic Assistance

SPACES Implementation

A 5 year phased deployment of ND's new integrated eligibility platform

ECONOMIC ASSISTANCE

State Median Income for ND households 2020

Many federal assistance programs are designed to help individuals and families who earn less than 60% of State median income (SMI).

60% SMI is roughly equivalent to 200% of the federal poverty level.

	30% SMI		60% SMI		100% SMI	
Household Size	Annual Income	Hourly Wage	Annual Income	Hourly Wage	Annual Income	Hourly Wage
1	$ 15,720	$ 7.56	$ 31,440	$ 15.12	$ 52,400	$ 25.19
2	$ 20,562	$ 9.89	$ 41,124	$ 19.77	$ 68,540	$ 32.95
3	$ 25,398	$ 12.21	$ 50,796	$ 24.42	$ 84,660	$ 40.70
4	$ 30,234	$ 14.54	$ 60,468	$ 29.07	$ 100,780	$ 48.45
5	$ 35,070	$ 16.86	$ 70,140	$ 33.72	$ 116,900	$ 56.20
6	$ 39,912	$ 19.19	$ 79,824	$ 38.38	$ 133,040	$ 63.96
7	$ 40,818	$ 19.62	$ 81,636	$ 39.25	$ 136,060	$ 65.41
8	$ 41,724	$ 20.06	$ 83,448	$ 40.12	$ 139,080	$ 66.87

Hourly wage based on assumption of 2,080 hours of work / year (full time equivalent)

EVERY OCCUPATION HAS A DIFFERENT EARNING PROFILE, WHICH HELPS US UNDERSTAND WHO MAY BE ELIGIBLE FOR ASSISTANCE

Sampling of occupations by average wage (2019)

Less than $12 / hr	$12 - $20 / hour	$20 - $28 / hour	$28 - $35 / hour

ECONOMIC ASSISTANCE

Temporary Assistance to Needy Families (TANF)

TANF provides assistance to needy families with children who are deprived of parental support or care.

Which means that a parent is absent due to divorce, separation, death or one or both parents are aged or disabled.

ECONOMIC ASSISTANCE
Temporary Assistance to Needy Families (TANF)

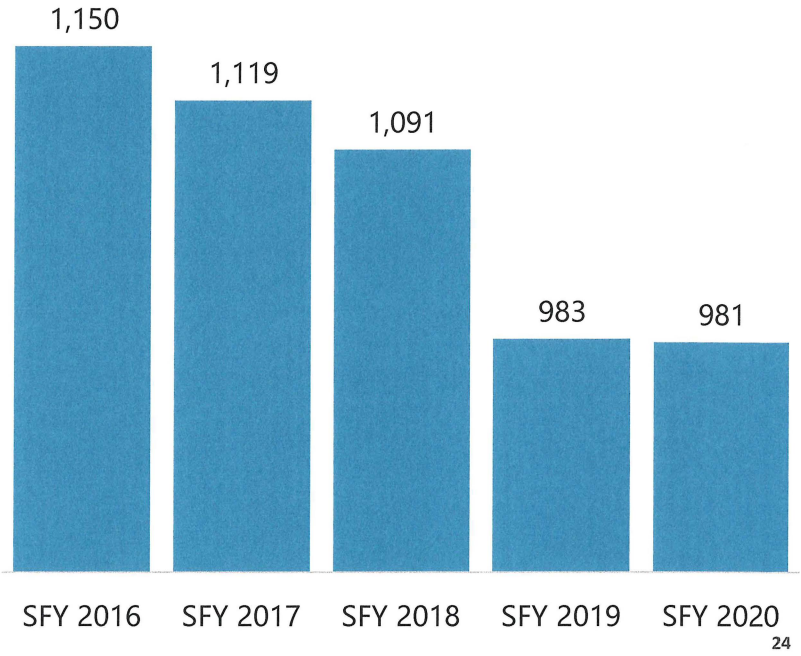
945

Average number of families served per month

81%

Of beneficiaries are children

52%



Of ND TANF cases are child only cases (children in the care of a non legally responsible caretaker)

$297

Average benefit per family per month

SFY2020

Average households served per month

ECONOMIC ASSISTANCE

Temporary Assistance to Needy Families (TANF)

TANF Funded Programs

Alternatives to Abortion

Reimbursements to organizations that deliver alternative services and education to the public.

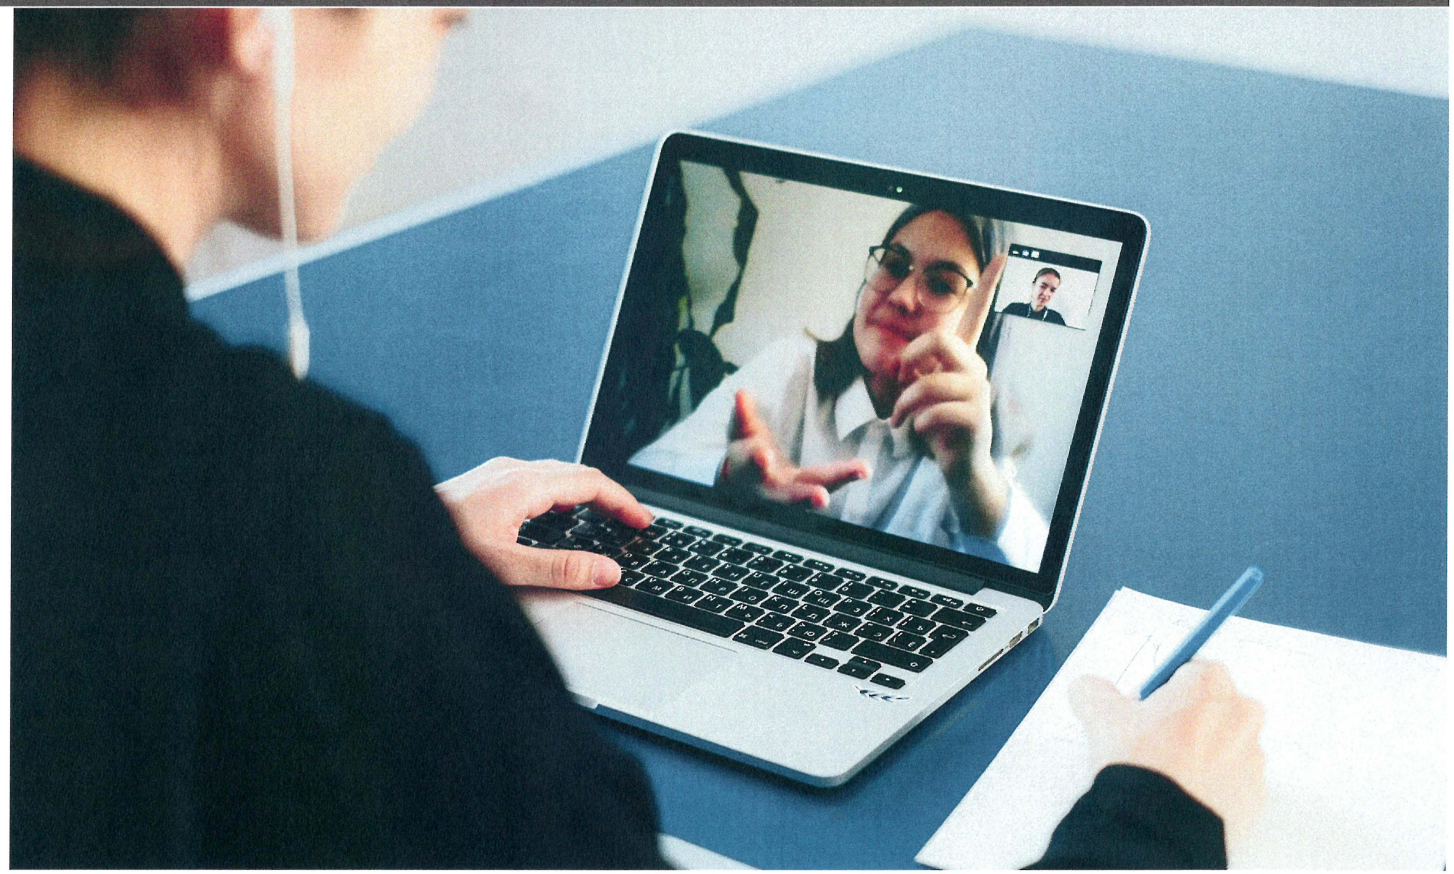
Crossroads

Case management and support service payments to qualified teen parents who are pursuing an education.

Kinship Care

Alternative to foster care for children living with a relative and in the care, custody and control of a Human Service Zone, Division of Juvenile Services, or a tribal agency within ND.

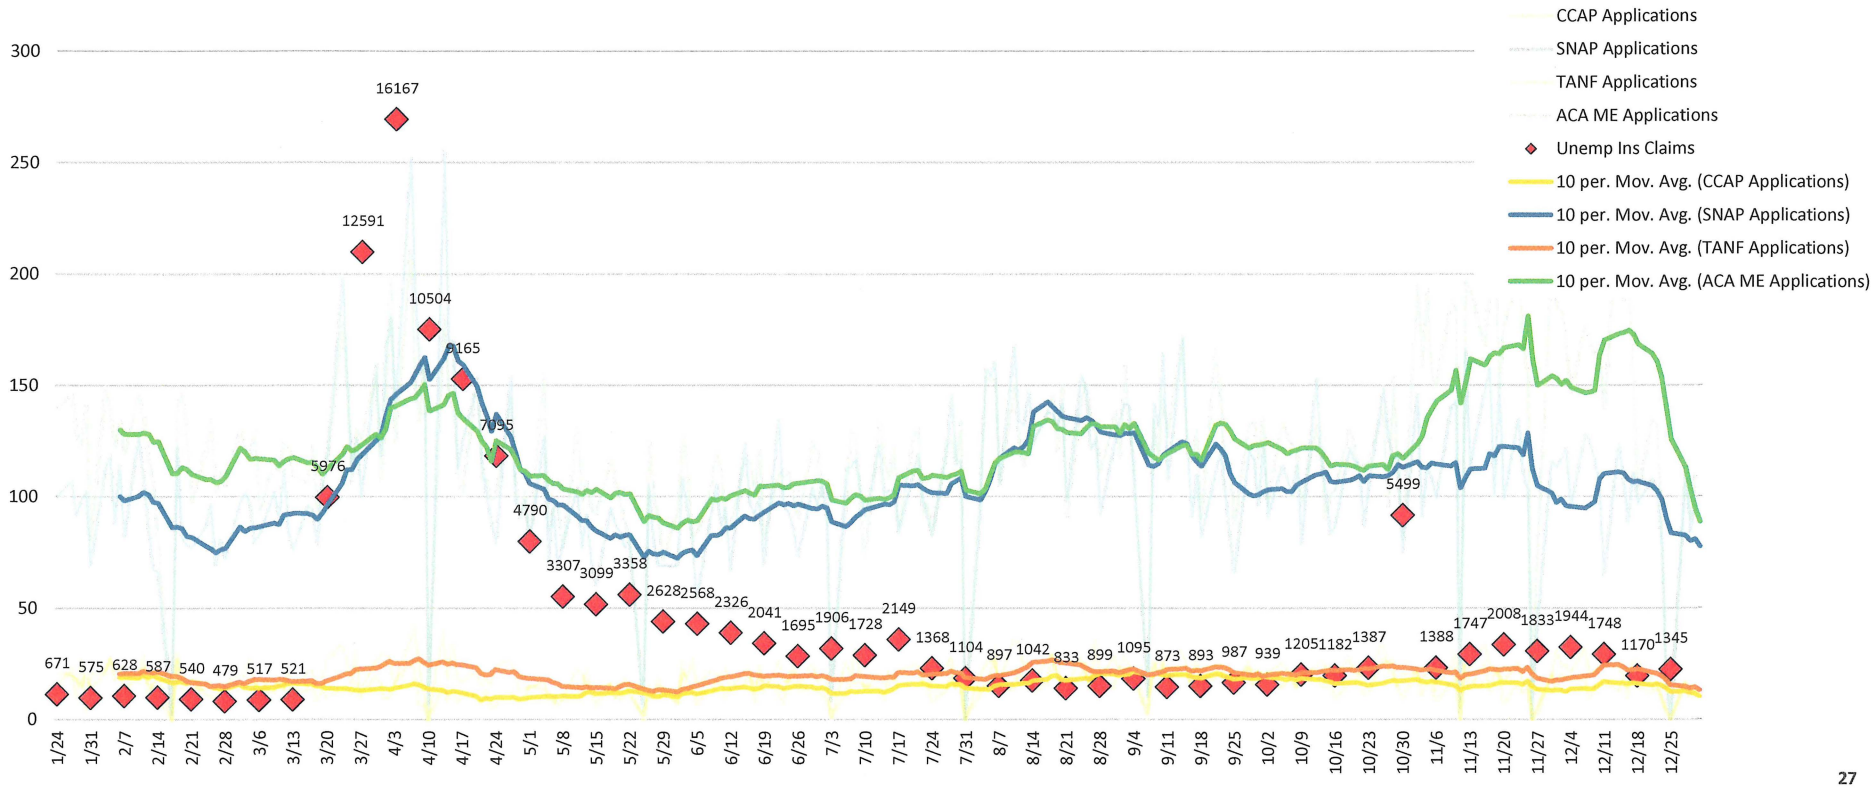
Parental Responsibility Initiative for the Development of Employment (PRIDE)



Case management and support service payments to address nonpayment of child support by noncustodial parents.

ECONOMIC ASSISTANCE

COVID 19 Program Administration and Service Delivery



To ensure the health and safety of the individuals we serve along with Human Service Zone staff the following measures were implemented:

- Waiver of face-to-face interview requirement
- Mail issuance of EBT Cards
- Waived mandatory work requirements

ECONOMIC ASSISTANCE APPLICATIONS DURING 2020

Daily applications remained above pre-COVID levels throughout 2020 with peaks in April, August and November/December

ECONOMIC ASSISTANCE

COVID 19 - Emergency Food and Energy Assistance

Pandemic EBT (P-EBT)

- Issued SNAP benefits to children eligible for free or reduced-price school meals who did not receive those meals due to school closure.
- Delivered info to families in partnership with DPI.
- Approximately 36,750 children received $9.5 million in SNAP benefits due to COVID school closure March-May 2020.

$9.5 million

SNAP Emergency Assistance

- Provides the maximum SNAP benefit to all SNAP eligible household starting in March 2020.
- An average of 15,000 households receive $2.6 million in additional benefits per month.
- Optional program benefit is authorized each month by USDA FNS.

$26 million

Pandemic LIHEAP (P-LIHEAP)

- Provided one-time help with the cost of electric utility bills for qualifying households.
- Payments were issued directly to participants' electric utility providers.
- Assistance available to households eligible in 2019-20 heating season
- Assisted 6,500 households as of 12-31-20

$3 million

ECONOMIC ASSISTANCE

COVID 19 - Child Care Assistance Program (CCAP)

- Allowed for more than 40 absence hours per month due to illness, quarantine and provider closures
- Allowed families to maintain eligibility as they were seeking employment (both at application and re-review)
- Extended payment request deadlines and aligned with Child Care Emergency Operating Grant (CEOG)

ECONOMIC ASSISTANCE

COVID 19 - SNAP Enhancement Grants

GRANT CHANGES

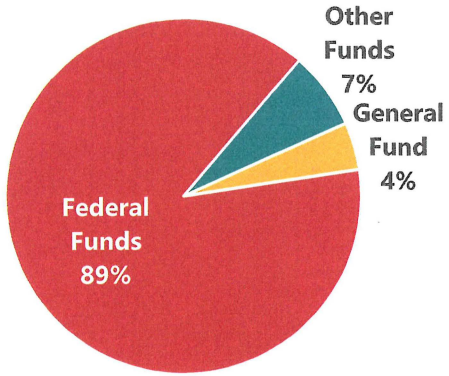
North Dakota Department of Human Services

Changes in Economic Assistance (EA) Program Grants from 2019-2021 Appropriation to 2021-2023 Executive Budget To House

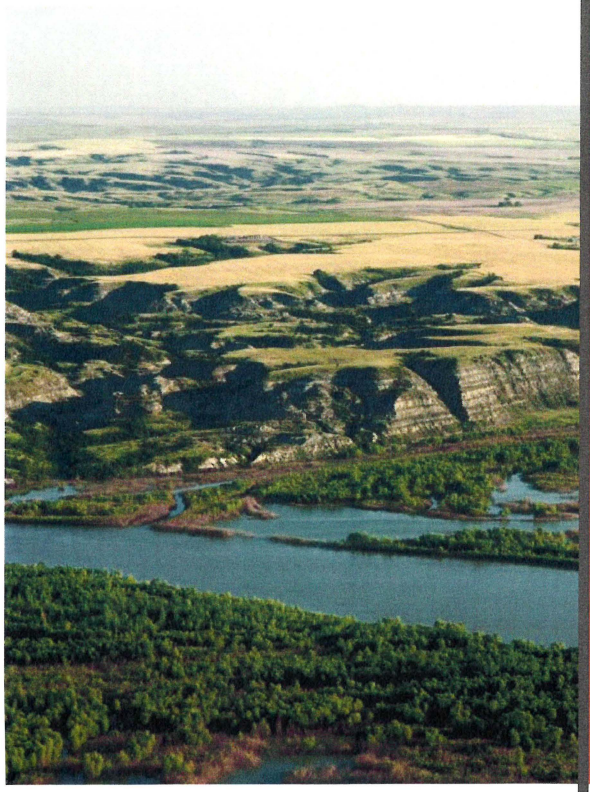
Description	**2019-2021 Appropriation**	Continued Program Changes	Costs to Continue	Total Changes	Executive Budget Changes	**2021-2023 Budget to House**
Temporary Assistance for Needy Families (TANF)	$7,623,000		($7,800)	($7,800)		$7,615,200
Child Care Assistance	$27,787,643		$6,923,232	$6,923,232		$34,710,875
Kinship Care	$2,990,000		($200)	($200)		$2,989,800
Supplemental Nutrition Assistance Program (SNAP) - Benefits	$165,240,000		$2,760,000	$2,760,000		$168,000,000
Low Income Home Energy Assistance Program (LIHEAP)	$25,728,145		$1,660,010	$1,660,010		$27,388,155
Total EA Program	$229,368,788		$11,335,242	$11,335,242	$0	$240,704,030
General Fund	$5,655,480	$0	$2,952,453	$2,952,453	$0	$8,607,933

Also included in the grants line are other Economic Assistance Program grants for which cost and caseload data is not computed. These grants include:

TANF Transportation and Support Services	$2,224,400	($613,170)		($613,170)		$1,611,230
SNAP Training, Outreach, and Nutrition Education Grants	$2,504,114	$369,464		$369,464		$2,873,578
LIHEAP Weatherization, Outreach, and Case Management	$8,787,772	($60,000)		($60,000)		$8,727,772
Emergency Rent Bridge		$3,500,000		$3,500,000		$3,500,000
Total Other Grants	$13,516,286	$3,196,294		$3,196,294		$16,712,580
General Fund	$56,239	($22,639)		($22,639)		$33,600



Total EA Grants	$242,885,074	$3,196,294	$11,335,242	$14,531,536	$0	$257,416,610
General Fund	$5,711,719	($22,639)	$2,952,453	$2,929,814	$0	$8,641,533



EA Budget Summary

No change in FTEs; $15.1 million increase in total budget (77% from federal funding)

- Complete the integration of LIHEAP into integrated eligibility platform
- Finish converting cases from legacy mainframe systems to SPACES
- Administer federal COVID relief funds for low and moderate-income households
- Integrate department's housing assistance initiatives into the administration of economic assistance resources

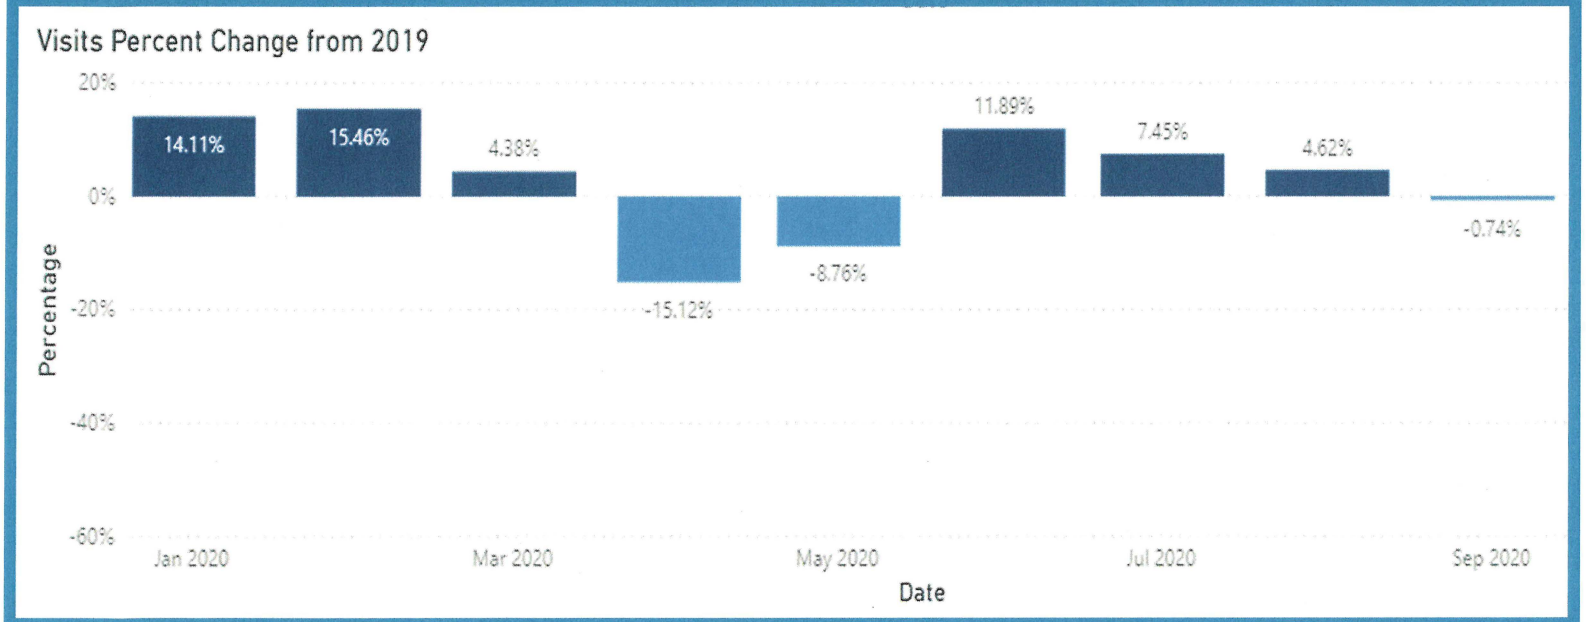
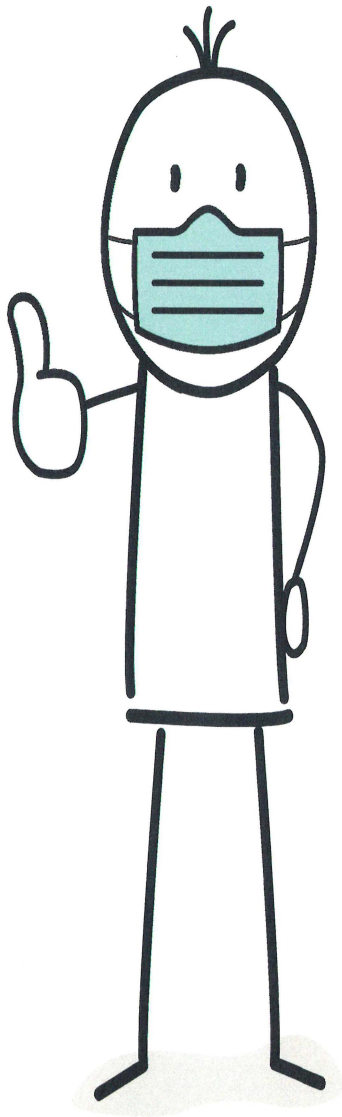
Total Average Difference	**-$5,379,917.09**	Less using average than months August 2019 - March 2020		

COVID-19: **TRADITIONAL MEDICAID UTILIZATION**



Utilization Comparison 2019 v. 2020



COVID-19: **UTILIZATION PERCENTAGE CHANGES IN TRADITIONAL MEDICAID**

Utilization changes shown in percentages from 2019 to 2020

COVID-19: **ENROLLMENT TREND v. 6.2% FMAP BUMP**

2020 Events: In 2020 the State received 6.2% **more** federal funds (lowering the General Fund need). To receive those funds Medicaid **cannot disenroll anyone** from coverage. Medicaid saw new applicants and the churn rate was 0%. As a result, enrollment reached 100,000 in August and continues to grow. However, decreases in utilization in April and May **provided a buffer**.

2021 Scenario 1: In 2021, HHS extended the public health emergency to April. This continues to lower the General Fund need by 6.2% and our churn rate continues to be 0 with a few exceptions. However, utilization is generally back up to pre-COVID levels. **The buffer will no longer exist.**

2021 Scenario 2: Sometime in the biennium the Biden Administration will end the public health emergency and the 6.2% increase in federal funds will go away. DHS will have 6 months to work through the backlog of redeterminations. There are **no funds** being provided by CMS for this work.

MMIS MODERNIZATION – THE ROAD AHEAD

MMIS -
ASSESSMENTS
Medicaid Information Technology Architecture
State Self-Assessment (MITA SS-A)
Ernst & Young Feasibility Assessment

HIGH LEVEL PROJECT SCHEDULE

BENEFITS OF MODERNIZATION

- CMS Directive & 90/10 enhanced funding
- System upgrades are more manageable
- Enhanced & specialized system functionality
- Potential to leverage NASPO ValuePoint
- One Vendor does not control the system
- Modularity enhances Interoperability
- Leverage cloud based or SaaS solutions
- As technology changes, modules are easier to replace

- State and Federal Mandates, Business Changes, and Technology changes are easier to accomplish
- Provide benefits to members and providers working toward the goal of interoperability that will result in more value-based care
- To reduce operational costs; increase flexibility and responsiveness to rapidly changing healthcare, legislative, business, and technical needs; and advance partnerships with intrastate and interstate agencies

POTENTIAL ROADBLOCKS

- Modernization of MMIS will require a transition of legacy platforms to modules and at times the maintenance and operations of those will overlap.
- Costs as related to multiple procurements
- NDIT and DHS staff availability

MMIS PROGRESS IN OTHER STATES

Montana

Montana Program for Automating and Transforming HealthCare Project **(MPATH)** 6-year plan ($99 Million)

- Data Analytics (Multi-release March 2018-November 2019)
- Provider Services (Multi-release August 2019-April 2020)
- System Integration Services(Implemented July 1 ,2019)
- Care Management (Multi-release June 2020-February 2022)
- Claims Module-Planned Implementation (Late 2022/Early 2023)
- Additional RFP Releases (October 2019-December 2022)
  - Fraud, Waste & Abuse Analytics
  - TPL Recoveries
  - Customer Care
  - Pharmacy Benefit Management System
  - Drug Rebate Management
  - Electronic Visit Verification

Wyoming

The Wyoming Department of Health, Division of HealthCare Financing, MMIS Replacement Project Team for the Wyoming Integrated Next Generation System **(WINGS)**

- $75 million proposal
- Four Modules have been implemented and are live:
- Pharmacy Benefit Management System(PBMS)
- System Integrator
- Data Warehouse
- Fraud, Waste and Abuse Case Tracking
- Two Modules are in the implementation phase
- Benefit Management System-Claims Processing with Third Party Liability
- Electronic Visit Verification(EVV)
- Care/Case Management System Module RFP through procurement July 2020

VALUE BASED PURCHASING

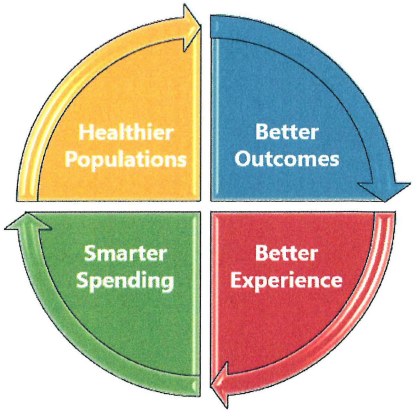
DHS met with members of the North Dakota Hospital Association

- 6 Prospective Payment System Hospitals
- 3 large Critical Access Hospitals

Meeting Dates



- **11/13/20** – Episodes of Care
- **12/3/20** – Pay-For-Performance
- **12/10/20** – Accountable Care Organizations

The 3 VBP Models presented by experts from other states

- Tennessee presented on Episodes of Care
- Wisconsin presented on Pay-For- Performance
- Caravan Health presented on Accountable Care Organization

VBP Models align with Quality

Quadruple Aim for ND Medicaid

VALUE BASED PURCHASING

1. States that incorporate VBP model into their Medicaid program can **increase quality** and **bend the cost curve**.
2. DHS sent a survey to call participants to understand their preferred VBP model. All PPS hospitals **except** Sanford completed the survey.
3. DHS will present the survey results to committee members and describe options for VBP models.

VALUE BASED PURCHASING FOR HOSPITALS

Estimated Total Potential Savings **$6,250,000**

Value Based Purchasing for Hospitals			
	Total	**Federal**	**State**
Value-Based Purchasing	$ (6,250,000)	$ (4,687,500)	$ (1,562,500)

Children and Family Services

Rethinking Child Welfare in North Dakota

NORTH Dakota | Human Services

Be Legendary.™

CHILDREN AND FAMILY SERVICES
Program Purpose

The purpose of the Children and Family Services division is to help families who are struggling avoid disruption by having access to the help they need to build stability and well-being together.

CHILDREN AND FAMILY SERVICES
What we do

Safety

- Child protective services
- Child fatality review panel
- State Child protection team
- Parent Resource Centers
- Alliance for Children's Justice

Permanency

- Foster Care
- Adoption
- Guardianships
- Interstate compacts for the placement of children
- Unaccompanied minor services
- Independent living services
- Licensing for QRTPs and LCPAs

Well-being

- Family preservation services
- Intensive In-home therapy
- Nurturing Parent programs
- Healthy Families
- Parent aides
- In-home case management
- Respite care
- Family centered engagement
- Early childhood services
- Child care licensing

CHILDREN AND FAMILY SERVICES

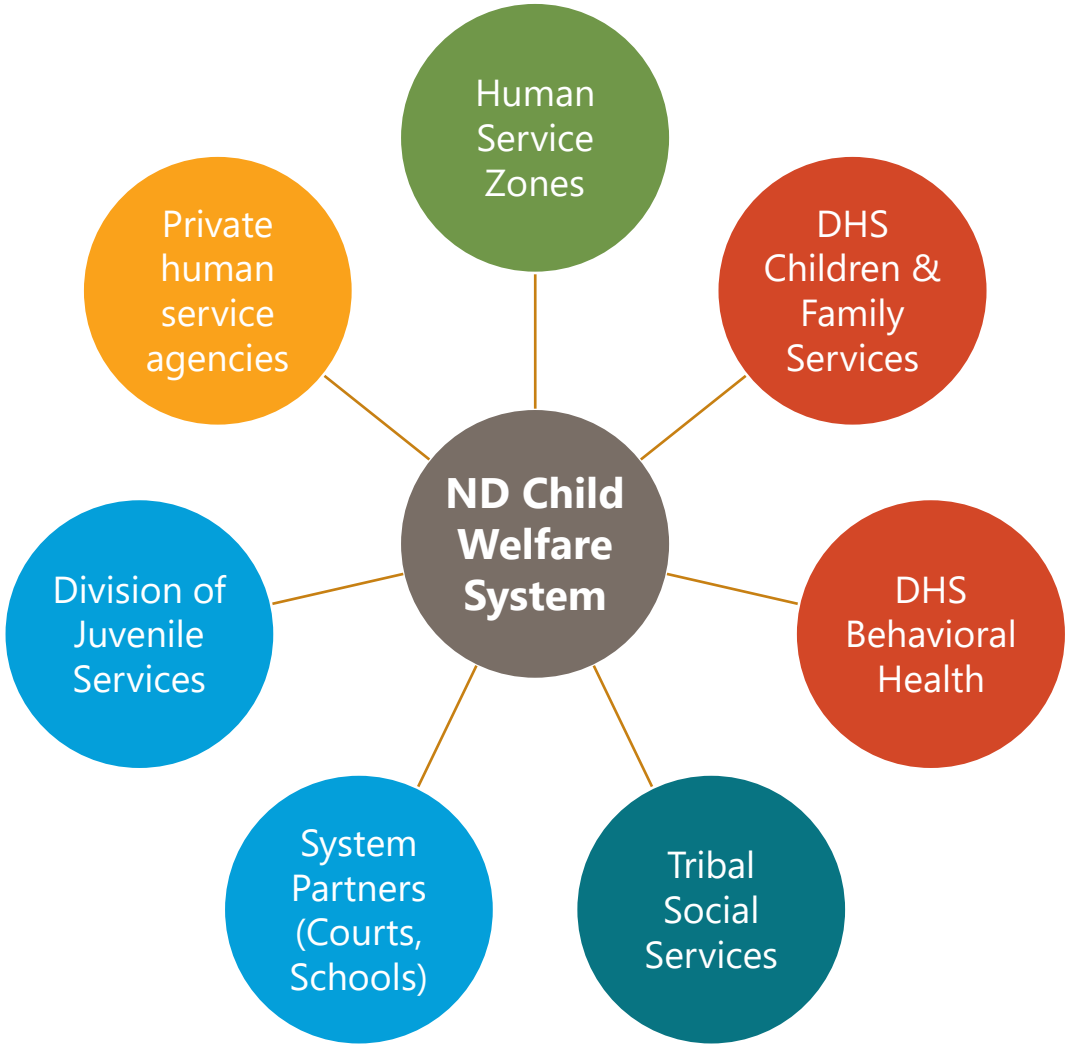
In ND child welfare services are delivered by local, state, tribal and private providers using both federal and state funds

Dept of Human Services

- **Human Service Centers**
  - Crisis teams
  - Intensive In-home services (therapy & treatment, skills training, behavior mod)
  - Targeted case management
- **Children & Family Services**
  - Training and coaching of field staff
  - Oversee quality service delivery
  - Administration of policy

Private Human Service Providers

- Safe shelter for crisis
- Human trafficking supports and safe beds
- Unaccompanied minor services
- Foster homes, including therapeutic
- Targeted case management



Tribal Social Services

- FRAME entry and foster eligibility determinations
- Joint practice model and ICWA training
- Native American Training Institute supports (training, billing, svc delivery)
- New FMAP service contracting
- IV-E agreements boost access to funding

Human Service Zones

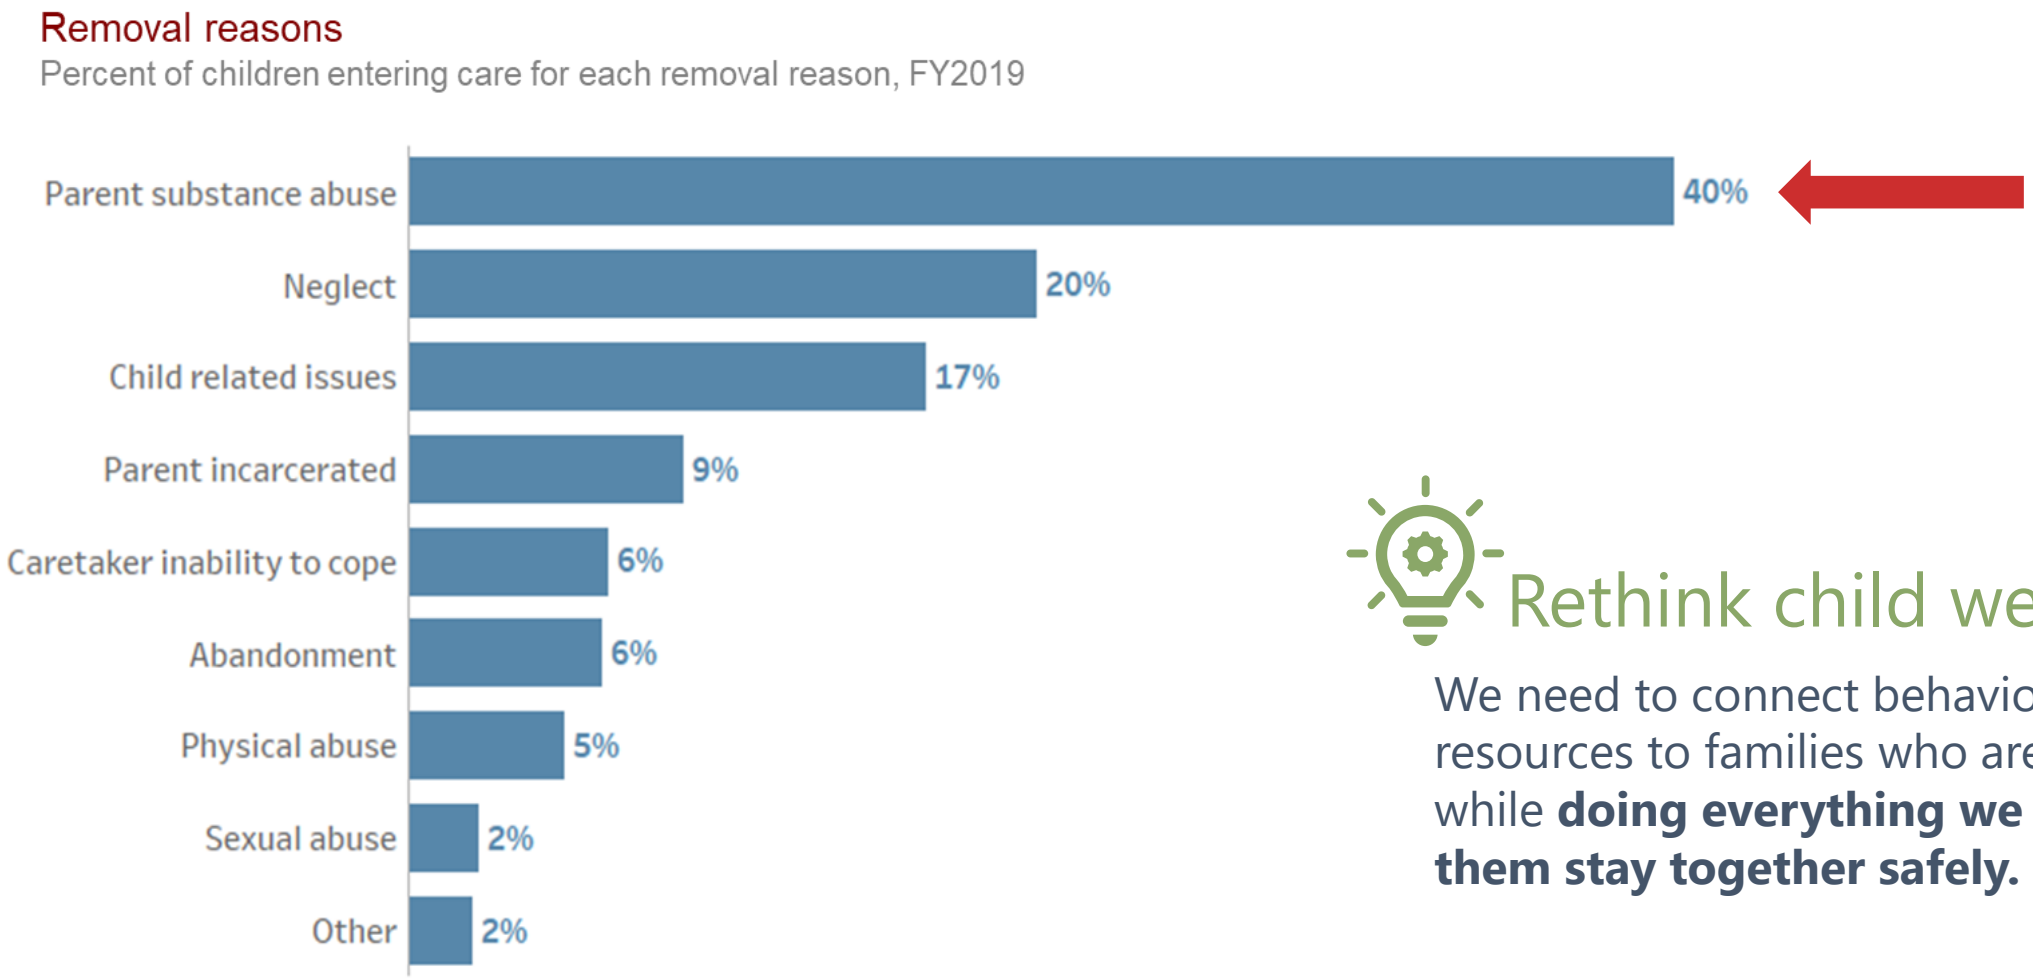
- Assess present and impending danger
- Safety planning
- Case management
- Assess and build parent capacities
- Provide safe supports for children and families
- Refer and broker services needed for families
- In home supports
- Parent aides
- License foster homes
- Intake for child abuse and neglect reports

The Child Welfare System in North Dakota includes both public and private sector partners

The mission of the child welfare system in North Dakota

Safe Children
Strong Families

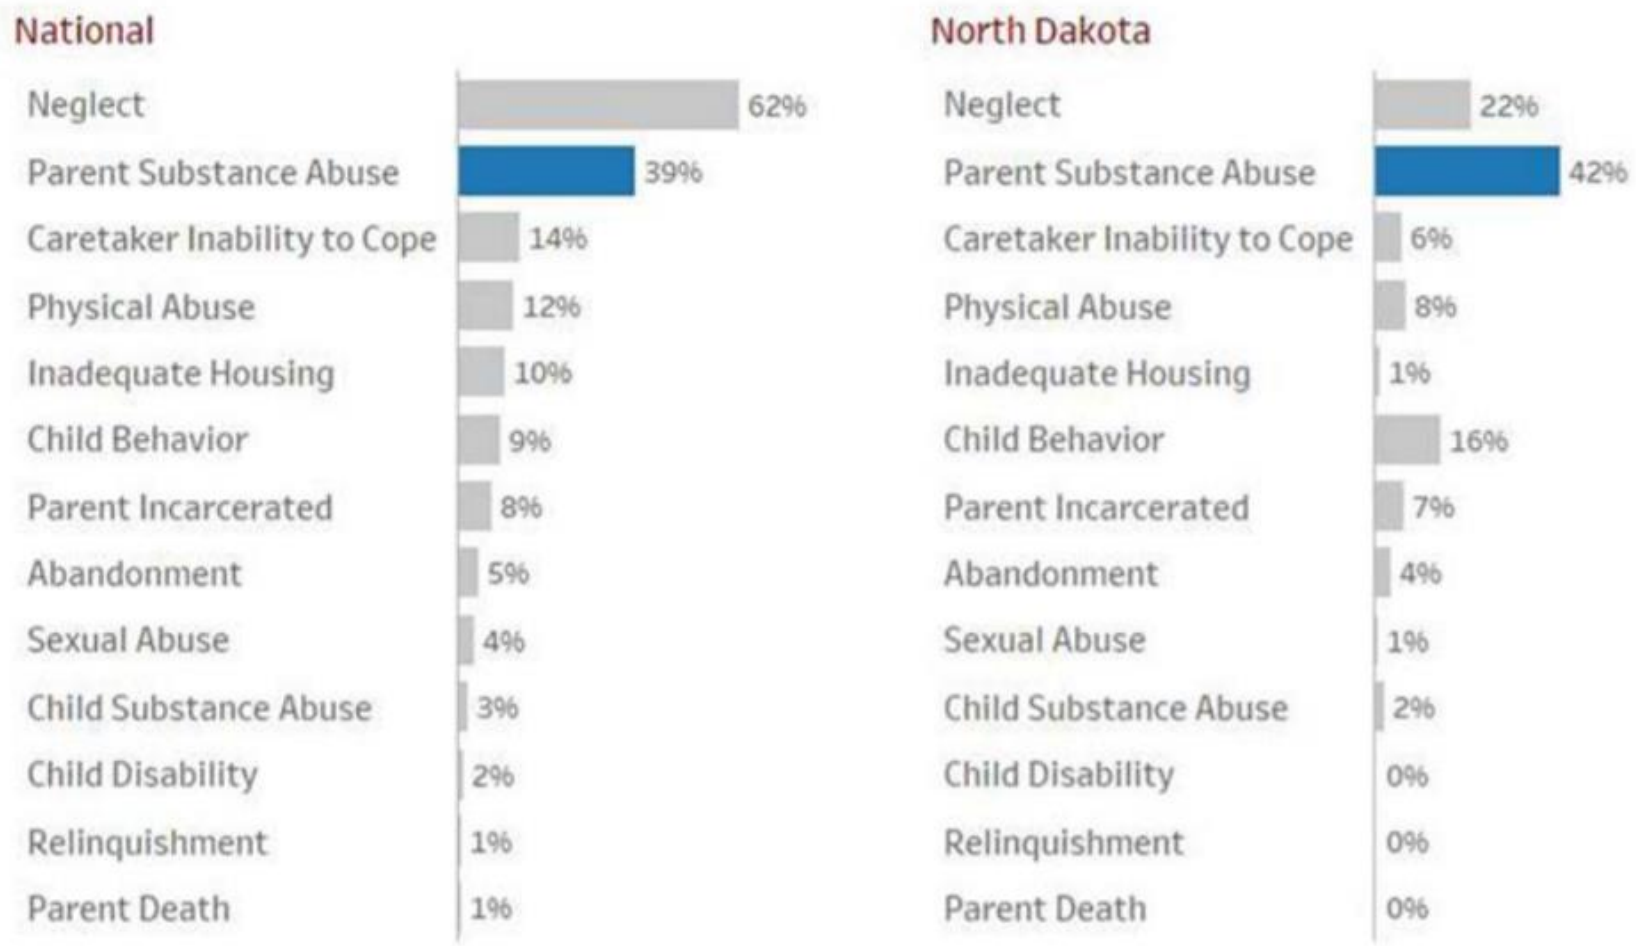
What’s driving us



- Abuse and neglect related to substance abuse in families
- Increasing challenging behaviors in K-3
- Adolescent suicides
- Inconsistencies in child protection practices
- Delays in completion of child safety assessments
- Clear return on investments made early

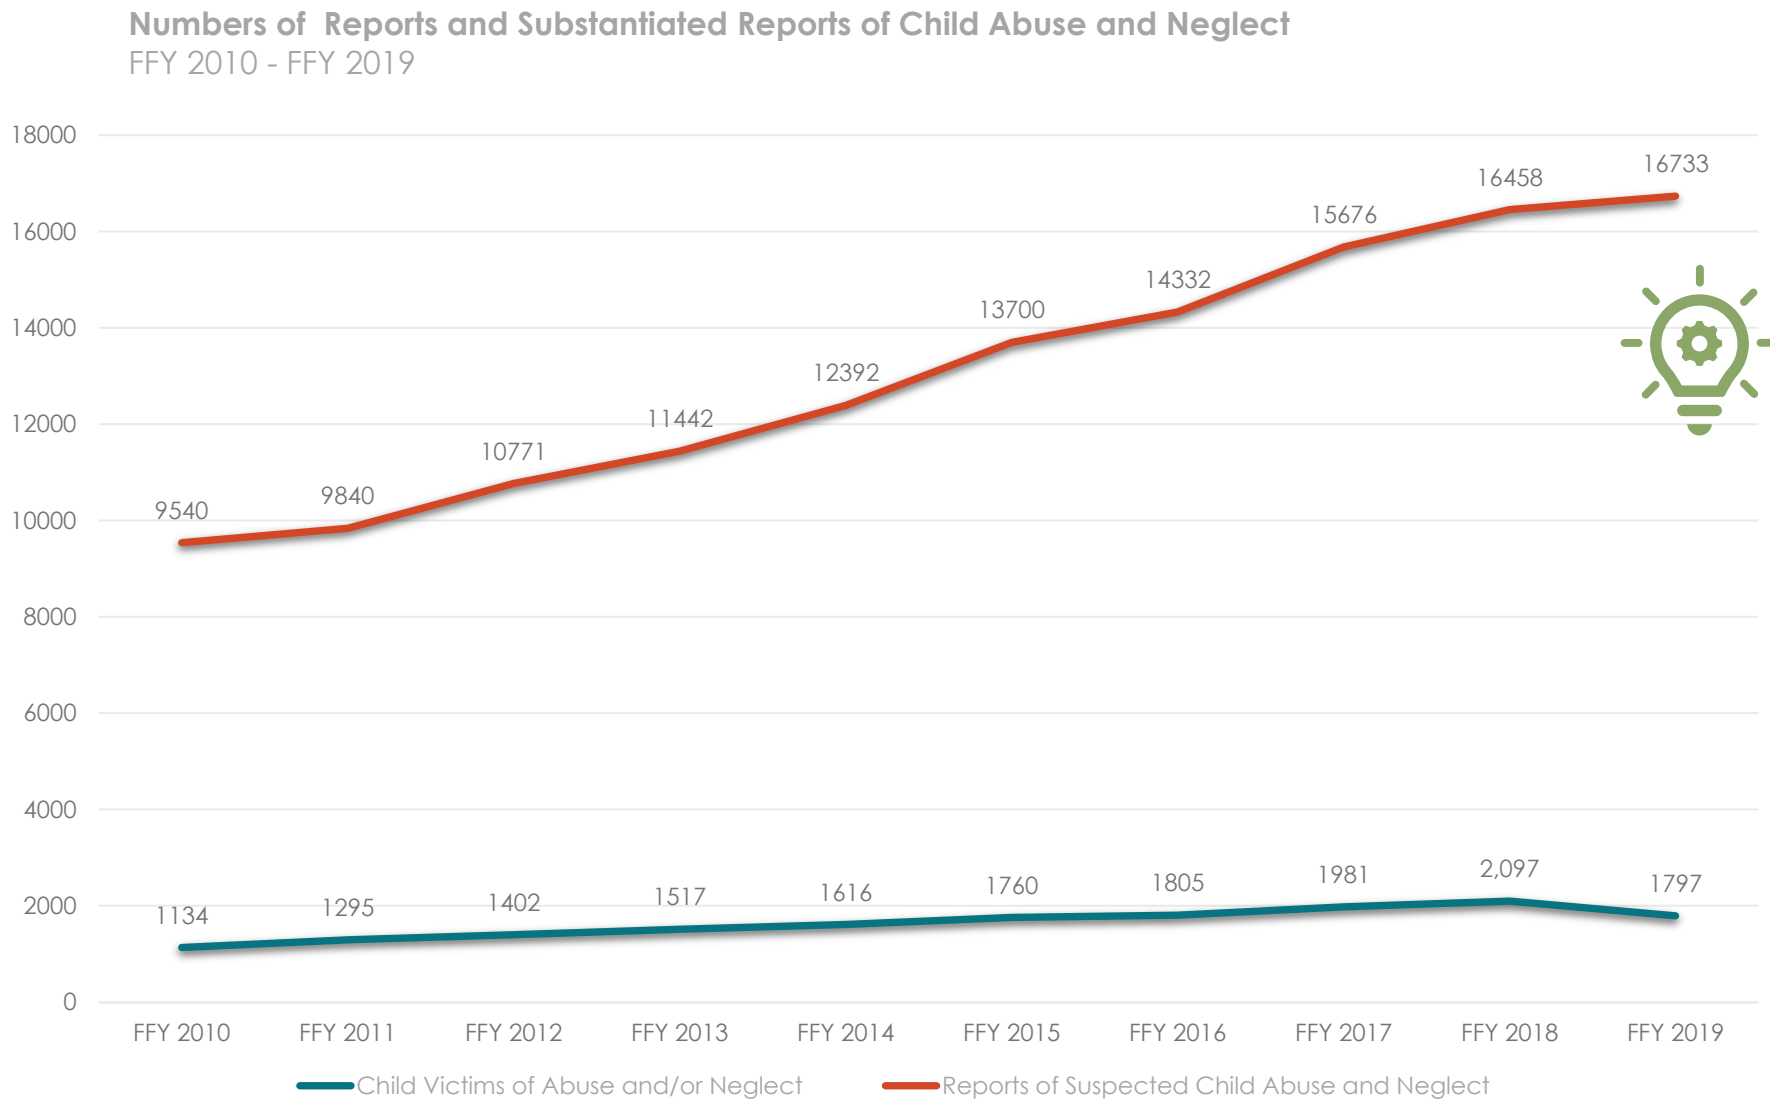
"Everyone would agree that children should not be exposed to abuse or neglect.

"The process of being removed from one's home and placed in foster care has consequences as well and can have negative effects that last a lifetime."



Substance abuse and unaddressed mental health needs are major de-stabilizing forces in families

Rethink child welfare

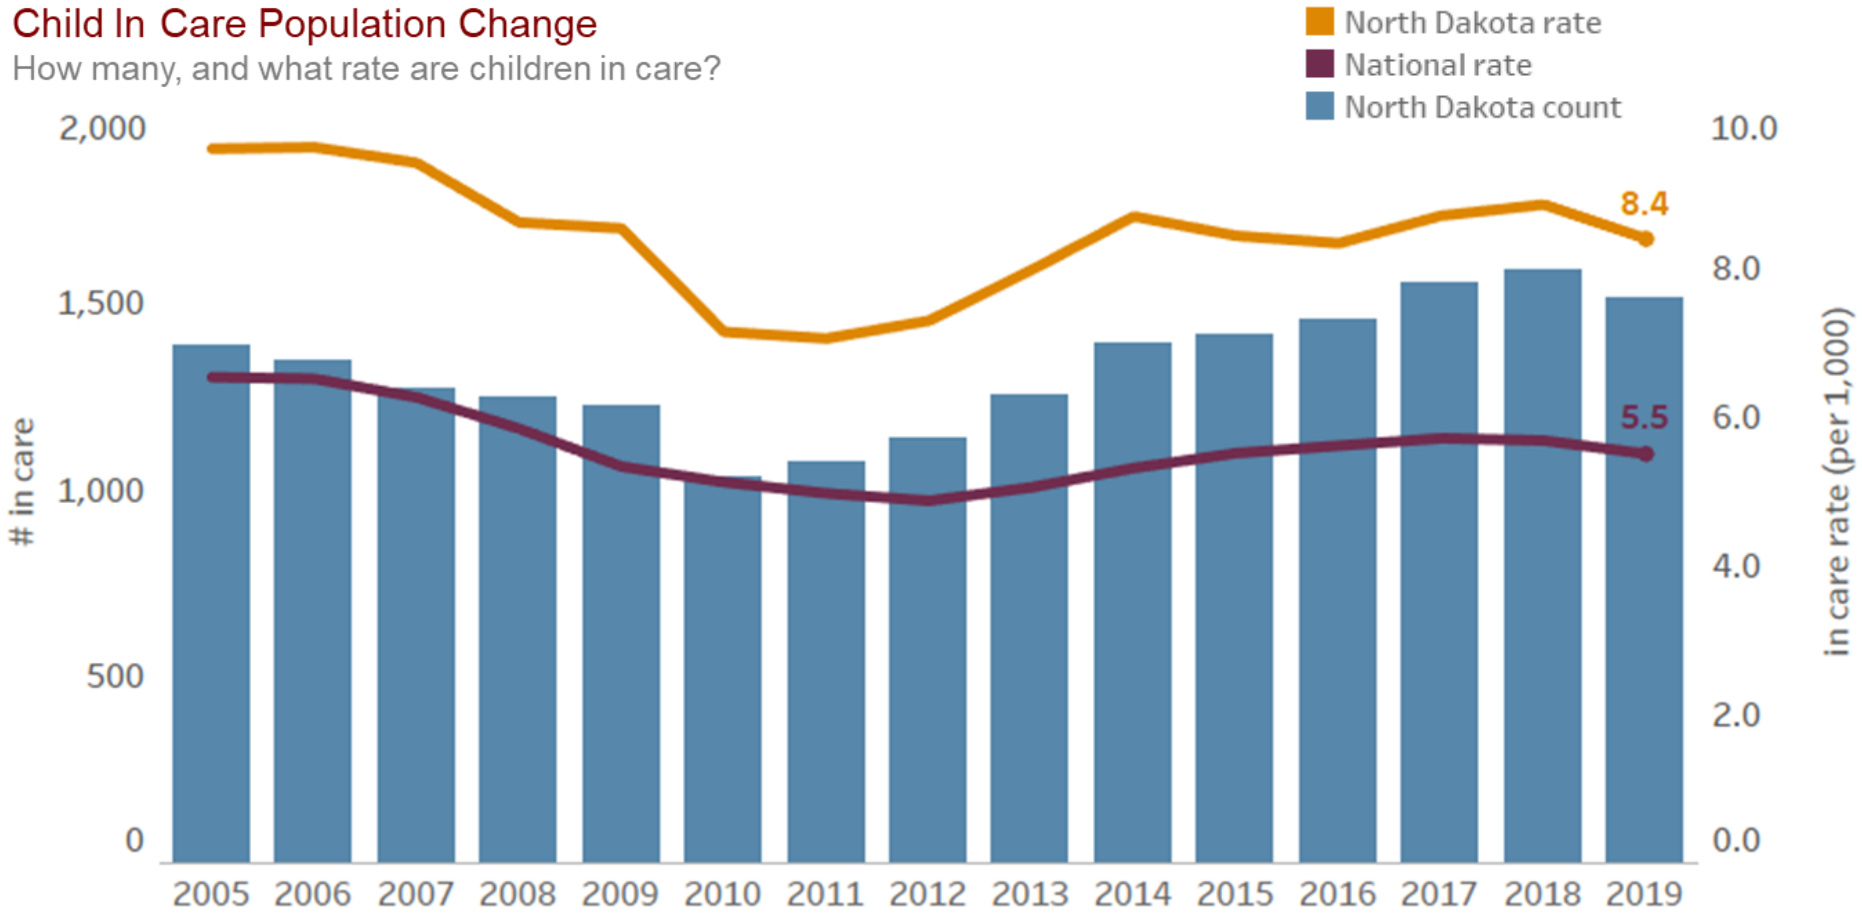


We need to connect behavioral health resources to families who are struggling while **doing everything we can to help them stay together safely.**

Parental Substance Abuse and Child Behavior are cited more often as reasons for removal in North Dakota than in the U.S.

Data source: FFY 2017 state-submitted AFCARS data. Denotes percent of children entering foster care for each removal reason; multiple reasons may be selected for a single child.

10-12 percent of child abuse/neglect calls are ultimately substantiated as abuse/neglect

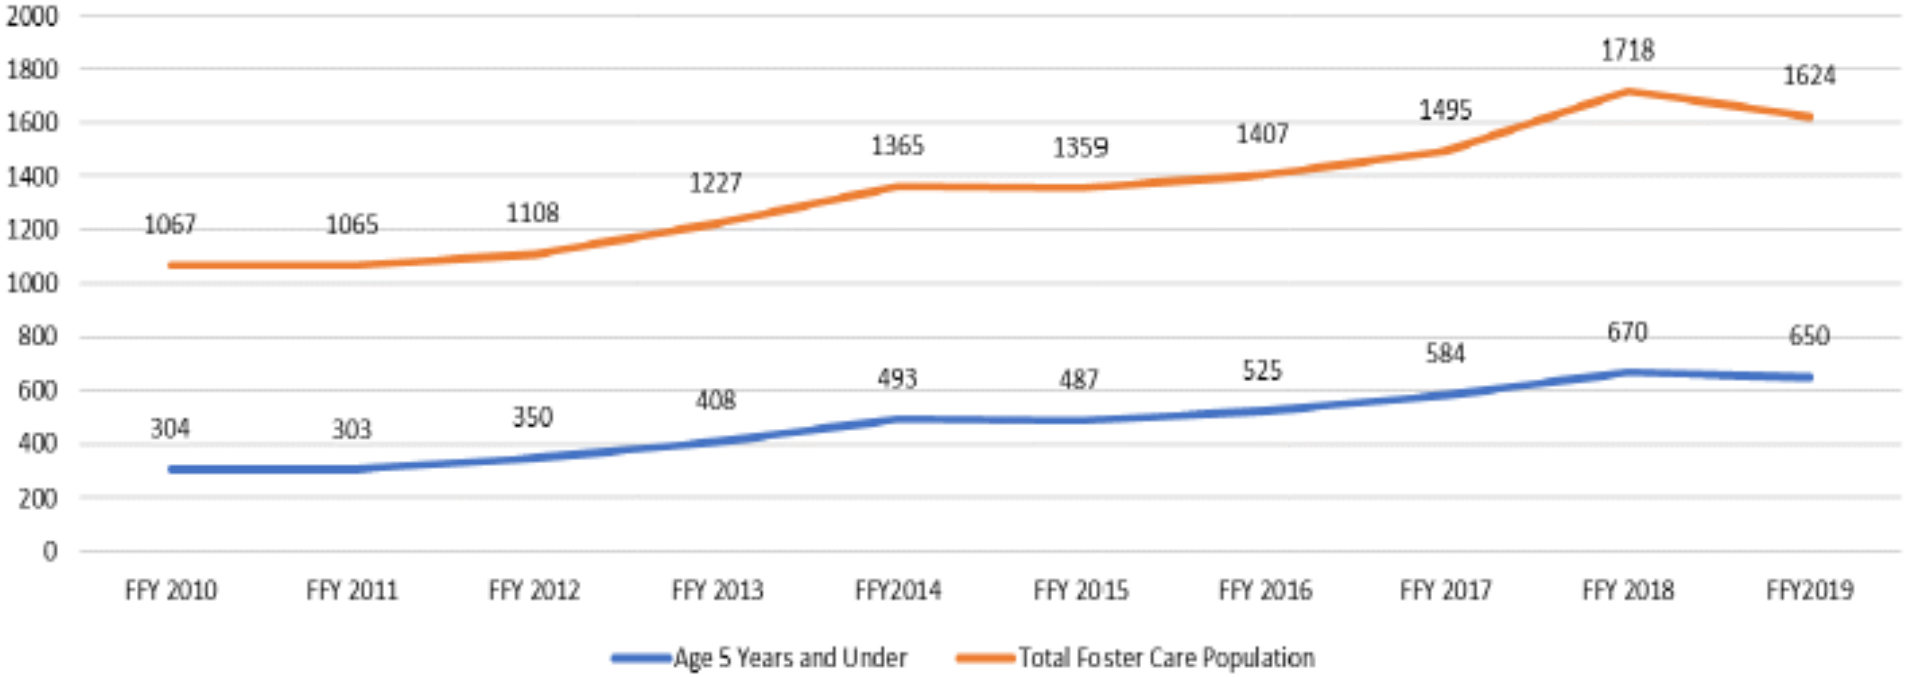


Rethink child welfare

People who call to report a suspicion of abuse or neglect are seeing something that causes them to be concerned about a child's (and their family's) well-being.

We need a different response for those often valid concerns.

The rates at which children are placed in foster care is 52 percent higher in North Dakota than in the U.S. overall



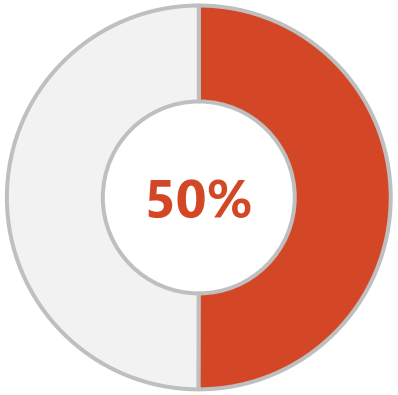
Rethink child welfare

We need to shift resources from removal to family strengthening and preservation.

The percentage of children in foster care under age 5 has risen steadily from 28% to 40% since 2010

The number of children in foster care in ND has risen by 52% over the last 10 years

ND Foster Care census and those age 54 years and under, FFY 2010-2019



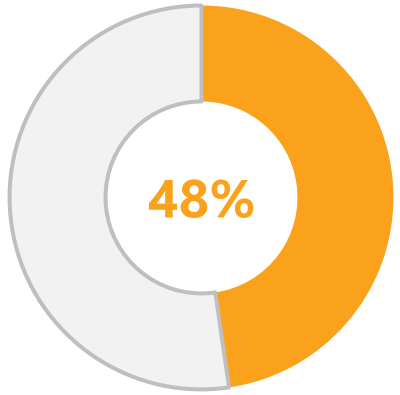
Rethink child welfare

Early interventions with young families are they key to reducing foster care placement for the youngest children.

CHILDREN & FAMILY SERVICES
Foster Care in ND – 2020 Snapshot

796

1 in 2 age 0-7



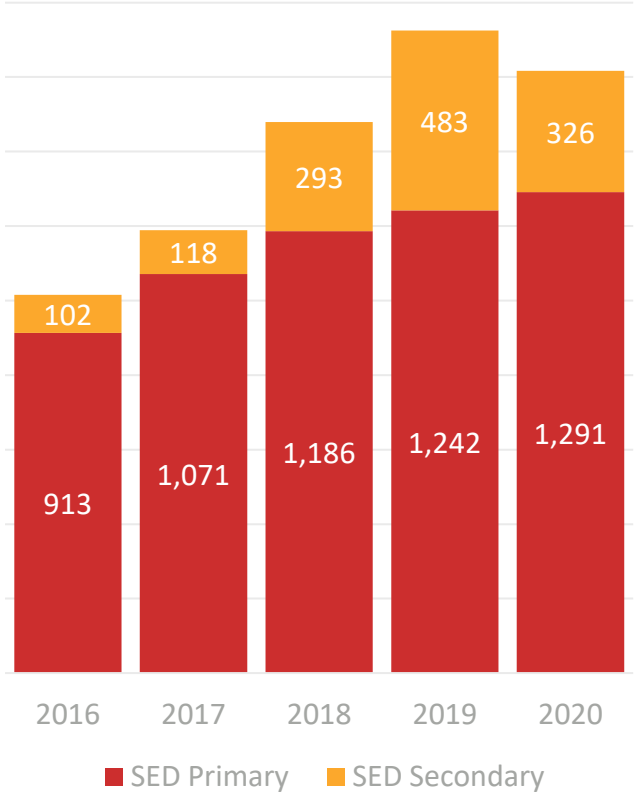
Half of the 1,591 children in foster care in North Dakota are age 7 or younger. (2020)

34%

Intense level of care

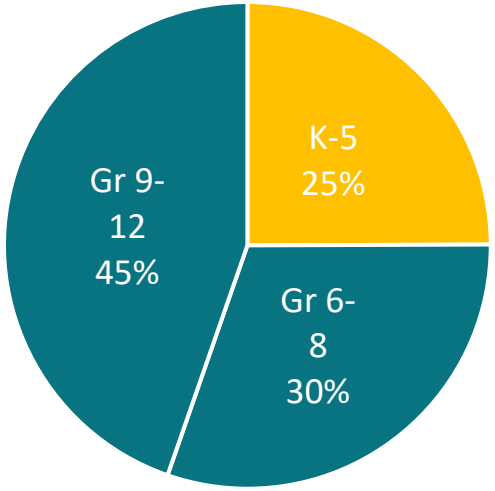
Of the 189 kids receiving therapeutic foster care in 2020, 65 (34%) were younger than 7 years old.

759



5x more likely

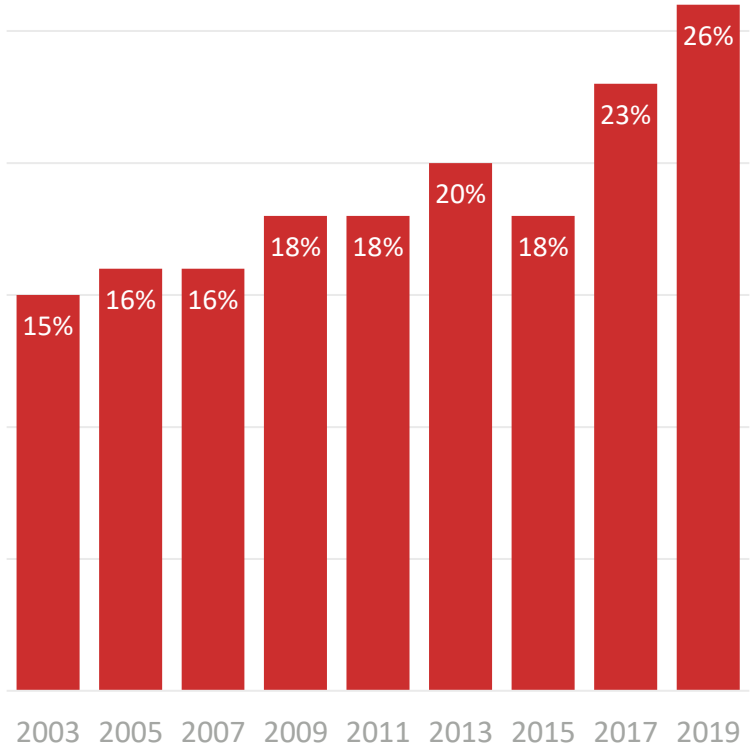
Native American children make up 48% of the total number of children in foster care in ND (759 of 1,591).



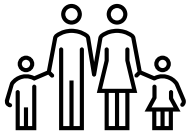
Native American children make up 8.7% of kids under age 18 in ND.

Trends in services for emotional disturbance, age of incidents and rates of chronic absence point to increasing behavioral health needs for kids and families

Students receiving services for "emotional disturbance" in Grades K-12



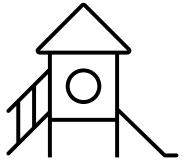
"Incidents" in school setting by grade level (2019-20 school year)



Rethink child welfare

Supporting behavioral health needs in families will can prevent disruptions at home and in school.

4th graders counted as chronically absent by academic year



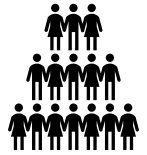
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

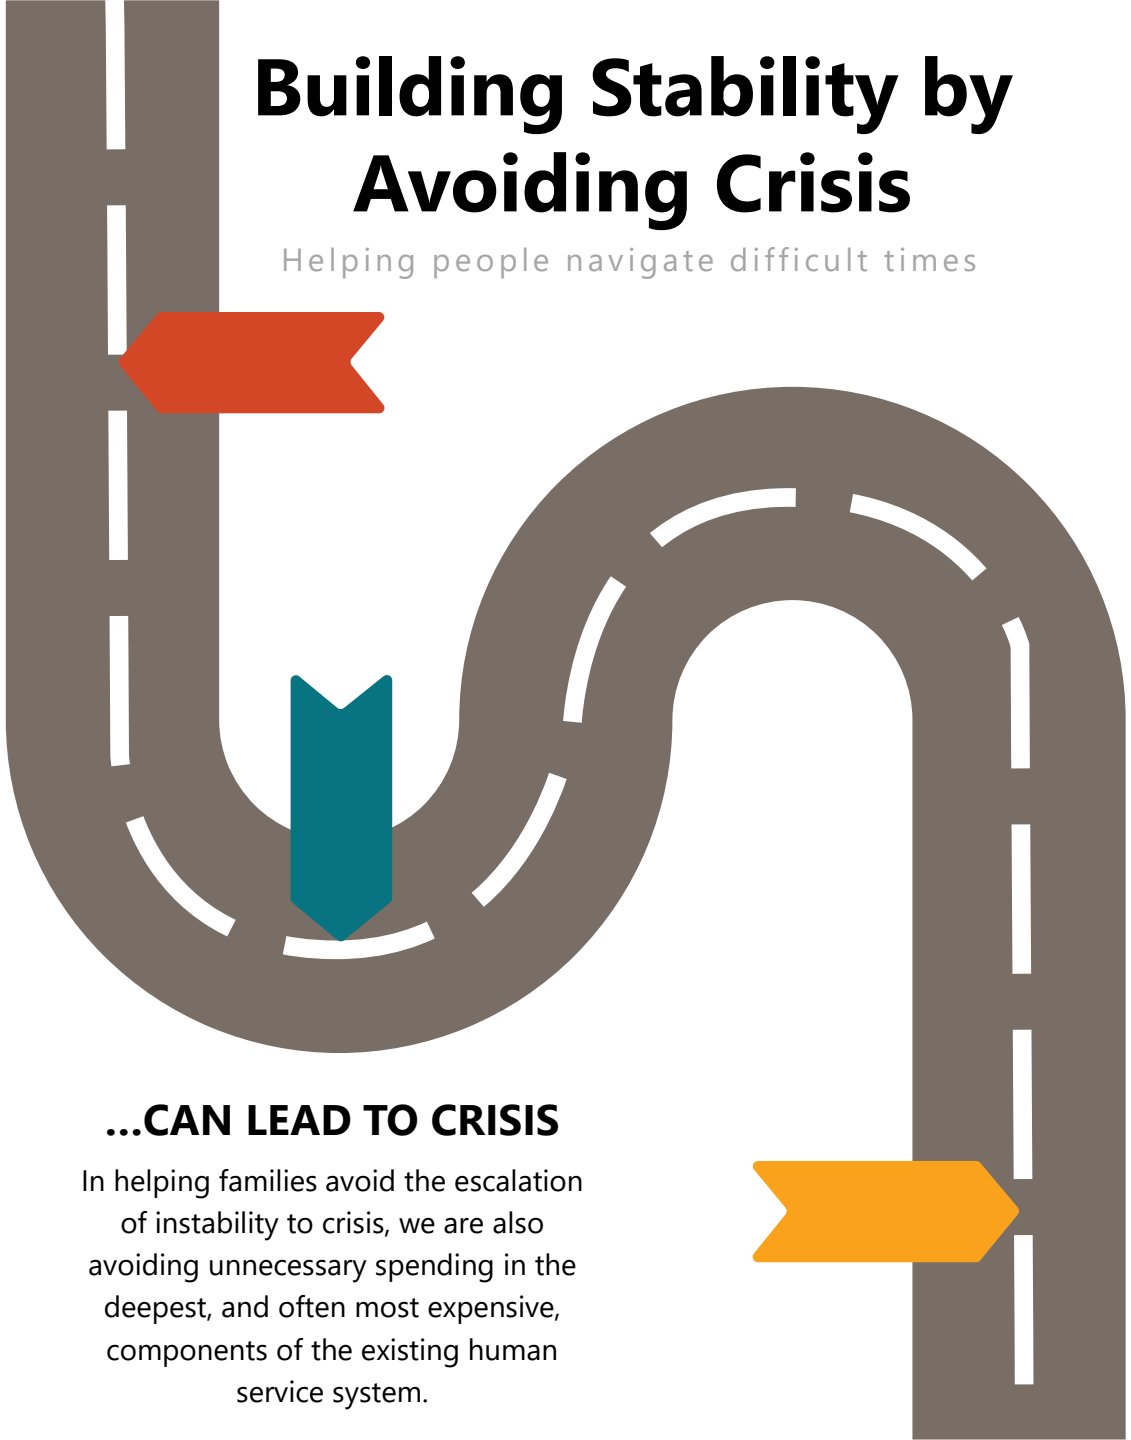
Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being



Economic Health | Behavioral Health | Physical Health

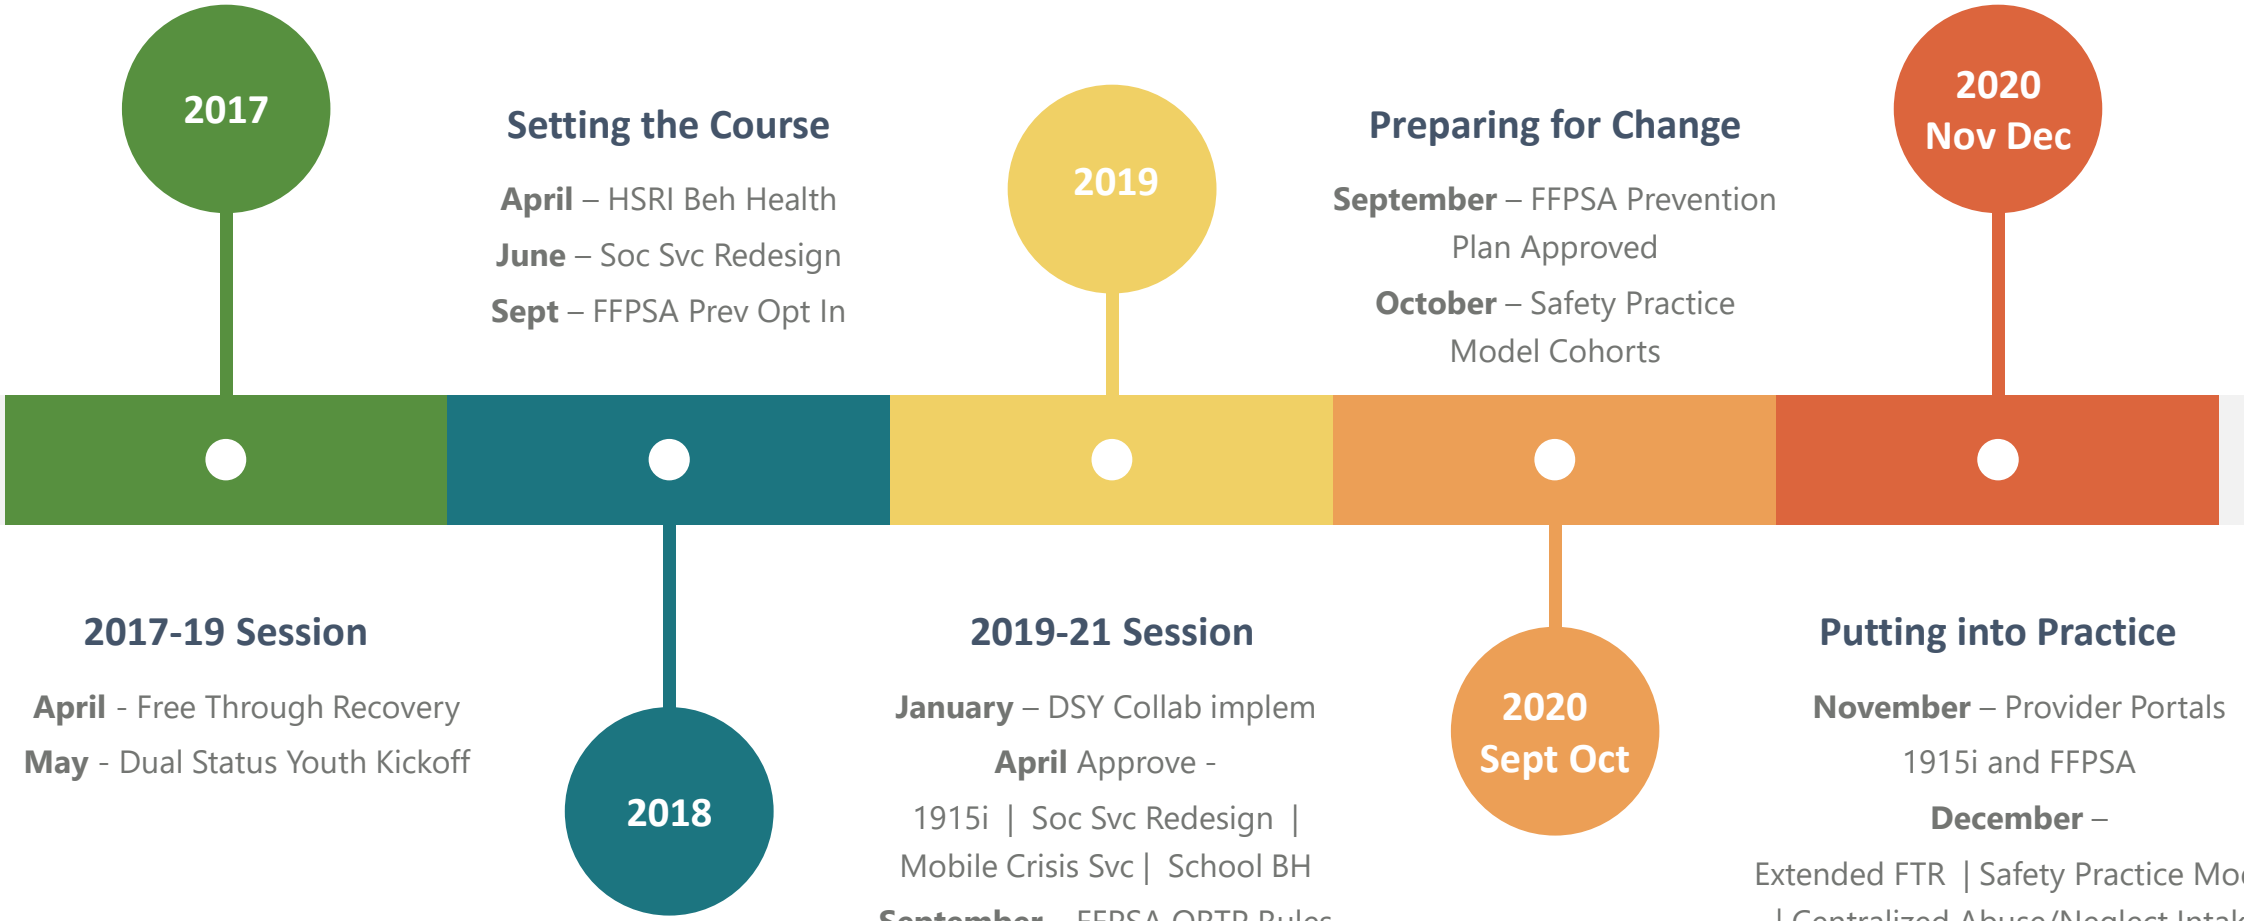
Building Stability by Avoiding Crisis

Helping people navigate difficult times

DISRUPTION

When families experience disruption, their ability to be a fully engaged, productive member of the community and the workforce is compromised.

...CAN LEAD TO CRISIS



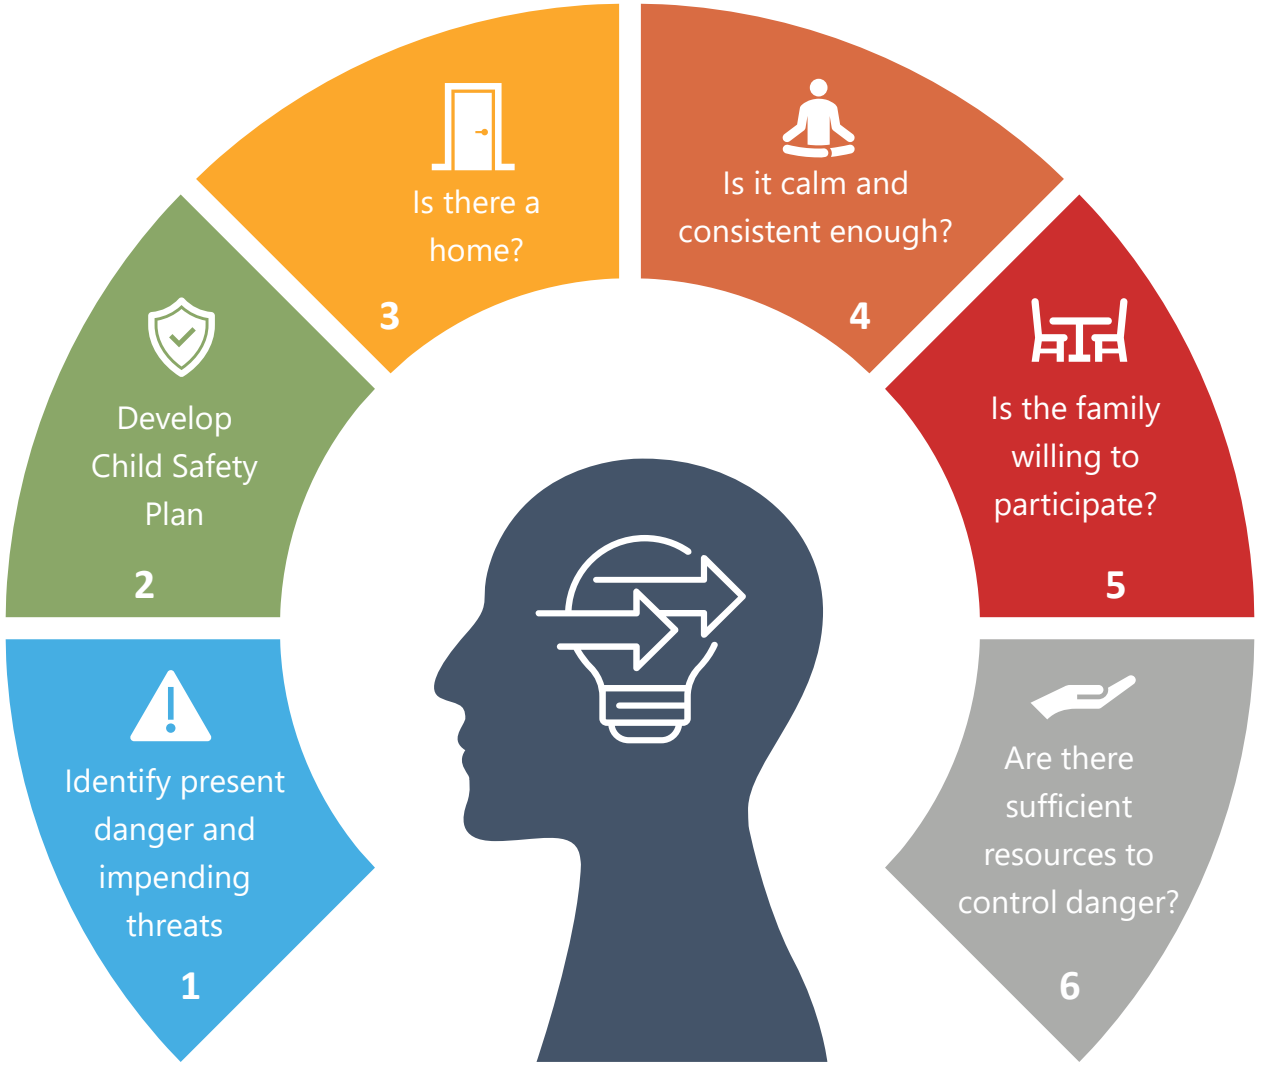
In helping families avoid the escalation of instability to crisis, we are also avoiding unnecessary spending in the deepest, and often most expensive, components of the existing human service system.

SERVICES SUPPORT STABILITY

Intervening early will both save money and strengthen families. It will allow us to reserve deep end services for the times when they are truly needed, and help people avoid deepening their journey into crisis by diverting from institutions, keeping families together, and helping and sure that people have a place to call home.

Our Journey Toward Building Stronger Families

Redefining Child Safety and Wellbeing through a Two-Gen Lens



Understanding Child Safety

When can a child remain safely at home and when is removal necessary

Safety Plan Determination looks at 3, 4, 5, and 6

If ALL YES
Child can remain in home with necessary supports in place

If any are NO
Child safety is not assured, so removal is necessary

Safety ≠ A Place

Safe Child

A child is safe if:

- ✓ No threats of danger exists within the family, **or**
- ✓ The parent/caregivers possess sufficient protective capacity to manage any threats, **or**
- ✓ The child is not vulnerable to the existing danger.

ND Safety Framework Practice Model Resource Guide, November 2020

Vulnerability

Refers to a child's capacity for self-protection. Factors include assessment of several aspects of a child's capacity:

- ✓ Age
- ✓ Physical or Mental Disability
- ✓ Provocative Behaviors
- ✓ Powerless, defenseless, non-assertive
- ✓ Illness
- ✓ Invisible to other adults

Safety is an issue only when there is a vulnerable child in a family.

ND Safety Framework Practice Model Resource Guide, November 2020

"North Dakota's Child Welfare System is focusing on efforts to **ensure availability and access** to a broad, flexible array of **effective community-based services and supports**

for children and their families

that address their emotional, social, educational and physical needs,

including traditional and nontraditional services as well as natural and informal supports."

ND 2020-2024 Title IV-E Prevention Services and Programs Plan

Children considered a "Candidate for Foster Care"

Under 18 years of age	Significant interference or limitations of the child's functioning in home, school or community	Child is pregnant or parenting a child(ren)	Siblings in foster care
Inadequate supervision based on family and youth circumstances	Currently involved in 2 or more community services or agencies	DSM diagnosis for emotional, behavioral, or mental health disorder	Child whose adoption or guardianship arrangement is at risk of disruption
Prior out of home placement	Reunification has occurred	Difficulties are interfering or limiting achievement or maintenance in 1 or more developmentally appropriate skills	Parent/custodian/guardian has limited capacity to meet educational, medical, safety or basic needs of child due to parental need*

Have access to

Evidence-based Prevention Services

In home parent skill-based programs

Mental health programs

Substance abuse prevention and treatment

*Parental inability to meet needs of child could be due to parent(s)' behavioral health, incarceration, physical or intellectual disability, debilitating or life-threatening medical needs, homelessness or substandard living conditions, verbalization of no longer wanting their child, or substance exposed newborns.

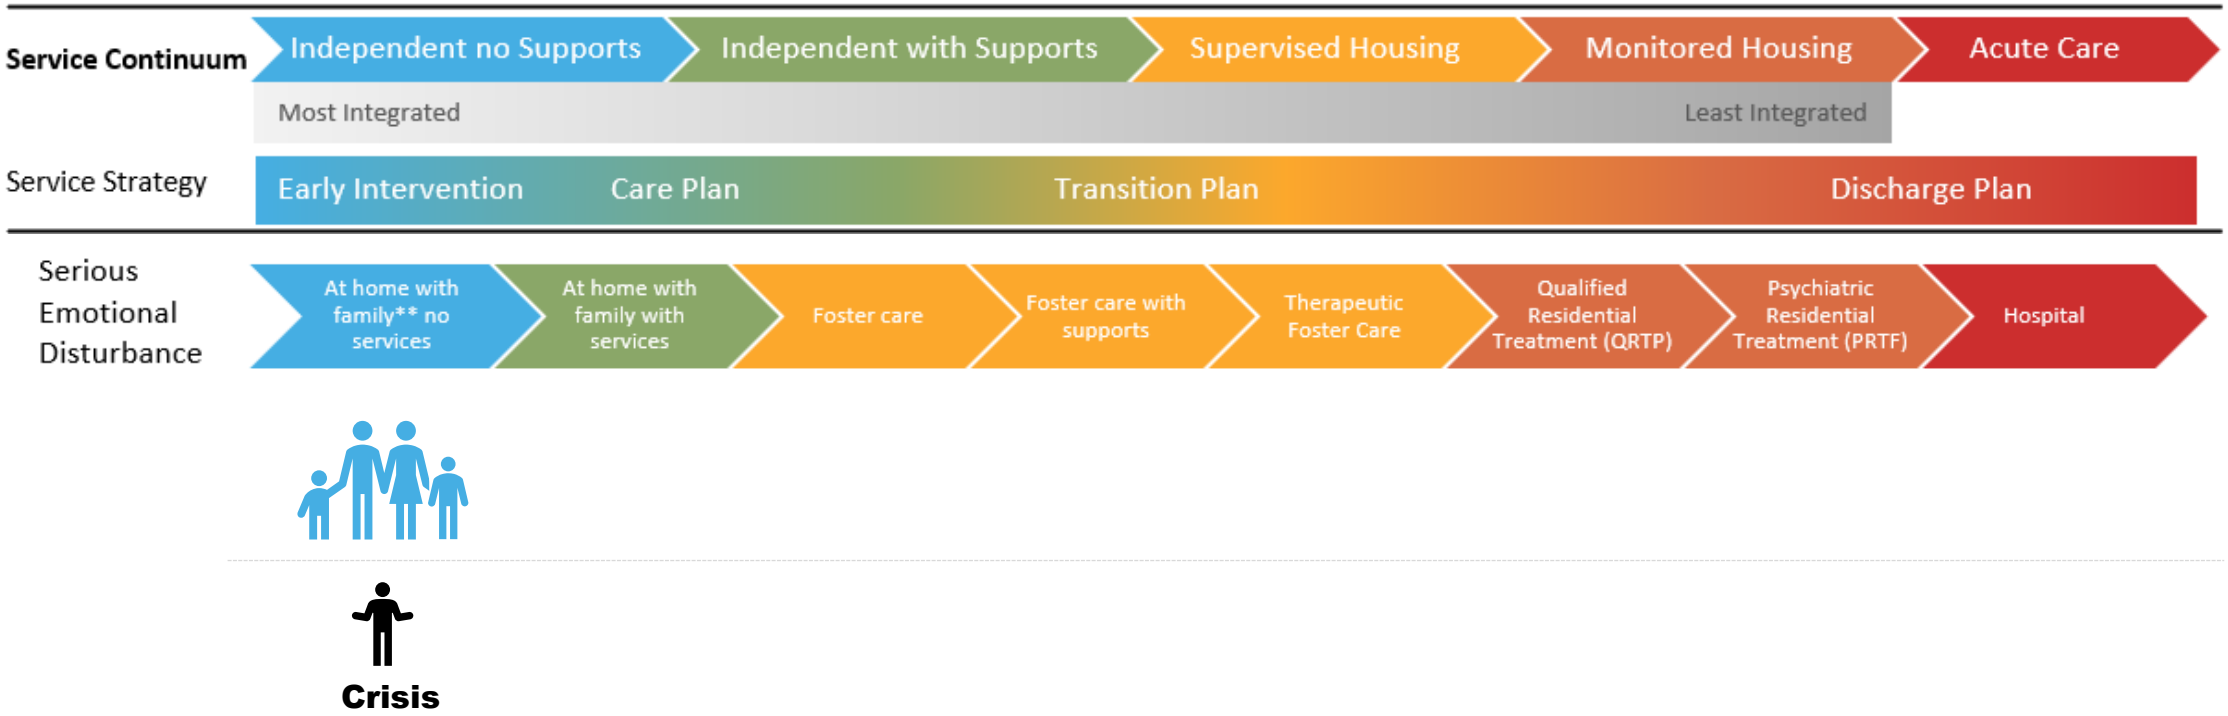
Meet Jayce.

Meet Jayce's family.

Age 9

Mom noticed Jayce wasn't himself. His teachers noticed too.

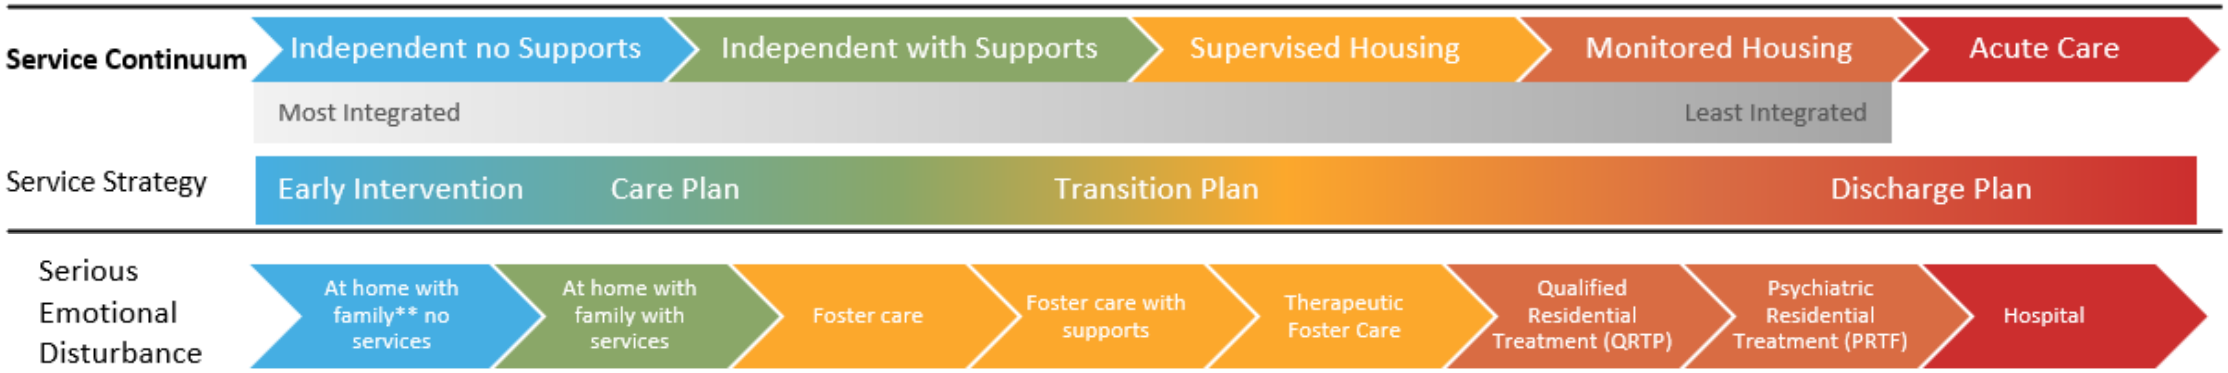
Acting out in school. Aggressive. Defiant. Sullen. Tipped over a desk in the classroom.



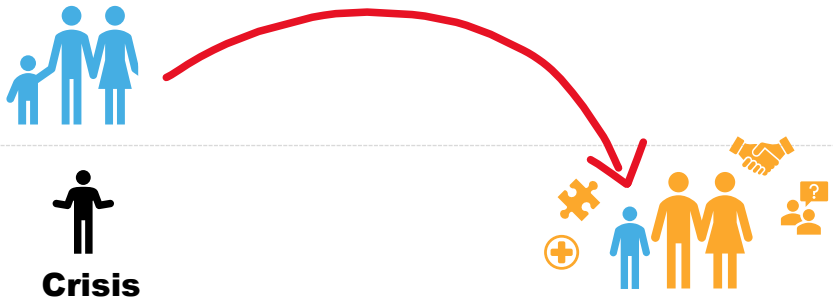
He lives at home with his mom, dad and little brother.

Jayce's school called in an abuse/neglect report.

- Mom, dad and brother (age 4)
- Both mom and dad work full time. Mom is a cashier. Dad works for a farmer.
- They don't qualify for Medicaid. They have a basic insurance package through the exchange.
- Tensions at home are escalating. Jayce's dad is becoming increasingly frustrated and has turned to alcohol in an unhealthy way to cope with Jayce's behavior.



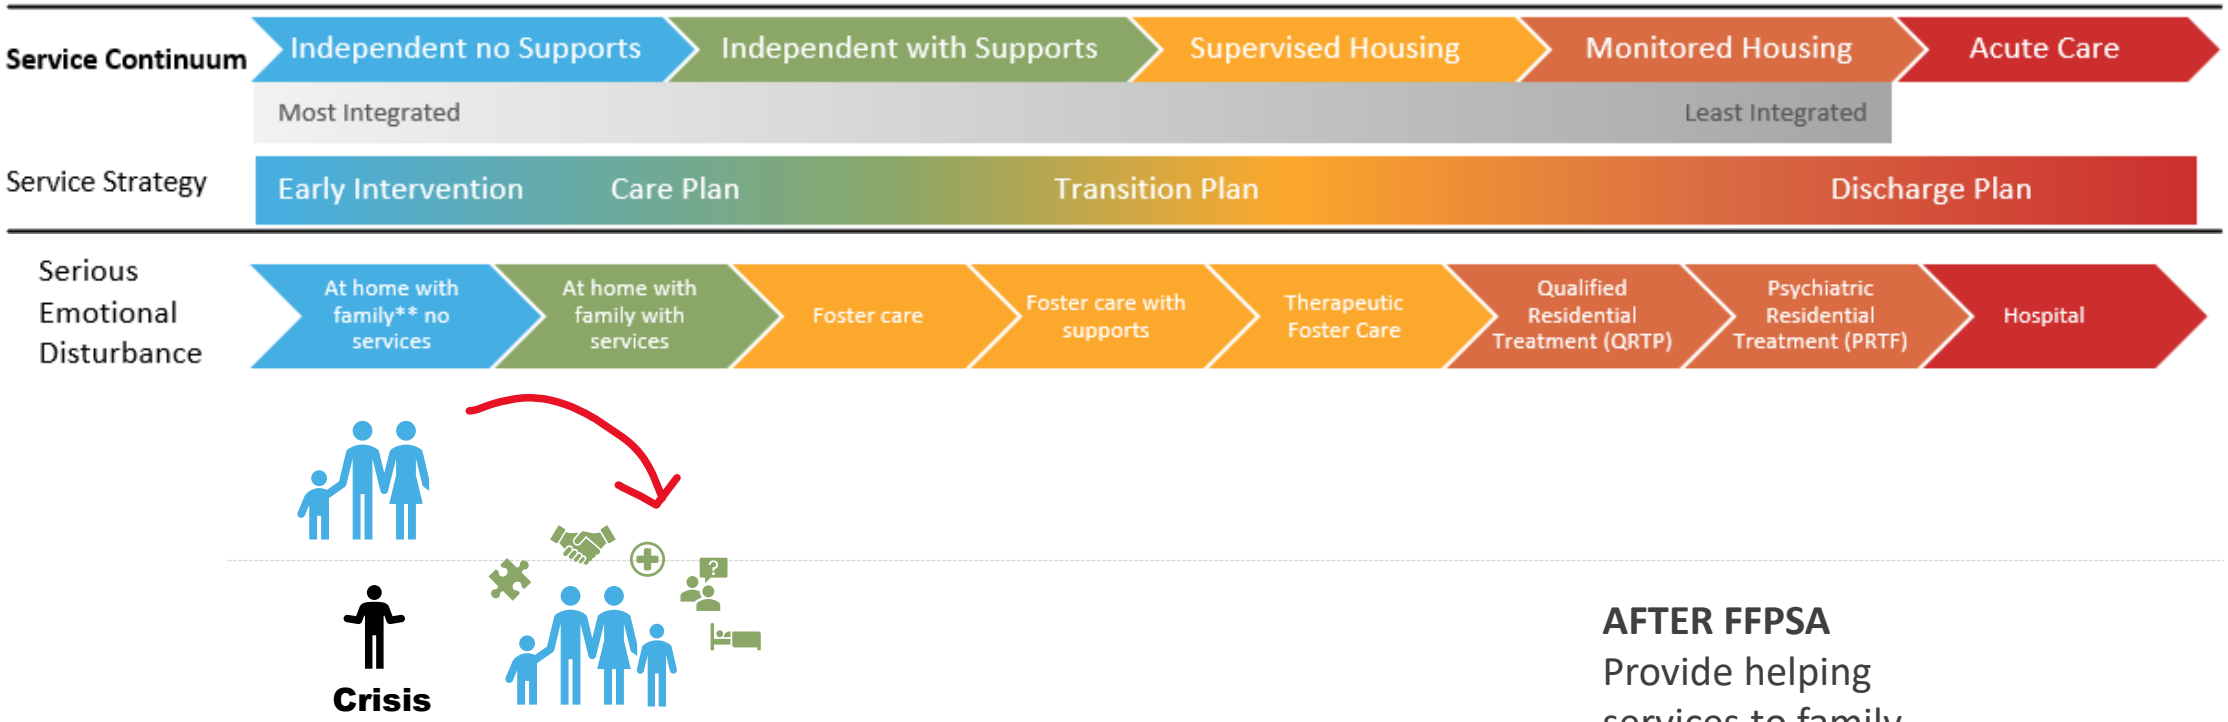
What does it mean to serve a family together rather than apart?



Understanding how systems can help children and families avoid crisis-level disruptions

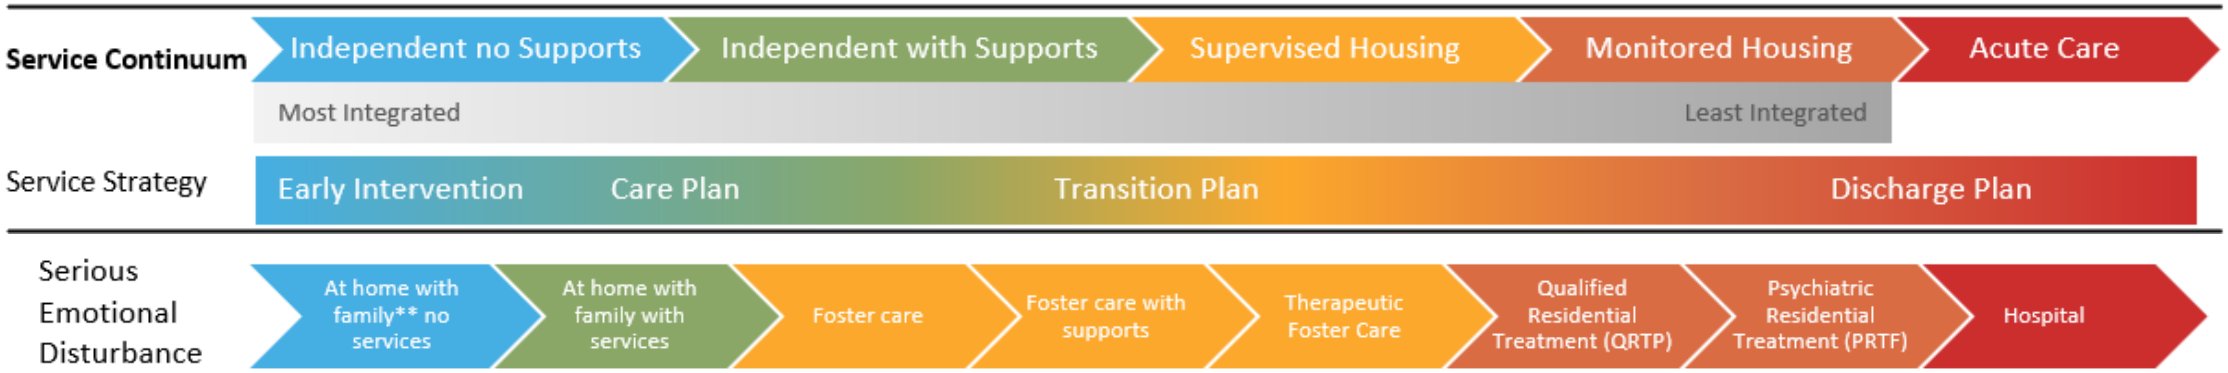
What does it mean to serve a family together rather than apart?

Understanding how systems can help children and families avoid crisis-level disruptions



BEFORE FFPSA
Provide helping services to child while in foster care using federal IV-E funds

What does it mean to serve a family together rather than apart?



Understanding how systems can help children and families avoid crisis-level disruptions

AFTER FFPSA
Provide helping services to family <u>while they are together</u>, using federal IV-E funds

What does it mean to serve a family together rather than apart?

Understanding how systems can help children and families avoid crisis-level disruptions

ALTERNATE - AFTER FFPSA

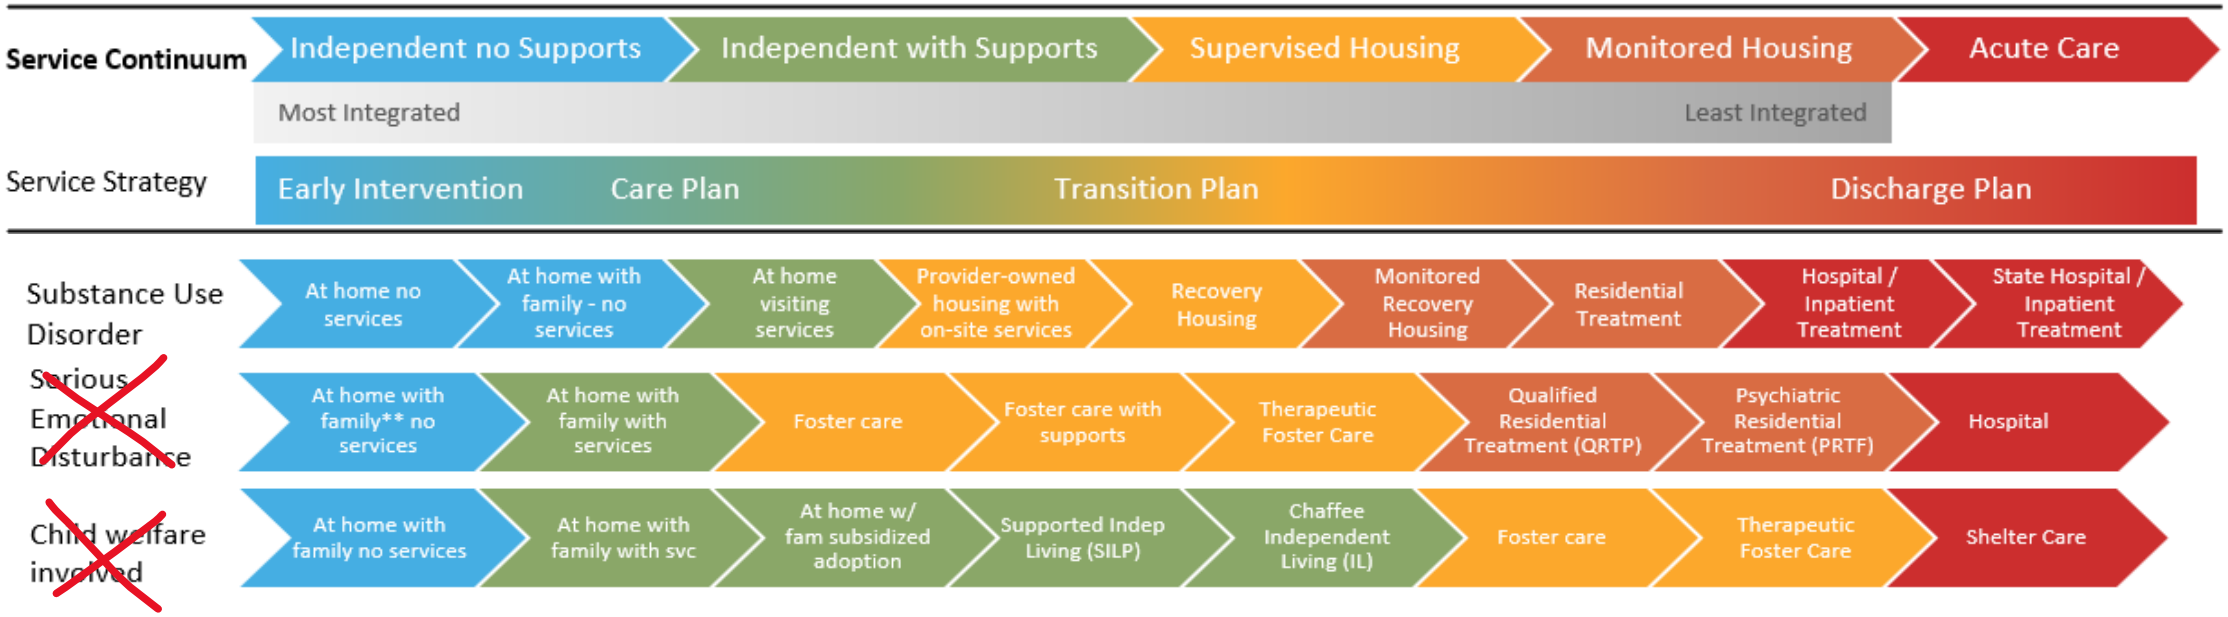
Provide helping services to child while in foster care AND to family using federal IV-E funds, shortening the time the family is apart

Meet Kevin, Brenda & Brandon

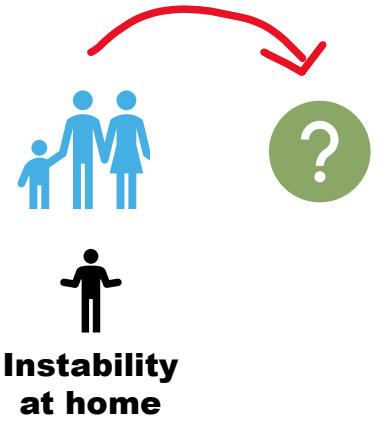
Kevin (43) and Brenda (42) live in a small home in Rolla with their son Brandon (6)

Kevin works for a local builder full time. Brenda is a paraprofessional at the elementary school.

Kevin suffers from depression and has been drinking a lot. Brenda has been diagnosed with an anxiety disorder.



Brandon attends first grade. The year started off well but he's been more withdrawn in class as the year has gone on.

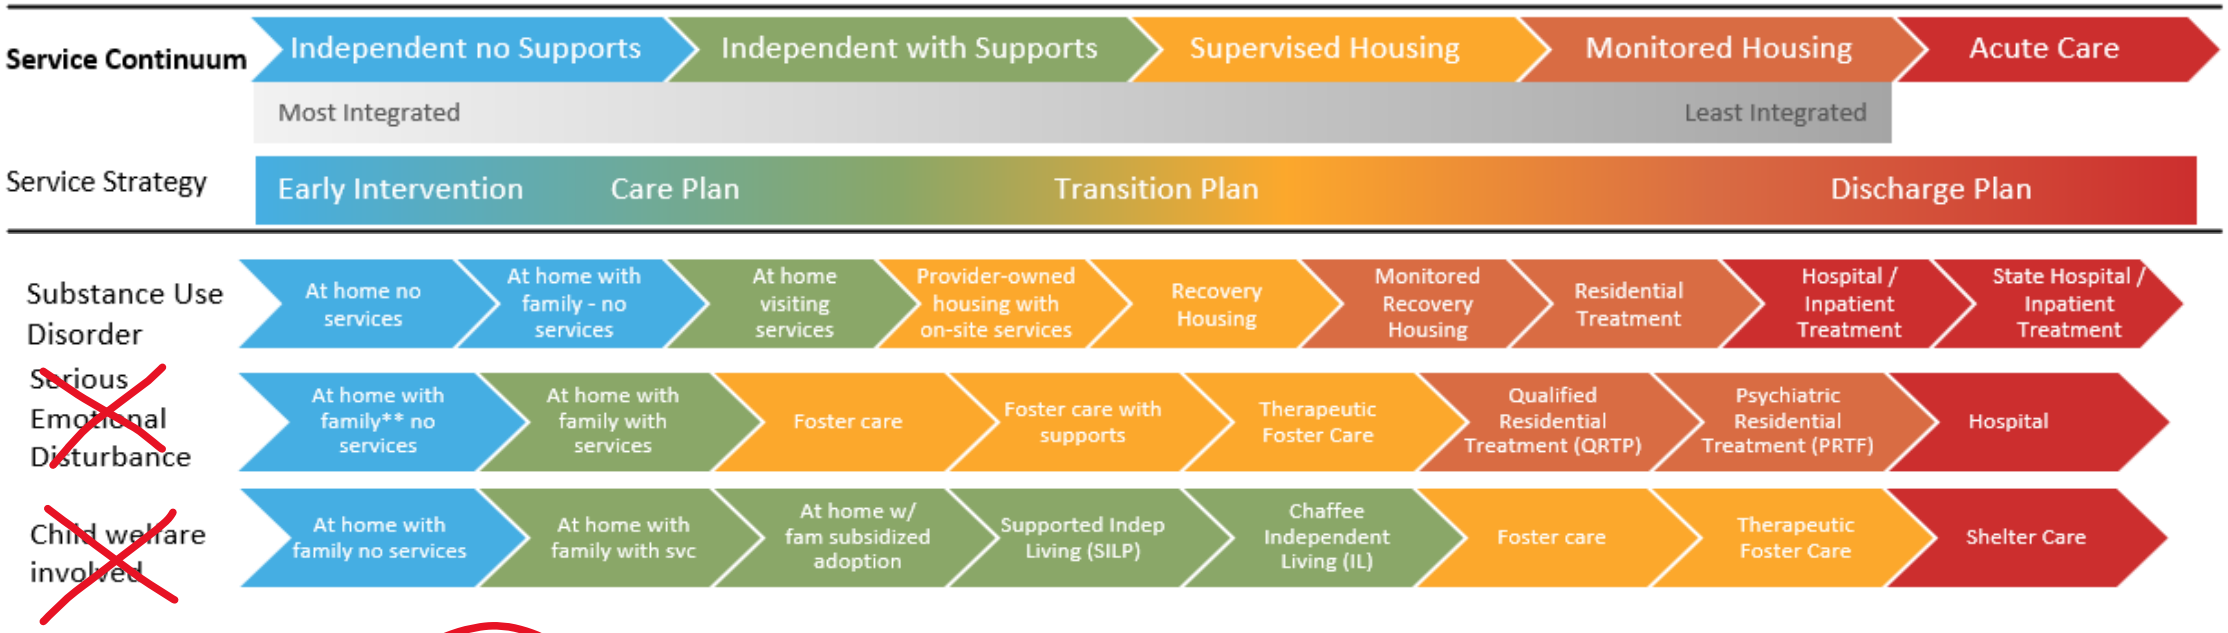


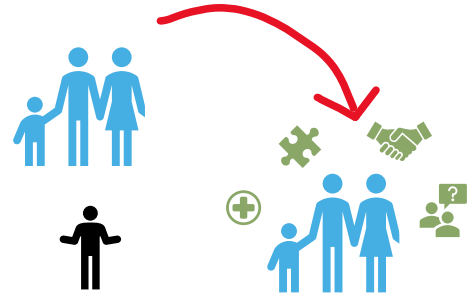
When they're getting hours at work, they can usually make ends meet. Money has been tight lately.

Tensions at home are rising.

What does it mean to serve a family together rather than apart?

Understanding how systems can help children and families avoid crisis-level disruptions





BEFORE FFPSA

Parents could access mental health or substance abuse services through their **insurance** or their **own resources**; **no** intervention with child welfare (Title IV-E) **resources UNTIL** a report of **abuse or neglect** is filed

What does it mean to serve a family together rather than apart?

Understanding how systems can help children and families avoid crisis-level disruptions

Instability at home

AFTER FFPSA

Family can **access** mental health and substance abuse services for mom and dad **through Title IV-E**

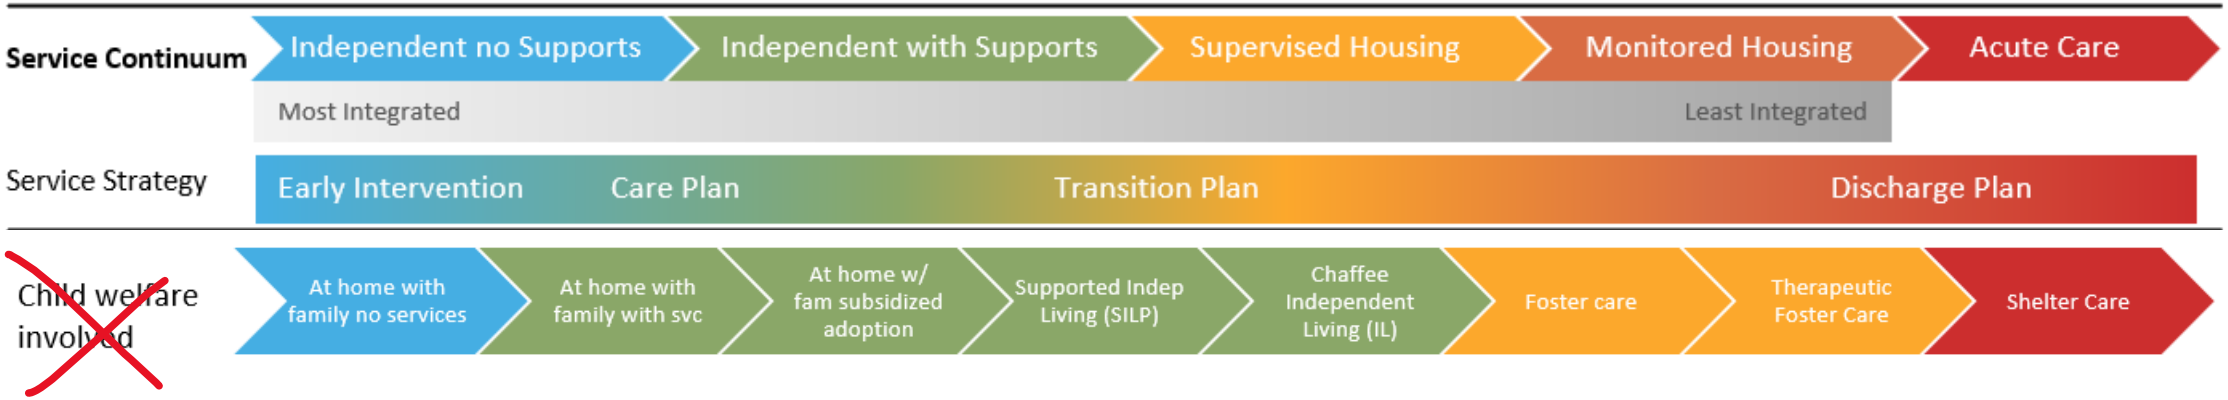
Why? Parents' mental health and substance abuse issues are causing instability in the home, which means the child could be a candidate for foster care if things escalate further

Meet Sarah & Leah

Sarah (19) and her daughter Leah (1) live in a small efficiency apartment in Grand Forks.

She works part-time as a front desk receptionist for a local hair salon.

She received a scholarship to take classes online at night to earn her associate degree in medical transcription.



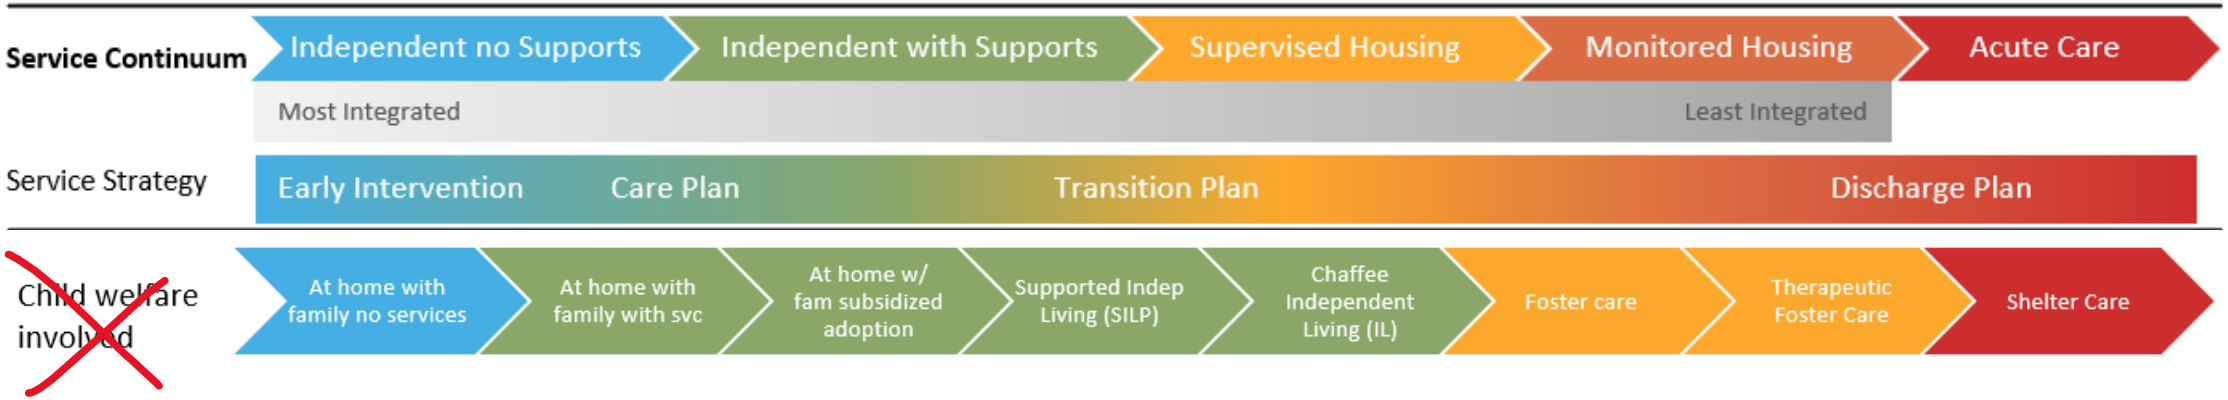
Sarah is almost always late with rent. Her hours at work went down. She hasn't been able to pay the last two months.

Sarah's neighbor watches Leah while she's at work.

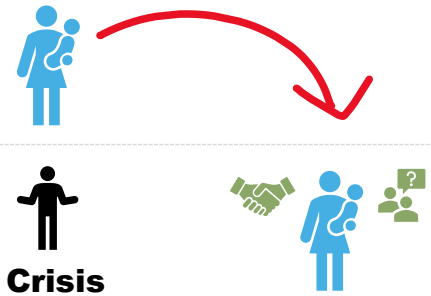
Sarah doesn't have a car. She receives SNAP and Leah has health coverage through CHIP. Sarah has coverage through Medicaid Expansion.

How can we help stabilize a family?

Understanding how systems can help children and families avoid crisis-level disruptions



Crisis



BEFORE FFPSA

Sarah would be eligible to participate in a parent skill-building program if a privately funded slot is available in her community.

How can we help stabilize a family?

Understanding how systems can help children and families avoid crisis-level disruptions

AFTER FFPSA

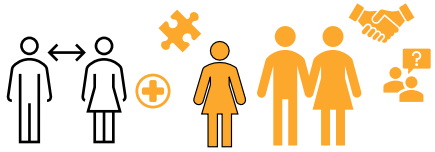
Because Sarah is at risk of losing her housing, she would be eligible to receive parent skill-building services from a IV-E funded provider.

Meet Taylor.

Taylor is 15.
She lives with a foster family.
She has been in the custody of a Human Service Zone for 15 months.

Taylor's behavior has been erratic and risky. She is drinking, smoking marijuana, has run away from school and home, and has been cited by the police 3 times.

Taylor has been hospitalized twice in the last 3 months for suicidal ideation.



She's not doing well at school or at home.

Her guardian requested an emergency placement at a Qualified Residential Treatment Program (QRTP).

What does it mean to deliver services closer to home?

Understanding how systems can help children and families avoid crisis-level disruptions

Service Continuum	Independent no Supports	Independent with Supports	Supervised Housing	Monitored Housing	Acute Care			
	Most Integrated				Least Integrated			
Service Strategy	Early Intervention	Care Plan	Transition Plan			Discharge Plan		
Serious Emotional Disturbance	At home with family** no services	At home with family with services	Foster care	Foster care with supports	Therapeutic Foster Care	Qualified Residential Treatment (QRTP)	Psychiatric Residential Treatment (PRTF)	Hospital

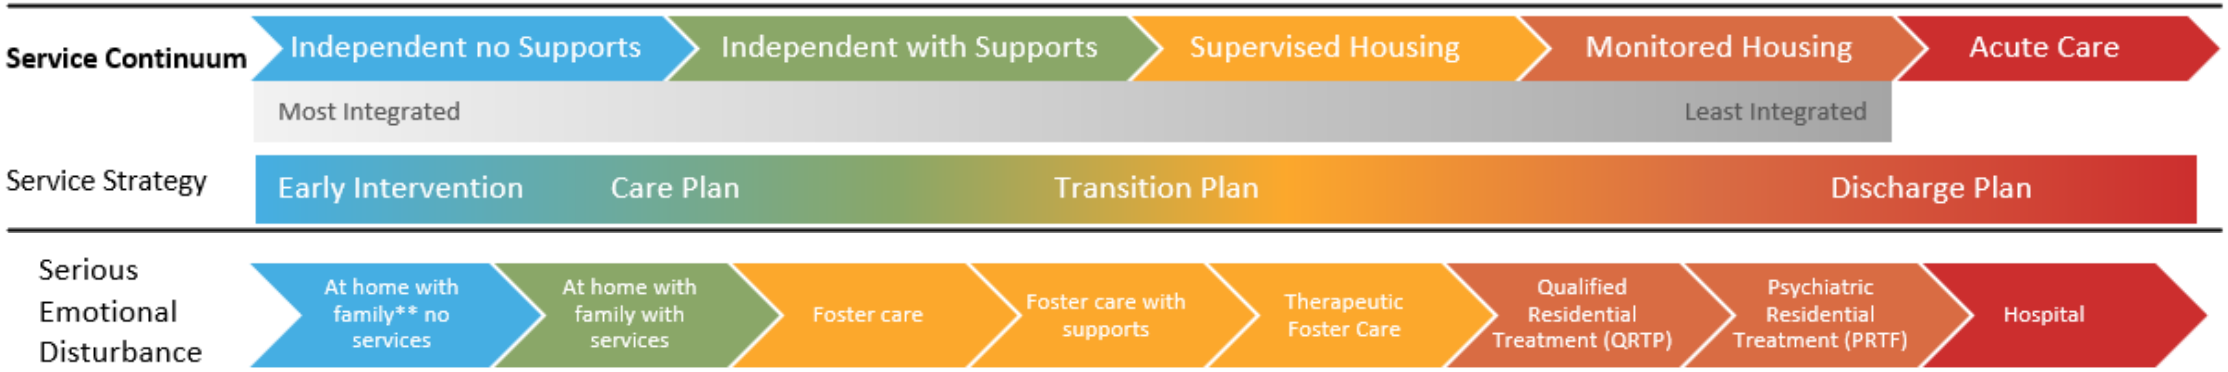
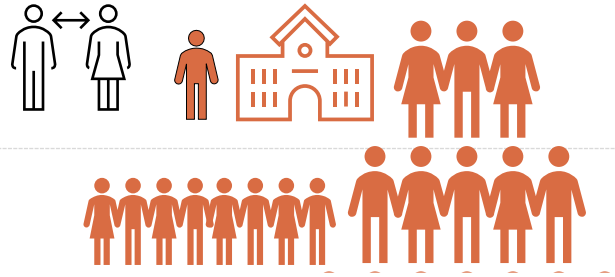
PERMANENCY

Taylor's case manager does a family search. Her aunt steps in and provides kin care. They pursue formal guardianship through the courts and Taylor moves out of foster care and out of "systems" involvement. If they need help to get through tough times, they will still be eligible under FFPSA.

Meet Samuel.



Samuel is 13.



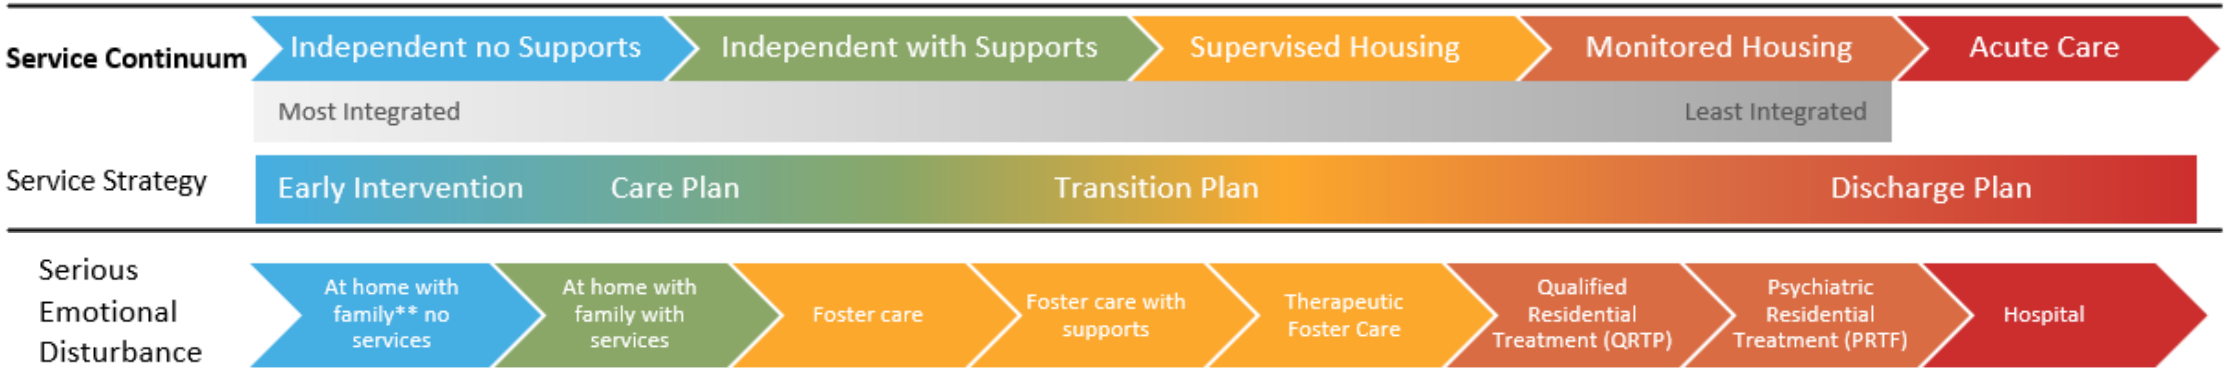
Samuel was removed from his parental home because of sexual abuse and was placed in a QRTP as an emergency placement.

He is legally in the custody of the Human Service Zone.

What does it mean to serve a family together rather than apart?

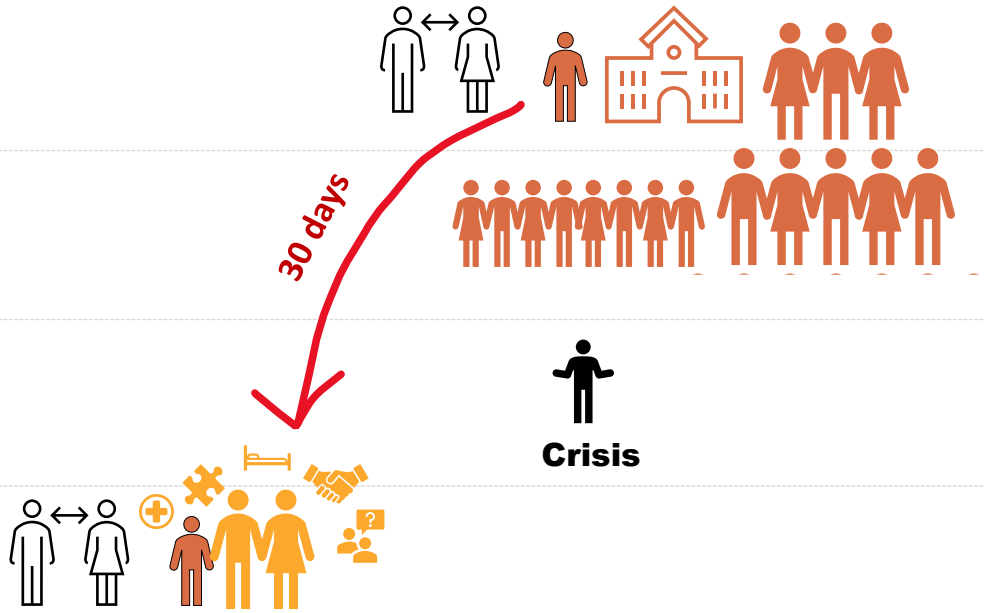
Understanding how systems can help children and families avoid crisis-level disruptions

BEFORE FFPSA



Samuel's emergency placement at the QRTP would end when the QRTP indicated that treatment was complete, at which point he would be sent to a foster home identified by the custodian.

Crisis

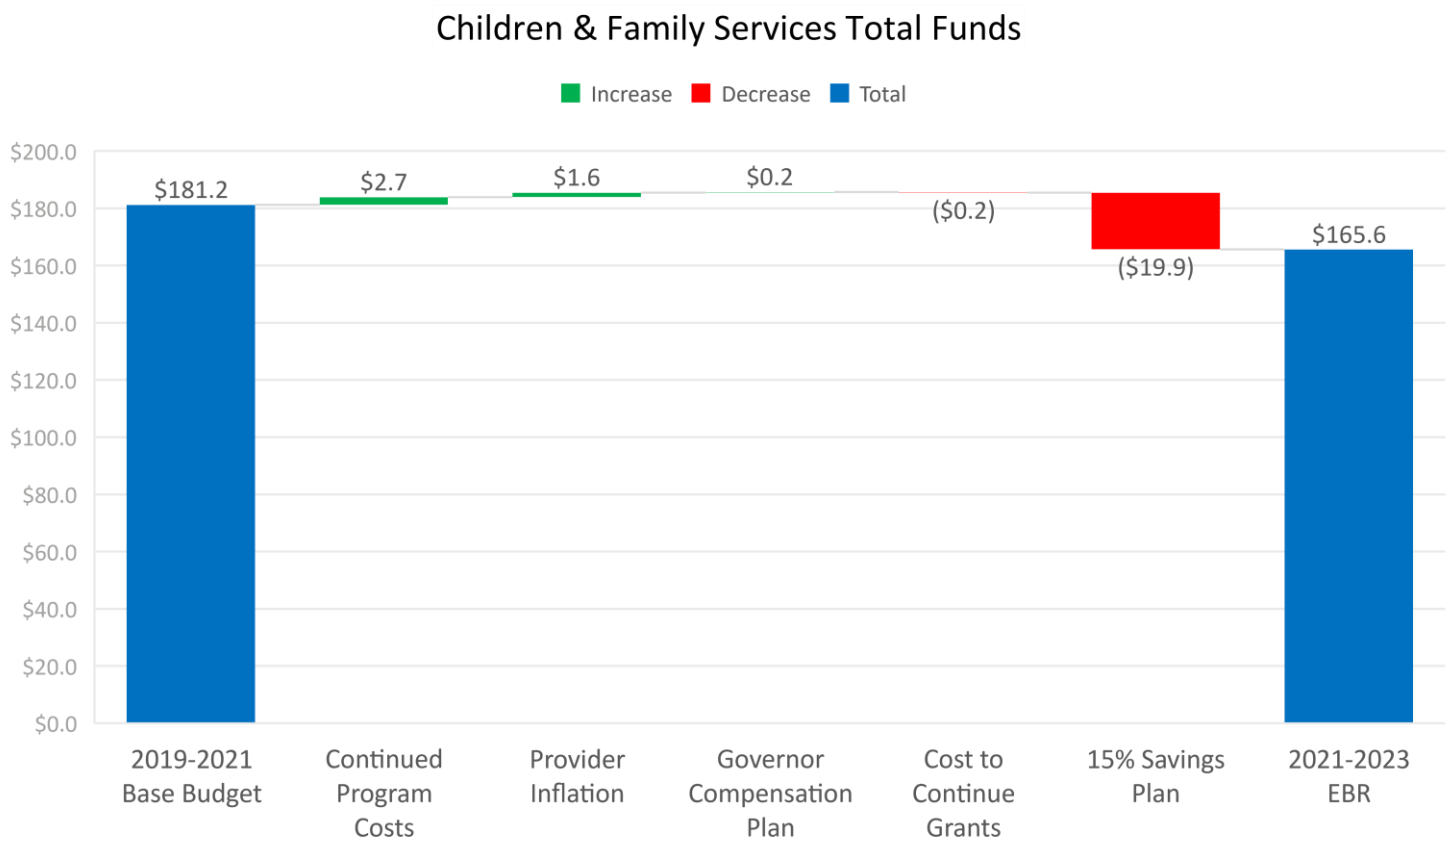


What does it mean to serve a family together rather than apart?

Understanding how systems can help children and families avoid crisis-level disruptions

AFTER FFPSA

After having an assessment of level of care needed, it was determined that Samuel's emergency placement at the QRTP would end after 30 days. Custodian identified foster family to facilitate transition after emergency stabilization.



Our goals

- Reduce Foster Care Numbers
- Reduce Institutional Placements
- Reduce Out of State Placements
- Reduce Substance Abuse as Abuse/Neglect factor
- Increase Kids receiving evidence-based supports
- Reduce severity of school-based behaviors

CHILDREN AND FAMILY SERVICES
Overview of Budget Changes

Description	2019-2021 Budget	Increase/ (Decrease)	2021-2023 Executive Budget
Salaries and Benefits	8,346,639	153,632	8,500,271
Operating	6,531,727	396,770	6,928,497

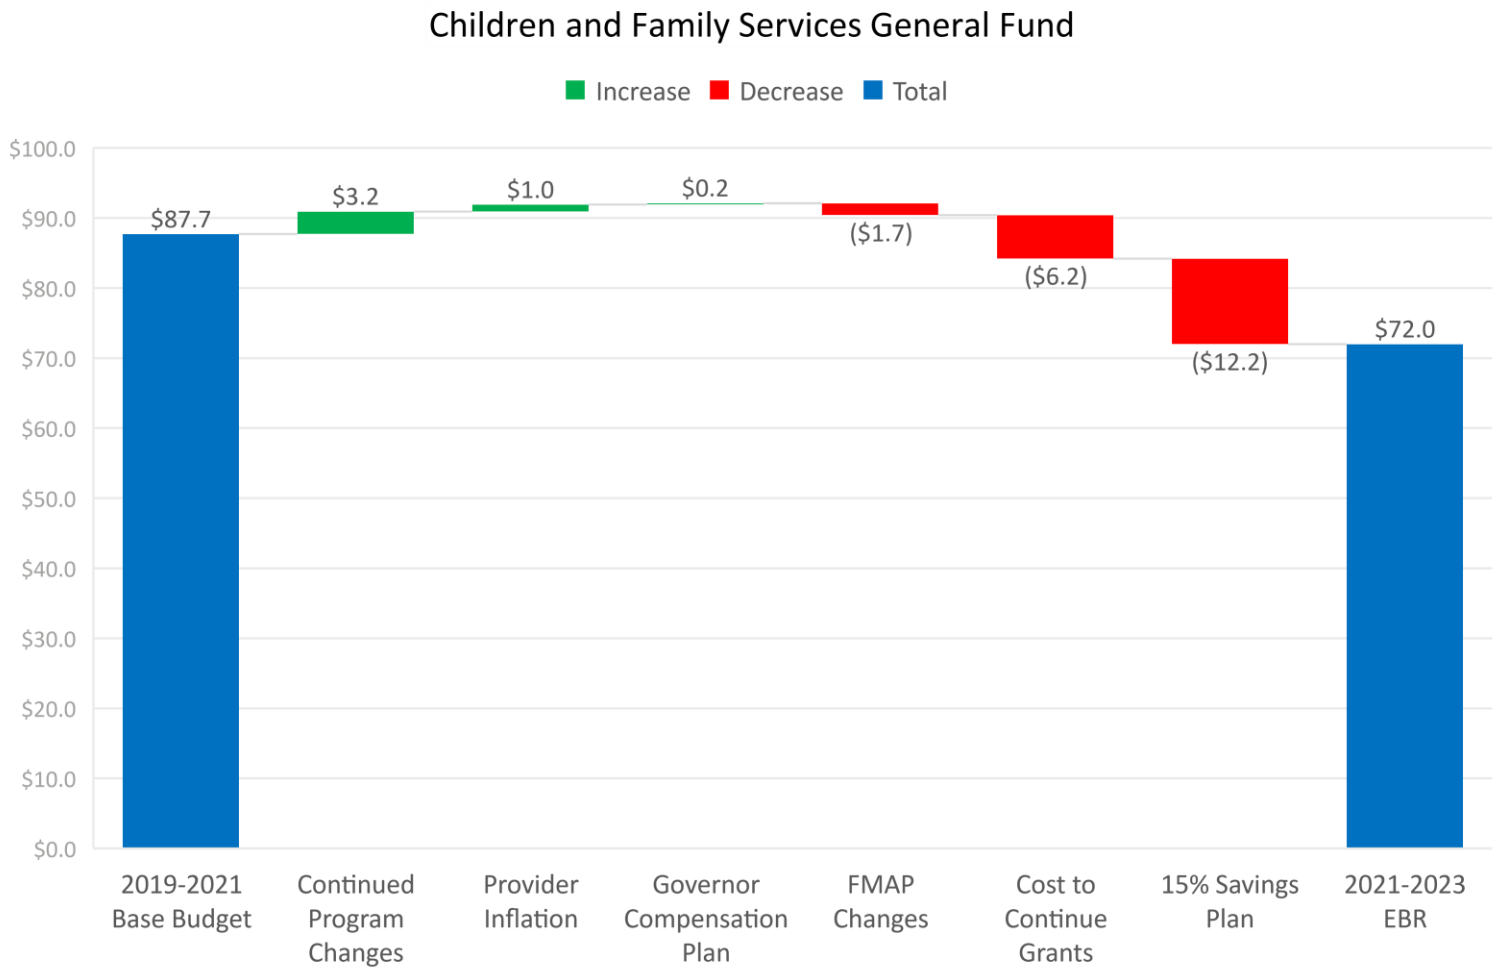
Full Time Equivalent (FTE)	41.60	0	41.60

CHILDREN AND FAMILY SERVICES
Overview of Budget Changes – Total Budget



15% Savings Plan

- Foster Care ($14.9) million
- Uniform TCM Rates ($2.4) million
- Eligibility Efficiencies ($2.2) million
- Contract Adjustments ($0.4) million

Continued Program Costs

- Tribal Agreements $2.6 million
- Special Needs Adoption $0.7 million
- Other cost changes ($0.6) million

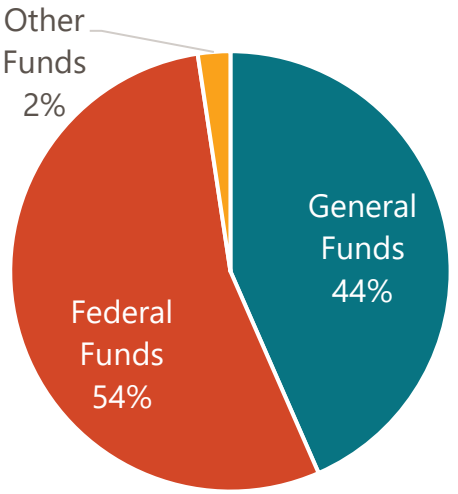
CHILDREN AND FAMILY SERVICES
Overview of Budget Changes – General Fund

15% Savings Plan

- Foster Care ($9.7) million
- Uniform TCM Rates ($1.1) million
- Eligibility Efficiencies ($1.1) million
- Contract Adjustments ($0.3) million

Continued Program Costs

- Tribal Agreements $2.6 million
- Other cost changes $0.6 million



CFS 21/23 Budget Summary

19-21 Budget	**$181,171,041**
21-23 Budget (exec)	**$165,637,720**

41.6 FTEs; no change in FTEs projected; $15.5 million decrease in total budget (7% of reduction is from federal funds)

- Reduce foster care and residential placements, accomplished in part by investing in evidence-based parent skill building and mental health services to families
- Implement equity in payments for services to families (QRTP, subsidized adoption, targeted case mgmt.)
- Investment in early childhood integrated data system
- Replacement of child welfare technology platform

DEPARTMENT OF HUMAN SERVICES

Quality services, Proven results, Closer to home

1. Base decisions on **quality**, **efficiency**, and **effectiveness**.

   Find success in a resource-constrained environment.

   Make **reductions** in some areas **and investments** in others to optimize outcomes.

2. The state has **enough treatment beds**. Investing in **earlier interventions** can help **avoid crisis**.

   Right service. Right place. Right time.

   Serving people in **lowest level of care necessary** will return **better outcomes**.

   To deliver services closer to home, **all** have to be **willing to change** how they do business – DHS can't do this alone.

3. How we **pay** for services should be **fair** and **equitable** across systems.

   Inequity in rates **affects** people's ability to **access** services - providers often prioritize more lucrative payment opportunities

   Demonstrate value to taxpayers. **Value** equals **high quality cost efficient care**.

CHILDREN AND FAMILY SERVICES

Replacement of FRAME/CCWIPS

BUDGET AMOUNT

$30,000,000

- $15 M general fund
- $15 M federal funds

PURPOSE

Develop and deploy system to manage child protection, foster care, in-home supports to families, and adoption

Supports administrative efficiencies, retirement of mainframe, and requirements for continued federal program compliance

NORTH Dakota | Behavioral Health
Be Legendary.™ HUMAN SERVICES

House Bill 1012 #1101
House Appropriations
Representative Nelson, Chairman

Behavioral Health Division
Pamela Sagness, Director

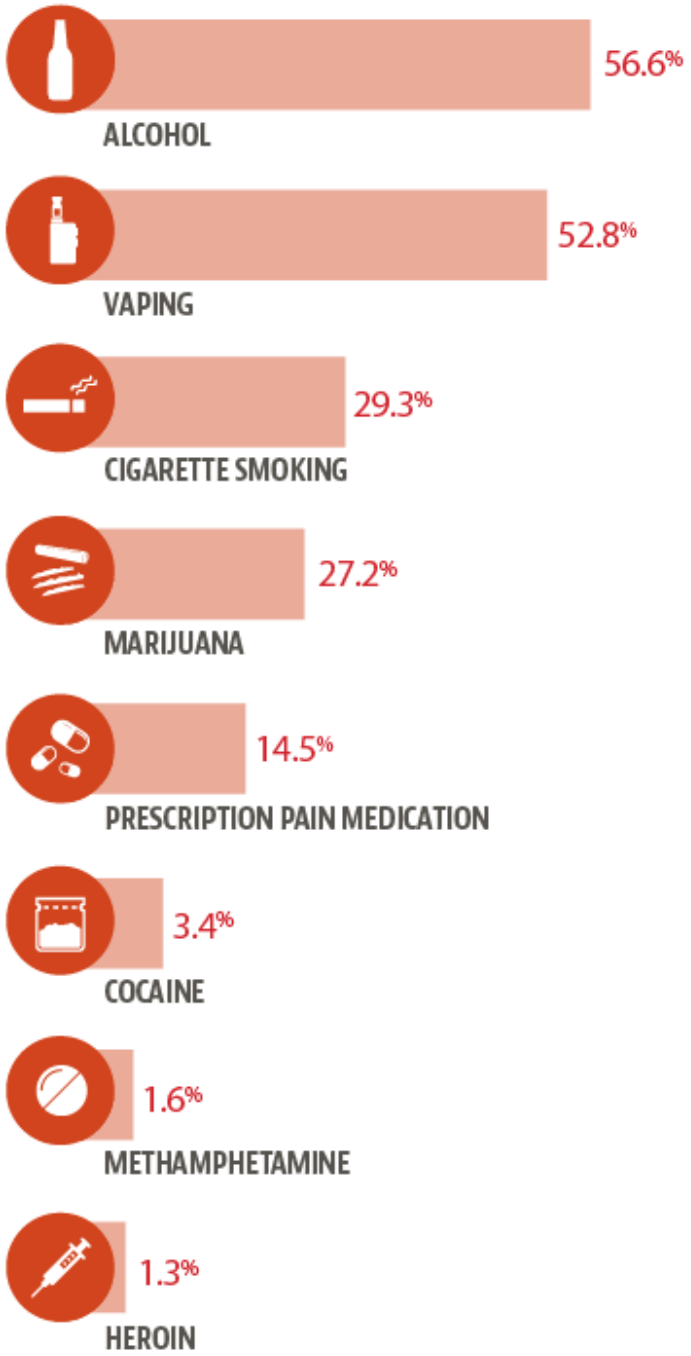
What is Behavioral Health?

A state of mental/emotional being and/or choices and actions that affect **WELLNESS**.

BEHAVIORAL HEALTH IS HEALTH

Why is Behavioral Health Important?

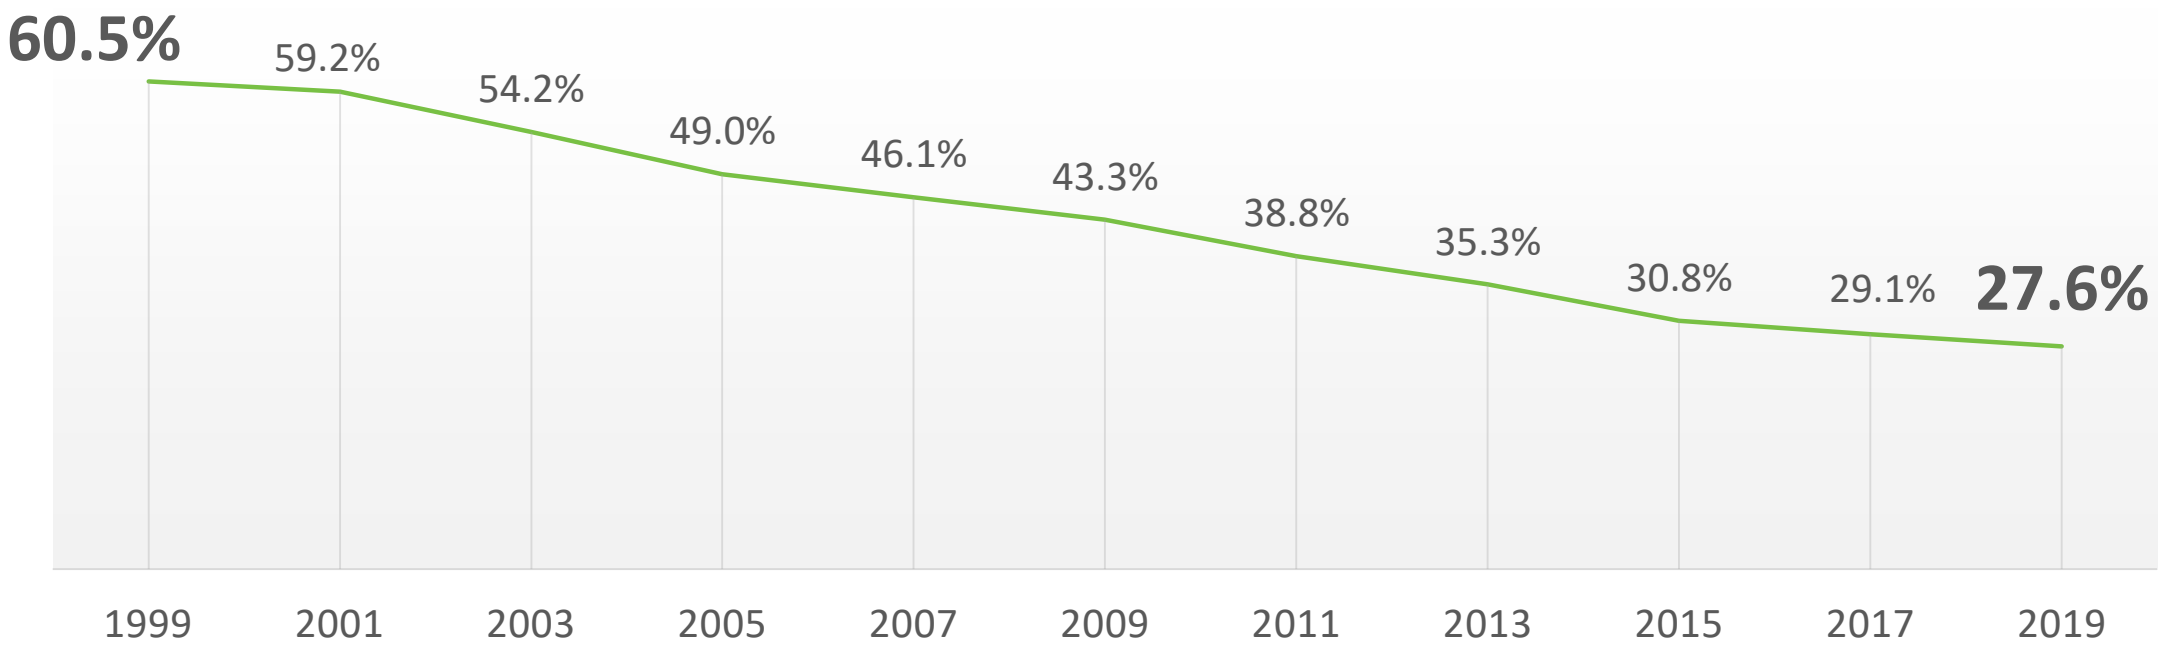
Persons with behavioral health disorders die, on average, about *5 years earlier* than persons without these disorders.

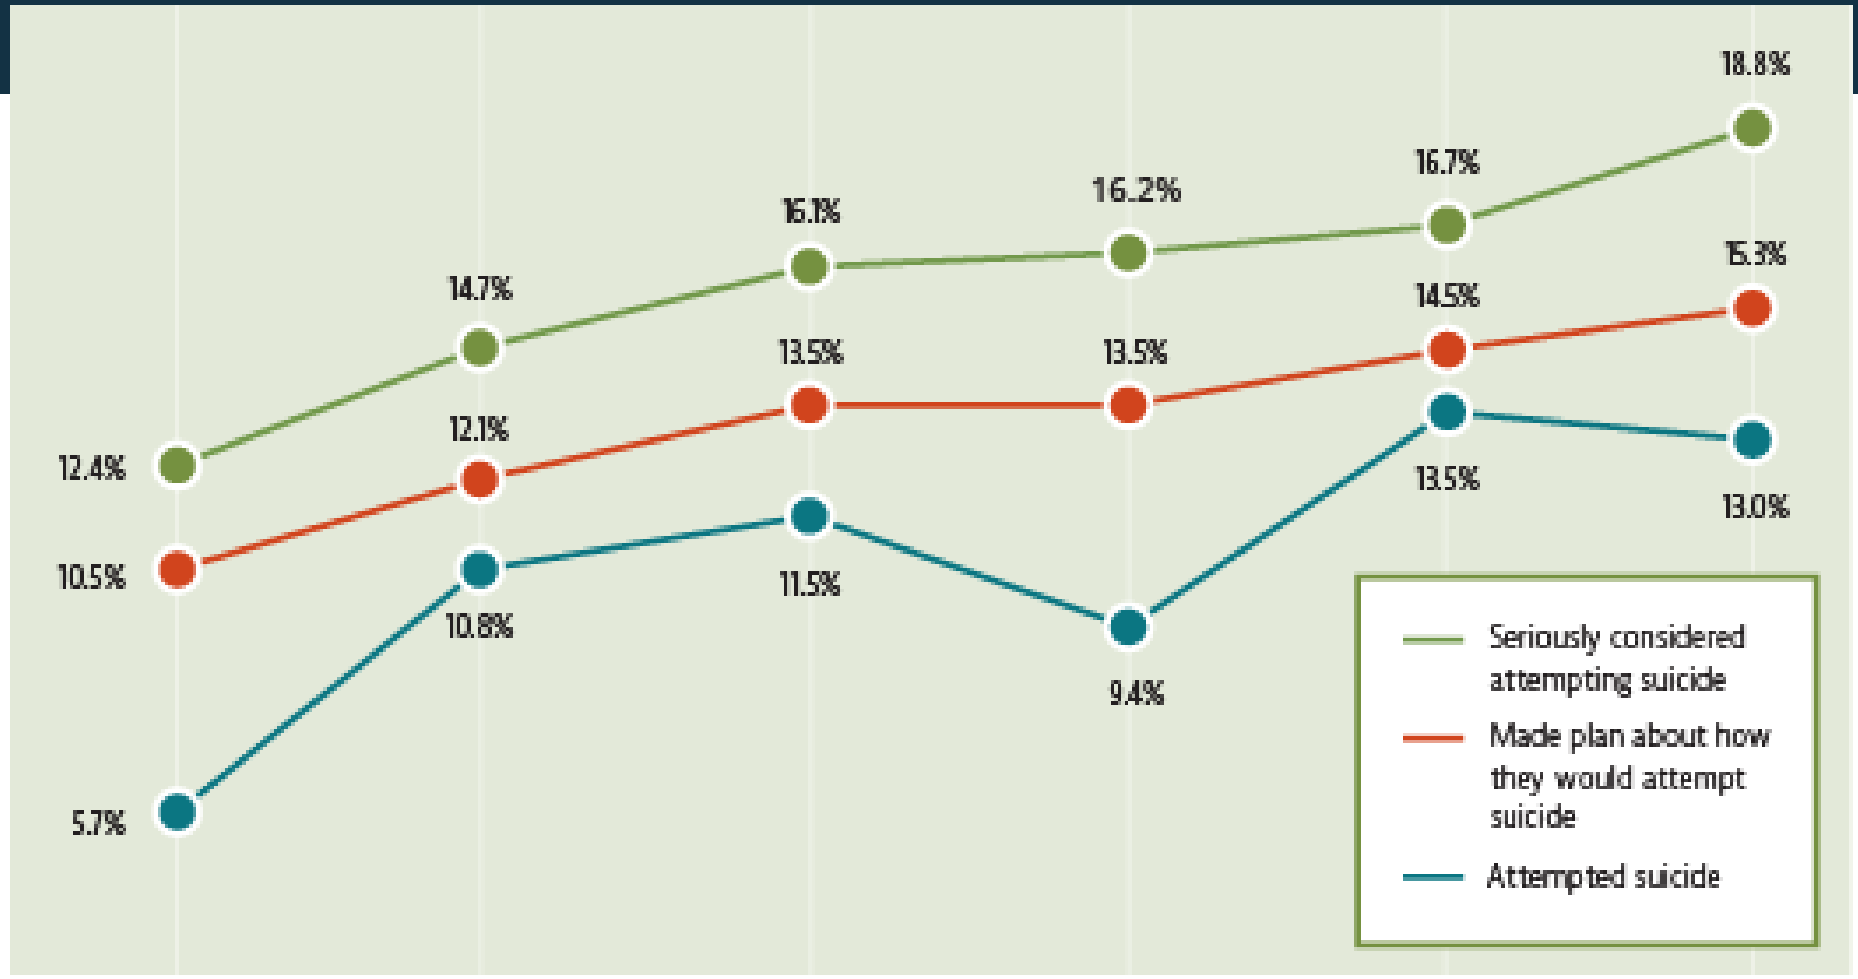


Persons with serious mental illness (SMI) are now dying *25 years earlier* than the general population

(Druss BG, et al. Understanding Excess Mortality in Persons With Mental Illness: 17-Year Follow Up of a Nationally Representative US Survey. Medical Care 2011; 49(6), 599–604.)

ND Youth Lifetime Substance Use
(High School Students)

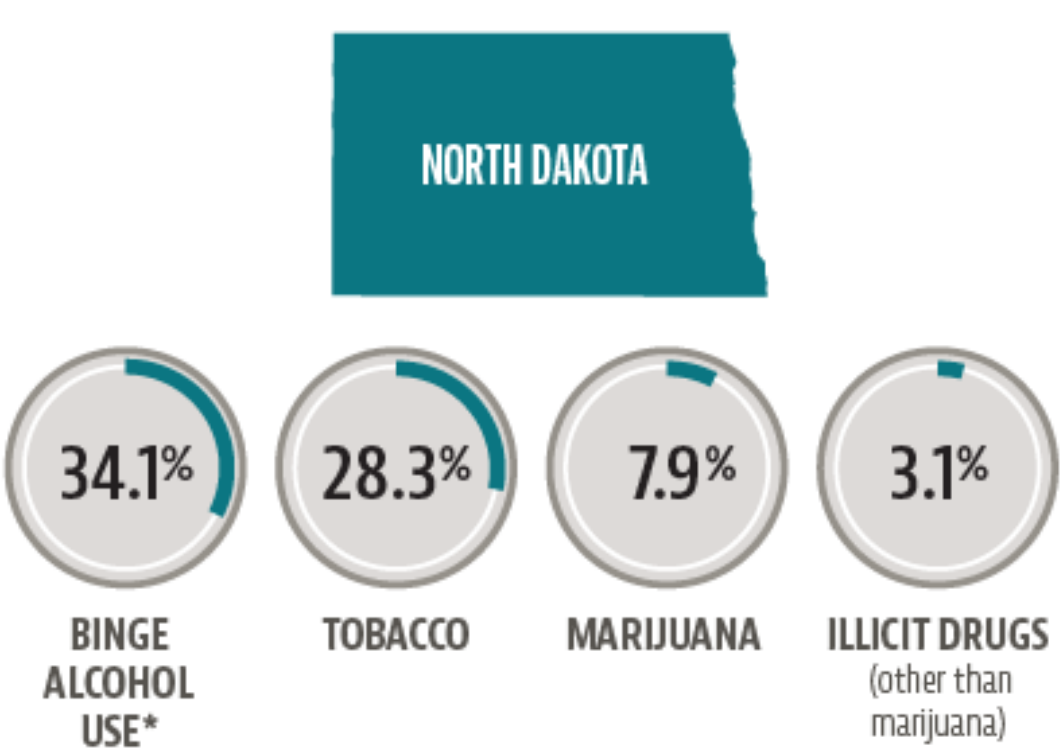


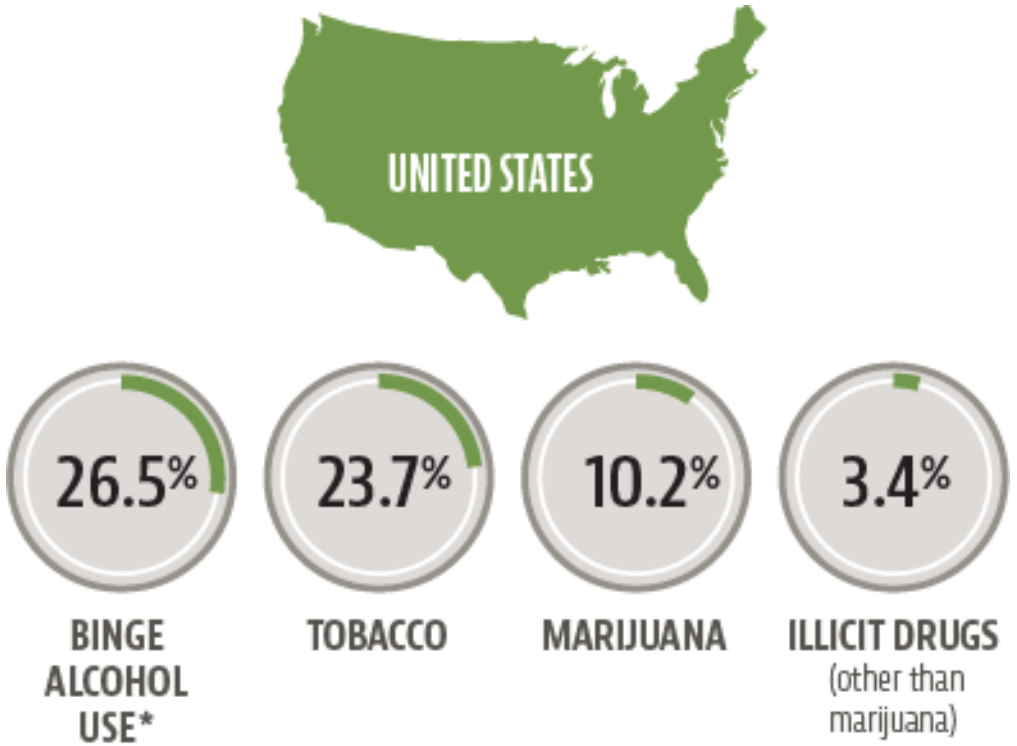


Prevention Works!

Current Alcohol Use (past 30 days) among ND High School Students

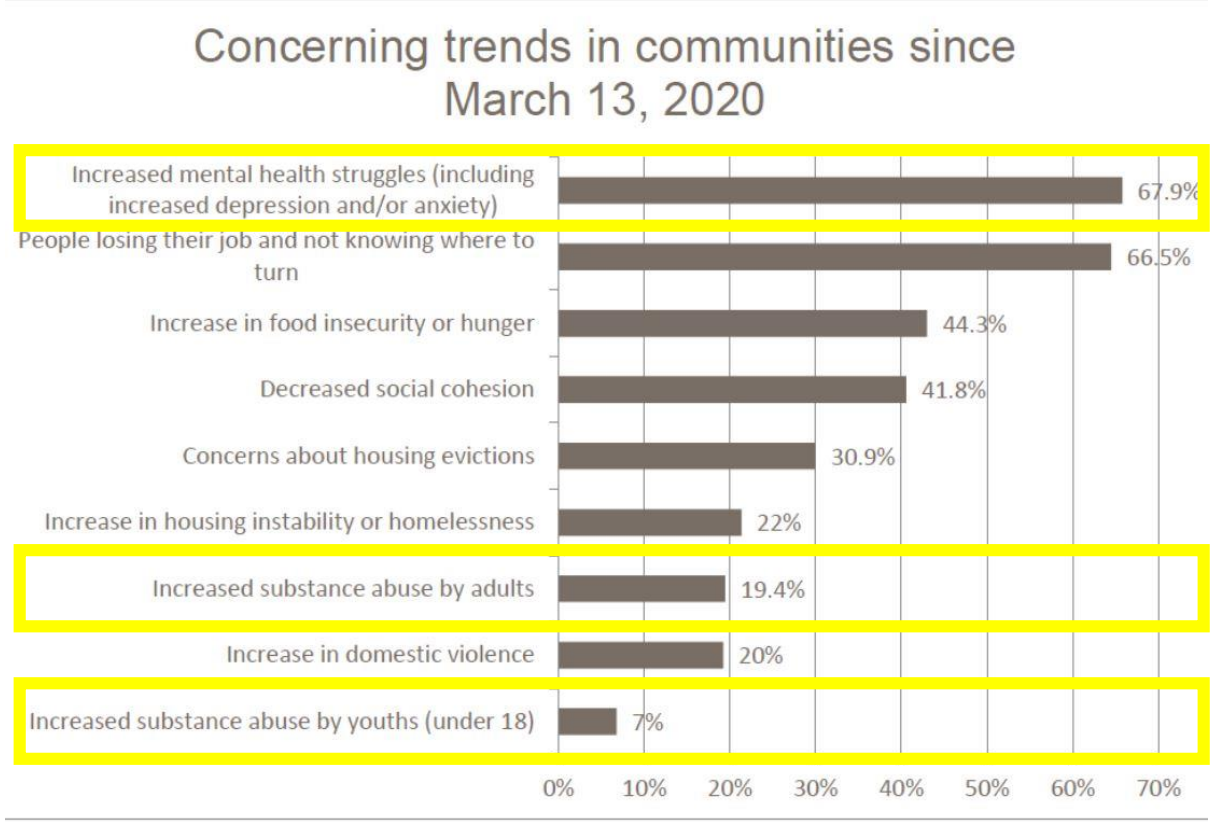
Youth Risk Behavior Survey



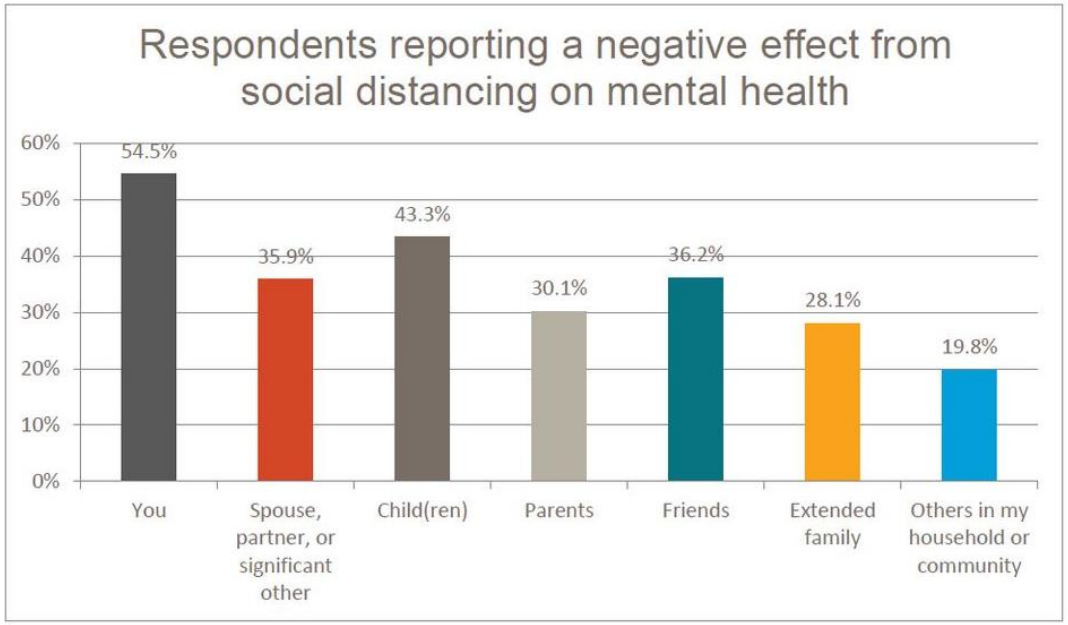


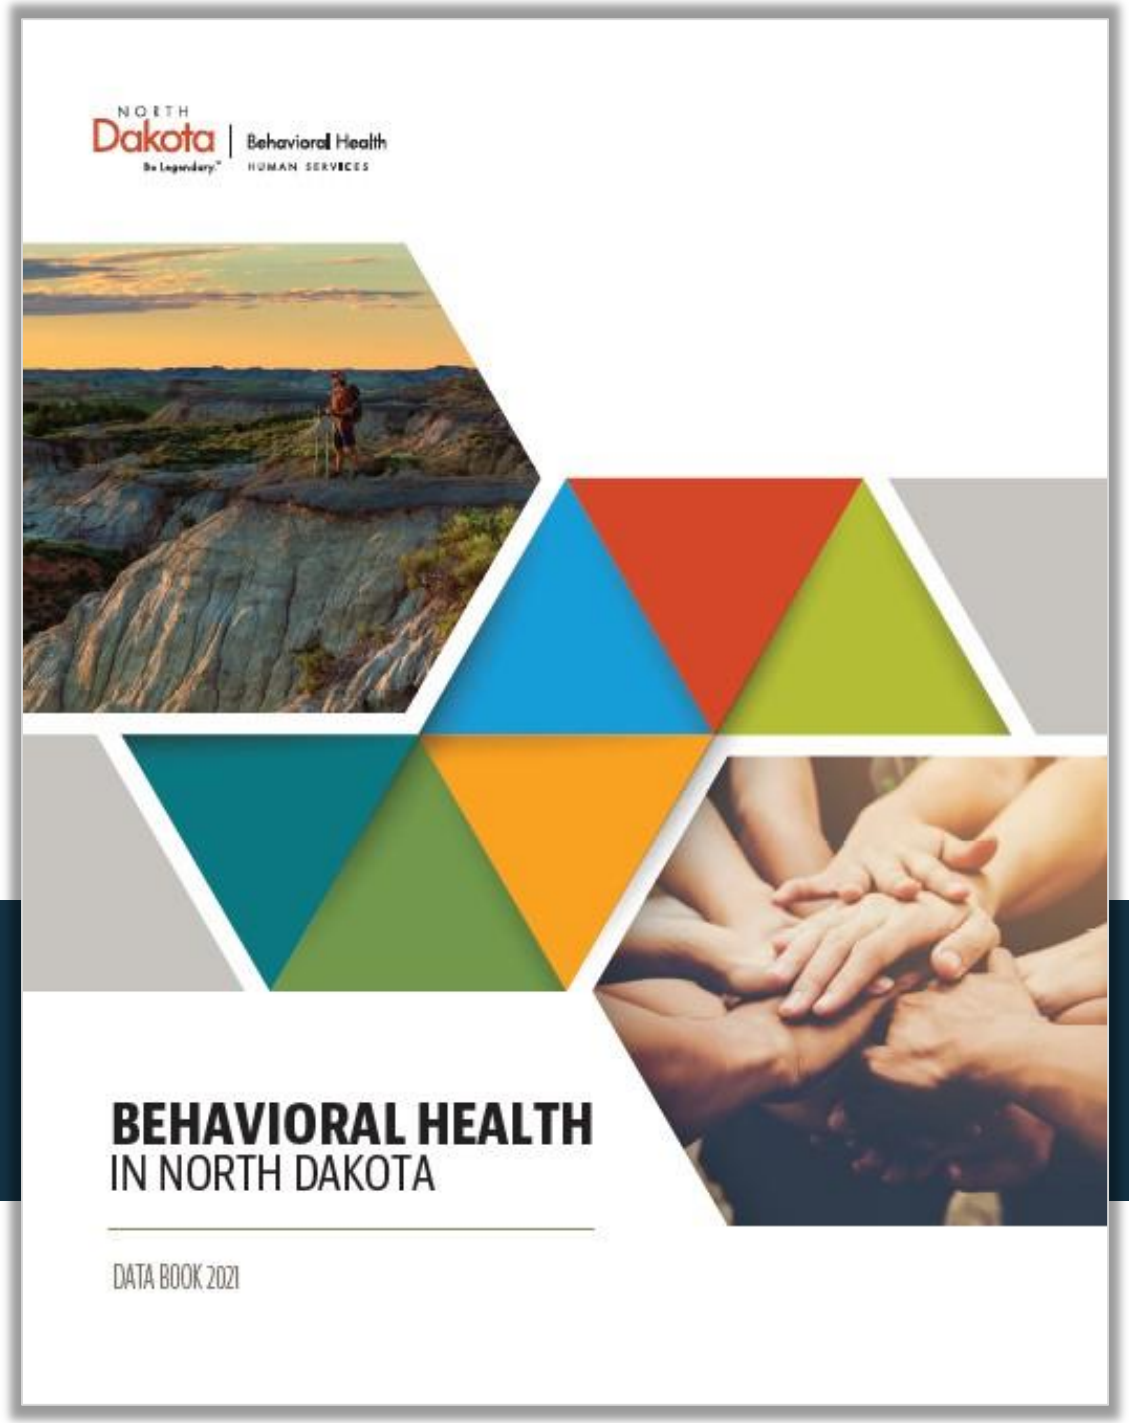
Youth Suicide
(High School Students; past 12 months)

Adult Substance Use
(Age 18+; past 30 days)



Disaster Impacts to Behavioral Health

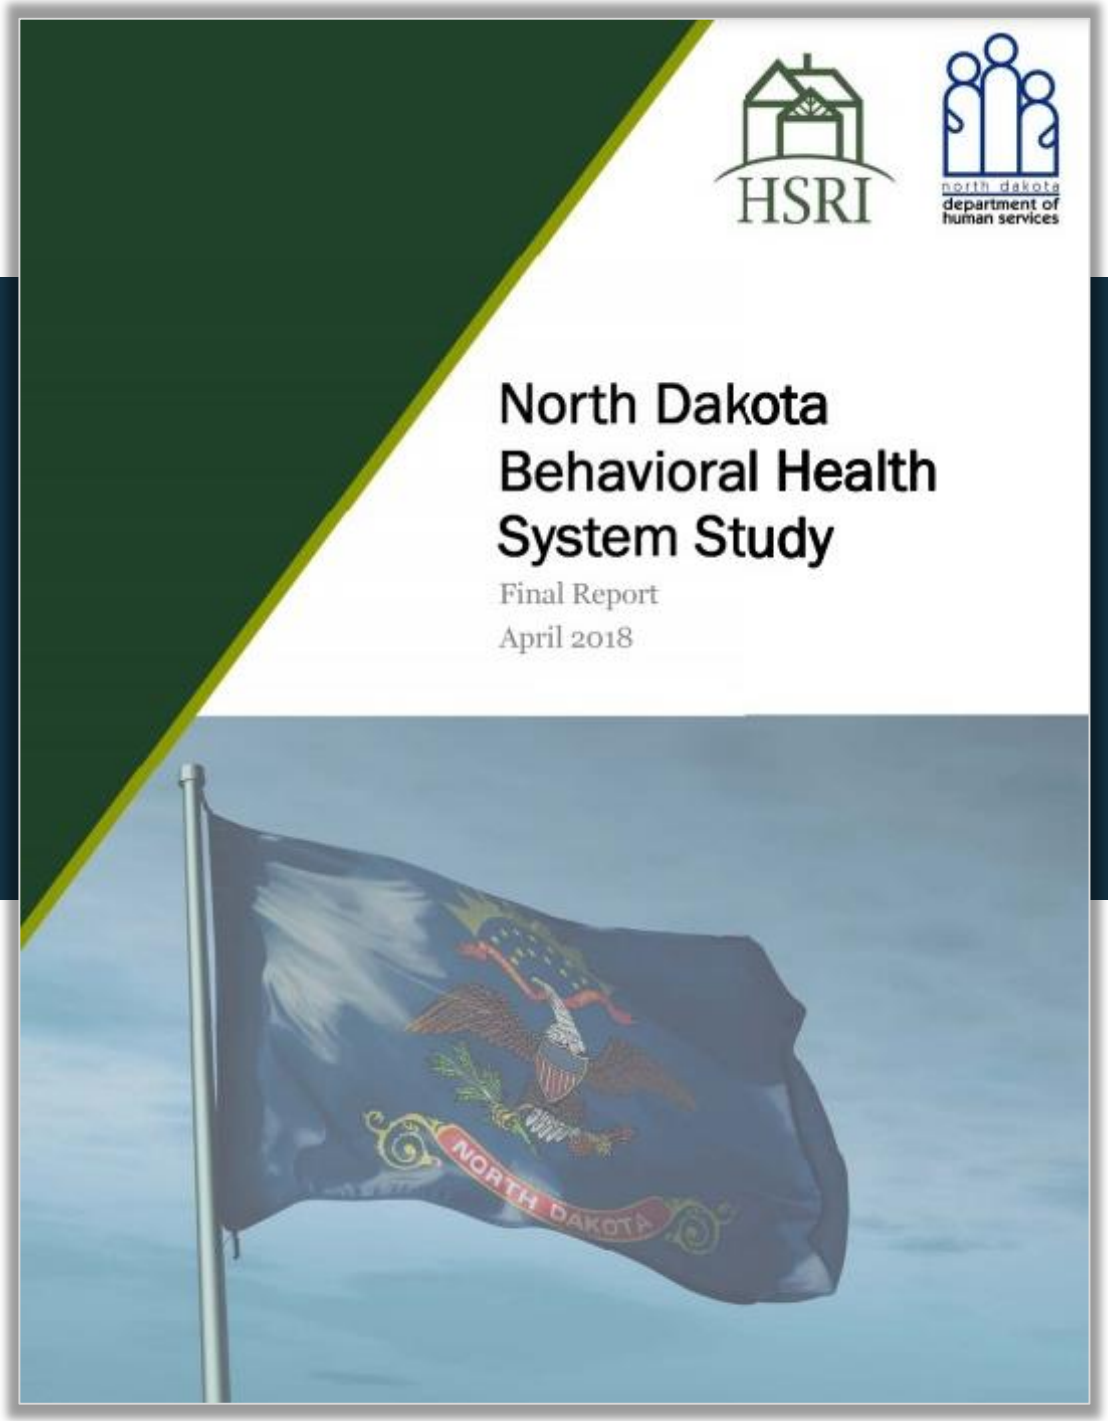




COVID-19 Impacts on Behavioral Health

ND Dept. of Commerce Survey May 2020

Respondents Reporting Negative Effect on Mental Health

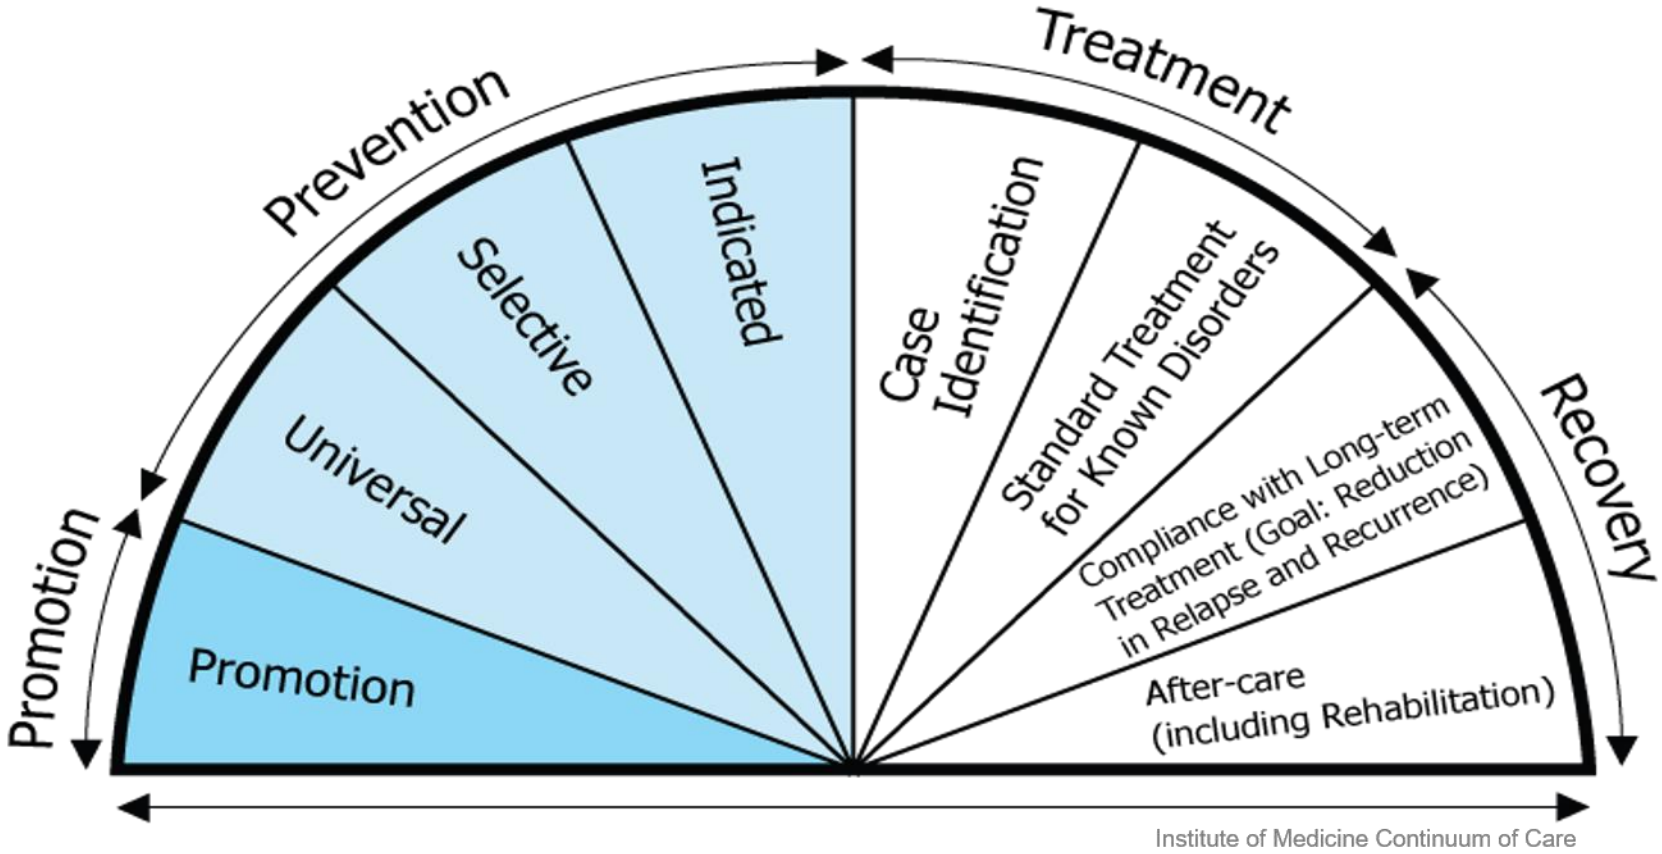


BEHAVIORAL HEALTH DATA BOOKLET

All data resources are available at www.behavioralhealth.nd.gov/data.

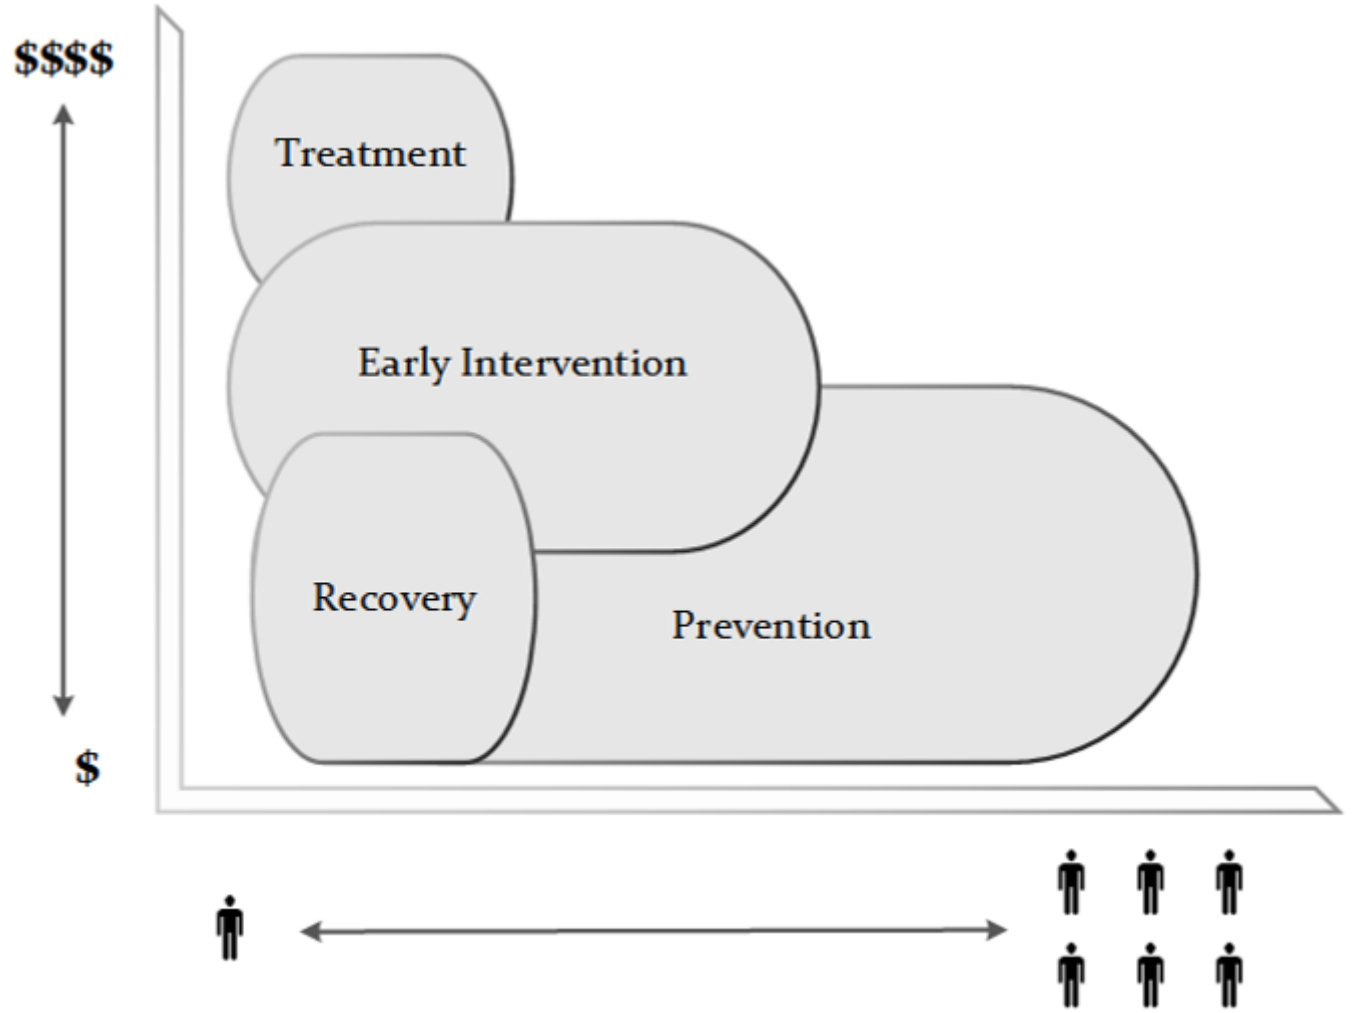
ROADMAP

The Behavioral Health Systems Study, April 2018



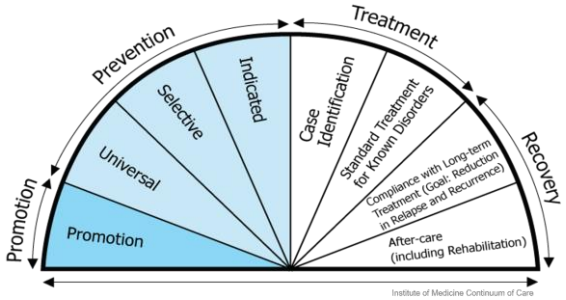
North Dakota Behavioral Health System Study **RECOMMENDATIONS**

The 250-page report provides more than 65 recommendations in 13 categories.



1. Develop a comprehensive implementation plan
2. Invest in prevention and early intervention
3. Ensure all North Dakotans have timely access to behavioral health services
4. Expand outpatient and community-based service array
5. Enhance and streamline system of care for children and youth
6. Continue to implement/refine criminal justice strategy
7. Engage in targeted efforts to recruit/retain competent behavioral health workforce
8. Expand the use of tele-behavioral health
9. Ensure the system reflects its values of person-centeredness, cultural competence, trauma-informed approaches
10. Encourage and support the efforts of communities to promote high-quality services
11. Partner with tribal nations to increase health equity
12. Diversify and enhance funding for behavioral health
13. Conduct ongoing, system-side data-driven monitoring of needs and access

Behavioral Health **Continuum of Care Model**



The goal of this model is to ensure there is access to a full range of high-quality services to meet the various needs of North Dakotans.

Return on Investment

Keys to Reforming North Dakota's Behavioral Health System

Support the full Continuum of Care

Increase Community-Based Services

Prevent Criminal Justice Involvement for Individuals with a Behavioral Health Condition

OVERVIEW

Behavioral Health Division

NORTH Dakota Be Legendary.™ | Behavioral Health HUMAN SERVICES

The Behavioral Health Division is a policy division, with responsibilities outlined in NDCC 50-06-01.4

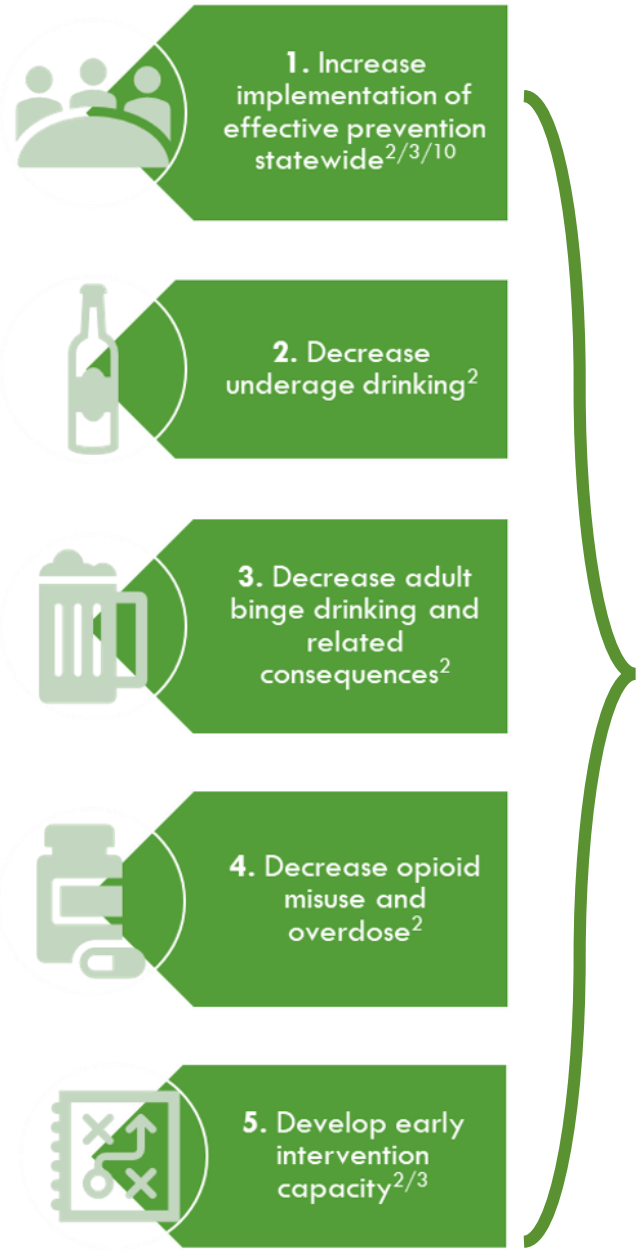
1

Reviewing and identifying service needs and activities in the state's behavioral health system in an effort to:

- ensure health and safety,
- access to services, and
- quality services.

2

Establishing quality assurance standards for the licensure of substance use disorder program services and facilities



3

Providing policy leadership in partnership with public and private entities

The Division identifies goals and administers **over 70 programs/projects** in these four primary areas.

- Community Behavioral Health Promotion
- Children's Behavioral Health
- Adult Mental Health Program and Policy
- Adult Addiction Program and Policy

COMMUNITY BEHAVIORAL HEALTH PROMOTION

Community and Tribal Efforts

Training and Technical Assistance
(Substance Abuse Prevention and Treatment Block Grant)

Youth Tobacco Enforcement (Synar)

Early Intervention (MIP/DUI)

Parents Lead

Statewide Campaigns

- Substance Use Disorder (SUD) Voucher Payment System
- Community-based Behavioral Health (CBH) Program
- Regulation of Substance Use Disorder Treatment Facilities

KEY INITIATIVES

Behavioral Health

NORTH Dakota Be Legendary.™ | Behavioral Health HUMAN SERVICES

FREE THROUGH Recovery

GOAL:

- Engage community organizations to be providers of care coordination & recovery support services

Overall, from March 2018 through October 2020, providers earned performance pay for 68.3% of their participants.

2,905 Individuals have Participated

961 Active Participants

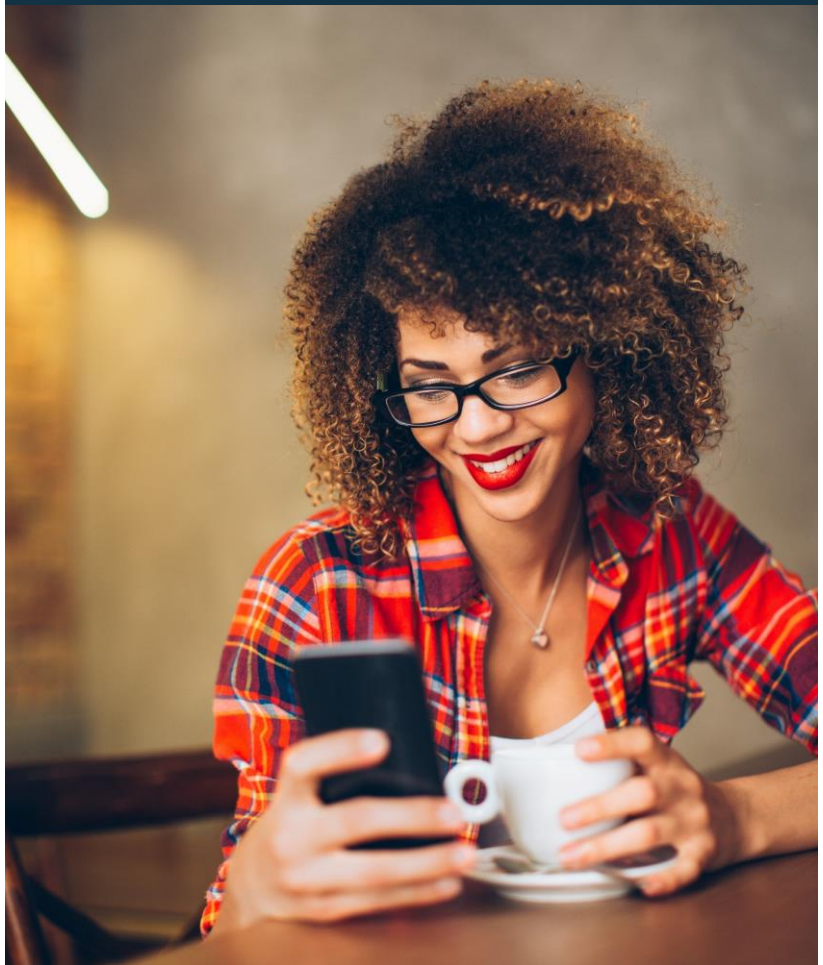
40 Providers

1915i State Plan Amendment

The amendment allows North Dakota Medicaid to pay for additional home and community-based services to support individuals with behavioral health conditions.

Individual Eligibility	Services
• The individual is age 0+; and • The individual is currently enrolled in ND Medicaid or Medicaid Expansion; and • The individual resides in and will receive services in a setting meeting the federal home and community-based setting requirements, and • The individual has a mental illness, substance use disorder or traumatic brain injury diagnosis The individual has a functional impairment, which substantially interferes with or substantially limits the ability to function in the family, school or community setting, as evidenced by a complex score of 50 or higher on the WHODAS 2.0.	• Care Coordination • Training and Supports for Unpaid Caregivers • Community Transitional Services • Benefits Planning • Non-Medical Transportation • Respite • Prevocational Training • Supported Education • Supported Employment • Housing Support Services • Family Peer Support • Peer Support

Substance Use Disorder (SUD) Voucher



21 Substance Use Disorder Treatment Programs are providing services through the SUD Voucher.

4,200+ individuals have been approved since inception of the SUD Voucher program.

GOALS: Improve access to quality services & provide choice of provider

	2015-2017	2017-2019	2019-2021
TOTAL BUDGET	$575,000	$4,917,087	$7,997,294
AMOUNT EXPENDED	$252,293.85	$8,288,293.05	$9,194,310.72 (as of November 30, 2020)

Peer Support Certification

The ND 66th Legislative Assembly passed Senate Bill 2012 giving the Behavioral Health Division authority to develop and implement a program for the certification of peer support specialists.

Administrative Rules 75-03-43 were promulgated and outlines the requirements and process for two levels of Peer Support Specialist certification:

- Certified Peer Support Specialist I (CPSS I)
  - **22 CPSS I (as of January 10, 2021)**
- Certified Peer Support Specialist II (CPSS II)
  - **9 CPSS II (as of January 10, 2021)**

*Since 2018 the Behavioral Health Division hosted **18 trainings** and trained over **450 individuals**.*

Behavioral Health and Education

Prevention and Early Intervention Pilot

The ND 66th Legislative Assembly passed Senate Bill 2012 appropriating $300,000 to the Department of Human Services for the purpose of establishing a children's prevention and early intervention behavioral health services pilot project in the school system; including services to children suffering from the effects of behavioral health issues.

October 2018 - Pilot project to Simle Middle School in Bismarck.

October 2020 – Pilot project expansion awarded to Dunseith Public School (tribal) and Barnes County North Public School (rural).

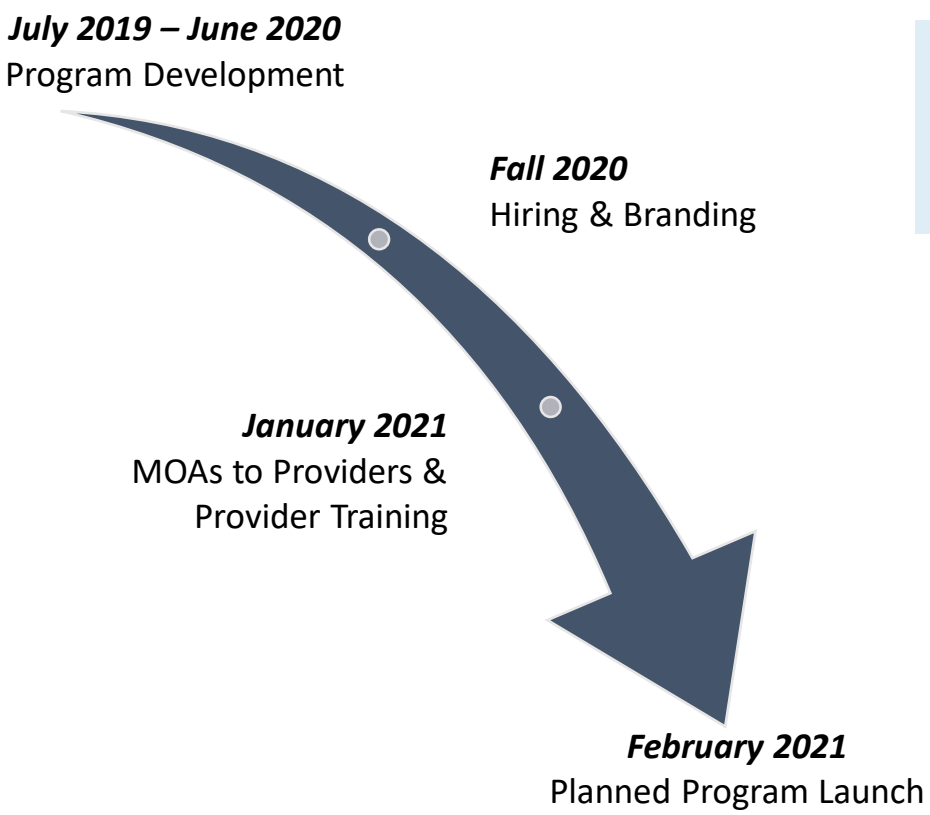
Behavioral Health School Grant Program

The ND 66th Legislative Assembly passed Senate Bill 2012 appropriating $1,500,000 to the Department of Human Services for the purpose of providing behavioral health services and support grants to school districts to address student behavioral health needs.

25 schools utilized ND State Medicaid reimbursement during the previous school year and are eligible for funding.

8 grant applications have been received (1/11/2021)

- 5 awarded (4 schools)
- 3 in review



Behavioral Health Resource Support (B-HERO)

The ND 66th Legislative Assembly passed Senate Bill 2149 which established the requirement for each school within a district to designate an individual as a behavioral health resource coordinator and Senate Bill 2313 which established the requirement for DHS to provide resources to behavioral health resource coordinators.

The Central Regional Education Association (CREA) was awarded the contract (through a Request for Proposal) to provide resources, information, and support to school behavioral health resource coordinators at each school in North Dakota, collaborating with the Behavioral Health Division.

CommunityConnect

My Recovery. My Story.

MISSION: provide quality, community-based behavioral health services that promote collaboration and partnership to meet the individual needs of every person served.

To be **eligible** for the program individuals must be 18 years of age or older, reside in North Dakota, and have a mental health or substance use disorder diagnosis that is impacting their functionality in domains including housing, employment/financial, physical health, and community connections.

Priority will be given to the following populations: Parents and caregivers, parents and caregivers with child protection services involvement, pregnant women, Individuals that utilize emergency and detox centers, individuals who are homeless or at risk of homelessness, individuals who use drugs intravenously

COVID-19 Behavioral Health Supports

Crisis Counseling, Assistance and Training Program (CCP Grant)

- Project Renew (Lutheran Social Services of North Dakota)

Emergency COVID-19 Grant

- Support for Healthcare providers (Sanford Health, “Reach for Resilience”)
- Addiction treatment (Sharehouse and Heartview)
- Mental health treatment (Agassiz Associates)
- Crisis support (Field Services)

WHAT'S DRIVING US

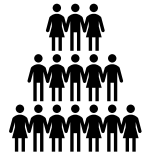
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment

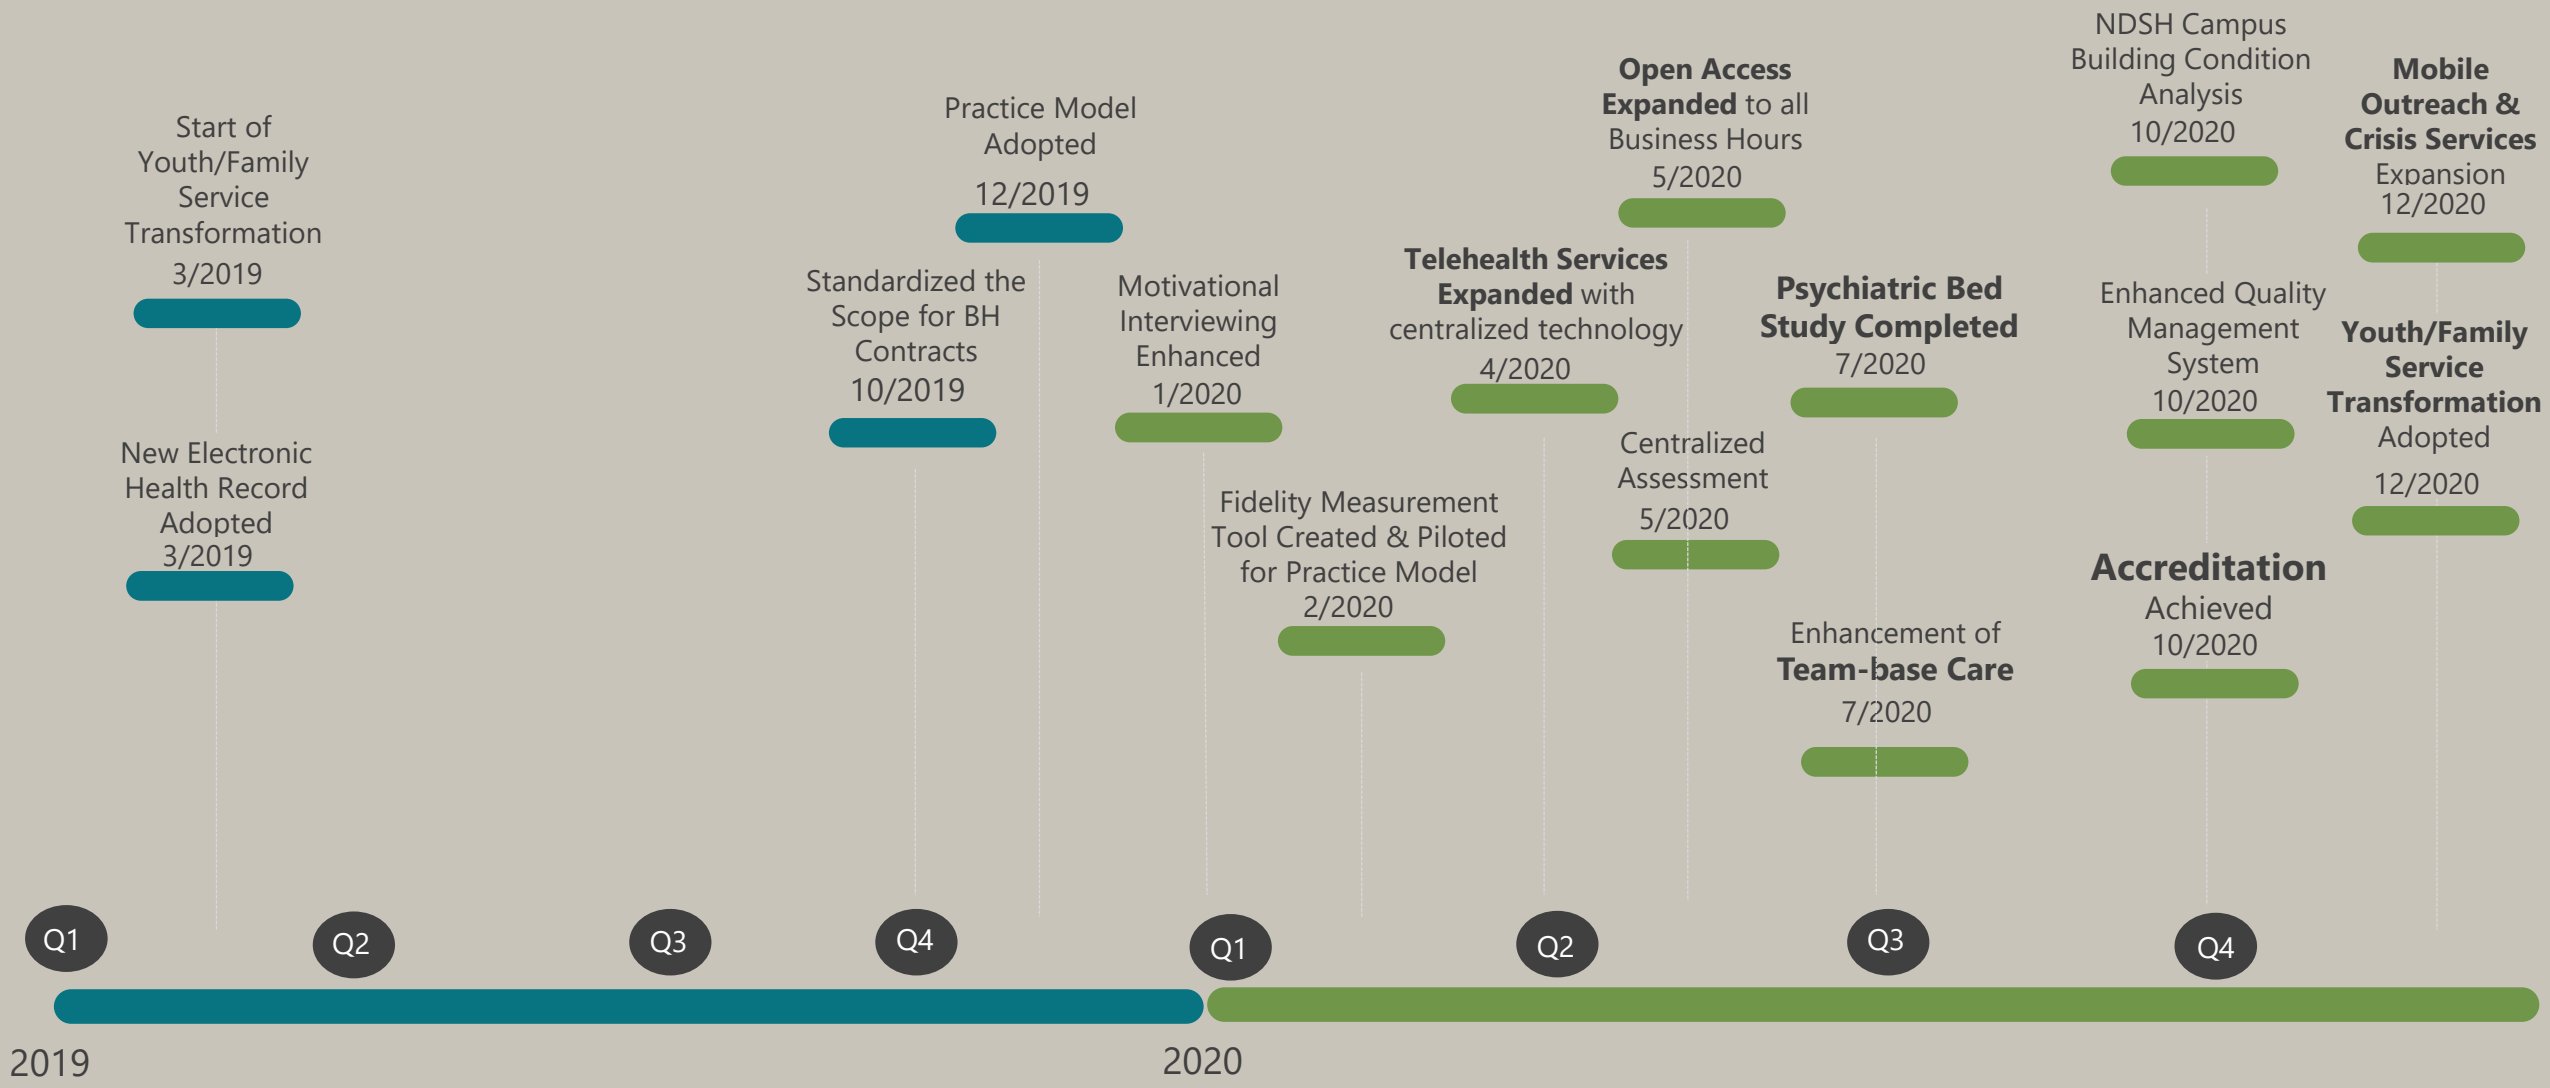


Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service



High Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

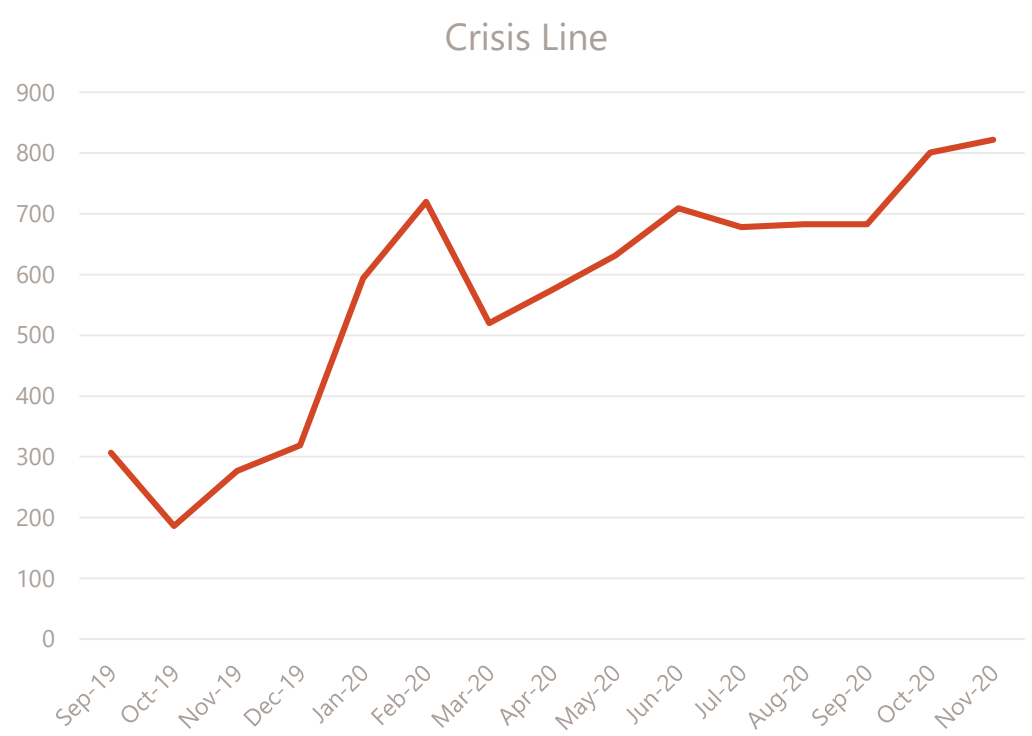
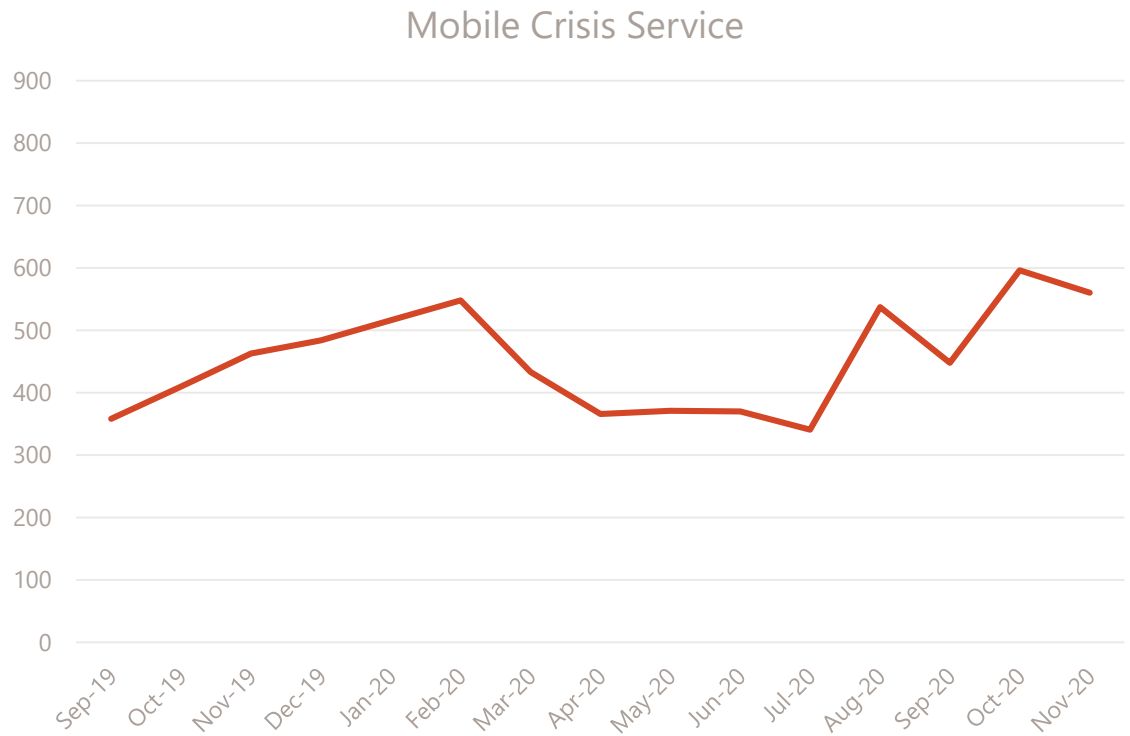
Crisis Services

2,230
Youth (<18) clients served

*New EHR was adopted in March 2019, thus a full calendar year for 2019 was not able to be provided.



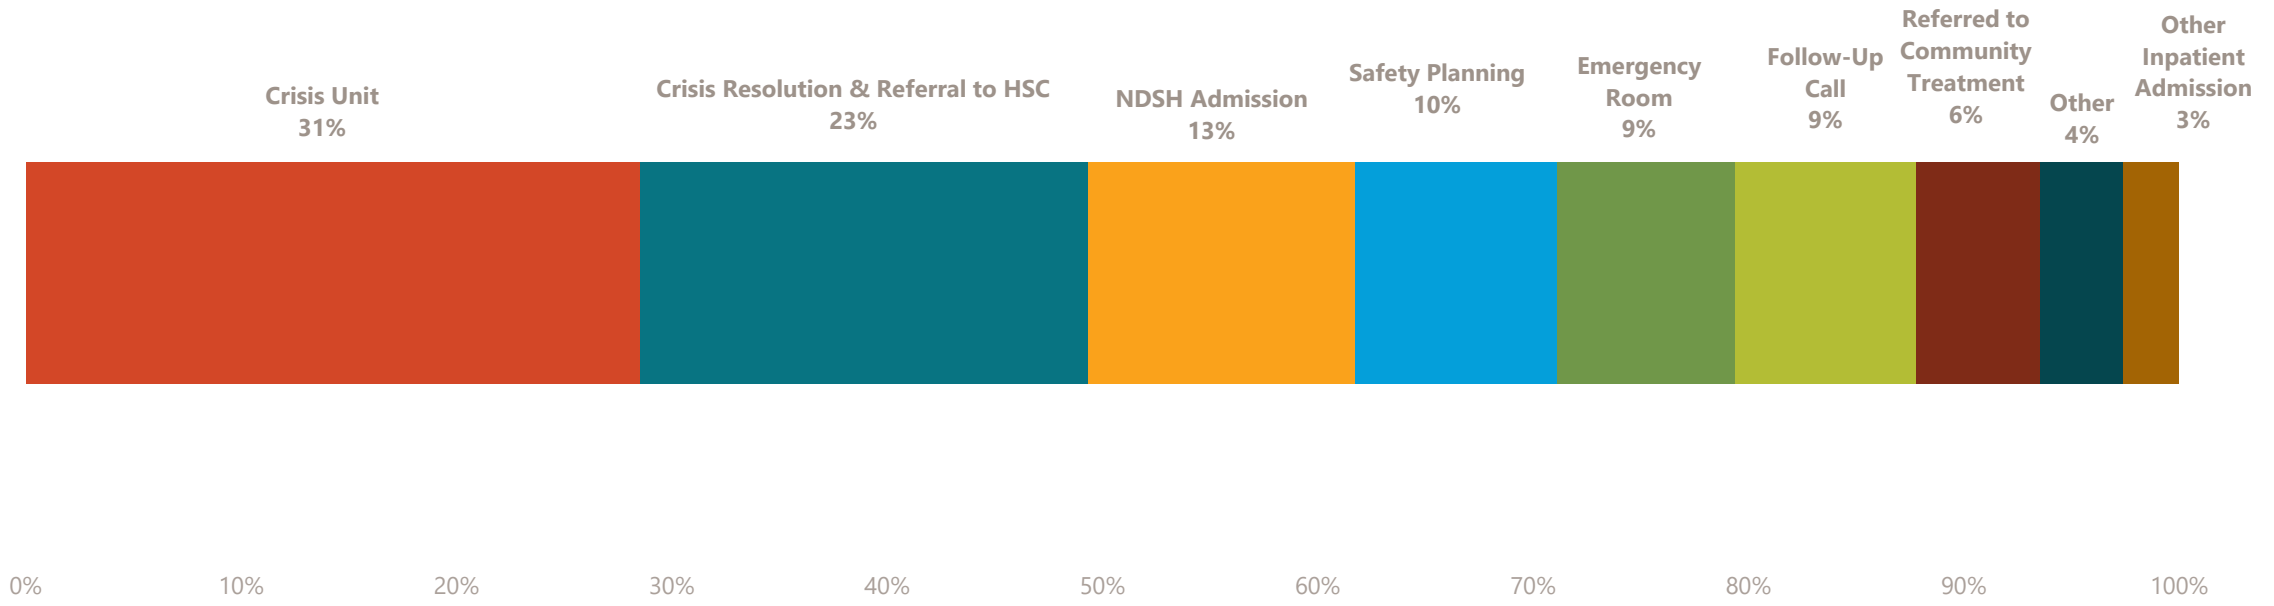
HUMAN SERVICE CENTERS
Telehealth Service Expansion

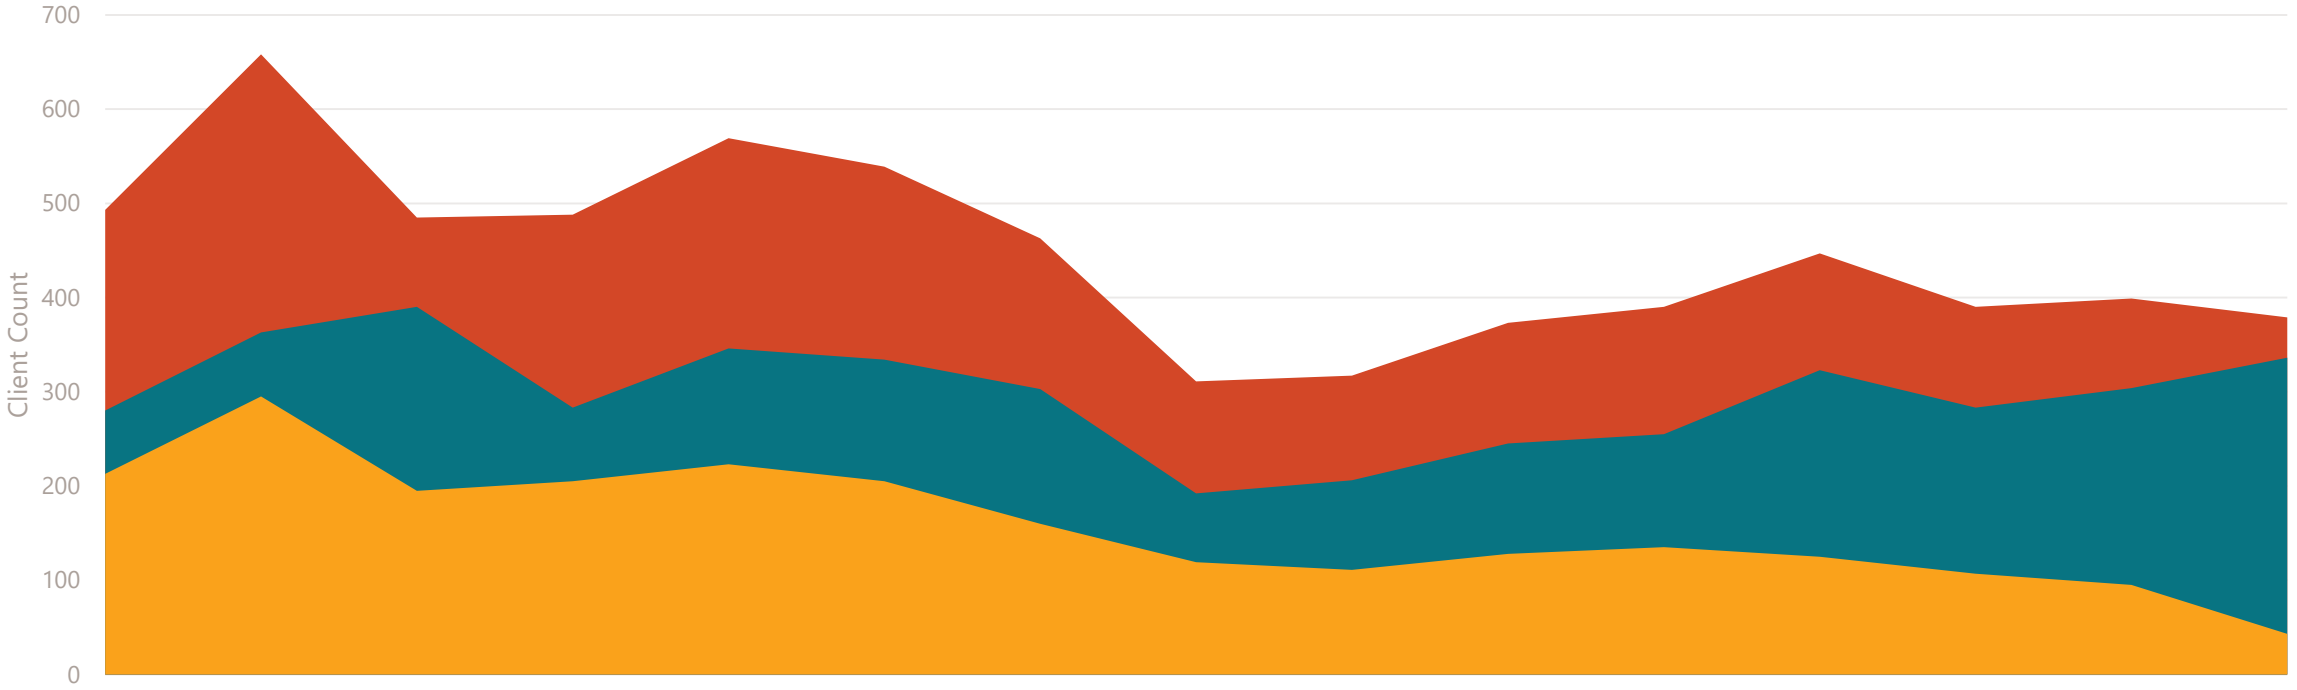


The Human Service Centers transitioned quickly to provide telehealth services to clients during the COVID-19 pandemic to ensure continued necessary services while maintaining safety.

HUMAN SERVICE CENTERS
Crisis Service Transformation

The Human Service Centers provided **15,300** crisis services from September 2019 through November 2020.

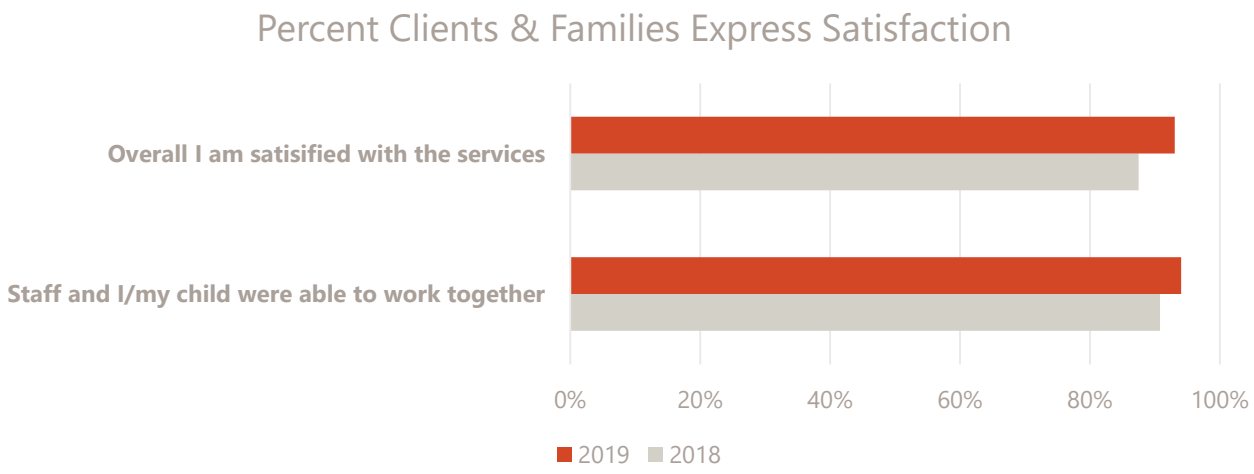


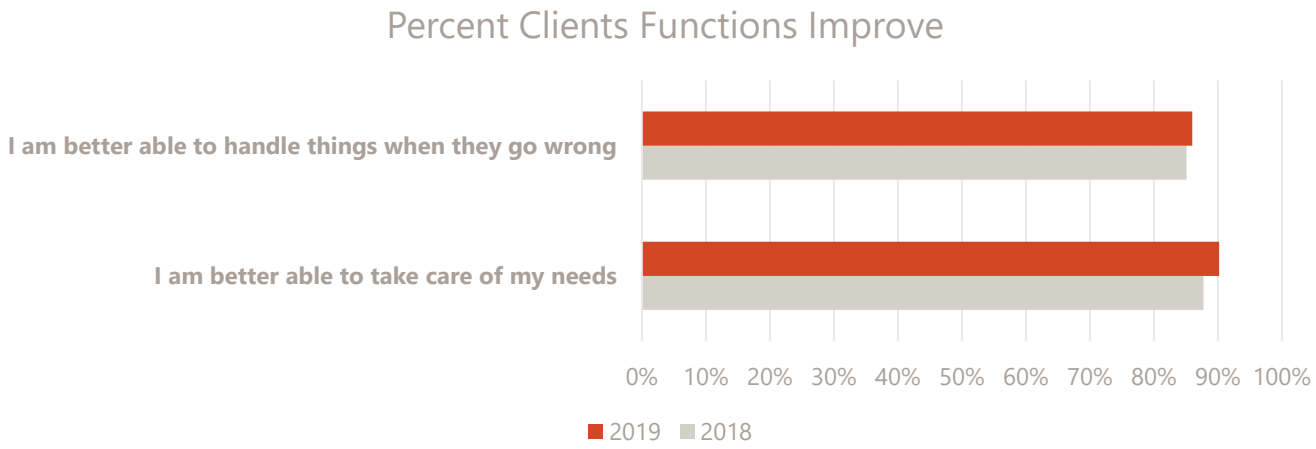


HUMAN SERVICE CENTERS

Crisis Resolution Increasing

Between September 2019 through November 2020, Human Service Centers triaged and screened 4,202 individuals for crisis services. Of those individuals, 67% were either referred to Crisis Unit, Crisis Resolution & Referral to HSC, or North Dakota State Hospital.





HUMAN SERVICE CENTERS:

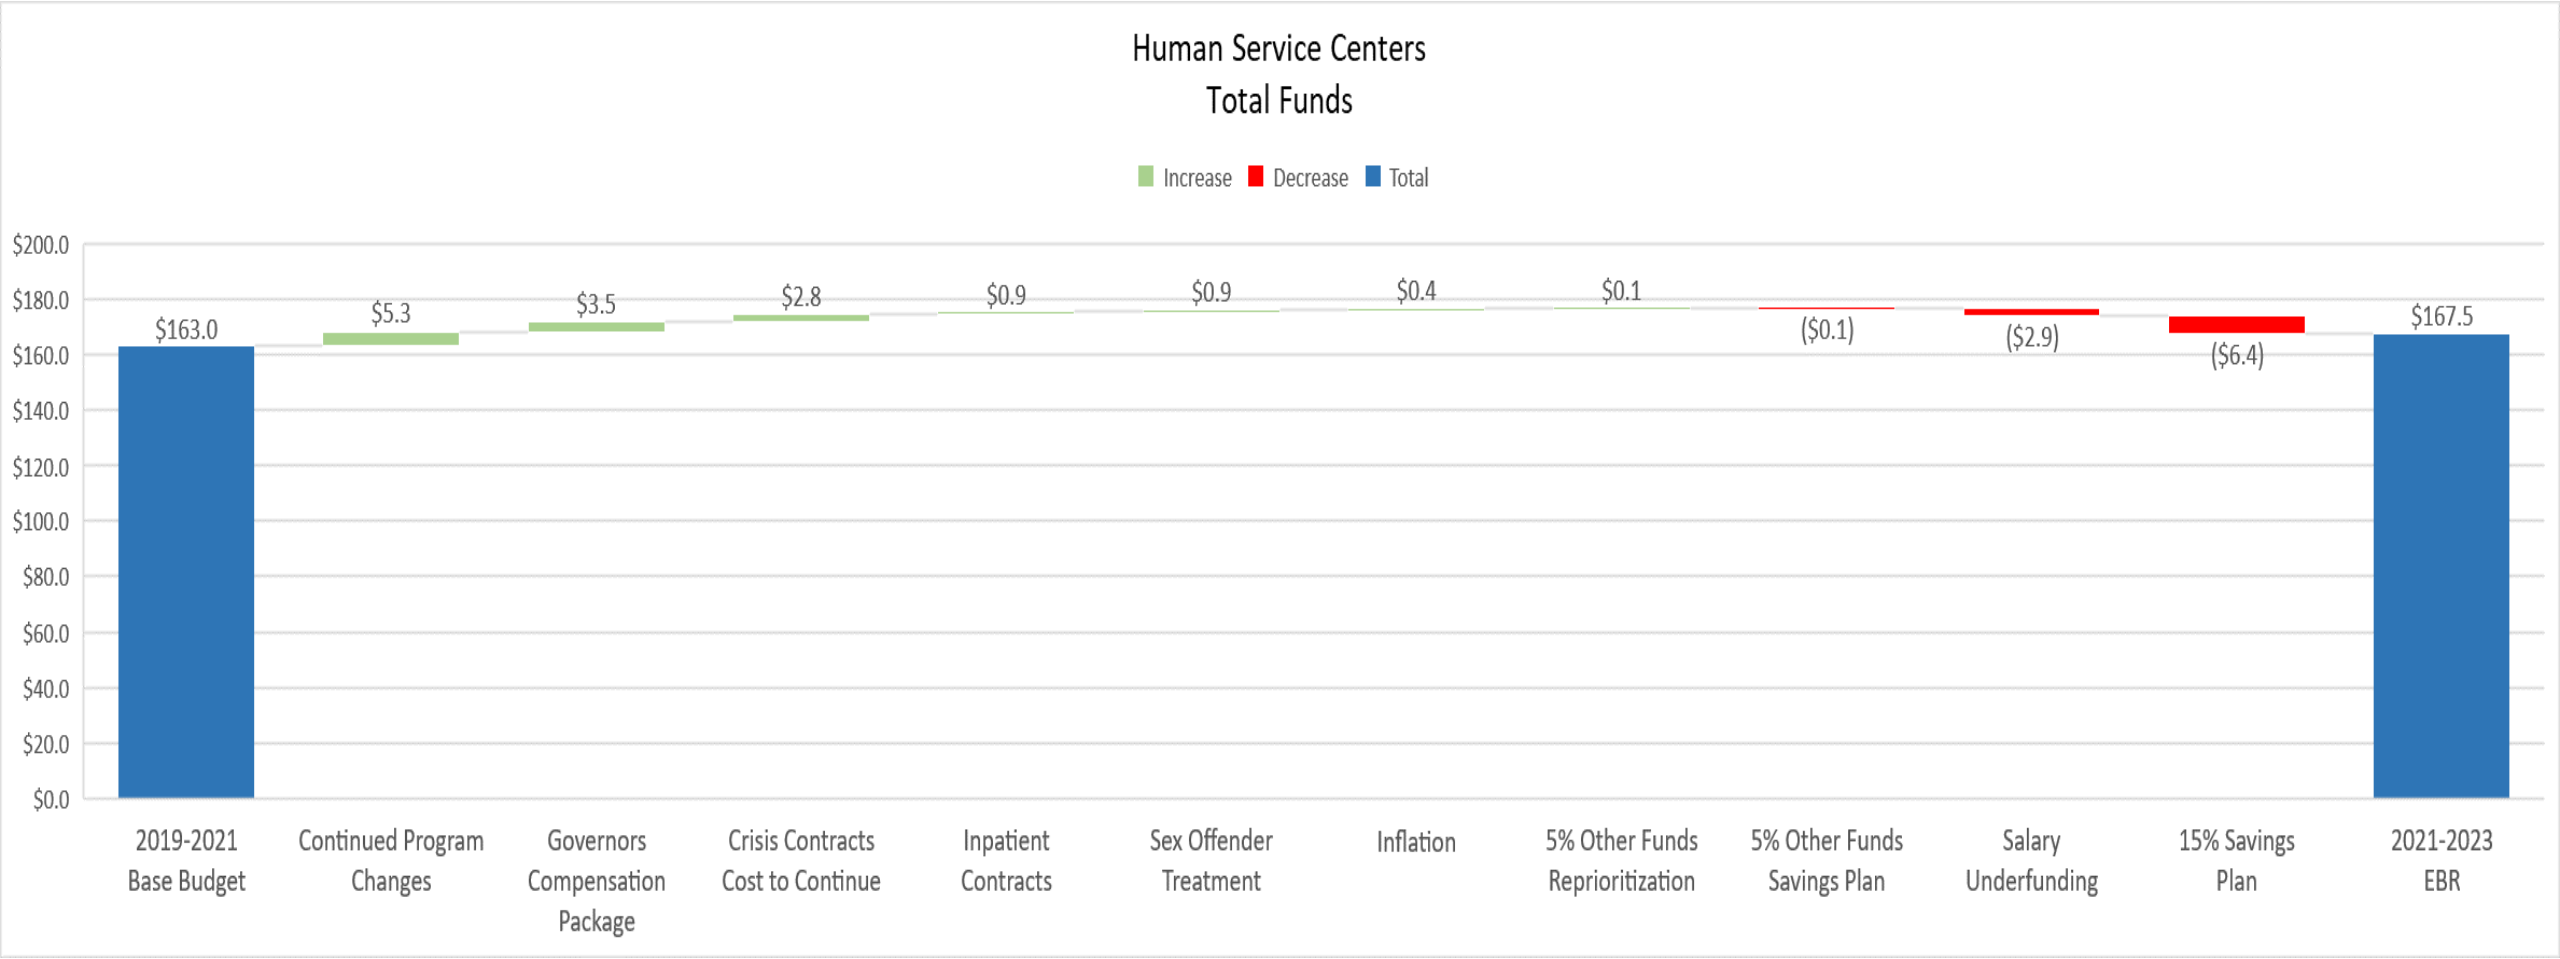
HUMAN SERVICE CENTERS:
Client Satisfaction & Improvement

"I was treated extremely well and with genuine concern. I felt cared for and loved as a human being. There is nothing that I would like to see changed, as I was well cared for. "

"I am very satisfied with the service as I get from the Human Services mental health. I would strongly recommend this agency to someone who needs help. Keep up with the awesome job!"



"The Human Services has changed my life to my best life. I am so thankful. Love them all dearly. The quality of my life would not have changed without them. I feel they sincerely care about me. "

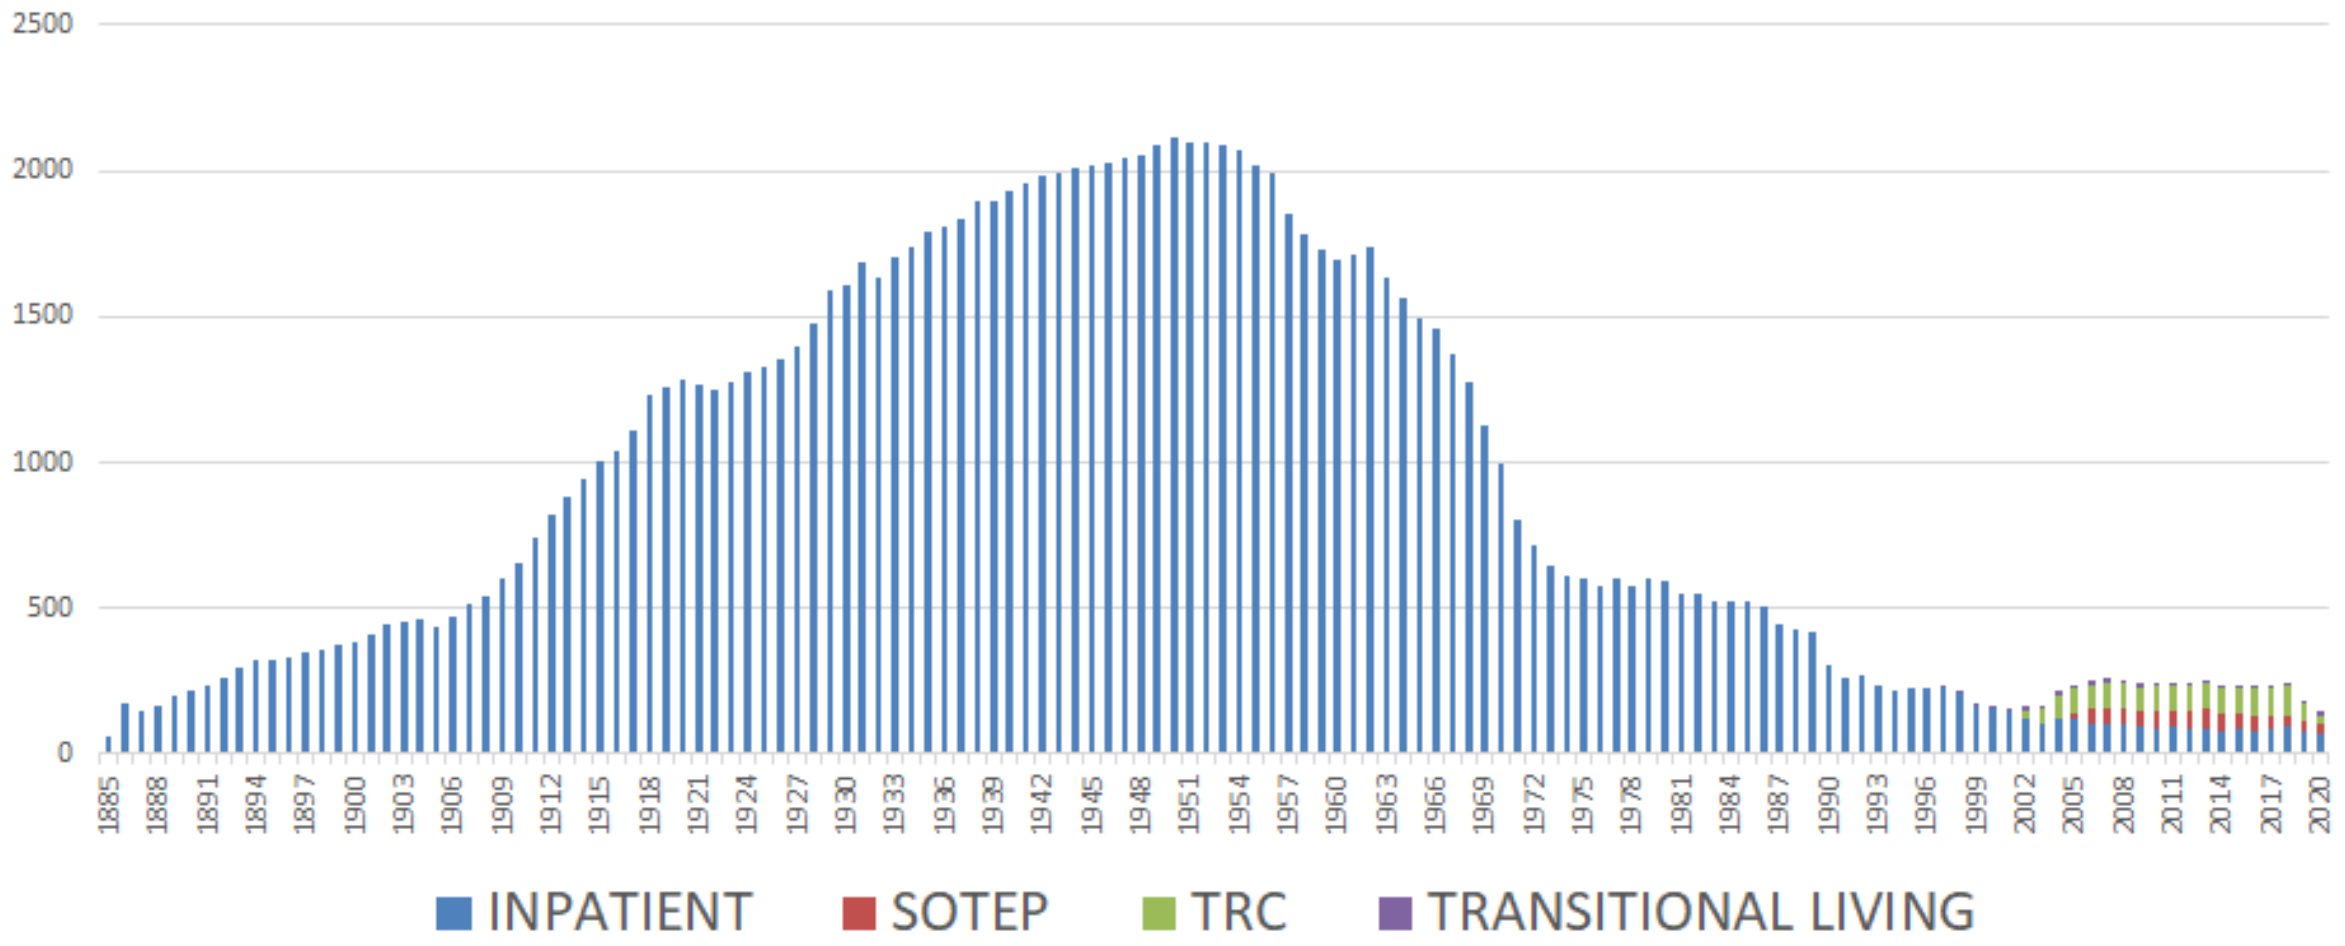
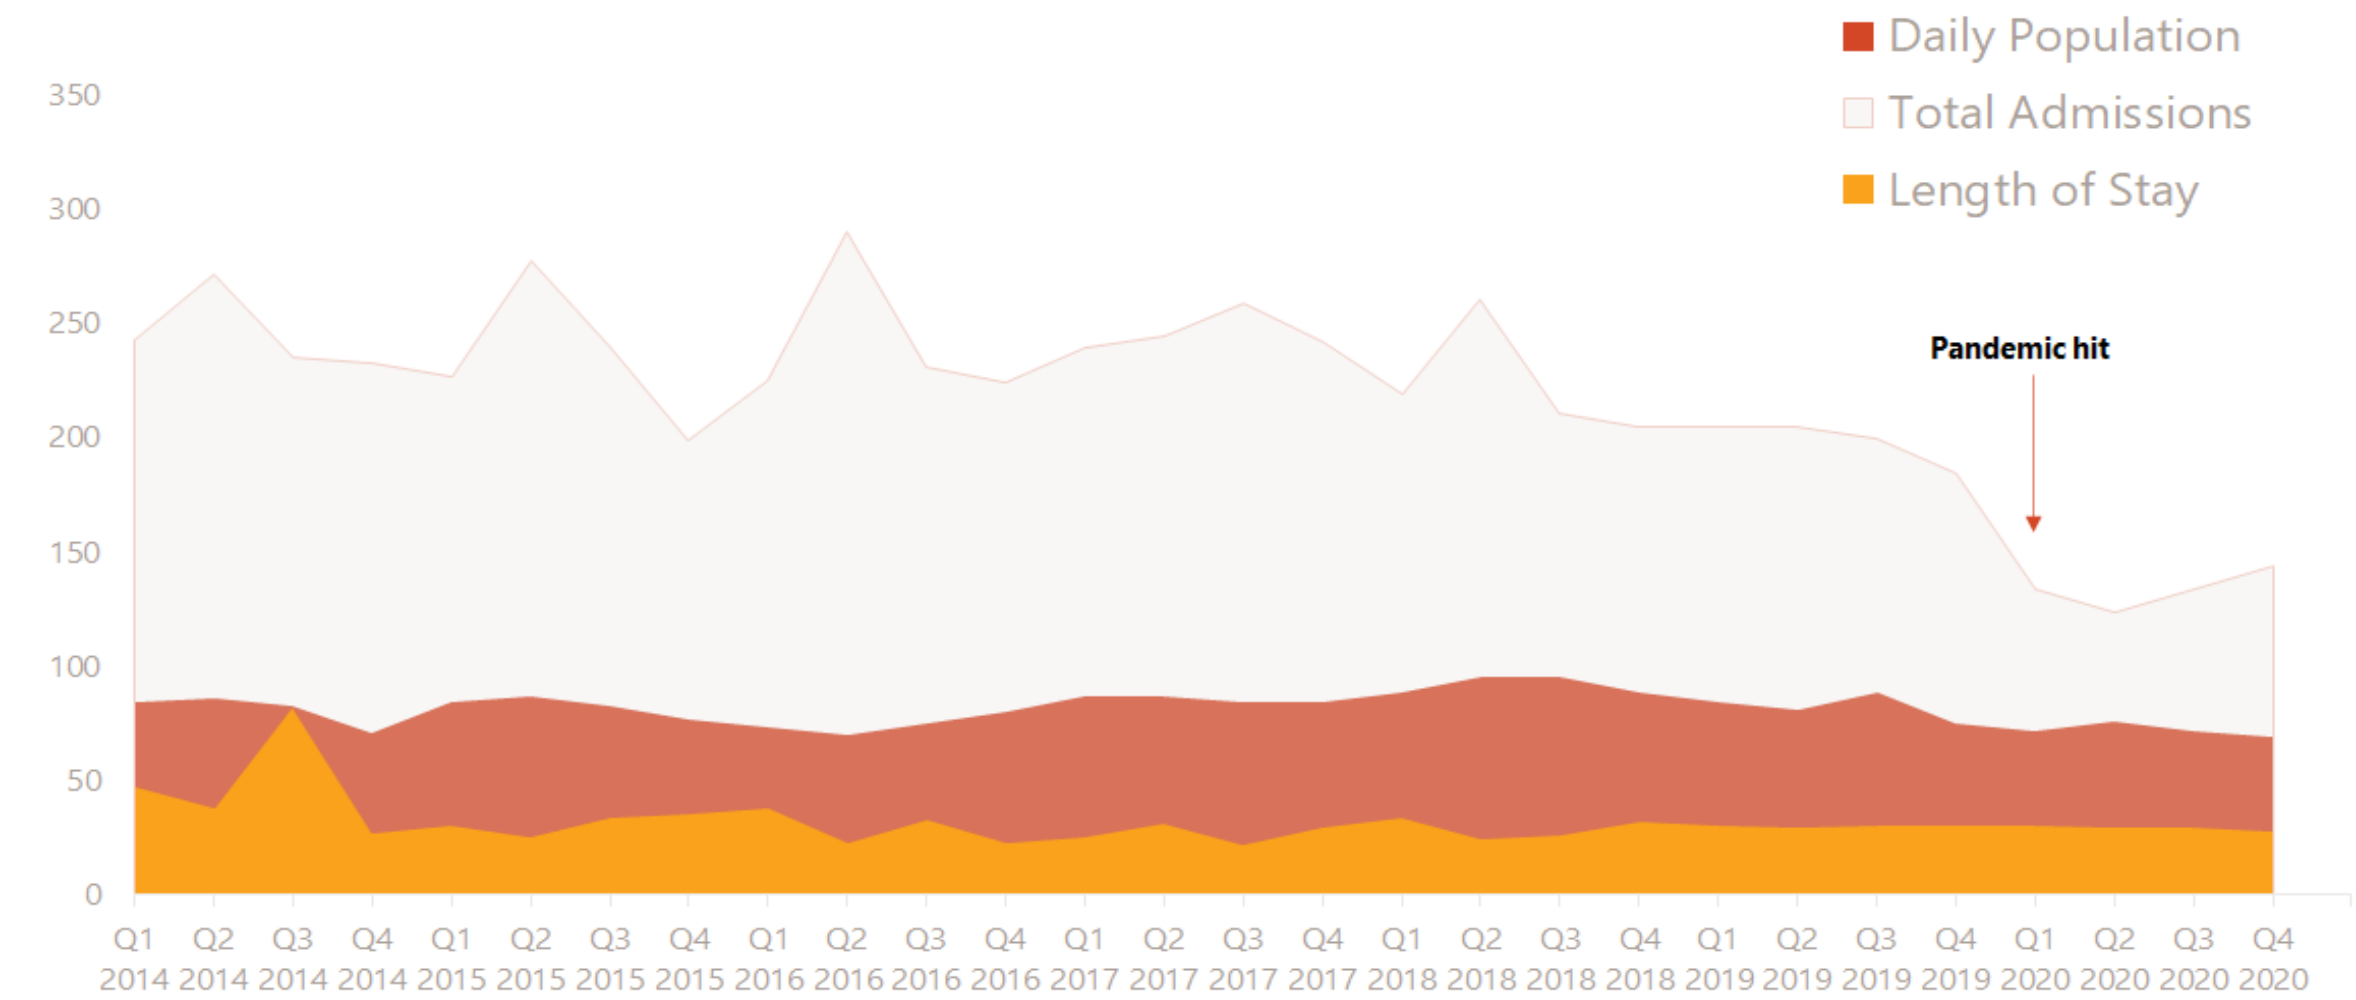
NORTH DAKOTA STATE HOSPITAL OVERVIEW



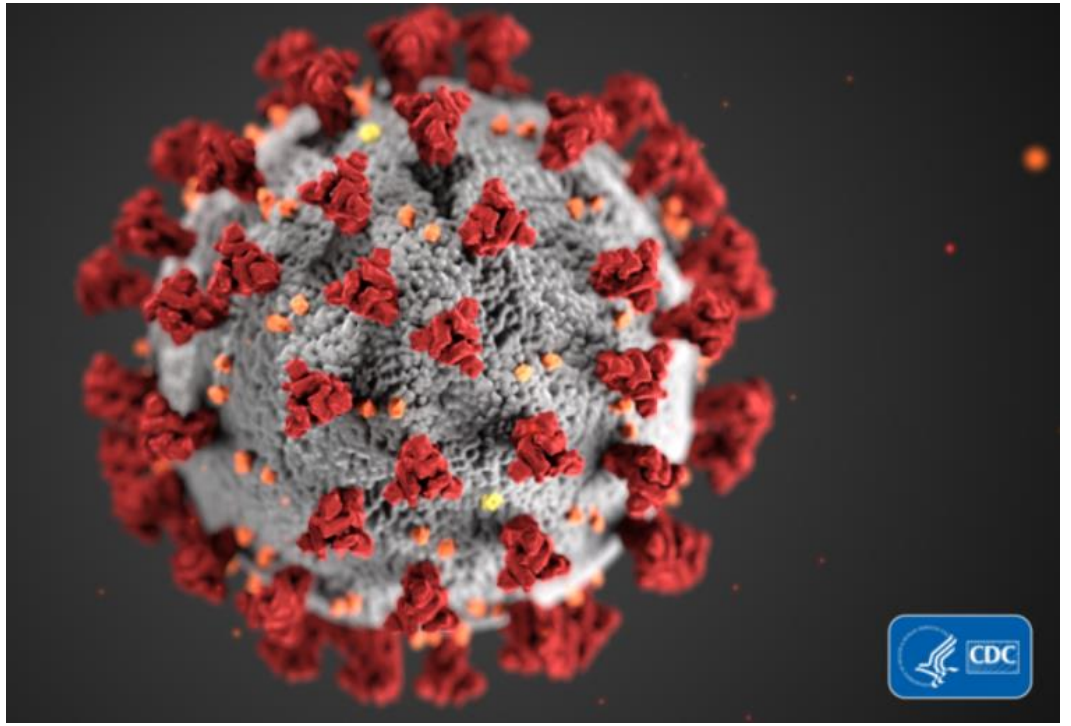
ABOUT US

STATE HOSPITAL SERVICES



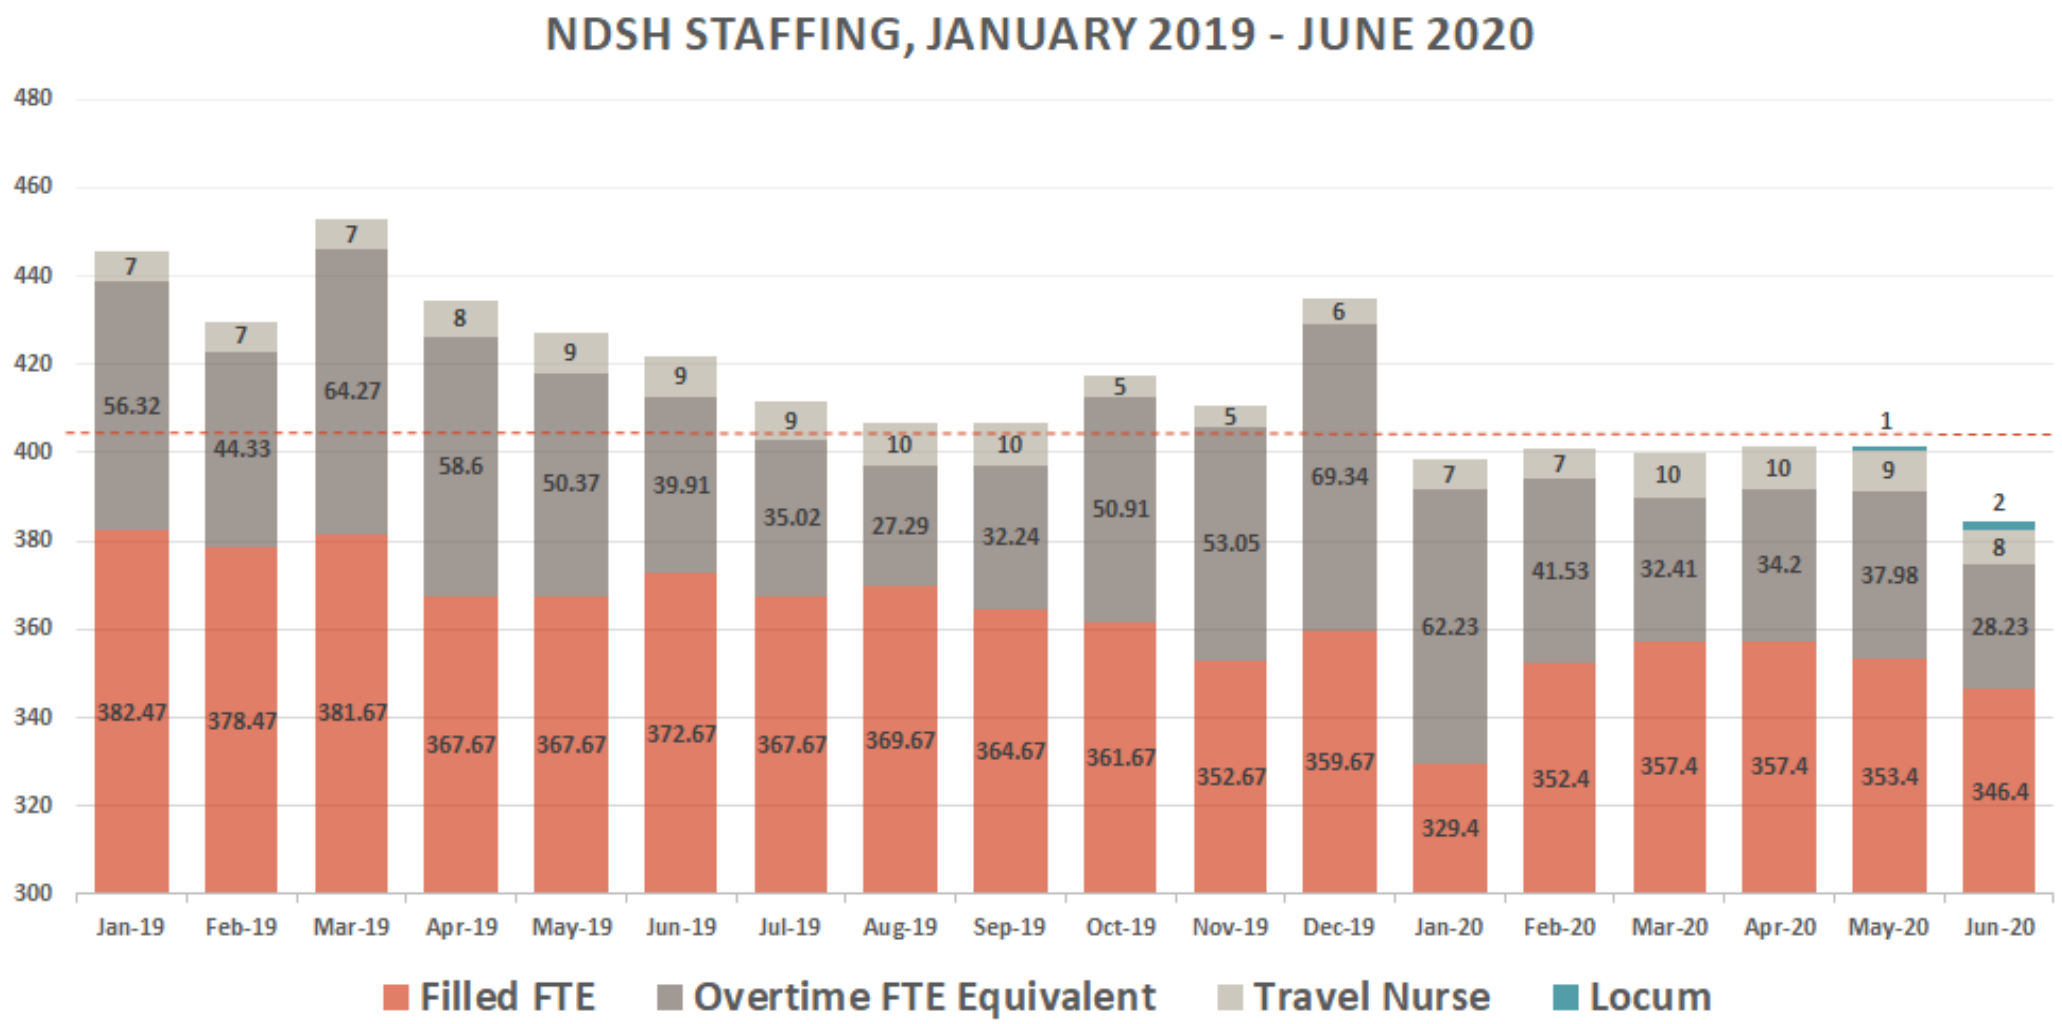
Specialized Safety-Net Quick Glance

NDSH CENSUS OVER TIME



NDSH ADMISSIONS AND DAILY POPULATION

COVID



NDSH PANDEMIC RESPONSE

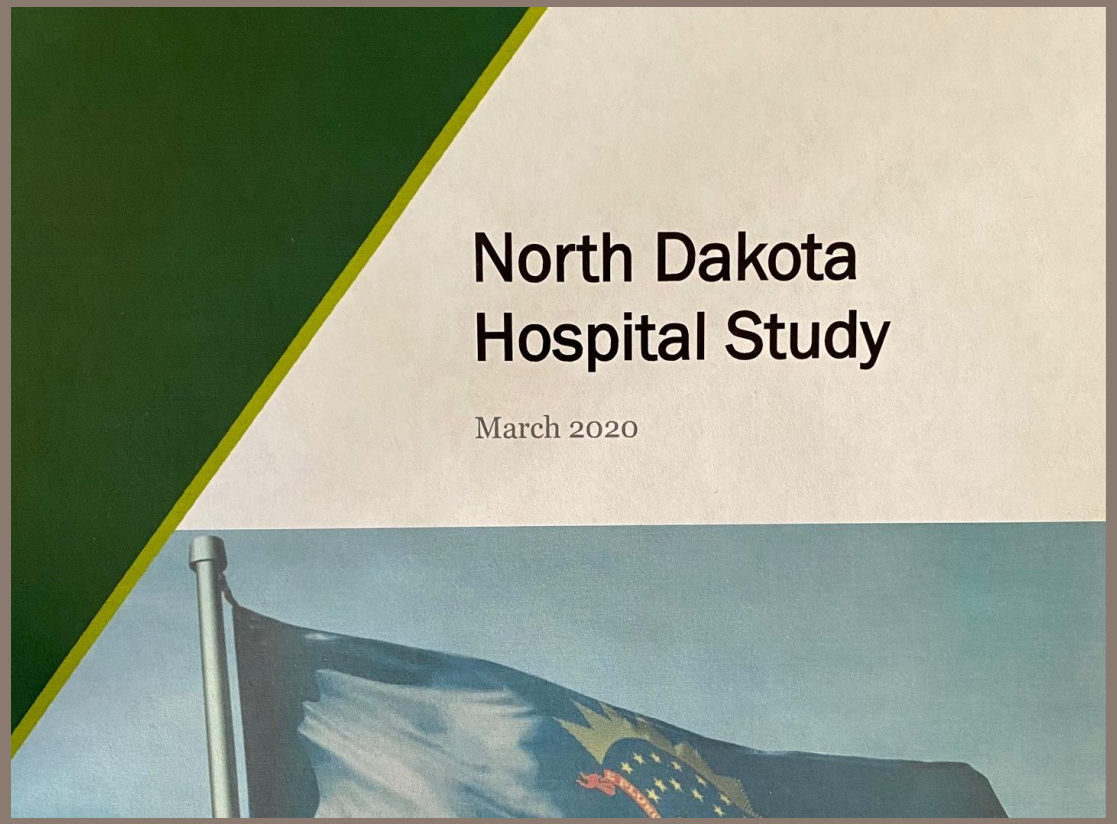
- Infection Control Procedures Expanded
- Weekly Surveillance Testing
- Visitor and Community Restrictions
- NDSH Role in North Dakota Bed Surge Plan
- Mandatory overtime and other staff shortage issues

NDSH STAFFING

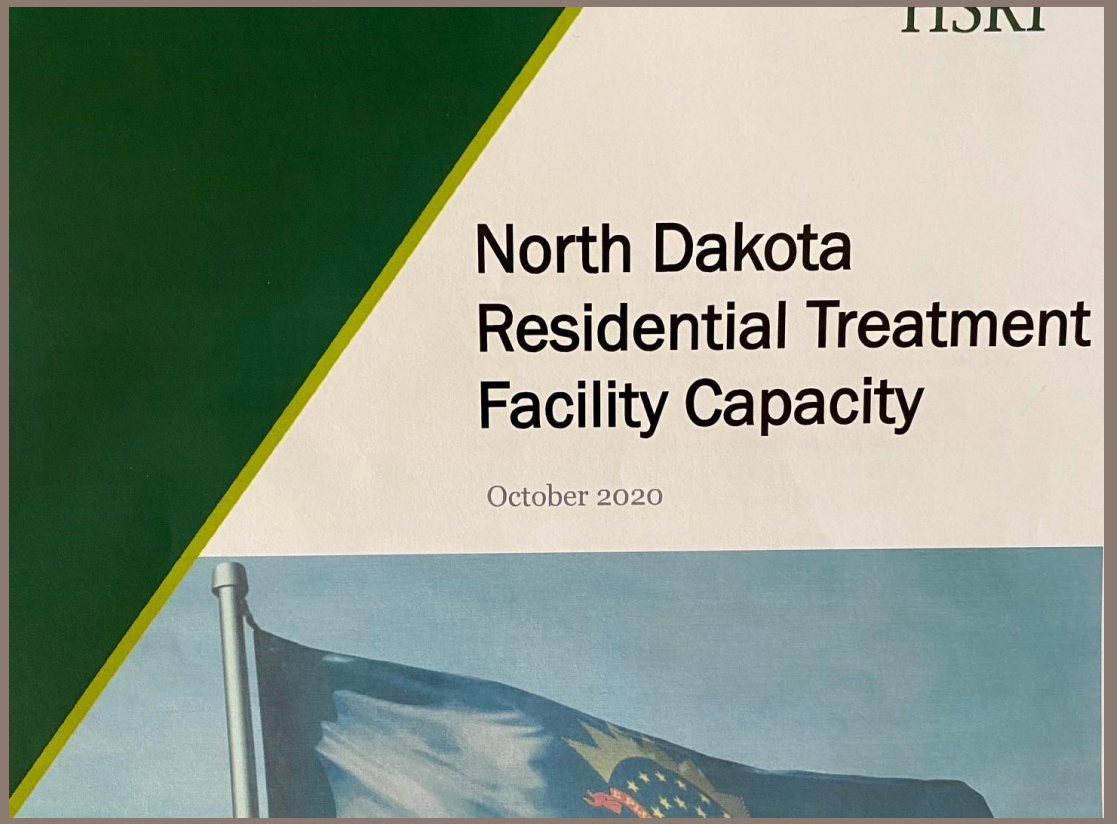
OVERTIME AND AGENCY STAFF MAKE UP THE DIFFERENCE

KEY APPROACHES

NDSH BIENNIAL ACCOMPLISHMENTS

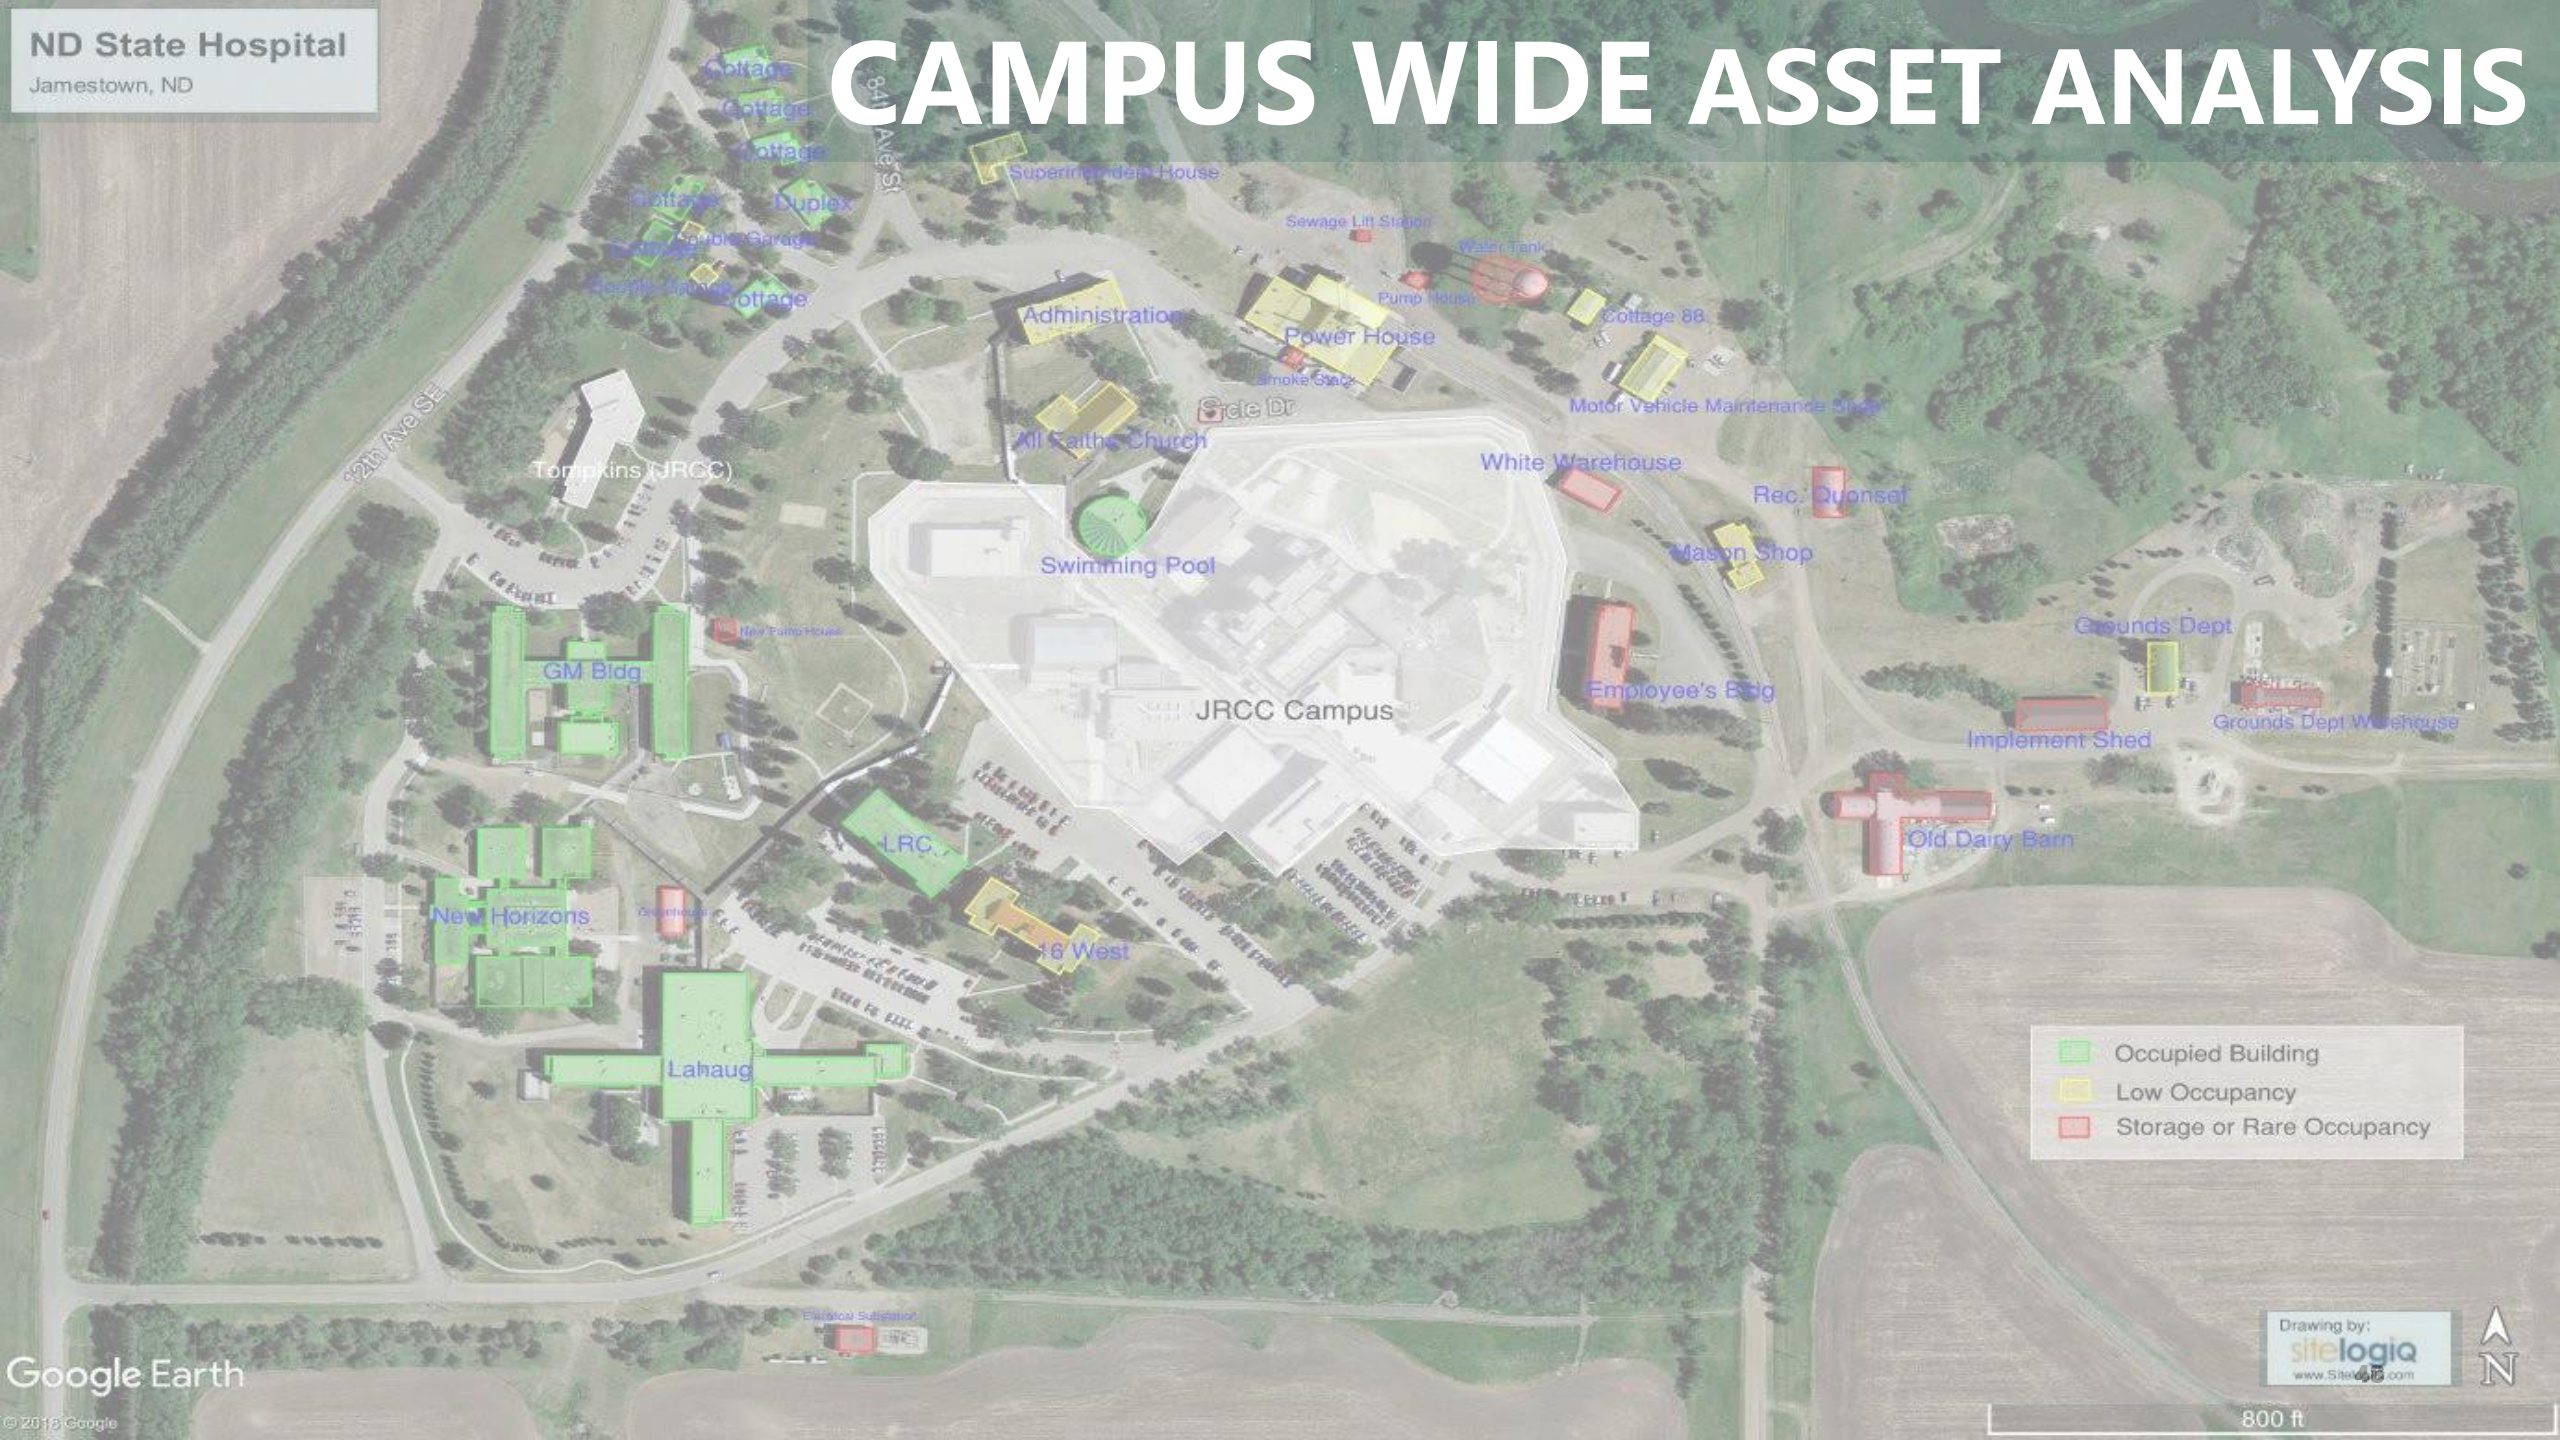


- Psychiatric and residential bed studies
- Campus infrastructure and building conditions analysis
- Forensic services expanded



SB 2012 SECTION 18
REPORT TO LEGISLATIVE MANAGEMENT

- Identify size and use of new state hospital
- Identify impact of crisis service expansion
- Identify potential use of Medicaid waivers
- Identify balance of inpatient, residential, and community services

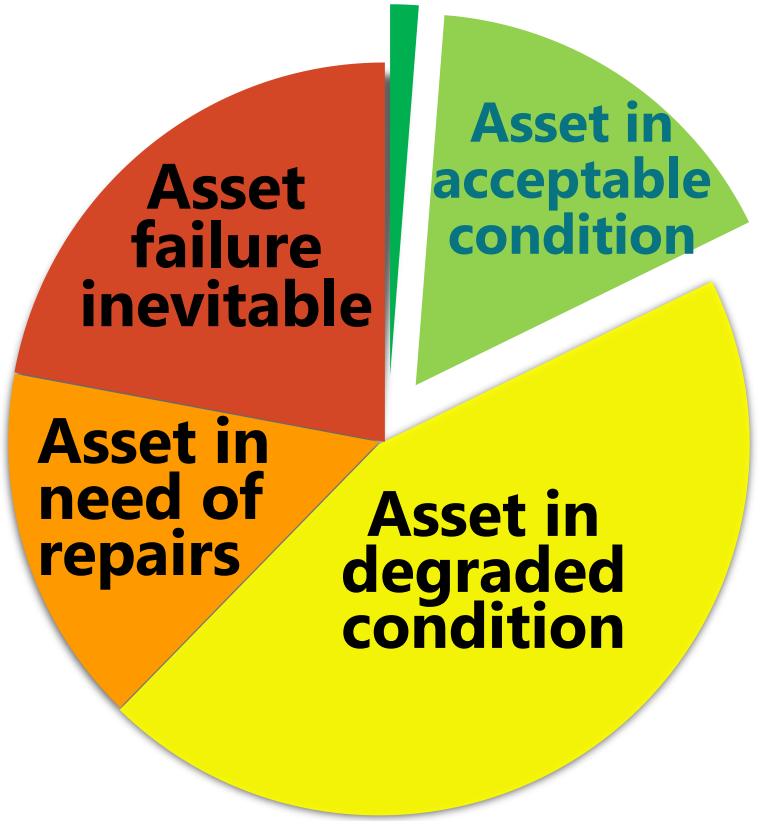


HSRI RECOMMENDATIONS

STATEWIDE PLAN RECOMMENDATIONS

STATE HAS SUFFICIENT PSYCHIATRIC HOSPITAL AND RESIDENTIAL BEDS

- Sufficient hospital and residential bed capacity
- 6-10 hospital beds needed in western North Dakota
- Build new state hospital at 75-85 beds
- Develop and expand alternatives to inpatient treatment
- Develop standardized coordination of services
- Integrate behavioral health services into physical health
- Do not pursue Medicaid IMD exclusions



CAMPUS WIDE ASSET ANALYSIS

ASSET ANALYSIS CONCLUSIONS

IMMEDIATE NEEDS FOR FAILING INFRASTRUCTURE

- Way past life expectancy
- At end of life
- Nearing end of life
- Middle of useful Life
- Beginning of useful life

NEW TREATMENT CAMPUS GOALS

IMPROVE CARE AND SAVE COSTS

01 An innovative approach to deliver a new Treatment Campus to accomplish Legislature's directive

02 Finance new construction with minimal to no upfront capital spending

03 **Eliminate over $5M in annual operating inefficiencies and duplicative support**

04 Provides operating and lifecycle cost certainty for the next 40 years

05 Provide a new facility that improves patient and staff safety and improved treatment

06 **Eliminate $148M of deferred Maintenance needs and provides a new facility with essentially a 40-year warranty**

07 Significantly reduce operating costs, and ensure cost certainty and facility condition for the next 40 years

WHY A NEW HOSPITAL

Offer safer & better care at a lower cost

Safety Concerns

Secure Entrance Issues

- The ability to have unwanted ingress/egress

Limited Sightlines

- Impacts ability of staff to observe patients at all times

Outdated Configurations

- Does not meet current care needs
- Anti-ligature limited

Care Concerns

Regulatory Deficiencies

- Joint commission requirements
- Life Safety Code requirements

Indoor Environment

- Contributes to longer stays
- Staff satisfaction and performance suffer

Cost Concerns

Operating Cost Inefficiency

- Aged facility systems are nearing (or have exceeded) end of useful life
- Deferred maintenance list continues to grow
- Difficult to staff maintenance FTEs

Excess Campus Footprint

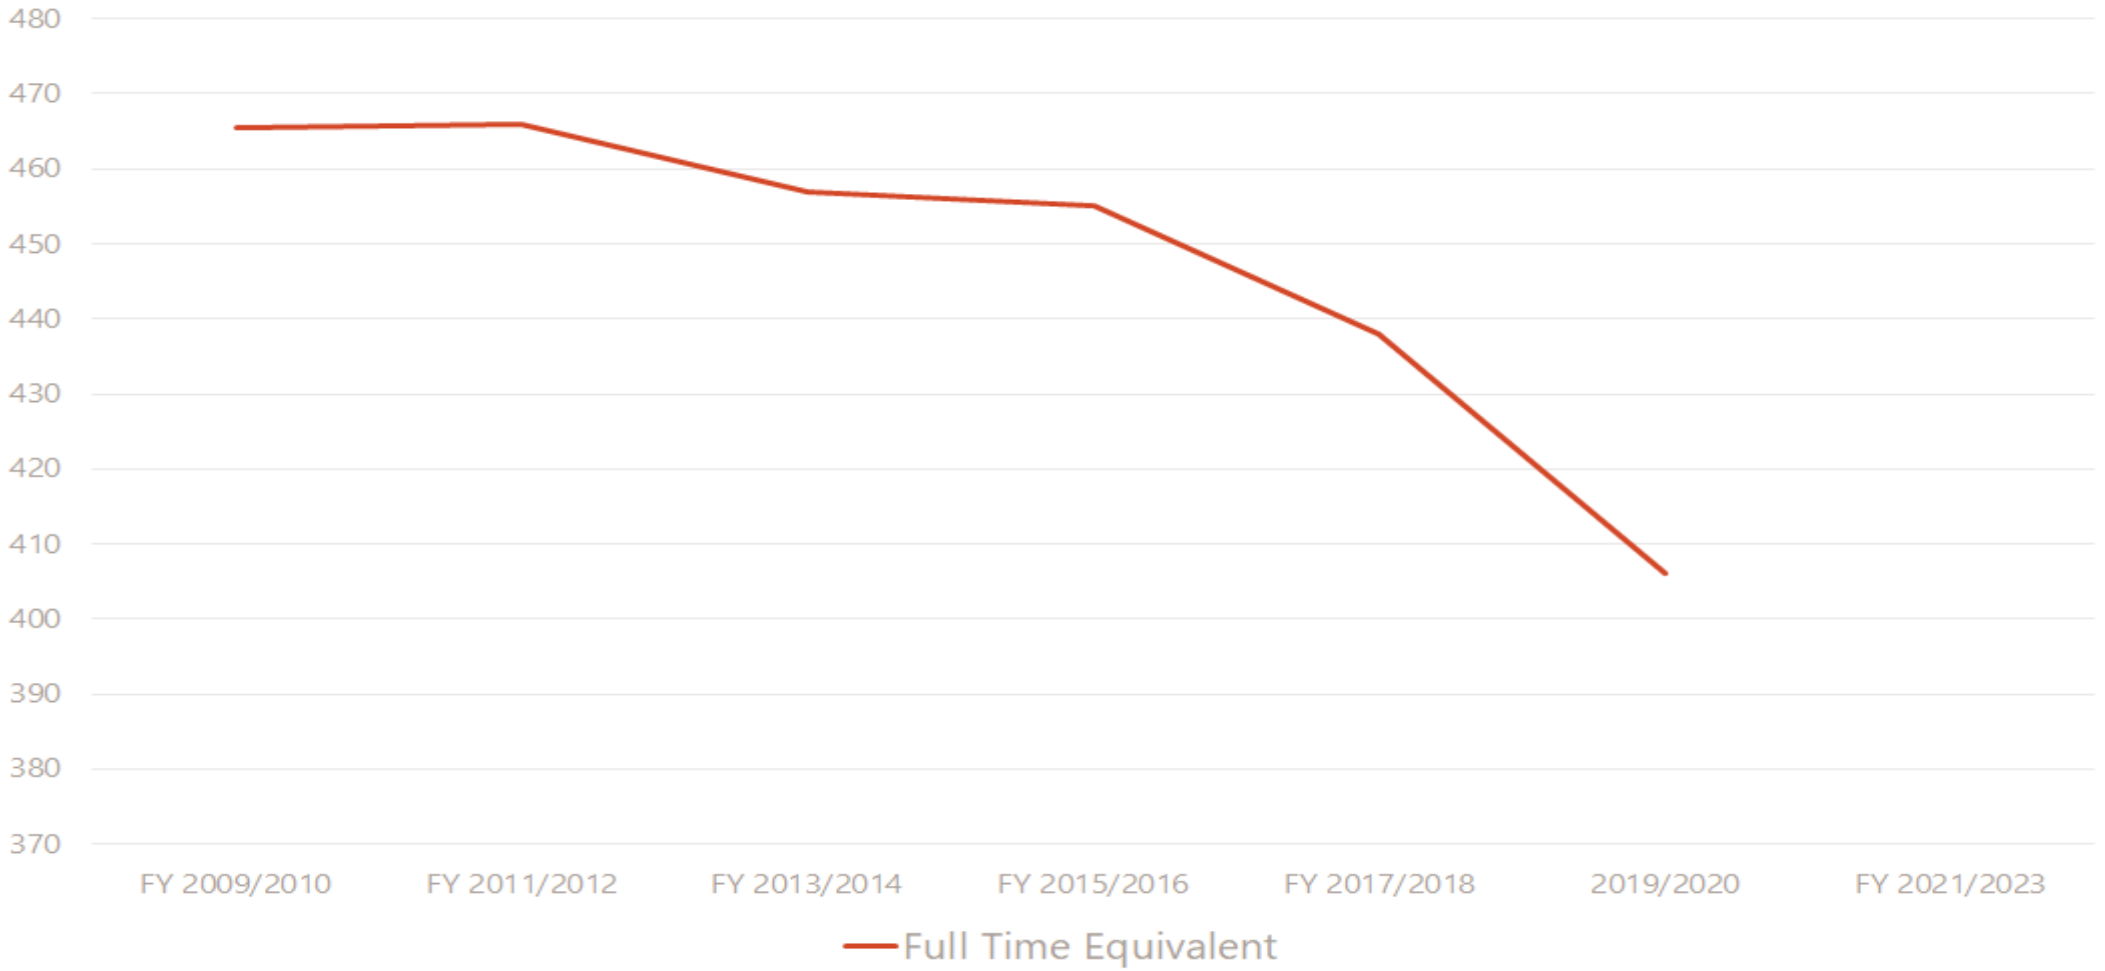
- Multiple buildings and excess square footage requires higher staffing
- Duplication of FTE services and/or roles

NEW STATE HOSPITAL VIA PUBLIC / PRIVATE PARTNERSHIP (LEASE)

Patients recover faster when treated in a modern, therapeutic environment.

Annual costs and savings to build a new State Hospital via private / public partnership (lease)	**$$$**
Annual lease payment (principal and interest)	$7,160,000
Annual facility operations cost savings (e.g.: carpet, light fixtures, plumbing)	($850,000)
Annual utility cost savings	($50,000)
Annual new hospital FTE reductions	($2,680,000)
Annual capital reinvestment savings	($1,8666,667)

BUDGET BUILT ON SMALLER HOSPITAL



BUDGET REDUCTION CONTINGENT ON THREE THINGS

1. 6-10 hospital beds needed in western North Dakota
2. Statutory authority to decline admissions when full
3. New hospital without costly deferred maintenance

Reduce state hospital inpatient services to 75 beds

CURRENT BUDGET REDUCES BY 27 FTE

OTHER PROPOSED BUDGET CHANGES

PROPOSED REDUCTIONS CONTINGENT ON CERTAIN FACTORS

- End DOCR contract and close treatment beds
- Provide land for National Guard training center

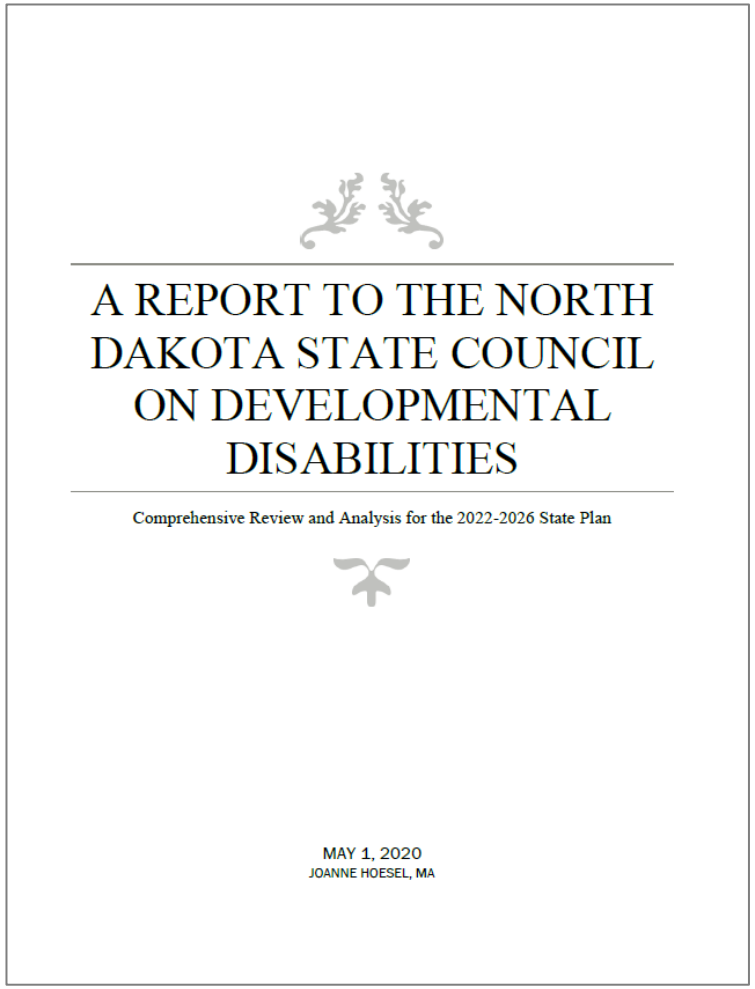
ND State Council on Developmental Disabilities

ND STATE COUNCIL ON DEVELOPMENTAL DISABILITIES

Purpose / Mission

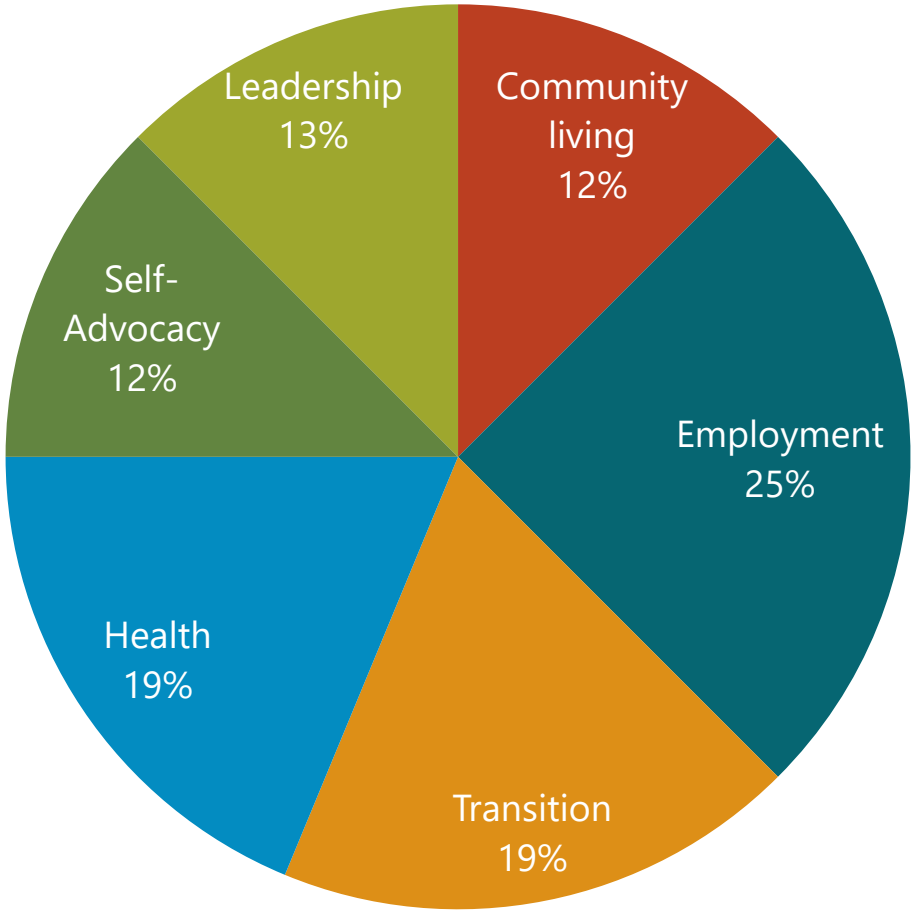
The Council advocates for policy changes that promote choice, independence, productivity and inclusion for all North Dakotans with developmental disabilities. The Council provides funding for and supports projects and activities that maximize opportunities in these areas for consumers and families.



ND STATE COUNCIL ON DEVELOPMENTAL DISABILITIES

Key Findings: 2022-26 State Plan Comprehensive Review and Analysis

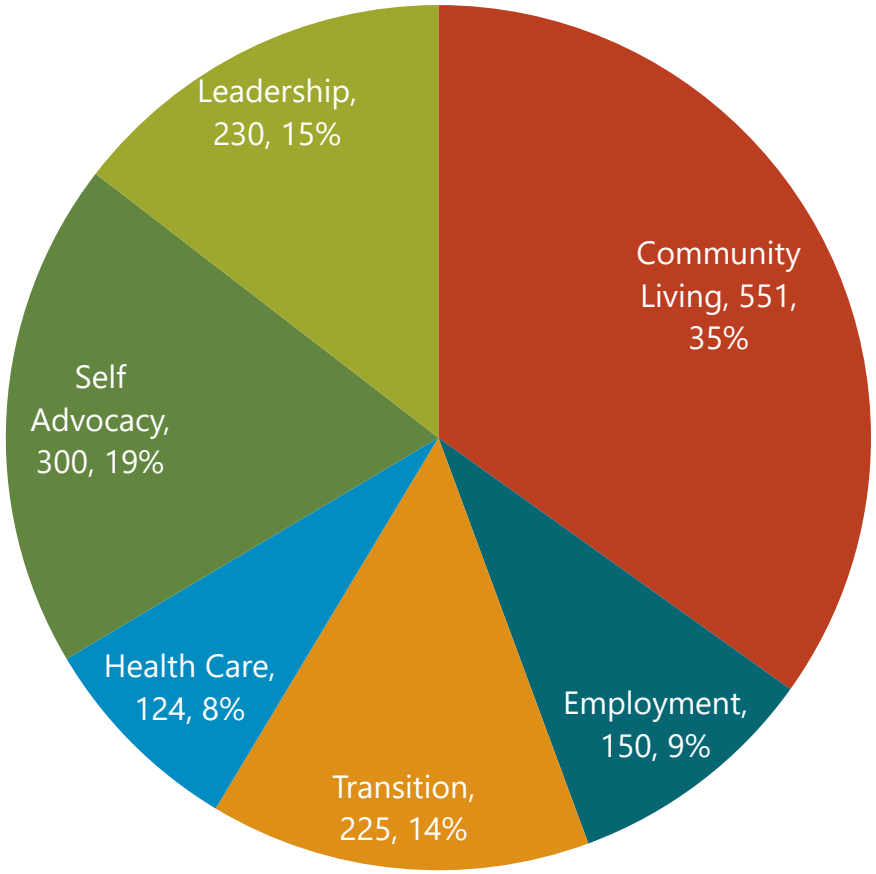
The following recommendations are offered as a roadmap for system improvement and present a range of possible options for consideration.



1. Fetal Alcohol Syndrome
2. Immunizations
3. Telehealth for IDD
4. Money Follows the Person
5. Culturally appropriate services
6. Infant Development services
7. Rental Assistance
8. Supported Decision-Making
9. Special Needs child care

DEVELOPMENTAL DISABILITIES COUNCIL

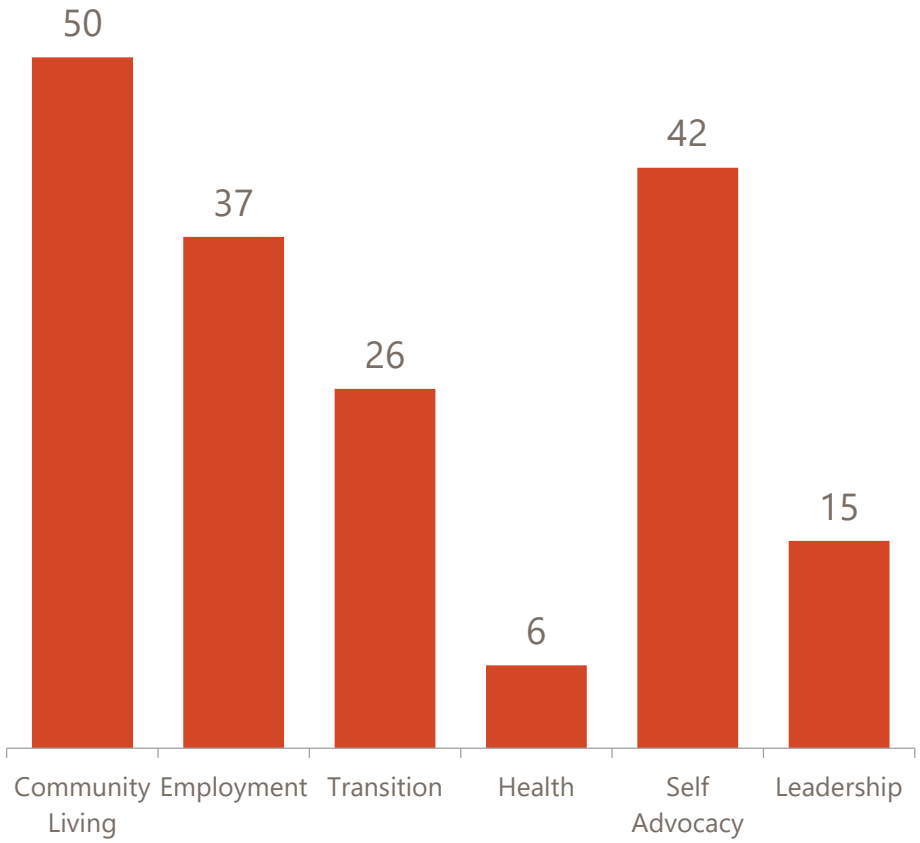
Our Work: Programs & Policies created or improved



- SAFE-Self Advocates Feeling Empowered Training.
- Advocates Leading their Lives
- Disability Awareness Training for First Responders
- Power Up Health Conference
- Supported Employment for Transition Age Youth
  - Kalix
  - Community Living Services

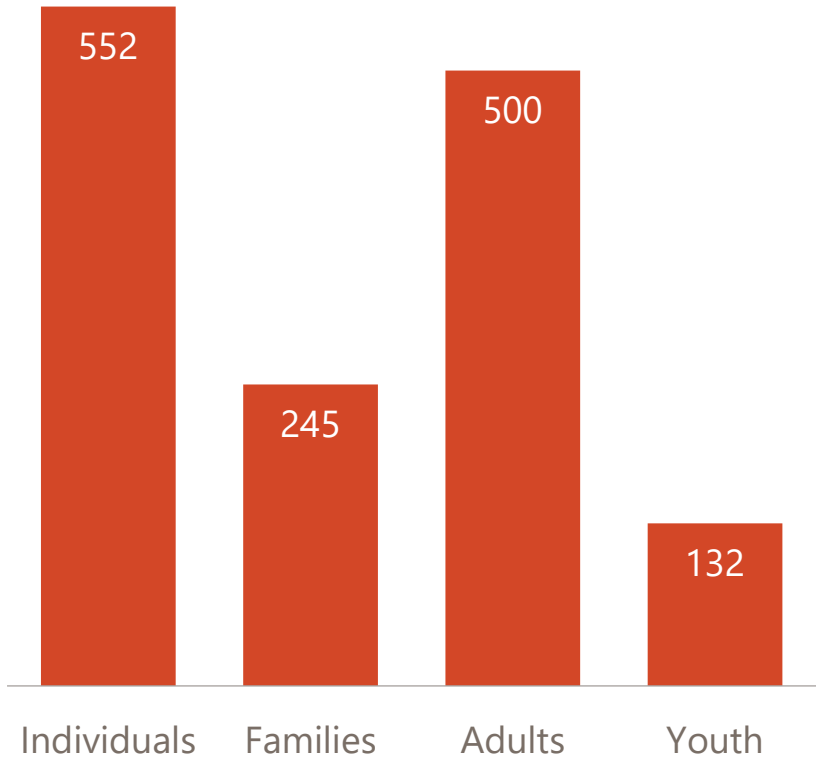
DEVELOPMENTAL DISABILITIES COUNCIL

Our Work: General public reached as a result of Council initiatives



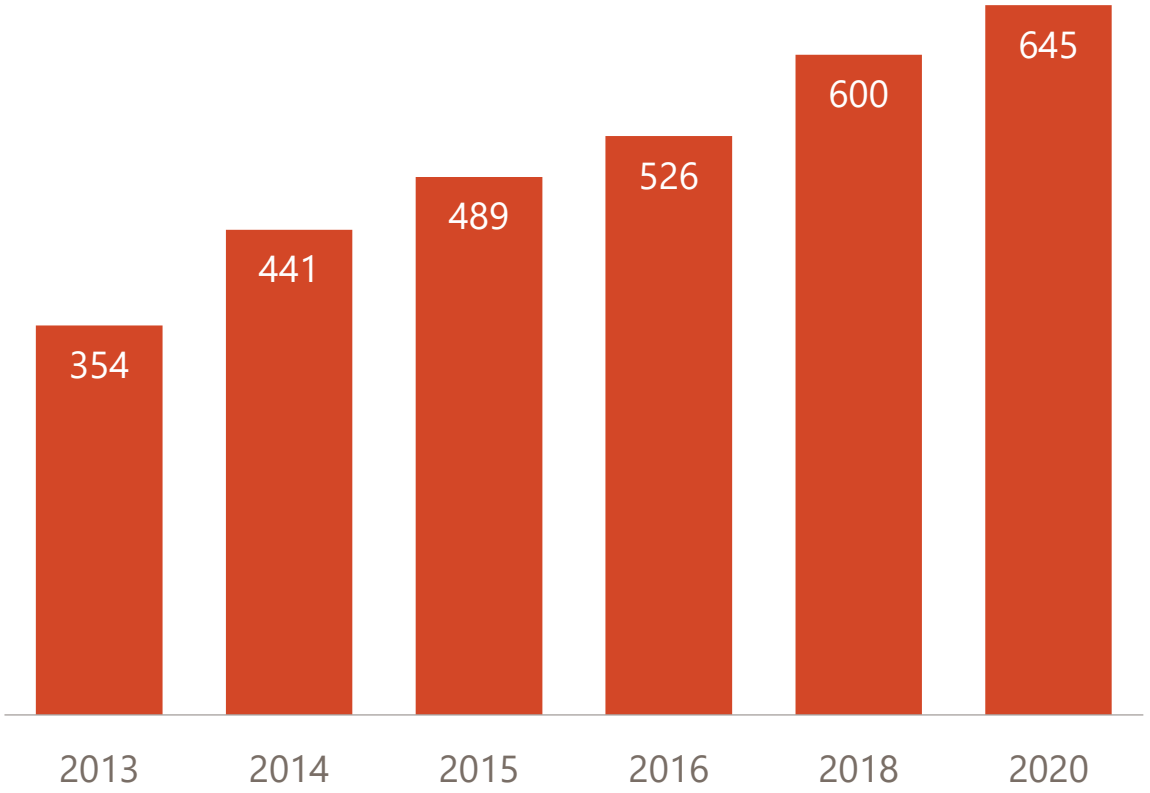
- Monthly zoom **stakeholder calls**, quarterly self-advocacy meetings, monthly self-advocacy board meetings.
- Granted funds to the North Dakota Association of Community Providers to **recruit/retain workforce** to developmental disabilities field
- Partnered on a project with **Money Follows the Person**
- Funded the **Supported Decision-Making** Project
- Hosted a 3-part virtual **Self Advocacy Conference**
- Hosted a one-day **Health Conference**
- Provided funding to 9 **families to attend** trainings/conferences. They share the information learned.
- Provided funding for **13 Small Innovative Projects** of $10,000 or less. Examples: adapted swimming at the YMCA, assistive technology to Bismarck State College for students with disabilities, funded the GROW garden project, updated DD modules, Provided funding for more work with transition age students on the reservation on Discovery, etc.
- Provided **21 Grants** to individuals, providers, and other entities for **COVID relief**. Grants to include; assistive technology, starting an online workout program, materials for activities, accessible gardening, communication tools, laptops, etc.

DEVELOPMENTAL DISABILITIES COUNCIL



Organizations involved in Coalitions, Networks or Partnerships

- Member of the DPI Community of Practice Group
- Chairperson of the North Dakota Disability Advocacy Consortium
- Member of the Olmstead Commission
- Partner on projects, training, and advocacy with Protection and Advocacy and the North Dakota Center for Persons with Disabilities as required by our Federal funders
- Treasurer of the National Association of Councils on Developmental Disabilities



DEVELOPMENTAL DISABILITIES COUNCIL
Individuals Engaged in Training and Advocacy

People Trained Through 5-Year Plan Goals

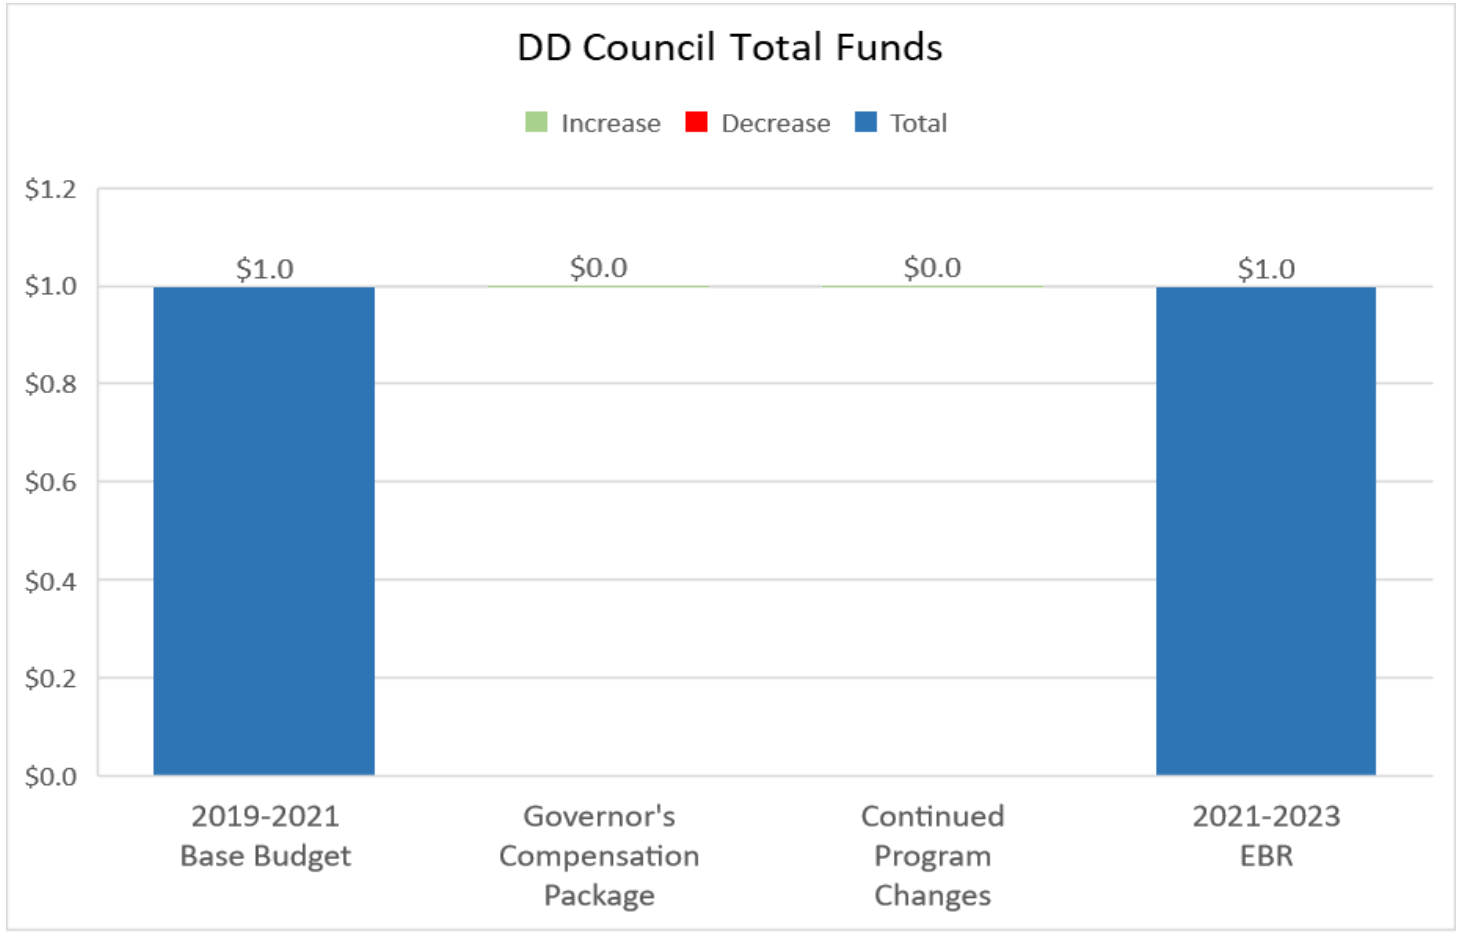
People Active in System Advocacy

NDSCDD 21-23 Legislative Priorities

Diverse projects that improve opportunities for people with intellectual and developmental disabilities

Build capacities of individuals, families and communities, enabling each to become more self sufficient through the Developmental Disabilities Assistance and Bill of Rights Act

DEVELOPMENTAL DISABILITIES COUNCIL



Budget Overview / Summary

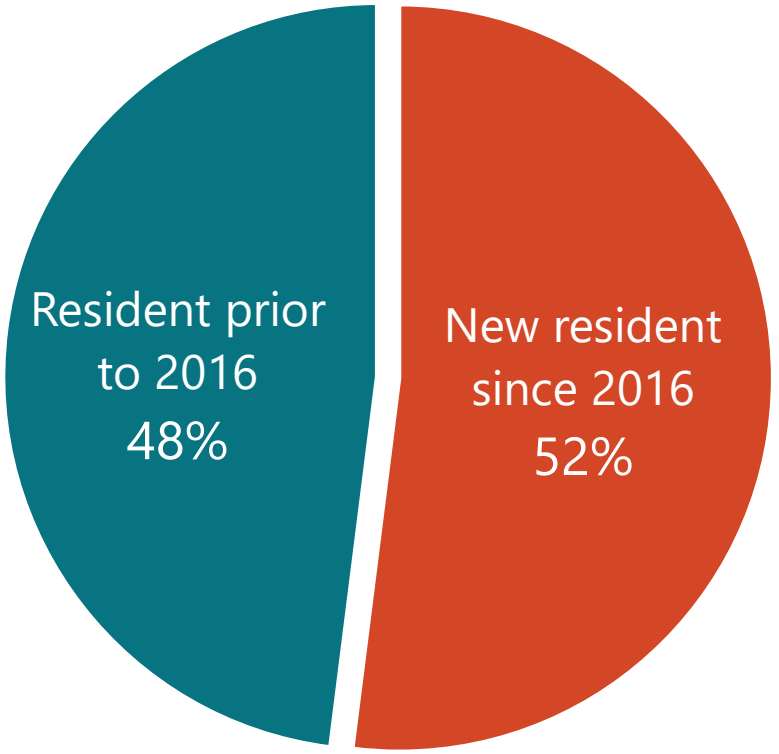
Reasons for Admission to LSTC

- Physical aggression within the family home or residential setting (towards family, employees, or other vulnerable people that they live with)
- Significant property destruction
- Self-abuse
- Other unsafe behaviors

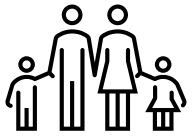


Increase in admissions with higher cognitive abilities (13 of 15 with mild/moderate IDD)

LIFE SKILLS TRANSITION CENTER
Residential Turnover

Transition Planning begins upon admission to LSTC

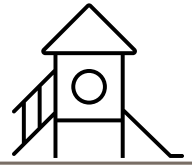
Care Team works together to identify long-term solutions for individual that reflect their choice and their needs



DHS Invests in People

Human services is the infrastructure of well being.

Human services can help people realize their full potential.



Our communities are stronger when all people can realize their full potential.

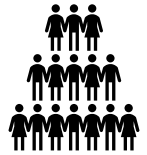
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

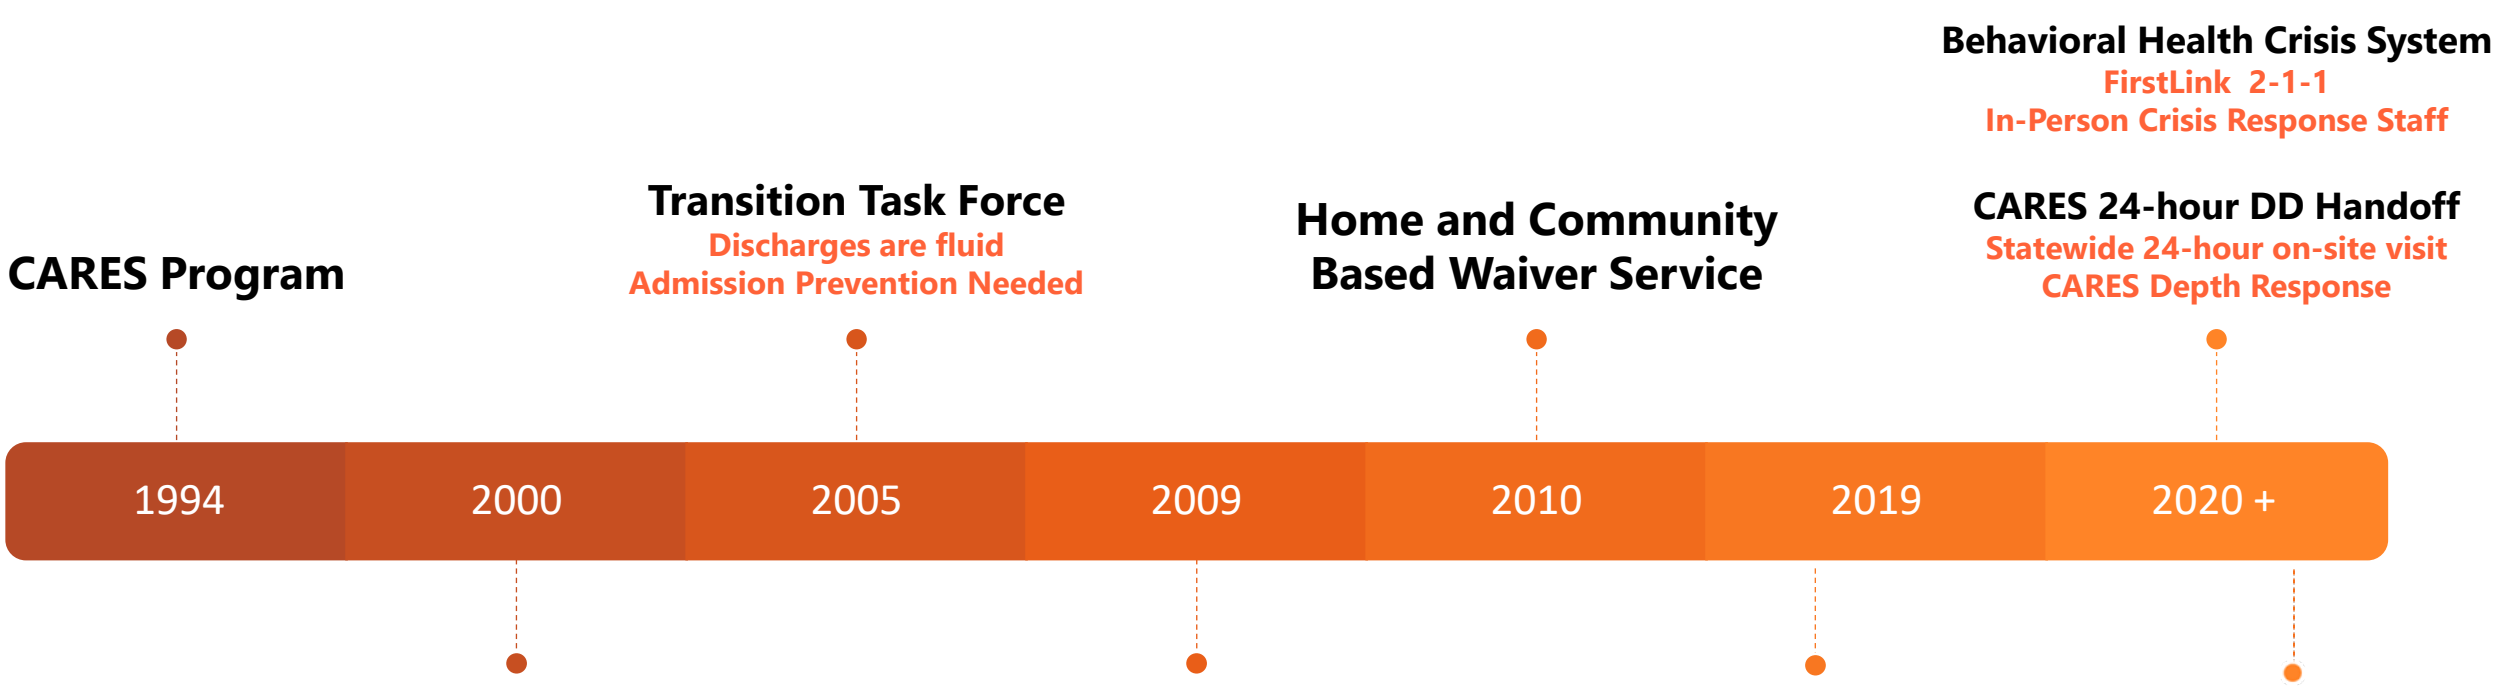
High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

Services Closer to Home



- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

DHS Key Priority

BIG Idea

Accelerate our efforts to transition adults and youth to smaller community settings.

TRANSFORMATION OF LSTC SERVICES

Transition

The result of a range of supportive activities that, together, help ***prepare*** an individual currently who currently lives in an institutional setting to return to living in their community, if that is their choice.

Rehabilitation
Financial Planning
Options Counseling
Care Provider(s) Recruitment

Housing Assistance

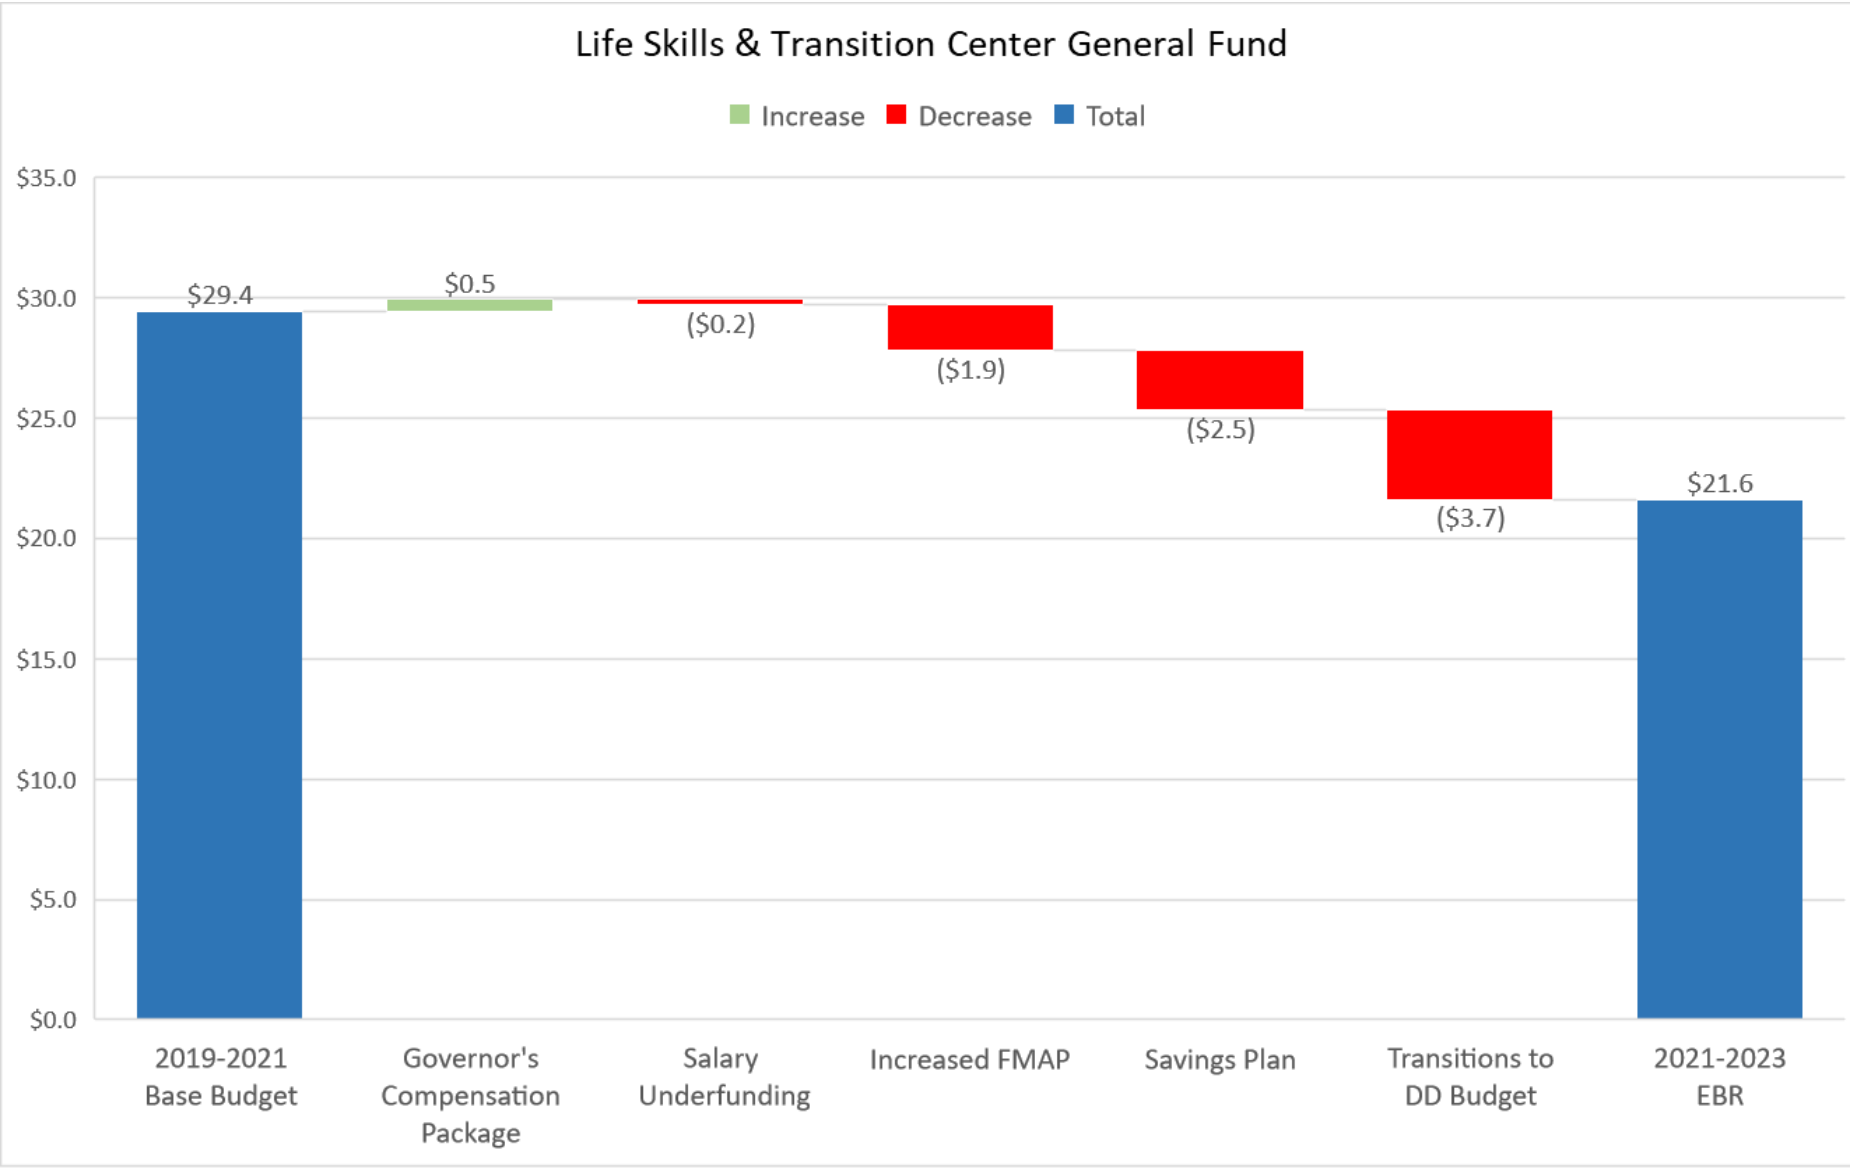
Overview Of Budget Changes (In Millions)

Description	2019-2021 Budget	Increase/ (Decrease)	2021-2023 Executive Budget
Salary and Wages	48,807,542	(8,851,333)	39,956,209
Operating	9,141,275	(1,324,010)	7,817,265
Capital	846,131	0	846,131
Total	58,794,948	(10,175,343)	48,619,605
General Fund	29,426,161	(7,777,688)	21,648,473
Federal Funds	26,880,105	(2,430,575)	24,449,530
Other Funds	2,488,682	32,920	2,521,602
Total	58,794,948	(10,175,343)	48,619,605
Full Time Equivalent (FTE)	322.84	(14.50)	308.34

Overview Of Total Budget Changes (In Millions)

15% Savings Plan



- LSTC Savings
  - Operational ($0.2) million
  - FTE ($1.4) million
- Net Savings ($3.2) million

Transitions to DD ($7.9) million

- Budget incrementally as people move to the community

The Net Savings DHS will realize from the 15% Savings Plan and Transition to DD Budget will be $3.2 million.

Overview Of General Fund Changes (In Millions)

15% Savings Plan

- LSTC Savings
  - Operational ($0.2) million
  - FTE ($0.8) million
- Net Savings ($1.5) million

Transitions to DD ($3.7) million

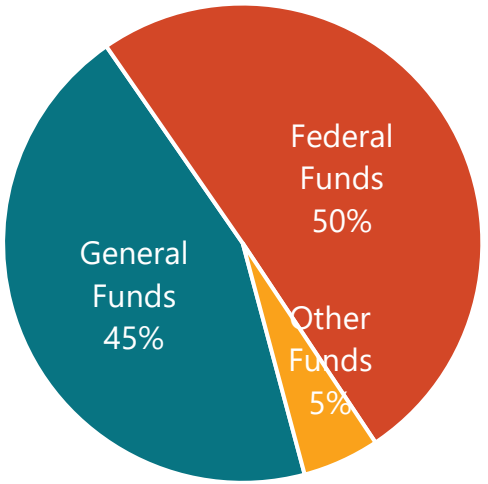
- Budget incrementally as people move to the community

The Net Savings DHS will realize from the 15% Savings Plan and Transition to DD Budget will be $3.3 million.

OTHER BUDGET IMPACTS

Permission to convey a portion of 2 parcels of land commonly referred to “the bowl” to the Grafton Park Board

Payment of special Assessments



LSTC Budget Summary

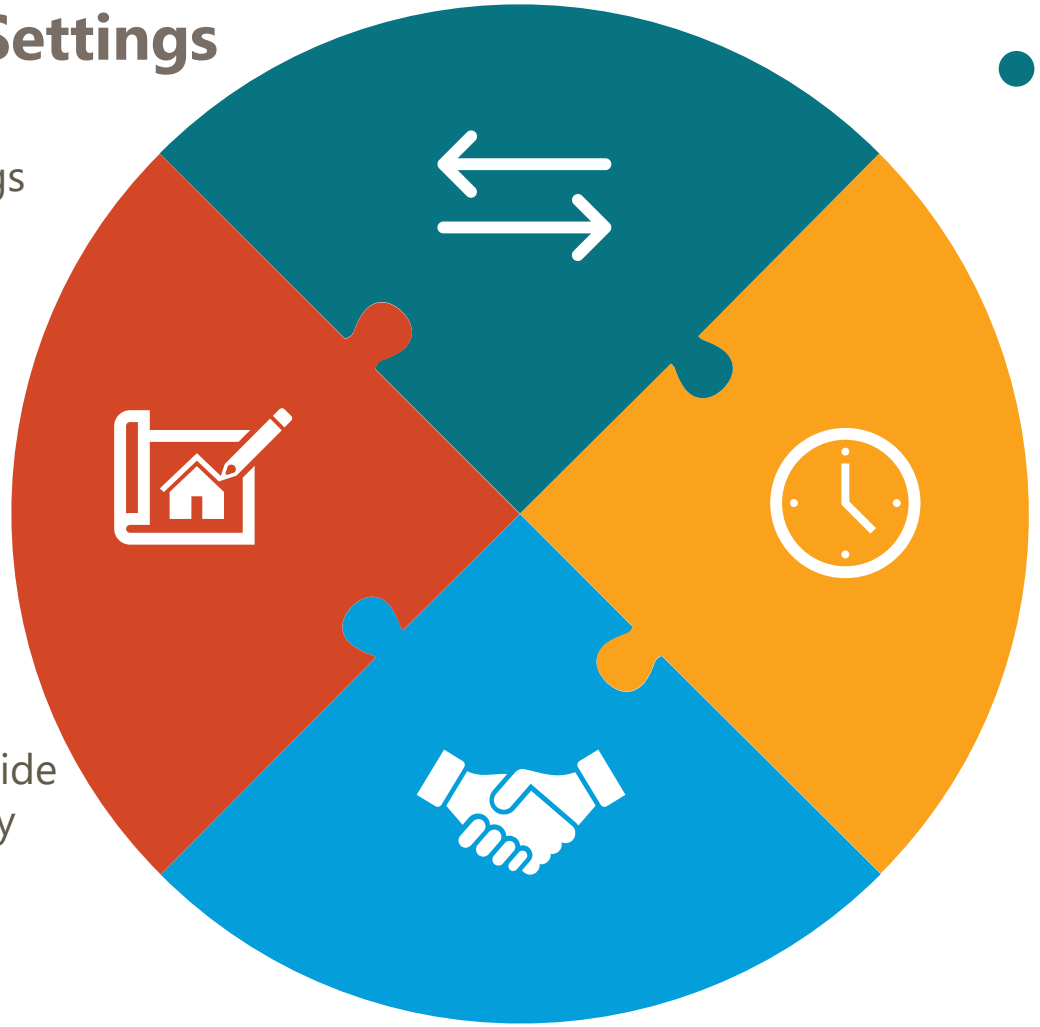
19-21 Budget	**$58,794,948**
21-23 Budget (exec)	**$48,619,605**

Reduction of 14.5 FTEs; $10,175,343 budget reduction (50% in federal funds)

- Reduce census by 26 (16 youth, 10 adults) via both transitions and diversions
- Shift operations to re-orient toward crisis and stabilization service
- Reduce general fund contribution to adaptive equipment service, seeking alternate revenue sources

NOTE: Interconnection between LSTC, CFS, and DD budgets as service models shift

Keys to successful acceleration of transition to community



Marshalling our resources to support a person's ability to make an informed choice about the most integrated setting that is right for them

New Community Settings

Create new small scale specialized residential settings (behavioral focus) in 2-3 communities

Shared Understanding of LSTC Role

Re-establish LSTC as a setting that specializes in crisis and stabilization services

Community Crisis Support

Continue to build LSTC crisis support team capacity to provide on-site response to emergency crisis in various community settings within 24-hours

Crisis Stabilization

Build staffing model and operational processes to support admission to LSTC within 48-hour

LSTC Net Budget Savings Plan Requires Partnership

Collaboration between LSTC, DD, and Children Family Services as well as ND community providers.

Census reduction of 16 youth and 10 adults to homes in their community.

The transition of people will occur gradually throughout the biennium as appropriate settings are developed by community providers.

Each person and their family/guardian will be involved in the development of their Person-Centered Transition Plan.

The LSTC is recognized as a setting that specializes in crisis and stabilization services.

Meet Janie.

Meet Janie's Family.

Janie is 14. Janie is on the Autism Spectrum. She receives services through the Medicaid DD waiver.

She was living at home in Velva with her parents and two sisters, attending school part time.

Things at home were escalating. Her intensifying behaviors became too much for the family to handle. Everyone was exhausted.

Janie's family received in-home support (40-60 hrs/wk).

As things escalated, they worked with their DD case manager and DD diversion coordinator to identify options.

In-community options were limited. A crisis placement at LSTC was approved.

- Mom works part time at the elevator. Dad works full time at the nursing home.
- All three girls attend the local school (ages 7, 9 and 14).

A young girl is struggling. So is her family. What do we do?

- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

AGING & ADULT SERVICES
Program Purpose

Help older adults and individuals with physical disabilities to remain in their own homes and communities.

Protect the health, safety, welfare and rights of residents of long-term care settings and vulnerable adults in the community.

AGING & ADULT SERVICES
New in 19-21

- SPED Eligibility
- New Waiver Services
- HCBS Case Managers
- DOJ Settlement
- Electronic Visit Verification

AGING & ADULT SERVICES
What we do

Aging & Disability Resource Link (ADRL)

- Toll free resource line for people with questions about how to access services
- Centralized intake for HCBS services
- Proactive in-reach and out-reach to build awareness of HCBS options

HCBS Case Management

- HCBS case management provided to consumers
- Eligibility review
- Care Team planning
- Service authorization

Protective Services

- Vulnerable Adult Protective Services delivered statewide
- Ombudsman services for long term care residents

Senior Nutrition & Community Supports

- Administration of Older Americans Act
- Senior nutrition program
- Support for Family Caregivers
- Lifespan Respite grant

Administration HCBS and Partnerships

- HCBS 1915(c) Medicaid waiver
- Medicaid State Plan – Personal Care
- SPED / Expanded SPED
- Money Follows the Person

AGING & ADULT SERVICES
Individuals receiving HCBS services (Nov 2020)

ND's HCBS for older adults and people with physical disabilities are coordinated by 64 HCBS case managers and delivered by 1149 Qualified Service Providers (QSPs) who served 2,300 people ages 18-104 in 2020

Source: DHS HCBS Caseload Data Nov 2020

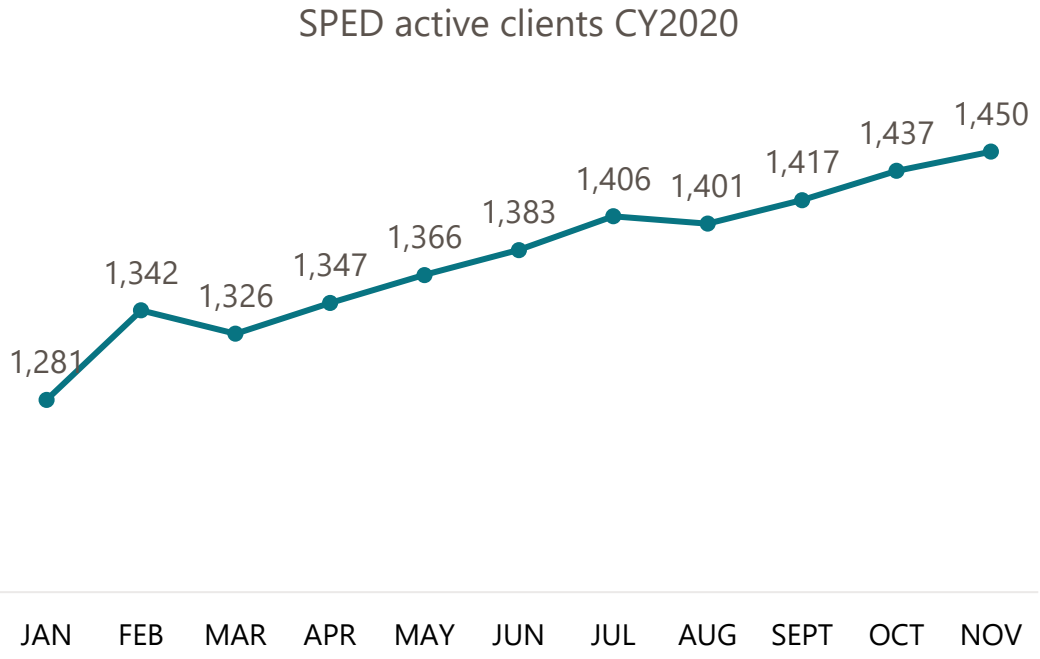
AGING & ADULT SERVICES
HCBS Case Managers

64

HCBS case managers who work in 19 Human Service Zones across ND

3,057

Individuals served by HCBS case managers (Nov 2020)



283 & 54

On average, 283 new referrals and 54 new cases opened for HCBS each month

AGING & ADULT SERVICES | NEW IN 19-21
HCBS Investments – SPED Eligibility

- Rebased client fee schedule and annual Cost of Living Adjustment (COLA)
- Updated functional eligibility criteria
- Resulted in **730 new clients** accessing services in CY2020
- **25% increase** in the total number served in CY2019
  - 94% have assets less than $25,000
  - Average monthly service cost of **$486** per person

AGING & ADULT SERVICES | NEW IN 19-21
HCBS Investments – Enhanced services

Added Services to Medicaid 1915(c) Aged & Disabled Waiver

- Residential habilitation
- Community supports
- Companionship

Services provide for up to 24-hour care in a private home or agency adult foster care and reduce social isolation of Medicaid eligible adults who screen at a Nursing Facility Level of Care

Meet Joan

In ND we served 1,166 people like Joan in CY2020

Joan is 83 years old

She lives alone in her own home

Joan has assets of less than $25,000. She has a monthly income of $1,020 per month

Joan has several age-related physical impairments (vision loss, rheumatoid arthritis, heart disease) that make it hard for her to complete housework and personal cares

Joan is a good candidate for **SPED** services.

Meet Lana

In ND we served 153 people like Lana in CY2020

Lana is 62 years old

She lives alone in an apartment.

Lana is Medicaid eligible. Her monthly income is from SSI, $783 per month

Lana has some behavioral health needs and difficulty remembering to take her medications. Lana needs a safe, supervised, structured environment.

Lana is a good candidate for **Expanded SPED** services.

Meet Betty

In ND we serve an average of 321 people like Betty each year

Betty is 67 years old

Betty lives with her husband who is her primary caregiver.

Her monthly income comes from SSI is $1191 each month. Betty is Medicaid eligible.

She meets a Nursing Facility Level of Care because of her dementia and related impairments. She needs supervision and help with her personal cares.

Betty is a good candidate for the **HCBS Medicaid Waiver.**

Meet Margo

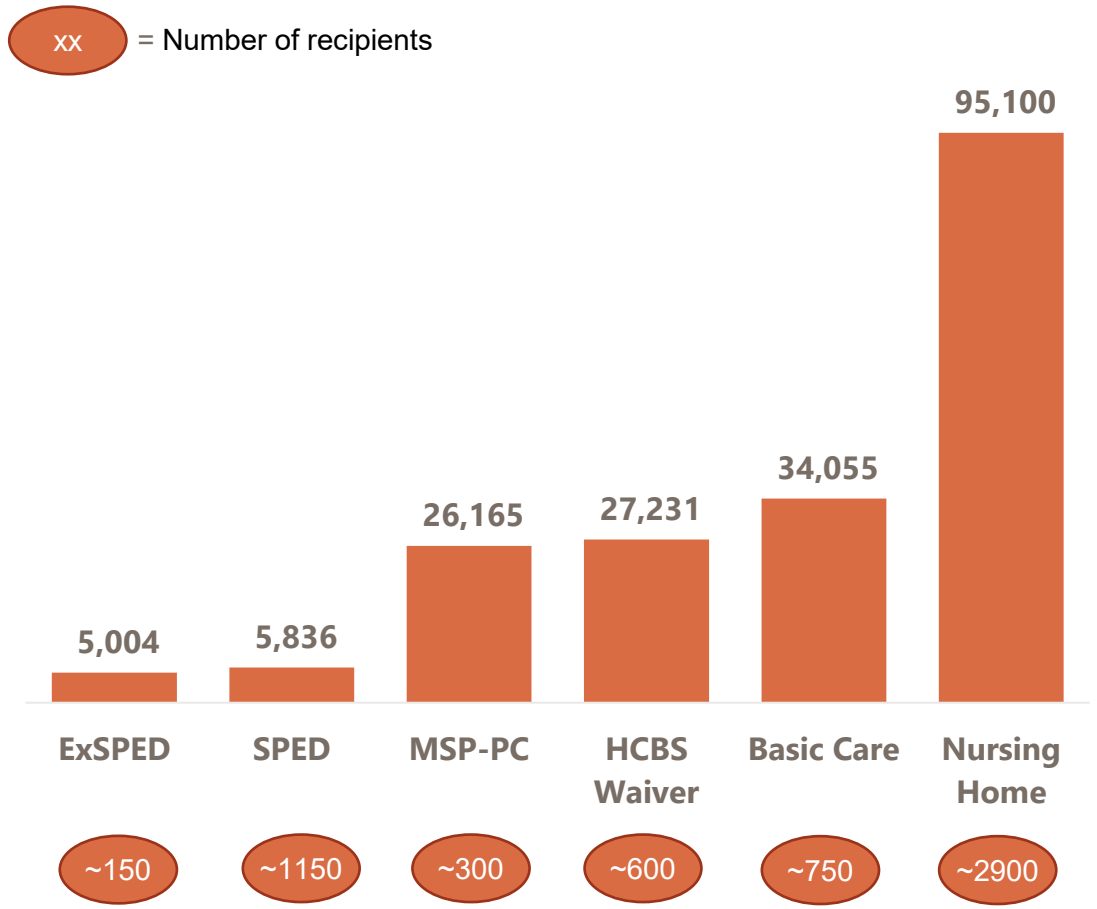
In ND we served an average of 588 people like Margo each year

Margo is 63 years old

Margo has a number of disability-related physical impairments. She needs hands-on care for an average of 240-300 hours per month.

She is Medicaid eligible and meets a nursing home level of care.

Margo is considered high need as she is impaired in at least 5 activities of daily living (ADLs). For Margo, this includes bathing, dressing, feeding, toileting, continence, transferring, mobility inside.



Margo is a good candidate for **Medicaid State Plan-funded Personal Care**

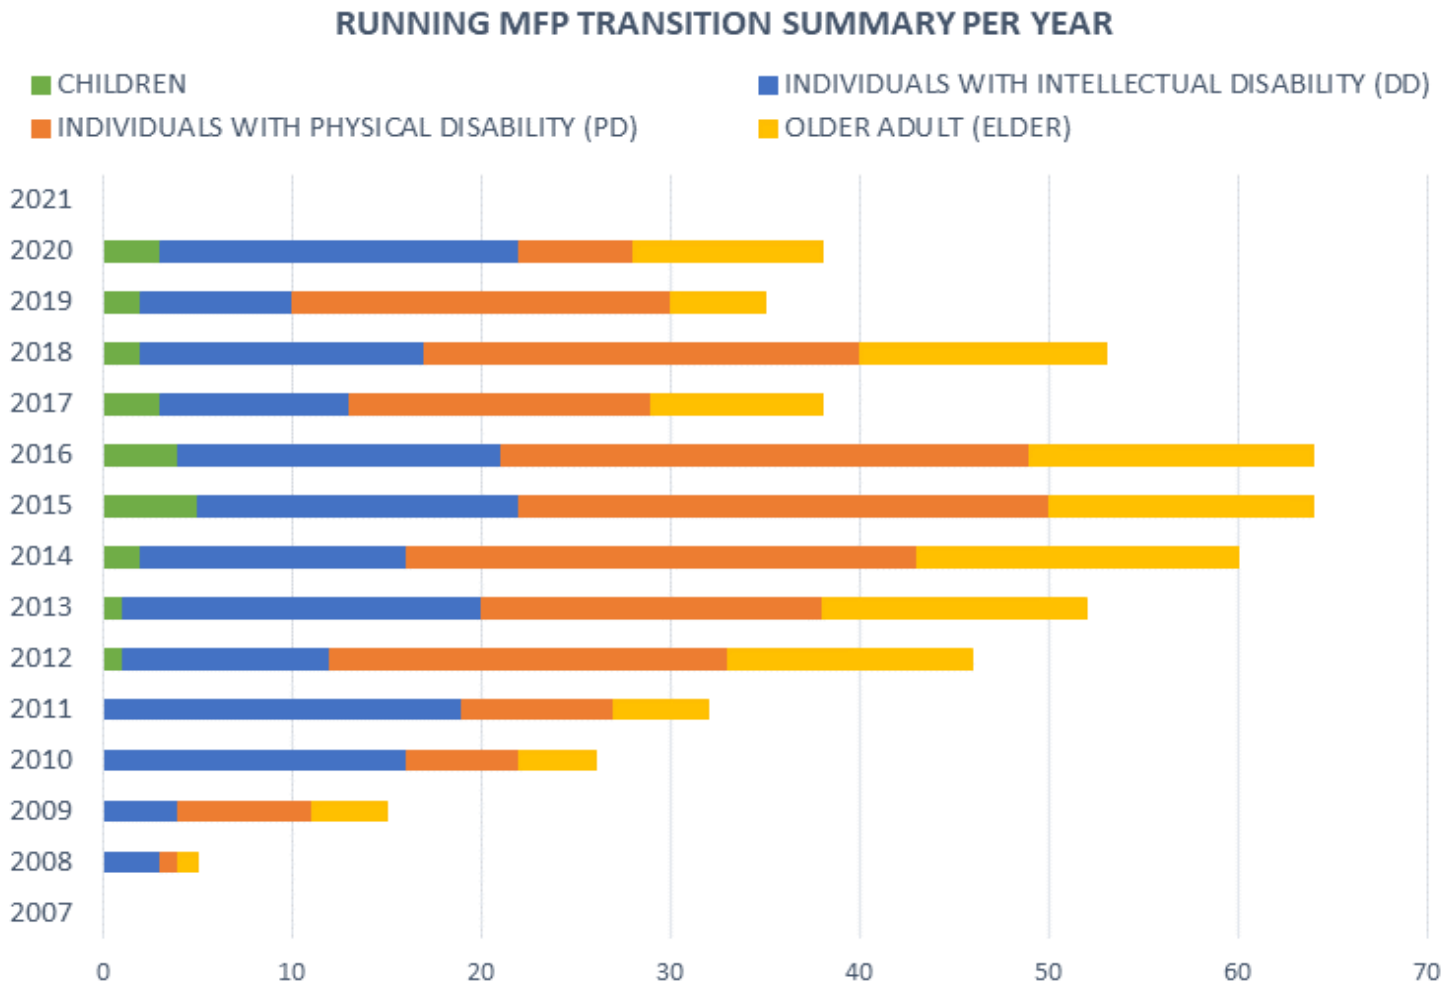
DHS FUNDED LONG TERM CARE AND HCBS SERVICES

Total cost by type of service

Cost Per Recipient Per Year

Cost paid by state by service in $ in State Fiscal Year 2020

Program Descriptions / Detail



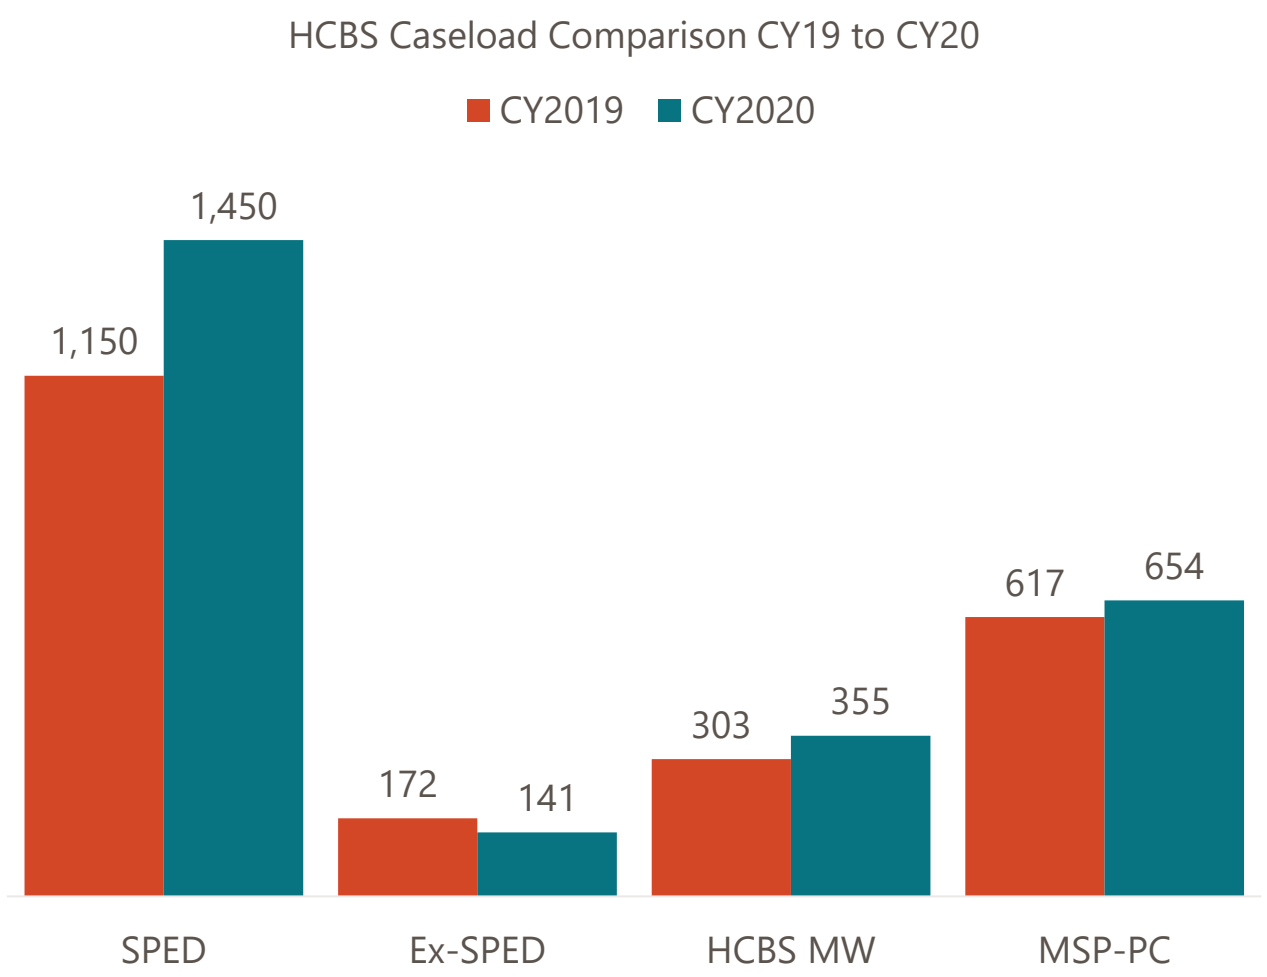
- **Service Payments for the Elderly and Disabled (SPED):** Provides services for people who are older or physically disabled, have limited assets, and who have difficulty completing tasks that enable them to live independently at home.
- **Expanded SPED (Ex-SPED):** Pays for in-home and community-based services for people who would otherwise receive care in a licensed basic care facility.
- **Home and community-based services (HCBS) waiver:** This waiver from the federal government allows the state to use Medicaid funds to provide services enabling eligible individuals who would otherwise require nursing home services to remain in their homes or communities.
- **Medicaid State Plan personal care (MSP-PC):** Personal care services available under the Medicaid state plan and enable persons with disabilities or chronic conditions accomplish tasks they would normally do for themselves if they did not have a disability.
- **Basic Care:** Room and board and personal care services for persons eligible for Medicaid.

AGING & ADULT SERVICES
Money Follows the Person

Federal Grant designed to assist states to increase the use of home and community-based services (LTSS System Rebalancing)

- Eliminate barriers that prevent individuals from receiving LTSS in the settings of their choice

- Original award - $8.9 million (2007)
- Award through 2020 - $29 million (fed) and $1.7 million (state)
- Transitioned 528 individuals from institutional settings back to the community



AGING & ADULT SERVICES
Key Changes due to COVID: Home & Community Based Services

HCBS services have continued to be provided throughout pandemic

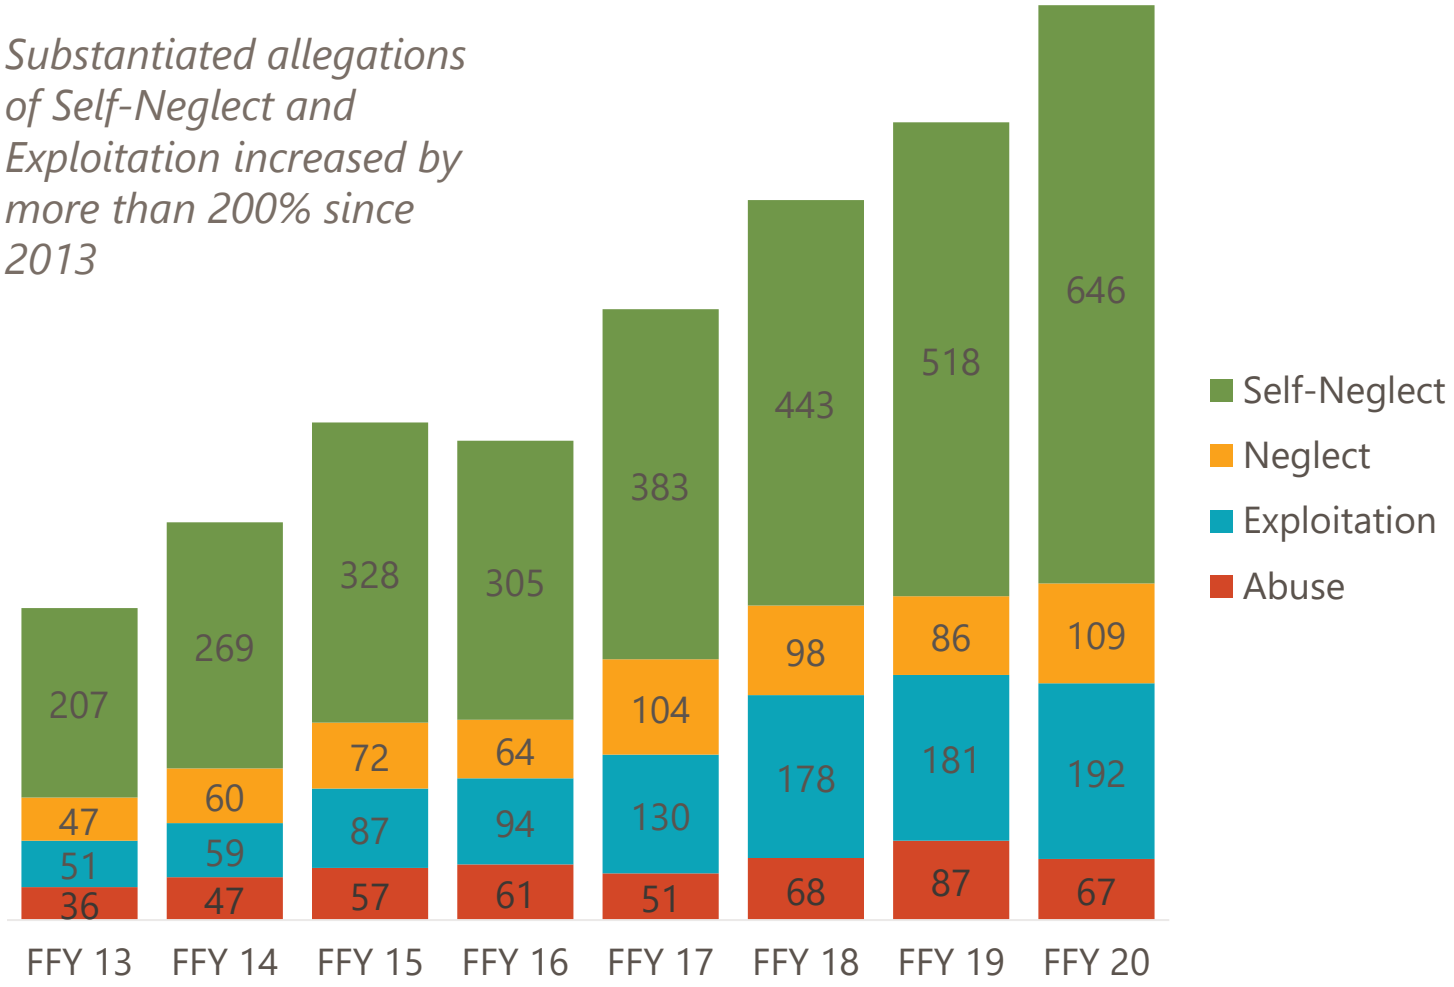
- Administrative Flexibility
- Allowed virtual case management
- Service flexibility e.g., authorize family to provide care
- Temporary increase service rates for family personal care and supervision
- Modified provider qualifications to speed enrollment

Noted increase in Social Isolation among HCBS recipients

AGING & ADULT SERVICES
Vulnerable Adult Protective Service (VAPS)

The program addresses the safety of vulnerable adults who are at-risk of harm due to the presence or threat of abuse, neglect, or exploitation.

AGING & ADULT SERVICES
Vulnerable Adult Protective Service (VAPS)



1,695 allegations

1,418 investigations

1,014 substantiated

Most common allegation:
Self Neglect

Substantiated allegations of Self-Neglect and Exploitation increased by more than 200% since 2013

AGING & ADULT SERVICES
Long Term Care Ombudsman

Long-Term Care Ombudsmen are advocates for resident rights. They help protect the quality of life and quality of care of anybody who lives in a nursing home, basic care or an assisted living facility.

AGING & ADULT SERVICES
Long Term Care Ombudsman

ND Long Term Care System

5,635 Nursing Facility Beds*
676 Swing Beds
2,054 Basic Care Beds
3,066 Assisted Living Units

**In 252 facilities located in 79 communities*

Cannot deny service due to unwillingness or inability to contribute

Federal, state, and local funds

AGING & ADULT SERVICES
Older Adults served with Older American Act Funds

Clients Served with OAA Funds increased by 6%

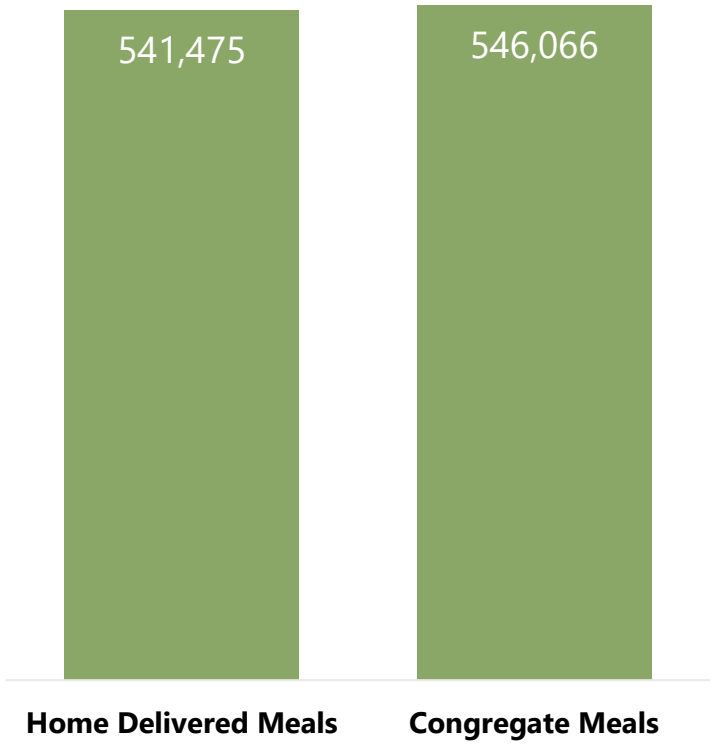
3,919
Clients with household income at or below **poverty** level (increase of 5% over FFY2018)

4,457
Clients **over age 85** (increase of 2% over FFY2018)

11,882
Clients who lived in **rural** areas (increase of 2% over FFY2018)

AGING & ADULT SERVICES
Senior Nutrition Services

Nutrition services **reduce** hunger, **food insecurity**, malnutrition, and **promote socialization** of older adults.

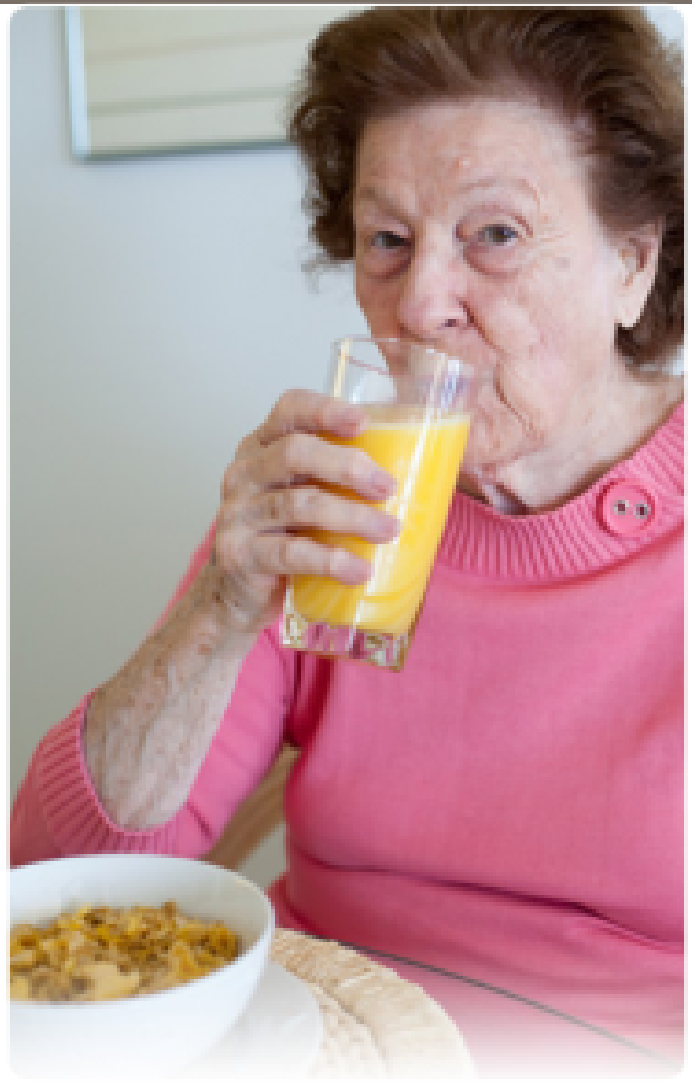


Seniors with food insecurity can have many negative health consequences:

- Prolonged hospital stays
- Unintentional weight loss that can increase need for physical assistance

AGING & ADULT SERVICES
Older American Act Funds Nutrition Services

In 2019 people utilized home delivered and congregate meals in roughly equal rates



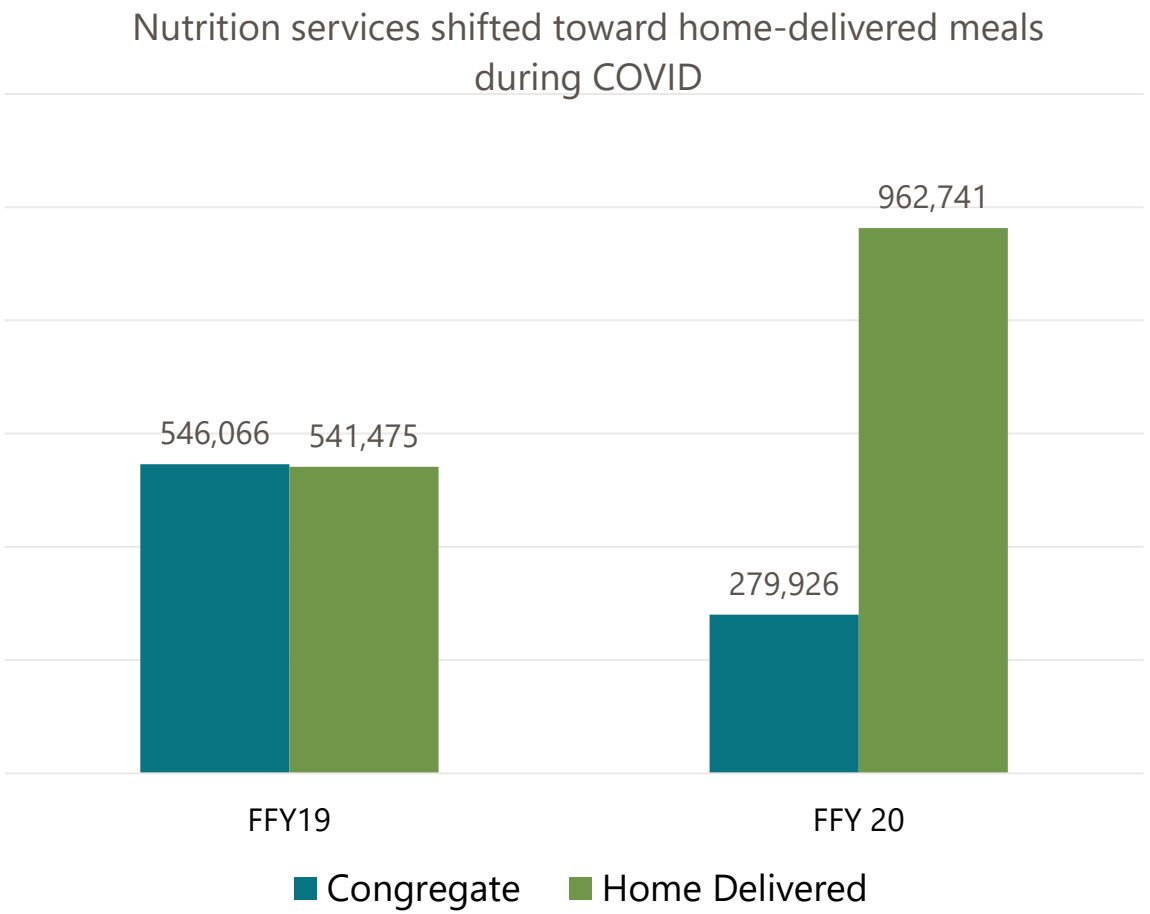
23%

Seniors receiving home delivered meals who are "high nutrition risk"
(1,113 of 4,801 individuals served)

9.5% of the 14,311 individuals who received congregate meals in 2019 were "high nutrition risk"

23%

of Seniors receiving home-delivered meals have 2 or more ADL limitations
(1,124 of 4,801 individuals served)



AGING & ADULT SERVICES
Key Changes due to COVID: Nutrition Services

The pandemic changed the way meals are delivered to older adults.

Meals options:
- Home delivered
- Pre-packaged grab-and-go
- Curbside pickup
- Frozen meal options

1,242,667
Meals served FFY2020 increased by 14% over FFY2019

9,362
Consumers served

AGING & ADULT SERVICES
Key Changes due to COVID: Nutrition Services

Home-Delivered Meals

Increased per meal rate from $4.60 to $7.00 to account for increased administrative costs

Funding

- Additional $305K ADRL grant (ACL via FFCRA / CARES)
- Serves individuals 18+ with a disability impacted by COVID-19
  - Transition coordination services
  - Financial assistance for one-time moving costs, and rental assistance
  - Companionship services and shopping
  - Technology to allow for virtual visits in skilled nursing facilities & basic care

AGING & ADULT SERVICES
Settlement Agreement between U.S. DOJ & State of ND

Purpose is to ensure that the State will meet the ADA requirements by providing services, programs, and activities for individuals with physical disabilities in the most integrated setting appropriate to their needs.

Effective December 14, 2020

Agreement will terminate eight years after effective date if Parties agree that the state has attained substantial compliance with all provisions and maintained that compliance for a period of one year.

AGING & ADULT SERVICES | DOJ SETTLEMENT
Americans with Disabilities Act

The Americans with Disabilities Act (ADA) requires public agencies to **eliminate unnecessary segregation** of persons with disabilities and provide services in the **most integrated setting appropriate** to the needs of the individual.

In **1999** the Federal Supreme Court **Olmstead** decision **affirmed** the **ADA** requirements.

AGING & ADULT SERVICES | DOJ SETTLEMENT
Benefits of DOJ Agreement

1. **Expands and raises awareness** about community-based care options available to adults with physical disabilities

2. Allows individuals to make **informed choices**, including the option to receive care while enjoying the benefits of community living in the least restrictive setting

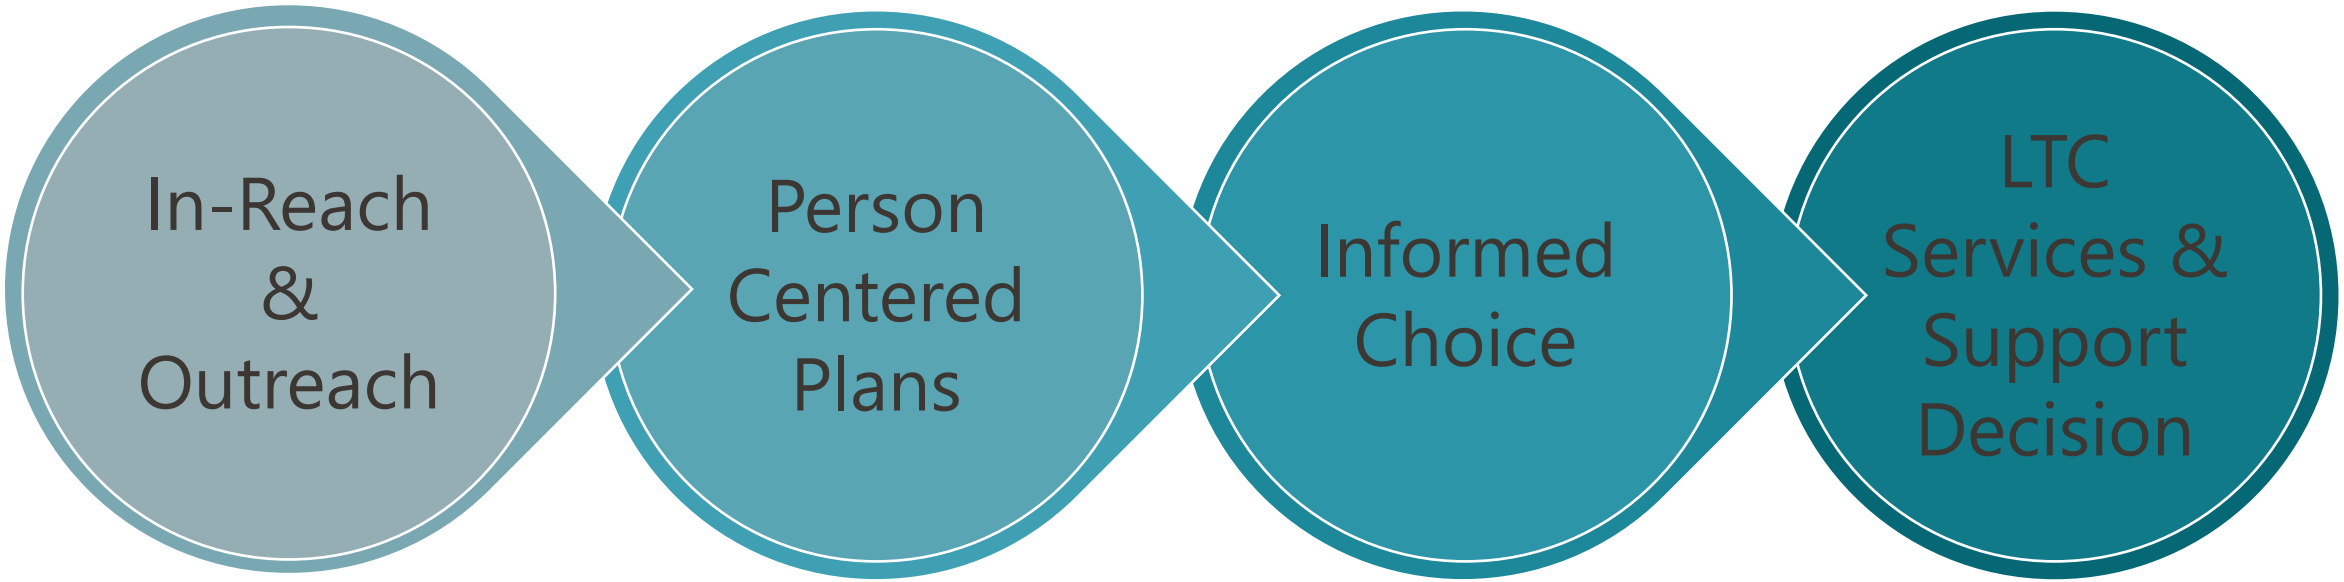
3. Builds upon the investments made by the 2019 Legislature and our **shared goal** of improving services to citizens

WHO ARE WE TRYING TO REACH?

TARGET POPULATION

Basic Eligibility

- Individual with physical disability
- Over age 21
- Eligible or likely to become eligible to receive Medicaid long-term services and supports (LTSS)
- Is likely to require LTSS for at least 90 days.



IF in skilled nursing setting

- Receive Medicaid-funded nursing facility services AND
  - Likely to require long term services and supports
- Receive nursing facility services AND
  - Likely to become eligible for Medicaid within 90 days, have submitted a Medicaid application, and have approval for a long-term nursing facility stay

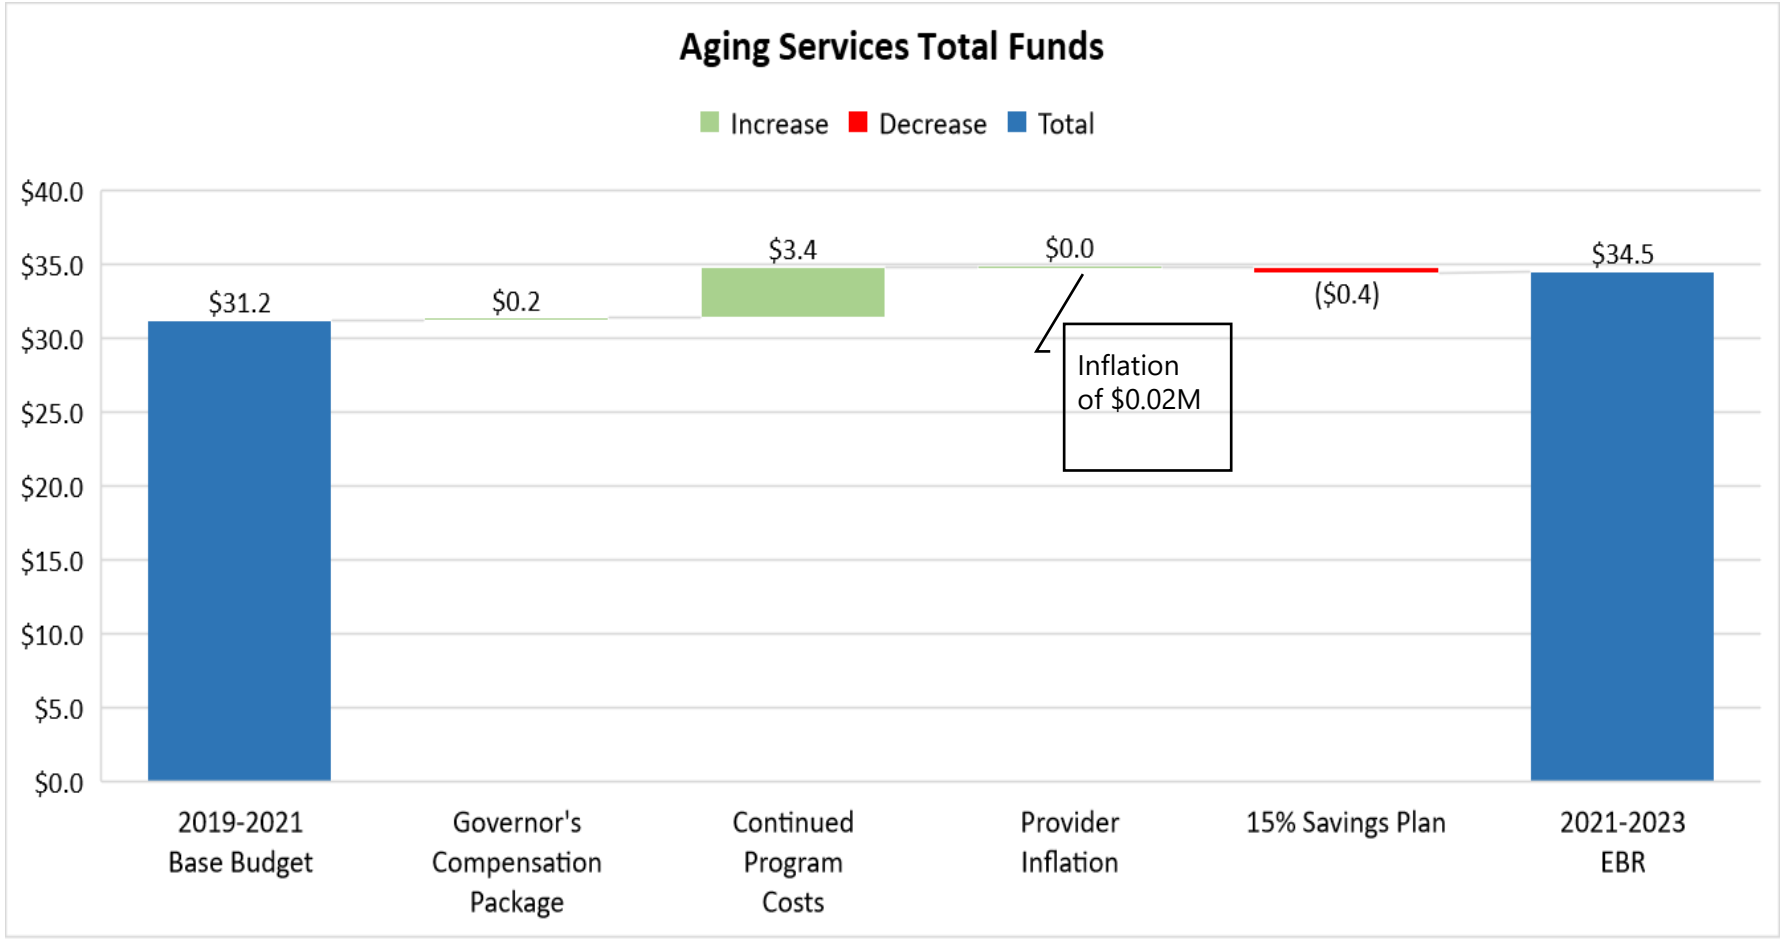
IF in hospital or home setting

- Referred for a nursing facility level of care determination AND
  - Likely to need services long term
- Need services to continue living in the community AND
  - Currently have a HCBS Case Manager or have contacted the ADRL

AGING & ADULT SERVICES
Informed Choice Strategy – Implemented January 1, 2021

- Process to identify individuals and give them an opportunity to make an informed decision about where to receive services.
- In-Reach: Making connections when individual is in hospital or skilled nursing facilities.
- Out-Reach: Connecting with someone who is living in their home and searching for care.

- Process, driven by the individual that identifies supports and services that are necessary to meet the individual's needs in the most integrated setting.
- Consumer works with HCBS case manager to examine range of options.



- The choice that is made after person has been provided with information about options for integrated settings and engaged in person-centered planning.
- Finalization of Care Plan and connection to resources as needed.

- Decision about individual care. All decisions are respected, and consumer is assisted in accessing HCBS if desired.
- Individual receives services in the setting and manner they selected; periodic follow up with case manager continues.

- State Rehabilitation Council
- Transition Task Force
- Money Follows the Person

DEVELOPMENTAL DISABILITIES
Service Array by Funding Authority

Meet Caden.

Meet Caden's family.

Age 14

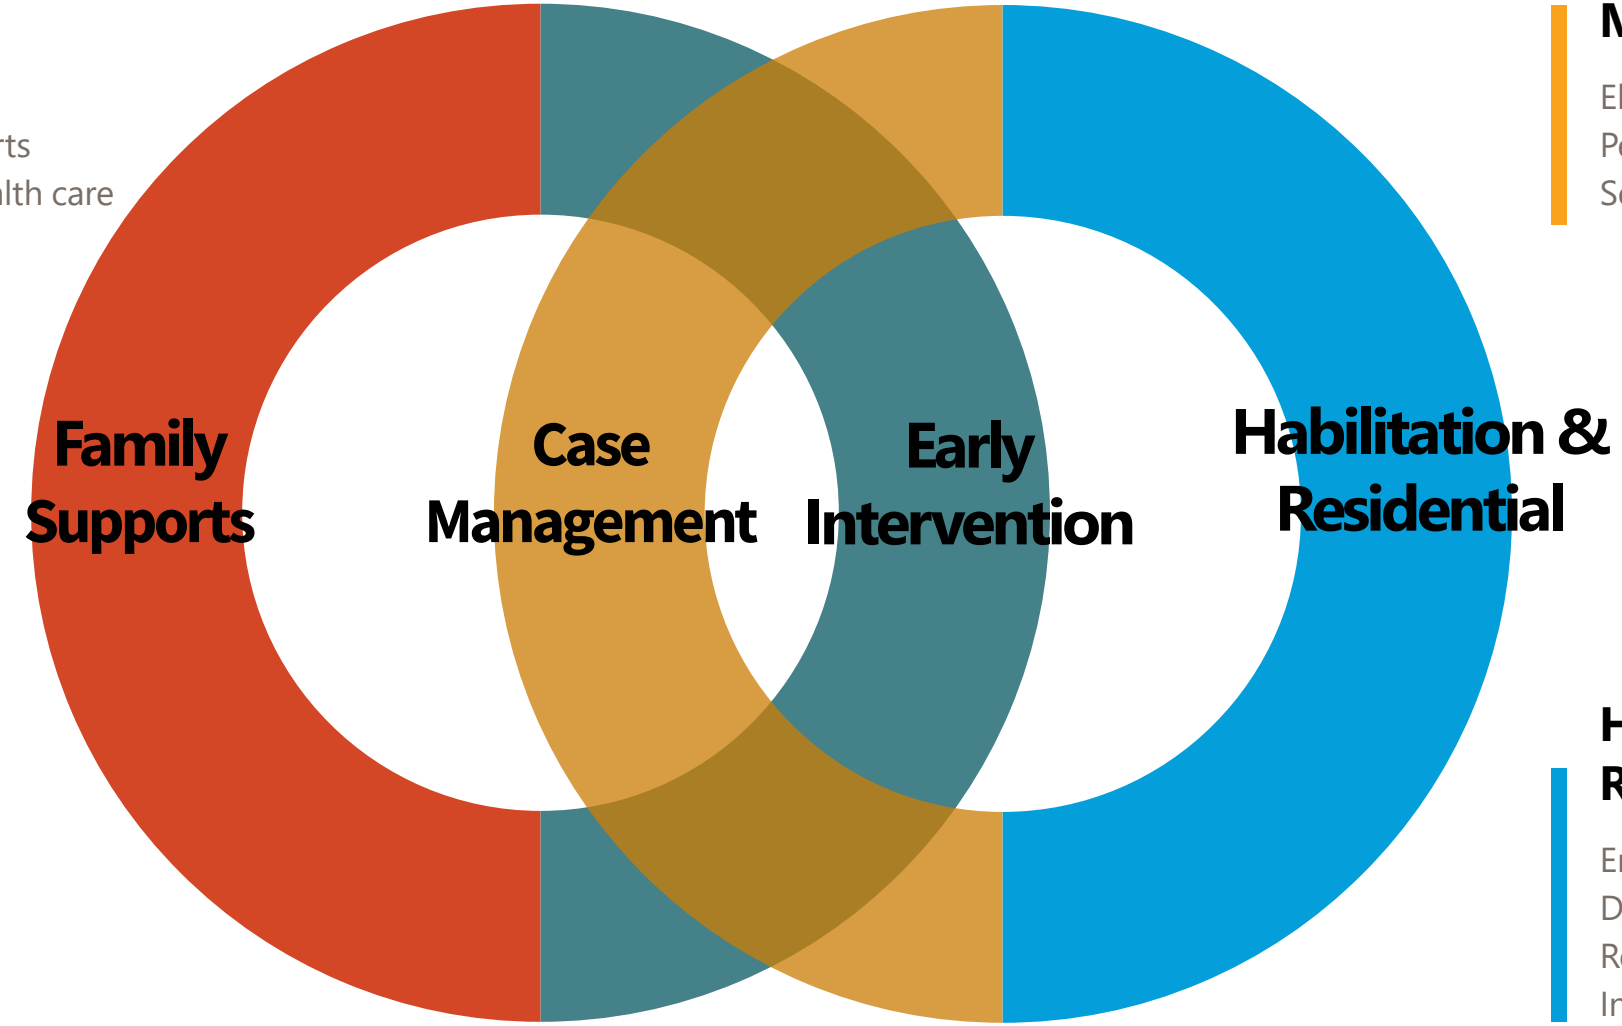
Diagnosed with a mild intellectual disability. And PTSD, Autism, ADHD, and a mood regulation disorder.

History of self injurious behavior, physical aggression, running away.

Has been living at home and attending school with peers half days with significant in-school supports.

Was found eligible for DD services at age 11.

- Mom, dad and two brothers (age 10 and 8)
- Both mom and dad work full time and are Caden's guardians
- Family receives in-home supports 40-45 hrs/week to help manage behaviors



Case management and early intervention are a key intersection within the continuum of services available to people with Developmental Disabilities

DEVELOPMENTAL DISABILITIES
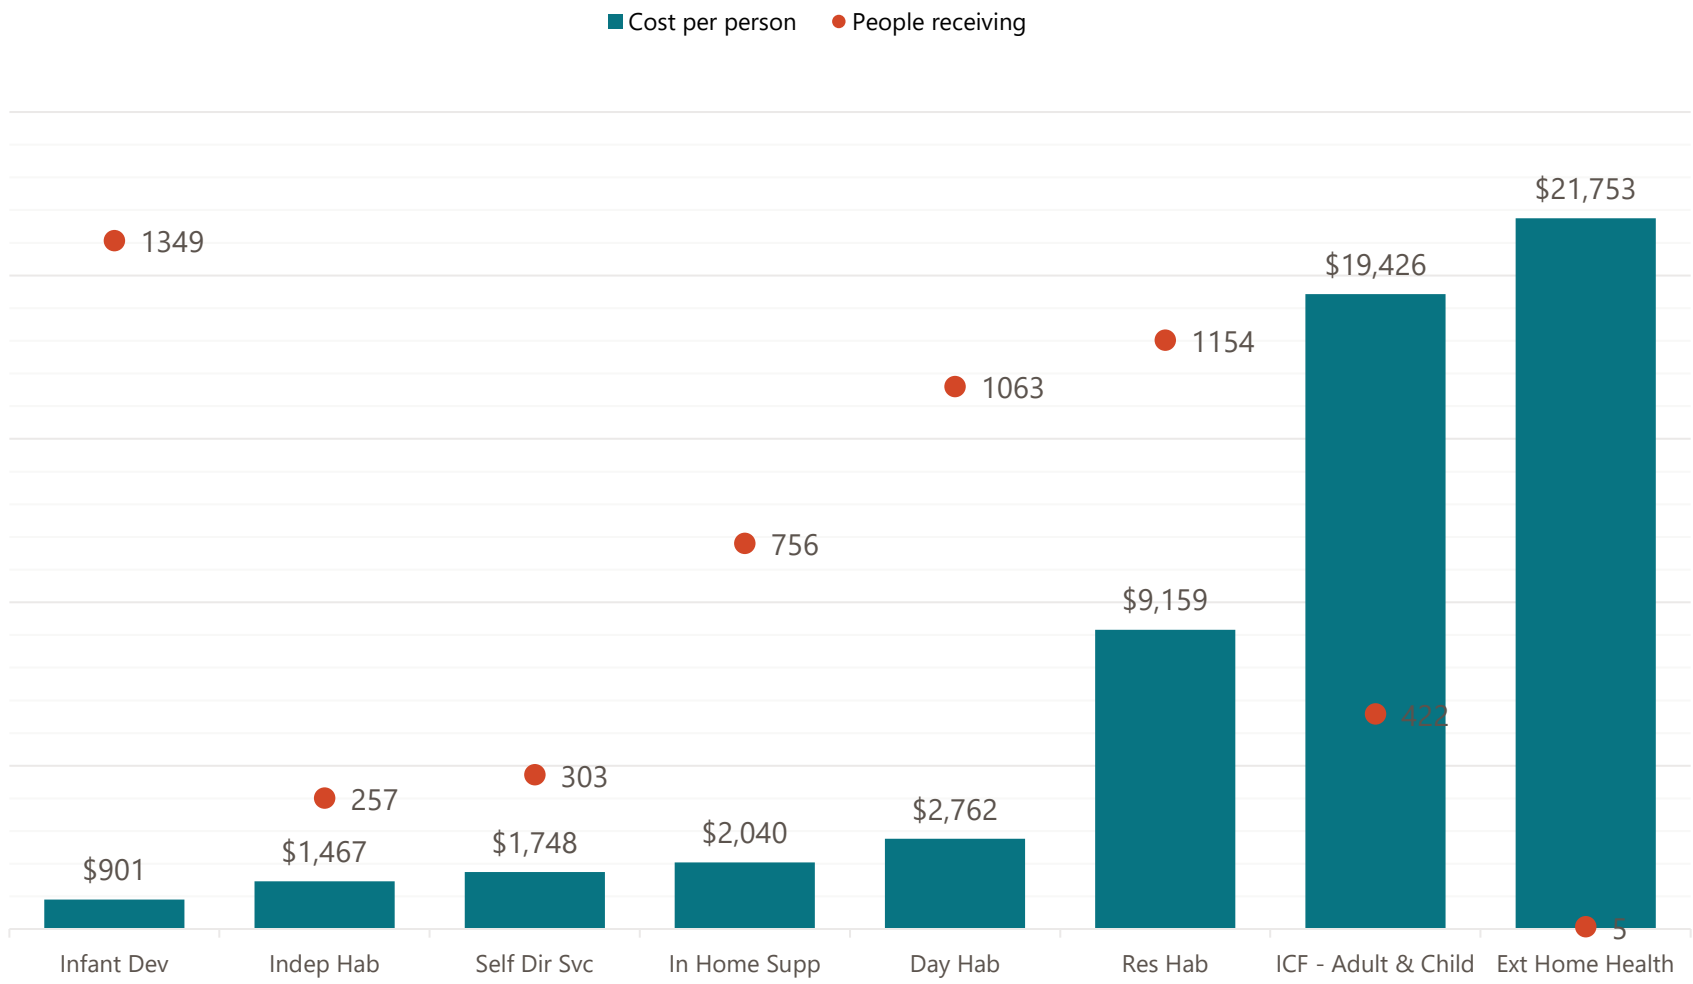
Individuals receiving services in community setting

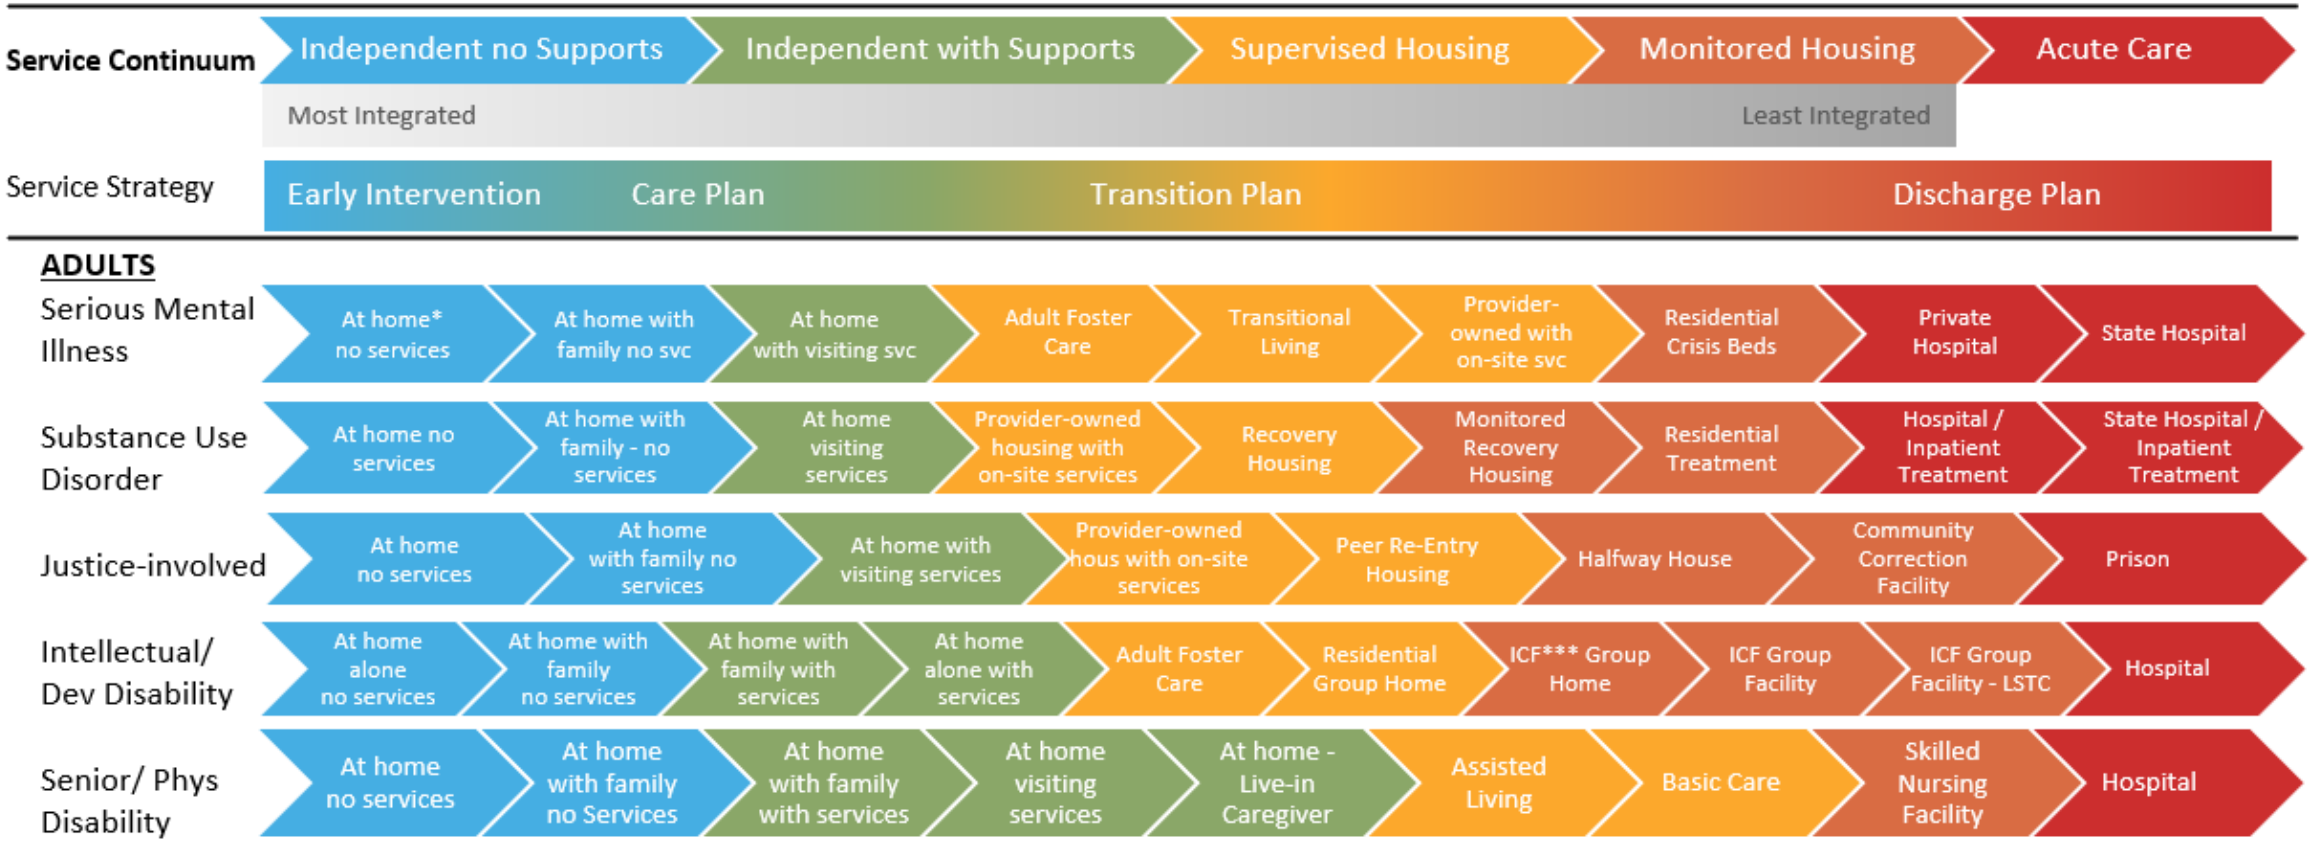
ND's 1915(c) waivered services for people with a range of developmental disabilities are coordinated by 120 DD program managers and delivered by 38 licensed providers who served 7,900 people ages 0-90+ in 2020



DEVELOPMENTAL DISABILITIES
Proposed 21-23 budget by type of service

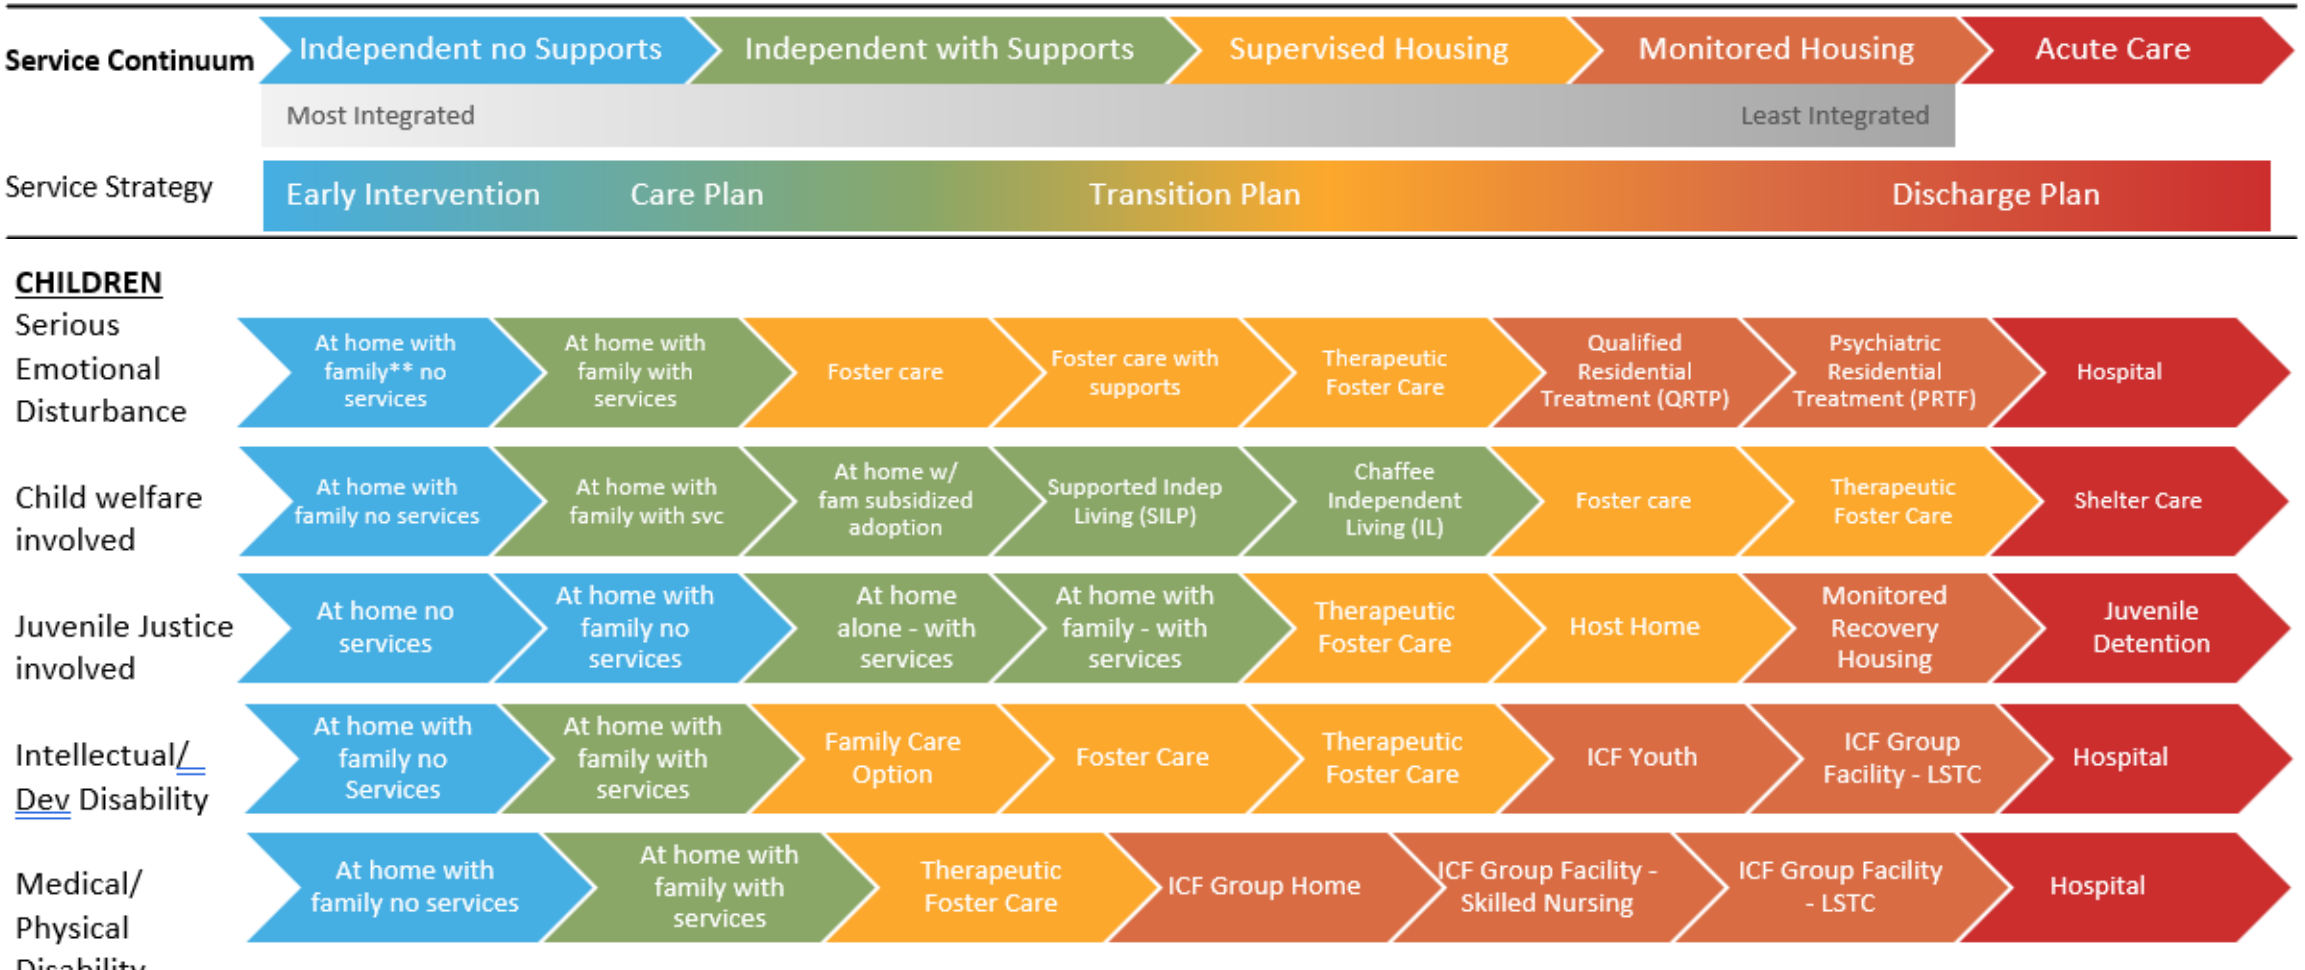
67% of the total proposed 21/23 budget for DD services will support residential care for people with developmental disabilities

DEVELOPMENTAL DISABILITIES
Cost month per person per type of service – SFY20



The Service Continuum - Adults

A critical concept defined



**Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)*

***Family = includes birth family, kin-caregiver, adopted family*

****ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)*

The Service Continuum - Children

Illustrating the work of transition and diversion

*Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)

**Family = includes birth family, kin-caregiver, adopted family

***ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)

Components of Quality

How are we doing? Can we do it better?

National Standards

Evidence Based Practices

Applying or translating research findings into care practices and decision making that will result in the best client outcomes

Accreditation

Assures quality, consistency and relevant approaches through application of research-based standards and a peer-review process

Licensure and Certification

Granting of authority to practice within health and safety guidelines and/or scope of practice

State Standards

Incident Reporting

Tracking of health and safety events that occur in the course of delivering care to clients

Outputs and Outcomes

National Core Indicators

Standard measures used across states to assess the outcomes of services provided to individuals and families

Core Set Measures

National standards of care and treatment processes for common health conditions

Quality Assurance

Monitoring desired level of quality in service delivery by examination of processes and procedures

Processes

Quality Control

Monitoring desired level of quality by examining results of processes and procedures

DEVELOPMENTAL DISABILITIES

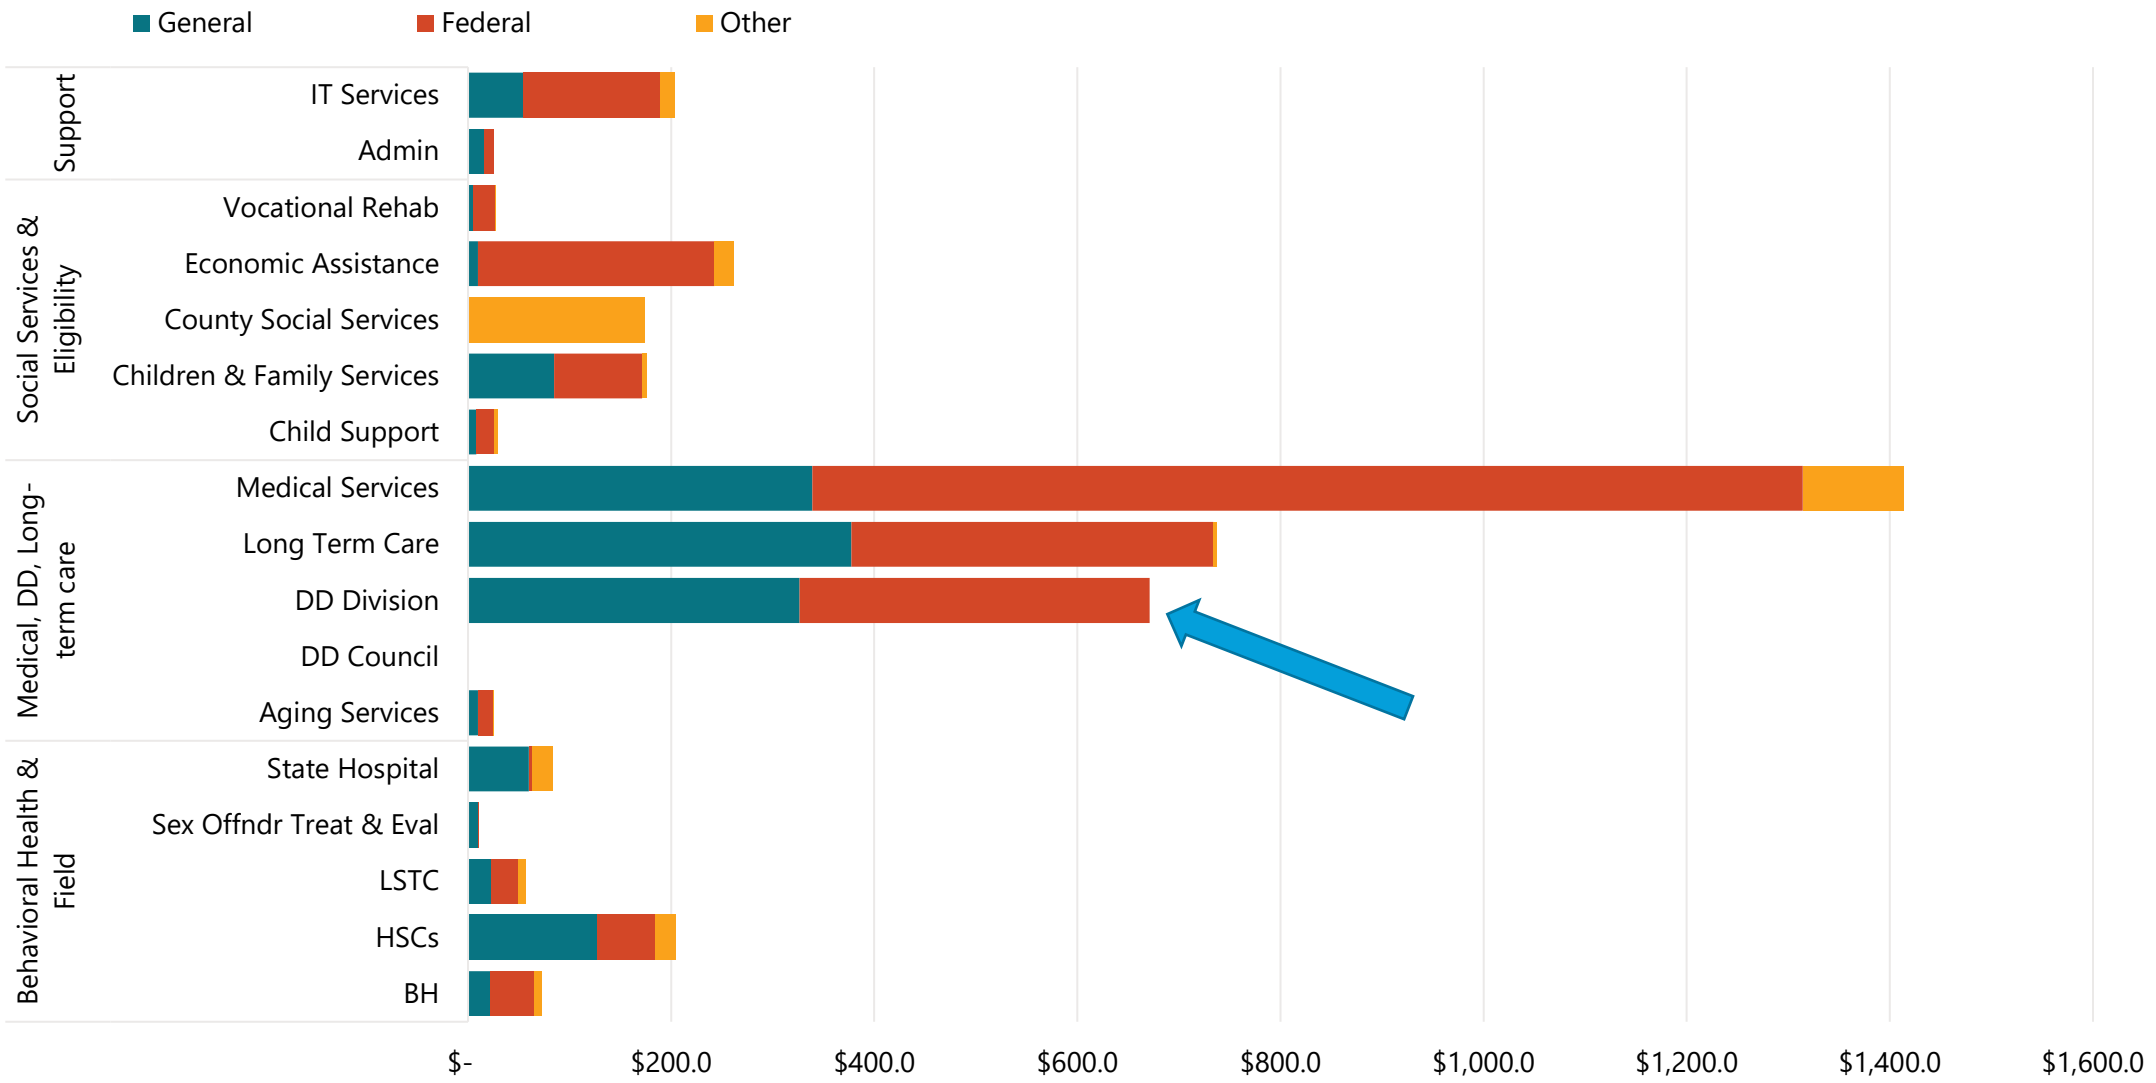
2021-2023 EXECUTIVE BUDGET DHS



Total budget $4.378 billion, by category of expenditure

Direct Client Services include Economic Assistance Programs, Child Welfare Programs, and grants and service contracts for Aging, Behavioral Health, Vocational Rehabilitation, Medical Services, and Developmental Disability.

2019-2021 LEGISLATIVELY APPROVED BUDGET

Total budget (millions) by division

Budget as of March 30, 2020

DEPARTMENT OF HUMAN SERVICES

Quality services, Proven results, Closer to home

1. Base decisions on **quality**, **efficiency**, and **effectiveness**.

   Find success in a resource-constrained environment.

   Make **reductions** in some areas **and investments** in others to optimize outcomes.

2. The state has **enough treatment beds**. Investing in **earlier interventions** can help **avoid crisis**.

   Right service. Right place. Right time.

   Serving people in **lowest level of care necessary** will return **better outcomes**.

   To deliver services closer to home, **all** have to be **willing to change** how they do business – DHS can't do this alone.

3. How we **pay** for services should be **fair** and **equitable** across systems.

   Inequity in rates **affects** people's ability to **access** services - providers often prioritize more lucrative payment opportunities

   Demonstrate value to taxpayers. **Value** equals **high quality cost efficient care**.

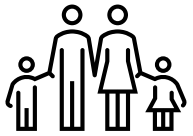
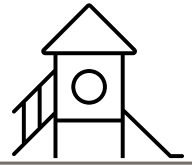
Representative Jon Nelson, Chairman



NORTH Dakota | Human Services

Be Legendary.™

Human Service Zones



Local + State Partnerships For Effective and Efficient Service Delivery

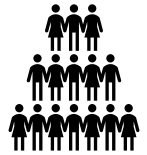
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

DEPARTMENT OF HUMAN SERVICES

Quality services, Proven results, Closer to home

1. Base decisions on **quality**, **efficiency**, and **effectiveness**.

   Find success in a resource-constrained environment.

   Make **reductions** in some areas **and investments** in others to optimize outcomes.

2. The state has **enough treatment beds**. Investing in **earlier interventions** can help **avoid crisis**.

   Right service. Right place. Right time.

   Serving people in **lowest level of care necessary** will return **better outcomes**.

   To deliver services closer to home, **all** have to be **willing to change** how they do business – DHS can't do this alone.

3. How we **pay** for services should be **fair** and **equitable** across systems.

   Inequity in rates **affects** people's ability to **access** services - providers often prioritize more lucrative payment opportunities

   Demonstrate value to taxpayers. **Value** equals **high quality cost efficient care**.

IMPROVING PROGRAMS IS MORE THAN LOOKING AT STRUCTURE: Process and Cultural Change Must Accompany Structural Change

- 3 Core Areas
  - Process
  - Structure
  - Culture
- Focus is on service delivery to the client in the most effective and efficient way possible
- Seek to remove geographic, political and cultural boundaries to deliver smart, efficient and compassionate human services
- Primary Stakeholders
  - Individuals & Families
  - Taxpayers
  - Employees

Zone Transformation History

2017-2018

- SB2206 Passed
- System redesign began
- CPS Redesign Kick-off

2019

- SB2124 Passed
- Kick-off with County Social Services
- Zone Agreements

1.1.20

- Zones formed
- 1st payment to zones 1.10.20
- Transfer 112 FTE from county to DHS

COVID begins to impact clients, zones and the transformation project.

3.31.20

- Zone directors hired
- Begin zone plans

6.30.20

- Draft Zone plans completed
- 2nd payment to zones
- 2021 budgets due

HUMAN SERVICE ZONES

Gateway for Human Services

- Child Welfare
- Economic Assistance
- Indigent burials
- General Assistance
- County Supported HCBS
- Locally provided programs

Access Points Across ND

- Formerly known as County Social Services
- 19 Human Service Zones
- 46 Offices

Effectiveness + Efficiency

- Person-Centered
- Timeliness
- Quality

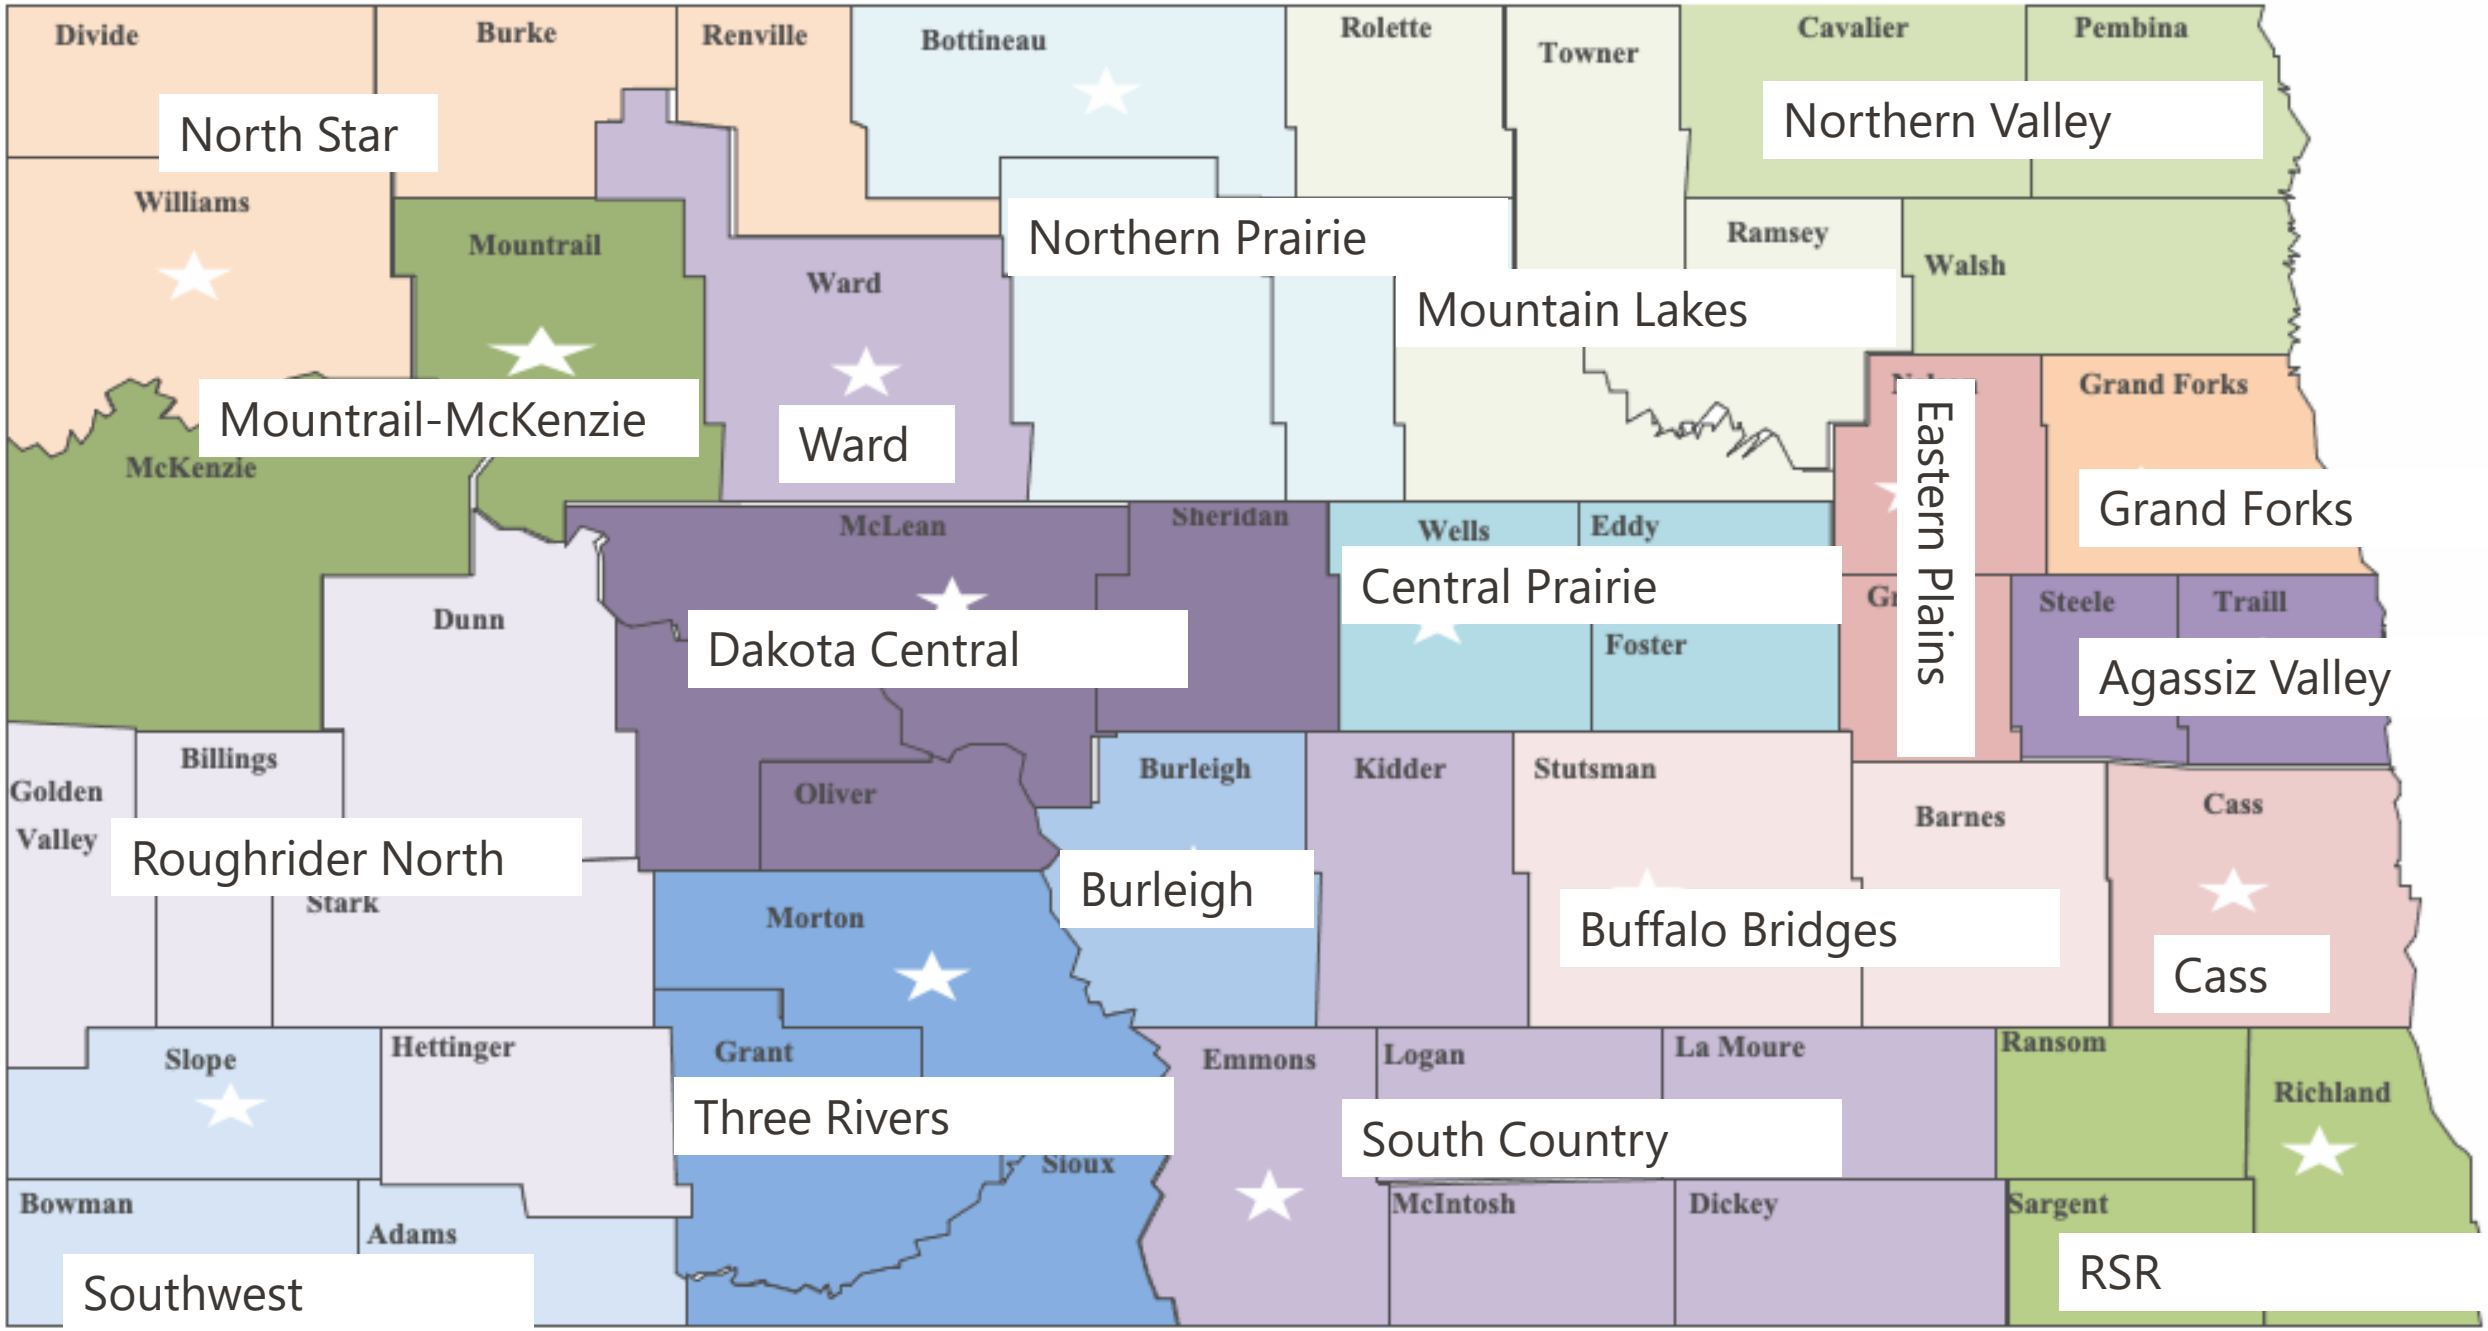
HUMAN SERVICES ZONES-MILESTONES

Zone Formation

- Formation of zone boards
- Zones formed 1/1/20
- Zone directors hired by 3/31/20
- Draft zone plans 6/1/20
- Final zone plans 12/1/20

Zone Operations

- Unified and consistent human resources policy and process manual 1/1/21
- Zone director performance appraisal process
- Consistent Chart of Accounts
- Indirect Costs*
- Equity Study*



Program Operations

- Consistent General Assistance policy and process*
- Consistent Indigent Burial Criteria*
- Opt In – State Study*
- Multiple Redesign
  - Child Welfare
  - Eligibility*
  - Central Background Check
  - Institutional CPS
  - Foster Eligibility*
  - Sub Adopt Negotiations*
  - ADRL
  - QSP Enrollment*

*These projects are currently in process.

COVID IMPACT

- Increased SNAP and Medicaid applications with fewer eligibility workers
- Hybrid office closures – continued to serve clients
- Experienced more clients using electronic means for verification
- Maintained child and family visits
- Federal waivers that provided flexibility in how eligibility workers engaged with clients

Total Full Time Equivalents

Counties were authorized 1,207 FTE

DHS budgeted for 985 FTEs in the zones

222 positions under reevaluation

ZONE DIRECTORS

Social Service Directors 2019

37

17+2

Human Service Zone Directors

18

Program + Direct Service Staff

HUMAN SERVICE ZONE ADMINISTRATION

Executive Policy

Leads Family Stability and Community Inclusion strategy and policy to guide service delivery in zones.

Chief Operating Officer

Leads DHS and zone operations and program redesign efforts for the zones.

Dir Zone Operations

Works to guide zones, build collaboration and lead zone operations.

Project Manager

Leads the DHS Office of Transformation supporting redesign projects, change management and process improvement across DHS and Human Service Zones.

FTE TRANSITIONS FROM COUNTY TO STATE

HCBS CASE MANAGERS

- Provide case management for older adults & individuals with physical disabilities receiving state and federally funded home and community-based services and basic care
- Became state employees 1/1/2020

Major Initiatives

- Specialized role of HCBS Case Manager
- Standardized training required for position
- Implemented a statewide centralized intake system for HCBS referrals and informed choice visits to ensure consumers understand their long-term service and support options
- 64 FTE provide support to 3057 unduplicated individuals
- Average 283 referrals and 54 new cases per month

CFS QUALITY ASSURANCE UNIT

SUPERVISOR: LEANNE MILLER

Continuous Quality Improvement Efforts (TBD in 2021)

Facility Licensure Visits

Case Record Reviews

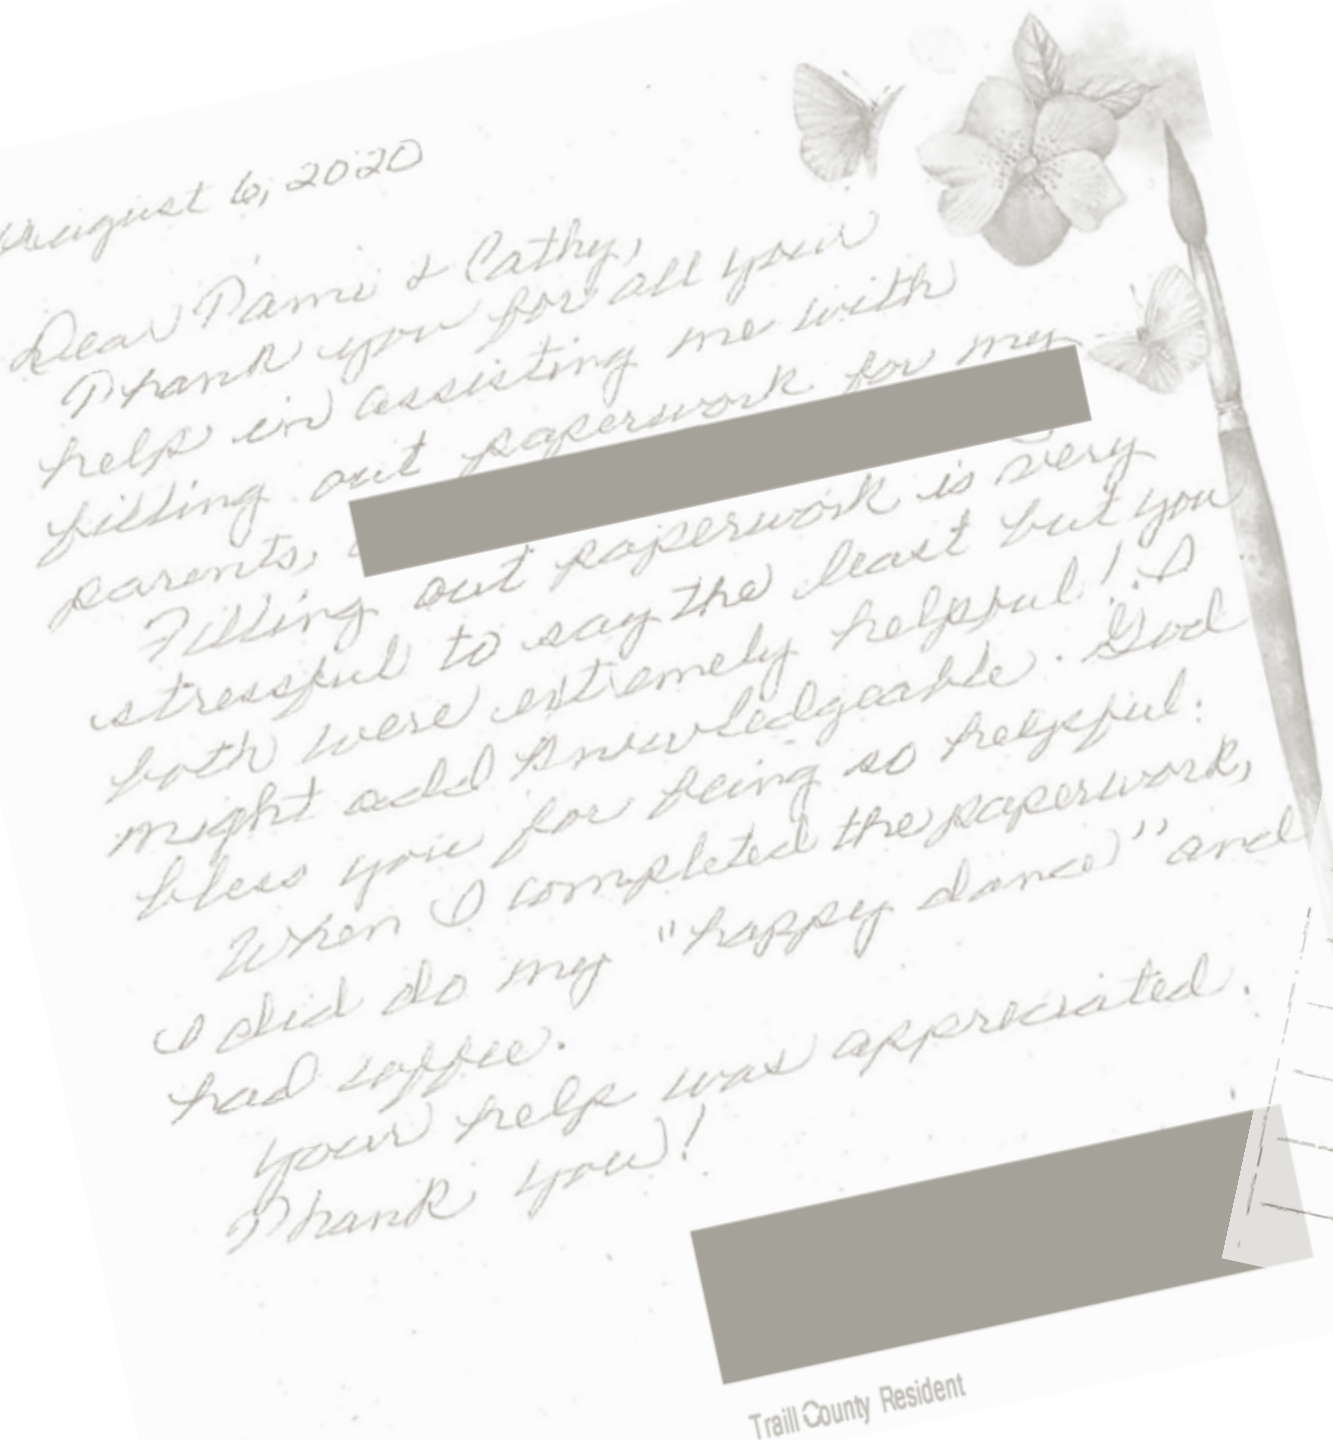
Child & Family Service Reviews

Safety, Permanency, and Well-Being

EARLY CHILDHOOD SERVICES UNIT

2020 Big Wins

- Childcare Licensors are now state employees
- Made progress on the Early Childhood Services (ECS) online application system



Goals for 2021

- Successfully complete the Child Care and Development Fund (CCDF) Monitoring Visit in Spring 2021
- Continue to work towards completion of the Early Childhood Services (ECS) online application system

MEDICAID LONG TERM CARE ELIGIBILITY UNIT

- Processed and maintain LTC Medicaid applications according to federal timeliness standards
- 16 FTE transferred from Human Service Zones
- Established Q1 2020
- Went live May 11, 2020

December 6, 2020

Dear Pami & Cathy,

Thank you for all your help in assisting me with filling out paperwork for my parents, [redacted]

Filling out paperwork is very stressful to say the least but you both were extremely helpful! I might add knowledgeable. God bless you for being so helpful: When I completed the paperwork, I did do my "happy dance" and had coffee.

Your help was appreciated.

Thank you!

[redacted]

Traill County Resident

12-11-20

Dear Ms. Brevik

This is just a quick note to say THANK YOU for your compassionate demeanor in handling our case.

It was a much needed emphatic ear you gave me on the phone at a time of my peak stress over this unexpected "worrier" matter. Such an attitude is very rare in my experience.

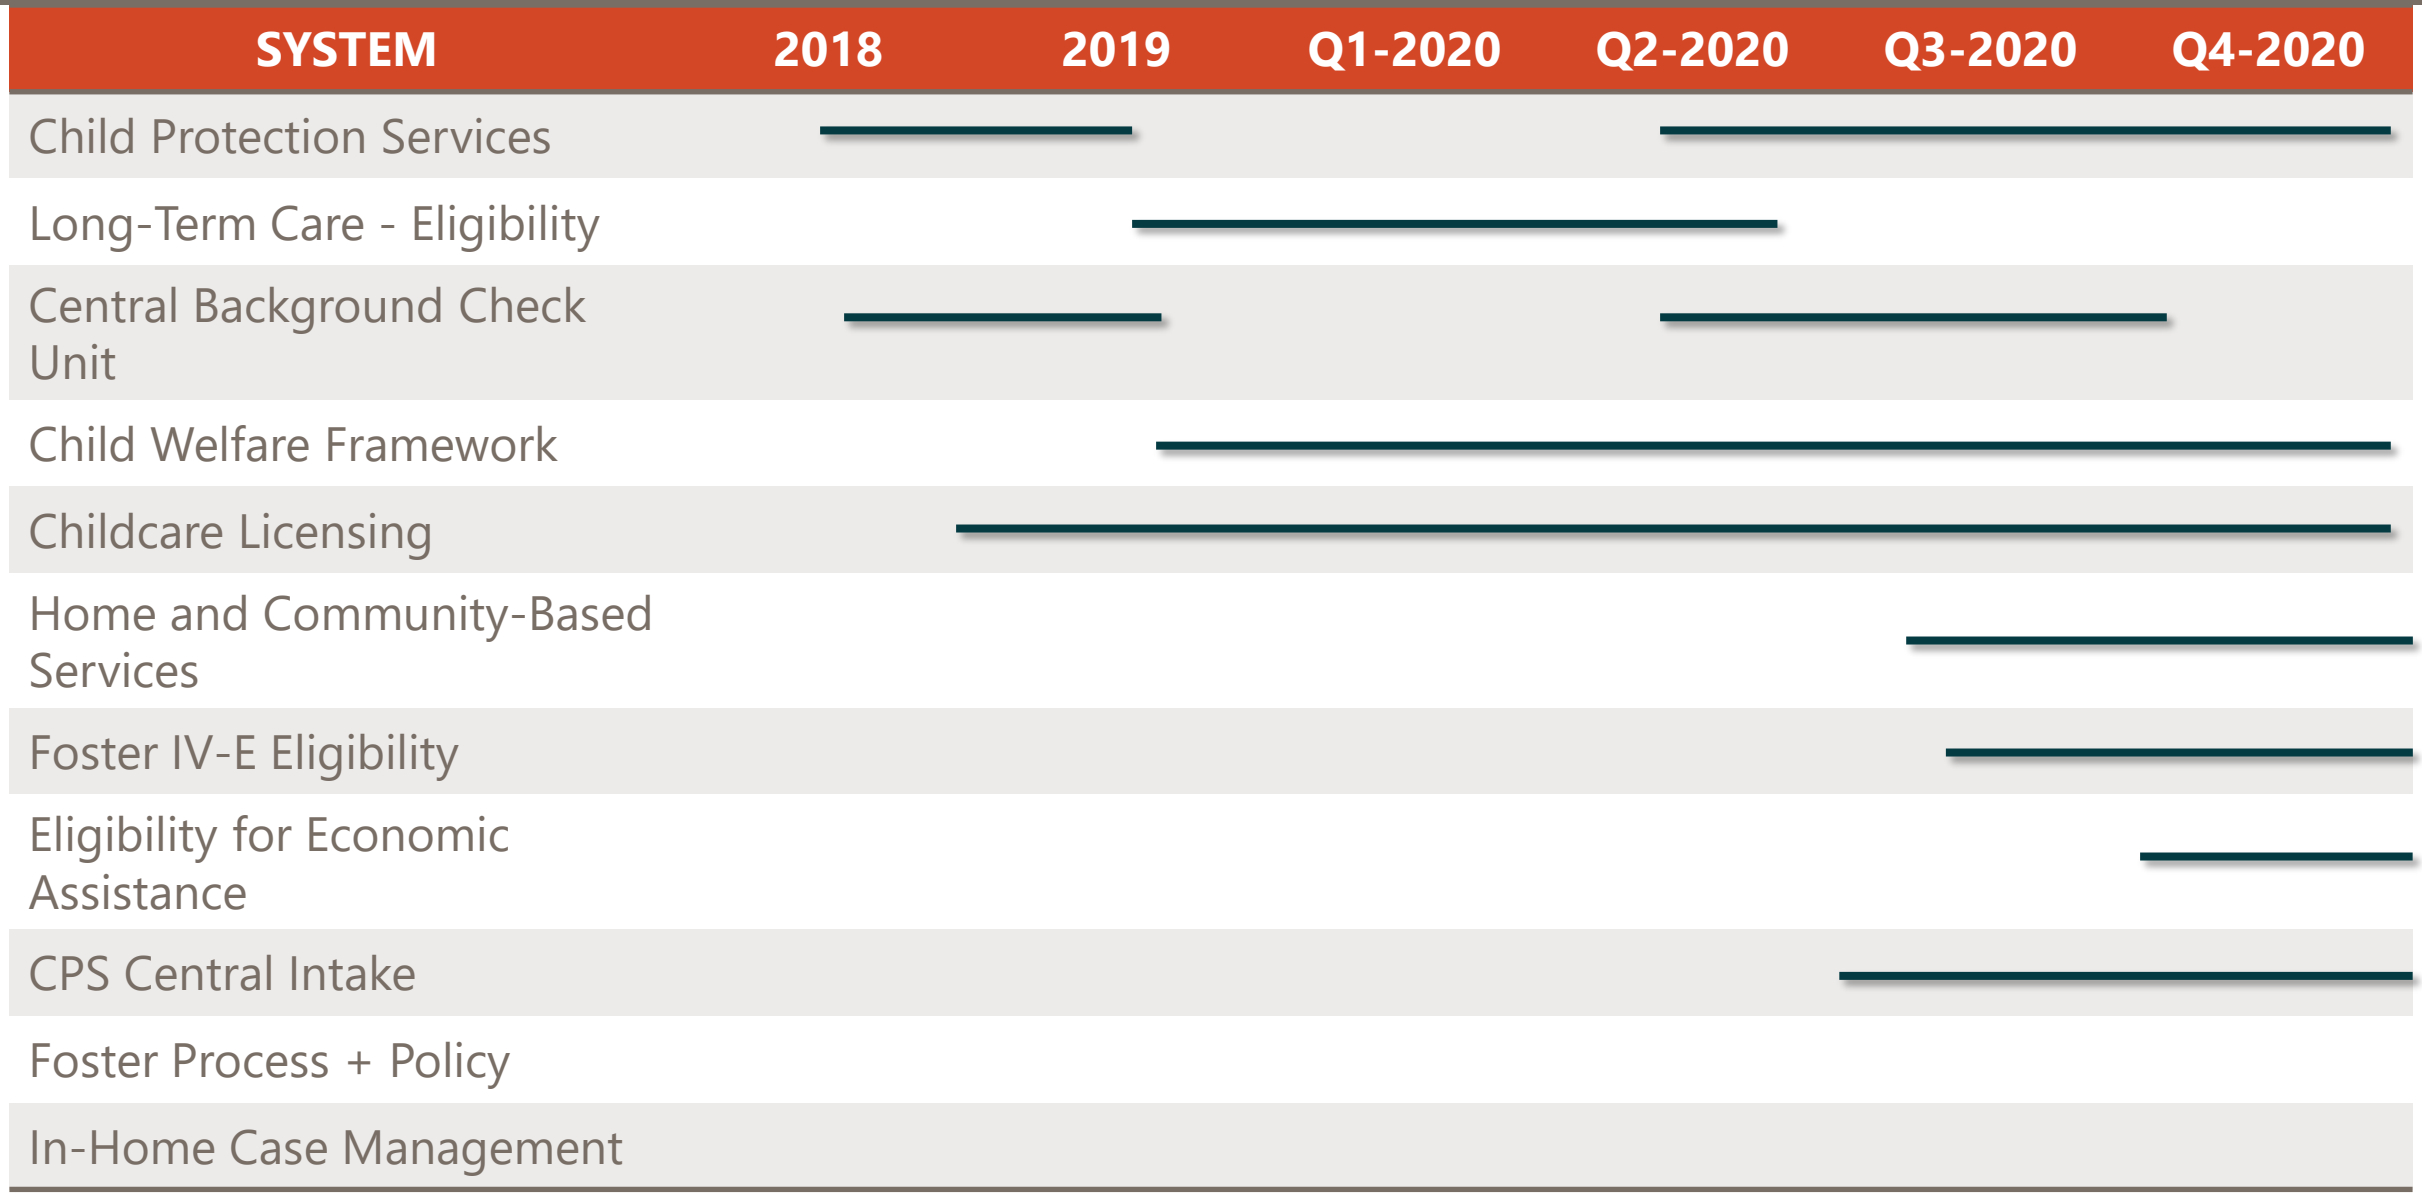
Happy Holidays

Sincerely

Pierce County Resident

FOSTER ELIGIBILITY + SUB ADOPT

- Authorized for 14 FTE to transfer from the HSZ to the State for a specialty foster eligibility unit
- Authorized for 2 FTE to transfer from the HSZ to the state to support subsidized adoption negotiation
- Unit launches in March 2021
- Will process all foster eligibility, Medicaid determinations for all foster and adopted children and negotiate subsidy for special needs adoptions



FOSTER CARE LICENSING

- Request for up to 16 FTE to for a specialized foster care licensing unit to provide foster care licensing and renewals to foster homes in ND
- Create consistency and a leveled approach to managing foster licenses

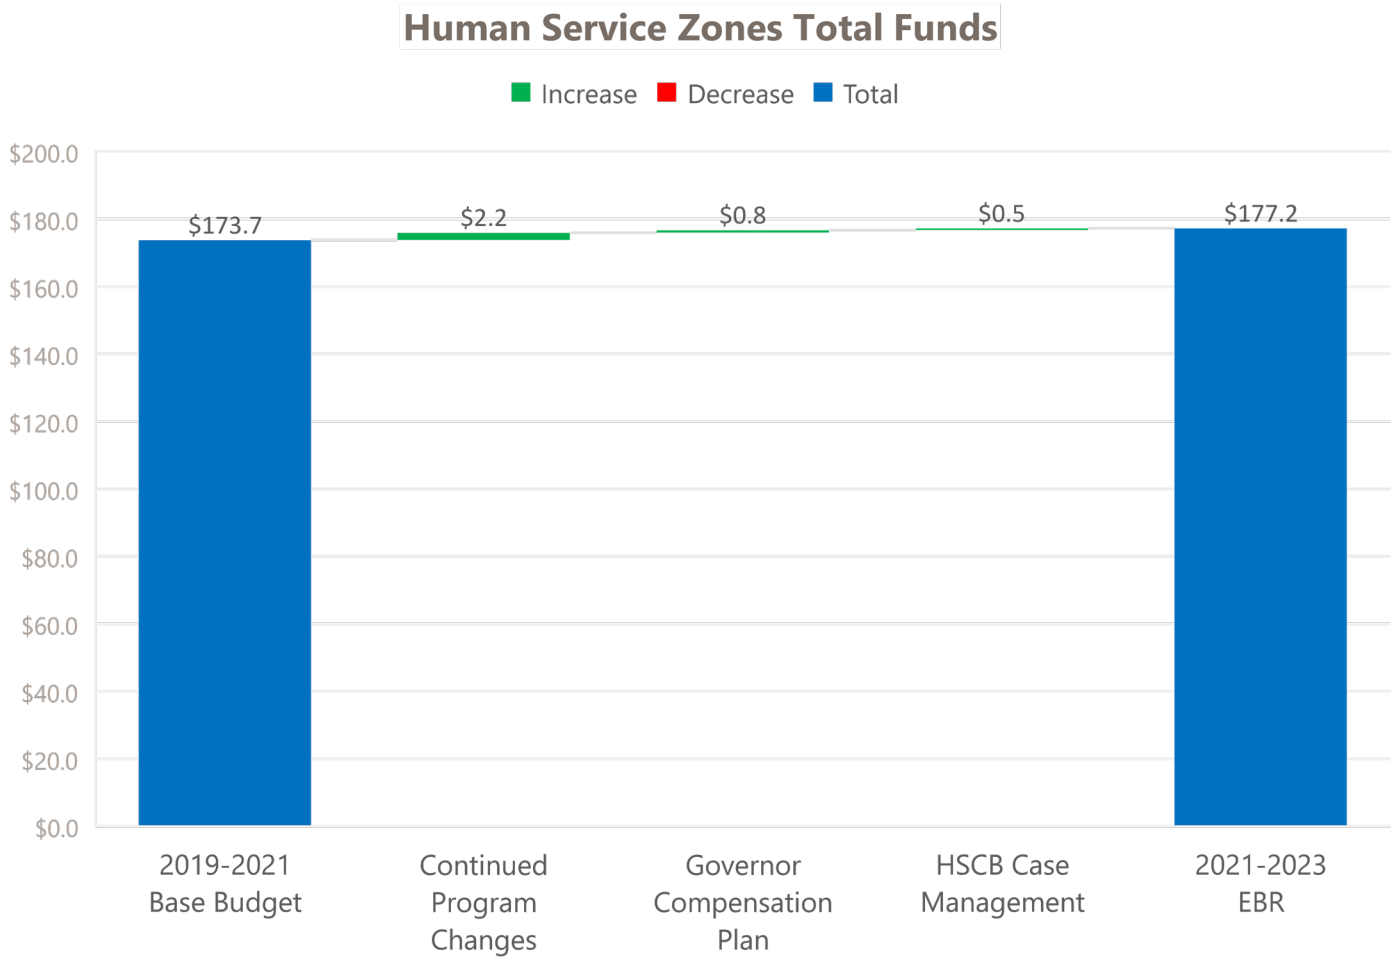
IN PROGRESS

- Request for 16 FTE to transfer from the county to state to form a specialty foster care licensing team
- Consistent indigent burial criteria
- Consistent General Assistance policies, criteria and appeals process
- Study for zones to opt in to State employment

SYSTEM REDESIGN TIMELINE

OVERVIEW OF BUDGET CHANGES

Description	2019-2021 Budget	Increase/ (Decrease)	2021-2023 Executive Budget
Salaries & Benefits	24,186,261	2,934,741	27,121,002
Operating	4,621,303	(432,414)	4,188,889
Grants	144,892,436	956,411	145,848,847
Total	173,700,000	3,458,738	177,158,738
General Fund	0	1,323,223	1,323,223
Federal Funds	0	1,176,874	1,176,874
Other Funds	173,700,000	958,641	174,658,641
Total	173,700,000	3,458,738	177,158,738
Full Time Equivalent (FTE)	140	3	143

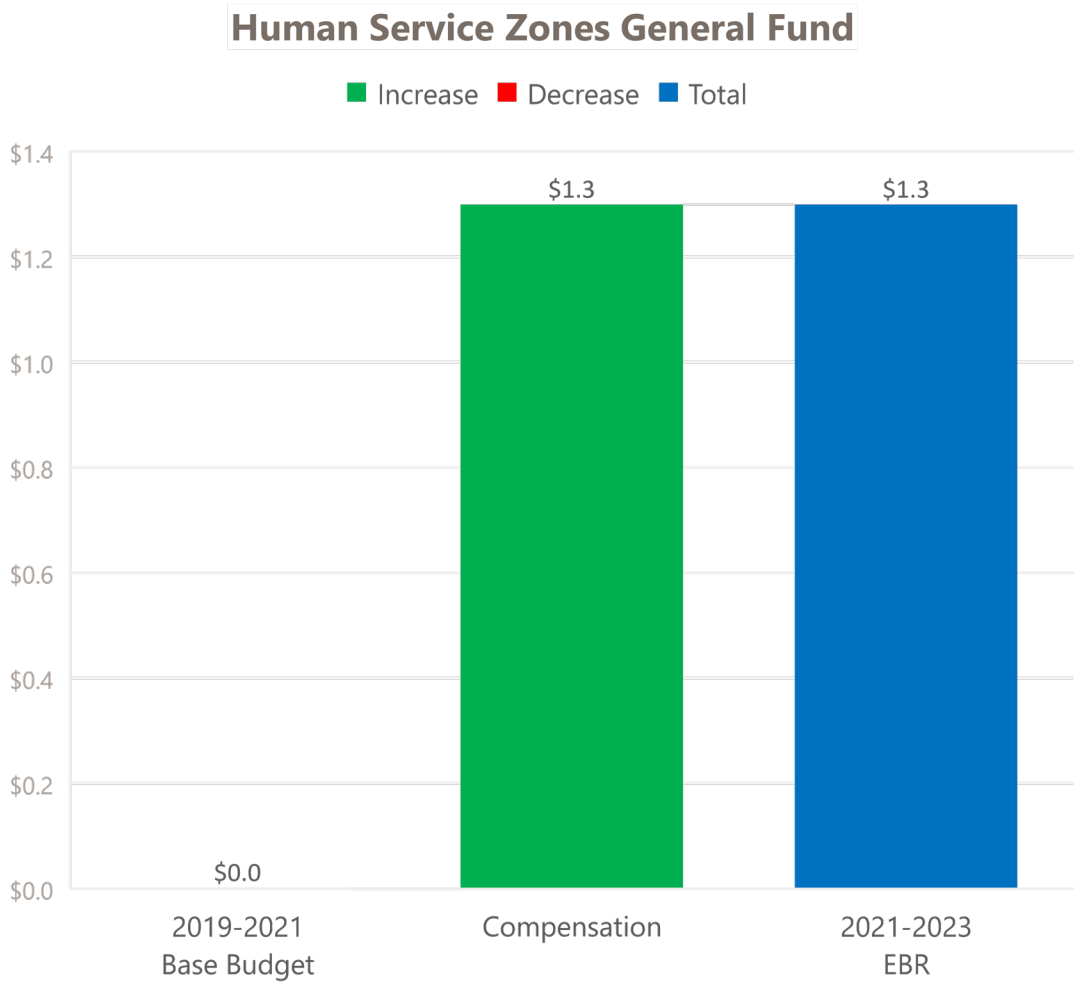


21-23 BUDGET REQUEST

	21-23 Request
19-21 Base	173,700,000
3 FTE HCBS	498,673
Comp + Benefits – 140 State FTE	2,436,068
Operating	(432,414)
Grants	956,411
Subtotal	**177,158,738**
Proposed Legislative Increase of 2/2	3,468,215
21-23 Zones Uncovered Need	9,089,381
Total Increase Requested	**12,557,596**
Total Proposed 21-23 Budget	**189,716,334**

EQUITY ADJUSTMENTS

Zone Directors	Compensation equity to align all zone directors within the range
Zone Employee Benefits	Employees shifting to host county benefits which were often more robust
Zone Transfers to State Team	140 FTE that transferred to state were made whole if moving to state caused them to go backwards in salary and benefits



OVERVIEW OF BUDGET CHANGES (IN MILLIONS)

Continued Program Costs

- Salary & Benefits Changes $1.6 million
- Zone Payment Change $1 million
- Other cost changes ($0.4) million

GENERAL FUND CHANGES (IN MILLIONS)

Compensation

- Expend revenue for collected fees for associated FTEs

HOUSE BILL 1012 #1114

House Appropriations | Human Resources Division

Representative Jon Nelson, Chairman

ADMINISTRATIVE SUPPORT BUDGET OVERVIEW

Arnie Strebe, Chief Administrative Officer / Chief Financial Officer

NORTH Dakota | Human Services

Be Legendary.™

DHS MISSION AND OPERATING PRINCIPLES

Provide quality, efficient, and effective human services, which improve the lives of people

- Services and care should be provided **as close to home as possible**
- Services should be **provided consistently across service areas** to promote equity of access and citizen focus of delivery

- Services should be administered to **optimize** for a given cost **the number served** at a service **level aligned to need**
- Investments and funding in DHS should **maximize ROI for the most vulnerable** through safety net services
- Cost-effectiveness should be considered holistically, acknowledging **potential unintended consequences** and **alignment between state and federal priorities**

- Services should help vulnerable North Dakotans of all ages maintain or enhance quality of life by:
- Supporting **access to the social determinants of health**: economic stability, housing, education, food, community, and health care
- **Mitigating threats** to quality of life such as lack of financial resources, emotional crises, disabling conditions, or inability to protect oneself

DEPARTMENT OF HUMAN SERVICES

Quality services, Proven results, Closer to home

1. Base decisions on **quality**, **efficiency**, and **effectiveness**.

   Find success in a resource-constrained environment.

   Make **reductions** in some areas **and investments** in others to optimize outcomes.

2. The state has **enough treatment beds**. Investing in **earlier interventions** can help **avoid crisis**.

   Right service. Right place. Right time.

   Serving people in **lowest level of care necessary** will return **better outcomes**.

   To deliver services closer to home, **all** have to be **willing to change** how they do business – DHS can't do this alone.

3. How we **pay** for services should be **fair** and **equitable** across systems.

   Inequity in rates **affects** people's ability to **access** services - providers often prioritize more lucrative payment opportunities

   Demonstrate value to taxpayers. **Value** equals **high quality cost efficient care**.

DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

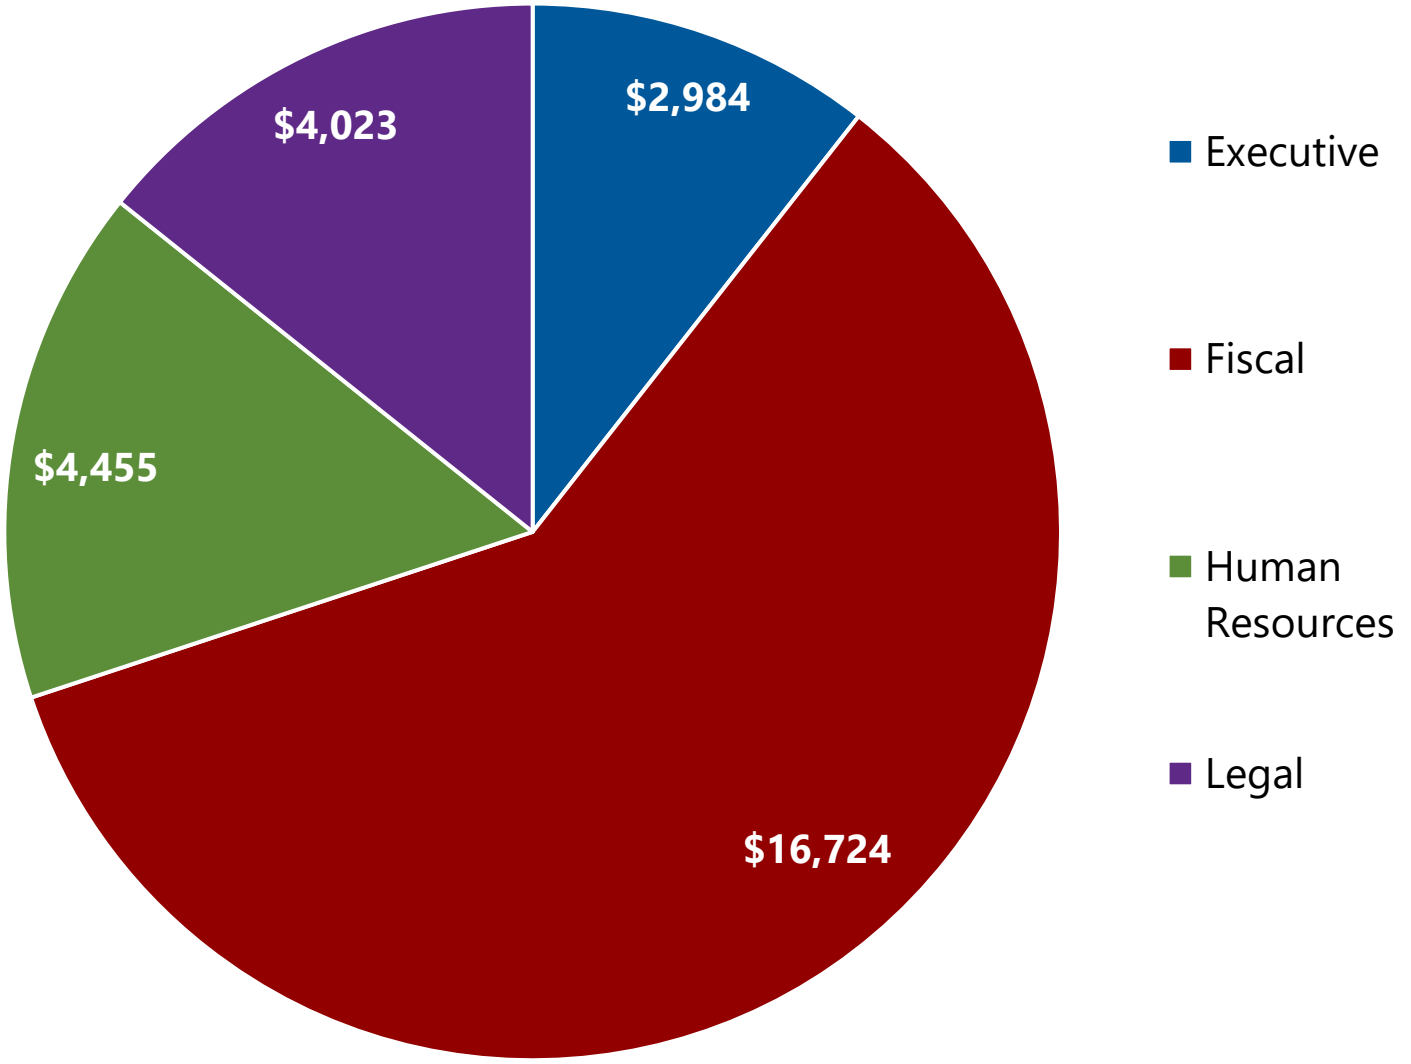
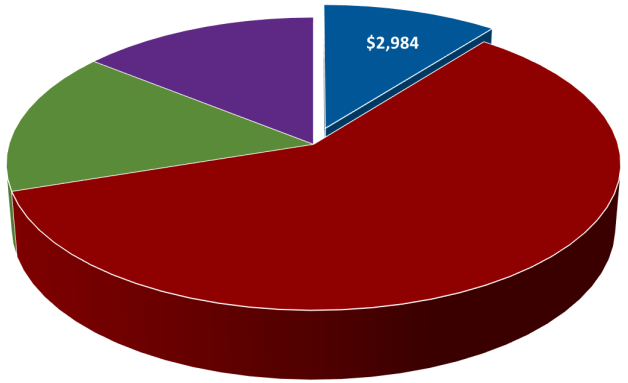
WHO WE ARE

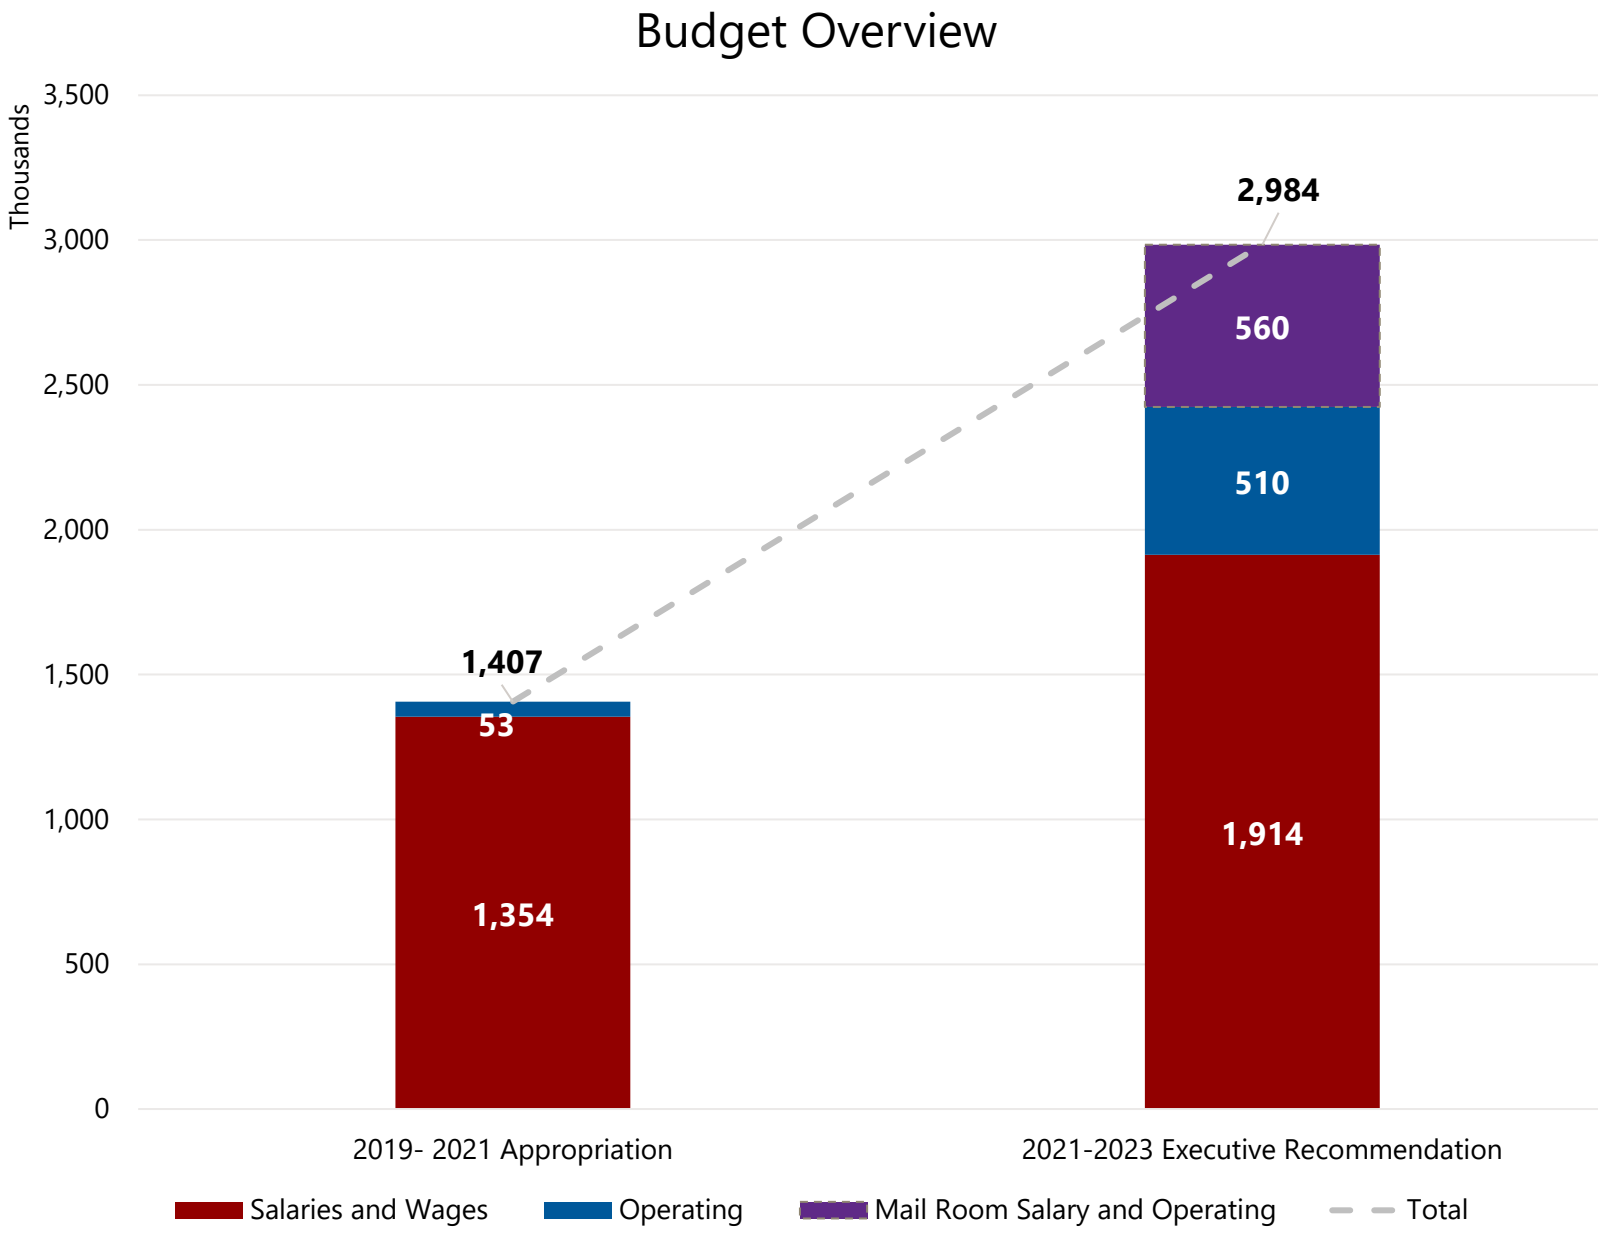


Administration Support



- Human Resources
- Legal Services
- Fiscal
- Logistics Management – New 19-21
- Strategic Communications – New 19-21

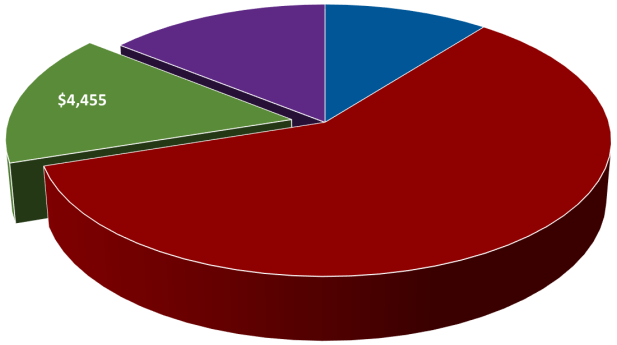
We support the people who serve the people



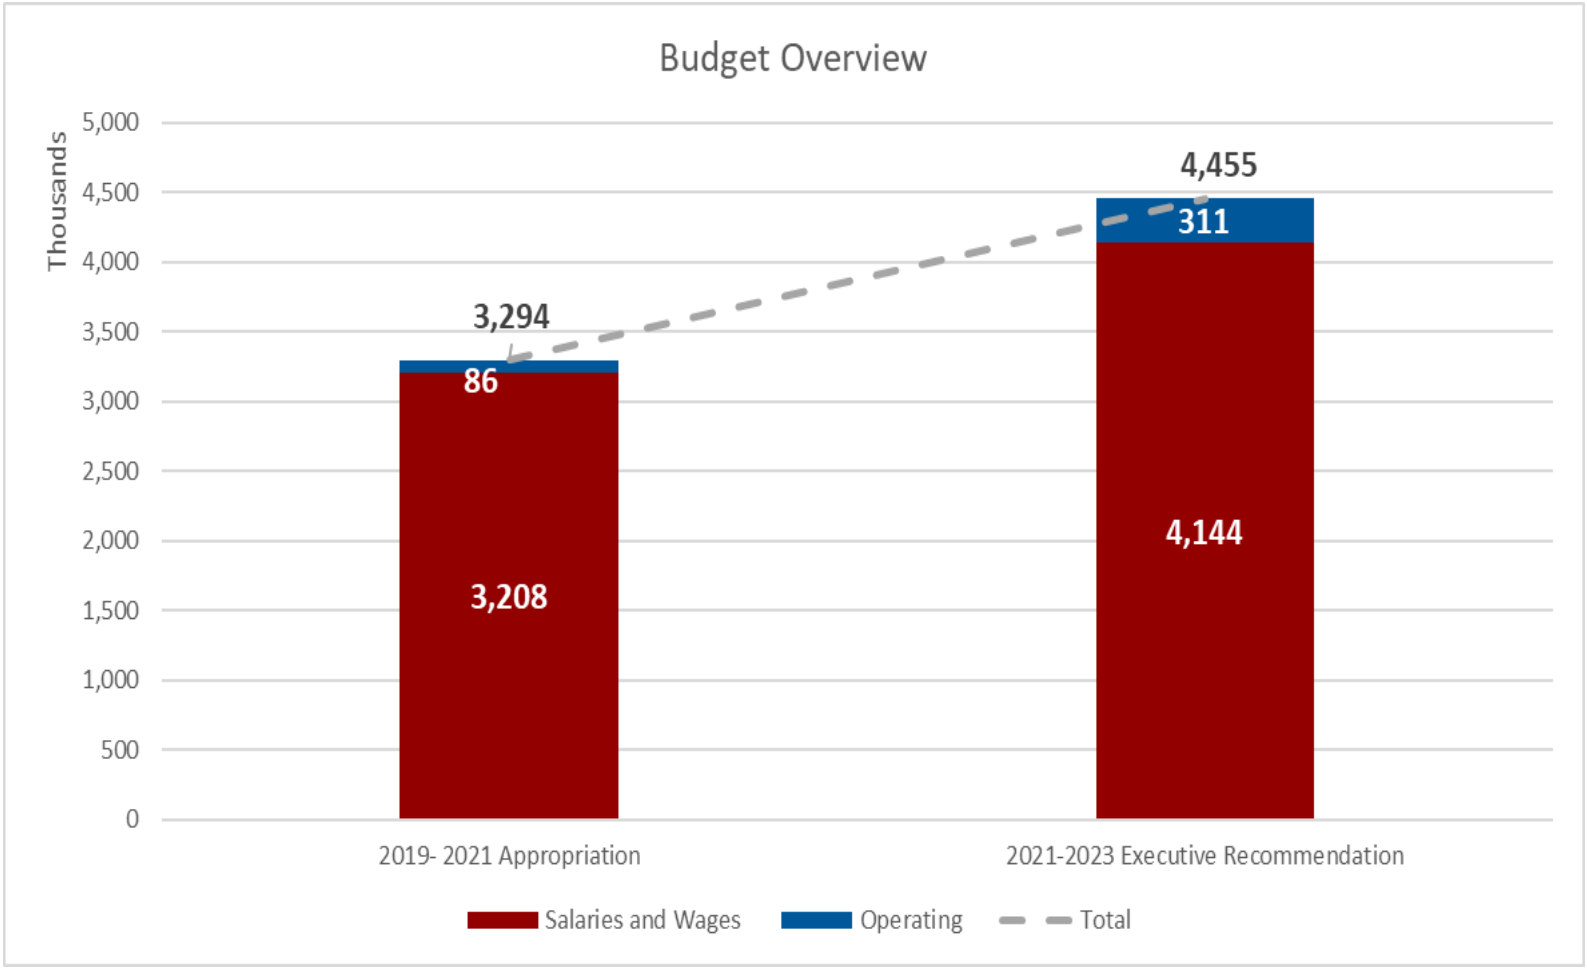
2021-2023 EXECUTIVE RECOMMENDATION ADMINISTRATION-SUPPORT (THOUSANDS)

EXECUTIVE OFFICE

- 11.0 FTE
- Provides programmatic direction and oversees operation of:
  - Program and Policy
  - Medical Services
  - Behavioral Health
  - Administration Support
    - Mailing services
- Provides guidance and/or information to:
  - Governor
  - Legislators
  - Congress
  - Political subdivisions and
  - Tribes
  - Public and Mass Media



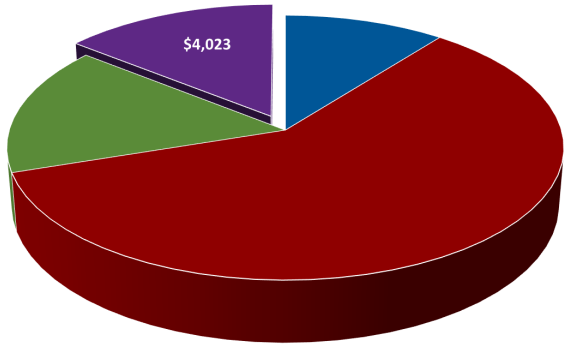
HUMAN RESOURCES – GOALS



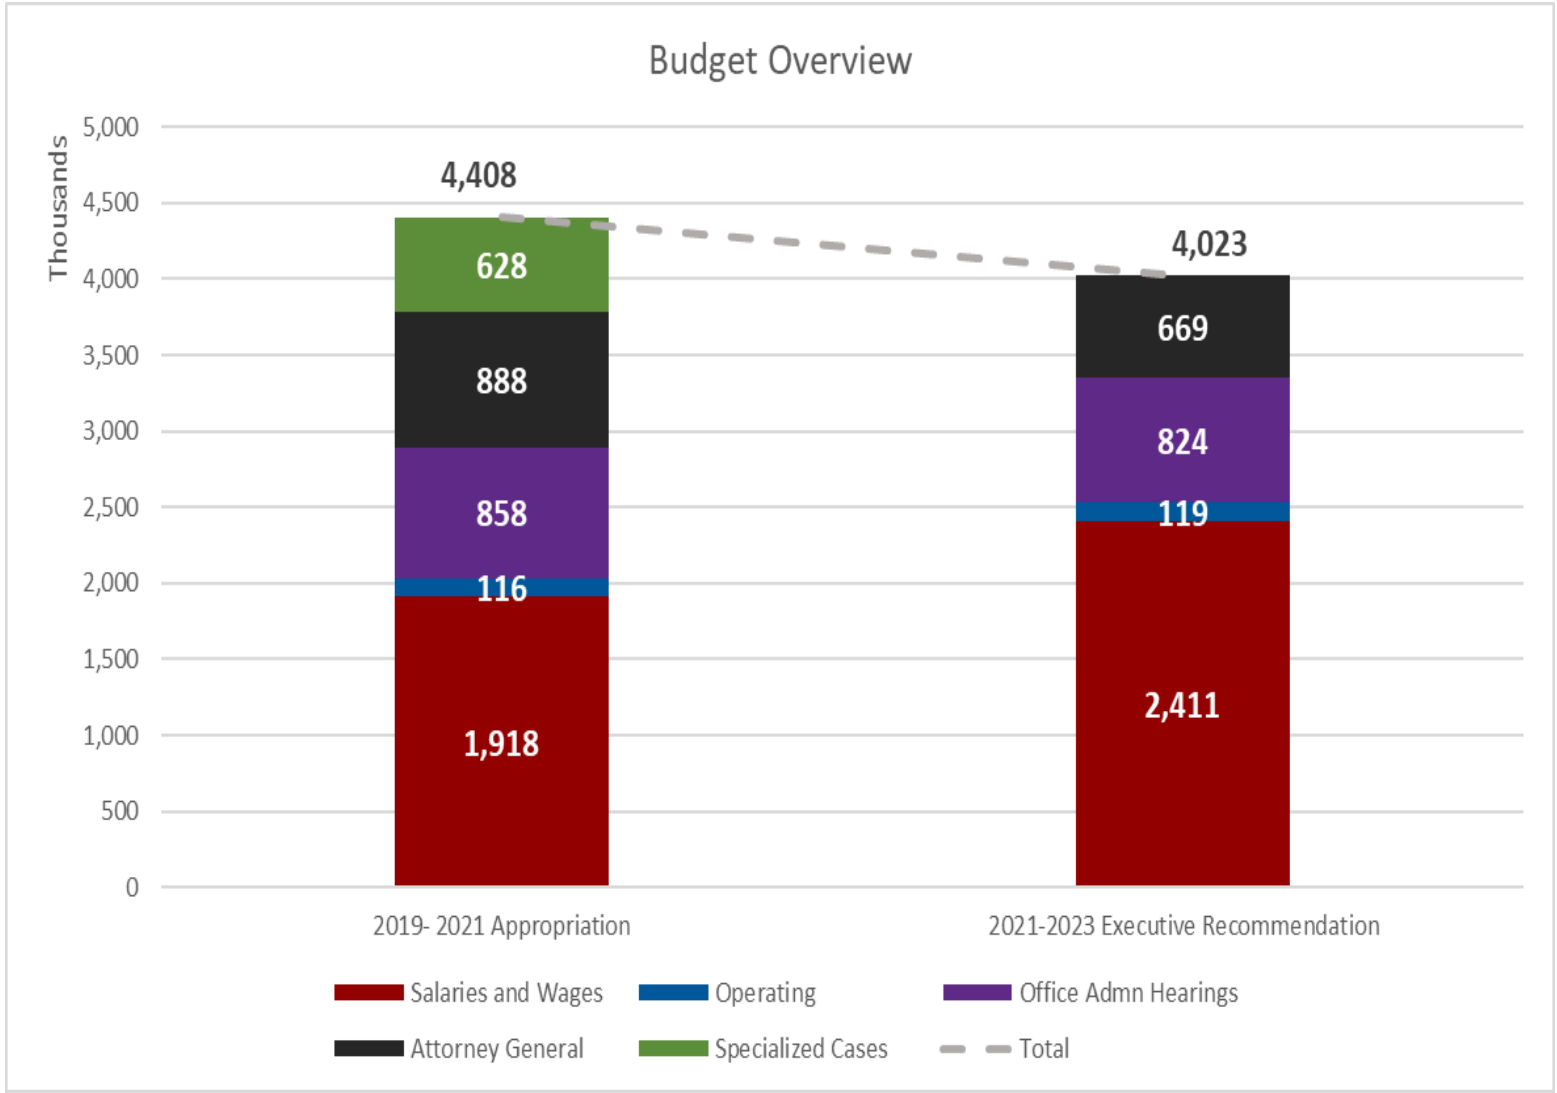
- New Workplace
- Employee engagement
- Recruitment / staffing
- Succession planning
- Automation of processes

HUMAN RESOURCES

- 21.80 FTE
- Talent Acquisition
- Performance Development/ Management
- Classification/Compensation
- Position/FTE Management
- Payroll/Data Management
- Learning & Development
- Compliance/Regulation
- Employee Relations
- Risk Management/Safety/Wellness
- Disaster Preparedness
- County Social Service/Zone HR support

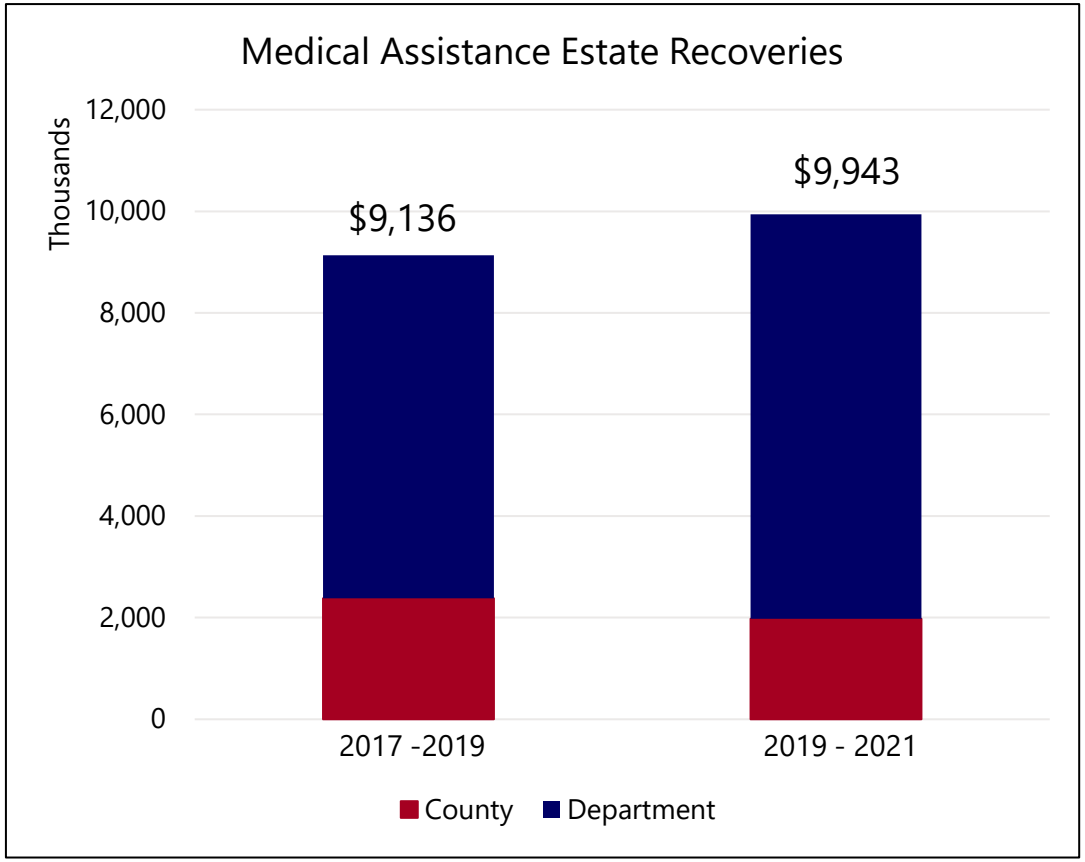


LEGAL – GOALS



- Provide general counsel and policy analysis
- Process administrative appeals
- Assist with, plan and develop administrative rules
- Implement administrative and program policy
- Draft proposed legislation

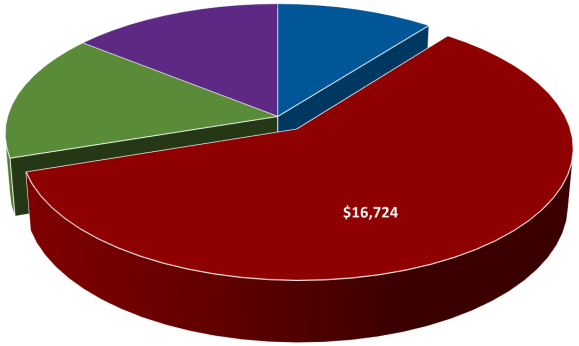
LEGAL UNIT-ADVISORY



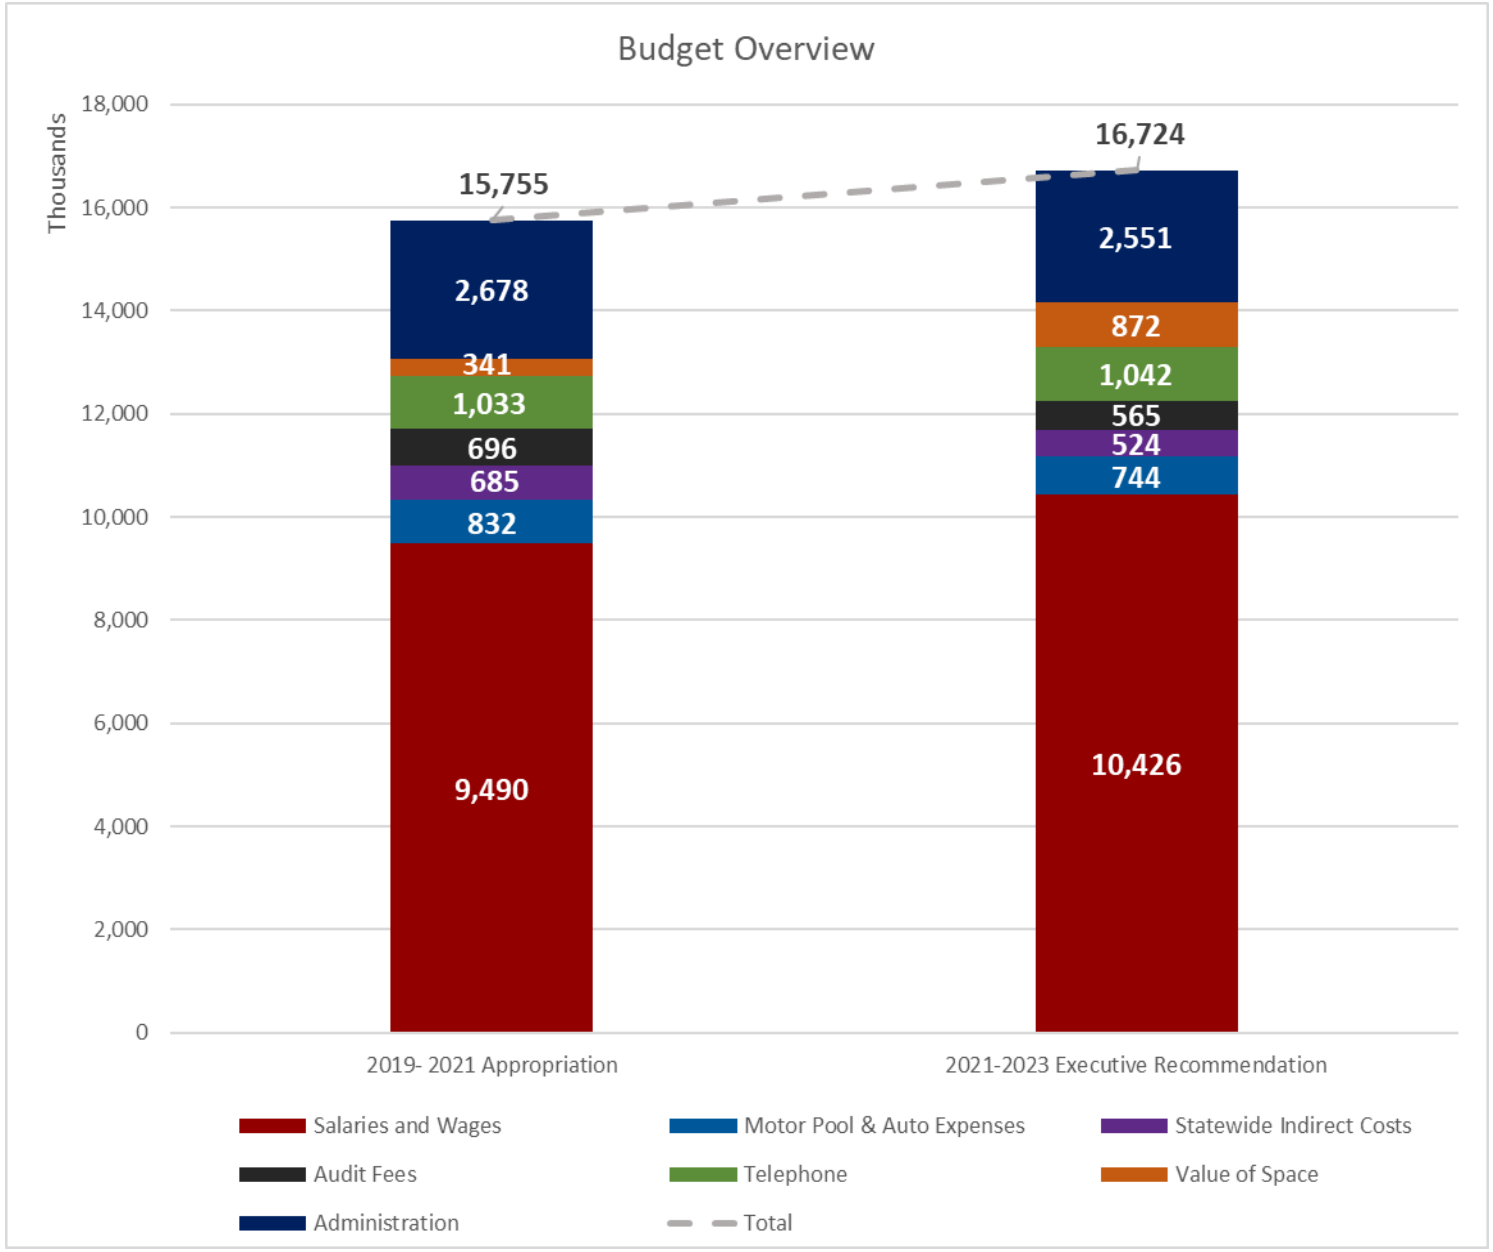
- 10.75 FTE
- Provides assistance in policy analysis, interpretation, development, training, and information
- Provides legal advice to the Department as authorized by the Attorney General
- Coordinates the appeals process for DHS clients and providers so they can obtain final decisions
- Facilitates estate recovery
- Serves as the Department's Civil Rights Office, ADA Compliance Office, and HIPAA Privacy Office
- Draft proposed legislation

LEGAL UNIT-ADVISORY

Number of:	SFY 2019	SFY 2020
Request for Fair Hearings	306	265
Provider Appeals	384	626
Intentional Program Violation	280	173
Civil Rights	18	13
Administrative Rules/ Legislative Process	4	42
Trust Review Files	87	84

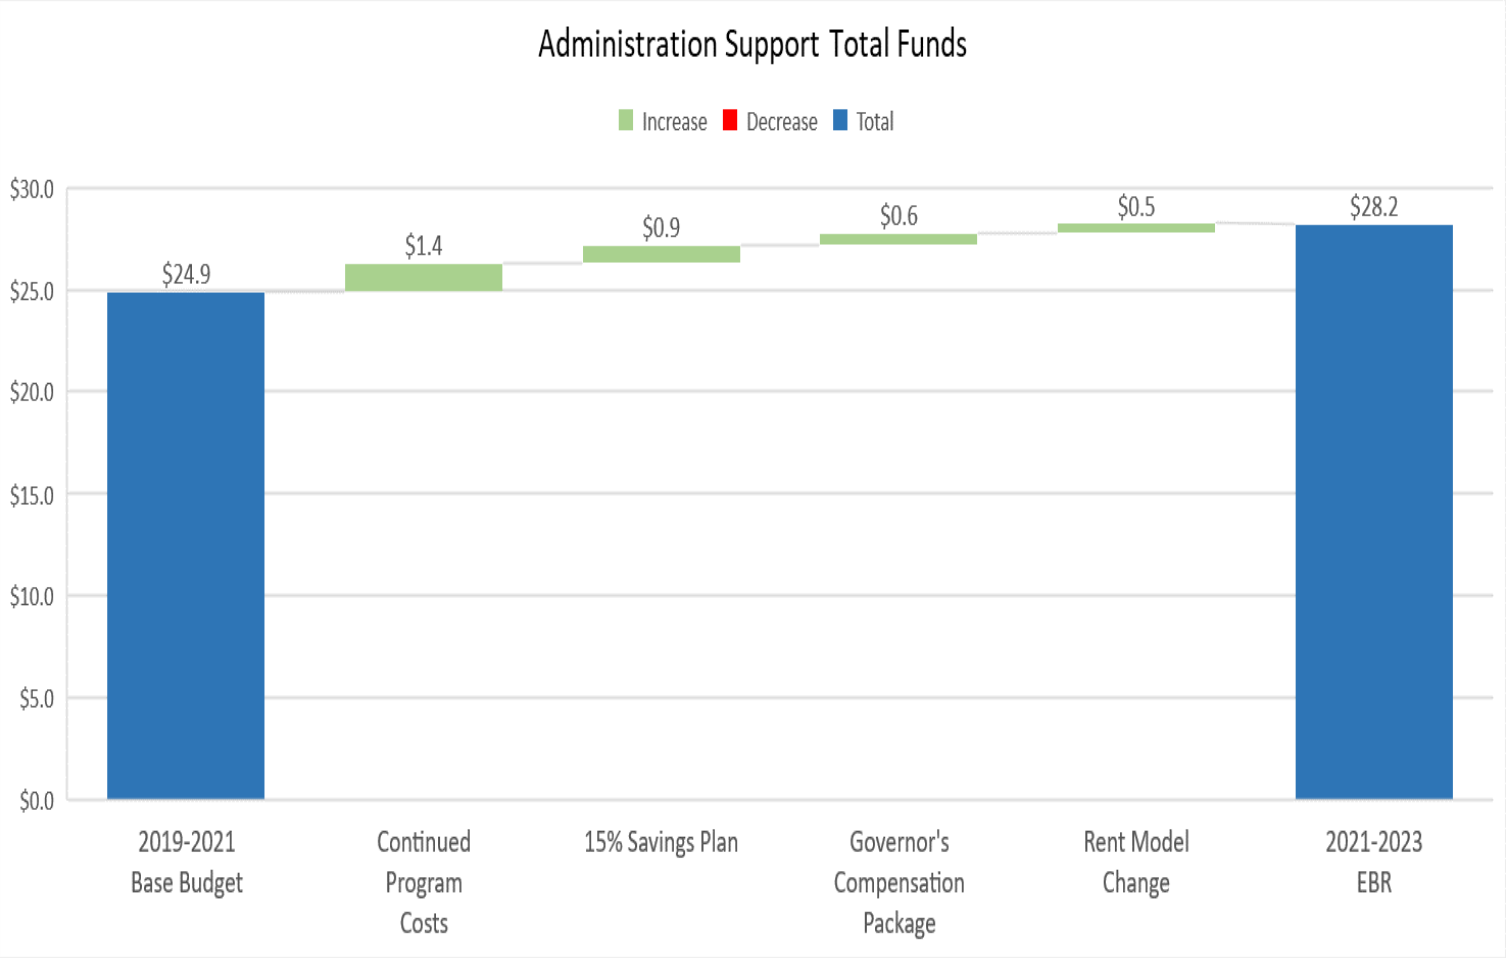


FISCAL ADMINISTRATION – GOALS



- Train and develop the fiscal team
- Improve fiscal effectiveness and efficiencies
- Develop a fiscal business scorecard
- Improve the fiscal acumen of the department
- Streamline fiscal processes
- Develop logistics

FISCAL ADMINISTRATION

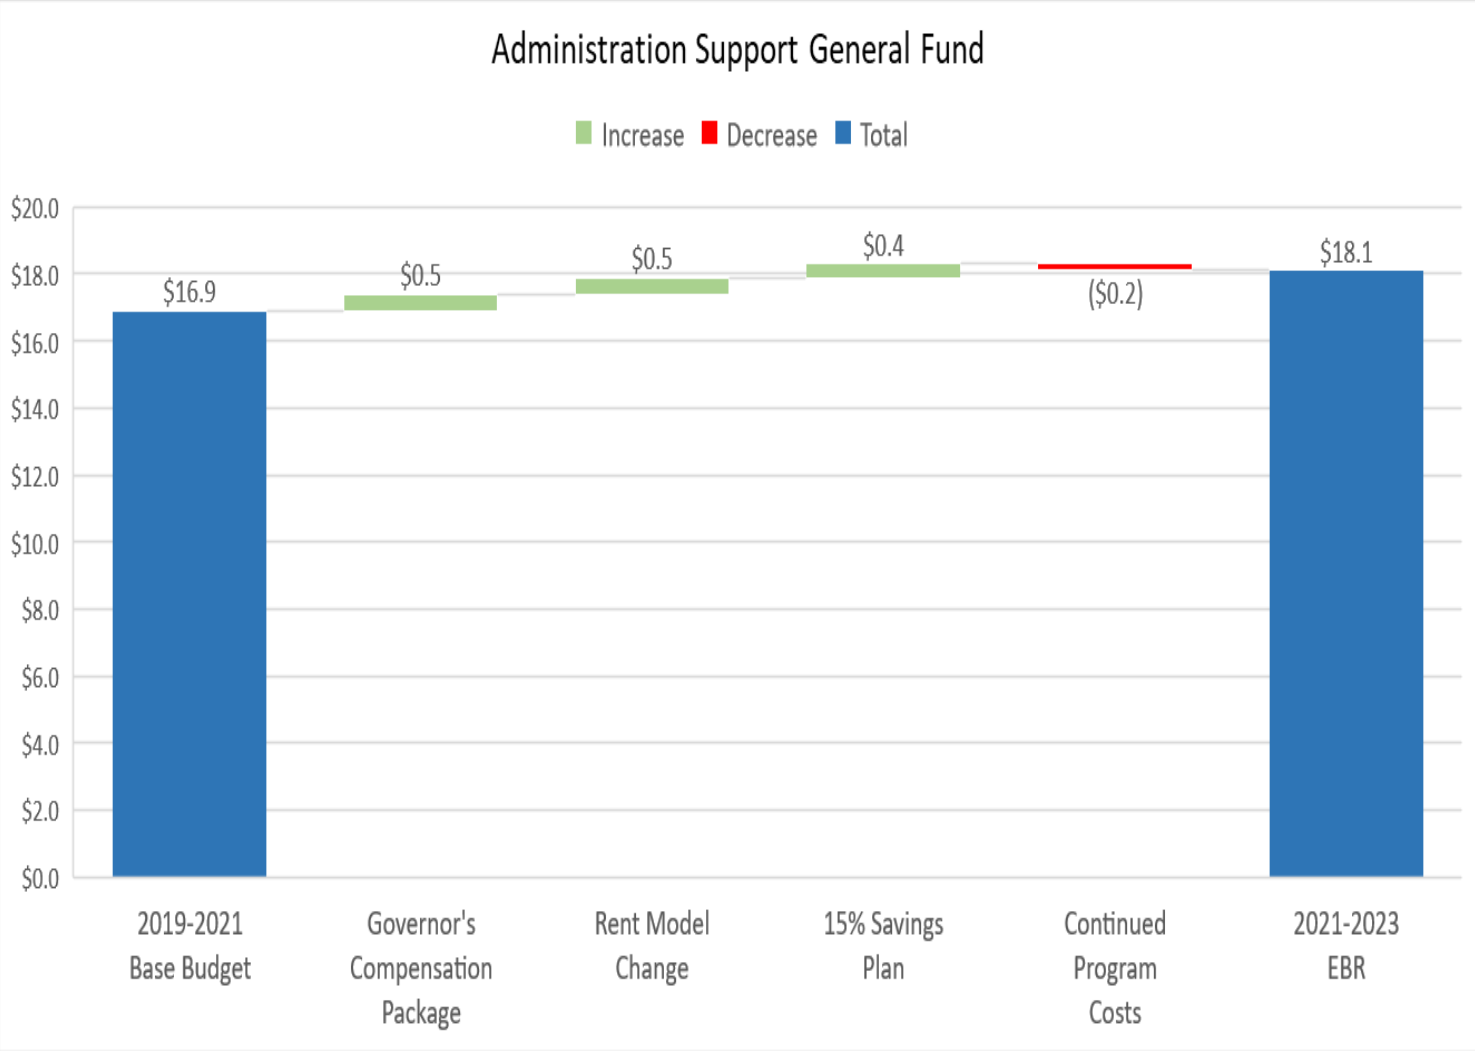


- 54.30 FTE
- Provides the following to program administrators to manage and achieve program results:
  - Budgeting and projection reports
  - Reporting
  - Cash management services
  - Procurement
  - Contract drafting and monitoring
  - Facility management
  - Centralized billing and receivable tracking for field services
  - Internal Controls
  - Audit review assistance
  - Sub-recipient Monitoring

OVERVIEW OF BUDGET CHANGES

Description	2019-2021 Budget	Increase/ (Decrease)	2021-2023 Executive Budget
Salary and Wages	16,939,176	2,509,310	19,448,486
Operating	7,925,303	812,231	8,737,534
Capital			-
Total	24,864,480	3,321,540	28,186,020
			-
General Fund	16,861,917	1,208,046	18,069,964
Federal Funds	6,581,522	3,322,296	9,903,817
Other Funds	1,421,040	(1,208,801)	212,239
Total	24,864,479	3,321,540	28,186,020
Full Time Equivalent (FTE)	89.85	8.00	97.85

OVERVIEW OF BUDGET CHANGES



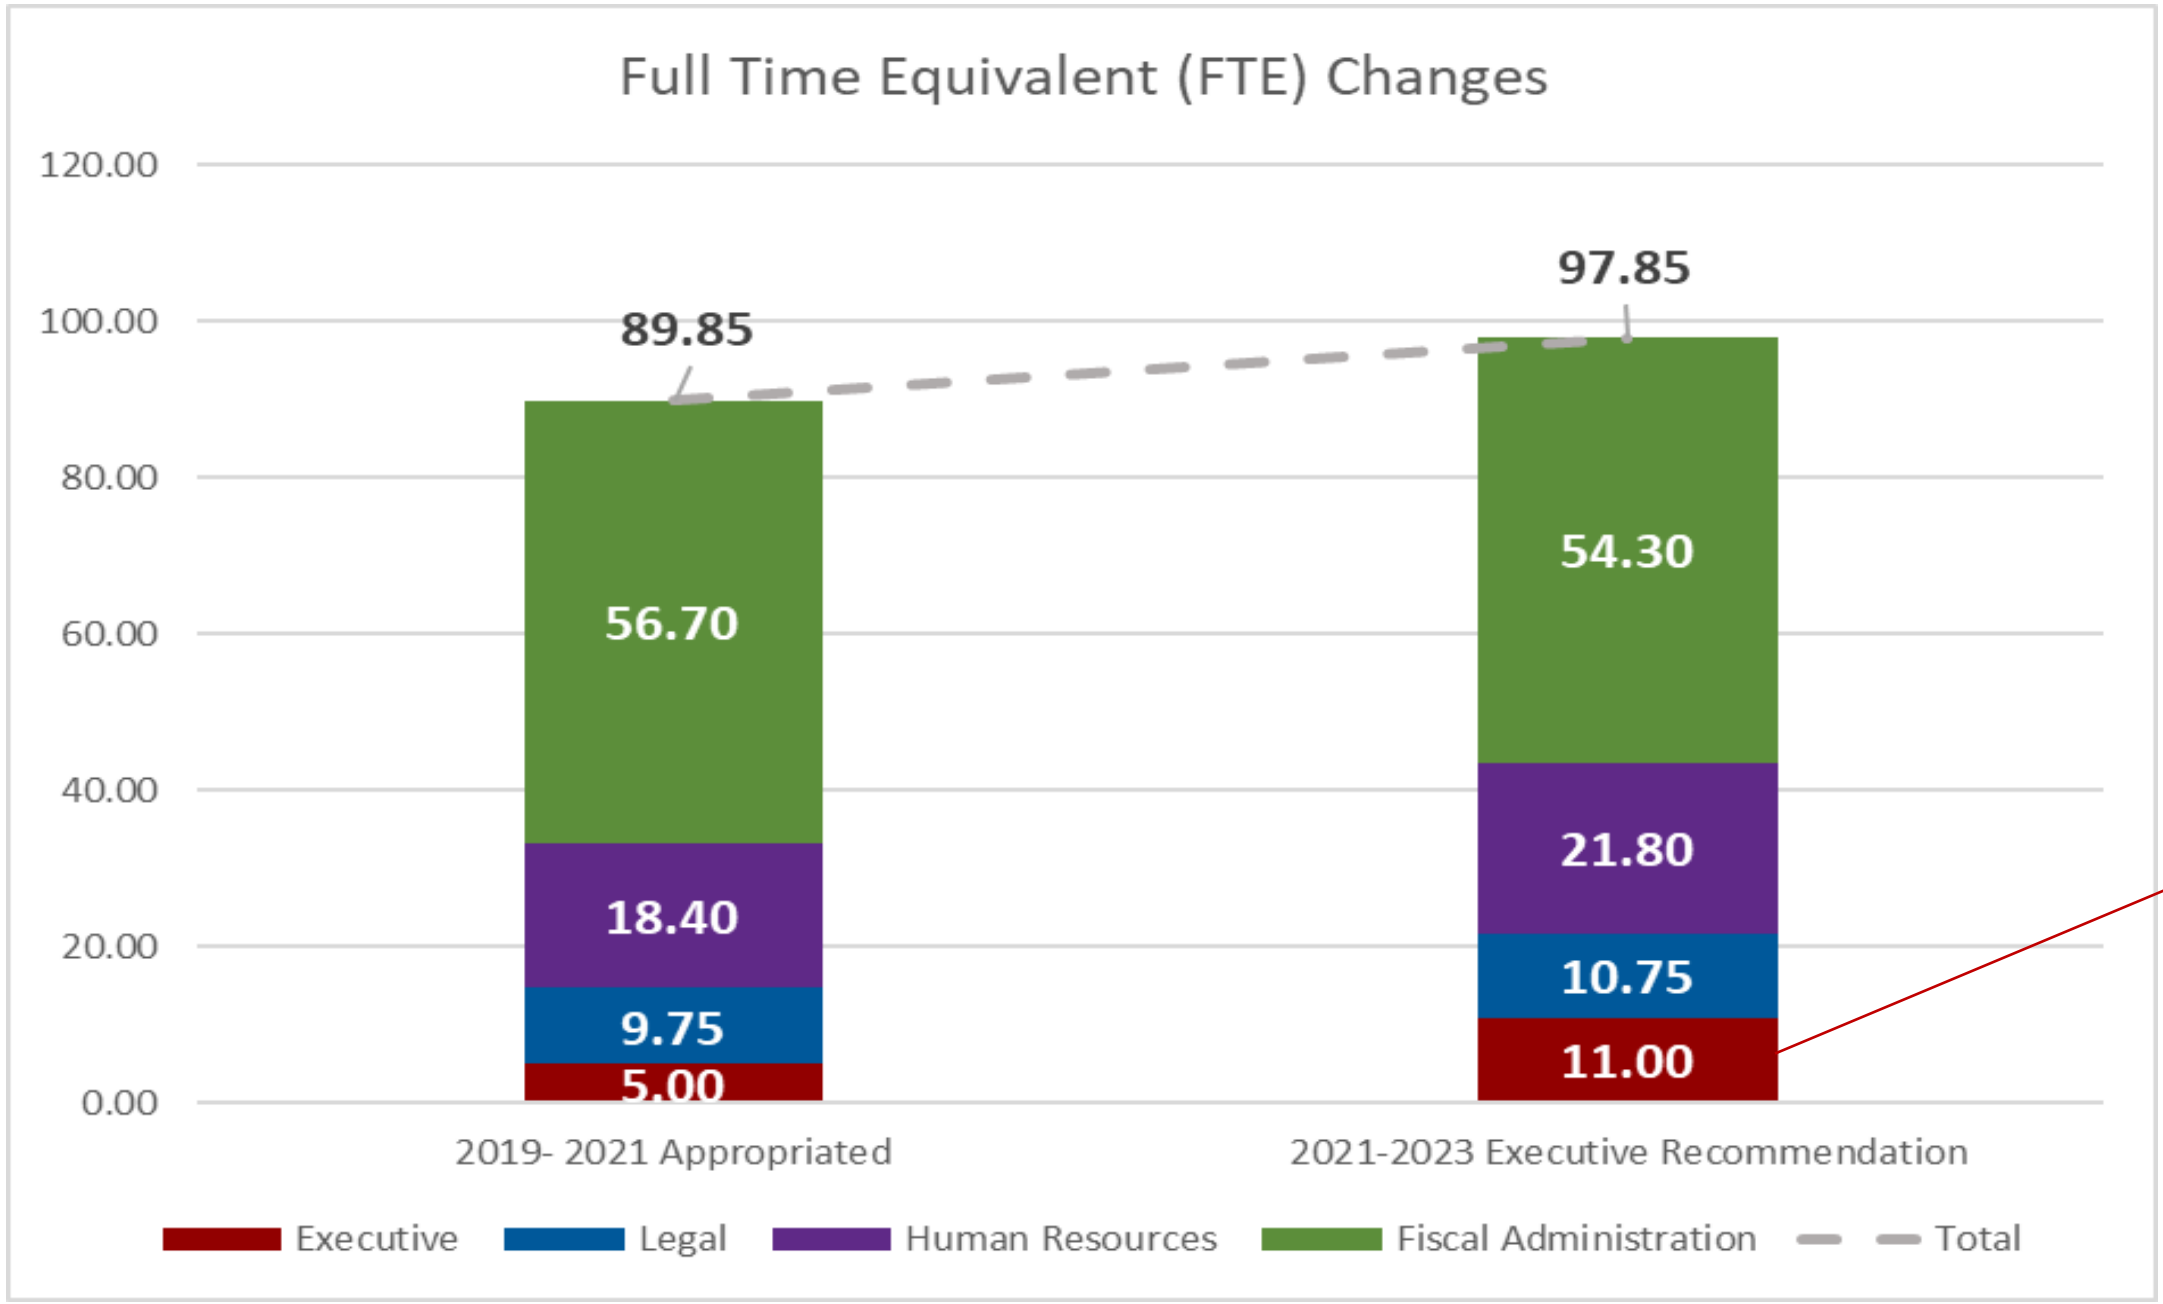
Continued Program Costs

- Wage Adjustments and Lump Sum Payouts for Retirement $1.2 Million
- Operational Changes $.2 Million
  - Increases:
    - Kanban Subscription
    - Nexus contract
  - Decreases:
    - Removal of Provider Audit Division
    - Lower audit fees
    - Less motor pool use
    - Lower legal costs for Attorney General and Office of Admin Hearings

15% Savings Plan

- Increases:
  - Addition of 8 FTE $1.6Million
- Decreases:
  - Removal of funding for Specialized Lawsuits $628,000
  - Use of State DOT rate vs Federal Rate for Personal Vehicle Travel $40,000

OVERVIEW OF GENERAL FUND CHANGES



Continued Program Costs

- Wage Adjustments and Lump Sum Payouts for Retirement
- Operational Changes Increases:
    - Kanban Subscription
    - Nexus contract
- Decreases:
    - Removal of Provider Audit Division
    - Lower audit fees
    - Less motor pool use
    - Lower legal costs for Attorney General and Office of Admin Hearings

15% Savings Plan

- Increases:
    - Addition of 8 FTE $1 Million
- Decreases:
    - Removal of funding for Specialized Lawsuits $628,000
    - Use of State DOT rate vs Federal Rate for Personal Vehicle Travel $16,000

Large increase due to Mailroom staff moving from Fiscal to Executive Office

LOGISTICS – GOALS

- Manage procurement of personal protective equipment (PPE) and critical supplies
- Centralized purchasing for DHS facilities
- Develop logistics program for internal audit and analysis for spending processes
- Develop logistics capability for procurement activities
- Provide liaison with partner agency logistics POCs and programs
- Develop logistics capabilities for management of property and facilities

STRATEGIC COMMUNICATIONS – GOALS

- Develop communication strategy in support of DHS's key priorities
- Enhance and strengthen internal communications processes and tools, with a focus on manager support
- Build awareness and capabilities related to change management
- Streamline and drive efficiencies in standard processes and measure results
- Update citizen-facing DHS website
- Improve the communication and change management acumen of the department

IT SERVICES

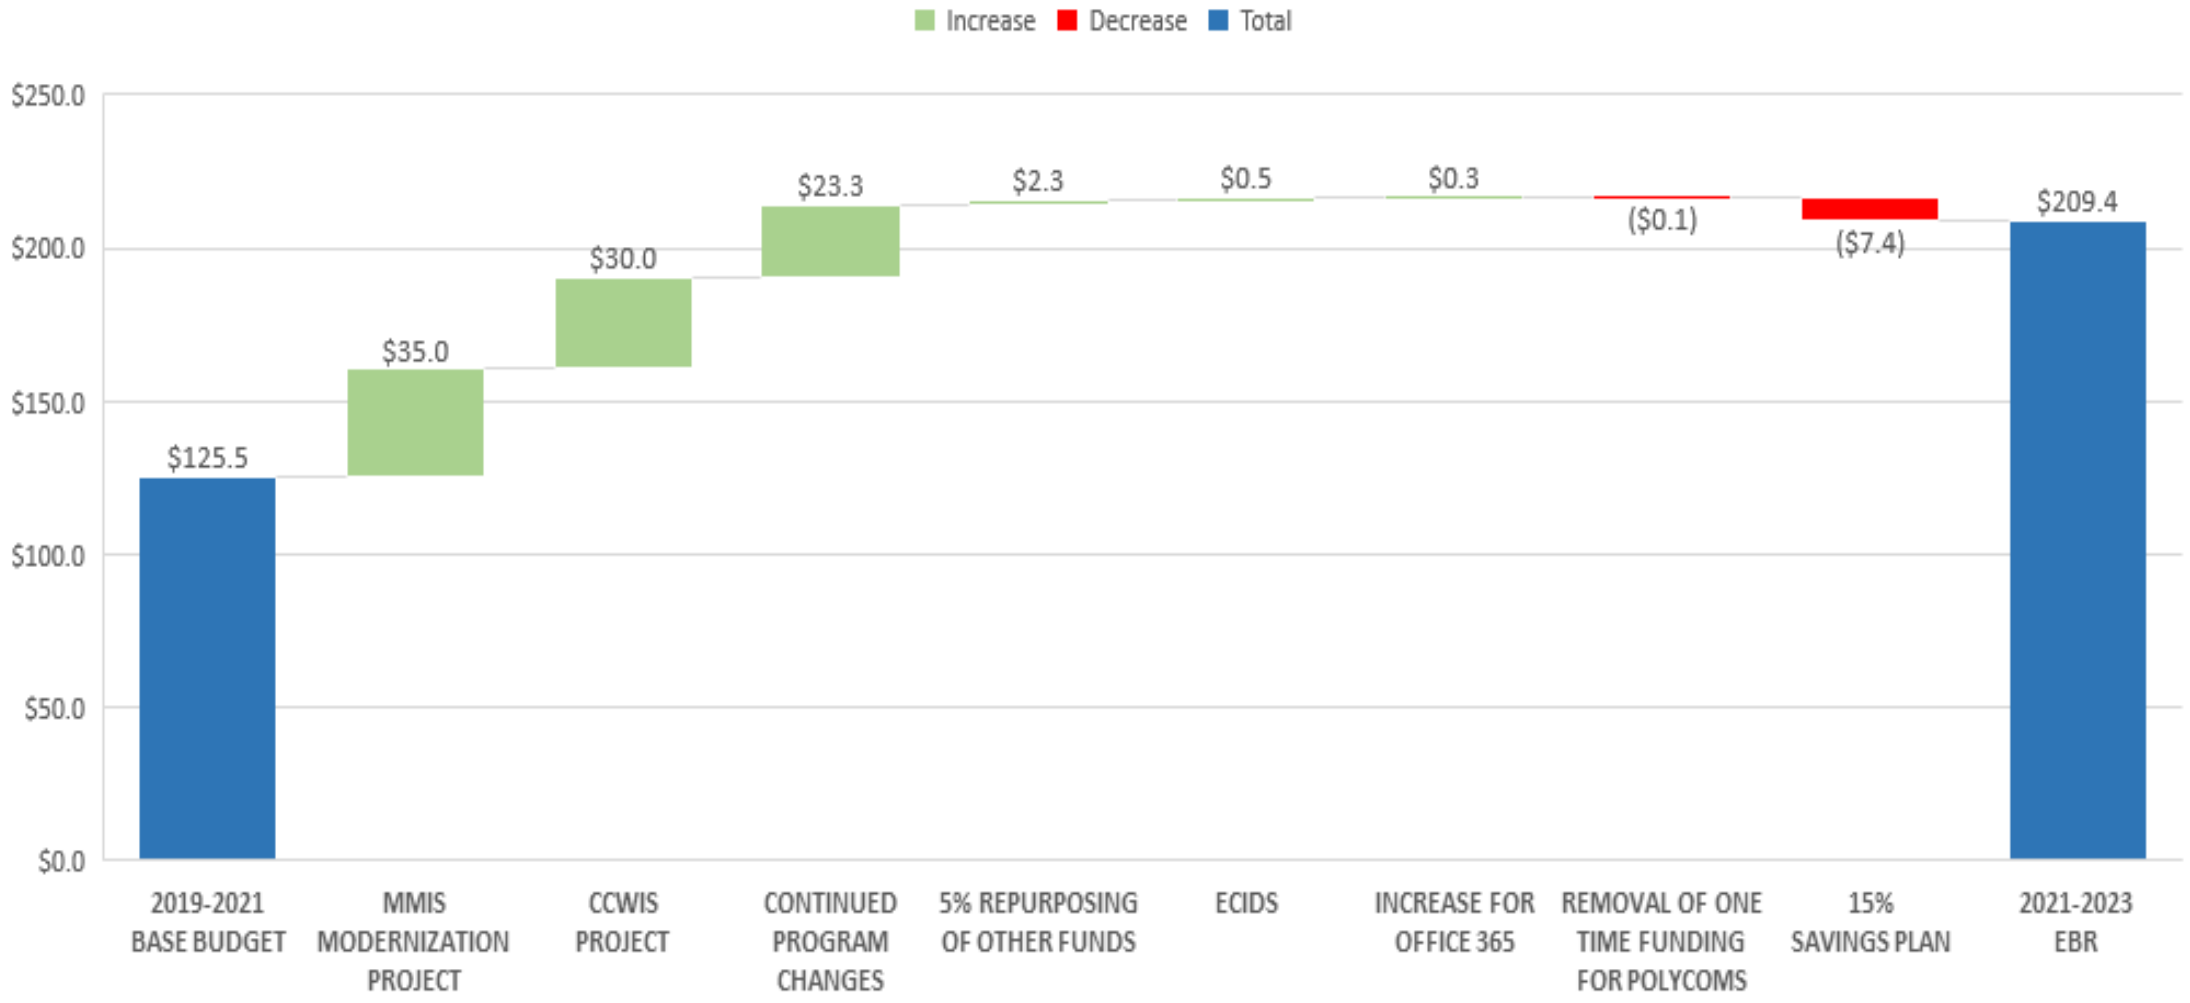
HUMAN SERVICES AND IT PARTNERSHIP

As a collaborative team, we work together to:

- Improve the citizen experience
- Enable and support our team members
- Focus on continuous improvement
- Deliver return on investment

- **Our approach to the human services IT budget:**
- Improving technology is a critical action now – not in a distant future state
- IT services and projects have been under-funded in past sessions
- IT enables us to do our work
- IT is a force multiplier

IT SERVICES PROVIDED



- **Information Technology Strategic Planning**
  - Customer Success
  - Strategic Planning, Direction
- **Business Applications**
  - Business Analysis
  - Project Management
  - Business Application Support
  - Application Development
- **Security**
  - Governance, Risk, Compliance
  - Operations
- **Information Management**
  - Business Intelligence
  - Electronic Document Management
- **Infrastructure**
  - Desktop | Hosting | Network
- **Communication**
  - Voice and video

OVERVIEW OF BUDGET CHANGES

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
1/14/2021 pm
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report

Chair Nelson called the meeting to order at 1:53 p.m.

Representative	Present	Absent
Nelson	x	
Kreidt	x	
Andersen	x	
Mitskog	x	
Schobinger	x	
Strinden	x	

Discussion Topics:

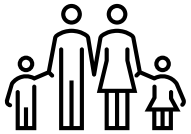
- Medical Services
- Key Priorities
- Values
- Who they serve
- Covid-19 impact
- Executive Request
- Budget Savings

Dr. Caprice Knapp, Dir. of the Medical Services Division (1:54 pm) testified about

Medicaid expansion#1115

Chair Nelson closed the meeting at 3:47 p.m.

Cole Fleck, Committee Clerk



Medical Services Budget- House Bill 1012

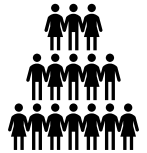
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

MEDICAL SERVICES DIVISION

Our Values

We help...

our members receive safe, appropriate, quality care in a timely manner.

We communicate...

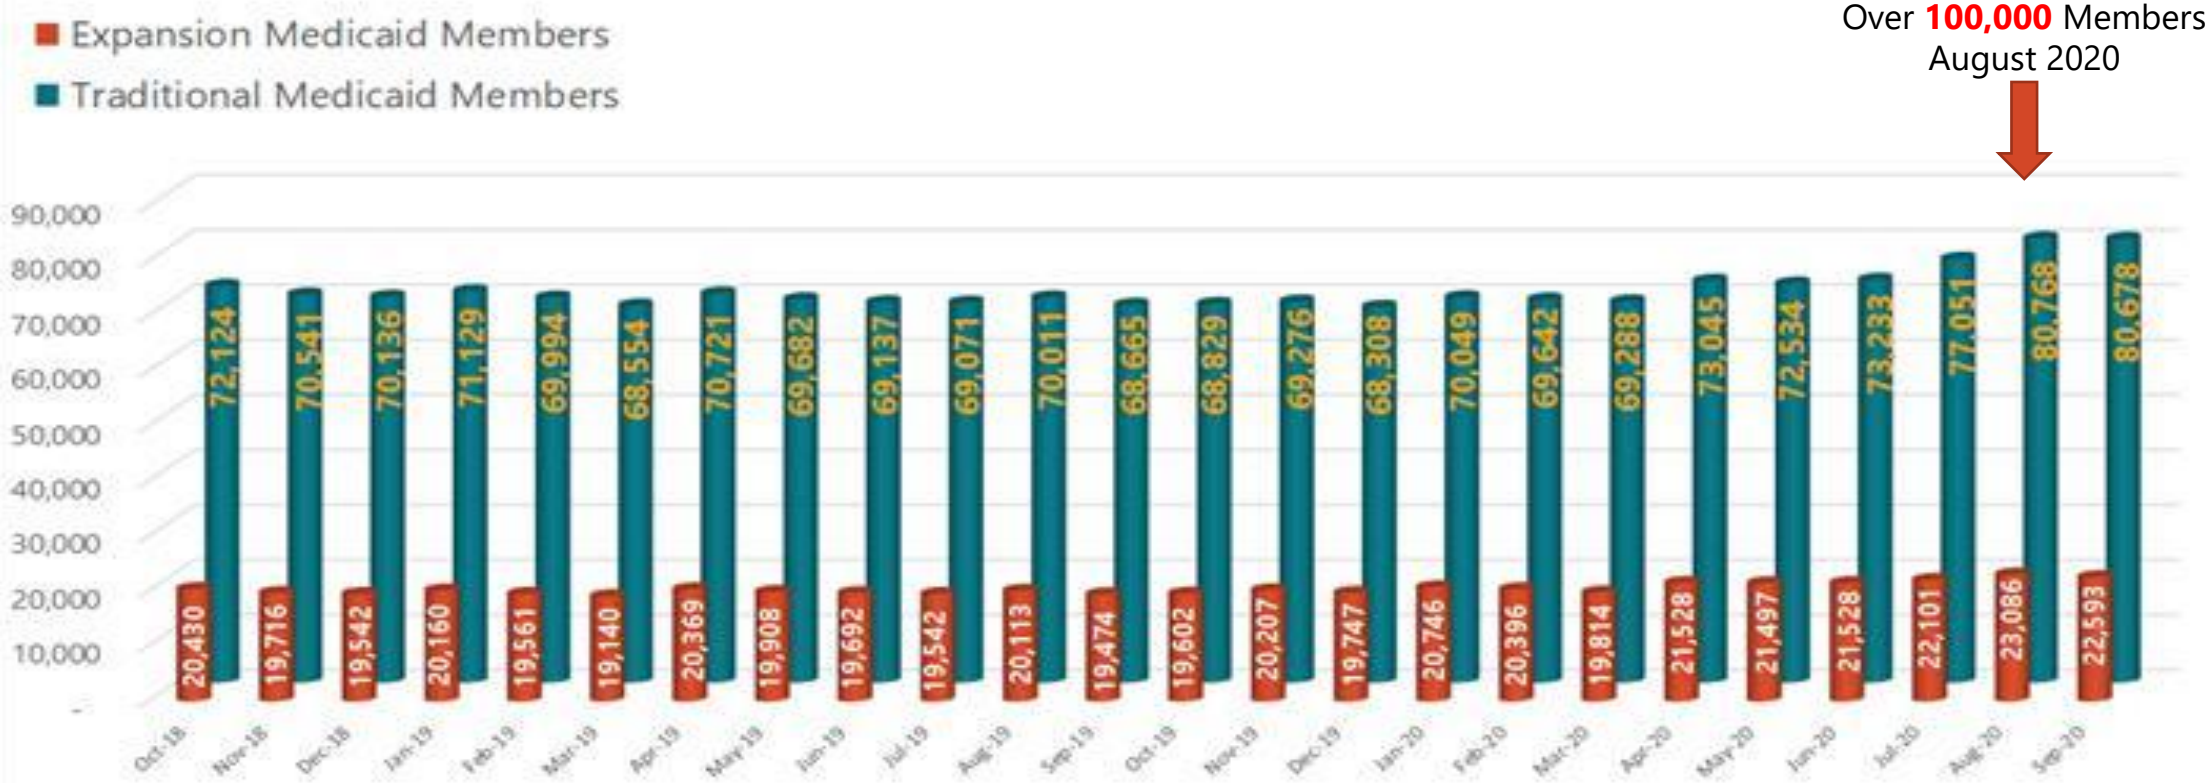
by listening, sharing information, and seeking feedback.

We partner...

with stakeholders, other state agencies, and tribes to achieve shared goals.

We oversee...

Medicaid to ensure integrity, efficiency, and stewardship of public resources.

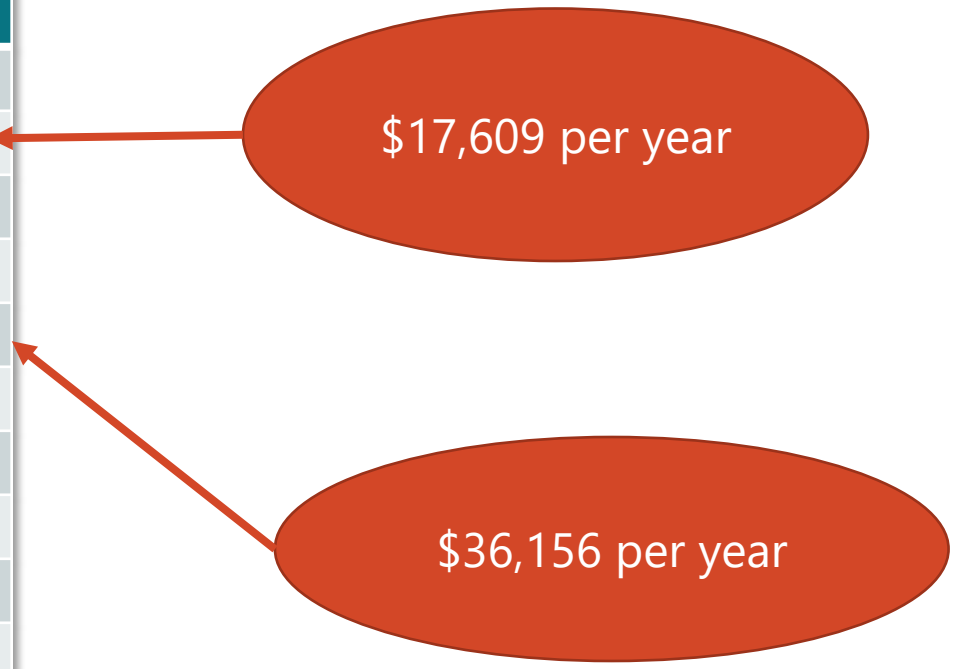


MEDICAL SERVICES DIVISION

Who We Serve

Traditional and Expansion Medicaid Members

24 Month Period



October 2018 - September 2020

Note: Children's Health Insurance Program numbers prior to January 1, 2020 are included in the Traditional Medicaid Members count.
Effective January 1, 2020, Healthy Steps children transitioned to Traditional Medicaid and are included in the Traditional Medicaid Members count.

Medicaid Expansion Eligibility for Adults

Family Size	Medicaid Expansion 138% of PL
	Monthly
1	$ 1,468
2	$ 1,983
3	$ 2,498
4	$ 3,013
5	$ 3,529
6	$ 4,044
7	$ 4,559
8	$ 5,074
9	$ 5,589
10	$ 6,105
+1	$ 516

MEDICAL SERVICES DIVISION

How We Pay

Contracted Services 1915(b) Waiver

- States design an Alternative Benefit Plan that describes the services and must include Essential Health Benefits
- Medicaid Expansion **does not** cover:
  - Skilled Nursing Facility Services*
  - Dental Care Office Visits**
  - Routine Eye Care**
  - Any waivered services
  - Long Term Care services
  - Room and Board for Residential Treatment Services**

** Only covers up to 30 days and only covers a skilled level of care*
*** Only covered for 19- and 20-year-olds*

Medicaid Expansion

Managed Care Organization:

- Risk Based Capitation paid on a per member, per month basis
- Current Vendor: Sanford Health Plan (SHP)
- Contract is currently being re-bid
  - Notice of Intent to Award will be issued approximately 5/21/2021
  - Contract Start will be approximately 1/1/2022

Medicaid Expansion:

BUDGET SAVINGS ITEMS

NORTH Dakota | Human Services

Be Legendary.™

NORTH DAKOTA MEDICAID

The 2013 ND Legislative Assembly (HB 1362) directed DHS to expand medical assistance as authorized by the federal Patient Protection and Affordable Care Act.

This included implementing the expansion by bidding through private carriers or utilizing the health insurance exchange

ND Medicaid Expansion

Limited to individuals age 19-64 with income below 138% of the Federal Poverty Level (FPL)

Health Care Services include those in ND Alternative Benefit Plan

Managed Care (MC) Delivery Model

NORTH DAKOTA LEGISLATION TO DATE

Since the initial implementation, each subsequent session of the ND Legislative Assembly has reauthorized ND Medicaid Expansion as administered and managed through a **Private Carrier**.

The 2019 ND Legislative Assembly (SB 2012) did make the following updates to the ND Medicaid Expansion Program:

- Directed the Department to continue the utilization of a private carrier for the administration and management **except for pharmacy services**, effective January 1, 2020.
- Directed the Managed Care Organization (MCO), while under contract with the Department, to
  - **Develop and implement a uniform provider reimbursement methodology**
  - **Add 1915(i) Behavioral Health Services through the MCO**

Medicaid Expansion: Transition from Managed Care to DHS Administration

Issue: Rates

Medicaid Expansion Reimbursement Comparison Per Capita Costs Per State

	Expansion Group - TOTAL Spending	Expansion TOTAL Group Enrollment	Expansion TOTAL Per Capita Amount	Rank
North Dakota	$297,650,200	21,100	$14,107	1
Alaska	$412,994,600	45,300	$9,117	2
Delaware	$569,892,300	63,100	$9,032	3
New Hampshire	$510,384,900	57,400	$8,892	4
Maryland	$2,699,785,000	313,600	$8,609	5
Minnesota	$1,808,509,000	210,300	$8,600	6
Connecticut	$2,051,390,800	256,200	$8,007	7
Indiana	$3,492,894,100	449,500	$7,771	8
Illinois	$5,434,013,700	752,000	$7,226	9
Montana	$690,420,200	98,600	$7,002	10

North Dakota is **54% higher** than **Alaska**

Note
Enrollment from the Medicaid Budget and Expenditure System (MBES) is reported for each month. In an effort to take into account that some beneficiaries are enrolled for only part of the year, maximum monthly enrollment for each state is used to estimate total enrollment over the period.

Medicaid Expansion: Transition from Managed Care to DHS Administration

Issue: Administration

Comparison Medicaid Expansion Financial Arrangement

Why do State Medicaid Programs use MCOs?

1. Managed Care Organization Takes on the Risk versus the State
2. Budget Predictability
3. Budget Savings
4. Improved Outcomes

Risk & Predictability

- As in any risk-based model the more people in the risk pool the more likely the managed care organization can spread the risk across health and less health individuals
- The larger the risk pool, the more predictable and stable premiums will be.
- Premiums also rely on the average health care costs of the enrollees
- Adverse selection occurs when the insurer attracts individuals when they have greater health care needs
- In **North Dakota**, the
  - **risk pool** is the **smallest** in the **entire country** using managed care
  - **premiums** have **not** been **predictable** or **stable**
  - **churn rate** indicates that **adverse selection** is probably occurring

Medicaid Expansion Comparison: under 100K People Delivery of Care Model

Medicaid Expansion Population

No MCOs

- Maine 19,812
- Alaska 51,144
- Vermont 55,431
- Montana 98,741

1 MCO

- North Dakota 20,369

Only State with 1 MCO

2 MCOs

- New Hampshire 53,424
- Delaware 62,534 **2 MCOs serve traditional and expansion ~199K*
- Rhode Island 66,641 **2 MCOs serve traditional and expansion ~250K*

Medicaid Expansion: Transition from Managed Care to DHS Administration

Other Issues

Proposed Solution
Health Homes

Transition from managed care to managed fee-for-service

- requires a more robust management program than current PCCM program

DHS brought in presenters from

- Alabama (Medical Homes to ACO)
- South Dakota (Health Homes Model)
- Connecticut (ASO model) in early 2020

South Dakota avoided $7.3 million in costs using Health Homes in 5 years

Feedback from North Dakota Medicaid Stakeholders

- Noted that **Health Homes** was the preferred model
- Subsequent meeting with outpatient stakeholders

2021-2023 Executive Request

- Authorizes DHS to plan for **Health Homes** and seek CMS approval
- Enhanced payment will offset some of the reduction in rates.

Proposed Solution
Health Homes

Medicaid Health Homes

- Established by the Affordable Care Act
- Created an optional Medicaid State Plan benefit for states to establish Health Homes to coordinate care for Medicaid members with chronic conditions
- For the first 2 years of the program, the state receives an **enhanced federal match (90%)** for the health home-specific services.
- Section 1945 of the SSA: https://www.ssa.gov/OP_Home/ssact/title19/1945.htm

Prior Testimony
Critical Access Hospital Impact

Prior testimony implied that DHS has not considered the impact on critical access hospitals.
Handout shows the Medicaid percentage of payer mix for all hospitals. Average Medicaid is 8% of payer mix across all hospitals. According to enrollment data, about 20% of that is expansion enrollees.

Average estimated expansion payer mix for CAHs is 1.58% and 1.3% for PPS

Prior Testimony
ND Medicaid Demonstrated Results in Pharmacy Management

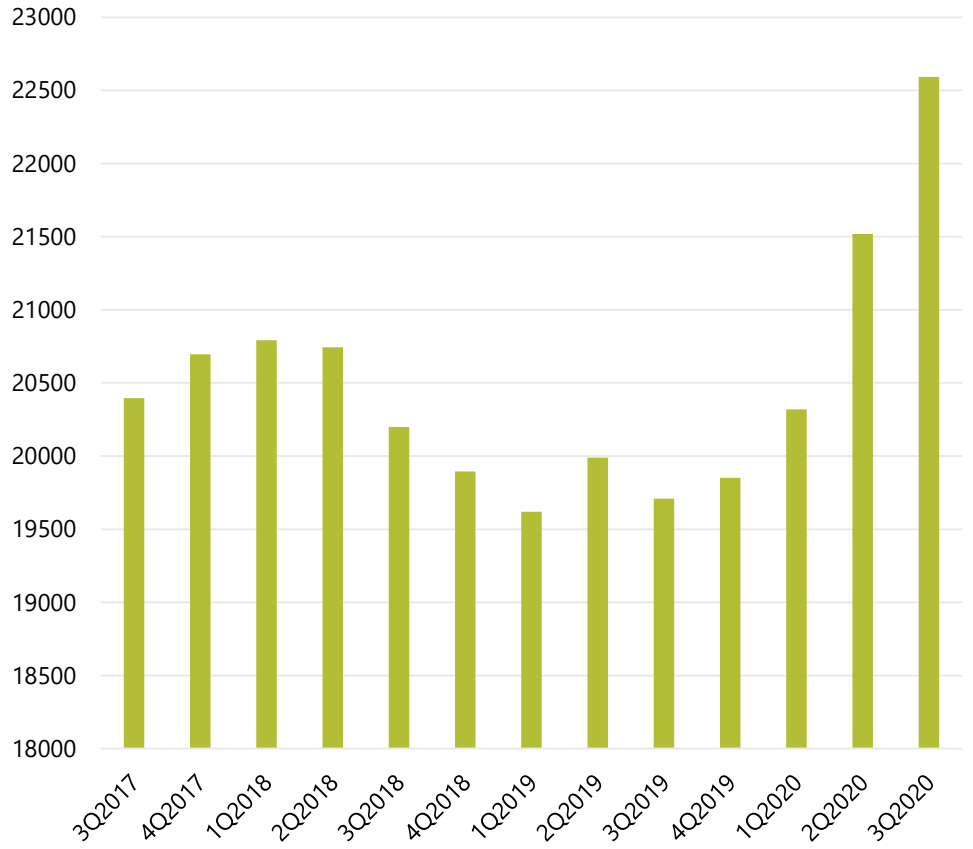
Prior testimony implied that DHS does not have demonstrated results in management

- In 2019, both CHIP and expansion Pharmacy was moved to DHS administration.

Estimated total pharmacy savings is $17.26 million

Prior Testimony
ND Medicaid Demonstrated Results in Pharmacy Management

Administrative Costs



- As discussed during the 2019 session, DHS estimated $3.991 million in net administrative savings
  - Avoidance of paying $4.554 million to Sanford Health Plan for administrative costs (admin, profit, and the Health Insurance Provider Fee (CY 2020 plus first six months of CY 2021))
  - Incurring additional $562,347 in administrative costs by bringing the pharmacy claims in-house
    - Health Insurance Provider Fee will now not exist in 2021, so that removes $550,000 of expected admin savings

Pharmacy Claims Costs

- As discussed during the 2019 session, DHS estimated $2.1 million in pharmacy claim cost savings from additional utilization management efficiencies
  - Faster changes in coverage criteria
  - Management of non-Preferred Drug List (PDL) medications
  - More robust, Medicaid population centered claims processing system
  - Closer management and control of state claims system within MMIS

Prior Testimony
ND Medicaid Demonstrated Results in Pharmacy Management

Average Number of Recipients by Quarter

COVID resulted in increasing number of eligibles for Medicaid Expansion

- Pre-COVID **average of 20,166**
- Post-COVID
  - 2Q20 = **21,518**
  - 3Q20 = **22,593**

Prior Testimony
ND Medicaid Demonstrated Results in Pharmacy Management

RX Claims- Net Costs By Quarter

Quarter	Spend	Per Member Per Month
3Q 2019	$3,030,829.88	$51.26
4Q 2019	$2,934,056.57	$49.27
1Q 2020	$2,419,967.44	$39.70
2Q 2020	$2,591,717.60	$40.15
3Q 2020	$2,794,276.77	$41.23

RX Claims Savings

- Rx Average PMPM 4Q17 – 4Q19
  - $48.16
- Rx average quarterly spend 4Q17 – 4Q19
  - $2.91 million
- Rx Average PMPM 1Q20 – 3Q20
  - $40.36
- Rx average quarterly spend 1Q20 – 3Q20
  - $2.6 million

Prior Testimony
ND Medicaid Demonstrated Results in Pharmacy Management

Summary – Claims Savings

PMPM dropped 16%

- Average of $48.16 (4Q17 – 4Q19)
- Average of $40.36 (1Q20 – 3Q20)

$1.509 million savings (1Q20 – 3Q20)

- If PMPM would not have changed from $48.16 average, net spend would have projected to be $9.315 million
- Net spend since carve out has been $7.806 million

With 3 quarters left, we are on track for total savings of $3.018 million

- Which is above the 2019 legislative testimony estimate of $2.1 million in claims savings

Prior Testimony ND Medicaid Demonstrated Results in Pharmacy Management

Savings From RX Carve Out- IHS

- **IHS claims are now 100% FMAP**
  - Prior to carve out, claims simply part of the rate
- **$3.6 million saved (1Q20 – 3Q20)**
  - Currently trending at $1.2 million per quarter
  - $3.8 million projected for next three quarters for total of $7.4 million in savings
- **Expansion contract included contractor being responsible for ensuring Medicaid Expansion was the payer of last resort**
- With DHS paying Rx claims, we have now included Expansion population in our processes for finding other coverage
- **A minimum of 190 recipients have been found to have Medicare coverage**
  - Premium ranges from roughly $900 to $1400 per month for different expansion recipients
  - 190 recipients X $1052 per month = $200,000 per month
- **$2.2 million in premium savings (Feb 2020 through Jan 2020)**
  - $1.2 million expected for next six months to total $3.4 million

Prior Testimony
ND Medicaid Demonstrated Results in Pharmacy Management

RX Carve Out Savings

	Realized Savings	Expected Total Savings
Claims	$ 1,509,000	$ 3,018,000
IHS	$ 3,600,000	$ 7,400,000
Premiums	$ 2,200,000	$ 3,400,000
Administration	$ 2,641,000	$ 3,441,000
Total	**$ 9,950,000**	**$ 17,259,000**

Expected Total Savings

- Claims = $3.018 million (> $2.1 million projected in 2019 session)
- IHS = $7.4 million **(*New savings)**
- Premiums = $3.4 million **(*New savings)**
- Admin = $3.441 million (< $3.991 million projected in 2019 session due to HIPF going away in 2021)

Total = $17.259 million (> $6.091 projected in 2019 session)

Prior Testimony
ND Medicaid Demonstrated Results in CHIP Management

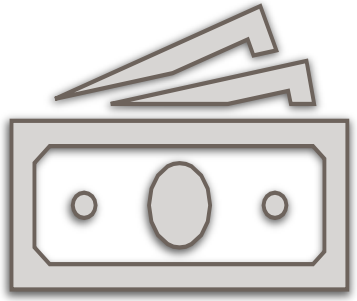
CHIP Savings (1Q20-3Q20)

- Expected CHIP cost = $6,706,332
  - Average 2377.77 kids per month x Average $313.38 premium per month
- Actual CHIP cost = $1,932,582
  - Actual Provider Payments = $2,872,734
  - Drug rebates = $940,152
- Savings = $4,773,750
- % reduction = 71.18%

Prior Testimony Federal Funds

During revenue downturns, 100% state-funded programs and **traditional Medicaid providers are disproportionately targeted for savings** versus expansion providers due to the funding split. Again, this creates a **non-equitable** Medicaid system.

100% General Fund	50%/50%	90%/10%
Autism Voucher Basic Care	Developmental Disabilities, HCBS, Nursing Homes, Dental, Vision Pediatrics	Expansion



Developmental Disability providers and **Nursing Homes** have put in the hard work to have **more equitable reimbursement**, reducing the financial burden on the State

DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment

Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

MEDICAL SERVICES DIVISION
Our Values

We help...

our members receive safe, appropriate, quality care in a timely manner.

We communicate...

by listening, sharing information, and seeking feedback.

We partner...

with stakeholders, other state agencies, and tribes to achieve shared goals.

We oversee...

Medicaid to ensure integrity, efficiency, and stewardship of public resources.

Basic Care Facilities

Basic Care Payment Two Components

Personal Care Rate

- Medicaid funded
- For ADL and IADL assist
- Salaries and fringe benefits only
- Must be provide for at least 15 minutes per day
- No bed hold payment

Room and Board Rate

- **State Funded**
- Supplies and Property costs
- Allocated costs for non-hands-on care
- Bed hold payment applicable

Overview of Long-Term Care Services: HCBS

NORTH Dakota | Human Services
Be Legendary.™

Home & Community-Based Services (HCBS)

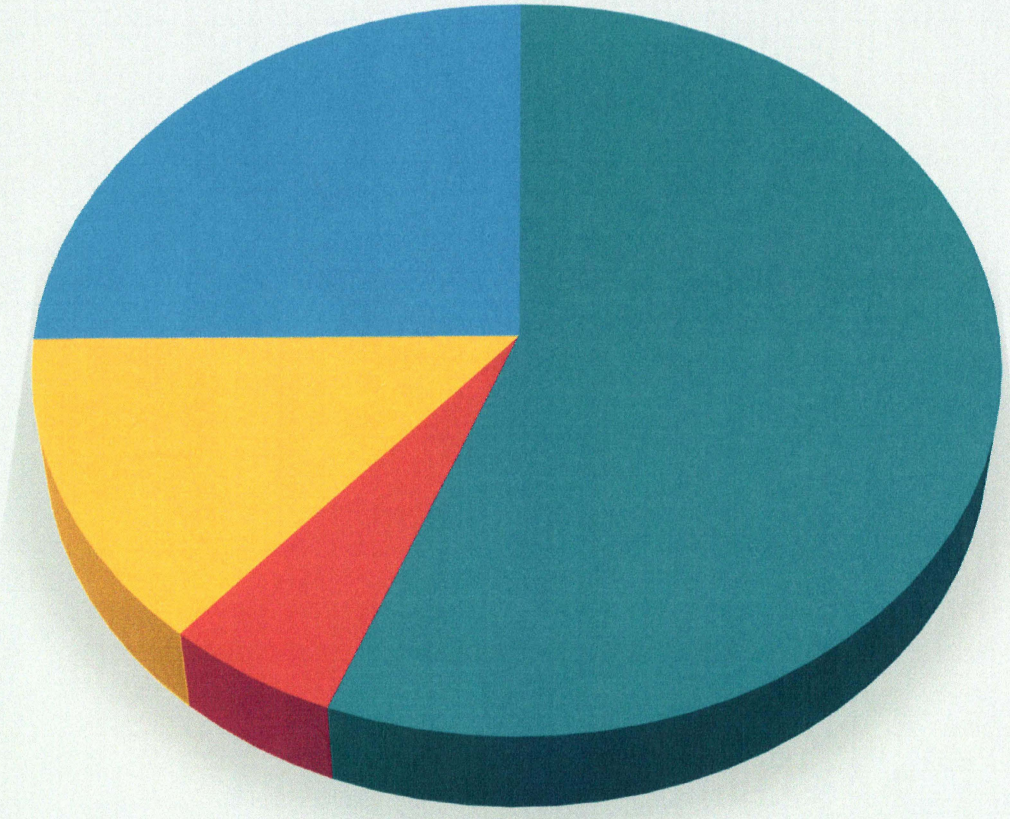
Adults & Individuals with Physical Disabilities

- Service Payments for the Elderly and Disabled (SPED)
- Expanded SPED (Ex-SPED)
- Medicaid 1915-(c) Waivers
  - Aged and Disabled
  - Tech Dependent

Medicaid Programs

- Medicaid State Plan Personal Care (MSP-PC)
- Money Follows Person Grant – (MFP)
- Supervise HCBS Case Managers
- PACE

HCBS SUPPORTS INDIVIDUALS WITH DISABILITIES

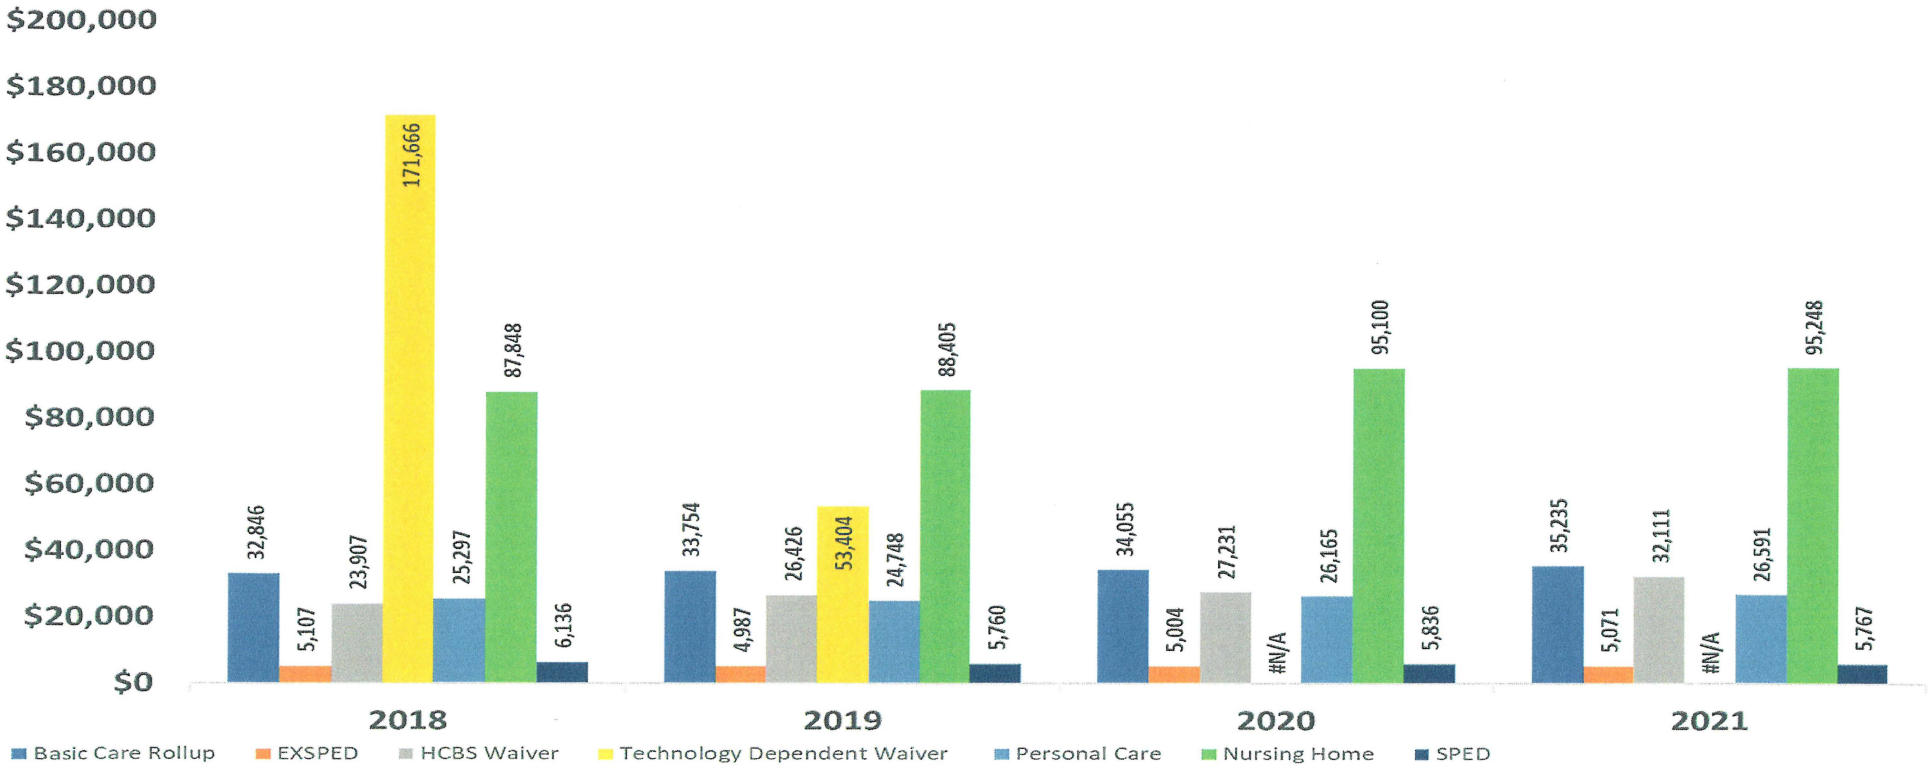


Olmstead Decision

- The Americans with Disabilities Act (ADA) requires public agencies to eliminate unnecessary segregation of persons with disabilities and provide services in the most integrated setting appropriate to the needs of the individual.
- In 1999 the Federal Supreme Court Olmstead decision affirmed the ADA requirements.
- Increasing access to HCBS will assist the State in meeting this requirement.

Benefits of HCBS

- Most integrated setting means, a setting where individuals with disabilities can fully interact with individuals with non-disabilities and take advantage of community living as much as possible.
  - Usually, a private residence owned or leased by the individual or their family.
- Most integrated setting for each individual is determined through person centered planning and informed choice.



CURRENT ACTIVE CLIENT CASES AS OF NOVEMBER 2020

- SPED: 1,450
- Ex-SPED: 141
- HCBS WAIVER: 355
- MSP-PC: 654

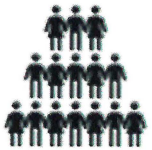
Funding Requests

Nursing Home Payment Reform

- Reform of both care and property rate methodology
- Interim report submitted October 1, 2020
- Policy testimony will be presented in **Human Services Committee**
- DHS sponsored bill- House Bill 1090
- $7.2 million ($3.3m General; $3.8m Federal)

Nursing Home Bed Buy Back



- Request to purchase beds out of the current nursing home system and layaway
- State plans to pay between $12,000-$15,000 per bed
- Taking beds out of the system reduces future State liability
- $3.3m in General Funds

Services Closer to Home

Create pathways that help people access the right service at the right time

Engage proactively with providers to expand access to services

High-Performing Organization

Develop an adaptable, capable and mission driven workforce

Balance resources to achieve strategic goals

REDUCE PACE RATES & ENROLLMENT

Estimated Total Potential Savings **$1,914,734**

Slide 2

BLM8 Bargmann, Lynn M., 1/17/2021

DHS MISSION AND OPERATING PRINCIPLES

Provide quality, efficient, and effective human services, which improve the lives of people

- Services and care should be provided **as close to home as possible**
- Services should be **provided consistently across service areas** to promote equity of access and citizen focus of delivery

- Services should be administered to **optimize** for a given cost **the number served** at a service **level aligned to need**
- Investments and funding in DHS should **maximize ROI for the most vulnerable** through safety net services
- Cost-effectiveness should be considered holistically, acknowledging **potential unintended consequences** and **alignment between state and federal priorities**

- Services should help vulnerable North Dakotans of all ages maintain or enhance quality of life by:
- Supporting **access to the social determinants of health**: economic stability, housing, education, food, community, and health care
- **Mitigating threats** to quality of life such as lack of financial resources, emotional crises, disabling conditions, or inability to protect oneself

DEPARTMENT OF HUMAN SERVICES

Quality services, Proven results, Closer to home

1. Base decisions on **quality**, **efficiency**, and **effectiveness**.

   Find success in a resource-constrained environment.

   Make **reductions** in some areas **and investments** in others to optimize outcomes.

2. The state has **enough treatment beds**. Investing in **earlier interventions** can help **avoid crisis**.

   Right service. Right place. Right time.

   Serving people in **lowest level of care necessary** will return **better outcomes**.

   To deliver services closer to home, **all** have to be **willing to change** how they do business – DHS can't do this alone.

3. How we **pay** for services should be **fair** and **equitable** across systems.

   Inequity in rates **affects** people's ability to **access** services - providers often prioritize more lucrative payment opportunities

   Demonstrate value to taxpayers. **Value** equals **high quality cost efficient care**.

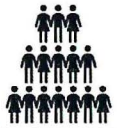
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

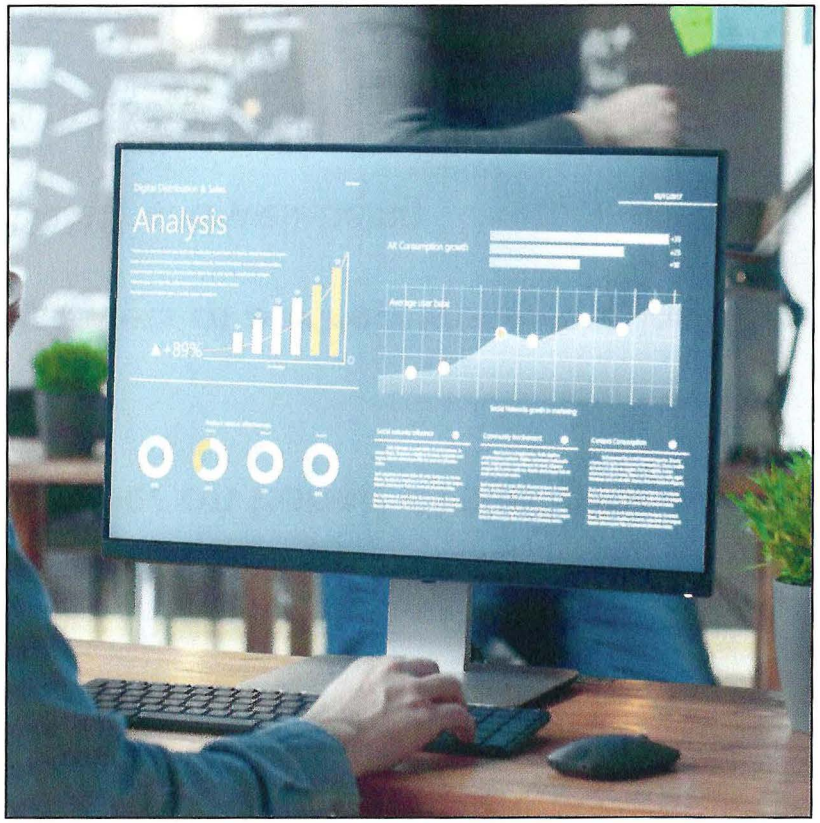
Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being



Economic Health | Behavioral Health | Physical Health

Fact-based decision making ensures solutions make the biggest impact on those we serve

Change and continuous improvement are standard operations across DHS.

We successfully lead and manage through it by:

1. Staying focused on our DHS mission and key priorities, and
2. Using fact-based decision making.

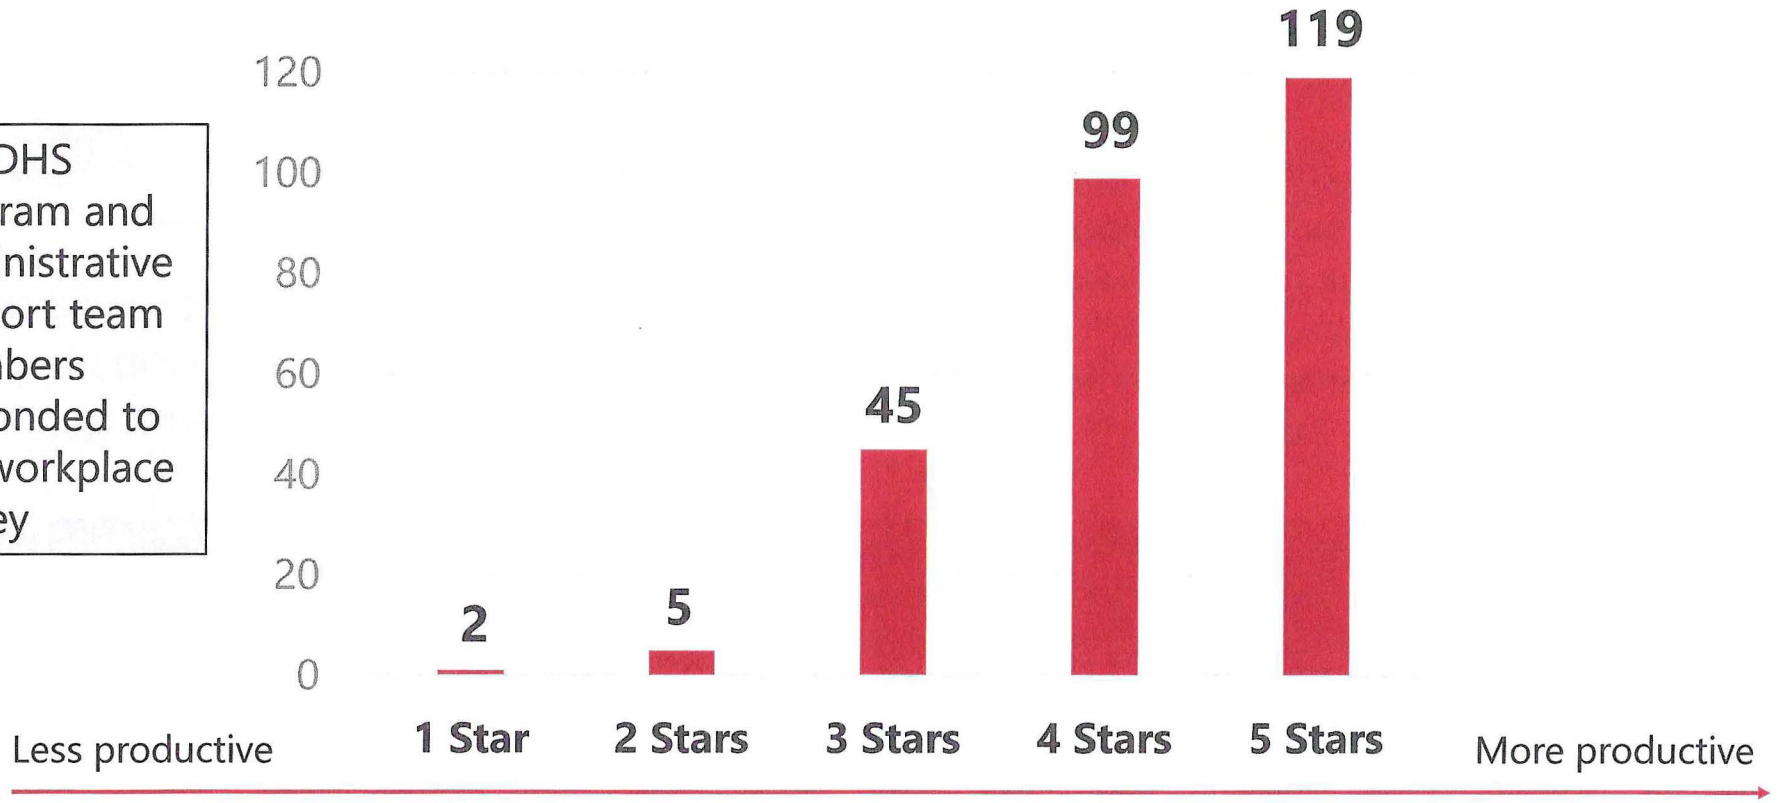
DHS's new workplace represents more than a work location

Its about defining how way we work and win together on behalf of those we serve

FACT

100% of field services team members work onsite:

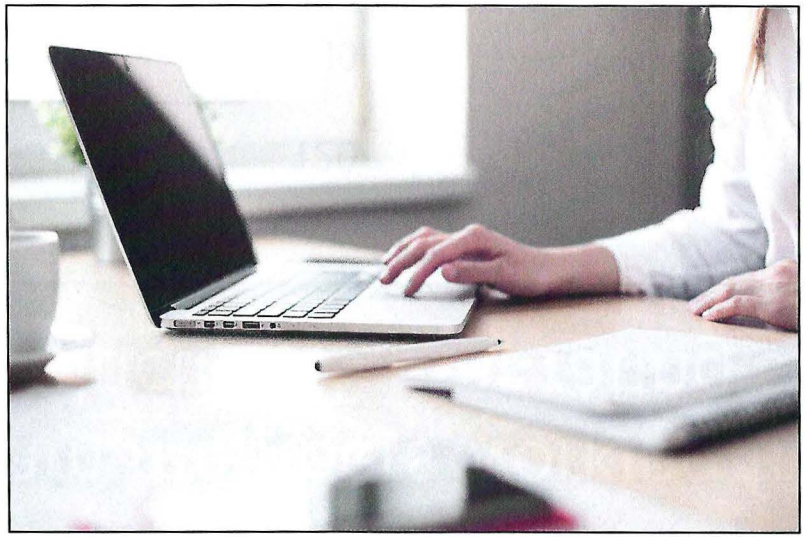
- Human service centers
- Life Skills and Transition Center
- State Hospital



80% of program administration and support teams work remotely.

Key tenets of our new workplace include:

- Safety and well-being
- Continuity of critical human services
- Taxpayer value
- Flexibility, technology, teamwork and innovation



Team members working from home say they are more productive (5-star rating scale)

270 DHS program and administrative support team members responded to our workplace survey

You asked about our work-from-home approach ...

We carefully reviewed every job function from a work-from-home perspective. Here's what we learned:

- Most of our clients are best served in a direct, face-to-face environment.
- While many program administration and administration support jobs can be done from home, some roles still need to be office-based.
- Team members may not always have the necessary space or functional setup to work from home.
- While some team members prefer to work from home, others prefer an office setting with appropriate health and safety precautions (e.g.; sanitization, masks).

Divisions will share detailed FTE updates in the format shown here

During the 2019 legislative session, North Dakota lawmakers authorized the Department of Human Services (Department) to create a Medicaid 1915(i) State Plan Amendment.

The amendment allows North Dakota Medicaid to pay for additional home and community-based services to support individuals with behavioral health conditions.

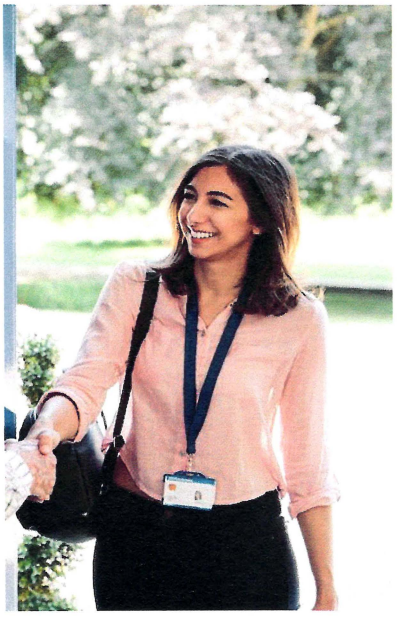
Process



9

9 blue - services in human service zones.

The Care Coordination Role

- 1915(i) Care Coordination Service are provided by enrolled 1915(i) Care Coordination Providers. Care Coordinators could be employed by the state, private providers/ community organizations.
- The Care Coordination Role is responsible for the development of the Person-centered Plan of Care and supporting the individual with accessing the greater community to meet the individual's overall needs. This includes:
  - Ensuring continuity of care including collaborating with existing systems and services.
  - Connecting individual to additional 1915(i) Services through the development of the person-centered plan of care.
  - Building informal supports network in the individual's community.
  - Providing services that are equitable and culturally competent.
  - Empowering individuals by upholding practice that promotes individual choice, rights and responsibilities.

10

10

CARE COORDINATION

- Coordinates participant care and assists individuals with gaining access to needed 1915(i) and other services.
- The Care Coordinator is responsible for the facilitation and oversight of:
  - Comprehensive Assessment and Reassessment of Activities
  - Development of an individualized Person-centered Plan of Care (POC), including a Crisis Plan component.
  - Plan Development Implementation and Monitoring.
  - Referral Collateral Contacts & Related Activities

Service Type	Age	Limits
Care Coordination	0+	8 hours per day; Remote Support up to 25% of the time.

Care Coordination Provider Qualifications

Organization/ Agency Standards

A provider of this service must meet all the following:
- Complete the Medicaid Provider Enrollment Agreement & Attestations.
- Meet individual practitioner qualifications/ and competencies
- Services are provided within the scope of practice.
- Agency conducts training in accordance to state policies and procedures
- Agency adheres to all 1915(i) standards and requirements.
- agency policies and procedures, including but not limited to, participant rights, abuse, neglect, exploitation, use of restraints and reporting procedures are written and available for NDDHS review upon request

Individual Practitioner

The individual providing the service must:
- be employed by an enrolled ND Medicaid provider or enrolled billing group of this service; and
- have a bachelor's degree in social work, psychology, nursing, sociology, counseling, human development, special education, child development and family science, human resource management (human service track), criminal justice, occupational therapy, communication science/disorders or vocational rehabilitation. With accompanying transcript, the NDDHS, at their discretion, may approve other degrees in a closely related field.

Proof of training/ competency in The Substance Abuse and Mental Health Services Administration (SAMHSA) Core Competencies for Integrated Behavioral Health and Primary Care; or
The Case Management Society of America standards of practice.

11

11

Example 1: Community Behavioral Health Provider

NOW

- $1,000,000 **general** fund/biennium
- 60 individuals served at any one time/biennium
  - 50% qualify for Medicaid
  - 25% qualify for 1915i (15)
- Individuals receive support services 24/7

FUTURE

- 15 individuals (qualify for 1915i) - Provider reimbursed for person-centered services based on individuals need

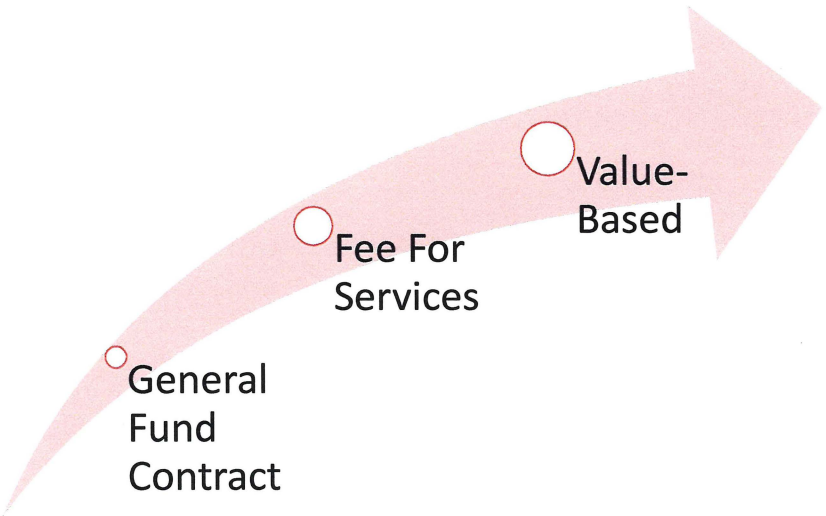
EXAMPLE →

- *An individual receives 2 hours of Care Coordination/3 days a week/biennium = $50,918.40*
  - *For 15 individuals = **$763,776***
- *An individual receives Peer Support 4 hours/week/biennium = $12,280.32*
  - *For 13 individuals = **$159,644.16***
- *An individual receives Supported Housing 1 hour/day/5 days a week = $21,819.20*
  - *For 12 individuals = **$261,830.40***
- *An individual receives Supported Employment 3 hours/week/biennium = $13,091.52*
  - *For 4 individuals = **$52,366.08***
- *Total amount billed to the provider = **$1,237,616.64***
  - *$618,808.32 general funds/biennium for the 15 individuals serviced*

In current budget most providers continue to receive 50% of the original amount - $500,000

12

12



Outcomes of 1915i Implementation

- Individuals with highest need receive services that are more robust and targeted to their specific needs (person-centered).
- State is investing less funding yet providing more service to individuals with a behavioral health condition and providing opportunities to providers to expand services.
- Providers are able to bill for the specific services they are providing which allows greater opportunity to expand services and increase revenue.
- Behavioral health on par with health & sustainable.

13

13

Reimbursement Roadmap

14

14

Example 2: School

FUTURE

EXAMPLE →

- *School-Based Care Coordinator*
  30 hours/40 weeks/biennium =
  $195,840

→ *Family Peer Support*
→ *Respite*
→ *Supported Education*
→ *Supported Employment*

School social worker could qualify as school-based C.C. and can be reimbursed for these services. - possible example.

15

15

Supporting Families

FUTURE

- ***Student struggles are often related to family issues.***
- ***Connecting family members to services can be significant for student success.***

EXAMPLE →

A family experiences homelessness due to parental mental illness. Connecting to care coordination providers of adult services will be vital.

16

16

Expanded Behavioral Health Workforce

- 1915i services are provided by non-traditional behavioral health professionals
- Potential to improve access for workforce in rural areas
- Effectiveness of lived experience
- Career growth opportunities

All leases have 30 day opt-out clause if legislature alters funding, except Dickinson (federal dollars)						

1915I

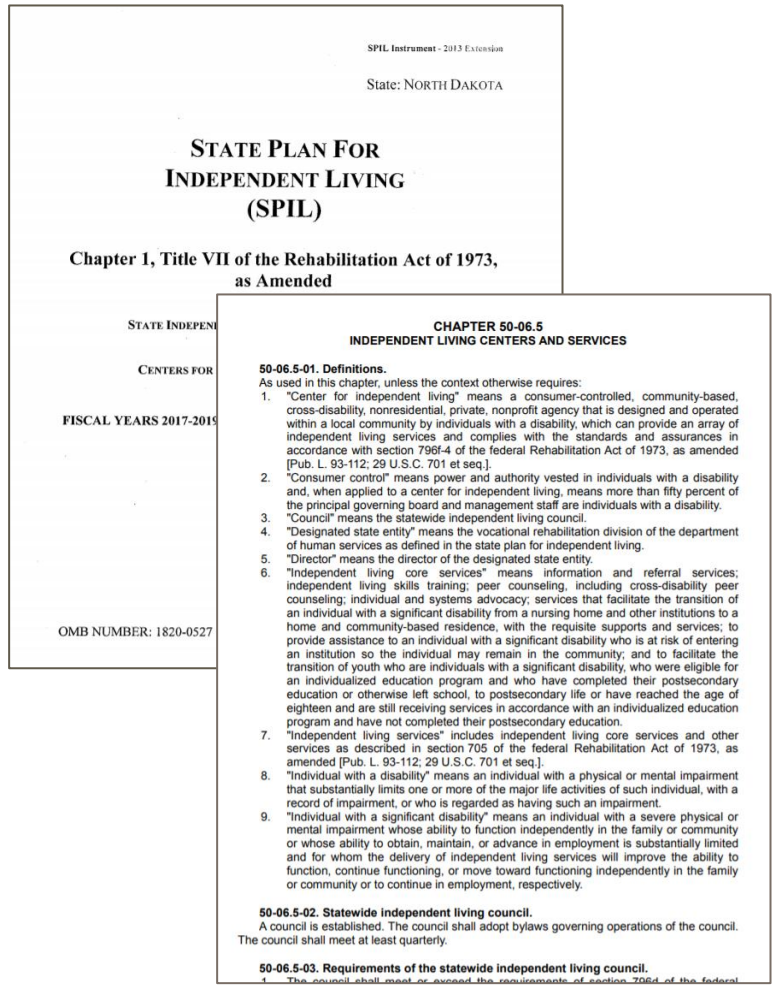
Eligibility

1. Individuals of any age (VR would start with those 14 and older, at least 9th grade)
2. Medicaid or Medicaid Expansion eligible
3. Will receive services in their home or community not in an institution
4. Diagnosis of mental illness, substance use disorder, traumatic brain injury (excluding intellectual or developmental disability)
5. Functional impairment requirement/impact on daily living (WHODAS)

Services Specific to VR (of the 12 possible services)

1. Benefits Planning Services
2. Pre-Vocational Training
3. Supported Employment
4. Supported Education

STATE PLAN FOR INDEPENDENT LIVING



- ND receives approx. $663,808 from the federal Administration for Community Living (ACL) to support independent living services each biennium
- In the past, ND appropriated the $73,756 required match plus $1,675,406 of general funds for a total of approximately $1,749,162 each biennium
- Title VII Funds go directly to Centers for Independent Living
- Outcomes defined in SPIL (3-year renewal)

STATE PLAN FOR INDEPENDENT LIVING (SPIL)

Chapter 1, Title VII of the Rehabilitation Act of 1973, as Amended

STATE INDEPEN

CENTERS FOR

FISCAL YEARS 2017-2019

OMB NUMBER: 1820-0527

CHAPTER 50-06.5
INDEPENDENT LIVING CENTERS AND SERVICES

50-06.5-01. Definitions.
As used in this chapter, unless the context otherwise requires:

1. "Center for independent living" means a consumer-controlled, community-based, cross-disability, nonresidential, private, nonprofit agency that is designed and operated within a local community by individuals with a disability, which can provide an array of independent living services and complies with the standards and assurances in accordance with section 796f-4 of the federal Rehabilitation Act of 1973, as amended [Pub. L. 93-112; 29 U.S.C. 701 et seq.].
2. "Consumer control" means power and authority vested in individuals with a disability and, when applied to a center for independent living, means more than fifty percent of the principal governing board and management staff are individuals with a disability.
3. "Council" means the statewide independent living council.
4. "Designated state entity" means the vocational rehabilitation division of the department of human services as defined in the state plan for independent living.
5. "Director" means the director of the designated state entity.
6. "Independent living core services" means information and referral services; independent living skills training; peer counseling, including cross-disability peer counseling; individual and systems advocacy; services that facilitate the transition of an individual with a significant disability from a nursing home and other institutions to a home and community-based residence, with the requisite supports and services; to provide assistance to an individual with a significant disability who is at risk of entering an institution so the individual may remain in the community; and to facilitate the transition of youth who are individuals with a significant disability, who were eligible for an individualized education program and who have completed their postsecondary education or otherwise left school, to postsecondary life or have reached the age of eighteen and are still receiving services in accordance with an individualized education program and have not completed their postsecondary education.
7. "Independent living services" includes independent living core services and other services as described in section 705 of the federal Rehabilitation Act of 1973, as amended [Pub. L. 93-112; 29 U.S.C. 701 et seq.].
8. "Individual with a disability" means an individual with a physical or mental impairment that substantially limits one or more of the major life activities of such individual, with a record of impairment, or who is regarded as having such an impairment.
9. "Individual with a significant disability" means an individual with a severe physical or mental impairment whose ability to function independently in the family or community or whose ability to obtain, maintain, or advance in employment is substantially limited and for whom the delivery of independent living services will improve the ability to function, continue functioning, or move toward functioning independently in the family or community or to continue in employment, respectively.

50-06.5-02. Statewide independent living council.
A council is established. The council shall adopt bylaws governing operations of the council. The council shall meet at least quarterly.

50-06.5-03. Requirements of the statewide independent living council.

COVID-19 Impact on Nutrition Services

- Since the beginning of the pandemic, seen an increase in the number of meals provided to older adults in the community.
  - At the start of pandemic, meals were split between Congregate Meals and Home-Delivered Meals.
  - After COVID-19, most meals became Home-Delivered. COVID-19 relief funding from the ACL and OMB was provided to meet demand.
- As of Nov. 2020, 981,288 meals were provided.
  - 673,281 were funded by COVID-19 relief funding at a rate of $7/meal.
    - These pandemic response funds were depleted through Nov. 2020.
  - 308,007 were provided at the regular rate of $4.60/meal.

COVID INFO

- SSA requires dedicated space for network and IT equipment- DDS staff cannot use hoteling space.
- We do have some hybrid employees who must go to the office to work paper claims.
- We have administrative support staff at the office everyday handling mail.
- SSA has not allowed automation of our procedures, so we are required to still print and mail documents and communications to claimants.

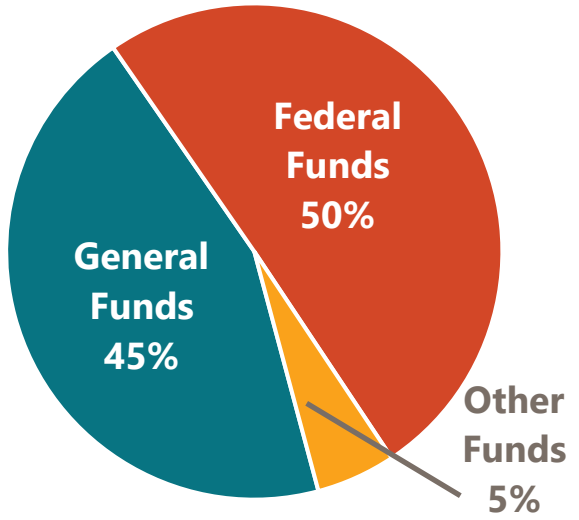
Life Skills and Transition Center Budget Detail

Providing support and services so people can move back to homes of their choice

NORTH Dakota | Human Services

Be Legendary.™



LSTC Budget Summary

19-21 Budget	**$58,794,948**
21-23 Budget (exec)	**$48,619,605**

Reduction of 14.5 FTEs; $10,175,343 budget reduction (50% in federal funds)

- Reduce census by 26 (16 youth, 10 adults) via both transitions and diversions
- Shift operations to re-orient toward crisis and stabilization service
- Reduce general fund contribution to adaptive equipment service, seeking alternate revenue sources

NOTE: Interconnection between LSTC, CFS and DD budgets as service models shift

Department of Human Services

Other budget impacts

Permission to convey a portion of two parcels of land commonly referred to as “the bowl” to the Grafton Park Board

Update: Payment of Special Assessments - City Postponed the project. This will not occur during the 21-23 biennium.

Additional unanticipated budget request: $183,040

- Unanticipated retirement of psychiatrist from Northeast Human Service Center
- Added to amendment that administration-fiscal will present before the committee.
- Critical need due to Behavioral Health diagnosis and acuity

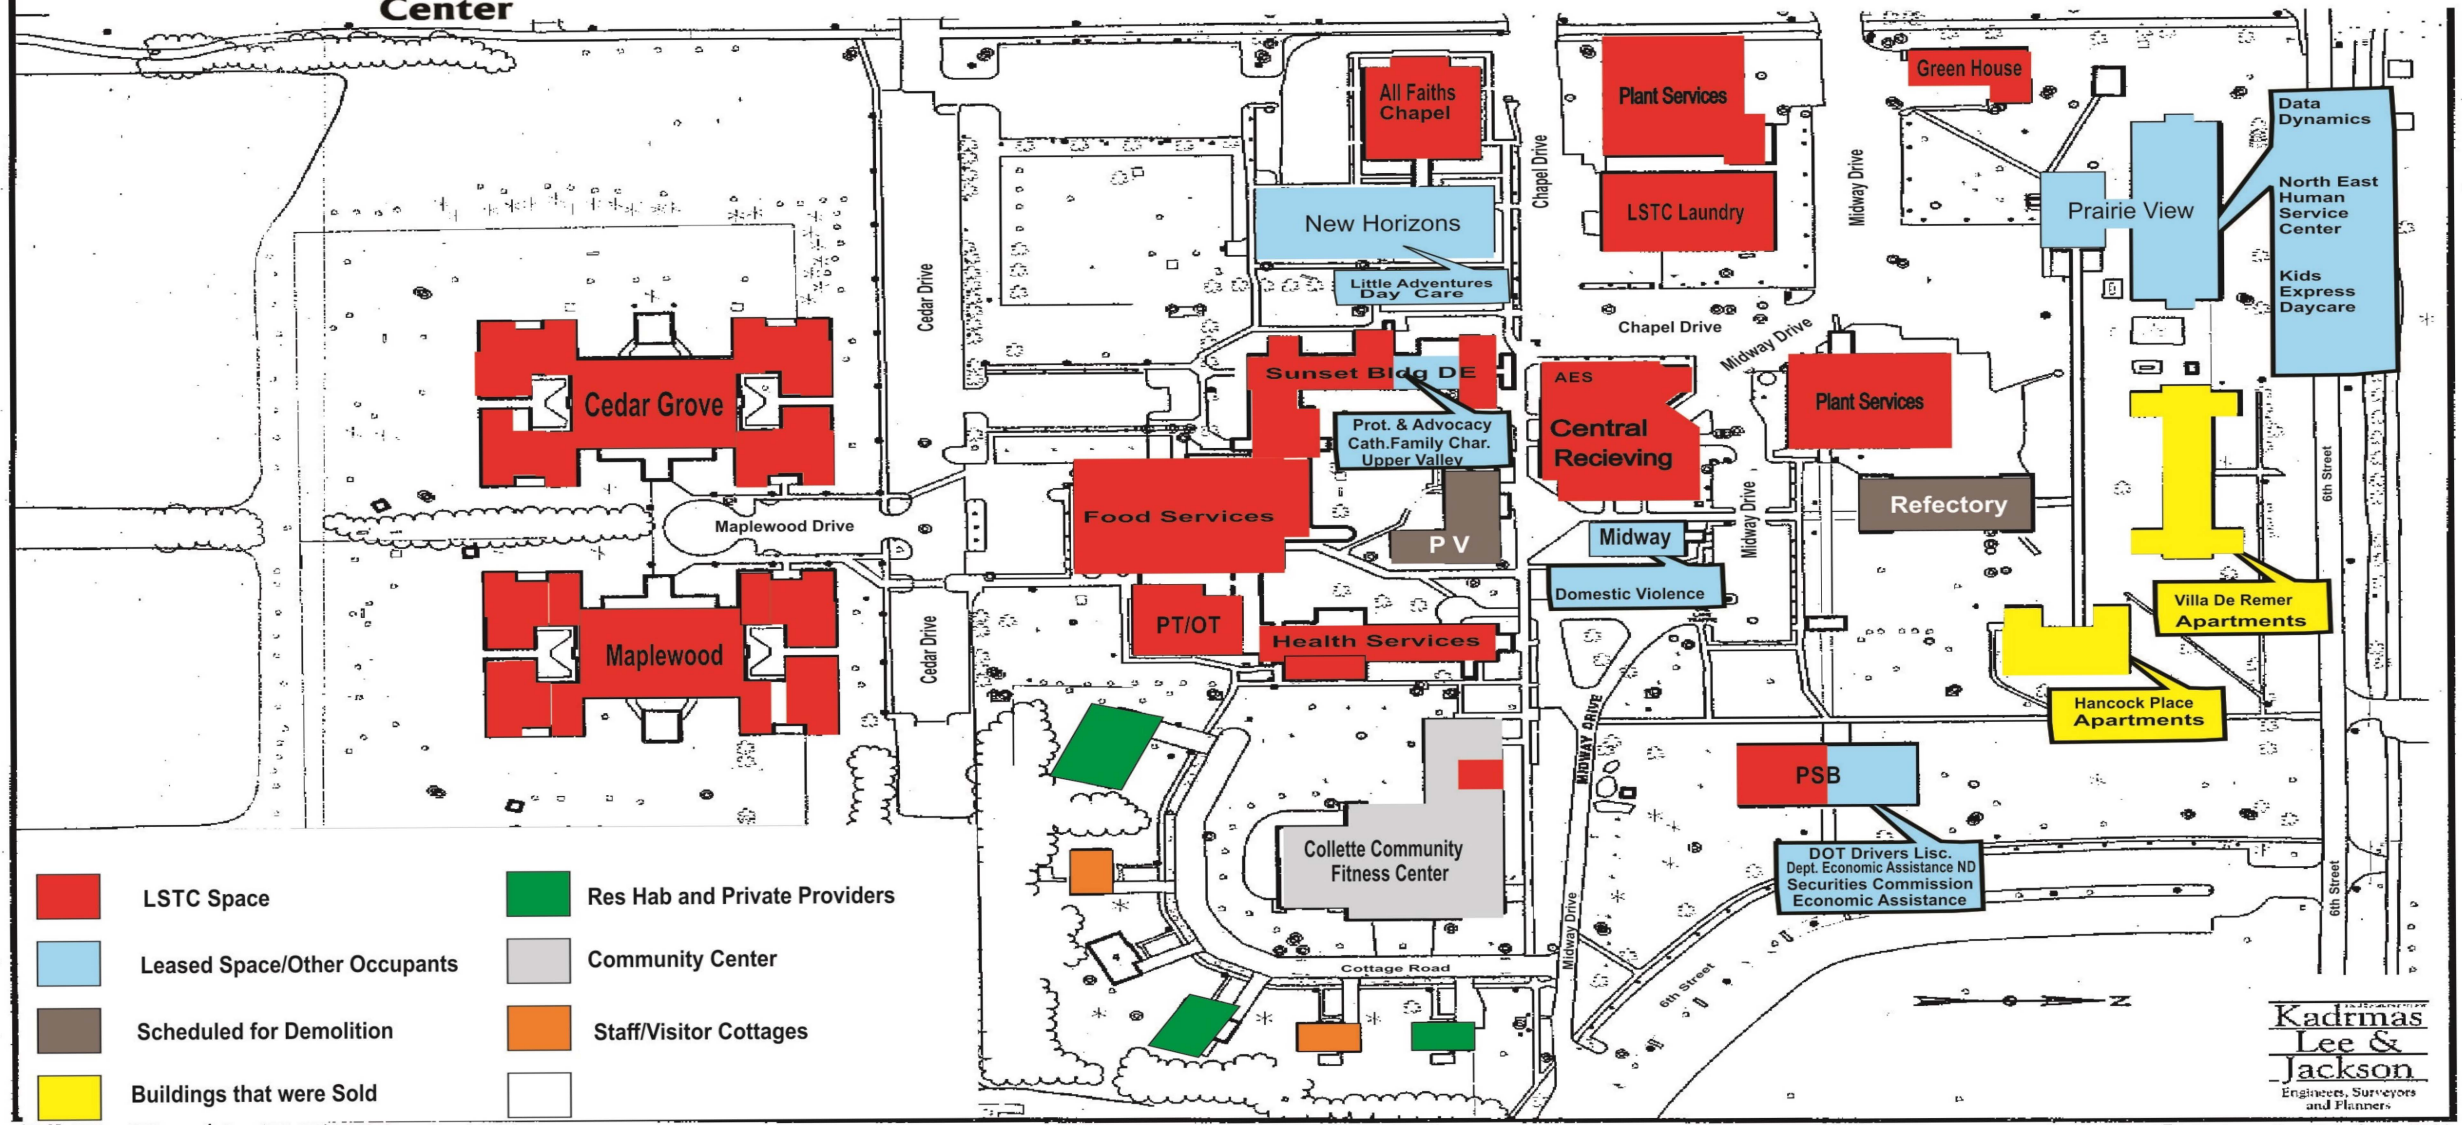
LSTC net budget savings plan requires partnership

Collaboration between LSTC, DD, and Children Family Services as well as ND community providers.



Census reduction of 16 youth and 10 adults to homes in their community.

The transition of people will occur gradually throughout the biennium as appropriate settings are developed by community providers.

Each person and their family/guardian will be involved in the development of their Person-Centered Transition Plan.

The LSTC is recognized as a setting that specializes in crisis and stabilization services.

ECONOMIC ASSISTANCE
COVID 19 - SNAP Enhancement Grants

Grant program to help ND grocers update their point-of-sale systems and websites to enable online and by-phone ordering and delivery, improving access to food for both SNAP beneficiaries and community residents

Through Dec 2020 assisted grocery stores with system upgrades in:

- Minot – **Karma Convenience Store**
- Ruthville – **Karma Convenience Store**
- Mohall – **Jason's Super Foods**
- Newtown – **Jason's Super Foods**
- Michigan – **Michigan Hometown Foods**
- Scranton – **SuperValu**

ECONOMIC ASSISTANCE
Low Income Home Energy Assistance Program (LIHEAP)

LIHEAP helps households with **home heating costs** by paying a portion of their heating bills, **and** with **improving** their home's overall **energy efficiency**.

FY 2020 funds obligated for energy efficiencies services.

- $1.1 Million – Weatherization
- $1.9 Million – Furnace Repair & Replacement

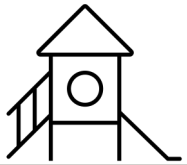
Human Service Zones



Local + State Partnerships For Effective and Efficient Service Delivery

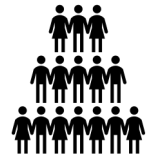
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

DEPARTMENT OF HUMAN SERVICES

Quality services, Proven results, Closer to home

1. Base decisions on **quality**, **efficiency**, and **effectiveness**.

   Find success in a resource-constrained environment.

   Make **reductions** in some areas **and investments** in others to optimize outcomes.

2. The state has **enough treatment beds**. Investing in **earlier interventions** can help **avoid crisis**.

   Right service. Right place. Right time.

   Serving people in **lowest level of care necessary** will return **better outcomes**.

   To deliver services closer to home, **all** have to be **willing to change** how they do business – DHS can't do this alone.

3. How we **pay** for services should be **fair** and **equitable** across systems.

   Inequity in rates **affects** people's ability to **access** services - providers often prioritize more lucrative payment opportunities

   Demonstrate value to taxpayers. **Value** equals **high quality cost efficient care**.

2. Reviews are completed by the Economic Assistance QA/QC Unit
3. See handout

Q4: WHICH ZONES COVER HOUSING IN GA

- 10 out of 19 zones covering some form of housing assistance in their General Assistance funds

Q5: COLLABORATION OPPORTUNITIES

56

Collaborative Services Across All Zones

Q6: ZONE FUND BALANCES

- Fund balances are reported in January of each year.
- Anything above the fund balance limitation is reduced in the June payment of the following year. Note there were no fund balance reduction in CY 2020.
- If the payment provided to the HSZ to defray costs to provide Human Services, the HSZ would then utilize fund balances.
- HSZ must utilized the full balance of their human service zone human services fund before requesting additional dollars from the Department.
- It is anticipated fund balances will be exhausted in 21-23.

Estimated Fund Balances	In Millions
CY 2020 Beginning Balances Report by HSZ	$10.30

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
1/21/2021 am
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Representative	Present	Absent
Nelson	P	
Kreidt	P	
Andersen	P	
Mitskog	P	
Schobinger	P	
Strinden	P	

Chair Nelson called the meeting to order at 8:30 a.m.

Discussion Topics:

- Behavioral Health Division
- FTE overview
- Budget Changes
- Administrative support budget overview

Pamela Sagness, Director (8:33 am) testified about the Behavioral Health Division #2084

Jamie Wilke, Assistant CFO, DHS(9:26 am) testified about the Program and Policy of the Human Resources Division #2055

Joe Morisette, OMB (10:46 am) testified about the budget changes #2164

Arnie Strebe, CEO CFO, DHS(11:09 am) testified about the Department of Human Services FMAP #2165

Chair Nelson closed the meeting at 11:28 a.m.

Cole Fleck, Committee Clerk

BUDGET CHANGES

RENT MODEL CHANGE

- Current model
  - Only non-general fund agencies pay rent
- Proposed model
  - All agencies pay a consistent rental rate per square foot
  - Funding added in executive budget for all general fund agencies to pay rent based on current occupied space
    - Offsetting general fund savings in FM salary budget, which would now be funded from special funds
- Outcome
  - Agencies will be incentivized to efficiently manage space utilization and benefit from future rent savings if space is reduced
  - Better utilization of existing space has positive return by minimizing use of offsite space and makes best use of state resources

BUDGET CHANGES

FACILITY MANAGEMENT FUNDING SOURCE CHANGE

- Rent model change results in additional rent collection
- Provides opportunity to fund Facility Management from facility rent payments and move toward self-funded facility services model

- Net amount deposited in general fund remains nearly unchanged:
  - 2019-21 biennium rent deposited in general fund $2,545,000
  - 2021-23 biennium:
    - Total rent collected $7,762,000
    - Less amount used to fund FM salaries $5,245,000
    - Net amount deposited in general fund $2,517,000

THE FMAP

The Federal Medical Assistance Percentage #2165

WHAT IS THE FMAP?

The Federal Medical Assistance Percentage (FMAP) rates are used in determining the amount of federal matching funds for state expenditures for assistance payments for certain social services, and state medical and medical insurance expenditures.

AT DHS, THESE RATES APPLY TO:

- Traditional Medicaid Services
- Long-Term Care Services*
- Medicaid Wavier Services**
- Child Welfare/ IV-E Foster Care & Subsidized Adoption

**Excluding state programs SPED (Service Payments to Elderly and Disabled) and expanded SPED.*

***Including Home and Community Based Services, Developmental Disabilities Services and 1915(i) Services.*

BY THE NUMBERS

Federal Matching Assistance Percentage (N.D.)

FMAP follows the federal fiscal year from Oct-Sept	Rate
Oct. 1, 2015 - Sept. 30, 2019	50%
Oct. 1, 2019 - Sept. 30, 2020	50.05%
Oct. 1, 2020 - Sept. 30, 2021	52.4%
Oct. 1, 2021 - Sept. 30, 2022	53.59%

COVID FMAP Increase of 6.2% to FMAP	Rate
Jan. 1, 2020 - Sept. 30, 2020	56.25%
Oct. 1, 2020 - June 30, 2021***	58.60%

****This date may change pending extension of public health emergency.*

FEDERAL FISCAL YEAR EFFECTIVE DATES:

OCT. 1 — SEPT. 30

2020 → 2021

The FMAP is calculated each federal fiscal year and is effective Oct. 1 through Sept. 30 each year.

HOW FMAP WORKS...

The FMAP formula compares a state's three year average per capita income relative to the U.S. three year average per capita income.

Lower FMAP Reimbursement (Federal match minimum of 50%)

If the State and the U.S. per capita income are equal, then the FMAP is 55%

Higher FMAP Reimbursement (Federal match maximum of 83%)

Jan. 8, 2021

Legislative Leaders, Stakeholders and North Dakotans:

During the 66th Legislative Session the North Dakota Insurance Department was tasked with assisting Legislative Management in conducting an interim study of health insurance premium trends. The study is unique because the legislature foresaw the need to look beyond insurance carriers and authorized the collection of data from the state's hospitals.

To conduct this study the Insurance Department contracted JWHammer, LLC for project management services, and Horizon Government Affairs for actuarial services. JWHammer and Horizon both have experience in the insurance and healthcare fields.

The following study was done in cooperation with a great number of stakeholders, including both hospitals and insurers. I want to personally thank them for their willingness to be open and transparent throughout the process. As with any study, different conclusions may be drawn from the data presented. However, those conclusions are best left to the policy making branch of our government, this study should serve as an opportunity to guide a discussion on health care delivery and health care insurance coverage in our great state.

The report is an account of driving factors in the expense of healthcare and how that may impact the premiums consumers pay. The data, analysis, and recommendations will be vital as the state policy makers consider policies aimed at ensuring that North Dakotans are receiving quality healthcare at a fair and reasonable price.

I am proud of the work that was completed, the accuracy of the data, and the in-depth policy options provided. This is just the beginning of the discussion and I look forward to continuing to work together with the stakeholders of this report as well as legislative leaders to benefit all North Dakotans.

Sincerely,

Jon Godfread
Insurance Commissioner

Final Report January 2021
ND Legislative Management Interim Healthcare Study
January 8, 2021

Healthcare Cost Study Program Manager: Jennifer Hammer, JWHammer, LLC (jennifer@jwhammerllc.com)
Policy Manager: J.P Wieske, Horizon Government Affairs (HGA), VP State Policy (jpweiske@horizondc.com)
Data and Analysis: Jeff Lemieux, HGA Chief Economist (jlemieux@horizondc.com)
Research Assistant: Rundell Douglas, HGA

Background

In October 2019, the North Dakota Insurance Department (NDID) engaged JWHammer, LLC and consultant Horizon Government Affairs (HGA) to develop a multi-pronged study of North Dakota's health costs, including data gathering and analysis, baseline current-policy projections for the next several years, development of policy alternatives, and cost estimates of alternative policies relative to baseline.

This final report updates our September 2020 interim final report.[1] The main updates are new data for 2019 on North Dakota and 50-state insurance markets from the National Association of Insurance Commissioners (NAIC), and some new data on North Dakota hospitals in 2019 from the Medicare Cost Report system.

Covid-19 has had an extreme impact on the U.S. health care system and in North Dakota. As we reported in September, North Dakota's health costs dipped in April 2020, but rebounded by June, as more normal care patterns re-emerged and deferred care was delivered. By September, we estimate that monthly claims costs rose to considerably above their prior-year levels as Covid cases surged in North Dakota. As of mid-December 2020, North Dakota had recorded over 1,000 deaths directly attributed to Covid-19,[2] and the CDC estimated that all-cause deaths in North Dakota during the pandemic were 10 percent higher than expected.[3] Due to the pandemic, we did not attempt to formally gather additional data from hospitals and in-state insurers in late 2020.

In this report, we use the terms "discharges" and "admissions" synonymously. Likewise, "Covid-19" and "Covid." Years may be marked as calendar years or hospital cost report years. Calendar years are used for most hospital-to-hospital comparisons; Medicare Cost Report years are used for most of the broader state-to-state comparisons. Insurance comparisons are in calendar years.

Executive Summary

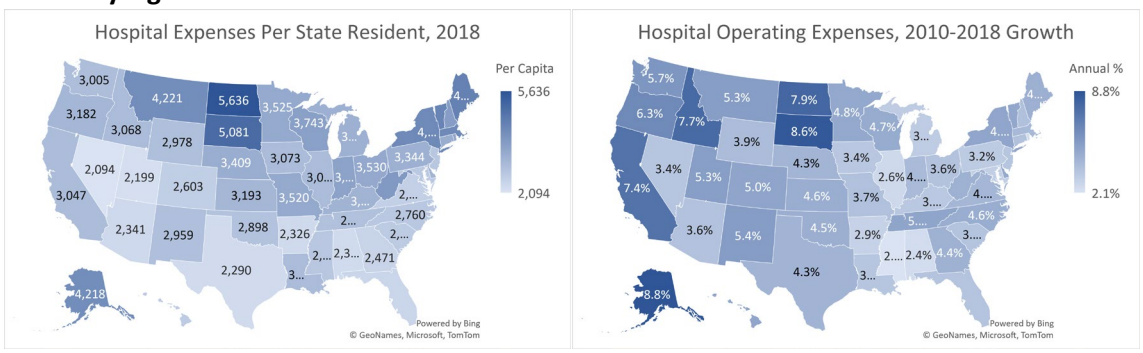
Health Costs in North Dakota

In October 2019, the North Dakota Insurance Department (NDID) engaged JWHammer, LLC and consultant Horizon Government Affairs (HGA) to develop a multi-pronged study of North Dakota's health costs, including comparisons with all 50 states, development of policy alternatives, and cost estimates of alternative policies. We have focused mainly on hospital and insurance costs – those most closely monitored by North Dakota state agencies – and on policy alternatives the state could implement using in-state revenues. This final report updates our interim report from September 2020. Major changes include updated NAIC data for insurers' costs in all 50 states and updated 2019 data from the Medicare cost reports for North Dakota hospitals.

Hospital Costs. We gathered data on hospitals' overall costs and revenues in all the states from the Medicare cost reports. The data in these cost reports is not audited, so we compared it with data provided directly to us from the largest nine hospitals in North Dakota. In general, we found that the data for 2010-2018[4] matched well, giving us confidence that the Medicare cost report data was a good source for 50-state comparisons.

On a per-capita basis, hospital expenses in North Dakota were highest in the nation in 2018, and their growth rate of about 8% per year since 2010 was among the fastest in the U.S. (see Summary Figure 1 and Summary Table 2). That 8% growth was comprised of a 1.5% growth in utilization (inpatient days, outpatient visits etc.) and about 6.5% growth in unit costs between 2010 and 2019 (see Summary Table 1). The hospitals' largest expense is wages and benefits. We estimate that among the 9 largest hospitals in North Dakota, aggregate wages and benefits grew by about 7% annually between 2010 and 2019. This growth, in turn, was comprised of employment growth of about 3% annually, and wage and benefit growth per employee of about 4%. North Dakota's average wage per full-time equivalent employee (FTE) was about $88,000 in 2019, and wages grew rapidly between 2010 and 2019 (see Summary Figure 2).

As Summary Table 1 shows, hospital expense growth was not uniform across North Dakota's hospitals. In particular, expense growth was higher-than-average at Sanford Health's Bismarck and Fargo hospitals. At the committee hearing that discussed the interim version of this report[5], Sanford noted that their Fargo hospital had been certified as the state's first Level 1 trauma center during this period of rapid expenditure growth. However, the contrast between North Dakota's hospital costs and those of other states cannot be fully explained by service upgrades. For example, Minnesota's per-capita hospital costs were one-third less than North Dakota's in 2018, yet the state has 5 Level 1 trauma facilities.[6]



---

[4] For reasons of completeness of data, comparisons in this report start in 2010 or 2011, and end in 2018 or 2019.

[5] http://video.legis.nd.gov/en/PowerBrowser/PowerBrowserV2/20200910/-1/18285.

[6] https://www.health.state.mn.us/facilities/traumasystem/designatedhospitals.html. In the 2010-2019 period, North Dakota and Minnesota had similar results for Medicare's Case Mix Index – an indication of the complexity of cases among Medicare patients – with each state's results ranging from about 1.5 to 1.8 during the period. A fuller state-by-state and hospital-to-hospital comparison of indicators of patient outcomes, mortality and adverse event rates, readmissions, and other quality measures, for all patients (not just Medicare enrollees), is beyond the scope of this report.

Level Rankings are based on 2018 or 2019, and Growth Rankings are based on 2010 or 2011 to 2018 or 2019, depending on data availability.

Insurance Costs. Individual market premiums jumped by about 15 percent in 2018, and HGA estimates they rose by another 10 percent in 2019. However, premiums fell in 2020 by about 9 percent due to the establishment of North Dakota's reinsurance program. Premiums in the small group and large group markets have been a bit more stable, growing by roughly 4-6 percent per year on average in recent years (see Summary Table 3).

Despite higher-than-average hospital costs, North Dakota's premium levels compare favorably with those of other states. For example, Summary Figure 3 shows premiums for the individual market on a per-member-per-month basis and as an average annual growth rate from 2014 through 2019, the period in which the ACA benefit mandates were in force. Summary Table 4 shows North Dakota's rank among the 50 states on measures of premiums, benefit costs, and administrative costs for the individual, small group, and large group markets.

There are several possible explanations for North Dakota's lower-than-average premium costs. First, North Dakota's prescription drug claims have been moderate (see Summary Figure 4). Second, the state's insurers have had lower-than-average administrative costs (see Summary Figure 5), although those costs in North Dakota rose rapidly in the 2014-2019 period.[7] Third, North Dakota's individual market demographics are more favorable than most other states. A CMS study of enrollment in 2017 pegged North Dakota's enrollment of children under age 18 (who collectively tend to have lower claims costs than older enrollees) at 60% higher than the national average, while enrollment of people aged 35-64 (usually higher cost) was 12 percent less than the average nationally.[8] Finally, we suspect that North Dakota's health plans have relatively high average deductibles compared with other states. In the individual market, we estimate that deductibles currently average more than $4,000.

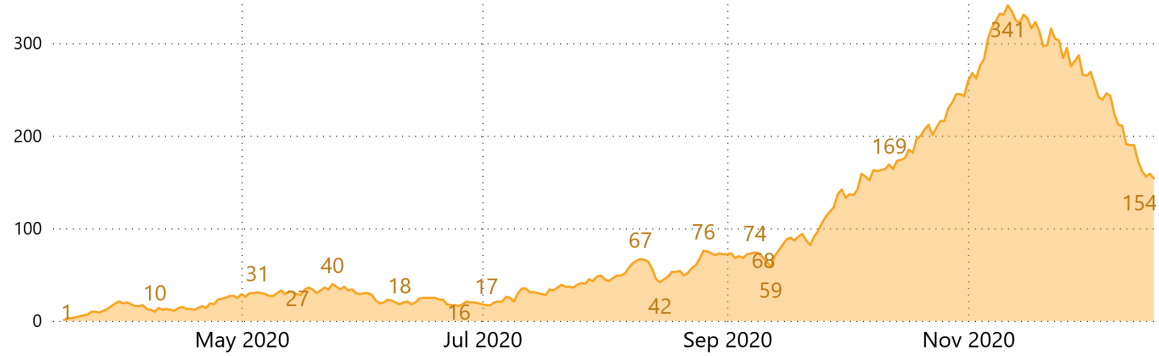
Covid-19 and Baseline Projections

The impact of Covid-19 on the medical community and insurance costs have defied predictions. For some medical providers, it initially led to an unprecedented drop in demand for medical services, despite the pandemic. For insurers in some states, this drop in demand has led to a significant drop in claims.[9] Early reports indicated that treatment of heart attacks and strokes fell considerably at the onset of the pandemic – likely a reflection of individuals forgoing needed care.[10] By late 2020, however, both providers and insurers were facing sizable pent-up demand, as well as a surging pandemic, which led to increasing utilization and costs.

Our initial post-Covid surveys of North Dakota hospitals and insurance companies showed that while health care claims and utilization fell in April 2020, they had resumed their prior levels by June (see Summary Figure 6). The dip and recovery pattern was also evident in our surveys of North Dakota insurers, with cumulative claims per-member per-month in 2020 only slightly above levels for the same months by Summer of 2019.

Summary Figure 6.



Sources: US: Bureau of Economic Analysis; ND: Horizon Government Affairs.
Note: ND index of patient revenues does not include federal emergency funding or other non-patient revenues.

However, by August and September 2020, North Dakota's Covid-19 case counts started increasing rapidly and by October and November, hospitalization rates jumped to among the highest in the nation (see Summary Figure 7). Hospitalization rates were declining as of late December, but we believe that by September through November, insurers' claims costs were running nearly 10 percent above costs for those months in 2019.

Summary Figure 7.
Hospitalizations for Covid-19 in North Dakota

Source: North Dakota Covid Dashboard (accessed December 19, 2020) https://www.health.nd.gov/diseases-conditions/coronavirus/north-dakota-coronavirus-cases .

During the initial Covid recession in the 2nd quarter of 2020, North Dakota lost about 8 percent of its payroll jobs (non-farm). The state's unemployment rate peaked at 9 percent in May, before falling to 6 percent by June and further to 4.5 percent in November.[11] Our surveys noted a corresponding decline in private insurance coverage mid-2020, which we reflected in our baseline projections.

Anecdotal indications from insurers show continuing reductions in private insurance coverage through November. The combination of accelerating numbers of Covid cases and the withdrawal of some federal economic relief in August led to a 5 percent decline in personal income in the state in the third quarter of 2020, which likely put further pressure on employers and individuals trying to maintain coverage.[12] Our baseline projections reflect the assumption that the state's economic outlook will remain weak heading into early 2021.

Preliminary Baseline Projections. Cost estimates of policy alternatives begin with a "baseline" projection of costs absent any policy change. Importantly, baseline projections aren't necessarily intended to be predictions of the future. Instead, they are used as a neutral benchmark against which the impact of policy alternatives can be assessed. In general, we project that rates of growth in both North Dakota's economy and its health sector will be quite subdued for an extended period.

Summary Table 5 shows our projections of enrollment by primary insurance type. Comparing post-Covid 2020 and beyond with pre-Covid 2019, we are assuming a small decline in individual coverage, some continued erosion of group coverage, particularly in the small group and large group non-ERISA markets, expansions of Medicare and Medicaid coverage, and an uptick in the number of uninsured.

[11] Bureau of Labor Statistics (https://www.bls.gov/web/laus/laumstrk.htm, accessed December 19, 2020).
[12] Bureau of Economic Analysis https://www.bea.gov/data/income-saving/personal-income-by-state (accessed December 18, 2020). The 5 percent decline is based on a reported 20.6 percent decline in the third quarter expressed as an annual rate (approximately 4 times the on-the-ground quarterly decline).

Relative to the interim final report, the adjustments to the coverage model in this final report are relatively minor. We updated large and small group coverage levels from the 2019 NAIC Supplemental Health Care Exhibit, which became available in November. We also updated some data for Medicaid and Medicare coverage for 2019 based on new compilations from the Kaiser Family Foundation, which are, in turn, based on new data from the U.S. Census Annual Community Survey (annual data).

Summary Table 5.

Baseline Enrollment Model

Primary Coverage for Acute Care	2019	2020	2021	2022	2023	2024	Change 2019-2024
			Number of Covered Lives				
Individual Market	43,747	41,547	41,538	41,581	41,673	41,810	-1,937
Small Group Employer	61,351	59,314	58,531	57,173	55,846	54,550	-6,801
Large Group Employer	156,685	152,178	152,365	152,553	153,504	154,461	-2,224
Large Group ERISA	201,187	197,551	195,957	196,335	196,713	197,093	-4,094
Medicaid	73,767	75,170	76,599	78,056	79,540	81,053	7,286
Medicare	114,549	116,803	119,102	121,447	123,837	126,274	11,726
Military and Other	29,745	28,932	28,164	27,439	26,754	26,106	-3,639
Uninsured	49,969	60,915	61,565	60,654	58,788	56,728	6,759
Total Population	731,000	732,410	733,822	735,237	736,655	738,076	7,076

Source: Horizon Government Affairs.

Summary Table 6 illustrates the basic contours of HGA's baseline assumptions about growth in the state's health costs. We assume hospital utilization continues to grow very slowly in the 2020-2024 period, while unit costs (costs per unit of utilization) rise by about 5 percent annually. We estimate that prescription drug costs (net of manufacturer rebates) will also continue growing relatively slowly, at about 4 percent per year on average. Compared with the interim report, we have made only one small modification to projections of claims and premium costs on a per-member per-month (PMPM) basis for this final report: a small reduction in the growth of costs in the small group market in 2021, which is based on the recent announcement by NDID of approved rates in that market.[13]

Summary Table 6.

Baseline Insurance Projections

	2019	2020	2021	2022	2023	2024
			Premiums PMPM			
Individual Market	512	468	481	511	543	577
Small Group Employer	467	498	506	529	559	591
Large Group Employer	451	487	511	538	565	594
			Annual Growth			
Individual Market		-8.7%	2.8%	6.3%	6.2%	6.2%
Small Group Employer		6.6%	1.6%	4.6%	5.6%	5.6%
Large Group Employer		7.9%	5.1%	5.1%	5.1%	5.1%
Memorandum:						
Growth of Hospital Unit Costs \1	4.0%	4.1%	4.5%	5.0%	5.0%	5.0%
Growth of Rx Claims (net of rebates)	3.9%	4.0%	4.2%	4.8%	5.4%	5.4%
Average Deductible (Individual Market)	$4,000	$4,500	$4,800	$5,100	$5,400	$5,700

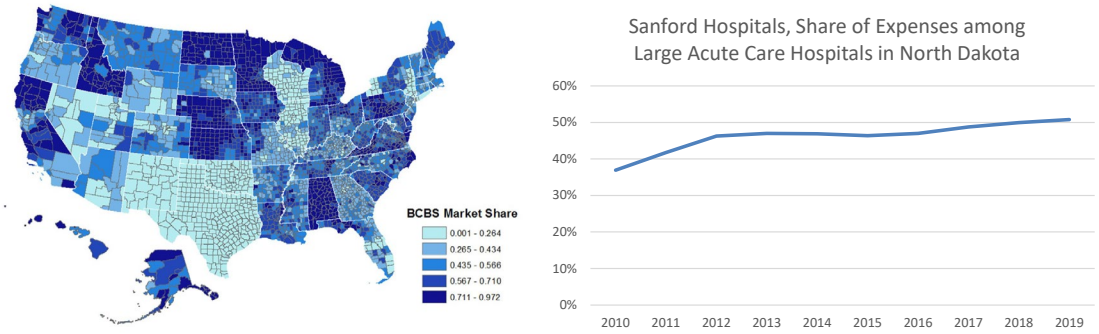
Notes: PMPM = per member per month; large group employer does not include self-funded (ERISA) plans.

\1 Overall hospital expenses per HGA composite index of utilization (admissions, outpatient visits etc.)



[13] https://www.insurance.nd.gov/news/godfread-announces-approved-2021-health-insurance-rates.

Competition and Markets. Although several insurers serve the North Dakota market, the dominant presence is Blue Cross Blue Shield of North Dakota, particularly in the individual market. Two metro areas (Bismarck and Fargo) host two hospitals; other cities and towns in North Dakota have at most one. Sanford Health Group owns the state's two fastest-growing hospitals, accounting for more than 50 percent share of the state's hospital expenses among large acute care facilities (see Summary Figure 8).

From an outsider's perspective at least, there are some areas of concern in North Dakota's health markets. Sanford hospital group is operating under a Corporate Integrity Agreement with the federal Department of Health and Human Services Office of Inspector General, resulting from whistleblower claims of unnecessary surgeries and self-dealing.[14] BCBS was recently fined following a market conduct exam, based on findings of improper payments for telehealth, mental health, and other services.[15]

North Dakota has few managed care plans and limited use of value-based payment methods, population health efforts or care coordination programs. Based on our pre-Covid interviews, the state's health system was characterized as a fee-for-service reimbursement regime, with providers competing to offer lucrative elective surgeries and insurers concentrating on holding down reimbursement rates across the board, with little regard for value of specific providers or patient outcomes from various care patterns.

Summary Figure 8.
Estimated Blue Cross Blue Shield and Sanford Group Market Share

Certainly, North Dakota is not unique in this regard. On a nationwide basis, the pandemic has exposed problems with existing markets for health care delivery and financing. In general, we assume that competitive markets produce efficient and desirable outcomes. In theory, and in practice in most industries, competitive market outcomes provide choices and value. However, it's not clear that North Dakota has benefited to the fullest extent from competitive efficiencies and innovations.

A key question for North Dakota is: Are competitive markets in health care possible? If so, can we strengthen them? If not, can the state work with health care providers and insurers to approximate competitive-style outcomes under a more collaborative system? What degree of public transparency and/or cooperation could lead to more dynamic outcomes without falling into the trap of over-regulation?

Early on in this project, we interviewed representatives from a coalition of hospitals attempting to develop a plan to convert North Dakota's health system from an old-fashioned fee-for-service and hospital dominated approach to better population health and care management.

We believe that the Covid-19 emergency has the potential to spark a more serious discussion of how North Dakota could re-wire its existing health system, while also maintaining and encouraging new competition. Hospitals accustomed to competing for lucrative patients or physicians may need to refocus their efforts on population health and monitoring, using common data. The state's dominant insurer may need to develop population-health and outcomes-based global reimbursement systems rather than simply paying under the same fee-for-service regime year after year. The idea of getting more competitive results, either through additional competition, better directed competition, or public-private cooperation and transparency runs through the policy alternatives discussed below.

Policy Alternatives

As part of our charge, we propose a variety of policy alternatives. Ultimately these policy alternatives reflect value judgements that must be made by North Dakotans and not by outside consultants. Not all of these policy alternatives will work for North Dakota. Some may even contradict one another. We have provided, what we hope, is sufficient information for the North Dakota Legislature, Insurance Commissioner, and Governor to make informed decisions on a path forward to lowering health insurance premiums, lowering health care costs, and providing better population health for North Dakotans.

Important disclosures – Horizon Government Affairs represents clients and coalition members who provide real-time benefit and pricing information for prescription drugs and who provide telehealth services; expansion of both services is recommended below. JWHammer LLC has clients that could potentially offer services to North Dakota under these recommendations. Additional disclosures are listed in the footnote.[16]

[16] Horizon Government Affairs (HGA) is a Washington, D.C.-based government affairs consulting firm that serves a number of clients in the health care industry and operates a number of coalitions that are similarly focused on health care issues. Horizon is not aware of, nor do we have reason to believe, that any of the recommendations included in this report would substantially benefit any of our clients or coalition members. None of the recommendations

Utilization & Care Management. Medication nonadherence and the related hospital admissions and emergency department visits are a significant driver of health care costs. Aligning the interests of the insurer, consumer and medical provider are key to driving down costs and moving consumers to better health.

1. **Benchmark Plan Revisions - Optimized Medication Plans:** The estimated annual cost of prescription drug-related morbidity and mortality resulting from nonoptimized medication therapy was $528.4 billion in 2016 US dollars.[17] Creating a medication optimization plan can have great health benefit for patients and save money.
2. **Private Insurance (Group) Mandate - Optimized Medication Plans:** Similar to the Benchmark Plan revisions, huge strides could be made in the group market. Small and large group plans could be required to offer an optimization program.
3. **Integrated Health Homes:** Our health system has become increasingly byzantine in its complexity and a consumer's ability to manage their own health care. The chronically ill face many issues usually including the management of multiple medical issues. Creating an integrated health home can help patients better manage their health conditions.
4. **Medicaid Strict Managed Care/Value-based Benefit Design** The state should encourage the use of value-based design in the state employee health plan and consider providing incentives for adherence. An outside vendor – not a PBM –may be able to assist state workers in managing their prescriptions and helping with adherence.[18]
5. **Other Options:**

   Limit Medicaid expansion to 100% of poverty. Currently North Dakota has expanded eligibility for Medicaid to 138% of poverty. However, the Affordable Care Act provides subsidies for private insurance to all individuals over 100% of poverty. This option would place people in the 100-138% of poverty range back into ACA subsidized private coverage. Note, the state savings may be limited due to federal matching of 90 percent for Medicaid expansion enrollees in the 100-138% of poverty range.

   Re-form Medicaid expansion as an exclusively managed care model. The importance of a medical home is highlighted above, but a number of states have begun using a similar managed care model in Medicaid. The idea is to eliminate

[18] https://www.medicaid.gov/Federal-Policy-Guidance/Downloads/smd20004.pdf.

a fee-for-service program in its entirety and require insurers to manage the health of Medicaid recipients. This could streamline state efforts if the state managed a single risk pool rather than two separate pools paying different rates and managed differently.

Prices, Coverage, and Insurance Initiatives. Pricing reforms have the potential to restrain the ever-upward push of commercial rates, improve coverage for telehealth services, and consider an alternative method of providing reinsurance coverage. The rate cap policy is explained in more detail by researchers from RAND, who offer it as a less disruptive alternative to broader rate setting or public option proposals.

6. **Cap on Out-of-Network Payment Rates:** Medicare's payment rates are commonly used as a benchmark for insurers, and rates relative to Medicare have been rising in North Dakota. By limiting rates to a percentage of Medicare in the out-of-network market, North Dakota would effectively stem the ever-upward drift of commercial payment rates.
7. **Private Reinsurance:** To supplement the cost-saving efforts of the 1332 waiver program, the State should evaluate purchasing private reinsurance to further reduce costs for individual taxpayers participating in the State's healthcare marketplace. Private reinsurance can assist in driving down/stabilizing rates and preventing spikes, providing consistency for taxpayers/users.
8. **Telehealth:** If structured properly, telehealth services may increase access to needed care while also controlling costs. For North Dakota, proper utilization of telehealth could have an overwhelming impact considering the 6,000% increase in telehealth visits in the Midwest between April 2019 and April 2020.[19] Consumers are increasingly becoming accustomed to telehealth, and states should consider whether existing regulatory barriers are necessary.

Transparency. Price transparency is seen as a panacea to our health system and blame for opaque pricing is assigned to hospitals, insurance companies, government policy, consumer disinterest, and an overly complicated health care system. The truth is, there is more than enough blame to go around. The most important issue to understand about price transparency is that it is a means to an end. Transparency is necessary to encourage competition. Competition stimulates innovation – lower prices and better quality.

9. **Direct to Consumer Pricing: Disclosure of Consumer Prices.** We used a secret shopper to compare prices at several hospitals in North Dakota for three common procedures: colonoscopy, normal vaginal delivery, and caesarian section (see Summary Table 7). What we found was drastically different price estimates. For consumers, these price differences are confusing. We suggest using Medicare rates as a reference and requiring hospitals to disclose their prices as a percentage of Medicare.
10. **Right to Shop:** As highlighted above, there is significant cost variation for common procedures across North Dakota providers. Consumers often are referred by the

[19] https://s3.amazonaws.com/media2.fairhealth.org/infographic/telehealth/apr-2020-midwest-telehealth.pdf

medical provider to the most convenient care delivery center. However, there may be cheaper alternatives with equal or even better-quality outcomes. Right to Shop legislation would allow insurers to make a cash payment back to a consumer when the consumer has shopped for and chosen a less expensive option.

Summary Table 7.

Hospital-Reported Prices for Selected Common Procedures

	Colonoscopy	Normal Vaginal Delivery	Caesarian Section
Trinity Hospital - St.Josephs (Minot)	2,980	4,343	5,058
St.Alexius Medical Center (Bismarck)	1,775	4,895	9,675
Sanford Medical Center (Fargo)	3,843	15,056	22,376
Sanford Medical Center (Bismarck)	5,509	13,603	20,386
Altru Health System (Grand Forks)	2,064	12,239	19,269
Jamestown Regional Medical Center	2,100	13,000	25,000
Innovis Health (Fargo)	4,700	11,000	31,000
Ratio of Highest to Lowest (Percent)	**310%**	**347%**	**613%**

Source: JWHammer LLC.

Program Integrity. Program Integrity focuses on maximizing taxpayer resources by ensuring that North Dakotans receiving health benefits are covered by the correct payer. For example, a Medicaid recipient shouldn't be covered by Medicaid if they are eligible for a group health plan. Whether it is mission creep, shifting priorities or just loss of focus, states stray away from dedicating time and resources to program integrity. Program integrity can provide quick and consistent wins.

11. **Medicaid Integrity Audit:** When a consumer receives financial assistance, North Dakota law allows for full assignment of benefits with no time limit. It is important for the state to periodically audit Medicaid benefits for other responsible payers. In some cases, children may be eligible for coverage under a non-custodial parent. Some recipients have opted out of their employer coverage. In other cases, the care received was reimbursed as part of a lawsuit. Contingency fee contracts provide vendors the opportunity to find savings for the state. The state also has an opportunity to build program integrity requirements into the RFP for the Medicaid expansion.
12. **State Group Health Integrity Audit:** This effort is similar to the Medicaid audit but would be applied to the state employee health plan.
13. **State Group Health Waiver**: The state currently provides no-cost health insurance to state employees and their families but the offer of "free" health insurance can lead to double coverage regardless of whether or not their spouse works for the state. Offering a small bonus to state employees who choose to opt entirely out of coverage may lower overall benefits expenses.
14. **Coordination of Benefits:** Coordination of Benefits rules in health insurance clarify which insurer is responsible for paying for certain benefits. The rules work entirely automatically and are a great example of program integrity. The North Dakota Department of Insurance could consider the benefits of adopting the newer National Association of Insurance Commissioner's model.

Employer Coverage. The vast majority of consumers receive coverage through their employer. As employer coverage continues to erode due to rising costs, states need to find new solutions to help employers.

15. **Study Combined Individual and Small Group Market :** Most states have an unstable individual market but North Dakota appears to be in good shape. A number of states have combined their individual and small group markets to make it easier for small employers to offer coverage. For example, employers offering coverage in the District of Columbia Exchange set their subsidy level (an amount or plan level) and the employee chooses coverage. It provides administrative simplicity for the small employer and choice of benefits for the employee.

Crisis & Pandemic Planning. It seems clear that some hospitals and insurers nationally were caught flat-footed by the pandemic. However, the Covid-19 crisis shouldn't have been a complete surprise, based on experience with numerous prior pandemics. Based on our preliminary analysis, the effects on North Dakota hospitals haven't been as dramatic as in harder-hit states. But this pandemic is not yet over.

16. **Risk Assessments:**
    Hospital and Insurer Own Risk Solvency Assessment. Domestic insurers are required to file a highly confidential report that details the risks to their business called the Own Risk Solvency Assessment or ORSA. This board level report is expected to detail all of the potential risks facing an insurer. North Dakota could consider adding a pandemic requirement for insurers and requiring hospitals to address potential public health risks with a required confidential report reviewed by the hospital's Board of Directors.

Cost and Impact Estimates

For some of the policy alternatives noted above we have prepared preliminary cost estimates and discussion. It may seem odd to discuss cost containment during a pandemic, when many health care providers are pushed to heroic limits. However, the pandemic won't last forever, and nuts and bolts discussions of the growth of health costs vs. affordability for government, employer, and consumer budgets will inevitably return to the spotlight.

Option: Cap Patients' and Insurers' Responsibility for Out-of-Network Charges. In March 2020, researchers at the RAND Corporation published a report demonstrating the savings and impact of capping hospitals rates for out-of-network services.[20] This policy would effectively stem the ever-upward drift of commercial payment rates relative to those paid by Medicare by limiting the amounts payable to out-of-network health care providers to a percentage of Medicare rates.

[20] Erin Lindsey Duffy, Christopher Whaley, Chapin White, *The Price and Spending Impacts of Limits on Payments to Hospitals for Out-of-Network Care*, RAND (March 20,2020)
https://www.rand.org/pubs/research_reports/RR4378.html

While this policy would not directly affect rates for in-network providers, it would indirectly put downward pressure on in-network rates over time. If insurers would otherwise face in-network rates higher than the cap, they could switch the provider to out-of-network status and pay a lower amount. We would view an out-of-network cap as potentially the least disruptive approach to limiting rates, compared with other policy alternatives such as public rate setting regime or public option alternative.

Summary Table 8 below shows the potential impact for a flat cap that remained at 220 percent from 2021 through 2024. Claims would be reduced by $7 million in the individual market and $29 million in the large group (insured) market by 2024, and premiums would be lowered by 2-3%, by that year. In dollars, premiums would be lowered by $166-187 per year or about $15 per member per month (PMPM) by 2024. Under an option where the cap was gradually lowered from 220 percent in 2021 to 190 percent in 2024, claims costs and premium reductions would be larger, with premiums falling by approximately $500 per year or about $40 PMPM by 2024.

Option: Re-Pricing Payment Rates for the Medicaid Expansion Population. For Medicaid expansion enrollees, North Dakota pays healthcare providers at rates more typical for commercial payers than those usually used for Medicaid enrollees not part of the expansion program. This option illustrates the magnitude of possible savings from bringing those rates down to those used in the rest of North Dakota's Medicaid program.

However, since the state's share of costs for the Medicaid expansion population is small, the savings from this proposal would mostly accrue to the federal government. We estimate that possible state savings from this policy could range from $5 to $8 million in 2021, growing to $6 to $9 million in 2024.

Option: Require Stricter Managed Care and Full Risk Health Plans in Medicaid. The Congressional Budget Office has issued two recent reports on potential savings from managed care in Medicare[21] and Medicaid.[22] To be fair, neither report directly specifies CBO's estimate of savings from tighter management of care by Medicaid or Medicare managed care organizations (MCOs). Nevertheless, we infer that the reports imply a potential savings of about 10 percent over time from the conversion of fee-for-service coverage to a strict managed care approach, and perhaps half of that potential savings from the conversion of loosely managed care to a stricter model.

We applied those potential savings amounts to North Dakota's Medicaid program, assuming the greater savings potential from the conversion of the non-expansion enrollee populations to strictly managed care, and the lesser savings from converting the current Medicaid expansion MCO to a stricter model. We estimate that the net savings for North Dakota would be low at first, but would grow to about $25 million by the year 2024 (see Summary Table 8).

Section I. Hospital Data – Historical 2010-2019

Contents: Key Findings

1. Patient Utilization Measures Grew by About 1-2% Per Year
2. Hospital Revenues and Expenses Have Risen by about 7.5-8.0% Per Year
3. Growth in Costs Per Unit of Use Averaged 6.5% Per Year
4. Average Salaries Rose 4% and Employment Grew 3% Per Year
5. Case Mix Index Growth in Medicare was 1% Per Year
6. Commercial Payment Rates Grew From about 170% to Over 200% of Medicare's Rates
7. Patient Financial Assistance is About 1 Percent of Patient Revenues
8. Hospital Compensation for Top Executives and Physicians Ranged Widely

HGA's data gathering started with the purchase of multiyear Medicare Cost Report Information System (HCRIS) data, processed by RAND (https://www.hospitaldatasets.org/) for all hospitals in the U.S, organized by Medicare Provider Number. From this data, we determined that nine hospitals in North Dakota met the criteria for in-depth study: acute care, nonfederal hospitals in communities with more than 10,000 residents.

In-Depth Study of Nine North Dakota Hospitals. HGA issued a data request to these nine hospitals based on the American Hospital Association's (AHA's) annual survey, after discussion with the state's hospitals and the North Dakota Hospital Association (NDHA). NDHA arranged to have the historical data submissions for the survey sent back from the AHA to each hospital, to make the data response less burdensome. The data request is shown in Appendix A.

One key purpose of the data request was to supplement and verify the publicly available data from HCRIS, which we use for state-by-state comparisons. We used concepts and definitions from the American Hospital Association's (AHA's) annual survey, so that responding hospitals could use familiar concepts.

Our preliminary finding is that the HCRIS 2010-2018 data provides a good summary of the state's utilization, expenses, and revenues, although there were several cases where we had to make corrections to the HCRIS data for individual North Dakota hospitals based on the hospital's AHA data response and in subsequent discussion with hospitals. There are other instances where the definitions used in each dataset are different, but generally similar. We further spot-checked the results against some data reported by non-profit hospitals on their IRS form 990 disclosures. The IRS data also contain additional data on compensation of top officers, executives, and physicians, which is shown in Appendix B. The one concept where the HCRIS and AHA did differ noticeably was on the hospitals' allocations of their revenues from payers: commercial vs. Medicare and Medicaid. In general, we have defaulted to using the AHA data as a guide for our projections.

The hospital-by-hospital HCRIS data we use for in-state North Dakota hospital comparisons was updated in November 2020. However, some data points and hospitals had missing data, and we have not attempted to contact hospitals during this fall's Covid surge to ask about issues with this latest data set. The preliminary 2019 hospital-by-hospital HCRIS results included in this

report are therefore subject to considerable uncertainty. Likewise, due to the missing data, we are unable to report aggregated hospital data from HCRIS for 2019.

For Tables 1-9, regarding the 9 hospitals with in-depth data, both the HRCIS and AHA data are converted to calendar years by HGA.

Patient Utilization Measures Grew by About 1-2% Per Year. Among the 9 reporting North Dakota hospitals, inpatient admissions have been roughly flat since 2010 (0.3% average annual growth AHA data; 0.1% HCRIS data; see Table 1). Meanwhile overnight inpatient "days" have grown slowly (1.3% per year AHA data; 1.6% HCRIS), such that the average length of stay increased from about 4.1-4.2 days in 2010 to 4.6 days in 2019. Outpatient and Emergency Department (ED) visits grew more rapidly, rising at average annual growth rates of 1.2 percent and 2.0 percent, respectively, and outpatient surgeries grew rapidly (5.4% per year). HGA's overall composite utilization index, which includes admissions, days, ED and outpatient visits, outpatient surgeries, and so on, increased by 1.4% per year between 2010 and 2019, with most of that growth occurring between 2010 and 2013.

Source: Horizon Government Affairs. HCRIS data via RAND, vintage 11-4-19.

Note: Average annual growth rate is 2010-2019 for AHA data; 2010-2018 for HCRIS data.

\a Overall utilization composite index is calculated by HGA using data from the AHA survey responses. It is not an AHA calculation.

1. ***Hospital Revenues and Expenses Have Risen by about 7.5-8.0% Per Year***. Total expenses and revenues of the nine reporting hospitals grew by about 7.5-8.0% per year in the 2010-2019 period, with only slight differences in the AHA and HCRIS estimates (see Table 2).

2. ***Growth in Costs Per Unit of Use Averaged 6.5% Per Year***. We compared average annual growth in expenses with growth in HGA's composite index of growth in utilization (see Tables 3 and 4). By this measure, the weighted average annual growth in expenses per unit of use was about 6.5 percent between 2010 and 2019. On a per-hospital basis, the range of annualized growth in expenses per unit of use ranged from a low of 4 percent to more than 11 percent. The hospital with the fastest-growing costs, Sanford Fargo, had annual utilization growth of 2.4 percent per year, with expense growth per unit of utilization growth of about 11 percent per year.

Note: Weighting is a custom blend of inpatient and outpatient utilization by HGA.
\a 2010 figure is a rough approximation; Average annual growth is calculated 2011-2018.

4. ***Case Mix Index Growth in Medicare was 1% Per Year.*** Although we do not have a direct estimate of the overall intensity of all patient stays, Medicare's case mix index – a proxy for the complexity or difficulty of cases – among Medicare patients rose by about 1 percent per year in the 2010-2018 period, with most of the growth between 2010 and 2014 (see Table 8).

Table 8.

Medicare Casemix Index (HCRIS Data, Approximated by RAND)

/a Data may be missing for 2019. Average annual growth from 2010 to last year shown, 2018 or 2019, depending on data availability.

5. ***Commercial Payment Rates Grew From about 170% to Over 200% of Medicare's Rates.*** An indirect method of computing payment rates, using charge to revenue ratios, suggests that average commercial payment rates rose from about 170 percent of Medicare rates in 2011 to more than 200 percent in 2018, with most of the growth occurring in the 2014-2018 period (see Table 9). Note that the individual hospitals had widely varying ratios from year to year by this measure, so we view the individual hospital data as particularly uncertain.

Note: Calculated as ratio of commercial charge-to-revenue ratio to Medicare charge-to-revenue ratio. Weighting is a custom blend of inpatient and outpatient utilization by HGA.

6. ***Financial Assistance is About 1 Percent of Patient Revenues***. Table 10 shows our tabulations of total financial assistance provided to patients (both insured and uninsured) qualifying for hospitals' financial assistance programs. These amounts are HCRIS tabulations of the approximate cost of care for patients in financial assistance programs less partial patient payments.

   In general, financial assistance levels were about 1 percent of net patient revenues for all North Dakota hospitals. However, reported financial assistance grew rapidly during the 2011-2018 period, with average growth of nearly 10 percent per year. Appendix C shows the HCRIS tabulations in greater detail for all North Dakota Hospitals.

Table 10.

Note: Average annual growth rate calculations are from 2011-2019 except as noted.
\a Data for some hospitals is missing for 2019. Average annual growth is computed from 2011-2018. Trinity reported zero financial assistance in 2011-2013; growth is calculated as 2014-2019.

7. ***Executive and Top Physician Compensation Ranged Widely***. HGA looked at the IRS form 990s to collect data on compensation of top executives and physicians at the non-profit hospitals studied. Importantly, some of the non-profit hospitals report as part of a larger group, so the top executive and physician compensation reported may not be in North Dakota. For example, many of the top executives and physicians reporting on the Sanford Group's form 990 may be based in South Dakota (see Table 11 and Appendix B).

Source. HGA based on data from the Medicare Hospital Cost Reports.
*Beginning points are 2010 or 2011 and endpoints are 2018 or 2019, depending on data completeness. Growth is based on 2010 or 2011 to 2018 or 2019.

HGA used HCRIS data to make several types of comparisons of North Dakota's hospital costs and utilization with measures from the other states and the nation as a whole. Importantly, these tabulations include data from all hospitals in North Dakota and other states, including federal hospitals, specialty hospitals in the HRCIS data, and additional critical access North Dakota hospitals that did not participate in the data request for this project and whose data were not included in the tables in the prior section. The 50-state comparisons below are based on HCRIS data processed by RAND vintage 8-1-2020.

The 50-state data are shown in cost reporting years, and some data for 2019 may be incomplete. Note that the national totals include Puerto Rico, but data from U.S. territories is not otherwise shown in the tables or rankings. Because some 2019 data may be incomplete – for several measures that are not ratios or averages, we show average annual growth rates for 2010-2018. Other tabulations are based on data that were first reported in 2011. Growth rates for these items may be 2011-2018 or 2011-2019.

8. ***Inpatient Discharges.*** The growth of inpatient discharges (admissions) in North Dakota has been roughly flat in the 2010-2018 period (-0.1% annual growth), while the nationwide trend was for a slight decline during that period (-0.6% per year). Much of the growth in North Dakota admissions was during the 2010-2012 period; the number of admissions in the state has leveled off or declined slowly since 2012 (see Table 12 and Figure 1).

Figure 1.

*2019 Data may be incomplete -- Average Annual Growth from 2010-2018.

9. ***Inpatient Days.*** The number of inpatient days in North Dakota hospitals grew by about 1.3 percent per year from 2010 to 2018, considerably higher than the national trend of negative 0.3 percent per year. North Dakota ranked 4th nationally in the number of hospital inpatient days per person, behind DC, Kentucky, and West Virginia (see Tables 13-14 and Figure 2). In 2010, North Dakota ranked 7th on this measure.

*2019 Data may be incomplete -- Average Annual Growth from 2010-2018.

10. Average Length of Stay. The average number of inpatient days per discharge nationwide has remained roughly constant at about 4.7-4.8 days. However, North Dakota's average length of stay increased from 4.8 to 5.5 between 2010 and 2019, a rate of growth among the highest in the nation (see Table 15 and Figure 3). As a result, North Dakota's rank on average length of stay rose from 11th in 2010 to 3rd in 2019.

Note: All Hospitals (including federal, critical access etc.) from Medicare Cost Reports

*2019 Data may be incomplete, but the ratio should be consistent with prior years -- average Annual Growth from 2010-2019. Montana growth 2010-2018.

11. ***Occupancy Rate.*** Table 16 shows that North Dakota had slightly lower-than-average statewide occupancy rate in the 2010-2019 period, with a 2019 rate of 54 percent, compared with a U.S. average of 62 percent. However, North Dakota's measured occupancy rate in the HCRIS data is somewhat higher than that of other rural states in the region, such as South Dakota, Montana, and Wyoming. Importantly, HCRIS and AHA measures of occupancy rates were quite different for some hospitals, so it is possible that the HCRIS measure shown here is somewhat uncertain, particularly in the absolute amount. Nevertheless, we believe the HCRIS measures are suitable for comparisons from state to state.

12. ***Beds Per Capita.*** Table 17 shows North Dakota's inpatient beds per 1,000 people, ranked by the 2017 ratios for each state (2018 data was incomplete). Among the states, North Dakota was 5th highest in inpatient beds per resident, behind only Mississippi, DC, West Virginia, and South Dakota.

*2019 Data may be incomplete -- Average Annual Growth from 2010-2018.

13. ***Operating Expenses.*** Overall operating expenses for North Dakota hospitals grew by an average of 7.9 percent annually between 2010 and 2018, well above the national average of 4.5 percent per year. Only South Dakota and Alaska had more rapid rates of growth in expenses during this period (see Tables 18-19 and Figure 6). North Dakota's hospital operating expenses per state resident were highest in the nation in 2018. Between 2010 and 2018, North Dakota overtook DC for the highest expenses per capita.

14. ***Operating Revenues.*** North Dakota hospitals' operating revenues grew from $2.3 billion in 2010 to $4.1 billion in 2018, a growth rate of 7.4 percent per year. That growth rate was considerably higher than the nationwide hospital revenue growth of 4.6 percent, trailing only South Dakota, Idaho and California among the states (see Table 20 and Figure 7). North Dakota's operating revenues per state resident ranked 2nd only to DC in 2018 (see Table 21). (As a regional referral center, DC has a focus of hospital beds for the region; North Dakota may also "import" some hospital patients from Minnesota.)

*2019 Data may be incomplete -- Average Annual Growth from 2010-2018.

15. Average Salaries per FTE. Among the states, North Dakota had the 8th highest average salaries in 2019 at $87,640 per FTE, and about $10,000 higher than the national average (see Figure 8 and Table 22). From 2010 to 2019, average salaries in North Dakota grew by 2.9 percent per year; the national average growth rate in that period was 2.1 percent.

Notes: All Hospitals (including federal, critical access etc.) from Medicare Cost Reports. 2019 data may be incomplete.

16. ***Inpatient Revenue Per Discharge.*** Although revenue or cost allocations are inherently uncertain, it has become customary to use charges as a tool to divide resource use among hospital units or services. To estimate hospital costs per discharge, we use inpatient vs. outpatient charges to allocate revenues to inpatient care, and then divide by the number of discharges.

    At over $20,000, North Dakota's inpatient revenue per discharge was 6th highest among states in 2019. Inpatient revenue per discharge grew by 5.7 percent per year, nearly double the national average of 3.0% (see Table 23 and Figure 9). In 2010, North Dakota's rank was 21st on this measure.

Notes: All Hospitals (including federal, critical access etc.) from Medicare Cost Reports. 2019 data may be incomplete.

17. ***Commercial to Medicare Rate Ratio.*** We used a proxy measure of average commercial rates compared with Medicare rates. Among all hospitals in North Dakota, the average ratio in 2019 was 213 percent of Medicare rates, or more than twice Medicare payment rates (see Table 24 and Figure 10). For comparison, the commercial to Medicare rate ratio in 2018 ranged from a high of 247 percent in Colorado to 150 percent or below in New York, Texas, Maryland, Massachusetts, and a handful of other states. Over the 2010-2018 period, North Dakota's rank on this measure jumped from 30th to 7th.

*2019 Data may be incomplete.

18. ***Medicare Case Mix Index.*** The average Medicare case mix index gives an idea of the intensity or complexity of the inpatient services provided in a state. North Dakota's 2019 measure of 1.74 is very close to the national average of 1.79, and has remained close to the national average since 2010 (see Figure 11 and Table 25).

19. ***Medicare Revenues Per Enrollee.*** Medicare patient revenues per enrollee in North Dakota were 2nd highest in the nation in 2018. Figure 12 and Table 26 show the measure based on gross Medicare enrollment in the state (anyone with any Medicare enrollment). We also tested the concept using a "net" or much reduced enrollment measure (only Parts A and B, excluding dual Medicare-Medicaid eligible people). Under both measures, Medicare patient revenues per enrollee in North Dakota ranked number 2, behind only DC.

Figure 12.

*2019 Data may be incomplete. Average annual growth from 2011-2018.

25. ***Medicaid Inpatient Discharges and Days.*** North Dakota's growth in Medicaid inpatient discharges averaged 1.4 percent over the 2010-2018 period (see Table 32) and the number of inpatient days rose by 2.5 percent per year (see Table 33). These growth rates for overall Medicaid utilization are similar to those reported above from the AHA-style data, giving us confidence in their accuracy. However, Tables 31 and 32 also show that the HCRIS Medicaid utilization data for many other states shows very large declines in inpatient discharges and days over the 2010-2018 period. In some states, the reductions in Medicaid utilization were well over 10 percent *per year* during this period. These states showing huge reductions include large states like Florida, Illinois, and Texas, as well as many smaller and medium-sized states. For example, the percentage of Medicaid discharges as a share of total discharges in Kentucky is reported to have fallen from 17 percent in 2010 to 2 percent in 2018, which seems unlikely.

    There could be several reasons for the apparent decline in Medicaid inpatient use in these other states, including shifts from inpatient to outpatient care or mischaracterization of Medicaid managed care coverage as private or commercial coverage instead of Medicaid. HCRIS does not provide data on outpatient utilization, and we are investigating the labelling of Medicaid vs. Medicaid managed care data, but , at this point, we do not have a good reason why these other states are showing such precipitous apparent declines in Medicaid hospital utilization and (sometimes) hospital revenues.

Table 32.

*2019 Data may be incomplete. Growth Rates from 2010-2018.

26. Medicaid Revenues Per Enrollee. Table 34 shows rankings of Medicaid revenues per enrollee. By this measure, North Dakota had the highest Medicaid hospital cost per enrollee in 2018.

However, it is fair to note that North Dakota hospitals' Medicaid revenues by this measure fluctuated widely from year to year, and state-to-state comparisons may be more uncertain than other measures.

Table 34.

*2019 Data may be incomplete -- Average Annual Growth from 2011-2018.

27. ***Private Patient Revenues Per Private Insurance Enrollee.*** We ranked states by non-Medicare and non-Medicaid (essentially private insurance) patient revenues per insured enrollee (employer plus non-group). By this measure, North Dakota ranked 3rd among the states in 2018 (see Figure 16 and Table 35).

Figure 16.

*2019 Data may be incomplete -- Average Annual Growth from 2011-2018.

28. ***Patient Financial Assistance.*** HCRIS reported charity care is based on both uninsured and insured patients qualifying for hospitals' financial assistance programs, less partial payments received. The valuation of the assistance is adjusted to a cost basis using cost-to-charge ratios. As noted above, North Dakota hospitals' financial assistance has increased rapidly (see Table 36 and Figure 17). However, at 1.3 percent of net patient revenues, the level of assistance is low compared with most other states, and well below the national average of nearly 3 percent (see Table 37). Importantly, the valuation of patient financial assistance in the HCRIS data is quite volatile from year to year, and therefore may be more uncertain than other measures.

III. Insurers – Historical Data 2010-2019

Key Findings and Illustrations

30. Individual Market Premiums – The NDID, NAIC, and CMS Data are in Rough Agreement on Overall Market Sizes and Trends
31. Premiums per Member Grew Rapidly in the Individual Market; Slower in Group Markets
32. Administrative Costs Grew Rapidly in the 2010-2018 Period
33. Pharmaceutical Benefit Claims, Net of Rebates, Grew Rapidly
34. Individual Market Baseline Reconstruction for 2019 and 2020

We gathered data on insurance benefits and claims from several sources: the CMS rate review data for 2020 (experience data through 2018), the NAIC supplemental exhibit (2010-2019), the NDID insurance market report (2014 through 2018), a data request to state insurers (through 2019 with some projections for 2020 and beyond; data request shown in Appendix D), and information from the state's 1332 reinsurance waiver request.

The following tables show our preliminary tabulations and estimates of statewide North Dakota premiums and benefits.

29. Individual Market Premiums – The NDID, NAIC, and CMS Data are in Rough Agreement on Overall Market Sizes and Trends. Table 38 indicates that the NDID Market Report, the NAIC supplemental exhibit, and the CMS rate review data are in reasonably good agreement for concepts they measure in common. ACA coverage has gradually expanded since its introduction in 2014 as a share of total individual market coverage. Individual market premiums grew very rapidly in 2014 and 2015 mostly due to the added benefits required for ACA coverage.

30. ***Premiums per Member Grew Rapidly in the Individual Market; Slower in Group Markets.*** Premiums per-member per-month (PMPM) in the individual market grew by about 8-9 percent annually in the 2014-2018 period, and about 4-5 percent per year in the small group and large group markets (see Table 39). A key reason for the difference was probably an influx of relatively older and sicker enrollees in the individual market during that period, as the individual market switched to guaranteed issue coverage (no coverage denials or limitations due to preexisting medical conditions).

* Growth rate may be 2014-2018 or 2014-2019 depending on data availability for 2019.

31. Administrative Costs Grew Rapidly in the 2010-2019 Period. In the individual market, general and administrative costs (including claims processing) grew by about 5.6 percent per year in the 2010-2019 period, more slowly than benefit costs (7.0%) and premiums (8.7%). However, administrative costs grew much more rapidly than claims costs in the group markets, according to preliminary data from the NAIC (see Table 40).

* Preliminary

32. Pharmaceutical Benefit Claims, Net of Rebates, Grew Faster Than Non-Pharmacy Costs. Based on the NAIC data, net pharmacy claims grew more rapidly than non-pharmacy costs in all markets. For example, in the individual market, net pharmacy claims grew by 11.8 percent per year, compared with average annual growth of 6.0 percent for non-pharmacy claims over the 2010-2019 period (see Table 41).

* Preliminary

33. Individual Market Baseline Reconstruction for 2019 and 2020. Table 42 shows our baseline reconstruction for the Individual Market in 2019 and 2020. This table is particularly uncertain and subject to change. It assumes 2020 premiums will be about 9 percent lower than 2019, due to the state's new reinsurance program. The reduction in enrollment is due mostly to the Covid-19 recession, based in preliminary data submitted by the state's health plans. Absent the recession, we had expected enrollment in the individual market to increase, based on preliminary data from CMS on 2020 plan selections, and due to the reinsurance and resulting premium reduction.

Source. HGA based on data from the National Association of Insurance Commissioners.
Notes: Growth is based on 2014 to 2019, except as noted in tables. All measures are based on PMPM (per-member per-month).

The data below show overall premiums and claims and other measures from the NAIC supplemental exhibit. These data are much more stable and comprehensive than the CMS Rate Review data, and we believe they are most appropriate for state-to-state market comparisons. However, there is still the possibility that the NAIC data could have volatility due to carriers entering or departing state markets. Importantly, the NAIC's "large group" category does not include self-funded (ERISA) benefit plans.

Despite North Dakota's relatively high and rapidly growing hospital and pharmaceutical costs, North Dakota's statewide premiums and claims per member month are about average, in the individual, small group, and large group markets.

34. **Individual Market Premiums.**

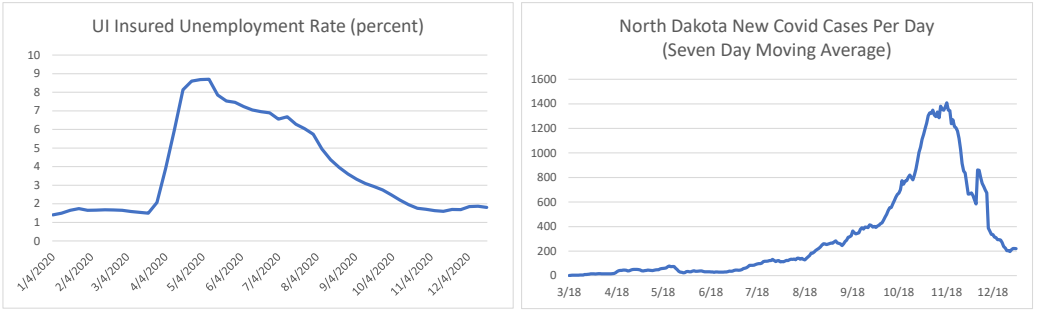
V. Current Market Status, Covid-19 Update, Baseline Projections to 2024



To estimate the impact of alternative policies, we begin by creating a benchmark or "baseline" estimate of the status quo. These baseline projections are not necessarily intended to be forecasts of the future. In light of the Covid-19 pandemic, any projections at this time are particularly uncertain. Nevertheless, working out a coherent set of projections is a key first step toward evaluating the impact of policy changes.

For North Dakota's hospital and insurance claims baselines we started by looking at the impact of the Covid-19 pandemic and the national recession on the state's overall economy and the state budget. In general, we project that rates of growth in both North Dakota's economy and its health sector will be quite subdued for an extended period.

Covid-19 and Impact on Unemployment. As of late July, North Dakota's total active caseload was about 1,000 cases and the number of new cases diagnosed over the prior week was about 120 per day. Statewide, only 42 patients were hospitalized. However, the number of cases rose steadily in July and the test positivity rate increased to nearly 7 percent.[23] The July 26 federal report to the states showed North Dakota in the "Red Zone" (highest risk) for outbreak.[24]

Between March 14th and July 11th, more than 80,000 North Dakota residents filed initial unemployment insurance (UI) claims.[25] For perspective, during the full year 2019 only 25,000 initial claims were filed. The state's insured unemployment rate (the ratio of people receiving unemployment benefits to those covered by the unemployment compensation system) rose to nearly 9 percent in April before returning to less than 2 percent in November (see Figure 22). However, the return to full employment corresponded with a large increase in the number of Covid cases.

Figure 22.

State Budget Impact of the Covid-19 Recession and Oil Price Changes. Table 52 shows our rough approximated model of the state's main expenditure and revenue categories. We used data from the National Association of State Budget Officers (NASBO)[26], supplemented with some data from the state's biennial reports.[27] Although this budgetary model is highly simplified, one relationship sort of jumps off the page: the correlation between the annual percent change in state oil and gas revenues and that of total state expenditures (see Figure 23).

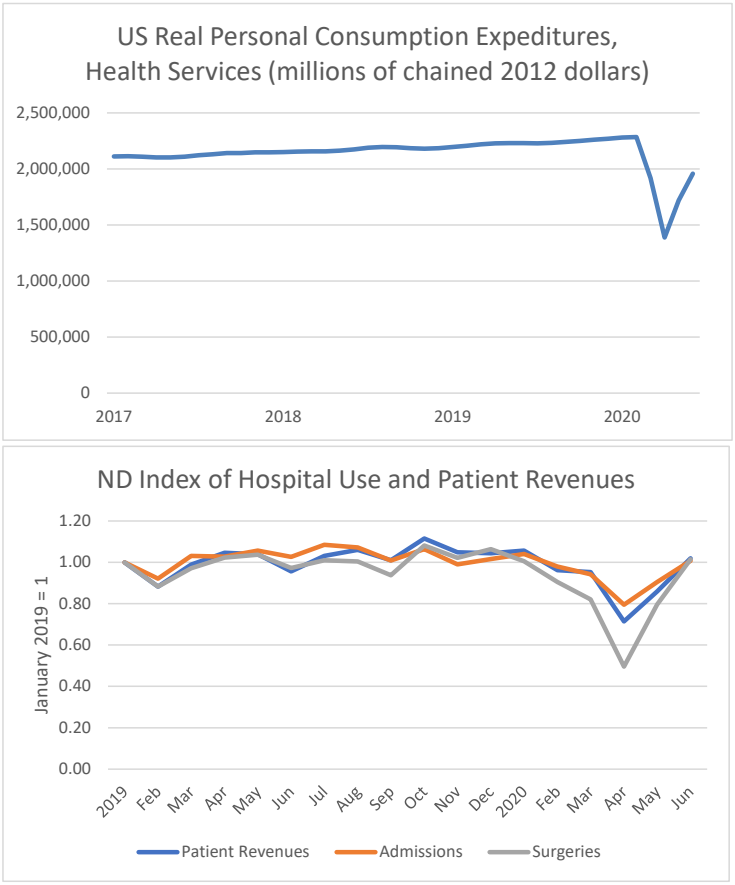
Hospital Financial Status Pre- and Post- Covid-19. Nationally, estimates of the potential costs of Covid-19 care over the course of the pandemic are as high as $160 billion.[28] However, when other analyses accounted for the possibility of reduced or deferred elective or unrelated care, they estimated a net health expenditure *savings* of $75 to $575 billion in 2020 alone.[29]

Of course, this huge range of costs and savings illustrate the uncertainty. Much will depend on whether a cure or vaccine is found, and whether the cost would be borne by government or private payers.



[28] https://www.healthaffairs.org/doi/full/10.1377/hlthaff.2020.00426
[29] https://us.milliman.com/en/insight/estimating-the-impact-of-covid19-on-healthcare-costs-in-2020

In the first quarter of 2020, the nationwide reductions in health spending from reduced or deferred care were much larger than the cost of Covid-19 care. Based on initial GDP estimates, U.S. personal consumption expenditures for health care fell by about 15 percent between February 2020 and June 2020 (see Figure 24).[30]

The pandemic and recession have also hurt total payrolls, including the health sector. Nationwide, hospitals and outpatient centers shed 2 percent of payrolls between June 2019 and June 2020, with larger percentage losses for other types of health services. Among all industries, jobs were down 9 percent during that period (see Table 53).

However, in North Dakota, hospital admissions and patient revenues had mostly bounced back to prior levels by June 2020. And during the state's surge in Covid cases in September through November 2020, HGA estimates that claims costs in the state were likely running about 5-10 percent higher than in those same months in 2019.

At this point, our assumption is that the state's Covid-19 costs and the short-term savings from deferred or delayed care approximately netted out in 2020, and that final year-end results will likely show that claims costs for the year came close to pre-Covid expectations. The outlook for 2021 remains uncertain, but for this report, we have not changed our assumptions about future hospital costs compared with the September interim report. Likewise, we have only adjusted our assumptions on future insurance costs slightly, based on the latest approved rates for 2021.

Table 54 shows our baseline reconstruction of the state's 9 largest hospitals' aggregated results from 2015-2019 and our preliminary pre-Covid-19 baselines to 2024. We assumed some slowing in hospital wage and benefit growth, and a slowing of the growth of non-patient revenues (including philanthropy) that had been propping up the hospital sector's margins in 2018 and 2019. Note we are assuming a somewhat lower total margin for the sector (3-4%) than had been achieved in the mid-2010s (5-6%).

Source: Tabulations and calculations by Horizon Government Affairs. HCRIS data as processed by RAND vintage 11-4-2019.

Table 55 below shows the underlying utilization assumptions behind the revenues and expenses projected in Table 56. We followed recent trends in North Dakota's expected hospital utilization, with very slow growth in admissions, approximately zero growth in inpatient days, and a slow downward trend in average length of stay. Medicare utilization will likely grow faster than that of Medicaid and private insurance enrollees.

Currently, we estimate that hospital patient revenues are growing more slowly than expenses in North Dakota. To re-balance revenues and expenses within the projection period from 2020 to 2024, we lowered the recent average growth of wages and benefits by one percentage point per year, to about 4.5 percent per year, and reduced the growth of "other" expenses considerably in 2020 and 2021. On the other hand, we assumed the growth of interest expenses would be about 1 percentage point higher per year during the projection period, reflecting current capital expenditure trends (but also assuming very low interest rates). Finally, we lowered the growth of non-patient revenues from its recent extraordinary growth rate of over 25 percent per year to 18 percent in 2020 and about 10 percent in 2021-2024.

The bottom line is that recent revenue growth has been lower than recent expense growth, particularly if we assume the growth of non-patient revenues slows from recent extremely high rates. Thus, to maintain margins, we expect North Dakota hospitals will be required to lower their rate of growth in expenses. We reflect this in the projections.

As a group, the state's hospitals seem to be in good financial condition. However, the hospital sector's financial outlook likely worsened in 2019, and several individual hospitals seem to be in precarious financial situation. Moreover, there are large construction projects in place or in the pipeline that could further squeeze hospital's finances in coming years, with an uncertain payoff down the road.

Preliminary Individual Insurance Market Projections. Tables 56-59 below show how these projections of hospital spending fold into our projections of insurance coverage and individual market claims and premiums. Tables 56 and 57 summarize the individual, small group, and large group (non-ERISA) markets. These are the markets regulated by the state. Table 58 and 59 show additional detail on the individual market.

Our baseline projects that premiums will increase by about 5 percent per year beginning in 2021. Note that in the individual market we account for North Dakota's state-led reinsurance program within the claims account – that program is the primary reason premiums are expected to be about 9 percent lower in 2020 than in 2019. We estimate that the Covid-19 recession will reduce private coverage in all markets in 2020, but that the magnitude of the coverage losses in North Dakota will be relatively small, less than 5 percent. Based on CMS data from 2020 open enrollment, we had assumed an increase in individual market coverage in 2020, due to the reductions in premiums associated with North Dakota's reinsurance program. However, we now expect slightly declining enrollment due to affordability issues, particularly among unsubsidized enrollees with ACA coverage.

HGA conducted an interview with a pandemic modeling expert at a large health insurer outside the state. They also expected considerable deferrals of care, but were cautious about the 2021 outlook, particularly regarding the cost of possible Covid-19 vaccines and treatments. In general, her expectation was that about half of delayed care would be simply deferred, and would resume in 2021. However, in her model some deferred or delayed care would result in worse outcomes; other patients would simply decide not to get their previously anticipated care.

On balance, we have made only slight adjustments to premiums for 2021 and later years, compared with the September report. In particular, we slightly reduced expected premium growth in the small group market for 2021, based on the latest approved rates from NDID.[31]

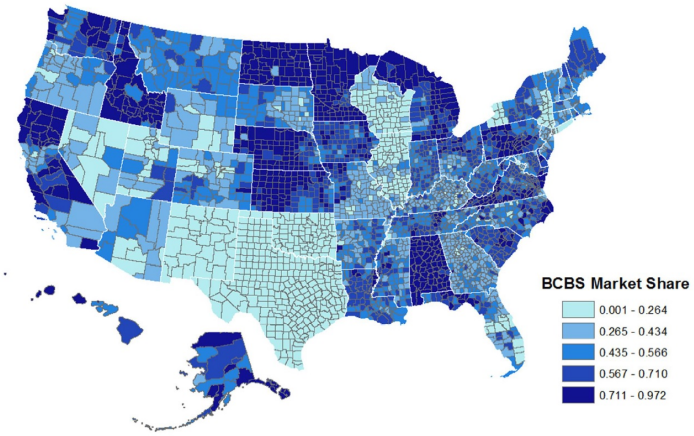
National Policy Outlook. Post-Covid-19, federal health policy remains extremely uncertain. Our preliminary baseline projections of North Dakota health costs will assume no major policy changes at the federal level that would affect the state's health markets before 2024.

However, in the longer run, the mismatch between Medicare and commercial rates is unstable, and likely unsustainable. North Dakota's rates are among the highest in the country (see Figure 25). Under Democratic control of the White House and Congress, we would expect legislation expanding subsidies for ACA coverage, and regulations rolling back some of the Trump Administration's relaxations of rules on state-based 1332 waivers. Less likely policy changes could include allowing commercial plans to use some multiple of Medicare rates, and/or allowing health plans to offer Medicare or MA-type coverage to broader populations, again using some multiple of Medicare rates. Even less likely would be a more direct Medicare "buy-in" for some of the population (perhaps for people aged 55+ or in the individual market).

Figure 25.

Source: HGA based on HCRIS/Rand data.



Competition and Markets. Although several insurers serve the North Dakota market, the dominant presence is Blue Cross Blue Shield of North Dakota (see Figure 26), particularly in the individual market. Two metro areas (Bismarck and Fargo) host two hospitals; other cities and towns in North Dakota have at most one. Sanford Health Group owns the state's two fastest-growing hospitals, and accounts for more than 50 percent of the state's hospital expenses among the state's 6 large acute care facilities (see Figure 27).

From an outsider's perspective at least, there may be some areas of concern in the state's health care markets. Sanford Health is operating under a Corporate Integrity Agreement with the federal Department of Health and Human Services Office of Inspector General, resulting from whistleblower claims of unnecessary surgeries and self-dealing.[32] BCBS was recently fined following a market conduct exam, based on findings of improper payments for telehealth, mental health, and other services.[33]

North Dakota has a limited managed care footprint and relatively low use of value-based payment methods, population health efforts or care coordination programs. Based on our interviews, the state seems mostly stuck in a fee-for-service reimbursement regime, with providers competing to offer lucrative elective surgeries and insurers concentrating on holding down reimbursement rates across the board, with little regard for value of specific providers or patient outcomes from various care patterns.

Certainly, North Dakota is not unique in this regard. On a nationwide basis, the Covid-19

pandemic has exposed problems with existing markets for health care delivery and financing. For example, the lack of telehealth infrastructure and financing may be a symptom of broader market dysfunction – call it market "lethargy" or market "stagnation" – the inability of existing markets to produce the sort of dynamism we expect from competitive systems.

In general, we assume that competitive markets produce efficient and desirable outcomes. In theory, and in practice in most industries, competitive market outcomes provide choices and value. However, it's not clear that North Dakota has benefited to the fullest extent from competitive efficiencies and innovations.

So a key question for North Dakota is: Are competitive markets in health care possible? If so, can we strengthen them? If not, can the state work with health care providers and insurers to approximate competitive-style outcomes under a more collaborative system? What degree of public transparency and/or cooperation could lead to more dynamic outcomes without falling into the trap of over-regulation?

Early on in this project, we interviewed representatives from a coalition of hospitals attempting to develop a plan to convert North Dakota's health system from an old-fashioned fee-for-service and hospital-dominated approach to better population health and care management.

The Covid-19 crisis might be a very good spur to revisit those efforts. Hospitals accustomed to competing for lucrative patients or physicians may need to refocus their efforts on population health and monitoring, using common data. The state's dominant insurer may need to develop population-health and outcomes-based global reimbursement systems rather than simply paying under the same fee-for-service regime year after year.

We believe that the Covid-19 emergency has the potential to spark a more serious discussion of how North Dakota could re-wire its existing health system, while also maintaining and encouraging new competition. The idea of getting more competitive results, either through additional competition, better directed competition, or public-private cooperation and transparency runs through the policy alternatives discussed below.

VI. Policy Alternatives and Options

In this section, we describe several policy alternatives for consideration by North Dakota policymakers. For some of the policies, we have also provided preliminary cost and impact modeling in the subsequent section below.

Some of the policy alternatives suggested are mutually exclusive. Ultimately, policy choices reflect value judgements, and it is not our job to substitute our judgment for that of the North Dakota's Legislature, the Governor or Insurance Commissioner. We have provided, what we hope, is sufficient information for policymakers and stakeholders to start charting a path forward toward lowering health insurance premiums, lowering overall health care costs, and providing better population health for North Dakotans. Below you will find 15 policy alternatives in five themes, as shown below**.**

Important Disclosures – Horizon Government Affairs represents clients and coalition members who provide real-time benefit and pricing information for prescription drugs and who provide telehealth services; expansion of both services is recommended below. JWHammer LLC has clients that could potentially offer services to North Dakota under these recommendations. Additional disclosures are noted in the footnote.[34]

Utilization and Care Management. Health care policy analysts have long touted the potential for wellness and preventive care to help Americans avoid disease. But gaps in coverage remain for many individuals managing a chronic health condition or conditions. While preventive care is provided at no cost on almost all health plans, those managing chronic medical conditions may have significant medical expenses. For example, a colonoscopy for someone who is 50 and healthy will be provided at no cost, but for an individual with ulcerative colitis they may be facing up to a $5,500 bill in North Dakota, if they have not yet met their deductible. But in some cases, chronic care management may be one area with the greatest return on investment. Medication and diet adherence for a diabetic, for example, leads to a longer, healthier life. For an insurer, it means fewer expensive complications.

Consumers with chronic medical conditions should be incentivized to manage their own care. It is well known that medication nonadherence and the related hospital admissions and emergency department visits are a significant cost driver of health care costs, particularly under fee-for-service insurance arrangements. For example, a comprehensive population study of Medicare beneficiaries in the fee-for-service program with diabetes, heart failure, hypertension, or hyperlipidemia found that avoidable healthcare costs due to medication nonadherence totaled nearly $30 billion.[35] Aligning the interests of the insurer, consumer and medical provider are key to this effort. North Dakota should (1) mitigate risk, (2) analyze and deploy a medication adherence and disease management strategy of investing targeted resources in the comorbid populations (two or more disease states and six or more medications), and (3) re-evaluate pricing structures. These efforts will lead to a measurable return on investment and measurably better health outcomes for North Dakotans.

1. **ACA Benchmark Plan Revisions - Optimized Medication Plans:** The continued release of academic studies regarding medication nonadherence highlights the need to focus on medication adherence as the greatest cost driver to utilization. The Lloyd et. al. report cited above specifically identified medication nonadherence as costing "billions of . . .expenditures, millions in hospital days and thousands of emergency department visits, that could have been avoided." She further goes on to state that "medication is a cornerstone of disease management. . . However, adherence to medications for most chronic conditions remains suboptimal – an

[35] Lloyd JT, Maresh S, Powers CA, Shrank WH, Alley DE. How Much Does Medication Nonadherence Cost the Medicare Fee-for-Service Program?. Med Care. 2019;57(3):218-224. doi:10.1097/MLR.0000000000001067

important gap in care that represents a ***major opportunity for cost savings and health improvement*** for the 150 million American adults, 60% of the population, living with a chronic illness." (*emphasis added).* The estimated annual cost of prescription drug-related morbidity and mortality resulting from nonoptimized medication therapy has ranged as high as $528.4 billion in 2016 US dollars.[36] If addressed appropriately, the state can reasonably expect to see lower hospital-related utilization and substantial cost savings. The state would be the first in the nation to seriously address this issue if it was implemented across all payers.

Implementation:
Insurers. In the individual and small group market, North Dakota should consider revising their ACA Benchmark Plan to include a robust "medication optimization program" as a new mandate AND specifically enumerate that home delivery or mail order dose-packaged medication are proactively offered though the ACA-qualified health plans or QHPs. The medication optimization program would allow consumers to have a comprehensive review of all their prescription drugs to assure that the consumer is on the correct dosages the correct medication and to review any unfavorable drug interactions.

CMS has indicated that once approval is received for essential health benefit changes, there is a presumption that the "generosity test" has been met. The new "mandate" is then an EHB (essential health benefit), which indicates that it is not a "mandate". After passage of the ACA, new mandates require cost defrayal by the state. This is the only vehicle to expand coverage for North Dakotans purchasing health insurance in the individual market, without financial obligation by the state. Once the Benchmark Plan includes the new mandate, insurers will reap a 3:1 ROI and North Dakota consumers will see lower premiums and increased health.

Additionally, the state should work with CMS to ensure medication optimization is treated as a preventive health service. This will ensure that access is affordable, and that plans – especially high deductible plans – can cover the service without requiring a deductible be met.

Action Item: File Revised Benchmark Plan for Individual Market
Time to Completion: 12-24 months

2. **Private Insurance (Group) Mandate - Optimized Medication Plans:** Similar to the ACA Benchmark Plan revisions discussed above, North Dakota could pass legislation requiring all small and large group, including non-ACA plans, to offer an optimization program.

Insurers. North Dakota should require the same mandate for inclusion of "clinical pharmacist driven medication optimization coupled with dose-packaged

[36] https://www.pharmacytimes.com/contributor/timothy-aungst-pharmd/2018/06/does-nonadherence-really-cost-the-health-care-system-300-billion-annually; and Watanabe JH, Mcinnis T, Hirsch JD. Cost of prescription drug-related morbidity and mortality. Ann Pharmacother. 2018;1060028018765159. doi: 10.1177/1060028018765159.

medication" by all small and large group plans as well. According to one source, "[t]he data from the delivery of this service are positive, with a demonstrated ROI as high as 12:1 with an average of 3:1–5:1. ROI reflects an ability to decrease hospital admissions, physician visits, and emergency department admissions and reduce the use of unnecessary and inappropriate medications."[37] There is no reason insurers shouldn't be deploying these resources to the comorbid populations. Prior to passage of a requirement, the insurance department could issue a bulletin requiring all insurers to address medication adherence and medication optimization in their plan filings.

State Government. North Dakota should also consider revising their state employee benefits to include a robust "medication optimization program" as a new inclusion in the plans offered to state employees. A well-designed, clinical pharmacist-led medication optimization plan and follow-up can reduce total medical cost by a third. In subsequent years, the state would reap the benefits of a state employee population that is using fewer sick days and driving down health care costs, which drive premiums.

Action Item: Legislation or Commissioner Bulletin to implement the mandate. Revise the fully insured employee benefit plan or bargain through negotiations AND pass legislation or issue a Bulletin for the non-Erisa group market

Time to Completion: 18-24 months for passage and implementation of optimization requirements. Less than 12 months to issue bulletin, and receive reports.

Medical Community. Medication optimization should become a priority in the medical community. Hospital systems, physicians, and pharmacists should routinely discuss medication optimization with their patients. Patients with multiple conditions should regularly have their medication reviewed in order to ensure patient compliance, drug interactions, and changing medical history. Medical and pharmacy schools should develop courses to educate medical providers on medication optimization.

Action Item: Legislation to require North Dakota Pharmacy and Medical School to offer medication optimization courses. Hospital systems and pharmacies should be encouraged to require their employees to routinely discuss the issue with their patients.

Time to Completion: 18-24 months for passage and creation of courses. Less than 12 months to issue guidance to medical providers.

3. **Integrated Health Homes:** Our health system has become increasingly byzantine in its complexity and a consumer's ability to manage their own health care. In most cases requiring treatment of acute care conditions, this administrative difficulty

[37] https://www.accp.com/docs/positions/misc/CMM%20Brief.pdf

does not lead to significantly poorer health outcomes. For the chronically ill, the issue is very different.

The chronically ill face many issues. Many have a number of medical issues, and these co-morbidities mean that managing the conditions separately creates problems. Multiple medications mean managing potential adverse drug interactions. The issue is even more severe for consumers with rarer medical conditions whose interactions may not be understood by most medical providers.

CMS has approved integrated health homes that have a component of medication adherence. This provides a sizable match to the state if efficacy is shown. The Medicaid population needs to be engaged in the process for outcomes to improve. Success means not only a lower budget line item, but better health for Medicaid recipients. If health has been an impediment for maintaining a job (as it sometimes is), it also means the potential for a better life.

One of the policy solutions is to create integrated health homes that will work systemically with the chronically ill Medicaid population to develop a medication regimen that is error and contraindication free, and then support the patients to adherence. The most effective model is to include a clinical pharmacist team. North Dakota should look at a narrower Illinois integrated health homes (IHH) model (which was developed based upon the Oklahoma model). It is a model of engagement and adherence to behavioral/physical health and medication regimens. Most importantly, quality metrics can be set, such as reduction of ED visits, claims etc. for the IHHs. The state should procure a vendor to assist in crafting a medication adherence program through the IHH model. The program should include collection of data to verify that Medicaid recipients are filling needed prescriptions, follow-up to ensure prescriptions are taken appropriately, and a review of all medications for the most chronically ill to ensure the prescriptions are in the right amount and if more than one that there are no negative interactions. If the program works correctly, it could ensure that Medicaid patients have fewer increases in severity for their chronic illness, and in some cases may allow ill patients to recover enough to re-join the workforce.

Implementation: The state should file a State Plan Amendment (SPA) with the federal government to seek 90%/10% match funds for an eight-quarter program to provide medication optimization services. In addition to medication optimization, the integrated health homes should connect Medicaid beneficiaries with social services and accountability services with their current providers. North Dakota should reference Illinois or Oklahoma's integrated health home models for reference. North Dakota should also procure an integrated health home project manager or director.

Action Item: State Plan Amendment & Approp Funding to Medicaid Dept
Time to Completion: 18-48 months

4. **Strict Managed Care/Value-based Benefit Design.** The state should encourage the use of value-based design in the state employee health plan and consider providing incentives for adherence. In addition, the state should consider hiring a vendor to assist state workers in managing their prescriptions and helping with adherence. In the long run, the program should reduce claims, and lead to a healthier workforce with less absenteeism.

   The State of North Dakota originally passed Medicaid expansion in 2013, providing coverage to residents up to 138% of poverty. The program is administered by Sanford Health Plan which won the RFP to administer the program. Despite lower than expected enrollment, the costs have been significantly higher than expected.

   The program created a two-tiered system. Those under 100% of poverty receive a traditional Medicaid managed care program. Those over 100% of poverty receive a program that pays commercial rates to medical providers.

   While strongly supported by the hospitals, there have been some significant concerns raised about the program. It requires Medicaid to run two separate programs which increases administrative costs. By splitting the pool, it makes it more difficult to manage the underlying claims costs both by making each pool less credible (since they are both small pools) and ensuring the larger pool is potentially attractive to managed care organizations. The differing benefit levels also create a sense of unfairness – it is hard to defend providing better benefits to those making more money.

   Two options exist:

   Limit Medicaid expansion to 100% of poverty. Currently North Dakota has expanded eligibility to Medicaid to 138% of poverty. However, the Affordable Care Act provides subsidies to all individuals over 100% of poverty.

   By limiting expansion to 100% of poverty, North Dakota would still be providing coverage to everyone in poverty, but allowing those over 100% of poverty to enroll in private market health insurance. For those enrolling in the exchange between 100% -138% of poverty it is very likely that in addition to enhanced cost sharing in silver plans, the consumers would be eligible to enroll in a bronze plan at no cost.[38]

   However, the savings to North Dakota is limited. The expansion population is effectively covered at less than 90 percent federal matching rate, which means $1 million savings to North Dakota requires more than $10 million in cuts.

   Re-form Medicaid expansion as a single combined pool in an exclusively managed care model. The importance of a medical home is highlighted above,

[38] https://www.kff.org/private-insurance/issue-brief/how-many-of-the-uninsured-can-purchase-a-marketplace-plan-for-free-in-2020/

but several states have begun using a similar managed care model in Medicaid. The idea is to eliminate a fee-for-service program in its entirety and require insurers to fully manage the health of Medicaid recipients. For some areas, a managed care program has led to extensive efforts to investigate social determinants of health, such as addressing food deserts or transportation limitations among patients.

This proposal could also require the Medicaid population to adjust to considerable changes with new requirements, and new provider networks. But the program could be offered to all Medicaid enrollees making it simpler to understand.

Implementation: The proposed program will require significant changes. By creating a single Medicaid program, the agency will be able to better manage care, offer better contracts to quality providers, and have economies of that do not come from divided pools. It also creates a more equitable program by treating all Medicaid recipients the same – regardless of income. This includes better use of value-based design inside Medicaid. The current program has a 90 percent federal match, which means state savings will be less.

Value based benefit design isn't just about waiving co-pays or deductibles. It is about determining the services that provide the best value and provide consumers with better health outcomes at lower overall costs. For example, a benefit design that ensures diabetics can afford the right dose of insulin and regards high value care will find that the cost of their diabetic population will fall.

***State Government*.** This is an area in which the state can lead. North Dakota state employees typically work with the state for a long period of time and are a large stable population. Implementing value-based design will allow the state employee health plan to assist state employee with managing their cost and care. The rewards for the state are not just in lower health care cost. If done correctly, it should also lead to a more productive, healthier workforce. For North Dakota employers and insurers, the state's leadership can provide concrete examples for success.

***Medicaid*.** Combining Medicaid into a single pool just makes logical sense. There will be resistance because of the loss of some federal revenue, but the program will be easier and less costly to manage, be fair for all recipients, and by pooling the risks together make it easier for Medicaid recipients. The Medicaid program can still use its limited levers to encourage the use of high value services. For example, one option would be removing fee-for-service as an option and requiring Medicaid recipients to receive care through an MCO with a required medical home. A number of states have used the MCO model to improve the costs in the program over time. However, with a small population, a strong rural component and a significant Native American population, the population may be too diverse to successfully implement a full managed care model statewide. Therefore, Medicaid could attempt to break the state into sections and try to attract MCOs to bid for care of local populations.

***Insurers*.** Insurers have begun to experiment with value-based design. However, in the highly regulated individual and small group markets, the rules are more complicated. State mandated benefits may favor low-value care or require lower cost sharing for some low value services. There is also a balancing act between providing additional incentives for high value care and concern that insurers are creating discriminatory benefit designs.

Action Item: Legislation, Major project planning across multiple state agencies
Time to Completion: 12-48 months

Prices, Coverage, and Insurance Initiatives. The following sections address pricing reforms that have the potential to restrain the ever-upward push of commercial rates, improve coverage for tele-health services, and consider an alternative method of providing reinsurance coverage. The rate cap policy is explained in more detail by researchers from RAND, who offer it as a less disruptive alternative to broader rate setting or public option proposals.[39] Preliminary estimates of the potential savings are shown below in the cost estimates section.

5. **Caps on Out of Network Rates for Private Coverage and the Uninsured.** Medicare's payment rates are commonly used as a benchmark for insurers. As shown above, commercial payment rates relative to Medicare have been rising in North Dakota. This policy would effectively stem the ever-upward drift of commercial payment rates relative to those paid by Medicare by limiting the amounts payable to out-of-network health care providers to a percentage of Medicare rates.
This policy would not directly affect rates for in-network providers. However, it would put downward pressure on in-network rates over time. If insurers would otherwise face in-network rates higher than the cap, they could switch the provider to out-of-network status and pay a lower amount. (Of course, there are other benefits to in-network status, such as data disclosures and quality measures, so some insurers may have an incentive to pay in-network providers more than the out-of-network cap in order to retain high-quality providers in their networks.)

   Setting the initial rate cap quite high, such as at 220 percent of Medicare, would not severely disrupt provider payments. (For context, we estimate that state average was 207 percent in 2018 (see Table 9 above) and we estimate that the statewide average would be about 220 by 2021, when the policy would take effect. If applied at the provider level, setting an out-of-network rate cap may also have a positive effect on surprise billing by limiting rates charged by out-of-network providers operating in a hospital setting. As we suggest below under the transparency section, we recommend that the state monitor prices regularly and issue regular reports.

   Implementation:
   ***State Government*.** Setting a rate cap for out-of-network services could allow the state employee plan (NDPERS) to bid for lower-cost coverage, by letting the state

[39] Erin Lindsey Duffy, Christopher Whaley, Chapin White, *The Price and Spending Impacts of Limits on Payments to Hospitals for Out-of-Network Care*, RAND (March 20,2020)
https://www.rand.org/pubs/research_reports/RR4378.html

offer coverage without any required network. Because the state would have access to detailed data about claims patterns and trends, it would allow a direct way to monitor the impact of the cap on premiums and healthcare providers in various parts of the state.

***Private Insurance Market*.** Rate caps are intended to help new insurers enter markets and create networks. Likewise, policymakers can use rate caps to ensure competitive rates even in areas without a competitive market for providers. Therefore, rate caps, could be viewed as alternative to more rigid price setting regulations when competitive outcomes are difficult to achieve. The ACA's network adequacy rules can make hospital negotiations difficult. Setting maximum hospital rates provides a benchmark for negotiations with insurers. If done right, it could lower the barrier to entry for insurers to compete in the North Dakota health insurance market currently dominated by one insurer.

Action Item: Legislation with set benchmarks.
Time to Completion: 12 months with implementation.

6. **Telehealth:** If structured properly, telehealth services may increase access to needed care while also controlling costs. In a rural state like North Dakota, telehealth can provide the opportunity to access medical specialists without time consuming travel. For those with mental health issues, telehealth can be an important lifeline. With more frequent visits and early interventions available, telehealth can help avoid costly delays in care (such as undiagnosed conditions that become worse with time) and, in situations where an in-person visit may not be required, virtual encounters may be priced at a lower rate than in-person care (if there is no state mandate requiring payment parity).

   For North Dakota, proper utilization of telehealth could have an overwhelming impact considering the 6,000+ percent increase in telehealth visits in the midwestern U.S. between April 2019 and April 2020.[40] Consumers are increasingly becoming accustomed to telehealth, but the current increase in availability of telehealth services is largely based on temporary regulatory waivers.

   Implementation:
   ***State Government & Insurers*.** There are a number of issues that states should examine to create a permanent infrastructure that supports widespread adoption and utilization of telehealth:

   Licensure. Many states have significant licensing barriers that control providers' ability to use telehealth. Provider licensing boards should be encouraged to embrace telehealth, allowing providers to establish relationships remotely as long as necessary conditions are met and the standard of care is upheld. State boards should consider the interstate compacts available (e.g., FSMB and

[40] https://www.fairhealth.org/states-by-the-numbers/telehealth

NCSBN compacts, among others), as well as other flexibilities that may enhance providers ability to practice telemedicine.

Payment. Currently, many states are mandating that telehealth providers be paid on par for the same services. These requirements, often referred to as "payment parity" or "reimbursement parity" laws effectively drive up the price insurers are required to pay by limiting their ability to freely contract for services. These laws stifle competition by not allowing insurers and providers to set different rates based on the delivery of service.

Software. Consumers and medical providers should be allowed to agree on the use of any software service. States shouldn't pick winner and losers.

Scope of practice. The pandemic has allowed many new types of service to be delivered by telehealth. States should look closely at their telehealth practice requirements and permanently modernize the statutes.

Insurance. States should create a legal framework that would allow businesses and consumers to purchase an insurance product providing telehealth services.

Action Item: Legislative and regulatory study, legislation.

Time to Completion: 6-18 months

7. **Private Reinsurance:** The Governor signed HB 1106 enabling North Dakota's Reinsurance Association of North Dakota (RAND) to implement a non-private reinsurance program to reduce healthcare costs for individual taxpayers participating in the State's healthcare marketplace. To supplement the cost-saving efforts of the 1332 waiver program, the State should evaluate purchasing private reinsurance to further reduce costs for individual taxpayers participating in the State's healthcare marketplace. Private reinsurance can assist driving down/stabilizing rates and preventing spikes providing consistency for taxpayers/users. For example, Aon, a private reinsurer, has proposed such a system, which is shown in Appendix E.

   Using reinsurance to transfer the budgetary/program volatility, creates immediate opportunities for the State of North Dakota including:
   - Transferring volatility away from the existing RAND program into the private market
   - Reducing the future "known, unknowns", thereby allowing greater funding flexibility with the safety and security of knowing that protection is in place in the event of a higher-than-normal claims year
   - Providing stability in rates from payers as a pre-arranged amount of funding is known
   - Predictable cash flows for insurers and the state as there is no need, once coverage is purchased, to adjust the reimbursement levels to carriers based on higher-than-expected claim numbers and amounts

- Adjudication and claims processing is handled by the reinsurer, removing some of the operations of running the program in house

In addition, given the current Covid-19 health crisis there is likely to be further pressure on the individual health market. According to a recent Kaiser Family Foundation report, "It is likely that the most significant impacts of the coronavirus outbreak and economic crisis on the individual market will not be evident nationally until data from the second and third quarters of 2020 become available." These solutions can help mitigate impacts stemming from the global pandemic.

Action Item: Legislation & Outside Resources for Data and Reinsurance Management
Time to Completion: 6-18 months

Transparency. Too often, price transparency is seen as a panacea to our health system and blame for our opaque pricing system is assigned to hospitals, insurance companies, government policy, consumer disinterest, and an overly complicated health care system. The truth is, there is more than enough blame to go around.

The most important issue to understand about price transparency is that it is a means to an end. Transparency is necessary to encourage competition. Competition stimulates innovation – lower prices and better quality. Competition is the ultimate consumer protection because it allows a consumer to walk away from a transaction to find a better partner. Without competition, the alternative to competition is and should be, increased government oversight. When entities act like a monopoly, it may be necessary for government to regulate it like a monopoly.

The Trump administration had a number of initiatives that if implemented will significantly increase transparency for patients. These include availability of hospital and insurer information on pricing. The recent Covid-19 legislation also requires new disclosures which will help many patients with one of the biggest problems, surprise billing. While these changes are an important first step, we believe North Dakota can build on the approach to ensure consumers have access to the information they need before receiving care.

8. **Direct to Consumer Pricing: Disclosure of Consumer Prices.** We used a secret shopper to compare prices at several hospitals in North Dakota for three common procedures: colonoscopy, normal vaginal delivery, and caesarian section (see Table 60). What we found was drastically different estimates. For colonoscopy, the prices quoted ranged from a high of $5,509 to a low of $1,775, a difference of more than 300 percent. For vaginal childbirth, the range from highest quoted price to lowest was nearly 350 percent, and for delivery by Caesarian Section, prices ranged from about $5,000 to more than $31,000, a difference of more than 600 percent.

Table 60.

Hospital-Reported Prices for Selected Common Procedures

	Colonoscopy	Normal Vaginal Delivery	Caesarian Section
Trinity Hospital - St.Josephs (Minot)	2,980	4,343	5,058
St.Alexius Medical Center (Bismarck)	1,775	4,895	9,675
Sanford Medical Center (Fargo)	3,843	15,056	22,376
Sanford Medical Center (Bismarck)	5,509	13,603	20,386
Altru Health System (Grand Forks)	2,064	12,239	19,269
Jamestown Regional Medical Center	2,100	13,000	25,000
Innovis Health (Fargo)	4,700	11,000	31,000
Ratio of Highest to Lowest (Percent)	**310%**	**347%**	**613%**

Source: JWHammer LLC.

In general, consumer-facing price disclosures by hospitals are too complicated or obscure to be useful, particularly if the prices disclosed are full charges or so-called "chargemaster" amounts or if the price quotes are based on discrete (often obscure) technical codes instead of commonly known procedures, such as hip replacement or appendectomy. These amounts often have little resemblance to actual reimbursements by insurers. In order for a price disclosure to be useful to a consumer, it must meet certain criteria:

1. The disclosure must be **actionable**. Disclosures that are delivered at the time of service don't allow the consumer to shop.
2. The disclosure must be **personal**. General pricing disclosures don't reflect the likely costs based on the consumer's insurance plan or other service variables. This may mean that the referring or treating physician be required to provide billing codes.
3. The disclosure must be **understandable**. The consumer needs to understand what is covered by the price disclosure. Since most hospital-based physicians bills separately, the consumer should be made aware of other possible bills that may accompany the disclosed amount.

Implementation:

Hospital and Clinics. Rather than disclosing chargemaster amounts or prices based on inscrutable procedure costs, we recommend that hospitals and other large health care providers, including clinics and outpatient surgery centers, ***disclose their prices to uninsured patients as a function of Medicare rates***. For example, a hospital could simply state that its walk-up rates for patients without insurance were "100% of Medicare rates" or "200% of Medicare" or whatever amount they wished to charge. However, patients could then shop based on one number, a simple percentage, and could be confident that they would only be charged what Medicare would pay plus the stated markup. Note, that we would not require providers to disclose their reimbursement rates with insurers, which could be higher or lower than the function of Medicare rates quoted to uninsured patients. However, it is clear that insured patients with high

deductibles might not be happy if their carrier's negotiated rates were higher than the walk-up rates charged to the uninsured. This dynamic would help drive intramarket competition and prices down over time.

Action Item: Legislation
Time to Completion: 12 months

State Government. We recommend that the state health or insurance departments publish and ***publicize lists of Medicare rates for common bundles of services, starting with the most common procedures that patients may face, such as childbirth, knee or hip replacement***, and so on. For example, consumers with a choice of hospital could look at the hospitals stated rates relative to Medicare, and then compute their costs based on the Medicare reimbursement rates. For example, if the state's analysis of certain procedure showed an average Medicare reimbursement rate of $1,000, a patient would have a better idea what to expect in absolute costs from a hospital that charged 150 percent of Medicare ($1,500) vs. one that charged 200 percent of Medicare ($2,000).

Another recommendation is that the state ***operate a price disclosure website***, similar to the website offered by the Wisconsin Hospital Association (https://www.wipricepoint.org/Home.aspx) The website allows consumers to shop prices at any time and uses a series of questions to drill down on the procedure and the consumer's insurance coverage. The Wisconsin website uses chargemaster prices – in line with our recommendations above, we would ideally recommend that an analogous North Dakota use prices for the uninsured based on a stated percentage of Medicare rates.
Action Item: Internal Project Plans
Time to Completion: 12-24 Months

Insurers. Consumers will be unable to meaningfully shop until real-time benefit tools become more widely available. We encourage North Dakota policymakers to ***require the state's health plans to expand their out-of-pocket calculators to include real-time benefit information***, so that patients would know exactly where they stand on their deductibles and could assess their out-of-pocket costs while still at the doctor's office, pharmacy, or hospital. Real-time benefit tools are especially important for consumer and medical providers evaluating their prescription drug options including cash payment prices. We recommend that state law and insurance regulations clarify that health plans would be allowed to give patients financial rewards for using real-time out-of-pocket benefit calculators. We acknowledge that providing real-time cost calculators can be particularly difficult in cases where providers are not in insurers' networks, and estimated payments on unadjudicated claims from out-of-network providers may be more difficult to estimate in advance. This work is hard and complex, but it is also necessary in an era where most patients have substantial deductibles. In summary, insurers should have a similar

responsibility as providers for educating consumers on their possible costs, what their insurance will cover, and reviewing options that will help save the consumer money.

Action Item: Bulletin or Legislation
Time to Completion: 6-12 months

9. **Public Policy Price Disclosures:** Another key element of transparency is disclosure to taxpayers and state policymakers. Most health care providers benefit from tax advantages, municipal bond funding for construction, and receive direct subsidies and reimbursements from federal, state, and local governments. They are essentially public/private entities, and it is certainly in the public's interest to balance private-led innovation against public health and financial responsibilities. In general, we do not recommend all-payer claims databases (APCDs) for North Dakota. For one, with such a dominant insurer, the price and reimbursement data in those databases could be very sensitive. But even more importantly, we believe that states that have mandated APCDs have produced relatively little actionable information relative to the investment.

   Implementation:

   State Government*.** We recommend that ***North Dakota staff a position (or otherwise contract for) dedicated to tracking the state's health care costs, using data collected from insurers, hospitals, and other health care providers. Best case scenario would require a continuous transmission of information similar to the data compiled in this report. The data could be gathered from providers and insurers in the same formats as disclosures those entities already make to the AHA and the NAIC. Further, it could be supplemented or cross-checked against publicly available data. The state's providers and insurers would be required to provide to the Insurance Commissioner. Legislative action may be required to continue to require providers to supply same.

   Action Item: Internal Project Plan & Legislation
   Time to Completion: 6 months

10. **Right to Shop:** As highlighted above, there is significant cost variation for common procedures across North Dakota providers. Consumers often are referred by the medical provider to the most convenient care delivery center – often the local hospital. There may be cheaper alternatives with equal or even better quality outcomes, especially for services like colonoscopies or MRIs. Right to Shop legislation would allow insurers to make a cash payment back to a consumer when the consumer has shopped for and chosen a less expensive option.

    For consumers there is a trade-off. In some cases, the less expensive service may require some travel or other care coordination. However, many find the cash payment incentive enough to spend the time and energy finding the best quality

and cost-effective treatment. New Hampshire implemented the program in their state employee program and has saved an estimated $11 million in 3 years[41].

Implementation:

Insurers. A number of states have passed "Right to Shop" legislation. Insurers should be allowed the option of encouraging consumer shopping by providing direct consumer incentives.

***State Government*.** The New Hampshire program for state employees appears to have been a success. The state of North Dakota could consider a similar program in an effort to lead on the issue and provide data to the private industry.

Action Item: Legislation
Time to Completion: 6-12 months

Program Integrity. State governments are often the largest purchasers of health care in any given state. The state provides health care coverage to both its state employees and those on Medicaid. This provides an opportunity for the state to lead on a number of health care issues, help change the dynamics for the private market, and to provide data on success or failure. But there are landmines for the state to consider. Often, those eligible to be covered under state programs may also be eligible for other coverage, leading to confusion on the correct payer. Poorly designed state-run benefit programs can replace existing private dollars, leading to private market crowd-out and an inefficient use of taxpayer dollars. In implementing benefit programs, North Dakota should endeavor to cover only those intended to be eligible for the program.

Program integrity does just that. Program Integrity focuses on ensuring that consumers have coverage for their health needs from the correct payer and is an important tool to maximize taxpayer resources. Program integrity issues are almost unavoidable without a consistent outside focus. Whether it is mission creep, shifting priorities or just loss of focus, states stray away from dedicating time and resources to program integrity. Program integrity can provide quick and consistent wins. Through the use of risk-based contracts, states have the option to outsource program integrity initiatives. Because private companies do not get paid unless there are recoveries, there is very little downside to the state.

Market-wide, it is imperative that consumers are covered by the correct payer. Program integrity issues exist in Medicaid, the commercial market and the state group health population. For example, we understand that Pennsylvania is currently addressing their state employee population, and we believe a majority of Fortune 100 companies have done this for their employees. This is the perfect opportunity for high utilizers to be transitioned to the correct payer, rather than the state. Any savings accrued in the state employee health plan and

[41] Josh Archambault and Nic Horton. Right To Shop: The Next Big Thing In Health Care. Forbes. Aug 5, 2016. Available from: https://www.forbes.com/sites/theapothecary/2016/08/05/right-to-shop-the-next-big-thing-in-health-care/#31bda24b4f60.

Medicaid could result in a substantial return back to the state. Savings in the commercial population would drive down health insurance rates for all private consumers.

11. **Medicaid Integrity Audit:** When a consumer receives financial assistance, North Dakota law allows for full assignment of benefits with no time limit.[42] It is important for the state to periodically audit Medicaid enrollees receiving benefits for other options to receive benefits. In some cases, children may be eligible for coverage under a non-custodial parent. Some recipients have opted out of their employer coverage. In other cases, the care received was reimbursed as part of another lawsuit. Contingency fee contracts provide vendors the opportunity to find savings for the state. The state also has an opportunity to build program integrity requirements into the RFP for the Medicaid expansion.
    Action Item: Legislation and completion of an RFP process.
    Time to Completion: 12-18 months

12. **State Group Health Integrity Audit:** North Dakota's health insurance benefits are generous and encourage full family coverage. However, State employees and their families may be covered by a variety of health insurance plans including private health insurance coverage, Medicare, and rarely Medicaid. North Dakota could consider a similar audit and consider what – if any – ongoing procedural changes are necessary to ensure program integrity.
    Action Item:
    Time to Completion:

13. **State Group Health Waiver**: The state currently provides no-cost health insurance to state employees and their families.[43] In some cases, the employee may also be covered under their spouse's plan. The offer of "free" health insurance can and does lead to double coverage. One option is to provide a small bonus to state employees who choose to opt entirely out of coverage. It provides an option to avoid double coverage, provides the employee an additional benefit, and reduces costs**.**
    Action Item: Legislation
    Time to Completion: Less than 12 months**.**

14. **Coordination of Benefits:** Coordination of Benefits rules in health insurance clarify which insurer is responsible to pay for certain benefits. The rules work entirely automatically and are a great example of program integrity. The NAIC adopted changes to the model coordination of benefits rule in 2013 but North Dakota's rule dates to 2006. North Dakota should consider the merits of updating the rule.
    Action Item: Updated Regulation.
    Time to Completion: 12 months**.**

---

[42] https://www.legis.nd.gov/information/acdata/pdf/75-02-02.1.pdf

[43] https://www.ndhealth.gov/HumanResources/Benefits.htm#:~:text=The%20State%20of%20North%20Dakota%20offers%20state%20employees,medical%20and%20child%20care%20expenses%29%20Employee%20Assistance%20Program.

Employer Coverage. The focus on insurance costs at the state and national level has primarily been on individual market ACA coverage which is a small percentage of the population. The vast majority of consumers receive coverage through their employer. As employer coverage continues to erode because of rising costs, states need to find new solutions to help employers.

15. **Study Combined Individual and Small Group Market :** Most states have an unstable individual market, but North Dakota appears to be in good shape. A number of states have combined their individual and small group markets to make it easier for small employers to offer coverage. For example, employers offering coverage in the District of Columbia Exchange set their subsidy level (an amount or plan level) and the employee chooses coverage. It provides administrative simplicity for the small employer and choice of benefits for the employee.

    Implementation:

    State: A one-year study would need to be completed with all stakeholders including insurers, employers, agents, and others. The study would have to consider the impact on the individual and small group markets separately and together.

    Action Item: Legislation
    Time to Completion: 12-24 months

Crisis & Pandemic Planning. It seems clear that some hospitals and insurers nationally were caught flat-footed by the pandemic. However, the Covid-19 crisis shouldn't have been complete surprise, based on our experience with numerous prior pandemics. Based on our preliminary analysis, the effects on North Dakota hospitals haven't been as dramatic as in harder-hit states. But this pandemic is not yet over.

16. **Risk Assessments:**
    Insurer Own Risk Solvency Assessment. Domestic insurers are required to file a highly confidential report that details the risks to their solvency called the Own Risk Solvency Assessment or ORSA. This board level report is expected to detail all of the potential risks facing an insurer. One option for future pandemic planning is to recommend that health insurers include discussions of pandemic risks.

    Implementation:

    Insurers: ORSA reports are required to be filed with insurers domiciled in the state. It is likely most insurers will include pandemic issues in their ORSA reports in the immediate aftermath of this pandemic. The important issue will be maintaining pandemic planning in the coming years. The insurance department should add the issue in their ORSA reviews and in any 5-year financial exams.

    Action Item: Insurance Department Bulletin
    Time to Completion: 24-36 months

Hospital Own Risk Assessment. Hospitals and hospital systems have been forced to lead throughout this pandemic. In many ways, hospitals have become the main point of contact for public health initiatives. Nationally, it has been clear that public health officials have needed to develop new reporting mechanisms to understand the availability of hospital beds, ICU's, and important equipment. We hope and expect those efforts will be made permanent. But public health issues need more attention and planning, especially at the local level. We are suggesting that the state mandate that hospitals and hospital systems conduct their own version of a risk assessment. These critical reports should be reviewed at the board level. The analysis should be highly confidential, and should consider financial, health, and disaster issues that could negatively impact the hospital and public health in the community.

Implementation:

Hospital: Insurer required ORSA reports were developed to ensure all insurers – from the smallest town mutual to the largest multinational insurer – had a framework to critically evaluate all possible risks facing the insurer. The report must be reviewed by the insurer's board. We are proposing a similar structure here that would require an evaluation by the hospital and its board. Over time, this annual evaluation will impact hospital operations and will foster ongoing discussions regarding hospital's public health obligations.

Action Item: Legislation, legislative study.
Time to Completion: 18-36 months

VII. Cost and Impact Discussion

For some of the policy alternatives noted above we have prepared preliminary cost estimates and discussion. Based on initial feedback from state policymakers, we would refine or expand this analysis for the final report.

Historically, public and private efforts to contain health costs have followed recessions. This makes sense, because a large share of health costs is paid directly by governments, whose revenues are constrained during recessions, and indirectly (via private insurers) by employers and employees, whose profits and wages are also squeezed in bad times. After the recession of the early 1980s, Congress enacted the PPS program, which cut Medicare's hospital payments, particularly for extended stays. Following the recession of the early 1990s, managed care programs flourished with strong employer support, with the goal of restraining private health costs. After the Great Recession of 2008, the growth of Medicare fees was constrained via sequestration.

It may seem odd to discuss cost containment during a pandemic, when many health care providers are pushed to heroic limits. However, the pandemic won't last forever, and nuts and bolts discussions of the growth of health costs vs. affordability for government, employer, and consumer budgets will inevitably return to the spotlight.

Option: Cap Patients' and Insurers' Responsibility for Out-of-Network Charges. In March 2020, researchers at RAND published a report demonstrating the savings and impact of capping hospitals rates for out-of-network services.[44] Medicare's payment rates are commonly used as a benchmark for insurers. This policy would effectively stem the ever-upward drift of commercial payment rates relative to those paid by Medicare by limiting the amounts payable to out-of-network health care providers to a percentage of Medicare rates.

This policy would not directly affect rates for in-network providers. However, it would put downward pressure on in-network rates over time. If insurers would otherwise face in-network rates higher than the cap, they could switch the provider to out-of-network status and pay a lower amount. (Of course, there are other benefits to in-network status, such as data disclosures and quality measures, so some insurers may have an incentive to pay in-network providers more than the out-of-network cap in order to retain high-quality providers in their networks.)

We would view an out-of-network cap as potentially the least disruptive approach to limiting rates, compared with other policy alternatives such as public rate setting regime or public option alternative. We would recommend that the initial out-of-network rate cap be set quite high, such as at 220 percent of Medicare, so that provider payments would not be severely

[44] Erin Lindsey Duffy, Christopher Whaley, Chapin White, *The Price and Spending Impacts of Limits on Payments to Hospitals for Out-of-Network Care*, RAND (March 20,2020) https://www.rand.org/pubs/research_reports/RR4378.html

disrupted. For context, we estimate that state average was 207 percent in 2018 (see Table 9 above), and we estimate that the statewide average would be about 220 percent by 2021, when the policy would take effect. The cap could be held constant or gradually lowered over time to give healthcare providers time to adjust.

Table 61 below shows the potential impact for a flat cap that remained at 220 percent from 2021 through 2024. Claims would be reduced by $7 million in the individual market and $29 million in the large group (insured) market by 2024, and premiums would be lowered by 2-3%, by that year. In dollars, premiums would be lowered by $166-187 per year or about $15 per member per month by 2024.

Table 62 shows an option where the cap was gradually lowered from 220 percent in 2021 to 190 percent in 2024. Under this option, claims costs and premium reductions would be larger, with premiums falling by approximately $500 per year or about $40 PMPM by 2024.

Source: Horizon Government Affairs.
Note: Preliminary estimates, subject to change. PMPM = per member per month.

The large group market in these estimates only includes “insured” health plans under state regulation, not so-called “self-funded” coverage operating under the federal ERISA program. The estimates also do not include NDPERS coverage.

Under both options, there would be federal savings as well, in both the individual market due to reduced ACA subsidies, and in the group markets due to revenue impacts. (When premiums are reduced for group coverage, federal tax analysts estimate that tax revenues increase, due to dollars being shifted from non-taxable employee benefits to taxable wages and profits.)

It would be a longshot, but it would be possible that North Dakota could apply via an ACA Section 1332 waiver to recoup the federal savings, at least from reduced ACA subsidies in the Individual market. Such a waiver application might have a more likely chance of success under a possible Biden Administration, which would be moving toward capping rates (or setting them) as a percent of Medicare as general policy.

Option: Re-Pricing Payment Rates for the Medicaid Expansion Population.
Medicaid expansion in North Dakota pays healthcare providers at rates more typical for commercial payers than those usually used for Medicaid enrollees not part of the expansion program. This option illustrates the magnitude of possible savings from bringing those rates down to those used in the rest of North Dakota's Medicaid program.

We used two methods of approximating the estimate – one using per-capita costs, one using payment rate ratios. Each has advantages and disadvantages. A disadvantage to the per-capita method implicitly assumes that the expansion has the same morbidity profile as the regular Medicaid (non-institutionalized) population. The ratio method is limited by our lack of data on the ratios of hospital costs to the overall. Given the uncertainties, we show both methods as a range of possibilities.

Since the state share of costs for the Medicaid expansion population is very small, the savings from this proposal would mostly accrue to the federal government (see Table 63). We estimate a range of state savings from $5 to $8 million in 2021, growing to $6 to $9 million in 2024.

Note: Preliminary estimates, subject to change.

Option: Require Stricter Managed Care and Full Risk Health Plans in Medicaid. The Congressional Budget Office has issued two recent reports on potential savings from managed care in Medicare[45] and Medicaid.[46] To be fair, neither report directly specifies CBO's estimate of savings from tighter management of care by Medicaid or Medicare managed care organizations (MCOs). Nevertheless, we infer that the reports imply a potential savings of about 10 percent over time from the conversion of fee-for-service coverage to a strict managed care approach, and perhaps half of that potential savings from the conversion of loosely managed care to a

[45] Congressional Budget Office, A Premium Support System for Medicare: Updated Analysis of Illustrative Options (October 5, 2017) https://www.cbo.gov/publication/53077
[46] Congressional Budget Office, Exploring the Growth of Medicaid Managed Care (August 7, 2018) https://www.cbo.gov/publication/54235

stricter model.

We applied those potential savings amounts to North Dakota's Medicaid program, assuming the greater savings potential from the conversion of the non-expansion enrollee populations to strictly managed care, and the lesser savings from converting the current Medicaid expansion MCO to a stricter model. We assumed a phase-in period of five years, and that the additional administrative and implementation costs for the more tightly managed MCO model in Medicaid would add $10 million in costs per year for the non-expansion population and $5 million for the expansion population. We also assumed that those costs would be effectively eligible for federal matching at the usual rates.

Table 64 illustrates these potential costs (+) and savings (-), both for the Medicaid program as a whole in North Dakota and the state's share of those costs. We estimate that the net savings for North Dakota would be low at first, but would grow to about $25 million by the year 2024. Notably, by using overall savings estimates from Medicare bids and the experience of other state Medicaid managed care programs, we do not make explicit assumptions about exactly how these savings are achieved by MCOs. In theory, these savings estimates could be achieved by a variety of means, including improved Medicaid adherence, better access to primary care, and other methods.

Table 64.

Appendix B – Information from IRS Form 990s and Financial Statements/Prospectuses

We looked at both form 990s and other financial statements to cross-check our data. Note, this is not a complete analysis. However, here are some preliminary notes on the data gathering process from these sources:

- **Financial Statements:** We found a fair share of financial statements, but there will be several years that has no information for some hospitals as there was no publicly available documentation for those respective years. As discussed previously, for the hospitals that are doing business under the Catholic Health Initiatives, this section is left unfilled.

- **Schedule H:** For Schedule H, which provides information of hospitals' bad debt, financial assistance and community benefits, it appears that submission of this document began in FY2013. Thus, there will be no data entries for 2010-2012.

- **Municipal Revenue Bonds:** For this section, there is still work to do based on differences in issued prices reported in the Schedule K (990) and on the Electronic Municipal Market Access (EMMA) platform—next step includes understanding the differences in reporting requirements for both sources. Additionally, as in the case with Trinity, a revenue bond reported on the Schedule K couldn't be found on EMMA when entering the CUSIP# considering that it was a recently issued revenue bond. Moreover, some hospitals did not have Schedule K submissions and/or other type of revenue bond information, so this section will be unfilled for those hospitals. Further fact-checking is required for this section before deriving any conclusions.

- **Public Benefits:** We are studying public benefits and will add a section describing those and presenting data from hospitals in future progress reports. A section highlighting major hospitals' Financial Assistance Programs under IRS 501(r)(4) is included below.

Appendix D – Insurer Data Request

Table Mockup for North Dakota Insurance Data DRAFT

Please replace the NAIC statewide numbers 2010-2018 with data for your company's results in North Dakota. The statewide data are simply shown as an example -- please replace.
Please estimate 2019 and project data for 2020-2022 using current policy and your most likely scenario for regulation. Assume the HIT is repealed as per Dec. 2019 federal law.
We know 2019 claims won't be fully complete and 2019 full-year expenses may not be fully tabulated by Feb 6, 2020 due date -- please estimate full year best possible.
Please note there are three additional data fields that are not on the NAIC supplemental: Average deductible, total allowed claims, Medicaid managed care.
Please try to estimate total allowed claims and average deductibles using a consistent method across time. Zero deductibles count towa Estimated Projected ==>

For your Company Only (not statewide)

Calendar Years	2010	2014	2015	2016	2017	2018	2019	2020	2021	2022

Appendix E – Aon Private Reinsurance Proposal

Public Sector Partnership:

State Governments:

Financial solutions that transfer volatility away from the individual health market allowing for rate stability and taxpayer healthcare savings

Q4 2020

Opportunity Overview:

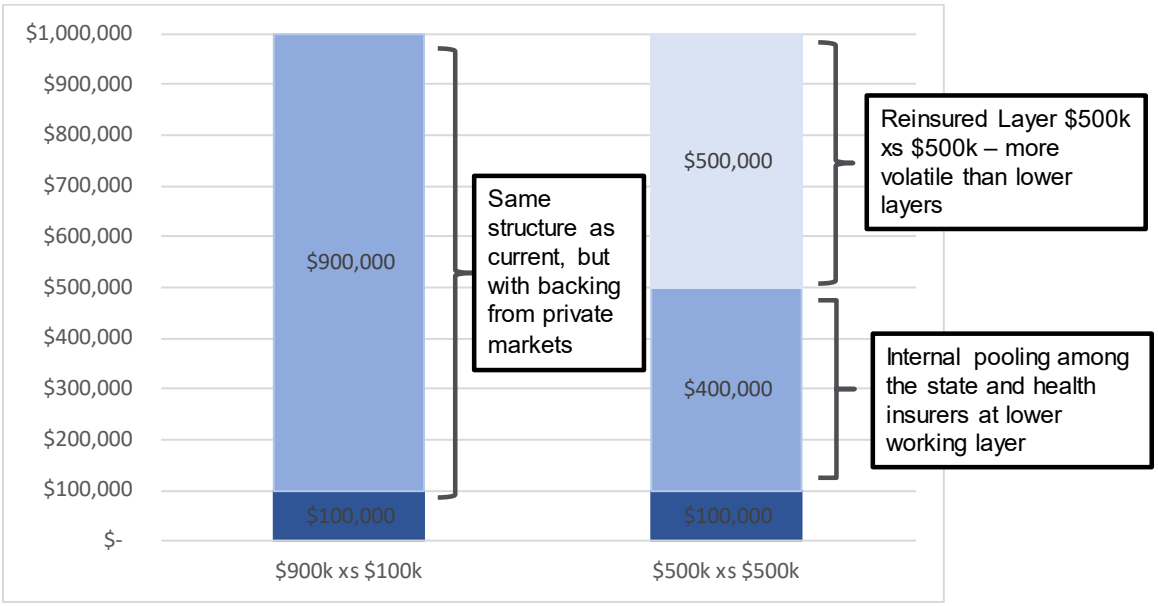
The Governor signed HB 1106 enabling North Dakota's Reinsurance Association of North Dakota (RAND) to implement a non-private reinsurance program to reduce healthcare costs for individual taxpayers participating in the State's healthcare marketplace. To supplement the cost-saving efforts of the 1332 waiver program, the State should evaluate purchasing private reinsurance to further reduce costs for individual taxpayers participating in the State's healthcare marketplace. Private reinsurance can assist driving down/stabilizing rates and preventing spikes providing consistency for taxpayers/users.

Using reinsurance to transfer the budgetary/program volatility, creates immediate opportunities for the State of North Dakota including:

- Transferring volatility away from the existing RAND program into the private market
- Reduces the future "known, unknowns", thereby allowing greater funding flexibility with the safety and security of knowing that protection is in place in the event of a higher than normal claims year
- Provides stability in rates from payers as a pre-arranged amount of funding is known
- Predictable cash flows for insurers and the state as there is no need, once coverage is purchased, to adjust the reimbursement levels to carriers based on higher than expected claim numbers and amounts
- Adjudication and claims processing is handled by the reinsurer, removing some of the operations of running the program in house

In addition, given the current Covid-19 health crisis there is likely to be further pressure on the individual health market. According to a recent Kaiser Family Foundation report, "…enrollment in the individual market was fairly steady from March to September 2020. In normal years, there is typically more attrition during these months as more people leave the market than come in during special enrollment periods (SEP). However, SEP enrollment was higher this year in healthcare.gov and state based exchanges." These solutions can help mitigate impacts stemming from the global pandemic.

The analysis that follows is based on 2017 RAND claims data provided by the State of North Dakota. The analysis can be updated based on more recent data, however the key points remain the same.



How would a private reinsurance program work?

The State of North Dakota in conjunction with RAND would purchase a transparent, reliable, and easily understood reinsurance policy that provides immediate recoveries based on predetermined attachment and exhaustion points.

When considering the existing Reinsurance Association of North Dakota (RAND) program, there are two main structural options to consider.

Excess of Loss

- Provides recoveries after a pre-determined amount of loss
- Smooths results in excess of pre-determined attachment point

Aggregate Stop Loss

- Provides recoveries after a pre-determined amount of loss in a defined/determined time period
- Coverage ensures the aggregation of numerous claims do not drain the financial reserves of the risk-bearer/entity

How much would this cost?

Aon modeled various scenarios using stochastic and deterministic models, we also used market data to derive pricing.

Aon used available data collected for the initial 1332 Waiver Process to illustrate a few structural and pricing options that would make sense given the current RAND structure. In evaluating solutions for North Dakota our overarching motivation is to maximize coverage, deliver fast payment, and provide clear benefit to the users of the RAND program.

Projected claims costs were derived from North Dakota's 2017 year. In order to secure pricing from the reinsurance markets, typically 3-5 years of data in required, however we believe this 12-month snapshot provides enough information to draw preliminary conclusions.

Pricing is provided on a 100% experience basis, and blended with national market data to provide more credibility to the block of business. It is illustrated on a per member per month basis.

Aon's analysis is based on following general market underwriting methodologies used across the reinsurance industry to develop a likely premium. Since North Dakota would be transferring the volatility to the market, the amount of money allocated to reinsurance claims in one particular year does not have to be as conservative as what may be traditionally allocated to a self-funded plan. Because RAND is a newly formed self-insured reinsurance program, it is not surprising that additional conservatism was included in the preliminary (NovaRest) actuarial analysis.

Claims Projections:

	75% Coinsurance	
Source	$900k xs $100k	$500k xs $500k
Nova Rest	$106.68	
Market	$67.27	$8.18
Aon - Deterministic	$58.53	$4.38
Aon - Stochastic	$58.82	$4.65

Pricing Options:

*XOL Pricing by layer	Premium
1. $900k xs $100k	$70.58
2. $500k xs $500k	$5.58
*Agg Pricing	
1. 110% of expected	$27.64
2. 120% of expected	$20.61
3. 130% of expected	$14.58

Key Takeaways:

- Based on the 2017 claims year costs there are indications that meaningful cost savings can be achieved by a private reinsurance purchase
- Claims costs can be shifted to the private market for less dollars than they are being funded for in the existing program, leaving additional funding to further stabilize rates and pay for the private purchase
- We can transfer claims to the private market for .65-.85 cents on the dollar (this is based on only one claims year and we would need 3-5 years to fully validate this with third party capital)
- The structures presented would provide more program certainty to payers allowing for greater flexibility in rate pricing
- While the premium payments for the State of North Dakota may be higher than the claims cost in some years, high claims years will counter balance the years where the state ends in a negative net position
- As an example, 1 in 20 years the reinsurer is projected to lose $20.57 per member per month, paying $1.30 to the state for every $1 the state pays in premium

Return Period (1 in X years)	**Losses (PMPM)**	**Reinsurer Position (PMPM)**
Average	$58.82	$11.76
5	$72.34	-$1.76
20	$91.14	-$20.57
40	$99.22	-$28.64

Considerations for Next Steps:

In order to procure formal pricing from the market, additional information is needed.

Reinsurance Parameters	Key Considerations
Data Required (last 3-5 years)	- Membership Data - Claims Triangles - Large Claim Loss Data - Plan Design Changes (Historical and Proposed)
Attachment Point	- Attachment points can allow for any corridor, both overlapping what is being offered or just covering a piece - To reduce total cost coinsurance can be included which will reduce the reimbursement by a percentage for each claim
How Much "Limit" to Purchase	- Often relatively small incremental premium to purchase higher limit - Markets will cap the limit they offer based on their risk tolerance
Contractual Considerations	- If the State of North Dakota does not cede the entire $900k xs $100k layer to the reinsurance market, arrangements will be needed to administer the pooling layer - Additional analysis will be required to confidently opine on the contractual structure between the State of North Dakota reinsurance program and the reinsurers

Who would provide this backstop?

Reinsurance companies are the providers of this protection and have been active participants in the health market for several years.

There is a significant market appetite for health exposure. There are several highly rated counterparties that will be interested in an excess of loss or aggregate structure as these are the main vehicles used to transfer volatility in the space.

All counterparties would be highly rated ("A" or better AM Best and/or S&P) entities with significant capital and strong track records of paying claims as agreed.

To learn more about potential structures, pricing and capacity please contact the team on the following page.

For Additional Information:

Knowing that our fiduciary commitment is always to our clients and prospects, Aon's Public Sector Partnership team focuses on developing innovative solutions to help governments and other public institutions reduce volatility and increase the resiliency of their mission. The PSP is a global team of talented colleagues that have deep experience serving in government, insurance, reinsurance, and the capital markets.

JON GODFREAD, COMMISSIONER

NORTH DAKOTA'S#2219 HEALTH CARE TRANSFORMATION

A 3-STEP APPROACH TO LEADING THE NATION IN QUALITY HEALTH CARE, **NOT COST** OF HEALTH CARE.

WHERE WE ARE

NORTH DAKOTA INSURANCE DEPARTMENT

WHERE WE ARE

On a per-capita basis, hospital expenses in North Dakota were highest in the nation in 2017, and their growth rate of about 8% per year since 2010 was among the fastest in the U.S.

HOSPITAL UTILIZATION

North Dakota has seen a dramatic increase in hospital usage. North Dakota Hospitals are seeing longer hospital stays than the national average, and utilization is growing faster in North Dakota than most of the rest of the country.

HOSPITAL EXPENSES

Hospital Expenses are ranking in the top 5 nationally and continuing to grow at higher than national average rates (also top 5 rankings), creating a revenue drives cost scenario.

HOSPITAL REIMBURSEMENT

In the last decade, private hospital reimbursement based on Medicare rates grew from 170 percent of Medicare in 2010 to over 200 percent of Medicare in 2018

HOSPITAL QUALITY

North Dakota hospitals have the worst two-year state level performance in the Midwest, with poor clinical outcomes

.

3 REMEDIAL SOLUTIONS

NORTH DAKOTA INSURANCE DEPARTMENT

SOLUTION 1:

Strengthening Employer Coverage: Both nationally and in North Dakota small employers have dropped coverage over the last several decades as the cost of coverage has continued to rise. There is no federal requirement for small employers to provide this coverage. We are proposing to provide help to small employers – in the long run it will lead to more affordable premiums, a healthier North Dakota, and help our small businesses grow.

- Keep all options open for employer coverage by crafting state rules for association health plans, and allowing small employers to self-fund their insurance through level funded plans authorized by state legislation.
- Study combining the individual and small group markets, or allow employers to subsidize employee premiums purchased through the exchange.
- Maintain and reduce insurance premiums by utilizing private capital backed reinsurance.

SOLUTION 2:

Medication Optimization: Study after study supports medication optimization as a successful tool to reduce costs and improve patient health. Medication optimization crosses across all health sectors, and to succeed requires payers, hospitals, and all medical providers to be involved.

- Mandate the development of specific curriculum at both the University of North Dakota Medical School and the North Dakota State University Pharmacy School on medication optimization.
- Require that medical providers achieve minimum medication optimization CE credits.
- Require insurers provide medication optimization review, within 72 hours of discharge, and at least annually for any patient with 3 or more prescriptions, and more than one chronic medical condition.

3 REMEDIAL SOLUTIONS

NORTH DAKOTA INSURANCE DEPARTMENT

SOLUTION 3:

Better Care for North Dakotans: North Dakota spends more on Medicaid than any other state, but success isn't measured by that metric. We need to keep as many people in private coverage as possible, and we shouldn't be replacing private coverage with public coverage. We also should not support commercial reimbursement rates for only a portion of the Medicaid population, driving diversity in the quality of treatment, misaligned with treating the most needy North Dakotan's fairly. We will push the legislature to consider new approaches including:

- Increase the size of the Medicaid beneficiary risk pool by realigning and implementing rates in parity with both the traditional and expansion Medicaid populations, that creates market competition, deviates away from revenue driving health care costs and encourages fairness among all Medicaid populations, while also re-basing CAHs.
- Implement integrated health homes to provide community and value based care to North Dakotans, modeled after current commercial primary care models, delivering significant federal funds to Medicaid beneficiaries.
- Providing access to a new North Dakota account which allow Medicaid recipients to pay for their share of premiums or to cover cost-sharing like deductibles.

NDHA
North Dakota Hospital Association Est. 1934

2021 HB 1012
House Appropriations Committee Human Resources Division
Jon Nelson, Chairman
January 21, 2021

Chairman Nelson and members of the House Appropriations Committee Human Resources Division, I am Tim Blasl, President of the North Dakota Hospital Association (NDHA). I am here to offer comments in support of HB 1012 and specifically in response to the interim health care study performed by the Insurance Commissioner.

First, I want to stress that North Dakota hospitals strongly support reforms to promote health care access and affordability, including efforts to reform health markets, increase telehealth, improve health care price transparency, promote value-based care, and strengthen patient adherence to medications. We take responsibility for driving cost containment and improving quality. Hospitals stand ready to discuss ways in which we can all work together to help patients better manage their care, drive quality, and reduce costs. But we all need to operate from the same set of facts in order to move those initiatives forward.

We believe that all North Dakotans should have access to high quality, affordable health insurance. We are lucky to have some of the lowest premiums in the country. Premiums are a reflection of not only health care cost, but also of market circumstances and the amount of health care used by patients. As you are probably aware, North Dakota does not have a competitive health insurance market. Approximately 92% of payments to hospitals is fixed – meaning hospitals have no ability to negotiate a different rate. Government payers such as Medicare, Medicaid, and military programs do not negotiate rates. And, because we do not have a competitive commercial health insurance market, the dominant payer - which has about 85% market share - dictates rates paid to hospitals with no negotiation. I recently confirmed with our larger hospitals that they are not able to negotiate rates with the dominant payer. In any case, if hospitals do not manage their costs well, payers do not pay them more. The bottom line is that

hospital expenses do not drive prices; prices in North Dakota are set by Medicare, Medicaid, and the dominant commercial insurer.

It is important to point out some concerns we have with some of the data and how it is presumed to apply to North Dakota. For example, the study draws conclusions regarding the rates paid by private health plans as compared to Medicare rates. The study asserts that private insurers in North Dakota went from paying 170% to 200% of Medicare rates during the nine years covered by the study. This has been pointed out as evidence that hospitals do negotiate rates with payers. First, I do not know how the consultants calculated these figures. I spoke with the two major commercial insurers in the state yesterday and they both confirmed that their rates are between 175 and 180% of Medicare. Had the consultants wanted to provide useful data on which to base policy decisions, North Dakota specific data would have been more helpful.

In addition to the concern we have with the data and assumptions, we are unsure how relevant the study is given the current Coronavirus pandemic. Hospitals have stepped up in unprecedented ways to meet the challenges of COVID-19. They ramped up testing efforts, bought additional personal protective equipment (PPE), added ICU bed capacity, paid for expensive temporary staff to care for additional patients, and created COVID-19 isolation units. In the midst of incurring these additional expenses, revenue plummeted. Hospitals cancelled non-emergency procedures to save scarce PPE and bed space, and many patients postponed care due to fear of the virus. While federal assistance, such as CARES Act funding helped, it is nowhere close to replacing the enormous revenue lost due to the pandemic.

Despite what the study authors assert, hospitals are not "back to normal". North Dakota hospital revenue crashed in March, April, and May 2020. Some of the rebound that happened after that was due to pent up demand from patients who were delaying care but could no longer. Hospitals took care of sicker, more fragile patients because care had been postponed. Hospitals meanwhile also took care of a record number of COVID patients. Hospitals came perilously close to being overwhelmed just eight weeks ago when they had a record 334 COVID patients. Please keep in mind that is an additional 300 patients on top of the other patients they cared for. As a comparison, in our first spike last May, there were 40 COVID patients hospitalized. We do not know if we will see additional spikes or if this represents a return to normal. No one will know what "normal" health care is going to look like for some time. And, as the study notes,

hospital margins are small - roughly 2%. With such thin margins, there is no cushion to absorb such losses.

We are also concerned with the report's conclusion that there was a large jump in hospital cost without an analysis of the reasons why it may appear that way. The study's inclusion of hospital expense data from 2010 in the growth calculations grossly skews the results. We requested adjustment, or at least an annotation, to data skewed by hospitals switching to provider-based billing between 2010 and 2019. Including this data causes what looks like a jump in expenses when, in reality, it is the product of a different methodology of reflecting costs. We also asked if the consultants considered that three of the six PPS hospitals have major patient populations from Minnesota, which means hospital costs are not all born by North Dakotans. They did not take this into consideration. They also did not analyze how increasing wages due to oil activity factored in. Wages constitute 60% of hospitals' cost. These are examples of how cost is driven by market forces that hospitals do not control.

The study also implies that increased hospital costs result in increased reimbursement or more expensive insurance premiums. As already noted, hospitals do not get more reimbursement just because their costs increase. They must operate within a budget of 90% of payments that are fixed and over which they have no control. Also contradicting this point is that North Dakota health insurance premiums are among the lowest in the country. Consumers are evidently not being charged for what the study asserts is a high-cost hospital environment. These two study findings do not square.

We are also concerned that the policy recommendations do not correlate with the data. I would like to comment specifically on a few that are of most concern to us: suggested cuts to the Medicaid Expansion program and government setting of rates.

Medicaid Expansion cuts.

In North Dakota, approximately 24,000 low-income adults have gained coverage under expanded Medicaid. Without any discussion of how it would reduce hospital costs or health insurance premiums, the study suggests that Medicaid Expansion be cut in several ways.

First, they suggest cutting the number of people who qualify by reducing the eligibility limit from 138% to 100% of federal poverty level. As a preliminary matter, this is not even an option. CMS

has not approved it when requested by states. And, even if it were allowed, it is not a wise policy decision. It would likely result in higher uninsured rates and worse access to care for many near-poor adults. And it is unclear why this would even be suggested given that, as the authors acknowledge, "…the savings to North Dakota is limited." The expansion population is covered at a 90 percent federal matching rate, which means $1 million savings to North Dakota requires $10 million in cuts.

The study also suggests cutting Medicaid Expansion reimbursement to providers. We think it is important to point out that Medicaid does not pay for the cost of care. Hospitals lose money when they provide care to a patient covered under any government program – whether that be Medicare or Medicaid. Even when current expansion rates are blended with traditional Medicaid payments, hospitals still lose money. Despite this, Medicaid Expansion has been able to greatly help patients, North Dakota communities, and health care providers. Hospitals have seen a significant decrease in the amount of uncompensated care since the program started. Bad debt and charity care in North Dakota rose from $102 million in 2008 to $274 million in 2014—a nearly threefold increase. Thanks to Medicaid Expansion, bad debt dropped nearly in half to $150 million in 2016.

While cutting Medicaid Expansion payments to health care providers may save five to eight million dollars in general funds as the study points out, it fails to acknowledge the loss to the North Dakota health care system of $200 million in federal funds. Medicaid Expansion represents a huge impact on North Dakota's economy - the budgeted amount for the 2019-2021 biennium alone was $633 million. Taking that much money out of the system cannot be sustained. It is merely a cut to providers and is not cost containment. This would surely result in a cost shift to private payers. If Medicaid rates do not provide fair reimbursement, the cost must be paid by the remaining users of the system. As some pay less, others must pay more. Consequently, private payments go up, taking health insurance premiums along with them. This seems counterproductive if the aim is to reduce premiums.

This policy suggestion also fails to acknowledge that the health care sector is the largest employer in North Dakota. You cannot affect health care without affecting the entire economy of the state. Medicaid Expansion brings in $90 in federal matching funds for every $10 of state general funds invested, which flows directly into local economies supporting employment, wages, and state tax revenue. Again, it is budgeted at $633 million for this biennium. Its impact keeps the cost of health insurance low for the businesses that drive our economy. It is critical to

covering operating costs at our hospitals, the loss of which will result in staff cuts and closed facilities. Medicaid Expansion pays salaries of employees who work at those hospitals, which in turn results in income and sales tax collections in the state. The state's investment of one dollar to secure nine is a fantastic return on investment not only for the health of patients but of our entire economy. This is of such importance now as we are in the middle of a pandemic that has caused so much upheaval in our economy – especially in the health care sector. We simply cannot sustain further instability now.

Government setting of rates

The study recommends that the state government *s*et maximum hospitals rates in the private insurance market and in the state employee plan (NDPERS) by limiting the amounts payable to out-of-network health care providers to a percentage of Medicare rates. Such policies cap the total amount that hospitals and physicians can be paid when they are not in network. These rate caps are viewed by the authors as an alternative to more rigid price setting regulations when competitive outcomes are difficult to achieve. They assert that setting maximum hospital rates provides a benchmark for negotiations with insurers. What this fails to understand is that, in North Dakota, hospitals and physicians largely participate in all networks. We do not have an out of network, surprise billing problem, as in other states. The authors state that this will also put downward pressure on in-network rates. This also fails to recognize the unique market in North Dakota in which hospitals do not have negotiating power with the dominant insurer. Rate caps would simply allow the dominant insurer to further lower its rates.

In summary, we hope that we can work together to come up with solutions that work for our state. There are many suggestions in the study we have supported in the past and will continue to do so, such as reforms to promote health care access and affordability, increase telehealth, and promote value-based care. We cannot support approaches that merely cut payment to providers and do nothing to contain costs, fail to balance patient access, and do not focus on improving quality.

I would be happy to respond to any questions you may have. Thank you.

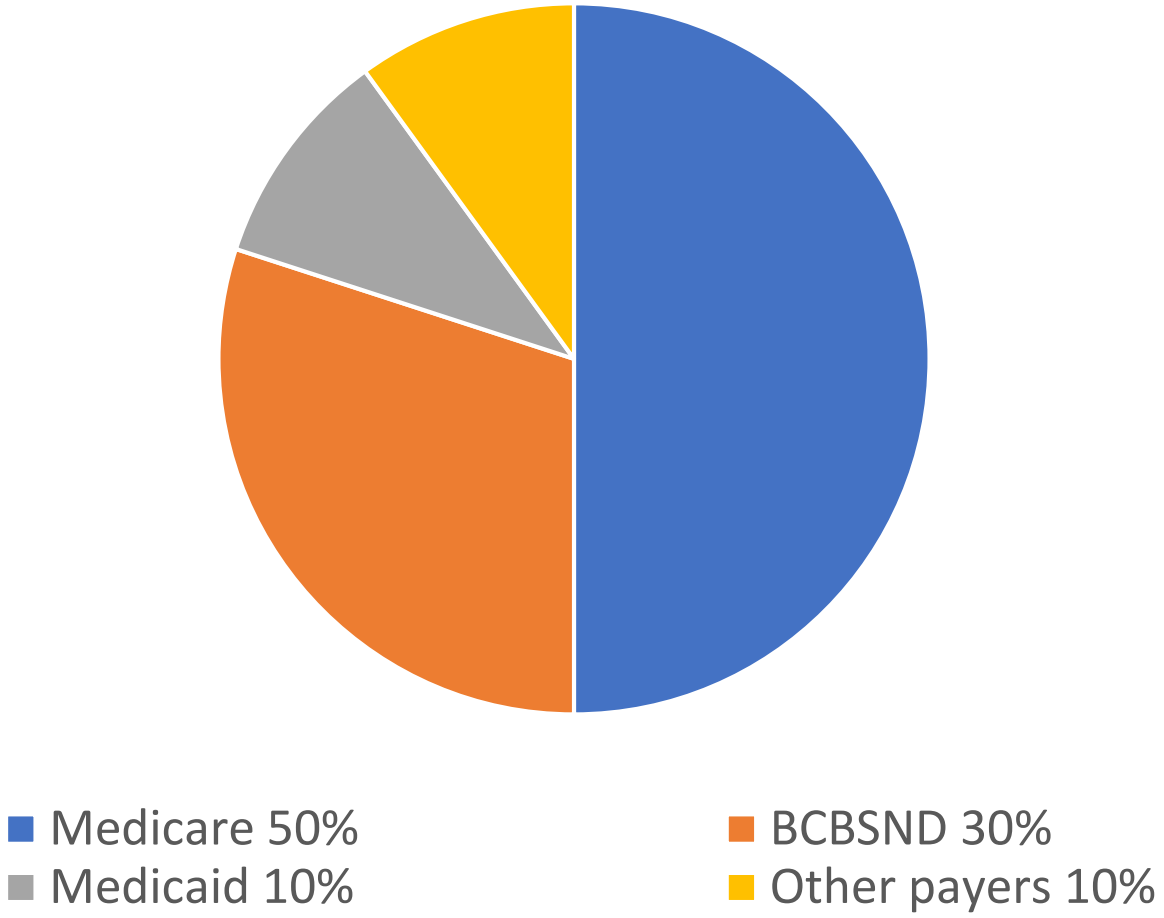
Respectfully Submitted,

Tim Blasl, President
North Dakota Hospital Association

House Bill No. 1012 #2215

House Appropriations Human Resources Division

January 21, 2021



Tim Blasl |President

NDHA
North Dakota Hospital Association
Est. 1934

ND hospitals strongly support health care access and affordability

- Policy options we support
  - Reform health markets
  - Increase telehealth
  - Improve health care price transparency
  - Promote value-based care
  - Strength patient adherence to medications

ND Payer Mix – 90% Fixed

ND specific focus is needed

- The study claims private insurers in ND went from paying 170% to 200% of Medicare rates.
- The study claims this is evidence that hospitals do negotiate rates with payers.
- The two major commercial insurers both confirmed that their rates are between 175 and 180% of Medicare.

What Drives Cost

- Study claims ND expenses highest in nation
- Half of our PPS hospitals have major patient populations from MN, which means the calculation assumed costs are all born by North Dakotans.
- Wages in ND increased at a high rate. Ex. oil activity, nursing shortage, recruitment challenges for professional services.
- The amount of health care used by patients (utilization) is the main driver of health care costs.

ND health insurance premiums are low

Hospitals operate within a budget of fixed payments.

Hospital margins are small - roughly 2%.

Hospitals do not get more reimbursement just because costs increase.

ND has among the lowest premiums in the country…

Which leads to low commercial provider rates

Medicaid Expansion Cut

- The report suggests reducing Medicaid Expansion rates - which would cut about $400 million out of the healthcare system in the next four years.
- It fails to acknowledge that the expansion population is covered at a 90 percent federal matching rate.
- Traditional Medicaid rates don’t cover the cost of providing health care services.
- Medicaid Expansion helps subsidize traditional Medicaid rates - even with the higher rates, providers overall still lose money when treating Medicaid patients.

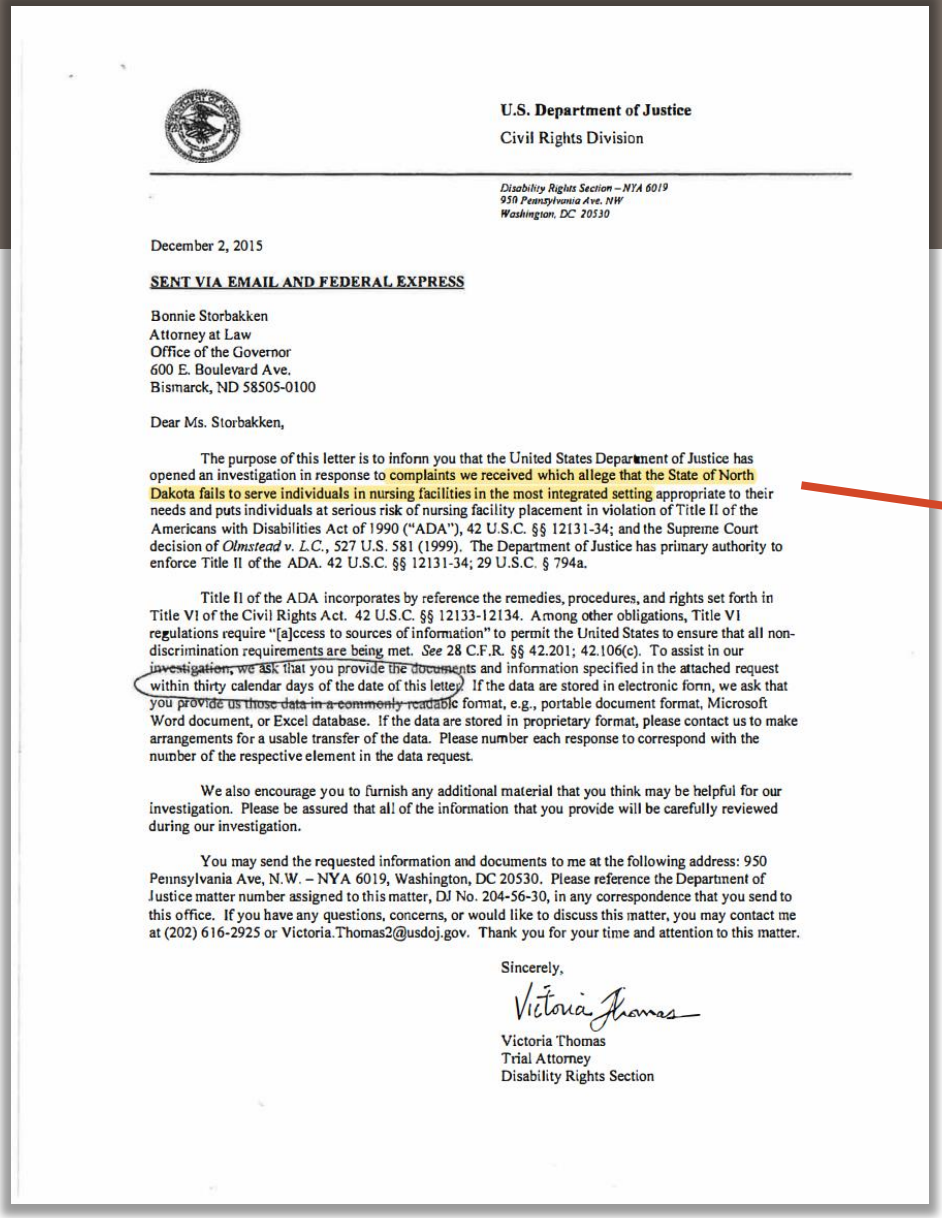
SETTLEMENT AGREEMENT BETWEEN U.S. DOJ & STATE OF ND



Purpose is to ensure that the State will meet the ADA requirements by providing services, programs, and activities for individuals with physical disabilities in the most integrated setting appropriate to their needs.

Effective December 14, 2020

Agreement will terminate eight years after effective date if Parties agree that the state has attained substantial compliance with all provisions and maintained that compliance for a period of one year.

NOTIFICATION FROM DOJ

U.S. Department of Justice

Bonnie Storbakken
Attorney at Law
Office of the Governor
600 E. Boulevard Ave.
Bismarck, ND 58505-0100

Dear Ms. Storbakken,

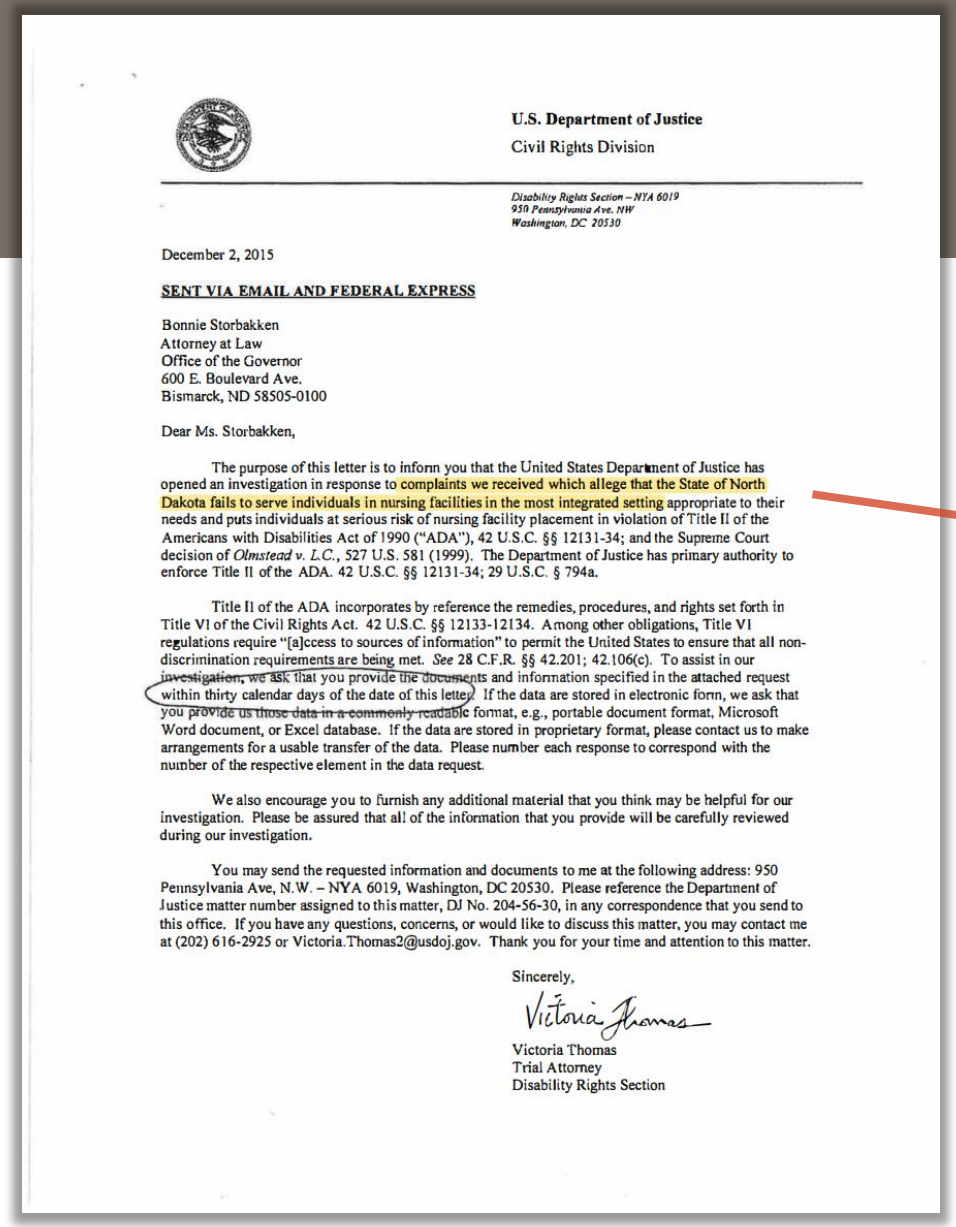
The purpose of this letter is to inform you that the United States Department of Justice has opened an investigation in response to complaints we received which allege that the State of North Dakota fails to serve individuals in nursing facilities in the most integrated setting appropriate to their needs and puts individuals at serious risk of nursing facility placement in violation of Title II of the Americans with Disabilities Act of 1990 ("ADA"), 42 U.S.C. §§ 12131-34; and the Supreme Court decision of *Olmstead v. L.C.*, 527 U.S. 581 (1999). The Department of Justice has primary authority to enforce Title II of the ADA. 42 U.S.C. §§ 12131-34; 29 U.S.C. § 794a.

Title II of the ADA incorporates by reference the remedies, procedures, and rights set forth in Title VI of the Civil Rights Act. 42 U.S.C. §§ 12133-12134. Among other obligations, Title VI regulations require "[a]ccess to sources of information" to permit the United States to ensure that all non-discrimination requirements are being met. *See* 28 C.F.R. §§ 42.201; 42.106(c). To assist in our investigation, we ask that you provide the documents and information specified in the attached request within thirty calendar days of the date of this letter. If the data are stored in electronic form, we ask that you provide us those data in a commonly readable format, e.g., portable document format, Microsoft Word document, or Excel database. If the data are stored in proprietary format, please contact us to make arrangements for a usable transfer of the data. Please number each response to correspond with the number of the respective element in the data request.

We also encourage you to furnish any additional material that you think may be helpful for our investigation. Please be assured that all of the information that you provide will be carefully reviewed during our investigation.

You may send the requested information and documents to me at the following address: 950 Pennsylvania Ave, N.W. – NYA 6019, Washington, DC 20530. Please reference the Department of Justice matter number assigned to this matter, DJ No. 204-56-30, in any correspondence that you send to this office. If you have any questions, concerns, or would like to discuss this matter, you may contact me at (202) 616-2925 or Victoria.Thomas2@usdoj.gov. Thank you for your time and attention to this matter.

Sincerely,



Victoria Thomas

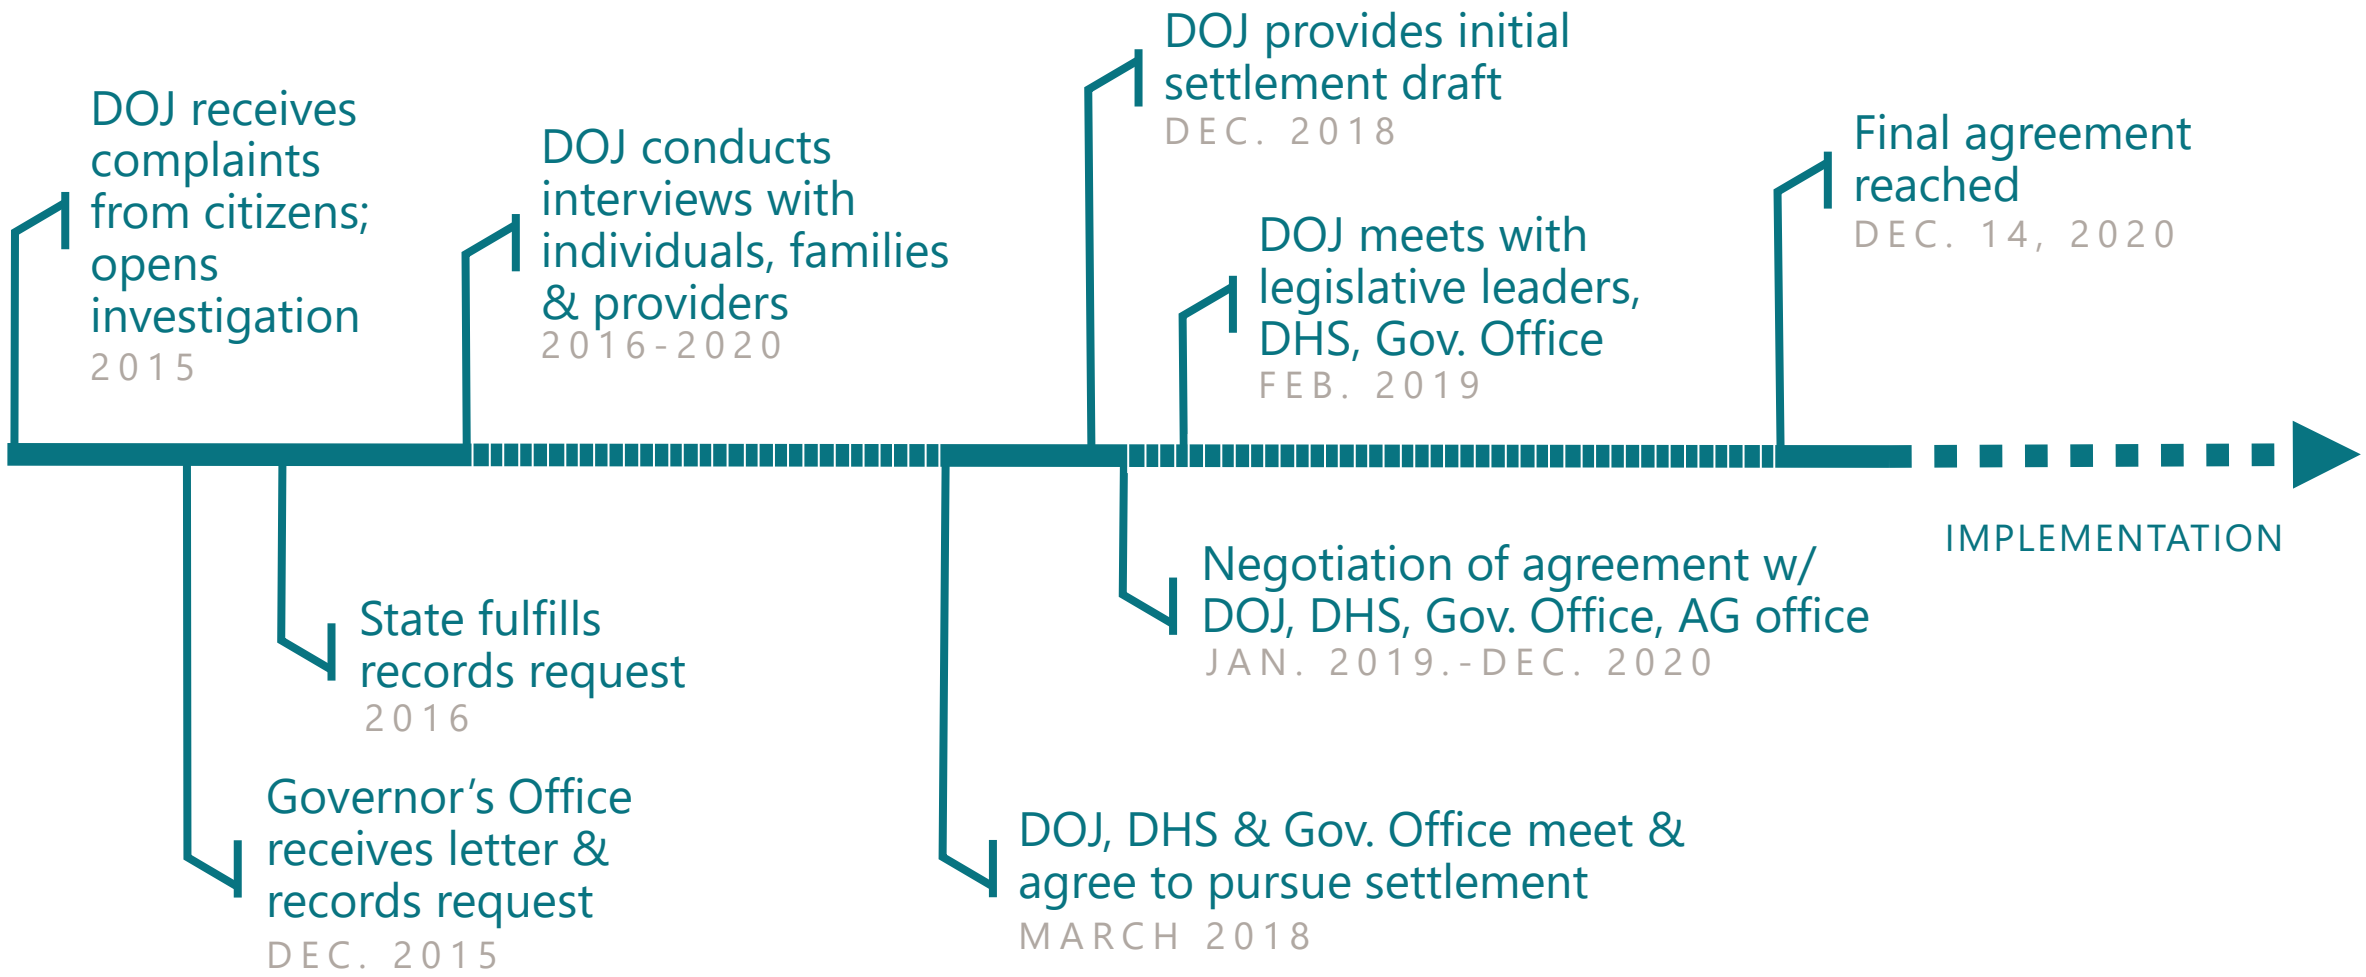
49
PER 1000

PEOPLE OVER 65 IN CERTIFIED NURSING FACILITIES

HIGHEST RATE IN THE U.S.



Sources: Henry J Kaiser Foundation, US Census Bureau (2016)

VARIETY OF CONCERNS

EXAMPLES PROVIDED BY DOJ

- **Unnecessary segregation** of disabled individuals in skilled nursing facilities
- Adults in skilled nursing facilities who would **rather be in their community**
- **Imbalance of funds** to skilled nursing facilities and community-based services
- **Lack of awareness** about existing transition services and available tools

TIMELINE

DOJ receives complaints from citizens; opens investigation
2015
DOJ conducts interviews with individuals, families & providers
2016-2020
DOJ provides initial settlement draft
DEC. 2018
DOJ meets with legislative leaders, DHS, Gov. Office
FEB. 2019
Final agreement reached
DEC. 14, 2020
IMPLEMENTATION
State fulfills records request
2016
Governor's Office receives letter & records request
DEC. 2015
DOJ, DHS & Gov. Office meet & agree to pursue settlement
MARCH 2018
Negotiation of agreement w/ DOJ, DHS, Gov. Office, AG office
JAN. 2019.-DEC. 2020

KEY TERMS | DOJ SETTLEMENT
Americans with Disabilities Act

The Americans with Disabilities Act (ADA) requires public agencies to **eliminate unnecessary segregation** of persons with disabilities and provide services in the **most integrated setting appropriate** to the needs of the individual.

In **1999** the Federal Supreme Court **Olmstead** decision **affirmed** the **ADA** requirements.

KEY TERMS | DOJ SETTLEMENT
Most Integrated Setting

A *living environment* that allows individuals with disabilities to interact with non-disabled persons to the fullest extent possible.

December 2020 U.S. Dept of Justice
Settlement with State of North Dakota

For Example

Single Family Home
Apartment
Townhome
Condominium
Farm or Ranch
Adult Foster Care
Living with family

KEY TERMS | DOJ SETTLEMENT
Community Integration Mandate

Public entities are required to provide **community-based services** when:

- Community-based services are **appropriate** for the individual; and
- The individual **does not oppose** community-based treatment; and
- Community-based treatment can be **reasonably accommodated**, taking into account:
  - Resources available to the entity and
  - Needs of others receiving disability services.

BENEFITS OF DOJ AGREEMENT

1. **Expands and raises awareness** about community-based care options available to adults with physical disabilities

2. Allows individuals to make **informed choices**, including the option to receive care while enjoying the benefits of community living in the least restrictive setting

3. Builds upon the investments made by the 2019 Legislature and our **shared goal** of improving services to citizens

KEY TERMS | DOJ SETTLEMENT
Informed Choice

The process by which the State ensures that Target Population members have an opportunity to make an informed decision about where to receive services.

December 2020 U.S. Dept of Justice
Settlement with State of North Dakota

For Example

- Person-centered planning
- Info about benefits of integrated settings
- Facilitated visits or other experiences in integrated settings
- Opportunity to meet with peers (other individuals with disabilities who are living, working and receiving services in integrated settings)
- Reasonable efforts to identify and address concerns

What do we need to do to help someone make an informed choice about how they may want to access services in the most integrated setting that is right for them?

AGREEMENT VISION

- Long-term care system & supports reform
- Increase access to community-based services
- Increase awareness about service options
- Increase provider capacity & training

Builds upon **shared goal** of improving services to citizens providing care closer to home

AGREEMENT COMPONENTS

I. Introduction
II. Jurisdiction
III. Definitions
IV. Target Population
V. Subject Matter Expert
VI. Implementation Plan
VII. Case Management
VIII. Person Centered Plans
IX. Access to Community Based Svc
X. Information, Screening & Diversion
XI. Transition Services
XII. Housing Services
XIII. Community Provider Capacity & Training
XIV. In-reach, Outreach, Education & Natural Supports
XV. Data Collection & Reporting
XVI. Quality Assurance & Risk Management
XVII. Enforcement
XVIII. General Provisions

IV. TARGET POPULATION MEMBERS (TPM)

COMMUNITY MEMBERS

- Adults with disabilities living in an integrated community setting, but at risk of Medicaid-funded nursing facility care.
- Adults with disabilities in need of additional community-based services to continue living in an integrated community setting.

NURSING FACILITY MEMBERS

- Adults with disabilities who reside in a nursing facility and receive Medicaid-funded long-term care services.
- Adults with disabilities who reside in a nursing facility who are at risk of becoming eligible for Medicaid-funded services.

Who are we trying to reach?

Target population

Basic Eligibility

- Individual with physical disability
- Over age 21
- Eligible or likely to become eligible to receive Medicaid long-term services and supports (LTSS)
- Is likely to require LTSS for at least 90 days.

IF in skilled nursing setting

- Receive Medicaid-funded nursing facility services AND
  - Likely to require long term services and supports
- Receive nursing facility services AND
  - Likely to become eligible for Medicaid within 90 days, have submitted a Medicaid application, and have approval for a long-term nursing facility stay

IF in hospital or home setting

- Referred for a nursing facility level of care determination AND
  - Likely to need services long term
- Need services to continue living in the community AND
  - Currently have a HCBS Case Manager or have contacted the ADRL

KEY TERMS | DOJ SETTLEMENT
Physical Disability

"Physical Disability" – means an impairment that substantially limits major life activity, including one or more major bodily functions, see 42U.S.C 12102: 28 C.F.R 33.108 such that the individuals meets ND's Nursing Facility Level of Care (LOC) by requiring for example, assistance with activities of daily living such as toileting, eating, or mobility.

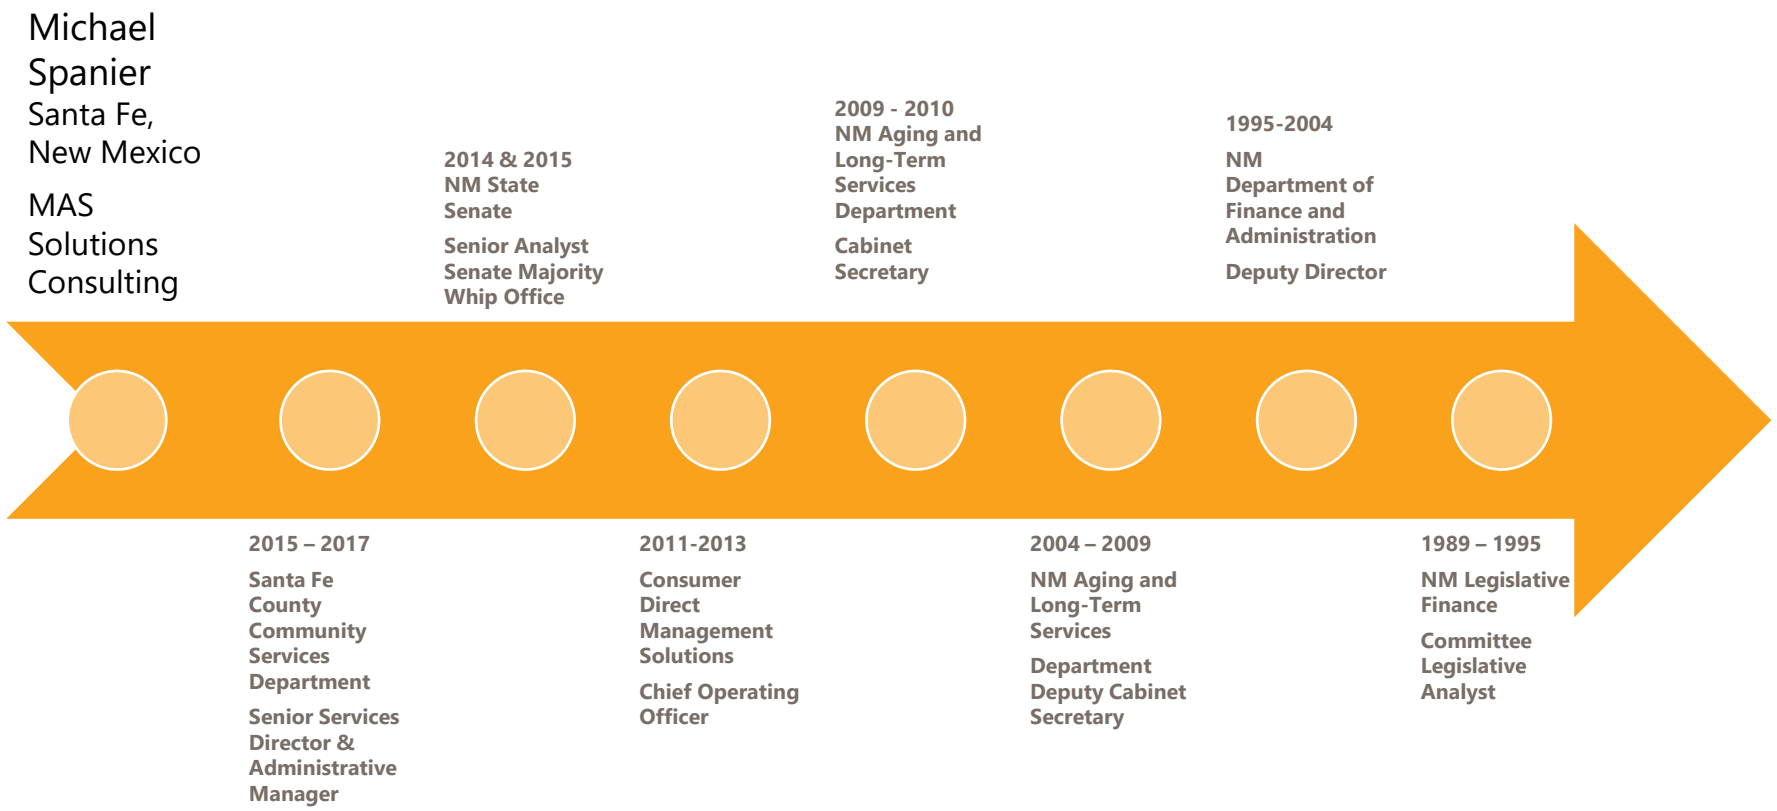
ND Admin code 75-02-09, as may be amended.

WHO IS NOT A MEMBER OF THE "TARGET POPULATION"

Individuals under age 21

Individuals who are not Medicaid eligible

Individuals who are not expected to need services for at least 90 days

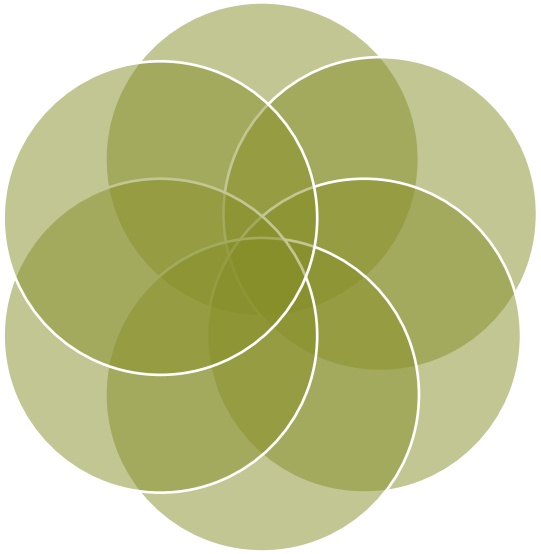


Individuals with an intellectual disability or mental illness who do not screen at a nursing facility level of care

V. SUBJECT MATTER EXPERT

Individual chosen by the parties with expertise in management, administration and finance of HCBS

Provide technical assistance and compliance reviews

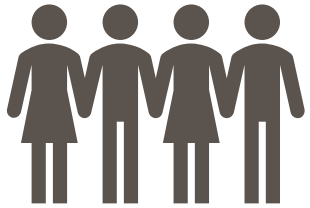


VI. IMPLEMENTATION PLAN

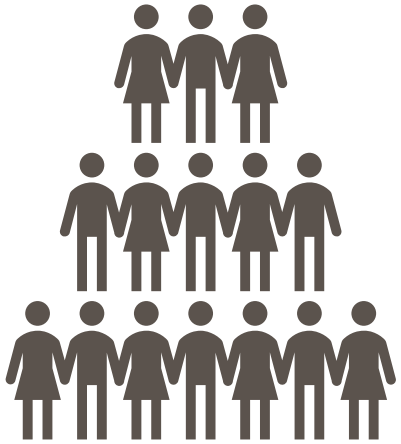
Within 120 days of effective date produce draft plan

Establish a method to address challenges to implementation

Review relevant services, capacity and barriers



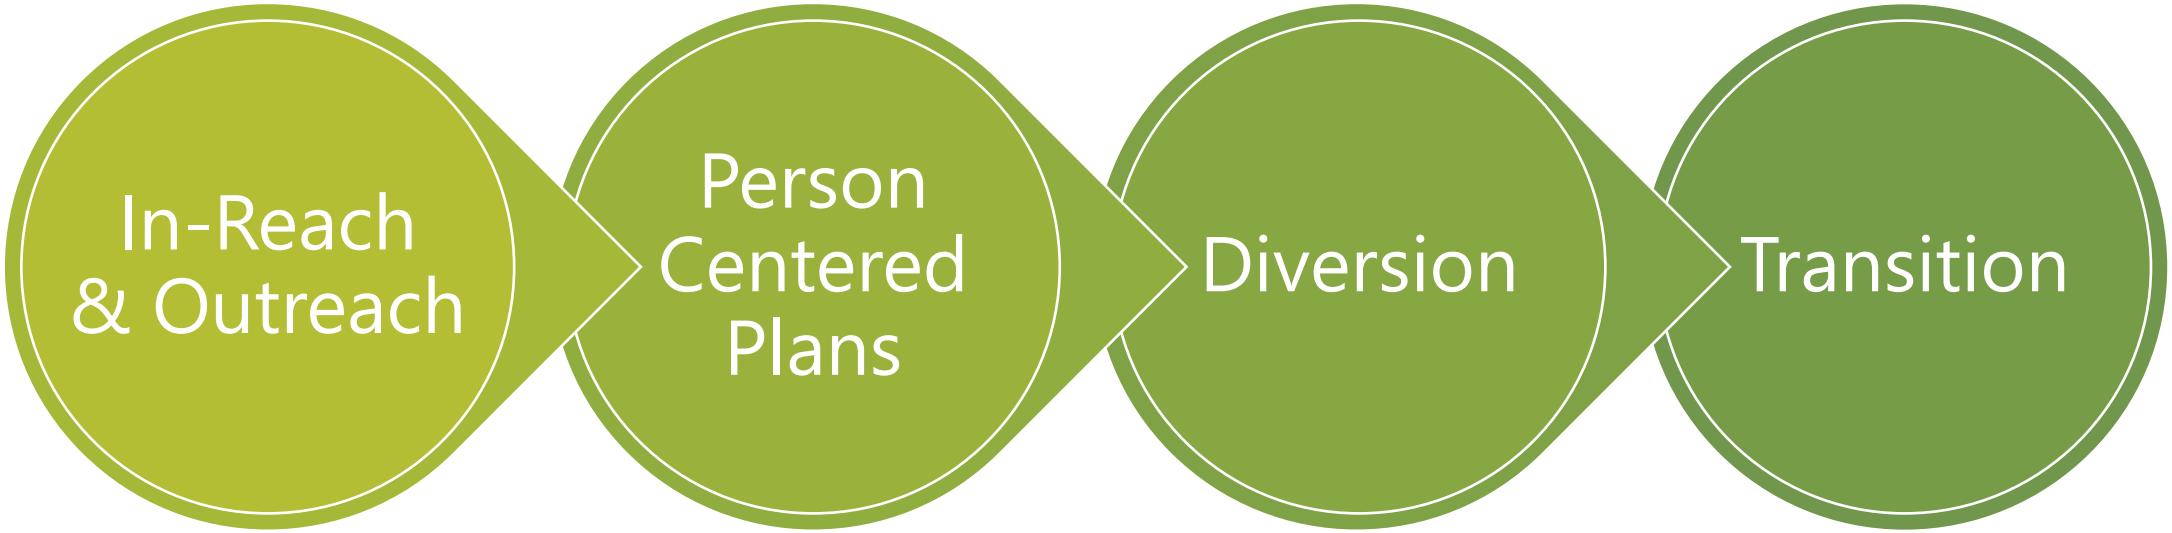
Assign agency and division responsibility for achieving benchmarks



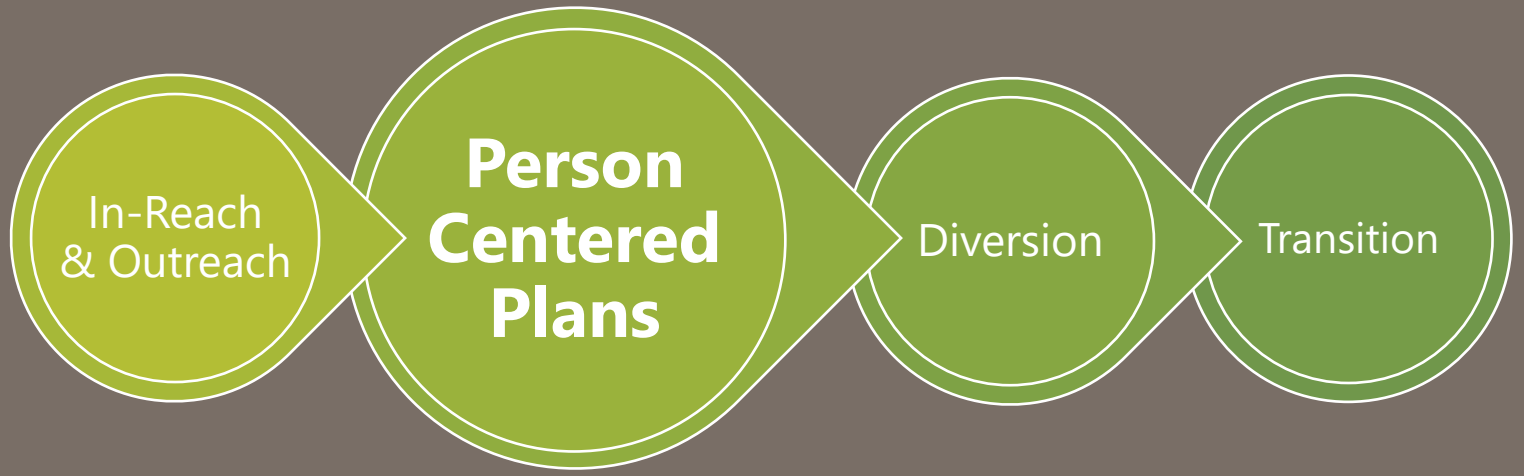
Engage Stakeholders

Identify benchmarks and timelines for meeting Agreement's requirements

VII. CASE MANAGEMENT



64 HCBS Case Managers

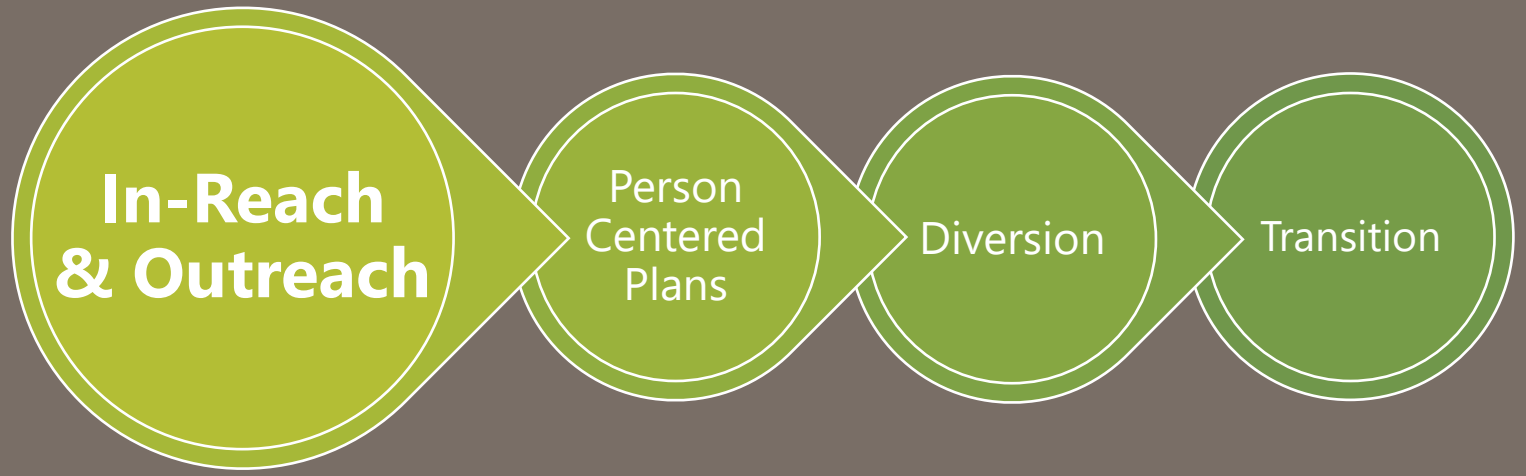


Served 2300 individuals
(Nov 2020)

- Provide case management for older adults & individuals with physical disabilities receiving:
  - Service Payments for the Elderly and Disabled (SPED)
  - Expanded SPED (Ex-SPED)
  - Medicaid 1915-(c) Waivers
    - Aged and Disabled
    - Tech Dependent
  - Medicaid State Plan Personal Care (MSP-PC) in community
- Conduct informed choice referral visits

ND / DOJ AGREEMENT STRATEGY

VIII. STRATEGY



PERSON CENTERED PLANNING

Medicaid mandated process, developed by individual and case manager to identify supports and services that are necessary to meet the individual's needs in the most integrated setting

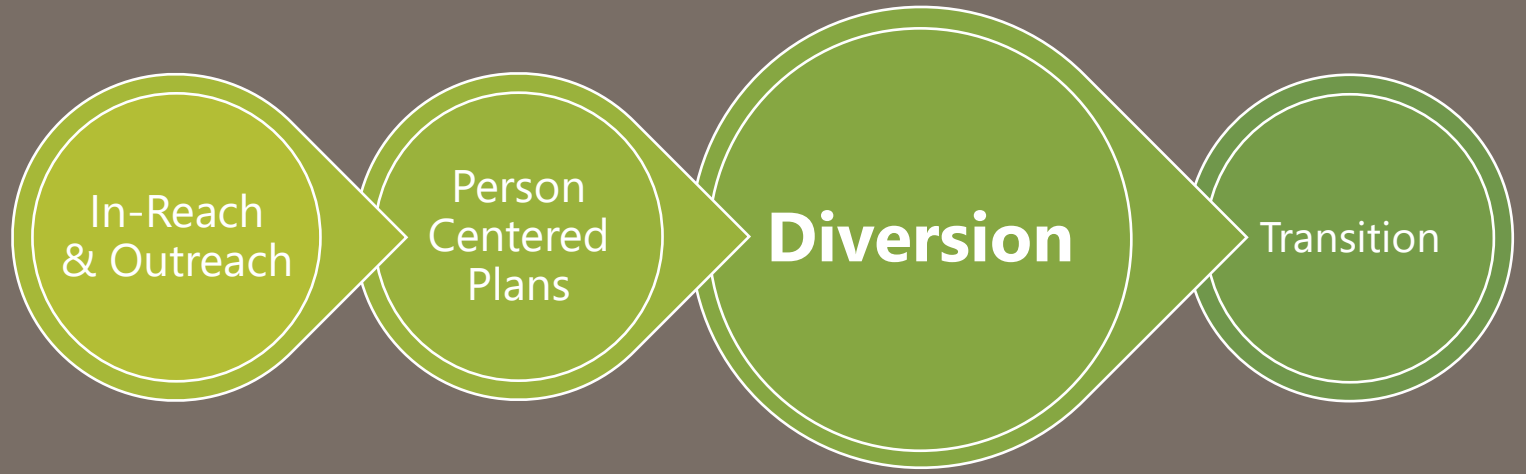
GOALS

Year 1	Year 2	Year 4	Year 6	Year 8
•290 Target Population Members (TPM)	•Additional 290 TPM	•Additional 650 TPM	•Additional 670 TPM	•Additional 670 TPM

XIV. STRATEGY

IN-REACH

Informing individuals in skilled nursing facilities and hospitals of their care options



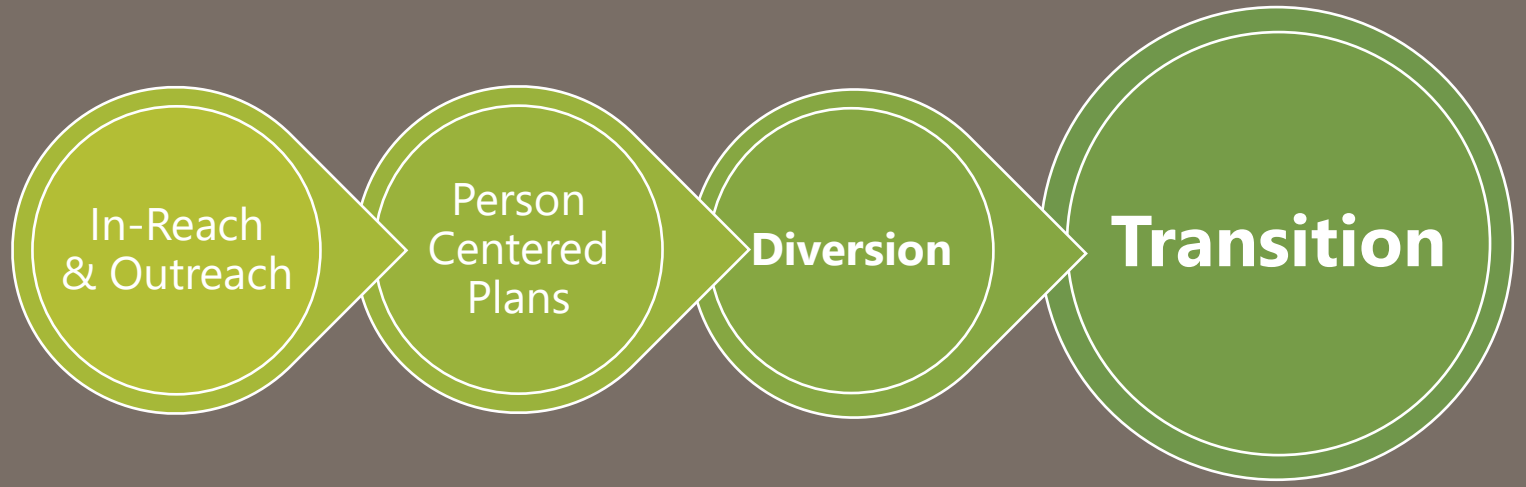
OUTREACH

Informing individuals and stakeholders in the community about their care options

GOALS

Within 9 months	Year 2	Year 4	Year 5 and after
•Individual or group in-reach to all skilled nursing facilities	•Develop peer support system	•Individual in-reach to at least 1,000 Skilled Nursing Facility target population members	• In-reach to all newly admitted or identified Skilled Nursing Facility target population members

X. STRATEGY



DIVERSION: COMMUNITY LIVING

Set of activities that allow a target population member to avoid placement in a skilled nursing facility and remain living in their home and community

GOALS

Year 2	Year 4	Year 6	
•100 Target Population Members (TPM)	•150 additional TPM	•150 additional TPM	Total 400 diverted

XI. STRATEGY

TRANSITION TO COMMUNITY

Services to prepare an individual currently residing in a skilled nursing facility to return to an integrated community setting

GOALS

Year 2	Year 4	Year 6	Year 8
•Transition 100	•Transition 60% identified through person centered planning (PCP)	•Transition 70% identified through PCP	•Transition all remaining individuals identified PCP

XII. HOUSING SUPPORTS

INTEGRATED HOUSING

Federal, state, or local assistance to TPM who need help accessing available integrated housing and support for TPM where lack of housing has been identified as a barrier to community-based services

GOALS			
Year 1	**Year 2**	**Year 3**	**Year 4-8**
•Assist 20 Target Population Members (TPM)	•Assist additional 30 TPM	•Assist additional 60 TPM	•Assist additional number of TPM based on aggregate need

KEY TERMS | DOJ SETTLEMENT
Permanent Supported Housing

Affordable, permanent housing coupled with housing supports and other community-based services. Individual lives in a private home alone, with family, significant other, or roommates of their choosing.

December 2020 U.S. Dept of Justice
Settlement with State of North Dakota

Notes

- Tenants must have access to community provider for intermittent on-call, planned and back up community-based services
- Must be scattered site housing

KEY TERMS | DOJ SETTLEMENT
Integrated Housing

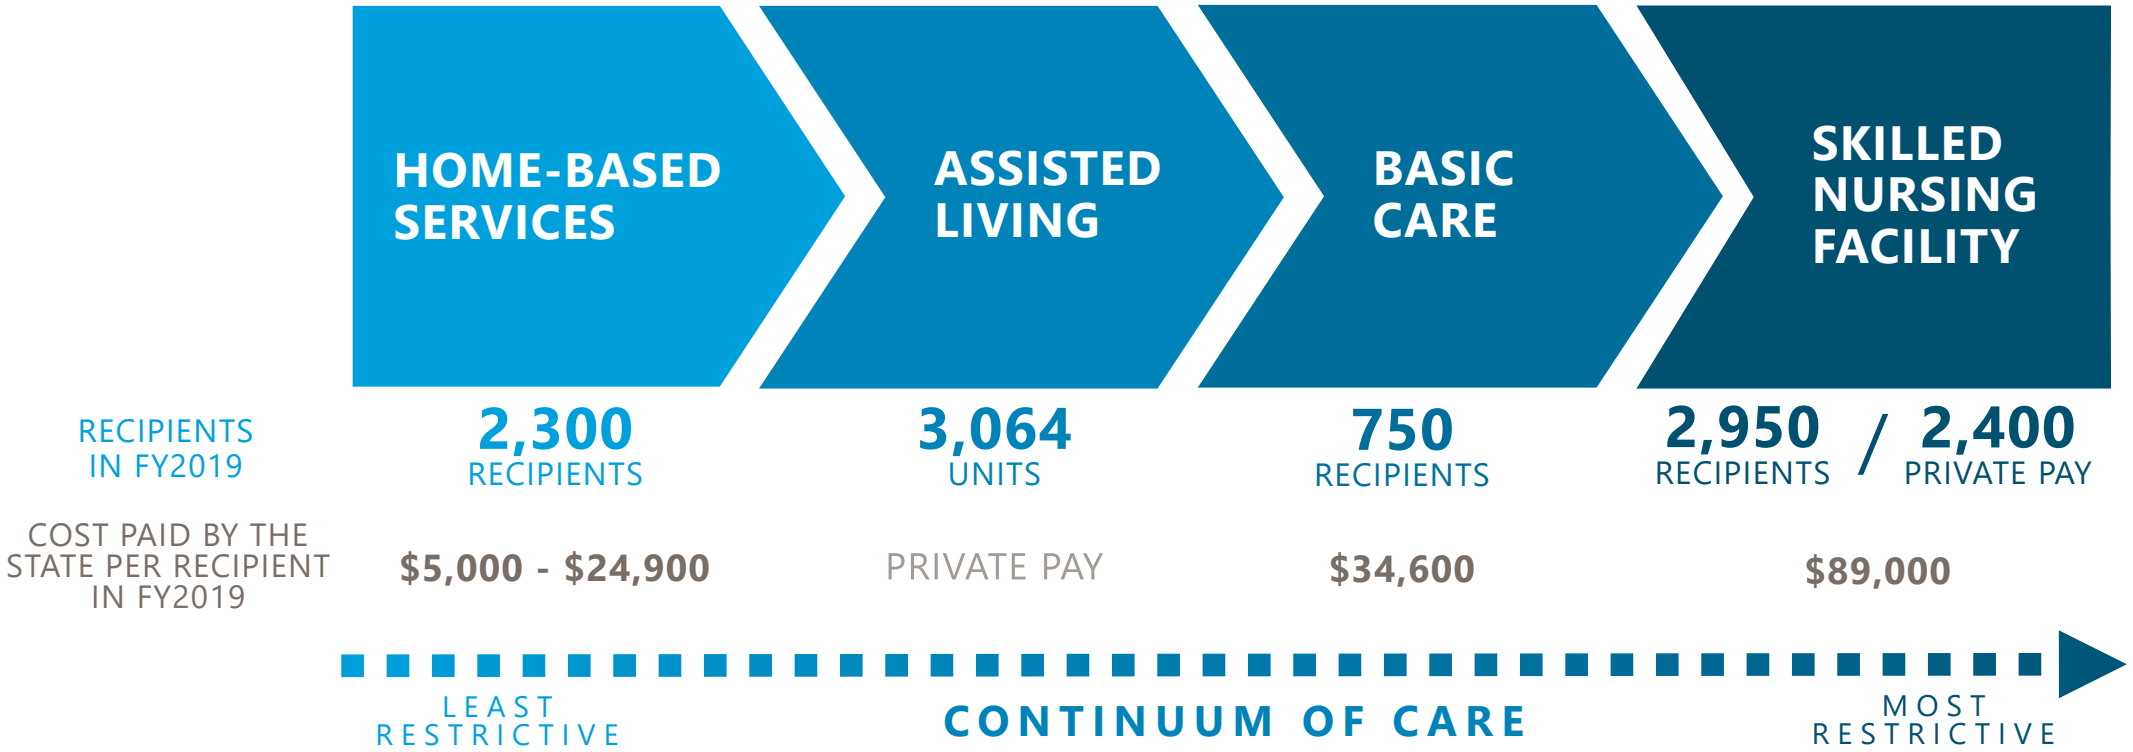
Housing **cannot be provided in** group homes, nursing facilities, boarding homes, residential care facilities or assisted living residences; or any building where more than 25% of the occupants are TPM.

Requires state to **provide** funding for **rental assistance** including reasonable expansion of existing capacity by funding and providing rental assistance to support permanent housing for TPM.

Requires state to **provide** for **assistance** with **identifying** housing, **coordinating** housing modifications, applying for subsidized housing, as well as help **preserving** tenancy if temporarily admitted to a Nursing Home.

XIII. PROVIDER CAPACITY AND TRAINING

State will ensure an adequate supply of qualified trained community providers to enable target population members to transition and live in most integrated setting

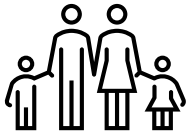


Provide guidance and training to nursing homes and other community providers who make a commitment to provide community-based services

Draft plan to addresses provider capacity, reimbursement rates, incentives to serve individuals with significant medical/supervision needs, those living on Native American reservations and in rural areas

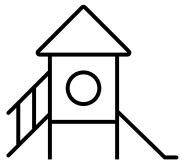
CONTINUUM OF CARE

LONG-TERM CARE SERVICES & SUPPORTS



OPPORTUNITIES FOR COLLABORATION

Internal and external partners



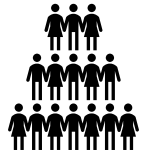
DHS Key Priorities

Build Stronger Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Enhance Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Provide Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Innovate and Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

Inspire a High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

Meet Margo

Margo is 53

She lives alone in her home

Margo has disability-related physical impairments. She is Medicaid eligible and meets a nursing home level of care.

Her monthly income is from Social Security Income, $783 per month

Margo needs support in the morning and the evening, and some home-making assistance to live independently and some occasional help with non-medical transportation. She can manage the rest of her day with the help of several assistive devices.

Margo is a good candidate for **Medicaid State Plan-funded Personal Care and the Medicaid waiver**

What will help Margo to choose to live at home?

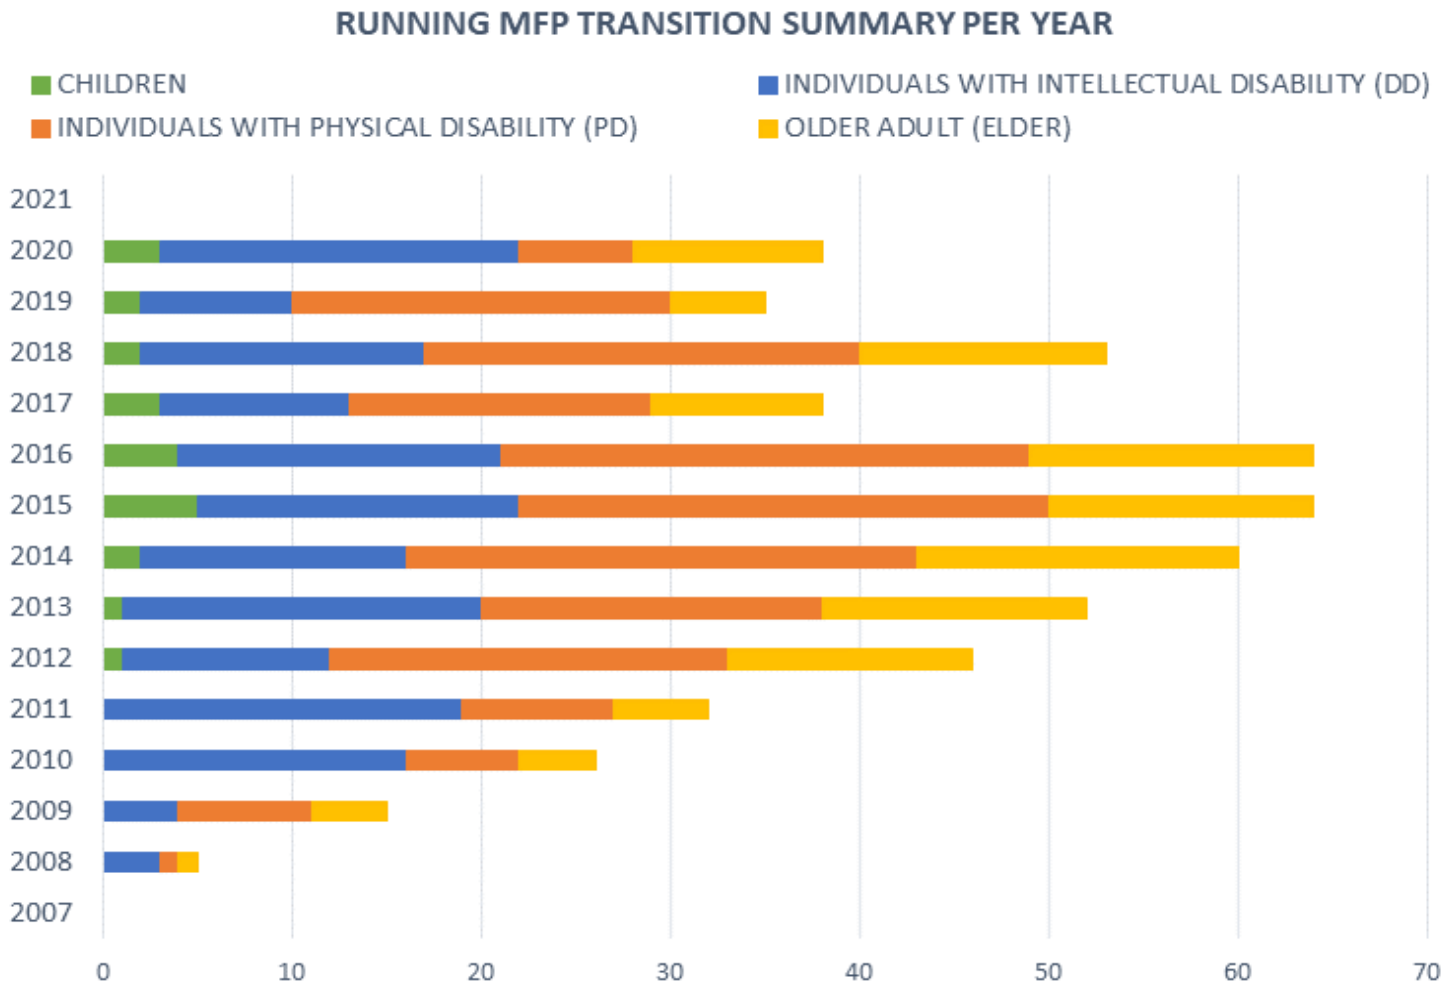
DHS FUNDED LONG TERM CARE AND HCBS SERVICES

Total cost by type of service

Cost Per Recipient Per Year

Cost paid by state by service in $ in State Fiscal Year 2020

Program Descriptions / Detail



- Service Payments for the Elderly and Disabled (SPED): Provides services for people who are older or physically disabled, have limited assets, and who have difficulty completing tasks that enable them to live independently at home.
- Expanded SPED (Ex-SPED): Pays for in-home and community-based services for people who would otherwise receive care in a licensed basic care facility.
- Home and community-based services (HCBS) waiver: This waiver from the federal government allows the state to use Medicaid funds to provide services enabling eligible individuals who would otherwise require nursing home services to remain in their homes or communities.
- Medicaid State Plan personal care (MSP-PC): Personal care services available under the Medicaid state plan and enable persons with disabilities or chronic conditions accomplish tasks they would normally do for themselves if they did not have a disability.
- Basic Care: Room and board and personal care services for persons eligible for Medicaid.

AGING & ADULT SERVICES
Money Follows the Person

Federal Grant designed to assist states to increase the use of home and community-based services (LTSS System Rebalancing)

- Eliminate barriers that prevent individuals from receiving LTSS in the settings of their choice

- Original award - $8.9 million (2007)
- Award through 2020 - $29 million (fed) and $1.7 million (state)
- Transitioned 528 individuals from institutional settings back to the community

House Appropriations Committee #2525
IN SUPPORT – HB 1012 – DHS Budget – Economic Assistance
January 25, 2021
Janelle Moos, AARP North Dakota
jmoos@aarp.org – (701) 355-3641

Chairman Nelson and members of the House Appropriations Human Resources Division, I am Janelle Moos, Associate State Director of Advocacy at AARP North Dakota.

AARP is a non-profit, non-partisan membership organization with more than 84,000 members in North Dakota. Our mission is to empower people to choose how they live as they age.

We wanted to take a moment to weigh in on a couple of important economic assistance issues.

First, SNAP is an important program that ensures older adults and families get the nutrition needed. We have closely monitored the food crisis more Americans and North Dakotans faced during the pandemic. SNAP benefits are an important tool that addresses this crucial problem. It is an especially important program for Americans over 50 because many face challenges to employment, live on fixed incomes, live alone, and have limited financial resources to pay for necessities like food, housing, and essential medicine. To people struggling to put food on the table, hunger is not a political issue, it is a daily reality. SNAP is a vital lifeline that feeds 23,840 North Dakota households. 35% of those recipients are either elderly or disabled. Also remember, participants generally spend their SNAP dollars locally, soon after receiving them, boosting local economies. An important benefit in this time.

Also, LIHEAP has served as a lifeline for low-income families. As you may know, AARP believe utility issues and rates are a key pocketbook issue. We have intervened in various cases in front of the North Dakota Public Service Commission on behalf of older adults and consumers and know the struggle of families to afford their utility payments. Having a safety net for families especially in our climate is not only the right thing it is the moral thing to do.

We encourage you to continue to support these programs to ensure no North Dakotan goes hungry or without heating or cooling assistance when they need it.

Again, we appreciate the time to raise issues important to North Dakotans 50+ and would be happy to answer any questions. Thank you.

HB 1012 #2534
House Appropriations – Human Resources Division
Monday, January 25, 2021
Rep. Jon Nelson - Chairman

Chairman Nelson and Members of the House Appropriations – Human Resources Division:

My name is Roxane Romanick and I'm representing Designer Genes of ND, Inc., as their Executive Director. Designer Genes' membership represents 260 individuals with Down syndrome that either live in our state or are represented by family members in North Dakota. Designer Genes' mission is to strengthen opportunities for individuals with Down syndrome and those who support them to earn, learn, and belong.

Individuals with Down syndrome have made many strides in living in their homes, schools, and communities because of educational and medical advances, public policy, and advocacy efforts. Public investments in early intervention, family support, public schools and special education, post-secondary school options, and home and community-based services do make a real difference for people with Down syndrome. The vast majority of our membership are living in home and community-based settings. Thank you for your important part in opening up these opportunities.

My daughter, Elizabeth, and our family are an example of the positive outcomes of this investment. Elizabeth has been a consumer of services from the first day of her life when her Early Intervention staff visited her in the hospital until the present with support from Vocational Rehabilitation and the Minot State Access Disability Services and the ASTEP program. Her education was supported by special education and general education from 2002 to 2018. A number of her job experiences have been supported by Vocational Rehabilitation. As a family, we have been supported by Family Voices of ND as well as the connections we've made through Designer Genes and the rest of the Down syndrome community across a wide arena of areas. All of these services and supports poured into a reservoir that she is depending on as she works on an Early Childhood Paraprofessional Associates from Dakota College of Bottineau. Who would have thought?

Our organization has interest in a number of areas of HB 1012 and this single piece of testimony is presented to draw your attention to those areas:

1. **Developmental Disabilities Division**
    a. **Payments for providers** – We stand in support with other advocacy efforts and the recommendation to award providers within the Developmental Disabilities system up to a 3%/3% increase. Our individuals across the life span from infants and toddlers in

our Early Intervention (Infant Development) to our oldest individuals with Down syndrome rely on this system.

b. **Eliminate the $11 million in state cost savings to the adult services providers -** This cut to our providers is devastating. The provider system has been stressed due to COVID, recruiting and maintaining staff, and assuring health and safety for everyone that they serve. These challenges put individuals at risk of institutionalization and instead of helping more individuals to move out of the Life Skills Transition Center, we will see the reverse happening.

c. **Restore and reallocate $100,000 Experienced Parent Funding –** In the 65th session, a number of advocates worked with legislators to secure an amendment on HB 1012 for $100,000 in state general funds and $160,000 in designated funds from the federal Part C grant to support the Experienced Parent program within the ND Part C Early Intervention system. In her January 20, 2021 budget detail testimony, Tina Bay, Director of the Developmental Disabilities Division, reported that this funding (both state and federal grant) would be cut as part of the state's cost saving plan.

Family-to-family support, parent support, peer support – call it what you want - is a critical element in sustaining the confidence and competence for families who have children with special health care needs. Our organization for one is designed expressly with that purpose in mind. In a 2005 research study of postnatal support of mothers of children with Down syndrome (mere_43_304.196_212.tp (brianskotko.com), the vast majority of mothers reported a desire to be connected to their local down syndrome organization "which can provide practical knowledge in addition to establishing the beginnings of a long term support relationship."

Our families who are raising children with special health care needs need other families to connect with who have lived experience either through their own experiences or through helping other families. We need structured approaches to matching families with other families like Family Voices of North Dakota does through their Parent-to-Parent program. I am requesting that upon restoring the $100,000 cut from the DD budget that it is reallocated to the Children and Family budget and passed on to Family Voices of North Dakota. (See below). Family Voices will put this money to work from Day 1 for the citizens of North Dakota and has the resources to do so.

2. Children and Family Services

a. Restore $100,000 to Family Voices and Reallocate $100,000 from DD

I am requesting that $200,000 be restored and given to Family Voices of North Dakota. They currently have $175,00 in the 2019-2021 biennium and have been told that $100,000 is being eliminated due to the cost savings plan. With your restoration and reallocation, they would have $275,000 to continue, plus expand the work they do to help families navigate and access a variety of service delivery systems. Believe your

money will go to work. Without an amendment from your committee, our North Dakota families will have lost $200,000 in critical supports.

3. **Vocational Rehabilitation**
    a. **Restore state general funds for the Centers for Independent Living –** If anyone should be testifying on this section, it's my daughter, Elizabeth. Through Dakota Center for Independent Living (DCIL), she was able to get her driver's permit. DCIL's active engagement on the Bismarck-Mandan Mayor's Committee on People with Disabilities helped her to know about their scholarship program, of which she's been awarded funding the last 3 years. Probably what she would tell you about the most though is their Youth Empowering Social Status (YESS) movement and the opportunities that she's had to develop leadership, speak publicly, and connect to other youth and young adults with disabilities and without. Sustaining our four Centers for Independent Living is another piece if assuring individuals with disabilities in our state live quality lives.

Thank you for your time and I will take any questions that you may have.

Testimony #2278
House Bill 1012 – Department of Human Services
Aging Services Budget
House Appropriations - Human Resources Division
January 25, 2021

Chairman Nelson and members of the committee, my name is Brian Arett. I am the executive director of Valley Senior Services providing services for senior citizens in the six counties of southeastern North Dakota. I am also a member of the North Dakota Senior Service Providers, an association of agencies that provide Older Americans Act Services to the senior population of this state.

Attached to my testimony is a copy of a booklet entitled Feeding Grandma 2021. This is the fifth booklet in a series that we have provided during the legislative session. Each session we have updated it to provide the most current and in-depth data on senior hunger, how our programs help prevent this from happening in North Dakota and why it is one of the most cost-effective methods for keeping seniors in their homes.

The basic premise behind this booklet is that providing a stable source of healthy, nutrient dense meals is a key factor in successful aging. And because this service is very cost effective - the cost of providing senior

meals for a year equals two days in the hospital or five days in a nursing home - it makes good fiscal sense for our state and for the people we serve.

But, the Senior Nutrition Program is so much more than just a meal. At senior centers, it is a chance for our seniors to engage and socialize with other seniors. And our “Meals on Wheels” programs provide meals to our most vulnerable seniors, those that are unable to leave their homes. Home delivered meals also provide our homebound senior with a daily well-ness check. Many times, this might be the only human contact our seniors have throughout their day. This happens every day in our most rural communities and in our largest cities.

In the state of North Dakota 49% of our seniors live alone, 67% live in rural areas, 61% are women and 20% live in poverty. Inadequate nutrition and /or limited social contact has direct health consequences that affect the healthcare system and the economy.

The agency I work for – Valley Senior Services – provides about 1,400 Meals a day to the seniors of southeastern North Dakota. The average age of the people we serve is just over 82. For many of the people that we

deliver meals to, their only contact with another person during the day is the volunteer making that delivery. We feel that this connection combined with an incredibly healthy meal provides invaluable support that allows many of these people to continue living independently much later in life than they otherwise would. And the partnership that we have with the state of North Dakota through funding provided by the Department of Human Services Aging Services Division is critical in making this happen.

Over the past few sessions, our senior meal programs have had great support from legislators in adding state dollars to the Aging Services budget to work toward our Associations' goal - to have enough combined Federal Title III and State Funds so that ALL senior meals provided by Title III agencies receive the unit rate reimbursement. The $4.60 unit rate reimbursement is NOT intended to cover the full cost of the meal. The total cost, estimated to be $11.02/meal, are covered with participants' program income contributions, required local match, NSIP dollars and additional funds raised locally.

In the testimony provided las week by Nancy Nikolas-Maier, Division Director for the Aging Services Division, she presented a proposed budget

for the biennium for Senior Nutrition Services of $12,036,132. A portion of these funds, the NSIP dollars of $1,693,820, are distributed to providers separate from the $4.60/meal reimbursement we receive for the meals we provide to seniors. This leaves a balance of $10,342,312 in funds designed for reimbursement to providers. Her testimony also noted that meal counts increased dramatically during the pandemic and that we served 103,672 meals in the month of November 2020. If we continue to serve that number of meals it would require funding of $11,445,389 to provide reimbursement for every meal served – an increase of $1,103,079 over the budgeted amount. Our first request of this committee is to add this amount to the budget to reimburse providers for every meal served through this program.

It is also important to point out that the unit reimbursement rate of $4.60/meal has not been increased since July of 2015 – a period of six years at the conclusion of the current biennium. At the same time, costs connected to providing this service have grown by 28.3% (from $8.59/meal to $11.02/meal). With that in mind, our second request of this committee is to increase the per meal unit rate to $5.60/meal. This request would recognize the impact that inflation has on the cost of maintaining this service and would add an additional $2,448,128 for the 2021-23 biennium.

These additional funds will help us to continue to keep up with the growth in demand for our services brought on by the ever-growing aging population. It will also assist us to keep up with rising food costs, and the costs associated with attracting, and retaining the employees required for providing our services.

North Dakota Senior Service Provider agencies are dedicated to making our state the best place possible to grow old. We feel that the State of North Dakota is a natural partner in helping us to accomplish this goal and ask that you add $3,551,207 in state funds to the 2023-25 biennium budget.

Thank you for your time in consideration of this testimony. I would be happy to answer any questions you might have.

Feeding Grandma 2021

A 2021 Legislative Document#2279 #2279

Provided by North Dakota Senior Service Providers (NDSSP)
www.ndseniorservices.org

We Feed Seniors So They Can Remain Healthy and Independent

North Dakota Senior Service Providers (NDSSP) is a group of agencies that provides services to older adults across the entire state of North Dakota. Older Americans Act Title III Nutrition Programs are some of the services we provide. Funding for this program flows to the state from the federal Administration for Community Living and consists of two primary components:

- **Congregate Nutrition Services** - providing nutritious meals for seniors in a social, group setting
- **Home Delivered Nutrition Services** - providing meals for homebound seniors, also known as Home Delivered Meals and Meals on Wheels

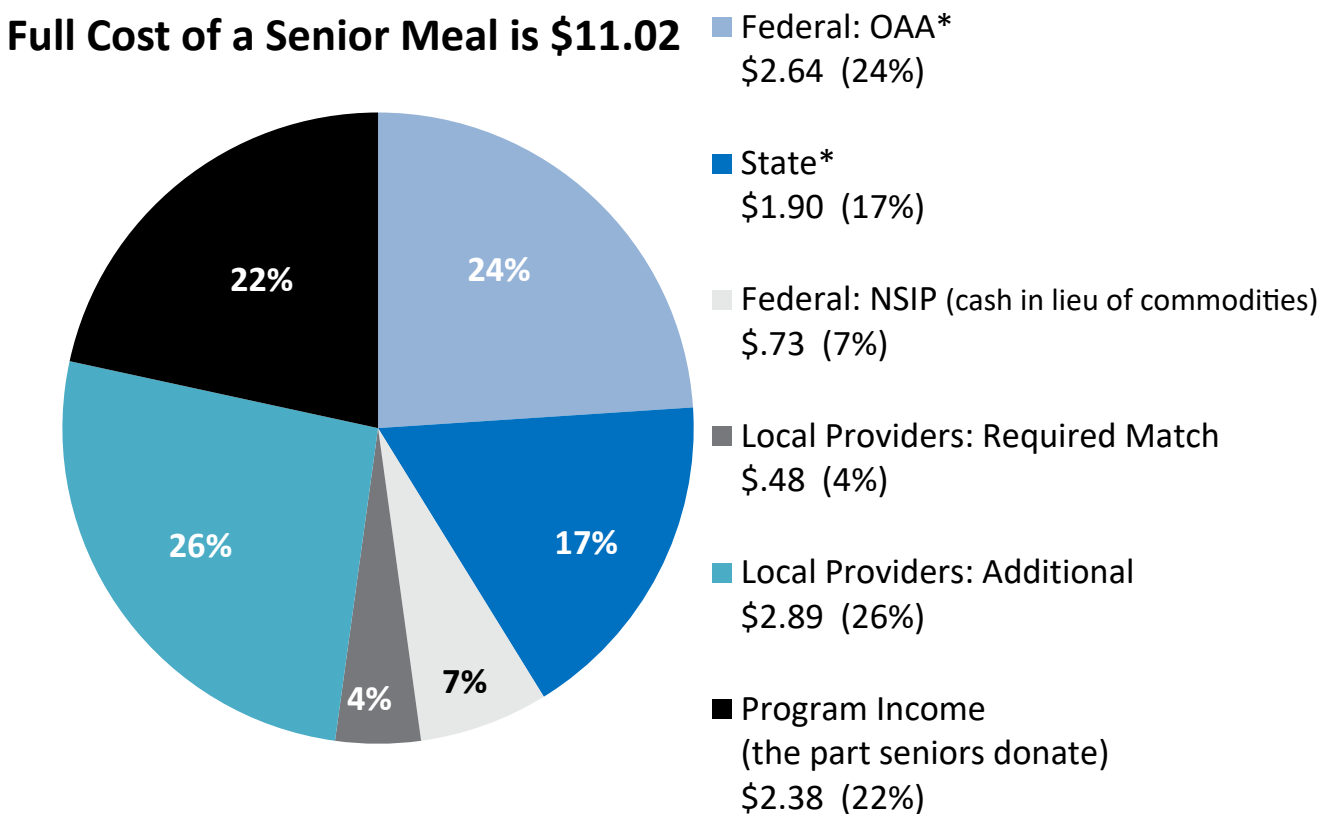
This document provides the highlights and updated usage and cost information for Federal Fiscal Year 2019. Research citations for this "Feeding Grandma 2021" document can be found in the "2015 Feeding Grandpa" document available at www.ndseniorservices.org.

Congregate & Home Delivered Meals Are Cost Effective

Many of the chronic health conditions that result in frailty and disability, loss of independence, and reduced quality of life in older adults are preventable through low-cost lifestyle interventions, incorporating proper nutrition and physical activity. Clearly these meals save valuable health and long-term care dollars.

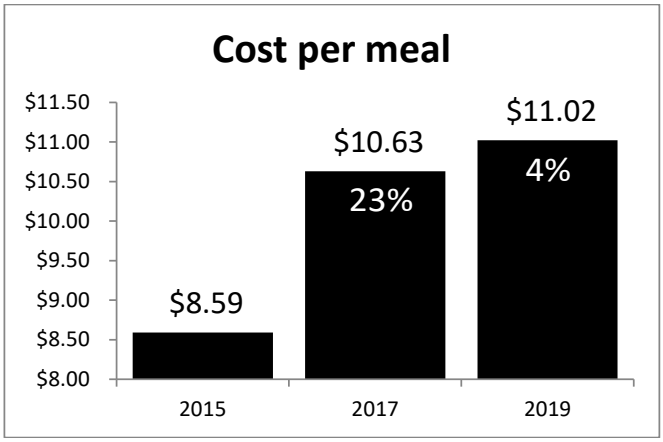
Source: Meals on Wheels America, 2019.

Congregate & Home Delivered Meals Promote Good Health



Nutritional status is closely associated with an older person's ability to function and remain independent. Hospitalized older adults suffer from many adverse effects when malnourished. Nutritious meals, tailored to older adults, reduce the risk of chronic diseases and related disabilities, prevent nutritional deficiency, and improve health over the long term.

Congregate & Home Delivered Meals Save the State Medicaid Money



These older adults who participate in our nutrition programs have many of the characteristics that make them nursing home-eligible. In federal fiscal year 2019, 172 of the 4,801 home-delivered meal clients scored with 3+ ADL (Activities of Daily Living) limitations AND were Medicaid eligible. This is a conservative estimate of the nursing home-eligible clients receiving home delivered meals. According to the 2019 Genworth Financial cost of care survey, the average annual cost in a North Dakota nursing home is $132,324. **This means the Medicaid cost to the state for nursing home care for these 172 people would have been over $22.76 million in 2019 alone.**

Congregate & Home Delivered Meals Funding is Lagging Behind Ever-increasing Costs and the Long-term Aging of the Population

In federal fiscal year 2019, the average full cost to provide a senior meal was $11.02. Below is a chart identifying where the money came from in FFY 2019 for these senior meals.

IMPORTANT NOTE: The Federal OAA and State monies are the funds that reimburse agencies the unit rate for the meal. **These two categories sum to only $4.54 a meal and not the unit rate of $4.60 per meal because there was not enough funding for all of the meals to be reimbursed** at the unit rate in 2019. If 100% of the meals were reimbursed at the unit rate, these two figures would add up to $4.60.*

The average cost of a senior meal continues to increase. While the state has provided additional funding in past sessions, it has not been enough to keep up with inflation. In federal fiscal year 2019, a total of 1,087,541 meals (546,066 congregate and 541,475 home-delivered meals) were provided across the state.

COVID-19 Response

Mid-March 2020, the COVID-19 pandemic shut down ALL congregate meal sites in North Dakota, per ND Aging Services mandate. Providers were deemed "essential" and stepped up to provide grab-n-go meals, take-out meals, and drive-thru meals, as well as adding many people to the Home Delivered Meals programs. Meals during the COVID-19 pandemic have increased over 40% over pre-pandemic times in some areas. While federal COVID-19 stimulus funds were allocated to help pay for these meals, the funding did not cover the full cost of the meal and will be spent out by 12/31/2020. Until there is an effective vaccine and all have been vaccinated, many of the state's older adults will continue to utilize these safe methods of getting food. **The average cost of a senior meal continues to increase. 2020 has seen food shortages, increased costs for both food and supplies, and the need for Personal Protective Equipment for staff and meal volunteers. All of these things have caused a spike in meal costs across the state; however these costs are not reflected in the graphs, which only show data through June 30, 2019.**

The basic unit rate of $4.60/meal has not changed since 2015. We are asking to be included with other Department of Human Services programs, which receive annual cost of living increases. Additionally, agencies are only allocated federal and state funding for a portion of the meals they provide. NDSSP is asking to be treated the same as other Department of Human Services providers. We request that we be paid a basic unit rate, with annual cost of living increases, for ALL of the Title III meals provided across the state - not just a portion of them.

Meal providers need to be able to depend on stable, basic rate funding for food, supply, and staffing costs. We try to utilize volunteers as best as we can for our meal programs, but we still have staffing costs. As our senior population continues to grow, we need to work collaboratively in a proactive way so essential services, such as senior meals, will not suffer as the state budget fluctuates. **These meals help seniors remain in their homes and out of costly nursing homes.**

Take action to save Medicaid dollars and support an increased basic unit rate for ALL Title III senior meals. Thank you!

Written by Colette Iseminger, MS, RD, LRD of the Grand Forks Senior Center for North Dakota Senior Service Providers, 620 4th Ave South, Grand Forks, ND 58201 c/o Brian Barrett, APT Solutions brian@aptnd.com Cell: 701-471-5104

North Dakota Dementia Care Services Program

Our state's residents affected by Alzheimer's and other dementia can receive support through the North Dakota Dementia Care Services Program (DCSP), a contract program through the Department of Human Services, Aging Services Division. For many families, the DCSP services are a lifeline when they need it most.

Since 2015, Lisa Millsap of Minot has been living with Alzheimer's disease. Her husband, Mel, has been caring for her in their home. Before the pandemic, Lisa was able to go to adult day care while Mel worked. Now, Mel is a 24/7 caregiver. Lisa and Mel have benefited from the support of the Alzheimer's Association through the DCSP, including care consultations with an on-staff dementia care expert. "Lisa was not properly diagnosed when she first developed early-onset," Mel says. "I'm grateful for the programs and support Lisa and I have received from the Alzheimer's Association and their staff through the state-funded Dementia Care Services Program.

Mel is one of the estimated 30,000 unpaid Alzheimer's caregivers in North Dakota. He wants people to understand that his wife Lisa "is still Lisa."

North Dakota Dementia Care Services Program

The Alzheimer's Association has served North Dakota residents through the Dementia Care Services Program (DCSP) since 2010 to improve disease management and increase family support to people living with dementia and their caregivers. Services include:

Care Consultation

Individuals with memory loss, family members, or concerned professionals meet with Alzheimer's Association Care Consultants. Consultants provide a customized road map including information about the diseases, care plans, resources for housing, financial and legal planning, referrals to community resources and support for caregivers. Meetings generally take place via phone, at the individual's home or at their preferred location.

Physician Outreach

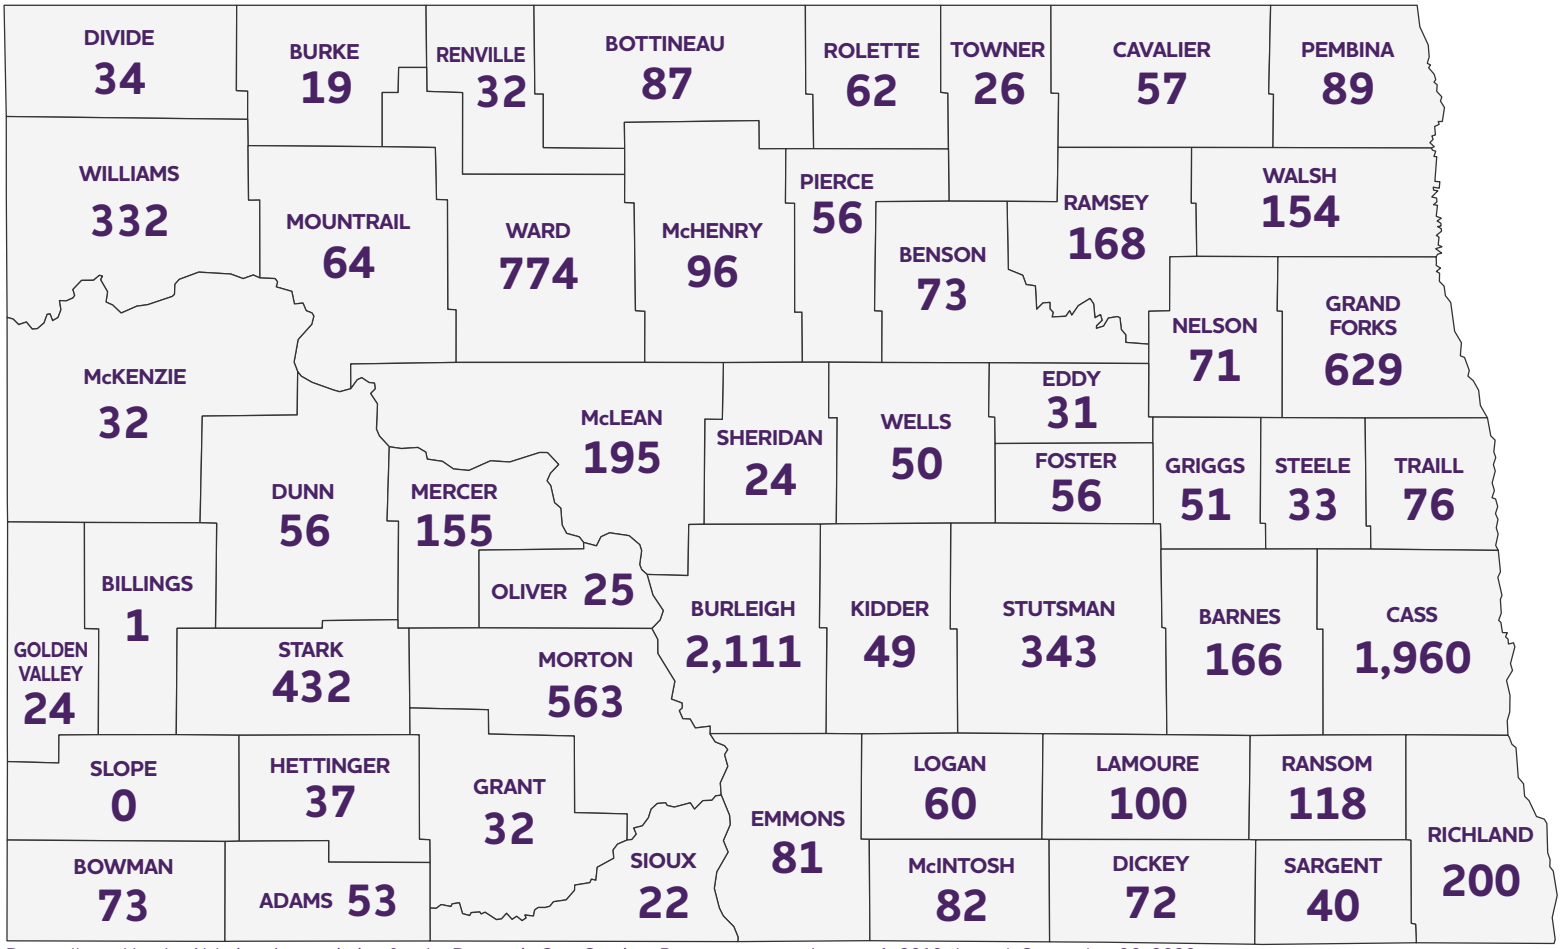
Health care setting outreach informs medical staff in clinics, hospitals and public health agencies about the importance of Alzheimer's early detection and diagnosis, as well as how to make referrals for family education and support.

Education - General Public & Professional Development

Community outreach offers education on dementia-related topics, such as understanding memory loss, brain health, partnering with one's doctor, and understanding communication. Classes are available for the general public, professionals, care partners, medical professionals, and law enforcement.

COVID-19 Update

Fortunately, COVID-19 has not disrupted the services provided by the DCSP. Without any delay and with the support of staff across the country, the Association has found innovative and creative ways to continue to reach constituents virtually. Depending on the client's preference, care consultations have been conducted via video conference or phone.



We have seen an increase in interest for professional dementia training, both from organizations as well as individuals. Our North Dakota long-term care and community-based providers that previously have not participated are now joining. Also, individual direct care workers, who previously would travel to receive training are now able to participate from their workplace or home. Although we still believe in-person training is the most effective way to improve quality care, interactive training from virtual locations has proven useful during the pandemic.

alzheimer's association®

North Dakota Dementia Care Services Program

The Alzheimer's Association has supported the families of 3,328 people living with dementia, including providing 11,896 care consultations for 6,898 caregivers.

Individuals Served by County[1] January 1, 2010 - September 30, 2020

Data collected by the Alzheimer's association for the Dementia Care Services Program contrat January 1, 2010 through September 30, 2020.

We have also educated **44,018** people across the state, to increase awareness of community resources, to understand the disease process, and to improve the quality of care of people living with dementia in North Dakota.

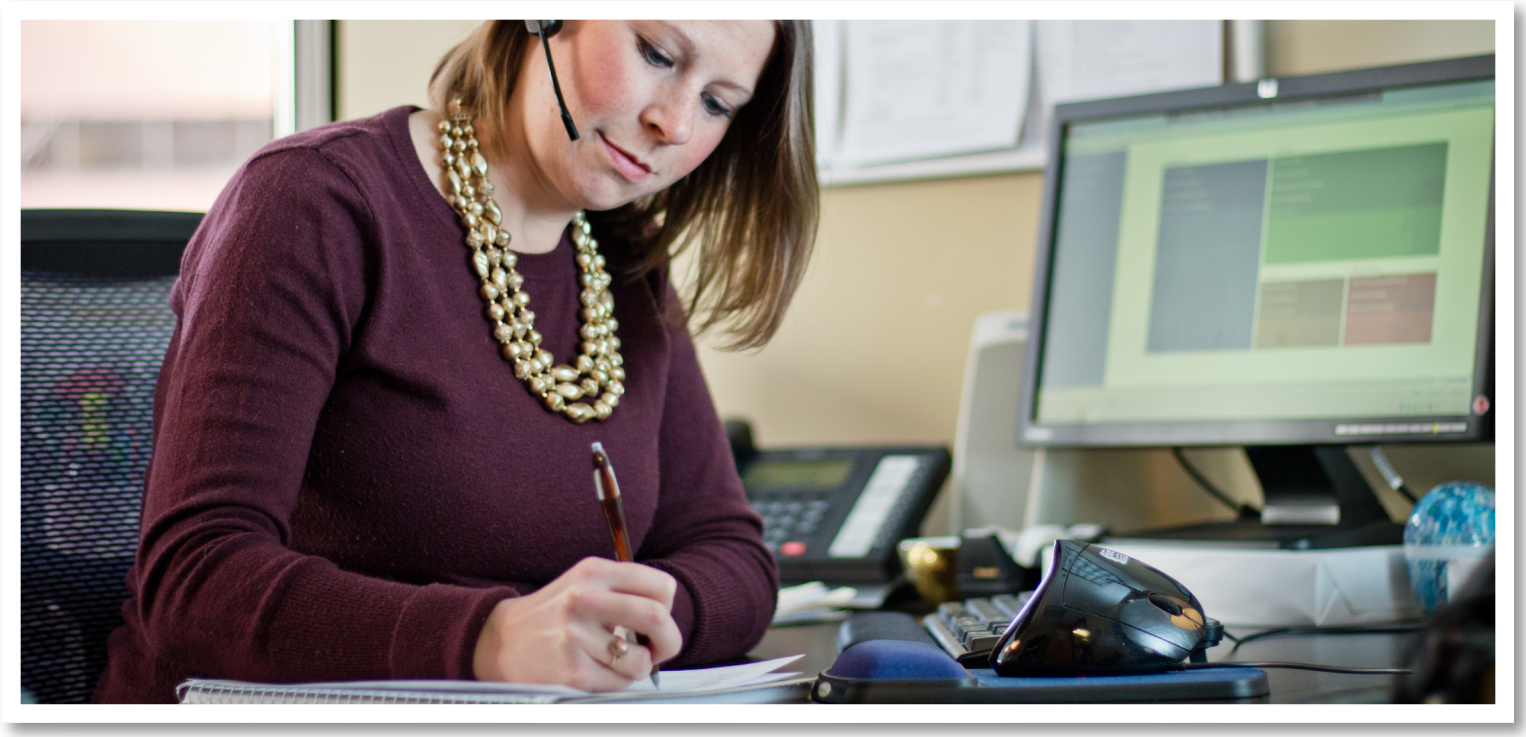
North Dakota Dementia Care Services Program

What is the value of the Dementia Care Services Program?

Recent research has demonstrated that two types of programs have potential for reducing avoidable health care and premature nursing home placement. One is the DCSP's caregiver support programs, and the other focuses on the care delivery team. Studies indicate that resources assisting caregivers have promise for reducing unnecessary emergency department visits and hospitalizations, and reducing transitions to residential care for individuals with Alzheimer's disease and other dementias.



An evaluation from the Center for Rural Health at the University of North Dakota School of Medicine and Health Sciences found:

- Over a 42-month program period, the legislature appropriated an investment of $2.2 million for the contract and has estimated results of long-term care cost saving of $39.2 million, such as those incurred through hospital or emergency related services and delays in placing a person with dementia in long-term care facilities.
- Caregivers who were more engaged in DCSP activities had greater hospital and rural ambulance cost savings compared to caregivers who were not.
- Caregivers who participated were more likely to complete important dementia care-related tasks like establishing a power of attorney and instituting health care directives.
- Caregivers who received DCSP services were twice as likely to either delay nursing home placement or decrease their likelihood of placement. The total cost avoided was $3,007,147 (based on 46 people who indicated an increase in the amount of time to place a person with the disease in an institution).

Additional Services Provided Outside of the North Dakota Care Services Program

24/7 Helpline (800.272.3900)

Staffed in 200 languages, this resource serves people with memory loss, their caregivers, healthcare professionals and the public by providing information and referrals to local community programs and services; dementia-related education; crisis assistance; and emotional support.

Support Groups

More than thirty support groups are held each month in various North Dakota locations and are led by trained volunteer facilitators to provide support, assistance, and encouragement to individuals and their care partners impacted by dementia.

Testimony
House Bill 1012 – Nikki Wegner, Alzheimer's Association, ND/MN Chapter
Human Resources Subsection of House Appropriations Committee
Representative Jon Nelson, Chairman
January 25, 2021

Chairman Nelson and members of the committee, my name is Nikki Wegner and I am the Western North Dakota Program Manager for the Alzheimer's Association. I am one of six staff who provide programs and supports to North Dakota residents impacted by Alzheimer's and other dementia.

Thank you for the opportunity to speak with you today in support of House Bill 1012.

We appreciate the continued funding included in this bill for the Dementia Care Services Program (DCSP). This longstanding partnership between the State and the Alzheimer's Association has provided a life-line for thousands of North Dakota families when they need it most, when they are faced with a dementia diagnosis and growing care needs for their family member. This program has also provided dementia education for tens of thousands of community members and professionals across the state.

While the Department of Human Services, Aging Services Division presented a recommended budget cut of $168,000 for this program in the next biennium, we are asking the committee to consider an increase of $132,000. I will explain why we believe this funding increase is necessary to meet the growing needs of North Dakota residents.

With the recent Olmstead Settlement Agreement, we understand that the legislature and the administration are looking carefully at how North Dakota can transform its long-term care system, so that people can remain at home with access to the care that they need. The DCSP supports and encourages access to available home and community-based services.

In fact, the UND Center for Rural Health studied the first few years of the DCSP at the request of the legislature. **Over a 42-month period, with an investment of $2 million, the state saved an estimated $39 million in long-term care costs from reduced hospital and emergency related services and delays in placing a person with dementia in long-term care facilities.**[1] You can see more details on that study in the document submitted with my written testimony. This document also includes a full overview of the DCSP, has a more in-depth explanation of our

[1] Center for Rural Health Assessment of North Dakota Dementia Care Services Program July 2013, p. 6

services, the total numbers of people-served, as well as a map of North Dakota showing our service numbers by county.

The goals of the DCSP are 1) to improve care, quality of life, and health outcomes, and 2) to reduce total cost of care associated with the disease for individuals, families and ultimately the state budget.

In testimony to this committee, DHS mentioned that in response to public health recommendations during the pandemic, that we have transitioned to providing training in a virtual format. They also further indicated that with virtual training, they expect to see a significant reduction in costs because of reduced travel and administrative costs.

While virtual training has been useful during the pandemic and well-received by professionals, we caution against moving to a fully virtual model. We still believe in-person education is the most effective way to improve quality care. Additionally, community members have not been as accepting of video technology, with some experiencing technical difficulties in connecting, and many indicating a preference for in-person services as soon as it is safe to do so. Given professional training is only a small component of the DCSP services, and there are community members who cannot or will not participate virtually, we recommend a hybrid model post-pandemic.

In the current contract for the DCSP[2], the Alzheimer's Association has:

- Delivered 1,744 Care Consultations – for 1,229 caregivers on behalf of 640 people living with dementia.
- Educated 2,054 community members across the state.
- Trained 135 law enforcement and 1,198 health care professionals.
- Referred 120 people to Family Care Services Program.

While professional training across the state is a valuable asset, it does not represent the largest impact of this program.

The greatest value of the DCSP remains supporting people directly impacted by dementia. We educate, support and provide resources to individuals living with dementia, their caregivers and families. The innovative services provided promote early detection and diagnosis, care coordination, effective caregiver training, support groups, and planning for the future.

[2] Data collected by the Alzheimer's Association for the Dementia Care Services Program contract July 1, 2019 through November 30, 2020

It is important to note that the services provided through the DCSP are available to all residents regardless of income, and differ from case management services provided through Medicaid-waivers. Case management is a valuable tool for those who qualify for those programs, but does not provide the same expert consultation provided by the Alzheimer's Association for those impacted by dementia.

Dementia that is unmanaged negatively impacts the individual diagnosed, their caregivers and ultimately creates a costly toll for communities and on the economy. Consider a few facts from our research:

State Costs
North Dakota's 2020 Medicaid costs for people living with dementia were $190 million – and that cost is expected to rise 13.2% by 2025.[3]

The average annual per person Medicaid cost for someone without dementia is $374, versus $8,779 for someone with dementia – that means that a person with dementia costs Medicaid ***23 times more*** than a person without dementia.[4]

Family Costs
Out of pocket costs for an individual with dementia are 3.5 times greater than for those without. [5]

We estimate that the value of care provided by North Dakota's 30,000 unpaid dementia caregivers is $454 million.[6]

Why are these costs so high?

1. Dementia complicates the management of other conditions,
2. People with dementia have more hospitalizations, in fact, twice as many as other older adults,[7]
3. And people with dementia have more emergency room visits.

The DCSP can help reduce these high costs. For example, studies have consistently shown that active management of dementia can improve the quality of life of affected individuals and their

[3] 2020 North Dakota Alzheimer's Statistics
[4] Alzheimer's Association 2020 Alzheimer's Disease Facts and Figures, p. 46
[5] *Ibid, p. 47*
[6] 2020 North Dakota Alzheimer's Statistics
[7] Alzheimer's Association 2020 Alzheimer's Disease Facts and Figures, p. 48

caregivers.[8] And that is where the Dementia Care Services Program enters the equation for North Dakota.

Growing Need

The need for care and support across North Dakota is growing. One in 10 people age 65 and older are living with Alzheimer's.[9] In 2017, we estimated there were 14,000 North Dakotans living with Alzheimer's. Today, we estimate that number to be 15,000. We expect those numbers to rise to 16,000 by 2025, an increase of 14% in just 8 years.[10]

Additionally, the Department of Human Services has indicated a need for a self-paced, online professional dementia education program to train Qualified Service Providers (QSPs). We support this because we know that staff training is an important determinant of quality dementia care across the long-term care spectrum.[11] The Alzheimer's Association has developed a program to deliver evidence-based online dementia training based on our nationally recognized Dementia Care Practice Recommendations.

Request for Funding Increase

To respond to this growing need, we are seeking an 11% increase in funding from $1,200,000 to $1,332,000. Please note that this program has never received a funding increase since it began in 2010.

Without these dollars, we will be unable to meet the increased demand for care consultation, professional training and community education, leaving residents with less access to these vital services that help to keep those living with dementia at home in the community.

We look forward to the continued partnership with the State to better support North Dakota residents and reduce long-term costs to the State. With the State's continued support, the Alzheimer's Association aims to ensure that everyone in North Dakota has access to the services proven to improve disease management and increase family support. We ask this committee to support the funding necessary to continue these vital services and expand our ability to serve the growing need.

Thank you for your consideration. I would be happy to answer any questions you may have.

HB 1012 #2498
NDACP Testimony
House Appropriations Committee
Human Resources Division
Hon. Jon Nelson, Chairman
January 25, 2021

Chairman Nelson and members of the Human Resources Division of the House Appropriations Committee, good morning, and thank you for this opportunity. I am Bruce Murry, Executive Director of the North Dakota Association of Community Providers (NDACP.org). NDACP is the membership organization of 30 licensed providers of services to North Dakotans with developmental disabilities (DD). We serve about 90% of people with DD in North Dakota.

As a registered lobbyist for NDACP, I would like to introduce several board members who will give in-person or video testimony from their respective areas of expertise:

Julie Erickson, CEO of Grand Forks Growth and Support Center, Grand Forks;
Scott Anderson, Program Service Director for Development Homes, Inc., Grand Forks;
Lorena Poppe, CEO of Poppy's Promise, Bismarck, NDACP Vice President;
Scott Burtsfield, CEO of Vocational Training Centers (VTC), Fargo;
Tom Newberger, CEO of Red River Human Services Foundation, Fargo; and
Jon Larson, CEO of Enable, Inc., Bismarck, our NDACP President.

I'd also like to introduce another NDACP member, Brooke Austin, CEO of Community Living Services, Fargo, who submitted written testimony about Section 11 services.

NDACP has a relatively simple legislative platform for the 2021-2023 biennium, in recognition that uncertain times face the energy and agricultural sectors in our state.

- Restoration of approximately eleven million dollars ($11,000,000) to provider rates for residential habilitation and intermediate care facilities for people with intellectual and developmental disabilities (ICFID);
  - Maintenance of the Governor's proposed two million, four hundred thousand dollar ($2,400,000) to day support services such as individual employment, group employment, and prevocational services, with a matching reduction to ICFID and residential habilitation;
- Inflationary increases to DD providers of 3% each year of the 2022 - 2023 biennium;
- Emergency appropriation of up to $250,000 to NDDHS to financially stabilize DD providers disproportionately affected by the COVID-19 emergency — especially In Home Support and Day Service providers who specialize in those needed services;
- Restoration of all cuts to Section 11 State General Fund services to people with DD who don't qualify for the DD Medicaid Waiver;

- Fully fund the 1915(i) Medicaid Amendment with special attention paid to ensure it remains accessible to people with DD/ID, as currently planned;
- Fully fund reforms and behavioral health initiatives of the Life Skill and Transition Center;
- Retention of a substantial state tax credit to employers who hire North Dakotans with developmental disabilities and mental illness, in HB 1405 (2021).

We also support restoration of funding for recreation and leisure centers with consideration of serving additional communities; a close review of the infant development and Part C budgets to ensure timely services can be brought to bear to minimize developmental delays; and strengthening of rates in related home and community based services to North Dakotans with other kinds of disabilities — QSP services under Aging Services and for brain injury, as well as 1915(i) Medicaid Amendment behavioral health services. NDACP is persuaded that building a new State Hospital as proposed in HB 1012 makes sense to move more mental health services to the community. It is difficult to move beyond brick and mortar legacies built by generations past, but it is probably time.

Many of you know we have welcomed Angela Dinius as Workforce Development Director for NDACP. She and I are both happy to answer any questions that may arise about NDACP, its members' services to people, and our priorities. Our contact information is below.

Thank you for your kind attention.

North Dakota Association of Community Providers

HB 1012 #3055
Testimony
House Appropriations Committee
Human Resources Division
Hon. Jon Nelson, Chairman
January 25, 2021

Good morning Chairman Nelson and members of the Human Resources Division of the House Appropriations Committee. My name is Julie Erickson and I want to thank you all for this tremendous opportunity to stand in front of you today and share a part of my journey and thoughts with all of you.

My experience with the developmental disability field over the past 15 years has been unique, challenging at times, and very passion filled. For you to best understand my perspective, I will share the trifold areas of different roles in my life that have shaped this view. First, I am the executive director for a Day Support program in Grand Forks called Grand Forks Growth and Support Center. Secondly, I had the privilege of teaching at the University of North Dakota in the rehabilitation and human services Undergraduate program. Lastly, and what I believe to be my most important role, I have the honor of being the mother to an amazing 14-year-old boy named Ryan.

Ryan is my third child and I knew he was a little bit different from my other children almost immediately after he was born. He did not meet his milestones at the same rate as my other two children and would often learn a skill and then lose that skill such a smiling or sitting up. We started Ryan in the infant development program to start tracking his progress and laying the foundation for services to help him thrive. At seven months old, Ryan began having severe seizures that ranged from 2 to 10 minutes long. There were periods of time where all Ryan did was seizure or sleep. He tried and failed seven different seizure medications before we were sent to Saint Paul Children's Hospital for further help. Ryan underwent a left functional hemispherectomy at the age of 11 months old. As his parents, we were very aware that the removal of the left hemisphere of Ryan's brain would have many impacts on his functioning and skills throughout his whole life. We also knew the other option is that he would probably die from his seizures if we did not choose this surgery. Ryan had two major brain surgeries within a week of each other to remove the tissue that was causing the seizure activity. The surgery was successful but left him with many major deficits.

His right peripheral vision field is cut and will never be repaired, he can use his right arm but his hand is not functional to do skills with. He walks and gallops with a limp and an uneven gait

pattern. And lastly, since they removed his speech center, Ryan has many challenges with communicating. Intellectually, he functions at about a three or four-year-old level. He can understand anything and everything that people say to him and is able to talk in small phrases that are sometimes hard to understand.

He is the most loving, sensitive, caring, and exceptional boy I have ever met. He values the small things in life like his family teachers and those around him and just really likes to be with people. He is in eighth grade at Schroeder Middle School in Grand Forks and is surrounded by a wonderful staff and also has a wonderful medical team. Ryan has received services through North Dakota Medicaid since he was nine months old. He has been through five brain surgeries, three orthopedic surgeries, months and months of hospital stays filled with uncomfortable tests and procedures. He has been through more hours of therapy than I can count. He is a fighter! He is my why! I tell you about my son Ryan not to gain your pity or for you to admire me just for surviving the tough times that I have been through. But I want to show you my testimony comes from multiple perspectives, not only as a developmental disabilities provider, but as the mother of a child with very severe disabilities.

The skills I gained navigating through the years of raising a special needs child actually were the greatest experience I could have had to become the director of Grand Forks Growth and Support, which was formally known as Agassiz Enterprises. Agassiz Enterprises was a developmental disability provider that started in the late 1970s. When I took over as their director in 2017, I most definitely had my hands full and many challenges against me. In a nutshell, I took a place that was basically functioning as outdated institution-type center. A place that needed tremendous updates to be accessible, ethical, and most of all a place that I would even feel comfortable bringing my son for care someday. This set the bar very high for all employees that worked at our center. After seven weeks as the executive director, we rebranded and changed our business name to begin a new start. I couldn't be more proud of the team that I have and how far we have come in 3 1/2 years. This experience gave me the perspective to know that the disability field still needs so much work and it needs to come from multiple entities who come together to work for the greater good of this community.

I will speak now to what I have seen in the last 3 1/2 years of being a provider of developmental disabilities services. As a standalone day support program our agency relies solely on the funds of Medicaid. We do not get paid for the services any time the individuals that we support do not attend day program. During the COVID pandemic, We have faced major financial challenges from the decrease in attendance of those who attend our day program due

to obstacles that were outside of our control. We were fortunate to apply and receive the PPP loan funding in April which eventually turned into a grant. This funding however was not enough. Myself and a few other smaller providers gathered And asked for more financial assistance from the state. We were able to apply and received four separate retainer payments which have helped us maintain our staff and stay open. We have 36 people who attend our day program close to 40 hours a week and there were days in November when we only had nine of these people present for services due to many COVID related reasons. Somehow, we survived 2020 and have started to return back to more of a normal attendance rate in the new year. Although we survived this challenging time, we do not have much left in our reserve fund going forward and any cuts to developmental disability providers would severely impact us. The funds the DD Division provided through Appendix K to stabilize us have been exhausted, and more.

I fully believe that people should have options for their services in their life. Without smaller providers these options would be taken away. I think it is important to look at a smaller providers as the small town businesses. We have heart, integrity and passion for our work and those we support at our agencies. We are the directors and staff who go above and beyond to make sure that people are receiving the best services that they can. Throughout the COVID pandemic, we had multiple testing events at our agency to decrease COVID risk on our staff and those supported. You could find me, dressed in full PPE climbing in and out of the vehicles to assist, calm, and hold the hands of the individuals we support while they were getting their COVID test.This is just one example of the small provider flavor I was speaking of. North Dakota needs providers with these qualities and if we face more financial strain there may be many of these providers who can no longer keep their doors open.

I would like to talk briefly about the effect the proposed $11 million cuts in the area of developmental disabilities would have on the agencies that provide services and those that receive services in the state of North Dakota. As a whole, developmental disability providers struggle to find a workforce that will bring high-quality care to the people that we support. Direct support professional's are the biggest group of staff that we struggle to hire and maintain. Although it is a rewarding job at times, it is also a very physical and stressful job. Cuts in our budget would present us with many more challenges when hiring, training and maintaining these employees. With low paid or not enough direct support professional staff, agencies are unable to provide high-quality care! High quality care is the most important thing. I can tell you right now, I struggle as Ryan's mother to think about it would be like to put him in a residential facility. My husband and I hope to keep him at home with us as long as we can,

and we also hope and pray that the quality of services continues to grow and increase in the years to come.

People with intellectual and developmental disabilities need the highest care possible. They have already experienced so much hardship and struggle in their life — even those who don't remember exactly whathard times and struggle they faced. Their resilience and real-quality of life is shown by the love, smiles and happiness that many of the people who receive DD services display every day of their lives. Plain and simple, they deserve the very best from the developmental disabilities industry.

Thank you again for the opportunity to stand before you and give my testimony. I welcome any questions that you may have.

Testimony #2415
House Bill 1012 – Development Homes, Inc.
House Appropriations – Human Resources Division
Hon. Jon Nelson, Chairman
January 25, 2021

Good morning Chairman Nelson and other distinguished Committee members;

My name is Scott Anderson, Program Service Director for Development Homes, Inc. (DHI) from Grand Forks, ND. I am honored and grateful to have his opportunity to speak with you on behalf of DHI, other ND Community Providers, and all the people we serve and support. The focus of my testimony will be to speak to the importance of the quality support and services we as Community Providers do each and every day, seven days a week and 365 days a year. We are fortunate to have the opportunity to serve and support others in the great state of ND.

Development Homes, Inc.(DHI) was established in 1974 supporting children and 46 years later we continue to serve children, along with adults and families as well. Our mission: "Development Homes, Inc. is committed to the provision of quality community based support services to person with disabilities, enabling them to maximize their individual potential, and fulfill their personal dreams." DHI provides a variety of services to about 170 unique individuals and we employ about 500 staff. DHI is currently the 8th largest employer in our Grand Forks community. The people we support, our organization and our staff, have a significant financial impact on our community. With the continued support from this legislature, DHI and every other provider will continue to provide opportunities for people to have the quality lives that we all aspire to have.

In March of 2020, the impact COVID-19 In ND reached a level that impacted each and every community across the state. Our schools were closed to all in-school education and the all too familiar term of "distance learning" was established and implemented. For all parents and those providers who support children, of which DHI is one, the impact was immediate and without precedent. The announcement was made on March 15, 2020 that kids would not be going to their school building for education starting the very next day, March 16, 2020. The determination and dedication of parents and providers to forge ahead with providing immediate educational support to our children was remarkable. At DHI, we were supporting 12 kids in placements living outside the family home. Most of the kids we support in that environment are in need of significant staff support, with most receiving a staff designated to support each child individually. The needed support, just within DHI, would be 10-12 staff working an additional eight (8) hours per day, five (5) days per week for the next 11 weeks. This totals approximately 4,000 to 5000 hours of unscheduled staffing time and the task of providing that support started the very next day. Several other providers across the state were also thrust into "stepping up" immediately to support many children during daytime, school hours. With the very common and prevalent "can-do" attitude, providers across the state were able to meet this challenge and provide the needed support for our kids. This event truly exemplifies the caring and quality of the organizations ND has providing services to people with disabilities. And one more lingering issue, not one provider has been given a dime of reimbursement for providing this support to our kids over these 11 weeks from March 16, 2020 through May 28, 2020. For providers in the state of ND, it is about the quality of services and being there

when we are needed, no matter the circumstances. We believe that efficiency is important but quality is essential. We need to be good stewards of the resources we have, but above all else, when needed, we need to be prepared to the best we can be, and deliver each and every time. But now that we have spent our hard won reserves to provide these services, our providers are less able to face the next crisis.

In November 2019, DHI opened a new Children's ICF-IDD in Grand Forks. This was a special project in collaboration with the DD Division, Life Skills and Training Center (LSTC) and DHI for the purpose of residential services for four children that were currently at LSTC. This ICF-IDD (5509) became fully operational on 2/24/2020 when the fourth of four boys moved in. This endeavor was certainly going to be challenging enough without COVID-19 but COVID-19 and school closings happened just three weeks later. Each of the four boys DHI was serving at 5509 had behavioral and mental health concerns. As was stated earlier, DHI has been around 46 years and has always served children. The difficulties we encountered and still encounter today are the lack of community resources to help support people, especially children, with higher behavioral needs when they present these difficulties. Sue Forester and the LSTC staff have been excellent to work with and been extremely supportive. The most significant issue with LSTC is logistics. Grafton is an hour away from Grand Forks. When behavioral issues arise, they can escalate very quickly, and any support LSTC can offer will not be timely enough to assist with resolving the event.

DHI has its' own "crisis team", made up of mostly administrative professionals with years of experience and all are Therapeutic Response trainers. DHI has this team so that we can respond with in-person support quickly during our most difficult behavioral events. Even with this timely support, sometimes events reach the intensity that mental health professionals are needed to assess the person having difficulty, for safety for themselves and others. When these calls are made, the first responders are the Grand Forks Police officers. Most times, the police officers arrive and just their presence will de-escalate the event, but not always. We have had events involving both children and adults we serve that have involved the need for physical, chemical, as well as mechanical(handcuffs) restraints with police officers and our staff intervening to try and keep everyone safe. In cases such as these, the paramedics arrive and we ask that the person be transported to the hospital for a psychiatric evaluation. The Grand Forks Police Department has been very professional, responsive and supportive during each of these intense events. The police are sometimes unsure of what their role is at times, as we are not looking for criminal charges against those struggling. Because of this, they can be frustrated with us and ask why did we call them. To be clear, when we make a call for emergency services, we are really looking for a safe transport to the hospital so that person struggling can be assessed.

Once at the hospital, it may take 30 minutes to several hours for psychiatric services to get involved and the assessment completed. Often there is lab work to insure medication levels are within therapeutic range. To be clear, the individuals having difficult have most times presented physical aggression toward others, including staff, others we support and even police officers. Property damage such as making holes in walls, throwing objects, slamming doors with enough force to dislodge the door or the door frame, and breaking windows are common during these intense events. The people are also most times, self-injurious and elopement risks as well. The hospital in Grand Forks has been very unwilling to admit people presenting these types of difficulties. In my conversations with the on-call psychiatrists assessing, especially when assessing children, they will not admit. I have been told that "We (the

hospital) cannot admit this person as we are not equipped to handle them as they are just too violent." In an ironic twist, soon after they say that, they discharge the person and say that they are calm enough to return to their home. This is not just a DHI or Grand Forks issue. Providers across our state can tell you very similar stories about the frustration of taking on people with significant challenges, without adequate community support from others to assist the person in being successful in their community. As you are all well aware the behavioral and mental health support systems in ND, as well as in our country, are overwhelmed and under-staffed. There are more people in need of this type of support than there is support available. If providers are going to be successful with reducing the number of people at LSTC, we are going to need to be fully-funded to provide the support needed, creative with our approaches (like our own response teams), collaborative with LSTC and our home regions, and have adequate and responsive community support and services that will be of assistance when that assistance is needed most. The net result of not having the supports and resources needed, is a failed placement. When we are working to help those who pose the greatest need, efficient is important but quality is essential. Success means allowing people to thrive in an environment where we learn and grow every day. When people are able to maximize their full potential and live the life they dream of, that is definitely success!

I want to thank each of you for your time and attention today. It has been an honor and privilege to have this opportunity to share on behalf of Development Homes, Inc. as well as the many wonderful and dedicated providers in the great state of North Dakota.

Respectfully,

Scott Anderson, Program Services Director
Development Homes, Inc.

Testimony #2499
House Bill 1012 – Department of Human Services Budget
House Appropriations – Human Resources Division
Representative Jon Nelson, Chairman

January 25, 2021

Chairman Nelson and Members of the House Appropriations Committee – Human Resources Division:

My name is Lorena Poppe. I am the owner and executive director of Poppy's Promise, a Bismarck-based provider of In-Home Support services through the Developmental Disabilities traditional Home and Community Based Waiver. I am testifying today in support of the Department of Human Services budget, particularly that of the Developmental Disabilities Division, with amendments.

I started Poppy's Promise in the Fall of 2017 in response to families of kids with disabilities expressing there was a shortage of providers to be available to meet the needs of their children and families. My goals were to 1) be another option as families seek out services that will best meet the needs of their children, and 2) meet kids and families where they are at on their unique journeys to full inclusion and participation in home and community life. We believe strongly in designing supports that will help to keep kids in their family homes and communities and minimize the need for institutionalization in a place that is unfamiliar to the child. In our short existence, we have seen the difference a small provider organization can make and are proud that we have been part of keeping families together in their home communities.

I am the sole owner of Poppy's Promise. I started my business by getting a Small Business Administration loan and taking a leap of faith. I knew there was a need, but understand now more than ever, 3 ½ years later, how critical it is that DD providers be supported to do the important work of helping people with disabilities achieve maximum health, happiness and freedom of choice across their lifetimes. At Poppy's Promise, we operate on a month-to-month basis without having a large financial reserve to fall back on. Since opening the doors at Poppy's Promise, I have been excited to see other new provider organizations popping up across the state. This is an exciting thing for North Dakota and I believe there is definitely a place for new organizations that can work together with longstanding providers to assure gaps in services are filled and people can receive supports and services in the least restrictive setting.

In listening to the budget detail of the DD Division of the Department of Human Services, I am concerned that new providers and those that are smaller and more specialized are not being fully considered. Specifically regarding the In-Home Supports program, you heard testimony from the Department indicating that program had the largest drop in utilization over the course of the Covid-19 pandemic (27%). And yet, In-Home Supports was left out of the Appendix K option to receive retainer payments to help providers stay in business during the pandemic. For providers of services that were eligible to receive retainer payments, those payments were an important part of keeping the doors of those businesses open. With the current extension of the Appendix K, there is an opportunity for the Department to extend the retainer payment option to those providers most in need and help to assure the services families rely upon don't disappear.

Another area of concern for all providers of DD services, but especially small providers, is the intention of the Department of Human Services to require providers to absorb the cost of accreditation necessary to maintain DD licensure. Because DHS contracts with one organization for accreditation, the Council on Quality and Leadership (CQL), providers would be forced to pay several thousands of dollars toward the accreditation process. This includes travel and lodging expenses of CQL reviewers coming to North Dakota from across the country. There is no reimbursement for accreditation built into the DHS budget. Poppy's Promise does not have the ability to cover that cost. I believe strongly in review processes being in place to assure quality of services, but also know the reality of trying to maintain a business that does not have the ability to set aside thousands of dollars for unreimbursed licensure requirements.

I come before you today to ask that you consider the current state of services for people with disabilities during an ongoing pandemic, the financial vulnerability of new and small providers, and the addition or preservation of funds to assure all providers who are relied on heavily by the citizens of North Dakota are able to survive and stand strong in continuing to provide supports and services.

Thank you for your time today, and I would be happy to answer any questions you may have.

Testimony Regarding House Bill 1012 #2460
House Appropriations Committee
Human Resources Division
Representative Jon Nelson, Chair
January 25, 2021

Good Morning Chairman Nelson, members of the House Appropriations Committee, my name is Scott Burtsfield, and I am a member of the North Dakota Association of Community Providers and the Executive Director for the Vocational Training Center, a licensed service provider for people with intellectual and developmental disabilities, located in Fargo, North Dakota. I want to first thank you for the opportunity to speak to you about House Bill 1012.

As most of you are aware, in 2018 a new payment system was implemented that forever changed the landscape regarding how North Dakota pays for services to those providing care and support for individuals with Intellectual and Developmental Disabilities. The implementation of this new system denoted a culmination of research, design and collaboration that intended to impartially, efficiently, and soundly allocate resources for the state's most vulnerable citizens.

Now, a couple of years into the new system, we realize our task is not quite completed. We still have work to do. We understand that there remain issues to be resolved and changes to be made. And we're doing it.

For instance, community providers, working diligently and collaboratively with Developmental Disabilities Division leadership, have recently been addressing deficiencies pertaining to inadequate reimbursement rates for services such as Day Habilitation, Prevocational Training and Small Group Employment Supports.

However, other matters will need further scrutiny as we move forward. For example, in addition to inadequate rates, organizations delivering solely Day Support services experience even greater challenges regarding provider liability and the under-utilization of expected and contracted services.

These challenges become especially evident in matters of contracted attendance for supported individuals versus actual attendance. Basically, this means that whether supported individuals attend their Day programs or not, for whatever reason, providers of Day Services remain responsible for providing 100 percent of the staffing, resources, etc. without compensation for the services and expenses they incur based on the expected attendance.

Though the issue was evident at the onset of our payment system over two years ago, this flaw became especially palpable throughout the COVID-19 pandemic where smaller

providers and specialized providers of Day and Family Supportive Services were disproportionally impacted for many of the above-mentioned reasons.

Another concerning COVID casualty that will need further examination, by all vested parties, pertains to matters of choices and restrictions for individuals with Intellectual/Developmental Disabilities in our state.

Throughout this pandemic there were too many instances in which supported individuals were confined to their residence for extended periods of time – against their will, choice, or volition. While certain situations warranted quarantining for obvious health and safety reasons, there were also many instances in which the "lockdowns" were unwarranted and became harmful. Harmful to an individual's mental health, harmful to their employment placement, and harmful to their sense of being and self-worth. It is now all too easy to cite the many situations in which we found the cure to be worse than the disease.

We will see these types of negative effects grow for many of the supported individuals served throughout North Dakota. However, this time it will not come in the form of COVID-19. It will be due to the federal elimination of Section 14(c) of the Fair Labor Standards Act (FLSA) which allows employers to pay wages below the federal minimum to employees who have significant disabilities.

While this is a highly controversial topic, with very valid points on both sides of the issue, there are many instances in which the utilization of subminimum wages creates meaningful employment opportunities for people with very significant disabilities. It is widely accepted that work is a valued activity in our society that promotes independence and enables individuals to participate in the whole community experience.

However, many with significant disabilities experience limited productivity which too often translates to limited job opportunities. Many deadline-driven or task-driven employers cannot look past the limited productivity or nature of the disability in their hiring decisions to realize they are passing by individuals that are tremendous assets to any work environment and desire to use their skills and abilities to the greatest extent possible.

Unfortunately, this may all become a moot point if employers will be required to pay the new proposed federal minimum wage. For one, such actions will not only destroy smaller organizations such as our beloved Vocational Training Center, but also create a very real scenario in which individuals with the most significant disabilities would likely never be offered the opportunity to work at all.

As you can see, in our industry, there is no shortage of trials, tribulations, transformations and reforms. However, through it all, there has been one fundamental element to the success of the individuals we support. This has always been our Direct Support Professionals (DSPs).

The incredible Direct Support Professionals in our state literally give their blood, sweat and tears to provide support and care for the state's most vulnerable population. They are increasingly held to much higher standards in terms of what is expected of them in their day-to-day work. In the last nearly three years there have been increased standards, training requirements, data collection and entry…the list goes on. These expectations have been imposed upon them with implementation of many of the new rules, policies, and mandates that accompanied the implementation of the payment system.

As a show of appreciation for DSPs increasing roles, responsibilities, expectations, and hazardous job duties, the Governor is recommending our DSPs and our services for individuals with disabilities be treated as "less than." "Less than" his recommendations for increases in other industries, "less than" his support for other professionals, and "less than" state employees who do not face being hit, bit, kicked, covered in human excrement daily.

Therefore, I am asking you to please cast aside the Governor's recommendation and support NDACP's request to leave provider services rates unscathed and support a 3% increase for each year of the biennium for service providers and the Direct Support Professionals we employ.

Again, I wish to thank Chairman Nelson and fellow members of the House Appropriations Committee for the opportunity to speak to you about House Bill 1012. I would be happy to answer any questions.

Scott Burtsfield, Executive Director
The Vocational Training Center

Testimony #2419
House Bill 1012 – Funding DD Recreational & Social Centers
House Appropriations – Human Resources Division
Rep. Jon Nelson, Chairman
January 25, 2021

Chairman Nelson and members of the House Appropriations Human Resources Division, for the record, my name is Tom Newberger. I am the Chief Executive Officer for Red River Human Services Foundation. We provide services to people with Intellectual and Developmental Disabilities (IDD) in Fargo, West Fargo and Wahpeton, North Dakota. I am here today to ask you to restore the $150,000 that was removed from the Governor's budget in the "Budget Account Code 712000" for the 2021-2023 budget. These funds are for Recreational and Social activities for people with IDD in Fargo and Grand Forks.

I will now explain why these funds are so critical and needed. First, our agency is a licensed and accredited provider for services. One of our programs is the Activity Center that has existed since 1972 and has 425 members. During this time period, the Activity Center has provided Recreational and Social services to people not only from our agency, but from the community and other IDD service providers. We provide services in the afternoons, evenings and on week-ends so people with disabilities can live better lives. Examples of what our Activity Center offers for people with disabilities is hosting dances, playing pool, darts and air hockey, ceramics, safety training classes, such as how to stay safe while walking or riding bikes, providing food for those who cannot afford it, going to people's homes or apartments if they are sick and buying them medications if they cannot afford it. We also support camping during the summer which they really enjoy. These are just a few examples of what we do to give people with disabilities better lives.

A question I received during the 2017-2019 legislative session from the Appropriations Committee was "Do other licensed residential providers do these services too?" This was a great question and really helped all the legislators at that hearing understand our critical services. My response to the question was yes, the residential providers do their best to give people in their programs options, but it is generally very difficult to do based on the limited number of FTEs they

have. For example, if everyone on this committee lived in the same group home and I am the only staff working with you in the late afternoon and evening, and one of you wants to stay home and watch television, another one of you wants to go out and get an ice cream cone, another one of you wants to go the park and another one of you wants to go bowling while someone else wants to play pool and the last one of you wants to do ceramics. The question is how can I as your only staff keep you all happy when everyone wants to do something different? The way to keep you all happy is to bring you to the Activity Center which our non-profit operates and our staff will meet your dreams and desires. The Activity Center promotes social connections and helps prevent mental health issues and reduces anxiety and possible physical aggression. So briefly, this is what our services do.

From a financial perspective, our annual budget for the Activity Center is $221,000 and the State has supported our services with $37,500 per year or seventeen percent (17%) of our budget. From an Activity Center member's perspective, the $37,500 from the State equates to just below twenty-five cents per member per day. This is a very low cost. We previously implemented membership dues of $8.00 per month and then reduced it to $6.00 per month to make it more affordable. Most of the members could not afford it, so now have no membership dues.

I kindly and strongly recommend that this committee re-instate the funding for the two Recreational and Social Centers in our State and consider increasing it to fifty-cents per day per member or a total of $300,000 per Biennium as a good portion of our other funding has been lost.

Thank you and I will be happy to answer any questions you may have.

House Appropriations – Human Resources Committee #2281

Testimony on House Bill 1012

Representative Jon O. Nelson – Chairman

January 25, 2021

Chairman Nelson and members of the House Appropriations – Human Resources Division Committee, my name is Donna Byzewski and I am the Program Director of the corporate guardianship program at Catholic Charities North Dakota. I am respectfully asking your committee to approve funding as detailed in the Developmental Disabilities Division budget for corporate guardianship services for people with intellectual disabilities. To continue providing quality services to meet the needs of current and future clients, we respectfully ask for a cost of living increase of 3% for the first year of the biennium and 3% for the second year.

The court appoints a guardian when a person's capacity to make decisions is compromised and he or she is at risk of neglect, abuse and exploitation. It is important to note that many adults with intellectual disabilities are their own decision maker. However, there are critical times when the person may need the services of a guardian, and if no one else is available or appropriate, a corporate guardianship is a necessity. Corporate guardianship is the guardian of last resort. Our contract specifies that Catholic Charities ND can only accept referrals from Developmental Disabilities Program Managers from the regional human service centers in North Dakota.

In the past 18 months, we have admitted 61 individuals to our program. We have made great strides reducing our waiting list for services. One year ago, our waiting list was at an all-time high of 126 people and our current list has the names of 92 persons. The reduction is primarily due to the additional legislative funding we received for 20 new slots/openings on 7/1/19. This has had a tremendous impact on the lives of people who were on the waiting list and I sincerely thank you for making this happen!

Our request for the next biennium is as follows:

7/1/21 to 6/30/22	489 wards x $8.37 x 365 days = $1,493,919 489 wards x $0.25 (3% COL) x 365 days = $44,621	$1,538,540
7/1/22 to 6/30/23	489 wards x $8.62 x 365 days = $1,538,540 489 wards x $0.26 (3% COL) x 365 days = $46,406	$1,584,946
7/1/21 to 6/30/23	Petitioning costs	$89,555
	Total for FY 2021 & FY 2022	**$3,213,041**

The request that we are submitting is bare bones, allowing us the capacity to meet the needs of 489 wards during the next biennium. We realize that the Department of Human Services' budget is tight but the requested funding will help assure that we have the staff and resources to meet the critical health and safety needs of the individuals we serve. Thank you for the opportunity to stand before you today and I would be happy to answer any questions you may have.

Testimony on HB 1012 #2423
Hon. Jon Nelson, Chairman
Human Resources Division
House Appropriations Committee
January 25, 2021

Chairman Nelson and members of the committee, my name is Jon Larson and I am the executive director of Enable Inc., a licensed developmental disabilities provider here in Bismarck. I also currently serve as the president of our provider association, NDACP.

On April 01, 2018 North Dakota implemented a long-awaited new payment system for developmental disability providers. This new payment system was developed by consultants who worked in close consultation with a steering committee that consisted of personnel from the Department of Human Services and DD providers. That steering committee began in the Spring of 2011 and continues to work on issues that arise with this still new system. I have been a member of this steering committee since its implementation.

Although not perfect the new payment system has done a good job of achieving its objective of fairly allocating resources based on individual needs as measured by a nationally recognized assessment tool and utilizing the existing allocation of resources. This new process involves the use of scores from the Supports Intensity Scale (SIS), a mathematical multiplier to connect the scores to authorized support hours, and a unit rate matrix with standardized rates for defined services, which result in a unique annual Individual Budget Allocation for every client.

This new system took years to develop and prior to implementation there were fears expressed by some providers, advocates, and consumers about the viability of continued provision of the same quality services that everyone has come to expect. Upon implementation on April 01, 2018 services continued as expected without drastic alterations to service delivery and providers have adapted to the changes created by

the new system. The steering committee continues to meet on a regular basis to address issues that have arisen since the implementation of this new system.

A central component of the new system is the Supports Intensity Scale or SIS. The SIS is a nationally normed tool that is used to identify the unique needs of the individual we support in our programs. North Dakota contracts with an independent organization, The Rushmore Group, to administer these assessments. Each individual supported is to have a new assessment every three years unless there is a significant life changing event that would require a new assessment. The Department hired a consultant in the fall of 2019 who found a trend of rising SIS scores from the assessments that occurred three years previously. A rise in the SIS score results in a higher payment to the provider. There are many reasons a SIS score would change including a deteriorating health or behavioral condition or an inaccurate score in the initial assessment or subsequent one. The information Optimus used in that conclusion is now nearly one and a half years old. They also noted at the time that they were seeing a leveling off of the increasing scores and it may indicate a stabilization of scores or even a U-shaped curve in the data that would result in a return to scores more closely related to the original.

NDACP has collected data from our members that compares the SIS score resulting from an assessment done in 2020 to the previous score and this data indicates that in aggregate the new scores are slightly lower than the previous scores resulting in lower payments to providers. The executive budget proposes a reduction in rates to residential providers based on the trends they saw prior to 2020. This new payment system is still very new and 2020 interrupted everything making data analysis difficult. The position of our association is to request that the rates in this new system not be reduced at this time to allow for the system to have time to stabilize. Adjustments to rates may be necessary but should be done in consultation with the steering committee and should be done in a manner that is cost neutral to the appropriation.

Accreditation by the Council on Quality and Leadership, CQL, has been required for licensure since the days we were operating under a lawsuit. This cost has been paid by the Department either through rate setting and cost settlement prior to the new system or directly after the new payment system. This cost is proposed to go back to providers in the executive budget. CQL accreditation is quite expensive, especially for smaller providers. This was not a cost recognized when developing rates in the new payment system and we feel that this required cost should continue to be paid by the Department.

The last area I want to address is the loss of funding for service under section 11. You have written testimony from Brooke Austin, from Community Living Services in Fargo that explains it in more detail than I will at this time. Section 11 uses state dollars at a very reasonable cost to provide a much-needed service to people who otherwise fall through the cracks. Providers receive a payment of $7.00 a day for people in this program, far less than it actually costs to provide the service. Without this service, the people in this program will likely struggle and require more urgent services that will cost more and be less appropriate to meet their needs.

In summary, I am requesting that the rates in the new payment system not be reduced as proposed in the executive budget, that accreditation costs continue to be paid by the Department and that section 11 funding be restored. In addition I recommend inflationary increases of 3% and 3% for state fiscal years 2022 and 2023. Thank-you for your consideration and I would be happy to answer any questions you may have.

Jon Larson
Executive Director, Enable, Inc.
President, NDACP

North Dakota: 2020 Long-Term Services and Supports (LTSS) State Scorecard #2402

The fourth edition of the *LTSS State Scorecard*, released in fall 2020, takes a multi-dimensional approach to measure state-level performance of LTSS systems that assist older adults, people with physical disabilities, and family caregivers. Unlike many other rankings that focus on a particular aspect of LTSS system performance, the *Scorecard* compares state LTSS systems across multiple dimensions, reflecting the importance and interconnectedness each has on the overall LTSS system. The full report is available at www.longtermscorecard.org

Data used for this *Scorecard* was analyzed in 2019, prior to the COVID-19 outbreak. Therefore, performance on this *Scorecard* does not include the impact of the pandemic on the LTSS system, which is considerable. Nevertheless, the *Scorecard* indicators continue to be highly relevant, both in the current environment and in a future post-COVID world.

Purpose: The *Scorecard* aims to empower state and federal policy makers and consumers with information they need to effectively assess their state's performance across multiple dimensions and indicators, learn from other states, and improve the lives of older adults, people with physical disabilities, and their families.

Results: The *Scorecard* examines state performance, both overall and along five key dimensions. Each dimension comprises 4 to 7 data indicators, for a total of 26 indicators. The *Scorecard* also measures changes in performance over the previous three years wherever possible (reference data available for 21 of the 26 indicators). The table below summarizes current performance and change in performance at the dimension level. Indicator data appear on the next page.

Dimension	Rank	Number of indicators with trend*	Number of indicators showing:		
			Substantial improvement	Little or no change	Substantial decline
OVERALL	**28**	**21**	**7**	**13**	**1**
Affordability & Access	**30**	6	1	4	1
Choice of Setting & Provider	**25**	6	2	4	0
Quality of Life & Quality of Care	**20**	2	1	1	0
Support for Family Caregivers**	**34**	4	2	2	0
Effective Transitions	**22**	3	1	2	0

* Trend cannot be shown if data are missing for either the current or baseline data year.
** The support for family caregivers dimension comprises 12 policy areas, organized into four broad categories. Change is shown at the category level in the table above. Policy data are shown on the next page.

North Dakota: 2020 Long-Term Services and Supports State Scorecard Data

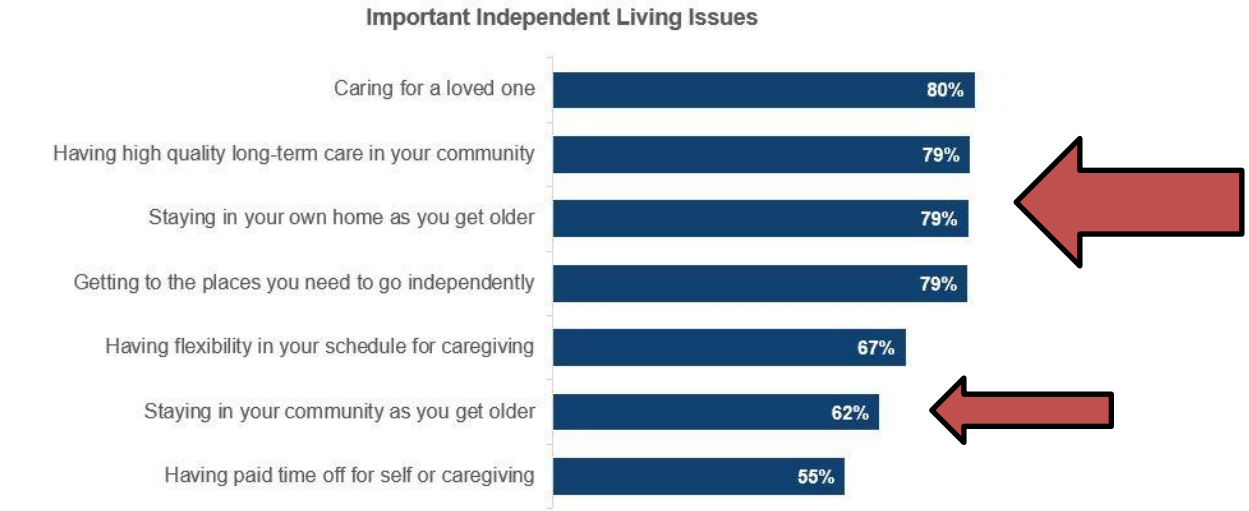
House Appropriations Committee #2403
IN SUPPORT – HB 1012 – DHS Budget – Aging Services
January 25, 2021
Josh Askvig, AARP North Dakota
jaskvig@aarp.org
(701) 355-3642

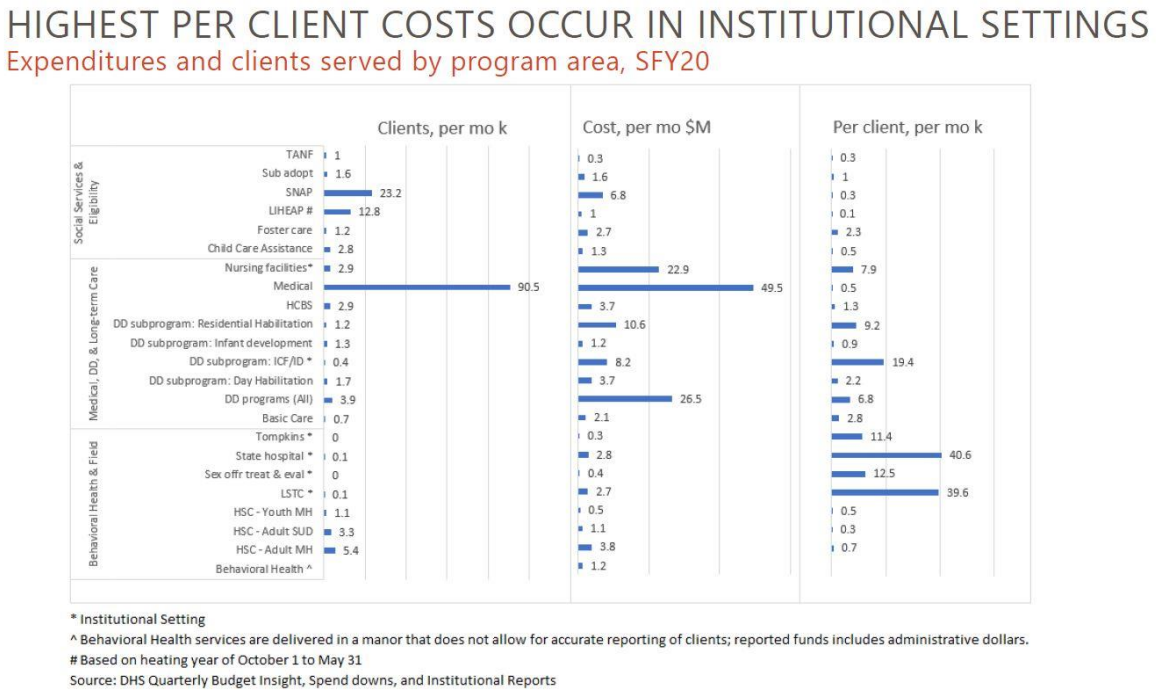


Chairman Nelson and members of the House Appropriations Human Resources Division, I am Josh Askvig, State Director at AARP North Dakota.

AARP is a non-profit, non-partisan membership organization with more than 84,000 members in North Dakota. Our mission is to empower people to choose how they live as they age.

Our story began when our founder, Dr. Ethel Percy Andrus discovered a former colleague of hers living in a chicken coop. She had run out of money and couldn't find anywhere to get the help she needed. Dr. Andrus decided she would make it her life's work to ensure older adults were given the opportunity to have dignity and purpose and founded what today is AARP.

We appreciate this committee's work to dig into issue important to older North Dakotans and this need will continue to grow. Today our population age 50+ is almost 256,000 and 50% of those households are age 65 or older. Today in North Dakota over 9 counties have a mean age of over 50 and a number of others are right on their heels.



AARP North Dakota supports the intent that DHS Director Chris Jones stated in his budget overview that the Department's effort is to provide services and care as close to home as possible. Below is a chart from our 2020 North Dakota Vital Voices Survey, a state specific survey of issues that impact North Dakotan's 45+ conducted every three years. In our survey last year, 79% indicated that staying in their own home as they got older, getting to the places they need to go and having access to quality long term care in their community was extremely or very important. Also, 62% said staying in their community as they got older was extremely or very important. It was no surprise to us and I am sure it doesn't surprise you.

I1. For the following list of issues, please indicate how important each is to you personally. (Percent 'extremely important' or 'very important') (n=722)

AARP.ORG/RESEARCH | © 2020 AARP ALL RIGHTS RESERVED.

Knowing this the work to continue to move resources, supports and efforts into delivering services through an HCBS model is commonsense. It also makes dollars and cents. If you look at the chart that was shared during the overview it is very clear that serving individuals in home and community based settings is not only preferred it is cost effective. The chart appears to show about 1/7th of the cost ($7.9k per client per month for Nursing facilities vs $1.3k per client per month for HCBS).

* Institutional Setting
^ Behavioral Health services are delivered in a manor that does not allow for accurate reporting of clients; reported funds includes administrative dollars.
# Based on heating year of October 1 to May 31
Source: DHS Quarterly Budget Insight, Spend downs, and Institutional Reports

Additionally, in line with the efforts to intervene early to stave off long term costs, the changes made last session to access the state funded Service Payments for the Elderly and Disabled (SPED), adding Expanded SPED and centralizing ADRL intake are already paying dividends.

Attached you will find the *North Dakota: 2020 Long-Term Services and Supports (LTSS) State Scorecard*. This is the 4th time the Commonwealth Fund, The Scan Foundation and AARP have teamed up to provide a state LTSS assessment with apples to apples comparisons. If you look at the card you will see North Dakota made substantial improvement in 7 of the 21 indicators. And two of those were in the area of Choice of Setting and Provider dimension. In fact, North Dakota was recognized nationally during the roll out of the 2020 Scorecard for the work it has done to make improvements.

But let's be clear, while we have done good work, we still have plenty of work to do. Specifically, look at the indicators on the back related to Nursing Home Cost, Medicaid LTSS Balance: Spending and Medicaid LTSS Balance: Users, and Successful Discharge to Community where we continue to rank low. Investments in HCBS like those in the Aging and Adults Services area only aid in moving those measures. Again, for AARP and the thousands of North Dakotans we represent, it's about choice. Older North Dakotans deserve to know they have options for care as they age. Overwhelmingly they prefer to stay in their homes and communities and the budget should continue the state moving in a direction that prioritizes Home and Community Based care.

A couple of other notes related to the Aging and Adults Services portion of the DHS budget. The importance of the Long Term Care Ombudsman should be highlighted. During the pandemic, Karla Backman and her team were a critical component to ensuring that the rights of residents and their families were respected and honored. The Ombudsman program was an often needed referral for our team at AARP as the pandemic unfolded.

Finally, we would be remiss not to mention Senior Nutrition funding. The meals programs funded through the Aging and Adults services budget are a critical life line for older adults. They promote good health and as evidenced during the pandemic a critical component to keeping individuals at home and in their communities. The North Dakota Senior Service Providers put together a document every legislative session about their meals funding. I was reading through the 2021 document and understand that it is estimated that 1 year of meals funding is equal to 5 days in a nursing home. And in too many instances malnourishment leads to hospitalization and increased LTC needs. It should also be noted that meals programs also help to combat isolation and loneliness.

Combine these factors with the idea that it appears many of these senior providers will be losing some additional federal supports they received during the pandemic and knowing they

have seen a significant shift in their costs as they have moved to almost exclusively pick up or to go meals, and there is a need for a funding increase. We would encourage you to increase the meals funding to ensure that this critical service can meet the needs.

Again, we appreciate the time to raise issues important to North Dakotans 50+ and would be happy to answer any questions. Thank you.

House Appropriations – Human Resources Division #2290

Sixty-seventh Legislative Assembly of North Dakota

House Bill No. 1012

January 25, 2021

Good afternoon, Chairman Nelson, and Members of the House Appropriations – Human Resources Division. I am Pam Mack, Director of Advocacy Services for the Protection & Advocacy Project (P&A).

P&A is an independent state agency. Its mission is to advocate for the human, civil, and legal rights of individuals with disabilities. P&A strives to ensure that every individual with a disability is treated with the same dignity and respect as all other ND citizens.

P&A is here today to support HB 1012 and the funding for services for individuals with developmental disabilities. The Department of Human Services has identified a long-range goal to purposefully focus on the need for crisis services at the Life Skills & Transition Center (LSTC). At the same time, it is working on transitioning for many of the current residents to the community, ultimately operating with a lower census. This is consistent with the Transition to the Community Task Force goals that have been established and the state's requirement to ensure that individuals with disabilities are able to live and work in the least restrictive environment.

P&A has been involved in the steering committee to collaboratively implement the reimbursement system for DD providers. The current

budget, as presented by the DD Division, includes a decrease in reimbursement rates for providers relative to the array of residential services. P&A recommends that the DD Division further determine whether the recommended residential reimbursement rates in the DD budget are adequate to provide for the level of acuity and support needs of the individuals who are transitioning out of the LSTC. This may require a need to compare the daily rate at the LSTC with current rates within community providers, the outlier process, and perhaps the establishment of tiers of service. For example, the per diem at LSTC is $1,200. The average daily reimbursement for community ICF's/IDD is just over half that amount. We cannot set up the community providers to fail by not giving them sufficient resources to serve the same client.

The current budget proposal eliminates the Section 11 grant funds from the DHS budget. These monies provide program management services for individuals with developmental disabilities who are not eligible for other DD services. This is concerning as this helps to ensure all individuals with developmental disabilities receive appropriate treatment, services, and habilitation consistent with NDCC 25-01.2-02[1].

P&A is aware that the proposed budget for the DD Division shifts the cost for Accreditation with The Council on Quality Leadership, which is required for all DD providers, to the providers. This is a valuable mechanism to ensure that quality services are provided. The cost associated with this

[1] **https://www.legis.nd.gov/cencode/t25c01-2.pdf**

may be difficult for providers that are smaller and do not have the array of revenue options to cover this cost with CQL Accreditation.

Thank you for your consideration. I'm happy to answer questions. You are also welcome to contact me at **pmack@nd.gov** or by phone at (701) 328-3975.

Testimony on House Bill HB1012
2021 Legislative Session
January 24, 2021
Rep. Nelson, Chairman; House Appropriations-Human Resources
Division #2679

Good morning, Chairman Nelson and members of the committee. My name is Sarah Carlson. I live in Dickinson, ND and I am writing this, representing my own thoughts and not on behalf of my employers.

Family Voices of North Dakota is statewide health information and education center who serves families of children with special health care needs in ND. Family Voices provides emotional and informational support to many families across North Dakota who have a child who has an ongoing medical diagnosis such as asthma, heart conditions, physical disabilities, and emotional/behavioral issues. The staff provides assistance and care coordination to families by helping them access and navigate services, understand what these services mean, how systems work, where does the funding come from and by providing emotional, informational and educational support information to assist with their unique and individual needs.

This support intersected with my life before my child left the hospital after birth. And again, and again, support and resources were provided because I had a lot of questions and my child's health was very complex. By the time my child was 1, I found myself attending a weekend leadership institute, at no cost to me, to learn more about the structure of funding and services in North Dakota. Shortly after that, I became a staff for Family Voices. Shortly after that, I gained another employer to provide family support focusing on children birth to age 3 for Early Intervention as an Experienced Parent. I then was recruited for the Family Advisory Council for the Department of Health's Special Health Services. And then appointed by the governor for family representation on the Interagency Coordinating Council, where I later held a chair position. I was doing this all while juggling family, raising a baby with complex healthcare needs, and a managing a full time leadership position, at ABLE, Inc., supporting adults with disabilities. I continue to do all of these things, and have served on National committees and speaking at National conferences.

This year, there are some vital funding decisions that are dependent upon your support.

1. **DD Division: Payments for Providers.**
    - Please offer your support for a 3%/3% increase. Providers across the state struggle with recruitment and retention of staff. Providers rely heavily upon these increases to both retain existing employees and attract new staff. The majority of the workforce is entry-level direct support staff, who have risked so much in the last year to keep people with very serious health conditions safe from COVID while maintaining quality of life. This increase is critical to continue to provide safe, consistent supports to some of our state's most vulnerable people.

2. **Children and Family Services: Restore $100,000 to Family Voices.**
   DD Divison: Restore Experienced Parent Funding of $100,000 and reallocate to Family Voices.
   - In 2017, I provided testimony along with many others to secure funding for parent/peer support with the Experienced Parent program. This support to families is critical while they are just starting their journey in services. I recommend restoring the $100,000 cut from the DD budget and reallocating it to Family Voices of North Dakota. Family Voices is a natural fit to provide these supports to families as they manage Project Carson, a program designed to support mothers who have a prenatal diagnosis or at birth diagnosis for their baby. Connecting this program with existing resources and connections to Early Intervention makes logical sense and does not put pressure on the DD division, to reinvent the wheel on parent support. In addition to the $100,000 for Experienced Parents (work specifically for families with children birth to age 3), please support a restoration of the $100,000 that was cut from Children and Family Services. Without this $200,000 total in the budget to support families, families will suffer and lack the critical support that is needed to provide emotional support and navigate complex systems. I am a reminder that the supports offered by Family Voices. That support has produced a domino effect, by helping mold a leader for this state, and also by continuing to offer that support to other families in the Southwest area of the state. I have personally supported hundreds of families in different capacities navigating birthing support, healthcare, infant development, educational, and employment services for people with special healthcare needs and their families. I receive referrals from all avenues, most often from professionals, silo-ed in one of those services mentioned. I do not believe that I would have been able to provide supports to other families if Family Voices did not first reach out to offer support to me and my family. Let my story be an example of the tremendous benefit these services have provided, and need to be continued for families across ND.

Thank you for your time and consideration. Please support these necessary changes.

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
1/25/2021 pm
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Representative	Present	Absent
Nelson	P	
Kreidt	P	
Andersen	P	
Mitskog	P	
Schobinger	P	
Strinden	P	

Chair Nelson opened the meeting at 2:15 p.m.

Discussion Topics:

- Arc of ND
- Mental Health Advocacy Network
- SUD Voucher
- Behavioral health care
- Homelessness in ND
- Cooper House

Kirsten Dvorak, Exec. Dir. Arc of ND (2:13 pm) testified about the Arc of ND #2436

Carlotta McCleary, Exec. Dir. (2:24 pm) testified about the Mental Health Advocacy Network #3355

Ty Hegland, Chair, North Dakota Addiction Treatment Providers Coalition (2:34 pm) testified about the North Dakota Addiction Treatment Providers Coalition #2502

Jeff Herman, CEO of Prairie St. John's of Fargo (2:44 pm) testified about Prairie St. John's #3352

Kurt Snyder, Exec. Dir. (2:49 pm) testified about the Heartview Foundation #3349

Brenda Owen (2:55 pm) testified about Summit Counseling Services, oral testimony

Denise Harvey, Director of Program Services with the North Dakota Protection and Advocacy Project (3:10 pm) testified about the ND P&A #2677

Jessica Lynn Bauers, Consumer (3:16 pm) testified about Jerry D's, oral testimony

Dan Maddler, CEO (3:21 pm) testified about Beyond Shelter #2445 #2446 #2447 #2448 #2449

Jesse Jahner, Sheriff (3:38 pm) testified about the Cass County Jail #3079

Dareen Knightly, COO (3:50 pm) testified about the Dakota Foundation, oral testimony

Trina Gress, Vice President of Community Options (4:03 pm) testified about Community Options #2465

Marissa Mahanna, Program Supervisor of Cooper House (4:13 pm) testified about the Cooper House #2457

Kandia Qual, Program Director for the Dacotah Foundation in Fargo (4:26 pm) testified about the Dacotah Foundation #2372

Taylor Restad, Director at LaGrave on First (4:35 pm) testified about the Northeast Human Service Center's budget #2466

Donene Feist, Director for Family Voices of North Dakota (4:43 pm) testified about Family Voices of North Dakota #2367 #2368 #2369 #2370

Roxanne Romanick, Executive Director (5:10 pm) testified about Designer Genes #2534

Vicki Peterson, Family Consultant (5:17 pm) testified for Family Voices of ND #2375

Chair Nelson closed the meeting at 5:28 p.m.

Cole Fleck, Committee Clerk

Testimony House Bill 1012 #2436
House Appropriations-Human Resources
January 25, 2021

Chairman Nelson and members of the Committee, my name is Kirsten Dvorak. I am the executive director of The Arc of North Dakota, which includes all six Arc chapters in North Dakota: Bismarck, Bowman, Dickinson, Fargo, Grand Forks, and Valley City. Our mission is to improve people's quality of life with intellectual and developmental disabilities and actively support their full inclusion and community participation.

According to the Developmental Disabilities Assistance and Bill of Rights Act (DD Act) and other federal legislation, "disability is a natural part of the human experience…". Prevention activities do not diminish the value of individuals with intellectual and/or other developmental disabilities (I/DD) but instead strive to maximize independence and enhance people's quality of life with I/DD.

Individuals with intellectual and/or other developmental disabilities deserve the opportunity for a full life in their community where they can live, learn, work, and socialize. To achieve this goal, they need a comprehensive, person-centered and directed, system of appropriate high-quality long-term supports and services (LTSS), a well-trained, fairly compensated workforce of providers, and direct support professionals.

The quality and effectiveness of LTSS for people with I/DD depends upon qualified providers of supports and services with adequate skills and training. Inadequate compensation hampers both recruitment and retention of direct support professionals (DSP). Insufficient funding would negatively impact the quality of support available to people with I/DD and the success that individuals have in living the life they choose in the community.

The Arc
North Dakota

P.O. Box 2081
Bismarck, ND 58502-2081
Phone: (701)222-1854
Email: k.dvorak@thearcofbismarck.org
Website: www.thearcofbismarck.org

It has been over 40 years since The Arc of North Dakota began the task of eliminating the state institution at Grafton. In 1980, The Arc was called the ARC, and the Life Skills and Transition Center (LSTC) was named the Grafton State School. When the lawsuit to close San Haven and the Grafton State School was dismissed in 1995, it was with the understanding that the state would continue to work to keep our citizens in their homes and communities. The Arc of North Dakotas' vision of closing LSTC has not changed. However, The Arc of North Dakota supports the census reduction and being a provider that specializes in crisis and stabilization services.

However, we have concerns about the decrease in the disability services budget. The reduction would jeopardize the promise of keeping our citizens in the programs to participate fully in their communities, where they experience quality of life and personal independence. We ask that you reinstate the 11 million dollars of funding. Funding that is used for person-centered home and community supports that are delivered in natural community environments.

I urge you to help us look for answers to a problem that has troubled us well over the 40 years.

House Appropriations-Human Resources Division Committee
Sixty-seventh Legislative Assembly of North Dakota #3355
House Bill 1012
January 25, 2021
Senator Jon Nelson, Chair

Good afternoon Chairman Nelson and Members of the House Appropriations-Human Resources Division. I am Carlotta McCleary, Executive Director of Mental Health America North Dakota and Executive Director of the North Dakota Federation of Families for Children's Mental Health. Today I speak on behalf of the Mental Health Advocacy Network (MHAN). MHAN advocates for a consumer /family driven mental health system of care that provides an array of service choices that are timely, responsive and effective.

MHAN has provided testimony since the 64th interim human service committee meetings (2015-2016) regarding our priorities for mental health services. We argue that peer to peer and parent to parent support, consumer choice, diversion from corrections, a core services zero-reject model, and conflict free grievance and appeals processes, and the access to a full and functional continuum of care serve as the backbone to correcting the crisis in North Dakota's behavioral health system.

MHAN is speaking in support of HB 1012. During the Sixty sixth legislative session, MHAN stressed that North Dakota needed to put the HSRI Report of 2018 into action. That report, much like the Schulte Report of 2014 said that North Dakota needed to drastically reduce its reliance on institutionalization and make sure that it had a fully functional community-based mental health system for children, their families, and adults that is as near their home as possible. Among the accomplishments of the last legislative session were the commitment to apply for the 1915(i) State Plan Amendment, peer support certification and training, prevention and early intervention pilot program in schools, the behavioral health pilot program, and the behavioral health resource coordinator in our schools.

MHAN's vision for this current legislative session was to ensure that the HSRI report would continue to be an active "road map" to ending the decade-long behavioral health crisis. MHAN commends the Department of Human Services for its continued emphasis on improving behavioral health services. The Department of Human Services' efforts in diverting people from corrections with Free Through Recovery and Community Connect should be applauded. MHAN also supports the building of a new State Hospital at Jamestown with reduced number of beds, along with development of six to ten beds in the western part of the state.

However, MHAN is deeply concerned about the current state of North Dakota's children's mental health system of care. Roughly 10% of all children in North Dakota have a serious emotional disorder (SED). As of 2019, this translates to roughly 18,000 children. We are currently serving only 1 out of every 18 children who have a serious emotional disorder. As a result of not having access to care, many children are being sent into the juvenile justice system. From 2011 to 2017, the number of children in juvenile corrections who had a serious emotional disorder rose from 49% to 79%. Although there have been improvements, children with serious emotional disorders still represent the majority of children in the corrections system despite only accounting for 10% of all children in North Dakota. The *Olmstead* decision of 1999 and subsequent litigation made clear that people with disabilities (including mental illness) must be given access to community-based services before requiring that they seek only institutional care. Let me be clear: *Olmstead* applies to children too.

It comes as no surprise that the COVID-19 pandemic has led to an increase in behavioral health challenges and has forced our society to rethink how it conducts business and serves the community. Our national Mental Health America released a report this year finding that there was a 93% increase from 2019 in the number of people who took their anxiety screen, and a 62% increase in the number of people who took their depression screen. They found that children and youth ages 11-17 had been "more likely than any other age group to score for moderate to severe symptoms of anxiety and depression." In addition, they found that "since the end of May 2020, nearly every racial/ethnic group has been experiencing consistently higher rates of suicidal ideation than the 2019 average." The Centers for Disease Control found that the COVID-19 pandemic has considerably

increased the symptoms of anxiety disorder and depressive disorder compared to 2019. In their study, 40.9% of American adults reported at least one adverse mental or behavioral health condition, with 10.7% of respondents reporting to have seriously considered suicide in the previous 30 days. Suicidal ideation was especially pronounced among racial and ethnic minorities, young adults, unpaid caregivers for adults, and essential workers.

As the Executive Director of the North Dakota Federation of Families for Children's Mental Health I can attest that we have seen an increase in our children and youth who have displayed more significant mental health symptoms and suicidal ideation. In addition, COVID-19 has made it more difficult for children, families, and young adults to get access to the services and supports that they need and it has become much more difficult for teams to coordinate care. Families in the Bismarck area are reporting a concern for dealing with children's mental health crisis. Families have reported that when calling crisis response, the service is done over the phone instead of in-person. In order to deescalate someone, you really need to have an in-person, human connection to develop rapport with the individual. Once they are deescalated, in-person debriefing is essential to prevent future crises. In addition to crisis response, families in the Bismarck area are also without safe beds as an option for children's mental health crisis. Safe beds are a safe place for a child to deescalate as an alternative to costly hospitalization. As a result, the only options many families have are: a) do nothing, b) hospitalize their child, c) call law enforcement.

MHAN has other concerns with the Governor's proposed budget regarding reductions in children's mental health. The Governor's proposed budget cuts the voluntary treatment program from its previous budget of $533,440 to a proposed 2021-2023 budget of $453,424. Prior to this program, many parents were forced to relinquish custody of their children in order to receive mental health services (and those services were in a residential treatment facility). With the creation of the voluntary treatment program, those parents were no longer required to relinquish custody of their children in order to receive treatment that would be provided in that residential treatment facility. During the last legislative session, the voluntary treatment program was given the flexibility to provide services to children in order to prevent an out-of-home placement. The voluntary

treatment program is essential in families being able to maintain custody of their children and provide linkages to community-based services. Cuts to this program would be detrimental.

MHAN supports parent peer support and the organizations that provide this valuable service. Family Voices of North Dakota, who provides support to children with special healthcare needs and their families, and North Dakota Federation of Families for Children's Mental Health, who provides support to children with mental health needs and their families, are both facing reductions as proposed in the Governor's budget. Family peer support organizations provide support, provide education for families, assist families in system navigation, give education for providers, and advocate with families so that they receive the services and supports that their child needs. MHAN supports fully funding family peer support organizations.

As you can see there is still a lot of work left to do in mental health. Now is not the time to reduce our efforts to improve the mental health system of care for children, adults, and their families.

Thank you for your time and I would be happy to answer any questions you may have.

Please Support the SUD Voucher #2502

Chairman Nelson & Members of the House Appropriations Human Resources Committee,

The past year has been a challenging one for the Substance Use Disorder (SUD) providers of North Dakota. With the ongoing COVID-19 Pandemic and suspension of acceptance of new patients into the SUD Voucher Program, providers have had to balance an increase in demand for services with a sudden lack of resources.

North Dakota's SUD providers represent one of the most important parts of the overall healthcare and behavioral health systems in North Dakota. With a high prevalence of alcoholism and binge drinking in our state, combined with an Opioid Crisis and Methamphetamine resurgence, these providers work tirelessly to serve those in need. Despite being underfunded and in high demand, these providers save lives while simultaneously saving millions in healthcare, social service, legal, and correctional costs.

The North Dakota SUD Voucher is one of the most important tools in serving North Dakotans who have a Substance Use Disorder. The voucher provides not only the ability of patients to obtain critical services in a timely manner, but it provides provider choice so patients can stay close to home and their families. Additionally, the voucher serves as a tool to keep patients out of emergency rooms, hospital beds, jails, courts, and morgues.

With the suspension of accepting new patients into the program on July 1, 2020, many providers were left with no options for their patients. With countless patients in the process of accessing services, the pipeline to serve those in need was cut off with a twelve hour notice. Though some may look at this as an unfortunate outcome of an expended appropriation, providers have often asked our association what they should tell those patients. Additionally some have wondered if those patients will survive long-term? When we ask providers to take a year off from serving patients, we run the risk of significant damage to patients, communities, and our state.

With an ongoing pandemic, high alcoholism rates, Opioid Crisis, and Meth resurgence, we respectfully ask you support the $17 million dollar request for the voucher by Governor Burgum. Though some may see a significant budget increase, those of us who serve patients know this represents increased savings to our communities and state, as well as the ability to save more lives.

Sincerely,

Ty Hegland
Chair, North Dakota Addiction Treatment Providers Coalition

Main Points:

- 98% of Licensed Addiction Counselors in North Dakota believe the SUD Voucher saves lives.
- SUD patients are not revenue neutral. Supporting the SUD Voucher saves millions in countless areas. According to the National Institute of Health, one dollar spent in SUD services saves $6 in correctional costs and/or $13 in primary healthcare costs.
- There are nearly 100 entities and thousands of individuals working to provide SUD services in North Dakota. 70% of providers believe their patients and practices were negatively affected when we stopped accepting new patients into the voucher program on July 1, 2020.
- Patients need a fully funded two year voucher. Passing the $17 million dollar re quest by Governor Burgum will help the industry get back on track and stop the underfunding of these critical services.
- The SUD Voucher should support all levels of care across the state of North Dakota and ASAM CUA assessments/treatment plans by licensed clinicians should always lead determinations of level of care. A full continuum of care is vital to our state.
- Due to limited funding, the SUD Voucher should not be extended to providers operating outside the borders of North Dakota unless they reside in an underserved area and complete a Certificate of Need style process.
- According to the American Medical Association, nearly 50% of individuals with a Substance Use Disorder have a co-occurring Mental Health Diagnosis. As a result, many of the SUD providers in the state provide comorbidity/dual diagnosis clinical services in order to serve both issues.

The Key Components of Supporting North Dakota SUD Patients & Providers

* The citizens and patients of North Dakota need a fully-funded SUD Voucher for the full two years of a biennium.

* Patients need the support of a full continuum of care. Due to the severity of illness and additional factors clinical assessments, commitments, jail diversion programs, etc., we cannot eliminate support for any levels of care, as it will cause serious harm to thousands of patients across North Dakota. This includes Residential, Outpatient, Medication Assisted Therapy, and Community Based Supports.

* SUD Providers across the state support the efforts of the ND Dept. of Human Services with community based services and social supports. However it is imperative that due to the severity of illness and ASAM clinical standards, Residential and Outpatient Clinical Services continue to be prioritized and supported due to being the core services of SUD treatment for patients.

* The costs of not treating SUD patients is not revenue neutral. NDATPC encourages the state to continue pursuing Medicaid Waivers to offset general funding costs, including pursuit of an IMD Waiver. The 1915i Waiver is a great start in this process, however we cannot continue to deny Residential/High Intensity Care for low-income individuals in North Dakota, as it causes more harm to patients, families, and communities. As a result of not having an IMD waiver, hospitals, jails, and many additional entities experience higher operating costs and patients receive services that are not effective in dealing with Behavioral Health/SUD disorders.

* According to the National Institute of Health, for every dollar spend on SUD services, $6 are saved in correctional costs and $13 are saved in primary healthcare costs.

* Due to recent budget issues, North Dakota should not enroll providers who are not licensed in the State of North Dakota, unless it is an underserved area and they complete a Certificate of Need process. Given the volume of providers within five miles of the border, the depletion of a SUD Voucher fund will only accelerate if this occurs and we will run into the same issue of the 2020-2021 biennium.

* The State of North Dakota should be in be in compliance with the Mental Health Parity and Addiction Equity Act (MHPAEA) at all times. This includes sufficient access for patients and payments to providers.

* ASAM Assessments carried out by licensed clinicians need to determine levels of care for patients. Other entities should not be involved in influencing service provision and levels of care through policy, as it causes patients to be cared for in inappropriate clinical settings and compounds the Behavioral Health/SUD disorders of a patient.

Office of the Sheriff
Jesse Jahner, Sheriff

January 13, 2021

North Dakota House Appropriations Committee
ND State Capitol Building
Via electronic submission

I am writing today to express support for the ND SUD Voucher program, and to urge approval of the requested increase in funding for the 2021-2022 biennium.

As the administrator of one of the largest jails in North Dakota, in the county with the greatest population and highest per capita need for services, I can attest to the fact that the SUD program has been one of the most beneficial programs we have ever participated in, and has contributed more significantly to improved outcomes for recipients than any other single program for which I have been a stakeholder.

You may not be aware that persons who are incarcerated are ineligible for Medicaid reimbursements. If a person is enrolled in Medicaid at the time they are arrested, their coverage lapses during the period that they are physically incarcerated. If they have never enrolled, they must wait until after they are released to start the process, as there is no existing support for enrollment navigators, no access to internet, and often persons in jail do not have access to the necessary information needed to enroll for coverage even though they may be eligible.

The SUD Voucher has filled the gaps in our needs continuum in multiple ways. It was instrumental in allowing us to connect defendants afflicted with addiction to immediate treatment for opioids, providing necessary funding to bridge the gap until Medicaid enrollments could be completed by the clinic. The SUD Voucher was also a critical resource for helping to ensure a seamless transition from inmate to patient for dozens of people who entered residential treatment programs. It was devastating to us when the funding ran out, resulting in the elimination of a primary route for immediate access to needed care.

The funding for this program is needed now more than ever, and we all recognize that the amount allocated last time significantly underestimated the actual need. This is a program that pays real dividends for those it serves, and I wholeheartedly support the proposed budget request. The various government units are going to spend this money either way – I believe we should spend it in support of treatment rather than in response to the medical and behavioral consequences of ongoing and un-addressed addiction.

Sincerely,

Capt. Andrew Frobig

Funds Run Dry for North Dakota Addiction Treatment Program — Counselors Say Lives are at Stake

Written By: Patrick Springer | Aug 29th 2020

Dale Lein couldn't shake the hold alcohol had on him. His addiction started in high school and followed him like a shadow throughout life. He found it difficult to hold down a job. He occasionally got into car accidents while driving drunk. He became estranged from his family. Finally, last year, a health crisis forced Lein to reckon with the fact that alcohol was destroying his life. A brain tumor, shoulder surgery and complications from decades of hard drinking put him in the hospital for four weeks. Alcohol, his doctors said, was killing him.

Lein desperately wanted to get sober. But he faced what seemed like an insurmountable problem. He was disabled and couldn't afford treatment. Then Lein got a break. He qualified for a state program that pays for addiction treatment for those who lack health insurance or other means to pay. After failed efforts in the past, Lein has achieved sobriety, thanks to help from counselors at Heartview Foundation and the state payment program.
"I've been sober now a year and five months," Lein said. "That's the longest I've ever been sober." Before getting treatment, "That's all I did my whole adult life was drink and drink and drink."

The payment program, called the substance use disorder voucher program, has provided treatment for 4,200 people struggling to recover from addictions since it started in September 2016. But money for the program is unexpectedly running out, so the North Dakota Department of Human Services was forced to freeze the program, barring new clients from enrolling — cutting off access to a program that addiction treatment advocates say is a lifeline for people who otherwise end up, untreated, cycling through hospital emergency rooms and jails, at much greater cost.

The Forum of Fargo-Moorhead

“They’re going to end up in our jails and emergency rooms — or they’re going to die,” Tonya Sorenson, a licensed addiction counselor and clinical supervisor at First Step Recovery in Fargo said of those who will lack treatment because the program is closed to new clients. “That’s the reality of what we’re dealing with. We see our clients in the paper, in the obituaries.”

Pamela Sagness, director of behavioral health for the state Department of Human Services, said officials have worked to maintain services for those currently in the voucher program. “The continuity of services is just vital,” she said, noting the risk of relapse for anyone battling addiction. Officials have struggled to budget for a new program and, for the current budget, had to make their best estimates of demand for services in December 2018.
“We’re really for the first time getting our arms around the scale of the need,” she said. The program currently is paying to help 1,348 clients.

The state's regional human service centers are aware of the suspension of new voucher clients and can once again serve as the “safety net for addiction service needs” and have expanded access to 24/7 crisis services in all regions, Sagness said. “No services were discontinued or stopped,” she said. “The notification was specific to stopping growth of the program.” Heartview Foundation, First Step Recovery and 20 other addiction treatment centers around the state were abruptly told on June 30 that money was running out, giving them just hours to prepare and try to finish pending applications.

Before the voucher program, those who couldn’t afford addiction treatment from private counselors had to seek treatment at eight regional human service centers around the state, where they often faced long waiting times, addiction treatment advocates said. “They were required to stand in long lines in human service centers around the state,” said Kurt Snyder, executive director of Heartview Foundation. “The beauty of the voucher system is it allows the private providers to open their doors to all comers. It made a real difference for a lot of people.”

Lein started his treatment with an 18-day regimen, with three days of residential service followed by 15 days of outpatient counseling and therapy. He continues to meet with his counselor once weekly, has weekly group therapy and regularly attends Alcoholics Anonymous meetings. “It does wonders,” he said. “It does absolute wonders for people who are in a crisis right now.” Under the voucher program, clients whose treatment is deemed medically necessary can qualify for evidence-based treatment from approved addiction treatment centers located close to home. The funding freeze on new clients — which addiction treatment advocates say could deny services to thousands of people struggling with addictions around the state — comes despite Gov. Doug Burgum’s outspoken support for addiction recovery, which he has made a priority issue since taking office in December 2016.

Yet addiction counseling center executives, including those at Prairie St. John's, ShareHouse and First Step Recovery, said they are unaware of efforts by Burgum to try to come up with money to provide services to new clients. “Under Gov. Burgum’s leadership, DHS is working diligently to pursue federal funding and identify possible rollup dollars in its existing budget to provide additional funding for the SUD voucher program, after attempts to find other sources including CARES Act funding were exhausted,” Burgum spokesman Mike Nowatzki said in a statement.

Human services officials have “consistently asked to increase funding to meet demand” for the voucher program, increases that were incorporated in Burgum’s budget requests last session, and approved by lawmakers, he said. Funding for the program, which enjoys strong bipartisan support in the Legislature, has risen dramatically since the program’s start four years ago.
“Behavioral health and recovery remains a priority of this administration, and to suggest otherwise because of a funding situation related to further expanding a program that has already been significantly expanded under this administration is disingenuous,” Nowatzki said.

Spending in 2015, the voucher progam's first year, totaled $252,294, which mushroomed to almost $8.3 million during the 2017-19 budget. During the current budget for 2019-21, vouchers are budgeted for $7.9 million — but more than $7.1 million had been spent by early August, with almost a year remaining in the biennium. Spending for 2017-19 exceeded the current biennium because the current two-year budget was planned before all of the receipts from the last biennium were in hand, Sagness said. "We want to get services to people in need," she said. "That's our mission. But there are limits to the funding."

To serve clients caught by the voucher funding squeeze, Prairie St. John's and ShareHouse are absorbing some of the costs. "It became a race against the clock to help people," said Ty Hegland, executive director of ShareHouse, adding that the vouchers are a "gap filler for patients who have no other means." ShareHouse will spend $50,000 to $60,000 per month to help fill the void, while Prairie St. John's bad debt and charity care spiked by $100,000 this month, said Jeff Herman, Prairie St. John's chief executive. "It's deplorable," Herman said, referring to the emergency created by the state's abrupt cutoff. "That's embarrassing for the state."

Extending charity care is difficult because treatment centers operate on thin margins, so it can't be sustained indefinitely, Hegland said. Meanwhile, costs elsewhere will spike as people with untreated addictions end up in jails and emergency rooms, he said. "This isn't just going to go away," Hegland said. "It's not going to be revenue neutral, and it's going to be very expensive."

A family member of a client who couldn't be accepted for treatment because voucher funding has been exhausted scolded staff at Summit Counseling Services, which serves western North Dakota, where treatment is scarce. "How can you sleep at night?" an angry family member asked staff, Executive Director Brenda Owen recalled. "It's heartbreaking."

Despite the freeze on adding new voucher clients, funding will be available for new patients receiving methadone treatments for opioid addictions, because federal money can pay for that, Sagness said. But the state general fund is the sole funder of the voucher program.
The rise in funding has been possible because of strong legislative support for the voucher program, said Sen. Judy Lee, R-West Fargo, chairwoman of the Senate Human Services Committee. "This was a legislative-established program," she said, which she views as an investment rather than an expense. "It's been remarkable," she said, adding that budgeting for the new program was an "absolute dartboard deal trying to figure out."

When the Legislature convenes in January, replenishing funds for the substance use disorder voucher program will be a priority, Lee said. But the state's economy has been hammered by the pandemic, which has caused oil revenues to plunge. "We know it's going to be a really challenging budget year," she said. She agrees with addiction counseling advocates that it's better to help people before their lives spiral into crisis. Legislators are convinced that the program pays dividends by helping people lead productive lives.

"Catch people before they fall to the bottom again and get them on track again," she said. Recovering from addiction is a constant struggle, Lein said. He feels grateful that his voucher approval recently was extended. "I'm still fighting alcohol," he said. "There's no doubt about it. I can't imagine what I'd do if I didn't get in. I don't know where I'd be. I don't even know if I'd be alive." As for the lack of funds to accept new clients, he added, "I'm hoping and praying that this will change."

Drug Overdoses On the Increase

Overdose deaths have quadrupled in the Minot area since last year

By Andrea Johnson
September 30, 2020

Overdose deaths in the Minot area have increased dramatically over the past year but police say it is not clear whether the stress of the ongoing coronavirus pandemic is one of the reasons why. "The pandemic's effect on the opioid use is unclear," said Minot Police Department Capt. Dale Plessas, investigations and records commander, in an email interview. "We saw an increase in overdoses prior to the pandemic."

According to the Minot Police Department, police had responded to 67 overdose incidents between Jan. 1 and Sept. 15, with 11 of those incidents resulting in overdose deaths. In all, there have been 13 overdose deaths in Minot through Sept. 15. In 2019 police responded to 31 overdose incidents in Minot, with three official overdose deaths.

Even those numbers may be out of date. On Monday Minot police said they were investigating the apparent overdose deaths of two 24-year-old men and sought help from the public in identifying what type of drugs the men might have taken and from where they might have gotten those drugs. Police said they fear that more people might overdose and die. During an unrelated court hearing on Tuesday, Ward County Deputy State's Attorney Todd Schwarz remarked to Judge Gary Lee that, by Schwarz's count, the area is now up to 14 fentanyl overdose deaths this year and Ward County now has more fentanyl overdose deaths than it does due to COVID-19. He said two more were lost over the weekend.

A woman who has been charged with dealing drugs wrote a letter to Lee this week from the jail and begged to be released to go to a drug treatment program. She told the judge that someone she loved died in her arms of a drug overdose last week. The woman, sober now after spending a few days in jail, wrote that she realizes that she has been battling drug addiction for years, knows that she is very ill, and wants to take the opportunity to get better. The woman is one of many people in the community who has lost a family member or a friend to the tragedy of a drug overdose or have found themselves facing criminal charges that are connected to their own addiction battle.

"Many overdoses and deaths that have occurred in the Minot area are linked directly to fentanyl," wrote Plessas in the emailed interview. "Often, opiate users purchase the drugs under the false pretense that they are receiving heroin or Oxycodone. The only way for drug users to protect themselves is to stop using." Police have said that fentanyl is particularly dangerous, not only to users but also to police officers and other first responders who might be exposed at the scene of an overdose.
"Fentanyl is reportedly up to 50 times more potent than heroin," said Plessas in the email. "As a result, we are concerned about the potential danger to first responders. Our officers are supplied with personal protective equipment to include gloves, N95 masks, and Tyvek ensembles. To date, our officers have not reported any exposures to fentanyl that required treatment."

Officers have also saved the lives of some of the people who have overdosed. “Our officers are equipped with Narcan to protect them from accidental exposure and to administer to victims of opioid overdoses,” said Plessas. Narcan, which is also known as naloxone, is a medication that can temporarily reverse the results of an opioid overdose and restore normal breathing, according to the National Institute on Drug Abuse. It usually works in two to five minutes, but the effects wear off and the person will still always require medical attention after the overdose. Naloxone can be administered via auto injection or nasal spray. Friends, family or others who administer naloxone to reverse an opioid overdose are protected from civil liability under state law.

Plessas said that officers have seen various drugs in overdose cases, but fentanyl is commonly part of the equation.

Plessas said officers want people to know that help is available.

Drug Overdoses, Fatalities on the Rise in Fargo

By Bailey Hurley
January 22, 2021

FARGO, N.D. (Valley News Live)

Drug overdoses are on the rise in Fargo, up over 300 percent compared to this time last year.

Fargo Police say just within the first few weeks of 2021 the department has responded to nine overdoses, two of which were fatal. By this time last year, FPD had responded to two overdoses, one of which was fatal. “And those are just calls that we got sent out to! There’s a lot of people that overdosed and by virtue of Narcan or family members or friends, they’re being revived and the police would never know about that,” Fargo Police Chief David Zibolski said.

Our goal and our mission as a narcotics unit is to identify the people that are supplying the drugs that lead to overdoses. Basically, they’re taking advantage of people suffering from addiction and we’re holding those people accountable,” Narcotics Sergeant Matt Christensen said.

Christensen says most overdose cases in the metro involve mixtures of fentanyl, heroin and meth. He says some of the cases the department is currently investigating have ties to California. Christensen also says more often than not, the ones supplying the deadly drugs in the metro are not local.

North Dakota House Appropriations Human Resources Sub Committee

Chairman Nelson and Committee Members,

My name is Jeff Herman. I serve as the CEO of Prairie St. John's of Fargo. I am also the Chairman of the Board of Directors for the ND Hospital Association and a past member of the State Mental Health Planning Council.

Prairie St. John's offers a continuum of behavioral health care including acute inpatient hospital care, residential treatment and day hospitalization. Our patients come from throughout North Dakota and Minnesota. We are a part of a network of private and public providers.

I am here to support the $9 million Substance Use Disorder Voucher increased allocation to the Department of Human Services in HB1012.

Through my 25+ years in behavioral health, I have come to conclude that for persons who suffer from addiction and mental illness, the best outcomes are correlated with; 1. Immediate attention when there is an openness to care on the part of the patient, 2. Care is provided at the level determined by appropriately trained professionals, and 3. A reliable method of payment for services that exist so patients are not further destabilized and that providers stay viable. No person enters our facility without all these considerations being reviewed. The level of care ranges from individual assessment to acute hospital care (as an aside we provided over $5.5 million dollars of charity care last year).

As you know the allocation that you made last legislative session served our citizens for only about one year of the biennium. The additional $9 million will serve to provide evidence as to what is needed and what tweaks we need to make to stabilize the programs in future biennia.

I also understand that in addition to the appropriation, NDDHS needs resources of staff to implement the increased voucher funding. The investment will prevent pain and suffering and is prudent to prevent clogging up our emergency rooms, courts, and prisons systems.

Thank you. Jeffrey A. Herman, MBA, RN

January 25, 2021 #3349

House Appropriations Human Resources Division

Chairman Nelson and members of the House Appropriations Human Services Division

My name is Kurt Snyder and I am the Executive Director of the Heartview Foundation. Heartview is a drug and alcohol treatment program established in 1964. We have over one hundred employees with an Opioid Treatment Program, outpatient programming and a 16-bed residential program in both Bismarck and Cando, ND. Last year we served individuals from 38 of the 53 counties of ND.

I am here today to voice our support for House Bill 1012 and specifically, the full funding of the SUD Voucher.

Since the inception of the SUD Voucher, it has been invaluable to providing access and care to so many citizens of North Dakota. And today, the need for substance use services is greater than ever as the opioid epidemic and COVID-19 devastate our communities.

Up until October of 2020, ND Medicaid did not cover the medication in the Opioid Treatment Programs and the SUD Voucher has been the only source of funding to cover these costs. We are grateful. However, the need for the SUD Voucher to support OTPs continues to be necessary. If an individual is Medicaid or Medicaid Expansion eligible, they still need to move through the approval process. In Burleigh County, we are experiencing a 3 to 4 month process for approval. Our patients rely on the SUD Voucher to have access to these lifesaving services in the interim.

I understand that the SUD Voucher is for filling gaps in coverage and is the payer of last resort. When other payment coverage is secured, Heartview has made repayments to the SUD Voucher Program. Please consider that Heartview's patient population, is over 65% Medicaid and/or Medicaid Expansion. (20% Medicaid and 47% ME). Much of our use of the SUD Voucher are for Medicaid or ME eligible individuals. If the approval process was addressed, our reliance on the SUD Voucher would be greatly reduced.

One solution for this issue is for ND Medicaid to identify Heartview Foundation and other Opioid Treatment Programs as "qualified Entities" to do Presumptive Eligibility. Presumptive eligibility is a Medicaid policy option that permits states to authorize specific types of "qualified entities," to screen eligibility based on gross income and temporarily enroll eligible individuals in Medicaid. Presumptive eligibility serves a dual purpose of providing immediate access to needed health care services while putting people on a path to ongoing coverage.

This concludes my testimony, and I would be open to answer any questions of the committee.

Kurt Snyder, Executive Director

Office: 701-751-5708 Cell: 701-426-8677

Email: kurt@heartview.org

HB 1012 #2677
House Appropriations
Human Resources Division
Representative Jon Nelson, Chairman
January 25, 2021

Representative Nelson and other members of the Committee, I am Denise Harvey, Director of Program Services with the North Dakota Protection and Advocacy Project (P&A). P&A is an independent state agency that protects people with disabilities from abuse, neglect, and exploitation, and advocates for the civil and legal rights of people with disabilities.

P&A supports the 1915(i) state plan amendment, and the tremendous efforts made to put this into place. P&A appreciates the extensive work done by DHS to expand behavioral health services to meet the needs of people with the right service, at the right time, nearest their home.

P&A supports the building of a new State Hospital with reduced beds, in conjunction with the establishment of 6 to 10 beds in the western part of the state. As per the 2020 update to the HSRI report, “There is little evidence to support investment in high-cost residential treatment when resources could be allocated elsewhere.” Our office has worked collaboratively with the State Hospital regarding discharge planning for individuals with longer stays. It is anticipated that with the current availability of Residential Habilitation Services, and the availability of additional Home and Community-Based Services through the 1915(i), that more individuals will be able to successfully reside in integrated community settings. It is expected that as the state of ND works toward having a full continuum of services in place for those with behavioral

health needs that there will be more beds available to appropriately meet the needs of individuals requiring acute care, for and not longer than, the length of stay needed for treatment. It is hoped that this will alleviate the pressure on law enforcement officials and other entities from varying parts of the state who are faced with emergent placement needs.

P&A supports peer support, along with certification and professional supervision for this program. We look forward to hearing of the positive results from consumers using this program. This has been a top priority for the consumers of mental health services for years, and we are very grateful for the support provided for this program and encourage on-going full financial support for this program.

P&A supports full funding for advocacy groups to include the Federation of Families and Family Voices. It is our understanding that these programs are marked for significant cuts for the next biennium. The support provided for families through these programs is invaluable. Families that use these programs often face ongoing challenges and need navigation through systems and support to meet the most critical needs of their families. Reductions in funding for these programs would be very detrimental to families with the highest level of needs.

P&A supports full funding for the North Dakota Brain Injury Network. The proposed significant cut in this program, which already has a limited staff of 3 persons, would drastically reduce services provided across the state of North Dakota. Services provided through the North Dakota Brain Injury Network that involve outreach, education and collaboration are not individual specific services and would not be reimbursable through the 1915(i). While the efforts to increase services for individuals

with brain injury through the 1915(i) are greatly appreciated, there remains much work to be done beyond this. The knowledge base and services provided by the North Dakota Brain Injury Network are essential for individuals with Brain Injuries and family members throughout our state.

In addition, P&A supports full funding for the facilitation of the ND Brain Injury Advisory Council by the Consensus Council. The work of the Advisory Council is vast and complex. The particularly skilled facilitation provided for meetings with members across the state, along with sub-committees, has been important in assisting the Council to meet targeted goals to best serve individuals with Brain Injuries and family members.

I am glad to answer any questions.

Experience the Eide Bailly Difference

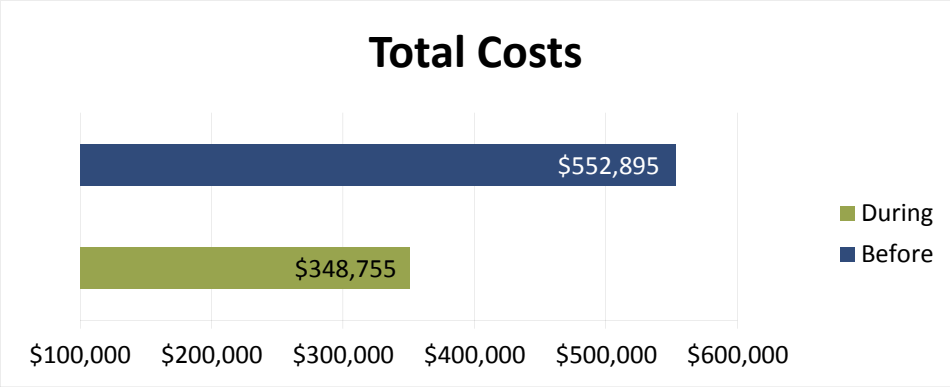
Cooper House Impact Report #2445

A Study of the Impact of Housing
North Dakota's Chronically Homeless Population

EideBailly®

CPAs & BUSINESS ADVISORS

Cooper House Impact Report & Cost Study



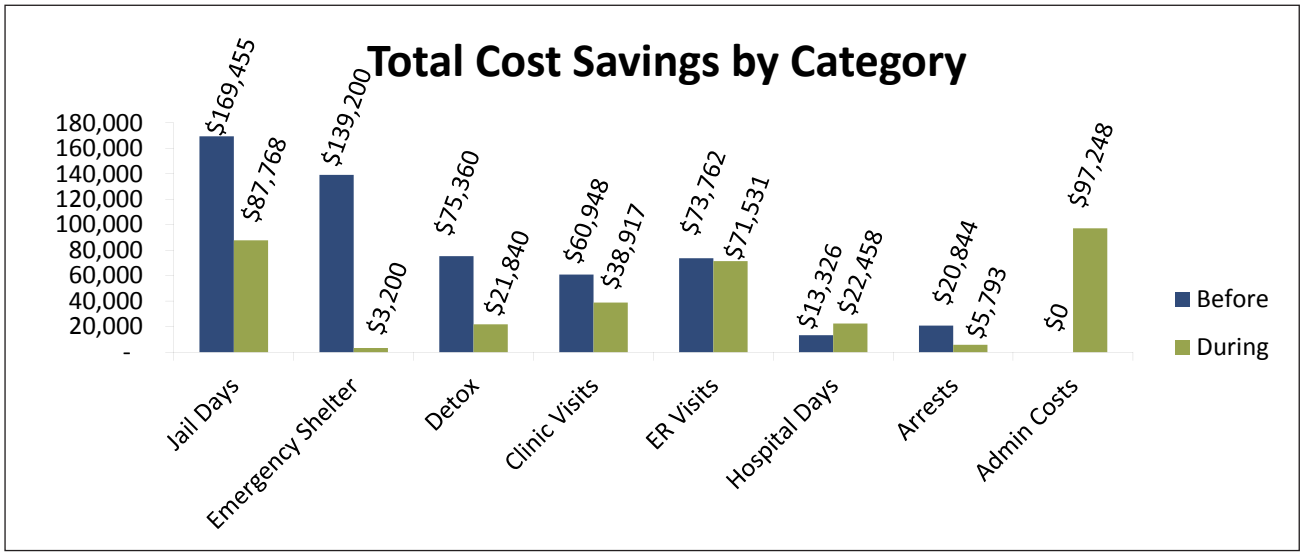
Eide Bailly was engaged by the Fargo Housing & Redevelopment Authority (FHRA) to compile cost data for a group of residents of Cooper House, a supportive housing for the homeless project managed by FHRA. We have compiled data showing the costs to society prior to when these people secured housing at Cooper House and then 12 months during their time housed at Cooper House. Because people move in and out not all dates line up over the same time frame. We have attempted to collect data showing 12 months prior to being housed at Cooper House and during their stay at Cooper House. We have not audited, reviewed or tested this information beyond simple due diligence while collecting it.

Background:

Cooper House opened in Fargo, ND in May of 2010. The Cooper House apartment's provide permanent supportive housing for homeless persons and is a stabilizing next step in the lives of people coming out of shelters or transitional housing programs. It consists of 42 apartments, 32 of which are efficiencies and 10 are one bedroom units. The apartments are rented exclusively to individuals who are documented as homeless. Preferences are given to those experiencing chronic or long-term homelessness, veterans, and people with disabilities. Homeless is defined as an individual or family who lacks a fixed, regular, and adequate nighttime residence. Chronic or long-term homelessness is considered to be anyone being homeless for 12 consecutive months or 4 times in the past 3 years.

Mental Health Technicians are on staff 24 hours, seven days a week at Cooper House, and a part time Licensed Addiction Counselor and a full time Case Manager are in the building daily, working with the clients and offering needed services. Family Health Care Center provides a part time nurse on site who provides medication management, infection control, health assessment, and referrals and follow up.

Cooper House employs a "Housing First" hybrid model, where people are provided a home first and then are offered a variety of services to help improve their lives and keep them in housing.



Conclusion:

Based on the results from the cost study, it is evident that housing the chronically homeless is "the smart way to do the right thing." There was a total of $204,140 savings in costs for those who lived at Cooper House for the time period that this study was conducted, through October 31, 2011. Being proactive in helping the homeless population is shown to help save the tax payers money and to make the community a better place to live.

The Study:

This study is meant to be a snapshot of the impact of housing North Dakota's chronically homeless population. The data of this study was collected with the consent of 66 tenants (the Study Group) who have lived at Cooper House at various times since it opened. Area service providers, shelters, law enforcement, the court system, and healthcare providers have all cooperated in providing the information gathered throughout this study. Once the information was consolidated then an average per person per month cost was calculated and this was used to calculate the group average.

Below is an overview of the costs comparisons for a one year period prior to being housed and a one year period ending October 31, 2011.

Note: There are two significant public cost drivers not captured by this study. Those of the judicial system which includes all costs related to court processing, arrests, and those costs related to state hospital days attributed to court ordered rehab. For some individuals this was up to dozens of times prior to living at Cooper House.

Healthcare & Medical Costs:

Based on the information received from Sanford Hospital, the Cost Study Group, costs went from $148,036 to $132,906 for a 10% decrease in costs or a savings of $15,130. The healthcare and medical cost data was compiled through October of 2011.

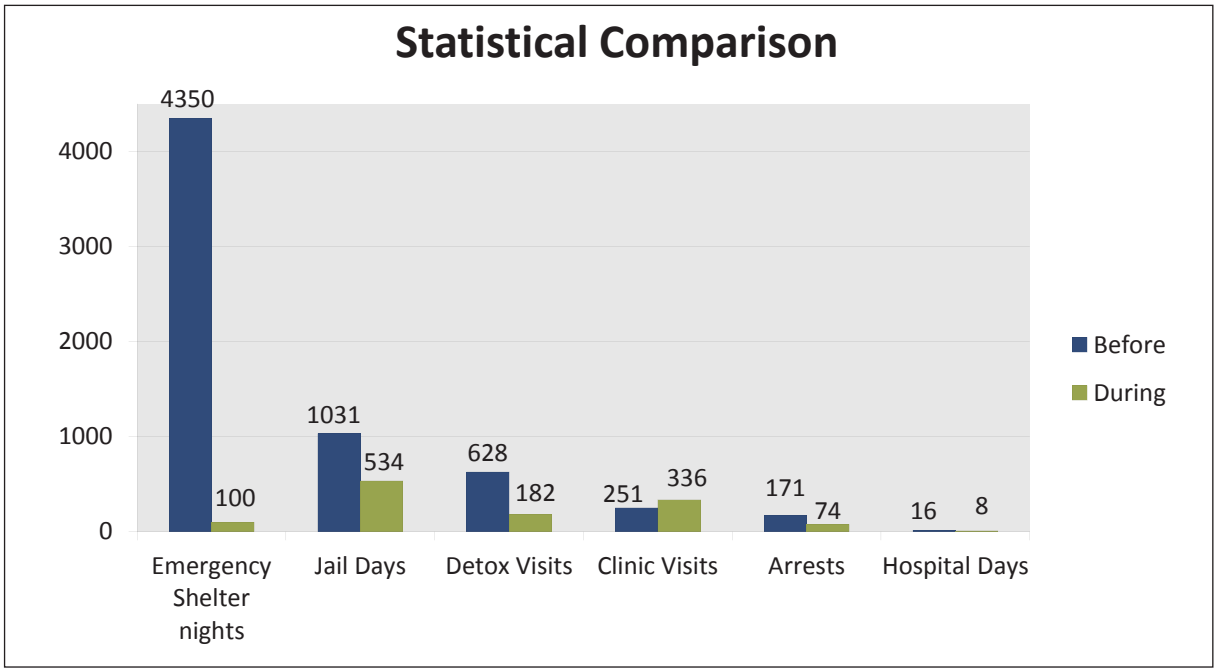
Law Enforcement & Legal costs:

Based on the information received from the Fargo Police Department, the cost associated with arrests declined from $21,000 to $6,000, which resulted in a decrease of $15,000, or 72%. The jail day costs were reduced from $170,000 to $87,800 for an $81,687 or 48% decrease.

Overall, legal and law enforcement saw a cost savings of $96,738 for those living at Cooper House, with some individuals having 100 less jail days than before they were homeless. The law enforcement and legal cost data was compiled through October of 2011.

Detox Costs:

Based on the information received from the Fargo Police Department, the average cost per detox visit is $120, not accounting for police officers time to collect and transport individuals to the facility. The total cost for detox visits decreased from $75,360 to $21,840. For the Cost Study Group, this is a cost savings of 71% or $53,520. In addition, this particular Study Group has seen 446 fewer visits. The detox cost data was compiled through October of 2011.



Administration Costs:

The capital outlay of the administration costs is $97,248. This service is provided by Dacotah Foundation through a contract with Southeast Human Services. The front desk is staffed 24/7 and these individuals are considered key to the success and integration back into the community. They staff check tenants and guests in and out of the building, monitor the security system, help with wellness checks, and work to link tenants to appropriate services.

Emergency Shelter:

Based on the information provided by only one of several homeless shelters in Fargo, the Study Group costs were reduced from $139,200 to $3,200, for a total cost savings of $136,000 or 98%. The number of emergency shelter nights was reduced from 4,350 to 100. The emergency shelter cost data was taken from averaging the costs for 2010 and 2011 to determine the average cost per year. The number of times accessed was taken compiled through October 2011.

Below is a statistical comparison of the number of times a service was accessed for the Cost Study Group before and during their residency at the Cooper House:

Places of Birth:

Many of the participants in the cost study call North Dakota their home and have lived here their entire life. Below, the red stars indicate where a portion of the Cost Study Group individuals are originally from.

Please note that not all costs were captured during the study. Some services accessed are not accounted for here and the cost of working with these individuals on the street is understated. For example, only one of several homeless shelters and one of the two hospitals were contacted for this study. Meals from community based organizations are also not accounted for here. In addition, costs accumulated here are only based on the individuals costs accumulated while living in Fargo and do not account for costs incurred in other locations.

Testimony in Opposition of HB 1012 #2446
Appropriations – Human Resources Division
Chairman: Representative Jon O. Nelson
January 25, 2021

Submitted by: Dan Madler, Chief Executive Officer - Beyond Shelter Inc. (BSI), 701-730-2734, dmadler@beyondshelterinc.com, Lobbyist #30

Chairman Olson and members of the Committee, my name is Dan Madler, I live in ND District 27 and I am the CEO of Beyond Shelter, Inc. (BSI), a mission driven North Dakota nonprofit developer of affordable housing. I would like to express my opposition to House Bill 1012 because of the recommended cuts to the proposed supportive service funding for two (2) Housing First Projects, Cooper House, located in Fargo, ND and LaGrave On First, located in Grand Forks, ND and further, I oppose HB 1012 because it provides no supportive service funding for another Housing First Project, Edwinton Place, located in Bismarck, ND.

Who is Beyond Shelter Inc.:

- Mission Driven ND nonprofit developer of affordable housing
- To-date BSI has closed on the financing of 43 affordable housing projects producing 1,270 affordable homes
- BSI in partnership with several stakeholders/partners has developed three (3) Housing First Projects in ND (Cooper House, LaGrave On First, and Edwinton Place) producing 124 permanent supportive housing homes for households suffering from **chronic homelessness** - defined as individuals and families residing in a place not meant for human habitation, in an emergency shelter, and who have been homeless and residing in such a place for a least one year or on at least four separate occasions in the last three years

Invest in things that work and Housing First works:

- Housing First is a proven model of ending homelessness
- It offers immediate access to housing with supportive services to follow
- Housing First is a cost-savings solution. The data and evidence is clear, Housing First saves North Dakota, ND Communities, and ND taxpayer's money. Chronic homeless households create the biggest financial burden on local medical, law enforcement, and service providers (see pages 11, 12, 39, and 40 of Housing the Homeless North Dakota's 10-year plan to End Long-Term Homelessness, Cooper House Impact Report, and Cooper House Financial Community Impact handout)

<u>The need for Supportive Service Funding is absolute</u>:

- If service providers are not able to staff the facility and provide onsite, person-centered treatment, individuals living at Housing First facilities would not be successful in their recovery, stabilization, and integration back into the community
- Supportive Service funding also provides for 24/7 staffing with a supervised entrance. This is necessary because without it, the Housing First Projects would experience unauthorized overnight guests, large parties, unlimited consumption of alcohol, weapons, and potentially an increase in violence, all of which impact a tenant's ability to remain housed

<u>Investments made to-date and continuing investment request:</u>

- $22.6 Million in total development costs have been invested to provide the 124 Housing First homes (Cooper House – 42 homes, LaGrave On First – 42 homes, and Edwinton Place – 40 homes)
- For the 2019-2021 biennium, Cooper House received a $550,000 general fund grant to provide services to individuals expiring chronic homelessness. I respectively request Cooper House to be funded at **$570,000 for the 2021-2023 biennium**
- For the 2019-2021 biennium, LaGrave On First received a $375,000 general fund grant to provide services to individuals expiring chronic homelessness. I respectively request LaGrave On First be funded at **$515,000 for the 2021-2023 biennium**
- For the 2019-2021 biennium, Edwinton Place received $0.00 from the general fund to provide services to individuals expiring chronic homelessness. I respectively request Edwinton Place be funded at **$640,000 for the 2021-2023 biennium**
- Total investment request = **$1,725,000** which is an increase of **$800,000** from the 2019-2021 base level funding

In closing, I would like to note that all three (3) Housing First Projects, Cooper House in Fargo, LaGrave On First in Grand Forks, and Edwinton Place in Bismarck, serve homeless households that come from all across North Dakota and I respectively request your support for to fully fund supportive services for all three (3) Housing First Projects for the 2021-2023 biennium.

Thank you for your time and consideration.

#2447

FM COALITION TO END HOMELESSNESS

United Way of Cass-Clay

THE 2020 STATE OF HOMELESSNESS

IN THE FARGO–MOORHEAD METRO AREA

A REPORT OF THE FM COALITION TO END HOMELESSNESS IN COLLABORATION WITH UNITED WAY OF CASS-CLAY

ABOUT THE FM COALITION TO END HOMELESSNESS

For 30 years, the FM Coalition to End Homelessness (the Coalition) has been working to address the concerns surrounding homelessness in the Fargo-Moorhead Metro. In response to a growing concern to a local rise in homelessness, four local emergency shelters came together in 1989 to form the Fargo-Moorhead Coalition for Homeless Persons to improve service delivery. As the Coalition became a forum for discussion about the particular circumstances related to working with those experiencing poverty and homelessness, the Coalition grew to include other organizations serving homeless and low-income populations. The Coalition's purpose was to coordinate and improve service delivery in the most humane and efficient manner possible, and it grew to become an active force to provide, expand, and obtain new services. In 2007, the Coalition became a 501(c)(3) nonprofit corporation, hired its first director, and became the key leader in implementation of the City of Fargo's Ten-Year Plan to End Homelessness.

Today, more than 70 partners from service areas related to housing, physical and behavioral health, recovery, law enforcement, community action, disability, and veterans' issues, as well as faith-based groups and individual community members concerned about homelessness, come together with a unified mission: working in partnership to find permanent solutions to prevent and end homelessness in Fargo, Dilworth, Moorhead, and West Fargo. Through unified advocacy, partner education and trainings, and community and regional collaboration, the Coalition strives to fulfill its mission and live up to its recently refreshed name and make homelessness rare, brief, and one-time for individuals and families in this community.

MAIN CONTRIBUTORS

Sarah Hasbargen, Southeastern North Dakota Community Action Agency (SENDCAA), Self-Sufficiency Coordinator

Megan Jenson, United Way of Cass-Clay, Senior Community Impact Manager

Sarah Kennedy, Presentation Partners in Housing (PPiH), Homeless Prevention and Diversion Program Director

Kyle Sample, Churches United, Shelter Supervisor at Micah's Mission

Emma Schmit, CAPLP (Lakes & Prairies Community Action Partnership, Inc.), Housing Director

Cody Schuler, FM Coalition to End Homelessness, Executive Director

Carla Solem, West Central Minnesota CoC Coordinator

Brett Lysne, Sandwich Club Design Co.

For the purpose of this report, we will refer to our geographic location as Fargo-Moorhead Metro (FM Metro). In 2018, the most recent data available, the US Census Bureau's American Community Survey (ACS) estimates the population for the Fargo-Moorhead Metropolitan Statistical Area at 245,471 individuals (source.)

This includes the population in Cass County, North Dakota, and Clay County, Minnesota, who are primarily located in the cities of:

- Dilworth, MN
- Fargo, ND
- Moorhead, MN
- West Fargo, ND

Throughout this report we will use FM Metro as our general location, or specifically Cass County, ND, and Clay County, MN, if there is a difference based on the state boundaries.

Additionally, some of the data and processes included in this report are by established Continuums of Care (CoCs). A CoC is a regional planning body of stakeholders designed to promote a shared commitment to the goal of ending homelessness.

CoC planning includes:

- Gathering and analyzing information to understand homelessness in the region;
- Understanding and supporting compliance with HUD and other funders;
- Implementing strategic plans to end homelessness based on data;
- Operating a regional Coordinated Entry System;
- Measuring results of regional planning and performance; and
- Prioritizing limited resources.

The West Central Minnesota CoC includes the following counties: Becker, Clay, Douglas, Grant, Pope, Otter Tail, Stevens, Traverse, Wadena, and Wilkin, along with the White Earth Reservation. It is one of ten CoCs in the state of Minnesota.

North Dakota operates as one CoC for the entire state.

PLANNING AND ADVOCACY ORGANIZATIONS

The FM Coalition to End Homelessness (the Coaltion) is a principle leader for ending homelessness in the FM Metro and serves as the official North Dakota Region 5 Coalition, the six-county southeastern part of the state. The Coalition is in close partnership with the West Central Minnesota CoC and North Dakota CoC as a platform for cross border collaboration between our two cities, two counties, and two states.
www.fmhomeless.org

The Minnesota Coalition for the Homeless (MCH) is a public policy and advocacy organization working to ensure statewide housing stability and economic security. Working with partners across the housing continuum in direct service to state agencies, MCH generates policies, community support, and local resources for housing and services to end homelessness in Minnesota.
www.mnhomelesscoalition.org

The West Central Minnesota CoC is tasked with developing, implementing, aligning, and monitoring regional planning related to preventing and ending homelessness. Through broad collaboration and planning, the CoC utilizes data, training, information sharing, and planning meetings to move towards making homelessness in West Central MN rare, brief, and one-time.
www.homelesstohoused.com

The North Dakota Coalition for Homeless People (NDCHP) brings together partners across the state to lead the effort in ending homelessness in the state through coordination, education, and advocacy. NDCHP's vision is for ND to have safe, decent, and affordable housing that is available to all. www.ndhomelesscoalition.org

The North Dakota CoC is tasked with developing, implementing, aligning and monitoring regional planning related to ending homelessness. The CoC is composed of representatives of relevant public and private organizations that come together to plan for and provide a homeless response system that is dedicated to preventing and ending homelessness in the state of North Dakota. North Dakota Housing Finance Agency is the collaborative applicant for the North Dakota CoC.

MESSAGE FROM THE EXECUTIVE DIRECTOR

June 23, 2020

As this report is released to our community, we are living through a global pandemic and our nation is facing the most significant conversation about race since the Civil Rights movement. It would be an understatement to say that 2020 is shaping up to be a year few could have imagined. Over the past months, homeless services have had to make a major pivot in response to COVID-19. Providing emergency shelter, moving people into housing, and providing key stabilization services without spreading a dangerous virus has tested our homeless response system and our providers on a personal level. But, the partners of the Fargo-Moorhead Coalition to End Homelessness have demonstrated the creativity, perseverance, and resilience they have shown time and time again. Our partners keep moving forward getting the day to day work done while not losing the vision that homelessness can be ended in our community.

That vision is rooted in social justice and human rights. Our mission to end homelessness relies on vital collaboration as we work together to strategically respond to systems of oppression and injustice that hinder people from thriving so that everyone has a safe place to call home. People of color experience homelessness disproportionate to the population. This calls upon us as a coalition to step up to address racial injustice. Healthcare remains out of reach to many who find themselves in a housing crisis. Therefore we need to get health care providers to see housing as a prescription. Affordable housing is out of reach for many in our community. So, we must step up to address costs and income inequality. This is why this State of Homelessness report is so important: to identify issues, celebrate successes, and use data as a key for finding solutions. This report is more than numbers and charts, this document tells a story and provides a map we can use to chart a new course.

In partnership,

Cody J. Schuler
Executive Director

FM COALITION TO END HOMELESSNESS

The purpose of this document is to provide our community with a comprehensive report of available data related to homelessness in the FM Metro. The writers have made the decision to lay out this report in four sections:

Who are our neighbors experiencing homelessness in our community?

What are the needs of those experiencing homelessness in our community?

What are we doing as a community to address homelessness?

What is next for our community?

In each section, you as the reader should have a better understanding of the answer for each question posed. Additional information can be found in the Appendixes related to the data sources and references used in the creation of this report, as well as definitions for some of the terms used throughout the report and additional resources available.

WHO ARE OUR NEIGHBORS EXPERIENCING HOMELESSNESS IN OUR COMMUNITY?

ESTIMATE OF THE NUMBER OF INDIVIDUALS EXPERIENCING HOMELESSNESS

To estimate the number of individuals experiencing homelessness in our community on any given night, we need to look at the estimates of those:

- sheltered in emergency shelter and transitional housing programs
- staying in a place that is not a regular or permanent place to stay, such as outdoors, in a car, vacant building, or a place of business, and
- doubled up with a friend or family member on a temporary basis because they have nowhere else to go.

Below is an overview of the housing inventory count, which provides a snapshot of the number of individuals homeless service programs can serve at any given time. For more on available programs and services, see the section entitled "What are we doing as a community to address homelessness?".

Project Type	Cass County	Clay County	Both
Emergency Shelter	210	74	284
Transitional Housing	36	73	109
Rapid Re-Housing	36	79	115
Permanent Supportive Housing	168	457	625
Other Permanent Housing	0	0	0
Total	450	683	1,133

With this current inventory we see on any given night there are 246 individuals in Cass County, ND, and 147 individuals in Clay County, MN, who are experiencing homeless in a sheltered location (either in emergency shelter or in a transitional housing program).

We can estimate, through the Emergency Shelter Bed Prioritization list which is managed by all Emergency Shelters in partnership, as of the beginning of April 2020, there are a total of 113 individuals staying in a place that is not a regular or permanent place to stay and actively looking for access to a shelter bed. This could include places such as outdoors, in a car or vacant building, or in a place of business. These 113 individuals include 98 adults, 6 school aged children (ages 5 to 18), and 9 children under the age of 5.

Those currently doubled up continues to be much more difficult number to gather, as those individuals are often the most unseen. As of April 2020, 555 students were identified as homeless in our metro school districts. At this same point, there were 33 school aged children were staying at the two emergency shelters that serve families and 6 school aged children were actively seeking shelter with their parents. The remaining 516 students identified as homeless are most likely to be doubled up. However, we believe that is a significant under-representation of those who are currently doubled up in our community.

Pulling this all together, on any given night, there are 1,022 individuals estimated to be experiencing homelessness in the FM Metro.

Sheltered	393
Unsheltered	113
Doubled Up	516
Total	1,022

This is consistent with last year's estimate of 1,075 individuals estimated to be experiencing homelessness in the FM Metro. While we must rely on an estimate for this number, the rest of this report includes more details and data collected on those in our community that received services to overcome their housing crisis and resolve their homelessness.

DEMOGRAPHICS OF INDIVIDUALS AND HOUSEHOLDS EXPERIENCING HOMELESSNESS

According to data available in the Homeless Management Information System (HMIS), in 2019, 3,322 individuals received homeless services either in Cass County, ND, or Clay County, MN. We need to acknowledge there is a level of duplication in these numbers as Minnesota and North Dakota do operate in separate information systems; for example, if an individual received services in both Fargo and Moorhead, they would be counted twice in the data below.

A majority of individuals experiencing homelessness are working age adults, with 61% of those who received services being between the ages of 18 and 54. Additionally, of those served, 23% were children under the age of 18 and 15% were older adults ages 55 and older.

Ages	Clay	Cass	Total	
Under 5	179	96	275	8%
5 to 12	218	114	332	10%
13 to 17	74	87	161	5%
18 to 24	118	186	304	9%
25 to 34	287	389	676	20%
35 to 44	239	317	556	17%
45 to 54	203	283	486	15%
55 to 61	112	221	333	10%
62+	47	117	164	5%
Don't know or refused	1	3	4	0%
Did not collect	29	2	31	1%
Total	1,507	1,815	3,322	

When looking at gender along with age, adult males make up the majority of the homeless population at 49%. Overall, 61.5% of the total homeless population identify as male and 37.5% as female. Additionally, 13 individuals identify as trans female (male to female), 5 individuals identify as trans male (female to male), and 6 individuals identify as gender non-conforming.

Gender by Age	Male	Female	Trans Female (Male to Female)	Trans Male (Female to Male)	Gender Non-Conforming	Client Doesn't Know/Client Refused	Data Not Collected
Adults	1,639	854	13	4	5	0	4
Percent of Total	49%	26%	0%	0%	0%	0%	0%
Children	382	383	0	1	1	0	1
Percent of Total	11%	12%	0%	0%	0%	0%	0%
Unknown Age	21	10	0	0	0	0	4
Total	2,042	1,247	13	5	6	0	9
Percent	61.5%	37.5%	0.4%	0.2%	0.2%	0%	0.3%

In total, this is an increase of only 39 individuals compared to the number of individuals who received homeless services either in Cass County, ND, or Clay County, MN in 2018. There is no major difference in age distribution or gender. Although, there was an increase in the number of individuals identifying as transgender or gender non-conforming. In 2019, a total of 24 individuals (roughly 1% of all individuals served) identified as transgender or gender non-conforming compared to only 15 in 2018.

In 2019, just under half of individuals who received homeless services identified their race as White, showing a significant racial disparity which exists among the homeless population compared to the general population in the FM Metro. As of 2018, US Census Bureau's American Community Survey (ACS) estimates show 87.1% of the total population in the FM Metro identify as White alone. With 19% of the homeless population identifying as Black or African American and 20% identifying as American Indian, we see significant racial disparities as these populations are overrepresented compared to the general population. The US Census estimates show only 6.1% of the general population identify as Black or African American alone and 1.4% as American Indian and Alaska Native alone (Census Estimates).

Race	Total	Percent of Total
White	1,620	49%
Black or African American	627	19%
Asian	9	0%
American Indian or Alaska Native	669	20%
Native Hawaiian or Other Pacific Islander	25	1%
Multiple races	277	8%
Client Doesn't Know/ Client Refused	26	1%
Data Not Collected	69	2%
Total Persons	3,322	

This is a slight increase in the rate of individuals of color who are experiencing homelessness. In 2018, 50% of individuals experiencing homelessness identified as White alone.

Additionally, 10% of individuals experiencing homelessness identify their ethnicity as Hispanic/Latino. Again, this is an overrepresentation compared to the general population, which is currently estimated at only 3.2% (Census Estimates).

Ethnicity	Total	Percent of Total
Non-Hispanic/Non-Latino	2,918	88%
Hispanic/Latino	324	10%
Client Doesn't Know/Client Refused	10	0%
Data Not Collected	70	2%
Total Persons	3,322	

The 3,322 individuals served throughout 2019 make up a total of 2,325 separate households. A vast majority (84%) of the households do not include children.

Household Type	Total	Percent of Total
Singles: Adults without children	1,943	84%
Families: Adults with children	313	13%
Youth: Youth only, no adults, with or without their own children	43	2%
Unknown Household Type	26	1%
Total Households	2,325	

This is a very consistent breakdown of households, from 2018, although there was an increase of 44 households served from last year.

Chronically Homeless

Individuals who are considered chronically homeless are typically more vulnerable and have significantly higher barriers, meaning they require more supportive services and longer-term support to be successful in ending their continued homelessness episode or episodes.

To be classified as chronically homeless, individuals must meet all the following:

- Currently experiencing homelessness,

- Been homeless for at least one year during the current episode OR homeless for less than one year in the current episode, but homeless at least four times in the previous three years, and
- Disabled (those who have a physical, mental, or other health condition that limits the kind of work they can do OR those who have a physical, mental, or other health condition that makes it hard for them to bathe, eat, get dressed, get in and out of bed or chair, or get around by themselves).

In HMIS, 22% (720) of individuals served in 2019 were considered chronically homeless. They make up 25% of all the households served. We must acknowledge that 10% of individuals served throughout 2019 did not have data collected on this classification, and thus results may differ if we had access to this information. Although, this does show improvement in data collection from last year, as in 2018, 30% of individuals served did not have data collected on this classification.

Like the overall homeless population, a majority of the chronically homeless individuals are working age adults. Of the individuals who are considered chronically homeless, 68% are between the ages of 18 and 54, with only 14% under 18. Aging adults are classified as chronically homeless at a higher rate compared to the general homeless population, with 18% of the chronically homeless population age 55 and older (compared to 15% of the general homeless population).

Age	Total	Percent of Total
Age 0-17	102	14%
Age 18-24	42	6%
Age 25-34	146	20%
Age 35-44	141	20%
Age 45-54	161	22%
Age 55-61	91	13%
Age 62 and above	37	5%
Client Doesn't Know/ Client Refused	0	0%
Data Not Collected	0	0%
Total Persons	720	

Like the general homeless population, a majority (65.8%) of the chronically homeless identify as male, followed by 33.5% identifying as female. Three individuals who are considered chronically homeless identify as trans female (male to female) and one individual identifies as gender non-conforming.

Gender	Total	Percent of Total
Male	474	65.80%
Female	241	33.50%
Trans Female (Male to Female)	3	0.40%
Trans Male (Female to Male)	0	0.00%
Gender Non-conforming	1	0.10%
Client Doesn't Know/ Client Refused	0	0.00%
Data Not Collected	1	0.10%
Total Persons	720	

Overall, compared to last year's data, the chronically homeless population is slightly younger with a 3% increase in those under the age of 18 and a 3% decrease in those over the age of 55. This may be due to better data regarding this sub-population.

In 2019, the 720 individuals considered chronically homeless made up a total of 591 separate households. A vast majority (93%) of the households do not include children.

Household Type	Total	Percent of Total
Singles: Adults without children	547	93%
Families: Adults with children	44	7%
Youth: Youth only, no adults, with or without their own children	0	0%
Unknown Household Type	0	0%
Total Households	591	

Youth

Youth homelessness is often harder to track. According to data available in HMIS, in 2019, 324 youth received homeless services either in Cass County, ND, or Clay County, MN. These are young adults 24 years old or younger, living without parents or guardians and may be parenting themselves.

Age	Total	Percent of Total
Age 12-17	60	19%
Age 18-24	264	81%
Client Doesn't Know/ Client Refused	0	0%
Data Not Collected	0	0%
Total Persons	324	

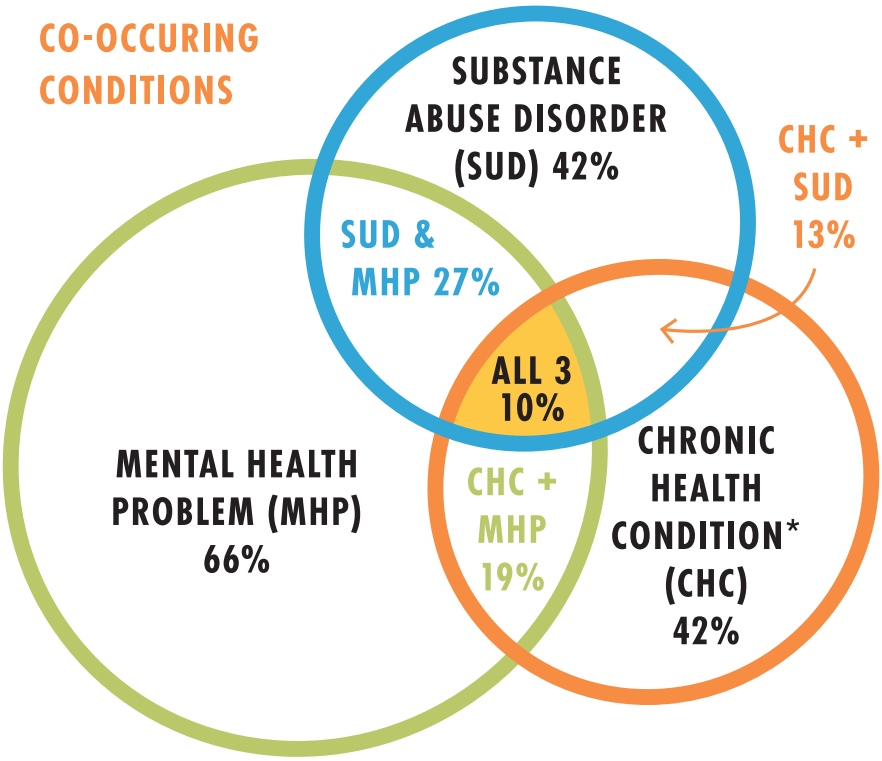
Unlike the general homeless population, youth are more diverse in their gender identity, with only 46% identifying as male. In addition to 48% identifying as female, 2% identifying as trans female (male to female), 2% as trans male (female to male), and 2% as gender non-conforming.

Gender	Total	Percent of Total
Male	150	46%
Female	157	48%
Trans Female (Male to Female)	6	2%
Trans Male (Female to Male)	5	2%
Gender Non-conforming	6	2%
Client Doesn't Know/ Client Refused	0	0%
Data Not Collected	0	0%
Total Persons	324	

LGBTQ+ youth experience homelessness at a high rate than their peers. As part of the 2021 State of Homelessness Report, we hope to include more data on this and the unique experiences of youth homelessness in our community.

Of the 324 youth served in 2019, 31 youth are parents themselves and between the ages of 18 and 24 years old. They have a combined total of 49 children in their care.

Youth are assessed for housing services utilizing a specialized tool geared towards those under 24 years of age. Within this assessment, 56% of youth answered that their lack of housing was because of an unhealthy relationship, either at home or elsewhere (emotional, physical, psychological, or sexual).



Health Conditions & Co-occurring Conditions

Physical health, mental health, and substance abuse are significant concerns and barriers among the people experiencing homelessness in our community. According to data available in HMIS, 44% of the individuals served in 2019 have a disability of long duration. This includes any disability that is ongoing, continued, or for an indefinite duration.

Of individuals diagnosed with a disability:

- 42% have been diagnosed with a chronic health condition, physical disability, or developmental disability.
- Two thirds (66%) have been diagnosed with a mental health problem.
- 42% have a substance abuse disorder (to either drugs, alcohol, or both).

Often individuals experiencing homelessness also experience co-occurring conditions. When looking at those who reported being diagnosed with a chronic health condition, serious mental health problem, and/or substance abuse disorder, 41% of respondents have been diagnosed with more than one of these conditions and 10% report all three.

These results differ from the numbers published last year because last year's data was based on self-responses as part of the Everyone Counts survey administered in October 2018 by homeless

service providers. Due to the different data sources from this year to last, we are unable to compare the annual results.

Overall, most individuals with a chronic health condition, substance abuse disorder, mental health problems, or a combination of these conditions in our community are housed. Individuals experiencing homelessness are not experiencing their housing crisis because of these conditions alone – rather it is due to a unique combination of experiences, traumas, lack of support networks, and access to services or supports. This section is included to highlight the fact that many individuals in our homelessness response system need access to additional services, in addition to housing support. Moving from homeless to housed looks different for each individual and each household; and often includes many other aspects of our community social services network.

Prior Living Arrangements

In HMIS, shelter and supportive housing programs in the FM Metro collect information regarding prior living arrangements for individuals who entered services. In 2019, almost half (46%) of individuals stated they were homeless, meaning they were staying at a shelter, transitional housing, or place not meant for human habitation.

Another 11% of individuals came from an institutional setting, including psychiatric hospital/facility, substance abuse facility, hospital, jail, prison, long-term care facility, or halfway house. 14% identified they were living in their own apartment or home with or without subsidies or support, and 21% were staying with a friend or family member.

Prior Living Arrangements - All Clients	Total	Percentage
Homeless	1,196	46%
Institutional Settings	288	11%
Permanent Housing/Own/ Rental	365	14%
Doubled Up (Staying with Friends or Family)	532	21%
Hotel or Motel without Voucher	77	3%
Client Doesn't Know/Refused	19	1%
Data Not Collected	114	4%
Total	2,591	

As a community, we are very concerned with the percentage of individuals and families entering homelessness from permanent housing. This intensifies when we look at families with children and youth experiencing homelessness.

With families entering services, 31% are coming from permanent housing, previously living in their own apartment or home with or without subsidies or support. This is a significant increase compared to the overall population.

Prior Living Arrangements - Families	Total	Percentage
Homeless	162	39%
Institutional Settings	7	2%
Permanent Housing/ Own/Rental	130	31%
Doubled Up (Staying with Friends or Family)	93	22%
Hotel or Motel without Voucher	18	4%
Client Doesn't Know/Refused	1	0%
Data Not Collected	3	1%
Total	414	

With youth experiencing homelessness, we see a significant increase in the percentage of individuals previously doubled up or staying with friends or family prior to entering homelessness, 37% compared to 21% with the general homeless population.

Prior Living Arrangements - Youth	Total	Percentage
Homeless	96	30%
Institutional Settings	22	7%
Permanent Housing/ Own/Rental	37	11%
Doubled Up (Staying with Friends or Family)	121	37%
Hotel or Motel without Voucher	9	3%
Client Doesn't Know/Refused	8	2%
Data Not Collected	31	10%
Total	324	

Prior Experiences

According to data collected in HMIS, of the 3,322 individuals served, 2,591 individuals entered programming or began receiving services in 2019. Almost a fourth (24%) of these new entries had a history of Domestic Violence. We must acknowledge 21% of individuals who entered services throughout 2019 did not have data collected on their domestic violence history, and thus results may differ if we had access to this information.

Of those with a history of Domestic Violence, 34% identified fleeing domestic violence as the reason for their current homeless situation.

Domestic Violence History	Total	Percent of Total
Fleeing Domestic Violence	207	34%
Not Fleeing Domestic Violence	361	59.30%
Client Doesn't Know/ Client Refused	3	0.50%
Data Not Collected	38	6.20%
Total Households	609	

This data does not capture the full impact and history of violence for many individuals experiencing homelessness. Violence may often be the primary reason why someone is experiencing homelessness but may not reported as the immediate cause. Additionally, research shows for many chronically homeless individuals, one of their first times experiencing homelessness was as a victim of violence. However, this is not captured in this data as it only reflects their current episode of homelessness.

According to agency specific data, 80% of the individuals who stay with YWCA of Cass Clay (YWCA), are seeking services due to violence. This is in line with national research which has shown being a victim of violence is the number one reason that woman become homeless (Source). To get a more accurate number the YWCA has changed how they ask clients about their history of violence. Previously, those seeking shelter were asked, "why are you checking into the shelter". However, many who had initially fled an unsafe situation may have temporarily sought shelter with a family, friend or elsewhere, leading them to select that they were homeless. In recognizing the low response in initial reporting of fleeing violence as women entered the shelter, YWCA staff were coached on how to ask probing questions on what lead to the woman's homelessness.

Of those who had been assessed for housing programs utilizing the VI-SPDAT tool, a staggering 58% of participants responded that their current period of homelessness had been caused by an experience of emotional, physical, psychological, sexual, or other type of abuse, or by any other trauma they have experienced. In addition, approximately 34% of people experiencing homelessness, who were assessed for housing services, identified that they had been attacked or beaten up since becoming homeless.

As part of the Everyone Counts Survey conducted in October 2018, 243 respondents were asked about adverse childhood experiences and traumatic events in their lives. Among the adverse childhood experiences inquired about in the survey, those experienced the most were:

- Living with a substance user (54%)
- Witnessing abuse of other family member (44%)
- Being physically abused as a child (36%)
- Living with a parent or guardian who struggled with mental health issues (32%)

Additionally, as children, about one-fourth of respondents (28%) lived in a foster home and 18% lived in a group home. About 30% were held for more than a week in a juvenile detention center or other juvenile facility or camp.

WHAT ARE THE NEEDS OF THOSE EXPERIENCING HOMELESSNESS IN OUR COMMUNITY?

INCOME, EMPLOYMENT, AND EDUCATION

Income and employment data were collected for the 2,519 adults served throughout 2019. Income and sources were collected at the start of their services along with when they exited services (Leavers) or at an annual check point if they remained in services (Stayers).

In 2019, only 48% of individuals who started services had a known source of income (one or more). Of those who left services in 2019, only 43% had one or more sources of income.

Number of Adults with Income	Start		Stayers		Leavers	
Total Adults	2,519		830		1,689	
1 or More Source of Income	1,217	48%	77	9%	719	43%

Below is a breakdown of cash income sources.

Cash Income Sources	Start	Stayers	Leavers

$1501 - $2000	122	5%	7	1%	69	4%
$2001 +	136	5%	8	1%	105	6%
Client Doesn't Know/Refused	3	0%	0	0%	4	0%
Data not collected	360	14%	0	0%	331	20%
Adult stayers not yet required to have an annual assessment			427	51%		
Adult stayers without required annual assessment			295	36%		
Total Adults	2,519		830		1,689	

In 2019, the federal poverty guidelines were set as a single adult making $12,490 annually or about $1,040 per month. Noting most individuals experiencing homelessness are not in family units, you can see that 68% are below that $1,000 per month threshold. Additionally, if we factor in family units, a family of four making $25,750 per year or less is within the 2019 poverty guidelines – this is roughly $2,145 per month (Source).

In addition to employment and cash income, data is collected on non-cash benefits individuals are receiving. A majority of individuals when starting and leaving services had no sources of non-cash benefits.

Non-Cash Benefit Sources	Start		Stayers		Leavers	
No Sources	1,343	53%	18	2%	928	55%
1 + Source(s)	846	34%	86	10%	463	27%
Client Doesn't Know/ Client Refused	3	0%	0	0%	2	0%
Data Not Collected/ Not stayed long enough for Annual Assessment	327	13%	726	87%	296	18%
Total	2,519		830		1,689	

Of those who receive non-cash benefits, most are enrolled in Supplemental Nutrition Assistance Program or SNAP (previously known as Food Stamps).

Type of Non-Cash Benefit Source	Start	Stayers	Leavers
Supplemental Nutrition Assistance Program (SNAP)	812	81	447
Supplemental Nutrition Program for Women, Infants, and Children (WIC)	68	7	37
TANF Child Care Services	9	1	5
TANF Transportation Services	0	0	0
Other TANF-Funded Services	4	0	2
Other Source	145	51	57

For more details on the benefits programs included in this section along with benefit eligibility, please visit:

- Cass County, ND Human Services Website: https://www.casscountynd.gov/our-county/human-services/economic-assistance-division
- Clay County, MN Social Services Website: https://claycountymn.gov/207/Financial-Assistance-Services

As part of the Everyone Counts Survey conducted in October 2018, respondents currently experiencing homelessness were asked about their education and employment. Almost two-thirds (63%) of respondents had at least a high school diploma or some level of college education.

Educational Attainment	Total	Percentage
8th grade or less	10	4%
Some high school but did not finish 12th grade	78	32%
12th grade (high school graduate)	69	28%
Some college but no degree	49	20%
Completed any college degree (2-year Associate or higher)	36	15%
Refused	1	0%
Don't know	0	0%
Total Individuals Surveyed	243	

Additionally, while in grade school, 31% of individuals surveyed had an Individualized Education Plan or required some level of Special Education.

While 48% of adults entering services this past year had some level of income and 34% were enrolled in non-cash benefits, they still experienced a housing crisis that resulted in them becoming homeless. In later sections of this report, there are more details on additional barriers to housing that many individuals experience, along with how our system works to help move these individuals from homelessness to housing regardless of income or employment.

BARRIERS TO SUSTAINABILITY

Individuals experiencing homelessness in our community face many barriers to sustainability or the ability to lead a stable life, specifically when it comes to gaining and maintaining livable-wage employment and safe, stable housing. Poor credit and rental history, access to employment and livable-wages, transportation, and affordable housing are the common themes individuals self-identified as the reasons why they are experiencing homelessness.

According to 5-year estimates by the Census Bureau, as of 2018, in the FM Metro 43% of occupied housing units are rented. Rent prices and low income are causing many renters to be cost burdened. This is when housing costs require more than 30% of a household's income each month. 42% of renters

in our community are considered cost burdened. This is significantly higher than those who own their home at 14%. (Census Estimates)

The rate of cost burdened households changes drastically based on the household's income. Below is a breakdown of those who are housing cost burdened by income level.

Percentage of households who are housing cost burdened by income level	Overall		Owners		Renters	
Less than $20,000	11,991	90%	2,064	81%	9,927	92%
$20,000 to $34,999	7,308	59%	1,782	45%	5,526	66%
$35,000 to $49,999	3,284	27%	1,483	29%	1,801	26%
$50,000 to $74,999	2,113	12%	1,756	17%	357	5%
$75,000 or more	861	2%	689	2%	172	2%
Total Housing Cost Burdened Households	25,557	26%	7,774	14%	17,783	42%

For more information on our region's access to affordable housing, check out:

- The National Low Income Housing Coalition's "Out of Reach" report: https://reports.nlihc.org/oor
- Minnesota Housing Partnership "State of the State's Housing" report for Clay County: https://www.mhponline.org/images/stories/images/research/coprofs/2019/Clay.pdf

The top reasons why people are experiencing homelessness, from respondents of the Everyone Counts Survey conducted in October 2018, included:

- Eviction or did not have leases renewed,
- Not able to afford rent or house payments, and
- Loss of job or work hours cut.

These situations compound when we consider the barriers these individuals face in being able to rent an apartment or getting housing. The top barriers to accessing housing were identified as:

- Credit problems,
- No affordable housing,
- Criminal backgrounds,
- Bad rental history or past evictions, and
- No local rental history or references.

When respondents were asked about supports they felt they needed to access housing, they identified:

- Available affordable housing,
- Deposit assistance,
- Ongoing case management/support services,

- Reliable and affordable transportation,
- Increased income or employment, and
- Ongoing rental subsidies.

When asked about what would help them to maintain stable housing, survey respondents identified employment, affordable housing, and transportation as the top three.

PUBLIC HOUSING ASSISTANCE

Public Housing Agencies (PHA's) are the largest mainstream providers of affordable housing for local communities. In Cass and Clay Counties, three PHA's have made it part of their mission to prioritize families experiencing homelessness and people with disabilities for housing resources. Fargo Housing & Redevelopment Authority (FHRA), Moorhead Public Housing (MPHA), and Clay County HRA (CCHRA) are all active participants in the Coordinated Access, Referral, Entry, and Stabilization (CARES) System and work towards the goals of ending family, youth, veteran, and chronic homelessness in our region. More details about the CARES System can be found in the next section, "What are we doing as a community to address homelessness?".

In 2019, the United States Department of Housing and Urban Development (HUD) allowed PHA's to apply for additional Mainstream Housing Choice Vouchers, commonly called Section 8 vouchers. These vouchers are meant to target adults with disabilities who are experiencing homelessness, initialization, or housing insecurities. Due to their work in showing the great need for additional affordable housing resources in our community, FHRA and CCHRA were able to apply for and were awarded new vouchers for Cass and Clay counties. This was the largest new allotment of vouchers given to CCHRA since its inception. The amount awarded FHRA and CCHRA together was larger than those awarded to other larger metropolitan areas across the nation.

In 2019:

- Moorhead Public Housing reported 83% of new admissions were exiting homelessness.
- Fargo HRA had 480 new admissions listed as previously being homeless throughout their programs.
- Clay County HRA served 360 households in their homeless programs and reported 93% of new admissions to Housing Choice Vouchers had experienced homelessness.

Even with the new vouchers, waiting lists for these programs remain long. The waiting lists for tenant-based Housing Choice Voucher at FHRA and CCHRA are both closed, as the waiting list grew too extreme for new applications. Those on the list can expect to wait two or more years before receiving

vouchers. Other site-based programs such as Public Housing or units for people who are elderly and/or disabled have various waiting lists, with larger units for families having the longest.

NEEDS ASSESSMENT

CAPLP (Lakes & Prairies Community Action Partnership, Inc.) completed a needs assessment for Clay County, MN, in 2018. SENDCAA (Southeastern North Dakota Community Action Agency) completed the same needs assessment in March 2019 for Cass County, ND. There were three parts to this needs assessment:

- A survey for people currently seeking housing services
- A survey for homeless related service providers
- A survey for people previously served by a homeless prevention and assistance program at CAPLP and SENDCAA

Clay County, MN:

Results indicated the top contributor to respondents' housing crisis was not being able to afford their rent. A mental health symptom or chemical use was the second highest contributor to their current housing crisis (50%). Roommate/neighbor issues, and poor credit/poor criminal history were also noted as causes to a current housing crisis.

When asked what would help the most to solve the current housing crisis, the top three responses were case management or other support services (44%), ongoing rent assistance (41%) and credit repair/budgeting (41%). Deposit assistance (35%) and transportation (38%) were also of note (respondents were able to check all that applied).

The provider survey was sent out via an online surveying tool to the Housing Advisory Committee made up of homeless service providers, the FM Coalition to End Homelessness, and various community partners.

- For prevention and homeless assistance, providers felt housing search assistance, landlord/tenant relationships, and financial assistance were most important.
- For families, providers felt the biggest barriers to housing stability were domestic violence, affordable child care, and lack of affordable housing.
- For singles, providers felt criminal history, substance use, and lack of affordable housing were the biggest contributors to housing instability.

- For youth, providers felt youth most often face barriers with little or no rental history, lack of affordable housing options, and employment.

Additionally, a survey was administered via phone for past clients served by Family Homeless Prevention and Assistance Program (FHPAP) at CAPLP in September of 2018. 100% of responding individuals indicated the FHPAP assistance and case management they received from CAPLP helped to stabilize their housing crisis. Rental assistance, utilities, and deposit assistance were stated as being the most helpful to resolving the housing crisis (96%). A third (33%) of people indicated case management was also beneficial (respondents could check all that applied).

Throughout the surveys, multiple themes emerged showing a significant need for affordable housing in our community. Also of note, there is a commonly identified need for supportive services to help find housing, mediate with landlords, and navigate employment and mental health/substance use services.

To gain a deeper understanding of the needs of people who have or are currently experiencing a housing crisis, CAPLP staff conducted two focus groups in January of 2019. The first was with 8 individuals at Micah's Mission, a shelter for families in Moorhead. Respondents were of varying races and ages consistent with shelter population and households served in FHPAP. The top three areas identified as concerns were finding housing, employment, and transportation. Many stated they had barriers on their background that were keeping them from finding housing and employment. They shared that additional case managers to support people with these barriers would be helpful.

An additional focus group was held with clients who are currently housed on CAPLP programs in Clay County, MN. The commonly identified needs by this group included affordable housing options, living-wage jobs, and transportation options to get to important appointments such as apartment viewings or jobs. Respondents felt the services that worked well included Supplemental Nutrition Assistance Program (SNAP), Minnesota Family Investment Program (MFIP), housing search assistance, landlord mediation with their case manager, and general case management services.

Cass County, ND:

Individuals seeking housing services were asked to identify what contributed to their current housing crisis. Of those surveyed, 42% reported the primary cause to their current housing crisis was that they could not afford rent. Other responses included physical health issues (21%), roommate or neighbor issues (18%), and violence or concerns for safety (13%). Less prevalent responses included chemical or substance usage, mental health symptoms, criminal history, and loss of a job or difficulty finding work.

The top three responses for what would help individuals find and keep stable housing included help with past due rent (48%), on-going rental assistance (38%), and deposit assistance (33%). The top non-financial related support is credit repair and budgeting (23%). Other responses which were noted in the respondents' comments were obtaining and maintaining employment, affordable housing, and sufficient income.

All clients who received rent or deposit assistance in March or April of 2019 were called and asked to complete a survey. Out of the 6 clients, 100% reported the assistance they received helped them stabilize their housing and all clients reported they were satisfied with the services they received.

Thirty-nine providers responded to a survey about resources needed to prevent homelessness.

- Providers reported short-term financial assistance, case management, landlord/tenant relationships, housing search assistance, and transportation assistance were the most important in ending and preventing homelessness.
- For families, providers felt the biggest barriers to housing stability were lack of affordable housing options, affordable child care, and poor credit.
- For singles, providers felt mental health, lack of affordable housing options, and criminal history were the biggest contributors to housing instability.
- For youth, providers felt youth most often face barriers with poor or limited rental history, life skills/financial fitness, and lack of affordable housing options.

WHAT ARE WE DOING AS A COMMUNITY TO ADDRESS HOMELESSNESS?

CARES: OUR HOMELESS RESPONSE SYSTEM

The Coordinated Access, Referral, Entry, & Stabilization (CARES) System is our region's approach to the Department of Housing and Urban Development (HUD) mandate that each Continuum of Care (CoC) operate a Coordinated Entry System. HUD defines coordinated entry as a process developed to ensure that all people experiencing a housing crisis have fair and equal access and are quickly identified, assessed for, referred, and connected to housing and assistance based on their strengths and needs. CARES follows this mandate but also includes prevention, diversion, and stabilization services. Research shows that to end homelessness, we need to reduce the number of individuals entering our system, and that while housing ends homelessness, some people also need ongoing supports to continue to remain housed.

CARES includes partner agencies interested in assuring a more coordinated, effective, streamlined, and consumer friendly system. Our system operates in partnership between the ND CoC, West Central MN CoC, FM Coalition to End Homelessness, and White Earth Nation.

As a system, CARES strives to manage scarce system resources in a streamlined, transparent, planful, data-driven, and consumer center manner. The CARES System starts when a person seeks crisis services (ACCESS), first attempting to prevent homelessness when possible through connection with mainstream and prevention resources. If homelessness cannot be prevented, persons are prioritized for emergency shelter and supportive housing programs based on vulnerability, client choice, and program openings and eligibility (ASSESSMENT/ASSIGNMENT). The most vulnerable households are assisted with nav-

igation services. Those offered supportive housing are assisted with identifying and working on goals to obtaining and retaining stable housing (STABILIZATION).

A centralized and coordinated system allows us to have current data on the specific needs and characteristics of those experiencing homelessness or at imminent risk of homelessness. This data is valuable for system planning and analysis; including distribution of resources (to agencies and households seeking services), measuring effectiveness of services and programs, equity analysis, and identification of trends and current housing needs by type and population. Recently, both CoCs committed to transitioning how data is entered into Homeless Management Information System (HMIS) to improve data accuracy and usability.

PROGRAMS AVAILABLE

This section includes an inventory of shelter, transitional housing, rapid re-housing, permanent supportive housing, street outreach, and other homeless support services available for individuals experiencing homelessness in the FM Metro along with an estimated breakdown of funding sources for each type of homeless services.

These estimates are based on program self-reporting which was available at the time of publication. This may not be a comprehensive breakdown of all funding sources.

Cass County, Project Type	Federal Funding (ESG, CoC, etc.)	State Funding	Local Funding	Totals	2019 Total Beds
Shelter	$129,833	$185,500	$301,000	$616,333	210
Transitional Housing	$96,396	$0	$40,000	$136,396	36
Rapid Re-Housing	$18,000	$22,000	$286,813	$326,813	36
Permanent Supportive Housing	$677,376	$0	$18,750	$696,126	168
Street Outreach	$0	$0	$25,000	$25,000	NA
Homeless Supportive Services (including Prevention)	$0	$0	$25,000	$25,000	NA
Total	$921,605	$207,500	$696,563	$1,825,668	450

Clay County, Project Type	Federal Funding (ESG, CoC, etc.)	State Funding	Local Funding	Totals	2019 Total Beds
Shelter	$364,578	$82,284	$288,653	$735,515	74
Transitional Housing	$0	$268,700	$0	$268,700	73
Rapid Re-Housing	$0	$574,776	$44,042	$618,818	79
Permanent Supportive Housing	$841,157	$2,103,741	$0	$2,944,898	457
Street Outreach	$0	$568,306	$0	$568,306	NA
Homeless Supportive Services (including Prevention)	$0	$197,702	$72,500	$270,202	NA
Total	$1,205,735	$3,795,509	$405,195	$5,406,439	683

Definitions for each type of program type:

Shelter:

- Offers temporary shelter (lodging) for homeless households.

Transitional Housing (TH):

- Participants must enter into a lease agreement (sublease or occupancy agreement) for at least one month. Leases must automatically renew upon expiration, except with prior notice by either party, up to a max of 24 months.
- Participants receiving rental assistance may be required to live in a specific structure.
- Support services must be available during entire participation in TH.

Rapid Re-Housing (RRH):

- Provides short-term to medium-term assistance (up to 24 months).
- Lease between households and landlord.
- Household's able to select their unit.
- Providers can restrict max length of financial assistance but not length of time in unit.
- Support services must be offered during entire participation in RRH.

Permanent Supportive Housing (PSH):

- Long-term housing.
- Homeless households with a member who has a disability.
- Support services provided that are designed to meet the needs of participants.

Other Permanent Housing (PH):

- Long-term housing not otherwise considered PSH or RRH.
- PH Housing with Services provides long-term housing and supportive services for homeless per-

sons but does not limit eligibility to persons with a disability.

- PH Housing Only projects provide long-term housing for homeless persons but does not make supportive services available as part of the project.

PREVENTION/DIVERSION

For the past three years, the Homeless Prevention Project (HPP) has continued to provide client-centered homeless prevention services. The HPP includes CAPLP, SENDCAA, Presentation Partners in Housing, and The Salvation Army. The goal of the HPP is to ensure low-barrier access for prevention services in line with coordinated entry to prevent and end homelessness.

Households experiencing a housing related crisis apply at one access point. The HPP reviews all applications and prioritizes available resources based on vulnerability of the household. Resources are matched to households to provide the minimum assistance necessary for the shortest time possible in order to stabilize a household. The HPP maximizes community resources in order to assist as many households as possible. In addition to housing focused case management, the HPP can provide rent, utility, and security deposit assistance for households experiencing homelessness or likely to become homeless.

In 2019, the HPP provided $556,751 in financial assistance to prevent 544 households from eviction:

Payment Type	Payments
Rent/Mortgage Payments	443
Security Deposit Payments	324
Utility Bill Payments	177

Looking towards the future, the HPP intends to expand services to include diversion. Diversion is a service that guides households to safe and appropriate alternative housing options without utilizing emergency shelters. This ensures shelter beds are available for those who truly have no other option.

HMIS data shows the number of individuals who entered a shelter and/or housing support program from an institution setting, permanent housing, or a doubled-up situation. This is a target population for diversion and in 2019 this includes 1,185 individuals.

Prior Living Arrangements	Total Individuals
Institutional Setting	288
Permanent Housing/Own/Rental	365
Doubled Up (Staying w/ Friends or Family)	532
Total	1,185

The HPP is working closely with shelters, housing providers, supportive services, and funders to ensure an end to homelessness where it already occurs, prevention of homelessness where it is on the verge, and prioritization of services to the most vulnerable households. See the later section "Process Highlight – Moving towards a Homeless Prevention and Diversion Orientation" for more details.

SHELTER ENTRY

In 2019, 2,057 individuals, 9 adult couples without children, and 485 families inquired about seeking shelter at one of the FM Metro's emergency shelters.

Household Type	Numbers
Single Men	1,346
Single Female	710
Single Other	1
Single Female with Children	403
Single Male with Children	21
Married/Couple with children	61
Married/Couple with no children	9
Total Households	2,551

The 485 families include a combined total of 975 children. Of those children, 44% are ages 0-5. Below is the breakdown of age for the children included in these families.

Total Children	Number	Percentage
Age 0-5	430	44.10%
Age 6-12	369	37.80%
Age 13-17	94	9.60%
Age 18+	37	3.80%
Unknown	45	4.60%
Total Children	975	

In total, this was an increase of 394 households (both singles and family units) compared to 2018.

This data is tracked through the Shelter Entry List, which is a list shared by all the emergency shelters in the FM Metro and was designed to get the most vulnerable people experiencing homelessness a shelter bed when spaces become available. Prior to this coordinated process, those in the community who were searching for a shelter bed would have to check each shelter daily to see if there was any availability. This prevented some of the most vulnerable in our community from getting a shelter bed, while those with more resources were able to access shelter.

Of the 2,551 unique households seeking services, 76% only sought shelter once throughout 2019. The remaining households sought shelter multiple times throughout the year resulting in a total of 3,343 duplicated households who sought shelter throughout 2019.

Number of Times Households Sought Shelter	Number of Households	Percentage
Sought Shelter 1 Time	2,541	76.00%
Sought Shelter 2 Time	547	16.40%
Sought Shelter 3 Times	177	5.30%
Sought Shelter 4 Times	59	1.80%
Sought Shelter 5 Times	14	0.40%
Sought Shelter 6 Times	4	0.10%
Sought Shelter 7 Times	1	0.00%
Total Duplicated Households Who Sought Shelter in 2019	3,343	

Of those seeking shelter, 953 households or 28.5% were able to receive services and a shelter bed. Only 27 households were diverted, or able to find an alternative place to stay rather than entering an emergency shelter. As of the last two weeks in 2019, there were 86 individuals and 21 families still seeking a shelter bed. The remaining households have dropped off the Shelter Bed List either because shelter staff were unable to contact them, or they were no longer in need of a shelter bed.

As part of the coordinated entry process, households seeking shelter are screened for vulnerabilities and needs. Of those households who sought shelter in 2019:

- 41% self-reported criteria that classifies the household as chronically homeless
- 35% self-reported having a disabling condition
- 21% self-reported a history of domestic violence
- Of those with a history of domestic violence, 24% experienced violence within the last 30 days

COORDINATED ASSESSMENT

Households who present as homeless are assessed for appropriate homeless interventions to assist with their current crises. The tool used to assist with assessing those who are homeless is the Vulnerability Index-Service Prioritization Decision Assistance Tool (VI-SPDAT). A VI-SPDAT is a survey administered to individuals who meet United States Department of Housing and Urban Development's (HUD) definition of homeless. Under the HUD definition, a person is homeless if they are living in a place not meant for habitation, in an emergency shelter, in transitional housing, or exiting an institution where they currently reside and were homeless before entering. Individuals can also complete a VI-SPDAT if they do not meet these definitions but are fleeing domestic violence, are a veteran, or youth. The VI-SPDAT is used to determine risk and assist with the prioritization of services for individuals who are experiencing homelessness. There are also specific VI-SPDAT tools utilized for families with children and single youth.

Once an assessment is complete and it is identified which housing program is appropriate, individuals and families are placed on the HMIS Priority List to await a housing program opening. The following chart is the breakdown of the Cass County, ND, and Clay County, MN, list as of the end of 2019.

Household Type	Cass County, ND	Clay County, MN	Totals
Singles: Adults without Children	200	437	637
Youth Singles: Age 18-24 without Children	31	41	72
Families: Adults with Children	60	118	178
Youth Families: Youth with Children	7	19	26
Totals	298	615	913

This data was collected in HMIS, and both North Dakota and Minnesota have a coordinated assessment report which collects these assessment referrals. Due to protection regulation, Domestic Violence providers are unable to use HMIS. YWCA of Cass-Clay (YWCA) is the FM Metro's Domestic Violence emergency shelter provider. The data provided by YWCA from a separate report was integrated with these numbers.

From this list we can see there are more families identified and assessed in Clay County, MN. This may be due to Minnesota having additional homeless programs which consider individuals who are doubled up as homeless. Since Minnesota assesses those who are doubled up and because families are more likely to be in these situations, this may explain why there are more families in Clay County, MN. North Dakota does not have any programs for doubled up households; therefore, these individuals are not assessed in North Dakota.

Below is the breakdown of the Priority List at the end of 2019 where housing intervention was recommended for those who were assessed.

- Those who are recommended for PSH (Permanent Supportive Housing programs) would best be assisted with non-time limited, permanent support or a housing first program.
- Households who were assessed as needing TH/RRH (Transitional Housing or Rapid Rehousing programs) would best be assisted with a program that offers more temporary assistance including rental assistance and case management for around 3-6 months, up to maximum of 2 years.
- The housing assessment also determines if a household would be more appropriate for mainstream services to assist with their housing crisis rather than a housing intervention program. These households would be referred to SNAP, MFIP, Section 8, or other programs not designated for individuals experiencing homeless exclusively.

Cass County, ND Breakdown	Adult Head of Household	Youth Head of Household	Total
PSH Single	159	21	180
PSH Family	48	6	54
TH/RRH Single	41	9	50
TH/RRH Family	16	0	16
Total	264	36	300

Clay County, MN Breakdown	Adult Head of Household	Youth Head of Household	Total
PSH Single	234	18	252
PSH Family	81	12	93
TH/RRH Single	180	17	197
TH/RRH Family	31	7	38
Total	526	54	580

COORDINATED ENTRY

When a housing provider has an opening in a program, they will request a referral of a family or individual on the Priority List. The Systems Specialist, who is employed by the FM Coalition to End Homelessness, is responsible for making these referrals and maintaining the Priority List for the FM Metro. The Systems Specialist accepts requests and pulls referrals from the Priority List, guided by the program's eligibility as well as the Prioritization Policies from CARES. The referrals are taken from the list and given to the housing provider. The housing provider then contacts the household and offers them entry into the housing program.

The West Central CoC recently conducted a major data clean-up effort that resulted in a significant decrease in the number of persons on our Priority List. Having accurate data is essential to CoC planning and helps ensure clients are served in a more rapid manner. The North Dakota CoC will conduct a similar process in June 2020.

The West Central MN CoC was recently awarded funding from HUD that will allow for the expansion of Coordinated Entry data management and training. This role will help assure the CoC is able to ensure data remains accurate and current, as well as provide a more accurate understanding of the demand for homeless services at a more detailed level. This position is targeted to start July 1, 2020.

Referrals provided for Cass County Housing Providers:

Household Type	Referrals Reports Processed	Number of Openings
Single	12	50
Single Youth	8	12
Family	16	46
Family Youth	4	5
Total	40	113

Referrals provided for Clay County Housing Providers:

Household Type	Referrals Reports Processed	Number of Openings
Single	18	37
Single Youth	0	0
Family	15	46
Family Youth	1	1
Total	34	84

EQUITY OF OUR SYSTEM

As mentioned in the demographic overview of those receiving services throughout 2019, homelessness disproportionately impacts people of color and those who identify as Hispanic. Equity in our system is something we are beginning to focus on as a community, really looking into the parts of our system that may be causing individuals and families of color barriers to receiving services to help best resolve their housing crisis and current episode of homelessness.

The West Central CoC conducted an Equity Review in August of 2019. For more details on how this study was conducted or key findings, visit:
https://www.homelesstohoused.com/homeless-information-data

Overall, this study found for individuals experiencing homelessness in West Central MN (including Clay County, MN):

- Persons of color had a disproportionately lower number of entries into transitional and permanent housing.
- Race played little role in who got into shelter.
- Overall, the likelihood of a positive or negative leave from a homeless program does not appear to be related to the following variables: race, ethnicity, or gender.
- Persons who have experienced domestic violence are statistically likely to experience a more positive leave.
- Persons over age 50 are statistically more likely to experience a negative leave.
- Native Americans/Alaskans have a slightly higher likelihood of returning to homelessness.

Additionally, the North Dakota CoC conducted an Equity Review as well in early 2020. At the time this report was published, this review was not publicly available. In next year's report we hope to have better equity data specific to the FM Metro, as we see this as an important measure of the success of our system.

PRESSURE ON OUR SYSTEM

This report includes an overview of each part of the CARES System and our community's response to ending homelessness. In order to achieve this ambitious goal, each part of our system and each partner needs to focus on reducing the number of individuals entering our system and effectively serving those in our system to prevent them from returning unnecessarily.

To judge our progress on this, we need to look at our system's flow. In 2019, there were 2,591 individuals who entered into services or entered our system. This is our system's inflow. During the same time, there were 2,166 leavers or individuals who exited from services or our system. This is our system's outflow.

Over the past three years, with access to better data for our community, we have seen the trend of more entries than exits.

Year	Inflow (Entries)	Outflow (Exits)	System Flow
2017	2,249	2,056	+ 193
2018	2,517	2,118	+ 399
2019	2,591	2,166	+ 425

This means while more individuals and families are exiting homelessness, an even greater number are entering homelessness.

EXIT DESTINATION

One vital data point the CoCs and FM Coalition to End Homelessness utilize to monitor project and system performance is exit destination of clients leaving services. The goal is to increase the percentage of individuals who leave homeless programs (street outreach, emergency shelter, transitional housing, rapid re-housing, or permanent housing) and exit to positive destinations versus temporary destinations, institutional settings, or other destinations.

While the CoCs track outcomes by program type (see the next section for more details and more system metrics), listed below are the 2019 cumulative outcomes for all program types operating in Cass and Clay counties, as well as the definitions of each destination category.

This first graph shows all exit destinations for all client populations. We would like to note that outcomes for individuals exiting permanent housing are typically much higher than those exiting shelter or outreach, which lead to the average shown below.

Exit Destination - All Clients	Total	Percentage
Permanent Destinations	716	33%
Temporary Destinations	290	13%
Institutional Settings	72	3%
Other Destinations	63	3%
Client Doesn't Know/Refused	347	16%
Data Not Collected	678	31%
Total Individuals	2,166	

Below are the exit destinations for families who exited from services in 2019. There is a significant increase in the percentage of households who exit to a permanent destination. We attribute this to the larger number of singles in outreach and emergency shelter. In shelter, singles are often more likely to leave without notifying staff of their plans after exit or declining to complete an exit interview, account-

ing for the high percentage of Data Not Collected and Client Doesn't Know/Refused seen in the chart above.

Exit Destination - Families	Total	Percentage
Permanent Destinations	441	72%
Temporary Destinations	83	14%
Institutional Settings	16	3%
Other Destinations	7	1%
Client Doesn't Know/Refused	0	0%
Data Not Collected	64	10%
Total Individuals	611	

With youth exiting services, there is an increase in the percentage of youth exiting into a temporary destination. This is mainly as youth exit services to stay or live with family or friends on a temporary basis. This is not uncommon for youth in general, as this is a very transitional period in most people's lives.

Exit Destination - Youth	Total	Percentage
Permanent Destinations	70	30%
Temporary Destinations	74	32%
Institutional Settings	16	7%
Other Destinations	6	3%
Client Doesn't Know/Refused	24	10%
Data Not Collected	43	18%
Total Individuals	233	

Exit destination definitions:

- **Permanent Destinations** include houses or apartments that are owned or rented by clients with or without any form of subsidy, rental by clients in a public housing unit, permanent supportive housing programs for formerly homeless persons, or living with family or friends on a permanent basis.
- **Temporary Destinations** include emergency shelter, transitional housing programs for homeless persons, hotel or motel, place not meant for habitation (a vehicle, abandoned building, bus/train/subway station/airport, or anywhere outside), or living with family or friends on a temporary basis.
- **Institutional Settings** include foster care homes or group home, psychiatric hospital or other psychiatric facility, substance abuse treatment facility or detox center, hospital or other residential non-psychiatric medical facility, jail, prison, juvenile detention facility, or long-term care facility or nursing home.

- **Other Destinations** include residential project or halfway house with no homeless criteria, deceased, or other.

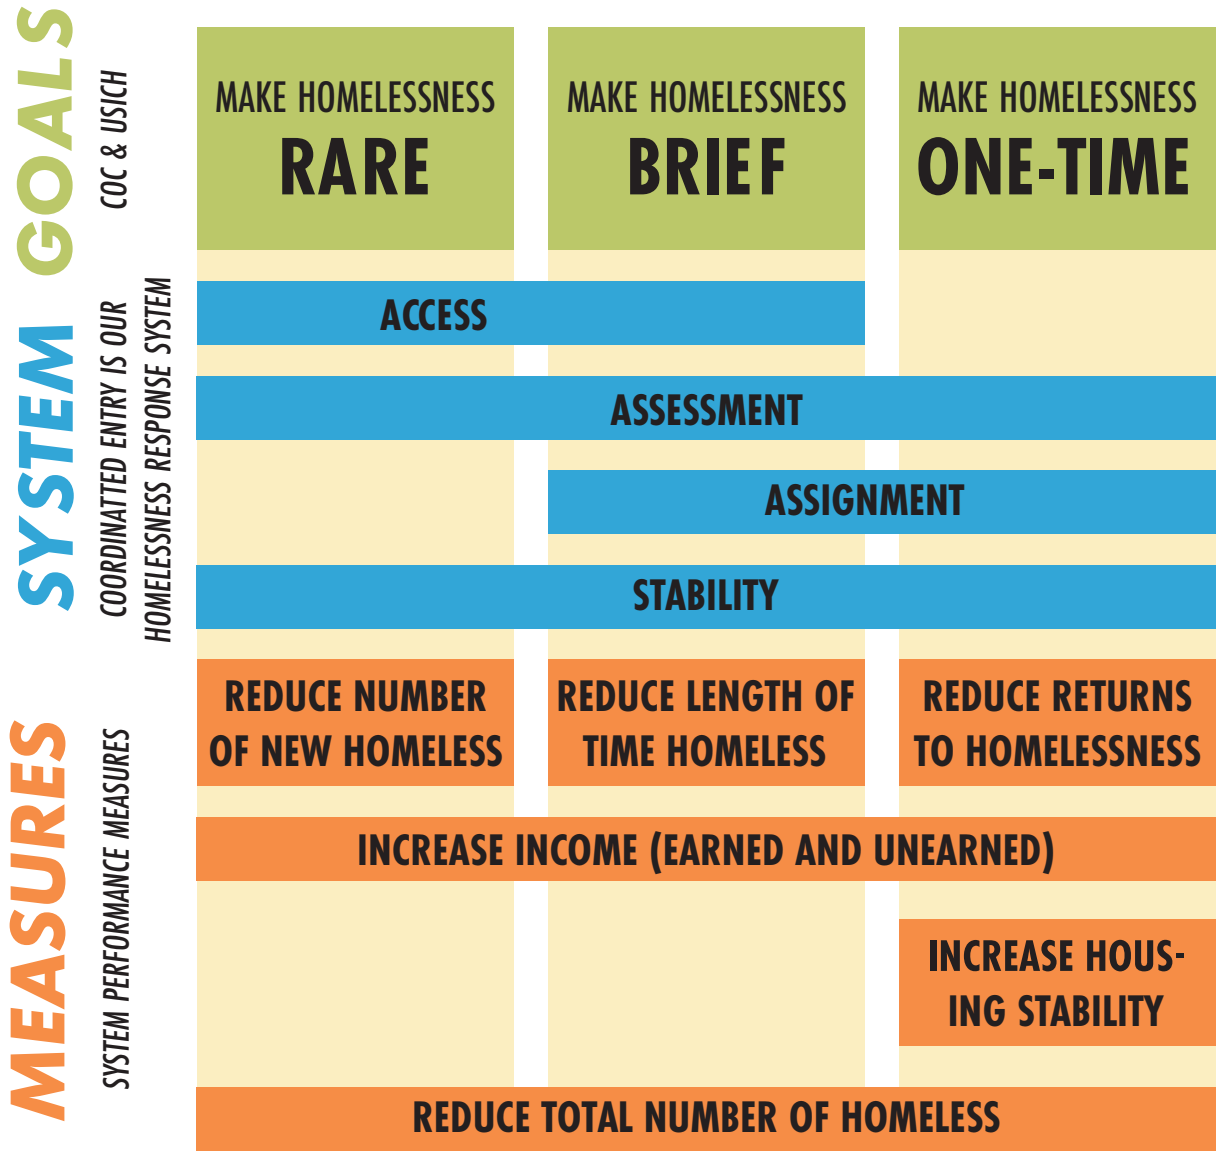
OUTCOME REPORTS

HUD, with the updated McKinney-Vento Homeless Assistance Act (the Act), views the local homeless response as a coordinated system as opposed to homeless programs and funding sources that operate independently in a community. To facilitate this perspective, the Act now requires communities to measure their performance as a system, in addition to analyzing performance by specific projects or project types.

The intent is for CoCs to regularly measure their progress in meeting the needs of people experiencing homelessness in their community and to report this progress to HUD. Since 2015, CoCs submit their Performance Measures to HUD annually. These include:

1. Length of Time Homeless
2. Number of persons returning to homelessness once housed
3. Number of Total Homeless
4. Change in income (earned and total income)
5. Number of New persons entering homelessness
6. Number of persons retaining permanent housing or exiting to permanent housing

This data is only available for the entire CoC compared to the rest of the report which is specific for the FM Metro. At this point, we are unable to pull these metrics for local communities.



North Dakota CoC

Measures	2015 Baseline Performance	2016 Performance	2017 Performance	2018 Performance	2019 Performance
1. Length of time homeless	205 days ES	**350 days ES**	**405 days ES**	71 days ES	55 days ES

	91% PH	91% PH	94% PH	**92% PH**	95% PH

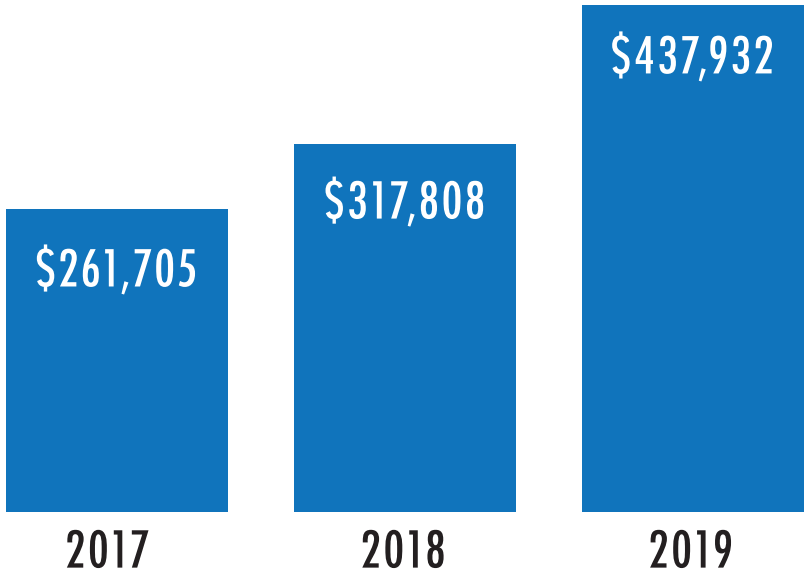
Ultimately, to achieve our community's goals of making homelessness rare, brief, and one-time, we need to monitor our homeless response system through these system performance measures.

Data Highlight: Housing Navigation cost savings from reduced use of costly community services pre- and post-housing

In 2015, United Way of Cass-Clay, in conjunction with members of the FM Coalition to End Homelessness, convened a Design Team of dedicated professionals with a wealth of experience and knowledge spanning nearly 200 years from multiple areas of homeless services. Over the course of three half-day meetings using a consensus model of decision making, the Design Team assessed and developed a Project Summary according to needs based on demographic and geographic populations. Valuing a high level of collaboration and transparency, the Design Team distributed meeting notes and solicited feedback via survey from collaborative stakeholders throughout the process.

This process resulted in a pilot where three new client-centered Housing Navigators would set to work on creating holistic links between existing resources and case management, thus closing gaps and removing barriers in order to achieve housing stability. The goal of this project is to create a new culture of service delivery and enhance collaboration and partnerships among homeless service providers, rooted in the Housing First Philosophy, a proven method of ending all types of homelessness, which offers individuals and families experiencing homelessness immediate access to permanent affordable or supportive housing with a low threshold for entry.

In 2016, Presentation Partners in Housing was selected as the agency to launch this pilot and hired three Housing Navigators. Since the program's inception, Presentation Partners in Housing has hired an additional two Housing Navigators.



In 2017, after the first complete year of services, 23 active Housing Navigation Program participants were able to attain housing, with 80% stably housed for at least 6 months. Additionally, 20 participants had been enrolled in the program for at least 12 months and had sufficient data to compare their pre- and post-housing usage of costly community services, such as detox admissions, ambulance transports, jail time, emergency room visits, and emergency shelter stays. These 20 participants reduced the usage of these costly services for an estimated cost savings to the community of **$261,705**.

Each of the 20 participants, whose personal data was collected as part of this program, voluntarily agreed to disclose their usage of these community services both while participating in the program and prior to being housed. To calculate the estimated cost savings, actual usage of each community service by each individual participant was collected and compared to the average annual usage of these same services by the same individual participant while homeless in our community.

In 2018, 36 active Housing Navigation Program participants were able to attain housing, with 88% stably housed for at least 6 months. Again, there were 20 participants who had been enrolled in the program for at least 12 months and had sufficient data to compare their pre- and post-housing usage of costly community services. These participants reduced the usage of these costly services for an estimated cost savings to the community of **$317,808**.

In 2019, 47 active Housing Navigation Program participants were able to attain housing, with 100% stably housed for at least 6 months. There were 24 participants who had been enrolled in the program for at least 12 months and had sufficient data to compare their pre- and post-housing usage of costly community services. These participants reduced the usage of these costly services for an estimated cost savings to the community of **$437,932**.

Over the past three years of this program, there has been a combined cost savings estimated at **$1,017,445** for our local community!

THE COST SAVINGS OF HOUSING

Process Highlight:
Moving towards a Homeless Prevention and Diversion Orientation

Historically, community responses to homelessness have focused primarily on addressing the needs of those who have already lost their housing – and our community has been no different. This model has led to communities 'managing' homelessness and, as a result, 'institutionalized' the homeless response system. An effective homeless response will always include providing emergency services and moving people into housing with appropriate supports as rapidly as possible. However, there is a crucial third component to an effective response: homeless prevention and shelter diversion. This third piece has often been under-emphasized and under-resourced in many communities including ours.

Following the lead of exciting new research and evidence-based approaches from communities across the nation, the FM Metro is shifting to a comprehensive, community-based preventative approach to ending homelessness. In designing the local prevention and diversion approach, the FM Metro proactively sought training and guidance from nationally recognized industry experts like OrgCode and the National Alliance to End Homelessness. Additionally, compassionate local providers and incredibly resilient and honest persons with lived experience have continually provided influence and direction on the design of a more robust prevention and diversion system.

No single agency or program can prevent and/or end homelessness. Success of a robust prevention and diversion system requires multi-agency commitment with key collaborations across the local CoCs including social services, public schools, the VA, youth providers, domestic violence providers, mental health and recovery programs, emergency shelters, and many more.

Beginning January 1, 2021, "211" through FirstLink will serve as the primary first point of contact for all households experiencing a housing crisis. Those currently experiencing homelessness and those most at-risk of homelessness will be referred to the Homeless Prevention and Diversion Program at Presentation Partners in Housing (PPiH). Following this referral, a highly trained Homeless Prevention and Diversion Specialist from PPiH will conduct a screening and assessment and work with each household to determine what resources and supports are needed to rapidly resolve their unique housing crisis. The goal is to immediately connect the household to resources as well as develop a housing stability plan that meets their individualized needs. Light touch case management and advocacy are provided along with supports from CAPLP, PPiH, SENDCAA, The Salvation Army, and other important mainstream resources to end homelessness where it occurs and prevent homelessness when it is on the verge. The end outcome is that all households remain housed or have a path to stable housing!

Erin Wixsten from OrgCode spent three days in the FM Metro in February 2020 training local providers and community stakeholders on the framework of successful prevention and diversion programs, in

partnership with FM Coalition to End Homelessness and United Way of Cass-Clay. Erin shared research and examples of communities that have been able to prevent shelter entry for up to 80% of households experiencing a housing crisis, CoCs that were able to close an emergency shelter for good, and high rates of evictions that were prevented as a result of a robust response to homelessness. Erin further stated there is "literally no way" these interventions do not work, and many communities that now embrace these approaches experience guilt that they did not implement prevention and diversion strategies sooner.

The FM Metro is ready to shift to a prevention and diversion orientation and approach to ending homelessness. Support from local city officials, CoCs, FM Coalition to End Homelessness, United Way of Cass-Clay, other local funders, service providers, and consumers have aligned in order to launch this project. We look forward to sharing data and outcomes from the launch of the Homeless Prevention and Diversion Program as part of next year's State of Homelessness Report.

WHAT DOES ENDING HOMELESSNESS LOOK LIKE?

Reasons people find themselves without a home will always exist. But with enough affordable housing in our community, increased employment and income, equity in services and programs, and coordinated service delivery systems, we can make homelessness rare, brief, and one-time for individuals and families in our community—virtually ending long-term homelessness. How do we do that? Our Coalition of service providers, funders, and community members advances our mission through advocacy, education, and collaboration. Our Coalition stands strong that this vision can become a reality.

WHAT IS NEXT FOR OUR COMMUNITY?

Looking to the remainder of 2020 and beyond, the FM Coalition has declared a priority for ending homelessness for youth and families with children. This data based priority was made primarily because it addresses the needs of some of the most vulnerable members of our community while doing the important upstream work needed to prevent future generations of chronic homelessness. We believe it will also work to address other concerns, such as the persistent fact that people of color experience homelessness disproportionate to the rest of the population. Demographic data of individuals experiencing homelessness suggest that early interventions in the lives of children of color will reduce future homelessness in adulthood.

This does not mean we are not working to address all types of homelessness, but making such priorities is how we make the incremental progress to reach audacious goals and accomplish systemic change. 2020–2021 planning and implementation include:

- Leveraging funding support of United Way Cass-Clay, which shares an emphasis on ending homelessness for youth and families with children.
- Create a campaign to increase public awareness about homelessness and efforts being taken to end homelessness.
- Increase awareness of homeless data and issues for local elected leaders as part of a comprehensive policy and funding strategy to advance our work.
- Developing and implementing comprehensive diversion and prevention systems and strategies.
- Developing specific strategies concerning youth and child homelessness.
- Renewed focus on developing strategies to address larger societal and systemic issues such as race, income inequality, and food insecurity.
- Strengthening partnerships with County and State partners in North Dakota and Minnesota.

Our Coalition remains committed to aligning resources and programs to create opportunities for people to thrive so that everyone in Fargo-Dilworth-Moorhead-West Fargo has a safe place to call home.

APPENDIX 1: DATA SOURCES, REFERENCES, AND RESOURCES

Main data sources as they appear:

Homeless Management Information System (HMIS) is the database that many state and federal funders require to be utilized by all homeless service providing agencies and programs.

Fargo-Moorhead Homeless Everyone Counts Survey (Everyone Counts Survey) is based on data provided by the FM Coalition to End Homelessness collected through face-to-face interviews and recorded into an online medium. A total of 243 individuals were surveyed on October 25, 2018, in the FM Metro.

United States Census Bureau Data is the leading source of quality data about the nation's people and economy.

Community Action Needs Assessments were completed by CAPLP and SENDCAA, respectively, in the form of focus groups and interviews. In Clay County, MN, the survey for people currently seeking housing services was administered to anyone that presented to CAPLP offices between the predetermined dates of October 22, 2018, to November 2, 2018. A total of 34 surveys were collected. In Cass County, ND, the survey was conducted for three weeks for anyone who presented at SENDCAA from March 5, 2019, to March 26, 2019. 40 clients applying for deposit or rent assistance completed the needs assessment survey over a three-week time span in March of 2019.

Shelter Entry List the list shared by all the shelters in the FM Metro designed to get the most vulnerable people experiencing homelessness a shelter bed when shelter bed spaces become available.

Coordinated Entry Priority List the active list of households who present as homeless who have been assessed for appropriate homeless interventions utilizing the Vulnerability Index-Service Prioritization Decision Assistance Tool (VI-SDPAT) to await a housing program opening.

West Central Minnesota CoC Equity Review a summary of three separate equity reviews compiled by the West Central Minnesota CoC.

APPENDIX 2: KEY TERMS AND DEFINITIONS

For the purpose of this report, **homeless** refers to people who lack a fixed, regular, and adequate night-time residence, including those whose residence is a shelter or transitional housing program, those living in unstable and non-permanent situations, and those forced to stay on a temporary basis with a family member because they have no other place to stay, specifically:

- **Sheltered** includes individuals who are sheltered in emergency shelter and transitional housing programs.
- **Unsheltered** includes individuals who are staying in a place that is not a regular or permanent place to stay, such as outdoors, in a car, vacant building, or a place of business.
- **Doubled up** includes individuals who are staying or living with a friend or family member on a temporary basis because they have nowhere else to go.

Chronically homeless includes individuals who meet all of the following:

- Currently experiencing homelessness,
- Been homeless for at least one year during the current episode OR homeless for less than one year in the current episode, but homeless at least four times in the previous three years, and
- Disabled (those who have a physical, mental, or other health condition that limits the kind of work they can do OR those who have a physical, mental, or other health condition that makes it hard for them to bathe, eat, get dressed, get in and out of bed or chair, or get around by themselves).

Continuum of Care is a regional planning body of stakeholders designed to promote a shared commitment to the goal of ending homelessness.

For the purpose of this report, **exits out of homelessness** are defined by the individuals' destination once they leave services:

- **Permanent Destinations** include houses or apartments that are owned or rented by clients with or without any form of subsidy, rental by clients in a public housing unit, permanent supportive housing programs for formerly homeless persons, or living with family or friends on a permanent basis.
- **Temporary Destinations** include emergency shelter, transitional housing programs for homeless persons, hotel or motel, place not meant for habitation (a vehicle, abandoned building, bus/train/subway station/airport, or anywhere outside), or living with family or friends on a temporary basis.

- **Institutional Settings** include foster care homes or group home, psychiatric hospital or other psychiatric facility, substance abuse treatment facility or detox center, hospital or other residential non-psychiatric medical facility, jail, prison, juvenile detention facility, or long-term care facility or nursing home.
- **Other Destinations** include residential project or halfway house with no homeless criteria, deceased, or other.

Individuals with a disability of long duration are those who have any disability that is ongoing, continued, or for an indefinite duration.

Individuals with a chronic health condition are those who have been diagnosed with a chronic health condition, physical disability, or developmental disability.

Individuals with a mental health problem are those who have been diagnosed with a mental health condition or disorder.

Individuals with a substance abuse disorder are those who have an addiction to alcohol, drugs, or both types of substances.

Youth Homelessness includes young adults 24 years old or younger, living without parents or guardians and may be parenting themselves, who lack a fixed, regular, and adequate night-time residence, including those whose residence is a shelter or transitional housing program, those living in unstable and non-permanent situations, and those forced to stay on a temporary basis with a family member because they have no other place to stay.

Project Type Definitions

Shelter:

- Offers temporary shelter (lodging) for homeless households.

Transitional Housing (TH):

- Participants must enter into a lease agreement (sublease or occupancy agreement) for at least one month. Leases must automatically renew upon expiration, except with prior notice by either party, up to a max of 24 months.
- Participants receiving rental assistance may be required to live in a specific structure
- Support services must be available during entire participation in TH.

Rapid Re-Housing (RRH):

- Provides short-term to medium-term assistance (up to 24 months).
- Lease between household and landlord.
- Household's able to select their unit.
- Providers can restrict max length of financial assistance but not length of time in unit.
- Support services must be offered during entire participation in RRH.

Permanent Supportive Housing (PSH):

- Long-term housing.
- Homeless household with a member who has a disability.
- Support services provided that are designed to meet the needs of participants.

Other Permanent Housing (PH)

- Long-term housing not otherwise considered PSH or RRH.
- PH Housing with Services provides long-term housing and supportive services for homeless persons but does not limit eligibility to persons with a disability.
- PH Housing Only projects provide long-term housing for homeless persons but does not make supportive services available as part of the project.

APPENDIX 3: FM COALITION TO END HOMELESSNESS APPROVED STATEMENT ON ENDING HOMELESSNESS FOR YOUTH AND FAMILIES

To: Members & Partners of the FM Coalition to End Homelessness
From: Cody J. Schuler, Executive Director
Date: August 8, 2019
Re: Approved Statement on Ending Homelessness for Youth and Families

A key component of pursuing strategies to end homelessness in the Fargo-Moorhead Metro area is to identify particular populations where resources can be aligned and timelines established towards a goal of "functional zero" where systemically homelessness is rare, brief, and one-time. At the May 28, 2019 meeting of the general membership of the Coalition, a discussion was held about consideration of a focus population following the successes of previous emphasis on ending Veteran homelessness.

On July 18, 2019 the Board of Directors of the FM Coalition to End Homelessness approved a proposal to create a statement to be distributed to the members of the Coalition to End Homelessness designating a priority on ending homelessness for youth and families with children without distraction from efforts to end homelessness for other populations. The statement and key rational was reviewed (with no action) at the July 23, 2019 meeting of the general membership of the Coalition. **The statement was approved by vote of the membership of the FM Coalition via electronic ballot that closed August 7, 2019.**

Any timelines, strategies, and goals will be identified in the future as the Coalition approves strategies.

Ending Homelessness for Youth and Families with Children Statement

The Fargo-Moorhead Coalition to End Homelessness designates a priority for developing strategies for ending youth homelessness and homelessness among families with children in the Fargo-Moorhead Metro area. This priority includes aligning existing community resources and advocating for new resources. By emphasizing homelessness impacting youth and children, the FM Coalition aims to address root causes, break cycles of poverty, and end future instances of homelessness. While prioritizing youth and families with children, the FM Coalition pledges continued vigilance in seeking strategies and aligning resources for all populations experiencing homelessness, including chronic, veteran, and those fleeing domestic violence.

This designation stands until the FM Coalition states otherwise.

Key rationale for this designation:

- Addressing youth and child homelessness strategically addresses future chronic homelessness.
- Adult homelessness is often rooted in youth/child homelessness and childhood trauma.
- Ending homeless for youth/children is achievable in the near future for our community.
- Placing a priority on this population locally is in line with priorities set by Minnesota's Action
- Plan and the US Interagency Council on Homelessness (USICH).
- Improved services for these populations benefits all populations.
- Public awareness concerning these populations raises awareness about the wider issue of homelessness.
- Prioritizing these populations will not reduce urgency or efforts towards ending homelessness for other populations.

THANK YOU TO:

Housing the Homeless

North Dakota's 10 - Year Plan to End Long-Term Homelessness

Prepared by the
North Dakota Interagency Council on Homelessness

October 31, 2018

Office of Governor Doug Burgum
State of North Dakota
600 East Boulevard Avenue
Bismarck, ND 58505

RE: Final Report—North Dakota 10-Year Plan to End Long Term Homelessness

Dear Governor Burgum,

A lot has changed in North Dakota since 2008 when the *North Dakota 10-year Plan to End Long-Term Homelessness* was drafted. The entire state has experienced a catalyst of economic prosperity as people from around the world came to find their fortune, some with nothing more than a few personal belongings and a desire for a better life. As the population and demographics of the state shifted, it remains the North Dakota Interagency Council on Homelessness's belief that every North Dakotan should have the opportunity to succeed in life, and have a safe and stable environment to call home.

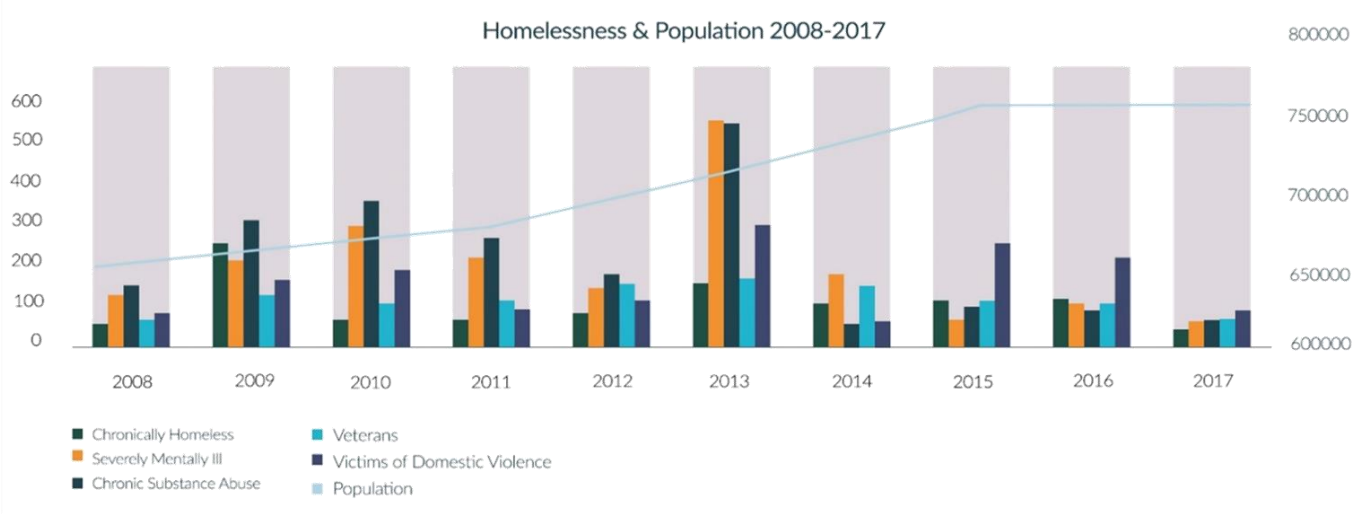
The 10-year plan formalized collaborative efforts between seven state agencies, one statewide homeless coalition, and the communities of Bismarck, Fargo and Grand Forks, developing goals and strategies to end chronic homelessness. Creating permanent supportive housing was the primary focus with a secondary focus on providing outreach and prevention services. As improved data provided insight into the multi-faceted challenges vulnerable populations' experience, outreach, prevention and support services became just as critical as housing.

Great strides have been made. However, the efforts to end homelessness continue. Generational poverty must be actively combatted, and youth need stability in order for them to succeed in school and be given the best possibility to grow into self-sufficiency. The chronically homeless need access to more rapid housing projects and customized support services. The safety net also needs to be cast wider for justice-involved individuals, and those facing mental and behavioral health issues. And, we cannot forget about how we can help our senior population age in place and provide resources for families experiencing frequent, short-term homelessness.

The Interagency Council on Homelessness's report highlights the work that was completed over the past decade, it profiles the state most vulnerable populations, and it outlines our recommendations to continue to prevent, reduce and end homelessness.

Respectfully submitted,

Jolene Kline



Jolene Kline, Chair
North Dakota Interagency Council on Homelessness

Executive Summary
#2449

Executive Summary

North Dakota's vulnerable populations require person-centered approaches to address their unique needs based on their current living situation, physical and mental health, and financial stability. In 2008, when the *North Dakota 10-Year Plan to End Long Term Homelessness* was implemented, North Dakota's primary focus was on permanent supportive housing for the chronically homeless. Although housing stability is the foundation of ending homelessness, over the past decade supportive services have become just as essential to prevent and reduce both short-term and chronic homelessness.

Counting the state's homeless populations is extremely difficult due to multiple definitions of homelessness, the mobility of the population, rural isolation, and the cyclical nature of homelessness for many individuals and families. In addition, people experiencing homelessness are often reluctant to identify themselves as such, therefore, many do not seek assistance. The U.S. Department of Housing and Urban Development (HUD) requires local service providers to conduct a Point In Time (PIT) Count every January to track sheltered and unsheltered men, women and children. North Dakota's 2017 PIT count totaled 1,089 homeless men, women and children, of which 45 were chronically homeless.

According to the U.S. Interagency Council on Homelessness, chronically homeless persons cost taxpayers as much as $30,000 to $50,000 per year. The cost is calculated based on services utilized such as hospitals, shelters, jail, psychiatric centers, and alcohol and drug treatment. Using the base national average of $30,000, North Dakota taxpayers spent approximately $1,350,000 million in 2017 on the state's chronically homeless population. Permanent supportive housing is estimated to lower that cost by 40 percent. Currently, two 'Housing First' facilities, where chronically homeless individuals are rapidly housed, exist in Fargo and Grand Forks. Although proven highly successful in conserving community resources, these projects are difficult to construct as conventional financing is not an option. Developers must leverage numerous federal, state and local financing programs, and solicit donations and private sector partnerships to structure the zero-debt financing the projects require. Low- and extremely low-income individuals can receive rental assistance which helps ensure rental income, unfortunately, only about one in four people who qualify for housing assistance actually receive it due to limited availability.

The North Dakota Interagency Council on Homelessness (NDICH) studied vulnerable populations based on their current housing situation, mental and physical wellbeing, family disposition, and justice involvement. Each of these populations can have safety nets in place that would effectively prevent or shorten their experience with homelessness if resources are effectively implemented.

- ***Chronically Homeless***—individuals and families residing in a place not meant for human habitation, in an emergency shelter, and who have been homeless and residing in such a place for at least one year or on at least four separate occasions in the last three years. North Dakota averages 138 documented chronically homeless individuals every year. The greatest concentration of community resources is spent on this population with most self-diagnosed as severely mentally ill or having chronic substance abuse problems.
    - State and federal funding is critical for financing permanent supportive housing.
    - Person-centered services are needed to stabilize these individuals and reintegrate them back into the community.

- ***Justice Involved***—persons with mental illness and substance abuse problems are overrepresented in our jails and prisons as compared to the general population. Deinstitutionalization, along with a failure to develop easily accessible and useful outpatient alternatives for treatment, has led to correctional facilities housing the highest concentrations of people with mental health and substance abuse concerns in the country.
    - Incarcerated individuals do not get the depth of mental health and addiction recovery services needed to become stable and sober after their release.
    - Difficulty finding affordable housing and employment, especially for felons such as sex offenders.

- ***Native Americans***—the magnitude of Native Americans experiencing homelessness on and off of the reservations is more than likely higher than the 21 percent currently reported. Reservations have the highest concentrations of extreme poverty in the state, and approximately half of all Native American children living in North Dakota are impoverished, more than five times the rate of other races. Over-crowding and inadequate housing conditions put stress on quality of life, as the majority of Native Americans will not force members in their household out if they do not have another housing option.
    - Approximately 78 percent of Native Americans live off of reservations to pursue educational and financial stability, however, many of these individuals lack support networks.
    - Historical trauma and assimilation of culture impacts the effectiveness of behavioral health treatment.

- ***Youth***—in 2017, according to the PIT count, there were 178 documented homeless children ages 0 to 18 years. School-age children, ages 5 to 18 years old, experiencing homelessness was reported much higher by the North Dakota Department of Public Instruction with 2,166 students documented as either sheltered, doubled-up with other families, living in a hotel/motel, unsheltered, or unaccompanied by an adult during the 2015-2016 school year. A major contributor to the financial stability and well-being of children is secure parental employment, unfortunately, many working families with children struggle to make ends meet. The poverty threshold considered sufficient for a family of four with two children to afford basic necessities was $24,036. In North Dakota, 21,716 children were living in families whose income was below this threshold.

- Support services in rural and urban areas can help stabilize families and youth lessening the need for relocation and out-patient treatment.
- State and federal funding critical for single-parent housing, providing life-skills support, daycare, after-school care, and career or educational advancement.

- ***Foster Youth***—in a survey of youth that aged out of the state's foster care system, 40 percent will experience homelessness by the time they are 21 years old. Of those experiencing homelessness, one out of every three has been incarcerated. North Dakota has the third highest youth incarceration per capita in the nation. Although the majority of foster youth obtain a GED or high school diploma and are employed, they face many challenges transitioning into adulthood without a strong support network.
    - Explore barriers to short- and long-term housing for unaccompanied, emancipated, and youth aging out of the foster care system.
    - Support services that are trauma, age and developmentally appropriate to mitigate emotional and behavioral deterrents.

- ***Frail Elderly and Disabled***— North Dakota ranks seventh in the nation in the highest proportion of individuals age 85 years and older. Based on the aging population, extended life expectancy, and likelihood of having a disability, it is anticipated that one out of two North Dakotans will need long-term care services such as nursing facilities, basic care, assisted living, swing bed or home- and community-based care in their lifetime. Disabilities includes ambulatory, visual, cognitive and hearing loss. Persons with a disability are more than twice as likely to be living in poverty as individuals without a disability.
    - Explore more options for rural and urban community-based alternatives for persons with disabilities and behavioral health issues.
    - Support grant programs for home modifications allowing people to age in place.

These vulnerable populations are the most housing insecure and cost-burdened, where 30 percent or more of their income is allocated to housing. Employed individuals earning minimum wage need to work 70 hours a week on average to afford a one-bedroom, market-rate apartment in North Dakota, and seniors living on the state's average social security payment alone can afford $400 per month in rent.

Moving Forward

The following recommendations are broad-based and will require dedication and investments from numerous state agencies to ensure vulnerable populations are receiving adequate services to accommodate their unique needs and to reintegrate them back into North Dakota's communities. Some of the recommendations are within the 2018 North Dakota Behavioral Health System Study and the State of North Dakota's Information Technology Department's Citizen Experience Initiative.

Breaking the Cycle of Generational Poverty

To end the cycle of generational poverty, children and their parents both need to be housing stable. Screening mechanisms need to be in place for service providers, primary care providers and school counselors to be able to identify problematic family dynamics and refer them to a case manager based on their current situation and complexity of need.

- Create more wrap-around service based housing programs for single parents with children.
- Expand outpatient and community-based services that are flexible such as peer support, community health workers, in-home and school-based clinical services and substance use disorder treatment services to address the behavioral health needs of children, youth and their families.
- Expand targeted, proactive in-home supports for families with children and youth at risk of foster care placement and justice involvement.
- Develop a streamlined process for homeless liaisons located in school districts across the state to be able to refer a case manager to assist families in accessing housing in both urban and rural communities.

Children that are not housing stable, are within the foster care system, do not graduate from high school, or have mental health or substance issues have a much higher probability of needing public assistance as an adult. Early detection and prevention are the best methods to help youth navigate difficult living situations.

- Explore barriers to create emergency shelters, low barrier housing, host homes and other short- and long-term housing options for youth and young adults who are unsheltered, fleeing an unsafe situation, or experiencing a housing crisis.
- Coordinate entry processes and support services that are trauma, age and developmentally appropriate.
- Review state and federal policies and processes impacting unaccompanied youth as well as youth aging out of the foster care system to determine any barriers that can be eliminated.

Lessening the Cost

Some individuals have complex medical and emotional needs, which prohibits their ability to live on their own without a social network assisting them. These individuals are classified as the chronically homeless and create the biggest financial burden on local medical, law enforcement and service providers.

- Finance more Housing First facilities creating more homes to stabilize the chronically homeless and provide funding for support and operations expenses.
- Explore the cost and benefit of funding "harm reduction" shelters, where residents can consume substances or come into a shelter under the influence of drugs and alcohol.
- Create consistent funding for state housing and service programs such as Housing Incentive Fund and the North Dakota Homeless Grant.

Government Efficiencies

The key to enhancing government efficiencies is to establish a systematic approach of clearly defined and repeatable steps where outcomes can be evaluated to generate consistent, optimum results. State agencies and local service providers are well connected and reach out to one another for assistance for the individuals and families they are helping, but most agencies expressed the need for more collaborative efforts to leverage resources and to be more responsive.

- The NDICH should be expanded to represent more stakeholders within government agencies, service providers and individuals and families that have experienced homelessness.
- Identify barriers preventing state agencies from accessing and leveraging HUD’s Homeless Management Information System (HMIS).
- Map the entry points for vulnerable populations and how they transition throughout state agencies and local service providers.
- Identify local, state and federal policies and regulations that hinder vulnerable populations and prioritize actions for change.

Covering the cost of public assistance is challenging for federal and state government and at the local community level. However, there are ways for the state to access additional federal funding through Medicaid to provide direct support to individuals and families.

- Pursue 1915(i) Medicaid state plan amendments to expand community-based services for vulnerable populations.
- Review long-term care facilities placement policies and explore options for community-based alternatives for persons with disabilities and behavioral health issues.

Client-Focused Delivery System

In order to expedite information gathering and to ensure current and accurate information is available, the state needs a consistent, end-to-end experience across all channels and departments where information can be obtained for any service, on any device and at any time. State agencies and local service providers expressed challenges they have noticed in their specific area and feedback from clients. Below are some of the ideas that were recommended:

- Housing Inventory - create an affordable housing inventory for each community/region
- Housing Forms - create a single form used by all regional housing authorities
- Database - create profiles for each client within a centralized database, so individuals or families applying for state or local benefits do not have to re-enter information
- Privacy Laws - review state privacy laws to ensure clients are protected, but at the same time do not hinder state agencies from accessing the information they need to be able to help a client that is transitioning services from one state agency to another.
- Consent Form - create a consent form signed by the client to release information to all state agencies and case managers
- User Profile - create an app or web portal where clients can enter their information that is stored and they can return at any time to complete.
- Online Chat - through an app or web portal, create an online chat function for clients to ask questions and be directed to the correct state agency or local service
- Services Portal - structure website into user categories and group information based on the client scenario, such as homeless or risk of becoming; searching for housing, employment or daycare, needing social services, youth, tribal, etc.

North Dakota's Plan to End Homelessness

North Dakota's Plan to End Homelessness

In 2004, President George W. Bush established a U.S. Interagency Council on Homelessness (USICH) to develop and implement a comprehensive, national approach to end chronic homelessness in America. That same year, President Bush and USICH issued an unprecedented collaborative effort between the U.S. Department of Housing and Urban Development (HUD), U.S. Department of Human and Health Services (HHS) and the U.S. Department of Veteran Affairs (VA) to make both permanent housing and supportive services funding available in a coordinated effort.[1] This was the initial investment towards developing a comprehensive national strategy to end chronic homelessness in 10 years.

At the state level, Gov. John Hoeven created the Governor's Interagency Council on Homelessness (NDICH) which consists of seven state agencies and one statewide homeless coalition, and the communities of Bismarck, Fargo and Grand Forks.[2] The intent of NDICH was to coordinate government policies, identify best practices, analyze individual and family needs, educate stakeholders, and solicit input from the faith and advocacy communities, businesses and the general public to prevent and end homelessness in North Dakota.[3] In 2008, NDICH finalized *North Dakota's 10-Year Plan to End Long Term Homelessness.*[4] A consortium of hundreds of individuals from state agencies, tribal nations, community and state stakeholders, and planning organizations participated in community forums, research studies and planning sessions.

Emphasis was placed on creating permanent housing and supportive services for the men, women, and children who would experience long-term homelessness during the next 10 years. North Dakota's goal was to assist local communities in providing housing, rent subsidies and supportive services, with a benchmark of creating 50 new permanent supportive housing (PSH) units each year to eliminate homelessness across the state. In order to reach this goal, five strategies were developed:

Strategy 1: Develop Permanent Supportive Housing

- Develop non-federal sources of "soft money"
- Create additional permanent supportive housing units
- Create partnerships between developers and service providers

Strategy 2: Improve the Ability to Pay Rent

- Eliminate barriers to employment
- Identify new sources for rent subsidies
- Improve access to mainstream supports (entitlement programs)

Strategy 3: Expand Supportive Services to Wrap Around Housing

- Connect supportive services to housing
- Prevent individuals from transitioning into homelessness or uncertainty

[3] Exec. Order No. 2004-09 (2004). Establishing the Governor's Interagency Council on Homelessness.

[4] North Dakota's 10-Year Plan to End Long Term Homelessness. 2008. Retrieved from www.ndhfa.org/Publications/Reports/Partner%20Publications/ndich_finalplan.pdf

Strategy 4: Strengthen Prevention and Outreach Programs

- Emphasize protocols to close front door into homelessness

Strategy 5: Collect and Disseminate Data Relating to Long-Term Homelessness

- Collect information on homeless populations and services provided
- Market and measure progress

NDICH agencies assigned to specific goals within each strategy:

Job Service of North Dakota	JSND
North Dakota Department of Corrections & Rehabilitation	NDDOCR
North Dakota Department of Commerce	NDDOC
North Dakota Department of Human Services	NDDHS
North Dakota Housing Finance Agency	NDHFA
North Dakota Indian Affairs Commission	NDIAC
North Dakota Department of Public Instruction	NDDPI
North Dakota Coalition for Homeless People (private organization)	NDCHP

Progress reports were created in 2010 and 2013 and can be viewed on the NDHFA website.[5] The 2018 report captures the accomplishments over the past decade, lessons learned about the complexities of homelessness, challenges faced by the most vulnerable populations, and recommendations moving forward.

[5] NDICH homelessness reports 2008, 2010 and 2013. Retrieved from www.ndhfa.org/Publications/Resources.html

Accomplishments 2008-2018

Accomplishments 2008-2018

Seven state agencies were assigned to specific goals and strategies in the 10-year plan, but the majority of the accomplishments were achieved through partnerships between the agencies and local service providers consisting of faith-based and non-profit organizations working directly with the homeless and vulnerable individuals and families. The following are highlights of accomplishments achieved through this collaborative initiative.

Strategy 1: Develop Permanent Supportive Housing

Units

In 2008, the original goal was the creation of 50 new permanent supportive housing (PSH) units per year to reach the goal of 461 new PSH units by 2018. Across the state, NDICH members, service providers, and the private sector were involved in the construction or rehabilitation of 1,855 rental units for extremely low-, low-, and moderate-income individuals and families. Twenty-four percent of the units were PSH and 10 percent were allocated specifically for homeless individuals. Table 1 breaks down the type of units constructed or rehabilitated since 2008 by region. Figure 26 on pg. 35 is a map of the eight regions.

Housing Units Constructed or Rehabilitated With State Agency Involvement

	Permanent Supportive Housing Units	Homeless Units	Elderly Units	ADA Units
Region I	37	0	143	15
Region II	52	17	67	34
Region III	12	6	25	9
Region IV	50	42	7	17
Region V	133	60	344	106
Region VI	15	0	130	15
Region VII	96	46	69	36
Region VIII	53	13	211	45
State Total	**448**	**184**	**996**	**277**

Table 1. Housing units constructed or rehabilitated with state agency involvement, 2008-2017. Source: NDHFA

PSH encompasses the 'Housing First' model of rapid placement of homeless individuals into independent and stable housing, and serves as a platform from which they can pursue goals and improve their quality of life. This approach is guided by the belief that people need basic necessities like food and a place to live before attending anything less critical, such as getting a job, budgeting properly, or addressing to mental and behavioral health issues.[6]

Two Housing First, PSH projects were completed and are leased-up. In 2010, the Cooper House in Fargo was the first Housing First complex in the state and was made available exclusively to individuals who were documented as chronically homeless. The 42-unit PSH project was recognized by the National Association of Housing and Redevelopment Officers with a best practices award. The Cooper House become the template

[6] National Alliance to End Homelessness: Housing First. Retrieved from https://endhomelessness.org/resource/housing-first/

for LaGrave on First located in Grand Forks, which also provides 42-units, and opened its doors in 2018. At the time of this report, construction started on the Edwinton Place, a 40-unit complex in Bismarck.

Another proven model deployed is PSH housing for single parents and their children with the intent of transforming families from poverty to prosperity two generations at a time. The Jeremiah Program in Fargo prepares determined single mothers to excel in the workforce, readies their children to succeed in school and reduces generational dependence on public assistance. The Jeremiah Program apartments opened its doors in 2018 to serve 20 low-income families. In West Fargo, ground was broken for Grace Gardens which will provide shelter for 30 women and children seeking refuge from domestic violence. Grace Gardens will assist women to become stable and independent, while providing a safe and nurturing space for the children to attend daycare and after school programs.

Funding PSH

It is virtually impossible for developers to build units that are affordable to low- or extremely low-income individuals with only conventional financing. Lenders loan money for housing development based on the anticipated property income, and when rents are set to affordable levels, there is a huge gap between the money needed to build and the money lenders and investors provide. Most affordable housing financing deals involve a mortgage, tax credits and two or three other sources of money, however, it is not uncommon for developers to rely on upward of 10 financing sources as they try to fill the gap. Low- and extremely low-income individuals can receive rental assistance which helps ensure rental income, unfortunately, only about one in four people who qualify for housing assistance actually receives it.[7]

Funding PSH involves creative financing strategies and invested partners providing federal, state, local and private sector resources. Federal funding administered by NDHFA and NDDOC includes National Housing Trust Fund, Low Income Housing Tax Credits, Neighborhood Stabilization Program, HOME Investment Partnerships Program, Community Development Block Grant, and Emergency Solutions Grants. State funding sources include the North Dakota Homeless Grant and the Housing Incentive Fund (HIF).

HIF is a North Dakota based tax incentive providing critical gap financing for the construction, rehabilitation and preservation of multi-family housing targeted to essential service workers and low- to moderate-income households. HIF has been an instrumental tool in financing housing for individuals with disabilities, who are elderly, and those experiencing homelessness.

In 2011, the North Dakota State Legislature created HIF as a financing tool for taxpayers to receive a state income tax credit and help thousands of people who might otherwise have been priced out of the state's housing market during the peak of energy development. Individuals or corporate contributors received a dollar-for-dollar credit against their state income liability for the year they contributed. Contributions could be targeted to a specific project, community or region when applicable.

Over the course of six years, NDHFA allocated more than $89.6 million in HIF funding to 77 projects to construct or rehab 2,380 units in 26 urban and rural communities across the state.

Strategy 2: Improve Ability to Pay Rent

Eliminate Barriers

In addition to PSH, landlords must be willing to rent to individuals and families that have a history of justice involvement and financial instability. NDDHS administers the Money Follows the Person (MFP) program, which includes a housing initiative and regional supportive housing meetings to bring housing and service providers together to create successful transitions for vulnerable populations. MFP housing staff created regionally based landlord and service provider training focusing on fair housing, discrimination and service animals. The training also included presentations on current housing developments and programs that are successfully addressing challenges with tenants, community perception, and short- and long-term effectiveness to implement best practices in each region.

In 2018, NDDHS allocated $150,000 of MFP rebalancing dollars to Opening Doors: Landlord Risk Mitigation Fund which is a statewide program emulating a similar program successfully initiated by the Fargo-Moorhead Homeless Coalition. Opening Doors will provide insurance to landlords who lease to vulnerable populations and includes coverage for excessive damages or lost revenue. NDHFA implemented and is administering the program.

Vulnerable populations who are able to work cannot pay rent without securing reliable and sustainable employment. The NDDOCR authorized the Work Release While Incarcerated program at the Missouri River Correctional Center in Bismarck, ND. The program generated over $250,000 in compensation for inmates to secure funding for future housing and supplied the area with much needed labor in construction and food services.

JSND is leading numerous state- and region-based employment initiatives prioritizing individuals who are low-income, receive public assistance, are basic-skill deficient, incarcerated, or a veteran. On-the-job training, classroom training, trade adjustment assistance and building work experience are critical to assisting

individuals to become more self-sufficient and increase their earning potential. Some of the programs incorporate case managers to create a holistic approach for people to become successful. JSND staff also provide outreach to homeless shelters and correctional facilities on a monthly to quarterly basis if agencies are not able to bring their clients to JSND facilities.

In addition to helping individuals, JSND administers the Federal Bonding Program and the Work Opportunity Tax Credit. Both programs are an employer incentive guaranteeing the job honesty of a harder to employ individual by offering a safety net for employer reimbursement of up to $5,000 to hire ex-offenders, recovering substance abusers, and persons with poor credit or lack of work history.

Seeking and maintaining employment can be challenging, especially without reliable transportation. Many local service providers have funds to assist individuals with public transportation costs, however, public transportation is more accessible in urban areas than in rural areas. The NDDOT administers state and federal funding for transit services in rural, small urban and urban areas for individuals who are low-income, elderly or have disabilities to access employment, medical and educational facilities, and any other locations as needed. Figure 3 outlines the NDDOT's public transit provider service areas.

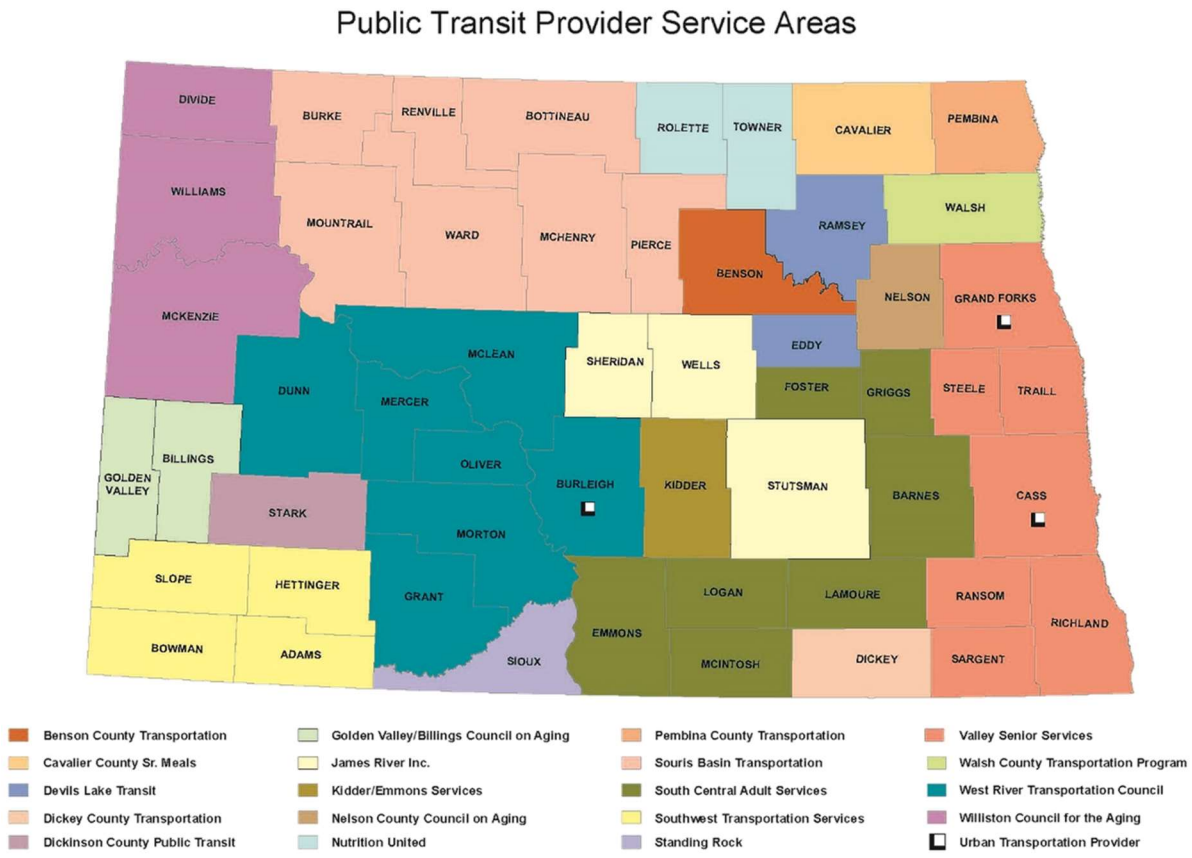

Figure 2. NDDOT Public Transit Provider Service Areas
Source: NDDOT

Rent Subsidies

Regional housing authorities and local service providers have access to funding or housing vouchers issued federally or through state agencies such as NDDOC and NDDHS. The vouchers are intended to assist very low-income, elderly and/or disabled individuals to be able to afford decent, safe and sanitary housing.

NDDOC's Emergency Solutions Grant for emergency shelter and homelessness prevention allows funding to be used for short- and medium-term rental assistance and services to stabilize and rapidly re-house individuals and families. The federal funds are consistently around $450,000 for this program and are distributed annually to more than 20 agencies across the state.

In 2013, the North Dakota legislature appropriated $2 million for the North Dakota Homeless Grant to be administered by NDDOC. The grant was designed after the federal Emergency Solutions Grant, but allowed for more flexibility to address the needs of homeless individuals and provide more rental assistance targeted to PSH. The grant also funds shelter operations, stabilization services, and rapid re-housing. The following biennium, the grant was appropriated $1.5 million and reduced to $300,000 during the 2017-2019 biennium.

HOME Investment in Partnerships program is another federal program administered by NDDOC that has provided subsidies to 666 households, totaling $1.1 million. Tenants can receive security deposit assistance, which contributed $1.2 million to 4,828 households over the past decade.

The U.S. Department of Health and Human Services awarded NDDHS for the Project for Assistance in Transition from Homelessness (PATH) grant. The program provides case management; one-time rental assistance to prevent eviction; security deposit assistance; and representative payee services. Recipients are those who are suffering from mental illness or co-occurring serious mental illness and substance abuse disorders and who are homeless or at imminent risk of becoming homeless. As a preventative measure, the program assists with one to three month's rent. Each of the state's eight regional Human Services Centers share the $300,000 PATH grant funds each year.

Strategy 3: Expand Supportive Services to Wrap Around Housing

Providing supportive wrap-around services is just as important as creating short- and long-term housing options for those in need. Services must address each person's and families' unique needs based on their current and historic housing and personal situations. Free Through Recovery, created in 2017, is a two-year, state-funded $7.5 million initiative administered by NDDOCR. The program pays for addiction counseling and behavioral health services delivered through social service, mental health, religious and cultural organizations throughout the state. The initial focus is on individuals on probation with a higher risk of recidivism. The program will require extensive local partnerships to meet urban and rural community needs creating on-going and consistent wrap-around services.

NDDOCR also has re-entry teams in Bismarck, Fargo, Grand Forks and Devils Lake consisting of community stakeholders that provide wrap around case management and supervision of offenders who are re-entering society. NDDHS, JSND, housing authorities, judges, tribal entities, local law enforcement and others are also involved. Among the outcomes tracked are housing status and this effort has improved housing stability for offenders and has been particularly successful in the Devils Lake area.

Finding employment is critical to becoming self-sustainable. JSND and NDDOCR host *Second Chance Job Fairs* in Bismarck, Grand Forks and Fargo for employers considered "felon friendly" to be able to interview individuals. In addition to job fairs, JSND actively provides workforce updates like job openings, recruitment efforts, and hiring events in communities across the state.

The Fargo area has successfully implemented a medical respite program to provide acute and post-acute medical care for homeless persons who are too ill or frail to recover from a physical illness or injury on the streets but are not ill enough to be in a hospital. Medical Respite is short-term residential care that allows the homeless individuals the opportunity to rest in a safe environment while accessing medical care and other supportive services. More than 20 community partners are providing funding for medical supplies, equipment, nursing services, case management, housing and living supplies for both men and women. Individuals can receive rapid housing and case management for six months after securing permanent housing if they agree to the program rules, are medically and behaviorally stable, and will comply with scheduled follow-up appointments. The average cost of Medical Respite care is $25 per day and the cost of acute care is $4,500 per day. Since 2016, the program has saved the Fargo region almost $3 million in acute care costs.

Navigating the process for support programs such as social security, SNAP benefits, Medicaid and Medicare can be challenging to understand the forms and program requirements in addition to the logistical barriers of accessing all of the agencies. NDDHS has designated PATH coordinators to assist helping individuals transitioning out of homelessness to apply for programs to promote recovery and wellness.

MFP is administered by NDDHS and is an $8.9 million grant from the Centers for Medicare and Medicaid Services to help approximately 110 Medicaid clients who are older adults or people with developmental disabilities transition from nursing homes or institutions and reintegrate them into the community. A full year of case management is provided in addition to $3,000 for one-time transition costs.[8]

MFP staff also created two pocket resource guides for six areas in the state providing contact information for supportive services and affordable housing providers. More than 25,000 guides have been disseminated across the state. Another publication created through the Supportive Housing Collaborative is The *Housing Resource Guide,*[9] which was created in partnership between state and federal agencies to bridge information and communication gaps for agencies, individuals and families needing to address the unique needs of persons with disabilities, who are elderly, and are experiencing economic hardship.

Strategy 4: Strengthen Prevention & Outreach Programs

State agencies assigned roles in the plan have worked together through programs such as MFP, Free Through Recovery, Opening Doors and PATH to assist those at risk of long-term homelessness to be able to find housing and successfully reintegrate back into the community. Another example of partnerships is Project Homeless Connect, which was an annual event in communities across the state. The Fargo-Moorhead Homeless Coalition transformed the event into a more on-going, holistic approach through a new endeavor, CARES (coordinated assessment referral and evaluation system). The regional system is a partnership between the Western Central Minnesota Continuum of Care (CoC), North Dakota CoC, Fargo-Moorhead Homeless Coalition, and White Earth Nation located in Minnesota. CARES streamlines access to services and makes the system client-centered.

Focusing on school-aged youth, NDDPI oversees approximately 150 district homeless liaisons to identify students experiencing homelessness, ensure their educational rights and provide a referral for the families or unaccompanied minors. Addressing the needs of homeless youth is a collaborative effort with state agencies and local service providers to determine a process for referring families to case managers.

[8] N.D. Money Follows the Person Grant. Retrieved from www.nd.gov/dhs/info/pubs/mfp/overview.html
[9] North Dakota Supportive Housing Collaborative: Housing Resource Guide. Retrieved from www.ndhfa.org/RentalAssistance/HousingResourceGuide0817.pdf

Project Service Connect has become an annual event in communities across the state. Homeless/Hunger Awareness Week activities have also been initiated. In most of the larger cities in North Dakota and the faith community has taken on an expanded outreach and emergency mission during winter months. These church sheltering operations have been crucial in providing a warm place to sleep for homeless individuals when weather conditions are life threatening.

Strategy 5: Collect & Disseminate Data Relating to Long-Term Homelessness

NDCHP organizes statewide collaborative meetings to share information pertaining to best practices, federal, state and tribal regulations, and serves as a connector between state and federal agencies and the local service providers. NDCHP also organizes the annual HUD Point in Time Count (PIT) with assistance from NDDOC to ensure homeless data counts for urban and rural areas.

Each state agency in addition to NDCHP works closely with the local media to promote program successes and to keep the public informed about the current homeless situation across North Dakota. In times of urgent response, such as severe winter weather, it is essential for the service providers to be able to communicate their needs and provide accurate information about homeless populations.

NDHFA sponsored a Statewide Housing Needs Assessment in 2012 and 2016 conducted by North Dakota State University's Center for Social Research to analyze population and housing trends. The 2016 housing assessment dove into the special needs of the state's subpopulations, which had not been analyzed before. Once the assessments were completed, NDHFA held regional forums with NDSU research staff to discuss the data and what the future looked like for each region. Economic developers, community leaders, legislators, service providers and the general public were engaged through the assessment process.

What We Learned

What We Learned

Counting homeless populations is extremely difficult due to multiple definitions of homelessness, the mobility of the population, rural isolation, and the cyclical nature of homelessness for many individuals and families. In addition, homeless people are often reluctant to be identify themselves as homeless, and many of them remain invisible even to the most diligent social workers. There is no uniform method for counting the homeless, instead indirect estimation, single-contact census, and capture-recapture studies are used to quantify this population.[10]

Local service providers use HUD's PIT methodology to conduct the annual PIT count for the state. The PIT focuses on counting sheltered and unsheltered homeless people. HUD requires communities receiving federal funds from the McKinney-Vento Homeless Assistance Grants program to conduct an annual count of all sheltered people in the last week of January. Electronic administrative records are used to enumerate people living in emergency shelters and transitional housing. Unsheltered counts are required every other year, although most communities conduct an unsheltered count annually. During the PIT counts, communities are required to identify whether a person is an individual, a member of a family unit, or an unaccompanied youth under the age of 18 or age 18 to 24. In addition, communities must identify if a person is chronically homeless, indicating long-time or repeated homelessness and the presence of a disability.[11]

In North Dakota, the homeless PIT count numbers have fluctuated as have the subpopulations. Figure 3 is a breakdown of the North Dakota's homeless subpopulations compared to the state's overall population growth. The subpopulations depict the complex issues surrounding homelessness that extends beyond not being able to afford housing. Local service providers and state agencies were unprepared for the magnitude of homelessness experienced across the state. When the 2008 plan was drafted, energy development catapulted North Dakota's economic development opportunities into the national spotlight attracting tens of

thousands of people to the state, some without living arrangements. A statewide housing shortage forced people into homelessness even if they could afford to pay rent or purchase housing due to the limited housing stock available. People were doubling up, living in vehicles, and sleeping in churches. Some employers provided traditional housing options in addition to recreational vehicles or man camps. Along with the population influx and housing shortages, service providers were responding to increased domestic violence, human trafficking, substance abuse and incarcerations, which can be the cause as to why individuals experience homelessness.

Discrepancies between definitions of homelessness is evident based on NDDPI's school-aged youth homeless counts, which includes housing insecure and doubling-up. In 2016, NDDPI reported 2,166 children ages 5-18 either living in shelters, doubled-up, in a hotel/motel, unsheltered or unaccompanied by an adult. NDDPI's 2015-16 homeless student count is two times more than the state's PIT count; however, NDDPI tallies the count over the school year and has more consistent access to this vulnerable population resulting in more thorough identification and reporting.

North Dakota Department of Instruction Data
Homeless Youth Ages 5-18

School Year	Number of Students Identified as in Transition	Sheltered	Doubled Up	Hotel/Motel	Unsheltered	Unaccompanied
2012-2013	2,122	239	975	189	719	
2013-2014	2,395	236	1,096	256	807	171
2014-2015	2,715	196	1,397	246	876	150
2015-2016	2,230	151	1,440	151	371	193
2016-2017	2,166	228	1,186	107	179	223

How Much Does Homelessness Cost

According to the U.S. Interagency Council on Homelessness, chronically homeless persons cost taxpayers as much as $30,000 to $50,000 per year. The cost is calculated based on public services utilized such as hospitals, shelters, jail, psychiatric centers, alcohol and drug treatment, and living on the street. PSH is estimated to lower that cost by 40 percent.[12]

The Cooper House, North Dakota's first Housing First project, opened in 2010 and a benefit-cost-analysis was conducted after 12 months of operation. Preliminary assumptions determined that the 66 tenants who lived in the Cooper House cost the public $552,895 the previous year. After being rapidly rehoused the public expense dropped to $348,755 a savings of $204,140 or 41.5 percent.[13] The savings were realized in the following cost centers: healthcare and medical, law enforcement and legal, detox, administration, and emergency shelters.

[12] Ending Chronic Homelessness in 2017. Retrieved from www.usich.gov/resources/uploads/asset_library/Ending_Chronic_Homelessness_in_2017.pdf

[13] Cooper House Impact Report. Retrieved from http://fargohousing.org/files/pdf/Cooper%20House/Impact%20Reports/Cooper_House_Impact_Report_June_2013.pdf

In Fargo, healthcare facilities, housing providers, and case managers collaborated to create a medical respite program in response to the healthcare gap for homeless individuals. Respite care provides recuperative services for those who many not meet criteria for hospitalization, but are too sick or vulnerable to be discharged on the streets. National trends have documented lower mortality rates as well as a reduction in the inpatient length of stay, emergency department visits, outpatient clinic visits and readmissions to the hospital for homeless individuals who are discharged to medical respite compared to those that are discharged to the streets. In 2016, an analysis of the Fargo Medical Respite program demonstrated a savings of $2,658,150 in acute care costs in less than two years. The Fargo program is a hybrid of a traditional respite program, where patients are recommended to stay for approximately 45 days allowing medical staff to treat the individual and develop a plan to transfer them to housing with support services in place. The MFP Housing Program also gives each participant a small stipend to help them set up their new home as they transition into permanent housing.

Although there is data showing the successful implementation of housing and medical intervention for homeless individuals, much of the national data focuses on large metropolitan areas and does not represent the smaller urban centers and rural communities of North Dakota.

Vulnerable Populations

Progress has been made over the past 10 years to end homelessness, however, certain populations are still at a higher-risk of experiencing both short- and long-term homelessness. Housing, case management and healthcare needs to be customized to each of these groups to ensure the greatest level of stability and long-term success.

Chronically Homeless

Chronically homeless is defined as an individual or family that is homeless and resides in a place not meant for human habitation, in an emergency shelter, and has been homeless and residing in such a place for at least one year or on at least four separate occasions in the last three years. Chronically homeless families include the head of household with a diagnosable substance use disorder, serious mental illness, developmental disability, post-traumatic stress disorder, cognitive impairments resulting from a brain injury, or chronical physical illness or disability.[14]

The median number of chronically homeless individuals in North Dakota over the past decade has been 75.5. The lowest count occurred in 2017 at 45, but averaged 138 annually from 2013-2016. The HUD PIT count is the only active means to document all chronically homeless individuals across the state, and it is conducted in January making it difficult to locate and document the unsheltered homeless.

North Dakota's chronically homeless population has more than likely experienced trauma in their childhood and have on-going mental health issues and substance abuse. For example, in 2017 of the 1,089 homeless and 45 chronically homeless individuals, 69 reported themselves as severely mentally ill, and 70 diagnosed themselves as having chronic substance abuse. The numbers for each category would probably be higher if they were medically diagnosed or if a case manager was able to document their condition instead of relying on self-reporting.

[14] HUD Defining "Chronically Homeless," 2015. Retrieved from www.hudexchange.info/resources/documents/Defining-Chronically-Homeless-Final-Rule.pdf

Housing the chronically homeless is challenging, and there is no one size fits all solution. Across the state, numerous partnerships have formed between federal and state agencies and local service providers to find housing models that best serve each community. Housing First is a rapid housing approach; homeless shelters are a temporary solution; and "harm reduction" shelters have been discussed in numerous circumstances as an alternative to dry shelters that are more prevalent and accepted by the general public. However, these housing models benefit urban areas and not rural communities. Rural-based homeless individuals and families are more "hidden" as they occupy tents, campers, abandoned houses, barns and ice fishing houses. Homeless individuals and families in rural areas have a more difficult time accessing services provided in urban communities.

Justice Involved

Persons with mental illness and substance use problems are overrepresented in jails and prisons as compared to the general population. Across the United States, deinstitutionalization, along with a failure to develop easily accessible and useful outpatient alternatives for treatment, has led to correctional facilities housing the highest concentrations of people with mental health and substance abuse concerns in the country. National data has shown that nearly 70 percent of adults entering jails and more than 50 percent in state prisons have a substance use disorder. Additionally, the number of mentally ill inmates in America's jails and prisons is reported to have quadrupled over the past 20 years. Research suggests that up to 50 percent of jail and prison inmates may have a mental health concern in addition to substance use disorders. Estimates of severe and persistent mental illnesses among incarcerated adults range from 15 to 25 percent, as compared to 5 to 8 percent in the general population.[15]

Data for North Dakota prison facilities in 2015 shows that over 70 percent of individuals entering prison have an active substance use disorder diagnosis. Beyond that, 41 percent of male inmates have a mental health diagnosis in addition to substance use disorders, and around six percent meet criteria for a severe and persistent mental illness. About 50 percent of female inmates have a mental health diagnosis in addition to substance use disorders, with 14 percent diagnosed with a severe and persistent mental illness.[16]

Individuals with behavioral health issues and criminal justice involvement have increased hardship in finding housing as many landlords are allowed to choose whether or not they lease to those with criminal records. If these individuals were treated for their behavioral health issues and not incarcerated as a form of treatment, they would have one less barrier to obtaining housing.

[15] Improving Access to Care for Justice-Involved Persons with Behavioral Health Needs. 2016. Retrieved from https://docr.nd.gov/sites/www/files/documents/media/Charter.pdf. p.4.

[16] Improving Access to Care for Justice-Involved Persons with Behavioral Health Needs. 2016. Retrieved from https://docr.nd.gov/sites/www/files/documents/media/Charter.pdf. p.4.

Other Race	47	2.3%

Table 3. Characteristics of Justice-Involved Persons Utilizing HSC Services, SFY 2013-17
Source: HSC event and demographics data extracted January 2018 from the ROAP system; n=2,271

Significantly more robust, wrap around services available to individuals within the community is critical, as individuals with justice involvement experience multiple barriers to accessing services. A common theme was that, in general, community-based treatment providers are resistant to serving individuals with criminal justice histories. Unfortunately, it is common for individuals to "burn bridges" with community treatment providers, which further limits their options. Another scenario described a "caste system" in both inpatient and community-based services, in which people who are justice involved face greater difficulty accessing services, receive lower-quality treatment, and are generally considered "less deserving" than those with no justice involvement.[17]

Another frequently cited challenge was access to housing. Felony convictions bar individuals from accessing HUD-funded and other publicly funded affordable housing options, and many private landlords are unwilling to consider renting to this population, especially if an individual is a registered sex offender. The instability of finding housing puts individuals at a higher probability of participating in activities that led to their incarceration. Justice involved individuals are not protected under the Fair Housing Act; therefore, landlords can reject their housing applications.

Even when individuals are able to find housing, they may have difficulty supporting themselves financially. Many have lingering justice involved issues as well as chemical dependency that needs to be addressed before being work-ready. As they address their behavioral and mental issues, seeking full-time employment may not be an immediate option as they need time and case management to adjust to life back in the community.

Another significant barrier to successful reintegration to the community concerns Medicaid eligibility. North Dakota is one of 19 states in which an individual's Medicaid benefits are terminated—rather than merely suspended—as soon as the person is incarcerated. This means that instead of activating coverage upon the

[17] 2018 North Dakota Behavior Health Study. 2018. p 83.

person's release, the person must reapply, impeding their successful transition back into the community. Since individuals are not eligible until they are officially released, prison staff assist individuals on what they need to do to get re-enrolled, but the individual themselves has to enroll again within 30 days of release.[18]

Behavioral Health

In 2016, almost 100,000 North Dakotans aged 18 and older met the criteria for a mental illness diagnosis, and an additional 23,454 people had a serious mental illness. The remaining 83 percent who have not received a diagnosis are nonetheless an important population for consideration, as this population includes young adults who may have behavioral health needs in the future, individuals from hard-to-reach populations who may be struggling with undiagnosed behavioral health challenges, and others for whom low-cost, proactive prevention strategies could prevent mental health conditions from occurring.[19]

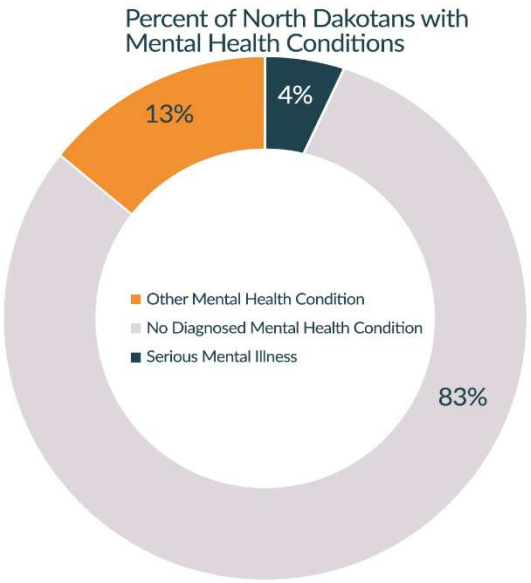

Figure 4. Percent of North Dakotans With and Without a Mental Health Diagnosis
Sources: SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health, 2015 and 2016, and U.S. Census Bureau, Population Division Release Date: June 2017

Among children and youth, the prevalence of mental health conditions is similar to national estimates. An estimated 12 to 25 percent of North Dakotan students have an emotional or behavioral disorder. In 2016, the annual average proportion of adolescents aged 12 to 17 with a major depressive episode in the past year was 11 percent, slightly lower than the corresponding national yearly average percentage of 12.8 percent.[20]

Table 4 presents numbers and characteristics of individuals who reported living in a homeless shelter or who received a health center service related to homelessness.[21] Table 4 likely underestimate the number of individuals with behavioral health needs who are homeless as the information only focused on recipients of some outpatient treatment.

Source: HSC event and demographics data extracted January 2018 from the ROAP system; n=1,735

Access to safe, adequate, and affordable housing is a critical element in supporting individuals with behavioral health needs to live independently in their communities. Unmet housing needs are obstacles to recovery and reduce the effectiveness of behavioral health treatment especially in rural areas. Most PSH units are based in Fargo and Bismarck, and other higher-population locations within the state and individuals will more than likely be relocated to these communities to be housed as part of their discharge plan from a mental health or substance use treatment facility. The lack of PSH in rural areas further complicates the accessibility for individuals seeking help outside of urban areas.

Within the Fargo-Moorhead area, three out of four homeless adults have serious health conditions, including mental and physical health problems, substance abuse disorder or evidence of a traumatic brain injury.[22] Based on an independent 2015 PIT survey commissioned by the Fargo-Moorhead Coalition for Homeless Persons, more than half of those surveyed were told by a doctor or nurse within the last two years that they had a serious mental illness, another 40 percent stated they had chronic physical health problems, and 30 percent considered themselves chemically dependent. These behavioral, mental and physical health issues impacted the respondents' ability to work, perform daily activities, manage finances and make sound decisions. Undiagnosed and untreated brain injuries may be an underlying cause of these issues. [23]

Native Americans

Native American's are the largest racial group other than whites in North Dakota, and in 2017 Native Americans totaled 21 percent of the state's total homeless population.[24] The amount of Native Americans experiencing homelessness is likely greater than then numbers reported due to the magnitude of homelessness both on and off of Reservations.

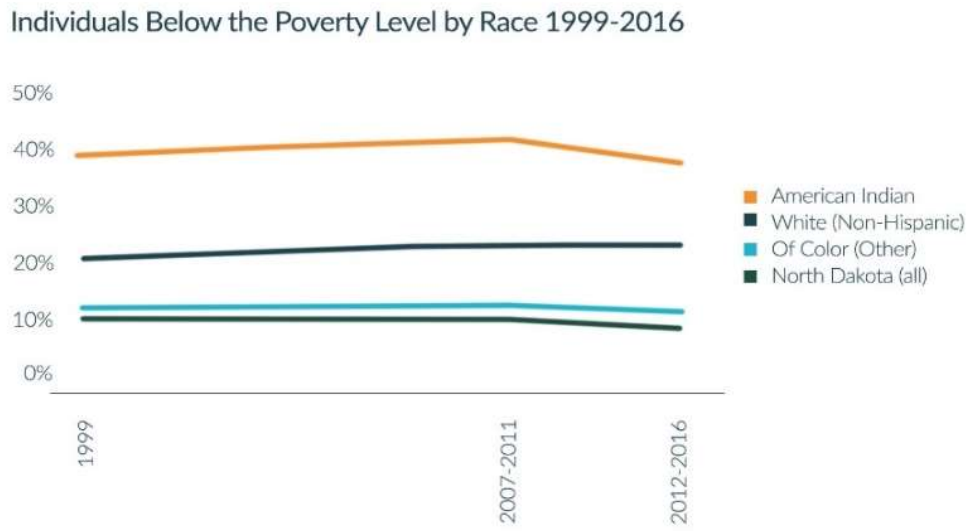

Figure 5. Individuals Below the Poverty Level by Race, North Dakota, 2012-2016
Sources: U.S. Census Bureau, Decennial Census and American Community Survey

The foundation of Native American culture emphasizes taking in family members and other tribal members who need a place to stay results in long-term doubling up of households. Therefore, the number of Native American's that would be considered homeless is more than likely higher than reported in the PIT count. Over-crowding and inadequate housing conditions put stress on quality of life, as the majority of Native Americans will not force members in their household out without another housing option.

Native American's face the highest percentage of poverty across all races in North Dakota, but the severity of poverty varies amongst the state's four Reservations.

[24] 2017 Point-In-Time Count ND. Retrieved from https://static1.squarespace.com/static/5570a318e4b02d3071ca7d2b/t/59934812db29d6ca444d0cde/1502824471561/PIT+Count+2017+%281%29.pdf

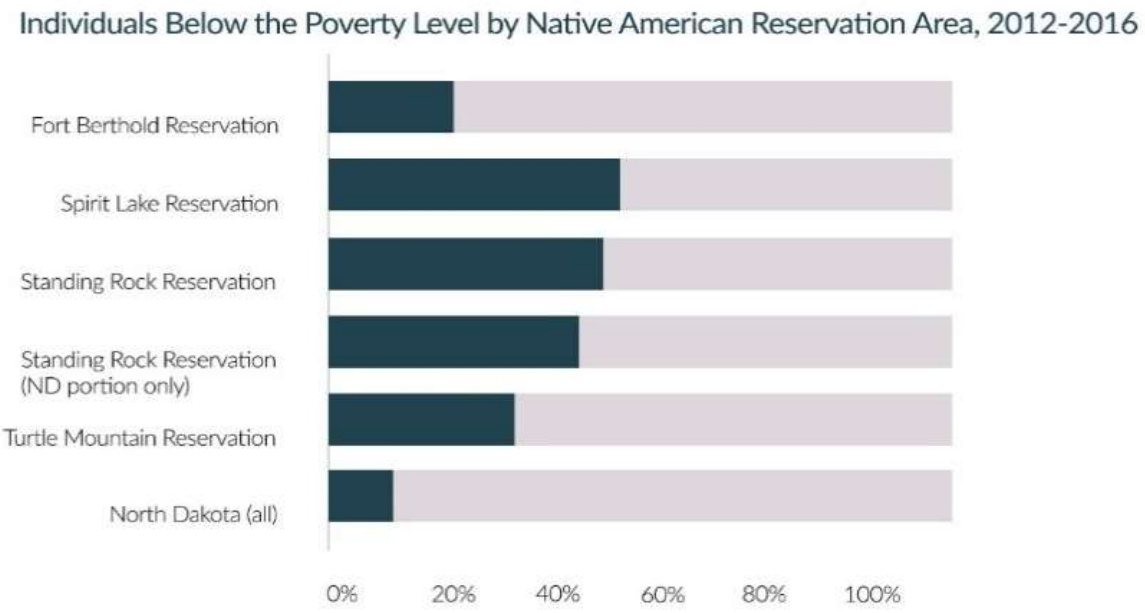

Figure 6. Individuals below the Poverty Level by Native American Reservation Area, North Dakota, 2012-2016
Sources: U.S. Census Bureau, American Community Survey

The poverty rate on the Fort Berthold Reservation is lowest due to the energy development that occurred on the reservation and surrounding area during the last decade. Other reservations do not have the same level of economic development opportunities which is exemplified by the percentage of cost-burdened households.

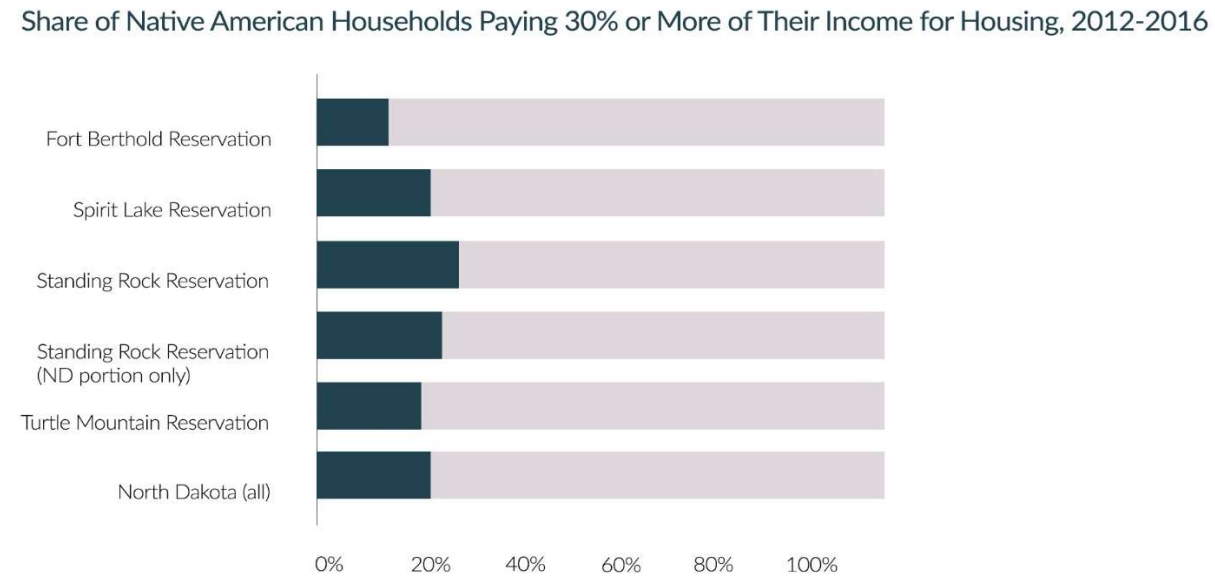

Figure 7. Share of Households Paying 30 percent or More of Their Income for Housing

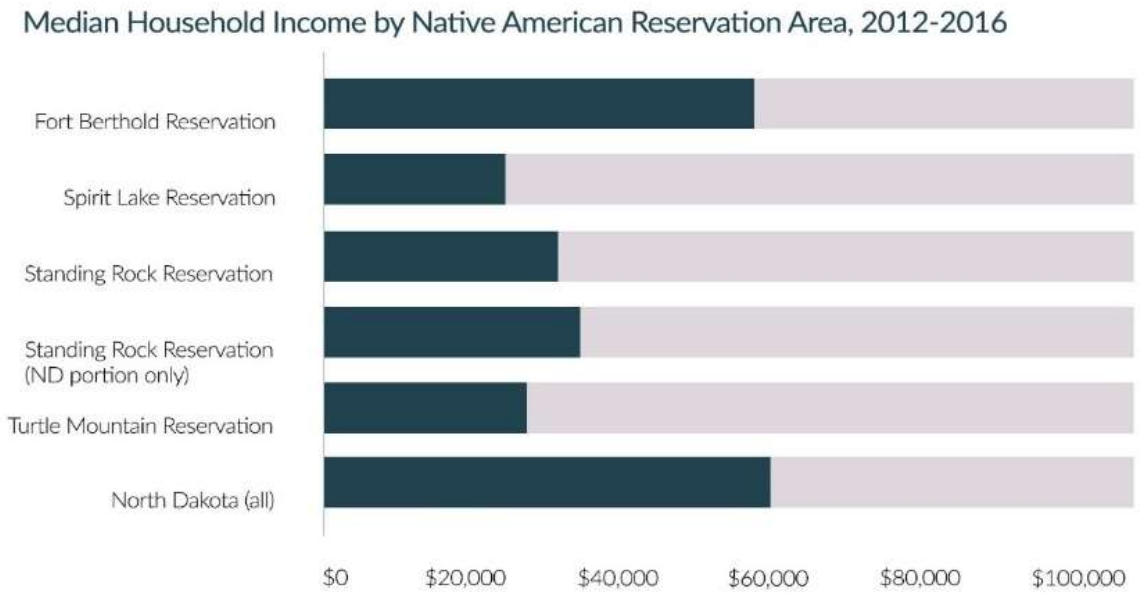

Figure 8. Median Household Income by Native American Reservation Area, North Dakota, 2012-2016
Sources U.S. Census Bureau, American Community Survey

Although there have been increased housing developments on the reservations, affordable housing options for homeownership and rental units is difficult to obtain. Construction of housing developments are usually smaller in total units and infrequent due to funding availability and fluctuating community needs; therefore, it is more challenging to access competitively priced building supplies and contractors willing to complete the project in a timely manner.

More than 40 percent of Native Americans are homeowners; however, mortgage lending on tribal land is an underserved market with unique challenges such as trust land, fractioned land ownership, and limited access to financial institutions. While tribal trust land status is no longer considered a major barrier since the implementation of Section 184 of the Indian Home Loan Guarantee Program, the volume of mortgage lending on tribal trust land is still quite small. Rental property managers on the Reservation deal with the same issues as properties off of the Reservation when renting to vulnerable populations: higher percentage of damaged the units, on-going criminal activity, and the tenants not paying rent on time.[25]

It is estimated that 78 percent of Native Americans live off of the Reservation, and poverty remains one of the most challenging aspects of urban Indian life. Whether or not Native Americans have financial stability off of the reservation, they have either experienced poverty themselves or know a family member who is living in poverty. Housing and homelessness remain at the top list of challenges they face.[26] The outmigration of youth and young families moving to more urbanized areas away from the reservations seeking higher educational and economic opportunities continues to increase. However, many Native Americans transition on and off the Reservation as they struggle to find support networks, fit in culturally, or they are not able to achieve financial stability.

YOUTH

In 2017, there were 178 documented homeless children ages 0 to 18 years old living in an emergency shelter, transitional living facility, or unsheltered according to the HUD PIT count.[27] School-age children, ages 5 to 18 years old, experiencing homelessness was reported much higher by NDDPI with 2,166 students documented as either sheltered, doubled-up with other families, living in a hotel/motel, unsheltered, or unaccompanied by an adult during the 2015-2016 school year.

Limitations in data collection and self-reporting may have resulted in a lower total number of homeless children or those at risk of homelessness across the state, as the U.S. Census estimated nearly 50,000 North Dakotan children are living in families with an income below 200 percent of the federal poverty level. Half of all Native American children living in North Dakota were impoverished in 2015, more than five times the rate for white children at nine percent.[28]

Further complicating the wellbeing of children is the state's rise above the national average for child maltreatment, which encompasses both abuse and neglect. In 2015, 1,760 North Dakota children were victims of maltreatment; specifically for every 1,000 children ages 0 to 17 in the state, 10.4 were abused or neglected. Of these victims, 77 percent were neglected, 32 percent were psychologically abused, 12 percent were physically abused, and four percent were sexually abused.[29] Physical, sexual and mental abuse during childhood are the leading causes for long-term homelessness as adults.

Juvenile delinquency has potentially high stakes for both individuals and society as a whole. Delinquency is linked to higher crime rates in adulthood and other adverse outcomes such as homelessness. One estimate suggests that between 50 and 75 percent of adolescents who have spent time in juvenile detention centers are incarcerated later in life. A total of 3,471 North Dakota juveniles ages 10 through 17 were referred to court at least once for delinquent or unruly behavior in 2016. [30] Following a national downward trend, the number of North Dakota juveniles referred to court has decreased an average of five percent annually since 2003. [31]

Local service providers have expressed their concern about assisting youth with opioid addiction and the difficulties in getting this population help and housing to keep them off of the streets. Youth with trust issues towards adults is extremely difficult to convince to seek help.

A major contributor to the financial stability and well-being of children is secure parental employment; however, many working families with children struggle to make ends meet. In 2015, the poverty threshold considered insufficient for a family of four with two children to afford basic necessities, was $24,036. In North Dakota, 21,716 children were living in families whose income was not meeting this threshold. Younger children, ages 0 to 4 in the state had a higher poverty rate than older children ages 5 to 17, 16 percent compared to 13 percent respectively. In eight North Dakota counties, at least one in five children was living in poverty. Children living on Native American reservations tend to have the highest child poverty rates in North

Dakota. Data from 2015 indicate that about half of all children in Rolette and Benson counties were impoverished, 49 percent and 48 percent respectively.[32]

The Temporary Assistance to Needy Families Program (TANF), designed to help families in need to achieve self-sufficiency, assisted 4,649 North Dakota children ages 0 through 19 in 2016, down five percent from 4,887 in 2015.[33] The Supplemental Nutrition Assistance Program (SNAP) provided food to 37,758 North Dakota children ages 0 through 18 in 2016, 21 percent of children statewide. In North Dakota public schools, 37,928 children were eligible for free or reduced-price lunches in 2016, 33 percent of total school enrollment. In five of North Dakota's 53 counties, Sioux, Rolette, Benson, Sheridan and Mountrail, at least half of students were eligible for free or reduced-price lunches in 2016.[34]

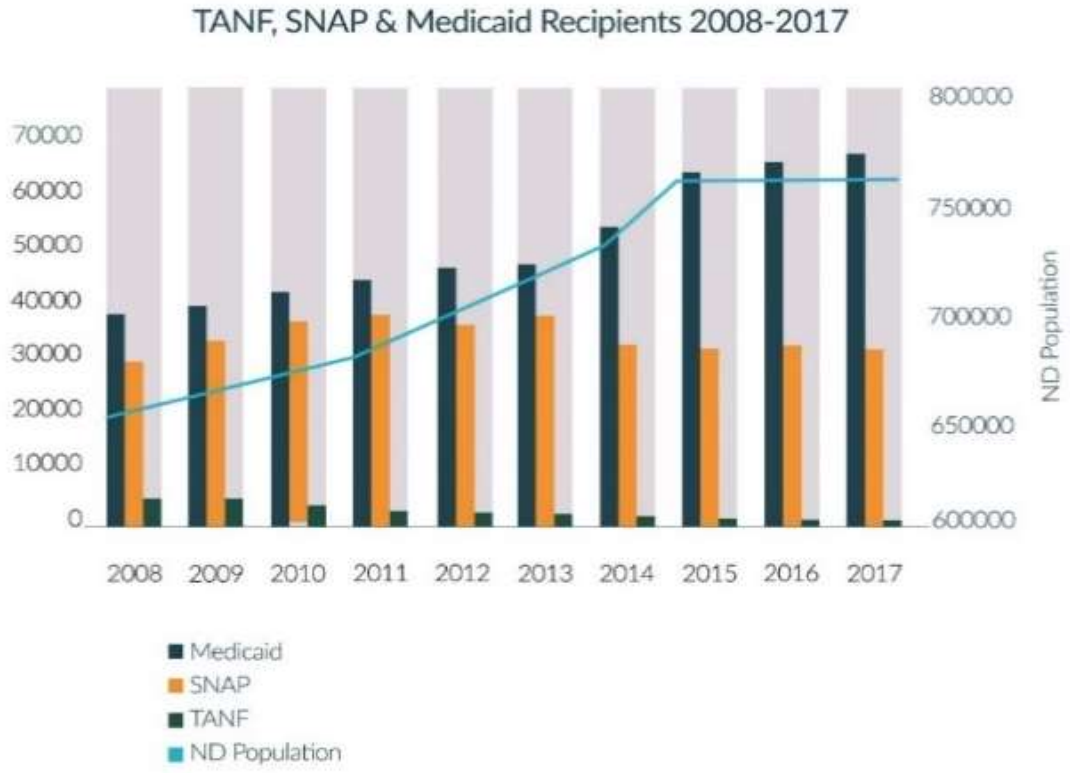

Figure 9. TANF, SNAP and Medicaid Recipients 2008-2017
Source: NDDHS

However, taking care of young children while holding down a job can be challenging. This is especially true for single parents who may have as many child-related demands on their time as married parents, but half as many adults in the household to meet them. To allow parents to work or attain the education necessary to become employed and self-sufficient, 6,610 children benefited from the North Dakota Child Care Assistance program in 2016, 5 percent of all children ages 0 through 13 statewide.[35]

High-quality child care nurtures, stimulates and supports children as they build the confidence and critical thinking capacities they need to thrive in school and life.[36] In North Dakota, single parents pay 34.2 percent of their income for infant-center care. Married parents of two children living at the poverty line pay 66.9 percent of their household income for center-based child care. The cost of infant care in North Dakota is more than the annual cost of college tuition at a four-year college. The average price of center-based child care for an infant costs nearly a year of mortgage in North Dakota.[37]

Foster Youth

In 2017, 2,048 youth were placed in foster care with the median annual increase over the past decade at six percent.[38] Often youth in the foster care system have lived through multiple traumas and disruptive events such as abuse and/or neglect, multiple foster home placements, lack of continuity in education, and an array of lost relationships such as friends, families, and/or siblings by the time they begin their transition into adulthood. Their life experiences can create additional problems resulting in mental illness and substance abuse, and an increased likelihood of incarceration and homelessness.

On average, 130 foster care youth turn 18 years old each year in North Dakota. At this point, youth can either age-out of the system or enroll in the 18+ Continued Care Program, which allows youth to remain in foster care until they turn 21 years old as long as they are enrolled in higher education. Of those turning 18, approximately 37 percent utilize the 18+ program annually.[32]

Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

In 2015, NDDHS – Children and Family Services Division completed the National Youth in Transition Data Base (NYTD) Cohort Survey, which surveyed current and former foster youth at ages 17, 19 and 21 to measure outcomes for youth following their discharge from foster care. By engaging these individuals at three different ages, the state can better understand the experiences of foster youth following their release from the program. The survey compares North Dakota to the national average in homelessness, substance abuse, incarceration, giving birth to or fathering a child, employment, public assistance, and education. The following five outcomes are outlined in the survey report.[39]

Outcome 1: Experiences with Homelessness

Leaving foster care unprepared to live on their own, puts youth at risk of becoming homeless soon after discharge. At each age level surveyed, North Dakota foster youth experience homelessness more than the national average. These youth have more than likely been homeless before age 17 and will more than likely remain homeless for an extended period then youth not in foster care.

[39] National Youth in Transition Data Base. North Dakota Department of Human Services-Children and Family Services Division.

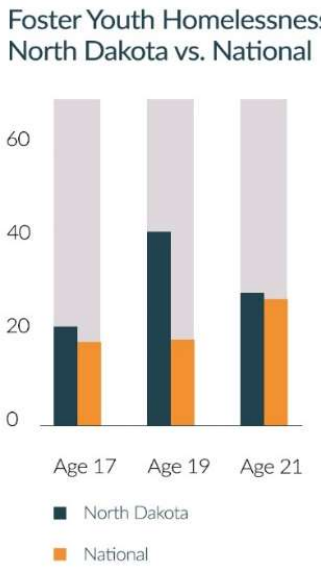

Figure 12. North Dakota Homeless Foster Youth vs. National Average
Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

Outcome 2: High-Risk Behaviors

North Dakota youth percentages are higher than the national average for substance abuse, incarceration and giving birth or fathering a child. These three scenarios hinder successful transition into adulthood among youth in foster care.

At age 17, almost half of the survey respondents had at some point during their lifetimes been referred for substance abuse assessment or counseling, and 20 percent of age 19 respondents and 14 percent of the age 21 survey respondents reported having had a referral to substance abuse assessment or counseling within the past two years. Youth incarceration rates in North Dakota are the third highest per capita in the nation. The data indicate that one out of every three homeless young adults surveyed has been in either foster care or correctional care as a juvenile. Youth emancipating from the Youth Correctional Center pose a particular challenge. Former foster youth continue to find themselves homeless at a significantly higher rate than their peers.

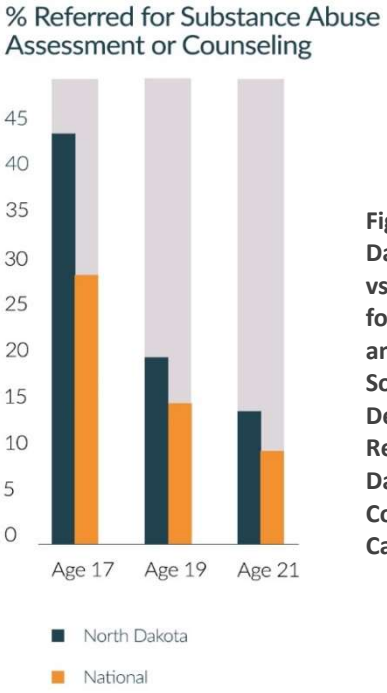

Figure 13. North Dakota Foster Youth vs. National Average for Substance Abuse and Counseling
Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

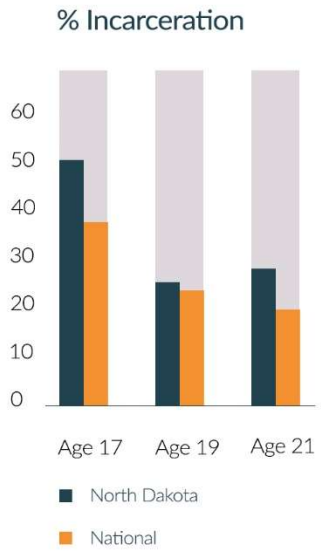

Figure 14. North Dakota Foster Youth Incarceration vs. National Average
Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

Outcome 3: Access to Health Insurance

Access to health care can help ensure that youth receive the prevention and treatment services they need to remain healthy and manage behavioral health issues or substance abuse. Youth in title IV-E foster care are categorically eligible to receive Medicaid. Additionally, some provisions under the Patient Protection and Affordable Care Act increased access to health care for youth formerly in foster care, including the extension of Medicaid coverage to young people up to age 26 in certain circumstances.

Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

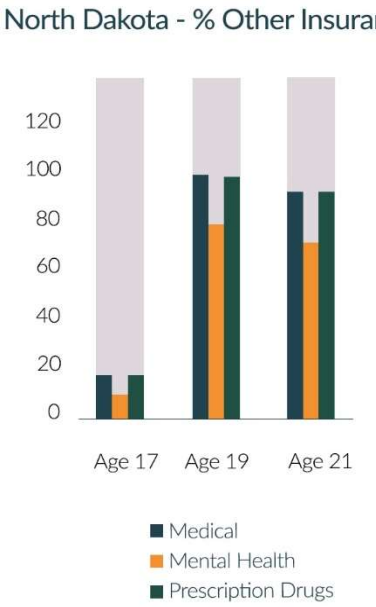

Figure 16. North Dakota Foster Youth with Insurance Coverage
Source: FRAME Demographics Report, North Dakota 18+ Continued Care Cases Data Sheet

Outcome 4: Financial Self-Sufficiency

As youth age and make decisions about whether or not to remain in or return to foster care, financial stability becomes a crucial indicator of their readiness for independence. Over 18 percent of age 17 respondents reported working either full- or part-time; at age 19, 43 percent were working full- or part-time, and at age 21, 61 percent were working full- or part-time. By age 21, 24 percent of North Dakota respondents reported receiving public assistance compared to 38 percent nationally. Fewer respondents reported receiving educational, financial assistance than those responding on the national level.

Outcome 5: Educational Attainment

Achieving a high school diploma or General Equivalency Degree (GED) can be considered a minimal requirement for self-sufficiency and can assist in establishing a solid educational foundation that will prepare youth for future educational pursuits. Respondents were asked to report their current enrollment status in an educational program, and the highest educational certification received. Ninety-seven percent of age 17 survey respondents had not yet received any educational certification, but 91 percent of them indicated they were currently enrolled in and attending some type of educational program. By age 19, 65 percent of survey respondents had received a high school diploma or GED, and by age 21 the percentage had increased to 67 percent.

Frail Elderly

The number of elderly households is projected to increase substantially as a result of the baby boom cohorts aging forward into the next age category. Such households on limited or fixed incomes can be vulnerable to becoming burdened by housing costs. Nearly half of all North Dakota renter-occupied households ages 65 and older were cost-burdened in 2014, and 17 percent of owner-occupied households ages 65 and older were cost-burdened.[40] Increased healthcare costs put additional pressures on housing-burdened households forcing many elderly individuals to abstain from medical treatments and medications resulting in declined heath, eventually forcing them out of their homes and into assisted living and nursing home facilities.

North Dakota ranks seventh in the nation in the highest proportion of individuals age 85 years and older. Based on the aging population and extended life expectancy, it is anticipated that one out of two North Dakotans will need long-term care services such as nursing facilities, basic care, assisted living, swing beds or home- and community-based care in their lifetime. In 2017, there were more than 16,000 individuals in basic care, assisted living or skilled nursing facility. The state has the oldest nursing home residents with 47 percent aged 85-95 years, which is the highest in the nation and is the second highest in the nation with 9.2 percent over the age of 95.[41]

Table 6 below is an overview of the level of care North Dakotans receive outside of their home. Elderly households that are able to retrofit their homes to address mobility challenges are the least cost-burden solution for the individual and the state.

Disabled

In North Dakota, 11 percent of the total population, or 72,674 people reported having a disability including ambulatory, visual, cognitive, and hearing to needing assistance with self-care and independent living. The employment rate for persons with a disability is much lower than for those without a disability. The disparity in employment between individuals with a disability and those without is illustrated by the difference in mean annual earnings. In 2014, mean annual earnings for the non-institutionalized population ages 16 and older with a disability in North Dakota was $22,377 compared to $31,754 for persons without a disability. Considering the lower rates of employment and lower mean annual earnings among individuals with a disability in North Dakota, the higher prevalence of poverty among those with a disability is not unexpected. Individuals with a disability were more than twice as likely to be living in poverty as individuals without a disability. Twenty-four percent of persons with a disability lived in poverty compared to 10 percent of persons without a disability.[42]

[42] 2016 North Dakota Statewide Housing Needs Assessment: Component 2-Special Housing Topics. p 16-8.

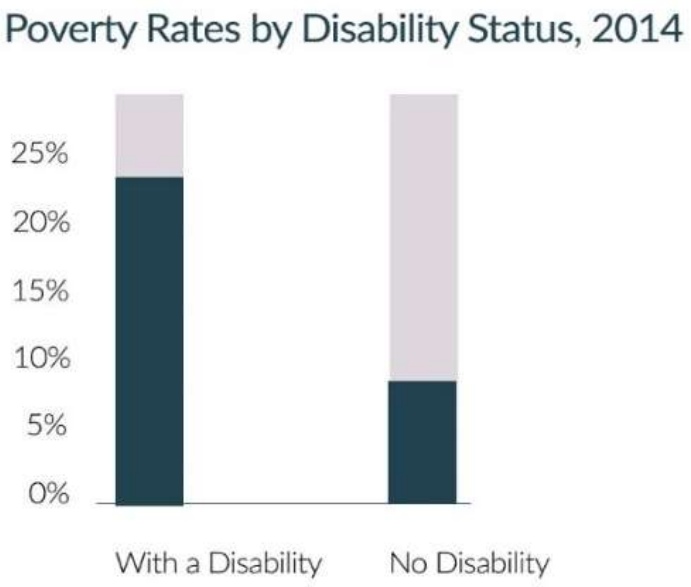

Figure 19: Poverty Rates by Disability Status in North Dakota, 2014
Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Persons less than 65 years old with disabilities are projected to increase by 6,108 by 2029, a 15 percent increase. The number of individuals with a disability ages 65 and older is projected to increase by 17,092, a 52 percent increase by 2029. Disability rates were assumed to remain the same until 2029, 6.7 percent for the 0 to 64 age category and 34.4 percent for the 65 and older age group. However, future trends on the proportion of the population with a disability should be monitored. In recent years, the number of people with a disability increased faster than the increase in the number of people without a disability.[43]

[43] 2016 North Dakota Statewide Housing Needs Assessment: Component 2-Special Housing Topics. p 16-8.

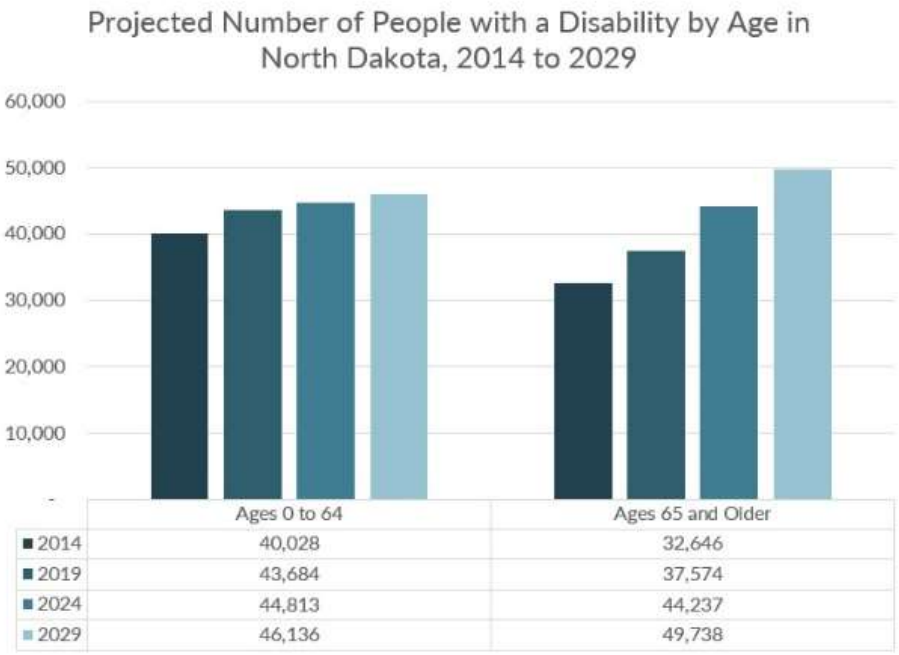

Figure 20: Projected Number of People with a Disability by Age in North Dakota, 2014-2029
Source: U.S. Census Bureau and the Center for Social Research at NDSU

The North Dakota State Hospital provides inpatient and residential care for substance abuse and severe mental illness. Individuals served by the State Hospital often have multiple needs and diagnoses—they may struggle with both mental illness and substance abuse, have developmental or cognitive disabilities, traumatic brain injuries, or other conditions that render them unable to care for themselves. Most patients treated at the State Hospital were discharged to their residence. Nearly all other patients were discharged to some other type of group-living or institution. Of all the discharges from 2010 to 2014, 60 percent were discharged to a personal residence, 14 percent were discharged to intermediate care facilities, 13 percent to correctional facilities, and 12 percent to another inpatient facility. While a majority of state hospital patients were discharged to known locations, a small percentage of discharges were classified as housing insecure. Examples of housing insecure discharge types include homeless shelters, left against medical advice, discharged after a court appearance, and unknown. The number of housing insecure discharges have increased since 2010. In 2010, 12 discharges were categorized as housing insecure. In 2015 the number of housing insecure discharges per year had doubled to 24. Put into another context, in 2015, on average, two discharges per month were housing insecure discharges. [44]

[44] 2016 North Dakota Statewide Housing Needs Assessment: Component 2-Special Housing Topics. p 18-9.

Veterans

In the past decade, the North Dakota Department of Veterans Affairs and the Fargo VA Health Care System's Homeless Veterans Program has worked with 1,200 veterans experiencing homelessness across the state. North Dakota's VA has 275 HUD-VA Supportive Housing (VASH) Program vouchers that are available to veterans and their families to live in market-rate rental units with the VA providing case management services. Utilization of the vouchers across the state is 90 percent, and no veterans are on a waiting list.[45]

Since 2006, the mortality rate among homeless veterans in North Dakota has dropped from 20 percent to 1.46 percent in 2016. Predominantly the cause of death is medically and age-related. Less than one percent is reported as suicides. Community Action of North Dakota is in the process of submitting data to HUD-VA to have North Dakota declared at "Functional Zero" for homeless veterans.[46]

Challenges of Affording a Home

Affordable housing is a function of both the supply of low-cost housing and the income levels of residents. Table 7 provides a benchmark of income levels for residents in the state and is designed to align closely with various federal housing programs. The benchmark of $69,600 in 2014 is based on median family income (MFI) of North Dakota residents as reported by HUD. Six categories of income are provided for program purposes and are based on a percentage below or above the state's MFI. Monthly affordable housing costs were estimated at 30 percent of the corresponding income category while affordable purchase price was based on a more complex formula that is typical of those used by lenders. The main assumptions include a 30-year loan fixed at 4 percent interest, 5 percent down payment, property taxes at 1.25 percent of the loan, property insurance at 0.6 percent of the loan, and total debt at no more than 20 percent of income.[47]

Income Categories Based on Income as a Percentage of the Median Family Income (MFI) FY 2014 (FY 2014 MFI = $69,600 in North Dakota)

Characteristic	Extremely Low: 0 to 30% MFI		Very Low: 31% to 50% MFI		Low: 51% to 80% MFI		Lower Moderate: 116% to 140% MFI		Upper: Above 140% MFI	Tax Credit: 0% to 60% MFI	
	From:	To:	From:	To:	From:	To:	From:	To:		From:	To:
Annual Income Ranges ($)	$0	$20,880	$20,881	$34,800	$34,801	$55,680	$55,681	$80,040	$97,441 and above	$0	$41,760
Monthly Affordable Housing Costs ($)	$0	$522	$523	$870	$871	$1,392	$1,393	$2,001	$2,437 and above	$0	$1,044
Affordable Purchase Price ($)	$40,351		$67,504		$108,612		$189,313		$227,168	$80,734	
Percent of Owner-Occupied Housing Units that Are Affordable	15.4%		22.1%		43.0%		63.3%		81.7%	29.9%

Based on these assumptions, the purchase price of a home for a family below 30 percent of the MFI would be $40,351. At present, only 15 percent of the owner-occupied housing units in the state are affordable for people in this income circumstance. Similarly, only 28 percent of the rental units in the state are affordable to those below 30 percent of the state's MFI. In contrast, those in the moderate income bracket have a much greater inventory of appropriately priced housing; 70 percent of the current owner-occupied housing stock and 91 percent of rental units would be affordable for moderate-income households.[48]

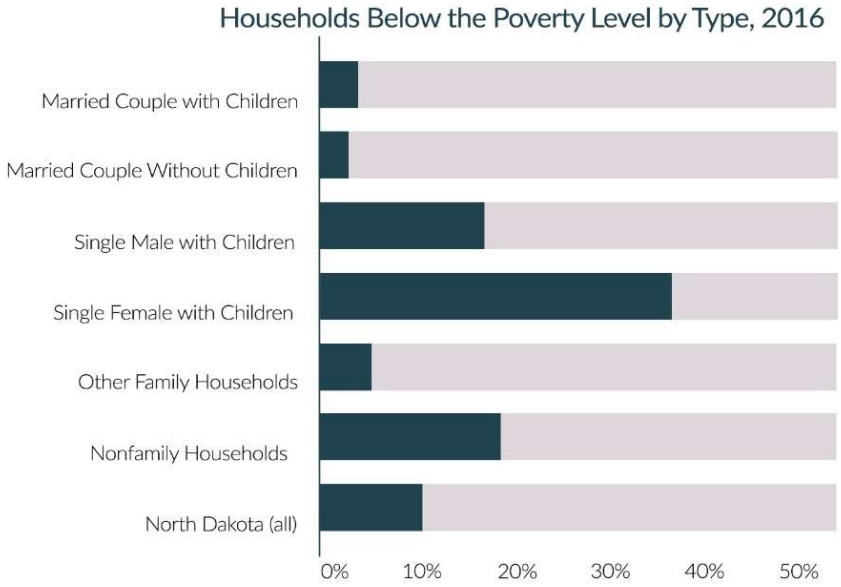

Figure 21. North Dakota Household Below Poverty Level by Type, 2016
Source: U.S. Census Bureau, American Community Survey

It is assumed that renting a home or apartment is more accessible than owning one; however, North Dakotans face extreme challenges to be able to afford an apartment. The state-set minimum wage is $7.25 an hour, and a person earning minimum wage would need to work 70 hours per week to afford a one-bedroom rental at the Fair Market Rent rate. Tenants would need to earn more than twice the minimum wage to only have to work 40 hours a week and be able to afford the Fair Market Rent for a two-bedroom rental home without paying more than 30 percent of their income. In addition to the income challenge, the number of rental housing units available in the state as of 2016 was only 40 per 100 extremely low-income renters.[49]

North Dakota is divided into eight housing and planning regions as shown in Figure 24 and each have unique strengths and challenges concerning housing stock, population growth and aging, economic development, and rural, urban and tribal reservations communities. Projected change in the number of households by income is an indicator of potential future housing needs. Double-digit growth is anticipated across all household income levels statewide as shown in Figure 25. Projected change is higher in the lower income brackets than the higher income brackets, and change in households is the greatest for extremely low and very low-income households with projected increases of 24 and 25 percent, respectively. Region I will experience the highest increase across all income groups while the most disparity in growth rates among household income levels is in Region VII where growth in the extremely low- and very low-income categories is double that of the higher income brackets at 31 percent. [50]

[50] 2016 North Dakota Statewide Housing Needs Assessment: Component 1-Population & Housing Forecast. p 27-8.

Housing Development & Voucher Programs

State and federal programs provide assistance through various mechanisms to assist extremely low, very low and low-income households. Several programs are project-based for finite periods, and a substantial number of those housing units will come to the end of the program participation period by 2029. The potential loss of housing units in both rural and urban areas could present substantial challenges for low-income households, especially considering the projected statewide increase in the number of such households. Planning to address the effects of the potential loss of this inventory will be critical to assuring that the state's most vulnerable citizens have adequate access to affordable housing.[51]

The U.S. Department of Agriculture (USDA) Rural Residential Housing Program makes loans to qualified housing developers as an incentive to build multi-family rental properties that meet the needs of low-income, elderly and disabled individuals and families in communities with a population of 35,000 or less. In addition to low-interest loans for development, USDA also provides rental assistance for low-income households. In 2015, USDA had 2,477 housing units in 146 multi-family properties in 99 communities around North Dakota. Three-fourths of USDA's housing units receive rental assistance. By 2029, 635 units or 26 percent of USDA housing will reach maturity and no longer be enrolled in the program. While the number of properties set to expire appears to be relatively small, the loss of even a few low-income housing units could have substantial impacts, especially in communities with low inventories of rental properties.[52]

HUD's Low-Income Housing Tax Credits (LIHTC) provides federal income tax credits to individuals, partnerships, LLCs or other entities, such as housing authorities and other legal entities, for the construction or renovation of properties that serve the needs of low- income households. Currently, there are 5,683 housing units in the LIHTC program. Like USDA's low-income housing, a substantial portion of the LIHTC properties, 37 percent or 2,124 units, in North Dakota will reach maturity by the end of 2029. Most of the maturing properties are located in the state's largest cities. Given the projected increase in the number of low-income households in the state's five largest urban centers, the need for affordable housing for such households is likely to increase making the potential loss of this housing inventory problematic. [53]

HUD's Housing Choice Voucher program, administered by public housing agencies, assists very low-income, elderly and disabled individuals and families. During the first quarter of 2016, 6,514 housing units in North Dakota were supported by the program. HUD's Public Housing program is administered by local housing authorities, which also owns and manages the rental housing for eligible low-income, elderly and disabled individuals and families. There are 1,709 units of public housing in North Dakota managed by 15 public housing authorities.[54]

NDHFA provides rental assistance with project-based programs known as Section 8 Performance-Based Contract Administration (PBCA). Currently, NDHFA has project-based assistance contracts with 98 properties with a total of 2,964 housing units. When contracts expire, properties may opt out of the program. NDHFA also administers the HUD Moderate Rehabilitation (Mod Rehab) program, and as of 2016, there were 10 properties with 157 units. The Mod Rehab program was repealed in 1991, and no new projects are allowed, therefore, once a property opts out, it cannot reapply. Because both programs are closed, properties in the PBCA program and the Mod Rehab program will likely decrease over time.[55]

HIF was authorized by the North Dakota Legislative Assembly in 2011 and has become one of the most successful tools to create affordable housing in the state. Housing units in the program are to benefit low- to moderate-

income households or below 140 percent of area median family income. Like the LIHTC program, units are income- and rent-restricted to the target households. NDHFA has allocated more than $89.6 million to 77 projects to support 2,380 new units in 26 communities across the state. HIF was reauthorized in 2017 by the North Dakota Legislature, but no funding was allocated to the program.[56]

MFP is administered by NDDHS and is an $8.9 million grant from the Centers for Medicare and Medicaid Services to help approximately 110 Medicaid clients who are older adults or people with developmental disabilities transition from nursing homes or institutions and reintegrate them into the community. A full year of case management is provided in addition to up to $3,000 for one-time transition costs.[57] Funding for the program will no longer be available after 2019 and operation of the program will cease in 2020.

Moving Forward

Moving Forward

The North Dakota 10-Year Plan to End Long-Term Homelessness focused on the immediate need for PSH and affordable housing as the cornerstone of ending homelessness. In order to prevent, reduce and end homelessness, a more systematic and collaborative approach to early intervention is needed to identify individuals that need short-term, assistance-based solutions and those that need more intensive, ongoing care to conserve local, state and federal resources.

According to the U.S. Interagency Council on Homelessness, in 2017 a chronically homeless person costs taxpayers as much as $30,000 to $50,000 per year.[58] That same year North Dakota counted 1,089 homeless individuals, of which 45 were chronically homeless. Using the base national average of $30,000, North Dakotan taxpayers spent $1,350,000 on emergency medical care, inpatient bed visits, detox programs, jails, prisons and psychiatric institutions for those chronically homeless individuals.

After reflecting on progress and roadblocks at the state and local level to address homelessness, members of the NDICHP and local service providers identified specific groups that are more vulnerable and would benefit the most from concentrated efforts. The following recommendations are broad-based and will require dedication and investments from numerous state agencies to ensure vulnerable populations are getting adequate services to accommodate their unique needs and help them be functioning and contributing members of North Dakota's communities. Some of the recommendations are within the 2018 North Dakota Behavioral Health System Study[59] and the State of North Dakota's Information Technology Department's Citizen Experience Initiative.

Breaking the Cycle of Generational Poverty

To end the cycle of generational poverty, children and their parents both need to be housing stable. Screening mechanisms need to be in place for service providers, primary care providers and school counselors to be able to identify problematic family dynamics and refer them to a case manager based on their current situation and complexity of need.

- Create more wrap-around service based housing programs for single parents with children. The Jeremiah Program and Grace Gardens, both located in Fargo, provide safe and affordable housing, support for continued education, quality early childhood education, life skills training and a supportive community. Parents can focus on personal and professional development to become self-sufficient. During the day, young children are enrolled in reliable daycare, receiving early childhood education opportunities so they are school ready. School-aged children are in a controlled environment where they feel safe and receive the support they need to succeed in school. Research conducted for the Jeremiah Program determined that every dollar spent on the Program resulted in a $4 savings in public services across two generations.[60]

- Expand outpatient and community-based services that are flexible such as peer support, community health workers, in-home and school-based clinical services and substance use disorder treatment services to address the behavioral health needs of children, youth and their families. Stabilizing the

[60] Jeremiah Program-Our Impact. Retrieved from https://jeremiahprogram.org/our-impact/

family in their home in their community will lessen the need for relocation and out-patient treatments.

- Expand targeted proactive in-home supports for families with children and youth at risk of foster care placement and justice involvement. There is a need for targeted support for children and youth as well as for parents whose children are at risk of out-of-home placement and justice involvement. Parental behavior is the main barrier to family reunification, therefore if more services were provided, youth may not need to enter the foster care system. Many youth who are justice involved also have a parent or close relative with justice-involvement.

- Develop a streamlined process for NDDPI homeless liaisons located in school districts across the state to be able to refer a case manager to assist families in accessing housing both in urban and rural communities.

Children that are not housing stable, are within the foster care system, do not graduate from high school, or have mental health or substance issues have a much higher probability of needing public assistance as an adult. Early detection and prevention are the best methods to help youth navigate difficult living situations.

- Explore barriers to create emergency shelters, low-barrier housing, host homes and other short- and long-term housing options for youth and young adults who are unsheltered, fleeing an unsafe situation, or experiencing a housing crisis. There is an unfilled gap for those ages 16 to 24 that need refuge in a safe space without being housed with chronically homeless adults.

- Coordinate entry processes and support services that are trauma, age and developmentally appropriate. Ensuring youth are housing stable is critical to their overall well-being especially for them to be able to create permanent and healthy connections with adults and continue to pursue educational or employment opportunities.

- Review state and federal policies and processes impacting unaccompanied youth as well as youth aging out of the foster care system to determine any barriers that can be eliminated. Unaccompanied and emancipated youth experience legal barriers that prevent them from accessing housing, employment, and government documents.

Lessening the Cost

Some individuals have complex medical and emotional needs, which prohibits their ability to live on their own without some sort of social network assisting them. These individuals are classified as the chronically homeless and create the biggest financial burden on local medical, law enforcement and service providers.

- Finance more Housing First facilities creating more homes to stabilize the chronically homeless. When basic needs are taken care, residents can focus on treating their issues, ultimately saving lives and reducing costs. The Cooper House in Fargo and LaGrave on First in Grand Forks provide permanent housing to the chronically homeless. Residents are charged rent, can have limited access to alcohol and receive services at their request. This housing model helps control public service costs these residents would have used for emergency shelter, emergency room visits, incarceration, and

detox centers. An independent study from Eide Bailly reported housing 66 individuals in the Cooper House saved the public $204,140 in service costs over 12 months.[61]

- Provide funding for support services and operational expenses. If service providers are not able to staff the facility and provide onsite, person-centered treatment, individuals living at the facility will not be successful in their recovery, stabilization, and integration back into the community.

- Explore the cost and benefit of funding "harm reduction" shelters, where residents can consume substances or come into a shelter under the influence of drugs and alcohol. Traditional homeless shelters have strict sobriety rules. If individuals are not sober or if they want to continue to consume substances, their only option is to do so in public. Individuals in the harm reduction shelter may form a pattern of consistency and service providers can develop relationships to help them reduce substance use or focus on sobriety and find more permanent housing options. Studies have identified the effectiveness of harm reduction shelters to curb consumption by creating a stable environment, therefore reducing the cost of public resources.
  - Withdrawal Management Unit also referred to as a Detox Shelter have proven successful in the city of Fargo and is adjacent to the Gladys Ray Shelter and the Veterans Drop-In Center. The Unit provides short-term residential and social (non-medical) detoxification services in a clean, supportive and calm environment designed to assist individuals through the difficulties and dangers from substances in a non-medical setting.[62] This format is more cost effective when it can be leveraged instead of seeking emergency medical treatment.

- Create consistent funding for state housing and service programs such as HIF and the North Dakota Homeless Grant. Developers and local service providers can leverage the funding with private investments and charitable donations to create customized local solutions based on community needs in rural and urban areas. The upfront investment in state funding is critical in delivering upstream and midstream services to vulnerable populations.
  - Explore the cost and benefit of state funded housing vouchers to be leveraged in emergency situations.

Government Efficiencies

The key to enhancing government efficiencies is to establish a systematic approach of clearly defined and repeatable steps where outcomes can be evaluated to generate consistent, optimum results. State agencies and local service providers are well connected and reach out to one another for assistance for the individuals and families they are helping, but most agencies expressed the need for more collaborative efforts to leverage resources and to be more responsive.

- NDICH consists of seven state agencies, one state-wide homeless coalition, and the communities of Fargo, Grand Forks and Bismarck. Moving forward it is recommended that the same state agencies be a part of NDICH; however, involvement is expanded to engage multiple people from each agency especially if the agency has more than one division involved in any aspect of preventing, reducing or ending homelessness.

[61] Cooper House Impact Report 2010. Retrieved from http://fargohousing.org/files/pdf/Cooper%20House/Impact%20Reports/Cooper_House_Impact_Report_June_2013.pdf

[62] Gladys Ray Shelter & Veteran's Drop-In Center. Retrieved from http://fargond.gov/city-government/departments/fargo-cass-public-health/gladys-ray-shelter-veteran-s-drop-in-center

- The NDICH would convene twice a year fostering an environment where each agency thinks and works beyond specific duties of their agency/department to achieve services and results that are broader in scope. The goal is to have more of the "right" people at the table to rethink processes that restrict developing new perspectives without hindering innovation or opportunity development. Each agency needs to critically think about the programs offered to be able to develop synergies and identify gaps that impact vulnerable populations. Engaging a diverse stakeholder group from the vulnerable populations and their family members will be insightful in creating comprehensive solutions.
- Develop a communication process to inform other state agencies and the public pertaining to the focus areas, tasks, and progress made through NDICH endeavors.

- Identify barriers preventing state agencies from accessing and leveraging HUD's Homeless Management Information System (HMIS). HMIS is a software application designed to record and store client-level information on the characteristics and service needs of homeless persons throughout a Continuum of Care (CoC) jurisdiction. Service providers currently utilize HMIS to coordinate service provisions, manage their operations and better serve vulnerable populations.

- Map the entry points for vulnerable populations and how they transition throughout state agencies and local service providers. The intent is to streamline the intake/assessment process and ensure they have access to the services they need at a specific point in time. The map will diagram how people and information are shared, gaps, overlapping functions and where efficiencies can be made.
  - Minnesota Department of Human Services – Housing and Supports Division created the Housing Benefits 101 website as tool to assist people who need affordable housing and support systems to maintain their housing, and understand the range of housing and support services available. The website allows each person to identify their current housing situation whether they are looking for a home; moving out of a facility, group home or foster care; need to relocate; are at risk of losing their home; or are experiencing homelessness. The client-centered focus streamlines research and resources that each person needs.[63]

- Identify local, state and federal policies and regulations that hinder vulnerable populations and prioritize actions for change. For instance, the definition of homelessness, case manager, and youth creates issues. Felony convictions inhibit individuals from acquiring housing as well as other social services and create a stigma when employers are reviewing employee applications.

Covering the cost of public assistance is challenging for federal and state government and at the local community level. However, there are ways for the state to access additional federal funding through Medicaid to provide direct support to individuals and families.

- Pursue 1915(i) Medicaid state plan amendments to expand community-based services for vulnerable populations. The 1915(i) state plan amendment has been the most common avenue for states to pursue funding for community-based services that include a wide range of home and community-based services as a state plan option. Adding services through 1915(i) could significantly reduce demand for emergency, inpatient, and long-term care services that are not reimbursed by Medicaid, which could reduce overall system costs in the long run.

[63] Minnesota Housing Benefits 101. Retrieved from https://mn.hb101.org

- Review long-term care facilities placement policies and explore options for community-based alternatives for persons with disabilities and behavioral health issues. In a recent study, it was documented that approximately one in four individuals under the age of 65 were receiving behavioral health-related services in long-term care facilities, which can cost $96,000 per year. With the right supportive services, these individuals could live in community-based PSH units, which are more cost effective solutions.

Client-Focused Delivery System

In order to expedite information gathering and to ensure current and accurate information is available, the state needs a consistent, end-to-end experience across all channels and departments where information can be obtained for any service, on any device and at any time. State agencies and local service providers expressed challenges they have noticed in their specific area and feedback from clients. Below are some of the ideas that were recommended:

- Housing Inventory - create an affordable housing inventory for each community/region
- Housing Forms - create a single form used by all regional housing authorities
- Database - create profiles for each client within a centralized database, so individuals or families applying for state or local benefits do not have to re-enter information
- Privacy Laws - review state privacy laws to ensure clients are protected, but at the same time do not hinder state agencies from accessing the information they need to be able to help a client that is transitioning services from one state agency to another.
- Consent Form - create a consent form signed by the client to release information to all state agencies and case managers
- User Profile - create an app or web portal where clients can enter their information that is stored and they can return at any time to complete.
- Online Chat - through an app or web portal, create an online chat function for clients to ask questions and be directed to the correct state agency or local service
- Services Portal - structure website into user categories and group information based on the client scenario, such as homeless or risk of becoming; searching for housing, employment or daycare, needing social services, youth, tribal, etc.

COOPER HOUSE, FARGO, ND #2449
PERMANENT SUPPORTIVE HOUSING
Financial Community Impact

Per a Cooper House Impact Report & Cost Study completed by Eide Bailly:

- Cooper House saves taxpayers money. There was a total of $204,140 savings in costs for those who lived at Cooper House for the time period that study was conducted, through October 31, 2011
- Costs tied to emergency shelters virtually disappeared once individuals moved into Cooper, dropping 98% from $139,200 to $3,200
- Detox costs also dropped dramatically, falling 71%, from $75,360 to $21,840
- Jail expenses fell 48% from $169,455 to $87,768

COOPER HOUSE, FARGO, ND
PERMANENT SUPPORTIVE HOUSING
Community & Tenant Impact

Cooper House has made a positive impact to the Community of Fargo and in the lives of the Tenants

---

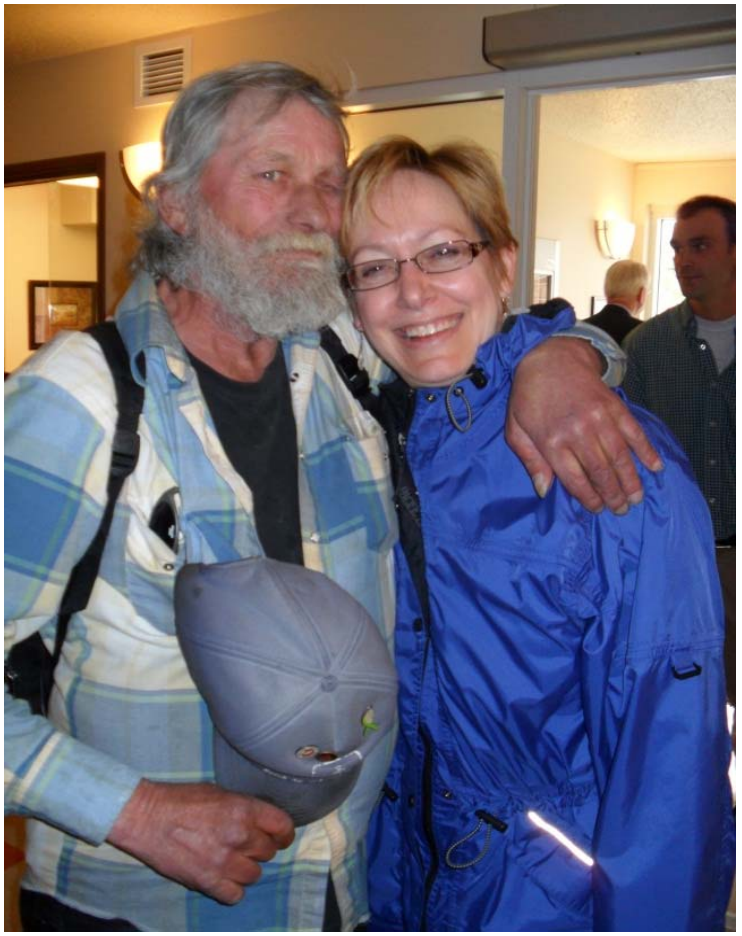
The RIGHT THING for "GI JANE" – Veteran, Chronically Homeless & Dually Diagnosed:

- Periodic episodes of homelessness for 3 years; Has successfully maintained housing at Cooper House for 24 months
- 1 Year Prior to moving to Cooper House: Hospital/Emergency Room Charges $38,500
- 1st year at Cooper House: Hospital/Emergency Room Charges $1,000
- Now engaged with case management and Veterans Administration Services

COOPER HOUSE, FARGO, ND
PERMANENT SUPPORTIVE HOUSING
Community & Tenant Impact

The RIGHT THING for "Pete" - Chronically Homeless & Dually Diagnosed

- Homeless for 20 years; Has successfully maintained housing at Cooper House for 25 months
- 1 Year Prior to moving to Cooper House: 201 days in Detox at a cost of nearly $30,000, Emergency Room/Hospital Charges 30,000
- By 2nd year at Cooper: 0 days in Detox, Emergency Room/Hospital Charges approximately $6,000
- Newly engaged in Case Management



Note: CY2013 Vacancy Rate was 2.3% which equals an average of 1-unit per month.

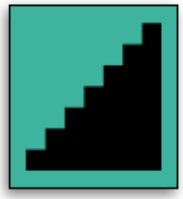
COOPER HOUSE, FARGO, ND
PERMANENT SUPPORTIVE HOUSING
Project Description

- ❑ No expectation of sobriety, however there is an expectation of mutual respect

- ❑ Relies on strong partnerships with community-based service providers to meet the varied needs of tenants

- ❑ Front Desk is Staffed 24/7
  - ➔Check Tenants & Guests In and Out
  - ➔Monitor the Security Cameras
  - ➔Perform Wellness Checks
  - ➔Work to Link Tenants with appropriate services

COOPER HOUSE, FARGO, ND
PERMANENT SUPPORTIVE HOUSING
Project Description



- Employs a "Housing First" model, which recognizes a home as a stable platform for delivering supportive services to help the tenant stabilize their life and keep them housed.

"We give people A HOME FIRST, then offer a variety of services to help them improve their lives."

Our **On-Site Nurse** breaks down barriers and builds trust with tenants to help them manage their chronic health conditions BEFORE they escalate to an Emergency Room visit or a hospital stay.

Human Services Committee Members; #3079

My name is Jesse Jahner, and I am the Sheriff in Cass County, North Dakota. As the Sheriff, my staff and I oversee the Cass County Jail, which has a current capacity of 348. Over the past year, the Cass County Sheriff's Office has collaborated on multiple occasions with various community partners to discuss and attempt to resolve gaps in the mental health services available in Cass County and statewide. That collaboration has included local hospitals, legislative members, service providers, representatives from state agencies, and local law enforcement. We have discussed alternative options for obtaining care where a need is identified. We have considered modifications to various stakeholders and providers' processes to work towards improved access and improved outcomes. Significant gaps still remain for those patients who have needs that are not or cannot be effectively treated in the community, and that would qualify for commitment to the state hospital. We are experiencing year over year increases in the number of people who end up in jail for serious offenses that threaten public safety and have limited access to psychiatric care. Of even more considerable concern is the number of people with such acute and immediate needs that hospitalization is deemed necessary by all parties, including the local human service center.

The number of referrals that we make in Cass County for the required pre-screening assessment has risen each year over the past few biennia, as have the number of persons who have been admitted into the state hospital. We feel that we have a strong sense of the commitment criteria and only refer those people that a qualified mental health practitioner has assessed for appropriate referral. Even more frustrating are the increasing instances where the process has determined that a person meets the criteria for admission to the state hospital, but there is no room. The access is denied or delayed beyond what is established in state law.

We have had Inmates sit in the Cass County Jail for up to as much as two weeks who were not committed due to capacity issues. This has been a recurring theme on several occasions throughout 2020. North Dakota Century Code requires us to move such persons out of jail within 24 hours of an issued commitment order. Still, we have experienced delayed entry and, on occasion, access denial because of resource issues. This delay from pre-screen to transfer has occurred in cases ranging from a few days to 13 days, and in one case, 31 days total before admittance occurred.

The pre-screening process should determine the condition of the patient and not an assessment of the conditions at the hospital. Suppose people are being denied access after a determination has been made that they do need hospitalization. In that case, at least some of the decisions that a person does not require hospitalization must be partially impacted by capacity considerations.

There are instances in Cass County where pre-screens were approved, commitment paperwork submitted, and then a delay led to expiration of the commitment paperwork and the need to repeat the process. There have also been instances in Cass County where pre-screens have been completed. Still, days or even a week passes before commitment paperwork is completed and submitted, which we are told was due to capacity issues.

There is no doubt that COVID-19 has complicated everyone's situation at every level in this continuum of care. But the numbers show that we are also dealing with an increase in cases of significant and even severe need of care. One of the striking observations we have made this year is the increased number of people landing in jail who are already open and active patients of the local human service center, who are subsequently determined to need acute care. These are not cases where it is appropriate or safe to release the individual back on to the street through the bond process. Multiple cases of residential arson, barricading with weapons, attempting to run over people and law enforcement with vehicles, aggravated assault and possession of explosives, and one person who was digging up the grave of a family member due to delusions. What we are seeing is that the need for additional capacity is greater than ever before.

I write this testimony and provide this information because I do not want to see services cut from the North Dakota State Hospital. When we see the need for additional capacity and services more than ever before, I respectfully ask that their budget is increased to meet the demand for those needing services. When Individuals receive services through the State Hospital, we see a dramatic difference in their mental health wellbeing. This is a testament to the type of work they are doing there. Please move to approve an increased budget and provide them the appropriate funding for the services they need to effectively treat those with mental health issues and, in doing so, keep our communities and citizens safe.

Respectfully,

Jesse Jahner

Jesse Jahner
Cass County Sheriff

Testimony HB 1012 #2465

House Appropriations Committee

January 25, 2021

Good afternoon Chairman Nelson and members of the Committee. My name is Trina Gress, I am Vice President of Community Options. I stand before you today to represent Community Options and the clients we serve. My testimony is in opposition HB 1012. There are three items I will be addressing with this committee today.

1. Request to add funds back into South East Human Service Center (SEHSC) and West Central Human Service Center (WCHSC) budgets to fund the Evidence Based Supported Employment Programs (EBSEP) until the clients can be transition to the 1915i. For the current biennium, SEHSC services total = $564,947.28, and WCHSC services total = $61,944.00.

2. Request to add funds back into Behavioral Health budget to fund the Pre-Vocational and Return to Work services for Brain Injury (BI) clients until the clients can be transitioned to the 1915i. Also, for the remaining 50% of services listed in DHS budget, increase existing rate to be competitive to other employment service rates. For the current biennium, Pre-Vocational services total = $337,499.00 and Return to Work services total = $348,553.00 plus the increase the existing rate to be competitive total of $92,340.00 for a total of $440,893.00 for Return to Work services.

3. Note that the 1915i does not serve clients with Acquired Brain Injury which is included in the state definition.

I will address the first and second items together. HB1012 proposes to cut the services listed above with the intent that the clients will be served in the 1915i Medicaid State Plan Amendment (1915i) after 7/1/2021. This is an unrealistic target date. Providers and clients need time to gather the proper documentation required for 1915i eligibility. Below are listed the extra hoops clients must jump through to receive services from the 1915i.

- There is no guarantee that the clients currently enrolled in the EBSEP, Pre-Vocational and Return to Work services will be 1915i eligible. There are <u>four</u> variables to receiving employment supports in the 1915i.
  + Must be Medicaid/Medicaid Expansion eligible.
  + Must get a score on the World Health Organization Disability Assessment Schedule (WHODAS) of 50 or higher.
  + Must identify employment as a need on the WHODAS.
  + Must have a diagnosis according to the attached handout. There are clients who may need to get a psychological or neuropsychological evaluation to attain the diagnosis. This could take months to attain.

- Need to secure Care Coordinators to meet the requirements of 1915i. Community Options is unable to provide care coordination and employment supports so a 3rd party will have to be

secured to do Care Coordination. Last week, Department of Human Services Medical Division reported that there are only 5 providers enrolled to provide 1915i services.

- Once a client secures full-time employment and their Medicaid is reviewed, income limits will more then likely cause their Medicaid (1915i) services to discontinue. Thus, the employment services are time limited. If an individual needs ongoing support, there will not be a service to meet the client's need.

Finally, just last session, the Legislature formally changed the definition of brain injury in North Dakota to include of all types of brain injuries. The NDCC 50-06.4 states "Brain injury" means damage to the brain or the coverings of the brain that produces an altered mental state and results in a decrease in cognitive, behavioral, emotional, or physical functioning. However, the 1915i only allows for three eligible diagnosis of traumatic brain injury (listed below) and no diagnosis of acquired brain injuries.

- F02.81 Major Neurocognitive Disorder Due to Traumatic Brain Injury, with behavioral disturbance
- F02.80 Major Neurocognitive Disorder Due to Traumatic Brain Injury, without behavioral disturbance
- G31.84 Mild Neurocognitive Disorder Due to Traumatic Brain Injury

In conclusion, Community Options is requesting this committee add funds back into the DHS budget to re-contract with provider to ensure there is enough time to find 1915i providers and transition the clients that do meet the eligibility criteria. If funds are not replenished in the DHS budget there will be 227 clients affected by this decision and going without services.

The creation and implementation of the 1915i took the North Dakota Department of Human Services (ND DHS) almost two years to complete and we are still awaiting the implementation. Yet ND DHS is requesting providers and clients to adapt in less than six months. This is not fair to the providers nor to the clients we serve. Thus, we are asking for funding to be added back into the DHS budget so there is additional time to ensure a smooth transition to the 1915i services while also mediating the risk of clients falling through the cracks.

I appreciate your time and consideration in these matters listed above. Thank you, do you have any questions?

House Human Resources Appropriations Committee Testimony #2457

Committee Chair Nelson and Members of the Committee, my name is Marissa Mahanna, Program Supervisor of Cooper House, Dacotah Foundation Fargo. I am writing this testimony in opposition to the budget cuts offered in HB 1012.

I have been employed at Cooper House, North Dakota's first permanent supportive housing program, prior to its opening in 2010. Over these past 10+ years, I have seen firsthand the effect that it has had on the lives of many previously homeless individuals. Cooper House has established a place of residency for those who have not been able to secure or maintain housing in the private sector due to criminal history; severe and persistent mental illness; and/or substance abuse. By eliminating the initial barrier to housing, tenants have been able to focus on the underlying issues and precipitating factors that initially lead to homelessness. Staff play a crucial role in the tenants' ability to maintain housing, work on addressing maladjusted behavior and promote their personal health and wellbeing.

I feel having 24 hour staffing in a building serving chronic homeless populations is essential to the safety and security of the tenants, their quality of life and the residential environment as a whole. Staff monitor the security for the tenants and the building, permit entrance to tenants who reside at Cooper, and document the tenants have been seen throughout the day. This process insures that all tenants are safe and accounted for, and gives a general knowledge of tenant capacity within the building in case of emergency such as fire, natural disaster, etc. Safety is also partially achieved by conducting contraband searches at the point of entrance. This eliminates possible weapons, illegal substances, and non-consumable forms of alcohol from being in the property. Cooper House is founded on the Harm Reduction Model. This model assists in decreasing the intensity, duration, and frequency of the usage of substances. Staff monitor and track consumable alcohols brought into the building based on a set policy that supports safer levels of consumption. This assists in reducing prospective bodily harm; less violence and or escalation of behaviors; use of dangerous mind altering substances; reduction in medical interventions; and maintaining a safer blood alcohol content for those that have not fully entered recovery. These interventions support the mission of utilizing less emergency services, supports harm reduction; and promotes tenant safety.

Staff also work as a gatekeeper of the building by monitoring access of visitors. This allows tenants to only receive visitors that they trust, keeps out individuals who have a history of violating the rules or criminal laws during prior visits, only allowing two visitors per tenant, and not allowing visitors to bring in alcohol outside of what is set policy for the tenant who resides at Cooper. These rules are all agreed upon at move in by the tenants with the objective to decrease noise disturbances and disorderly conduct. Also, many transient populations tend to double up or couch surf in standard housing which often results in eviction and unsafe circumstances. Staff being available onsite is necessary in eliminating potential housing violations that could result in eviction and continue the cycle of homelessness. Without staff, the building would not be regulated in this capacity and potential victimization of those who are vulnerable would have grave consequences.

Besides acting as the gatekeeper for the safety and security of the tenants, staff provide additional supports. The staff allocate and distribute donated food items to insure that tenants have access to minimal and appropriate nutrition. Staff work collaboratively with other entities in the community to promote residents well-being and address needs. They also safety plan with the tenants when needed to assist in the reduction of higher level of care and/or use of emergency services. Staff implement and facilitate psychosocial support activities in the form of recreational groups and individual informal life skills training. They assist in the form of mentoring, education, role playing, etc. Staff play an instrumental part in procurement of wrap around services, access to community based providers, and liaison to community supports.

Without having staffing 24 hours a day, the building would not function in a safe manner, would not be able to house its target population of the most vulnerable chronically homeless and would jeopardize the integrity of the program. Alcohol consumption would not be regulated, illegal substances or dangerous items could be brought into the building, there would no longer be screening or supervision of visitors thus allowing anyone in at any time. I would foresee that the usage of legal and illegal substances would rise without the presence of staff onsite full time. Additionally, criminal activity, violence, overdose, and death could be a result of lack of regulation, assessment, and intervention provided by staff. I am aware of some properties in downtown Fargo that serve similar populations as Cooper House, that struggle with these concerns. Oftentimes, due to lack of assertive skills or cognitive function, vulnerable populations are not able to protect their housing or their physical or mental wellbeing. It is well known that individuals, without the supportive housing, are preyed upon by others they have met in the homeless community. They use them for shelter and other needs or desires. Without staff, Cooper House tenants could potentially fall victim to the same type of exploitation.

Cooper House has created a supportive and compassionate environment for this specific disadvantaged population. I have seen the impact of how providing basic needs have created a space and opportunity to work towards achievement of psychological needs and self-actualization. This process is what creates self-reliant and productive citizens. Having staff monitor the safety and security of the Cooper House building and tenants is an indispensable component to protecting some of our states most vulnerable people.

Thank you for your time and consideration of our request.

Marissa Mahanna

HOUSE HUMAN RESOURCES APPROPRIATIONS COMMITTEE #2372

TESTIMONY

Committee Chair Nelson and Distinguished Members of the Committee, my name is Kandia Qual, Program Director for the Dacotah Foundation in Fargo. Our agency provides staffing, supervision, and emergency interventions to the permanent supportive housing project, Cooper House. I am here today to give testimony in opposition to the budget cuts made to mental health services offered in HB 1012.

Cooper House permanent supportive housing is a proven, cost-effective, person centered, and humane way to provide stable homes to individuals who have difficulty finding and maintaining housing due to their on-going struggles with severe mental illness, substance use, vulnerability, or previous traumas.

Supportive housing creates stability in the lives of its tenants, allowing individuals who have often spent years living on the streets to live full, rewarding lives integrated into our community. It allows them to engage in services that they previously may not have engaged in because they were always consumed with trying to find where they would safely lay their head that night or where their next meal was coming from. It allows service providers to locate individuals on a regular daily basis to provide engagement and build motivation for change through offering assistance with their mental health and physical health concerns. It allows individuals a safe and secure home to protect themselves from being taken advantage of, trafficked, assaulted, or victimized as often occurs with many homeless individuals.

Having staff present 24/7 in supportive housing projects contributes to the overall success in tenants maintaining their housing and moving towards larger goals of addressing their mental health or substance use concerns, obtaining employment or educational goals, and eventually moving out to mainstream housing through a variety of services and supports the staff provide.

Based on my professional involvement in Cooper House since it's origination in 2010, I can attest to the essential nature of the services provided by staff within the Cooper House program and how those services directly contribute to the success of the tenants.

The ability to have staff 24 hours a day 365 days a year at Cooper House plays an immense role in the safety of the tenants as well as engagement into services that enhance the quality of their lives. The proposed cuts to the Cooper House portion of HB 1012 would directly impact the ability to continue these essential services. This change in staffing would result in increased safety and welfare concerns for the tenants of Cooper House. It also potentially would decrease their engagement in other services intended to enhance the quality of their lives and promote their ability to move on to mainstream housing as staff often bridge the engagement into these services. A decrease in staffing hours would also result in a vastly increased demand for emergency services such as police and ambulance services as staff would no longer be present in the same capacity to intervene and assist before events reach the level those services are needed.

Staff monitor and regulate who enters the building so individuals who are vulnerable or that haven't developed assertiveness skills can remain safe and not put their housing at risk by having individuals that may cause issues manipulate or force their way into their home or take advantage of them. There have been several situations where a resident has allowed a non-resident visitor into their apartment

and the visitor has engaged in illegal activity, domestic violence has occurred, or the visitor simply refuses to leave and staff have been able to intervene in the situation. The staff are able to have the visitor removed from the apartment and prevent the individual from entering the building in the future. This monitoring by the staff protects the initial resident involved as well as other residents of the building from that visitor causing further issues that could result in evictions or safety concerns.

Due to the intensity of mental health, substance use, and physical health concerns with the population we serve, staff complete welfare checks on individuals that we haven't had regular contact with each day. There have been many instances over time, where the hospitals and emergency services have indicated that individuals would have died if staff hadn't been present to complete welfare checks and initiate emergency services. One of many possible examples I could share would be that of an individual with a seizure disorder. The staff completed an immediate welfare check after a neighboring tenant called down to staff reporting an odd noise from that unit. Staff discovered that the individual was having a seizure and bleeding profusely from a wound to their head. Staff performed immediate lifesaving first aid and accessed emergency services. The individual had an extended stay in the ICU but because staff were there and able to intervene as quickly as they did, that individual was able to have a successful recovery. They are now living independently in the community.

Another quite recent example is an individual that tested positive for COVID and deteriorated rapidly due to other compromising health issues. Because staff were present and monitoring the individual's condition, emergency services were initiated for this individual when their condition deteriorated. The individual's condition required them to be hospitalized and on a ventilator. They have since made a full recovery and are back at their home in Cooper House.

These situations likely would not have had the same end result had staff not been present to complete welfare checks, administer first aid, assess the need for emergency services, and initiate that response as rapidly as they did.

Staff are constantly building rapport and relationships with residents from the moment they move into Cooper House. Staff use those relationships to bridge residents into services with care providers. Staff build bridges to service providers in many ways such as coordinating with the on-site nurse if someone is having physical complaints or appears to be deteriorating in health. Staff work side by side with SEHSC to introduce residents to team members of SEHSC, build motivation with them to be open to or engage in services, and to outreach residents in their apartments when case managers haven't been able to reach them. Staff contact SEHSC case managers when they are seeing a deterioration of mental health or when incidents of concern have occurred so the case manager can get involved quickly to assist the resident. Staff also express concerns to case management if they see an increase in an individual's substance use. Staff promote resources, referrals and service linkage for individuals that may require county social services such as homemakers or cleaning services. Without staff present, and having developed those levels of trust, residents may not enter into some of the services that assist them to improve the overall quality of their lives.

Staff provide mental health support, at all hours of the day and night, to individuals that may be struggling with negative symptoms of their mental health such as extreme paranoia, delusional thinking, suicidal thoughts, cravings for substance use when they are working towards recovery, thoughts of violence towards others, and emotional support when trauma has occurred in a tenants life. Prior to being a resident at Cooper House, many of these scenarios would have resulted in the individual

presenting at the hospitals and ER's, attempting to end their life, relapsing in their chemical usage, or causing injury to others. Tenants have vocalized that having staff there in the moment to process these thoughts and feelings has assisted them to avoid the negative results or accessing higher levels of care.

As indicated, the 24/7 staffing provides many essential and critical services to the chronic and vulnerable population this program is intended to serve outside of just monitoring an entrance. Based on my observations and experiences working directly with the program and its target population, I feel that without having the funding for staffing present in its current capacity the safety of the residents, their quality of life, their engagement into services, and the building program as a whole would be at risk.

We know that there has been mention of 1915i being a supplement to the funding currently being proposed. However, this is a new funding source that will require eligibility and take time to enroll individuals. It is yet to be determined how it may be implemented and assist the Cooper House program. Many individuals served by Cooper House are not enrolled in Medicaid when they move in so they would have to establish eligibility for reimbursement of services. It takes time and engagement to build the relationship required to complete enrollment of residents into programs such as Medicaid as well as to assure they stay enrolled. We have also understood that 1915i will be tied to individual services provided and many of the routine services and safety interventions are procedures that intermingle with the building population as a whole and can't immediately be tied to a specific individual on a day to day basis for reimbursement purposes. While 1915i will be a beneficial source to augment and grow services within Cooper House on an individual basis, we are unsure how this will immediately transition towards covering all the essential services currently provided if the proposed decrease in funding were to occur.

We are requesting that consideration be given to maintain the current funding for Cooper House. We feel this is essential for the continued operation of Cooper House and the program's ability to serve the intensity of the target population in a safe and effective manner.

Thank you for your time and consideration of our request.

January 12, 2021 #2466

Good afternoon, Chairman Nelson and members of the committee,

My name is Taylor Restad, I work for the Grand Forks Housing Authority as the Program Director at LaGrave on First. I am here to respectfully request $515,000 be included in Field Services - Northeast Human Service Center's budget in House Bill 1012 to fund the 24/7 housing support staff at LaGrave on First in Grand Forks.

During the last session, $375,000 was included in SB 2012 for our Housing Support Specialists at LaGrave on First, a permanent supportive housing project for people in the Grand Forks region who have experienced chronic homelessness. The funding supports certified Mental Health Technicians for the residents of LaGrave on First. These staff members provide year-round, 24/7 necessary housing supports and monitoring to create and maintain a safe and supportive environment for residents. LaGrave on First is an apartment complex that offers one-bedroom/bathroom units of affordable housing and on-site support services without prerequisites such as sobriety, participation in services, or clean background checks as the program is based on the Housing First approach to ending homelessness. People with behavioral health needs first need a safe, affordable place to live before they can pursue other goals related to their health, well-being and quality of life. By all accounts LaGrave on First has been greatly successful in its mission to provide needed housing and opportunity to our chronic homeless population.

Last session's amount was reduced from our initial request of $550,000 due to the anticipated approval and implementation of North Dakota's 1915i State Plan Amendment in July of 2020. If approved and implemented as we had anticipated, this amendment would have allowed us to bill Medicaid for the housing services provided by our Housing Support Specialists rather than need a line item in the DHS' budget. DHS submitted the 1915i State Plan Amendment in April of 2020, although it has recently been approved by CMS the ability to begin functionally using it will take time and the amendment does not include daily rates. The Grand Forks Housing Authority has begun the process to become a Medicaid biller in order to take advantage of this funding opportunity. Additionally, while we are grateful that the 1915i State Plan Amendment includes housing support services, as they are key to keeping people housed, we are deeply concerned regarding the maximums of 156 hours per year versus inclusion of daily rates. To this end, I stand before you requesting $515,000 be included in House Bill 1012 for LaGrave on First until we have an implemented 1915i State Plan Amendment that includes daily rates.

I appreciate the opportunity to make this request in front of you today, I'll be happy to take any questions.

Sincerely Submitted,
Taylor Restad

FAMILY VOICES OF NORTH DAKOTA

FVND was started in 1996 and became a State Chapter formally sanctioned by National Family Voices, Inc. in the first quarter of 2001. FVND aims to achieve family-centered care for all children and youth with special health care needs and/or disabilities. Through our national network, we provide families tools to make informed decisions, advocate for improved public and private policies, build partnerships among professionals and families, and serve as a trusted resource on health care.

The FVND Health Information and Education Center:

- Assists families as they navigate public and private systems, including health systems and insurance plans;
- Provides assistance to families in accessing services and resources for their children and how to partner with providers and caregivers;
- Listens to families as they describe their encounters with systems and helps guide them to possible solutions;
- Works with families, health care providers, public and private agencies, and advocacy or support groups to promote family-centered care and medical homes for children with special health care needs; and
- Promotes discussions and linkages among families, providers, managed care programs, and government to better serve the health care and related needs of children and families in North Dakota.

ND Parent to Parent Project:

- Is a statewide network of parents supporting families of children with developmental delays, disabilities, and special health needs;
- Offers emotional support and information;
- Acts as a valuable resource to families;
- Offers assistance in learning the necessary skills to help parents face the challenges of raising their child;
- Offers moral support and encourages parents to feel comfortable and optimistic about the future; and
- Is dedicated to supporting families at their most challenging times and to celebrating each new victory.

As a component of these services, FVND offers leadership institutes, training, workshops, and resource development. They also participate as a major partner on the local, state, and national levels in system transformation, facilitating a responsive system of care for children and youth with special health care needs (CYSHCN) and their families based upon a family-centered approach.

FVND Health Information and Education Center funding is provided by a grant from the US Department of Human Services' Health Resources and Services Administration, Maternal and Child Health Bureau and the North Dakota Department of Health (Title V, Children's Special Services) and ND Parent to Parent Project funding is provided by the ND State Council on Developmental Disabilities.

"We who have children with special health care needs have learned patience, joy and resilience which come from the lessons our children have taught us. Through them our lives have been enriched, learning from those lessons and sharing them with those who also have devoted their lives, partnering with parents and providers in each step. Family Voices of ND is an important connection for families not only to connect with one another but in assisting them in accessing vital information"

D. Feist

Listening and Responding:

North Dakota Survey of Agencies Serving Children and Youth with Special Health Care Needs

Over the past eleven year, Family Voices of North Dakota (FVND) has utilized a qualitative interview system to gather information regarding the capacity of the system of care for families of children and youth with special health care needs (CYSHCN) to help identify the experiences that families may face as they search for resources, information, financial support, emotional support, and access to services.

This effort serves as a bridge to a better understanding of what is working well for families, barriers that families encounter, a celebration of successes and models of excellence, and opening a dialogue regarding the identified challenges that families may be facing. This paper highlights background information (including population, about FVND, about family-centered care, and need), study design (including intent and proposed outcomes, potential uses, and methodology), overall results (including data collection results, description of the response and respect scale, and interpretation), and FVND recommendations for use of results to improve the capacity of the system to be responsive to the needs of families of children and youth with special health care needs as they navigate their care and support options.

"Instead of depending on case workers and teachers deciding what was a need for our family, give us the choice of what our family needs and allow us to pick and choose, with assistance, what we think we need."

Background

Children and youth with special health care needs (CYSHCN) have been defined federally as children or youth with or at risk for chronic physical, developmental, behavioral, or emotional conditions who also require health and related services beyond what is needed by children generally. This definition includes children with:

- Disabilities
- Chronic illnesses and conditions
- Health related educational and behavioral problems

Based on the information from the 2016 National Survey for Children's Health Children with Special Health Care Needs (CSHCN) provided to North Dakota's Children's Special Health Services (SHS), 19.4 percent of North Dakota's children (about 30,876) have a special health care need. Survey data indicate that the prevalence rate of special health care needs in ND is 8.3 percent for children ages 0-5, 19 percent for children ages 6-11, and 29.3 percent for youth ages 12-17, and is 21 percent for males and 15 percent for females.

The data show that CSHCN families experience an economic impact; 12 percent of these families who had a child with special health care need of a lesser degree experienced financial problems due to their child's health needs. For those families with complex medical needs nearly 18% experienced financial problems due to their child's health needs.

About Family-Centered Care

Family-centered care assures the health and well-being of children, youth, and their families through a respectful family-professional partnership. It honors the strengths, cultures, traditions, and expertise that everyone brings to this relationship. Family-centered care is the standard of practice which results in high quality services.

The foundation of family-centered care is the partnership between families and professionals. Key to this partnership are the following principles:

- Families and professionals work together in the best interest of the child or youth and the family. As the youth grows, they assume a partnership role.
- Everyone respects the skills and expertise brought to the relationship.
- Trust is acknowledged as fundamental.
- Communication and information sharing are open and objective.
- Participants make decisions together.
- There is a willingness to negotiate.

"We were alone, and I SEARCHED for resources and made calls and went to meetings and filled out paperwork. I spent more than two years searching for help, including at social services, and they never even told me about CSHS. Very sad and frustrating at how much money and stress it could've saved our family. Accessing existing programs should be a simple, streamlined process."

Based on this partnership, family-centered care:

- Acknowledges the family as the constant in a youth's or child's life.
- Builds on family strengths.
- Supports the child or youth in learning about and participating in his or her care and decision-making.
- Honors cultural diversity and family traditions.
- Recognizes the importance of community-based services.
- Promotes an individual and developmental approach.
- Encourages family-to-family and peer support.
- Supports youth as they transition to adulthood.
- Develops policies, practices, and systems that are family-friendly and family-centered in all settings.
- Celebrates successes.

The Needs of CYSHCN in North Dakota

The 2016 Data Resource Center for Child and Adolescent Health indicate that families varied greatly in their knowledge of community services and programs they can access. Specifically the report showed that:

- In an average week, how many hours do you or other family members spend arranging or coordinating health or medical care for this child? 35 percent of families did not receive coordinated health care. 52.4% spent less than one hour, 10.3 % 1-4 hours weekly and 2.2% spend 5 or more ours weekly

Over the past decade, national surveys have indicated that families who are informed are better decision makers for their CYSHCN. The Health Care Experiences of Families of Children with Special Health Care Needs conducted by the Heller School at Brandeis University and Family Voices also confirmed this family need. Research shows that family and child health outcomes improve dramatically when they can consistently access accurate and quality information in a timely manner.

"I found it very hard to learn about services for children with special healthcare needs. I was always given the run around and always had to wait for answers. For new families I would suggest sending out a packet of information containing information for all services available and support groups for families dealing with a child with special healthcare needs."

As a reality check to assessment and survey indicators, families who have contacted FVND via phone or in person shared their lack of health care information and knowledge and available resources in ND. In addition to problems accessing medical and community based resources, families reported difficulty in locating information that is easily understood for diagnosis and treatments of their children, and in understanding public and private insurance benefits and limitations.

Study Design

Intent and Proposed Outcomes

The intent of this project was to help identify the experiences families of children and youth with special health care needs may face as they search for resources, information, financial support, emotional support, and access to services. The project sought to identify what was working well and how that was influencing the family capacity to access information. Barriers encountered by families serve as real life examples of specific challenges faced by families as they navigate the system of care for CYSHCN.

Potential Uses

The survey can enhance family capacity to seek and access appropriate services for their CYSHCN by providing a snapshot of the strengths and challenges within the information navigation trail. It will serve as a base for identifying and celebrating success and beginning a dialogue to identify barriers that families may face. The information will be used to identify areas for FVND to work as an organizational partner with the system of care to effectively improve the capacity of families to navigate, locate, and access appropriate services and supports.

Methodology

The methodology of this initiative had several stages, each serving as a progressive way of gathering information that would meet the anticipated outcomes and assist organizations, families, and systems to better meet the needs of CYSHCN.

STAGE	DESCRIPTION
Targeting Programs:	Using traditional avenues of information seeking by families, FVND developed a database of organizations and agencies across ND that serve CYSHCN to call in search of resources and information.
Notification of survey:	Before the survey was conducted, a letter was sent to administrators of the main agencies that were going to be called to let them know about the upcoming survey.
Scenario:	A family scenario was created to serve as the purpose of the call and a consistent way of soliciting information, resources, and referrals.
Seeking information calls:	A parent caller, using the scenario and acting as a parent seeking information and resources, called agencies, organizations, and providers in the database with the scenario.
Data collection:	The parent caller documented each call individually by noting the responses she received from each person (at each agency). The caller also rated each call on both responsiveness and respectfulness, based upon a subjective scale and interpretation from the vantage point of a parent of a CYSHCN.
Aggregate findings:	The responses were collated into an Excel database.
Rating responses:	A group of individuals from across the state rated each agency on a scale of 1-5, based on the data and indicated if the agency was responsive and respectful.
Disseminate information:	The results and information were shared at meetings with agency directors and partners.

Overall Results

The results yielded good responses from a variety of programs and agencies that were genuine in their willingness to help and find information, care about the situation, follow up by email, and emulate an overall desire to cover the needs of the family. Specific "helping" behaviors included:

- Referrals to county offices
- Referrals to FVND and other family support agencies
- Offers to make calls on behalf of the family
- Willingness to check back to see how they were doing
- Follow up emails
- Active listening

Some responses and behaviors that were not found helpful included:

- Multiple "baton tosses"; passing the parent caller on to other programs and services
- Referrals to other programs that were not knowledgeable or helpful
- Not referring to their own agency's programs
- Offering websites, but not asking if the family had internet access
- Offering information without the contact information
- Using incorrect names such as "Human Resource Center" instead of "Human Service Center"
- "Good Luck" wishes when they were unable to assist

Table 1. Data Collection Results	
Number of programs called	215
Number of calls completed (sometimes spoke with multiple individuals within the same program)	324
Number with wrong 800#	8
Number with wrong local number	13
Number disconnected	14
Number totally unreachable	15
Number answering to a different name	11
Number rated as responsive	235
Number rated as respectful	146

Response and Respect Scale

1. Not responsive or respectful; gave no information or help on where to go or what to do.
2. Somewhat responsive or respectful, but not both; gave no information or help on where to go or what to do.
3. Responsive and respectful, offered some information, but it was not the best or was lacking in contact information
4. Responsive and respectful, gave information, but did not give all needed information (both parent support and other needs)
5. Responsive and respectful, gave correct information on who to call or connect to or what to do.

Table 2. Rating Results

1 – Worst	65
2	73
3	44
4	26
5 – Best	7
Rating average	**2.2**

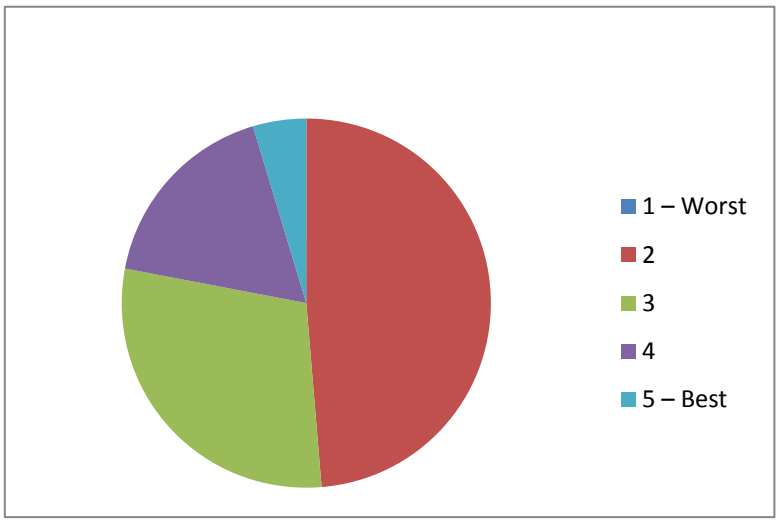

Figure 1: Response and Respect Results

Interpretation

A review of the outcomes of this exercise indicate that there are locations, agencies, and programs that are well prepared to assist families when they turn to them in search of resources, information, and assistance. Some seemed to be inclined to assist, regardless of whether it was a population that they were responsible for helping or not. Several, albeit a small number, seemed to be prepared and well organized in their approach to assisting over the phone. Because of the many barriers to communication and understanding inferred by phone conversations, those that were considered respectful are to be applauded.

While there is no current national standard to help us determine whether an average state rating of 2.2 is adequate, we feel strongly that we would like to see this number improve. This project also highlighted the plight of families as they blindly stumble through the system of care in search of resources, information, and assistance for their CYSHCN. The study suggests that there was an abundance of wrong numbers, disconnected numbers, and a general lack of available resources without "digging" from one level within a program to another. There is an obvious lack of knowledge of the system of care in general by many programs and service agencies – sometimes within their own program. The "loop" of information had many missing links such as a failure to ascertain the capacity and resources of families to follow the suggested resource or failure to offer the contact information. First contact employees (those who answer the phone) may have created a barrier by not stating the program name appropriately or not offering a clear and concise description of what they could offer families of CYSHCN.

FVND Recommendations

Transformation of the health care system for CYSHCN will be dependent upon ensuring that families have accessible, accurate, family centered and culturally competent information. Through FVND with the Family to Family Health Information Center and ND Parent to Parent Project, FVND recognizes their role and responsibility in working in collaboration with other partners to create an accessible and accurate information system for families. Recommendations that warrant follow up include the following.

Training that facilitates:

- Information sharing and cross training within an agency on the various programs, including the full scope of the agency, not just a specific program.
- Orientation and ongoing training for all front line/first contact staff, such as operators, receptionists, or outreach workers.
- Cross training and sharing of information and resources between agencies, programs, organizations, and service providers within the state's communities.
- Staff that are trained on accessing family support partners, such as FVND.
- Utilization of FVND training on family-centered practices and encourage agencies to have FVND staff present at staff meetings, trainings, and conferences.

Partnerships that:

- Encourage networking opportunities between agencies and service providers.
- Promote statewide information and resource partnerships that will promote consistent and predictable methods for sharing information that ensure service agencies, programs, and organizations can be responsive to the requests and needs of families and their CYSHCN.
- Ensure that agencies and programs include families and youth on advisory boards and committees.
- Provide families with information on FVND and other family organizations with all referrals.

Tools that promote:

- Quality improvement for monitoring and improving the information and resource system.
- The use or development of a shared database of information for families and providers with accurate contact information.
- The utilization of data from family support partners such as FVND to evaluate program and agency effectiveness in supporting families.

Accountability that will:

- Identify and use regular "check points" between critical partners within the CYSHCN system of care to identify gaps in the provision of information and resources.
- Lead to a strategic plan for a family centered and culturally and linguistically competent approach to addressing the needs of families.
- Assure that family support partners such as FVND are included in the planning, implementation, and evaluation of the information and referral system.
- Utilize FVND as an outside evaluator of the information and referral system.
- Continue to discuss available opportunities for family support organizations to provide information regarding family perspective in accessing services and support.

FVND Next Steps

As an immediate response, FVND met with state agency directors to review the survey, results, discuss recommendations, and explore partnership opportunities for improving information and resource access. After meeting with state agency directors, FVND met with agency staff and presented the results and discuss approaches to improve family access to information and resources.

FVND is working on a "North Dakota Roadmap" to begin addressing the information gaps experienced by families. We invite partners from across the state to join in this endeavor and other approaches to develop the capacity of the health care and information system to be more responsive to the requests for information and services of families of CYSHCN.

Finally, FVND is invested in the vitality of this survey and its potential to expand the capacity of families to access accurate information and support. We will continue to seek resources to support the survey each year, hoping to document improvements in information, support, service, and resource access for CYSHCN and their families.

FAMILY VOICES OF NORTH DAKOTA

Who are Children with Special Health Care Needs?

Nearly 20,000 children in our state have some kind of special health care need and over 40% of these children have a health condition that limits their play and school activities.

This means 1 in 5 families within our state have children living with a special health care need and includes: physical, mental or emotional disabilities; others live with a chronic illness and many present a brief, but life-threatening medical problem.

If you are the parent or caregiver of a child, youth or young adult with special health care needs you are not alone! Family Voices of North Dakota is available in all eight regions across the state. Contact us; we understand your concerns.

ONE in FIVE
FAMILY VOICES®

What makes Family Voices different?

Family Voices of ND is a parent led organization. All staff are parents of children with special health care needs and disabilities.

All services that are provided to your family are at NO cost to you!

For more information about Family Voices of North Dakota please contact us!

FAMILY VOICES OF NORTH DAKOTA®

Navigating Crossroads to Hope

As part of a grassroots national network, Family Voices of North Dakota is the Family to Family Health Information Center to help you navigate the complicated issues surrounding health care for your child or youth with special health cares needs and/or disabilities.

KEEPING FAMILIES AT THE CENTER OF THEIR CHILD'S HEALTH CARE

What does Family Voices do?

Family Voices of ND:

- Provides families with tools to navigate systems and help make informed health care decisions.
- Provides leadership and brings the voice of families to health care programs and policies.
- Promotes family/ professional partnerships.
- Offers opportunities to interact with policymakers, educates families about the legislative process and teaches advocacy skills.
- Hosts trainings, workshops and topical calls for parents and professionals.
- Provides support, encouragement and peer mentoring.
- Walks you through transition phases into adulthood.

Parent to Parent USA Program

Parent to Parent (P2P) matches families with children/youth with special health care needs/disabilities with a trained volunteer Support Parent who has had similar experiences.

P2P is a valuable source of assistance and information for parents because they can talk with an experienced parent who really understands.

Families often look to P2P for help and information such as:

- Resources
- Financial supports
- Similar experiences
- A listening ear

Member of the Parent to Parent USA Alliance, Committed to Parent to Parent USA-Endorsed Practices

If you are looking for another parent to visit with, please call FVND today

Project Carson

Project Carson offers support to new parents who receive a prenatal or at birth diagnosis. Project Carson's goal is to assure that families receiving a diagnosis have access to a support network of parents and organizations that understand the emotions, joys and challenges that come with the word diagnosis."

Our network of experienced parents can help you access supports that may be available to you such as:

- Financial Assistance
- Family Support
- Early Intervention Services for your child and family

To be referred to Project Carson, call 1-888-522-9654.

Supporting Families in North Dakota: Through the Lens of Lived Experience

Family Story

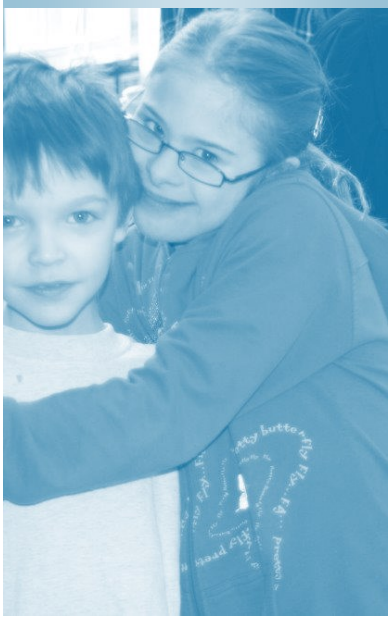
Family Voices of ND has been a valuable resource for me and my family. They have provided me with valuable training and knowledge about resources networking in my community and areas around me. My husband and I now have a better understanding of how "the system" that our child, with special health care needs, is in. Everything can be so confusing, but this knowledge has better equipped us. There have been topical calls to further enhance our learning. This is extremely beneficial to us and other families, so we can understand what everything is all about in this world that we must now live in, that we were so totally unprepared for. Also, a big thing I am so thankful for, about FVND is that their line is always open. Sometimes, I just don't know where to begin. I know I need something for my child, I know something just isn't right, but where do I start, where do I go from here? One call is all it takes. This is immensely valuable. FVND usually doesn't just give me the number and say, "try this." Often, the call is made for me, and things get going. Then, I get a call from someone if I needed a referral to another place. I don't end up spending an hour or more on the phone trying to get to where/who I need to. What a relief.

The Parent to Parent program has been an excellent resource as well. I was matched with another parent when I wanted to talk to another parent close in my area who had a child similar in diagnosis to mine. It was very nice not to be paired with someone in another state away. We could discuss what works, what doesn't, and things like local providers and state resources. I felt reassuring to have someone near by to talk with. Then, I was paired with a parent to who wanted to talk to me about their child and I was going to support them. Interestingly, it worked both ways. We enjoyed talking with each other and were able to learn from each other. What kind of things had worked and providers we had found. We actually both benefited and were able to improve the care for both our children!

Supporting families *involves the connection to another person who has also raised a child/youth with a special health care need and/or disability and who has a shared life experience. This connection assures that families get resources and services in ways that are respectful, relevant, and honor their unique choices and perspectives so that they can make informed decisions to achieve the best possible outcomes for their children and/or youth.*

Families are big, small, extended, nuclear, multi-generational, with one parent, two parents, and grandparents. We live under one roof or many. A family can be as temporary as a few weeks, as permanent as forever. We become part of a family by birth, adoption, marriage, or from a desire for mutual support. As family members, we nurture, protect, and influence each other. Families are dynamic and are cultures unto themselves, with different values and unique ways of realizing dreams. Together, our families become the source of our rich cultural heritage and spiritual diversity. Each family has strengths and qualities that flow from individual members and from the family as a unit. Our families create neighborhoods, communities, states, and nations.

Developed and adopted by the New Mexico Legislative Young Children's Continuum and New Mexico Coalition for Children, June 1990.



Family Driven

Family-driven means families have a primary decision making role in the care of their own children as well as the policies and procedures governing care for all children in their community, state, tribe, territory and nation. This includes:

- Choosing supports, services, and providers;
- Setting goals;
- Designing and implementing programs;
- Monitoring outcomes;
- Participating in funding decisions; and
- Determining the effectiveness of all efforts to promote the mental health and well-being of children and youth.

Osher, Osher, & Blau, 2006

Fidelity is trust, accountability, and predictability across the systems of care between all stakeholders within an established and accepted practice. Families of children and youth need fidelity from the people in their lives; teachers, providers, support team, and others. The expectation of fidelity to family driven or centered practices is a fundamental value in family support.

Background

There are an estimated 27,000 children and youth with special health care needs and another 23,000 children and youth with an emotional, behavioral, or mental health condition in ND; 13,000 of these children receive special education.

Research and experience shows that there is much more to meeting the needs of children and youth with special needs than those services offered by providers. Most services are provided according to guidelines that dictate the eligibility, type of service, and access. Because of this, families of children and youth with special needs often serve in a variety of roles to ensure the well-being of their children and youth, such as care management, transportation services, social support, socialization, advocacy, medical treatment, therapies, and other necessary services. And, because family caregivers are generally the primary and/or sole caregivers to their children and youth with special needs, their own physical, mental, and emotional health and wellbeing can impact how they provide that care. As a result, parents of a child or youth with special needs may also experience increased stress, guilt, blame, or reduced self confidence in parenting, which can divert attention from other aspects of family functioning. In turn, this can effect the physical, mental, and emotional health and wellbeing of all of their children and youth.

Children and youth with special health needs include all children who have, or are at increased risk for, chronic physical, developmental, behavioral, or emotional conditions and who also require health and related services of a type or amount beyond that required by children generally.

Further...

Researchers and leaders across the nation agree that key to this support is:

-**Connections** to others who have lived experience in successfully navigating the system of care for their own child or youth;

-**Access** to formal and informal information and resources that are family and youth driven/ centered and culturally responsive; and

-Family and youth **choice** based upon their interpretation of that information.

Each component is essential as the foundations of family and youth driven/centered care and support. Family driven/ centered care assures the health and well-being of children and their families through a respectful family professional partnership. Family driven/centered means that families have a primary decision-making role in the care of their children, as well as in the policies and procedures governing care for all children in their community, state, tribe, territory, and nation. Family-driven/centered care is the standard of practice which results in high quality services.

Current State of Supporting Families

Historically, until the past decade, families, youth, and consumers of services had to fight to secure a place at the decision-making table, and typically served in a volunteer advisory capacity. Later, some were paid a "stipend" to cover childcare costs, travel related expenses, and income lost due to missed work. As organizations and individuals became more experienced and skilled, and as programs and service providers saw the value of ongoing support, some agencies contracted with family run organizations and leaders as providers of lived experience, peer to peer support for families of children and youth with special needs. States and their communities have taken the task of developing sustainable support as a critical component to the provision of a continuum of services for families of children and youth with special needs. Many are offering funds and resources for family run organizations to provide support services.

Using representatives from lived experience populations has been on an upward evolutionary process for over three decades. Federal, State, and private funding sources require family, consumer, and youth representatives and a shift towards a more family, consumer, and youth driven approach to serving vulnerable populations. Aside from organizational and funding requirements, the inclusion of a lived experience representative to provide family support has multiple benefits.

Across the Country

In **Arkansas** a community based, family run organization was awarded a contract from the state to provide peer to peer home visiting for targeted families of young children at risk for special needs. The organization was given enough funding to train the trainers of home visitors, hire and supervise home visitations, and to manage the program within nonprofit business practices.

In **North Carolina**, the statewide, family run organization for children and youth with mental health needs received a large, state contract to hire, train, and supervise Family Support Specialists with lived experience across the state to work with providers and ensure a family driven approach to service delivery and evaluation.

Lived Experience

The term "lived experience" has been used to characterize consumer and family members whose experiences are likely to match up to individuals currently receiving services. The term can be used to describe the first-hand accounts and impressions of living as a member of a group, such as those who have used mental health services, families who have been involved in the child welfare system or families who received services through a federal or state program. The core concept of supporting families is based upon an embedded lived experience and a peer to peer approach. One or more of the following might describe an individual with lived experience:

- A parent, family member, caretaker who has raised or is raising a child or youth with special needs;
- Willing to share life experiences in a positive manner;
- Has been involved in and understands multiple service delivery systems;
- Can separate both the good and bad experiences and use them to improve the system response to the families they serve;
- Can use experiences to help other families move beyond perceived limitations;
- Can transfer knowledge to build the capacity of the families served/supported;
- Builds their knowledge of systems through interactions with different families and their needs;
- Has an understanding of where and how to get answers regarding identified needs; and
- Persistence in securing necessary resources and information.

Guiding Principles of Supporting Families

The following Guiding Principles were developed to serve as a foundation for supporting families across the state with special needs.

- **Lived Experience:** Support evolves from lived experience, where families have access to persons familiar with the road who understand the questions, worries, joys, heartache, and celebrations that are a part of the journey;
- **Coactive Navigation:** Families build their capacity, confidence, and strength through support and coaching from another parent who can share their experiences when traveling new paths with their child's or youth's diagnosis.
- **Meaningful Connections**: Families build their capacity, confidence, and strength in navigating systems through active support and coaching from another parent.
- **Active Engagement:** Responsive listening and translation is provided through shared experience and serves as a vital component to assist families in a manner that allows them to receive the services necessary to meet their authentic needs.
- **Critical Partnerships:** The system promotes and models family-professional partnerships as a predictable aspect in establishing family identified needs and services.
- **Unbiased Respect:** ALL support recognizes and builds on the strengths of each family member and respects their choices, culture, and beliefs in an impartial and nonjudgmental manner.
- **Sense of Belonging:** Families have peers with similar experiences standing with them as they identify and use their natural networks to promote a sense of belonging.
- **Ongoing Sustainability:** Adequate efforts and resources are identified and available to ensure the continuity and longevity of supporting families for the duration of need.

Supporting Families: A Sampling of Services

Some of the supporting families services that could be offered to families and the systems that serve them includes:

- Serving on care planning teams with families;
- Building the capacity of families to identify and express their needs;
- Advocating and sharing information on the needs of families;
- Developing or editing material that builds the knowledge, capacity, and skills of families;
- Creating special programs or activities to meet family needs;
- Evaluating the program's response to the principles of family, consumer, and youth driven-centered;
- Creating and collecting satisfaction surveys;
- Discussing with families their specific needs and guiding them to resources;
- Serving as a trainer for in-service trainings;
- Representing the families served on workgroups, taskforces, and/or interagency councils;
- Reviewing program policy to ensure sensitivity to the needs and experiences of families served;
- Creating and facilitating family advisory committees;
- Serving as an family advocate or voice at service planning meetings; and
- Serving as a peer mentor to those served when partnering with professionals or navigating the system of care.

Recommendations

In light of the previous discussion, the following recommendations emerged from the group.

- **Families must have access to organizations that represent the lived experience through:**
    - Referrals to supporting family organizations by all child and youth serving agencies and programs within a specified period of time;
    - Systems that use available evidence based, parent to parent models and family driven principles to connect families; and
    - Family run organizations that provide family support through a memorandum of agreement and within the guiding principles of this paper.
- **Support to families must be accessible on all levels of planning, treatment, and evaluation and feature the following:**
    - Statewide coverage without gaps;
    - Transparency that allows families to make choices on what will work best for them;
    - 24/7 availability;
    - Family driven and centered approaches;
    - Opportunities to access culturally competent support that is respectful and responsive to their own beliefs, values, and customs; and
    - Adequate provisions for urgent and emergency support needs.
- **Families are engaged and have opportunities to build their skills as a parent of a child or youth with special needs through:**
    - Agencies and programs that are committed to assisting family run organizations in identifying families that could benefit from additional training and support;
    - Utilization of family run organizations and their expertise to develop and manage training programs for families that are responsive to their identified needs;
    - Annual trainings within the state to build the leadership capacity of families; and the
    - Availability of a formal career ladder for families with lived experience through a rigorous training and certification program.
- **Family support is viewed as a critical and professional service to the well-being of families of children and youth with special needs and demonstrated through:**
    - An examination of the extent to which current supports are aligned with these principles;
    - Ongoing opportunities for funding and resources to ensure that family run organizations have the capacity to sustain the support they offer;
    - Family leaders have regular opportunities to meet with the Governor, policymakers, and agency management to discuss and review the state of the state in family support;
    - During budget discussions, family support will be considered as a viable alternative to more costly interventions;
    - Regular, consistent, and predictable funding from the state; and the
    - Recognition that program management does not constitute family support in itself.

"Overall, there have been fabulous things going on in the state of North Dakota to support families with children with special health care needs. At the beginning of our diagnosis of our daughter, I felt disconnected, afraid, and outnumbered by children who seemed to live lives as "usual." I have felt quite thankful for the groups that I have been a part of and believe they are a vital part of our system."

A.L. North Dakota

Next Steps

In an effort to promote the principles and intent of this paper and promote the fidelity of supporting families, we have agreed to the following next steps:

1. Development of a short and long term strategic plan that will outline goals, activities, outcomes, and accountability;
2. Meet with stakeholders and policymakers to establish direction and resource options to finance and sustain family support;
3. Work collaboratively to align our organizations with responsibilities; and
4. Create memorandums of agreement between organizations to minimize competition, repetition, and confusion.

Changing the future,

one family at a time

Testimony on HB 1012
2021 Legislative Session
January 26, 2021
Rep Nelson, House Appropriations Chairperson

Representative Nelson and Members of the Committee

My name is Donene Feist, I am the Director for Family Voices of North Dakota. I come before you today to regarding HB 1012.

Family Voices of North Dakota is statewide family to family health information and education center who serves families of children with special health care needs in ND. Each state in the country and our territories has one family organization that has been designated as a family to family health information and education center by HRSA federally. We are that entity for ND. We provide emotional and informational support to many families across North Dakota who have a child who has a chronic health condition and/or disability. In addition to the support and 1:1 assistance we provide to families, we also provide various trainings and workshops, which help families understand how systems work so that they can also be good stewards of state dollars and the programs of which their children are enrolled. Our staff, who all are parent to children with special health care needs, provides assistance to families by helping them access and navigate services; explaining what the services mean, how systems work, and where the funding comes from; by providing emotional support to assist with their unique and individual needs.

FVND follows the Maternal and Child Health definition of children with special health care needs, which is those children and youth who have a chronic condition of at least one year, a physical disability or mental health/behavior health diagnosis. Additionally, there are many children and youth who may have a physical disability and a chronic health illness but also may have a co-occurring mental health diagnosis. Because of many families have a co-occurring condition, it often leaves families having to understand and navigate many systems and complicated silos. We receive our referrals through agencies, physician offices, out of state hospitals where a child/youth may be receiving services.

All of our services under the auspices of the statewide health information and education center are performed through parent-to-parent mechanisms through our staff. In addition, we run a parent-to-parent matching program called North Dakota Parent-to-Parent which provides connection of one parent to another as a mentor for emotional support. This program mirrors the "peer support" program that you may be familiar with in the behavioral health system; however funding for peer support outside of the behavioral health system has not been prioritized.

In partnership with Designer Genes in 2012, we provide support through a project called Project Carson. Project Carson provides emotional and informational support to families who may receive a prenatal diagnosis or an at birth diagnosis.

FVND is affiliated with two national organizations: Parent to Parent USA and the Family Voices National organization, who provide ongoing technical assistance to all states across the country

We continue to experience an increase in the number of calls and requests for assistance from families and providers. On the last few pages of my testimony I have included the data we collect on the calls we receive and the help that is provided.

We are requesting that the dollars described and removed above be placed back into the budget for HB 1012. The need for family support is not going away. Sadly, dollars for family support have been nearly eliminated in the 1012 budget.

Families desperately need a place to go to get the help that they need. Through funds appropriated in the 2015 session and 2017 session, we have been able to increase staff time. Current staff are assisting families across ND. Funds allocated, not only help meet increase in demands for assistance to families and professionals 1:1, but also for ongoing training, and development of educational materials. Our mailing list has steadily increased to nearly 7394 across the state.

In 2015- present we were provided flow through dollars through: **SECTION 20. GRANTS - EXEMPTION - REPORTS TO LEGISLATIVE MANAGEMENT**. The grants line item in subdivision 2 of section 1 of this Act includes $75,000 from the general fund for a grant to a statewide family-to-family health information and education organization which provides parent-to-parent support for families and is

located in a county with a population of less than 6,000 based on the 2010 decennial census, for the biennium beginning July 1, 2015, and ending June 30, 2017. Funds awarded must be used for family-related information and education services. The organization receiving a grant under this section shall provide a report to the legislative management during the 2015-16 interim on the use of grant funds. The requirements of chapter 54-44.4 do not apply to the selection of a grantee, the grant award, or payments made under this section.

In 2017-present we were provided flow through dollars through: HB 1040 from 2017. FAMILY-TO-FAMILY SUPPORT SERVICES. There is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of $100,000, or so much of the sum as may be necessary, to the department of human services for the purpose of providing funds to one or more organizations to provide family-to-family support services, for the biennium beginning July 1, 2017, and ending June 30, 2019. Funds provided under this section must be used for providing support services to families with children who have disabilities or behavioral health needs.

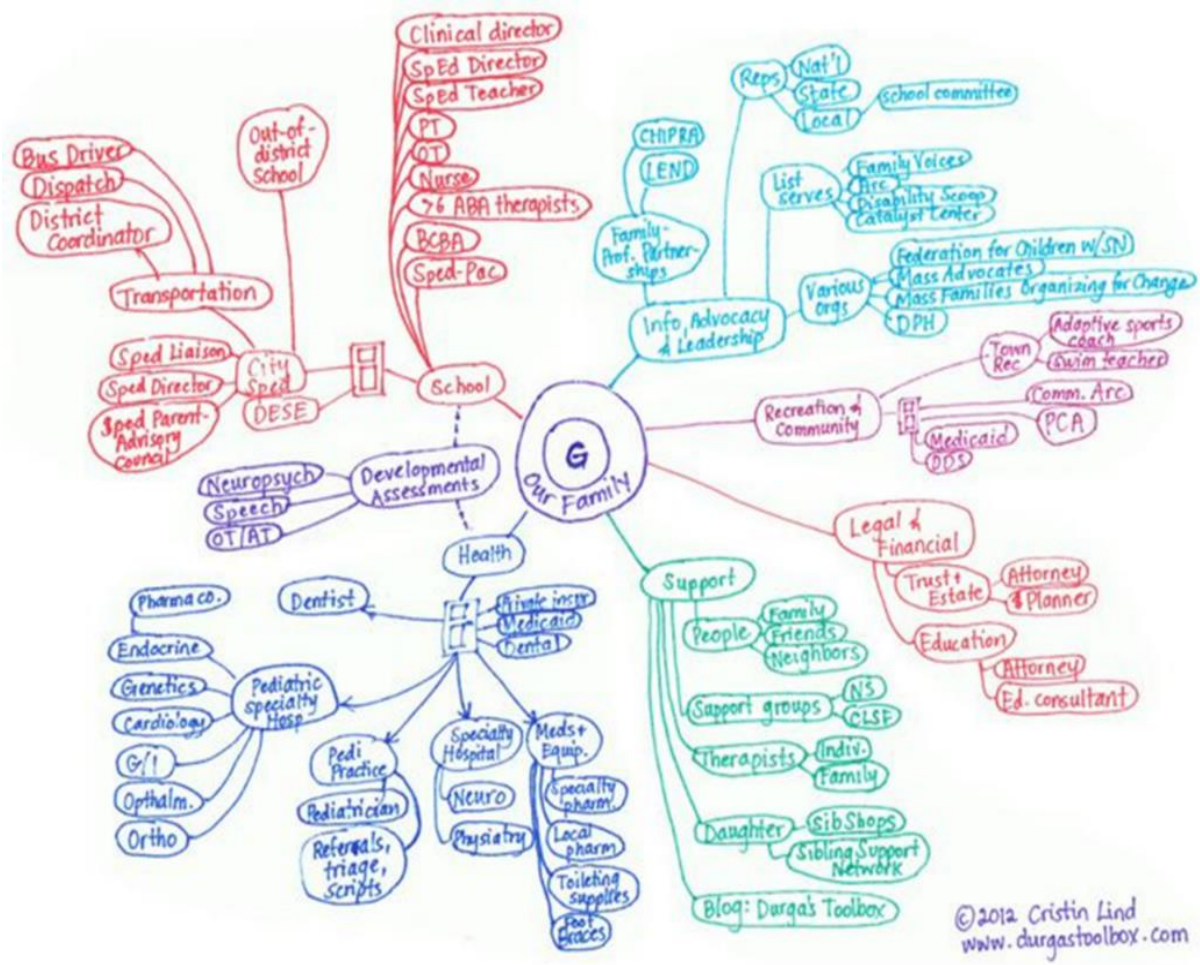
Most recently we have been told that we would be cut $100,000 and the remainder would need to be put out for a Request for Proposal versus flowing directly through to our organization. We have not received an answer on why this change is occurring. This was flow through dollars through Children and Family Services.

We often encounter families who are in crisis and experiencing difficulty accessing services because of denials and ineligibilities. We end up providing assistance similar to an ombudsman because nothing like this exists for families who are raising children with special health care needs and disabilities in North Dakota.

To be clear, not all of the families that we assist receive Medicaid services. Not all of the families we serve will be served under the 1915i state plan amendment. In previous testimony, Chairman Nelson, you had asked the question of whether some general funds were eliminated due to being able to bill through the 1915i, and the response was yes. We want to be clear that this isn't always the case, as other families may have private insurance and be on one of the waivers. Some may be just on income based Medicaid. There are no two families alike.

IN 2016 ND Kids Count Data indicates that 86% of parents with children eligible to receive services are not aware of available programs. We feel that this is still an issue five years later. ***People cannot access what they do not know exists*****.** In essence, we do the work to help families, one of our most vulnerable population the how to access the provider networks they will need in raising their child with a chronic illness and disability. Who then would provide this service to families?

Most recently, through focus groups to identify family's needs through the Money Follows the Person initiative, we learned families needed assistance in navigating and understanding the various systems and silos, a streamlined approach, need to connect with others, application assistance and help coordinating services. We also know through a survey that we completed with DD Program Managers which revealed many of them do not know local resources and this is where FVND plays a very valuable part to systems of care.



Our data collected below and on the final sheets of this testimony, is information that all staff collect and is aggregated. I share the information to help you understand the magnitude of information that we collect daily.

The included table identifies the ongoing increase in the number of calls that are received by our office. We are on our 20th anniversary as a nonprofit. Eighteen years ago, our total contacts were 518 families and 427 providers. As you can see we have had a steady increase in the number of contacts to staff from families and professionals. Our federal fiscal year is July 1 through June 30 of which this data is reflective.

Total Encounters of all calls	**2015**	**2016**	**2017**	**2018**	**2019**	**2020**	**June 1, to Dec 31, 2020**
Families	**2865**	**3260**	**3712**	**4026**	**4172**	**4233**	**2296**
Professionals	**2339**	**2499**	**2893**	**3076**	**3158**	**3273**	**2173**
Totals	**5204**	**6059**	**6605**	**7102**	**7330**	**7506**	**4469**

As stated earlier, many times, our encounters with families are heightened because the family is in crisis. We have noted that the issues being presented by families today are being increasingly complex. Our staff work with a large number of families who experience gaps in service, have difficulty understanding the complexities of our Medicaid systems and Medicaid waivers, and their private insurance who have children with very complex medical issues. Many providers contact us to make a referral or to assist them in locating resources for families they are working with. Families often do not know where to begin. We will partner with them in making those connections to community resources, possible eligibility criteria and programs, assist them with the application process, follow up with them to assure their family needs are being met, and provide ongoing emotional and informational support.

In the diagram below you will see children with a chronic condition or disability utilize many services. Most services that families encounter are in silos.

National prevalence data estimates from the National Survey obtained through the Data Resource Center indicate there is an estimated 30,118 CYSHCN in ND. One in five families in North Dakota has a child with special health care needs.

IN 2016 ND Kids Count Data indicates that 86% of parents with children eligible to receive services are not aware of available programs. We feel that this is still an issue five years later. ***People cannot access what they do not know exists*.**

We know and can identify as best practice that families thrive when supported by others with lived experience. We also know that families build capacity, strength and confidence through support and coaching from another parent. Active engagement with families through responsive listening from others who have walked in the same shoes assists families in a manner that allows them to receive services necessary to meet their family and child's needs.

Families across North Dakota have repeatedly shared the difficulty in locating and accessing services when they call our offices. Raising a child or youth with special health care needs, accessing quality services and paying for them while still meeting the needs of the entire family and maintain employment is stressful.

Chairman Nelson and members of the committee, I have stood before you all for many years. The needs for families to live, thrive and survive in their community has also increased. We often **hope for the best, but don't know what the future holds in a world and system that wasn't built for our children.** There is no handbook or parenting book about raising a child with special health care needs and disabilities.

Most of our children don't fit a mold. All are uniquely their own, and many have multiple diseases or disorders so rare that often doctors have never seen. Early on families realize with a heavy heart, the world we live in isn't built for our children. Each and every day families are fighting someone about some aspect of their care. It could be a doctor, nurse, therapist, educator, or an insurance company. Every day families launch battles for what we know our children need to thrive, and sometimes our fight ends in defeat. We cry in our bedrooms at night. In the dead of night, many families lie awake, overcome by fear of the unknown.

Every day many families are fighting a battle against a disability, disease or chronic illness that we will never beat. Most of families know the very real implications of what can happen to our children at any given time. *All we want is for our children*

to not have to fight so hard to simply be. Families need support often to get from point a to point b. This is an ever fluid and changing environment.

Our role is not only to provide support, assistance in navigating and connecting to services to families, but through or various trainings and workshops, help families understand how systems work so that they can also be good stewards of state dollars and the programs of which their children are enrolled. A valued provider has stated "It is important to ensure that there are adequate supports for families, as these strengthen the family unit as a whole. This results in a decreased demand for providers as you are creating lasting change within the family unit.

Again, we are requesting that the dollars described and removed above be placed back into the budget for HB 1012. The need for family support is not going away. Sadly, dollars for family support have been nearly eliminated in the 1012 budget. Dollars for the Experienced Parent program which is in the DD Budget has also been eliminated. Do the most vulnerable families in the state not deserve assistance?

In closing, let us remember as each of us makes decisions that will affect children—whether we are parents, educators, health professionals, or government officials—it is our duty to consider if that decision either affirms or denies a child's most basic human rights. **Families are not looking for handouts, but they do often need a rope to hang on to, to keep from drowning in an every changing system. Family support is vital, to help them live, thrive and survive in an every changing world.**

The data shared on the last few pages are from federal fiscal year July 2019-June 2020 is to illustrate not only the number of calls but the type of information families and providers call us about. Additionally, several families we have assisted have shared information with you.
We thank you for your consideration.

Donene Feist

To the Members of the House Human Resource Committee,

Three years ago, my six year old daughter, Addilynn, was fighting for her life in PICU in Minnesota after seizures nearly took her from us.

Four years ago, I attended the Parent Leadership Institute through Family Voices of North Dakota. I have also reached out to their staff on numerous occasions for guidance and support.

Both of these moments have changed my life and my daughter's. Addilynn has a very rare genetic disorder that causes developmental delays and difficult to treat epilepsy. My ability to advocate for her changed dramatically after attending the Parent Leadership Institute. It has helped Addilynn get the medical treatment, equipment and therapies she needs to thrive. It has helped me insure that she has qualified and competent individuals caring for her when her family cannot. Without the services that Family Voices of North Dakota provides, I would not be able to advocate for her in the manner in which I do now…which would have a great effect on her quality of life.

I urge you to reconsider the budget cuts made to the Family Voices of North Dakota programs. Family of children with special health care needs NEED agencies like Family Voices to help them navigate a confusing and sometimes scary system for their children.

I know that my daughter would not be thriving today without the advocacy skills and support that I have received from Family Voices of North Dakota.

toby.jean.carlson@gmail.com

To the Members of the House Human Resource Committee,

I would just like to give due praise to Family Voices of North Dakota. This particular program has been so helpful to my family on many levels.

I have a son who is now 18 his name is Kaden and he has a rare disease called leukodystrophy. He is totally dependant on us for all his care. Being a parent of a child with special healthcare needs can be very overwhelming, which is why programs like Family Voices are absolutely vital to families in ND.

I have many stories I could share of the help they have delivered, but I will tell the one that really introduced us to them and what they stand for. In 2010 my son Kaden suffered a brain hemorrhage and needed brain surgery along with months of recovery. It was the most afraid and overwhelmed I ever have been. In that moment I called Family Voices for guidance and support and they were there for my family.

They went above and beyond in support and pointing me in the direction I needed to go. They were amazing in their ability to jump in and really be there. I have used their services for many things from emotional support, help in guidance through the medical system, training me to be a better parent to my son, and help in general questions.

I have worked with many non-profit organizations, and Family Voices has been the most efficient and caring. I can't express enough how much FVND has meant to our family. I know if I call them tomorrow with a question it will be answered. In a world with a lot of runaround that means so much. They are worth every bit of funding and need to stay as a big presence in our state. As a parent I am so grateful for them!!

Amanda Burner

Minot ND

amanda.burner@outlook.com

To the Members of the House Human Resource Committee,

We are so thankful for Heather Wheeler staff of Family Voices of ND in Williston.

Our family has been blessed with a beautiful little boy who is now 6 years old who faces many challenges due to his disabilities, including Fetal Alcohol Syndrome, Autism Spectrum Level 2, ADHD and anxiety.

As we embrace these challenges along side him we have often felt lost, afraid and very alone. This path will never be easy, but after my first phone call with Heather, I realized that we will never be alone. There will always be someone there to help us navigate through this uncharted path and help us get back up if we fall.

In the world of FAS they say that if you know one child with FAS, you only know one which with FAS. This is because FAS is so different due to the brain damage to each child.

Heather and Family Voices of North Dakota, although she may only know Jaxson; Jaxson is who she knows well. Jaxson needs her and so do we. Thank you so much for putting this support in our lives

The Kostad family

HB 1012 #2534
House Appropriations – Human Resources Division
Monday, January 25, 2021
Rep. Jon Nelson - Chairman

Chairman Nelson and Members of the House Appropriations – Human Resources Division:

My name is Roxane Romanick and I'm representing Designer Genes of ND, Inc., as their Executive Director. Designer Genes' membership represents 260 individuals with Down syndrome that either live in our state or are represented by family members in North Dakota. Designer Genes' mission is to strengthen opportunities for individuals with Down syndrome and those who support them to earn, learn, and belong.

Individuals with Down syndrome have made many strides in living in their homes, schools, and communities because of educational and medical advances, public policy, and advocacy efforts. Public investments in early intervention, family support, public schools and special education, post-secondary school options, and home and community-based services do make a real difference for people with Down syndrome. The vast majority of our membership are living in home and community-based settings. Thank you for your important part in opening up these opportunities.

My daughter, Elizabeth, and our family are an example of the positive outcomes of this investment. Elizabeth has been a consumer of services from the first day of her life when her Early Intervention staff visited her in the hospital until the present with support from Vocational Rehabilitation and the Minot State Access Disability Services and the ASTEP program. Her education was supported by special education and general education from 2002 to 2018. A number of her job experiences have been supported by Vocational Rehabilitation. As a family, we have been supported by Family Voices of ND as well as the connections we've made through Designer Genes and the rest of the Down syndrome community across a wide arena of areas. All of these services and supports poured into a reservoir that she is depending on as she works on an Early Childhood Paraprofessional Associates from Dakota College of Bottineau. Who would have thought?

Our organization has interest in a number of areas of HB 1012 and this single piece of testimony is presented to draw your attention to those areas:

1. **Developmental Disabilities Division**
    a. **Payments for providers** – We stand in support with other advocacy efforts and the recommendation to award providers within the Developmental Disabilities system up to a 3%/3% increase. Our individuals across the life span from infants and toddlers in

our Early Intervention (Infant Development) to our oldest individuals with Down syndrome rely on this system.

b. **Eliminate the $11 million in state cost savings to the adult services providers -** This cut to our providers is devastating. The provider system has been stressed due to COVID, recruiting and maintaining staff, and assuring health and safety for everyone that they serve. These challenges put individuals at risk of institutionalization and instead of helping more individuals to move out of the Life Skills Transition Center, we will see the reverse happening.

c. **Restore and reallocate $100,000 Experienced Parent Funding –** In the 65th session, a number of advocates worked with legislators to secure an amendment on HB 1012 for $100,000 in state general funds and $160,000 in designated funds from the federal Part C grant to support the Experienced Parent program within the ND Part C Early Intervention system. In her January 20, 2021 budget detail testimony, Tina Bay, Director of the Developmental Disabilities Division, reported that this funding (both state and federal grant) would be cut as part of the state's cost saving plan.

Family-to-family support, parent support, peer support – call it what you want - is a critical element in sustaining the confidence and competence for families who have children with special health care needs. Our organization for one is designed expressly with that purpose in mind. In a 2005 research study of postnatal support of mothers of children with Down syndrome (mere_43_304.196_212.tp (brianskotko.com), the vast majority of mothers reported a desire to be connected to their local down syndrome organization "which can provide practical knowledge in addition to establishing the beginnings of a long term support relationship."

Our families who are raising children with special health care needs need other families to connect with who have lived experience either through their own experiences or through helping other families. We need structured approaches to matching families with other families like Family Voices of North Dakota does through their Parent-to-Parent program. I am requesting that upon restoring the $100,000 cut from the DD budget that it is reallocated to the Children and Family budget and passed on to Family Voices of North Dakota. (See below). Family Voices will put this money to work from Day 1 for the citizens of North Dakota and has the resources to do so.

2. Children and Family Services

a. Restore $100,000 to Family Voices and Reallocate $100,000 from DD

I am requesting that $200,000 be restored and given to Family Voices of North Dakota. They currently have $175,00 in the 2019-2021 biennium and have been told that $100,000 is being eliminated due to the cost savings plan. With your restoration and reallocation, they would have $275,000 to continue, plus expand the work they do to help families navigate and access a variety of service delivery systems. Believe your

money will go to work. Without an amendment from your committee, our North Dakota families will have lost $200,000 in critical supports.

3. **Vocational Rehabilitation**
    a. **Restore state general funds for the Centers for Independent Living –** If anyone should be testifying on this section, it's my daughter, Elizabeth. Through Dakota Center for Independent Living (DCIL), she was able to get her driver's permit. DCIL's active engagement on the Bismarck-Mandan Mayor's Committee on People with Disabilities helped her to know about their scholarship program, of which she's been awarded funding the last 3 years. Probably what she would tell you about the most though is their Youth Empowering Social Status (YESS) movement and the opportunities that she's had to develop leadership, speak publicly, and connect to other youth and young adults with disabilities and without. Sustaining our four Centers for Independent Living is another piece if assuring individuals with disabilities in our state live quality lives.

Thank you for your time and I will take any questions that you may have.

Testimony on HB 1012

2021 Legislative Session #2375

January 26, 2021

Representative Chairman Nelson, Representative Vice-Chairman Kreidt and Members of the House Human Services Appropriations Committee:

My name is Vicki Peterson, and I am here to testify to restore the $100, 000.00 that has been eliminated in the budget for the Department of Human Services flow-through dollars. I am a Family Consultant for Family Voices of ND. I have been a Family Consultant for nearly 18 years. I first gained knowledge of Family Voices of ND through my son's Early Intervention Experienced Parent, (also a vital program that is having funding eliminated). My son, Aaron has Autism with an Intellectual Disability and chronic health conditions. At the time, my son was non-verbal but did not have a diagnosis yet, and our insurance was denying speech therapy. I was angry, how could they deny a child who was non-verbal, speech therapy. I spoke with Donene, the director of Family Voices of ND, she guided me to the resources I needed, and I got two bonuses, the first was help with insurance covering speech therapy and I had a connection to another parent who also had a child with an intellectual disability and turned out as well a diagnosis of autism which my son soon received. This started my path to help other families as well and I was immensely proud when I was asked to be a part of this most wonderful family, Family Voices of ND. Over these years I know I have helped many families just as I was helped.

Family Voices of ND is the Family-to-Family Health Information Center in ND. We navigate all systems of care, including those families who have children and youth with special health care needs, chronic health conditions and disabilities. All systems of care mean physical health, mental and behavioral health, navigation of health programs and insurance both private and public. We offer a unique component, lived experience. All staff has a unique connection to other families who have children with special needs as we all have children with special needs, or young adults now with special needs. This is essential for making those connections, not only with families but providers as well.

I would like to briefly describe what a referral to Family Voices of ND and specifically to me may look like.

- Referrals come from providers, schools, lead agencies, could be anywhere that had connections to families that have children and youth with special needs.

- I contact the family within 72 hrs. of receiving the referral and I pride myself that I stick to that rule, as families many times are connected to us when the family may be experiencing some crisis.
- I first need to listen to the issue, or crisis, and need. It is extremely important that the family knows I understand that I too have had some of the same experiences.
- There may be financial issues, they may need resources to find programs that will be of support to their child, they may need and most often do, emotional support, the need to speak with another parent that has some same experiences, maybe they lost health insurance, maybe there are family members with mental health issues and might need referrals to programs, maybe a child's school plan is not working and need support. Many times, they need multiple resources to, multiple programs, the care coordination and navigation of systems, many systems.
- Average calls are around 35 to 45 minutes. I must make sure to follow-up and follow-through for families, as they are counting on the support.
- Typically, there will be referrals to programs and or other resources, often there are many referrals and research as well to make sure we are looking for all resources.
- A call may come from a provider who already has a family on a case load but does not know how to connect them to informal or other formal supports.
- We are not a 1 call and done. I have families I have and continue to help navigate systems of care for over many years, as their child becomes a teenager, and teenager becomes a young adult.
- I am there to listen, I am there to navigate, I am there to support.

Family Voices of ND helps train many family members to become strong advocates for their children, a voice. We help families with positive communication with the providers. We help providers communicate with families.

You will hear many times throughout this session, about Person- Centered Planning, keeping children and youth from being institutionalized, more focus on home and community-based services, juvenile justice reform, family-centered care. Family Voices of ND is a part of this, we are all about family-centered care. We focus on the family with children with special needs. Wrap-around services must be in place for the families. If the family is not healthy, the child will not be healthy.

Being a part of Family Voices of ND, has changed my life. It has made me a better communicator and better person. I have opportunities to make a difference in the lives of families with children and youth with disabilities and chronic health, because

someone made that difference for me and my family. Family Voices of ND is reaching out to the 1 in 5 children in ND that have those special needs.

I am requesting to restore the monies that were cut from the Department of Human Services so that we can continue to do what we need to for those families that need us the most, the more vulnerable.

Thank you for your time and consideration.

PRAIRIE HARVEST
MENTAL HEALTH
930 N. 3rd St., Grand Forks, ND 58203-2408 #2260

To: Chairman Jon Nelson and Members of the House Appropriations – Human Resources Committee

RE: HB1012

I am Debra Johnson, CEO of Prairie Harvest Mental Health in Grand Forks.

Prairie Harvest Mental Health is a private non-profit agency providing permanent supportive housing, work opportunities and a variety of services designed to help people with serious mental illness succeed on their mental health wellness and recovery journey.

I have prepared this testimony asking the Legislature to consider restoring the recommended budget cut for Prairie Harvest Mental Health of $1,414,800. Justification is included in this document.

Since our inception in 1991 Prairie Harvest Mental Health has worked in a successful public/private partnership with Northeast Human Services Center. This structure has allowed us to focus services on our respective strengths. Northeast Human Services Center provides the treatment services and in a team approach with the consumer and Case Manager, Prairie Harvest provides the services and permanent supportive housing.

Over the years Prairie Harvest Mental Health has successfully raised over $4 million in grants to build 42 units of permanent supportive housing all at varying levels of support (see attached Exhibit A). These properties are owned with zero debt. Northeast Human Services Center refers consumers to the housing based on their unique needs. Prairie Harvest has units that are staffed 24/7 as well as four hours per day. In addition, there are two peer supported lodges (that are operated in a family like setting).

One home, a one-bedroom dwelling was purchased in 1998 with funds from the State Hospital and suits one or two individuals.

Our partnership with Northeast Human Service Center has allowed consumers to remain in the community which is, of course healthier as well as cost effective. Our data indicates for example that one young man prior to receiving Prairie Harvest services experienced 193 days in institutional care. He lived in Prairie Harvest Housing beginning in 2004. The Prairie Harvest supportive housing enabled him to work on his recovery, resulting in his hospitalization days decreasing to 46 in 2009, two in 2010 and he has not been in the hospital since. He currently lives and works in the community with minimal staff contact (just brief medication monitoring assistance).

In addition to the housing, Prairie Harvest Mental Health provides:

- Scattered sites Supported Residential Program & Medication Monitoring (60 consumers)
- Representative Payee (63 consumers) (No State funds)
- Life Skills/Job Development (40 consumers) (No State funds)

Also included in Exhibit A are the costs associated with institutional care, transitional housing and crisis care, as well as the supportive services provided by Prairie Harvest Mental Health.

Working with consumers on a daily basis has given us insight of their on-going needs.

During the COVID pandemic Prairie Harvest Mental Health has worked tirelessly to keep the consumers safe and healthy. We implemented policies related to PPP and other precautions immediately. Mask mandates and limited visits from others was required. As a result, we only had two positive individuals with no symptoms and one who was hospitalized and later recovered. Our staff implemented programs and services over Zoom to help keep consumers busy and connected as they work on their recovery journey. Staff helped keep them connected to family and friends using Zoom and Facetime and established telehealth procedures. As this document is being written Prairie Harvest Mental Health consumers and staff are receiving vaccines. Prairie Harvest Mental Health services are vital to continued success in living in a least restrictive yet supportive environment.

The recommendation to cut the Prairie Harvest Mental Health budget by $1,414,800 (over 50%) came without warning.

We have been aware of and took part in the 1915(i) amendment discussions as well as by providing testimony to State Employees who crafted the 1915(i) amendment.

While we can agree there is potential for providers to recoup some expenses there is little time to prepare for transitioning from a daily rate system to one that is just in development stages.

Other concerns include: (1.) trainings have only recently begun (1/20/21); (2.) As we have attempted to project a revenue forecast for our agency, we have had challenges getting answers clarified. We have been told that no one in our State is an expert in 1915(i) billing. Example: in the 1915(i) presentation brought to you by Pamela Sagness on page 12 (Exhibit B) there is an example of how the 1915(i) can reimburse a community provider. While it appears very encouraging, when looking through the information provided it contradicts what we were told in the 1915(i) training of 1/20/21. In this case it states the provider could bill 1915(i) for $763,774 for Care Coordination, as well as three other areas, including Supported Employment. The training indicated a provider cannot provide both Care Coordination and the other services. If this is in fact true, the reimbursement would be closer to $500,000 than $1,237,616. In the case of Supported Employment in the amount of $52,366, I understand there is a requirement for the provider to be accredited. The cost for accreditation could greatly reduce this revenue stream.

Prairie Harvest Mental Health has no billing system in place as we have been operating in pass-through funding within the Northeast Human Service Center billing system.

We are asking that the $1,414,800 be restored for the 2021-2023 biennium so we can assure services are not interrupted.

Prairie Harvest Mental Health has a stable supportive Board of Directors and staff. We advocate for individuals living in the least restrictive housing of their choice.

Following are letters of support from family members, consumers, and professionals.

In closing, I am not only the Chief Executive Officer of Prairie Harvest Mental Health, I am also a daughter, sister and mom to people with behavioral health concerns. My late Mom struggled her entire life with schizoaffective disorder and chronic anxiety. Because services such as those provided by Prairie Harvest Mental Health were not available to help, my Mom lived in a nursing home for 12 years beginning when she was 69 years old. I am asking you to help us remain a source of support for those who have long been underserved or overlooked.

Thank you.
Respectfully,
Debra Johnson

Revised 1/15/2021

Example 1: Community Behavioral Health Provider

NOW

- $1,000,000 **general** fund/biennium
- 60 individuals served at any one time/biennium
  - 50% qualify for Medicaid
  - 25% qualify for 1915i (15)
- Individuals receive support services 24/7

FUTURE

- 15 individuals (qualify for 1915i) - Provider reimbursed for person-centered services based on individuals need

EXAMPLE→

- *An individual receives 2 hours of Care Coordination/3 days a week/biennium = $50,918.40*
  - *For 15 individuals = **$763,776***
- *An individual receives Peer Support 4 hours/week/biennium = $12,280.32*
  - *For 13 individuals = **$159,644.16***
- *An individual receives Supported Housing 1 hour/day/5 days a week = $21,819.20*
  - *For 12 individuals = **$261,830.40***
- *An individual receives Supported Employment 3 hours/week/biennium = $13,091.52*
  - *For 4 individuals = **$52,366.08***
- *Total amount billed to the provider = **$1,237,616.64***
  - *$618,808.32 general funds/biennium for the 15 individuals serviced*

In current budget most providers continue to receive 50% of the original amount - $500,000

Debra Johnson, CEO
Prairie Harvest Mental Health
930 North Third Street
Grand Forks, ND 58203-2408

Dear Deb:

As I understand it, the proposed DHS budget for the 21-23 biennium includes a cut of $1,414,800 to your contract. While it is suggested that this amount can be recouped from Medicaid through the 1915(i), this is really an unknown as the 1915(i) is not yet being implemented in ND. I'm further concerned that this means it is expected that individuals you serve must be on Medicaid and additionally eligible for services through the 1915(i); that individuals not on Medicaid and otherwise eligible for the 1915(i) will not be able to access services through you without another funding source.

Your organization is essential to the types of Home and Community-Based Services (HCBS) needed in ND, including the provision of permanent supportive housing and recovery-based services. Without these services, individuals will be at a greater risk for institutionalization.

Please consider this is a letter of support for Prairie Harvest Mental Health. State funding for Prairie Harvest Mental Health should not be cut. ND is trying to expand HCBS to try to meet the needs of individuals with behavioral health issues... not cut them.

Sincerely,

Teresa Larsen

January 12, 2021

To Whom It May Concern,

I am writing to express my support for Prairie Harvest Mental Health and the positive impact it has on my brother and my family. My brother has been a client and resident of PHMH for 4 1/2 years and in this time has he greatly improved his mental and physical health.

For 43 years he had lived with our mother in Minot, ND. With age and illness, she became unable to care for him. I took guardianship of him and moved him to Grand Forks in 2016. He moved into Siewert Plains, a group home operated by PHMH that has 24-hour staff. As with the majority of people with mental health illnesses, counseling and the adjustment of medication is an ongoing process. The staff at SP are able to monitor and address any changes that they see in his behavior before it becomes a larger issue. It is a great feeling knowing that he is under such great care in a positive, healthy environment and that he has someone there for him at all times.

PHMH has also provided a social outlet for my brother that he never had before. He enjoys his groups and social activities, such as cooking, games, exercise, and other activities. He has developed social interaction skills that he has never had. All of this has had an amazing impact on the mental health of my brother.

Prairie Harvest has been the perfect fit for my brother and I can't imagine what we would do without the support and care that they provide. My brother is as mentally healthy as he has ever been and has grown so much from the support that PHMH provides.

Sincerely,

Les Moore

Re: Support for Harvest Home in Grand Forks, North Dakota

Date: January 13, 2021

Our family offers our heartfelt support for and thanks to the staff and administrators of Harvest Home in Grand Forks North Dakota where Gene Pelton , our brother and son, has been a client/resident for 15+ years. Without the safety and compassion shown to him, Gene would have been a street person many years ago and may not have survived.

Gene, diagnosed as having paranoid schizophrenia ,relies on medication to stabilize his medical condition; and the staff has monitored his medication which Gene proved not be able to do on his own. This truly has saved his life.

We are impressed that Gene has been taught to take responsibility for his own apartment keeping it clean and orderly. The staff provides support for off-campus needs such as transporting him to medical appointments, grocery shopping and occasional recreational activities.

This safe environment offers companionship when it is desired while providing the privacy dictated by his illness. Gene loves living at Harvest Homes and says often, " This is my home." He enjoys visit with us but is always ready to "get back to my home" .

Our family is so grateful that the state of North Dakota has developed and funded this forward thinking place for adults with mental illness. The caring staff provides a perfect balance of providing support and encouraging appropriate independence. Please continue the fund this life saving concept, safe and facility.

Respectively submitted,

Guardians: Dawn Pelton Malene
Ray Pelton

Sara Vogel's' story:

Hi, my name is Sara Vogel and I live at Siewert Plains. I have been here for over 5 years. Prairie Harvest has helped me to reach my goals and become a better person. I have more confidence in myself then I did before I came here. My mental illness was horrible. Before I came here, I was using drugs, alcohol, hanging out with the wrong people. I was also manic. My symptoms got worse and I could not cope with the stress of my life. It got better for me when I got into Prairie Harvest and got on the right medicine, started attending groups, learned how to cope with stress and how to socialize. I have made a lot of friends through Prairie Harvest. Now that I feel better and able to cope with stress, I am looking for a job with my job coach and would like to get my own place. I would like to thank the staff and nurse at Prairie Harvest for everything that they have done for me.

1/13/21

David Hird
675 N 43RD ST #103
Grand Forks, ND 58203

To Whom it may concern:

PHMH means care for mental illness. My vital medication is given to me and for me.

PHMH means staff support and peer support for me. Staff are both friendly and professional. I make connections with peers.

PHMH means security for me. I live in a safe place in and environment that is far better than anywhere else I formerly lived.

PHMK means that my daily needs are taken care of. My mother always asked what I had on the meal plan and she marvels at the variety of the things I eat.

PHMH means improvement in many types of living needs. The groups contribute to many facets of my life. From hypothermia to core-values I get patient education.

Sincerely,
Shavid Hird

I like having Prairie Harvest to lead me during difficult times. I like having hellos and they always find a way to make you feel at home. I like it here at the Lodge and the support it shows me. Prairie Harvest is always involved and helpful.

Thank you,
Danny O.

Kelly – **wishes to remain anonymous**

I just got out of jail. I was in for mental health related reasons. Next, I went to the state hospital in Jamestown, ND. I was there for 8 months and was basically homeless and mentally distraught. Deeply distraught. I was afraid and homeless. My psychologist promised he would let me stay at the hospital until I was safe. The people I worked with at the hospital had never heard of PHMH in Grand Forks, and so, I was the first patient to get a tour of Prairie Harvest facilities.

There was a work sight permanent housing opportunity and programs to help with medication, help getting into school, and hundreds of other clients in my same position, mentally. I liked it. I met with Prairie Harvest staff and they invited me to be a client. I ended up in the Lodge Program, which is permanent housing for clients where we govern most of our own lifestyle without too much interference from staff.

Since I've been with Prairie Harvest, I've gone to college and worked steady for the entire time I've been here. I'm on my medication everyday and feeling much healthier. I made a ton of friends. I quit smoking, drinking, and using drugs for almost 16 years. I've been honored with being made Prairie Harvest client of the year as well as CCL Lodge Member of the Year, which is an award given to one person in the entire Lodge Program nation wide.

My family is so relieved that I'm getting the help from Prairie Harvest staff. They have a person to help me in any cat3egory of help I may need. I'll probably stay a client for the rest of my life. I pray that other with mental health problems are as lucky as I've been to find a place like this.

Mission Statement

We promote independence and an enhanced quality of life for adults with serious mental illness.

PRAIRIE HARVEST
MENTAL HEALTH

Vision

Prairie Harvest Mental Health envisions people with serious mental illness living free from stigma and fully integrated into our community.

Values

Service: Serving people with serious mental illness is our highest value.

Dignity: We treat everyone we serve and each other with courtesy, compassion and respect.

Recovery: We focus on individuals maximizing their fullest potential.

Competence: We strive for excellence and effectiveness in all that we do.

Education: We educate ourselves and the community which decreases stigma and enhances community awareness.

Health: We believe there is no health without mental health.

Parity: We believe that health insurance plans should cover mental health at levels that are equal to any other medical benefits.

Prairie Harvest Mental Health

Who are We?

- A private non-profit organization classified as a 501 (C)(3) by the Internal Revenue Service;
- Concerned citizens serving on a volunteer board of directors;
- Community volunteers;
- Advocates, family and friends of clients;
- Clients;
- Paid Staff

What Do We Do?

Prairie Harvest Mental Health provides community and facility based services to vulnerable adults. Quality of life is greatly enhanced through improved living environment, access to services and programs and the opportunity for employment.

What Are Our Goals?

- To help improve the quality of life for clients;
- To expand housing choices;
- To increase employment opportunities;
- To incorporate peer-support in agency programming;
- To educate the public to a better understanding and acceptance of mental illness and other forms of human needs;
- To reduce stigma for individuals with serious mental illness;
- To encourage community involvement and support for community based programs;
- To develop financial resources to enhance and expand Prairie Harvest Mental Health and its activities;
- To expand delivery to rural communities.

Prairie Harvest Mental Health Programs For Adults with Serious Mental Illness

Community Based Services:

- Supported Residential Program
- Extended Services Program
- Representative Payee
- Life Skills
- Job Development

Facility Based Services:

- Harvest Homes - 12 apartment complex
- Prairie Lodge - Peer-supported 6 bedroom house
- Harvest Lodge - Peer-supported 6 bedroom house.
- Siewert Plains - 8 bedroom 24-hour support house
- Stern Place - 9 apartment complex
- Singe Family Dwelling

One out of five families is affected with mental illness.

Community Based Services

Supported Residential

Daily Living Activities

Under the guidance of Direct Care Workers, clients learn skills that lead to independent living which include:

- Housekeeping
- Laundry
- Hygiene
- Grooming
- Grocery Shopping
- Meal Planning
- Nutrition
- Budgeting

Housing and Subsidies

Direct Care Workers provide assistance to clients in locating independent housing and applying for: Supplemental Security Income, Social Security Disability Income, Medical Assistance, Food Stamps and Fuel Assistance.

In addition, clients are assisted through subsidizing their rental and security deposits until housing assistance is received. Subsidies are also available for utility deposits and grocery allotments to get them on their feet. Through our Home Place Thrift Store, clients receive basic household items to furnish their apartments.

Financial Management: Representative Payee

Upon approval from the Social Security Administration, Prairie Harvest Mental Health provides Representative Payee services to individuals who are unable to manage his or her Social Security benefits. Prairie Harvest Mental Health helps ensure benefits are first used for the basic needs of the individual, providing the beneficiary with a more stable living environment.

Supported Residential - continued

Loan Fund

Clients are eligible to obtain interest free loans to obtain items such as medications, furniture, telephones, DVD players and televisions. Clients make regular payments based on their incomes.

Medication Management

We offer two medication monitoring programs:

1. Under the self administered medication program, a Prairie Harvest Mental Health nurse is available on a weekly basis, or as needed, to review, update and educate clients about medications and medical issues or questions.
2. For those needing closer supervision, a Prairie Harvest Mental Health nurse oversees certified Medication Monitors who go into the client's home up to two times a day to observe that medications are taken correctly and in compliance.

3. Medical Guidance

Prairie Harvest Mental Health nurse assists clients with any medical concerns they have;

- Notifies the appropriate medical staff;
- Schedules appointments;
- Arranges for annual physical, dental and vision exams;
- Compiles medical histories for clients;
- Maintains emergency data forms.

Socialization Activities

Socialization is encouraged through a variety of activities designed for our clients. Coordination and transportation are provided for clients.

- Birthday Club
- Recreational Activities
- Y Family Center - reduced rates
- Peace of Mind

Extended Services

Why is Extended Services Needed?

Extended Services is based on the premise that work should be accessible to everyone, regardless of disability. It offers a vocational solution for many individuals who were, in the past, considered unemployable. Extended Services is a concept that allows all persons with disabilities to work in the community and to ensure that the employer and the employee receive the assistance and support necessary for this to happen.

How Does Extended Services Work?

Extended Services match competent workers with available jobs in the community. Services include a careful matching of worker abilities and interests with specific job requirements. Specialized training is provided to the new employee at the job site by an Employment Training Specialist and follow-up services are available for as long as the worker is employed.

Who Will Benefit From Extended Services?

Employers:

- Will gain a conscientious, punctual, competent worker, receive free screening and training of supported employment workers, receive an opportunity for tax incentives, and reach equal opportunity affirmative action goals and positive public image.

Employees:

- Will gain increased self-esteem and a sense of fulfillment, structure to their daily lives, greater financial security, and have increased involvement in the community.

Who Will Benefit From Extended Services?

Our Community:

- Will have tax dollars redirected to independence and productivity., enhance rights and roles of all people, and expand the number of people looking for entry level positions.

What Does Extended Services Involve?

Job Placement – Qualified individuals are assisted in locating available jobs in the community. Many factors are considered when an individual is matched to a position such as: job duties, job locations and work hours, transportation available to the worker, worker's skills and interests, employer expectations.

Job Training – There is no cost to the company. If needed an Employment Training Specialist provides the new employee with one-on-one training and support at the job site. This on-site assistance is reduced as the employee becomes proficient in completing the job to company standards.

Ongoing Support – The employee's work performance is monitored by the Employment Training Specialist for as long as the individual is employed. Additional training or support, if needed, will be provided at any time.

Life Skills

What is Life Skills?

Life Skills promotes a well-balanced and healthy lifestyle to clients who would be homeless without services by:

- Teaching individuals how to care for their immediate needs,
- Preparing individuals to care for themselves on a long-term basis,
- Encouraging individuals to remain active through participation in various activities and hobbies, and
- Educating individuals, as well as the community, about mental illness.

How Does The Life Skills Program Work?

Prairie Harvest Mental Health clients are referred to the Life Skills Coordinator for Life Skills. Once individuals are referred, the Coordinator determines what assessments need to take place. Based upon those assessments, the Coordinator plans a program with the help of the client. For example, the client and Coordinator might conclude that they need to work on their laundry skills as well as developing a hobby. That client's program would focus on those needs.

Life Skills

Household Chores	Meal Planning	Meal Preparation
Grocery Shopping	Hygiene	Transportation Training
Budgeting	Laundry	Emergency Preparedness
Organization	Scheduling	Social Skills
Safety Training	Health Training	Medication Training
Hobbies	Recreation	Socialization Activities

Skill Groups

Leisure Club	Health & Wellness Group	Exercise Group
Walking Group	Road to Healthy Living Group	

Wellness Club

With health and wellness the primary focus, clients participate by earning points for healthy choices. Points are redeemed at the 'Wellness Store' for merchandise.

Job Development

What is Job Development?

Job Development provides a range of services to the community and clients who, without services would become homeless. This range of service includes: service coordination, client assessment, service monitoring and employment education to clients, businesses and the general public.

The Job Developer will work on expanding job opportunities in the community as well as providing participants with skill building activities so they can return to work. The Job Developer helps work on changing society attitudes about hiring people with disabilities as well as to work with participants in changing their perceptions about working. Social benefits that go along with work are: a reason to get up in the morning, respect from co-workers, improved self-esteem, to name a few. The Job Developer helps educate the community business leaders and citizens about the potential people with mental illness have in working in competitive jobs.

The Job Developer:

1. Provides an assessment of each client in the following areas: need to work, interest in working, ability to work and type of work that the client is interested in doing.
2. Establishes relationships with community employers.
3. Provides direction and assistance to participants in obtaining jobs with livable wages and benefits.
4. Helps to identify, secure and supervise potential work contracts for work teams.
5. Works to create better paying jobs with the opportunity for advancement for participants.
6. Conducts individual and group training sessions on various work related skills such as: Job Searching Skills, Interviewing, Resume Writing, Co-worker Relationships, Appropriate Hygiene and Clothing for Work, Accepting Change in Schedules, SSI and SSDI Benefits.

Employment Groups

- Pathways to Wellness
- Lodge Job Club

Facility Based Services

Harvest Homes

This 24-hour staffed facility is an important addition to the continuum of care for individuals with mental illness. It bridges the gap between living independently in one's own apartment and group home living.

Harvest Homes consists of twelve one bedroom apartments, where one is an accessible dwelling unit.

Facility includes a common area kitchen and recreation room, where meals and socialization can be shared by residents.

Supportive services are provided through the partnership with Prairie Harvest Mental Health and Northeast Human Service Center. Referrals to the facility are through the case management system at Northeast Human Service Center. The services provided are designed to enhance and maintain the individual's level of independence, while improving their quality of life.

These services include:

- Case Management
- Crisis Management
- Nursing
- Medication Monitoring
- Daily Living Activities
- Socialization Opportunities
- Community Involvement
- Employment Groups
- Skill Groups

Opened in1997

Lodge

What is a LODGE?

A Lodge is an affordable dwelling for 6 people who share in running the home, including domestic chores and the purchase and preparation of food. The residents make their own house rules and manage their own activities. In addition, they are employed at a business run by their sponsoring agency, in this case, Prairie Harvest Mental Health. The work is part-time or full-time and organized so that one member can readily substitute for another whenever necessary.

The Lodge program at Prairie Harvest Mental Health is designed to follow the Fairweather Lodge Model. This is a national model developed by Dr. George Fairweather for adults with persistent mental illness. This model is currently implemented in 10 states, including North Dakota. The primary philosophy driving this model is that people that live together and work together can more easily recover and find stability for the long term.

What is a Prairie Harvest Mental Health Lodge like?

Prairie Harvest Mental Health supervises two Lodges in Grand Forks: Prairie Lodge and Harvest Lodge. Each Lodge has the capacity to accommodate 6 individuals in private bedrooms. The Lodge resembles a healthy family, with each member contributing to the maintenance and care of the house and of each other. Staff presences at the Lodge is very minimal. Their role is mainly to mentor, advise, mediate and help out in emergencies.

Prairie Lodge

Opened in 2000

Lodge - continued

How do I refer someone to the Prairie Harvest Mental Health Lodge Program?

Prairie Harvest Mental Health currently contracts with Northeast Human Service Center, located in Grand Forks, North Dakota. All referrals must come through Northeast Human Service Center. For more information on **Northeast Human Service Center,** call **701-795-3000.**

Groups:

- Job Club
- Exercise Group
- Other Groups as needed

Harvest Lodge

Opened In 2001

Siewert Plains

An 8-bed permanent living facility for adults with serious mental illness, Siewert Plains opened in May of 2008. In an effort to bridge the gap between transitional and permanent living, Siewert Plains offers 24-hour support along with educational groups and trainings to augment Prairie Harvest Mental Health's supportive services.

These services include:

- Case Management
- Crisis Management
- Nursing
- Medication Monitoring
- Daily Living Activities
- Socialization Opportunities
- Community Involvement
- Employment Groups
- Skill Groups

Opened in 2008

Stern Place Apartments

Stern Place has been made available through an Economic Stimulus grant through our local Grand Forks Urban Development. Stern Place augments the Grand Forks communities permanent supportive housing with the addition of 9 self-contained apartments. This complex opened March 2012

Supportive services are available on a limited basis. A nurse assures all tenants receive medications in the mornings. Additional staff work four hour shifts from 4:30—7:30 PM. Monday through Friday. Medication monitors ensure medications are taken twice daily over the weekends. Case Management is provided through Northeast Human Service Center. Limited staff support provided through Prairie Harvest Mental Health, includes Life Skills, Job Development and Case Assistance.

Stern Place is suited for independent individuals. With limited support services and staff presence, tenants need to be capable of supporting themselves. Expectations include: independence with self-care, housekeeping, cooking and laundry.

Opened in 2012

Single Family Dwelling

This residence houses one to two people, providing another choice for individuals with serious mental illness who prefer independent community living. All supportive services are available to tenants in this home.

Purchased in 1999

Work Opportunities

Prairie Harvest Mental Health believes that everyone deserves the opportunity to work in competitive employment and to be paid fair wages. Prairie Harvest Mental Health and the Home Place Corporation have various positions for people with disabilities.

Home Place Thrift Store

Clerking, sorting and custodial positions in a retail setting provide opportunities for learning the skills necessary for similar positions in the community.

Community Support

Prairie Harvest Mental Health provides one-on-one support to individuals with serious mental illness to help them succeed in the competitive employment field. Services are individualized and focus on the skills areas needed to strengthen work related activities.

Rag Contract

Prairie Harvest Mental Health cuts clothing into rags to sell to community and state agencies. State agencies can now order goods and services directly from work activity centers. The rags are cotton or cotton blend. We get out of style, stained, or overstock clothing from the Home Place Thrift Store to cut into rags. The rags are sold in 50 pound lots or as requested by customer.

Cleaning Contract

Prairie Harvest Mental Health provides cleaning services at Augustana Lutheran Church.

The Home Place Thrift Store

The Home Place Thrift Store is a division of Prairie Harvest Mental Health, a business in the Grand Forks community. The Home Place Thrift Store exists to provide customers with affordable goods and clothing and to provide resources to Prairie Harvest Mental Health.

The Home Place Thrift Store provides a great shopping experience for any member of the family.

You will find something for everyone at the "Home Place", located at **1811 S. Washington in the Town & Country Mall**. Clothing, furniture, household items and a variety of miscellaneous items make shopping fun at the Home Place. New or like new items at low prices. Affordable shopping for everyone.

Donations are always appreciated. All donations are tax deductible, stay in the community and benefit individuals in the Grand Forks community. The Home Place Thrift Store picks up donations of clothes, furniture, working appliances, computer equipment less than 3 years old, books, household items, etc. at no cost. Also accept ripped, stained or torn cotton/cotton blend clothing for the Prairie Harvest Mental Health work program.

Due to the COVID-19 pandemic, all donations are accepted during business hours. Place your boxed or bagged donations in the back of The Home Place truck parked in front of the store. Accepting furniture donations, please call 701-795-9143 to schedule time to drop off donation.

The Home Place is in need of volunteers to work in the thrift store. Volunteering provides an excellent opportunity to give back to the Grand Forks community. Any time you can give is appreciated.

Thrift Store Hours

Monday - Friday: 10:00 AM—6:00 PM

Saturday: 10:00 AM - 5:00 PM

Sunday: Closed

Board of Directors

Nicole Amsbaugh, MPAS, PA-C - Grand Forks, ND

Client Advisory Board

The Client Advisory Board is a client run entity with a Prairie Harvest Mental Health staff coordinator that reports directly to the Prairie Harvest Mental Health Board of Directors about the needs and wishes of the clients. It will be a way for the voice of the client to be heard as well as a way to better involve Prairie Harvest Mental Health clients in the workings and activities of Prairie Harvest Mental Health. The Client Advisory Board representatives will consist of 1 representative from Harvest Homes, 1 representative from Stern Place, 1 representative from Siewert Plains, 2 representatives from Supported Residential, 1 representative from Prairie Lodge and 1 representative from Harvest Lodge. Meetings will be held on the last Tuesday of the month.

Updated 7/1/2020

United Way

Testimony #2714
House Bill 1012
House Appropriations Human Resources Division
Rep. Jon Nelson, Chairman
January 25, 2021

Chairman Nelson, members of the House Appropriations Human Resources Division, I am Heather Simonich, Operations Director of Nexus-PATH. Nexus-PATH is a member of Nexus Family Healing, providing child welfare and behavioral health services from nine office locations in North Dakota. I am here today to provide input on HB1012, more specifically the Behavioral Health Division budget, relating to implementation of 1915(i) services.

Your committee is familiar with the Department's work in securing legislative and federal CMS approval to develop a 1915(i) state plan amendment. We fully support the Department's vision and believe the 1915(i) state plan provides opportunity to offer robust community-based services and supports previously unavailable in North Dakota.

Much progress has been made and yet many challenges remain. Timing is critical as our children and families need us now more than ever. You heard from Superintendent Baesler on Friday morning regarding the growing behavioral health needs of our students – the "multipliers" as she put it. You are also aware of the Department's goal and strategic efforts to avoid placing children in foster care or congregate care settings whenever possible. To achieve this goal, it is critical that we build and improve access to intensive family services in our ND communities.

We understand that there is significant federal rule that makes rolling 1915(i) services out in a rural state with a limited workforce very challenging. Today, I would like to speak briefly to concerns about the current eligibility requirement in the area of functional capacity.

- **A WHODAS score of 50 indicates an individual ranks in the 95th percentile of functional impairment. This is a level of functioning**

comparable to those that are home-bound, have significant physical limitations, or reside in institutional care settings.

- **The WHODAS was developed to assess functional impairment in adults and although it is a reliable and well-validated measure for use with adults – it was not designed for children. We have concerns regarding the application of this tool and its scoring algorithm to children. A score of 50 is simply too restrictive and will severely limit access to these essential 1915(i) services.**
- **We currently use the WHODAS to determine eligibility for our school case management services because a score of 25 is required for eligibility under the ND SED-TCM state plan. To date, we have not had a child score near 50 yet these are students that our schools have identified as having the highest needs and would certainly benefit from 1915(i) services. Many of them have experienced significant trauma, are on the verge of out of home placement, and require substantial one-on-one supports in school to function.**

We understand the Department will work with CMS to make amendments to the eligibility criteria if needed and we urge them to begin conversations now or in the very near future. We have shared our data with both Medical Services and Behavioral Health Division staff. Without careful reconsideration of this eligibility requirement and more assurance of eligible children, providers will struggle to establish these critical services – especially in our rural communities.

In closing, I can't help but return to Superintendent Baesler's words, "We cannot do this alone". I know our schools are depending on providers like Nexus-PATH to be part of the solution here. To meet our ND families where they are at – to provide person-centered services in ways they have never been delivered before. It will take all of us working in tandem and, together, I believe we can bend the curve. We are proud to live in a state chasing bold behavioral health and child welfare goals – goals aimed to reduce congregate and foster care placement, invest in families and early childhood, and build robust community services that span the entire

behavioral health continuum. These are goals that we all agree are in the best interest of children and families and will ultimately build a better North Dakota. The collaborative leadership demonstrated at the state level is applauded and has set an effective tone for leadership amongst providers, Human Service Zones, and local school districts.

Thank you for the opportunity to testify before your committee today. I am happy to answer any questions you may have.

Testimony #2604
House Bill 1012 (DHS Appropriation)
House Appropriations- Human Resources Division
Representative Nelson, Chairman
January 25, 2021

Chairman Nelson, Members of the House Appropriations Committee, I am Stacey Hunt, Licensed Clinical Psychologist in the state of North Dakota and Chief Executive Officer of St. Thomas Counseling Center, PLLC, in Jamestown. I am here today to provide information on House Bill 1012.

House Bill 1012 is a bill for an Act providing an appropriation for defraying the expenses of the Department of Human Services. This bill provides funds for the ND Behavioral Health Division's Substance Use Disorder Voucher program. I am here today in support of the SUD Voucher program.

St. Thomas Counseling Center, PLLC, is a mental health and addiction counseling center in Jamestown. We employ a Licensed Addiction Counselor and are licensed by the ND Department of Human Services Behavioral Health Division for Adult Level 2.1 (Intensive Outpatient Program) and Level 1 (Individual and Aftercare) treatment services. We accept commercial insurances and are approved providers for the Behavioral Health Division SUD Voucher program, which provides a funding source for substance use disorder treatment for people who do not have insurance and cannot afford treatment. Potential clients are generally referred to us from Parole and Probation, district court, local clinics, or from South Central Human Service Center.

The Behavioral Health Division SUD Voucher program was created to allow less chronic substance users seeking treatment to access services

at a community provider so the human service centers could focus on serving the high-risk, chronically addicted population. During the current biennium, St. Thomas Counseling Center has treated 101 clients who used the SUD Voucher to pay for services. These clients did not have private insurance and could not qualify for ND Medicaid or Sanford Expansion insurances. Without the SUD Voucher program to pay for services, these clients would have had to go to the Human Service Centers to receive services; thus taking resources away from the chronic, core population the HSCs are intended to serve. Unfortunately, the appropriations for the SUD Voucher were exhausted as of June 30, 2020, and we had to start turning clients away. These last six months have been difficult for not only our business, but also for potential clients who may have lost their jobs because of COVID related reasons, or are realizing that their use of substances during COVID quarantines is problematic and want to seek treatment. Because the SUD Voucher is exhausted, these ND citizens have to attempt to find treatment at the Human Service Centers.

The people we see at St. Thomas Counseling Center are typically individuals whose use of drugs or alcohol has caused some significant concern in their life, but can usually get back on track after addressing their addiction issues. For instance, a DUI may cause the person to lose their job, and with it their health insurance. They are ordered by the court to have a chemical dependency evaluation, but cannot pay the out of pocket fee. Without their evaluation, they cannot regain their license, cannot regain their job, and likely will continue a cycle of using drugs or alcohol to cope with stress. However, if the person can access the Behavioral Health Division SUD Voucher funding for their evaluation and any subsequent services needed; the person can complete their court

requirements, regain their driver's license, find a job, and change the trajectory of their life.

Additionally, the SUD Voucher provides transportation assistance, so citizens who live in rural areas can access services. Approximately 60% of our Voucher clients live in Jamestown, leaving 40% who travel from other towns in South Central ND, including Valley City, Oakes, LaMoure, Napoleon, Carrington, Cooperstown, and Edgeley. There are no substance use treatment providers in those areas, which means without the Voucher's transportation assistance, approximately 45 clients would not have been able to access services with us this biennium.

Funding for the SUD Voucher is included in the Behavioral Health Division budget appropriation. Testimony from the BHD indicates that Voucher funding will be exhausted prior to the end of the biennium. I feel that this program is a needed and valuable resource to the citizens of North Dakota and now advocate for the funding to not only be continued, but to be increased for the 2021-2023 biennium, so we can continue to provide a continuum of SUD treatment options among private and public providers.

Thank you for allowing me to speak on this issue. This concludes my testimony and I would be happy to answer any questions you may have.

#2311

January 3, 2021

To Whom it May Concern,

It has come to my attention that funding cuts are having a drastically amount of the needed funding being considered for the ND Brain Injury Network.

I have had the impacts of several different types of head injuries in my 70 years. In the beginning of my injuries at the age of 15 or 16 it has been a psychological nightmare to live with. The struggles I had growing through the different injuries and not having any type of help for healing and recovering. There are still struggles I live with daily, for instance trying to write this letter so that you can understand or realize how greatly this funding is needed to be able to continue its guiding me with resources that are not available. Especially in this rural western part of the state, on our reservations and to reach other people who have no knowledge of what life has been or is like for me or others who live with this.

I am telling you about how their programs help support me. I am one of North Dakota's American Indians who uses their online support groups, and the webinars of their education for people who have experienced, lived through and struggle living with these very difficult traumatic brain injuries(concussions) that people, doctors, hospitals, educators, legal systems, schools and a whole list of other offices, programs that haven't any knowledge of how to help us. I have been a part of this Brain Injury Network since it has begun. Since Rebecca Quinn has been in the office I have seen this program expand enormously and hoping for it to continue for me and it's reaching onto the reservations and other American Indians that live off the reservations, including the educating of all the legal and legislative systems.

I am asking for your consideration of the greatly needed funding of this Brain Injury Network.

Sincerely,

Skipp Miller

Still alive and functional

1.14.2021

North Dakota Legislators,

My name is Carma Hanson and I am the Coordinator of Safe Kids Grand Forks, an injury prevention coalition based out of Altru Health System in Grand Forks. Our mission is to reduce the number of unintentional injuries and deaths to children under age 19 – their leading cause of death. Safe Kids Grand Forks has a coverage area that includes northeast North Dakota and northwest Minnesota and through our efforts, we partner with many agencies that conduct like-type work. Together, we have over 250 parents and colleagues that assist in our work to keep kids safe at home, at school, at play and on the way.

The North Dakota Brain Injury Network (NDBIN) is one of our partner agencies and together, we collaborate on many projects related to brain injuries. As you can imagine, brain injuries in children can occur in a number of ways, including preventable injuries such as sports concussions, falls from playground equipment or bike and car crashes. Our work as Safe Kids Grand Forks is to prevent those injuries from happening and we share that mission with the NDBIN. Once an injury has occurred, they then take over with the wonderful work that they do to assist clients with services, provide support for living with a brain injury, assist with support for the caregivers of those with brain injuries and connect the client with support and resources to help them in their recovery process.

The work that this group does is outstanding and I would encourage you to reconsider the funding allocation that has been presented in the DHS Funding Bill 1012. This proposal suggests a 50% reduction in funding for the NDBIN. While we are in a time when all funding needs to be carefully considered, I would caution that this drastic cut could have significant impacts on those suffering from brain injuries. This type of injury is complicated and careful intervention and rehabilitation is critical to those inflicted with this type of trauma. Safe Kids Grand Forks and our team have benefited greatly from the work of the NDBIN as they educate providers on concussion and brain injury management and help set protocols for coaches, teachers, athletic trainers and others involved with kids with TBI's. They also provide direct services to clients across the state as they navigate the very complicated world of living with a brain injury.

Rebecca Quinn, the Program Director for the NDBIN can speak eloquently about the services that are provided from kids – adults in their program. She has established a network of care and resources across the state that assists people of all ages, injury severities and income levels. The impact of a financial cut to the extent suggested would significantly impact their programming abilities and I would challenge you to reconsider that proposal.

I thank you for your time to read this letter of support for the North Dakota Brain Injury Network. Please do not hesitate to reach out to me should you have further questions that I can address.

Sincerely,

Carma Hanson

Carma Hanson, MS, RN

Coordinator – Safe Kids Grand Forks

It is great to have such a wealth of resources and your work in coordinating all of it is much appreciated!

Amy Brossart-Robinson, M.S., CCC-SLP
Clinical Assistant Professor
Department of Communication Sciences & Disorders
University of North Dakota (UND)

Thank you! I also wanted to thank you for all the work you are doing across our state for those with brain injury and providers. Really helpful and impressive, thanks so much!!~ It has been crazy. We are still seeing everyone by telemedicine, which has proven quite effective. Also great to be able to address initiation, planning and really all areas of cognitive and executive functioning in patients natural environments. Anyway, we are fortunate to be able to carry one, even in this bizarre times. Have a happy and healthy Holiday!! Thanks,

Janet Grove, MS CCC-SLP, CBIS
Licensed Speech-Language Pathologist
Certified Brain Injury Specialist
Progressive Therapy Associates

During these trying COVID times of stress and negativity, the Pollyanna in me wants to spread cheer!

Thank you for all that you do to elevate the lives of those with BI. Each time I am on calls with you I am SO impressed. You show genuine compassion, insight and kindness to those you talk to. I have wondered if people treat me kindly because I'm "brain damaged", but I truly believe that you treat everyone kind because that is who you are.

Thank you,

Sandi

I continue to see how active NDBIN is in this crazy time. I keep hoping that hospital admissions will slow down but like the entire State of ND hospitals, we are overrun. I was still working last night and already know today will be no different. You continue to have great topics and meetings. I just have not been able to attend. Just wanted you to know it is not due to lack of interest or support.

Marie Brekken, PA-C
Physical Medicine & Rehabilitation
Sanford Health Fargo

67th Legislative Session #2312

House Appropriations-Human Resources Division

Chairman Nelson and other members of the Committee. I am Rebecca Quinn and serve as program director at the Center for Rural Health at the University of North Dakota School of Medicine and Health Sciences. The Center for Rural Health is contracted by the Department of Human Services to operate the North Dakota Brain Injury Network. My testimony today is on behalf of all the individuals and families impacted by brain injury in North Dakota.

A 2016 North Dakota Brain Injury Needs Assessment found that for people with brain injury in North Dakota, services and supports for the condition are **few, are disparate, and are disjointed.** Among the primary needs identified were a **lack of awareness, lack of training, and a lack of coordination across existing services.** The North Dakota Brain Injury Network meets these needs by providing a centralized, statewide source of information regarding brain injury and delivers resource facilitation services to individuals with brain injury. Resource facilitation for brain injury is an evidenced based service that assists individuals along the path of recovery and increasing independence. This vital service has been adopted by over 40 states and is seen as a core for state brain injury service development by the Federal TBI grant program. In order to continue to serve as the central source of information and support for brain injury in the state I ask that you please restore the funding for NDBIN.

I know there has been a lot of discussion about the future possibility of 1915i and how services can be shifted to be provided under these programs. I would like to address some concerns regarding how this would impact the services for individuals with brain injury.

First, is concerns over the **diagnosis eligibility 1915i.** In order to access the 1915i an individual must have a Diagnostic and Statistical Manual diagnosis of Neurocognitive Disorder Due to Traumatic Brain Injury. This is a psychological diagnosis, not a medical diagnosis and many individuals with brain injury do not currently receive this correct diagnosis and it is exclusive of non-traumatic injuries. This was something raised during the comment period for 1915i and DHS went above and beyond to try to find an easier solution. We were unable to find one and instead the discussion was that NDBIN could serve as a resource helping individuals understand the proper diagnosis needed and help with attaining it. A concern is that if NDBIN funding is reduced, no longer being able to serve in the role to assist with accessing 1915i for brain injury, this could mean less individuals able to receiving needed services.

A second concern is regarding the **financial eligibility** for 1915i. Majority of the individuals that NDBIN works with are not receiving Medicaid or Medicaid expansion, but are on private insurance or Medicare. For many of these individuals the very reason they utilize NDBIN is it is an opportunity to get support and understanding no matter their financial status. Many of these individuals are working, in school, lead active lives, but still need information, support, and navigation help that is not tied to Medicaid eligibility.

Third concern is regarding the **functional eligibility and service needs**. Depending on the age of the individual, financial eligibility, level of impairment, and functional need there are numerous different service options and combinations that can be tailored to meet an individual with brain injuries' needs. While 1915i may be a newly available service, it is not the only service available and, in many cases, may not be the best fit for an individual. NDBIN services to provide guidance and navigation to help access various service types, programs, services, treatments, and supports.

The final and ultimate concern is the **role of NDBIN**. Throughout the development of North Dakota's brain injury services, there has been identified the need for a centralized brain injury hub to provide information, support, and training. Over the last ten years this has been developed in NDBIN. Currently, NDBIN provides information and resource referral, informal supports, outreach, and training. All of these are indispensable services and none of them are billable under 1915i. In fact, a crucial component in 1915i being successful for individuals with brain injury is the existence of NDBIN. Training for direct care providers in understanding brain injury and how to effectively help provide the proper supports and available treatments will need to be an ongoing process. NDBIN will be able to serve to assist individuals navigate the application process and understand how to get the proper diagnosis and documentation of injury, we will be available to provide routine training for providers, but also able to provide case by case technical assistance and understanding of each individuals' unique options. And most importantly, NDBIN will continue to advocate for providers to serve individuals with brain injury. The complexity of the brain injury population means these individuals are often misunderstood, feel lost in the service system, and are often forgotten.

I am excited and hopeful about the potential 1915i holds for those with traumatic brain injury, but I am equally as excited and hopeful about the impact of the new residential habilitation services under HCBS, and the new options for tele-medicine therapy services under Medicaid. 1915i may be able meet the needs of one individual, another individual may have needs that cannot be met by it or they may not qualify. However, we would be remiss to think these services will meet the needs of individuals with brain injury without the ongoing training, guidance, and support of NDBIN.

Respectfully submitted

Rebecca Quinn
Center for Rural Health
University of North Dakota, School of Medicine and Health Sciences

NDBIN Activities July 2019-January 2021 #2312

- Resource Facilitation
  - Resource facilitation for brain injury is an evidenced based service that assists individuals along the path of recovery and increasing independence. This vital service has been adopted by over 40 states and is seen as a core for state brain injury service development by the Federal TBI grant program.
  - This biennium NDBIN has provided resource facilitation to a total of 266 individuals, received 92 new referrals, and had contacts with more than of 1,600 individual or family members
  - A few quotes from our satisfaction survey:
    - *Felt supported and understood.*
    - *Always prompt in answering questions and providing support and assist.*
    - *Keep on Keepin on with how you are doing your work! Thank you for all your support for those who need and are searching for others to help them in their daily lives.*
    - *I had no problem whenever I called Rebecca to ask a question. She always got back to me and either asked further questions to clarify or gave me answers to what I was seeking.*
    - *You do I & R services and help individuals get connected to a service. This is a great need.*

- Mind Matters Conference
  - Unfortunately, had to cancel in 2020, but plan to host a 2-day virtual event: March 25&26th
  - Past conference attendee quotes:
    - *I like having the information to share with clients that struggle with TBI*
    - *Love the Mind Matter conferences*
    - *We are fortunate to have such an important conference in ND.*
    - *Oh my-all speakers were amazing! Connecting with everyone and sharing what works-what does not.*
    - *Well organized-good job and thank you!*
    - *I thought the conference was great. I enjoyed all the speakers-nice variety and topics and good information.*

- Online Brain Injury Training
  - June of 2019 NDBIN launched 5 online training courses
  - Courses included:
    - Introduction to Brain Injury
    - Cognitive and Behavioral Consequences of TBI in Adults
    - Primary Care and TBI
    - Pediatric TBI
    - Substance Use and TBI
  - 1,287 individuals enrolled, 625 having completed, 412 evaluations

- Certified Brain Injury Specialist (CBIS) Training
    - Nationally recognized credential for professionals working in brain injury services. This certification is administered by the Brain Injury Association of America and involves formal coursework and a written examination.
    - NDBIN provided CBIS training in ND in July of 2019, Dec 2019, June 2020, Dec 2020
    - Total of 65 officially certified CBIS in ND as of 1/19/2021.
    - NDBIN hosts a quarterly call for all CBIS to share information and collaborate.

- Webinar Wednesdays
    - These FREE webinars cover a range of brain injury topics and are designed to meet the needs whether you are a brain injury/stroke survivor, caregiver, or provider. Variety of continuing education credits are offered and they are archived online.
    - Total of 26 webinars, 251 total evaluations.

- Virtual Support Groups
    - Facilitated 22 support groups, including 15 virtual.
    - Began partnership with University of Mary Occupational Therapy program to have students co-lead groups.

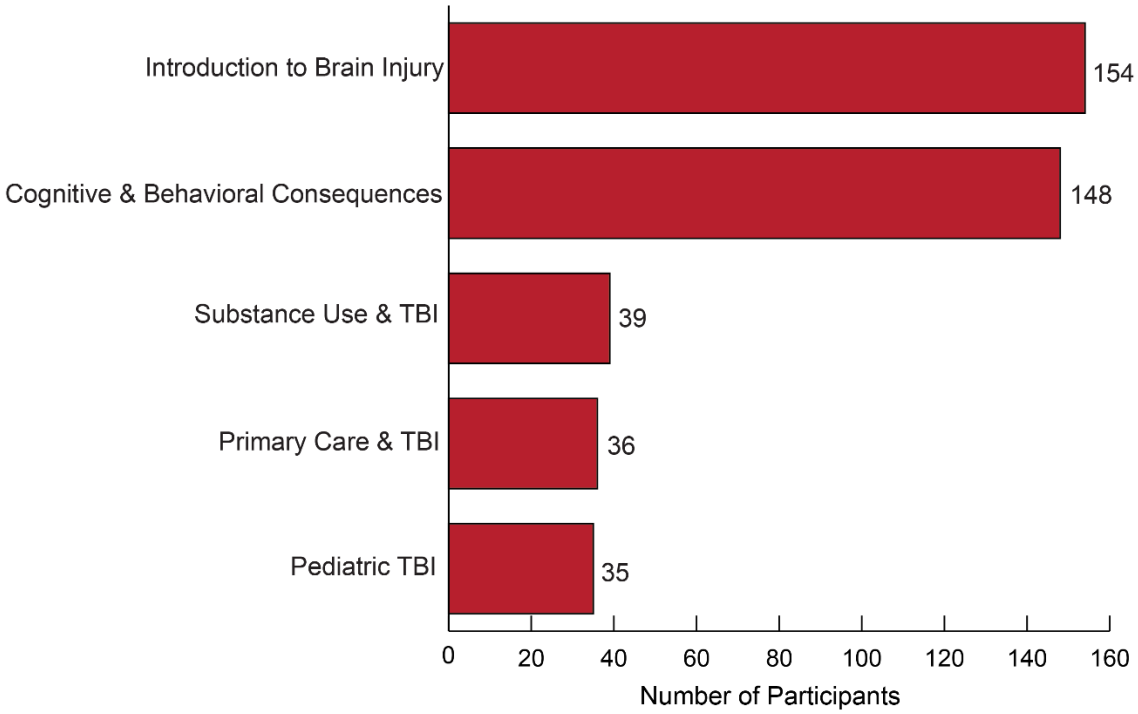
- Adapted the REAP for ND
    - This is an evidenced based return to learn guide developed by CO and adapted to over 20 states.
    - What is REAP?
        - R = Remove/Reduce physical and cognitive demands
        - E = Educate the student athlete families, educators, coaches, and medical teams of the potential symptoms
        - A = Adjust/Accommodate for the student athlete academically
        - P = Pace the student athlete back to learning, activity, and play
- Virtual Concussion Symposium
    - Hosted a Concussion Symposium with over 100 attendees
    - Keynote by the author of REAP

- Website
    - Maintained a comprehensive website with over 34,780 unique page views
    - Searchable online resource guide, maintained events calendar
    - Developed new content regarding caregivers, special education, and related services

- North Dakota Brain Injury Guide
    - Partnered with the North Dakota Stroke Association to publish a new North Dakota Brain Injury Guide for new survivors. In process of being distributed to hospitals, clinics and private providers.

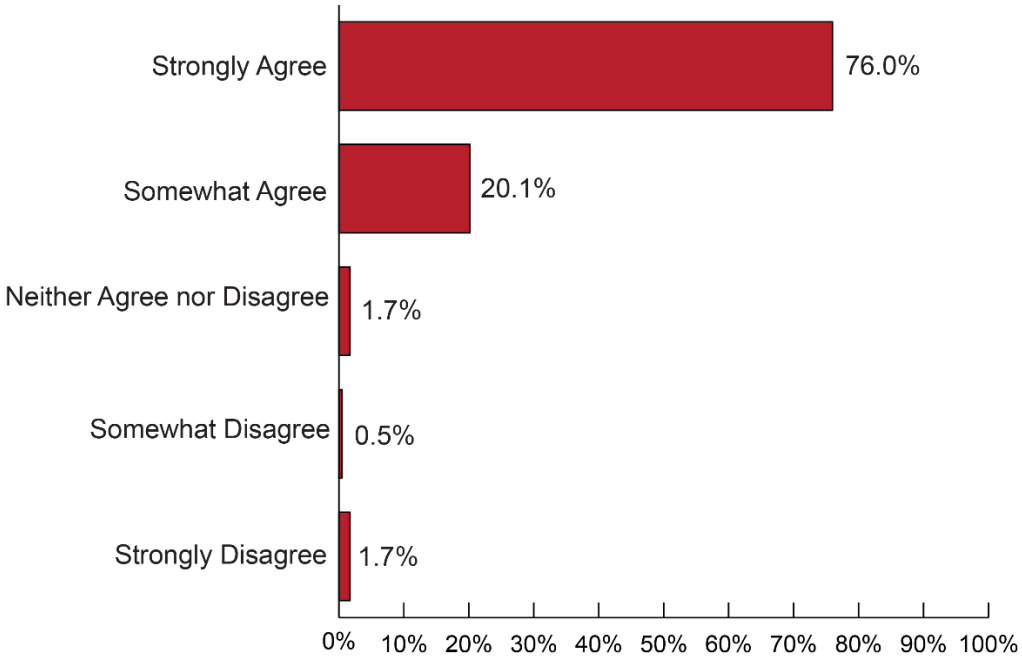
Upcoming Programs:

- Survivor Connections
    - New program to be launched spring of 2021.
    - Phone based program for new individuals with brain injury to connect them with trained volunteers to provide support for those new to the injury.
    - So far have developed program, recruited & trained 3 survivor volunteers.



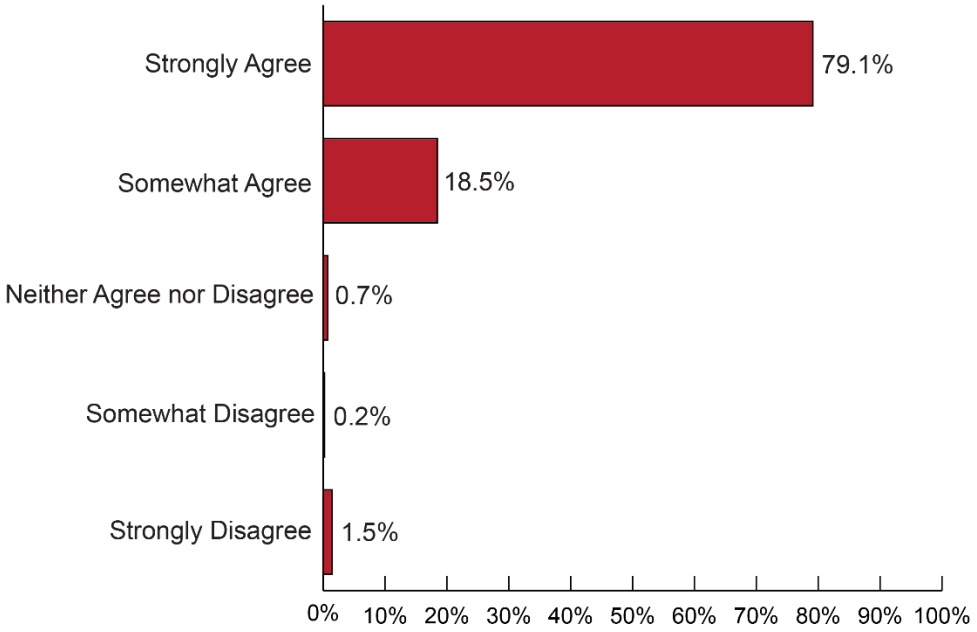
- Brain Injury Basics Training
    - 1st training to be held February 19th, 2021.
    - New training developed to be less intensive than the Certified Brain Injury Specialist, but more engaging than the online courses.
    - This training is based on an interactive approach and will provide direct care staff, peer support specialists and caregivers of individuals with brain injury a general knowledge of brain injury and what that means for the individuals they serve, practical techniques for handling difficult behaviors of individuals with brain injury, as well as building rapport for the individuals within their care.

- Book Club
    - Launched January 2021.
    - A virtual brain injury book club on the first Thursday of every month.

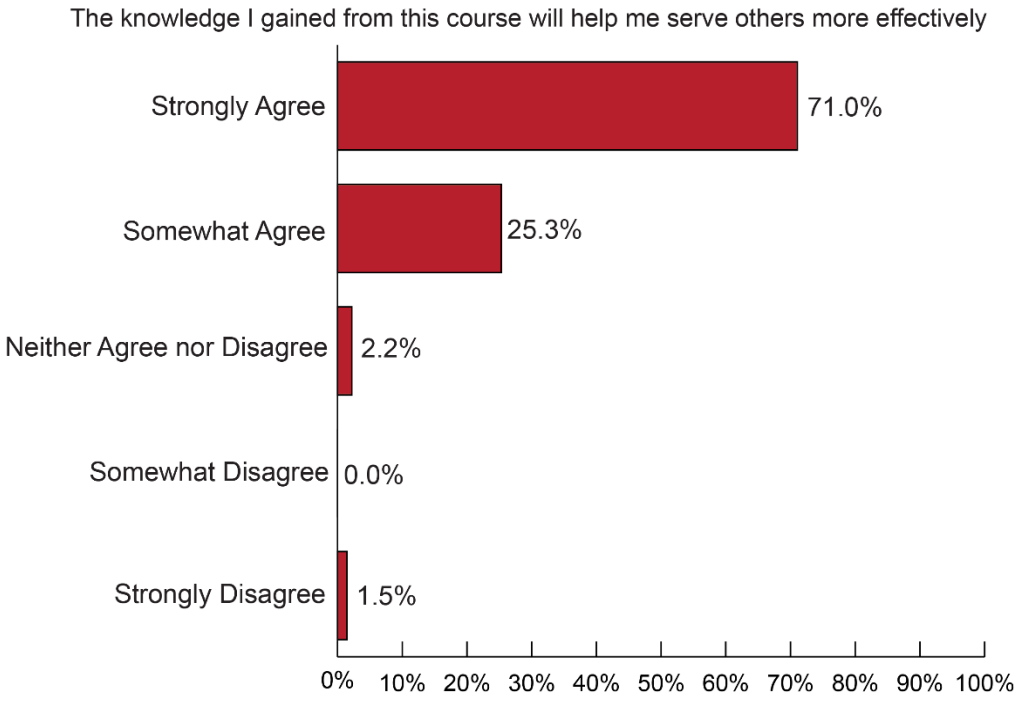


- Virtual Office Hours
    - Launching February 2021.
    - Anyone with questions or needs related to brain injury can join NDBIN for these virtual office hours.

Online Brain Injury Courses-412 total evaluations completed

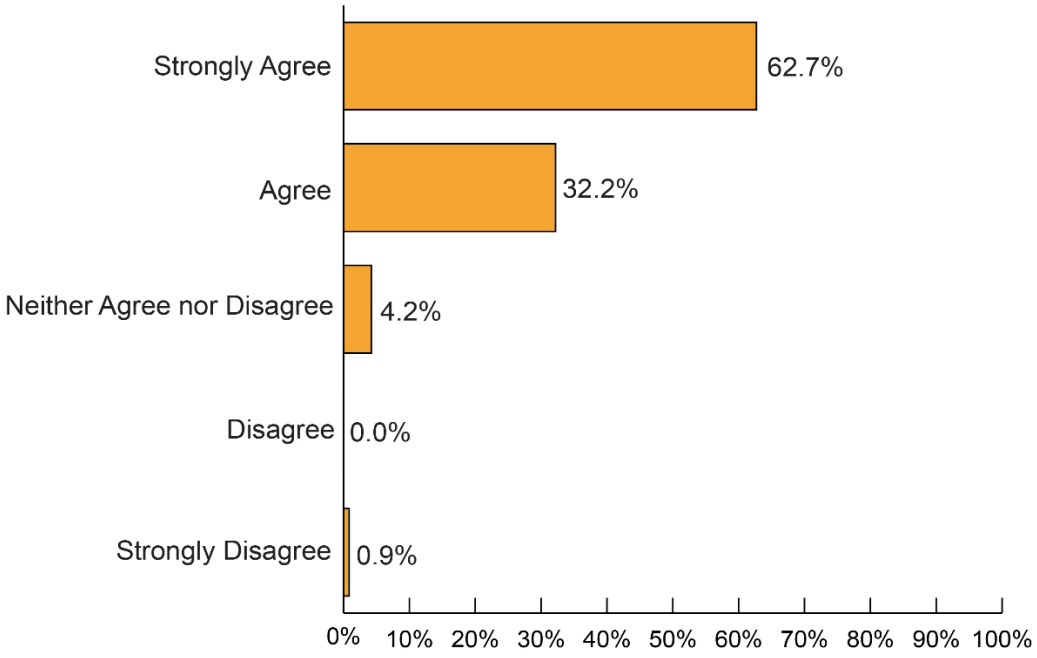


Course Attended:

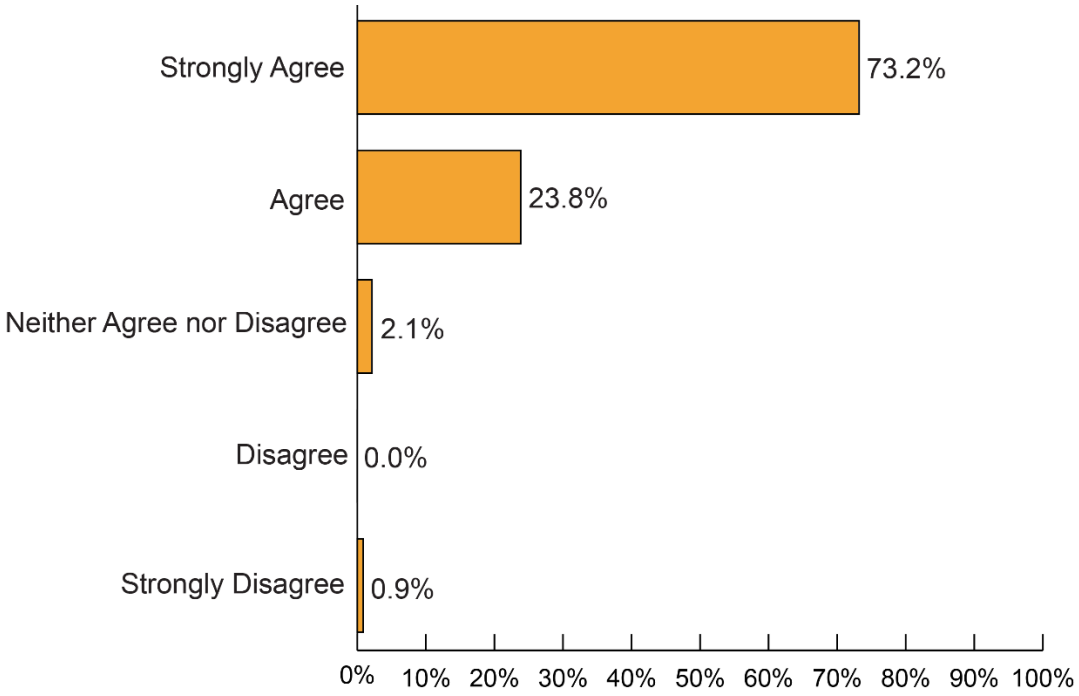


I found the course information to be helpful:

The material presented was appropriate for the intended audience:

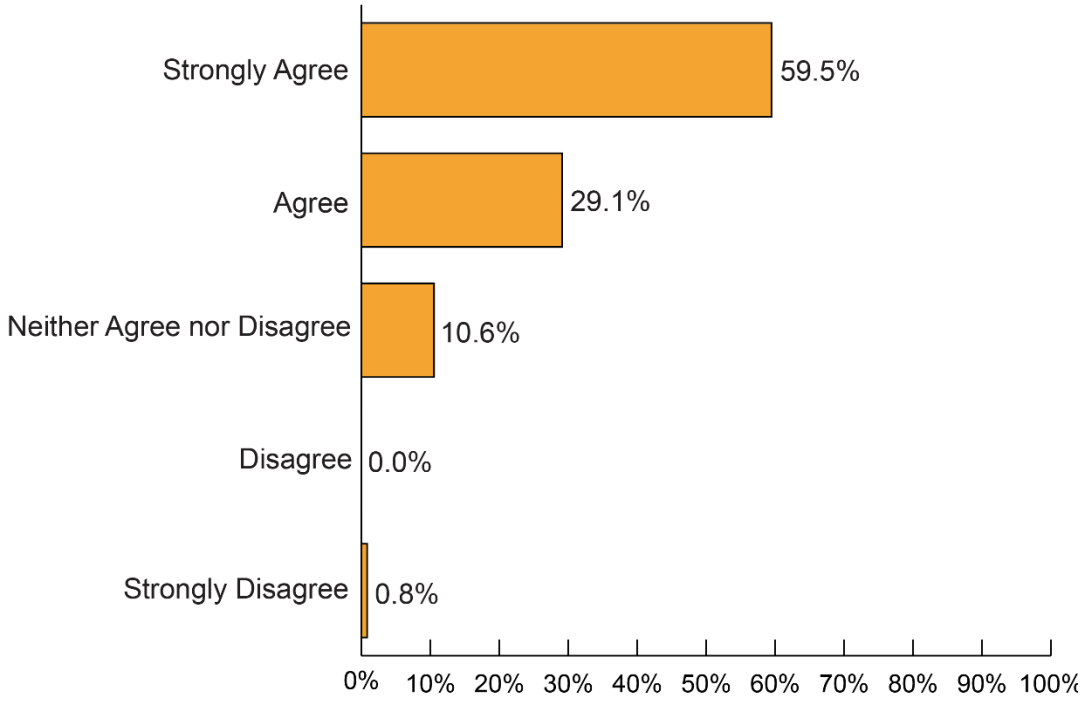


The knowledge I gained from this course will help me serve others more effectively:



Webinar Wednesdays-26 total webinars, there were 251 total evaluations completed

---



The training objectives were met:

Help for Today,
Hope for Tomorrow.

North Dakota Brain Injury Network

- Free service to individuals, family members and professionals
- The central source of brain injury support, information, and education for ND

Why NDBIN?

- NDBIN was developed because there had been identified a **lack of awareness, lack of training, and a lack of coordination across existing services.**
- NDBIN meets these needs by providing:
  - Outreach
  - Toll-free number, website with searchable directory
  - Informal supports and resource facilitation
  - Education and training for individuals, family, and providers

Need to Fully Restore Funding

- Have slowly built over 10 years to have this base infrastructure.
- NDBIN is complementary of newly developing services, not duplicative or able to be shifted.

Concerns about Replacing with 1915i

Diagnosis Eligibility	• Neurocognitive Disorder Due to Traumatic Brain Injury • Excludes those with acquired
Financial Eligibility	• Majority of individuals utilizing NDBIN are not on Medicaid • For most NDBIN is there only service option because they are over the limits to qualify for other programs
Level of Care and Service Needs	• Variety of brain injury presentation requires various avenues for support • NDBIN provides navigation across all systems
Role of NDBIN	• Hub for support and training • Vital to maintain NDBIN as the resource to support the development of providers and individuals navigate the available services.

Greg is a 45-year-old male from Fargo who sustained several TBIs as a child.

He was never identified as having a brain injury, or provided treatment, but has stuggled with attention, memory, impulse control, and addiction.

He was screened for brain injury by his Free Through Recovery provider and was referred to NDBIN for assistance.

How NDBIN helped:

- Provided education to Greg about his brain injury and learning to manage his symptoms.
- Training to his providers about high incidence in the criminal justice system and how to modify services to be more supportive
- Began attending brain injury support group and now “doesn’t feel alone or in a fog”

Melissa is a freshman in high school in a rural ND town.

She sustained a severe TBI in an ATV accident 2 years ago.

She received inpatient rehabilitation, but was discharged to her rural ND home with little support.

Her special education teacher reached out to NDBIN for assistance.

How NDBIN helped:

- Education and support to parents regarding understanding of brain injury and disability acceptance.
- Explained possible available services and eligibility.
- Provided TBI education to teachers and TBI prevention education to fellow students
- Provided materials for special ed teacher to utilize and technical assistance in developing individualized education plan.

Heather is a working mother of two. She sustained a brain injury last year when she was rear-ended.

She broke her nose as well as was unconscious for 20 minutes. She was treated in the emergency room, but was discharged with no information or follow up.

Since her injury she has been feeling forgetful, disorganized, short tempered with her kids, and feels isolated. Heather found NDBIN via a google search and called the toll-free number.

How NDBIN helped:

- Education and support to parents regarding understanding of brain injury and disability acceptance.
- Explained available services and eligibility
- TBI training for teachers and fellow students
- Technical assistance in developing individualized education plan and supportive materials

Be Legendary.™

67th Legislative Session #2510 January 25, 2021

House Appropriations-Human Resources Division

Chairman Nelson and other members of the Committee,

Thank you for the opportunity to testify today. My name is Nan Kennelly. I am a speech-language pathologist and certified brain injury specialist from Fargo, and a provider for cognitive and communication disorders related to brain injury. I currently serve as the Chair of the North Dakota Brain Injury Advisory Council.

I am providing testimony on behalf of the Brain Injury Advisory Council, a statutory-defined (NDCC 50-06.4-10) and Governor-appointed state advisory council. The Mission of the North Dakota Brain Injury Advisory Council is to improve the quality of life for all individuals with brain injury and their families through brain injury identification, awareness, prevention, research, education, collaboration, support services and advocacy.

A 2016 North Dakota Brain Injury Needs Assessment found that for people with brain injury in North Dakota, services and supports for the condition **are few, are disparate, and are disjointed.**

The Brain Injury Advisory Council has serious concerns about the proposed budget reductions for brain injury in the Department of Human Services budget. These programs have been slowly built over the last 10 years and represent the *only state funded programs exclusively dedicated to brain injury* in the state. With services for this complex population being *already so limited,* it would be a disservice to ND residents and families living with brain injury.

It is particularly concerning that the DHS budget reductions appear to be made with the mistaken assumption that the programing could shift to federally funded programs, with an expectation that the Medicaid 1915(i) program will provide offsetting benefits.

Members expressed concern for these shifting DHS budget priorities, including:

- The restrictive definition of brain injury within the Medicaid 1915(i) program, requiring a "neuro-cognitive disorder related to traumatic brain injury" diagnosis. This would eliminate other types of brain injury diagnoses and needs, and limit brain injury services to a select few individuals.

- Since Medicaid 1915(i) services requires financial eligibility for Medicaid, economic means testing will greatly restrict the number of individuals eligible for brain injury services, compared to current practices.

- The reduction of NDBIN program funding will limit the level of technical assistance support and service coordination statewide, compared to current service levels.

- The NDBIN is not a direct service agency and should not be conflated within discussions concerning Medicaid 1915(i) service programming.

- The reduction of technical and facilitative support to the operations of the ND Brain Injury Advisory Council.

- The reduction of education and training available to providers in ND, currently provided by NDBIN.

In summary, the ND Brain Injury Advisory Council has serious concerns about proposed budget cuts to existing programming, as well as the mistaken rationale that the 1915i services will duplicate NDBIN, which they do not. The Advisory Council feels these budget cuts and reduction of service go against our mission to improve the quality of life for all individuals with brain injury and their families.

Thank you for your time and I welcome any questions.

Respectfully submitted,

Nan Kennelly
Chair, ND Brain Injury Advisory Council

67th Legislative Session #2512 January 25, 2021

House Appropriations-Human Resources Division

Dear Representative Nelson and members of the House Appropriations Committee, Chairman Nelson and other members of the Committee. Thank you for the opportunity to testify today. My name is Nan Kennelly. I am a speech-language pathologist and certified brain injury specialist from Fargo, and a provider for cognitive and communication disorders related to brain injury. I serve as the current Chair of the North Dakota Brain Injury Advisory Council. I own a private practice in Fargo, ND, Onword Therapy. I lead a support group for individuals and families living with brain injury, and I am a vendor for the Social and Recreation program through the Department of Human Services.

I am providing testimony today as a provider who serves ND residents and families living with brain injury, and to object to proposed budget cuts for brain injury programming in ND and to the North Dakota Brain Injury Network (NDBIN). Over the last 10 years, ND has slowly built brain injury programming for education, support, and service. To reduce funding that would sustain and develop this programming would be a giant step backward for ND, and would have negative consequences for ND residents and families living with brain injury.

Many of our patients attend our support group, Webinar Wednesdays and participate in the Social and Recreation program funded by DHS. Our patients utilize the modules available on the NDBIN website for education and support. The benefit of these program runs deep. The Social and Recreation program has been especially beneficial, as social engagement is one of the biggest changes after brain injury. Our staff participated in training put on by NDBIN to become Certified Brain Injury Specialists, improving the quality of care we provide at our clinic. Additionally, our staff and many patients attend the ND Brain Injury Conference put on by NDBIN each year for professional continuing education and supportive education for our patients. I repeatedly see firsthand the benefit that ND brain injury programming has on those I serve. It is my opinion that cutting funding to serve ND residents living with brain injury would be a devastating loss.

I am especially concerned with a justification provided to me for budget reductions for brain injury programming. I have been told that since 1915i was approved for ND, the budget cuts were hoping to avoid duplication of service. I am here to tell you that this is a misconception. To qualify for 1915i services, an individual must first qualify for Medicaid, and then have the specific diagnosis of Neurocognitive Disorder related to Traumatic Brain Injury. These requirements alone exclude most ND residents living with brain injury. In my 15 years of private practice, I can count on one hand the number of brain injury patients we served that qualified for Medicaid. That is a very small percentage compared to the thousands of patients I have treated with brain injury. In my experience, the majority of ND residents living with

brain injury have commercial insurance, Medicare or Workforce Safety. Additionally, the definition for brain injury for 1915i varies from the ND definition of brain injury, leaving out a large percentage of people that would otherwise qualify for service and support. And in an ironic twist, many individuals would find the services of 1915i through NDBIN. If funding is cut to NDBIN, it is likely that fewer individuals will know about and/or benefit from 1915i services and qualification requirements. While the 1915i is a victory to add to services that were lacking for Medicaid recipients, it is absolutely not a duplication of service, and will not benefit most of ND residents living with brain injury who are currently being served through DHS and NDBIN funding.

Please consider this testimony a request to **fully restore the brain injury funding in HB 1012 including the proposed 50% reduction in funding the North Dakota Brain Injury Network.** This reduction would have detrimental effects on our patients, the programming my practice can offer, the support available through NDBIN, and the overall progress we have made in recent years in ND brain injury programming and support.

Thank you for your time and I welcome any questions.

Respectfully,

Nan Kennelly, MS CCC-SLP, CBIST
Licensed Speech-Language Pathologist
Owner | Onword Therapy

Dear Members of the Budget Committee: #2307

Prior to knowing about my head injury life was:
I was scared to death. I couldn't remember things. I missed appointments they tested me for dementia. Then I had testing and they said you have a brain injury

Since learning about my brain injury life is:
I wake up and it is foggy. Knowing is helpful. I am learning new tools. It is scary, but at least I know.

North Dakota Brain Injury Network is important to me because: I love them. Without them I would be lost. I am starting to feel better. I am feeling human not like a freak.

I feel that the state of North Dakota needs to know this about brain injury: We think different. We are the same but completely different we need different services then typical brain injuries.

Sincerely,

1/22/2021 Maureen E Spath

Date: 1/22/2021

Dear Members of the Budget Committee:

Prior to knowing about my head injury life was:
good. I had a full time job, I did not have pain, confusion, or other symptoms of a TBI. After my TBI, I was mis-diagnosed.

Since learning about my brain injury life is:
After my brain injury, I feel miserable because of my mis-diagnosis and constantly being in pain. I also feel fatigue much of the time.

North Dakota Brain Injury Network is important to me because:
I can have an agency like NDBIN to help me with things like doing my paperwork, going to doctor appointments and advocating for me. Sometimes when I go to the doctor they don't listen to me

I feel that the state of North Dakota needs to know this about brain injury:
The care people with brain injuries need is different than mental health care.

Sincerely,

Date: 1-22-21

Dear Members of the Budget Committee:

Prior to knowing about my head injury life was:

A strugel, not knowing why I felt different and out of place. Upset more often the not. Trusting is hard. Taking responably for my self was Hard.

Since learning about my brain injury life is:

I still strugel but now I have some sence of self worth, and hope. Life is not all Bad. I feel better about choices I make.

North Dakota Brain Injury Network is important to me because: the help I get is worked at my needs and pace, Because N.D.B.I.N [redacted] offers me help I did not know was out there.

I feel that the state of North Dakota needs to know this about brain injury:

That no person is the same as a nother. So [redacted] progress is never the same as a nother.

Sincerely, Bruce Owens

Thanks for being There For us.

Date:

Dear Members of the Budget Committee:

Prior to knowing about my head injury life was:
My life felt scattered, very confusing and I was self destructive.

Since learning about my brain injury life is:
a little bit better because I am learning to deal with which help me cope better.

North Dakota Brain Injury Network is important to me because: They keep me grounded. They educated me. I know I can reach out anytime.

I feel that the state of North Dakota needs to know this about brain injury: We need comprehensive care, dyeing mental health. We help communicating with others.

Sincerely,

[redacted] Tracy Allen Jones

January 22, 2021

To the members of the budget committee:

I would like to express my support towards the North Dakota Brain Injury Network, NDBIN. As a guardian working in North Dakota I see the growing need for the services provided by NDBIN. There are many individuals including the several I serve as guardian who are not able to get services through current the mental health system. This is very frustrating as a guardian. Often the services they do get are often one sided focusing on their mental health and not addressing the brain injury only the mental health or substance abuse. This strikes me odd as without the brain injury being addressed, I see a gap in their ability to utilize the services they are given. Either they cannot communicate effectively with their providers or cognitively they cannot take in the information provided by their providers and the cycle of mental health and or substance abuse continues.

My interactions with NDBIN have assisted me as far as education, consultation, and collaboration going as far as attending meetings involving my individuals with head injuries. My concern is that without this service I will not have the information I need to effectively assist my wards to be as independent as possible. I have genuinely enjoyed the education provided by this organization. Not only has it been an excellent source of a device volume of topics but it as allowed me to obtain the CEUs to retain my National Guardianship status. I look forward to continued opportunities to engage with NDBIN and hope that you will allow them the funding necessary to provide the level of education, consultation and support they currently offer.

Thank you very much for allowing me to voice my support on this matter. I feel that it is the duty of all of us especially the legislature to provide services to all North Dakotans especially those lives we can impact so significantly.

Sincerely,

Veronica Miller, guardian

Thursday 2-

To whomever it may concern,

This is a letter about my care at NAMI and its benefits.

I have been with NAMI for about 1 year. I go to groups there and receive help from their wonderful staff. Tori McCarthy is my case manager there and she is very good at what she does.

I also have a TBI and have a short memory span as a result of my TBI.

Since I have been with NAMI - they have helped me stay connected and also helped me live independently. It has made a difference in my life.

Thank you again.

Joanne Savage

Date: 1/21/2021

Dear Members of the Budget Committee:

Prior to knowing about my head injury life was:
My life was confusing. I felt fearful of being taken advantage of but didn't understand why. I had a hard time communicating with people. My life felt disorganized.

Since Learning about my brain injury life is:
I feel better about myself and I feel improved. It is good to connect with others and learn and share things. I no longer feel like I am just surviving I think that I can own these.

North Dakota Brain Injury Network with important to me because: They have educated me about my injury and through that I am coping better. They have advocated for me. They helped me to find NDM Brain Injury Services who are very supportive of me.

I feel that the state of North Dakota needs to know this about brain injury: That people with Brain Injuries want to get better. And that they need different services than more traditional mental health services.

Sincerely,

Andrea Heath

Date: 1-22-2021

Dear Members of the Budget Committee:

Prior to knowing about my head injury life was:
I struggled with many aspects of my life for a long time.

Since learning about my brain injury life is:
I am better equipped to be self-aware and am more apt to function within my abilities.

North Dakota Brain Injury Network is important to me because:
People need education and support to recognize and understand ALL the conditions of their lives.

I feel that the state of North Dakota needs to know this about brain injury:
Many people are suffering because of this issue not even knowing that they are among others with similar needs and can recover more effectively with support and understanding.

Sincerely,

Nicole Lacey

Date: 1/22/2021

Dear Members of the Budget Committee:

Prior to knowing about my head injury life was:
Hectic, confusing and scattered and disorganized I didn't always understand why things went the way they did.

Since learning about my brain injury life is:
My life was more manageable - I still not under control by better I understand myself better.

North Dakota Brain Injury Network is important to me because: I like having a place where I can get facts and answers. Nice to know that there is an advocate out there.

I feel that the state of North Dakota needs to know this about brain injury:
That I'm not invisible any more. That brain injuries are a mental illness and not the same as mental illness and should be overlooked and I hope we don't

Sincerely,

Date: 1-22-21

Dear Members of the Budget Committee:

Prior to knowing about my head injury life was:
very difficult for me. I had a hard time controlling my emotions and understanding what was happening to me and why.

Since Learning about my brain injury life is:
I now understand what is happening and now I'm not feeling alone anymore. There is a family at NIAM that is wonderful.

North Dakota Brain Injury Network with important to me because: The support has been incredible that I have received and I do not know what I would do without it. NIAM has been indispensible. Their support and knowledge is vital to Brain Injury clients.

I feel that the state of North Dakota needs to know this about brain injury:
It's a very important issue that needs funding and needs to be addressed. This is an invisible illness worthy of attention!

Sincerely,

Chelsea E. McNair

Toni & Christie are one of the brightest lights in my work to work living and I am grateful to be one of their clients.

I am processing as time goes on and now I realize I would be so lost without them. These guys are so special and dedicated that I feel my life is becoming a replection of some of my dreams and they have restored a lot of my faith back into me. These guys are amazing to me. Thanks for letting me share my thoughts & sentiments.

God Bless

Tony Gus

Testimony on HB 1012
House Appropriations Committee - Human Resources Division
January 26, 2021 #2849

Good afternoon Chairman Nelson and members of the House Appropriations - Human Resources Division Committee. My name is Shelly Peterson, President of the North Dakota Long Term Care Association. We represent 211 assisted living, basic care, and skilled nursing facilities in North Dakota. I am here in support of HB 1012 and ask for your support of basic care and nursing facility funding.

HB 1012
First, just a quick recap of the numbers – see the attachments for assisted living, basic care, and nursing facilities.

Second, I want to address basic care funding as the DHS budget proposes a decrease in basic care funding as shown on Attachment A.

The reduction of $7.3 million to basic care is catastrophic, and if left intact many basic care facilities will be unable to stay in business.

Before the pandemic hit basic care utilization was growing, more people needing basic care assistance were seeking this living arrangement with services. However, as you can see, basic care occupancy has dropped because of COVID-19, so the money for the increase in caseload/utilization is probably not necessary, (3.3 million). But the cost changes to continue, as well as at least a 2% inflator is absolutely necessary. This type of reduction will forever destroy care to individuals in need of this type of care.

What is basic care and why is it important? Basic care is a congregated residential setting with private and semi-private rooms, providing 24 hour staffing. Basic care provides an all-inclusive rate providing room, meals, personal care services, supervision, activities, transportation, medication administration, nursing assessment and interventions and care planning. Residents range in age from late 30's to over 100 years old, with the average age in the mid 80's. Almost two-thirds of residents living in basic care need assistance to pay for their care. The average basic care assistance rate on July 1, 2020 was $129.69, what a bargain! Twenty-four hour care, all-inclusive rate that covers all of your needs. An independent study commissioned by DHS in 2014 stated in their report, (Myers & Stauffer), "It is therefore in the state's best interest to proactively invest additional resources to further develop it's non-institutional resources, (HCBS, basic care and assisted living) that promote the ability of the elderly and disabled to "Age in place" and be served for as long as possible in their own home or another community residential setting.". This cut to basic care is doing just the opposite and serves to harm this entire service option in North Dakota. Please take a look at Attachment B labeled Basic Care Rates Effective July 1,2020, the average rate is $129.69. North Dakota has a real gem, called basic care and I would ask the committee to not accept the Governor's Budget reduction.

The next budget item I would like to address is Adult Residential Care. These are licensed basic care providers specializing in head injury services, (two) and in dementia care, (thirteen). These facilities are funded under the Medicaid waiver and the clients they serve screen in need of skilled nursing care. Adult Residential Care is a more independent integrated setting with 24 hour access to staff to support their independence.

Below is the list of the 15 Adult Residential Care facilities and their daily Medicaid rate, their licensed bed capacity and their occupancy as shared on the 1-14-21 HC Standard report.

FACILITY NAME	CITY	DAILY RATE	LICENSED BEDS	OCCUPIED
Maple View	Bismarck	$112.08	36	31
Edgewood Senior Living	Fargo	$108.93	35	33
Maple View Memory Care	Minot	$103.22	43	32
Edgewood Senior Living	Mandan	$107.08	73	48
Maple View Fargo	Fargo	$108.26	36	30
Ecumen – Evergreens	Fargo	$114.72	54	32
Edgewood Senior Living	Minot	$123.77	22	18
Edgewood Senior Living	Minot	$126.38	133	97
Roseadele	Jamestown	$127.47	20	20
Edgewood Senior Living	Bismarck	$133.13	44	36
Maple View	Grand Forks	$125.62	36	25
Edgewood Senior Living	Jamestown	$127.35	61	39
Lakewood Landing	Mandan	$154.94	38	32
Open Door Center	Valley City	$173.00	10	10
Dakota Pointe – HIT INC	Mandan	$198.24	10	10

Besides the daily rate above, a room and board rate of $758.00 per month is allowed. These providers are also in need of at least a two percent rate adjustment per year. The Governor's Budget allows only a one percent adjustment.

Interestingly that brings me to the next budget item, skilled nursing facilities. That budget needs an enhancement of $7.2 million for reforming the Nursing Facility Payment System. What we need for nursing facilities $7.2 million is almost identical to the basic care reduction of $7.3 million. Although we are on board and support the changes to the Nursing Facility Payment System, we can not in good faith ask for that money at the expense of basic care. Options to restore basic care funding:

1) Take the $3.3 million funded for the bed buy-out and give it to basic care.
2) Take the $5.6 million funded for the nursing facility 1% inflator and give it to basic care, (nursing facility inflator is already funded at the Skilled Market Basket in another part of the budget). As well as use that money to increase the inflator to at least two percent for all basic care providers.

3) Look at nursing facilities and basic care utilization, as budget savings may be found, as the pandemic has negatively impacted occupancy.
4) If money cannot be found in the above three options, then delay implementation of the new Nursing Facility Payment System. I hate to even suggest that option as we have worked hard to gain consensus with members and the department, any delay might damper the spirit of reform. However, we can not and will not support the reform at the expense of basic care.

That being said, I would now like to transition into the new Nursing Facility Payment System funded in this budget and ask you to support this reform.

The study of the payment system was a long grueling process and it challenged us to think differently. The study was mandated in the 2019 legislative session and you directed a revised payment methodology be developed. Not a tweaking of the old system but the creation of a new methodology. That took us awhile to grasp. I believe for the first few meetings, someone in the group would ask, "Are you sure this is necessary? Wouldn't it be better to change our current system and improve it to incentivize efficiency?" Then we would go back, read the legislative language you approved and said no, we need to change the entire payment methodology and thus we did! Many times, during our months of meetings I did not think we would arrive at consensus, but we stuck with the process and in the end at our September 2020 membership meeting, approved the new payment system by a vote of 99-1. At the end we did not get everything we advocated for and neither did the state, but we believe this system can achieve better efficiency of state resources and a quality service that delivers on our promise of assuring the elderly get quality care at the end of their life.

We could never had completed this study without the knowledge and expertise of two payment experts. Joe Lubarsky, President of Eljay, LLC and Brad DeJong, Senior Partner with Eide Bailly. Brad is an expert in North Dakota's nursing facility payment system and Joe is a national expert in the development and modification of nursing facility payment systems. He has assisted in the design of payment systems in 30 states. Without their expert knowledge this project would have never been successful. Brad DeJong is with us today and he will testify on the details for the new proposed fair rental system.

As you are aware, HB 1090 contains all the policy language to implement the new payment system and HB 1012 contains the money to implement. It is impossible to just talk about the money without talking about the new policy behind it. We are still working out the policy issues, (HB 1090), with House Human Services. All policies are based upon a long and sometimes challenging negotiation process. Each detail impacts one another. They are all related and entwined to the overall success of the new payment system. We know you have final approval the as legislature determines policy and the budget. I am hoping you see the value and can support all changes we are bringing to you. To trust the state and national experts who know complex payment systems. There are key components that are vital to the implementation and success of the new system.

Key Features of the New Pricing Model

1. Moves to a hybrid pricing model verses our current cost-based system with limits.

2. Set price levels as a percentage of median, with direct care and other direct care at 120% of median and indirect at 110% of median.
3. The indirect price will be established separately for small nursing facilities, 55 beds and under, and large facilities, greater than 55 beds. Small nursing facilities will have a higher price of approximately $4 dollars in the indirect cost category.

4. The margin cap in all cost centers will be 3.46% of the price. Please do not confuse this with an operating margin under our current system. In our current system, everyone gets an operating margin, that will not be true in our new system. Every facility will have the opportunity to receive a margin, but it will be based on where they are operating relative to the Price Point.

- Facilities that are 3.46% or more under the Price Point will receive the facility specific allowed cost plus the margin.
- Facilities that are within 3.46% of the Price Point will receive the Price.
- Facilities that are at or over the Price Point will only receive the Price, no margin.

5. The new pricing model, (not the property component), would implement on 1-1-22 and the 6-30-21 cost report will be used to set the initial prices.

6. We are proposing a hold harmless provision for two years on the operating side. For the initial year starting 1-1-22 nursing facilities

will be able to select to operate under the existing cost based methodology or the new pricing model. All nursing facilities will receive two sets of rates and they will decide and select the one they want. This two year hold harmless is very important and will help those who may experience rate decreases under the new pricing model to transition more slowly into the new payment model.

7. In the second year of implementation, 2023, the hold harmless provision continues. A nursing facility can continue to stay under the existing cost based system or convert to the new payment system. In year three, all must convert to the new pricing model.

8. Rebasing will occur every two years for the first four years and will be examined after that period.

9. The Medicare Skilled Nursing Facility Market Basket will be utilized to increase rates in the non-rebasing years. Item 8 & 9 are really important because we are losing a key component on the payment system. That is called annual rebasing. Under annual rebasing today, if your costs are <u>under</u> the cost limit and your costs increase substantially, you get that full increase in your rate up to the limit. This feature has saved many facilities and has been vital. But we are giving it up. In giving this "annual rebasing up", it is important to get the annual Skilled Market Basket and rebasing of the price every two years.
10. A process has been developed to address atypical cost increases in a non-rebasing year. (i.e., pandemic – national minimum wage) and that will be outlined through the rule promulgation process.

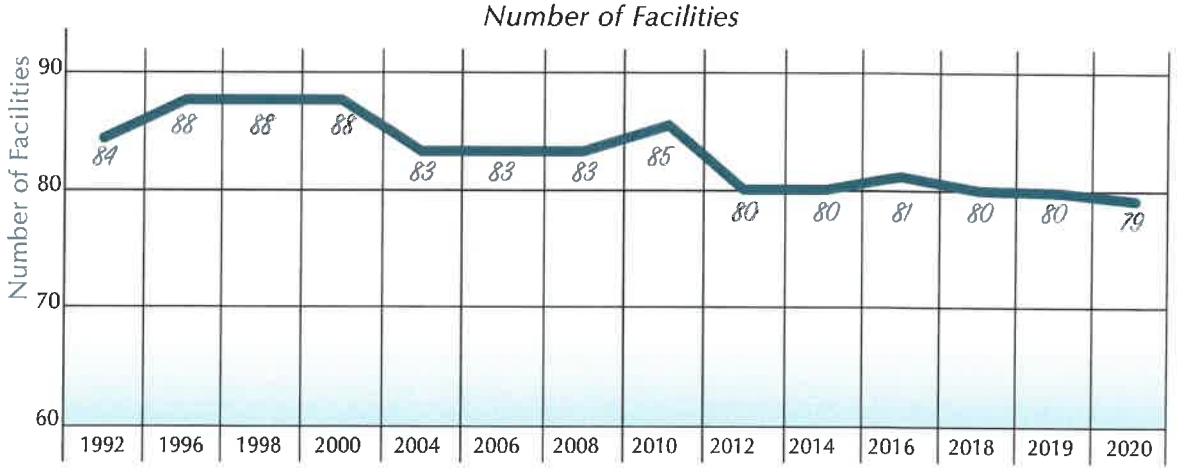
11. Equalization of Rates continues.

12. When the two year transitional hold harmless ends, we would like to see the development of a new quality incentives payment. This is not part of the legislation before you today but something I would like to bring back in 2023 for implementation in 2024.

    Based upon a statistical analysis of costs there is <u>one</u> driver of why it costs more in some North Dakota nursing facilities and that is the number of staff they have. Lower cost facilities have less staff, high cost facilities have more. Under this new system some high staff facilities may need to reduce staffing to be successful under this model. An analysis of cost and quality data in North Dakota shows those with higher costs, (higher staffing), have better overall quality outcomes. We would like to see a system that rewards quality and allows all nursing facilities to earn back dollars in the form of a quality payment to help support the cost of their higher staffing. Today we need the two year hold harmless transition payment, but in the future, we would love to see this as a quality payment. (See two charts on quality)

13. Implement a Fair Rental Value System as the property component on 1-1-23. Implementing this component of the new system is going to take time because to establish your Fair Rental Value the state will need to collect square footage and cost of additions and renovations made on all nursing facilities over their lifetime. This also needs a hold harmless provision, and this provision will be needed until everyone crosses over into the fair rental system. The hold harmless provision is to help those that have recently undertaken a major construction project or to help those that are planning a major

construction project if the financing of the project was in place by 12-31-21. The majority of the new money here are for those nursing facilities that have a low property rate to transition to a higher property value.



Brad DeJong is going to address in detail the fair rental system so I would like to defer any question on that topic to him. After Brad, I have asked Reier Thompson, CEO of Missouri Slope in Bismarck, to talk about his skilled nursing facility the impact of the pandemic and a little bit about a new construction project in progress today.

This concludes my testimony and I welcome your questions. Would you like to hear from Brad and Reier before you ask questions?

CPAs & BUSINESS ADVISORS

HO PROPRIATIONS PRESENTATION

House Bill 1090, Fair Rental Value

HISTORICAL PROPERTY RATE SETTING

- Current property rates are set based on accounting standards based depreciation on allowable capital assets and debt financing costs
- Building and fixed equipment capital assets are subject to a per bed maximum allowable cost which limits what a facility can spend
- Depreciation on capital assets is calculated based on a straight-line method over an estimated useful life set based on AHA guidelines
- Interest expense is based on the payment terms of the allowable debt and includes the amortization of debt financing costs
- The allowable depreciation and interest are divided by actual cost report year days or 90% occupancy days, whichever is higher, to get to the rate per day

EideBailly

HISTORICAL PROPERTY RATE SETTING

- Current system provides for high rates in the earlier years after a major project, and decreasing rates as it ages
- Current system only repays facilities for cost of capital projects over future years which discourages renovations as it will always require debt
- Current system does not provide funding to build reserves for future projects which leads to large projects having to be funded with debt which increases overall cost

EideBailly

PROPOSED FAIR RENTAL VALUE (FRV)

- Property rate would be based on a % return on the fair value of all allowable capital assets to determine the Fair Rent
- Building and fixed equipment costs are still subject to a per bed limit that is based on RS Means cost per square foot multiplied by an allowable square footage per bed license (entire facility space)
- Equipment is limited to $15,000 per bed license and land and land improvements are limited to 10% of the building limits
- FRV is adjusted annually for based on the effective age and a replacement factor
- Effective age decreases annually, but can be limited by capital renovations made which encourages ongoing maintenance
- The Fair Rent is then divided by actual cost report year days or 90% occupancy days, whichever is higher, to get to the rate per day

EideBailly

PROPOSED FAIR RENTAL VALUE (FRV)

- FRV will provide a more stable property rate
  - Early year rates will not be as high as current system, estimated cap is $62.14 vs $86 currently the high rate
  - Rate will remain consistent over time as long as the facility maintains the buildings
- FRV will provide revenue streams that will help facilities reserve for future projects and encourages renovations over time without having to utilize debt to fund the entire project
- See Attachment 3 for calculation examples of new projects

EideBailly

FRV FOUR YEAR PHASE IN

- 71 facilities are estimated to see an increase in their property rates due to the transition from historical property rate setting to FRV
- These 71 facilities will see an average estimated impact of $7 per day increase in total on their rates that will increase the estimated Medicaid spending by $8,619,000
- FRV proposed rate setting will phase this increase in over 4 years at an estimated cost of $2,155,000 in each of the fiscal years 2023-2026
- Information is included as Attachment 1

EideBailly

FRV HOLD HARMLESS

- 8 existing facilities are estimated to have property rates as set under the current property rate rules that will exceed the 1/1/23 FRV rates based on 2020 rate data
- The Medicaid cost for these facilities is already included in the current DHS budget, there is no new money needed to keep them under the current property rate system
- If these 8 facilities were forced to move their rates down to FRV on 1/1/23, it would reduce revenues by an estimated $1,500,000 based on the estimated FRV vs current 2021 property rates
  - This could lead to debt obligation issues
- Of these 8, 3 will transition to FRV in year 1 with all but 1 transitioning by year 8
- Missouri Slope will be new in 2021 and is also not expected to transition to FRV as the interest rate on the debt is too high
- See information provided in Attachment 2 and 3

Reier Thompson Testimony In Support of HB 1012 #3728
January 26, 2021
House Appropriations Committee – Human Resources Division
Harvest Room
Chairman Jon Nelson

Chairman Nelson and members of the Committee, my name is Reier Thompson and I am the President/CEO of Missouri Slope in Bismarck. I am testifying in support of HB1012.

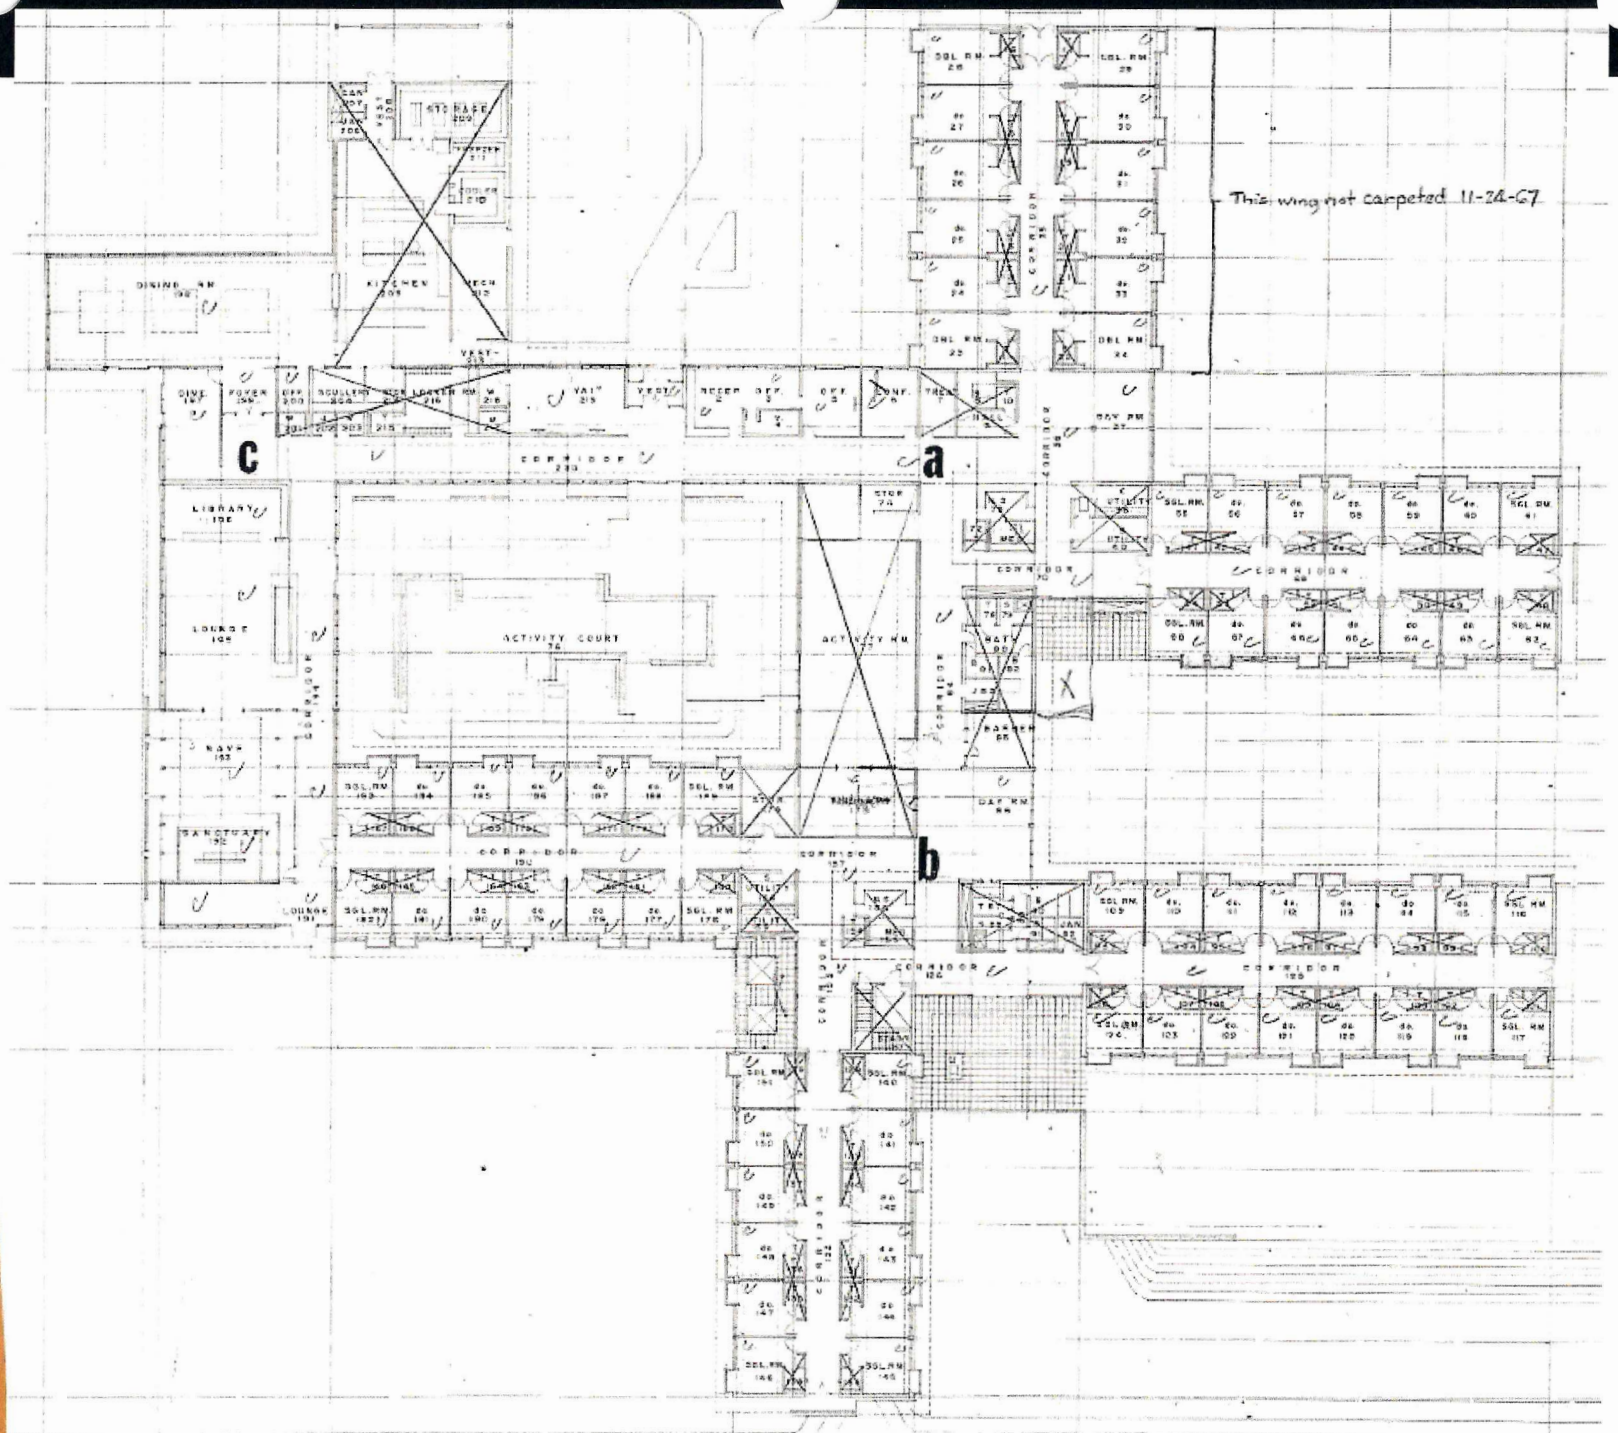
Missouri Slope opened its doors 54 years ago as a retirement home. At this time, the residents were very capable of most of their needs. About one in ten residents required a wheelchair. Fast forward to today, one in ten do not require a wheelchair. In addition to wheelchairs, many of our residents need the help of mechanical lifts which we are required to operate with two caregivers. Residents are now using oxygen concentrators, electric lift recliners, electric lift beds, walkers, CPaps, BiPaps, IV and feeding pumps. All of these items compete for physical space in the resident rooms. Rooms that were not designed to handle this amount of equipment. It has gotten to the breaking point of becoming unsafe working conditions from overcrowding.

Our Skilled Nursing Facility is currently licensed for 250 beds and has approximately 170,000 square feet in total (attachment A). When divided this equate to 680 square feet per bed. The single resident rooms are approximately 214 square feet + another 27 square feet in the bathrooms. The double occupancy rooms are approximately 282 square feet + another 27 square feet in the bathrooms (attachment B). Unfortunately, residents who require the use of a mechanical lift are often unable to use their own bathrooms as they are too small to safely maneuver. These residents end up using a commode in their room or a larger bathroom in another part of the facility. This is not a good situation and is not what our seniors deserve.

The current pandemic has put a magnifying glass on Infection Control within Skilled Nursing Facilities. Having double occupancy rooms creates additional risk and has forced us to create safe spaces to isolate people when they are COVID pending, doing certain treatments, or even collecting COVID test specimens. This is a terribly inefficient use of space and our occupancy is artificially limited because of it. Additionally, the double occupancy rooms create uncomfortable situations for residents, families, physicians, and caregivers wanting to have private conversations. Even more uncomfortable and sad is during end of life situations for a roommate wanting to allow for and give extra space to the dying resident and their family members. The rooms are just too small.

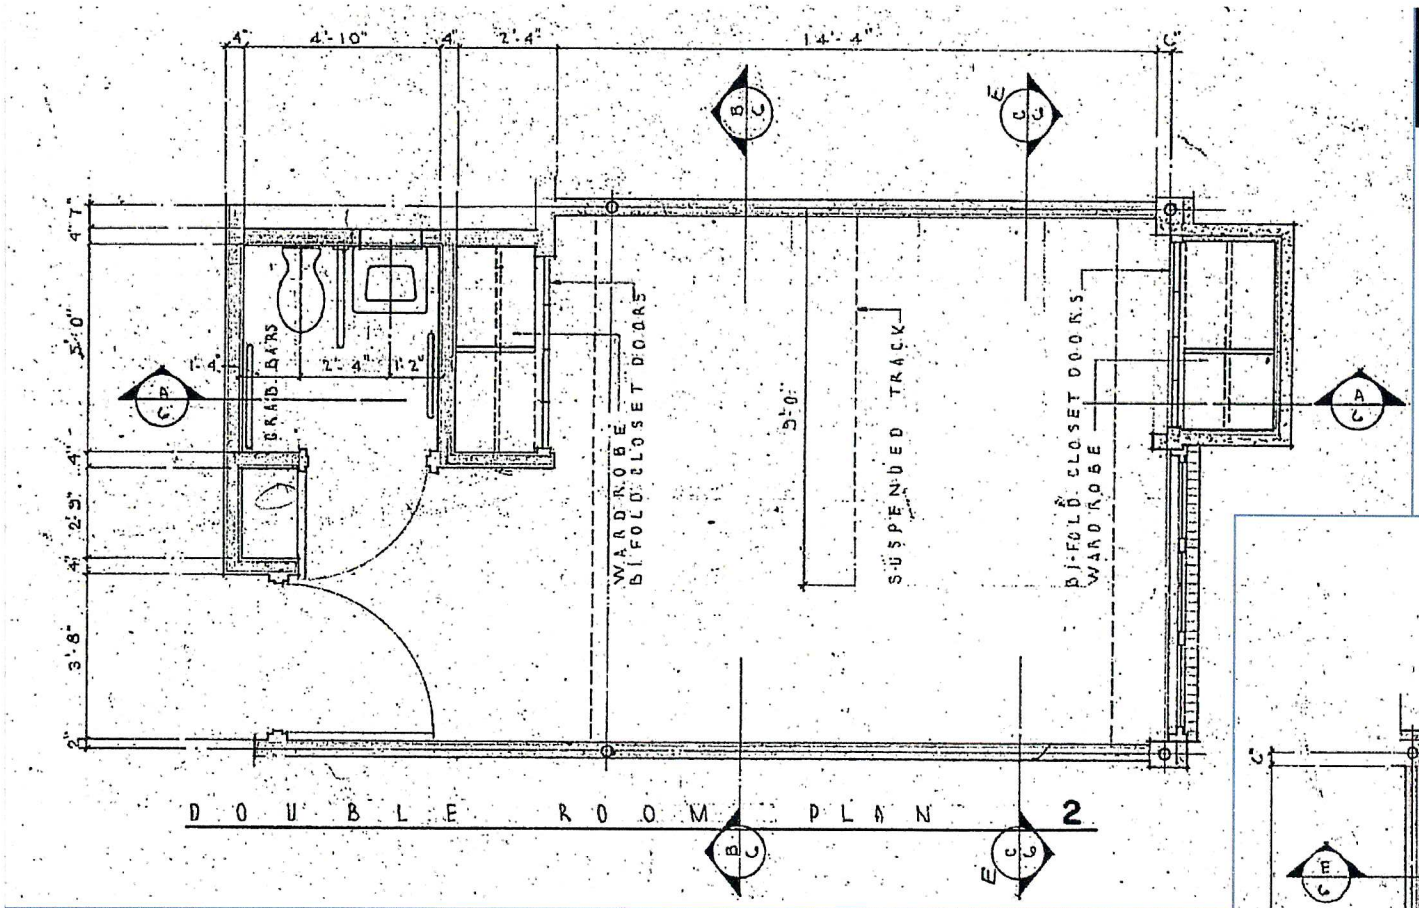
Moving forward, we have designed a new campus with 192 private/single rooms and a total square footage of 224,000 square feet (attachment C). When divided this equate to 1,167 square feet per bed. The rooms will all be approximately 263 square feet + another 105 square feet in the bathrooms (attachment D). Bathrooms of this size will

allow residents and caregivers to safely maneuver as well as have a shower in their own room. The space in the room will allow residents to feel comfortable and have room for a visitor or two.



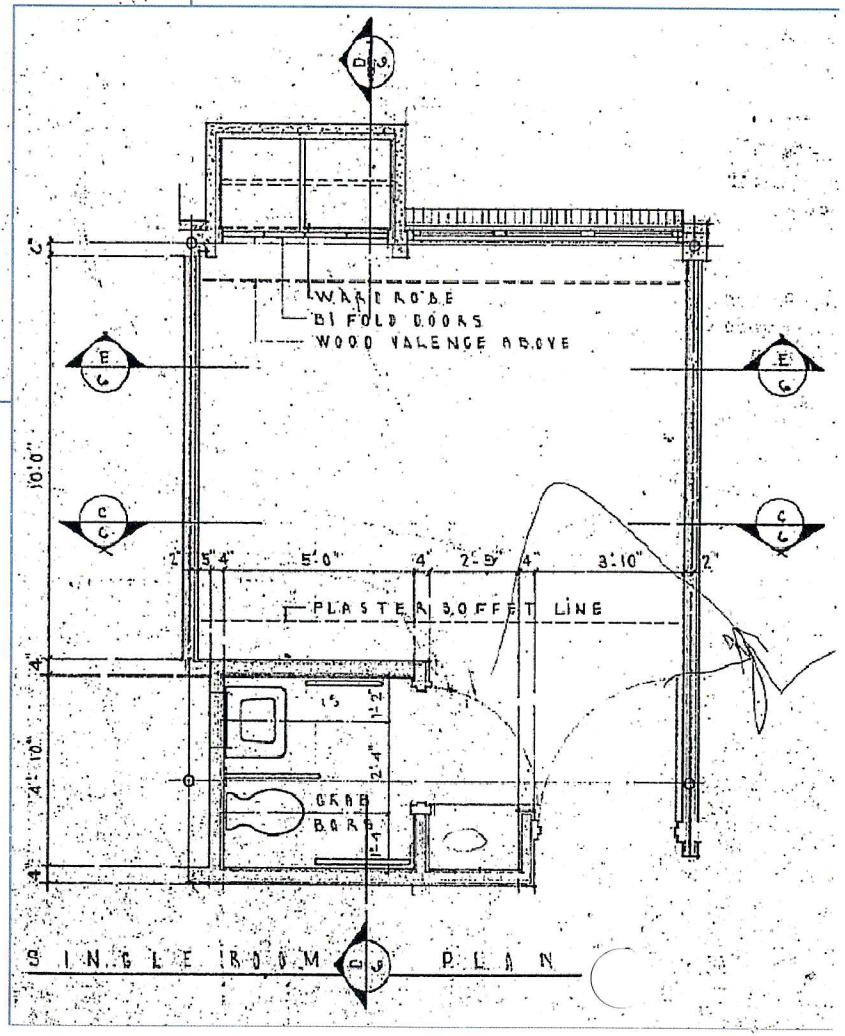
Not only are the rooms and bathrooms larger, more space has been planned for storage of emergency supplies, food, and equipment. We struggle to find space for important supplies at our current location. Additionally, our residents and families desire space outside their room. Our new campus will offer shared spaces attached to the households (nursing units). Sunrooms, living rooms, and a chapel are helpful in meeting the social, emotional, and spiritual needs of our residents. Meeting all our residents needs is required by CMS.

Our new campus has been slightly oversized in ancillary areas including the kitchen, laundry, maintenance, and supplies departments to accommodate future phases including basic care and independent living buildings. Had we not built these spaces this large, we would be closer to the 950 square foot target that is the subject of discussion. At any rate, we have learned over the past 54 years what works, what is required, and what is expected. Our new campus is being built to accomplish all of this and with a focus on safety and efficiency. For instance, bringing services to our residents such as showers and dining, rather than bringing our residents out to services will help keep our direct staffing levels in check. We will have more to clean and maintain, but the cost of doing so versus hiring more direct care staff to move residents around is less. We feel our new campus will be a model for the future of long term care in terms of efficient design and will help bend the cost curve.



Thank you for the opportunity to testify on behalf of my organization and the North Dakota Long Term Care Association.

Respectfully,



Reier Thompson, President/CEO

NORTHLAND PACE
Senior Care Services
Program of All-Inclusive Care for the Elderly

ND House Bill 1012

Ryan Bosch Executive Director

#3481 Lynn Grimm Chief Financial Officer

NORTHLAND HEALTHCARE ALLIANCE
a new direction in healthcare excellence

Northland PACE Statement

- In response to North Dakota HB 1012, specific to budget detail for PACE Program payment rate reductions, Northland PACE opposes the proposed HB 1012 budget detail specific to the PACE program and would like to further propose alternative appropriations

NORTHLAND HEALTHCARE ALLIANCE
a new direction in healthcare excellence

Problem Statement

- ND Department of Human Services proposes under HB 1012 a cost-based reduction payment change to the PACE program of 4.0% during 2021-2023 biennium
- Reduction change based on previous year profit margin at the time of reporting to DHS
- Cumulative sustained earnings not considered in determining rate change.

NORTHLAND HEALTHCARE ALLIANCE
a new direction in healthcare excellence

Problem Statement

- PACE program payment model is much different than that of long-term care.
- PACE receives capitated payment to manage and coordinate healthcare services to those needing nursing home level of care in their homes and in the community
- PACE does not receive payment/funding for property/facilities

NORTHLAND HEALTHCARE ALLIANCE
a new direction in healthcare excellence

Problem Statement

- Proposed cost-based payment change and normalization plan jeopardizes operational and PACE program growth and expansion
- PACE program is responsible for building financial reserve to self-fund expansion and investments
- Directly negates goals to expand healthcare options for those that wish to receive care at home

NORTHLAND HEALTHCARE ALLIANCE
a new direction in healthcare excellence

Proposed Alternative

- Northland PACE proposes the alternative to the currently proposed DHS cost-based payment rate reflective of profit margin to be rather based on MDS assessment model.
- Each enrolled participant is nursing home level of care screened, each with unique measurable and defined care needs.

NORTHLAND HEALTHCARE ALLIANCE
a new direction in healthcare excellence

Proposed Alternative

- Proposed alternatives could include:
  - PACE specific MDS rates or
  - Establish % of average 40 rates per facility in particular zip codes
  - Northland PACE and DHS to partner in establishing MDS assessed model

NORTHLAND PACE
Senior Care Services
Program of All-Inclusive Care for the Elderly

January 26, 2021 #3482

North Dakota 67th Legislative Assembly
House of Appropriations Committee

RE: Northland PACE Program and HB 1012

Representative Jon Nelson and members of the House Appropriations Committee,

The Northland PACE Program has been supported by legislation and the state of North Dakota since opening in 2008. House Bill 1012 provides detail to the proposed budget changes under the Department of Human Services (DHS), to include the services of Northland PACE, also associated with long-term care payment reform. Testimony has been provided by members of DHS outlining details of these changes which involves a change reduction in payment rate to Northland PACE of 4.0% over the 2021-2023 biennium. These changes are based on the proposed cost-based payment methodology by DHS and to seek an optimal profit margin. Under the cost-based payment model, the premise is that the Medicaid rate will be adjusted (decrease as stated) and then monitored. If costs for services and/or operations are observed to increase, the rates may be increased to compensate. If costs for services and/or Northland PACE becomes more efficient operating, rates will be decreased but not to exceed the established minimum set by DHS. This proposed cost-based rate setting may be highly variable creating financial volatility. A meeting was held between Northland PACE leadership and members of DHS when it was announced these changes would be implemented January 1, 2021 and were based on current and previous year Northland PACE financial reports, specifically our profit margin. Cumulative sustained earnings over time were not reviewed to account for the cost-based rate change and rate setting into the future.

While the Northland PACE Program, long-term care facilities, and Home and Community Based Services (HCBS) do have similarities in the fact that they are supported and funded under the DHS budget, the Northland PACE Program is unique and considerably different than that of these other programs. The Northland PACE Program receives payment based on a risk adjusted capitated payment rate from both the state as well as CMS. The Northland PACE Program receives payment based on the level of care need for each participant and the PACE program then manages and coordinates the healthcare needs of the participant to ensure optimal health outcomes and reduced care costs. The more successfully we achieve these goals the more financially solvent we are which allows us to reinvest in the Northland PACE Program and further save state financial resources and increase access to those throughout North Dakota meeting nursing home level of care needs.

Given the capitated payment model, the Northland PACE Program incurs all financial risk associated with providing care services and operating as a PACE program which also serves as incentive for optimizing care outcomes and efficiencies of operating. Furthermore, the Northland PACE Program does not receive funding, like long-term care facilities, for property. These details demonstrate the rationale of why seeking an adjusted optimal profit margin by way of the cost based payment model do not fit the model in which the PACE program is designed to operate nor does the cost-based payment model adjustment allow for the PACE program to achieve growth and expansion. The cost-based payment model changes provide financial risk to the Northland PACE Program given care needs change rapidly for enrolled participants. Maintaining a financial reserve allows us to deliver all necessary services while focusing on opportunities for growth, expansion, and further investing in service improvement.

Additionally, funding reduction for the PACE program is also being proposed based on enrollment reduction goals. During previous testimony by DHS, it was stated that enrollment goals have historically not been met and therefore funding can be reduced as a result. Given the settlement between the state of North Dakota and Department of Justice and the strategies in place by DHS, Northland PACE is a program, among all other options under DHS, that is being provided as an option for all people of ND that screen for nursing home level of care. As Northland PACE is included in the Informed Choices and ADRL strategy along with additional internal growth measures, Northland PACE is positioned for continued growth into the future. The detail for the proposed budget accounting for enrollment should be proposed with the expectation that growth be realized thus assessing and appropriating budget support in response to enrollment growth.

The Northland PACE Program provides access to all-inclusive healthcare for adults 55 years of age and older, meet nursing home level of care, and to those that are able to and wish to remain living at home. Since July 2019, Northland PACE has undergone leadership change as well as significant operational and structural changes resulting in financial success in building financial reserves to invest in existing and projected future capital to include expansion to additional service areas. Reducing payment rates associated with the cost-based payment adjustment plan jeopardizes the ability for Northland PACE to provide adequate services, expand services to additional service areas (communities) throughout North Dakota. It further jeopardizes the ability for the PACE program to assist the state in being a viable option for North Dakotans to receive healthcare in their homes versus placement in long-term care facility options.

For consideration of the ND House Appropriations committee and DHS, Northland PACE leadership would like to propose alternative options for payment adjustment consistent with the PACE program model. In order to enroll in PACE, a potential participant is required to screen as “Nursing Home Eligible”. Considering this requirement, it only makes sense that PACE rates determined in a similar methodology to the MDS assessment model. Whether PACE Programs have their own set of MDS rates or are a % of average 40 rates per facility in the particular zip code, the MDS model would be a more objective and fair value approach to setting the payment structure for PACE Programs. Similarly, to a certain degree, Medicare rates are established

based on the frailty of participants which is determined by the diagnosis of each participant. This change in the method of payment at the Medicaid level would require a joint effort between the PACE Program and Department of Human Services in order to establish a concrete structure.

Developing an MDS payment model for PACE Programs in ND would not only provide an objective approach to rate setting, it would also assist in providing an objective tool to determine those individuals best suited for the PACE Program or other care options. It would provide means to the SNF to refer those residents who are on the cusp of institutionalization but are still eligible for independence to receive the care necessary to stay in their homes

Submitted respectfully,

Testimony on HB 1012
2021 Legislative Session
January 26, 2021
Rep. Nelson, House Appropriations Chairperson

Chairman Nelson and Members of the Committee, #3436

My name is Lynne Ostrem. I wear numerous hats with concerns of HB 1012.

- I have an adult son, David, with a Traumatic Brain Injury.
- I have been David's Guardian and Conservator and responsible for completing the applications for services with DHS since 2012.
- I worked with Senator Mathern, Royce Schultze (DCLI), Representative Anderson and Stacie Dailey (DHS) to set up By Laws and legislation for the ND Brain Injury Council.
- I worked with Representative Anderson to pass legislation to study the use of Hyperbaric Oxygen Therapy for individuals with Traumatic Brain Injury.
- I started a QSP Agency to provide services to Brain Injured individuals.
- I worked with others to form the "North Dakota Brain Injury Advocates" a Non-profit organization.

A common statement in the Brain Injury World is "No 2 brain injuries are alike". There are a number of medical studies, journals and papers where you can find evidence that brain injured individuals can make gains with rehabilitation years after their injury. The gains may not be as dramatic as the initial year but functional gains are noted.

Brain Injury Association of America – March 21, 2017 "Brain Injury Rehabilitation Outcomes"
The National Association of Insurance Commissioners defines rehabilitation as:
"Health care services that help a person keep, get back, or improve skills and functioning for daily living that have been lost or impaired because a person was sick, hurt or disabled. These services include physical and occupational therapy, speech-language pathology and psychiatric rehabilitation services in a variety of inpatient and/or outpatient settings."

Although earlier access to post-acute rehabilitation is associated with greater gains and overall cost reduction, later rehabilitation also results in significant functional treatment gains and reduced costs, even many years after injury or for those patients who have an overlay of psychiatric or behavioral issues.

BrainLine; Institute of Medicine. 2011 and Reviewed July 26, 2018
Cognitive rehabilitation therapy may be like the proverbial elephant — it feels different to different people depending on their circumstances and perspective. But, as patients and families will attest, CRT is as fundamental a need in TBI recovery as physical rehabilitation — and for some, even more essential to their quality of life.

David's disability necessitates the use of many services. Most of those services are in different silos within DHS. We have used North Central Human Services, Medicaid, Behavioral Health, Aging Services, Vocational Rehabilitation, and Economic Assistance.

Each one of these services involves a different application and verification of all expenses. Since 2012, I have filled two - 18 gallon totes with files of DHS related paperwork with applications, appeals and legal action that needed to be taken for David to receive the services that are valid and available according to the DHS manuals and the North Dakota Administrative Code.

I have been listening online to DHS personnel testimony this session concerning HB 1012. I have heard several times that some departments have funds still remaining. When I hear that comment, from a consumer/advocate standpoint, my question is, "Why are there remaining funds?"

I can tell you from my son's experiences and trying to access services, it has not been an easy adventure.

When we tried to access services with North Central Human Services we were told there was no one that specialized with brain injury. When we tried accessing services with Vocational Rehabilitation, I found the "job" for David, but there were no consistent options for job coaches that would work with a brain injured individual so between the employer and David we turned it into a volunteer position and I made sure someone was with him and supervised him.

I have requested various services for David and told either he was not eligible for services, or there were no services in ND so "DHS" will not list it on the Care Plan.

David and I met last week with his case manager and requested cognitive therapy or behavioral therapy added to his Care Plan. It was not added. The case manager said she would check on it and let us know. DHS only wants services that you are actually using put on the Care Plan. Every time you add or take something off the Care Plan, there is a Case Management Charge of $131.42 in David's case.

There are a number of cases like this that I could point out but I don't think we have the time. From past experiences, it is not very easy to access the services you as a Committee are allocating money for. The current system is not very "user friendly" and I would venture to say that most people give up. I on the other hand, am part Polish – (no offense meant).

I understand that there may be some that label me and others that advocate for loved one as “problem people”. Please understand, we are human and we are struggling to get services for our loved ones in a system that is very difficult to navigate. Many times the first response we receive from DHS personnel is “No”. We are forced to take the next step to continue to find a way to receive services. I feel it is only through this process of giving our personal testimony that we can change the system to hopefully make it more user-friendly.

There are limited residential options for the brain injured population in North Dakota. The 2 specialized skilled nursing homes are always full along with a wait list. The Nursing homes are not interested in admitting a young “mobile” brain injured client because the rate of reimbursement does not allow for the specialized care required.

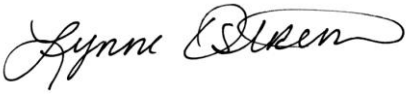
Brain Injured individuals can access Transitional Living Services through the HCBS waiver. This service has to be provided by a licensed QSP agency.

In 2016 I believe there were only 3 QSP Agency that offered this service. All 3 of them had limited staff and were not willing to take on an additional client. This put me in a position where I felt like there was no other option but to start a QSP agency to provide transitional living services for my son. I have found barriers for QSP agencies to provide quality care with the rate of reimbursement is almost parallel to the barriers for consumers looking for services. QSP agencies are required to have employees complete a Document of Competency and training. These expenses are bore by the Agency without reimbursement. It is recommended that new employees “shadow” a seasoned employee that understands the client to ensure the best possible care. Those costs are not reimbursable. My average costs to “train” an individual are approximately $3,000.00. That amount is not reimbursable. I have questioned Nancy Meier about the possibility of QSP Agencies being reimbursed for administrative costs or training but was told that it was not possible, DHS is only allowed to reimburse for “face-to-face” units.

Another financial hindrance is the unit rate of pay for Transitional is reimbursable only when there is “face-to-face” engagement with the client. If I have overnight staff at his house, my billable units stop when he goes in his bedroom at night. I continue to pay staff at an overnight rate that I cannot get reimbursed for.

For overnight staff to be reimbursable I would have to add Supervision on to the Care Plan and the agency rate of pay drops to $9.96/hour with the condition the staff is required to stay awake. I will admit, I didn't try to add that to the Care Plan.

From my understanding, the December 2021 DOJ agreement with DHS has a timeline where individuals are suppose to be transferring out of the institutional setting and into community. There are already limited QSP Agencies in the state. I have talked with many of them and it is a reoccurring problem – lack of employees to meet the workload. From my perspective, the current program that is set up for licensing QSP agencies is going to make it very difficult to meet the increasing needs of individuals looking for Home and Community Based Services because of the DOJ settlement.



I'm not sure what the process would be to get help to cover some of the QSP Agencies' administrative costs, training costs or increase the rate of pay. I have reached out to North Dakota Association of Community Providers for assistance. The Director, Bruce Murry, has been very helpful and has reassured me that I am not the only one with this dilemma.

This past year, I have found 2 great organizations that I have relied on for resources. Family Voices have hosted several informational Zoom meetings that have been very beneficial for me and my son. There are resources and supports on their website that can be used for a wide variety of consumers.

The other is Protection and Advocacy. Teresa Larsen has done an outstanding job keeping those of us informed as to the legislative happenings and any updates. I have needed to use the Advocacy services in the past and it is helpful to know they are there.

I respectfully submit that you reconsider and replace the funds that were cut from their budget. The support and guidance they offer to all families dealing within this system is something we need to rely on to help us.

Thank you for your time and your consideration in these matters. If you have any questions I would be happy to try and answer them.

Testimony Prepared for the
House Appropriations – Human Resource Division
January 26, 2021
By: Kim Jacobson, Agassiz Valley Human Service Zone Director
#3222

RE: House Bill 1012 – DHS Budget related to Human Service Zones

Chairman Nelson and committee members, my name is Kim Jacobson. I am the Agassiz Valley Human Service Zone Director, serving the service area of Traill and Steele Counties, a member of the North Dakota Social Service Director Association, and a member of the North Dakota Association of Counties Board of Directors. Please consider my testimony in support of HB 1012 and the amendment brought forth by the department.

The last two years have brought many changes for the local human service delivery system. At the end of the 66th Legislative Assembly, county social service agencies and the department together began a fast-paced path towards the formation of human service zones. The teamwork and collaboration leading up to the 66th assembly provided groundwork for system redesign, visioning, and goal setting. However, planning and doing are two very different things.

Today, I am pleased to report that we have together transitioned to 19 human service zones. We have accomplished many great things, including: developing, negotiating, and entering into human service zone agreements and operational plans; combining county-based workforces into human service zone teams; leading the transition to human service zone board structure; developing innovative service and management collaborations between zones; transitioning locally administered services allowing zones to still meet the unique needs of local communities; developing and launching unified human service zone personnel policy which supports merit system/federal/state law compliance while providing opportunity for locally unique policy when appropriate; transitioning the legal custody of all foster children to the human service zone director; and restructuring to a consistent fiscal coding, management and budgeting system. As alluded to last week during the department's testimony, we have created many elements of a well-designed and even frosted cake.

It is recognized that the transition to effective and efficient state/human service zone team will take at least eight years. While we have accomplished a lot of initial and visual steps, it is important to note that we are just **one year** into the human service zone and state team system during a time we have also been dealing with COVID19. Our team-based approach is a strong example of government innovation. However, the operational side of service delivery is very complex. Building a responsive state/zone team system is unchartered territory. Working as one with shared decision-making and accountability while demonstrating local responsiveness is hard work that requires time, attention, and nurture. This is critical to continued success and for responsive services for citizens. However, as you know, adequate funding is key to providing service.

Last session's SB 2124 was a comprehensive and sizable bill. I am very grateful for the support of the legislative body from both an appropriations and policy perspective and the investment in local human service delivery. I also express appreciation for the support of the vision - *a state and local team* - working together in a hybrid model of structure. This allows for unique local need to be met, voices to be heard, and a nimble, local response as we work together to provide system effectiveness, efficiency, and quality.

With any system's change it takes time. It was anticipated that there would be need for technical changes, intent clarifications, and parameters for next steps. Therefore, as expected through this year's legislative budgeting process we have learned many lessons. We have learned that there are some financial issues that need to be addressed so that human service zones can continue to effectively serve the entire state. It is important to address the budgetary issues now or the cake that we have worked so hard to prepare will be missing big pieces and there will not be enough to serve those in need across the state.

Our Lessons Learned:

Initial base funding shortfall:

The approved appropriation for human service zones in 2019 biennium was ~$10 M short of necessary levels to support local human services. Efforts to redesign programs, especially economic assistance programs, was delayed because of the COVID19 pandemic. The benchmark of 985 FTEs for human service zones was not an accurate projection to base funding for our current system and the phase of the redesign process. As prior biennium

approved budget levels are used to base the next budget, we face a critical and concerning trajectory.

HB 1012 compounds this budgeting concern as it was built off the 2019 biennial budget. We started in with a $10M deficit. Luckily, when human service zones formed on January 1, 2020, most zones had a reserve fund balance. However, the department projects that 100% of the reserve funds statewide will be depleted by July 2022.

The department's amendment for $9M in uncovered need and $3.4M in 2/2 salary adjustments will not erase the impact of the $10M shortfall in 2019 and the impact of this shortfall on 2021 budget base. The amendment also will not prevent full depletion of all human service zones reserve fund balances.

Human service zones provide critical safety net services to North Dakotans. In essence, no human service zone reserve fund balance means the safety net will no longer have a financial safety net. The department has reassured us that they are legally and morally committed to ensuring adequate funding of human service zone services. However, even with this reassurance, it is very concerning especially as we are so early in our new structural model and will soon have no reserve fund balances. Due to this trajectory, we are faced with uncertainty about how current and future needs will be met and how local access points and services will be preserved to meet the needs our vulnerable citizens.

Looking forward, it is important for the legislative body to understand that unless the budget is passed as requested with the addition of the department's amendment plus additional funds to offset the full depletion of human service zone reserve balance funds, the 2023 budget request will be significantly higher than the 2021 request. If not, critical services may be lost. Simply said, there will not be enough cake to go around. Plus, the 2023 cake will need to be much larger and/or prepared as a multi-layer cake.

Salaries, Benefits, and Equity:

For 2021, 89% of the approved Agassiz Valley Human Service Zone budget is salary and benefits. For many years, social service employee salaries have been subject to the state classified merit system and salary ranges. The only real changes now are the legislative body determines our annual salary adjustment and the department authorizes any new or vacant position fills and agrees upon salary set points. Salary adjustments for most human service zone team members equaled 0% in 2020 and up to 2.5% in 2021.

We learned through the introduction of HB 1012, that there was not a mechanism to include human service zone team members with the state employee salary requests in the OMB budget. One of the reasons for this omission was a lack of clarity on how human service zone team member salary adjustments should be requested within the state budgetary request system. The amendment introduced by the department, aims to correct this omission. I urge you to adopt this amendment. Also, I encourage legislative intent to address the process for requesting and bringing forward human service zone team member legislatively authorized salary increases to prevent future inadvertent omissions.

Another lesson learned is the scope and impact of health insurance package disparity within the human service zone system. For example, a family health insurance policy for Agassiz Valley Human Service Zone team members costs employees over $1000 per month out-of-pocket. Meanwhile, our neighboring zones and state agency, who we compete with for hiring and retention, have much more robust benefit packages. As we move forward, we realize that both salary and benefits need to be looked at in a comprehensive manner to provide a level of equity but also to prevent service deserts. Adequate base funding is necessary for the system to work as one. Budgetary flexibility is also key so that funds, upon availability can be redirected to meet identified need.

During this legislative assembly, *SB 2086* – a policy bill – seeks to address policy points and clarify legislative intent regarding a variety of items including equity, indirect costs, roles and responsibilities, county "*skin in the game*", and other items. There is a current workgroup, in which I am a member, that is working on amendments to provide critical policy clarifications. This is also an important piece of the cake.

Today, I respectfully ask you to ensure adequate funding for local human service zone services and to support our workforce in the provision of those services. Adequate funding is critical in meeting the needs of our citizens and to support the property tax relief efforts gains through our systems change. Also, funding is key to support the ongoing redesign efforts as we work together to achieve additional system improvements. With adequate funding and solid policy, our cake will be large enough and designed well to serve those in need.

Thank you for this opportunity to provide testimony regarding HB 1012. Questions from the committee are welcomed.

Testimony for Senate HB 1012

Senate Human Services Committee #3171

January 26, 2021

Chairman Nelson and members of the House Human Resource Division of the Appropriation Committee, I am Steven Reiser, Director of Dakota Central Human Service Zone. I am also a member of the North Dakota Human Service Zone Association. Please accept this testimony in favor of HB 1012.

The counties of McLean, Mercer, Oliver and Sheridan formed a social service district in 2006 and started operating as district on January 1, 2007. The mission of the district was to provide a better service to the county residents and when possible lower costs. In 2007 Dakota Central employed 36 staff. At the end of 2019 Dakota Central employed 31 staff. There can be cost savings and efficiencies found when counties join together but it takes time. Even though caseloads have grown from 2007 Dakota Central is able to employ fewer staff. If you look at 2020 staff numbers Dakota Central is down to 25 staff because of 4 staff transferring to state employment and reducing two more staff.

Zones have done a lot in one year and are working hard to improve services and find efficiencies but there has to be financial stability to the achieve kind of improvements we all hope for.

I support the amendments that the Department of Human Services has proposed. Using all of the reserve funds that zones have now to replace the dollars that the zone budget is short for the last biennium and not fully funding zones this biennium could cause a reduction in service and make good thoughtful cost savings very difficult.

Zones want to improve the services they provide at the grass roots level and they are willing to work together to be more efficient in this delivery. They need the funding requested by the Department of Human Services to make it happen.

Thank you for allowing me to testify and I would answer any questions you might have.

Testimony Prepared for the
House Appropriations – Human Resources Division
Tuesday, January 26, 2021
By: Terry Traynor, NDACo Executive Director #3144

RE: House Bill 1012 – DHS Budget/Zones

Chairman Nelson and committee members, thank you for the opportunity to briefly address you regarding the ongoing process of social service redesign and the budget to support the Human Service Zones across the state. Zones, and particularly zone employees, are very literally the boots on the ground for delivering so many of the state funded services critical to our most vulnerable North Dakotans.

I want to preface my testimony on the bill by thanking this Committee and the Legislature for passing the redesign enabling legislation, and funding, last session, as well as DHS staff and the many county officials – zone directors, county auditors, state's attorneys, and commissioners – that have devoted so many hours to implementing this monumental change. My conclusion is that the transition, thus far, has gone well considering the short amount of time that we have been at this, but it is not without its difficulties. Some of which are fiscal and will ultimately be addressed by HB1012.

First and foremost, counties very clearly support the funding requested for Zones in the base budget and the critical additions identified by the Department. I think it is important to note that these funds support not just zone employees, but also all former county and zone employees transferred to state employment through the various redesign initiatives – all of which became, and continues to be, property tax relief. As proposed, this will be the third biennium that the Legislature has set aside $200 Million in oil tax revenue specifically to make this redesign successful, and thus far, significantly less has been requested and appropriated.

While efforts have been made since formal zone formation, barely a year ago, to achieve some degree of compensation equity, for many employees this goal has not been met. As some zones require much greater employee share for benefits, it has been, and will continue to be, challenging. Obviously, if the Department is not

provided with sufficient funds to address inflationary costs of salaries and benefits – treating zone budgets similarly to DHS division budgets – this concept collapses.

Because the Property Tax Relief Fund transfer as proposed in HB1012 is insufficient for fully funding the zones, the budget anticipates spending over $15 million in zone reserves (exhausting all reserve accounts in one biennium). These reserves were largely built up over many years. They, very honestly, include some state reimbursement, however, they are largely dedicated social service property tax levy funds. We are a team – state and county – working together and pooling our resources to make human service redesign work, but the perception that property taxes (although clearly collected specifically for human service purposes) will be used as a one-time harvest to offset state general fund dollars is difficult for many zone board and county commission members to accept.

I recognize that reserve funds should not sit unused indefinitely, and the legislature has mandated that DHS fund the human service delivery needs – by transfers from other divisions if necessary – many local officials are (after barely a year) unsure about the potential emergency needs that DHS may not be able to fund, or fund immediately. I also recognize that not utilizing those reserve funds would make your job significantly more difficult, but I must raise this issue as those perceptions exist. Possibly consideration could be giving to reserving a small amount in each Zone, as we gain more experience as to its need.

A final point I wish to address is the meager offset to the property taxes supporting the indirect costs of human service zone support. I thank the Department for budgeting to continue the partial funding at the same level as 2016, but only wish to point out that the costs of space, utilities, janitorial, insurance, IT support, state's attorney salaries and benefits, and all the rest are not stagnant. Over the past five years the property tax burden for these costs has continued to erode the "relief" you as a legislature have provided. This is becoming critical for the counties that have reached their 60-mill general fund limit. DHS, zones and counties are working to analyze and hopefully better standardize how these indirect costs are identified and I sincerely hope we can present a better picture of this property tax supported piece of the puzzle before you adjourn.

Thank you again for the opportunity to address this important bill.

Overview Today

- **Medicaid Expansion**
  - Hospitals support HB 1012

HB 1012

- Thank you for supporting Medicaid Expansion
  - Reauthorizing the program every session
  - Supporting the current reimbursement rates

HB 1012

- **Benefits of Medicaid Expansion**
  - 24,000 individuals receive health care coverage
  - Health outcomes improve
    - individuals receive care on a regular basis
    - chronic conditions are managed
      - Ex. diabetes

HB 1012

- **Benefits of Medicaid Expansion**
  - Uncompensated Care
    - reduced by nearing 50% ($150 million per year)
  - Prevents cost shifting to other payers
  - Maintains access to health care in rural communities

Medicaid Expansion

- **Governor's Executive Budget 2021 – 2023**
- Reduces hospital/physician Expansion payment rates to traditional Medicaid rates
- Payment rates reduced by 40% - 50%
- Annual negative impact = <u>$100 million per year</u>

Medicaid Expansion

- **Rural Hospitals**
  - Medicaid Expansion payments $31 million
  - Proposed Cut $12 million
- **Urban Hospitals**
  - Medicaid Expansion payments $165 million
  - Proposed Cut $88 million
- **Total Reduction** **$100 million**
- Includes physicians

Medicaid Expansion

- **Impact of removing $100 million per year from provider payments.**
  - Reduced services
  - Job reductions
  - Access to care – hospital closures
  - Cost shift – increase insurance premiums

Conclusion

- **Why current Medicaid Expansion rates are good for ND?**
  - Maintains stability in our healthcare system
  - 90% federally funded/10% state funded
  - Traditional Medicaid rates don't cover the cost of providing care.
  - Provides access to care
  - Limits cost shift to other programs/payers (commercial)

Questions

- Tim Blasl, President
- North Dakota Hospital Association
- tblasl@ndha.org

2021 HB 1012
House Appropriations Human Resources Division
Representative Jon Nelson, Chairman
January 26, 2021

Chairman Nelson and members of the House Appropriations Human Resources Division, I am Tim Blasl, President of the North Dakota Hospital Association (NDHA). I am here to testify in support of House Bill 1012. I ask that you give this bill a **Do Pass** recommendation.

Medicaid (Traditional)

Medicaid payments play an important role in hospitals' finances, which can affect beneficiaries' access to care. Like other public payers, Medicaid payments do not cover the cost to the hospital of providing the care, resulting in payment shortfalls. Adequate provider payment rates help to ensure improved outcomes and access to necessary medical services for the people who rely on Medicaid to get their health care.

Medicaid Expansion

Medicaid Expansion was designed to significantly reduce the number of uninsured and improve their health by providing access to routine health care and preventive screenings. Covering about 24,000 North Dakotans, Medicaid Expansion has been very good not only for patients, but North Dakota communities and health care providers as well. The federal government pays 90% of the cost. This requires the state to pay only 10% – considerably less than the 50% the state pays for traditional Medicaid enrollees. Before the program was authorized, North Dakota hospitals' bad debt and charity care rose from $102 million in 2008 to $274 million in 2014—a nearly threefold increase. Thanks to Medicaid Expansion, hospital bad debt has dropped by nearly 50 percent. This significant decrease in uncompensated care has contributed to positive operating margins for a number of our hospitals.

We support reauthorization of Medicaid Expansion at the rates that were appropriated last session. We are not asking for an increase. We are simply asking that current rates – rates that have been in place with no increase since 2014 – be maintained. The cut being proposed by the Department of Human Services (Department) represents a reduction of $100 million annually to hospitals (acute care hospitals). It makes little fiscal sense to cut $10 million in general funds and lose the corresponding $90 million in federal funds which amounts to an approximately 45 percent cut in hospital reimbursement.

The federal share for Medicaid Expansion is a nine to one return on investment. It provides dollars that flow directly into local communities, supporting wages, employment, consumer spending, and state tax revenue. It is critical to covering operating costs at our hospitals and clinics, the loss of which will result in staff cuts and closed facilities.

It has also been proposed to move administration of the Medicaid expansion program away from a private carrier and to the Department. We feel the administration of the Medicaid expansion program by a private carrier has worked well and our members would like to see that continue. Hospitals are concerned with the ability of the Medicaid Management Information System (MMIS) to handle this change. We are also concerned with the FTEs that the Department is requesting to add in order to administer Medicaid Expansion and that they will not be sufficient to provide the strong managed care being provided by the current private carrier.

Medicaid – Value-Based Purchasing

NDHA supports a collaboration between the State and hospitals to design a Value-Based Purchasing model that will create incentives that encourage enrollees to take personal responsibility for their health, provide program cost certainty, and support practice innovations that further the objectives of efficient, patient-centered care delivery.

Conclusion

In summary, hospitals treat and care for the citizens of North Dakota in a variety of settings and at a number of locations. Services must be provided 24 hours a day, seven days a week, 365 days a year, and the competition for employees has been raised to a new level. I ask that you support reauthorizing Medicaid Expansion at current reimbursement rates, maintain

administration by a private carrier, and providing for a partnership model between the State and provider organizations to implement a Value- Based Purchasing model.

For these reasons, we support HB 1012 and ask that you give it a Do Pass recommendation. Thank you. I would be happy to address any questions you may have.

Respectfully Submitted,

Tim Blasl, President
North Dakota Hospital Association

SANFORD HEALTH

House Appropriations Human Resources Division Committee
Rep. Jon Nelson, Chair
Jan. 26, 2021
HB 1012 #3261

Good afternoon, Chairman Nelson and members of the committee. My name is Michael LeBeau, M.D., and I serve as President for Sanford Health's western North Dakota region.

I am here today representing the Health Policy Consortium, a healthcare advocacy group that includes Trinity Health in Minot, Altru in Grand Forks and Sanford Health in Fargo and Bismarck. Collectively we provide 80 percent of the acute healthcare services in North Dakota.

Let me begin by thanking each of you for your support and your leadership. North Dakota's lawmakers are a frontrunner in making decisions important to providing uninterrupted care for the patients we serve. I raise up your decision to leverage federal funding for North Dakota's Medicaid Expansion program. While other states struggle through hospital closures and shrinking access to care, North Dakota's hospitals are supported by sound policy decisions and innovative financial investments.

As you know, North Dakota's healthcare system has the unique challenge of delivering care in one of the most rural parts of the country. We provide the same advanced medical services offered in urban areas, competing for the same medical professionals and investing in the same technology—the two biggest drivers of healthcare costs—all while serving a much smaller population. While we lack the advantage of economies of scale in urban areas, you have helped us maintain a healthy healthcare ecosystem necessary to keep healthcare services close to home.

It is what prepared us for the healthcare emergency that has tested healthcare systems across the country. While we are still working our way through the COVID pandemic, it's important to recognize North Dakota's healthcare system has been strong from day one and has successfully handled COVID-19 patient surges arguably better than other states who have had to ration services. By working together, North Dakota hospitals created access to safe,

high-quality hospital care for more than 3,700 critically ill COVID-positive North Dakota. During the last surge, when every available hospital bed in the state was being used, we found new beds and staffing by leasing additional space and hiring every contract nurse we could find. We leveraged our system affiliations to acquire necessary personal protective equipment (PPE), invested in testing equipment and supplies when the State Lab's productivity was bottlenecked and we redesigned the way we provide care, increasing the use of telemedicine by nearly 1000%.

Today we are leading the country by treating high-risk COVID-positive patients with outpatient antibody infusions that help reduce hospital admissions and save lives. We are also leading the country in administering COVID vaccinations.

I'm sharing this information to both thank you for helping us meet the challenge and to frame my comments regarding Medicaid Expansion. The decisions you have made to support North Dakota's healthcare system by making fair policy decisions and by leveraging federal dollars for sustainable Medicaid Expansion rates are key to maintaining our rural delivery system. Medicaid Expansion has helped us recruit and retain workforce, provide innovative behavioral health community services, invest in critically needed capital improvements and stand ready in the face of worldwide pandemic. We could not do this without your leadership and support.

Before I wrap up, I'd like to briefly discuss the Governor's proposal to reduce Medicaid Expansion rates. It has been suggested that paying North Dakota healthcare providers a different rate for those covered by traditional and those covered by Expansion is not fair to healthcare providers. That statement is false.

Different reimbursement rates for the same service is a standard practice in healthcare, not the exception. Hospitals receive many different payment rates from many different payors. Some pay more, some pay less. The only point that matters is at the end of the day is that the collective rates equal more than the cost of the care. Traditional Medicaid does not nearly cover the cost of care. Medicaid Expansion rates do. Collectively, Traditional and Expansion payments are still slightly less than the cost of care, but expansion payments – which have a 90% federal match rate – are tremendously helpful in offsetting costs that would otherwise be shifted to private health

insurance. Lowering Medicaid Expansion rates to Traditional Medicaid rates does not fix a problem for healthcare providers, it creates one.

In closing, I cannot overstate the stability Medicaid Expansion in its current form has provided. Leveraging Medicaid Expansion's 90 percent federal match to offset underpayments from Traditional Medicaid is both innovative and strategic. Without it, hospitals will need to reduce services, reduce staffing and, in some cases, close their doors. And businesses will be left to bear cost-shifting that will inevitably increase insurance premiums. HPC supports HB 1012 and encourages you, our state's policy leaders, to engage North Dakota's healthcare leadership in your work to ensure access to affordable, high-quality care for your constituents. We could not continue to enhance healthcare in North Dakota without your leadership and support, and we are pleased to support you.

I would be happy to answer any questions. Thank you.

Mike LeBeau, M.D.

House Appropriations Testimony #3366

Medicaid Expansion

January 26, 2021

INTRODUCTION:

Name: Mike Delfs

Position: President/Chief Executive Officer

Organization: Jamestown Regional Medical Center

Chairman Nelson and members of the Committee,

I appreciate the challenging and important work all of you are doing for North Dakota and I'm thankful for your willingness to serve. The legislature and the ND Hospital Association have accomplished some amazing things to positively impact the health of North Dakotans and provide coverage for at-risk individuals, particularly those who fall within the confines of the Medicaid Expansion program.

Thank you for the time to today to present information on what Medicaid Expansion means to Healthcare across the state, to the communities we serve and most importantly, to the people whose healthcare needs we serve.

As stated previously, but certainly worth repeating; there are few programs that can boast a 10% state contribution to access an additional 90% from the federal government. While some may assert the payment rate is too high, I would remind everyone that the rate was set high by design. To mitigate cost shifting to other programs and payers, the healthcare providers and state worked together to establish a rate that could stand on its own and not produce the unintended consequence of cost shifting.

The positive impact of the Medicaid Expansion dollars simply can't be overstated. Aside from the obvious positive influence of decreased bad debt, more patients qualifying for coverage and therefore seeking out care, the secondary but equally important economic impact for our communities is vital across the state. Economically, these dollars flow through to communities

and end up as money spend at the local hardware store, grocery story, car dealership, or spent on a new home and countless other ways.

Primarily, the Medicaid Expansion program has improved health of our citizens who receive care on a regular, consistent basis, with properly managed chronic conditions (such as hypertension and diabetes), and now receive much needed screenings that mitigate potential life threatening conditions and expensive treatment.

While providing medical care to an at-risk population, the Medicaid Expansion reimbursement has also provided a safety net to North Dakota's hospitals by reducing the amount of uncompensated care, commonly known as bad debt. For decades, segments of our population without medical coverage or with poor coverage, have used the emergency room as their healthcare option when their conditions became so bad they had no choice but to seek emergency assistance. As you may know, emergency room fees can run as much as ten times the fees of a primary care visit which further exacerbates the problem.

Consider the primary impact to hospitals and healthcare providers of losing these dollars. The patients who fall within the Medicaid Expansion rates do not simply "go away" if the reimbursement is reduced down to traditional Medicaid Rates. They continue to need services while the costs associated with providing care for them i.e. salaries of nurses, doctors, technicians, people to keep the facility germ free etc. do not change and in fact most often go up year-over-year to meet the increased cost of living. Similarly, the cost of medical (and nonmedical) supplies, drugs, equipment etc. continue to increase every year. Unfortunately, the fact remains; there are very few services that break even at traditional Medicaid rates and in fact, most services are reimbursed at a significant loss at traditional Medicaid rates. These losses range from 30% up to 60% or more on every dollar spent. This is true at all hospitals and healthcare providers across the U.S.

What could this mean for your local hospital? For example, at Jamestown Regional Medical Center, decreasing payment down to traditional Medicaid rates would result in a loss between $900,000 and $1 million dollars per year. Hospitals, including Jamestown Regional Medical Center, and the communities we serve, will be faced with some extremely hard choices. Are there services that the community needs but we can no longer provide? Will patients have to drive hundreds of miles to get the same services they are receiving locally today? Will your hospital be there in the future if they are no longer paid at the current rate for these patients? This is not an overly dramatic question to ask.

As I am working on this testimony, new information has just come out from CHPQR (Center for Healthcare Quality and Payment Reform) a national association dedicated to improving quality and exploring payment reform. They have assessed how many rural hospitals in each state are at immediate and high risk for closing. In ND, 9 rural hospitals are at immediate risk for closing with another 7 at high risk for closing. While some of this is due to the COVID-19 crisis, it illustrates that hospitals in ND do not have exorbitant bottom lines or that Medicaid Expansion dollars are reimbursement revenue that is the proverbial cherry on top. This reimbursement is vital for all hospitals to continue providing services locally.

I asking, on behalf of hospitals across the state that you continue all elements of the Medicaid Expansion program as-is. It helps patients, helps healthcare in maintaining the ability to serve our communities and it is good for the communities we serve. In short, it is good for North Dakota.

Thank you.

Chairman Nelson and members of the committee, thank you for the opportunity to appear before you today. My name is Dave Molmen and it is my privilege to serve as CEO of Altru Health System. I am here to offer comments in support of HB.

You've heard testimony by several of my colleagues today, and to save the committee's time, I want to go directly to the issue of payments under Medicaid Expansion. This committee has heard testimony asserting that payments under this program are higher than other states, and as such, should be reduced to be more "in line" with those other states. While on the surface, that argument may have some appeal, it does not hold up to even a cursory review.

I would like to briefly walk you through an understanding of how North Dakota came to expand Medicaid to explain why we feel the issue has been wrongly framed, and why it would not be wise to implement those reductions.

When the Affordable Care Act was signed into law in 2010, it created the Medicaid Expansion program wherein, if states determined to extend Medicaid eligibility to those with incomes of up to 138% of federal poverty level, the federal government would provide 100% of the funding to do so in 2014, phasing down to 90% in 2020.

The question of Medicaid Expansion was debated vigorously in the North Dakota legislature in 2013. Although the program held the promise of making care available to low-income families with a large federal match, there was concern, both about the long-term sustainability of the program and whether the federal share of funding would remain true to the initial representations. There was additional apprehension about standing up a program with required state funding, even if it was only a minority share.

Ultimately, the Legislature recognized the high benefit of this program to over 20,000 North Dakota citizens and moved ahead with plans to implement. It was the right thing to do for the health and well-being of North Dakotans, and in the succeeding years Legislators' wisdom would be borne out.

It's important to recognize that, after authorization, a parallel debate was taking place among our state's health care providers. Hospitals in the US had $160 billion cut from their Medicare payments to pay for Medicaid Expansion and other components of the Affordable Care Act. On one hand, participation in this program was a way to get some of that money back, but providers had severe concerns about the stability and funding of the program and for taking on a new category of care that may pose new risks, especially the risk of cost shifting. For a time, it appeared as though we might not be able to get enough contracts with providers to cover the state for care.

Now here's the important part, and I'm going to call this the North Dakota way.

I'm sure you're all aware of many situations in which North Dakota gets treated unfairly under Federal programs in comparison to many more populous, more urban states. Medicaid

Expansion is an example where North Dakota used skill in negotiating our unique position to achieve something very good for our state.

The Obama administration had, to the time of our negotiation with them, not been successful in getting Expansion authorized and implemented in any "red states". It was highly motivated and willing to do so, and willing to do what was needed to get it going in North Dakota. In these negotiations, they agreed to terms that would provide a rate of payment for services that would not have to be cross subsidized by other patients, as they do in other states. This was a huge success and it leveraged our position as a small rural state to get terms that worked our state. As I said, we can find plenty of examples where it hasn't worked that way for North Dakota, but this is something that over the years has delivered huge benefits to our people. Nearly a decade into the program, the federal government continues to pay 90% of the cost.

Mr. Chairman and members, should the state reverse this position on the misconception that a reduction of rates is better for North Dakota's citizens, health care systems will be put at great risk. That move would result in only a small relative benefit (10%) to our state, while turning away over $100 million from our economy every year. $100 million dollars *every year.* Over $50 million of that $100 million goes to directly pay nurses, doctors, and other workers, who provide the care to our people, pay taxes, build houses, and buy groceries. $50 million dollars *every year*. That's nearly 1,000 jobs across our state. Jobs in Hettinger, and Harvey, Bismarck and Grand Forks, Mayville and Jamestown; those are jobs of people caring for their neighbors in every community, your community and mine.

I want to emphasize that this is an issue that impacts all providers of care and does so equally in every community in our state, those in our rural areas and larger cities alike. As I did last week, I would encourage you; I would ask you, to inquire of leaders of the hospitals and institutions in your local area as to its impact. I'm confident that they will tell you exactly the same thing as Mr. Delfs and Dr. Lebeau have told you today. It would be a devastating blow. For many of our institutions, the reduction would be larger than their entire bottom line.

Returning once more to the assertion that North Dakota should be more like other states, superficially that might sound appealing, but study after study after study has shown that in those other states *the payment for services under their Medicaid programs are less than the providers' costs to deliver them*. This means that in those states the burden must be shifted to commercial payors or other sources. The tab has to be picked up by their Blue Cross Blue Shield plans, other payment sources, or somehow cut out of services delivered.

Emulating other states' model does not strike me as a formula for success.

Although I do not have access to the figures for the whole state, I would speculate that, in our state, implementation of the proposed reimbursement reductions would cut payments by nearly half.

I hear actuaries and economists throw around a lot of numbers, formulas, and jargon about the costs and margins for hospital services, and I think they mostly just confuse people and cloud the issue. So here's the back-of-the-envelope way that I think about it, and it works exactly the same way as any farmer or business person would think about it for their own operation. It goes like this: operating margins for hospitals in the State of North Dakota have generally ranged between -5% and 3% over the past several years. In the case of a 3% operating margin, that means the revenue a hospital brings in would be 3 cents more on the dollar than the expenses they incur to deliver the services. Three cents. And in the case of hospitals with negative operating margins, it means they would lose several cents on every dollar of service.

With margins like that, it doesn't take any complex actuarial formula to get the idea that if you reduce the payment for any type of service by 50%, as has been suggested by some, that service would now have to now have to be subsidized by other services or payments from other sources. And I would say that for any form of payment, whether it was Medicaid, commercial insurance, or any other form of payment.

My question is, why would you do that? Why would you severely cut the payments to support the program only to send the money that could pay for it out of the State of North Dakota to Washington DC? Why would we purposely underpay services and turn away $9 to at best save 1?

The North Dakota Legislature was wise to expand our Medicaid program. It's done immeasurable good for our citizens and our state. We negotiated well and effectively to ensure the program's sustainability. Mr. Chairman and members of the committee, I ask that in your wisdom you act to protect our success and see that it not be undone

House Appropriations
Human Resources
Division

HB 1012 #3491
January 26, 2021

Chairman Nelson and Committee Members, I'm Courtney Koebele and I serve as executive director of the North Dakota Medical Association. The North Dakota Medical Association is the professional membership organization for North Dakota physicians, residents and medical students.

NDMA supports keeping Medicaid Expansion at current rates through a private carrier. Reducing Medicaid Expansion at this point would have a devastating effect on North Dakota's healthcare system.

As the committee knows, Medicaid Expansion is 90% funded by the federal government. Therefore, moving Medicaid Expansion in house would provide a cost savings of $10.7 million, with a loss of $85.9 million to North Dakota's healthcare systems and private providers. There is no doubt that this would have a massive impact on all providers, not just hospitals.

The 2016 allotment was particularly harsh on physicians. Physicians did not receive a 4% cut, or even a 10% cut. According to our calculations, the Department cut traditional Medicaid physician payments by 33%. With reduction of Medicaid rate and the elimination of the budgeted 3% inflationary increase, the total reduction to health care

providers was $30.5 million. The North Dakota Medical Association had serious concerns about these cuts. In short, the already small operating margins of many systems and providers were eliminated.

Medicaid expansion helped cushion the blow of these cuts. Medicaid expansion is a program that is working well for the patients and the providers. NDMA urges this committee to keep the program as it is today.

Expanding Medicaid provided the much-needed coverage to our low-income patients, improved access to care, improved the health and well-being of the newly insured, and improved the financial stability of our clinics and hospitals. Medicaid expansion is not simply a budget issue. You must also consider the real human effects of this decision, including the health and well-being of those who gain coverage under expansion. Medicaid expansion provided coverage to a population who never before had coverage – including behavioral health coverage.

Our physicians provide the safety net medical services for the most vulnerable of our population – a population of Medicaid patients who present unique, and often some of most difficult, challenges. Our Medicaid patients benefit from the services we are able to provide them – from a North Dakota health care system that is recognized nationally as a high-quality, efficient health care system. However, we have unique healthcare workforce recruitment and retention challenges occurring in our state. Our capital needs continue to grow, with aging facilities, technology and equipment. Our costs for medical

equipment, new technology and supplies continue to increase. We must pay the same rates for physicians, nurses and other health care personnel as the rest of the country.

NDMA is very concerned that going back to the trend of poor payment will not bode well for the future of health care in North Dakota. In time, the access and quality in health care enjoyed in the state will deteriorate rapidly as health care resources become increasingly scarce and health care workforce and capital needs are not met. We need to work together on all avenues that provide resources to sustain our health care system.

Physicians in North Dakota continue to do their part in providing good access to quality medical care for Medicaid beneficiaries and showing their ongoing commitment to the long-term sustainability of the Medicaid program. We look forward to working with the Committee in addressing the future needs for Medicaid medical services. Thank you for the opportunity to address this committee. I would be happy to answer any questions.

North Dakota Practicing Physicians by Specialty

Specialty - Primary Care

Of the 1695 total physicians, 34% or 581 physicians are in primary care. For this purpose, we define primary care as family medicine, internal medicine, obstetrics, and pediatrics (first self-designated specialty only).

Chairman Nelson and members of the House Appropriations Human Services Division: #3480

My name is Kurt Snyder, and I am the Executive Director of the Heartview Foundation. Heartview is currently offering Medication Assisted Treatment (MAT) to 291 individuals including some at North Dakota State Penitentiary in Bismarck and Dakota Women's Correctional in New England. At any given time, we have over 400 individuals in our care. We employ a psychiatrist, medical providers, psychologists, nurses, addiction counselors, mental health counselors, social workers, peer support specialists, case managers, and residential technicians. Last year we served individuals from 38 of the 53 counties of ND. Of our patient population, over 65% are Medicaid or Medicaid Expansion. (20% Medicaid and 47% ME).

I am here today to voice our support for the re-authorization of Medicaid Expansion. More specifically we support:

Removing the Sunset Clause

- I have a number for you, 47. 47% of our patient population is Medicaid Expansion. Almost ½ of our patient population is covered for only 2 years at a time. How can treatment providers plan expansion efforts into rural or underserved communities with such a vulnerable funding base? How can we be expected to meet the needs and demands of the opioid epidemic without confidence in our funding streams? Please remove the sunset clause!

Retain Medicaid Expansion with a Private Insurance Carrier

We strongly oppose moving Medicaid Expansion under Medicaid for these main reasons:

- First, the Mental Health Parity and Addiction Equity Act of 2008 (MHPAEA) was meant to prevent health insurance plans from imposing less favorable benefit limitations on mental health or substance use disorder benefits than on medical surgical benefits. Medicaid Expansion fully complies with MHPAEA. ND Medicaid does not. MHPAEA specifically restricts annual limits. ND Medicaid has annual restrictions on Intensive Outpatient, Partial Hospitalization and High Intensity Residential. Parity also insures that "Medical Necessity" be the standard for authorizing services. Again, ND Medicaid does not follow parity in this respect. ND Medicaid does not utilize accepted clinical standards for authorizations but instead providers must request additional days of coverage that sometimes takes months for approval. If Expansion is moved under ND Medicaid over 67% of our patients would not have the important protections of this federal parity law. The law that prevents discrimination and stigma.

- I have another number for you, 67. 67% of our patient population would be ND Medicaid if Expansion is moved under the Medicaid umbrella. 67% of our patient population would be subject to ND Medicaid's claims processing. This terrifies me! ND Medicaid has testified on many

occasions that clean claims are paid in a timely manner, which we agree upon. The problem, however, is that ND Medicaid denies 33% of Heartview claims, while other commercial payers average under 9%. Furthermore, reprocessing denied claims is extremely difficult with ND Medicaid. We often experience wait times of weeks, and sometimes months to even get a response from Medicaid on a single claim. In January 2019 ND Medicaid gave us a $450,000 cash advance because we were having cash flow issues due to overwhelming outstanding Medicaid claims. As of today, 55% of outstanding claims with ND Medicaid are over 6 months old. In comparison, only 4% of Medicaid Expansion outstanding claims are over 6 months old.

We Support Implementation and Continuation of Commercial Rates

- Finally, I need to address reimbursement rates. Last session there was an amendment that was intended to provide consistent reimbursement rates across providers. However, it turned out that reimbursement rates within substance use providers were not established equitably. A level of care called Partial Hospitalization Program or PHP, (which makes up over 50% of our revenue) was given a higher reimbursement rate to hospital-based programs. Community based programs were given a lower rate which is inherently unfair. I would argue that our quality of care exceeds hospital-based programs because we offer all 3 FDA approved medications for opioid use disorder. Even within the ND Medicaid reimbursement rate structure there is no difference between hospital-based programs and community-based PHP programs.

- According to the American Hospital Association, 18.5% of the payer mix in hospitals is attributed to Medicaid. Most Medicaid Expansion enrollees are childless adults working one or more jobs and in much-needed access to chronic disease management, mental health services and addiction treatment programs. As a result of the needs of this population they are overrepresented in our services. Substance use providers need commercial rates to offset the disproportionate number of patients (67%) within our service structure.

This concludes my testimony, and I would stand for any questions.

Kurt A. Snyder, MMGT/LSW/LAC

House Appropriations Committee, Human Resources Division - HB 1012

Representative Jon O. Nelson, Chair #3341

January 26, 2021

Chairman Nelson, Members of the Committee:

My name is Brian Ritter and I'm President the Bismarck Mandan Chamber EDC. I am here today on behalf of our organization's approximately 1,200 members in support of HB 1012.

While it may seem out of place for a business organization to offer its support for the Department of Human Services appropriations bill, our 2021 Legislative Agenda specifically states, "*Support efforts to sustain Medicaid Expansion to ensure access to services and to mitigate increased expense to businesses."* And make no mistake, Medicaid Expansion is critically important to the Bismarck-Mandan business community.

One reason why is because Bismarck-Mandan's two largest private employers are healthcare providers. Thousands of employees in our community are employed in an industry directly impacted by Medicaid Expansion; the rates of which cover the cost of care. As not-for-profit entities, reducing those rates can directly impact their viability and in turn their ability to employ Bismarck-Mandan residents.

Additionally, if those rates are reduced, the cost of care will be shifted to private insurance carriers who may pass those costs on to the business community in the form of increased premiums. Once again, this is a direct impact on the business community and why we're here today supporting this legislation.

And finally, Medicaid Expansion becomes a business community concern because most Medicaid Expansion enrollees work in jobs that do not provide health insurance. In an economy that already has nearly 2,400 open jobs, any employee not able to participate in the workforce because of a health concern left untreated is a detriment to the business community.

In short, maintaining Medicaid Expansion rates at their current levels is a good thing for our providers, our employees and our community. As such, I respectfully ask the Committee for a DO PASS recommendation on HB 1012.

Thank you for the opportunity to testify and should you have any questions, I would happy to address them.

Testimony
House Bill 1012 – Department of Human Services Budget
House Appropriations – Human Resources Division
Representative Jon Nelson, Chairman

January 25, 2021 #2499

Chairman Nelson and Members of the House Appropriations Committee – Human Resources Division:

My name is Lorena Poppe. I am the owner and executive director of Poppy's Promise, a Bismarck-based provider of In-Home Support services through the Developmental Disabilities traditional Home and Community Based Waiver. I am testifying today in support of the Department of Human Services budget, particularly that of the Developmental Disabilities Division, with amendments.

I started Poppy's Promise in the Fall of 2017 in response to families of kids with disabilities expressing there was a shortage of providers to be available to meet the needs of their children and families. My goals were to 1) be another option as families seek out services that will best meet the needs of their children, and 2) meet kids and families where they are at on their unique journeys to full inclusion and participation in home and community life. We believe strongly in designing supports that will help to keep kids in their family homes and communities and minimize the need for institutionalization in a place that is unfamiliar to the child. In our short existence, we have seen the difference a small provider organization can make and are proud that we have been part of keeping families together in their home communities.

I am the sole owner of Poppy's Promise. I started my business by getting a Small Business Administration loan and taking a leap of faith. I knew there was a need, but understand now more than ever, 3 ½ years later, how critical it is that DD providers be supported to do the important work of helping people with disabilities achieve maximum health, happiness and freedom of choice across their lifetimes. At Poppy's Promise, we operate on a month-to-month basis without having a large financial reserve to fall back on. Since opening the doors at Poppy's Promise, I have been excited to see other new provider organizations popping up across the state. This is an exciting thing for North Dakota and I believe there is definitely a place for new organizations that can work together with longstanding providers to assure gaps in services are filled and people can receive supports and services in the least restrictive setting.

In listening to the budget detail of the DD Division of the Department of Human Services, I am concerned that new providers and those that are smaller and more specialized are not being fully considered. Specifically regarding the In-Home Supports program, you heard testimony from the Department indicating that program had the largest drop in utilization over the course of the Covid-19 pandemic (27%). And yet, In-Home Supports was left out of the Appendix K option to receive retainer payments to help providers stay in business during the pandemic. For providers of services that were eligible to receive retainer payments, those payments were an important part of keeping the doors of those businesses open. With the current extension of the Appendix K, there is an opportunity for the Department to extend the retainer payment option to those providers most in need and help to assure the services families rely upon don't disappear.

Another area of concern for all providers of DD services, but especially small providers, is the intention of the Department of Human Services to require providers to absorb the cost of accreditation necessary to maintain DD licensure. Because DHS contracts with one organization for accreditation, the Council on Quality and Leadership (CQL), providers would be forced to pay several thousands of dollars toward the accreditation process. This includes travel and lodging expenses of CQL reviewers coming to North Dakota from across the country. There is no reimbursement for accreditation built into the DHS budget. Poppy's Promise does not have the ability to cover that cost. I believe strongly in review processes being in place to assure quality of services, but also know the reality of trying to maintain a business that does not have the ability to set aside thousands of dollars for unreimbursed licensure requirements.

I come before you today to ask that you consider the current state of services for people with disabilities during an ongoing pandemic, the financial vulnerability of new and small providers, and the addition or preservation of funds to assure all providers who are relied on heavily by the citizens of North Dakota are able to survive and stand strong in continuing to provide supports and services.

Thank you for your time today, and I would be happy to answer any questions you may have.

NDAB Resolution 2021-03:

State 2021 – 2023 Appropriation for the Older Individuals Who Are Blind (OIB) Program

Whereas, demographically, North Dakota is among the states which has the highest proportion of people per capita who are 55 years of age and older, and this is the subpopulation of people who have the highest incidence of significant sight loss that is not medically correctable; and,

Whereas, seniors who receive blindness rehabilitation skills training to adjust to sight loss can postpone or avoid institutionalized care and live more productive and fulfilling lives; and,

Whereas, the appropriation that's made for the older Individuals Who Are blind (OIB) program in the state's budget is critical to meet the costs that this program realizes because, (1) the federal government funds the program in North Dakota at a minimal base level due to the size of our population compared to other states, and (2) travel costs are significant because the vision specialists employed in the program need to meet in the client's home setting to make a proper evaluation to assess the skills training needed for that individual person;

Now, Therefore, be it resolved by the Board of the North Dakota Association of the Blind at its meeting on this Sunday, January 10, 2021, that given the increasing demand for vision rehabilitation skills services available through the Older Individuals Who Are Blind Program, that we,

(1) Strongly Urge the Governor and the 67th State Legislature that convened on January 5, 2021, to maintain and increase the state appropriation that is allocated in the 2021-2023 biennial budget within the HB1012 Human Services budget for the Older Individuals Who Are Blind Program and that our state appropriation for this program would be increased to a 25% match of the federal appropriation that North Dakota receives for this program; And,

(2) urge our federal congressional delegation, Senators Hoeven and Cramer, and Congressman Armstrong, to work to maintain and increase the federal appropriation for the Older Blind Program in the federal budget and that they would work to have the formula for the federal appropriation be based, not only on the state's population size, but also on a state's per capita percentage of people who are 55 years of age and older.

Testimony for the Older Individuals Who Are Blind (OIB) Program Appropriation within HB1012.

To: Chair John Nelson, and Members of the House Appropriations Human Services subcommittee, North Dakota 67th Legislative Assembly.

From: Allan Peterson, Legislative Committee, North Dakota Association of the Blind (NDAB).
Home address: 7009 Horseshoe Bend, Horace, ND 58047.

Re: Testimony in support of the state Appropriation for the Older Individuals Who Are Blind (OIB) Program within the Division of Vocational Rehabilitation, North Dakota Department of Human Services

Greetings Chairman Nelson, and members of the House Appropriations Human Services Subcommittee,

We are testifying on our own behalf, as well as to help represent the advocacy goals of the North Dakota Association of the Blind (NDAB). Our testimony is directed in support of the Appropriation for the Older Individuals Who Are Blind Program within the Division of Vocational Rehabilitation for its operation during the next biennium of 2021 - 2023.

In North Dakota, the Older Individuals Who Are Blind Program is administrated by the Division of Vocational Rehabilitation within the Department of Human Services. Funding for the program is generated through a 90% grant from the federal government which requires a minimum state appropriation of 10%. Federal funding for the program is authorized under the U.S. Rehabilitation Act.

Federal funding for the Older Individuals Who Are Blind program is allocated to the states on the basis of population size. Because North Dakota's population base is small in comparison to other more populated states, it receives what is termed a minimal allocation. Minimal federal funding is a problem for the program here in North Dakota because our state is geographically large in relation to its population size, which necessitates a lot of travel to meet with clients in their homes. Also, our state has a higher proportion of people in the older age ranges, which experience a much higher incidence of sight loss. The Older Individuals Who Are Blind Program is specifically directed to serve individuals who are 55 years of age and older.

Although there have been many significant advances in eye care, sight problems such as macular degeneration, diabetic retinopathy, glaucoma, and cataracts continue to be primary sources of vision impairments and blindness, particularly, for persons who are 55 and older.

The professional staff which are trained to provide the services for the Older Blind Program are classified as vision rehabilitation specialists. In North Dakota there are 6 vision rehabilitation specialists assigned to work in each of the state's 8 defined Human Service regions. Vision specialists, employed in the older blind program, travel to a client's home to do an assessment of needs and provide the services and counseling that is needed in that person's home environment and is individualized to meet client needs. The services of this program have helped thousands of our older citizens who have experienced severe sight impairments to become more independent and enjoy a more productive and fulfilled life in spite of having lost some or all of their eyesight.

The skills and aids that the vision rehabilitation specialists provide to older citizens with sight loss, is often quite an (pardon the pun) "an eye opener" which does much to help them stay in their own homes and postpone or avoid institutionalized nursing home care. The cost savings that are gained by postponing or avoiding institutionalized care and the increased sense of wellbeing and dignity that are realized by being more independent are compelling reasons for the state to provide the appropriation needed for this program in North Dakota. In most instances, the clients served are elderly and live on very fixed incomes so for them to purchase a vision aid that would help them is difficult or impossible.

The rural character of our state and limitations on access to public transportation can mean those who experience severe sight loss are isolated and very dependent on others.

You might ask, among us in ND, **how many today have a loss of eyesight**? The U.S. Senses Bureau estimates that presently there are approximately 762,062 residents in North Dakota. Many credible studies have demonstrated that, conservatively, that **3.3%** among the general population, will have conditions that mildly, moderately, or severely medically compromise their eyesight – this means that more than 20,000 individuals in North Dakota are affected by uncorrectable sight loss - a quarter of whom (5,000) have significant sight loss and/or are "legally blind".

About North Dakota Association of the Blind (**NDAB**): You could say that NDAB is an organization of and for people who are blind or sight impaired. We are a statewide membership organization founded 85 years ago in 1936, a majority of our members are blind or sight impaired.

Testimony
House Bill 1012
House Appropriations Human Resources Division
Rep. Jon Nelson, Chairman
January 26, 2021 #3274

Chairman Nelson, members of the House Appropriations Human Resources Division, I am Heather Simonich, Operations Director of Nexus-PATH. Nexus-PATH is a member of Nexus Family Healing, providing child welfare and behavioral health services in ND. I am here today to provide input on HB1012, specifically the Medical Services budget, relating to the equalization of Targeted Case Management (TCM) rates.

We understand the Department's effort to equalize Targeted Case Management rates within and across state plans. However, as a provider charged with supporting our schools and communities with much needed community-based services now more than ever – we have significant concerns regarding the established targeted case management rate.

Recently, Nexus-PATH creatively partnered with six North Dakota school districts to deliver intensive case management services to students and their families. This is a formal partnership with a signed MOU that places a Nexus-PATH school case manager within the school building. This individual works as a member of the school team serving students with the highest needs as identified by school staff. This partnership offers school professionals and students access to an intensive service not available through traditional school supports.

The Nexus-PATH case manager serves as a bridge between school, home, and the community. An individualized care plan based on a comprehensive assessment of student and family needs and strengths guides service delivery. The case manager routinely visits the family home, assists with transportation, connects the family to services available in the community, assists with student behavior at school, and works intensively with the student and family to build the skills necessary to overcome their challenges. Importantly, this service is provided throughout the summer and provides the family with access to a 24/7 on-call service staffed by a licensed social worker. Initial feedback from school professionals, students, and families has been overwhelmingly positive.

Currently, the cost of this service is funded by Medicaid Targeted Case Management or BCBSND billing, the school district, and various grants/donations. The cost of this service, particularly in our rural communities, is not sustainable without a significant contribution by the school district and sustained grant funding. As a provider, it is an ongoing challenge to rely heavily on unstable grant and school funding from one year to the next. The challenges in our rural areas related to the behavioral health workforce shortage and serving clients across expansive geography necessitates a targeted case management rate be established based on true service costs. The service referenced here is an excellent example of the type of service required to meet our most vulnerable families where they are at, build trust, and begin healing while at the same time supporting our educators and improving academic success.

I will close today just as I did yesterday – reminding us of Superintendent Baesler's statement on Friday, "We cannot do this alone". These words weigh heavy on me. I have provided you with an example of one innovative and successful private-public partnership to better meet the needs of our students and their families. North Dakota service providers can do this. It will take all of us, and your full support, but I believe we can answer the call. Our children's lives depend on it.

Thank you for the opportunity to testify before your committee today. I am happy to answer any questions you may have.

The individuals below provided permission to list their name, email, and school district (agency) in support of this testimony and welcome questions you may have regarding their partnership with Nexus-PATH to deliver School Case Management service.

Total savings over 40 years	**$0**	($**369,568,960**)	($**553,086,435**)

MAKE ONGOING REPAIRS OR BUILD: THREE OPTIONS FOR STATE HOSPITAL

Current Situation: Make On-Going Repairs

Requires immediate General Funds

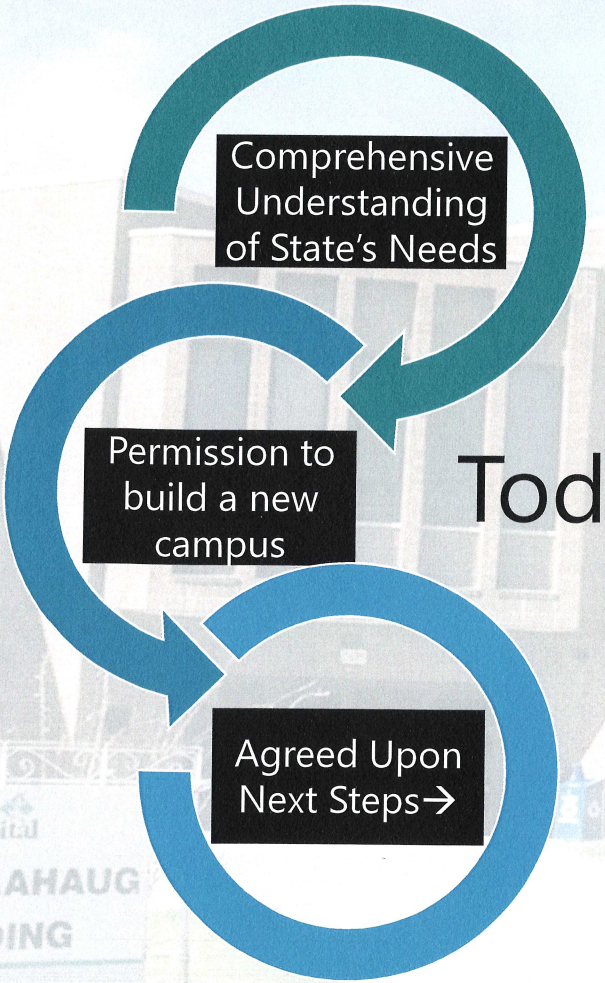
- State secures General Funds
- State procures an architectural design
- State procures contractors to renovate facility
- State maintains facility with reoccurring costs
- State pays the bond/loan over time

No operational savings

New State Hospital via Bond (Loan) Option

Requires no up-front funds

- State secures funds
- State procures an architectural design
- State procures contractors to build facility
- State maintains facility with reoccurring costs
- State pays the bond/loan over time



Operational savings

New State Hospital via Public/Private Partnership (Lease)

Requires no up-front funds

- State procures private partner
- Private partner procures an architectural design
- Private partner builds facility
- Private partner operates and maintains facility
- State makes annual payment over life of lease
- State retains ownership of hospital
- Private partner returns asset at 85% new

Operational savings

Today, We Are Seeking Authorization

PROPOSED AMENDMENTS TO HOUSE BILL NO. 1012

Page 4, after line 16, insert:

"**SECTION 9. CAPITAL PROJECTS AND PAYMENTS.** During the period beginning with the effective date of this Act, and ending June 30, 2023, the department of human services is authorized to expend funds for the following capital projects and payments:

1. The payment of special assessments at the state hospital and life skills and transition center; and
2. The demolition of the chapel and employee building and associated tunnels at the state hospital.

Notwithstanding sections 54-16-04 and 54-27-12, the director of the office of management and budget may transfer appropriation authority between line items within subdivisions 1, 2, and 3 of section 1 of this Act for the biennium beginning July 1, 2021, and ending June 30, 2023, as requested by the department of human services for the department to expend funds on the demolition of the identified buildings and associated tunnels and for emergency capital projects. The department of human services shall notify the legislative council of any transfer made pursuant to this section. The department of human services shall report to the budget section after June 30, 2022, any transfer made in excess of $50,000 and to the appropriations committees of the sixty-eighth legislative assembly regarding any transfers made pursuant to this section.

SECTION 10. STATE HOSPITAL BUILDING PROJECTS. The department of human services is authorized to construct a new state hospital on the property owned by the state of North Dakota, in Stutsman County, near or on state hospital's current campus. The new state hospital may include space for the operation of the regional human service center. The department of human services shall utilize chapter 48-02.1 and have a private operator to build, transfer, and operate the facility through a development agreement on leased property owned by the state of North Dakota. The continuing cost to support the new state hospital through a development agreement must be included in the department of human services' 2023-25 biennium budget request submitted to the sixty-eighth legislative assembly.

SECTION 11. LEGISLATIVE INTENT – CONVEYANCE OF LAND. It is the intent of the sixty-seventh legislative assembly that the department of human services and national guard enter into an agreement to lease up to twenty acres of real property associated with the state hospital for the national guard to build a new training and storage center.

SECTION 12. EMERGENCY. Sections 9 and 10 of this Act are declared to be an emergency measure."

Renumber accordingly

CHILDREN AND FAMILY SERVICES

In ND child welfare services are delivered by local, state, tribal and private providers using both federal and state funds

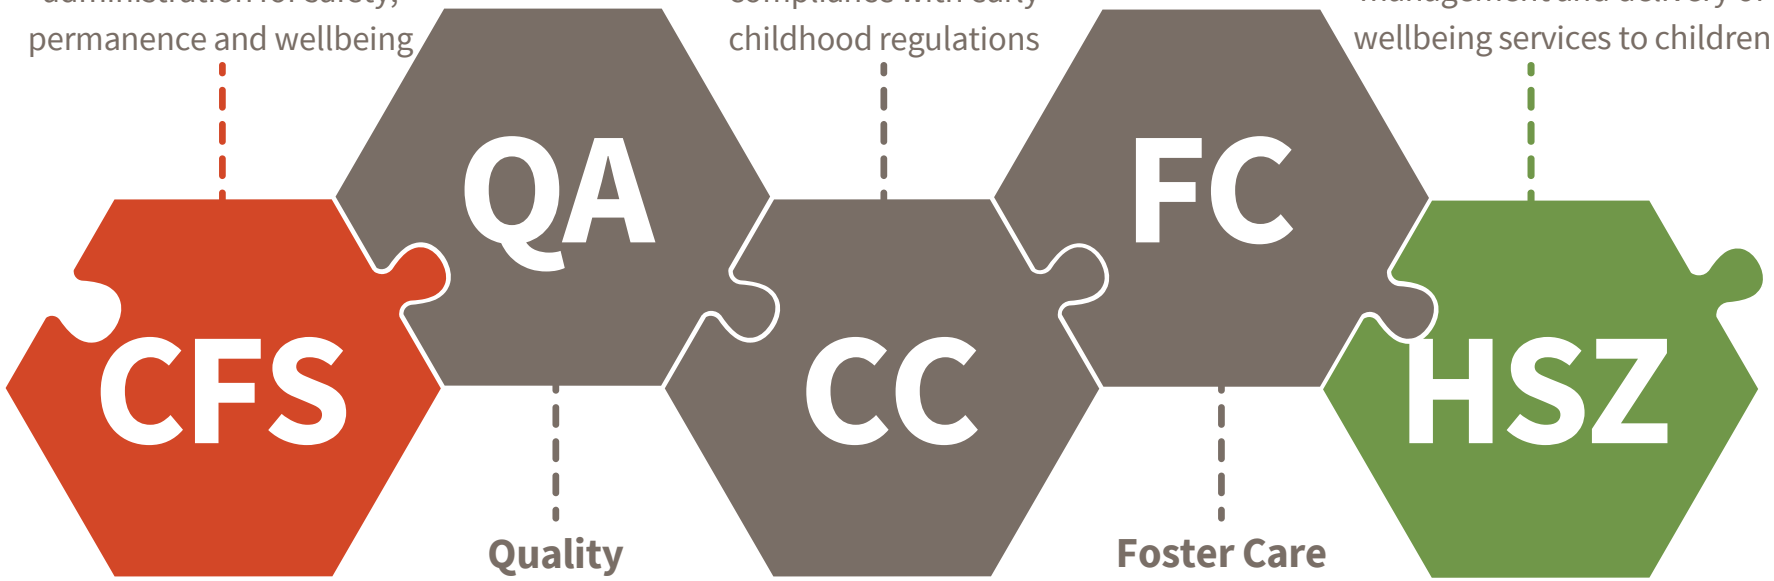
Dept of Human Services

- **Human Service Centers**
  - Crisis teams
  - Intensive In-home services (therapy & treatment, skills training, behavior mod)
  - Targeted case management
- **Children & Family Services**
  - Training and coaching of field staff
  - Oversee quality service delivery
  - Administration of policy

Private Human Service Providers

- Safe shelter for crisis
- Human trafficking supports and safe beds
- Unaccompanied minor services
- Foster homes, including therapeutic
- Targeted case management

Tribal Social Services



- FRAME entry and foster eligibility determinations
- Joint practice model and ICWA training
- Native American Training Institute supports (training, billing, svc delivery)
- New FMAP service contracting
- IV-E agreements boost access to funding

Human Service Zones

- Assess present and impending danger
- Safety planning
- Case management
- Assess and build parent capacities
- Provide safe supports for children and families
- Refer and broker services needed for families
- In home supports
- Parent aides
- License foster homes
- Intake for child abuse and neglect reports

A Focus on Quality, Fidelity & Consistency

Connector teams link program and policy with client services

Program & Policy

41.5 employees in CFS budget;
Policy planning and administration for safety, permanence and wellbeing

Child Care Licensing

24 FTE in HSZ budget
Oversee licensing and compliance with early childhood regulations

Client Services

≈300 HSZ employees
Assess safety; case management and delivery of wellbeing services to children

Quality Assurance

10 FTE in HSZ budget
Monitor quality across child welfare system; provide coaching/training

Foster Care Licensing

16 FTE in HSZ budget
Assure quality and efficient delivery of support services to families

GREEN SHEET WALKTHROUGH

	Executive Budget Request			
	FTE Positions	**General Fund**	**Other Funds**	**Total**
Children and Family Services				
Continued program changes		3,172,228	(394,323)	2,777,905
Agency savings plan		(12,191,335)	(7,728,080)	(19,919,415)

Our goals

- Reduce Foster Care Numbers
- Reduce Institutional Placements
- Reduce Out of State Placements
- Reduce Substance Abuse as Abuse/Neglect factor
- Increase Kids receiving evidence-based supports
- Reduce severity of school-based behaviors

"North Dakota's Child Welfare System is focusing on efforts to **ensure availability and access** to a broad, flexible array of **effective community-based services and supports**

for children and their families

that address their emotional, social, educational and physical needs,

including traditional and nontraditional services as well as natural and informal supports."

CHILDREN AND FAMILY SERVICES

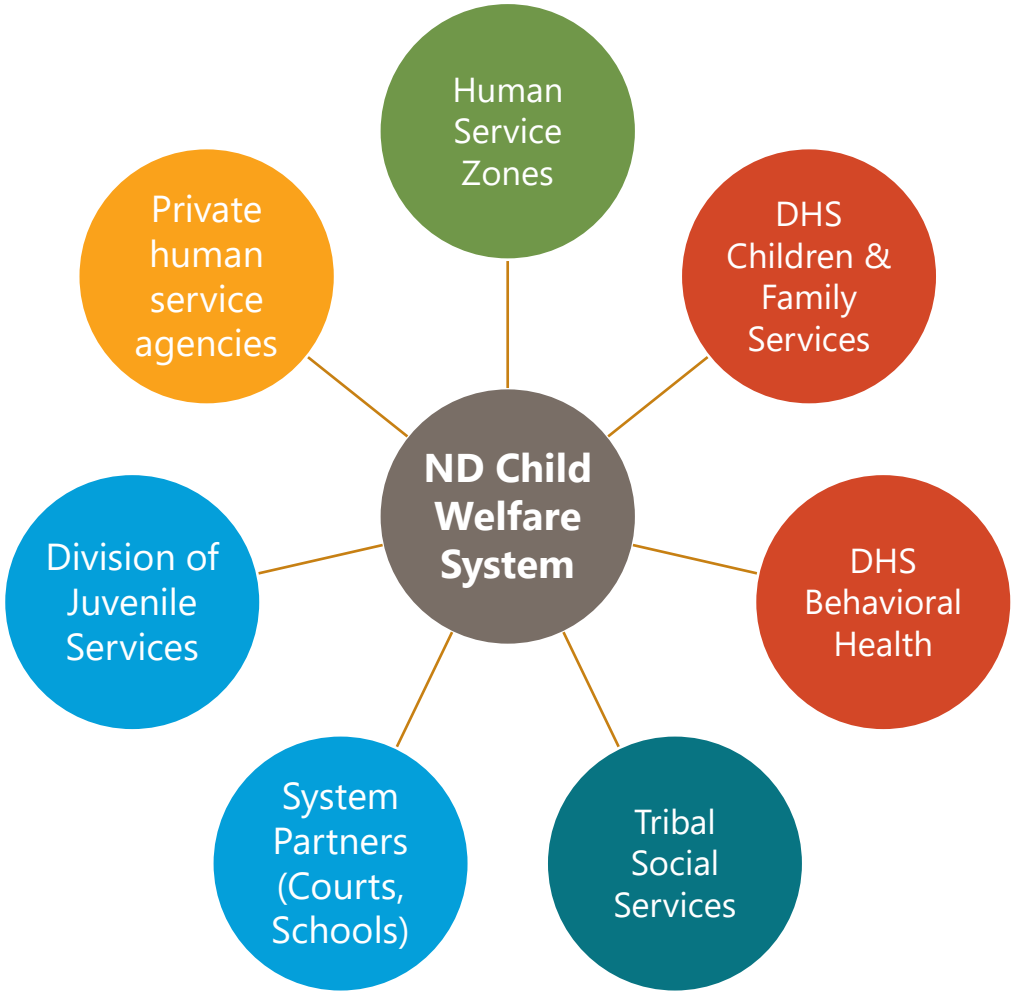
Replacement of FRAME/CCWIPS

BUDGET AMOUNT

$30,000,000

- $15 M general fund
- $15 M federal funds



PURPOSE

Develop and deploy system to manage child protection, foster care, in-home supports to families, and adoption

Supports administrative efficiencies, retirement of mainframe, and requirements for continued federal program compliance

The replacement of FRAME/CCWIPS affects all parties involves in the ND Child Welfare System

The mission of the child welfare system in North Dakota

Safe Children
Strong Families

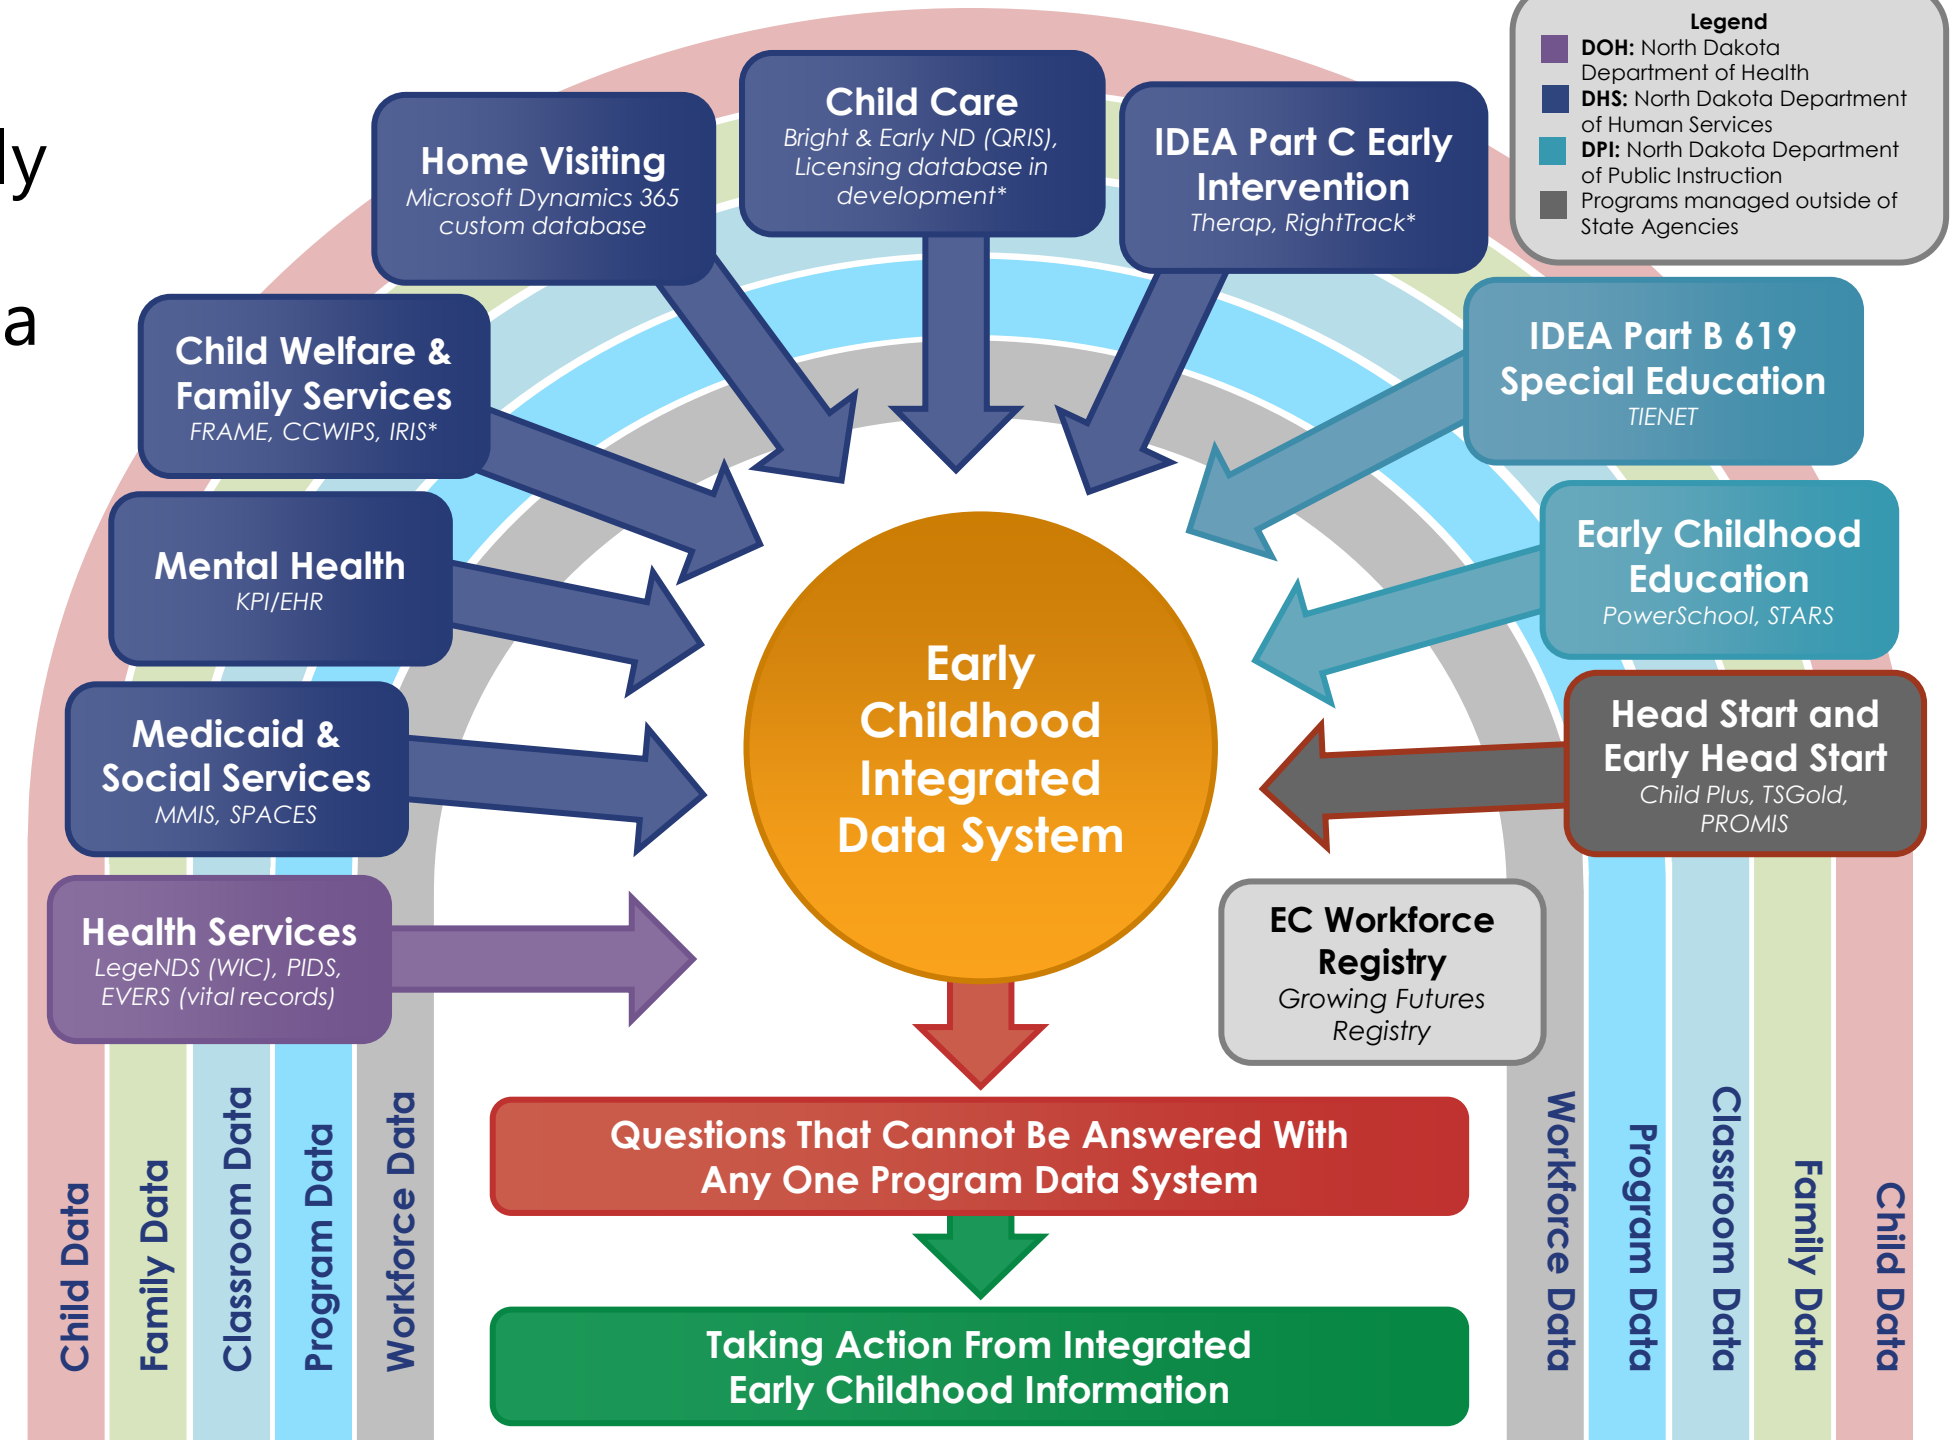
CHILDREN AND FAMILY SERVICES

Early Childhood Integrated Data System (ECIDS)

BUDGET AMOUNT

$500,000

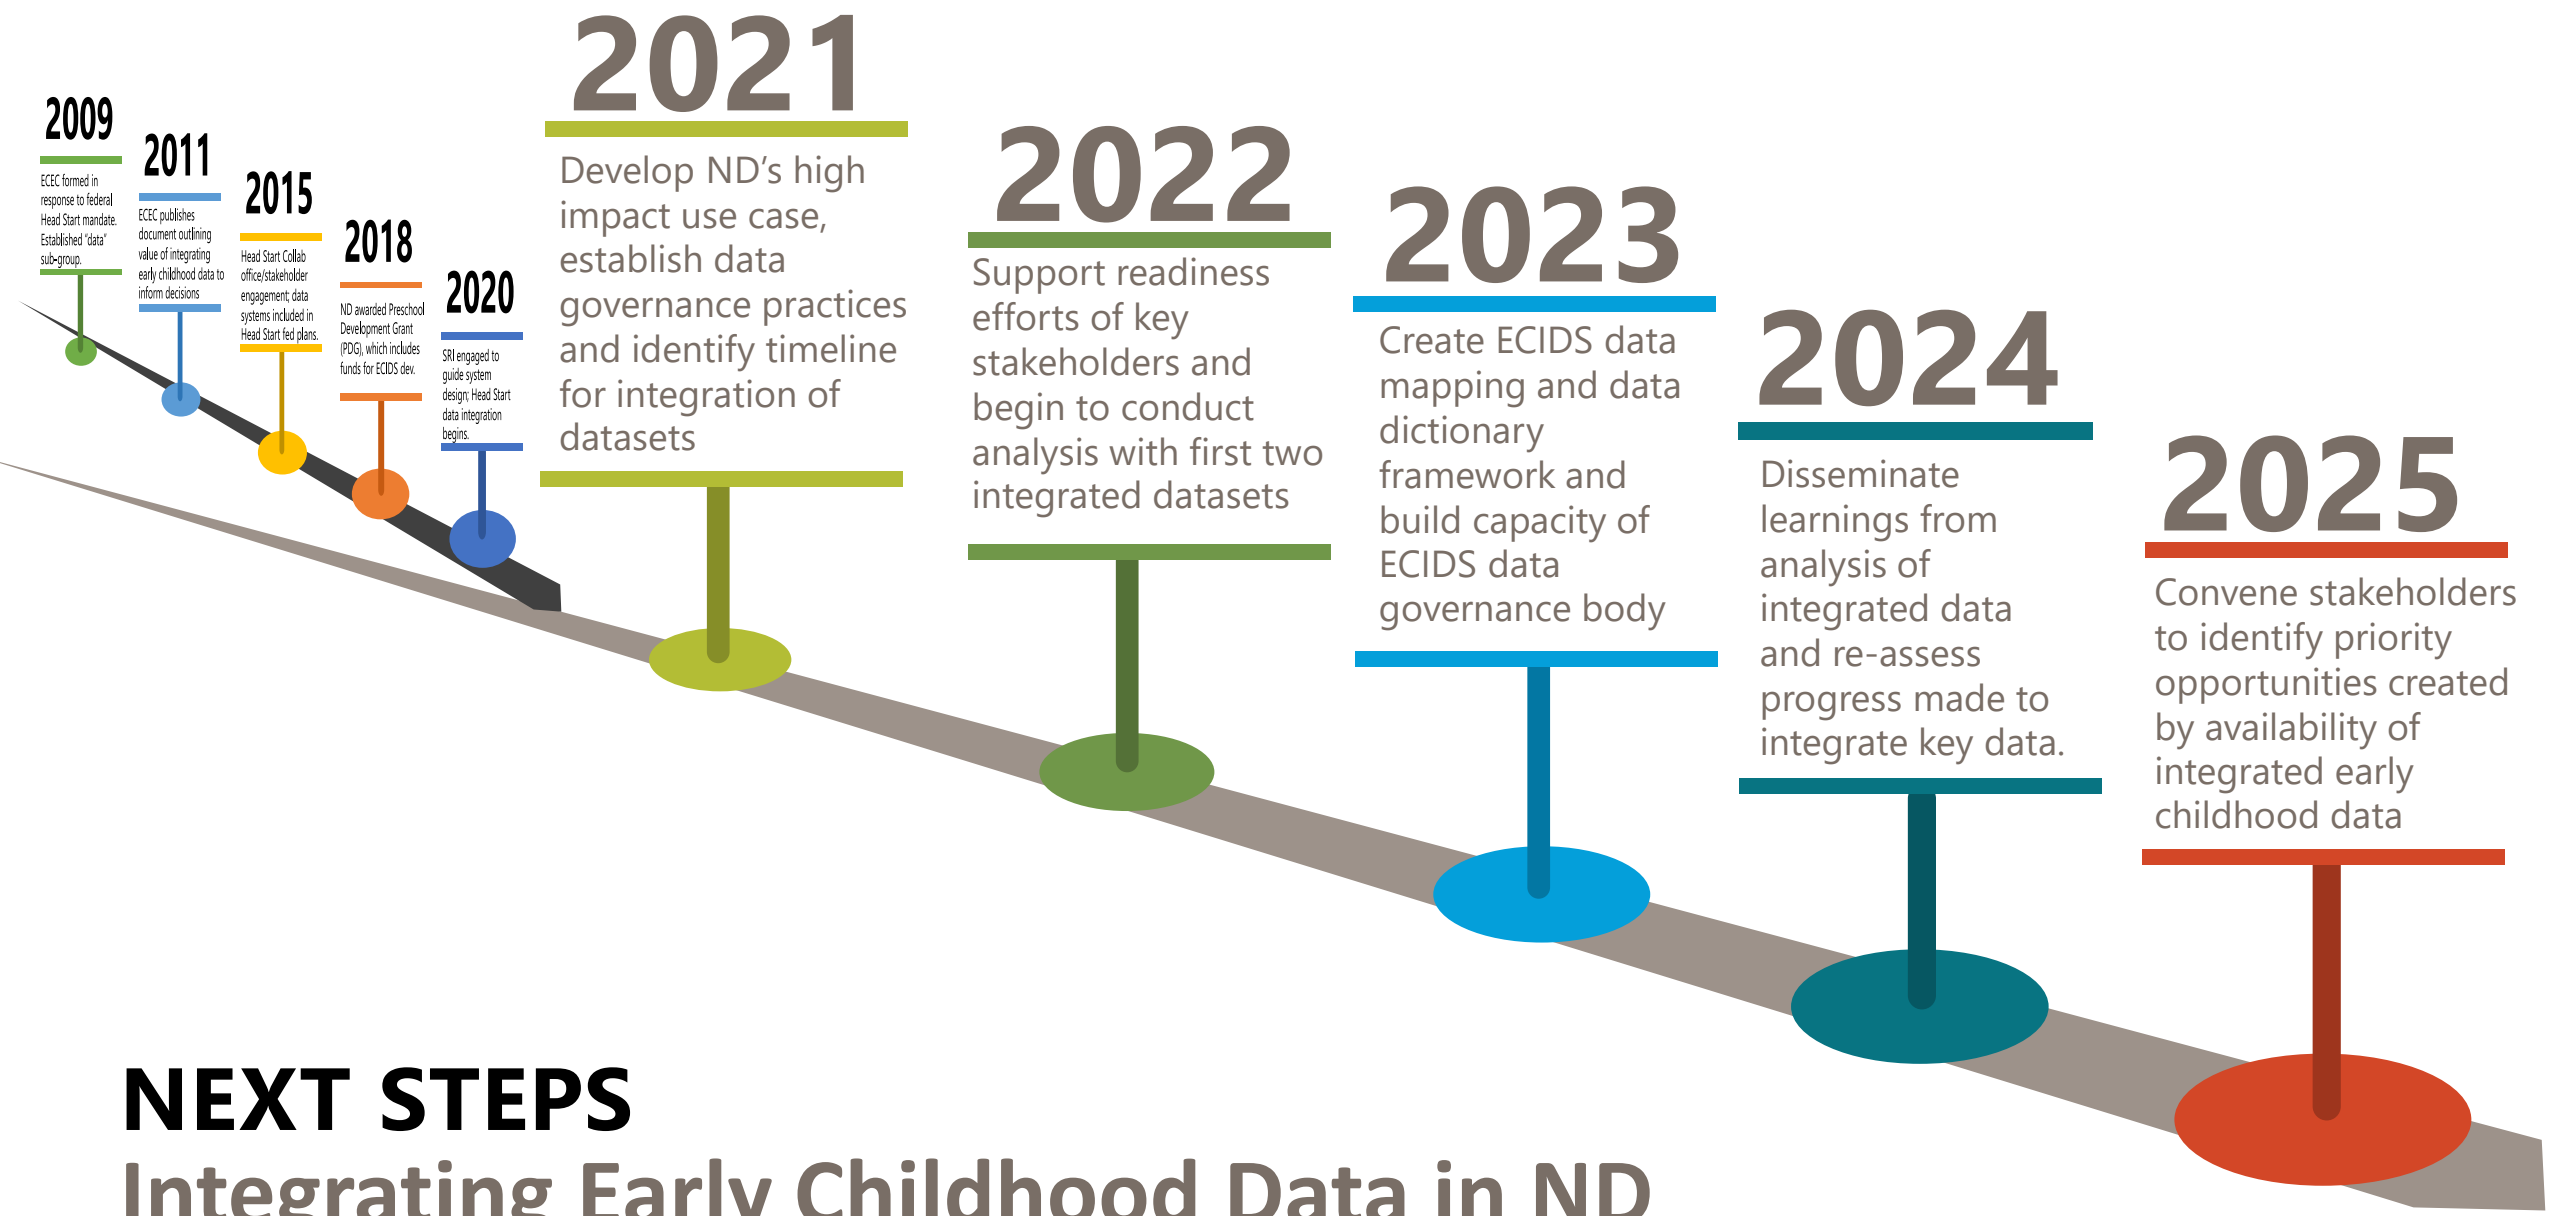
- $500k general fund
- $0 federal funds



PURPOSE

Build a data model that connects information from existing databases in ways that allow policy makers to better understand how early childhood programs intersect with families' lives.

Improve ability to measure the outcomes of the investments made in early childhood.



What is an Early Childhood Integrated Data System?

EARLY CHILDHOOD INTEGRATED DATA SYSTEM

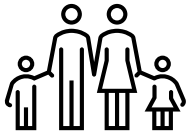
Creating an ECIDS in North Dakota will

Integrate	Integrate data from various early childhood programs and services
Enable	Enable decision making to improve the coordination among and quality of services
Support	Support collaborative thinking between service providers, state agencies and policymakers
Improve	Improve efficiency of data management and reporting for stakeholders
Maximize	Maximize return on resources invested in collecting quality data
Inform	Inform policies and practices that support better outcomes for children and families.

NEXT STEPS

Integrating Early Childhood Data in ND

The evolution of an idea that could help us better serve families



House Bill 1012 #3887
Long-Term Care Services and Supports

House Appropriations Human Resources Division, Chairman Nelson

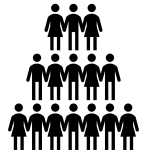
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

MEDICAL SERVICES DIVISION

Our Values

We help...

our members receive safe, appropriate, quality care in a timely manner.

We communicate...

by listening, sharing information, and seeking feedback.

We partner...

with stakeholders, other state agencies, and tribes to achieve shared goals.

We oversee...

Medicaid to ensure integrity, efficiency, and stewardship of public resources.

Medicaid Long-Term Care Eligibility Unit

- Long Term Care Unit was formed in February 2020. The unit consists of 15 Eligibility Workers and One Supervisor.
- The LTC unit members are dispersed throughout the State and are home based employees.
- They are supported by several other State entities such as NDIT, Medicaid Policy and System Support, Medical Services, Economic Assistance, and the Legal Advisory Unit.
- The LTC unit utilizes MS Teams, and has a Call Center that is staffed Monday – Friday 8:00 am to 5:00 pm CST.

Client Support

The LTC Unit processes Medicaid Applications in which the client falls into one of the following categories:

- Resides in Skilled Nursing facility
- Resides in a Memory Care facility
- Resides in a Basic Care Facility
- Resides in a Medical facility with a Swing Bed Level of Care
- Is in receipt of Nursing Care Services or HCBS services and has a Spouse
- Is in receipt of the HCBS – 1915c Medical Waiver for Elderly or Physically Disabled individuals
- Asset assessments prior to Medicaid application for spouses who enter a nursing home – Spousal Impoverishment

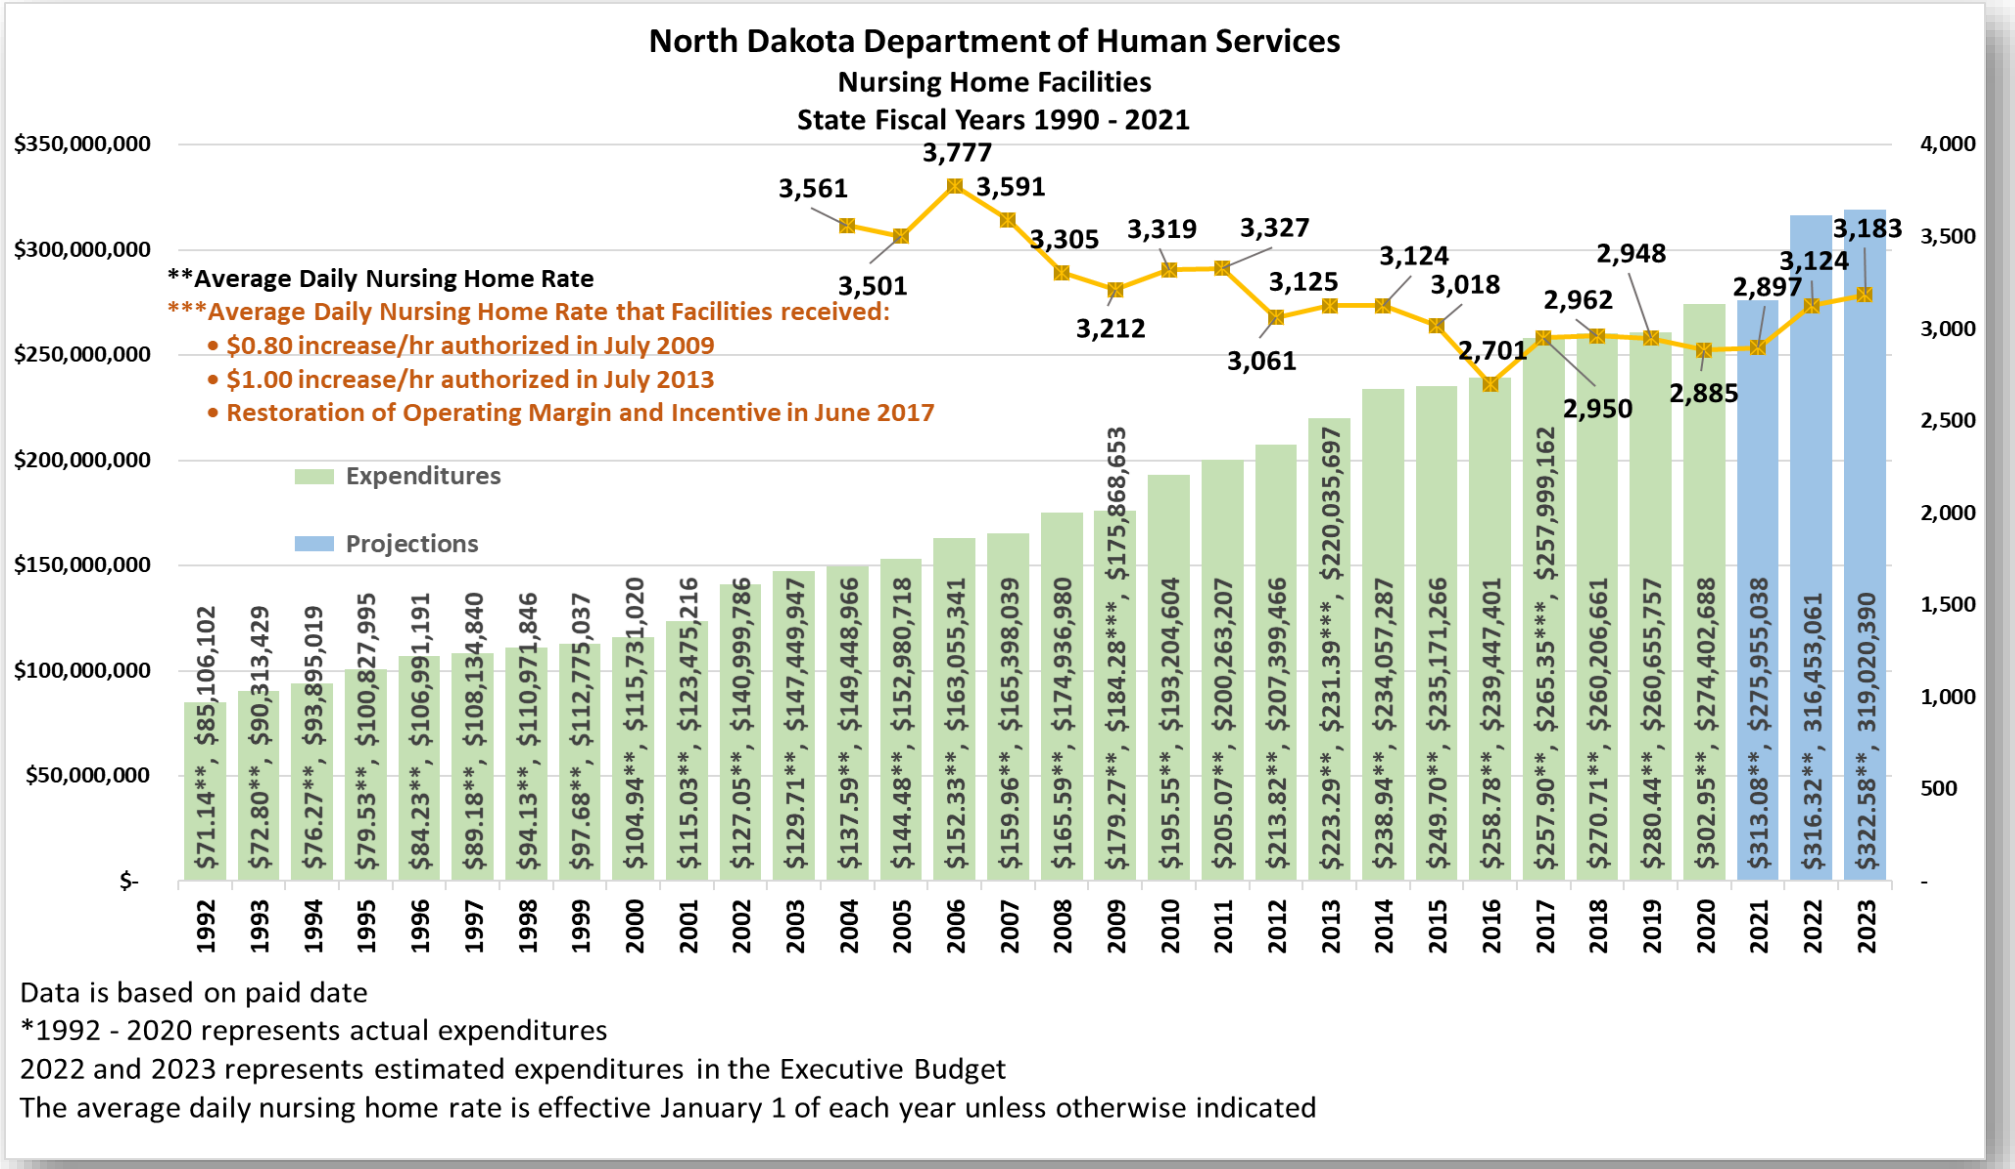
NORTH Dakota | Human Services
Be Legendary.™

Bed Occupancy For Nursing Home Facilities

Nursing Facility Occupancy



Nursing Facility Medicaid Occupancy

Nursing Home Facilities

State Fiscal Years 1990 - 2023

Data is based on paid date

*1992 - 2020 represents actual expenditures

2022 and 2023 represents estimated expenditures in the Executive Budget

The average daily nursing home rate is effective January 1 of each year unless otherwise indicated

Funding Request

Nursing Home Payment Reform

- Reform of both care and property rate methodology
- Interim report submitted October 1, 2020
- Testimony will be presented in **Human Services Committee**
- DHS sponsored bill
- $7.2 million ($3.3m General; $3.8m Federal)

Care Rate

Hold Harmless $4.1 million ($2.5 million year 1, $1.6 million in year 2)

- Facilities can choose old cost rate or new price rate
- 14 will likely choose old cost rate
- In year 1 (2022), the 14 choosing old cost rate would be inflated by 2.3%= $2.5 million
- In year 2 (2023) the 14 choosing the old cost rate would get 1.8% inflation (0.5% less than those choosing the new rate or 2.3%)=$1.6 million
- **At the end of year 2 there is no more hold harmless for care**

Services Closer to Home

Create pathways that help people access the right service at the right time

Engage proactively with providers to expand access to services

Property Rate

$2.1 million for increases to lower rate facilities

- 4-year phase in
- Year 1 (2023) $2.1 million
- Year 2 (2024) $4.2 million
- Year 3 (2025) $6.3 million
- Year 4 (2026) $8.4 million, annual amount expected

Property Rate

$1 million for Hold Harmless

14 facilities where cost>FRV

- By year 1, 8 cross over
- By year 2, 9 (cumulative) cross over
- By year 6, 10 cross over
- By year 8, 11 cross over
- By year 9, 12 cross over

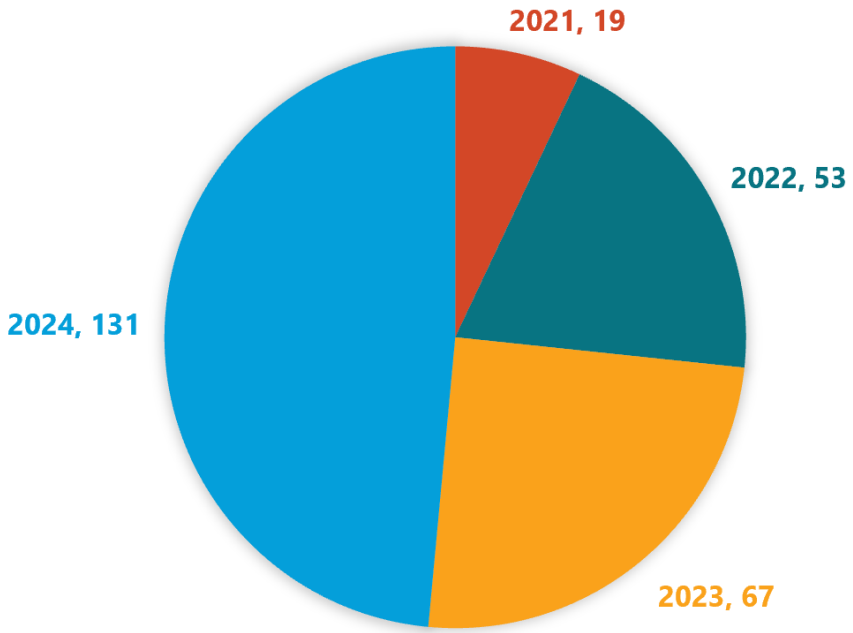
Missouri Slope nor McKenzie County do not cross over even at year 15

Property Rate

Future Hold Harmless Estimate Depends on 12/31/2021

- So, if most cross over by year 9 why not predict how the $1 million per year decreases?
- Because the deadline to submit new construction or major renovation projects is 12/31/2021 and those would be considered in the future hold harmless amount
- Note prior testimony that lower interest rates cause facilities to cross over quicker (2.5% would cross in year 1; 5% would cross around year 11)

Funding Request



Nursing Home Bed Buy Back

- Request to purchase beds out of the current nursing home system and layaway
- State plans to pay between $12,000-$15,000 per bed
- Taking beds out of the system reduces future State liability
- $3.3m in General Funds

Nursing Home Bed Buy Back

EXPIRATION OF BEDS IN LAYAWAY
270 TOTAL

Services Closer to Home

Create pathways that help people access the right service at the right time

Engage proactively with providers to expand access to services

Basic Care Facilities

Basic Care Rates

- Rates are effective July 1
- Cost reports are submitted annually
- Limits for Direct Care and Indirect Care
- No Rate Equalization
- One daily rate for all residents in the facility regardless of care needs
- Rates range from $78.63 - $186.68 per day
  - **Personal Care rate range**
    $36.37 - $99.88 per day
  - **Room and Board rate range**
    $36.45 - $112.91 per day

Reduce Basic Care Appropriation

Basic Care is a **state-funded program** that was created in the 1990s when home and community-based services were not as well developed

- North Dakota is the **only** state with Basic Care
- Medicaid **pays for personal care services** for Medicaid-eligible Basic Care residents
- The State **pays for room and board** for Medicaid-eligible Basic Care residents
- Basic Care **is not a CMS recognized institutional setting** and CMS will only allow payment for room and board in an institutional setting.

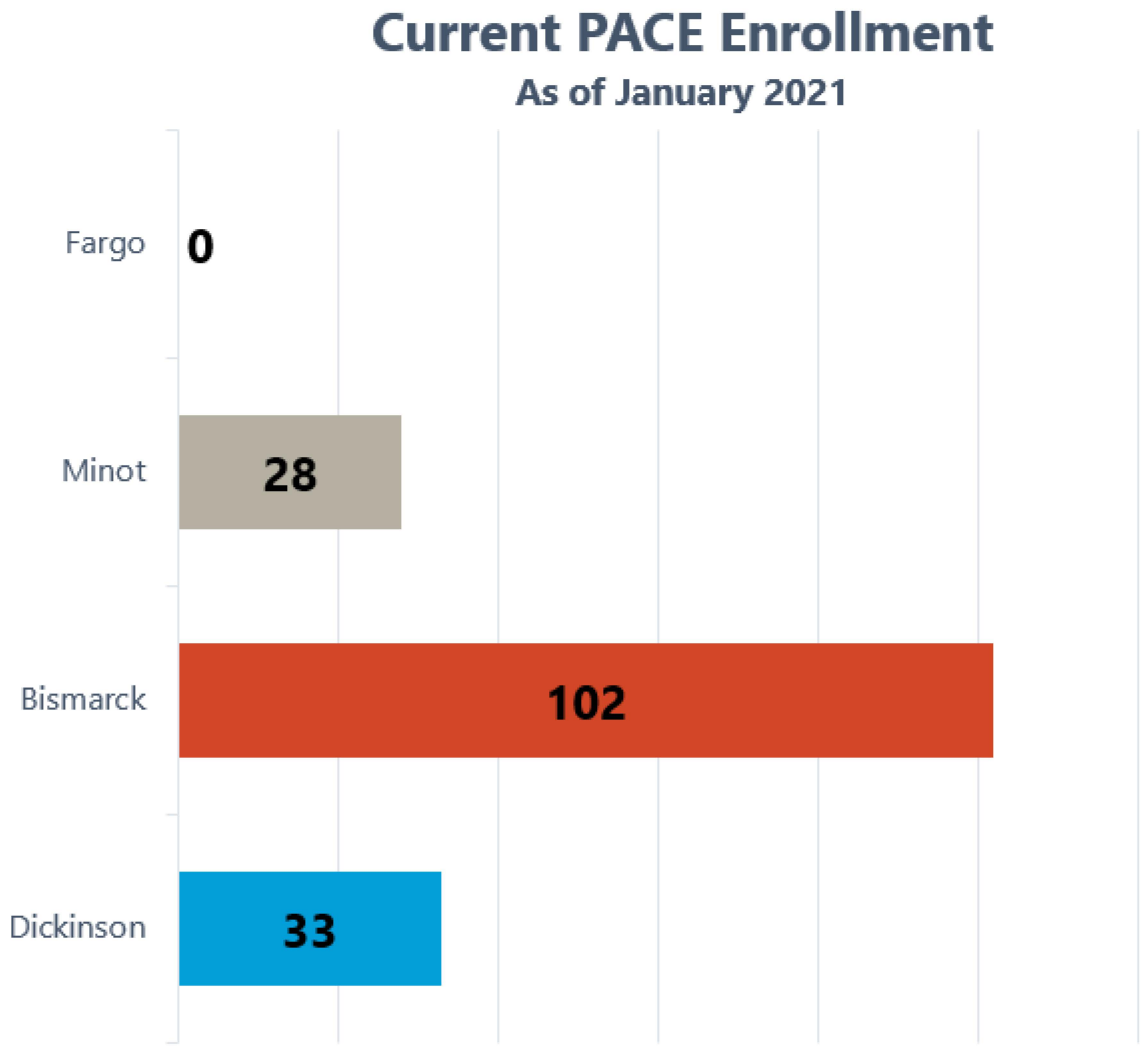
There is currently private pay differential in the Basic Care program, unlike Nursing Homes which charge a private pay room differential to Medicaid clients

LTCA survey showed that:

- 26 facilities charge >$10 per day (average is $9)
- Range is $1 to $26
- Room and board rates have no limit unlike nursing home rates that have limits
- Room and board ranges from $36 to $112 across Basic Care facilities

BASIC CARE REDUCTION

Estimated Total Potential Savings **$7,300,000**



Basic Care Reduction			
	Total	**Federal**	**State**
Basic Care	$ (7,300,000)	$ (0)	$ (7,300,000)

PACE ENROLLMENT

Total Enrollment: 163

PACE ENROLLMENT PROJECTIONS

2019-2021 Biennium

Reduce PACE Rates and Enrollment

- Based on the latest audited 9-months of financials from July 2019 through March 2020, Northland PACE experienced a **10.7 percent profit**. Our goal is to bring profits more in line with PACE programs in other states.

- The rate decrease was calculated by the State's actuaries using a Dual allocation methodology model. This approach analyzed the three most recent years of financial experience and allocates expenses for the Dual population between Medicaid and Medicare, and builds the rates up using the financial experience.

- Starting January 1, 2021, the monthly PACE capitation rates will be **decreased by 3.98%**.

REDUCE PACE RATES & ENROLLMENT

Estimated Total Potential Savings **$1,914,734**

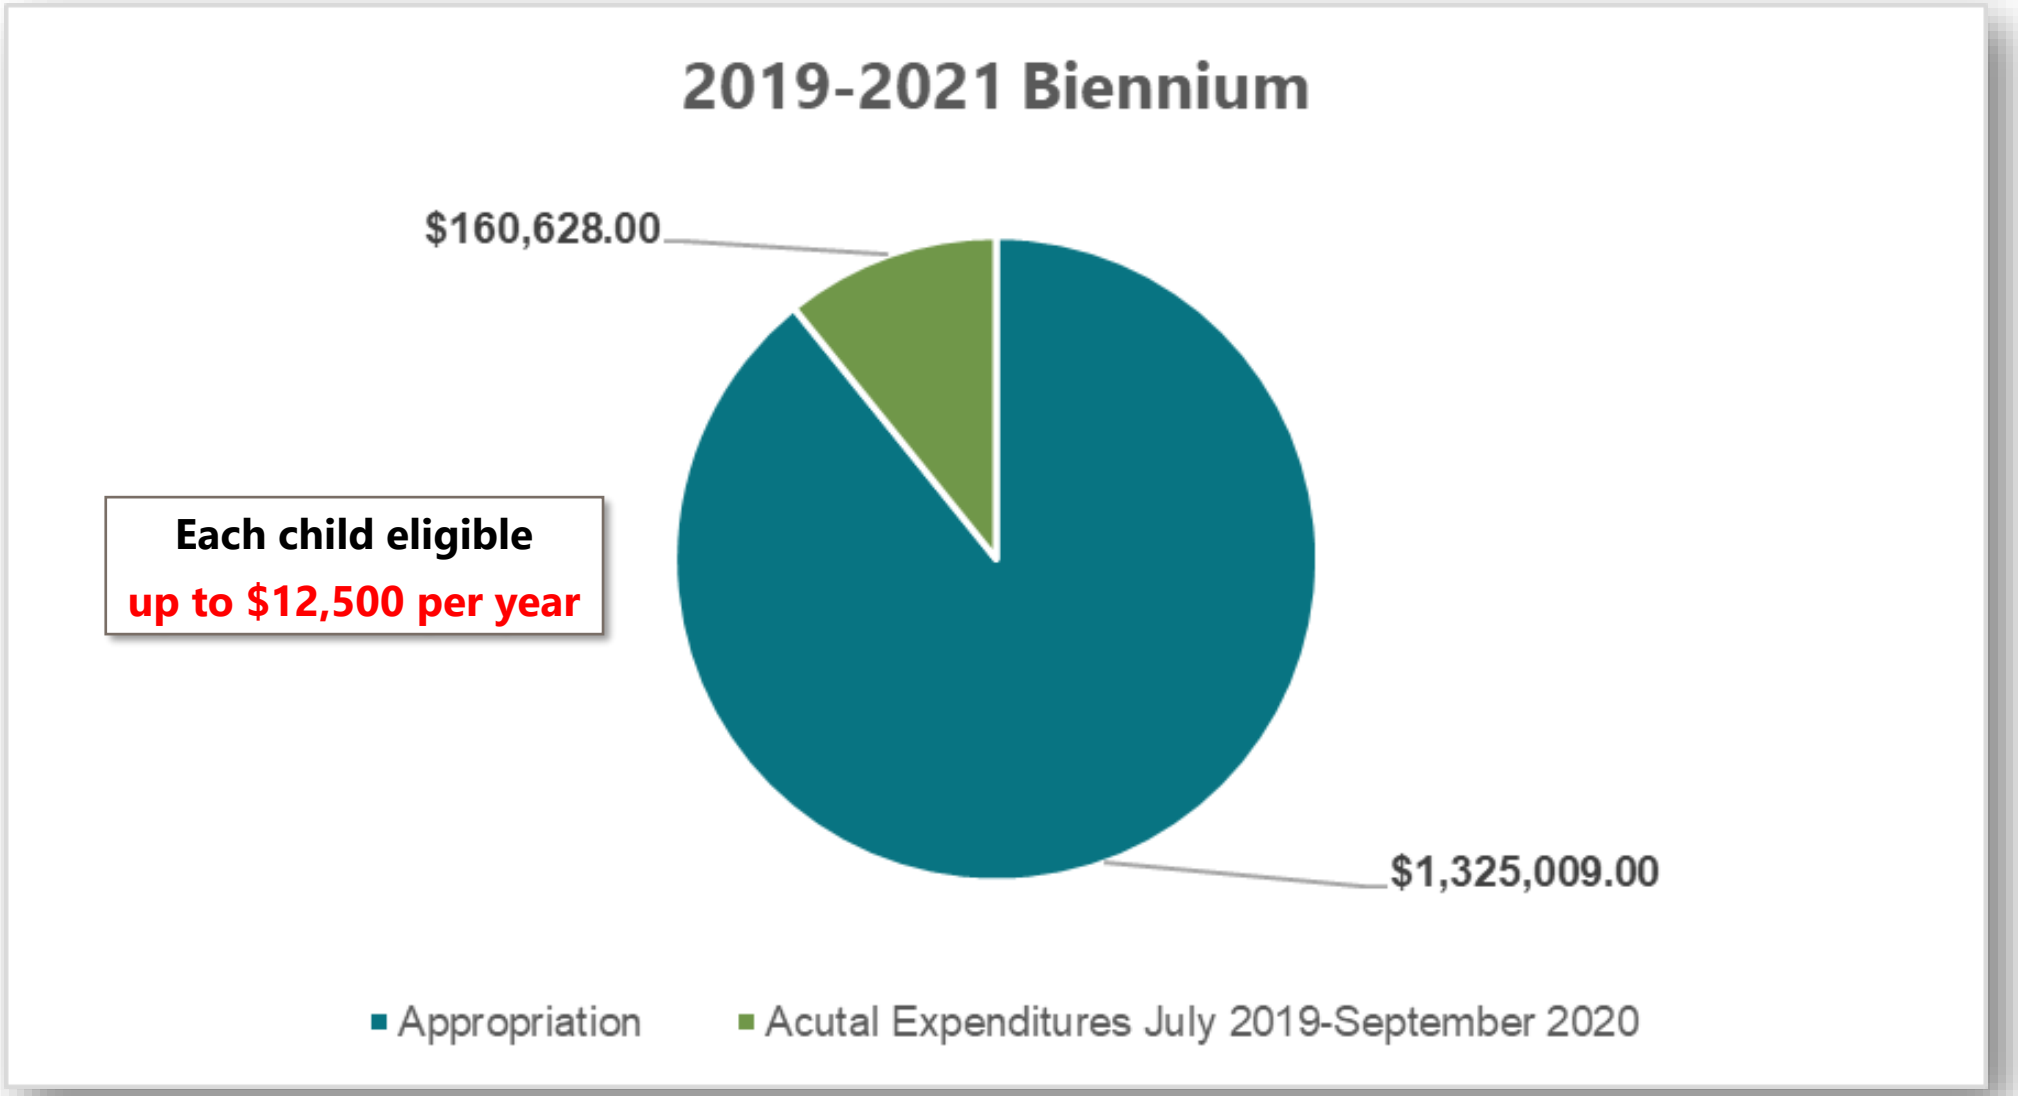
Reduce PACE Rates & Enrollment			
	Total	**Federal**	**State**
PACE Capitated Rate Reduction	$ (1,385,545)	$ (740,194)	$ (645,351)
PACE Enrollment Reduction	$ (529,189)	$ (282,709)	$ (246,480)
TOTAL POTENTIAL SAVINGS	**$ (1,914,734)**	**$ (1,022,903)**	**$ (891,831)**

Detail for Long-Term Care Services: Autism and Other Waivers

NORTH Dakota | Human Services
Be Legendary.™

AUTISM SPECTRUM DISORDER (ASD) WAIVER

ASD Wavier



- **96 slots** per year
- **56 children on waitlist** as of 1/20/2021

- **$395,577 spent** in 2019-2021 on waiver
- **$2,077,632 spent** on state plan services in 2019-2021

  (96 children*$10,821 per child*2 years = $2,077,632)

- **$2,473,209** total spent on waiver & state plan in 2019-2021

ASD VOUCHER

2019-2021 Biennium
$160,628.00
$1,325,009.00
Each child eligible
up to $12,500 per year
Appropriation
Acutal Expenditures July 2019-September 2020

Re-Investment of the Autism Voucher

- Age 3 years through age 17
- Family gross income is 200% below Federal Poverty Level (FPL)
- Must have an Autism Spectrum Disorder diagnosis
- Not be on any Medicaid 1915c waivers
- Child must reside with parents, legal guardian or custodian
- Must have lived in ND for at least 6 months

- Helps pay for assistive technology, training and other approved support services such as respite, that enhance the quality of life of children with autism spectrum disorder.
- ASD Voucher = maximum of $12,500 per year, per child.
- Early intervention and therapy services are not covered.

Autism Voucher Statistics

Year	Total Number of Children Enrolled	Total Number of Children with Voucher Purchases	Total Number of Children with No Voucher Purchases	Average Spending Per Year
2017-18	52	45	7	$4,974.45
2018-19	39	30	9	$4,866.84
2019-20	48	43	5	$3,186.88
2020-21	42	-	-	-

Autism Voucher Purchases

- Swings/playsets
- Arts and craft items/puzzles/flashcards/magnetic letters
- Toys to support socialization – doll house, kitchen sets, fidgets
- Respite/tutoring
- Adaptive swimming lessons/adaptive activities/adaptive horseback riding
- Weighted blankets/bean bag chairs/iPads, sensory items

Autism Voucher Requested – Not Purchased

- Fishing poles and tackle
- Pools
- Workout equipment that is not age appropriate
- Stuffed animals
- Kayaks and trailers
- Home Meal Delivery
- Cable TV, air conditioner, internet
- Car
- Entire kitchen sets, appliances, knives, plates, etc.

Re-Investing in Waiver Instead of Voucher

Voucher

- Only families with ASD who are 200% below FPL are eligible
- Limited to purchases of items and non-therapy services
- Does not qualify child for Medicaid
- Does not provide a service manager
- All general fund budget
- No federal matching funds

Waiver

- All North Dakota families with ASD are eligible
- Receives traditional Medicaid coverage and benefits
- Receives a service manager to assist family with planning and services
- Has assistive technology to purchase items of need
- Receive federal matching funds for all services

Eliminating the voucher and **re-investing** in the **waiver** will result in **50 new slots**

Summary of Autism Changes

Estimated Total Potential General Fund Savings

$623,000

Elimination of Autism Voucher = **$1.358 million** general fund savings

Re-investing in Autism Waiver = **$830,000** in general funds for of **50 slots** and state plan services

Elimination of Autism Training funds = **$93,000** in general fund savings

ELIMINATION OF TECHNOLOGY DEPENDENT WAIVER

Estimated Total Potential Savings **$596,112**

Elimination of TECH DEPENDENT WAIVER			
	Total	**Federal**	**State**
Tech Dependent Waiver	**$ (596,112)**	$ (318,560)	$ (277,552)

2021 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Harvest Room, State Capitol

HB 1012
1/28/2021 am
House Appropriations Human Resources

A BILL for an Act to provide an appropriation for defraying the expenses of the department of human services; to provide an exemption; and to provide for a report.

Representative	Present	Absent
Nelson	P	
Kreidt	P	
Andersen	P	
Mitskog	P	
Schobinger	P	
Strinden	P	

Chair Nelson opened the meeting at 8:30 a.m.

Discussion Topics:

- Key Priorities
- Overview of Medical Services
- Overview of Budget
- Executive Request
- Medicaid Expansion
- MMIS Modernization

Caprice Knapp, Medicaid Dir (8:31 am) testified about medical services #4046

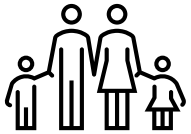
Tory Brabent, DHS, Medical Services(9:10 am) testified about MMIS #4046

Caprice Knapp, Medicaid Dir (9:46 am) testified about Executive Budget #4046

Caprice Knapp, Medicaid Dir (10:50 am) testified about Medicaid Expansion #4071

Chair Nelson closed the meeting at 11:10 a.m.

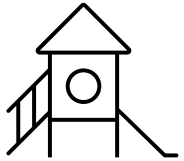
Cole Fleck, Committee Clerk



House Bill 1012 #4046
Medical Services Budget- Traditional

House Appropriations Human Resources Division, Chairman Nelson

Caprice Knapp, PhD **Medical Services Director**



NORTH Dakota | Human Services
Be Legendary.™

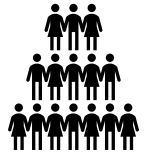
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

MEDICAL SERVICES DIVISION

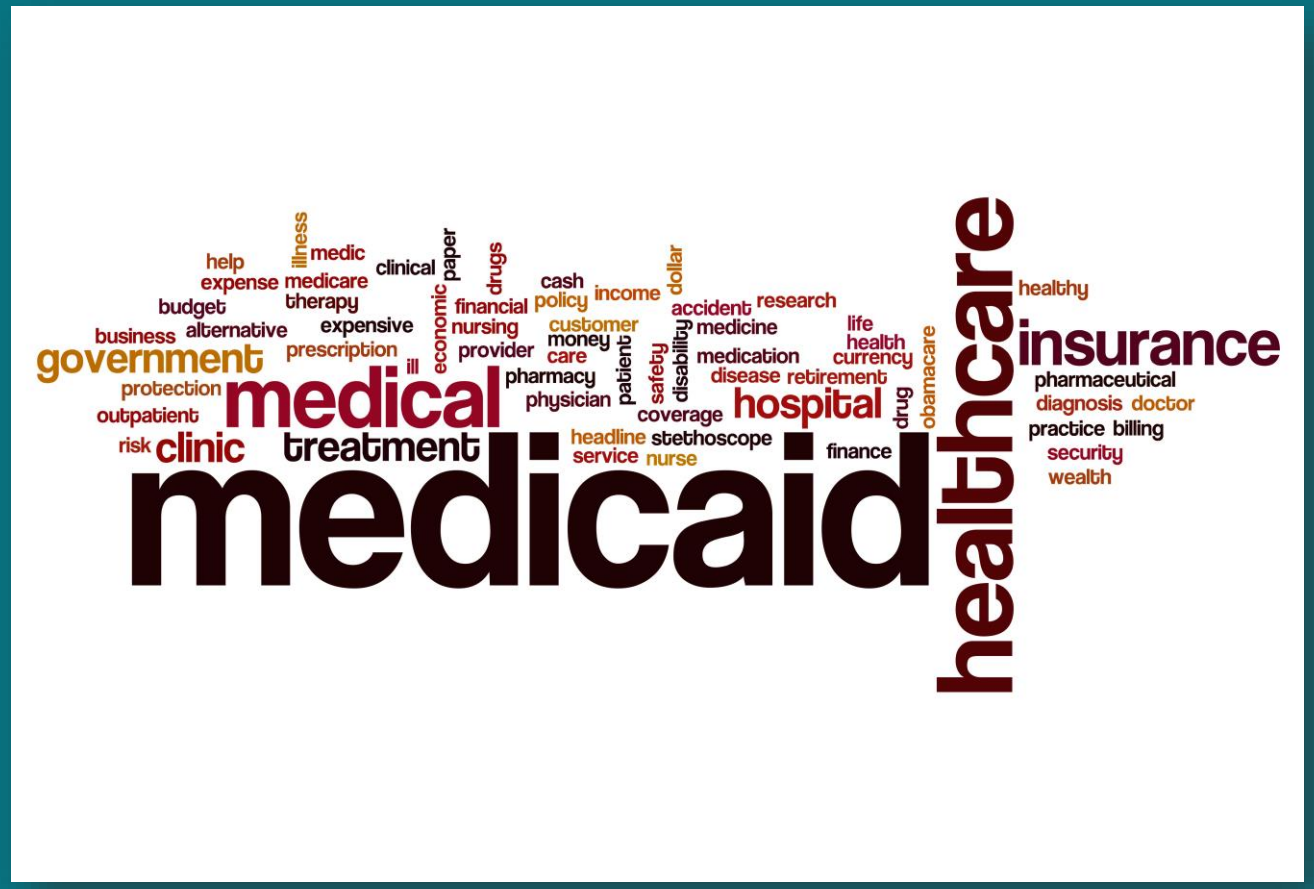
Our Values

We help...

our members receive safe, appropriate, quality care in a timely manner.

We communicate...

by listening, sharing information, and seeking feedback.



We partner...

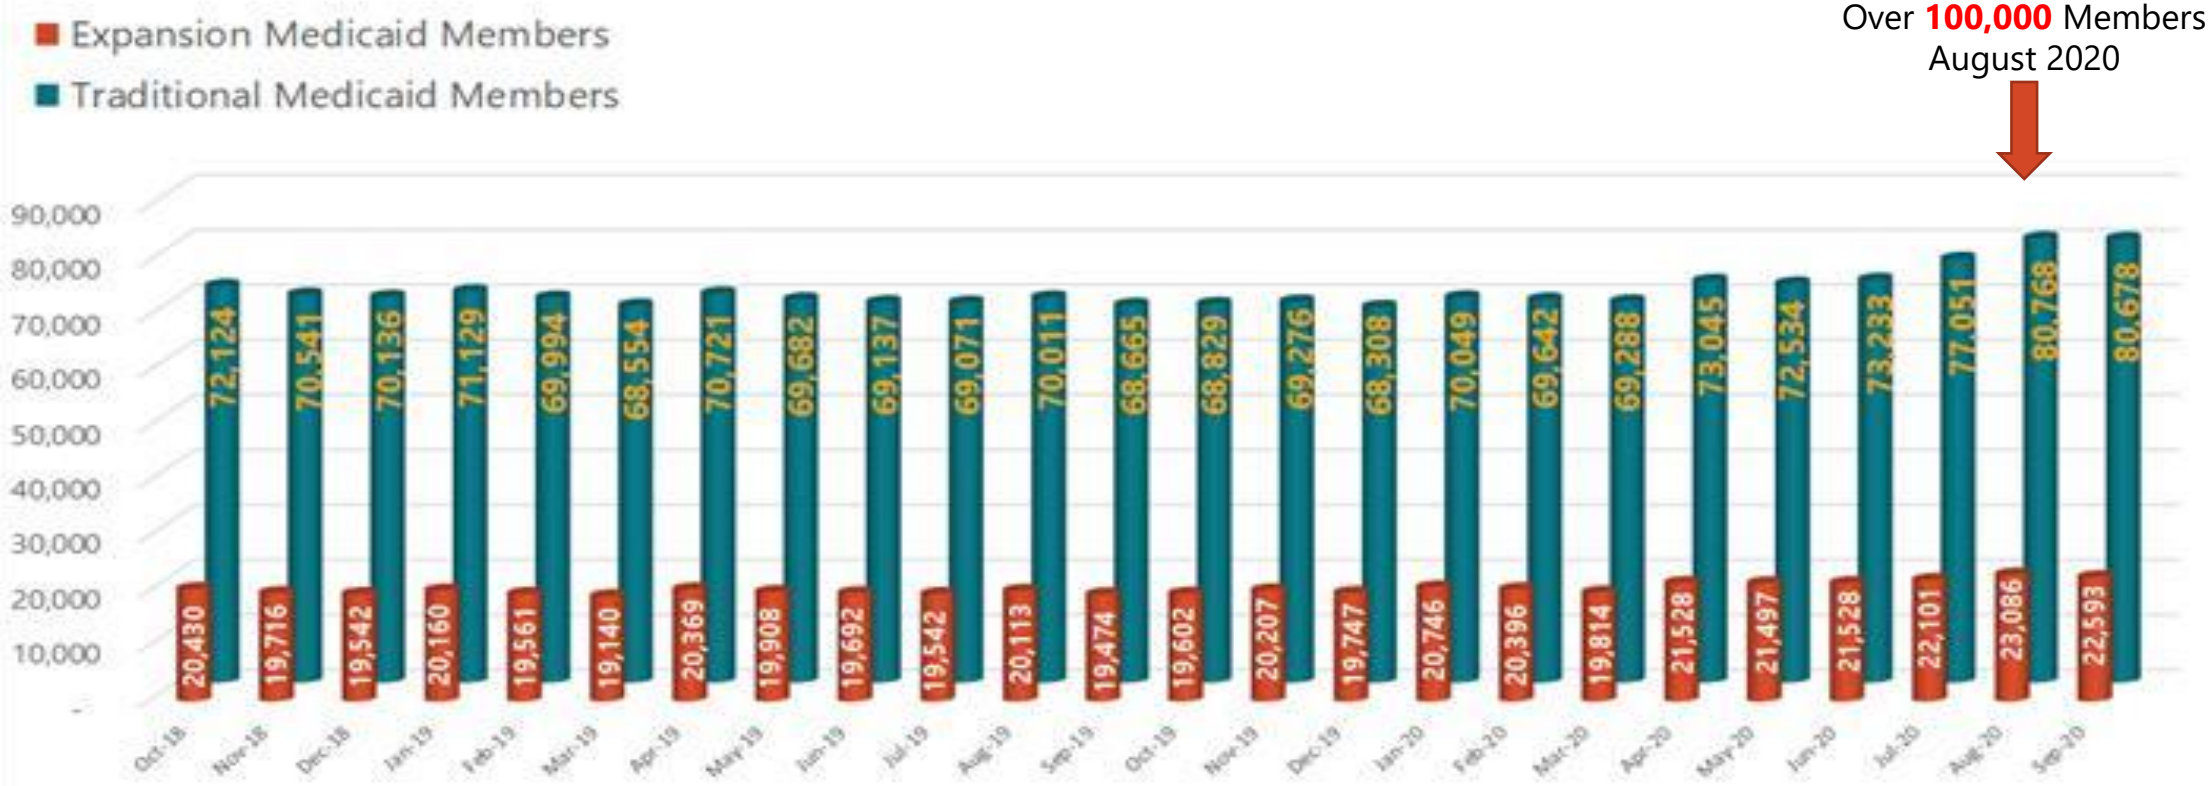
with stakeholders, other state agencies, and tribes to achieve shared goals.

We oversee...

Medicaid to ensure integrity, efficiency, and stewardship of public resources.

AGENDA

- Overview of Medical Services
- Overview of Budget
- 2021-2023 Executive Request
  - Funding Request Item
  - Budget Savings Items
- Review Executive Request for 2021-2023



MEDICAL SERVICES DIVISION

Who We Serve

Traditional and Expansion Medicaid Members

24 Month Period

October 2018 - September 2020

Note: Children's Health Insurance Program numbers prior to January 1, 2020 are included in the Traditional Medicaid Members count. Effective January 1, 2020, Healthy Steps children transitioned to Traditional Medicaid and are included in the Traditional Medicaid Members count.

MEDICAL SERVICES DIVISION

How We Pay

Traditional Medicaid

Payments:

- Fee-For-Service
- Payment rate for most professional services is about 100% of Medicare's reimbursement
- Some providers are paid according to their cost like nursing homes, critical access hospitals, and Human Service Centers
- Some provider payment rules are set by the feds IHS, FQHC

Fee Schedules: http://www.nd.gov/dhs/services/medicalserv/medicaid/provider-fee-schedules.html

Children's Health Insurance Program Interim Changes

CHIP Savings (1Q20-3Q20)

- Expected CHIP cost = $6,706,332
  - Average 2,378 kids per month x Average $313.38 premium per month
- Actual CHIP cost = $1,932,582
  - Actual Provider Payments = $2,872,734
  - Drug rebates = $940,152
- Savings = $4,773,750
- % reduction = 71.18%

EXECUTIVE REQUEST 2021-2023

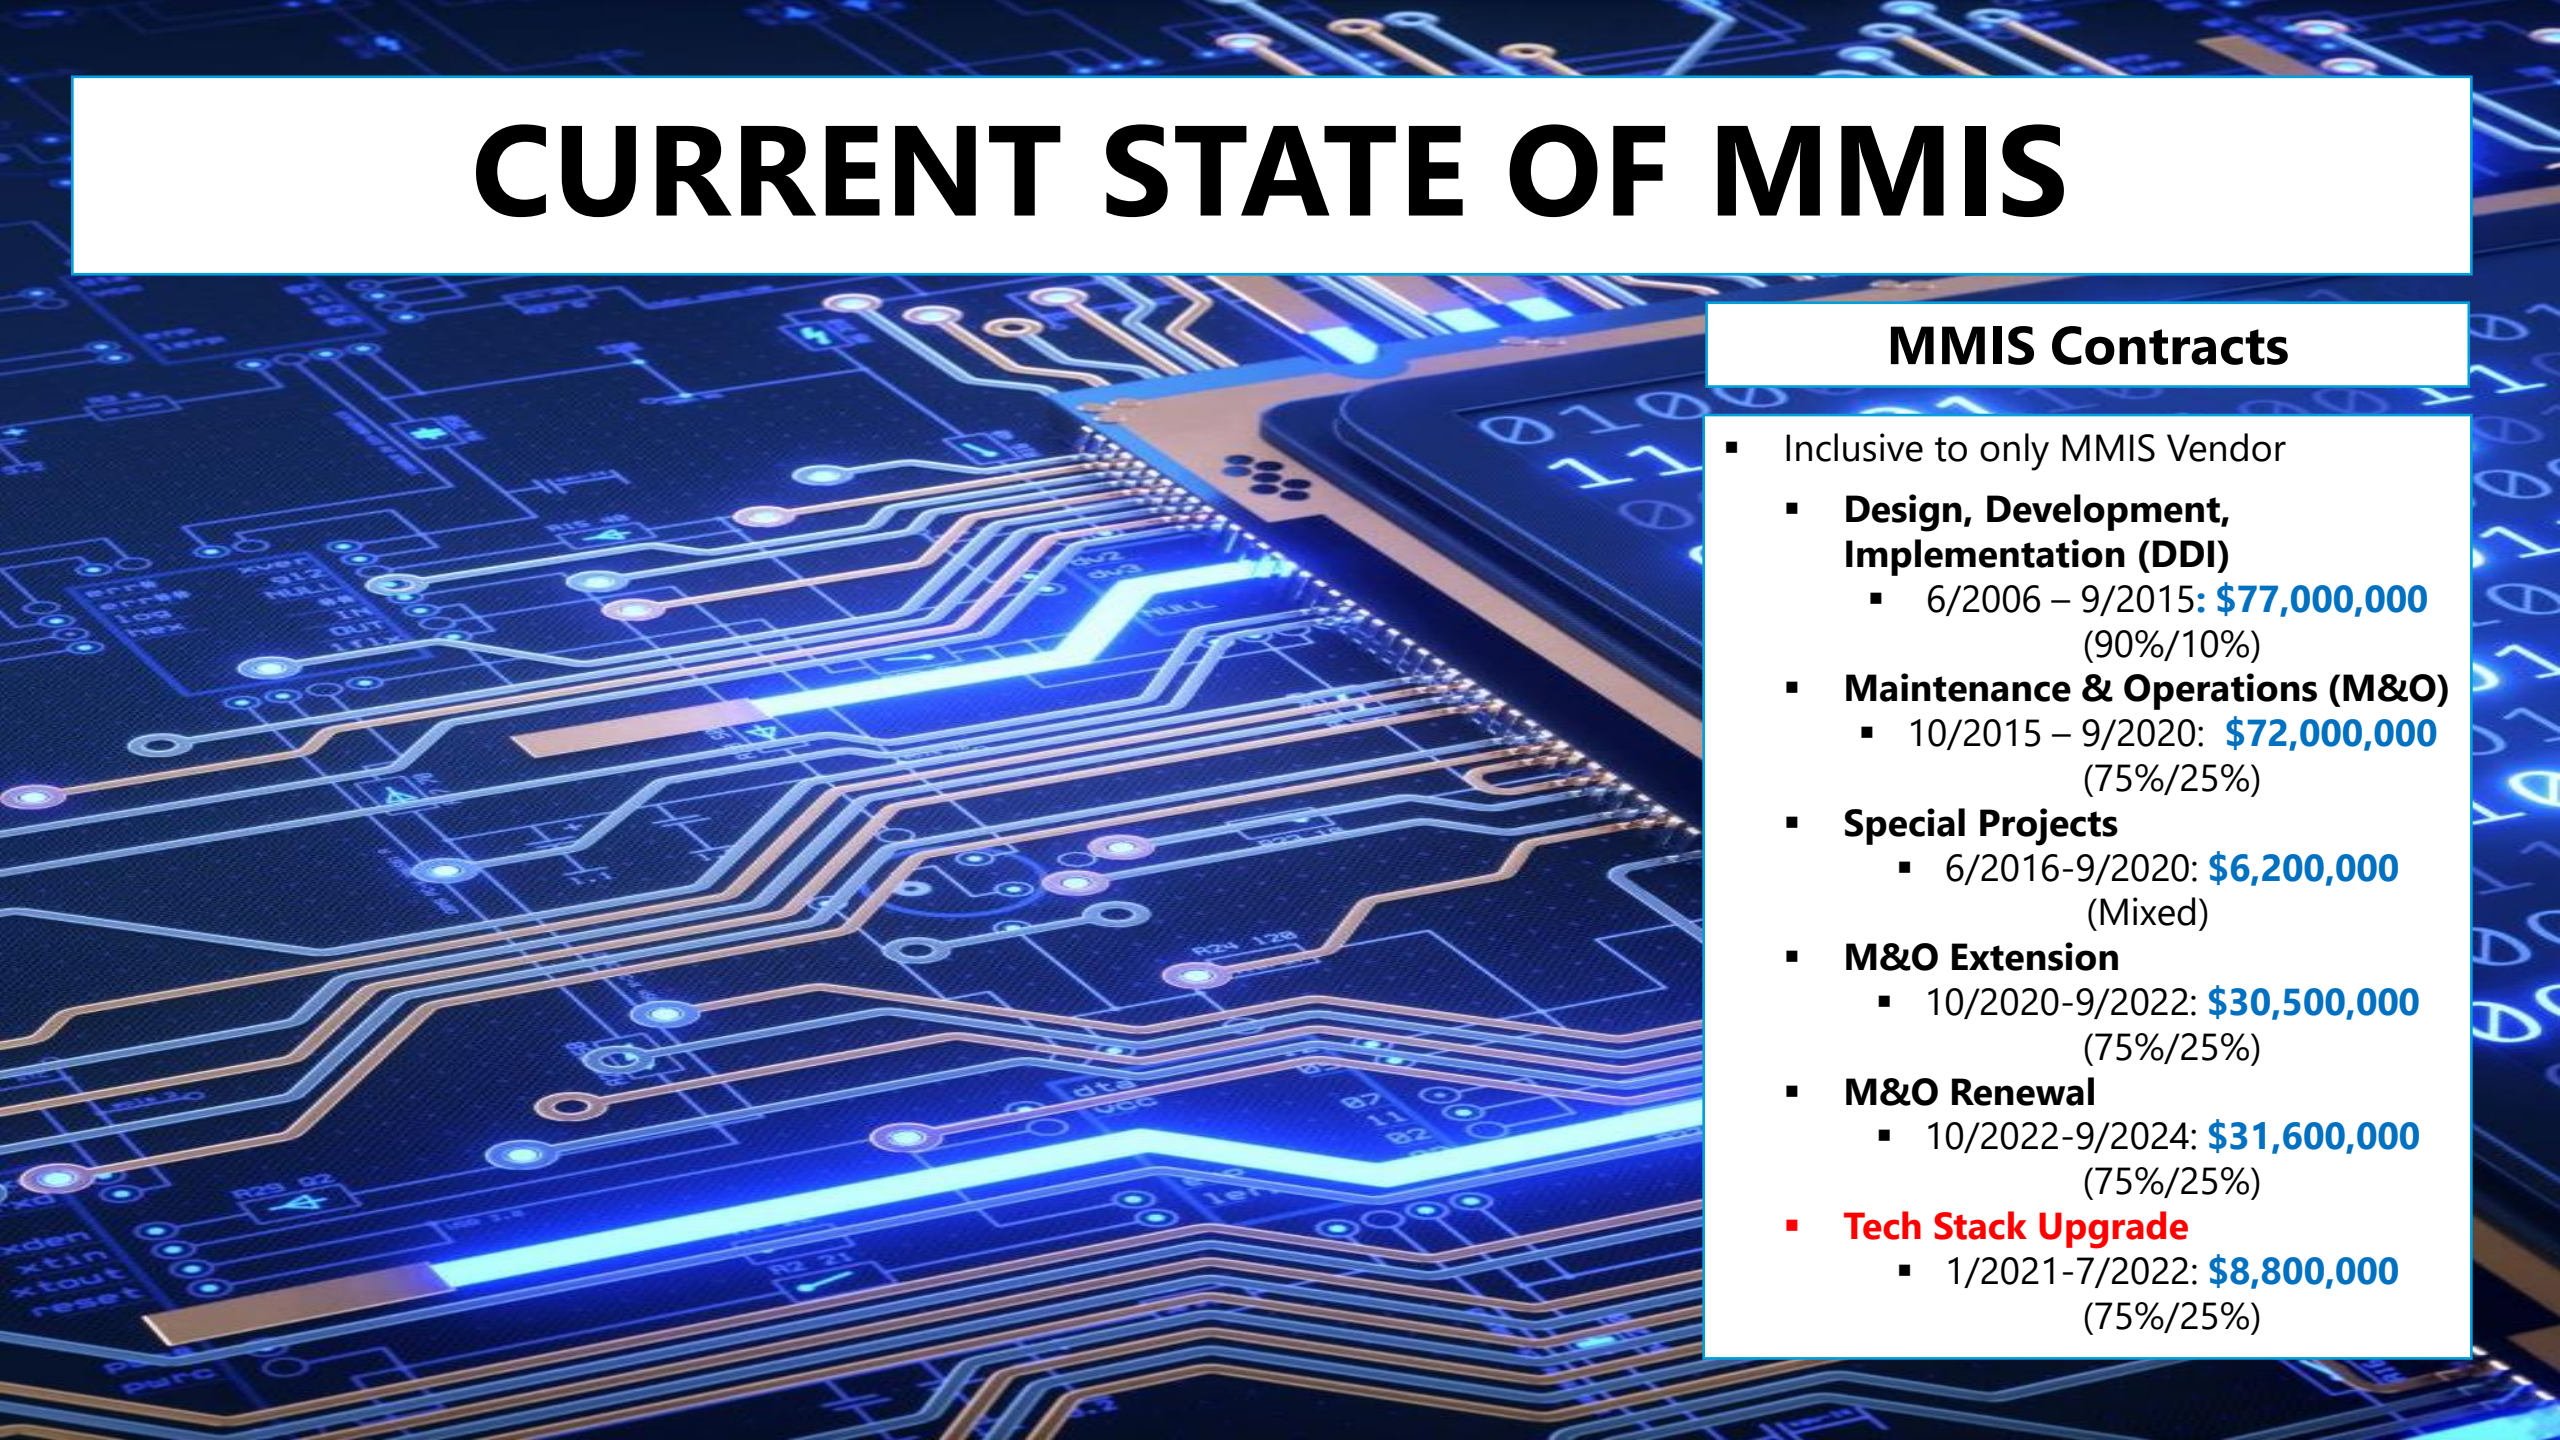
MMIS MODERNIZATION

CURRENT STATE OF MMIS

Monolithic System

- **Single system** for **all** functional areas
- Single system **limits the ability** for upgrades
- **One vendor controls** the single system
- **Entirely hosted** by NDIT
- **Limitations of a single system:**
  1. Prior Authorizations are **highly manual**
  2. **Lacks** case management functionality
  3. **Lacks the ability** to efficiently communicate to providers and members
  4. **No Member Portal**
  5. Third Party Liability is **highly manual**



CURRENT STATE OF MMIS

Current Operations

- **Meets CMS regulations** of timely payment
  - **99.90%** of clean claims processed **within 30 days**
  - **100%** of clean claims processed **within 90 days**
- **In 2019:**
  - **2,952,206** Claims processed
  - **$1,308,172,318** paid to providers
- **Provider Portal:** Submit Claims, View Claims Status, Check Member Eligibility, View Remittance Advices, Submit Prior Authorization Requests, Provider Re-Validations

CURRENT STATE OF MMIS

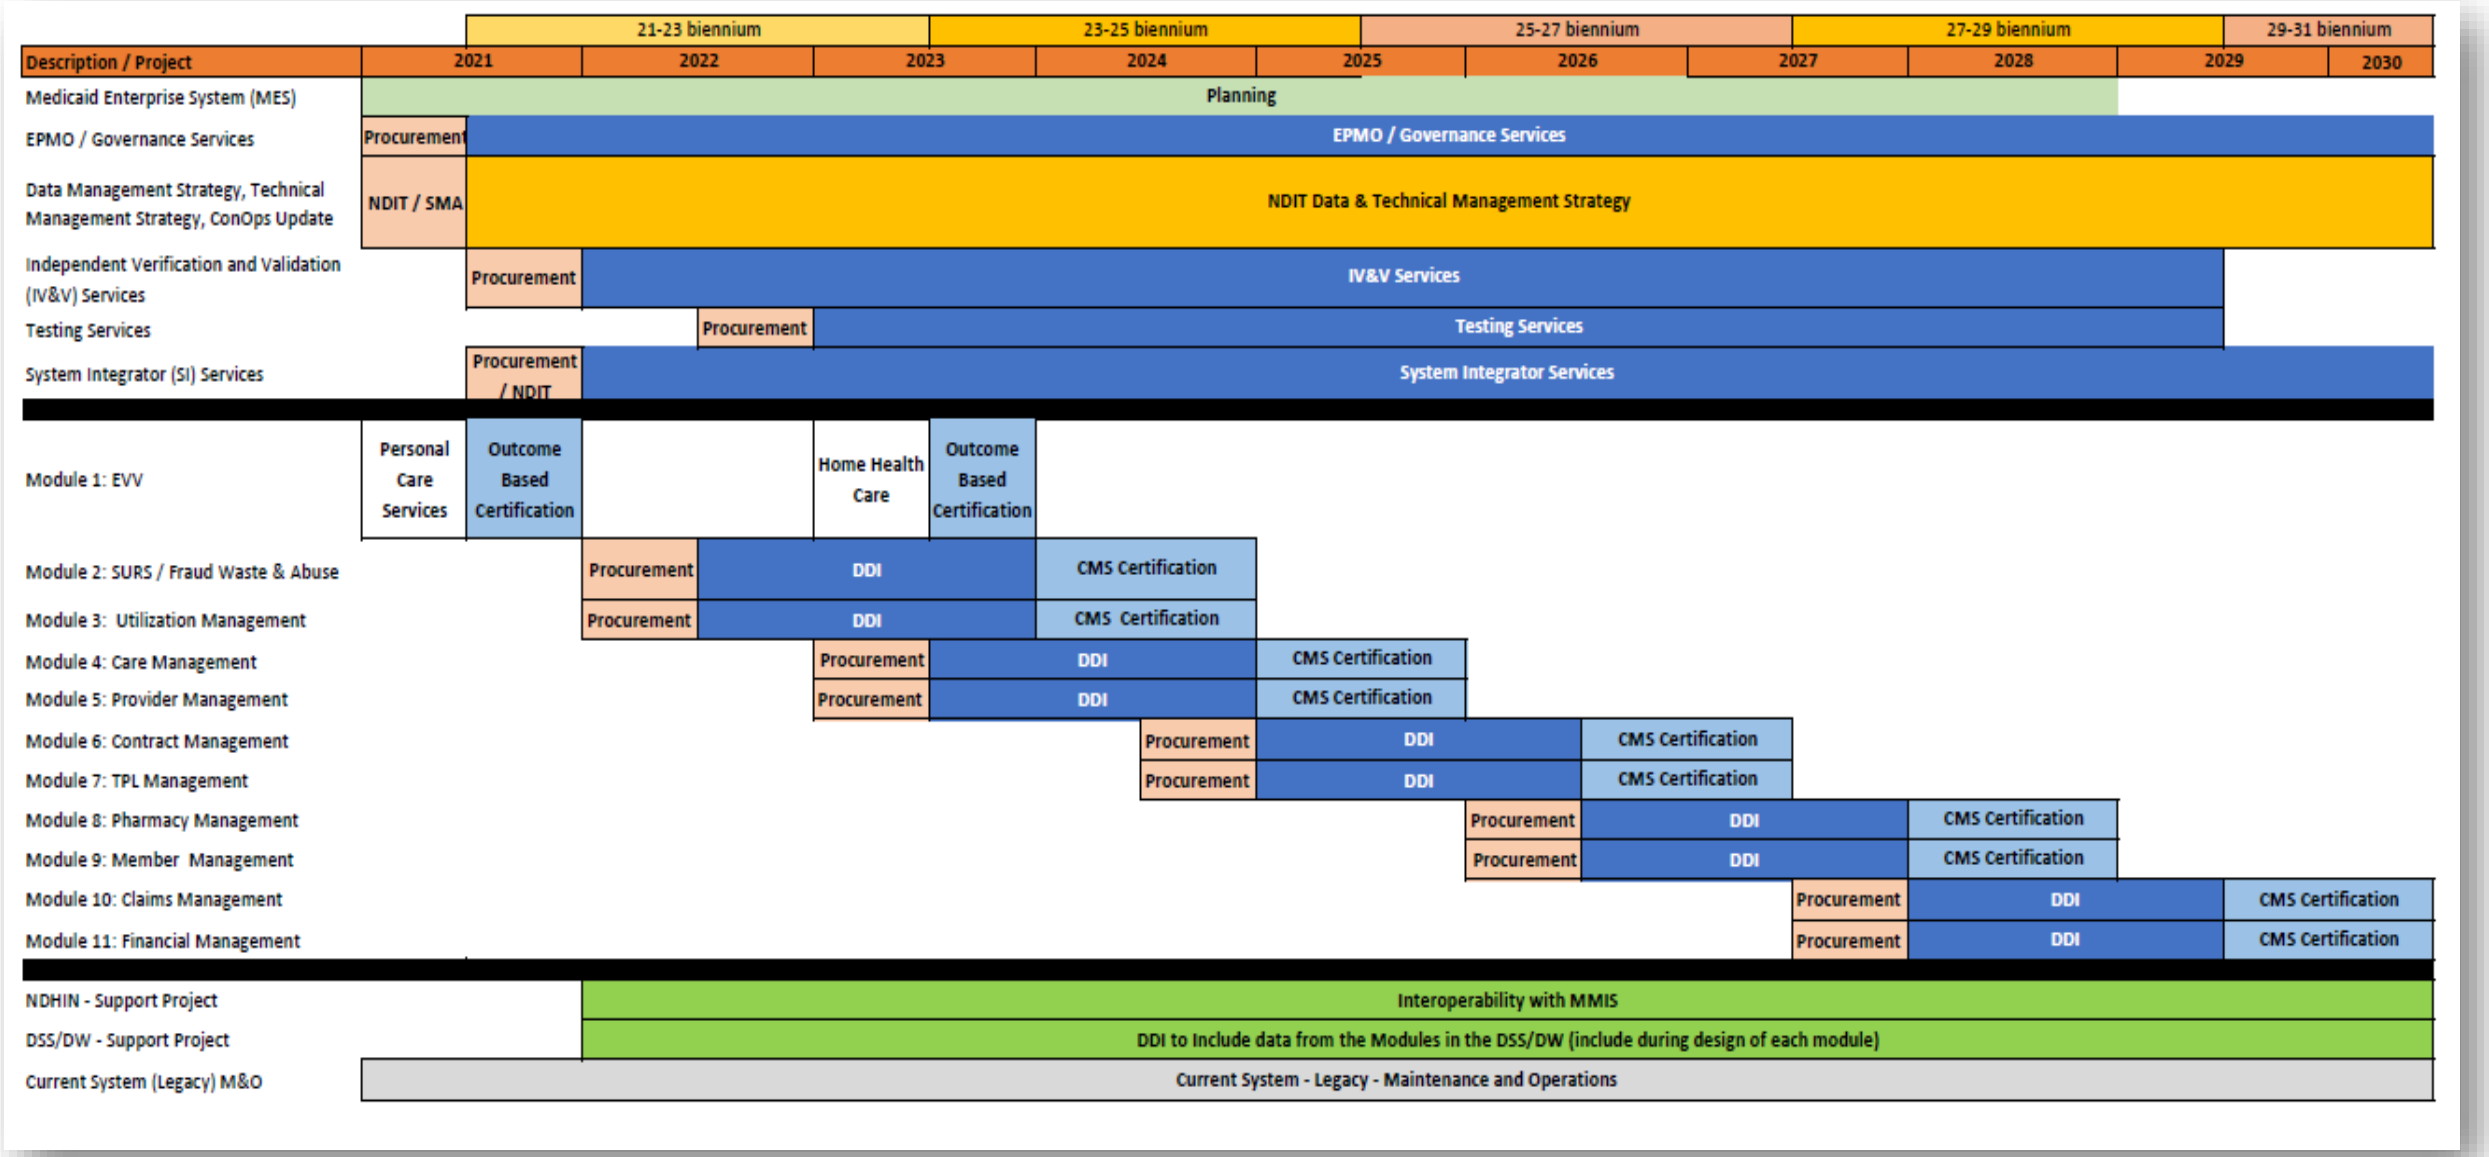
MMIS Contracts

- Inclusive to only MMIS Vendor
  - **Design, Development, Implementation (DDI)**
    - 6/2006 – 9/2015: **$77,000,000** (90%/10%)
  - **Maintenance & Operations (M&O)**
    - 10/2015 – 9/2020: **$72,000,000** (75%/25%)
  - **Special Projects**
    - 6/2016-9/2020: **$6,200,000** (Mixed)
  - **M&O Extension**
    - 10/2020-9/2022: **$30,500,000** (75%/25%)
  - **M&O Renewal**
    - 10/2022-9/2024: **$31,600,000** (75%/25%)
  - **Tech Stack Upgrade**
    - 1/2021-7/2022: **$8,800,000** (75%/25%)

MMIS ASSESSMENT

Medicaid Information Technology Architecture State Self-Assessment (MITA SS-A)

MMIS ASSESSMENTS MITA SS-A



- Medicaid Information Technology Architecture (MITA) State Self-Assessment (SS-A)
  - Required by CMS
  - Analysis of the current and proposed future state of MMIS
    - Business Architecture
    - Information Architecture
    - Technical Architecture
    - Standards and Conditions Architecture
  - Developed a Future MMIS Roadmap

KEY FINDINGS MITA SS-A

- Medicaid should develop and implement a MMIS modernization plan
- Medicaid should make progress toward an integrated Medicaid Enterprise System
- Modules should be based on the business needs
- Modules can adapt to rapidly changing technology needs
- Medicaid should adhere to CMS Modularity and Interoperability directives to receive enhanced FFP
- The State needs improved data governance & standards
- Medicaid should move towards process automation (Customer Satisfaction)
  - Increase Accuracy
  - Improves Timeliness
  - Reduce Costs

MODERNIZATION – THE ROAD AHEAD

MITA ROAD MAP-HIGH-LEVEL PROJECT SCHEDULE

PROGRESS IN OTHER STATES

Montana

Montana Program for Automating and Transforming HealthCare Project **(MPATH)** 6-year plan ($99 Million)

- Data Analytics (Multi-release March 2018-November 2019)
- Provider Services (Multi-release August 2019-April 2020)
- System Integration Services(Implemented July 1 ,2019)
- Care Management (Multi-release June 2020-February 2022)
- Claims Module-Planned Implementation (Late 2022/Early 2023)
- Additional RFP Releases (October 2019-December 2022)
  - Fraud, Waste & Abuse Analytics
  - TPL Recoveries
  - Customer Care
  - Pharmacy Benefit Management System
  - Drug Rebate Management
  - Electronic Visit Verification

Wyoming

The Wyoming Department of Health, Division of HealthCare Financing, MMIS Replacement Project Team for the Wyoming Integrated Next Generation System **(WINGS)**

- $75 million proposal
- Four Modules have been implemented and are live:
- Pharmacy Benefit Management System(PBMS)
- System Integrator
- Data Warehouse
- Fraud, Waste and Abuse Case Tracking
- Two Modules are in the implementation phase
- Benefit Management System-Claims Processing with Third Party Liability
- Electronic Visit Verification(EVV)
- Care/Case Management System Module RFP through procurement July 2020

2021-23 EXECUTIVE REQUEST

- $35,000,000 Budget **(90% Medicaid Match)**
  - Target 2 Modules
- Establish Large IT Oversite – May 2021
- Release RFP in 2021
  - Systems Integrator
  - Independent Verification and Validation (IV&V) Services
  - Module 1
- Release RFP in 2022 – Module 2

VALUE BASED PURCHASING

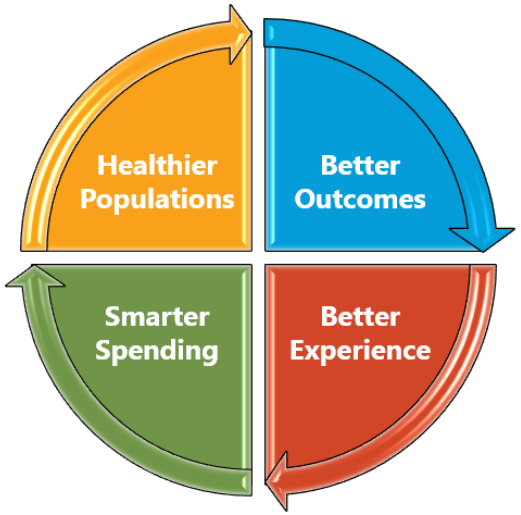
DHS met with members of the North Dakota Hospital Association

- 6 Prospective Payment System (PPS) Hospitals
- 3 large Critical Access Hospitals

Meeting Dates



- **11/13/20** – Episodes of Care
- **12/3/20** – Pay-For-Performance
- **12/10/20** – Accountable Care Organizations

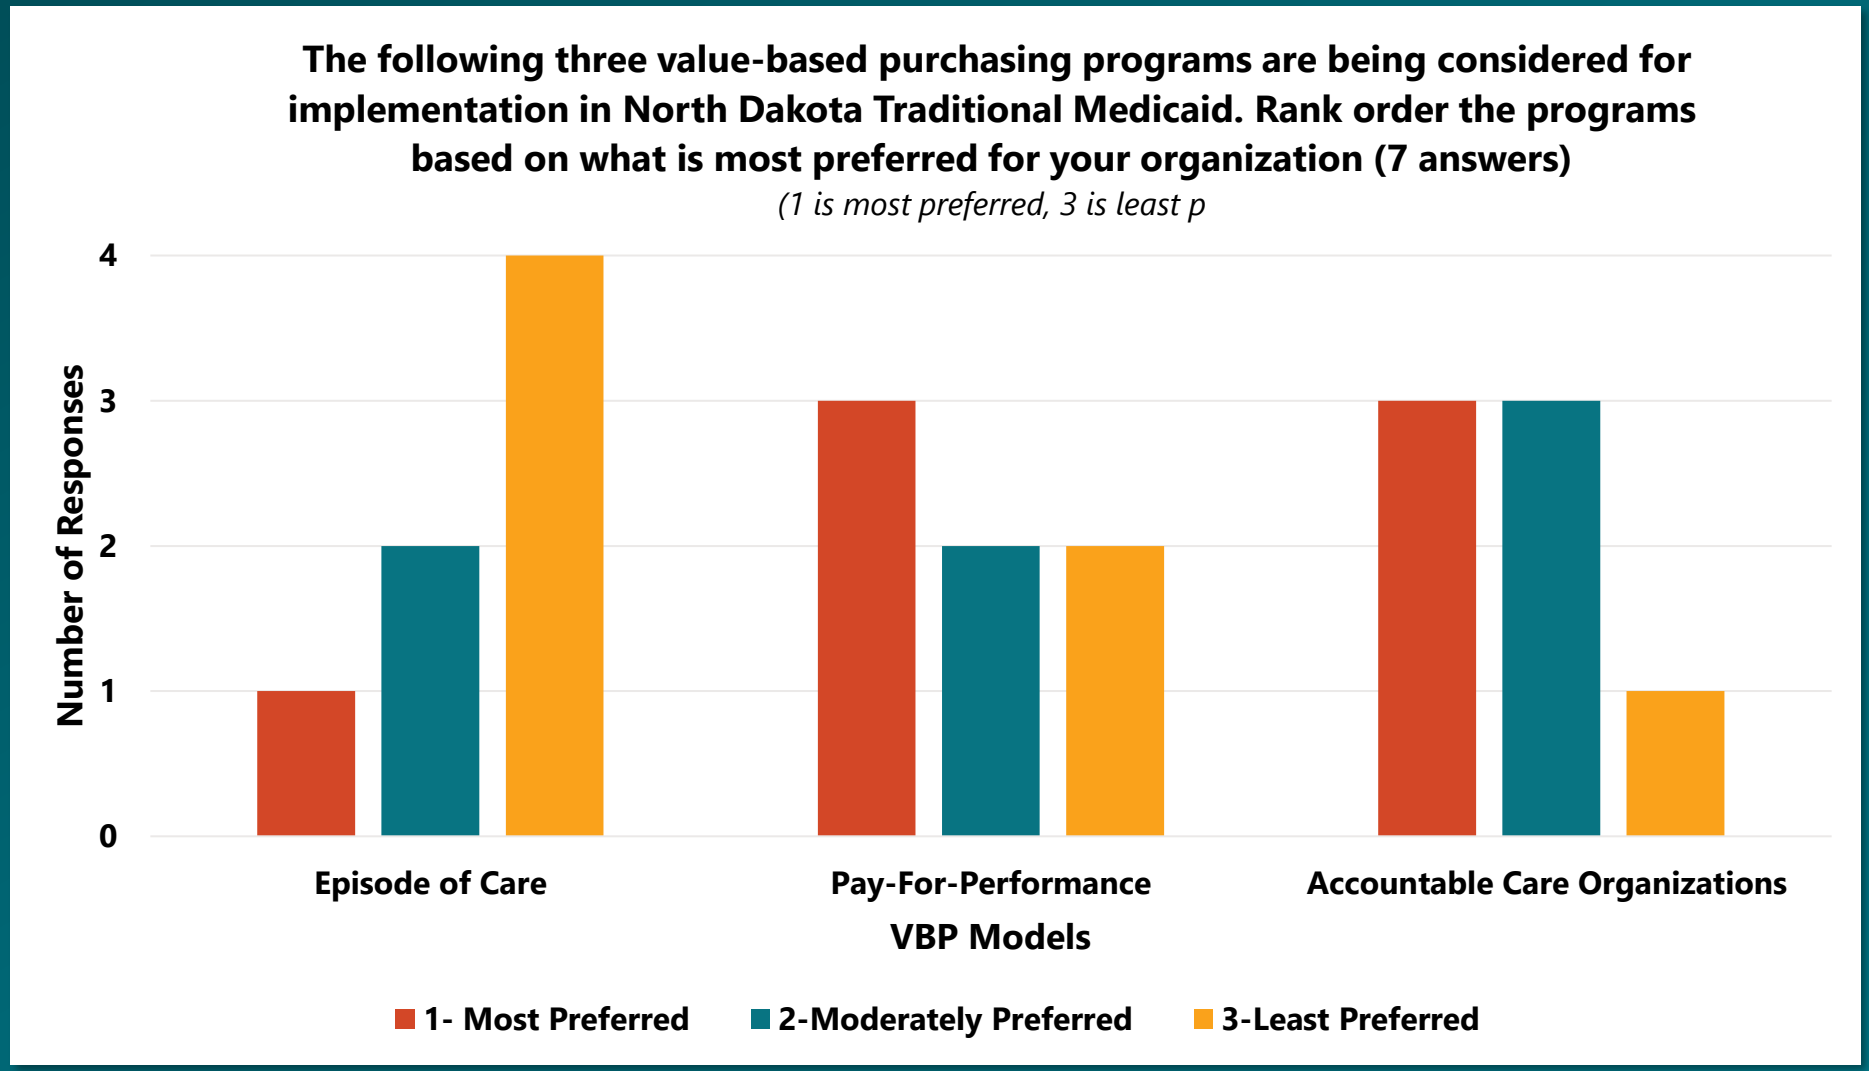
The 3 VBP Models presented by experts from other states

- Tennessee presented on Episodes of Care
- Wisconsin presented on Pay-For- Performance
- Caravan Health presented on Accountable Care Organization

VBP Models align with Quality

Quadruple Aim for ND Medicaid

VALUE BASED PURCHASING



States that **incorporate VBP model** into their Medicaid program can **increase quality** and **bend the cost curve**

DHS administered a **survey** to North Dakota Hospital Association member to understand their preferred VBP model based on the presented models

All **PPS Hospitals**: Essentia, CHI St. Alexius, Altru, and Trinity responded to the survey, **except for Sanford**

All **3 CAHs** responded to the survey

VALUE BASED PURCHASING SURVEY RESULTS

VALUE BASED PURCHASING SURVEY RESULTS

VBP Models	Top Pro	Top Con
Episode of Care	No changes to current billing procedures	If cost is above an acceptable threshold, the provider owes a payment back to the state.
Pay-For-Performance	Simplicity from a billing perspective (one bill instead of many).	Any non-claims based measures will take additional funds to calculate.
Accountable Care Organization	Provides an opportunity to offer more comprehensive care.	Number of patients in the ACO - fewer Medicaid patients can mean more difficulty for providers to manage care and spread risk.

VALUE BASED PURCHASING SURVEY COMMENTS

What benefits do you foresee in transitioning to a value-based purchasing program in North Dakota Traditional Medicaid?

- If it frees up the state to really share data would be value add. Providers would like to get true gaps in care data.
- More focus on comprehensive care for patients to highlight better outcomes, payment model reflects trends in value-based care more so than traditional fee for service
- Successful value-based care programs improve the quality of care while reducing overall cost.
- Pay for performance
- If aligned with other value-based program, it facilitates the movement globally toward value-based payment mechanisms across the state of North Dakota.
- Closer alignment between payment and outcomes
- The trend the health care industry is headed

VALUE BASED PURCHASING SURVEY COMMENTS

What barriers do you foresee in transitioning to a value-based purchasing program in North Dakota Traditional Medicaid?

- Such a small population hard to get to real change.
- Lack of historical data for full evaluation of programs before shift, member attribution issues, patient compliance with care
- Data- timely, accurate data being shared with the providers at risk is critical to managing a population. This will require establishing the infrastructure and a willingness of both DHS and providers. 2. The small population of MCD in ND.
- One size does fit all, we have large and very small hospitals in ND
- Cost; time it takes to change the culture of an organization; the concern that money will initially be taken from all providers and then re-distributed to those that meet the thresholds.
- All programs eventually are takeaways financially. Organizations will have new infrastructure and administrative costs simply to assure they don't "lose" too much funding.
- If the program would be managed in house utilizing different metrics than those currently in existence in Commercial or Medicare Value Based programs.

VALUE BASED PURCHASING FOR HOSPITALS

Estimated Total Potential Savings **$6,250,000**

Value Based Purchasing for Hospitals			
	Total	**Federal**	**State**
Value-Based Purchasing	$ (6,250,000)	$ (4,687,500)	$ (1,562,500)

Thank you!

NORTH Dakota | Human Services

Be Legendary.™

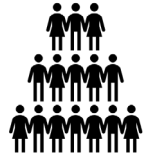
DHS 2021-2025 KEY PRIORITIES

Strong Stable Families

- Maintain family connections
- Improve stability and prevent crises
- Promote and support recovery and well-being

Early Childhood Experiences

- Support workforce needs with improved access to childcare
- Help kids realize their potential with top quality early experiences
- Align programs for maximum return on investment



Services Closer to Home

- Create pathways that help people access the right service at the right time
- Engage proactively with providers to expand access to services

Efficiency Through Redesign

- Embrace process redesign to find efficiencies in our work
- Leverage technology to support greater efficiency, quality and customer service

High-Performing Team

- Develop a One DHS Team culture
- Engage team with opportunities for learning and development
- Implement fiscal scorecard to drive efficiency and effectiveness

Reinforce the Foundations of Well-being

Economic Health | Behavioral Health | Physical Health

MEDICAL SERVICES DIVISION

Our Values

We help...

our members receive safe, appropriate, quality care in a timely manner.

We communicate...

by listening, sharing information, and seeking feedback.

We partner...

with stakeholders, other state agencies, and tribes to achieve shared goals.

We oversee...

Medicaid to ensure integrity, efficiency, and stewardship of public resources.

Medicaid Expansion Eligibility for Adults

Family Size	Medicaid Expansion 138% of PL
	Monthly
1	$ 1,468
2	$ 1,983
3	$ 2,498
4	$ 3,013
5	$ 3,529
6	$ 4,044
7	$ 4,559
8	$ 5,074
9	$ 5,589
10	$ 6,105
+1	$ 516

$17,609 per year

$36,156 per year

$14,000 per capita in health care benefits

MEDICAL SERVICES DIVISION

How We Pay

Contracted Services 1915(b) Waiver

- States design an Alternative Benefit Plan that describes the services and must include Essential Health Benefits

- Medicaid Expansion **does not** cover:
  - Skilled Nursing Facility Services*
  - Dental Care Office Visits**
  - Routine Eye Care**
  - Any waivered services
  - Long Term Care services
  - Room and board for Residential Treatment services**

** Only covers up to 30 days and only covers a skilled level of care*
*** Only covered for 19- and 20-year-olds*

Medicaid Expansion

Managed Care Organization:

- Risk Based Capitation paid on a per member, per month basis
- Current Vendor: Sanford Health Plan (SHP)
- Contract is currently being re-bid
  - Notice of Intent to Award will be issued approximately 5/21/2021
  - Contract Start will be approximately 1/1/2022

EXECUTIVE REQUEST 2021-2023

NORTH Dakota | Human Services

Be Legendary.™

NORTH DAKOTA LEGISLATION TO DATE

Since the initial implementation, each subsequent session of the ND Legislative Assembly has reauthorized ND Medicaid Expansion as administered and managed through a **Private Carrier**.

The 2019 ND Legislative Assembly (SB 2012) did make the following updates to the ND Medicaid Expansion Program:

- Directed the Department to continue the utilization of a private carrier for the administration and management **except for pharmacy services**, effective January 1, 2020.
- Directed the Managed Care Organization (MCO), while under contract with the Department, to
  - **Develop and implement a uniform provider reimbursement methodology**
  - **Added 1915(i) Behavioral Health Services through the MCO**

ND Medicaid Expansion Transition Principles

All North Dakota Medicaid **members** should be valued the same, **regardless of Category of Eligibility**, and should have **access to the same core services.**

All North Dakota Medicaid **providers** should be valued the same, **regardless of traditional or expansion**, and should have **equity in reimbursement.**

Taxpayers should be assured that their state and federal taxpayer dollars are not being used to disproportionately support **able bodied adults**, who can work and **transition off government assistance** unlike most traditional Medicaid clients.

Medicaid Expansion: Transition from Managed Care to DHS Administration

Note: Other services excludes ob/gyn.

Medicaid Expansion Reimbursement Comparison DHS Payments to Hospitals

FIGURE 1. Base and Supplemental Payments as a Share of Total Medicaid Payments to Hospitals, FY 2018

Source: Medicaid and CHIP Payment and Access Commission (MACPAC), "Medicaid Base and Supplemental Payments to Hospitals, March 2020 Issue Brief.

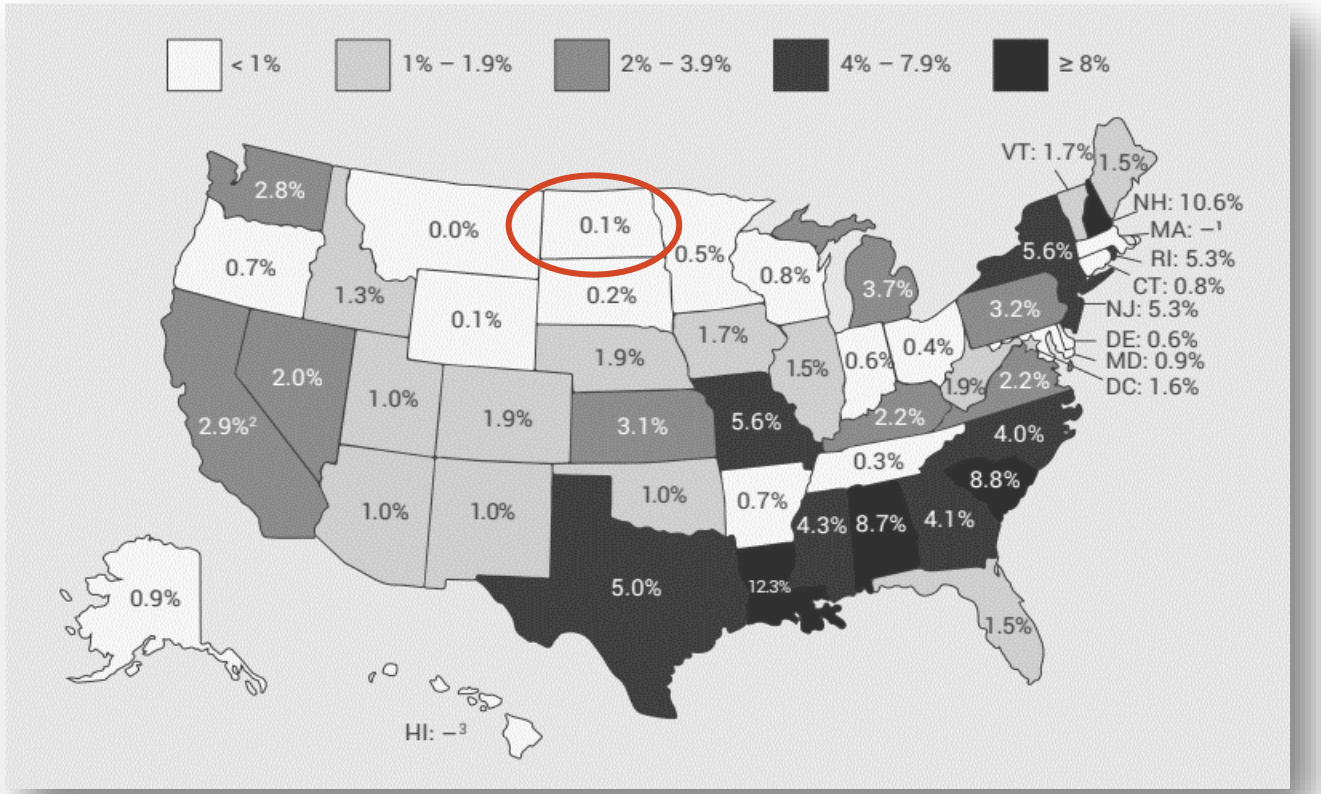
Medicaid Expansion Reimbursement Comparison DHS Payments to Hospitals

Medicaid DSH Payments to Hospitals

- Medicaid disproportionate share hospital (DSH) payments offset hospitals' uncompensated care costs

- Federal rules provide Medicaid matching funds up to a maximum level of DSH payments. Federal limits apply at the individual hospital level and statewide. State DSH allotments are largely based on historical DSH payments.

- The DSH limit is the maximum amount of uncompensated care costs that a State can reimburse a hospital under Medicaid. It is based on **"cost"** of inpatient and outpatient services provided by each hospital and defined as sum of:
    1. **Medicaid shortfall:** the difference between a hospital's Medicaid payments and its cost to provide services to Medicaid-enrolled patients, and
    2. **Uninsured losses:** the cost of providing care to those without insurance for services received, less payments from uninsured.

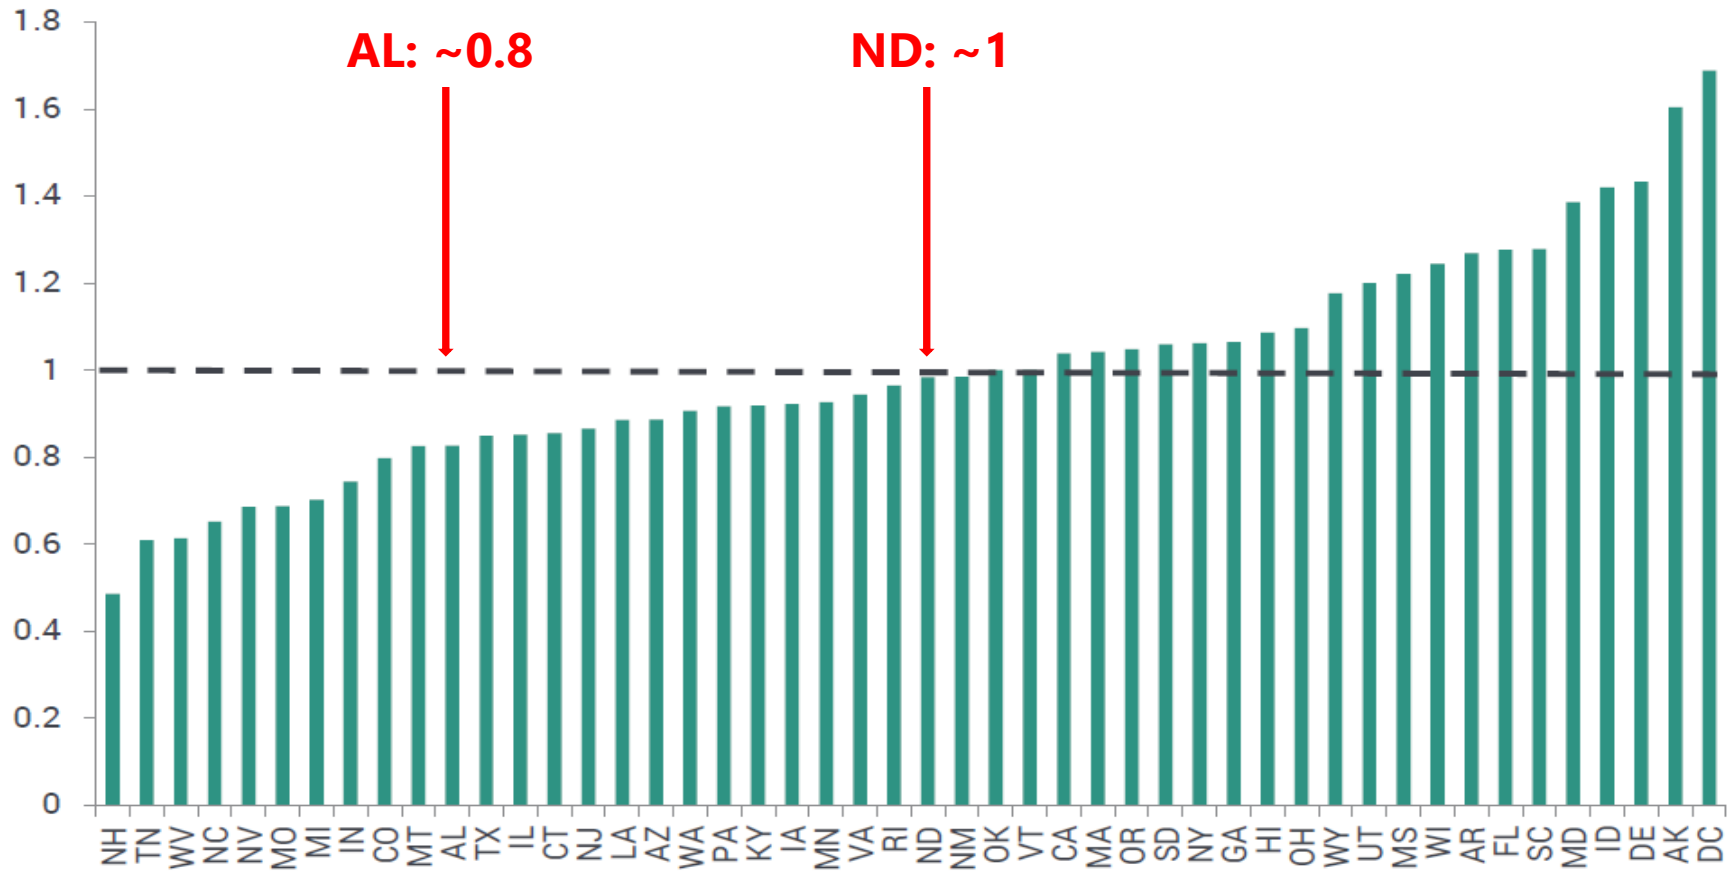


Medicaid Expansion Reimbursement Comparison

DHS Payments to Hospitals

Medicaid DSH Payments to Hospitals

- **North Dakota Medicaid DSH spending is among the lowest in the nation** – both in terms of share of Medicaid spending (0.1%) and absolute dollars ($22.3 million federal and state)
- **North Dakota's Medicaid DSH allotment is about the same as South Dakota** ($22.4 million) and smaller than all other states except for Hawaii, Montana and Wyoming.

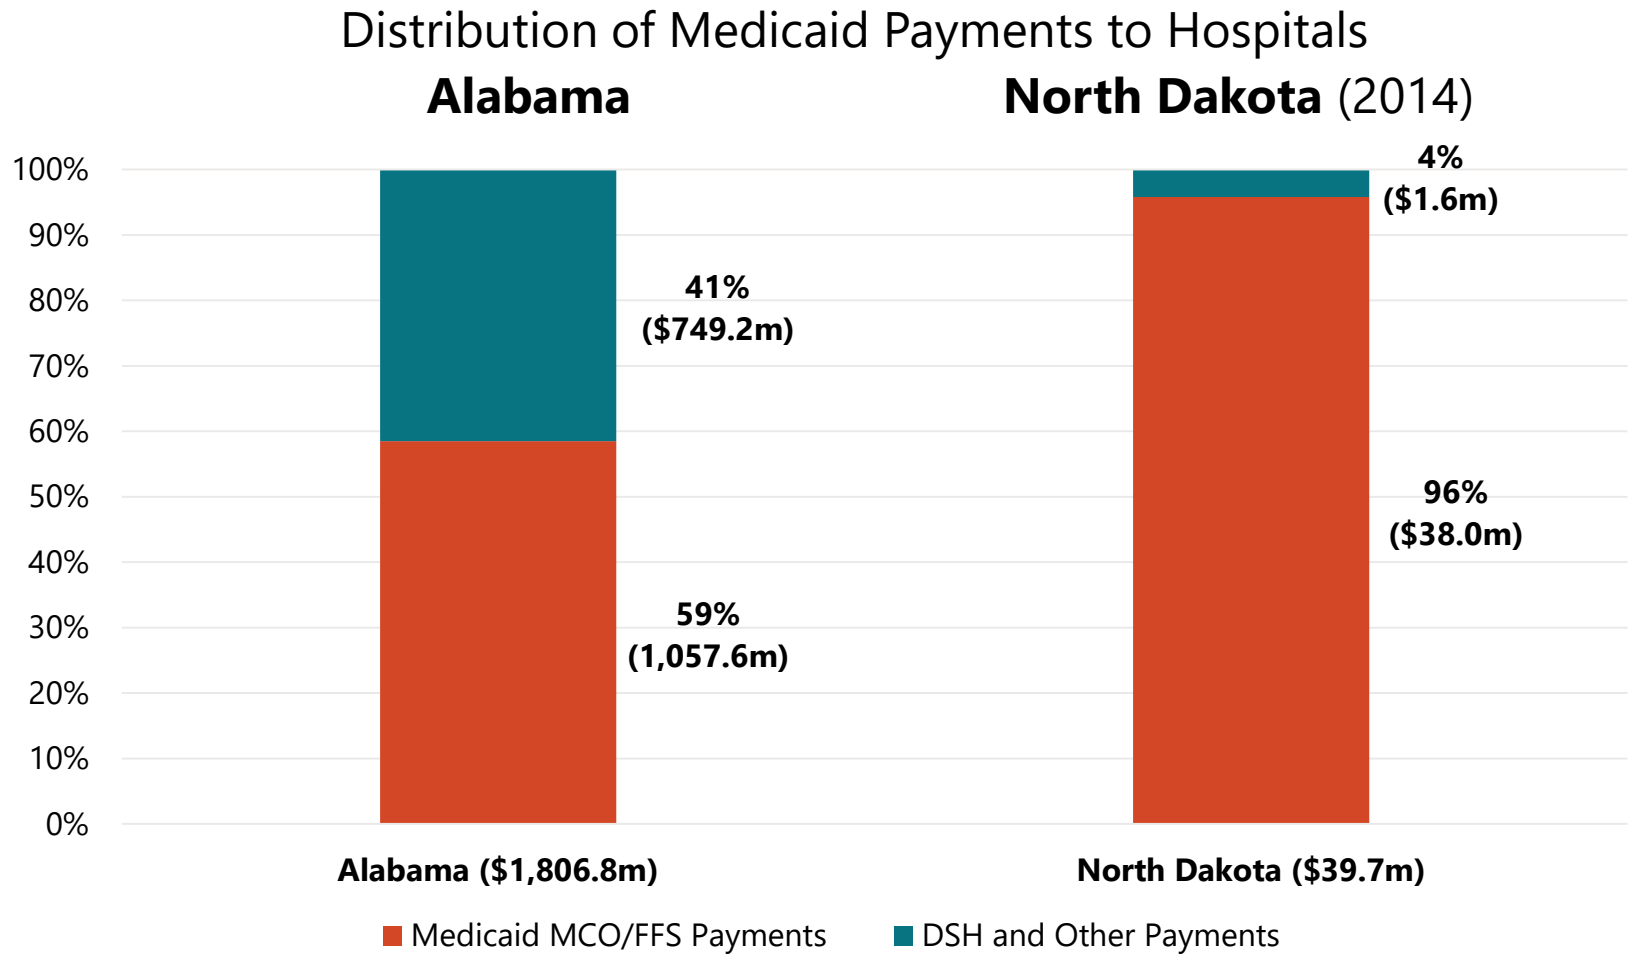


DSH Spending as % of Total Medicaid Benefit Spending by State, FY 2018

Source: Medicaid and CHIP Payment and Access Commission, "Report to Congress on Medicaid and CHIP," Washington, DC, March 2020.

Medicaid Expansion Reimbursement Comparisons Inpatient FFS Payment Index

EXAMPLE: MEDICAID-TO-MEDICARE INPATIENT FEE-FOR-SERVICE PAYMENT INDEX, CY 2010

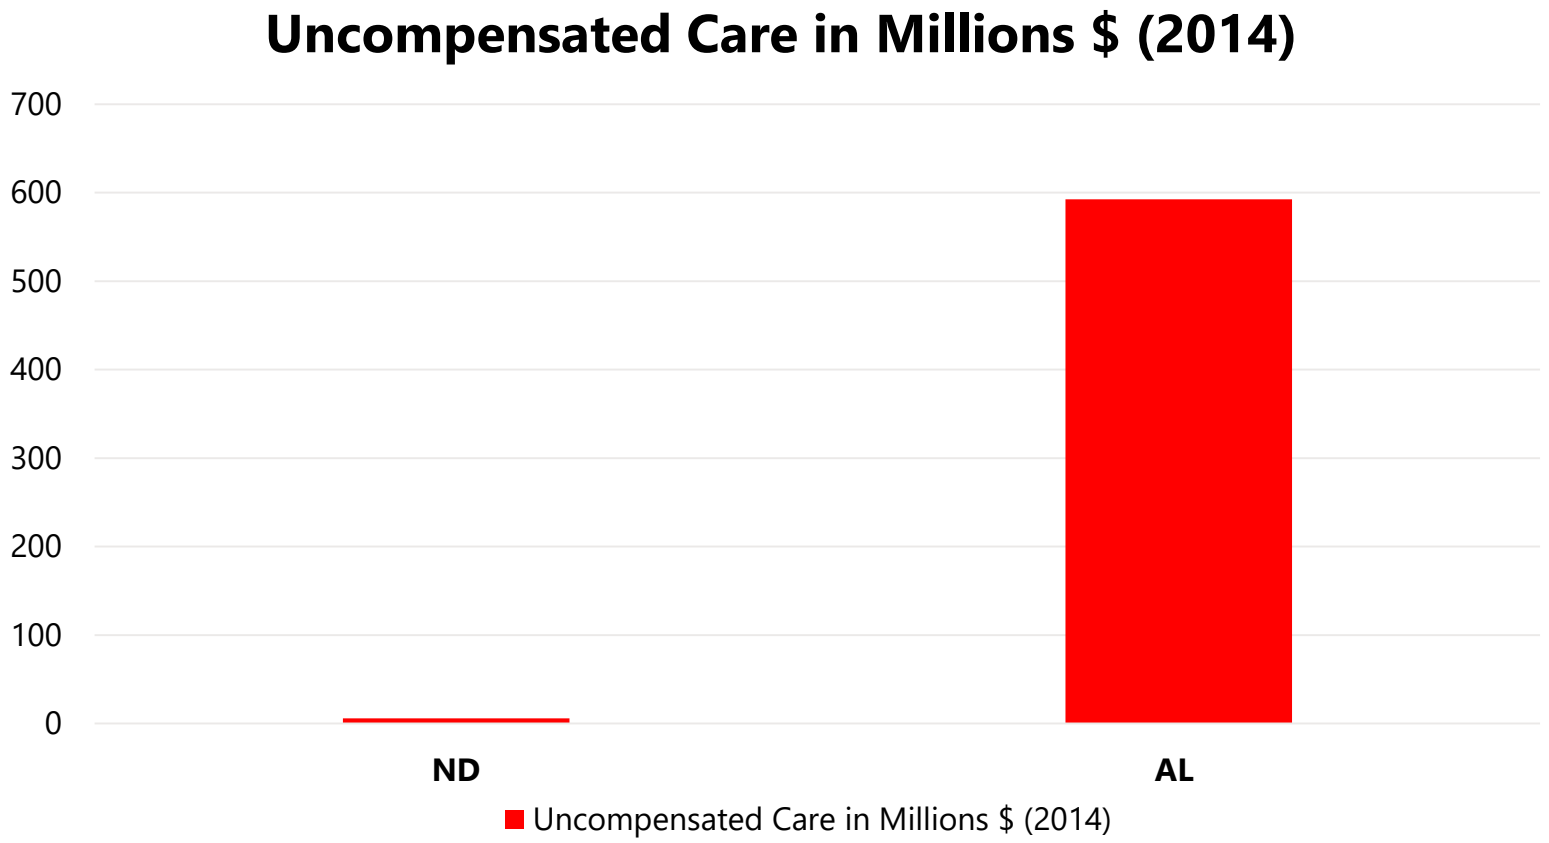


SOURCE: MACPAC. "Medicaid Hospital Payment: A Comparison Across States and to Medicare," Issue Brief, April 2017.
NOTE: The payment index values are normalized around the national average, which has a value of 1.0. For example, a state with an index value of 1.10 would have payments that were 10 percent higher than the national average. Kansas, Maine and Nebraska were excluded due to missing data.

Medicaid Expansion Reimbursement Comparisons

ND's Medicaid Payments

EXAMPLE: NORTH DAKOTA'S MEDICAID PAYMENTS ARE LARGELY IN BASE PAYMENTS



SOURCE: U.S. Government Accountability Office, "States' Use and Distribution of Supplemental Payments to Hospitals," July 2019

Medicaid Expansion Reimbursement Comparison

Hospital Uninsured & Uncompensated Care Comparison

ND hospitals uncompensated care is a fraction of AL uncompensated care

North Dakota	ALABAMA
7.9% uninsured	12.1% uninsured
$5.9 million total uncompensated care	$592.4 million total uncompensated care

SOURCE: U.S. Government Accountability Office, "States' Use and Distribution of Supplemental Payments to Hospitals," July 2019

Summary of Medicaid Expansion Reimbursement Comparisons

North Dakota Medicaid expansion costs per capita are the highest in the country. 54% higher than the second highest state of Alaska.

North Dakota Medicaid FFS rates for physicians are:

- higher than average and comparable to neighboring states

North Dakota hospital expenses are highest per capita and in growth in the U.S.

DSH payments in North Dakota are among the lowest in the United States

Summary of Medicaid Expansion Reimbursement Comparisons

North Dakota Medicaid rates are not equitable

Payment to providers for the care of non-institutional, able-bodied adults, who can work and transition off Medicaid, are 75% to 100% higher than payments to providers for the care of other Medicaid populations like children, elderly, pregnant women, non-institutionalized adults.

Across all other state non-institutionalized programs, none incur per capita expenses as high as $14,107 for Medicaid expansion.

- Per pupil education $12,453
  - Per pupil Kindergartener $10,373
- Per pupil higher education $7,780
- Unemployment insurance $5,379 (average payment pf $448.26 times 12)

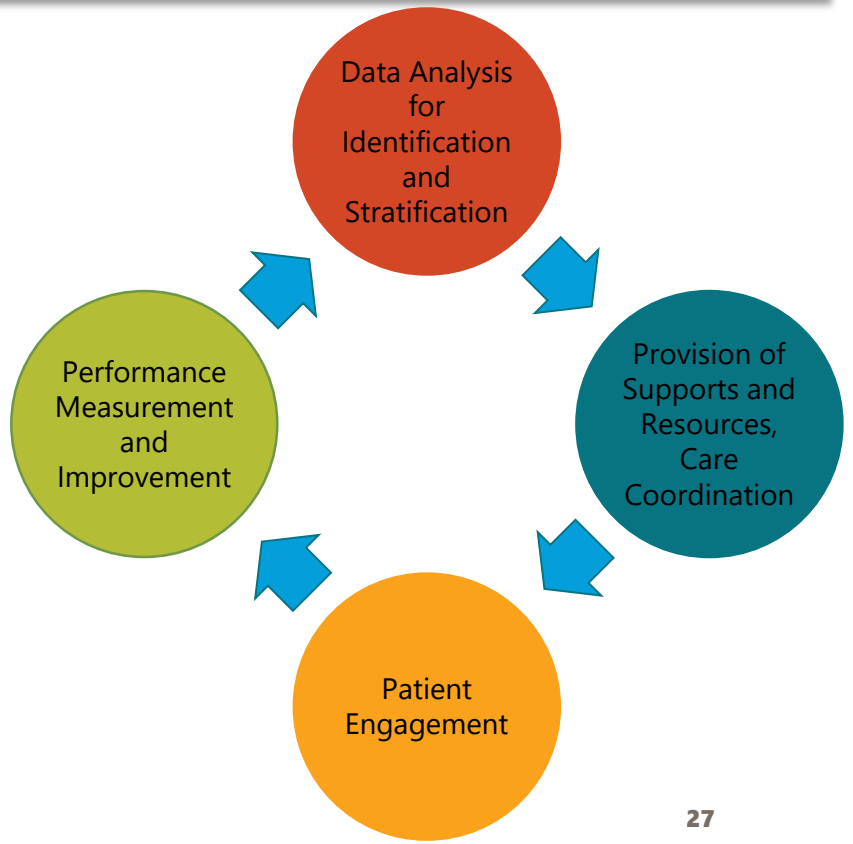
Summary of Medicaid Expansion Reimbursement Comparisons

- Transition from managed care to DHS administration will occur July 1, 2022 giving providers time to adjust, plan, and account for COVID impacts.
- As of 12/18/2020 North Dakota Medicaid providers received $326 million in provider relief funds from the federal government.
- HHS expected to **release $24.5 billion more** in provider relief funds so that providers can make up nearly 90% of lost revenues and net change in expenses. Payments will be made from 12/16/2020-1/31/2021.
  - **The department noted that more than 35,000 applicants won't receive an additional payment because the total relief they've received so far is 88% of their losses or they had no change in revenues or net expenses due to COVID-19.**

Medicaid Expansion: Transition from Managed Care to DHS Administration

Issue: Administration

Comparison Medicaid Expansion Financial Arrangement



What is Managed Care?

Goal: to **control costs** while simultaneously **improving health care quality and outcomes**

Requires more than just care coordination, it involves a set of activities intended to **identify populations** to prioritize for extra support care planning and coordination, patient engagement, and analysis of data to evaluate outcomes and improve processes.

Activities to Improve Health Care Quality & Outcomes

- Intensive management of high-cost individuals.
- Selective contracting with providers willing to offer services at discounted rates.
- Initiatives to steer consumers away from high cost, low value services towards low cost, high value services.
- Requiring enrollees to obtain prior authorization from their primary care physician to gain access to specialty services.
- Focusing on preventive services.
- Monitoring the use of basic and ancillary services and using incentives to reward below-average use and disincentives to discourage excess use.
- Requiring providers to assume part of the financial risk or cost overruns for services they control, directly or indirectly.

Comparison Medicaid Expansion Financial Arrangement

Why do State Medicaid Programs use MCOs?

1. Managed Care Organization Takes on the Risk versus the State
2. Budget Predictability
3. Budget Savings
4. Improved Outcomes

Risk & Predictability

- As in any risk-based model the more people in the risk pool the more likely the managed care organization can spread the risk across health and less health individuals
- The larger the risk pool, the more predictable and stable premiums will be.
- Premiums also rely on the average health care costs of the enrollees
- Adverse selection occurs when the insurer attracts individuals when they have greater health care needs
- In **North Dakota**, the
  - **risk pool** is the **smallest** in the **entire country** using managed care
  - **premiums** have **not** been **predictable** or **stable**
  - **churn rate** indicates that **adverse selection** is probably occurring

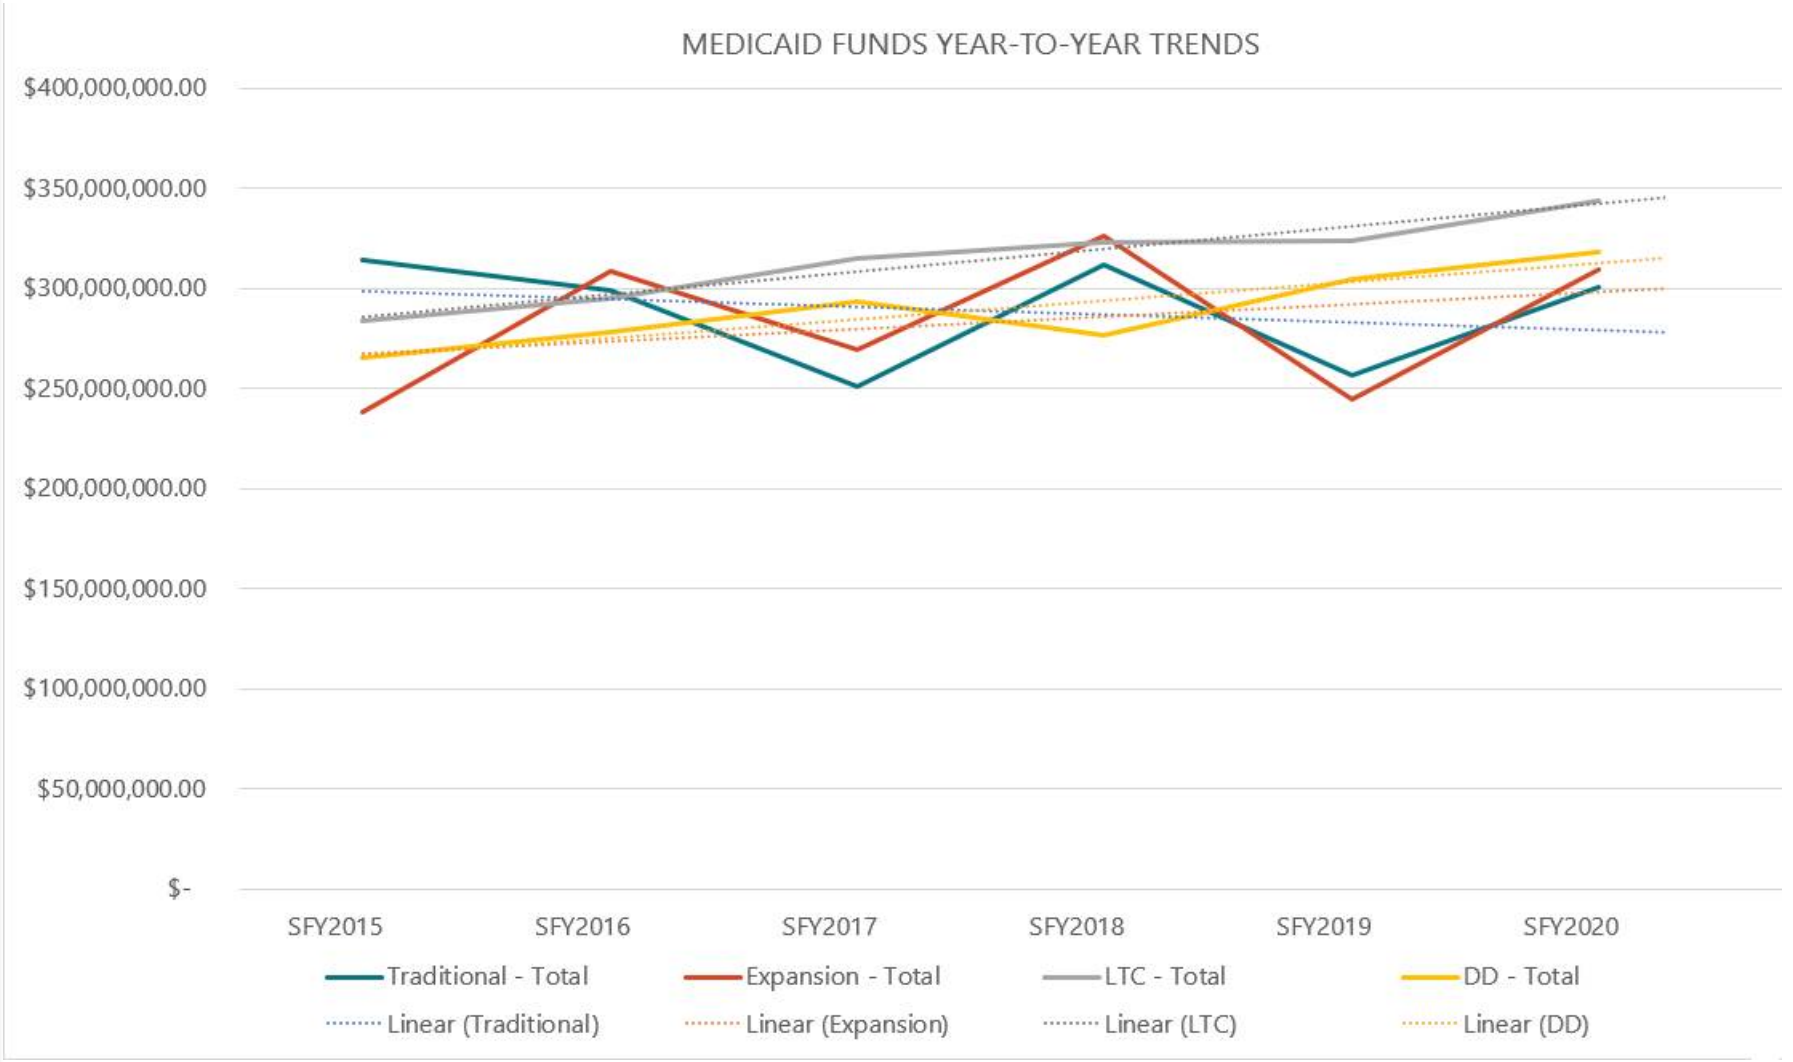
Comparison Does Managed Care Save Money?

Inconclusive Evidence

Lewin Group Analysis

- AHIP funded
- Meta-analysis, a review of 24 studies
  - none were peer reviewed
  - proposes that cost savings range from 0.5% to 20%
  - Point to decreases in inpatient utilization but at that time inpatient was going down throughout the U.S. health system

Mathematica 5-State Analysis



- Found no savings

Duggan Study from NBER Analysis

- Showed moving to managed care resulted in no improvement in health care and substantial increases in government spending.
- MCO did little to nothing to reduce spending.

Source:https://www.healthaffairs.org/do/10.1377/hblog20180430.510086/full/

Comparing Has Medicaid Expansion Saved Money in North Dakota?

Comparing Has Medicaid Expansion Improved Health?

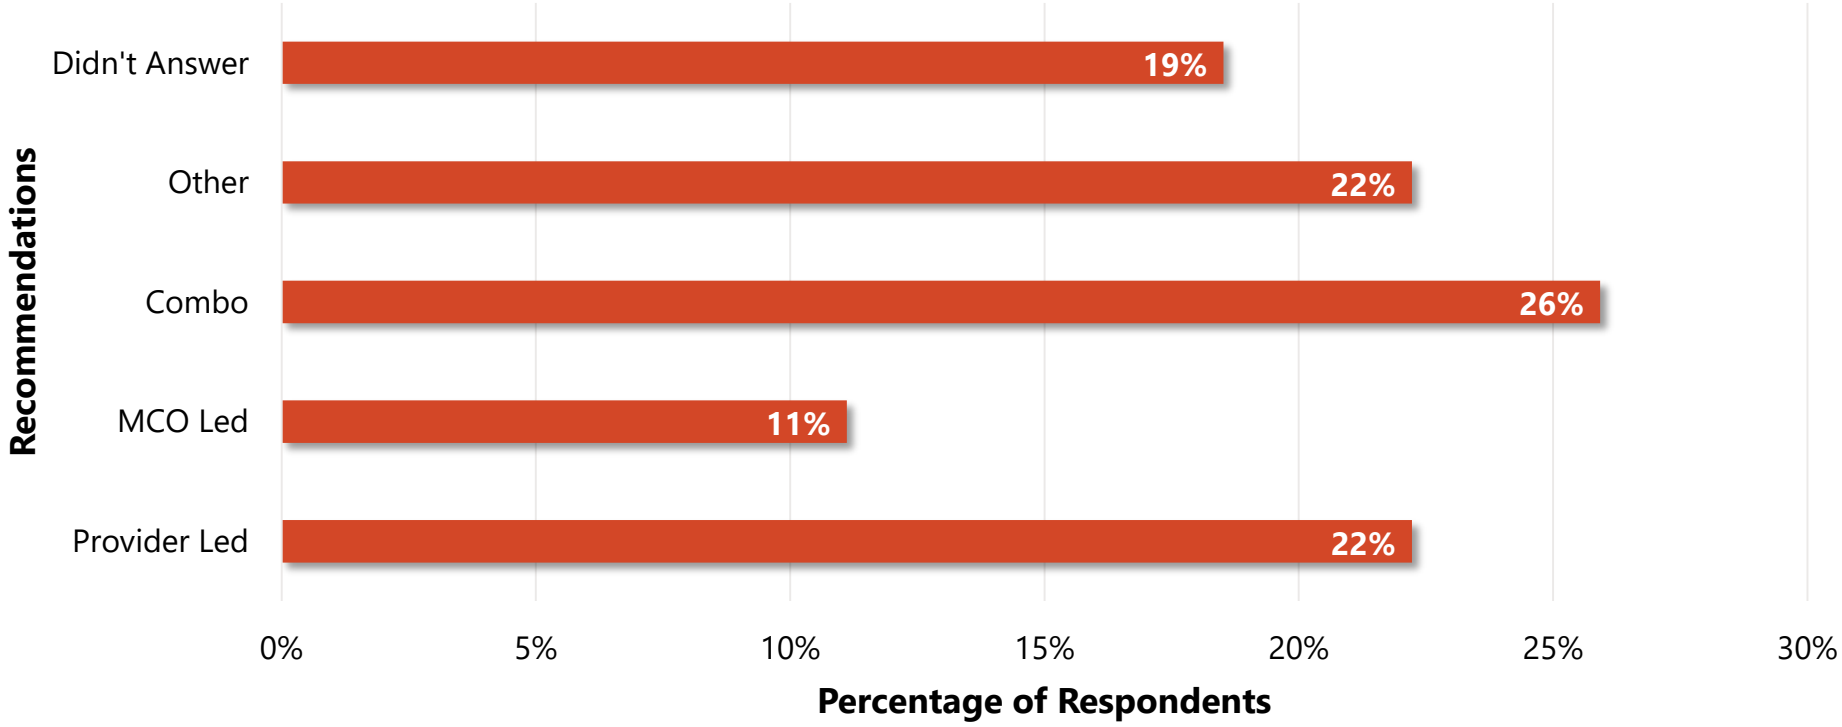
HEDIS and CAHPS measures are skewed toward members with **continuous enrollment**. In expansion we know the churn rate is high (~11,000 members) and we know that expenditures keep going up and not down.

The State's contracted actuary uses a different analytical tool to get a better idea of the **effectiveness of the managed care** organization called Prometheus.

- 43 episodes are built such as diabetes and knee surgery
- Compares the utilization and cost based on clinical standards
- Sorts potential waste and identifies care that should have been potentially avoided using the right interventions and clinical management

What is Care Coordination in an MCO?

Prior testimony in 2019 session on the number of care coordinators in managed care organization



- Difference between care coordination, case management, and population health in managed care:
  - Care Coordination: contracted to primary care providers
  - Case Management: typically done by the MCO typically and targets high risk members, high touch and costly
  - Population Health: typically done by MCO and relies on data analytics to target sub-groups.

ND Medicaid Expansion MCO Survey

There are different approaches to care management by a MCO:

1. **Provider-led** (with an enhanced payment to providers for outcomes)
2. **MCO-led** (MCO has its own care managers)

What do you think is the ideal care management approach, why?

ND Medicaid Expansion MCO Survey

"Provider led care management because the care managers are direct member of the patients care team coordinating care and service for the patient. Hybrid models work will where MCO's support provider led programs with expertise in certain programs such as behavioral health."

"I believe the best method should be a combination of provider-led, when possible, and MCO-led, when necessary. Not all providers will be able to perform necessary care management, but that doesn't mean the MCO should simply take on all care management when there are providers who can and do perform important care management to the benefit of their patients. As such, those high performers should be eligible for enhanced reimbursement. Different strengths and areas of expertise to the table that complement each other.

"Ideally, we feel the care management should be owned by the primary care providers who work closest with the patient. With the enhanced primary care models, we are able to fill in the gaps more easily by being closely connected to the patients and providing ongoing care management to the patients through calls, virtual care, patient portals, goal setting and management, mental health counseling, and medication management."

"The ideal approach is a hybrid of the two. Both the MCO carrier and the provider."

"I feel that provider lead would be more beneficial as they understand the needs of their patients and understand barriers to service delivery unlike MCO. I have learned that direct contact with individuals allows for feedback and ability to understand how policies affect direct practice."

What did providers comment in the MCO Survey?

Proposed Solution
Health Homes

Transition from managed care to managed fee-for-service

- requires a more robust management program than current PCCM program

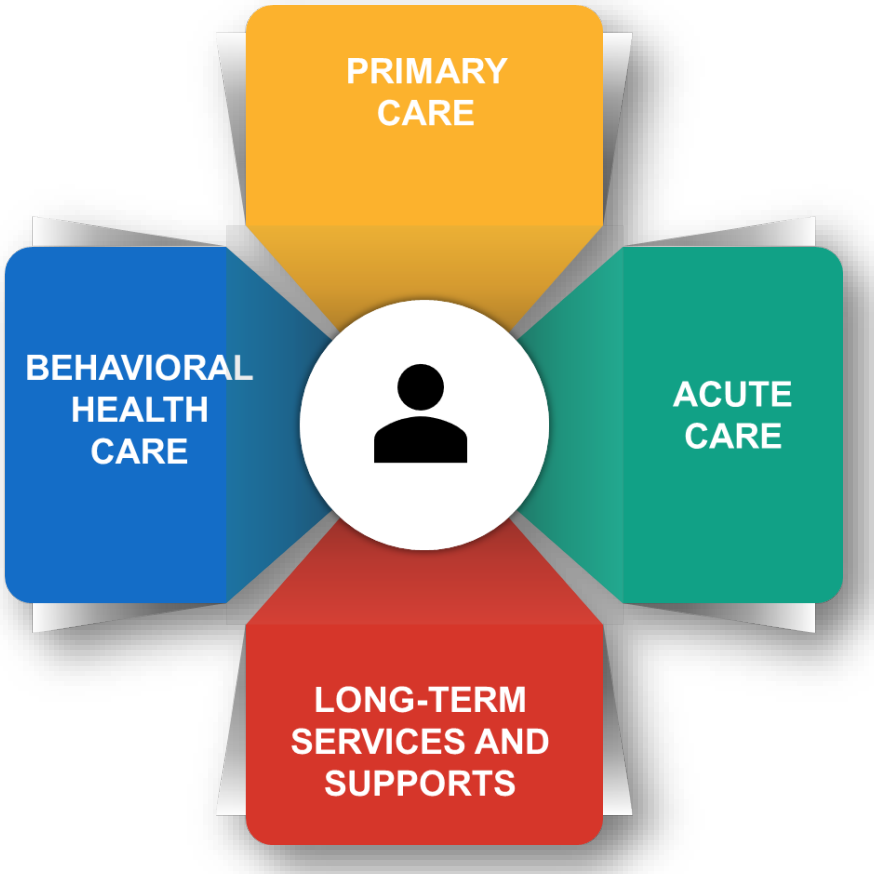
DHS brought in presenters from

- Alabama (Medical Homes to ACO)
- South Dakota (Health Homes Model)
- Connecticut (ASO model) in early 2020

South Dakota avoided $7.3 million in costs using Health Homes in 5 years

Feedback from North Dakota Medicaid Stakeholders

- Noted that **Health Homes** was the preferred model
- Subsequent meeting with outpatient stakeholders



2021-2023 Executive Request

- Authorizes DHS to plan for **Health Homes** and seek CMS approval
- Enhanced payment will offset some of the reduction in rates.

Proposed Solution
Health Homes

Medicaid Health Homes

- Builds on the PCMH model
- Fosters a **"whole-person"** orientation to care for individuals with **chronic conditions** through the integration and coordination of:
  - Primary Care
  - Acute Care
  - Behavioral Health Care
  - Long-Term Services & Support

Proposed Solution
MCO → DHS Administration

Parity to Medicaid members

- Adults in **household** will have **same benefit package**
- Adult **dental** and **vision** will be **part of benefit package**

Significant administrative simplification

- Staff time available to develop an overall care coordination for Traditional and Expanded Medicaid, including review of Targeted Case Management, Primary Care Case Management, and Coordinated Services Program
- Client repayment for eligibility overpayments will be limited to actual claims paid vs. the cost of the monthly premium
- Administrative rules and procedures are the same for providers across the entire Medicaid program
- Only one program to manage, evaluate, and report on

Legislature has more control as compared to privately contracted services

Proposed Solution MCO → DHS Administration

Streamlined movement between traditional and expansion
