- **1,032** – Providers receiving CCAP payment(s)/month
- **49%** - % of payments are to kids age 0-3 (32% ages 3-5, 19% ages 6+)
- **35%** - % of children who benefit from CCAP each month (38% ages 3-5, 28% ages 6+)

HB 1540 CCAP Improvements & Innovations

2023 July

Eliminated co-pays for families with income at or below 30% of State Median Income.

Average, per month:
- 1,660 children
- 954 families

August 2023

Increased the infant-toddler state maximum rate to help offset costs for child care providers

November 2023

Enhanced payment to child care providers who are quality rating.

Average per month:
- 127 providers

February 2024

Allow up to four months of child care assistance for families when they are looking for work or education.

April 2024

Allow families applying for CCAP up to 30 days to provide documentation necessary to support the eligibility determination.

April 2024

Extended eligibility periods from 12 to 18 months, increasing the timeframe between required re-application periods.

June 2024

Implemented the Child Care Workforce Benefit., providing individuals working at least 25 hours/week in licensed child care setting a CCAP benefit covering 100% of the state maximium rate for their own family.

As of 12/2024:
- 1,661 children
- 744 working individuals

June 2024

Enhanced payment of 30% to providers caring for infant-toddlers.

July 2024

Families experiencing homelessness are allowed 90 days to provide verification and can receive four months of child care during that time.

July 2024

Reduced co-pays for families above 30% SMI.

CCAP Co-Payments by State Median Income (SMI) and Household Size – July 2024

Child Care Workforce Benefit Experience

November 2024, Economic Assistance Child Care team hosted two listening sessions to hear from providers on their experiences, feedback and insights with the Child Care Assistance Program.

Provider quotes on the **Child Care Workforce Benefit's impact** on **staff recruitment, retention, and operational sustainability**

"This has been life-changing for our center as far as hiring and recruitment."

"The workforce benefit, has kept us open... This is life-changing for us."

"The benefit has helped me give bonuses to staff. I can't guarantee raises because it's grant funding, but bonuses have been really nice."

"It's helping providers actually be able to stay open and support their staff."

"I love the childcare workforce benefit."

"It makes a big difference for our employees, and it's great that income isn't a factor for them to qualify"

"This benefit has kept us afloat. We've talked about closing in the past, but this has really made a difference"

"It's a big help for us. This has helped us sustain operations during tough times."

"It's great to see something so supportive for staff, it's made a big difference in retaining employees"

"It would be great to have more assurance that the benefit will last long-term so we can confidently plan."

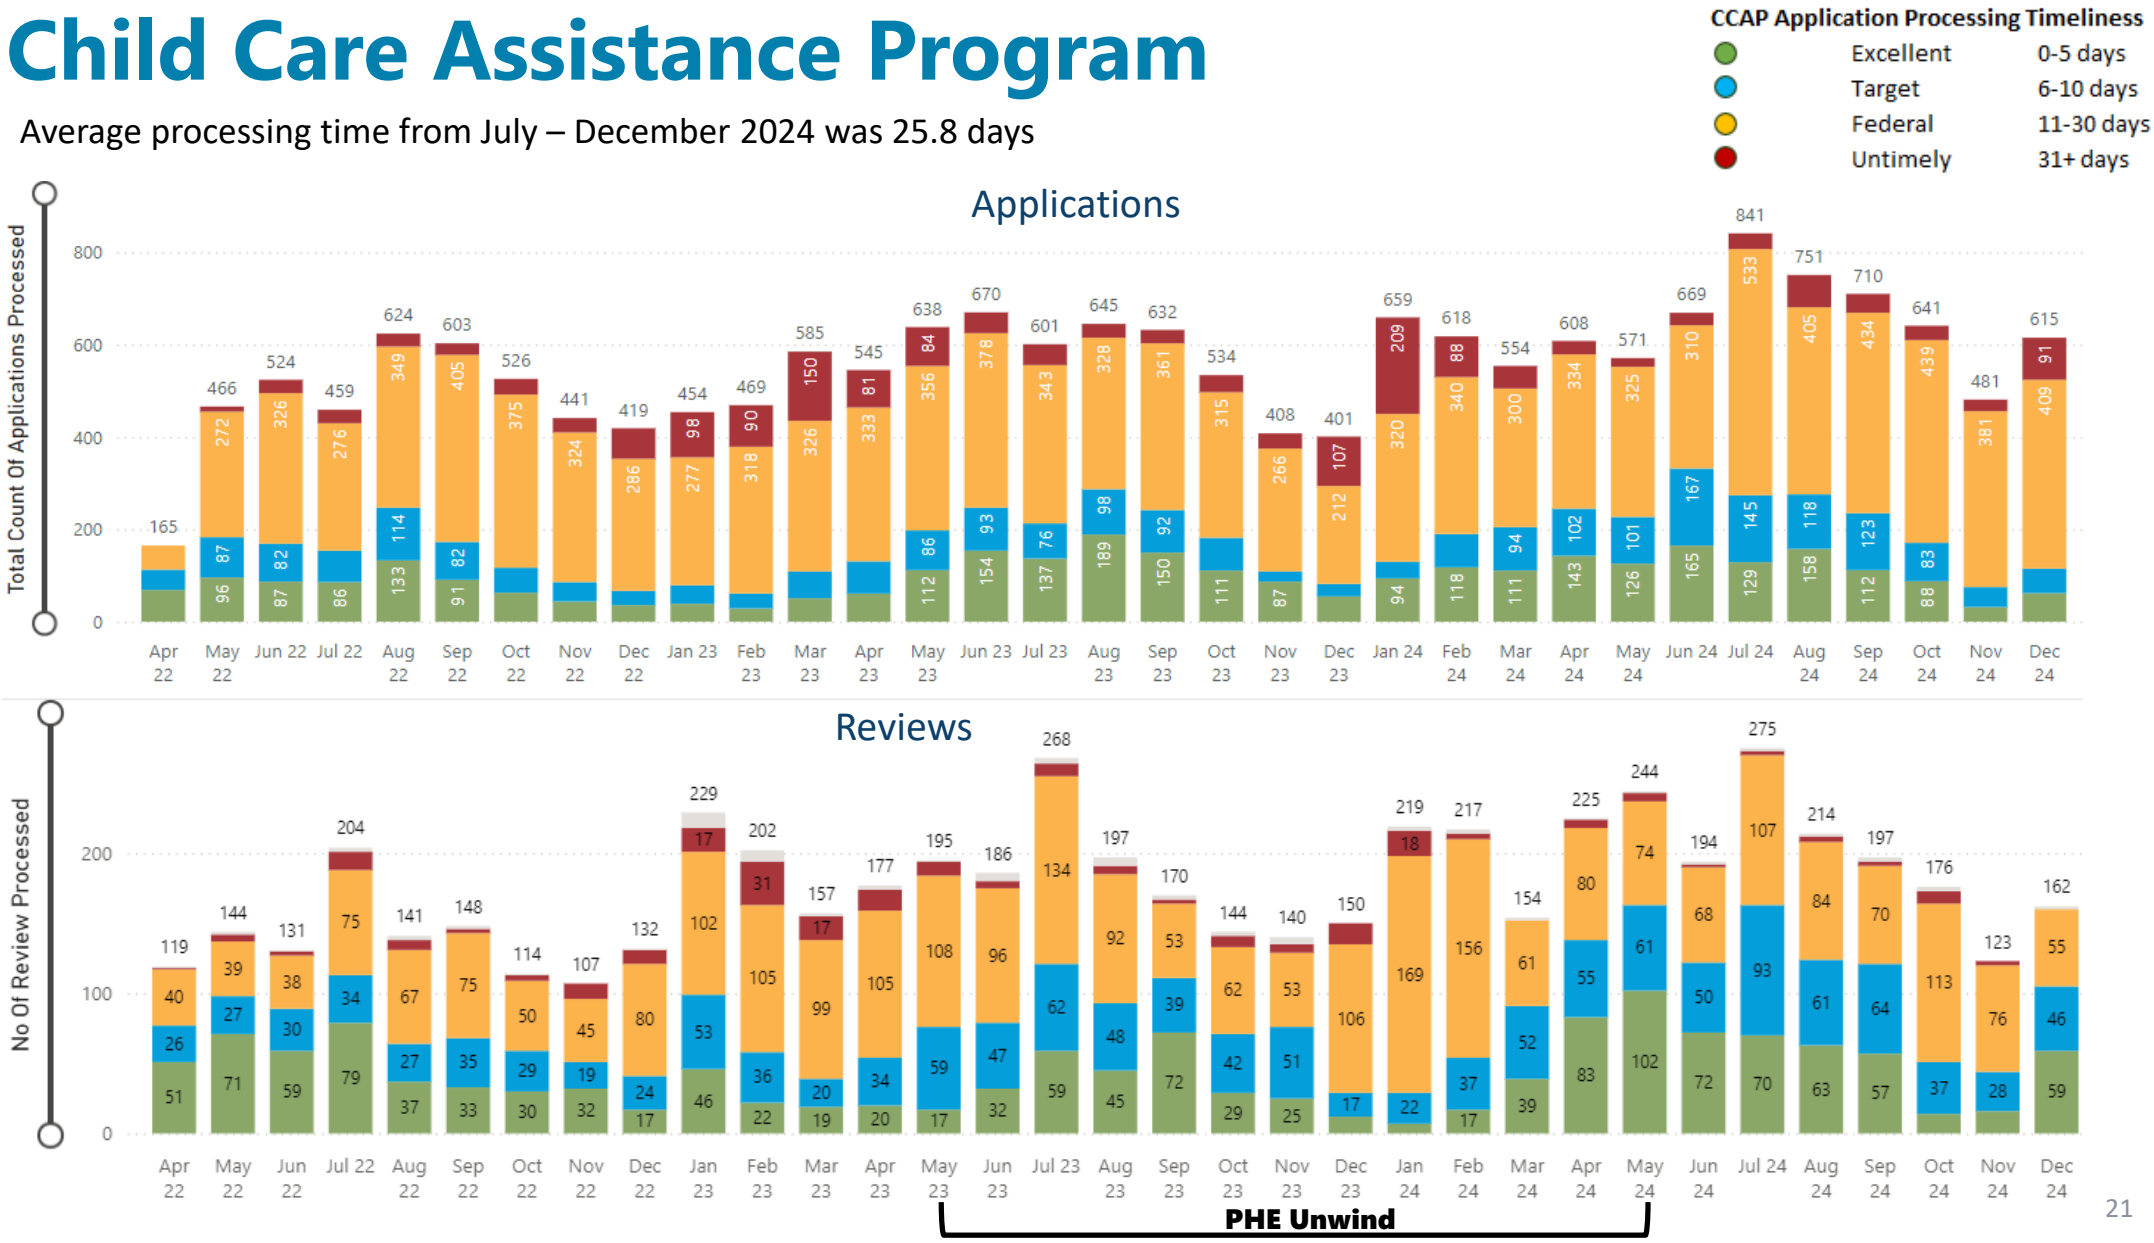
Key Indicator: Child Care Staffing

Child Care Worker Benefit



% Licensed Child Care Providers who have workers utilizing the CCAP Child Care Worker Benefit June-Dec 2024

- **744 workers** employed by 302 providers
- Receiving assistance with child care costs for 1,661 children
- Average monthly assistance / worker = **$1,400** which is the **equivalent** to an **$8/hr wage increase**

Child Care Assistance Program

Average processing time from July – December 2024 was 25.8 days

Program Integrity and Performance

CCAP Quality Control Reviews

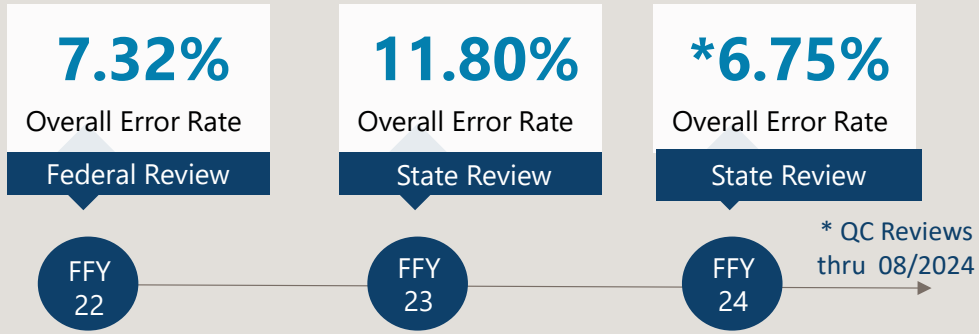
Federal and state reviews of CCAP are conducted by the Economic Assistance Policy Division Quality Control Unit (QC).

Federal Reviews vs. State Reviews

Federal Reviews

- Occur every three years
- 23 randomly selected cases monthly
- There is no guarantee a case from each human service zone office will be selected for review

State Reviews



- Occur during non-federal years
- 30 cases sampled monthly
- Measures are taken to ensure at least one case from each human service zone office is selected yearly

CCAP Performance

Accuracy of case processing is measured as an improper payment error rate.

How is an error rate calculated?

$$\text{error rate} = \frac{\text{improper payments for reviews completed}}{\text{total payments of reviews completed}}$$

The federal target for CCAP error rates is less than 10%.

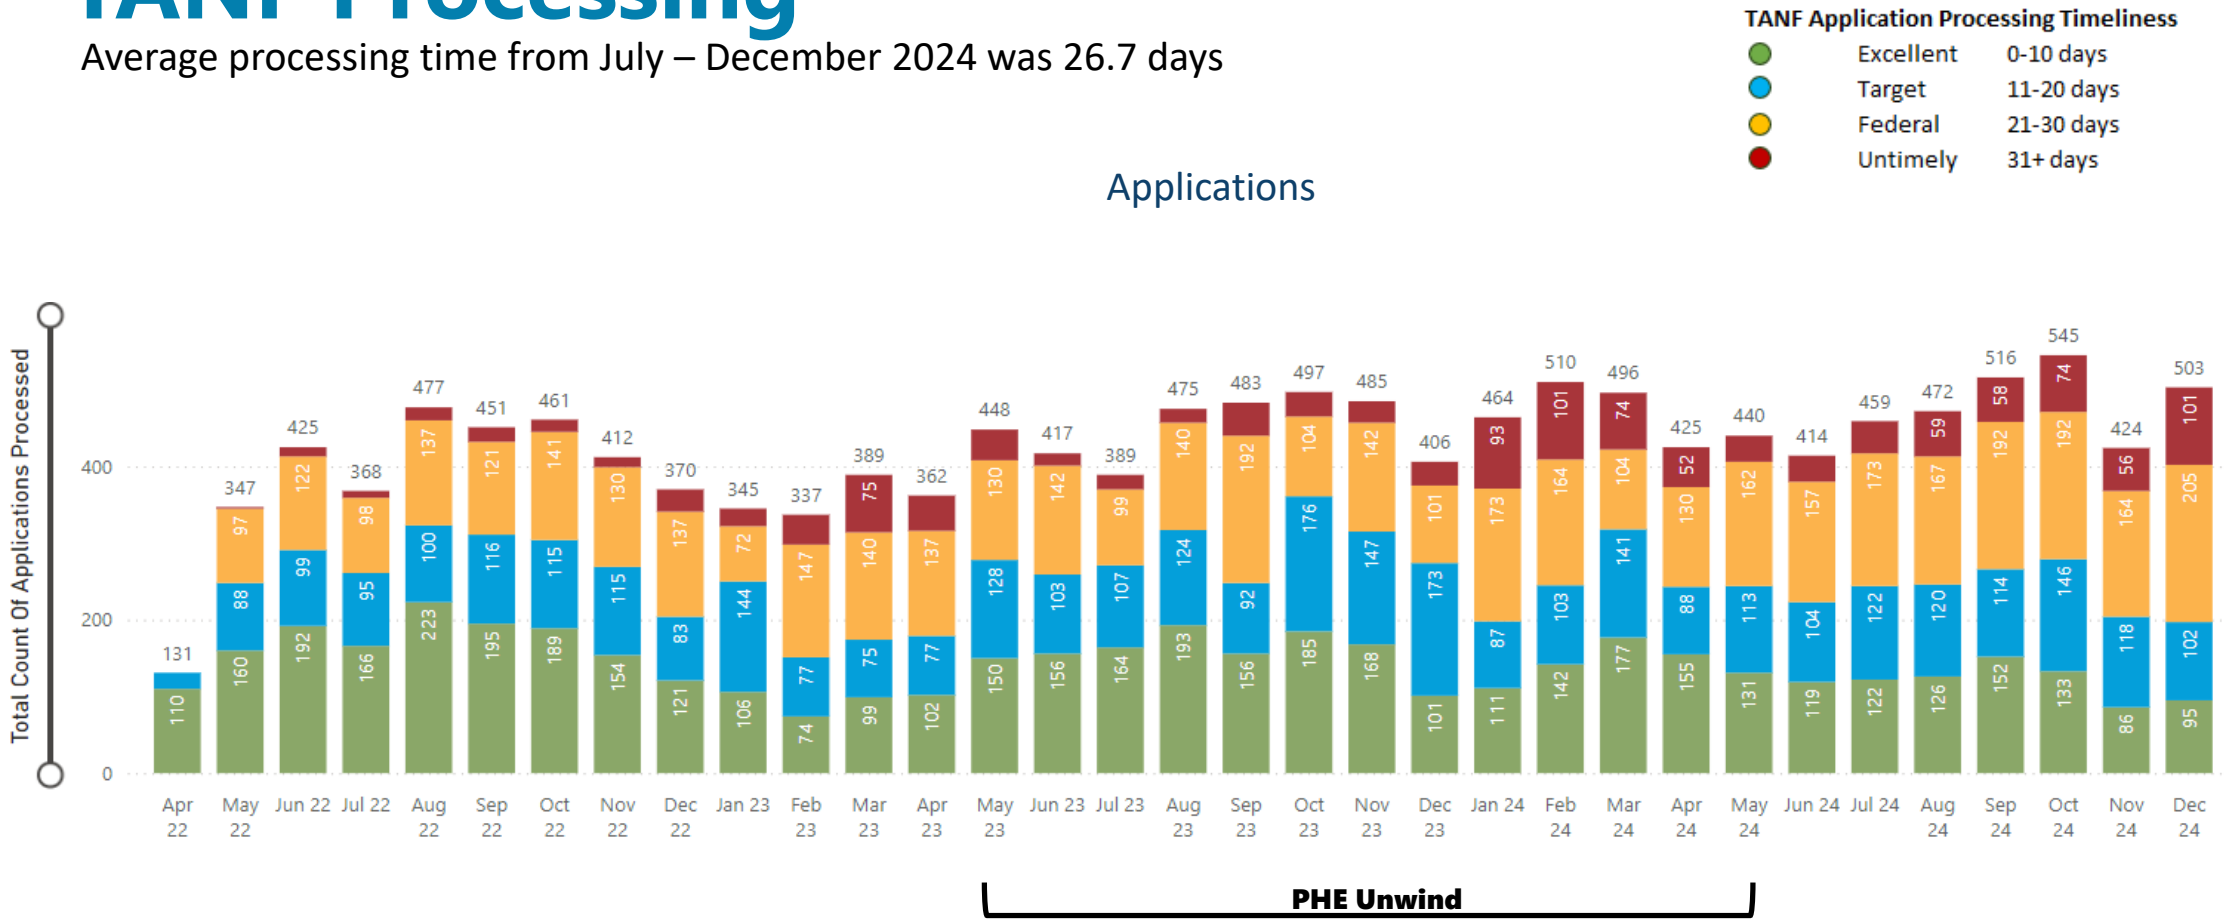
Temporary Assistance for Needy Families (TANF)

Serving families with children who are deprived of parental support or care due to divorce, separation, death or one or both parents being aged or disabled.

From June – November 2024 the TANF Program provided support to:

- Households served: **695**
- Average payment per household: **$640**
- Average support service payment per household: **$63**
- **51%** of the TANF households are child only

NORTH Dakota Be Legendary. | Health & Human Services



TANF Program Changes as per 2023-25 Legislative Session actions

- August 2023, implemented an increase in the TANF benefit amount, essentially doubling the amount for eligible families.
    - A caretaker with 2 children, working 40 hours per at $7.25 per hour or $1,160 per month is eligible for a benefit amount of $896 per month. Prior to this change, the family would have received a $448 benefit.
- October 2023, eliminated the benefit cap provision, preventing an increase in TANF when a child is born to a household member who was receiving TANF during the probable month of conception.
- October 2023, provide eligibility for pregnant women from the start of their pregnancy.
- October 2023, allow for an additional 12 months of earned income disregard as a work incentive.

NORTH Dakota | Health & Human Services

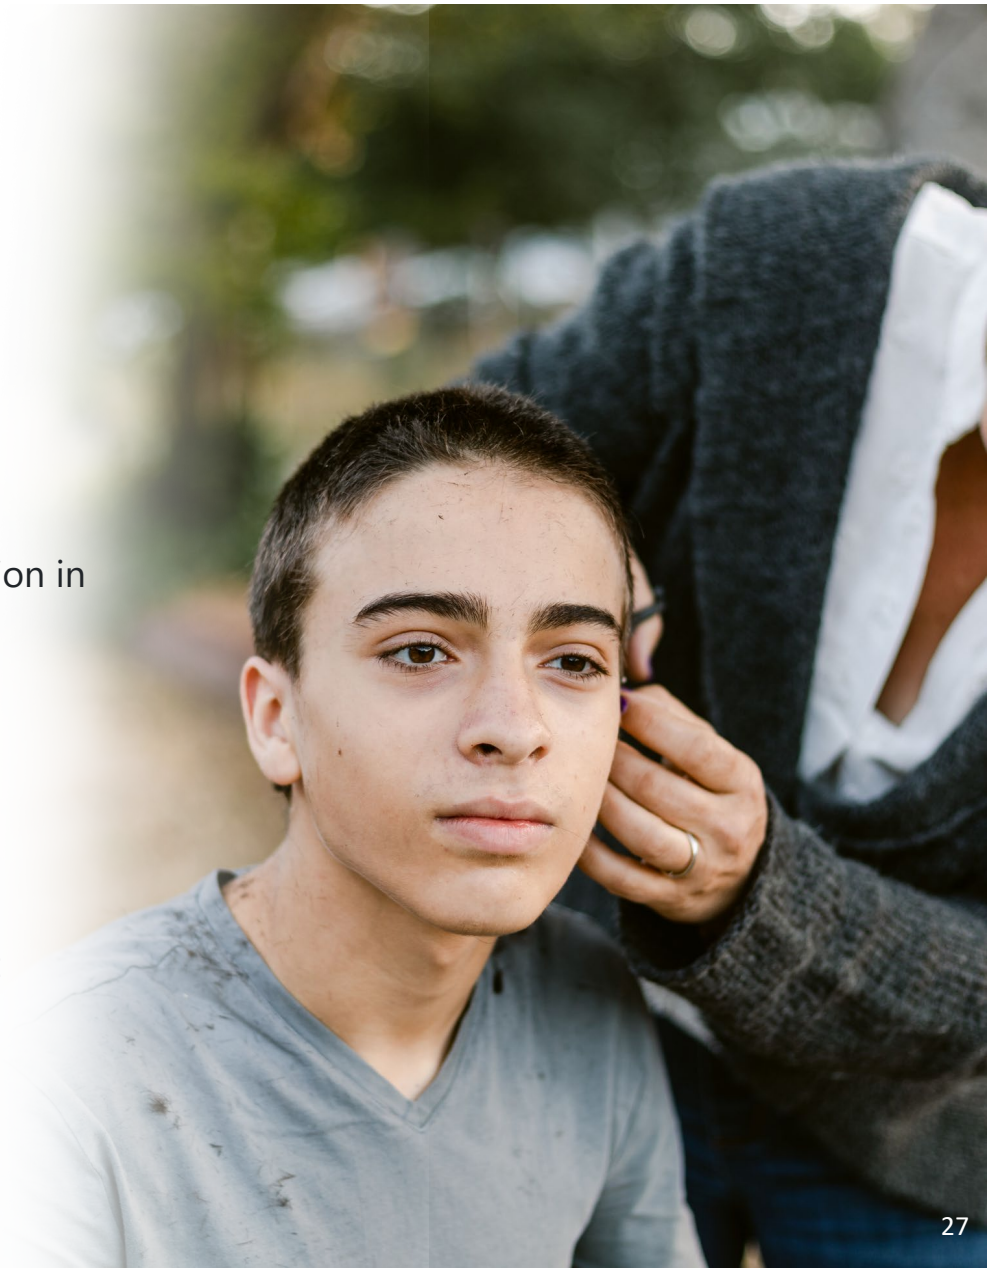
3.55% Overall Error Rate	5.53% Overall Error Rate	*3.86% Overall Error Rate
State Review	State Review	State Review

* QC Reviews thru 06/2024

**TANF does not have a federally-established target rate*

TANF Looking Ahead



Changes & Improvements

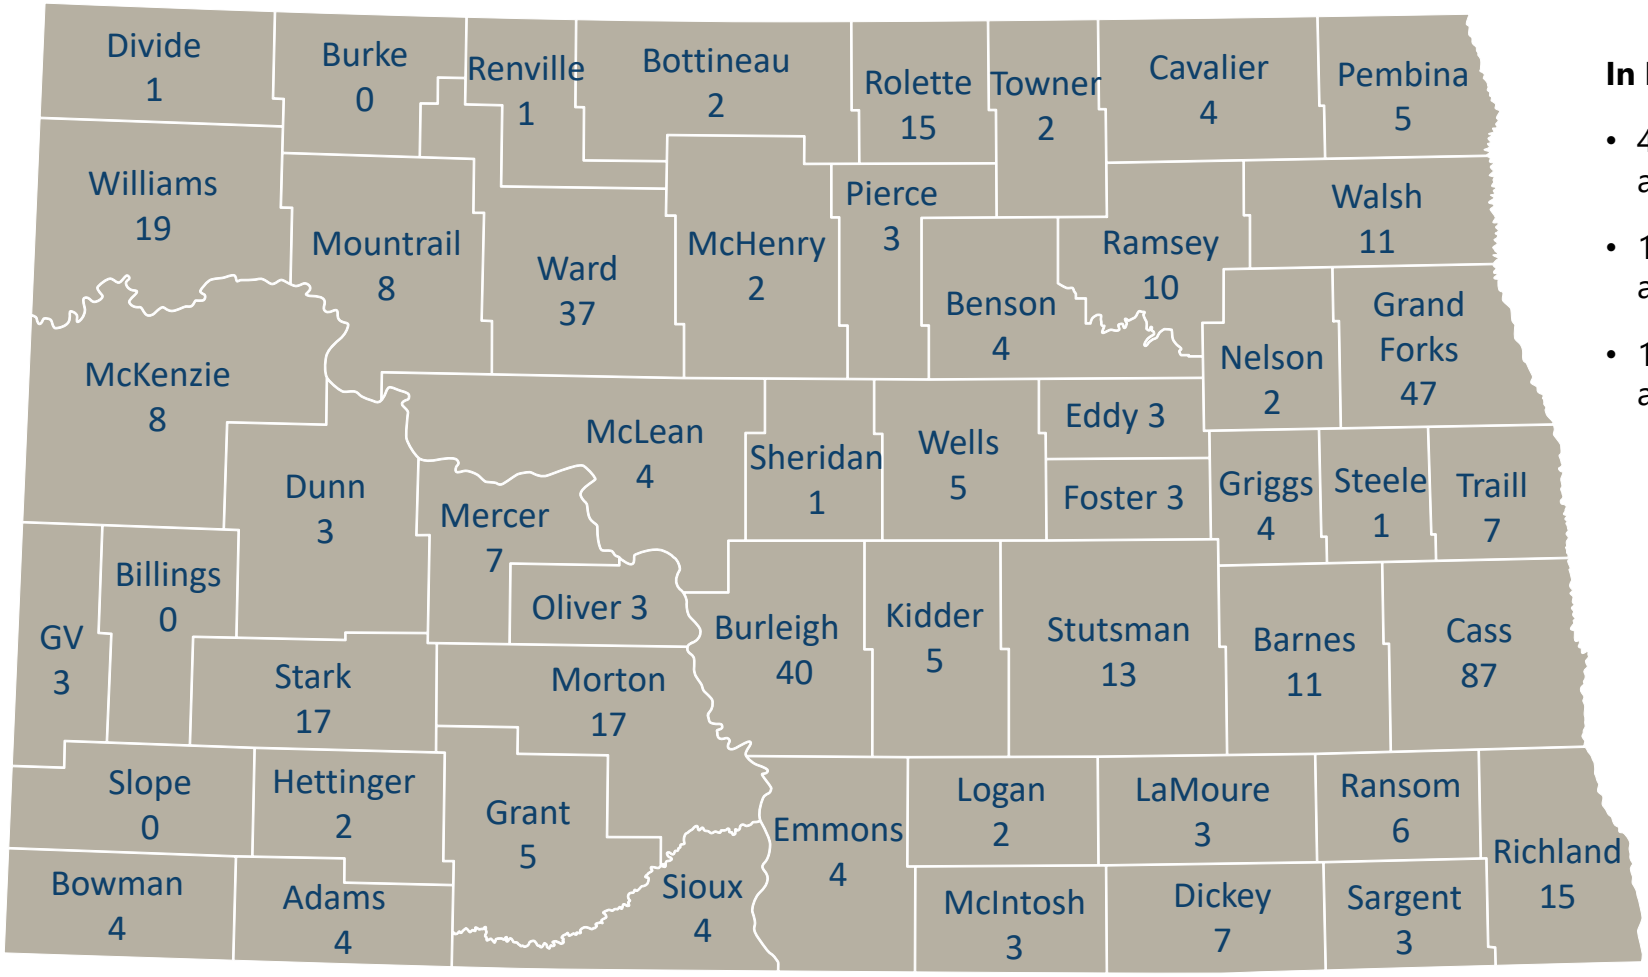
Enhanced Support for TANF Families:

- For families currently receiving TANF, the state retains the full monthly child support amount.
- ND retains about $1.3 million in child support per biennium.
- An investment of $70,000 in state funds could direct all $1.3 million in support to TANF families.

Other Efforts:

- Reduce burden on families and eligibility workers by eliminating monthly reporting
- Enhancing work support through motivational interviewing and supportive services
- Annual increase for benefit level to sustain progress made in last legislative session

Supplemental Nutrition Assistance Program (SNAP)



Provide nutrition benefits to supplement the food budget of lower-income families so they can purchase healthy food and move towards self-sufficiency.

During the last six months (June – November 2024), on average/month SNAP provided support to:

- Number of Households: **26,330** (average/month)
  - 36.2% include a child under age 18
  - 22.42% include an individual 60+
  - 36.60% have earned income
- Number of Individuals: **50,733** (average/month)
- Benefit per Household: $**376** (average/month)
- Total SNAP dollars: $9.9 million (average/month)

SNAP Impacts Local Economies

Authorized SNAP Retailers by County

In ND, there are:

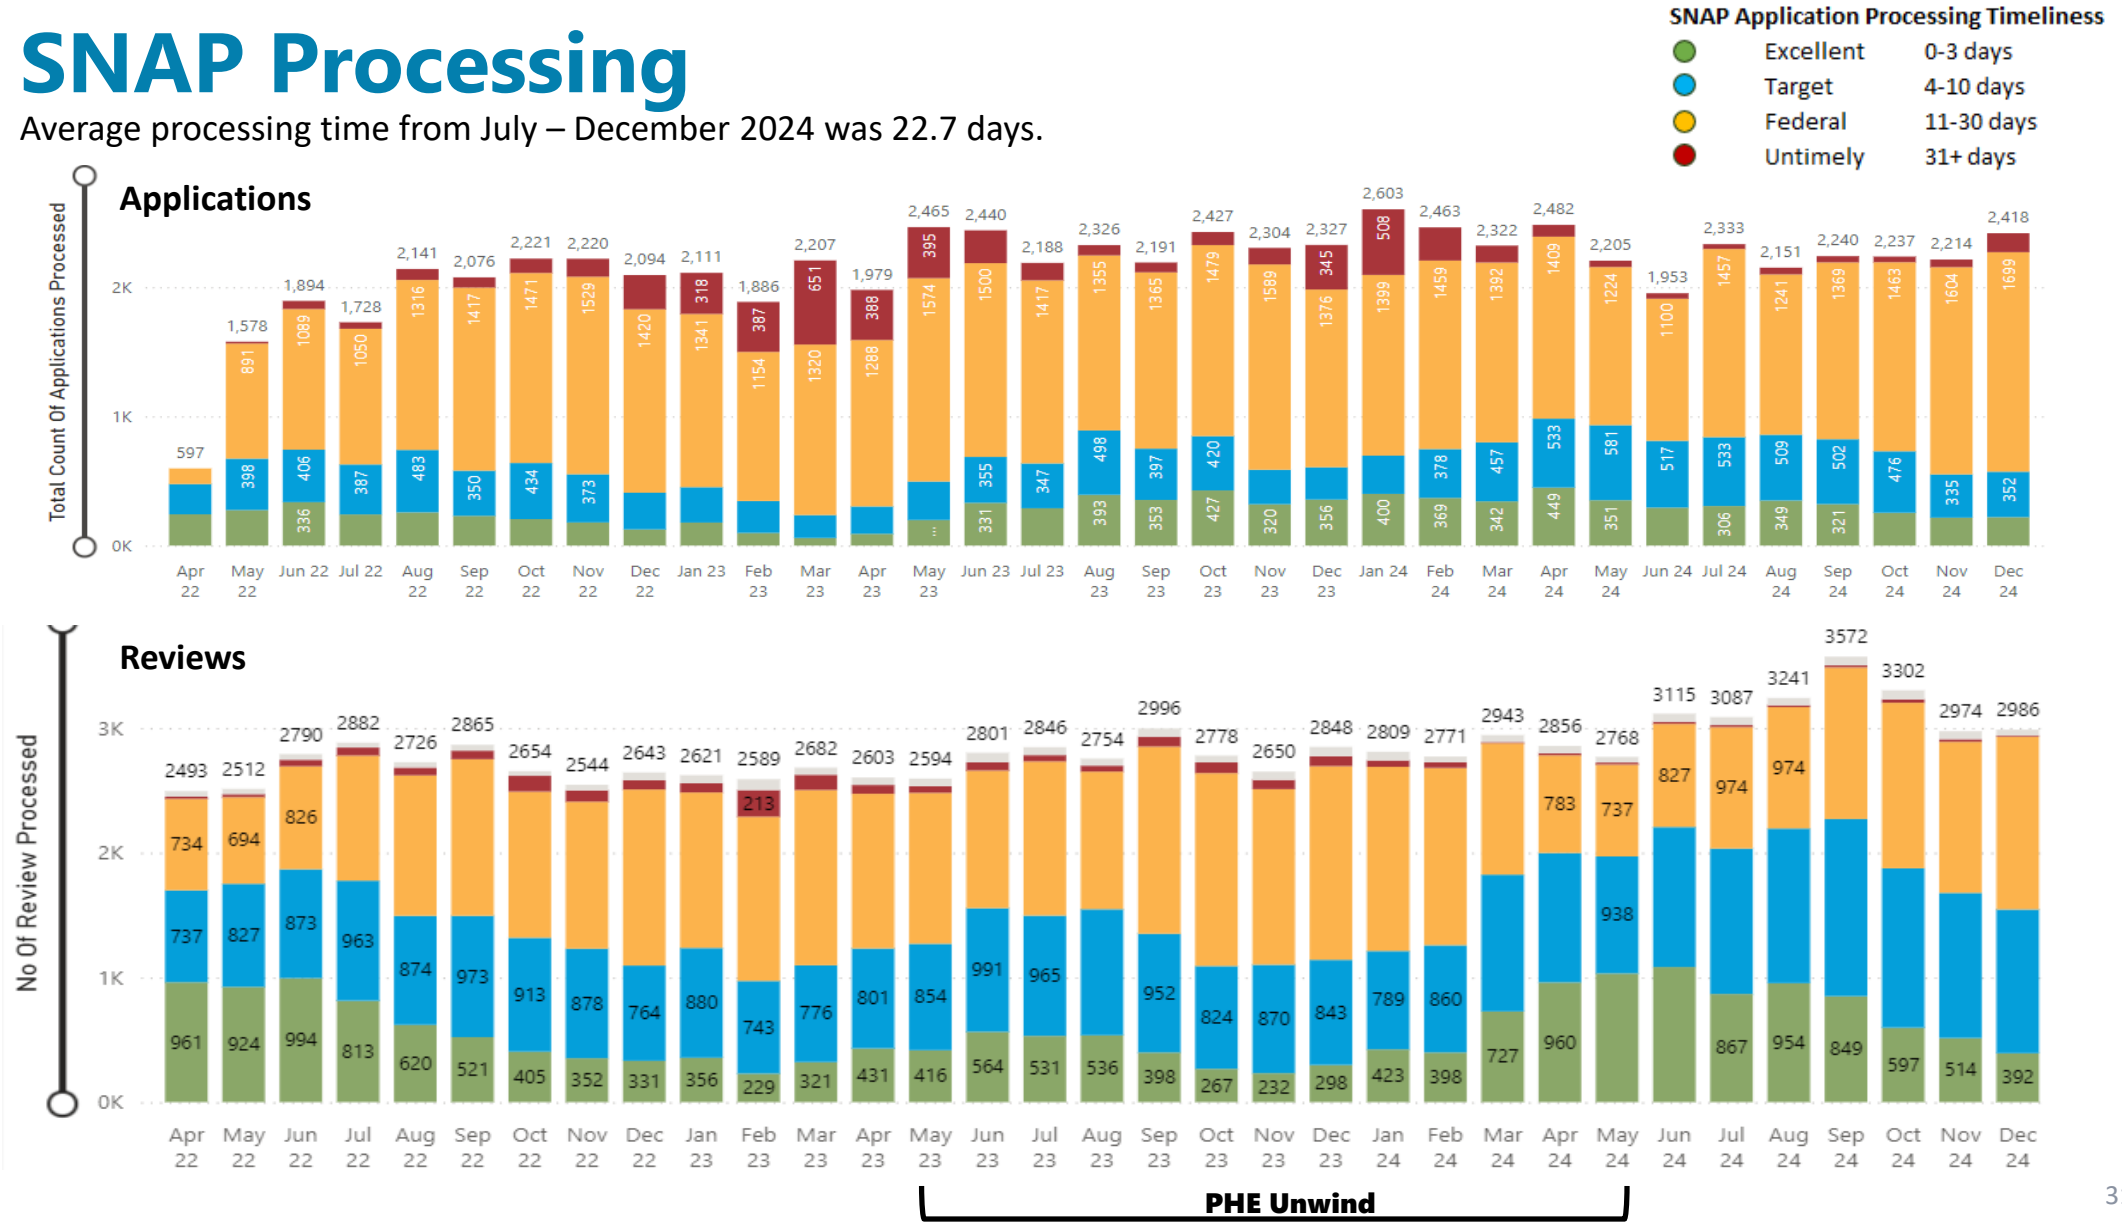
- 477 retail food stores authorized to accept SNAP benefits.
- 12 famer's markets authorized to accept SNAP benefits.
- 14 retail food stores authorized to accept SNAP benefit online.

According to the Food Research & Action Center (FRAC), each dollar in federally funded SNAP benefits generates **$1.79 in economic activity**.

Source: Food Research & Action Center, *The Positive Effect of SNAP Benefits on Participants and Communities,* https://frac.org

Sun Bucks (Summer EBT)

The Summer Electronic Benefits Transfer Program, or SUN Bucks provides food assistance to households with **school-age children** who are **eligible for free or reduced-priced school meals during the summer,** when they don't have access to meals at school.



- New Program available through USDA, Food and Nutrition Services (FNS).
- Partnership with the Department of Public Instruction to develop and implement the program in ND, the first year of availability which was summer 2024.
- **38,412** children and their families received $4.6M in benefits. FNS established a benefit level of **$120 per child**.
- Children receiving, SNAP, TANF, Medicaid or free or reduced-price meals are directly certified for Sun Bucks.
- Children who are not directly certified who may be eligible for Sun Bucks can still apply for the Program.
- Summer 2025 – anticipating **44,000** children will benefit.

Program Integrity and Performance

SNAP Quality Control Reviews

Federally mandated reviews of SNAP are conducted by the Economic Assistance Policy Division Quality Control Unit (QC).

How are SNAP Quality Control Reviews Completed?

Reviews are completed and a sample size is determined each year by Food and Nutrition Services (FNS). The sample size can change from year to year, as it is based on a calculation using the average monthly caseload size which can vary.

Both Active and Negative Cases are Reviewed for accuracy and timeliness

Active Case	Negative Case	Timeliness
Household received benefits during the sample month.	Household's participation was denied or closed during the sample month.	Household received their eligibility determination within Federal timelines.
The measurement of active case reviews is called the active payment error rate.	The measurement of negative case reviews is called case and procedural error rate (CAPER).	The measurement of timeliness is called the application processing timeliness (APT) rate.
Active payment error rate measures how accurately states determine eligibility and benefit amount.	The CAPER rate reflects the number of cases that were not properly closed or denied.	The APT percentage reflects the number of applications approved timely compared to the total number approved.

Program Integrity and Performance

SNAP Quality Control Reviews

Federal Target Rates

- Active Payment Error Rate: 6% or better
- CAPER Error Rate: below national average
- Timeliness Rate: 95% or better

2022-24 Summary of SNAP Performance Measures

SNAP Looking Ahead

Changes & Improvement

Partnering with HSZ's to develop a **hybrid EBT issuance model**, to ensure individual can meet their family's food needs that considers:

- Elderly or Disabled
- Individuals experiencing homelessness
- Applicants who meet the federal definition of expedited, requiring a determination within 7 days:
  - Households with less than $150 in countable income
  - Households whose shelter costs are more than their income

Housing Stability

The NDRH Housing Stability Program (NDRH) offers housing facilitation, household coaching and financial assistance to North Dakota households experiencing homelessness that need to obtain and maintain stable housing and households that are at imminent risk of homelessness.

Housing Stability Funding was made available from the U.S. Department of Treasury. Eligibility Criteria include:

- Individuals experiencing homelessness.
- Individuals facing eviction.
- Income equal to or less than 30% area median income.
- Eligible households can receive up to 6 months of rental assistance.

During SFY 2024, the Housing Stability Program impacted:

- Number of average households served: **1,049** (average/month)
- Payment: **$653** (average/month)
- Total dollars supporting households: **$11 million**
- Households with children: **29%**

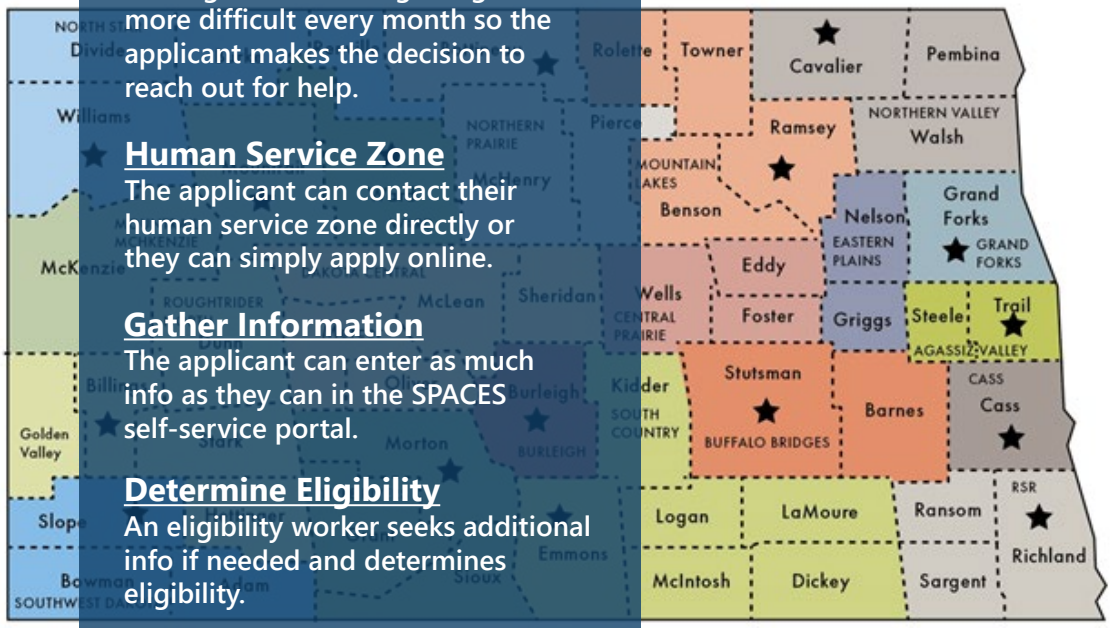
Human Service Zones

Serving North Dakota individuals and families is a partnership. Economic Assistance administers programs, while Human Service Zones determine eligibility to deliver benefits.



Person Decides to Apply
Making ends meet is getting more difficult every month so the applicant makes the decision to reach out for help.

Human Service Zone
The applicant can contact their human service zone directly or they can simply apply online.

Gather Information
The applicant can enter as much info as they can in the SPACES self-service portal.

Determine Eligibility
An eligibility worker seeks additional info if needed and determines eligibility.

Issue Benefits
If eligible, the state will issue the benefit in the appropriate manner.

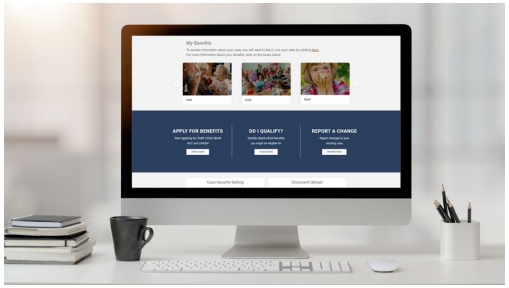
How Clients Access Services

One Address. One Phone Number. No Wrong Door.
Eligibility redesign makes it easier for families to get help by simplifying access points.

Centralized Mail Unit

One mail and email address for document submission

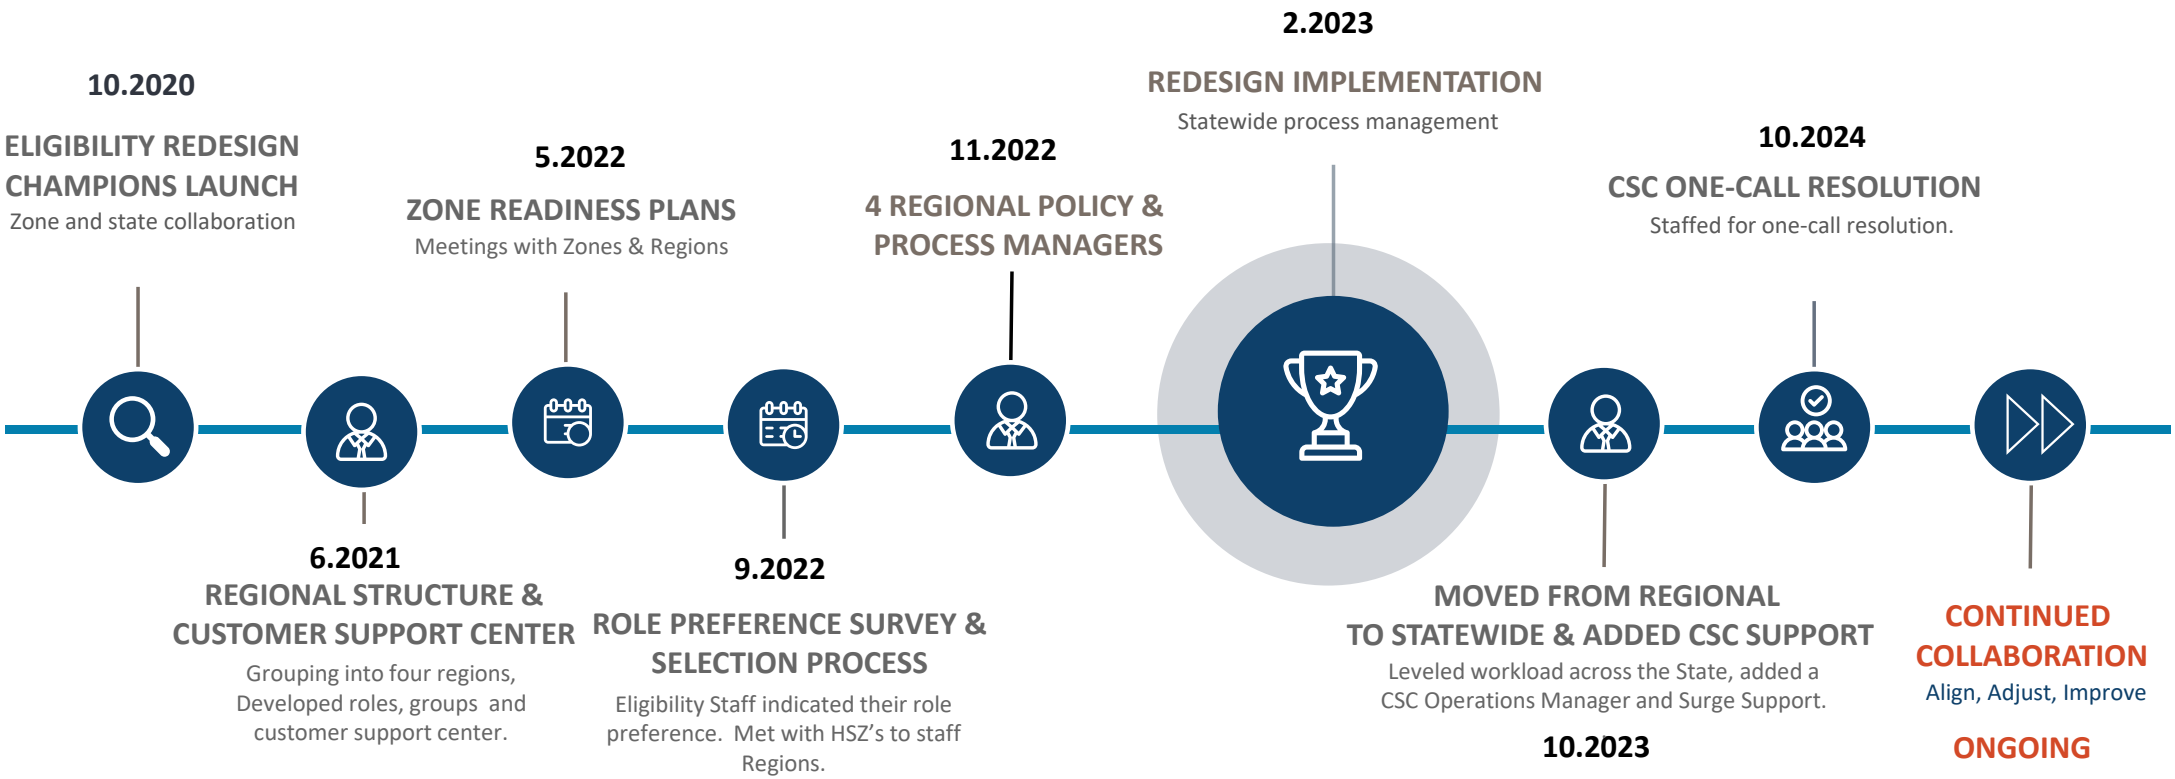
Customer Support Center



One phone number to speak to an expert

Local Support

Local offices will remain open for in-person support



Self-Service Portal

Individuals can use the self-service portal to apply, report changes, renew their benefits, view notices, upload documentation, and check their eligibility and benefits.
Dec 2024 SSP Adoption Rate – 47.13%

Application Processing - All Programs

- February 2023 – HHS and HSZ's worked together to develop a regional service delivery model to support Economic Assistance and Medicaid coverage.
- May 2023 – First month participants were required to complete a Medicaid renewal, after the temporary Medicaid coverage extension due to the PHE.
- October 2023 – HHS and HSZ's moved from a regional to a statewide service delivery model to support Economic Assistance and Medicaid coverage.
- May 2024 – Last month of Medicaid renewals for PHE unwind.

Supporting Service Delivery

Service Delivery Team

Learning & Development

- Developed 40 new program & system learning modules.
- SNAP, Medicaid and SPACES virtual classroom trainings held monthly.
- Continuous updates to SPACES on-line help, including job aids on complex processes.
- Partnered with HSZ Supervisors & Lead workers to develop a new eligibility worker onboarding plan.
- Meet with supervisors & lead workers monthly to review policy and system changes.

LTC Eligibility Team

- Improved average processing time for applications by 43.77% and reviews by 42.89%.
- Community Outreach and Education:
  - Presented at Statewide, along with the East & West LTC Association Conference
  - Presented at Aging Services Informational Collaboration with facilities, care providers and participants.
  - 23 facility visits over last 2 years.

Regional Policy & Process Managers

Collaboration with HSZs to continuously improve service delivery:

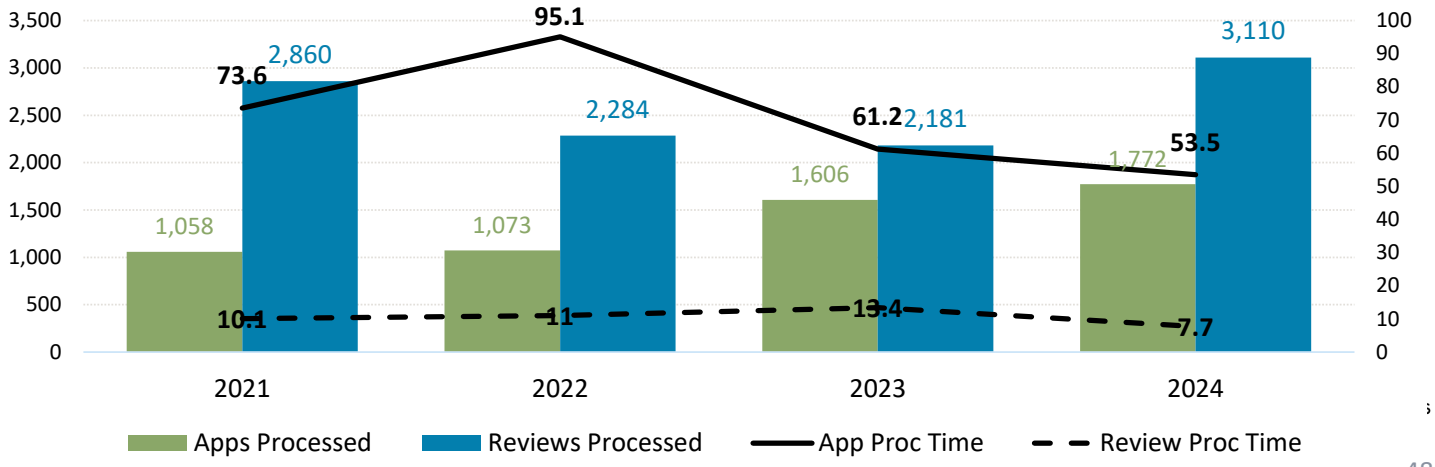
- Shift from regional process to statewide processing – achieving level caseloads statewide.
- Continuous monitoring and escalation of work items to ensure timeliness.
- In-person meetings and training for community partners.

CSC Operations

- Implementation of in-person on-boarding.
- Development of CSC scripting.
- Holiday coverage
- Implemented a supervisor review process.

Policy & System Support Help Desk

Provided policy and technical support to the HSZ eligibility teams.



- 34,754 support tickets closed in 2023
- 24,455 support tickets closed in 2024

Supporting Service Delivery

Long-Term Care Eligibility Unit

- Formed in February 2020 as part of Social Service Redesign
- Responsible for determining Medicaid eligibility for individuals who are in:
  - Skilled nursing facilities
  - Memory care
  - Basic care
  - Swing beds, and
  - Individuals receiving home and community based waiver services
- Today, staffed by 17 eligibility workers, 2 supervisors and 1 unit supervisor (HHS)

- Participants can report changes, upload documents and complete reviews.
- Mobile Friendly

Worker Portal

- Used by 375 HSZ eligibility team members to determine eligibility and level of benefits for families seeking CCAP, LIHEAP, Medicaid, SNAP and TANF.
- Interfaces with 50+ systems, including MMIS, Child Support Social Security, Vital Records, IRS, EBT/EPC Vendors, etc.
- Case narratives to support eligibility for historical and audit purposes.
- Create and send notices requesting information, informing individuals of their eligibility, referrals, etc.

Provider Portal

- Associate as a provider for children eligible for CCAP and for households receiving LIHEAP.
- Certify enrollment.
- Submit billings.
- View payment history.
- Submit attendance records.
- Mobile Friendly

Referral Portal

- SNAP & TANF work eligible individuals referred to employment and training partners.
- Programs focus on work readiness, training and job placement services.
- Job Service ND, Community Options, Turtle Mountain Employment and Training, receive referrals and maintain individual participation records.
- Support services for work readiness.

Supporting Service Delivery

SPACES Improvements 2023-25

- Process alignment to support the **statewide eligibility redesign**
- Implemented enhancements in line with CMS and state-identified enrollment strategies for the 12-month unwinding period. This included **passive renewals**, **automating 35% of eligibility determinations**.
- **Social security interface** automation, reducing the number of work items by 80%.
- Successful and timely **implementation of legislative changes** for CCAP, TANF and Medicaid.
- **Self-Service Portal** enhancements driving **adoption rate** from 10.5% to 47.1% in one year

SPACES "Behind the Scenes" Impact

Integrated Eligibility system automation removes need for paper apps

Sun Bucks

(summer SNAP)

- Summer 2024 - 38,000 children ($4.6M, 100% fed)
- Direct certification process for Summer 2025 = 44,000 children projected to benefit
  - ✓ 24,000 children will be directly certified because they are eligible for SNAP and TANF
  - ✓ Plus 6-8,000 children will be directly certified as eligible for Medicaid-only

Direct Certification for Free/Reduced Meals

- Nov 2024 added automated data exchange to remove the need for children who are already Medicaid eligible to have to apply again for Free / Reduced Meals from their school
- DPI and HHS exchange data between technology systems to eliminate need for families to complete an additional paper application

1	TANF- Secondary School Diploma or its Recognized Equivalent Attainment Rate (Annual)	New	9/3/2024	
7	TANF-Supplemental Work Outcomes Report (Annual)	New	9/3/2024	
1	[ND-224516] BABY BOT Twins (More than 1 newborn) Pregnancy & SSN Newborn	New	2/20/2024	ALL
8	Penny Bot SSP Analysis - [ND-227849] Conflict Panel - Database Mapping Modifications	New	4/10/2024	ALL
3	Education Summary Screen Logic Enhancement	New	8/7/2024	
9	Eligibility Override creating Cannot Change Segment due to 'Benefits Cannot be changed because of Change in COE'	New	6/10/2024	
9	Messaging needed for SSP for August payments - Dashboard display	New	7/19/2024	
4	ND-183795 - Single Parent Adoption is not considered deprivation for TANF	New	5/22/2024	
2	ND-203049 - ND Verify: Store the request and response XML in the database	New	4/19/2024	ALL
4	ND-223949 - Client Portal | Case linking not available while first application in progress	New	4/19/2024	ALL
3	SNAP EXPEDITED (ND-189135, ND-176503, ND-228647)	New	5/21/2024	SNAP
2	ND-189135 - Income converting and using converted amount to determine expedite status	New	5/21/2024	SNAP
1	ND-191529 - Work Program - Reevaluation of rules for when a person needs to be disenrolled from the JOBS program.	New	5/22/2024	
6	CCAP - QRIS Bonus Payment - Update	New	7/26/2024	
5	Global Change - SAVE should not stop the eligibility determination process while verification is pending.	New	7/28/2024	
7	Education Details - Cancel vs Continue Button Difference Enhancement Logic	New	8/14/2024	
5	CCAP Changes for Non-compliance issues	New	8/22/2024	
8	SNAP – Provisions in the Consolidated Appropriations Act, 2024	New	8/22/2024	
2	Modifying the provider SSP to give updates on when an associated family is due for review.	New	8/22/2024	
9	Absent Parent Update 2.0	New	8/5/2024	
5	Electronic Signature Language needed on SPACES forms	New	9/24/2024	
3	ND-194539 - TANF payment issued incorrectly - $45.00 Out of Home Allowance issued for Long Term Care Arrangement to Ineligible Caretaker as they were considered in Filing Unit	New	5/22/2024	
7	ND-192198 - TANF - removal of selection of MHA Tribal NEW Program for JOBS referral	New	5/22/2024	
5	ND-196188 - TANF Transition budgeting error – child care expenses are not taken into consideration when earned income eligibility for TANF Transition determined	New	5/22/2024	
6	ND-193635 - System must allow JOBS Transportation Allowance to sanctioned individual to cure JOBS sanction in second pending month when application is pending	New	5/22/2024	
0	ND-192135 - TANF issues with children > 16 and JOBS Requirements and school requirement	New	5/22/2024	
0	CCAP-Providers Portal: Unable to edit Pre-Certifications in SSP	New	10/28/2024	
3	CCAP children with a Disability	New	10/28/2024	
2	TBQ data for Bendex	New	11/4/2024	
6	MSP Modifications using TBQ data	New	11/6/2024	
2	Defect / Enhancement: Unearned Income Source - Reimbursement	New	10/26/2024	
7	Remove Option to Limit the Number of Reasonable Opportunity Periods	New	11/14/2024	
8	ABAWD Exemptions questions for Homeless, Foster Child to be mandatory in SPACES	New	11/19/2024	
9	SNAP Tribal Food Distributions - SPACES and SSP Changes	New	11/19/2024	
4	Global Change - Remove References to NDVerify	New	7/26/2024	
2	ND-222191 WORK ITEM: new medical work item/process is needed	New	7/11/2024	
0	FNS Timeliness Technical Assistance Request - Ending 1- and 2-month certification periods to improve timeliness rates	New	11/27/2024	
3	CHIP Coverage when Reported Change in Circumstance is Other Health Insurance	New	12/1/2024	
5	CCAP Add SFN 433 as an option to attach to notices	New	12/1/2024	
9	SSP All Portals | Document Upload | Prevent password protected documents from upload	New	10/31/2024	

Included in Executive Budget Request

Retire Legacy Systems from Mainframe

- While the majority of the Economic Assistance transactional systems no longer operate on the mainframe, there are legacy system tails that need to be retired, including both programmatic data and process interfaces.
- The effort of retiring mainframe systems will require teams to reverse engineer old technology processes and methodically retire older solutions, transferring or purging data as necessary.

Total	General	Federal	Other

Total General	**$ 59,248,641**	**$ 37,464,091**	**$ 62,409,968**	**$ (3,161,327)**
Total Federal	**$ 334,748,232**	**$ 291,721,917**	**$ 384,851,227**	**$ (50,102,995)**
Total Other	**$ 20,604,057**	**$ 11,525,664**	**$ 13,364,077**	**$ 7,239,979**

Note: Because the projection uses the 2023-25 legislative base as its starting point, one-time funds and carryover are not included. However, expenses associated with those items are included.

For Economic Assistance, the housing funds from US Treasury (ERAP/HAF) and Other COVID-related emergency funds ($92,250,000) are not included in the 2023-2025 Legislative Base. Adding $22,114,400 to the Operating Carryover and $70,135,600 in Grants Carryover will return the projection to a status of "under budget."

Program Integrity and Performance

Audit Findings | 2021-22 Single Audit

- **2022-014 Low-Income Home Energy Assistance**. Coordinate with the Department of Commerce to properly report subawards of the state under the LIHEAP program for FFATA reporting. *Reviewed processes and adjusted staffing.*
- **2022-015 Low-Income Home Energy Assistance**. Ensure adequate rental documentation is on file and proper eligibility determinations of the Low-Income Home Energy Assistance Program (LIHEAP) are made. *Reviewed processes and provided additional training.*
- **2022-016 Low-Income Home Energy Assistance**. Ensure policies and procedures prevent duplicate payments from being applied to LIHEAP cases. We also recommend the Department of Human Services ensure required documentation is obtained for individuals appearing in multiple cases in accordance with state LIHEAP Policy. *Reviewed processes and provided additional training. LIHEAP Business Process Redesign in process.*
- **2022-017 Low-Income Home Energy Assistance**. Ensure eligibility is verified through the State NDVerify system prior to approval of all LIHEAP applications or revise the State Plan to identify the use of NDVerify as optional for approval by the Federal awarding agency. *Revised Plan; LIHEAP Business Process Redesign in process.*
- **2022-018 Emergency Rental Assistance Program**. Ensure monthly payment amounts are calculated correctly and reviewed for accuracy. Additionally, we recommend the Department ensure the improper payments are recouped through the ERA program's refunding process. *Reviewed processes and adjusted staffing.*

Testimony HB1012
House Appropriations Human Services Division
1/27/2025

Chairman Representative Jon Nelson and Members of the House Appropriations Committee ; Human Services Division,

Thank you for taking my testimony regarding Medicaid, 1915i and the DD waiver.

While we live across the border in Audubon, MN, our two adult children live in Fargo & West Fargo ND. My husband and I are guardians of both of them, adopted through ND foster care in Cass County, ND in 1998 and 2003.

When our children moved back over to ND, we were used to the system in MN, as our son had been on a DD waiver in MN. We were completely unprepared for the difficulty & roadblocks of the ND application system and its call center in ND. The SSP is cumbersome, impractical, incomplete, and all around hard to use. The system that you have now have instated where you contact a "call center" and someone wholly unfamiliar with your case tries to help you - instead of keeping it to your local human service zone, and having ONE case worker work your case, is ill-considered and is not working for those in need in ND, their families or the eligibility workers trying to help us.

We have been working with the ND portal/HHS system for about the past 16 months since we have a son on the DD Waiver and a daughter who is on the 1915i program and both are on Medicaid. We have expressed our frustration to their workers, and to Vicki Peterson from Family Voices of ND who is gathering information from everyone on their experience with the system. We have also expressed our frustration to eligibility workers and the acting head of 1915i, Mandy Dendy.

It would be too long to tell you all the details of what we've experienced so we will try to summarize just some of my experiences with the below bullet points.

- It took us a total of 6 months to be approved for medicaid for our intellectually disabled son - but a full 126 days to be approved for WWD Medicaid as nobody seemed to understand the type of Medicaid he qualified for (and there is nothing on the SSP that explains or gives a choice for WWD.) So we applied for the wrong type, he was denied, and then reapplied for WWD, (the call center was so unhelpful and didn't offer solutions during this time, nor were they aware of WWD or how it worked and never suggested it as an option for us). He went 3.5 months without any services in Fargo due to nobody understanding the issue. Finally after much work by myself & his DDPM, RSI in Minot had to step in and let us know he needed to apply for WWD, so we did and were finally approved.

- My son is Native American, and I just found out this week that if you are in an enrolled tribe (which he is) you do not have to pay the enrollment fee OR the monthly premium payments for WWD Medicaid. *We've been paying WWD premiums since November of 2023*. Even though we put his enrollment number on the initial application, they missed this and never told us it was even a policy. We just informed the call center

yesterday, who had to ask a supervisor if that is their policy, as the representative who answered did not know until she looked it up and called a supervisor. A supervisor called us yesterday and we are getting all his premiums reimbursed.

- We have made so many calls to the call center (way too many to document) and multiple times the phone representative did not know the answer to our question and we didn't learn for a while to ask for an "eligibility supervisor" or a "supervisor review." Nobody mentioned we could, and we would end the call feeling frustrated. Many times we would be on hold for an hour.

- It took 6+ months for a LIHEAP check to arrive for my daughter due to a series of errors on both my daughter's part (losing the check) and on the part of ND (not reissuing the check and not knowing what happened to the paperwork). Countless calls finally led me to Peggy in Economic assistance, who was tracking this on her end, but it took the call center **at least 2 months of repeated calls to them asking where the check was** for someone to tell me to contact economic assistance, and another 2 months for the check to finally arrive in our hands.

- The SSP application system has confusing questions, is difficult at best to fill out, doesn't leave room for "notes" or exceptions to the questions we are answering. We have no disabilities yet we greatly struggle with the SSP. I don't feel anyone with special needs or disabilities could fill out and manage the portal, I know my kids could not have navigated it. Each time a new letter comes in, you have to download it to your computer to even read it. The system is frustrating at best.

- We have gotten notices that both of our kids' medicaid will be closed due to a technical and/or human error (this just happened for both of them last week). This should NEVER happen. My daughter lost her services for a time period due to these errors in 2024 and could not get her medication, all due to a computer error. Had a caseworker been assigned to this, it would not have happened.

- As far as 1915i, it would be better to be structured more like the DD Waiver. Having a DDPM who oversees all our son's services, and isn't only billing when she sees him, is an excellent policy. I think 1915i was meant to be similar, but I've had so many more issues with 1915i than the DD waiver, as I documented to Mandy Dendy in a long email. My daughter went through 7 workers in 8 months (some left their job, some we fired, some terminated her) - each time we had to fill in a new worker on my daughter's status and we lost valuable time helping my daughter. The housing support coordinator allowed her to become homeless as he was absolutely no help in finding her housing (he would "meet" with her to talk about life, do ice breakers, have coffee - not look at apartments and tell her where the no-income, low-income housing was. I believe it had to do with billing, he can "bill" when he is with the client so he met her once a week to "bill" but did not help her find housing).

- The next housing support assigned to my daughter did not want to work with **me** as a guardian, so they terminated my daughter's case "effective immediately" (against policy - a 30 day notice is required) and this happened while she was homeless, all due to me asking clarifying questions on email & correcting the housing coordinator when she the details of the apartment were wrong. The housing coordinator didn't

want to "deal with the guardian" (and didn't feel she should have to). This agency is no longer providing housing supports, and has been reprimanded for the way they terminated our daughter.

- The workers in 1915i are not being taught how to work with the guardians. As stated above, one agency terminated my daughter because I was assisting them in finding an apartment for her, and I've also had a supervisor question my involvement in my daughter's life. I take great offence at this as we have been her guardians for 9 years and all the responsibilities fall back on the guardian, not a worker who meets with them 1 hour per week. She is also in jeopardy of losing 1915i right now for not engaging with the care coordinator, peer support or housing support. There should be a period of time the case is always open and the client can engage as needed.

  As it's set up - 1915i can only **bill** when they see the client - but my daughter is completely overwhelmed with all the appointments she needs to keep in order to stay eligible for the services. A supervisor keeps telling us, we can't "Bill" when we talk to you - the guardians - so please back off. And yet, we are responsible for our daughters well-being, care and daily needs.

- When losing her Care Coordinator and her Housing Support all at once, she became homeless and I became her "main coordinator' for a period of at least 6 weeks and have been acting as co-coordinator for 13 months now. ***Yes, this is my choice, but had I not been a safety net to keep the services afloat (paperwork, calls, etc.), she would have fallen through each and every crack of 1915i as care coordinators / housing supports came and went.*** I was able to find her a HUD apartment, applied for ND Housing Stability, made sure her benefits were still coming, and have worked hundreds of hours in 2024 helping my daughter who has mental illness, addiction issues and brain injury.

- My daughter was just determined disabled by SS and is now on SSDI so we are changing over from Medicaid Expansion to Traditional Medicaid. Her case is very complicated as she also had ND Housing Stability, and SNAP. A case worker was needed to work her case and get her annual renewal application approved. **An amazing**, ***wonderful case worker was assigned to her case who thoroughly helped me and has agreed to stay with me through my transition to traditional medicare. I don't understand why the clients in ND cannot be assigned a caseworker who understands each case and can "work it" when there are issues. The complexity of the information she gave me regarding what my daughter was eligible for in the upcoming months (and the paperwork needed to accomplish it) was mind-boggling and having this gal on my team has given me so much hope that it will be done correctly. Each client in ND needs someone like this.***

We respectfully make the following recommendations:

PLEASE get rid of the current SSP system, & go back to each person having their own case worker and a local one from their human service zone so we can find help in time of need and not a "new worker" after being on hold for 1 - 2 hours at a call center.

We know this is what North Dakotans need and what eligibility workers want.

Please revamp 1915i, it's full of concerns and is inefficient in really helping the people that need it most (those with mental illness and behavioral issues, which is already a difficult population to work with).

Please train your workers more thoroughly, and hire call center personnel we can understand and will get to the bottom of an issue for us, or will find a supervisor who can.

Please give those experienced long-term eligibility workers bonuses, raises and recognition as they are the ones who really care that it is done right for the client and who put in the hours to help even when it's out of their scope (I have run into a few of these angles).

Consider embedding a policy maker in the life of someone who is on the Medicaid program. Follow them, walk through their annual review with them, ask how they like their programs, and if the programs are working, if they can navigate the SSP, how well they are receiving services from their care coordinators, & their agencies. Send out surveys to clients and their guardians asking these questions.

Note: This email is intended to help ND improve their SSP and processes for people applying for help. There have also been some amazing people who have helped along the way, who have pointed us in the right direction, who have bent over backwards to assist us in the past 16 months, for which we are grateful. We also very much appreciate our adult children's current care team, they are excellent people.

Thank you.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/29/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:21 p.m. Chairman J. Nelson called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Prevention and Promotion
- Children's Behavioral Health
- Adult Mental Health
- Adult Addiction
- Community Supports
- Budget

2:21 p.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services testified and presented Policy and Administration #32602.

2:24 p.m. Laura Anderson, Policy Director, Behavioral Health Division, Health and Human Services testified and presented Behavioral Health Policy #32602, # 32650, 32651.

2:43 p.m. Pam Sagness, Executive Director of Behavioral Health Division, Health and Human Services testified on the substance use disorder voucher and billable services #32602.

2:47 p.m. Laura Anderson, Policy Director, Behavioral Health Division, Health and Human Services, continued with testimony #32602.

2:59 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services spoke to funds that are redistributed.

3:00 p.m. Pam Sagness, Executive Director, Behavioral Health Division , Health and Human Services, testified on wrap around services and other community-based services for individuals who may need extended services.

3:07 p.m. Laura Anderson, Policy Director, Behavioral Health Division, Health and Human Services, continued with testimony #32602.

3:21 p.m. Dr. Shauna Eberhardt, Clinical Director Policy, Behavioral Health Division, Health and Human Services, testified that there was a wait list for Community Connect #32602.

3:21 p.m. Laura Anderson, Policy Director, Behavioral Health Division, Health and Human Services, continued with testimony #32602.

3:35 p.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services clarified a funding question.

3:37 p.m. Laura Anderson, Policy Director, Behavioral Health Division, Health and Human Services, continued with testimony #32602.

3:58 p.m. Dr. Shauna Eberhardt, Clinical Director Policy, Behavioral Health Division, Health and Human Services, testified on support services #32602.

4:13 p.m. Dr Mellisa Kainz, Utilization Review Administrator, Behavioral Health Division, Health and Human Services, testified on One Assessment # 32602.

4:21 p.m. Dr. Shauna Eberhardt, Clinical Director Policy, Behavioral Health Division, Health and Human Services clarified untreated patients.

4:22 p.m. Dr. Mellisa Kainz, Utilization Review Administrator, Behavioral Health Division, Health and Human Services, continued with testimony # 32602.

4:23 p.m. Dr. Shauna Eberhardt, Clinical Director Policy, Behavioral Health Division, Health and Human Services, testified on specialty programs #32602.

4:33 p.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, clarified inpatient and residential levels of care.

4:34 p.m. Dr. Shauna Eberhardt, Clinical Director Policy, Behavioral Health Division, Health and Human Services, continued testimony #32602.

4:43 p.m. Laura Anderson, Policy Director, Behavioral Health Division, Health and Human Services, continued with testimony #32602.

4:56 p.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, testified on the current spend on Avel eCare and was requested to compile a comprehensive list of costs across the state for the committee.

4:58 p.m. Laura Anderson, Policy Director, Behavioral Health Division, Health and Human Services, continued with testimony #32602.

Additional written testimony:

Dave Marion, Prairie Recovery Center, submitted testimony in favor #32327.

Chaz Brobst, submitted testimony in favor #32562.

Melanie Gaebe, Chair of Behavioral Health Planning Council, submitted testimony in favor #32592, #32593.

5:04 p.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

Written Testimony on HB1012 relating to Substance Use Disorder Voucher (1-29-2025)

Chairman Nelson and members of the House Human Resources Committee, for the record my name is Dave Marion, and I have the great fortune of working for the Prairie Recovery Center, located in rural Raleigh, North Dakota. Prairie Recovery Center is a one of a kind, committed residential agency working with individuals seeking addiction and mental health services. PRC provides short-term one of a kind residential service in a rural environment for recovery with committed staff and therapists experienced in substance use, mental health and trauma informed work. We pride ourselves on not being a cookie cutter program and client centered.

We are in support of the full funding of the ND Substance Use Disorder Voucher Program and its amazing impact that it has on so many through ND that received treatment in a timely manner and not sit on waiting lists. The SUD Voucher Program has served as a safety net for those without health insurance or adequate resources to access addiction treatment in ND and has been lifesaving. Many of these individuals are referred to us by parents, parole and probation, regional human service center and physicians. Most of these individuals have experienced an overdose in their lives and are at extreme risk and are referred to by professionals that find a lack of services for those most extreme needs. Over 210 individuals have been helped since July 2023 at the Prairie Recovery Center from the SUD Voucher. The ND SUD Voucher is one the most important tools in serving the increasing need for North Dakotans who have a substance use disorder. The voucher provides not only the ability of patients to obtain critical services in a timely manner, but it provides provider choice so patients can stay close to home and families as well of the bottle neck of waiting lists in the past. In addition, the voucher serves as a resource to keep patients out of emergency rooms, hospital beds and revolving doors in jails, and courts and get the treatment they need to change their life and get the confidence to do great things.

It is imperative that we not create more hurdles or restrict individuals from getting great quality services, at whatever level that is in the continuum of care. The SUD Voucher was established and supported by the Dept of Health and Human Services to address barriers to treatment and increase the ability of people to access treatment and services for substance use disorders. With one of the goals being to allow the individual to choose a provider with objectives to increase the number of providers and service options and those options communicated to individuals. Another Goal being able to improve access to quality services with objectives of SUD providers to provide evidence-based services on an individual need, in addition to reduce financial barriers for individuals accessing needed services.

With the ongoing pandemic that compounded, high alcoholism rates, Opioid Crisis and Meth resurgence we respectfully ask your support of full request for the voucher. Though some may see a significant cost, the effect on less emergency room visits, revolving door jail and court visits has been impactful. For those of us who serve patients that want better and are committed to changing their path know that The SUD Voucher has and will continue save lives and Prairie Recovery Center is a committed and a proven provider to do so.

Respectfully,

Dave Marion

Testimony
HB 1012
January 28, 2025

Chairperson Rep. Nelson and Members of the Committee

My name is Chaz Brobst. I am encouraging you to pass HB 1012. There are many pieces of this bill that are near and dear to my heart. As an individual who has dealt with serious mental illness for over half my life at this point, I know how important funding is for Behavioral Health. Things like 988, mobile crisis units, Peer Support, Behavioral Health Clinics and others. I know what it is like to have to go out of state for mental health care because services have not been offered in North Dakota. This should not be happening. If the Vision of Health and Human Services is really to be the healthiest state, then we need to be providing the funding in order to provide the services to do just that. Without this funding symptoms of mental illness will increase and this would include suicide rates in our state. They are already too high. I have gotten lucky that none of my attempts have ended my life. For that I am grateful. I have been given the chance to provide testimony asking you to continue to fund these programs. To some it may be dollar signs, to others it is more time. More time to spend with a loved one. More time for doing the things they enjoy. It is another day on earth. Without funding for behavioral health lives will be cut short because they cannot receive the care, they need in a reasonable amount of time. Until someone has been to that very dark hole you don't know just how long a 5-minute hold while trying to access critical mental health care really is. Or how long a month wait is to see a counselor is until every breath seems like an eternity and breathing seems too difficult to do. Funding programs like Mental Health America of ND (MHAND) and Consumer Family Network (CFN) not only provides a place for people to turn to find services and navigate the system but also gives hope. Hope is found within the people. Continued funding of the State Hospital is also necessary. While never a pleasant experience it is a place that is needed for those that need it. Funding HB 1012 is absolutely necessary for every person with any sort of mental health need.

I have also worked with individuals with disabilities all of my adult life. Continuing to fund services such as the Developmental Disability Council, Family Voices, Autism Waiver, Fetal Alcohol Services, Special Education and so many more things is critical to leading happy, healthy lives. The people that benefit from these services want nothing else than to be a productive member of their community. They want to be healthy and happy like every other person in the state, country and world. They want the opportunity to make a difference. Let's give them the chance to do just that.

I urge you to pass HB 1012 to make ND the healthiest state in the nation.

Thank you for your time.

Chaz Brobst

Testimony
House Bill 1012
House Appropriations
Human Resources Division
Rep Jon O. Nelson, Chair
January 29, 2025

Good morning, Chairman Nelson and members of the committee. My name is Melanie Gaebe and I am the Chair of the Behavioral Health Planning Council (Council). I am providing testimony on behalf of the Council in support of HB 1012.

For those who may be unfamiliar with the Council, every state receiving federal Mental Health Block Grant funds is required to have a planning and advisory council. North Dakota expanded the focus of the council to include services for substance use disorders under the encouragement of the Federal Substance Abuse and Mental Health Services Administration. This expanded focus moved us toward a behavioral health planning and advisory structure that integrates mental health and substance abuse services.

The Council consists of thirty members who are appointed by the Governor. We have a diverse membership representing a wide array of state agencies, stakeholder groups, mental health providers, as well as consumers who have lived experience with mental health and substance use disorders. Our objective is to monitor, review, and evaluate the allocation and adequacy of mental health and substance abuse services in North Dakota.

The second piece of my testimony outlines the priority areas the Behavioral Health Planning Council is supporting this legislative session. The Council members are available to assist you with questions or concerns you have with these priorities. As noted on the priority document, please direct questions to the Council's contracted facilitator, Janell Regimbal at janell@insighttosolutions.com. She will be able to direct your questions to the Council members best able to provide you with the information you request.

Thank you,
Melanie Gaebe
Chair, Behavioral Health Planning Council

behavioral health
planning council

Monitoring, reviewing, and evaluating the allocation and adequacy of mental health and substance abuse services in North Dakota
Focusing on wellness and recovery that is consumer and family driven
For more information: https://www.hhs.nd.gov/bhpc

What is Behavioral Health?

- Refers to mental health and substance use disorders, life stressors and crises, and stress-related physical symptoms. Behavioral health care refers to the prevention, diagnosis and treatment of those conditions. (https://www.ama-assn.org/delivering-care/public-health/what-behavioral-health)
    - Behavioral health and mental health are often used in the same way, but mental health is really a piece of the overall picture of behavioral health

2025 Behavioral Health Planning Council Legislative Priorities

- Full funding of Health and Human Services Behavioral Health agency priorities to include:
    - State hospital replacement funding
    - Expanded school-based behavioral health services
    - Collaboration with housing initiatives to integrate behavioral health systems with housing plans
- Identified Gaps in Statewide Minimum Service Expectations
    - Crisis Services – limitations on the distance mobile crisis units travel mean the majority of the state does not have access
    - Local care options – investments in local options for care will help ease the overcrowding at the state hospital
        - Residential and Partial Hospitalization Programs
        - Expansion of geriatric psychiatric facilities
        - Community-based residential programs for court-ordered treatment
        - Increase capacity for medical detoxification in underserved areas
    - Programs for underserved populations
        - Youth, pregnant/parenting individuals, and rural populations
    - Inclusion of culturally responsive behavioral health traditional healing services in state funded recovery
    - Supported housing
        - Access and equity in recovery housing programs
        - Integration of behavioral health services with ongoing housing plan
- IMD Waiver – The Council continues to oppose the IMD Waiver, but support other options to reach the same goals
    - State plan changes to increase days of care
    - SUD voucher set aside for IMDs
    - Increased flexibility to address gaps
    - Increased coordination between providers and the state
    - Establish rigorous monitoring framework

To be in contact with leadership of the Behavioral Health Planning Council to respond to your questions or for requests for further information, email the Council's contracted facilitator, Janell Regimbal at janell@insighttosolutions.com.

Collaboratives

North Dakota Long-Term Care and Psychiatric Facility Collaborative – Behavioral Health

Collaborative members: ND Long Term Care Association, ND Hospital Association, Alzheimer's Association, Health & Human Services-Behavioral Health, Good Samaritan Society, Sanford Health, Prairie St. John's, SMP Health-St. Raphael, Dept of Corrections & Rehabilitation, Altru, Hill Top Home-Killdeer, LTC State Ombudsman, Benedictine Living-Ellendale

Purpose of Collaborative: Identify and address behavioral health specific issues impacting populations served by long term care facilities and psychiatric facilities in North Dakota.

Ongoing Work of the Collaborative:

- Definitions Workgroup (stable, acute, level of care, safety)
- Engage Medicaid
- Data Gathering
- Length of Stay Review
- Strategize Solutions
- State Hospital Role

WHO	**Justice-involved** (DOCR and civilly committed sex offender population)	**Residents with Challenging Behavior** (not specifically gero-psych)	**Gero-Psych**	**Community-Based**
CONSIDERATIONS / PROBLEM STATEMENTS	Individuals who are justice-involved currently or by history remain in state facilities due to a lack of options. • Aging DOCR • Sex-Offenders • Violent Crime History Facility proximity to schools can be an issue in community. Insurance issues for long term care providers. • Case by case review but mostly no.	Medicaid eligibility delays. Medicaid residents under 65 that are hospitalized, SNFs cannot bill for bed hold days. Provider hesitancy to support individuals with difficult behaviors due to concern support won't be available if things escalate. CMS very low risk tolerance for potential harm in SNFs. Lack of care coordination to assist individuals across systems. Need for consulting specialists to assist facilities in maintaining or returning individuals with high need. Reimbursement considerations.	When acute situations arise, the closest inpatient facility isn't necessarily best care for this population (mixed milieu). Neuro-cognitive disorder difficulty. Gero-psych language does not represent current population with many younger individuals. Connecting with peers of similar age is limited in current system. Specialty contracted beds located in existing Long-Term Care facilities are full. (3 providers) Reimbursement considerations. There is a significant delay in discharge/admission to a facility while reapplying for Medicaid which adds cost to the state and reduces revenue for the facility. NDCC 50-24.4-29 edit to avoid NDSH admission prior to Gero-psych admission.	Missing level of service for long term therapeutic interventions? Transitional living facility identity – what is a transitional time frame for a chronic disease? Does ND need Intermediate Care Facilities (ICF) for individuals with mental health conditions? Risk mitigation fund for gero-psych if qualifying issues? "Basic care for SMI"

Peer Support

Peer Support
What is it?

A Peer Support Specialist is a person or family member who uses his or her lived experience of recovery from mental illness, substance use and/or brain injury and skills learned in formal training to deliver services to promote mind-body recovery and resiliency.

Peer Support is **Effective**

Peer Support compliments and is supplemental to clinical services. The role of a peer support specialist is distinct and does not replace the clinician.

Role of a Peer Support Specialist

- Provide support and encouragement to achieve goals
- Assist with connecting to clinical care and community resources
- Teach skills such as stress management, conflict resolution, and parenting
- Offer proactive, flexible, and long-term follow-up

Peer Support
Behavioral Health Policy Team Role

TRAINING

- Over **1,200** individuals trained in the core training since 2018
  - 11 sessions since July 2023, including tribal and DOCR partnerships
- Continuing education
  - 25 free training events since July 2023
- Peer support supervision
  - 7 sessions since July 2023

CERTIFICATION

Administrative Rule 75-03-43 outlines the requirements and process for two levels of peer support specialist certification:

- Certified Peer Support Specialist I (CPSS I): **408**
- Certified Peer Support Specialist II (CPSS II): **39**

REIMBURSEMENT

- Community Connect
- Free Through Recovery
- Substance Use Disorder Voucher

Reimbursement also available through 1915(i) Medicaid State Plan Amendment; Medicaid Expansion; Blue Cross Blue Shield

Outcomes

Baseline and discharge ratings using a 5-point rating scale (1 lowest to 5 highest).

The following charts show the average baseline and discharge ratings for participants with complete baseline and discharge records, where the discharge occurred during the 2023-2025 biennium (n=836).

PURPOSE

Identify the extent to which the individual participates in meaningful daily activities (employment, school, volunteering, family caretaking, other activities, etc.).

COMMUNITY

Identify the extent to which the individual's relationships and social networks provide support, friendship, love, and hope for overall wellbeing.

HEALTH

Identify how well the individual makes informed healthy choices supporting their physical health and emotional wellbeing (physical activity, attending medical appointments, taking medications as prescribed etc.)

HOME

Identify the stability and safety of the individual's living environment.

Recovery Housing Assistance Program (RHAP)

Recovery Housing Assistance Program (RHAP)

What is Recovery Housing?
Supportive living environment for individuals wanting to initiate and sustain recovery from addiction.

Substance-free Home Environment

Space to Focus on Continued Growth and Healing

24-hour Peer-Led Support and Connection

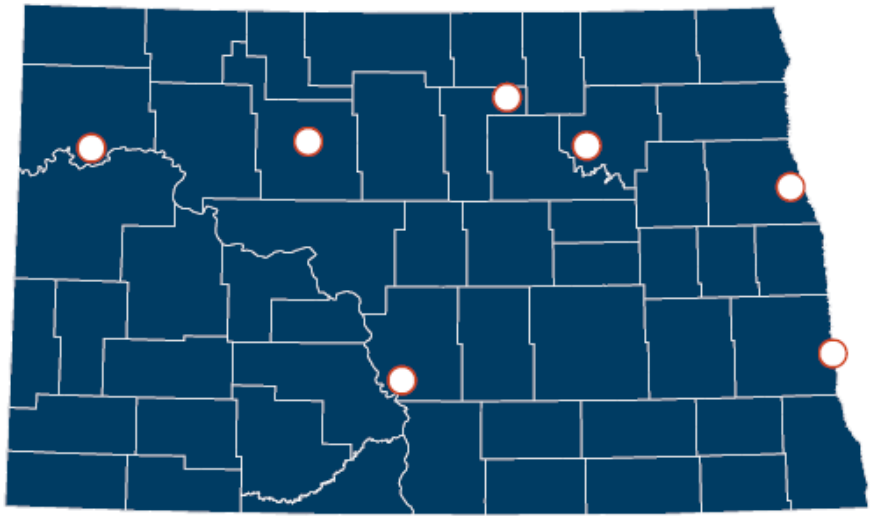
Resources to Support Individual Life Goals

NORTH Dakota | Health & Human Services
Be Legendary.

Recovery Housing Assistance Program (RHAP)
Background and Eligibility

Developed through the 66th Legislative Assembly for the purpose of:
- Increasing evidence-based addiction recovery support services; and
- Addressing housing needs alongside addiction recovery support

Program started in May 2022



Pays up to 12 weeks of an eligible individual's living expenses at an approved Recovery Housing provider.

Eligibility
- ND Resident;
- Age 18 or older;
- Have a substance use disorder; and
- One of the following:
  - Currently enrolled in a HHS public assistance program; or
  - Currently enrolled in a BHD substance use disorder or community program; or
  - Household income is at or below 200% Federal Poverty Guidelines

Suicide Prevention

Suicide Prevention

Suicide Fatality Review Commission (SFRC)

- A group of multidisciplinary professionals and community members appointed by HHS Commissioner that meets to evaluate the circumstances leading to and causing deaths by suicide in North Dakota to improve community and service systems and to take action to prevent further suicides.
- The first SFRC report was released January 2025.

Suicide Prevention Training Contracts

- Partner agencies:
  - American Foundation for Suicide Prevention (AFSP)
  - FirstLink
  - Haugen Performance Consulting, PLLC
- As of December 1, 2024, 31 trainings have been provided to 626 individuals throughout the state.

Community-level Suicide Prevention

- Six grants were awarded in early 2024.
- Populations of focus include:
  - Middle and High School Students
  - Parents and Families
  - Farmers and Ranchers
  - Collegiate Athletes
  - Individuals with disabilities
  - Veterans

Statewide Community Outreach

- Suicide prevention awareness messaging
- Community partnerships and collaboration
- Suicide prevention training and technical assistance

Opioid Settlement Fund

Opioid Settlement Fund

Current settlements with 13 manufacturers, distributors or pharmacies (one still pending)

ND has received 22.7M and expected to receive additional 40M.

$8M was appropriated in the 2023-2025 biennium to HHS

- at least 20% to be used for opioid use prevention and overdose prevention, including best practices relating to fentanyl drug overdose, and workforce development.

NORTH Dakota | Health & Human Services
Be Legendary.

Opioid Settlement Advisory Committee
Listening Sessions

The role of the Advisory Committee is to provide recommendations to HHS on use of appropriated settlement funding.

The Advisory Committee hosted listening sessions in the summer/fall of 2023 to gather public feedback.

- Themes of input included:
  - Prevention
  - Syringe Service Programs
  - Access to treatment

- Themes of input included:
  - Access to treatment and recovery services including for those in the criminal justice system
  - Enhance behavioral health workforce

- Themes of input included:
  - Syringe Service Programs
  - Access to treatment
  - Set aside for tribes

Email comments were also accepted

Opioid Settlement Committee
Funding Recommendations

Opioid Settlement Advisory Committee approved the following use of funds:

- Purchase of naloxone for community distribution *($635,380)*
- Tribal implementation of opioid efforts including prevention, treatment and recovery *($310,833)*
- Opioid Settlement Fund (OSF) grant *($7,053,7878)*

Advisory Committee Priority Recommendations

1. Utilize opioid settlement funds to increase access to **community-based treatment and recovery services in rural areas.**
2. Utilize opioid settlement funds to increase access to **treatment and recovery services in jails**.
3. Utilize opioid settlement funds for **prevention activities**, including coalitions, community work, and prevention activities for youth.
4. Utilize opioid settlement funds to enhance the **behavioral health workforce**.
5. Utilize opioid settlement funds to support **Syringe Service Programs.**
6. Utilize opioid settlement funds to increase access to **community-based treatment and recovery services** in non-rural areas.

List of Opioid Remediation Uses

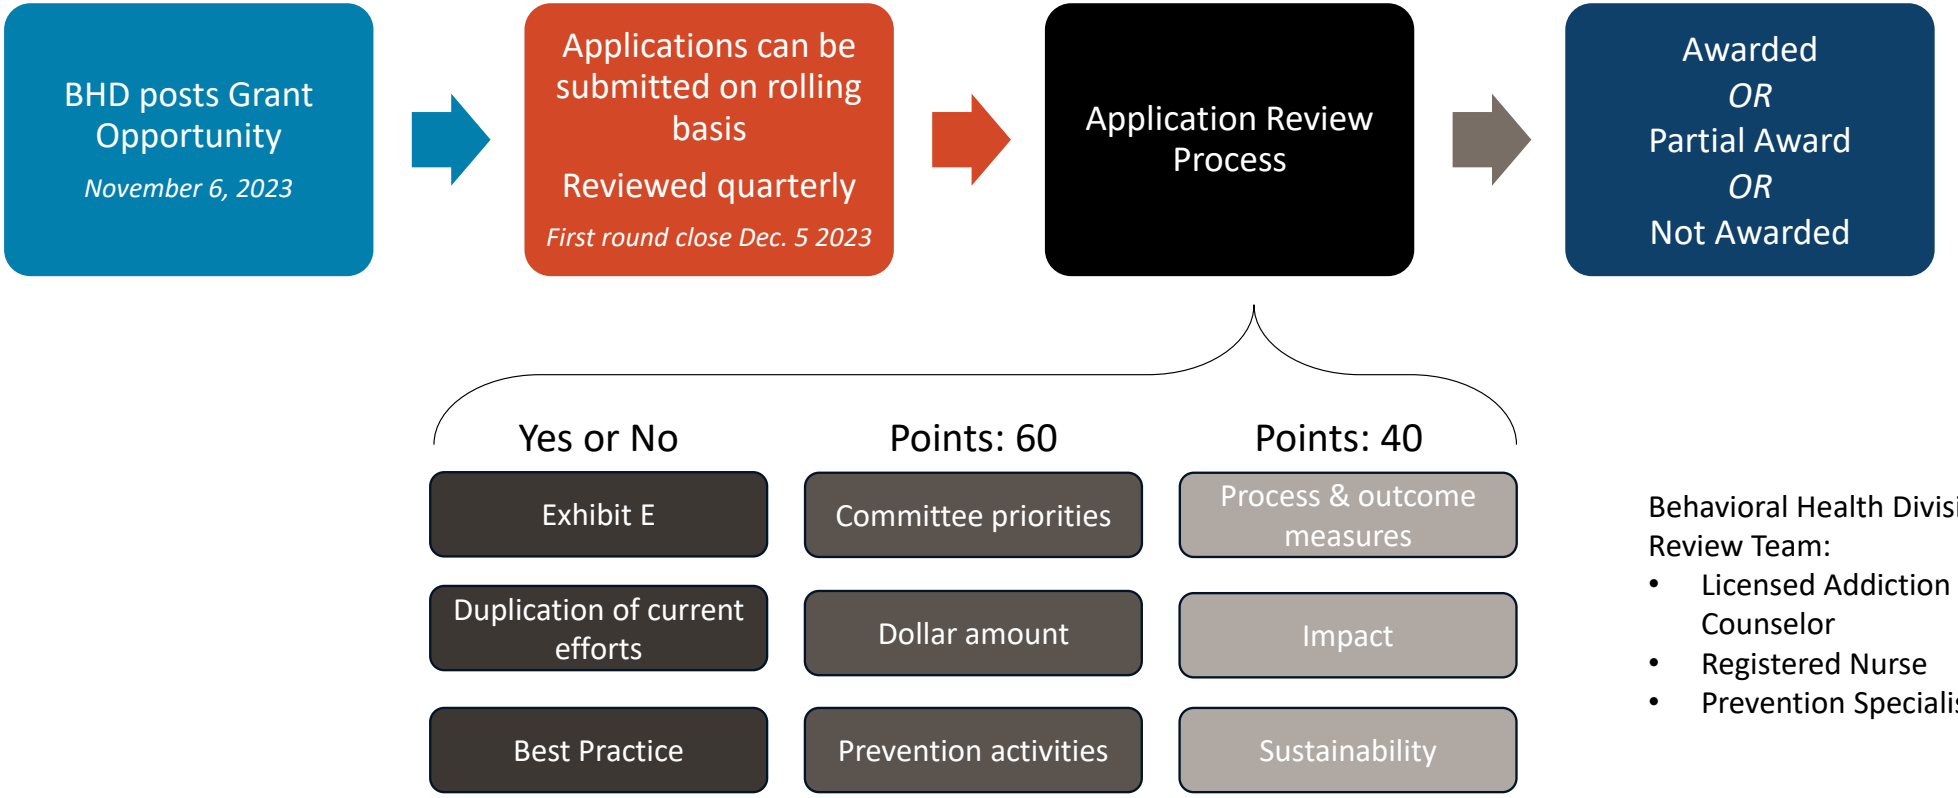

Exhibit E

Allowable opioid abatement and remediation strategies categorized by the following:

1. **Core strategies**
   - Examples:
     - Purchase, training, and distribution of naloxone or other FDA-approved drug to reverse opioid overdoses
     - Treatment for incarcerated populations with opioid use disorder
2. **Treatment**
   - Examples:
     - Support treatment for opioid use disorder
     - Support workforce development for addiction professionals who work with persons with opioid use disorder
     - Support individuals in recovery from opioid use disorder
3. **Prevention**
   - Example:
     - Prevent overprescribing, misuse of opioids, and opioid overdose deaths
4. **Other**
   - Example:
     - Provide education and training to abate the opioid epidemic

Opioid Settlement Grant Process

Opioid Settlement Funding Grant Highlights

14 applicants were awarded February 2024

- **Endeavor Sober Living** – Supported 21 pregnant and parenting women in their recovery journey with a recovery house. All women have seen an improvement in their employment status and 10 women have been reunified with their children. Looking at opening a second location.
- **USpire** – Supported 61 family units, including parents who are incarcerated, to build skills.
- **Heartview/TAAP** – Enhanced the behavioral health workforce by adding 8 new Licensed Addiction Counselor (LAC) training sites, adding 15 new clinical supervisors, providing 15 scholarships and 26 individual stipends
- **Heartview Dickinson** – began providing outpatient Substance Use Disorder treatment services January 27th
- **ONE Program** – connected with several tribal leaders and placed 171 ONE Boxes throughout tribal communities
- **Community Connect Providers** – 51 providers have served 942 individuals
- **Sanford Medical Center Fargo** – Became licensed as an outpatient Substance Use Disorder Treatment provider. They have connected 86 individuals to treatment services.

Certified Community Behavioral Health Clinic (CCBHC) Certification

Certified Community Behavioral Health Clinics (CCBHC) – BHD Policy Role

Certification Process Components

The National CCBHC Criteria

- **Staffing**
- **Availability & Accessibility of Services**
- **Care Coordination**
- **Scope of Services**
- **Quality & Other Reporting**
- **Organizational Authority, Accreditation & Governance**

Throughout the criteria, emphasis on:

- Designing requirements to meet state/local needs
- Person-centered care
- Delivery of services outside the clinic
- Innovative partnerships
- Reaching individuals not currently in care
- Measurement-informed care

CCBHC
Federal Grant Efforts

May 2022

NOT AWARDED

BHD submitted three federal grant applications for the FY 2022 Certified Community Behavioral Health Clinic Planning, Development, and Implementation Grant (CCBHC-PDI) NOFO No. SM-22-002 for **Badlands**, **South Central** and **Northeast** Human Service Centers.

Dec 2022

NOT AWARDED

BHD submitted a federal grant application for FY 2023 Cooperative Agreements for Certified Community Behavioral Health Clinic Planning Grants (CCBHC Planning Grants) NOFO No. SM-23-015.

May 2023

NOT AWARDED

BHD submitted three federal grant applications for the FY 2023 Certified Community Behavioral Health Clinic Planning, Development, and Implementation Grant (CCBHC-PDI) NOFO No. SM-23-024 for **Badlands**, **Northwest** and **Northeast** Human Service Centers.

December 2024

AWARDED

FY2025 Cooperative Agreements for Certified Community Behavioral Health Clinic (CCBHC) Planning Grants (Short Title: CCBHC Planning Grants) is posted. The purpose of this program is to support states in developing and implementing certification systems for CCBHCs, establish Prospective Payment Systems (PPS) for Medicaid reimbursable behavioral health services, and prepare an application to participate in a four-year CCBHC Demonstration program. NOFO No. SM-25-001

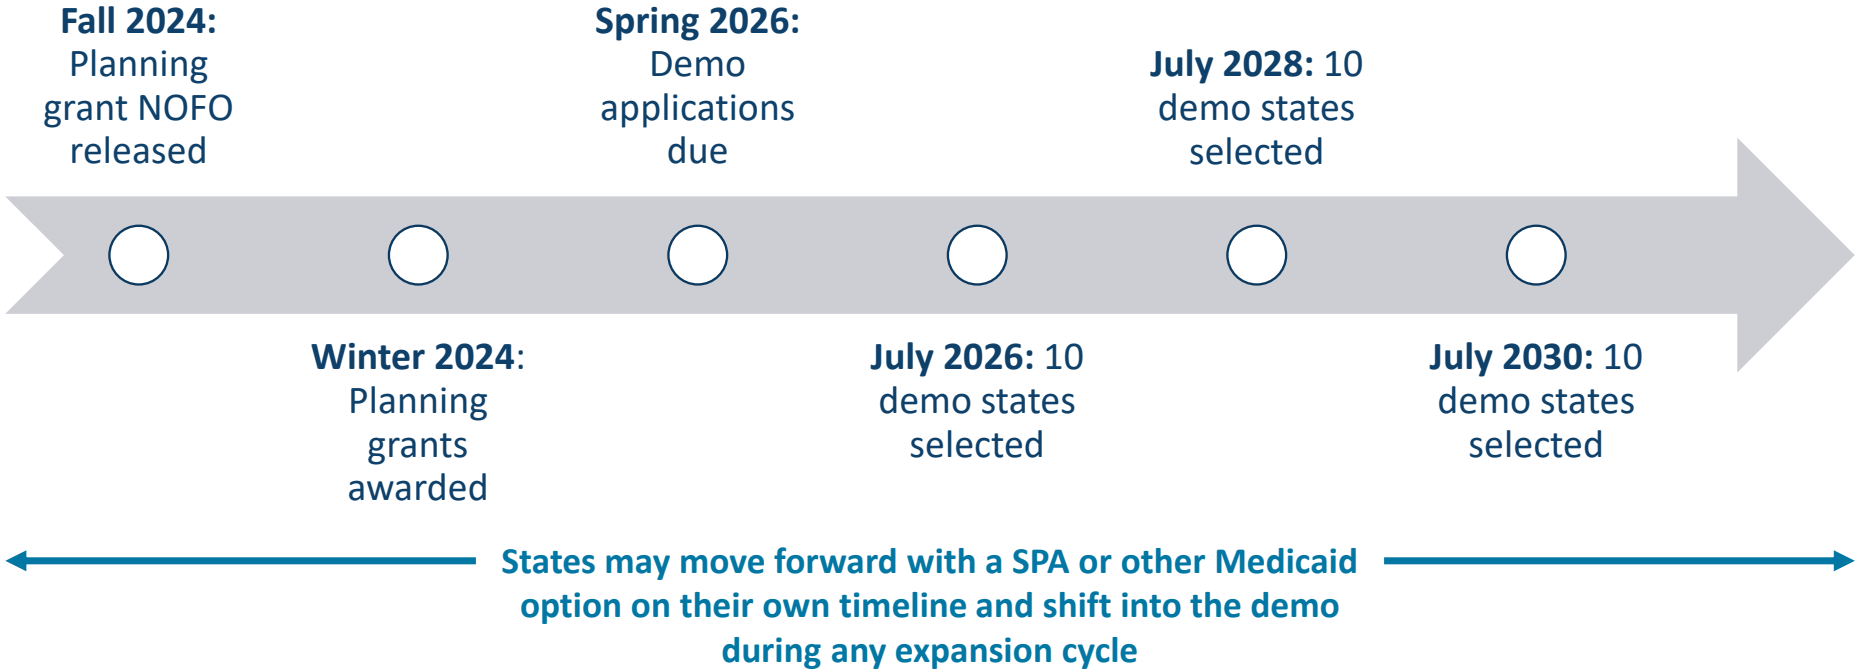
CCBHC Planning Grant

Grant Dates: 12/31/2024 – 12/30/2025
Funding: $1,000,000

Solicit	Solicit input from people with lived experience of mental health, substance use disorders, family members, providers and other stakeholders
Identify	Identify and select clinics to participate in the Demonstration Program
Certify	Develop process for certifying clinics as CCBHC
Develop	Develop a Prospective Payment System (PPS) for services furnished by a CCBHC [ND Medicaid]
Establish	Establish capacity to provide behavioral health services that meet Certification Criteria
Ensure	Ensure data collection and reporting capacity necessary for evaluation



Implementation Pathways
Medicaid CCBHC Options

Medicaid Demonstration
Next application opportunity in 2026
4-year demonstration with enhanced FMAP (65.68% for ND)
States must receive $1M planning grant to apply for demo
States and clinics meet federal demo guidance (w/ opportunity to tailor model to state/local needs)
Clinics receive Medicaid PPS
States may begin small with 2+ CCBHCs and scale up over time

Medicaid SPA: CCBHC Option
Effective March 9, 2024
States may add CCBHC services to their Medicaid state plan
Statutory definition tied to SAMHSA certification criteria
Does not require PPS at this time, but states can elect to use PPS
All normal Medicaid requirements apply
Standard FMAP applies (50.97% for ND)
Add'l CMS guidance forthcoming

Other Medicaid Authorities
Includes Medicaid SPA under rehab option; Section 1115 waiver; managed care directed payment
State must specify inclusion of selected CCBHC services (some may not otherwise be included in the plan)
States can elect to use bundled payment modeled on PPS (with CMS approval)
Standard requirements of the selected Medicaid authority apply
Standard FMAP applies

Timeline: Federal Demonstration Expansion

Behavioral Health Navigator

Through 68th ND Legislative Assembly action, HHS created a behavioral health navigator role.

- Facilitate connection to care by identifying resources for individuals and families and helping them navigate through behavioral health care services.
- Assist in interpreting clinical language to ensure individuals can navigate to the appropriate level of care or service.
- Position is overseen by a Licensed Professional Clinical Counselor

From Oct. 2023 through Dec 2024, the behavioral health navigator assisted **304 individuals**.

Behavioral Health Navigator

In July, 2024, a request was made for BHD to screen private family referrals through the new process known as One Assessment or the Children's Treatment Services Level of Care.

- No additional resource was available
- Walk through process

Behavioral Health Navigator **temporarily** screens youth from private homes

Screening includes:

- Youth connection to community resources
- Recommendations made by clinician
- Recent (past 90 day) history of crisis services, ER visits, or hospitalizations

Private Screenings to Maximus	
Met screening-sent to Maximus	79

Federal Requirements for Youth Behavioral Health Inpatient and Residential Services

- 42 CFR Part 441 Subpart D requires state Medicaid programs to have an independent team certify the need for services when a youth under age 21 is admitted to inpatient psychiatric services.
  - Inpatient psychiatric services include services provided in hospitals and psychiatric residential treatment facilities (PRTF).
  - ND Medicaid also issues a level of care for youth served in Qualified Residential Treatment Programs (QRTPs).

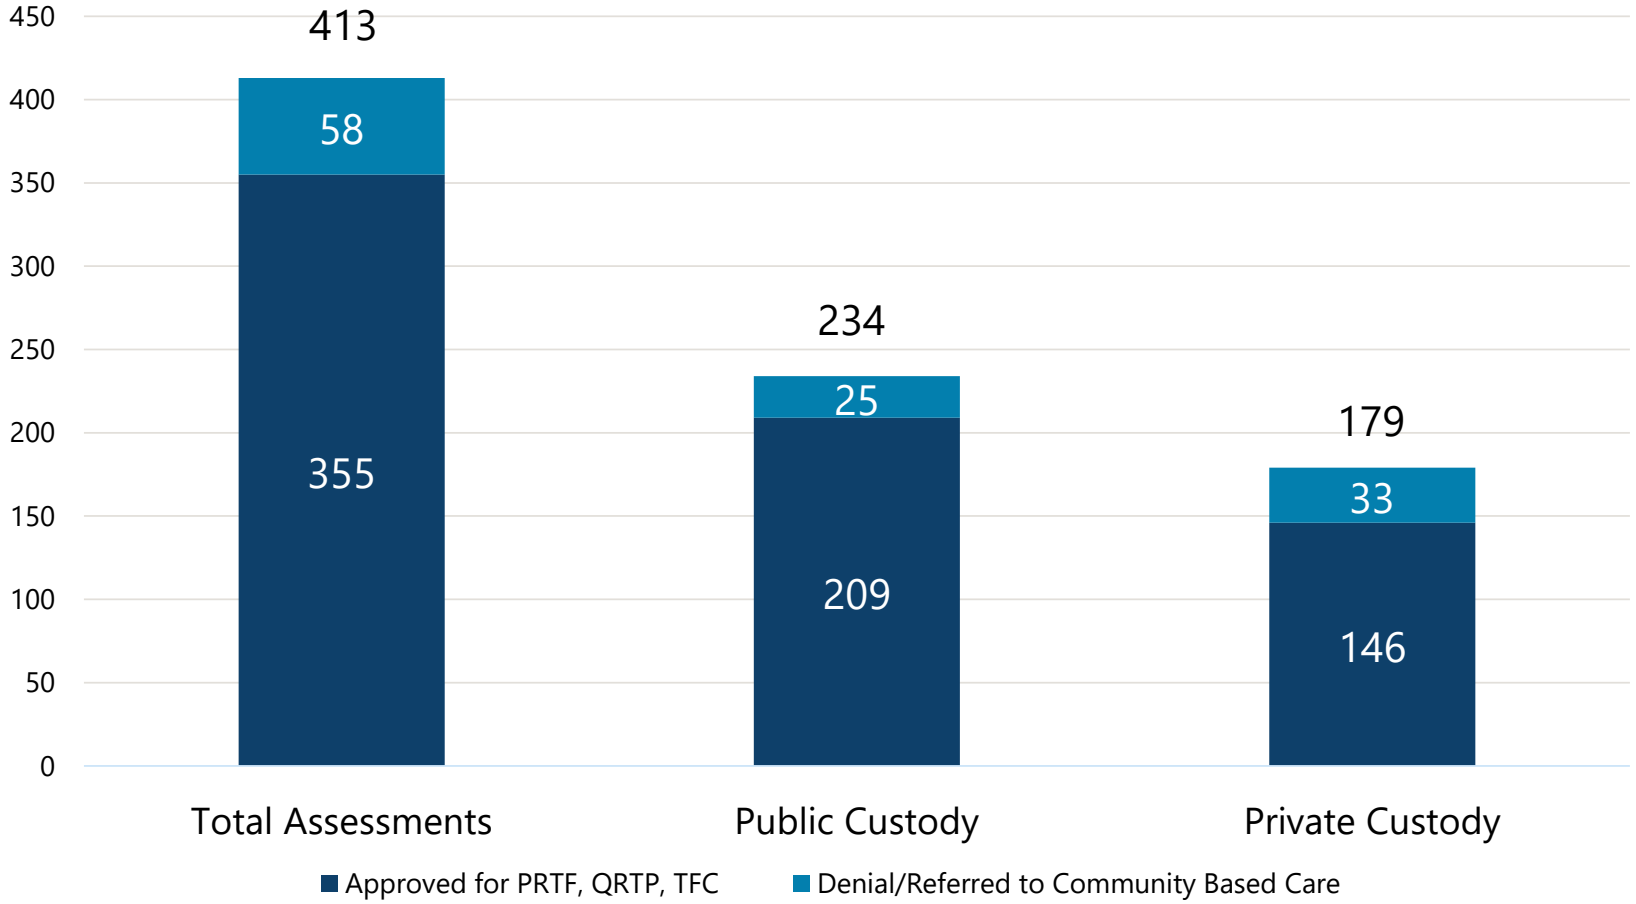
Level of Care Process

Pre One Assessment
Services before July 1, 2024

- **Fragmented and Inconsistent**. Prior to the one assessment, North Dakota had separate entry points and review processes for PRTF and QRTP levels of care. Additionally, the review and documentation process differed substantially between settings. PRTF reviews were based on narrative documentation only and referral information was submitted by the PRTF provider while QRTP reviews included interviews with families and youth.
- **Not Person Centered.** PRTF reviews did not include interviews of youth and families.
- **Potential for Bias.** PRTF reviews only focused on narrative documentation, not medical records.
- **Duplication.** Multiple assessments and dual determinations for the same youth.

Post One Assessment
Services After July 1, 2024

- **Streamlined approach.** One assessment and evaluation, regardless of the type inpatient or residential behavioral health treatment requested.
- **Independent.** Medical documentation review is completed by an independent third party and is broader than a narrative description.
- **Family and person-centered.** Includes interviews with youth and families. Ensures care is provided in the least restrictive, most appropriate setting to meet the youth's needs.
- **Consistent.** Clinical criteria are applied consistently for all youth across North Dakota. Eliminates variance in provider interpretation of clinical criteria.



One Assessment Transition

Did clinical criteria change?	No, the one assessment is a process change only and did not change the clinical criteria for PRTF or QRTP admission. The clinical criteria for PRTFs were updated in June 2023 and providers were trained in the criteria at that time and have had a year to adjust to the clinical criteria. The one assessment adds independent verification of clinical criteria and provider submitted information through review of clinical notes and an interview with youth and families but does not change the certificate of need (CON) clinical requirements in place prior to the one assessment.
How does this change impact the care of kids?	The new assessment will allow better supports for youth and families entering treatment service by streamlining entry and ensuring the right care at the right time, provided in the least restrictive, most appropriate setting. The one assessment creates an opportunity for NDHHS to assist families who do not qualify for PRTF level of care to identify other treatment options and resources in the community. NDHHS will also have more data related to youth entering services to allow the state to monitor and identify trends related to service delivery across the continuum of care.
What has ND HHS done to help facilities and families?	NDHHS has collaborated with providers and families to navigate changing processes. NDHHS provided multiple educational sessions to providers before, during, and after implementation of the One Assessment, with opportunities to provide feedback and ask clarifying questions. NDHHS has added a Behavioral Health Navigator to support families in determining the right source of care. NDHHS continues to assess the behavioral health landscape of North Dakota and has included stakeholders in discussions to consider further enhancements to ensure youth have the right care at the right time, provided in the least restrictive, most appropriate setting.

One Assessment

- The new process is one assessment for both PRTF and QRTP levels of care, along with the addition of Treatment Foster Care.
  - The process change to one assessment is centered around streamlining services for youth and families and ensuring that care is provided in the least restrictive, most appropriate setting.
  - This new process will ensure families and youth come through a single point of entry, allowing ND HHS to have better data about PRTF admissions and denials and an opportunity to assess and help ensure youth with behavioral health needs are directed to appropriate supports at all levels of care.
  - Under the one assessment, referrals for Children's Treatment Services assessment will go to one 3rd Party Vendor. The vendor will assess for PRTF, QRTP, and TFC level of care, and complete independent interviews with youth and families and review additional required documentation to limit bias to ensure that clinical criteria are applied appropriately and consistently for all youth across the state.

Voluntary Treatment Program

NORTH Dakota Be Legendary. | Health & Human Services

Voluntary Treatment Program

Provides out of home residential services for Medicaid-eligible children with a serious emotional disorder without requiring parents to relinquish custody (NDCC 50-06-06.13).

- The VTP will pay for maintenance costs of the treatment episode and Medicaid will pay for the treatment costs in accordance with the state plan.
- Providers include Qualified Residential Treatment Providers (QRTPs).

ELIGIBILITY

- Up to the age of 18;
- Currently have a diagnosable mental, behavioral, or emotional disorder of sufficient duration to meet diagnostic criteria specified in the DSM 5; and
- The functional impairment substantially interferes with or limits the child's role or functioning in the family, school and community activities.
- Youth are unable to be effectively served in the community

Voluntary Treatment Program

2023-2025 Biennium Appropriation: $453,424

Through September 30, 2024, (75% of the biennium) 100% of the allocation has been expended.

- $265,103.00 of MHBG funding has been used to support youth through December 31, 2024.
- To continue the program through June 2025, it is estimated that an additional $600,000 of MHBG funding will be needed to support youth currently in the program and 4 additional youth.

Development of Partial Hospitalization/ Intensive Day Treatment

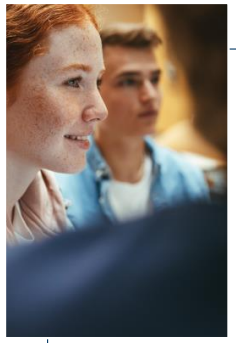
NORTH Dakota | Health & Human Services
Be Legendary.

Partial Hospitalization/ Intensive Day Treatment

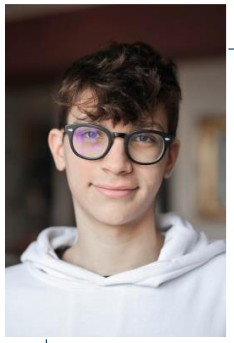
Partial Hospitalization Programs (PHP) and intensive day treatment programs provide intensive, community-based therapeutic services that respond to the chronicity and severity of an individual's behavioral health condition. PHP and day treatment programs can be for mental health conditions, substance use disorders, and co-occurring disorders.

- There is currently limited access to PHP programs for children and adolescents across the state. Fargo (current) and Bismarck (opening in early 2025).
- Projected Impact
  - Increase frequency and intensity of behavioral health services by multidisciplinary treatment teams closer to home.
  - Reduce costly emergency room visits, and inpatient hospitalization stays.
  - Reduce Emergency Department boarding and length of hospital and residential stays.
- Funding for start-up costs as treatment services are reimbursable.

	2025-2027 Biennium Decision Package [ONE-TIME FUNDING]
Development of PHP/ Intensive Day Treatment	2,000,000



Youth Crisis Services



NORTH Dakota
Be Legendary. | Health & Human Services

Youth Crisis Services

Nationwide best practice for youth crisis services includes:

- Someone to Contact
- Someone to Respond
- A Safe Place for Help

Youth crisis stabilization centers focus on initial response, triage, screening, assessment, and intervention to rapidly address the needs of the youth in crisis and promote de-escalation and stabilization.

	Decision Package	**TOTAL 2025-2027 BIENNIUM PROPOSAL**

Be Legendary.

Treatment Collaborative for Traumatized Youth

The Treatment Collaborative for Traumatized Youth (TCTY) mission is to enhance the availability of evidence-based mental health treatment for traumatized individuals in North Dakota through implementing evidence-based treatments and building a multidisciplinary collaborative network across the region.

www.tcty-nd.org

Contract with Sanford Research North

Treatment Collaborative for Traumatized Youth

	Base Budget	Decision Package to **EXPAND**	TOTAL 2025-2027 BIENNIUM PROPOSAL
TCTY	200,000	408,000	608,000

25-27 Expansion

- Focus on supporting TCTY's expert team in enhancing previous trainings and roster maintenance by adding ongoing education and resource dissemination.
- Expand TF-CBT training to offer a TF-CBT training on the western part of the state
- Add an in-person advanced TF-CBT training workshop for previously trained and newly trained mental health professionals.

This new proposal will produce the following outcomes:

- 110 TF-CBT trained,
- 180 Advanced TF-CBT trained,
- 200 attended the two-year Education Series, and
- 14,400 exposures to Awareness/Resource Messaging.

Electronic Health Record

EHR Legacy System Data Extraction & Migration

MyAvatar was implemented in 2019, at which point decision was made to leave some historical data in the legacy systems (ROAP and AIMS). In 2023, HHS was notified by the vendor that vendor support for the legacy system would end. Since that time, NDIT has provided support to the extent of their ability and BHD has provided continued funding for this system, which presents increasing data security concerns. Today, the data infrastructure of this legacy system is antiquated and is no longer able to be adequately supported by NDIT.

Project Risks	• It is assumed that the longer this initiative is delayed, the more expensive it will be to complete the initiative due to diminishing subject matter expertise on the legacy system • HHS may become out of compliance with retention laws. • PHI will be lost or violated
Anticipated Benefits	• Reduce maintenance funds allocated to legacy system support. • Continue to maintain compliance with retention regulations. • Reduce PHI security risk.

	2025-2027 Biennium Decision Package [ONE TIME FUNDING]
EHR Legacy System Data Extraction & Migration	$1,000,000

NORTH Dakota Be Legendary. | Health & Human Services

State Hospital Network Redundancy

The State Hospital does not currently have a redundant network, which contributes to increased patient safety and legal risk in the event of network loss (e.g. the network cable is cut). Without access to internet, State Hospital staff are cut off from access to the patient medical record within the Electronic Health Record (EHR). This decision package would create a redundant network line for failover in the event of primary network loss or instability.

Project Risks	• Single network failure could contribute to increased patient safety risks if access to the EHR is not able to be quickly restored • State Hospital staff will continue to experience interruptions with EHR connectivity, which reduced efficiency and leads to staff dissatisfaction.
Anticipated Benefits	• Reduced potential patient safety and legal risk. • Improved EHR performance.

2025-2027 Biennium Decision Package [ONE TIME FUNDING]	
State Hospital Network Redundancy	$500,000

NORTH Dakota Be Legendary. | Health & Human Services

EHR System Recovery and Backup Solution

The Behavioral Health Division's Electronic Health Record (EHR) data is hosted by the vendor, Netsmart with no current on-premise data backup or recovery solution. Currently, the State Hospital does not have a viable option for immediate access to critical patient safety data, which contributes to increased patient safety and legal risk. This funding request is to develop a solution to create a data backup, which would be owned and maintained by the State, to ensure immediate access to critical patient data is readily accessible.

Project Risks	• Citizens served at the State Hospital may be subjected to undue safety risks in the event of an EHR service interruption.
Anticipated Benefits	• Secure patient safety in the event of EHR service/ network interruptions.

	2025-2027 Biennium Decision Package [ONE TIME FUNDING]
EHR System Recovery and Backup Solution	$500,000

Federal Funding for 2025-2027 Biennium

Federal Funding Source	Purpose	Current Award Deadline	Current Award
Substance Use Prevention, Treatment and Recovery Services Grant (SUPTRS)	Provide priority treatment and support services for individuals without insurance; provide primary prevention for persons not identified as needing treatment.	September 2025	$7,530,548
Mental Health Block Grant (MHBG)	Provide comprehensive, community-based mental health services to adults with serious mental illnesses (SMI) and to children with serious emotional disturbances (SED) and to monitor progress in implementing a comprehensive, community-based mental health system.	September 2025	$1,762,814
State Opioid Response Grant (SOR)	Address the opioid overdose crisis by providing resources to states and territories for increasing access to FDA-approved medications for the treatment of opioid use disorder (MOUD), and for supporting the continuum of prevention, harm reduction, treatment, and recovery support services for opioid use disorder (OUD) and other concurrent substance use disorders.	September 2025	$4,000,000
System of Care Grant (SOC)	Provide resources to improve the mental health outcomes for children and youth, birth through age 21, with serious emotional disturbances (SED), and their families.	September 2025	$3,000,000
988 Grant	Improve state and territory response to 988 contacts (including calls, chats, and texts)	September 2025	$838,072

Federal Funding for 2025-2027 Biennium

Federal Funding Source	Purpose	Current Award Deadline	Current Award
PATH	Support community-based outreach, mental health and substance abuse referral/treatment, case management and other support services, as well as a limited set of housing services for adults who are homeless or at imminent risk of homelessness and have a serious mental illness.	July 2025	$300,000
Traumatic Brain Injury State Partnership Program	Create and strengthen person-centered, culturally competent systems of services and supports that maximize the independence and overall health and well-being of all people with TBI across the lifespan, their family members, and their support networks.	July 2025	$200,178
Cooperative Agreements for Certified Community Behavioral Health Clinic Planning Grants	Support states to develop and implement certification systems for CCBHCs, establish Prospective Payment Systems (PPS) for Medicaid reimbursable services, and prepare an application to participate in a four-year CCBHC Demonstration program	December 2025	$1,000,000
Strategic Prevention Framework-Partnerships for Success	Reduce the onset and progression of substance misuse and its related problems by supporting the development and delivery of state and community substance misuse prevention and mental health promotion services.	September 2025	$1,250,000
Pediatric Mental Health Care Access Grant	Intended to promote behavioral health integration into pediatric primary care by using telehealth services to provide high quality and timely detection, assessment, treatment and referral for children and adolescents, with behavioral health conditions, using evidence-based practices and methods.	September 2025	$858,000

One Assessment for Level of Care Assessment for Youth Behavioral Health Inpatient and Residential Services

42 CFR Part 441 Subpart D requires state Medicaid programs to have an independent team certify the need for services when a youth under age 21 is admitted to inpatient psychiatric services. Inpatient psychiatric services include services provided in hospitals and psychiatric residential treatment facilities (PRTF). ND Medicaid also issues a level of care for youth served in Qualified Residential Treatment Programs (QRTPs).

On July 1, 2024, the North Dakota Department of Health and Human Services (NDHHS) began using One Assessment for youth entering inpatient or residential behavioral health treatment.

What is the one assessment?	The one assessment is a streamlined approach to assessing level of care. Under the one assessment, referrals for inpatient or residential behavioral health treatment go through one evaluation process. An independent vendor assesses the level of care, completes independent interviews with youth and families, and reviews medical documentation. The one assessment is designed to limit bias to ensure that clinical criteria are applied appropriately and consistently for all youth across North Dakota.
Why did ND HHS make this change?	Prior to the one assessment, North Dakota had separate entry points and review processes for PRTF and QRTP levels of care. The separate processes were fragmented and resulted in multiple assessments and dual determinations for the same youth. Additionally, the review and documentation process differed substantially between settings. PRTF reviews were based on narrative documentation only and referral information was submitted by the PRTF provider while QRTP reviews included interviews with families and youth. The differences in documentation and review requirements resulted in inconsistent application of clinical criteria across the state. The new process for one assessment is centered around streamlining the point of entry for youth and families, applying clinical criteria consistently, and ensuring that care is provided in the least restrictive, most appropriate setting.
Did clinical criteria change?	No, the one assessment is a process change only and did not change the clinical criteria for PRTF or QRTP admission. The clinical criteria for PRTFs were updated in June 2023 and providers were trained in the criteria at that time and have had a year to adjust to the clinical criteria. The one assessment adds independent verification of clinical criteria and provider submitted information through review of clinical notes and an interview with youth and families but does not change the certificate of need (CON) clinical requirements in place prior to the one assessment.
How does this change impact the care of kids?	The new assessment will allow better supports for youth and families entering treatment service by streamlining entry and ensuring the right care at the right time, provided in the least restrictive, most appropriate setting. The one assessment creates an opportunity for NDHHS to assist families who do not qualify for PRTF level of care to identify other treatment options and resources in the community. NDHHS will also have more data related to youth entering services to allow the state to monitor and identify trends related to service delivery across the continuum of care.
What has ND HHS done to help facilities and families?	NDHHS has collaborated with providers and families to navigate changing processes. NDHHS provided multiple educational sessions to providers before, during, and after implementation of the One Assessment, with opportunities to provide feedback and ask clarifying questions. NDHHS has added a Behavioral Health Navigator to support families in determining the right source of care. NDHHS continues to assess the behavioral health landscape of North Dakota and has included stakeholders in discussions to consider further enhancements to ensure youth have the right care at the right time, provided in the least restrictive, most appropriate setting.

5:10 p.m. Jessica Thomasson, Executive Director, Human Services Division, Health and Human, services will provide the committee with turnover data.

5:11 p.m. Kristen HasBargen, Director, Human Service Zone Operations, Health and Human Services, testified and continued with testimony #32758.

Additional written testimony:

Julianne Horntvedt, Executive Director, North Dakota State Council on Developmental Disabilities in favor #31721.

5:15 p.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

Testimony
House Bill 1012
January 27, 2025

My name is Julianne Horntvedt and I am the Executive Director of the North Dakota State Council on Developmental Disabilities. I am submitting testimony on behalf of our Advocacy Committee.

A few comments about HB1012:

1) We are glad to see the Governor's budget request for continued support of the Cross Disability Waiver. We feel that this is an important step to provide support to individuals and families who may "fall through the cracks" of the current waiver system
2) We support the continued funding for Family Voices of ND. Their support to families in this state is unmatched and we often refer calls we receive to them for parent support, to provide information on waiver services, ABLE accounts, trainings, etc.
3) We have concern about the decrease in the budget for the Autism Waiver. With families already on a waitlist, a cut to funding will provide less support to those who need services. We realize the staffing shortage is a real crisis, perhaps we can be creative about how we recruit/train/and retain staff in the state so they can provide the needed support so more individuals can utilize services.
4) We have concern about the decrease in funding to the FASD Center at UND. The Council has chosen Fetal Alcohol Spectrum Disorder as our targeted disparity group in our current 5-year plan. This means we have dedicated resources in different ways to provide education, training, and awareness to families, educators, foster parents, state staff, etc. We hope to see this funding restored so individuals and families have a place to go for diagnosis and support.

Sincerely,

Julianne Horntvedt

HB1012 Overview – Human Service Zone Operations

House Appropriations | Human Resources Division
Representative Jon Nelson, Chairman

NORTH Dakota Be Legendary. | Health & Human Services

January 30, 2025, Kristen Hasbargen | Director, Human Service Zone Operations

Human Service Zone Purpose and ND Century Code Reference(s)

In order to provide optimum service, reduce program costs, and benefit recipients of human services within this state, counties shall combine and consolidate their county agencies into human service zones in the manner provided in this chapter.

Chapter	Chapter Name
50-01.1	Human Service Zones
50-35	State-Funded Human Services
50-06	Department of Human Services

Dakota Central Human Service Zone

NORTH Dakota | Health & Human Services
Be Legendary.

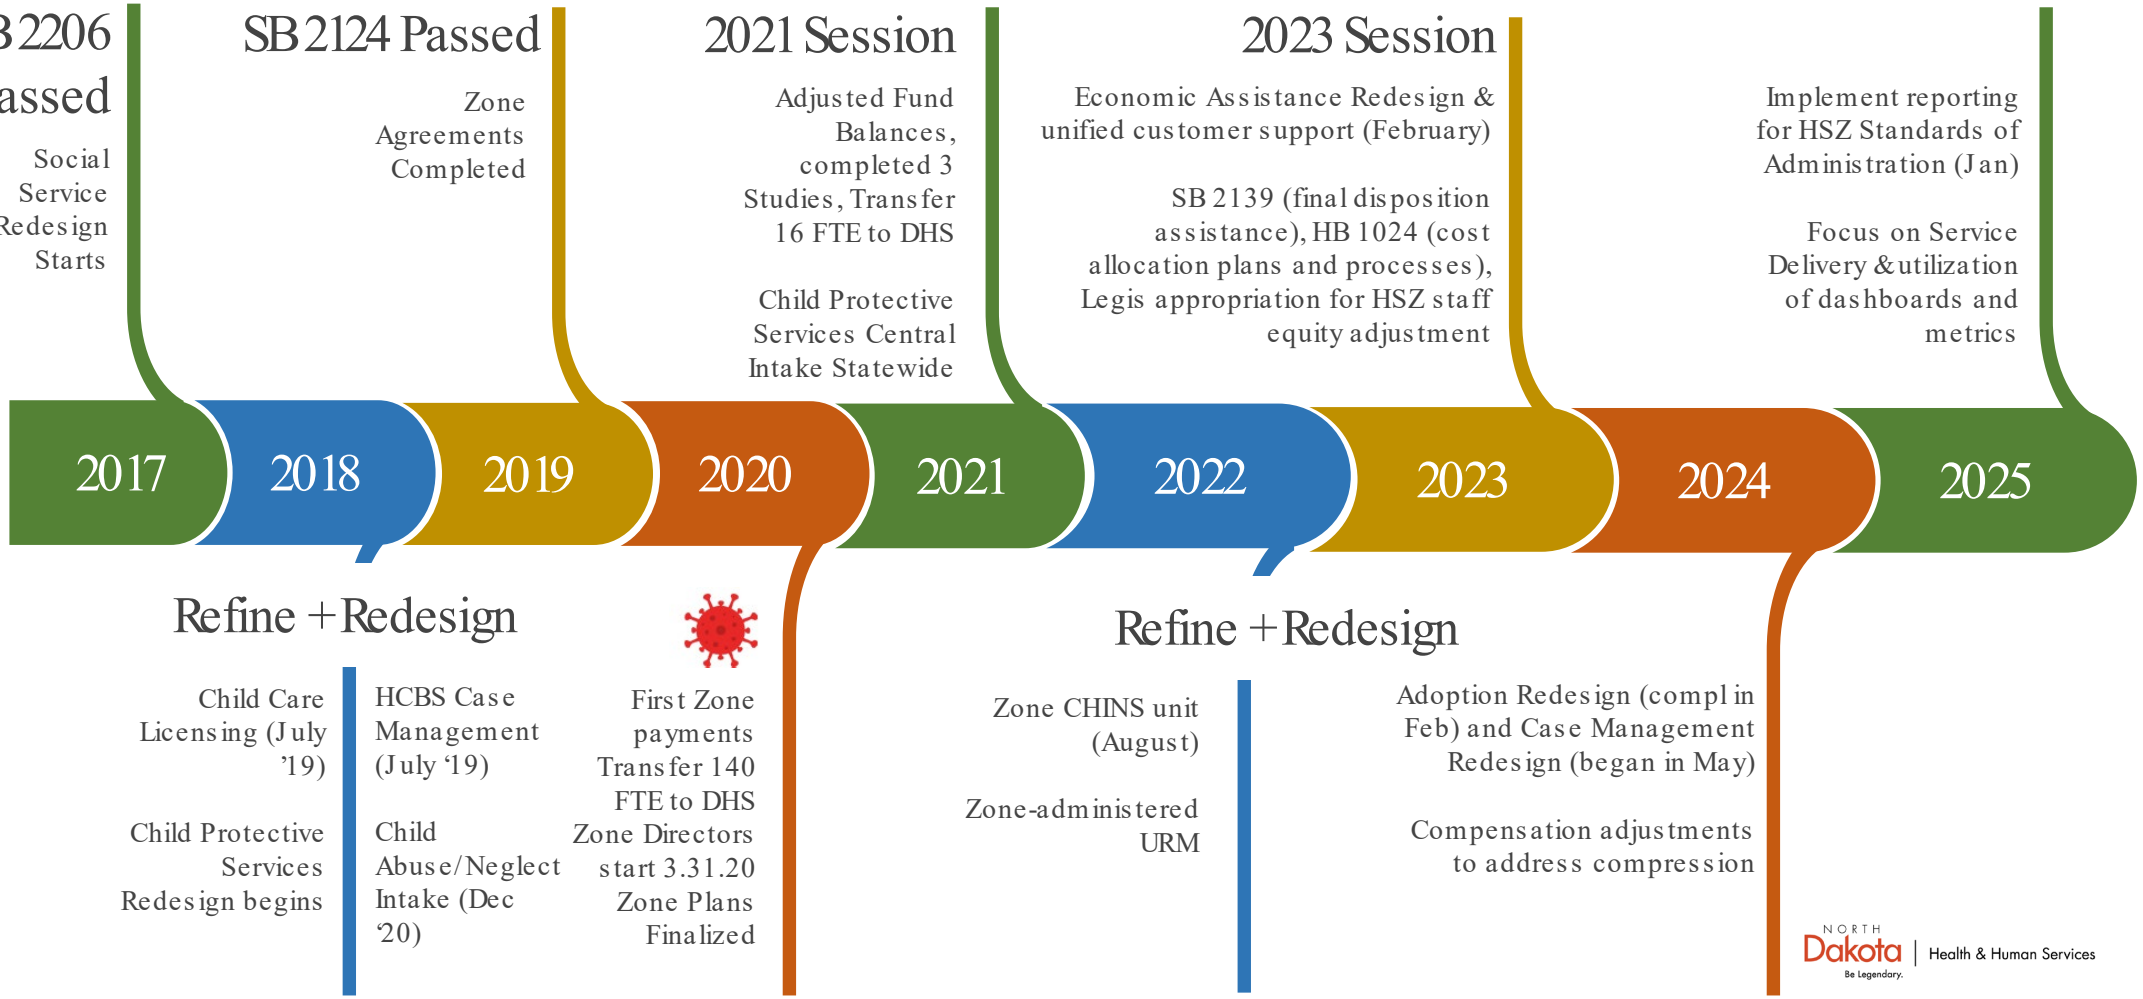
Who we are and what we do

Zone Ops Team

- Kristen Hasbargen
- Jason Coffey, Fiscal
- Alicia Baumann, HR
- Joelle Hammer, Fiscal
- Jessica Thomasson

Our role

- Serve as liaison between Zones, Zone Boards, and HHS, including collaborative budget work
- Provide directives, leadership, mentoring and technical assistance to Zones, Zone directors, and HSZ boards
- Mediate between Zones to support function and capacity across system
- Collaborate on visioning, evaluating and solution identifying of services delivered by Zones.



Partners

- Human Service Zone Directors
- HHS Program and Policy (Children and Family Services, Economic Assistance, Legal and Medical Services)
- HSZ Board members and County Officials (Commissioners, Auditors, State's Attorneys)

NORTH Dakota | Health & Human Services
Be Legendary.

ND Human Service Zone Implementation Continues

NORTH Dakota Be Legendary. | Health & Human Services

Social Service Redesign set the stage for Counties and the State to work together to serve North Dakotans through the Human Service Zone structure

- Standardization
- Consistency
- Shared services + workload
- Increased access and resources for clients
- Decreased multi-function jobs and allowed for specialization/expertise – reduced # of hats
- Clear program performance measurements
- Increased state collaboration + oversight
- Property Tax Relief

NORTH Dakota | Health & Human Services
Be Legendary.

What does it mean to work together?

Human Service Zone Board Role

- Serve as an Advisory Board
- Representative of those served by the Zones
- Co-manage Zone Director Performance, Hiring and Termination

NORTH Dakota | Health & Human Services
Be Legendary.

What does it mean to work together?

Host County Role

- State's Attorney (employee issues, child welfare, contracts)
- Host County Employer
- Host County Auditor
- Payroll + Benefit administration
- Retirement Provider
- Physical Space
- HR Support (varies by Zone)
- EAP Provider (if offered)

NORTH Dakota | Health & Human Services
Be Legendary.

What does it mean to work together?

What it means to be a Zone Employee

HR Policies

- The Zone HR Policy Manual was created in July of 2020 with HHS and Zone representation
- All of the policies are based on Admin Code, Best Practice or State/Federal Laws
- The Zones must follow the established Zone HR Policy Manual, but each Zone has the ability to create addendums (changes) to certain areas of the policy manual
- Example: Dress Code, Weather Related Closures, Benefits
- The Host County determines office closures related to weather or other incidents
- Telecommute workers are required to work when the office is closed due to weather related or other closures

What does it mean to work together?

FTE Committee (HR)

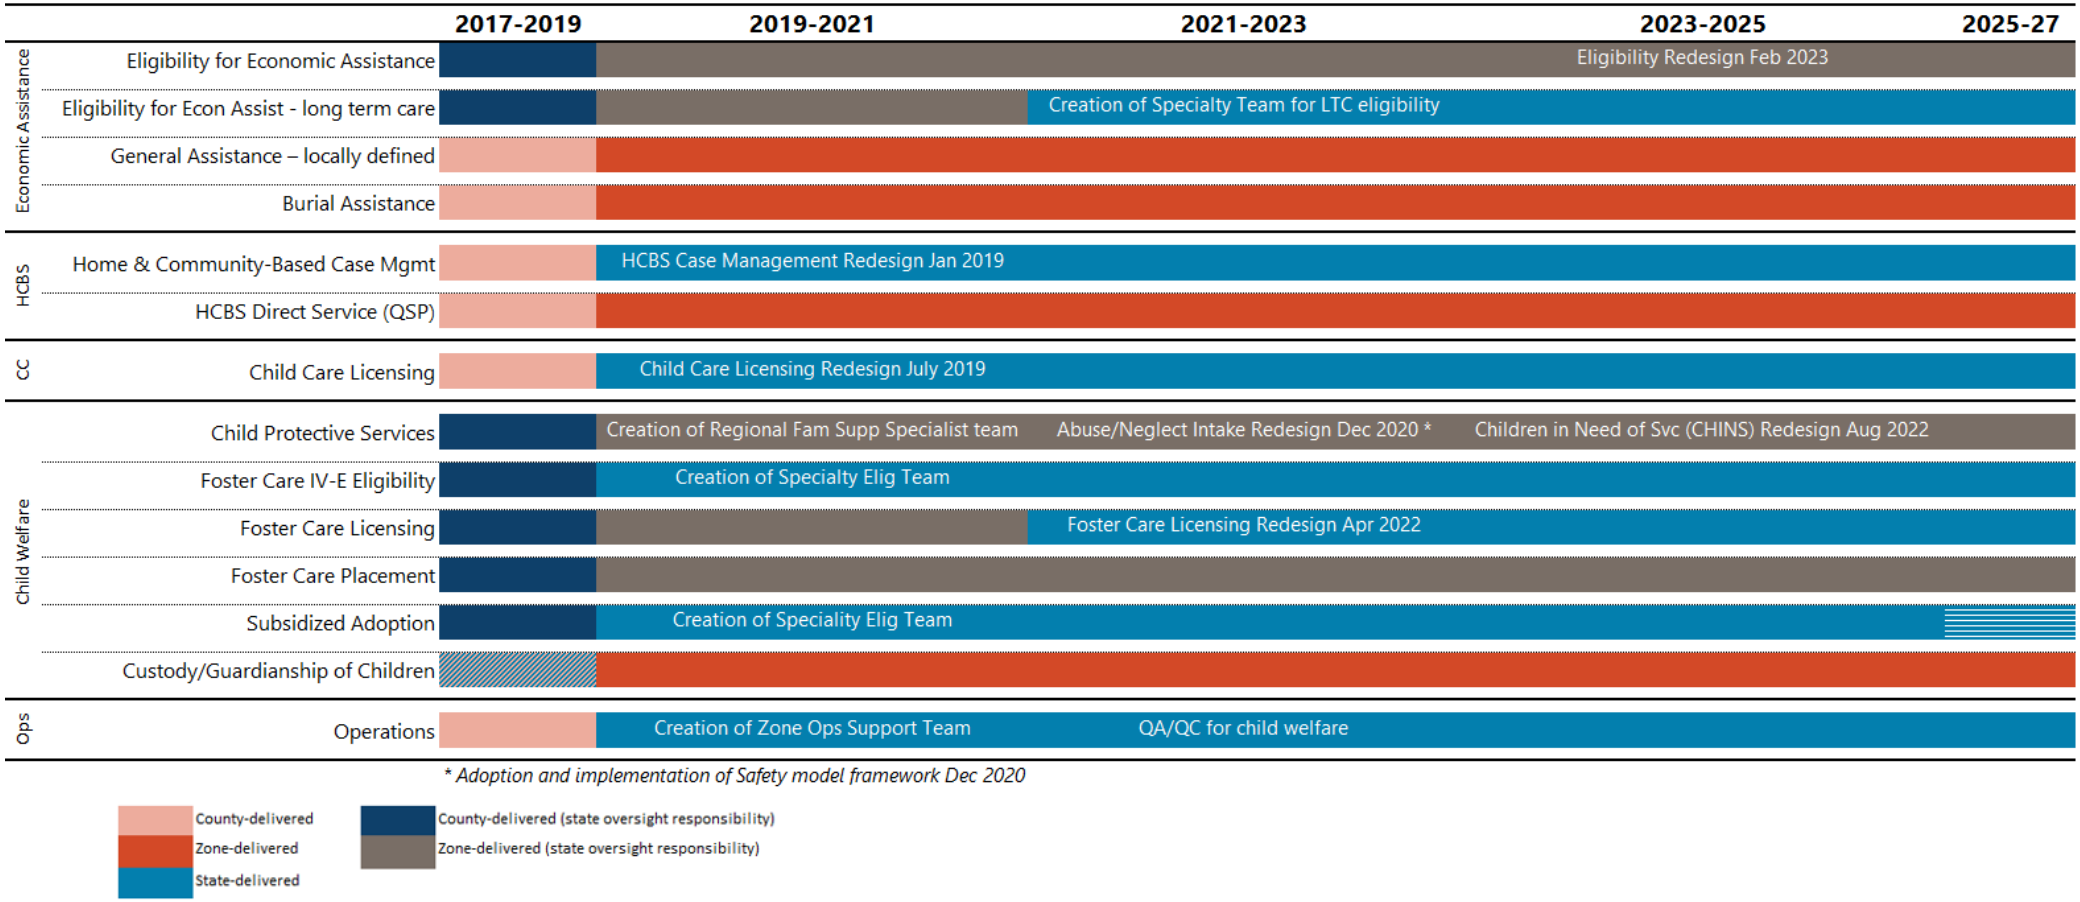
Hiring

- SB 2124 directed: "The department of health and human services shall develop a process to review a request from a human service zone for any proposed increase in staff."
- Zones assisted in development of both process and group composition. The committee consists of 4 Zone Directors and 4 members of the HHS Zone Team.
- Salary offers need approval from FTE committee only if above midpoint of salary range.
- Committee meets twice per week.
- This group reviews all FTE requests, salary increases, and temporary hires.

NORTH Dakota | Health & Human Services
Be Legendary.

What does it mean to work together?

HHS/State Role



- Establish policy and procedure for programs based on law and administrative rule
- Support programs teams in the zones with technical assistance, hands on training and reviews, including quality reviews
- Administer and adhere to the state merit system for human resource management
- Provide HR technical assistance and support as needed
- Provide official posting and ranking of Zone candidates for interview

New state responsibilities since SB2124

- Funder of all direct costs for delivery of human services
- Provide fiscal support for budgeting and purchasing
- Partner with the zone board on zone director performance management, hiring and terminations

NORTH Dakota | Health & Human Services
Be Legendary.

North Dakota's model of human service delivery is characterized by shared roles and responsibilities

Successes in the last year

Increased access to data

- Position Control Log in SharePoint, HSZ page
- Data dashboards

Support and Stabilization of Cass CPS team

- HHS and other HSZ members assistance
- New staff onboarding model-now duplicated

Staffing Collaboration amongst Zones

- Cross-Zonal Supervision in both child welfare and EA
- Transfer of FTEs for difficult to fill positions (CSC Call Center, Eligibility workers)

March Madness

- Data driven conversations which led to identification of cases that were not being processed timely
- Transparency in assigned work which allowed for designating focus daily (i.e. types of cases or reviews)

Successful PHE Unwinding

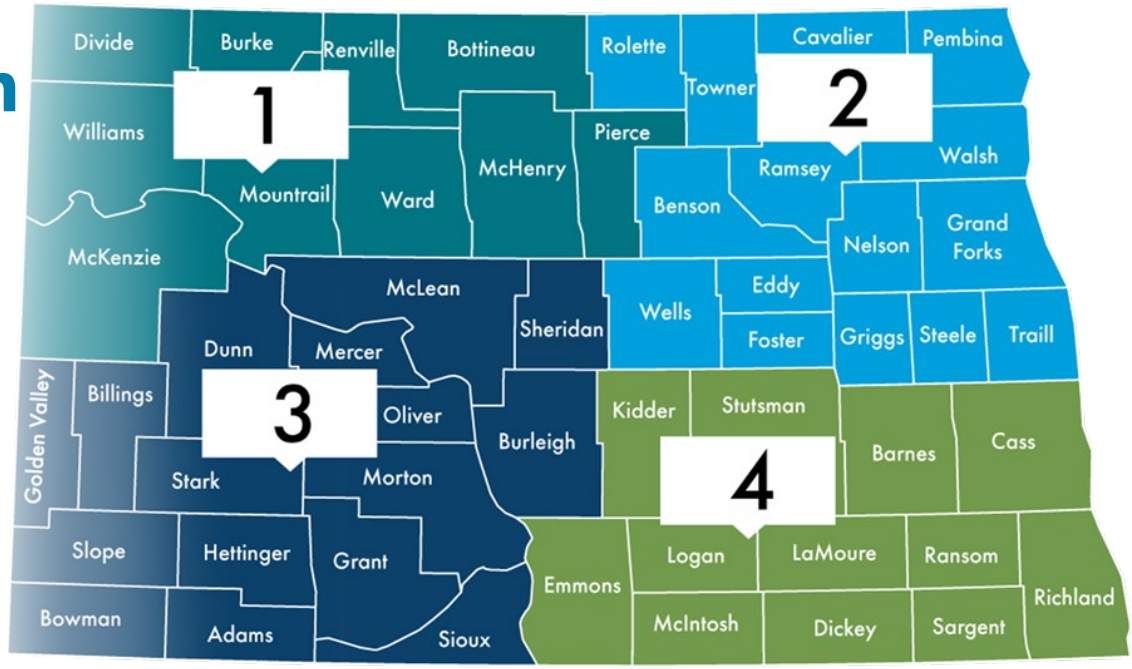
Successes this biennium

- Uniform on-call policy and pay for child welfare team members
- Meeting Federal Face-to-Face in person case worker visitation standard of 95%, Zones met this goal reaching 96%.
- Redaction of records, creating a state-wide unit for expertise and support
- Provision of QSP services from neighboring Zones
- Tools allowed for recruitment and retention were not allowed at the county level but are for Zones

Roughrider Human Service Zone

Preparing for Re-entry

Human Service Zone/DOCR Collaboration



- Buffalo Bridges HSZ monthly visit to James River Correctional Center for application assistance
- Burleigh HSZ recently began 2 Eligibility Workers going to State Penitentiary to assist with apps prior to re-entry
- Zones discussing outreach Dakota Women's Correctional Center in New England and Heart River in Mandan

Eligibility Processing

Human Service Zone/Economic Assistance Collaboration

- High work volume in one group – How to adjust
- Staffing decisions regionally – What Zone/employer? Where do they work?
- CSC – Staffing to trends and metrics.
- Development of new Eligibility Worker training. Lesson Plan from HHS; Zones looking at Benchmarks and Competencies.

Child Welfare

Human Service Zone/Children Family Services Collaboration

- Cross Zonal Supervision of front line child welfare staff
- Support during a vacancy and mentoring of new team members
- Assist each other in visiting youth in the community where they have placement, both foster and residential facilities. Transportation coordination.
- Shared On Call

NORTH Dakota | Health & Human Services
Be Legendary.

Surge Support

Statewide Collab / HHS and HSZs

Information provided courtesy of Cass County Human Service Zone

Cass County CPS Support and Stabilization Plan

The Support & Stabilization Plan operated through May 2024, decreasing the backlog by over 86%

At least 15 workers from 10 Zones assisted with case assignment, working over 145 cases

3 Zones provided onboarding support for 10 new CPS Assessment Workers

At least 7 State partners assisted in completing Tool 3's to aide in case closure (process management support.) 169 were sent to process management during this timeframe

6 FSS State team members provided case supervision while Cass CPS Supervisors participated in case

North Star Human Service Zone

Top pain points

Collaborative decision making across the Human Service Zone network

- 18 Zone Directors acting as one in decision-making
- Definition of processes
- Consistent Communication

Staff preparedness

- Recruitment, retention and strengthening of team members

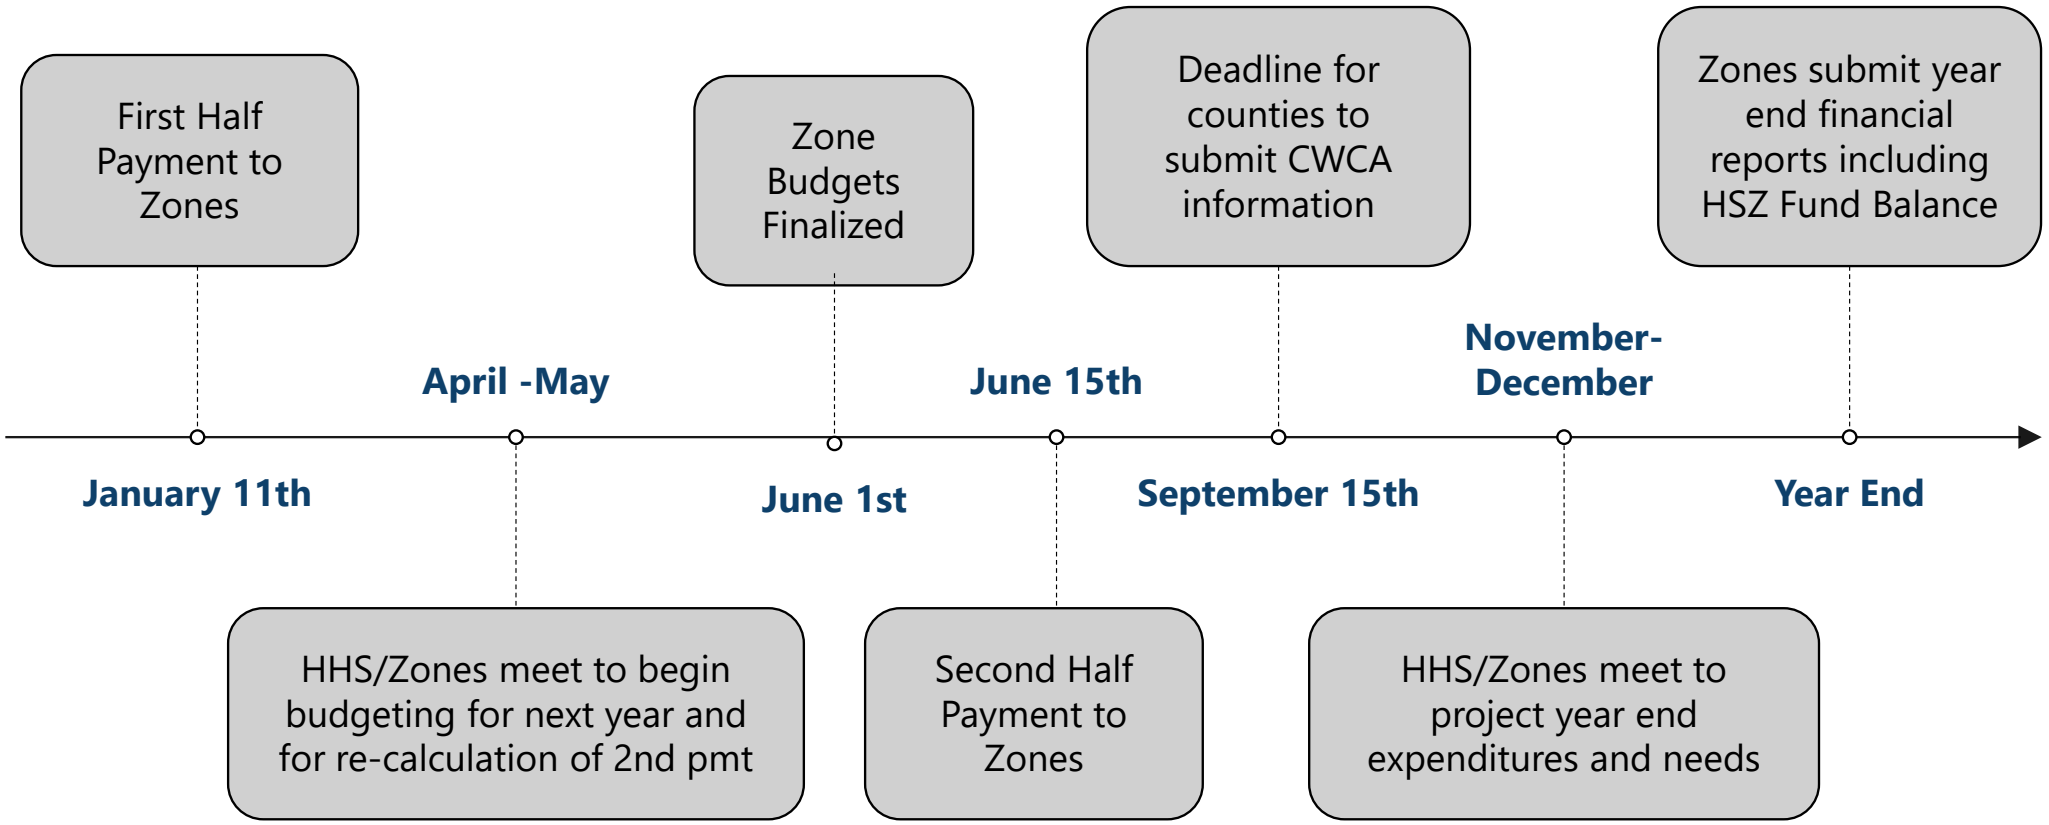
NORTH Dakota | Health & Human Services
Be Legendary.

Cass Human Service Zone

More on Staff Turnover

In 2022, Zones gathered data regarding Staff turnover/retention:

- Child Welfare positions - 37.5% turnover
- Economic Assistance - 23.6% turnover



<u>An indicator of progress…</u>

Cass Human Service Zone has created a dashboard to track retention in their Zone and has documented significant progress over the last couple years.

	2022	2024
Child Welfare	65%	15%
Economic Assistance	39%	7%

Zone Budgeting Process

Developed Standards of Administration for Human Services delivered by Human Service Zones

Human Service Zone Standards of Administration include measures that describe basic standards as they apply to HSZ delivery of Human Services, including Child Welfare services, Economic Assistance services, and HSZ Operations.

- Measures 1 - 5 relate to Child Welfare
- Measures 6 and 7 relate to Determining Eligibility
- Measure 8 and 9 relate to Operating
- Measure 10 is in development and will relate to Error Proofing in Determining Eligibility

NORTH Dakota | Health & Human Services

Quarterly Summary of Compliance with Standards of Administration

SFY 2024 Q1 (July – August - September 2024)

	Measure	Quarterly Perf Stat	E - Exceeds Standards	M - Meets Standards	F - Failure to Meet Stds	S – Severe Failure to Meet Stds	C – Chronic Failure to Meet Stds	Q1 SFY 24 (current)	Q4 SFY 23	Q3 SFY 23	Q2 SFY23
			CATEGORIES Compliance Status – Current Quarter					Has this measure been deemed Severe or Chronic in the last 2 years? (Status S or C)			
1	CW: Tardy Transaction Errors	95.9%		100	99	<99		C	S	S	S
2	CW: Visits for children in Foster care	95.9%	>95	95	85	<85					S
3	CW: Visits for children in in-home/kin care	75.0%	>95	90	85	<85		C	S	S	S
4	CW: Timely CPS assessments	87.7%	88	85	80	<80			S	S	S
5	CW: Timely CPS face-to-face visits	79.3%	95	90	80	<80		S		S	S
6	EA: Work item processing volume	64.2%	100	90	80	<80			S		
7	EA: Processing timeliness	88.6%	95	90	80	<80				S	S
8	OP: Budget Reports by Due Date		<3	3	30	>30					
9	OP: Timely Personnel Reports		5	15	25	>25					
	As-of-current-quarter summary of compliance status		**2**	**2**	**1**	**2**	**2**	**3**	**4**	**5**	**6**

To determine Zone status as per Standards of Administration, compare column total to the Action thresholds (yellow shaded rows)

	As-of-current-quarter summary of compliance status		2	2	1	2	2	3	4	5	6
Action Thresholds	Targeted Training	Yes			3+ Cat F, S,or C						
	Corrective Action Plan	No				5+ Cat S, C					
	Performance Improvement Plan	No						>=5 "severe" (S) for 3+ quarters in a row			
	Structural Re-alignment	No						>=5 "severe" (S) for 4+ quarters in a row			

10	EA: Error proofing (STATEWIDE) **Measure still in development**

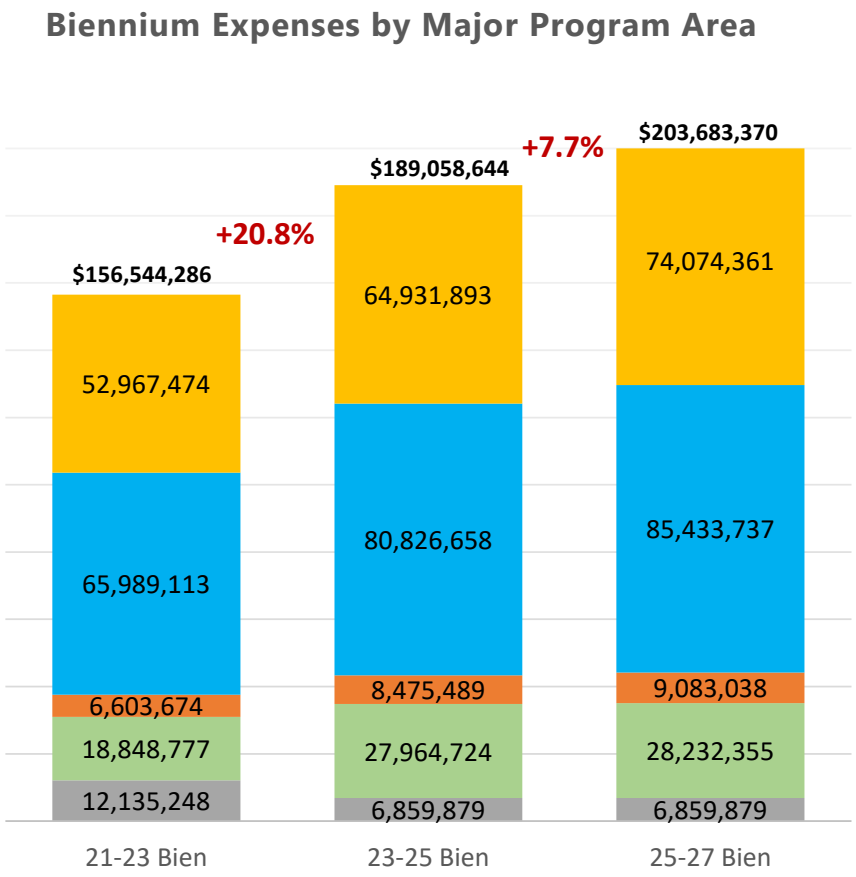
Property Tax Relief Fund established to fund Human Service delivery via Social Service Redesign

(SB 2206 – 65th Legislative Assembly)



- OMB transfers funds into HHS' Human Services Fund (aka "457 Fund") based on budget request
  - Services are delivered by both Human Service Zone and HHS staff
  - Funding for Human Service Zone delivered services are captured in a single budget line (grants)
  - Funding for HHS-delivered services are itemized in more detailed budget lines as per HHS practice
- The Property Tax Relief Fund was capped at $250 M in the 2023-25 session

Administrative Structure for Child Welfare

- All States are responsible for compliance with Federal and State requirements; however, they may differ in the way child welfare services are operated and delivered.
- Client Serving Child Welfare Functions in ND are delivered by Human Service Zones
  - Hotline to report suspected abuse or neglect
  - Screening and determining need for response
  - Conducting assessments
  - Safety/risk and family functioning assessments
  - Assigning cases to response track

ND Child Welfare System Mission: Safe Children and Strong Families

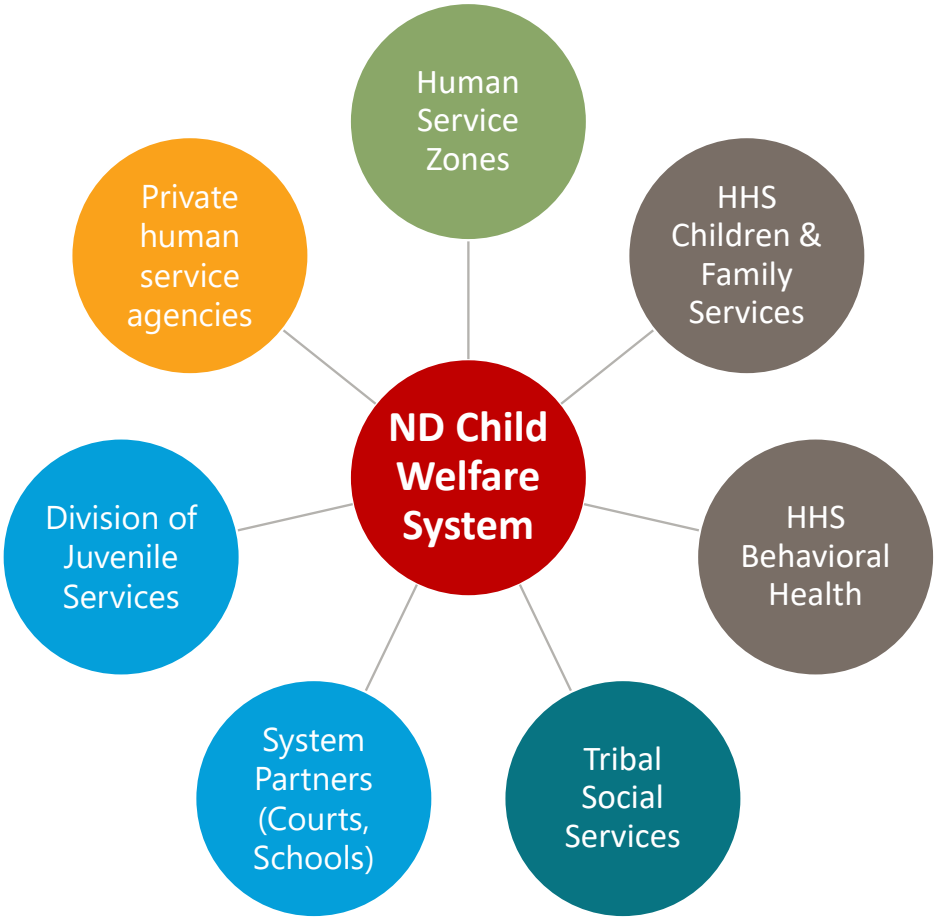
Safety

Protection

- Child protection services
- Safe Planning with Families
- Shelter Care
- Foster Care
- Child fatality review panel

Prevention

- Parent Resource Centers
  - Home Visiting Services
  - Behavioral Health & Substance Abuse Services
  - In-home Service
  - IV-E Prevention Services
  - Kinship ND



Permanency

- Family Reunification
- Adoption
- Guardianships
- Interstate compacts for the placement of children
- Independent living services
- Licensing for Foster homes, QRTPs and LCPAs

Well-being

- Family preservation services
- In-home case management
- Children in Need of Services
- Respite care
- Nurturing Parent programs
- Parent aides
- ICWA Family Preservationist (IFP)
- Family centered engagement

The Child Welfare System in North Dakota includes both public and private sector partners

- **627** children receiving **prevention** service through FFPSA
- Serving over **950** approved **kinship caregivers** who are caring for **1,700 children**
- **750** licensed **foster providers** caring for **1,170 children**
- **36** licensed Qualified Residential Treatment Program (**QRTP**) beds available; 75% average utilization rate
- **0 children in out of state placements**

North Dakota Child Welfare System

Dept of Health & Human Services

Human Service Centers
- Crisis teams
- Intensive In-home services (therapy & treatment, skills training, behavior mod)
- Targeted case management
- FFT/MSFT

Children & Family Services
- Training/coaching of field staff
- Oversee quality service and system delivery
- Administration of policy
- License foster homes
- IV-E and Adoption Eligibility

Private Providers

- Foster homes, including therapeutic foster care
- Safe shelter for crisis
- Human trafficking supports
- Targeted case management
- Adoption services for children in foster care and the families adopting them
- Title IV-E Prevention Services

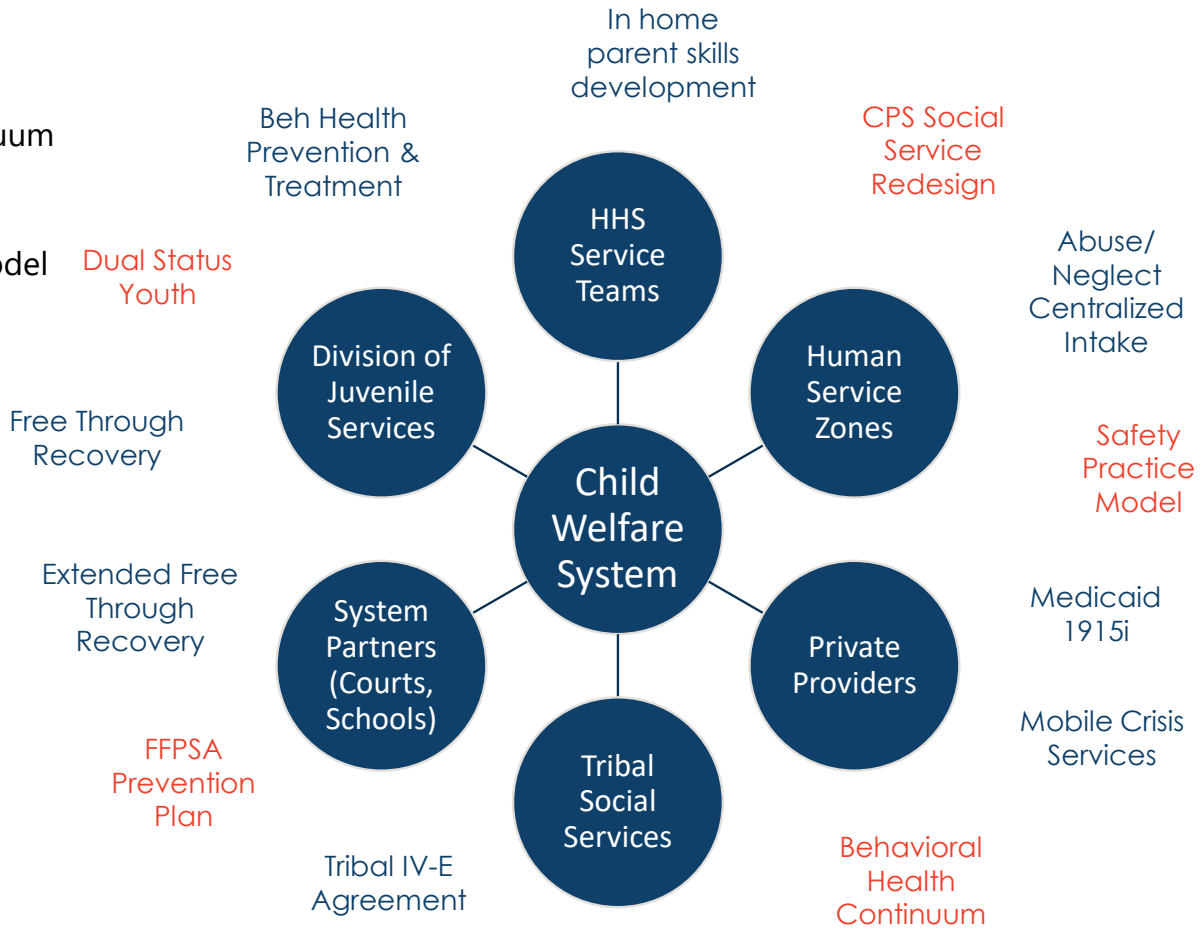
Tribal Social Services

- FRAME entry and foster eligibility determinations
- Joint practice model and ICWA training
- Native American Training Institute supports (training, billing, IEP (ICWA Family Preservation)
- FMAP service contracting
- IV-E agreements boost access to funding

Human Service Zones

- Assess present and impending danger
- Safety planning
- Case management
- Assess and build parent capacities
- Provide safe supports for children and families
- In home supports
- Parent aides
- Recruitment and Retention
- Intake for child abuse and neglect reports
- CHINS (Children in Need of Services)

Division of Juvenile Services (DJS)



CFS works closely with DJS specific to children in need of out of home treatment, which results in a foster care placement.

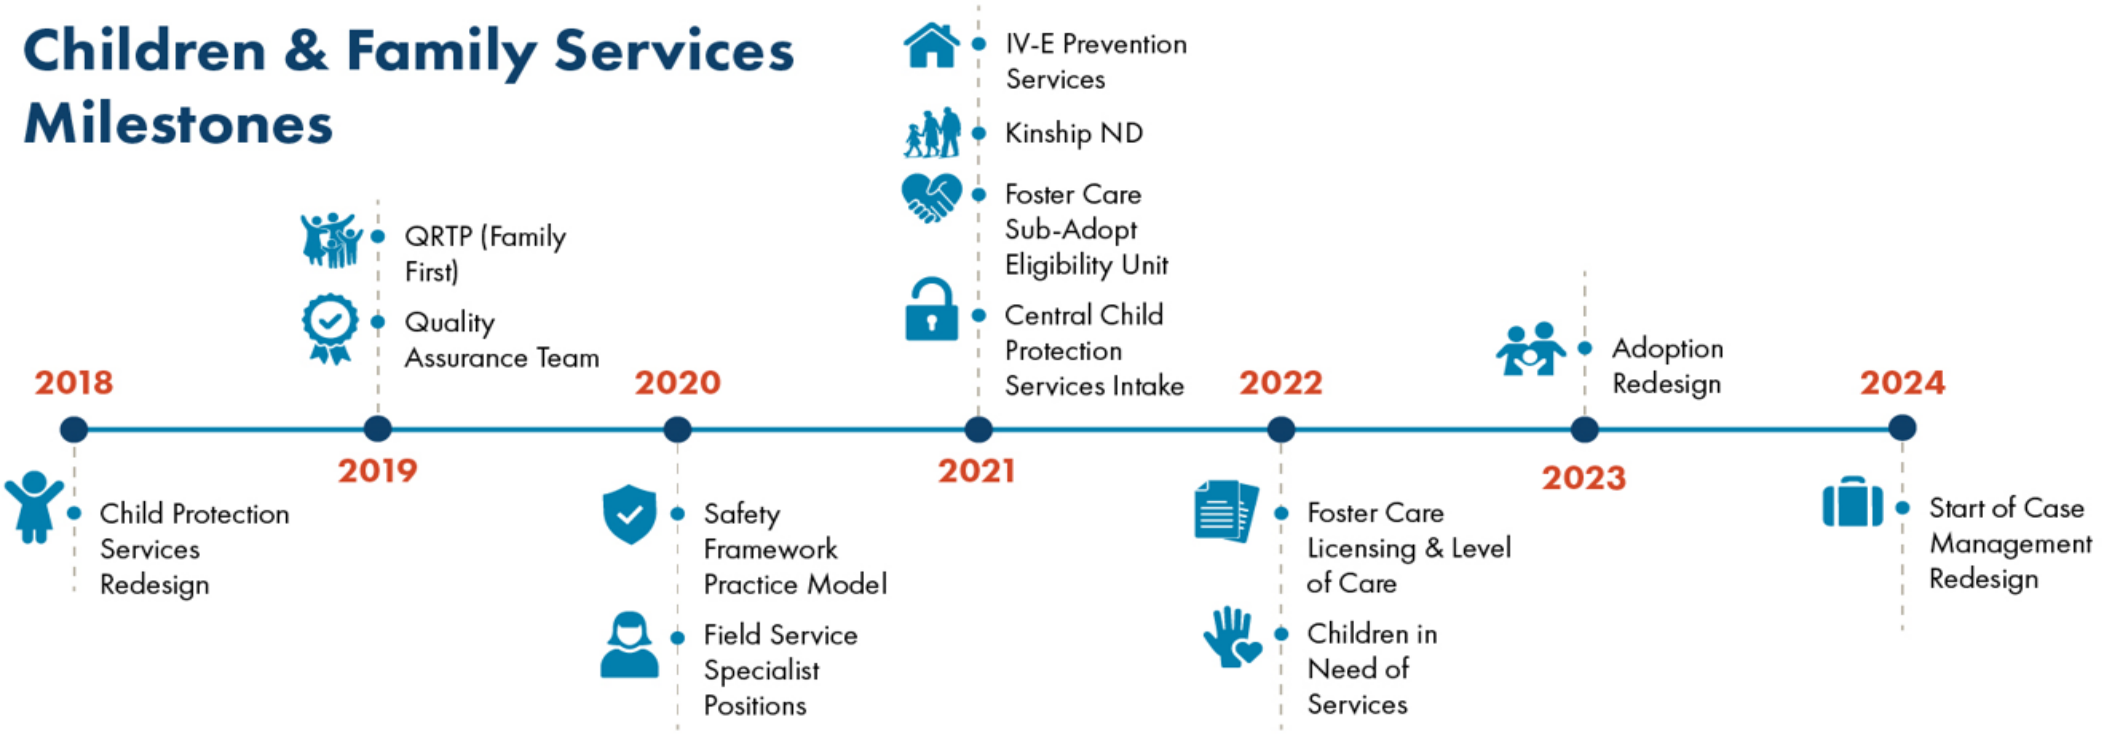
What's the Big Idea?

- ✓ Keep families **together** whenever possible
- ✓ Prioritize safety and family **reunification whenever possible**
- ✓ **Prevent** kids **from** ever **entering** the child welfare system

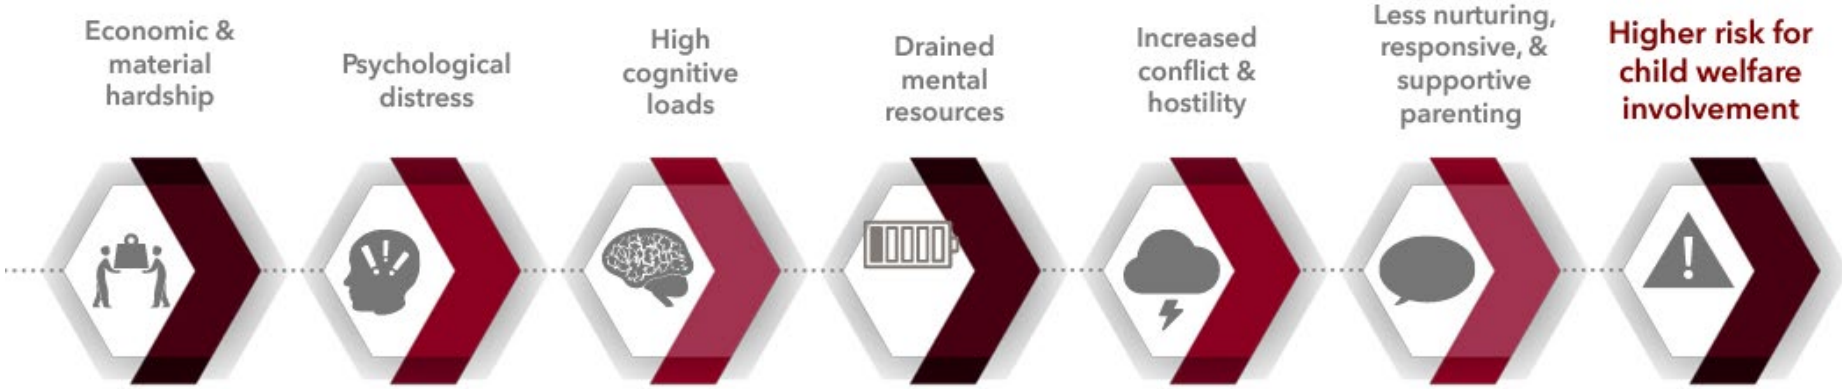


In Child Welfare:

What does "progress" look like?

- Reduce Foster Care Safely
- Reduce Institutional Placements
- Reduce Out of State Placements
- Reduce Substance Abuse as Abuse/Neglect factor
- Increase Kids receiving evidence-based supports
- Increase Kinship services

North Dakota continues to make progress toward a more family-oriented system of care



NORTH Dakota Be Legendary. | Health & Human Services

Another frontier to explore

How might economic and material hardship impact parenting and child wellbeing?

Family Stress Model

> It's not that people who are struggling to make end meet aren't well-qualified parents. It's that lack of financial resources creates stressors that make it more difficult to solve problems.

(Conger, 1994) (Neppl, 2016) (Duncan, 2014) (Mistry, 2002)

Data aggregated by: Anderson, C., Grewal-Kök, Y., Cusick, G., Weiner, D., & Thomas, K. (2023). Family and child well-being system: Economic and concrete supports as a core component. [Power Point slides]. Chapin Hall at the University of Chicago.

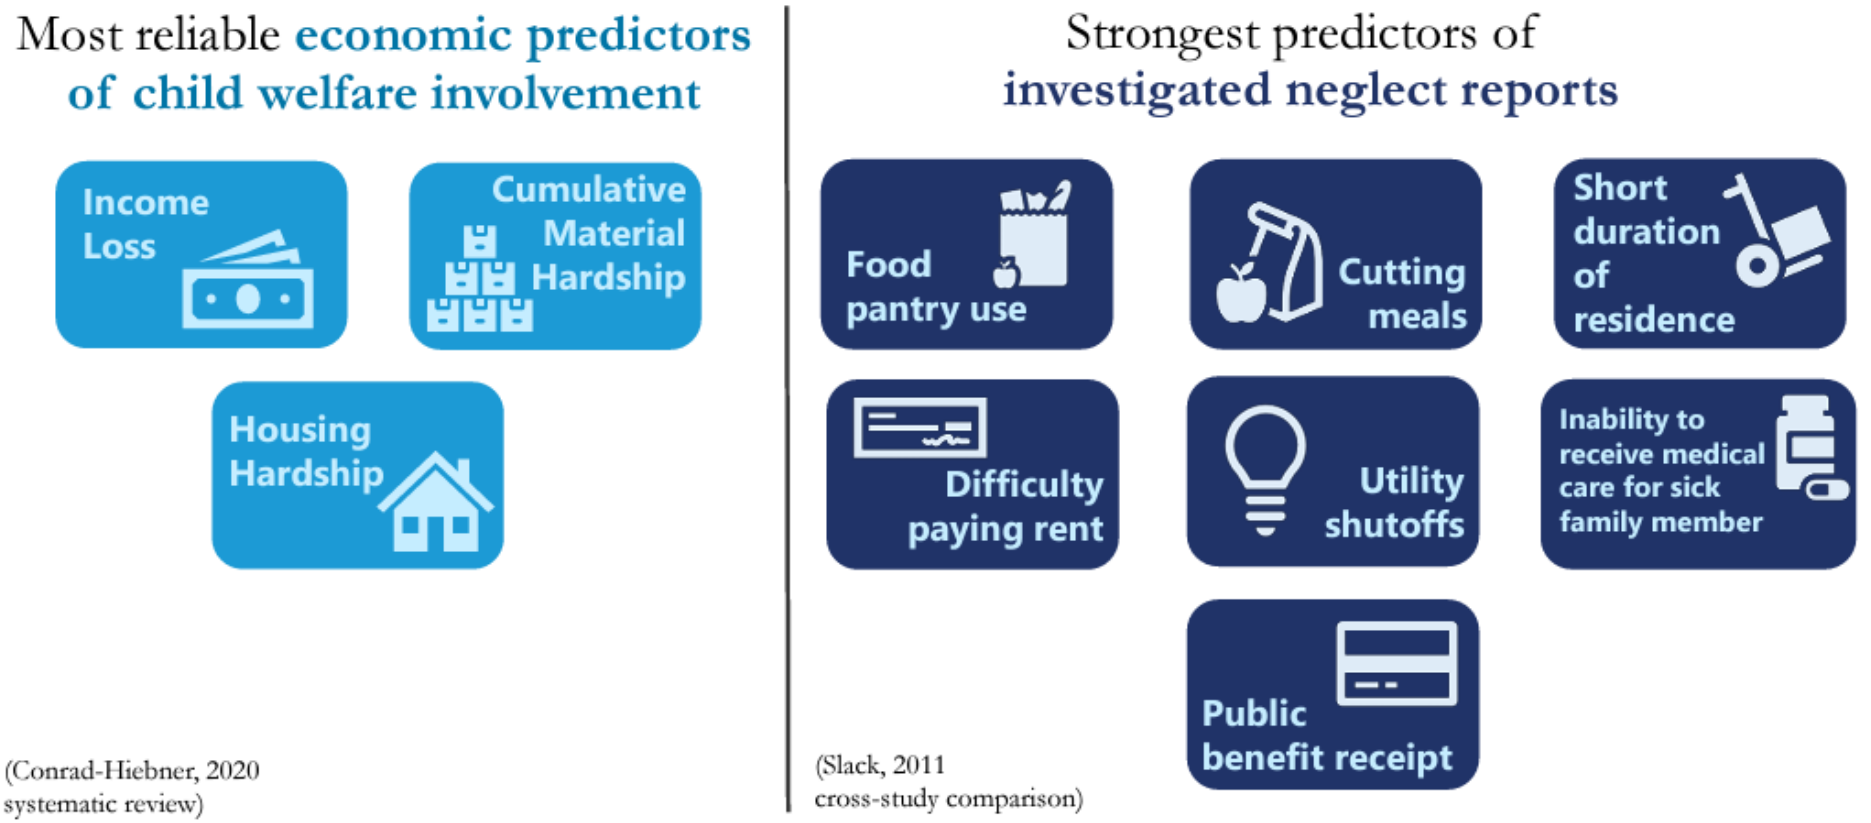
Connecting what we see and what we need to do

Community-Based Service

Expand outpatient and community-based services; Grow evidence-based service options

Prevention

Invest in prevention and early intervention, including attention to economic wellbeing of families

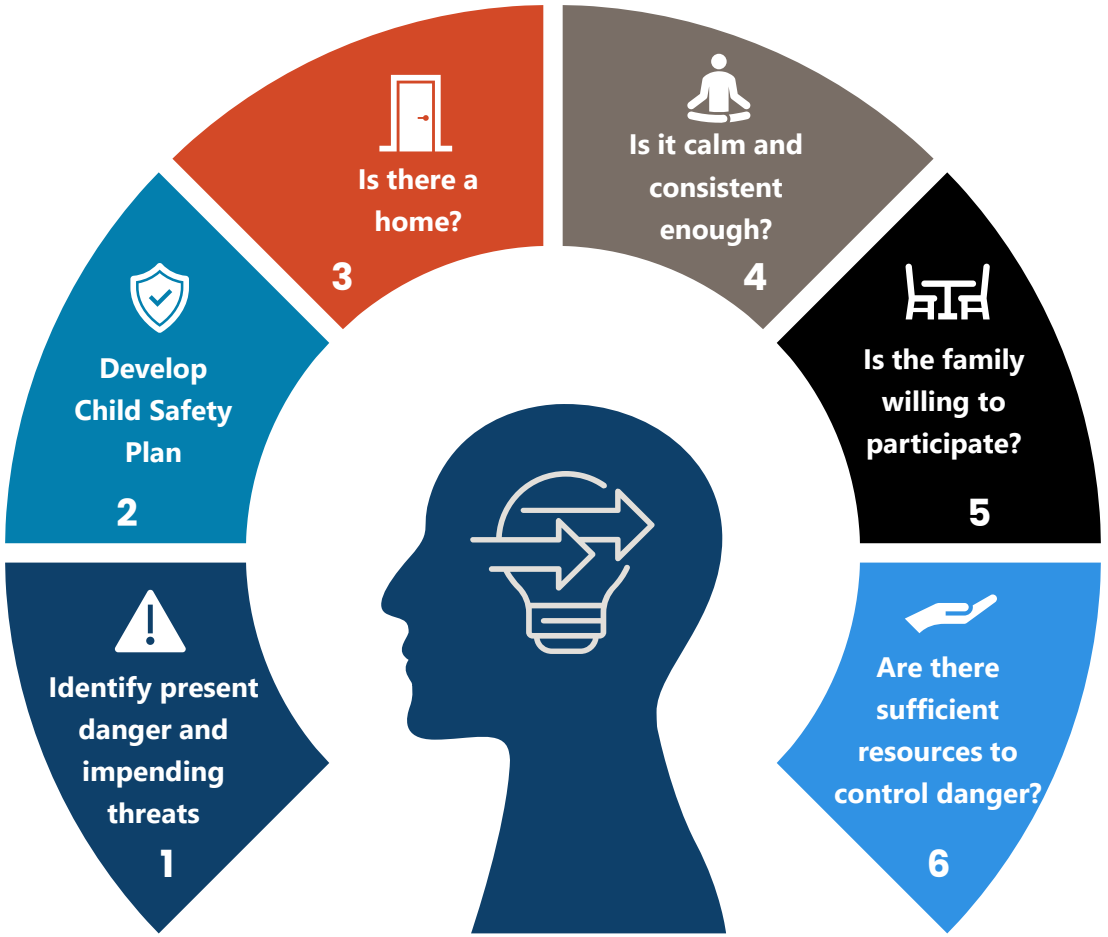


Access

Ensure all children and families have timely access to Behavioral Health svc; Expand quality child care; Connect housing and employment

Integration

Enhance and streamline system of care for children and youth; Align assessment and eligibility practices; Embrace quality frameworks and tools to measure impact



Opportunity for differentiated response to prevent crisis from spreading

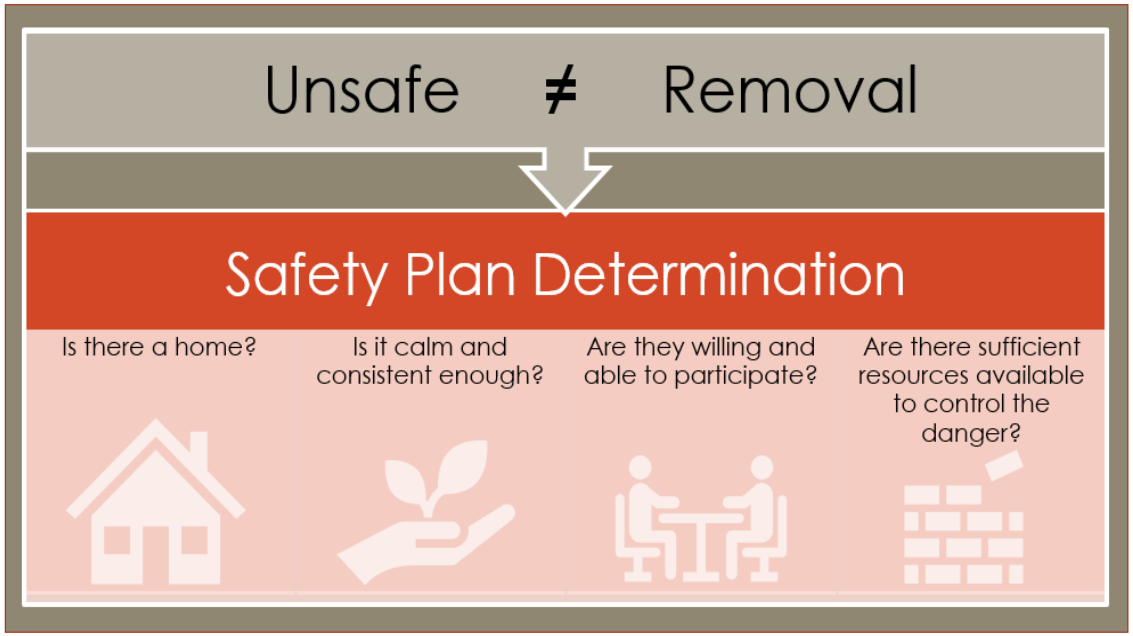
Data aggregated by: Anderson, C., Grewal-Kök, Y., Cusick, G., Weiner, D., & Thomas, K. (2023). Family and child well-being system: Economic and concrete supports as a core component. [Power Point slides]. Chapin Hall at the University of Chicago.

What is Safety?

When can a child remain safely at home and when is removal necessary

What is Safety?

When can a child remain safely at home and when is removal necessary



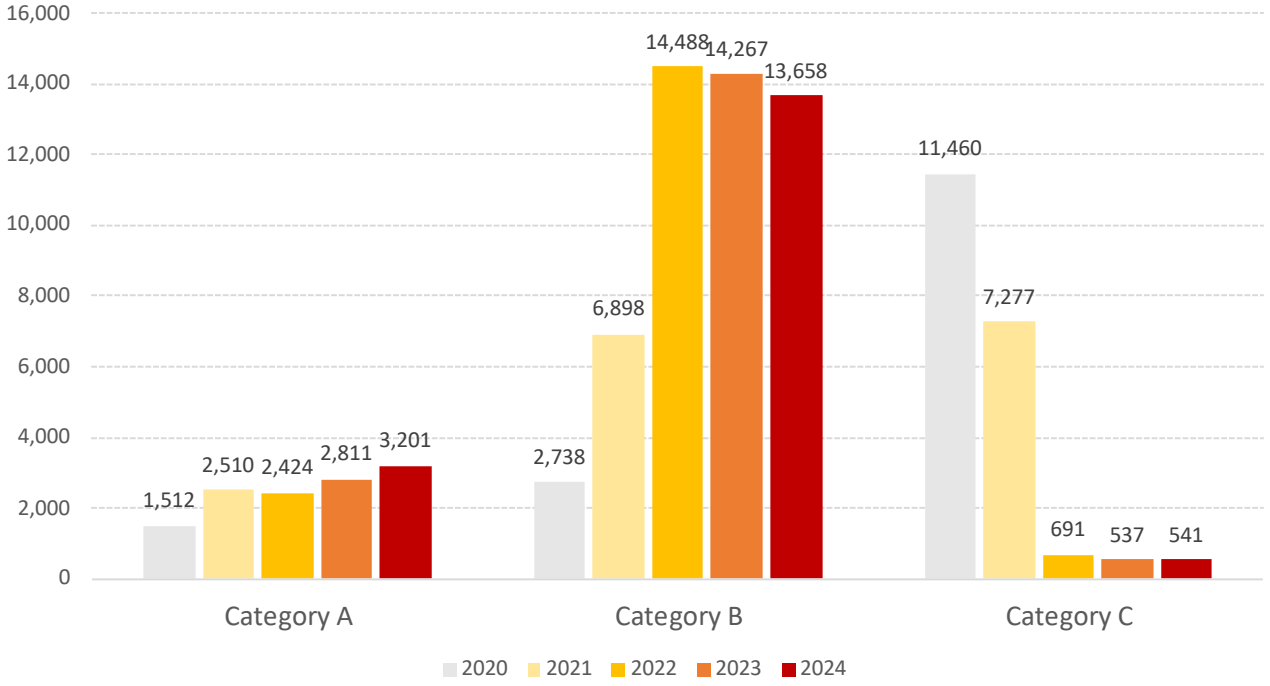
What does it look like when a child is:

SAFE

- ✓ No threats of danger exist within the family, or
- ✓ Parents/caregivers possess sufficient protective capacities to control any threat, or
- ✓ The child is not vulnerable to the existing danger.

UNSAFE

- ✓ Threats of danger exist within the family, and
- ✓ Children are vulnerable to such threats, and
- ✓ Parents/caregivers have insufficient protective capacities to manage or control the threats.

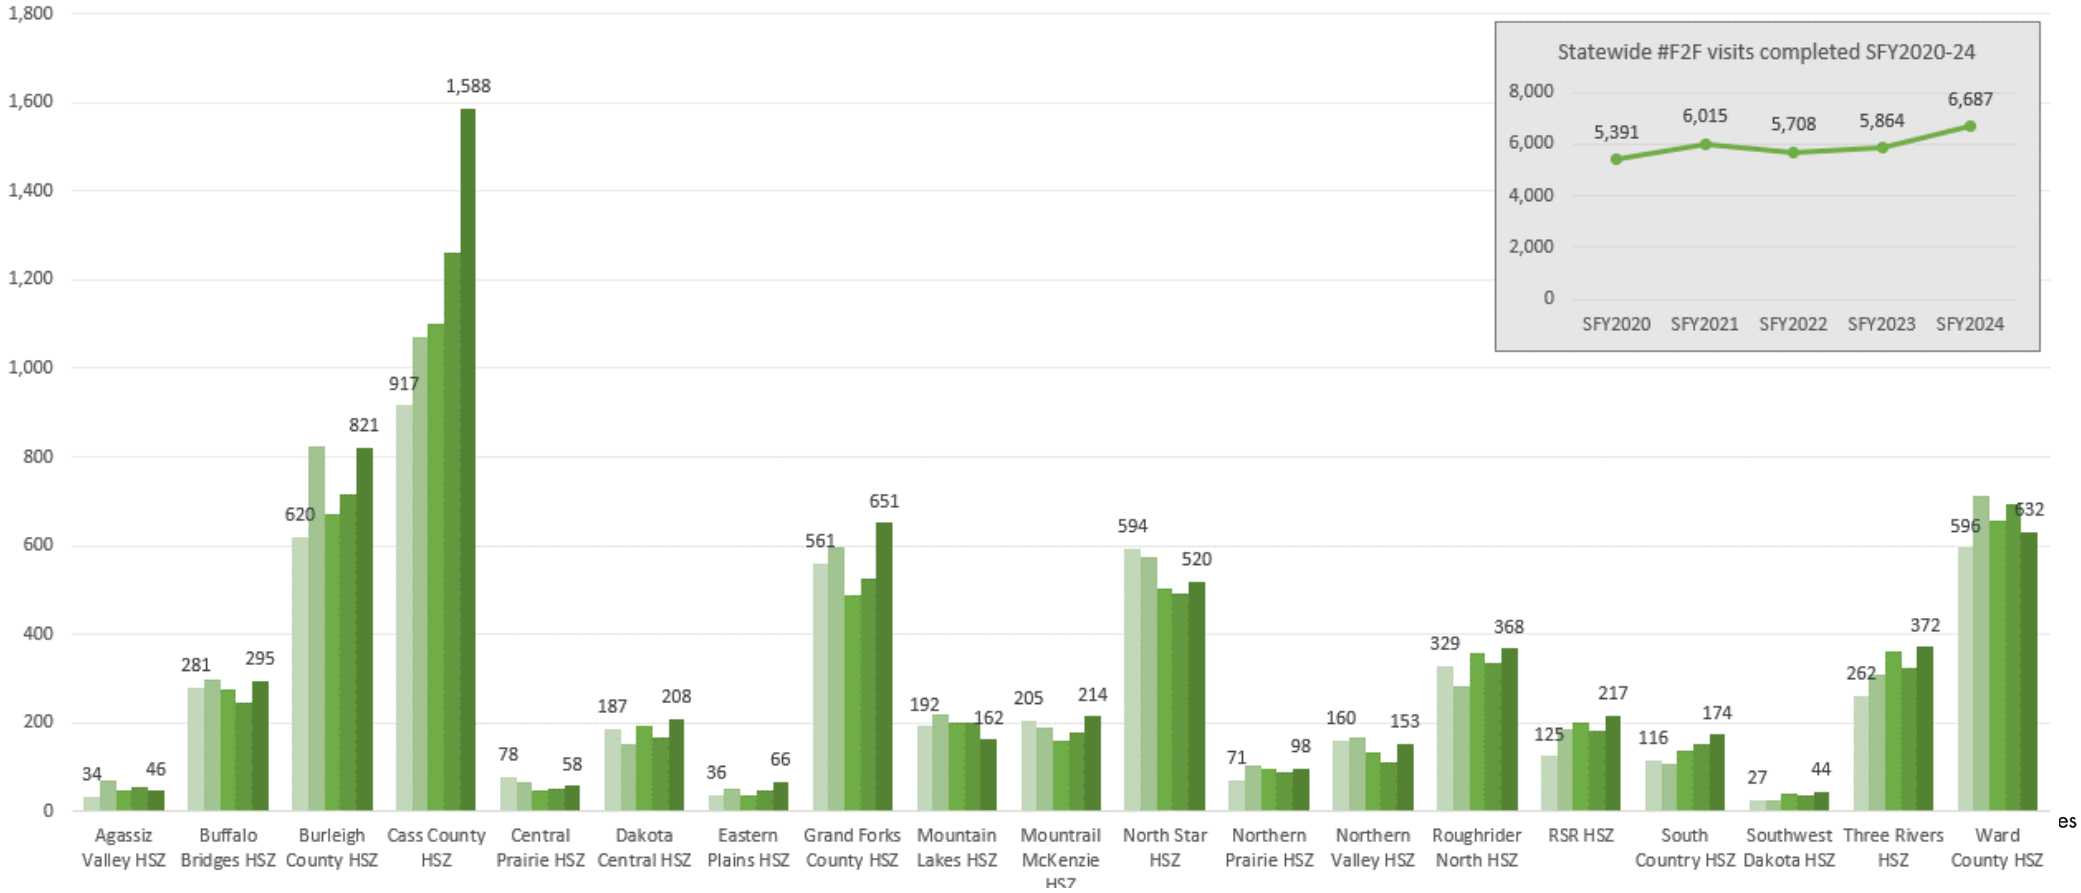


IF ALL QUESTIONS ARE "YES" - Child can remain in the home with necessary supports in place

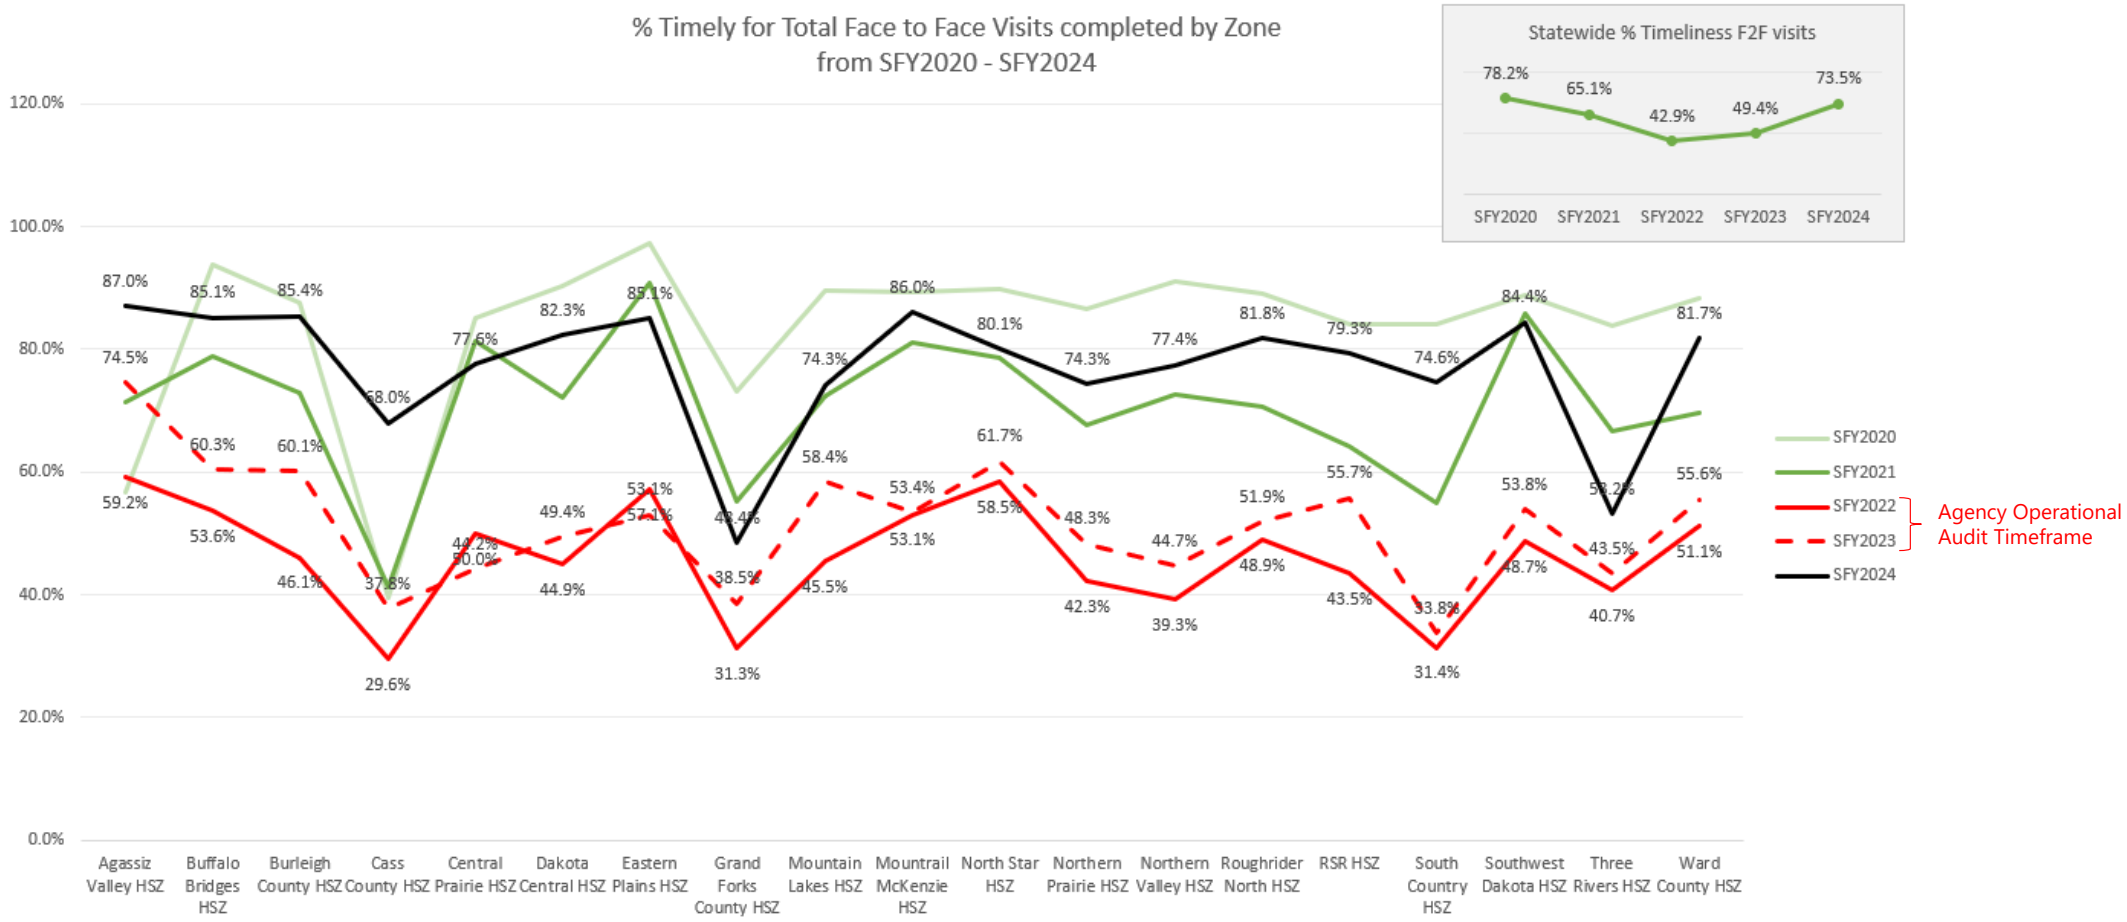
IF ANY QUESTION IS "NO" - Child safety not assured so removal is necessary

HHS Operational Audit

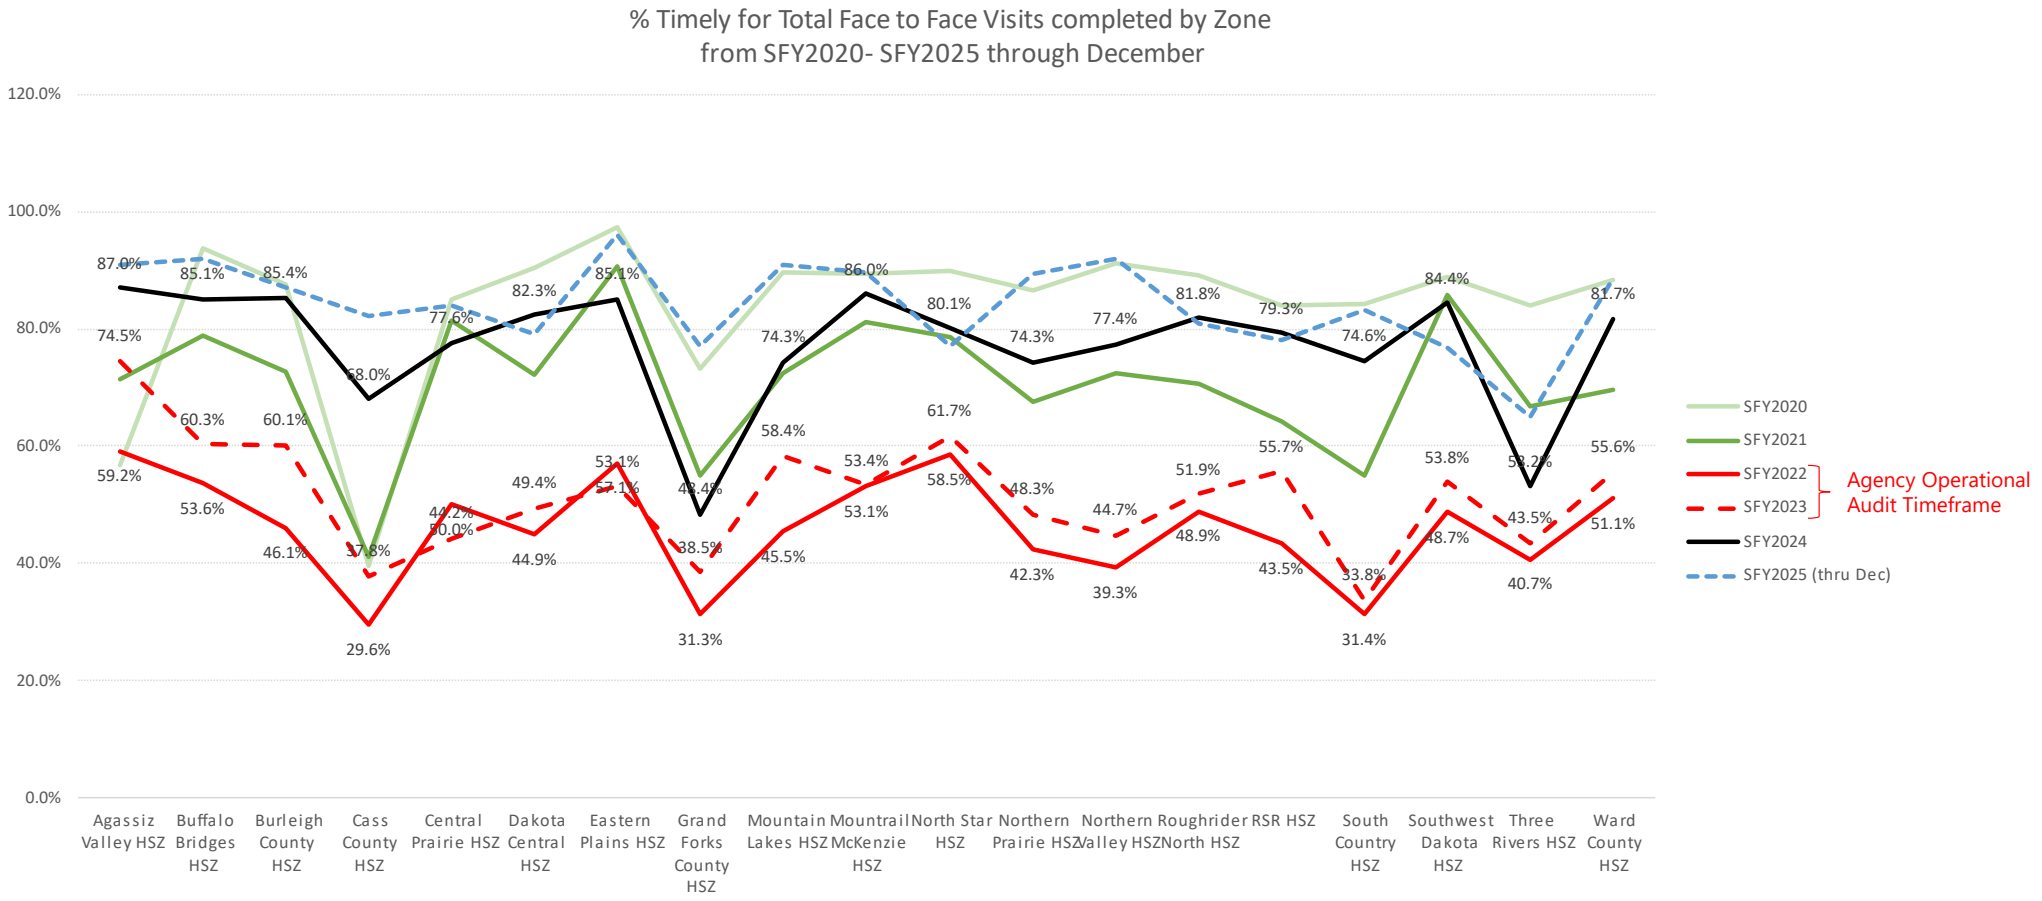
Finding 2023-03 | Children in suspected abuse situations not contacted timely



The Distribution of cases between Categories A, B and C has shifted with the adoption of a new child welfare practice model

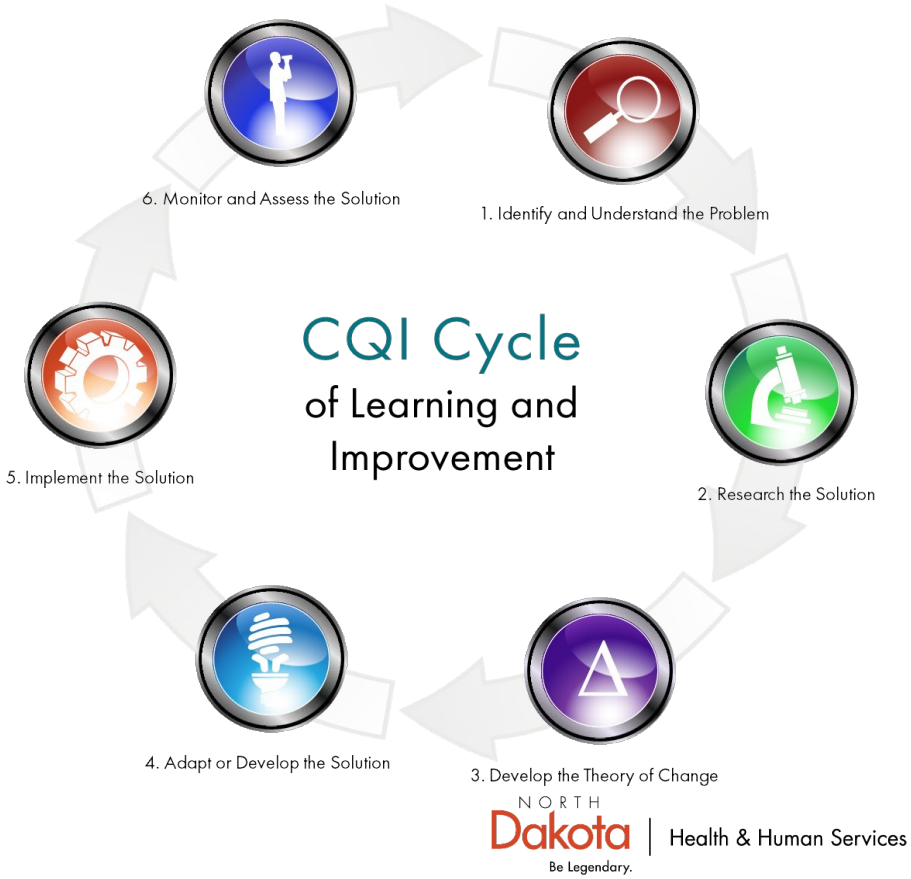


NORTH Dakota | Health & Human Services
Be Legendary.



Number of Face-to-Face visits completed by Zone from SFY 2020 – SFY 2024 increased by 24%

Statewide timeliness rates for face to face CPS visits are highly influenced by large population centers



The first few months of SFY2025 suggest that the positive trend toward stronger performance will continue

CFS Quality Assurance team conducts ongoing reviews for 7 outcome measures around safety, permanency and wellbeing of children

- Full review of 65 randomly selected cases every 6 months
- Reviewing for compliance with 7 federal outcome measures
- QA results shared with HSZs upon completion to help inform practice
- CQI Cross-Zonal teams take the results from the reviews and run through the CQI process

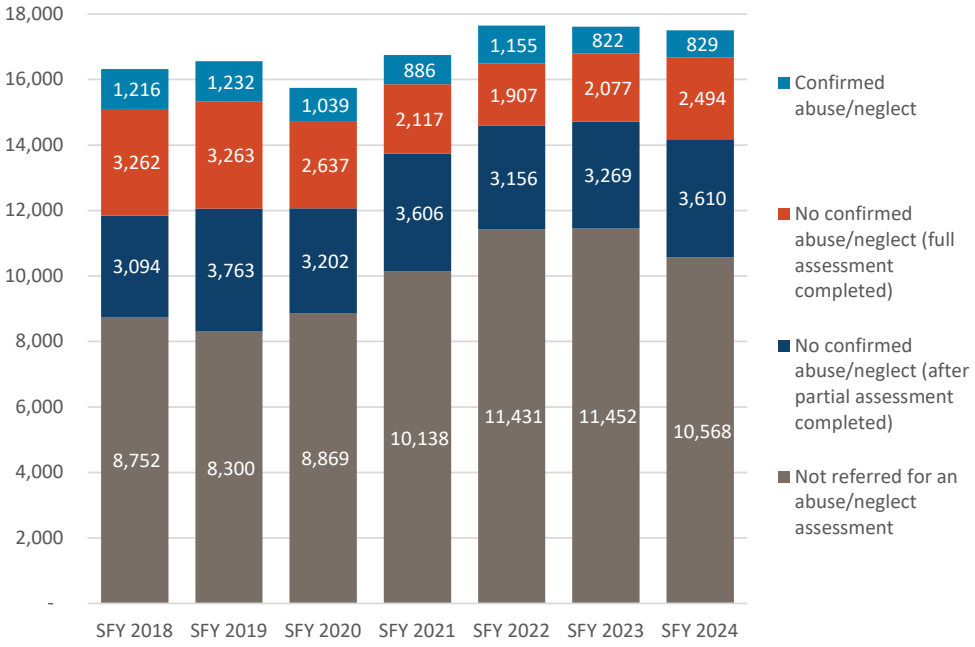
NORTH Dakota | Health & Human Services
Be Legendary.

Results of QA Reviews on Safety Outcome 1 (timeliness of face-to-face visits)

Safety outcome 1: Timeliness to initiate a CPS response

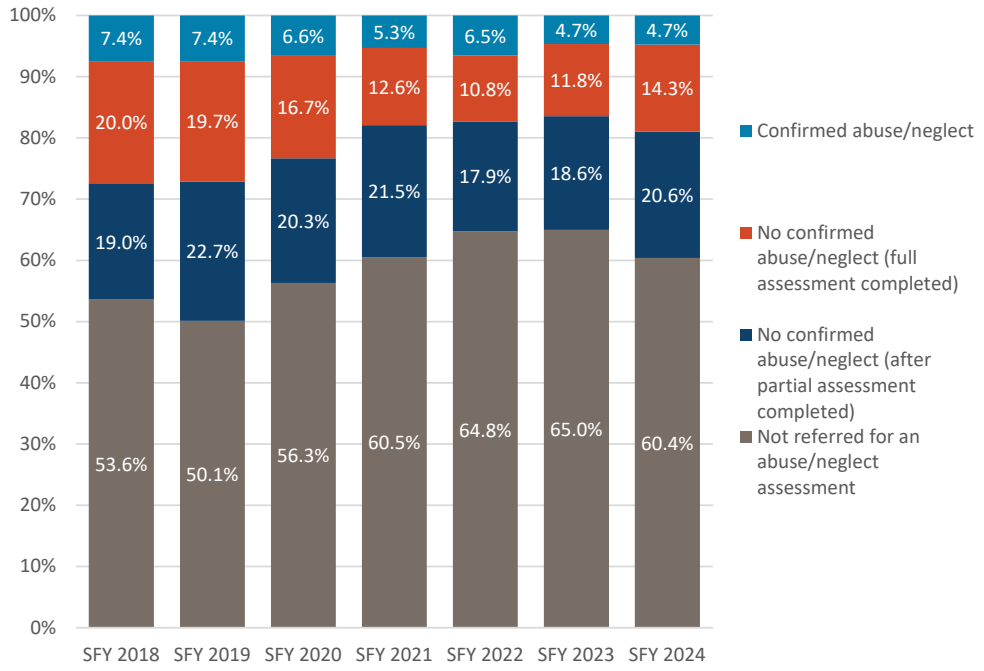
Review period	# cases in sample	# that required a face-to-face visit (Measure 1 applicable)	Compliance with standard achieved
Jan 2020 - Mar 2020 (ND QA)	65	26	77%
Jun 2020 – Mar 2021 (ND QA)	65	32	40%
Oct 2020 – Sept 2021 (ND QA)	65	32	44%
Jun 2021 – Mar 2022 (ND QA)	65	27	67%
Oct 2021 – Sept 2022 (ND QA)	65	22	68%
2024 (ND Adhoc)	73	73	92%
2024 (CFSR R4 – 50% compl)	38	9	89%

PIP Compliance Benchmark: **82%**



ND's Target Compliance Benchmark: **90%**

NORTH Dakota Be Legendary. | Health & Human Services



ND sees approximately 800-900 confirmed cases of child abuse or neglect each year

Confirmed cases represent an average of 5% of total reports received

Over the last two years, ND has seen approximately 825 confirmed cases of child abuse and/or neglect each year

Over the last two years, 4.7% of reports of suspected child abuse/neglect are ultimately confirmed

NORTH Dakota Be Legendary. | Health & Human Services

The body of evidence related to a concrete connection between material hardship and family distress has reached a tipping point

"Mothers entering substance use treatment who have difficulty securing child care are **82% more likely to self-report child neglect** *(compared to mothers entering treatment who don't have this difficulty)*"

"Difficulty finding child care was a stronger predictor of maternal neglect than almost any other factor measured in this study, including mental health and severity of drug use."

-Cash, 2003

"Nearly 85% of families investigated by child protective services have **incomes** below 200% of the federal poverty line ($49,720 for a family of 3 in 2023) "

-Dolan, 2011 – Nat'l Survey of Child & Adolescent Well-Being II Baseline

"Households that will experience a foreclosure filing in the next 6-12 months are at **70% greater risk of a CPS investigation** *(compared to households that will not)*"

-Berger, 2015 (WI data 2008-2011)

"Almost **70%** of families with incomes below 200% of the federal poverty line report experiencing a **material hardship** in the past year (difficulty paying for housing, utilities, food, or medical care. Of these families, **61%** experienced a **financial shock** in the past year."

-Urban Institute, 2018

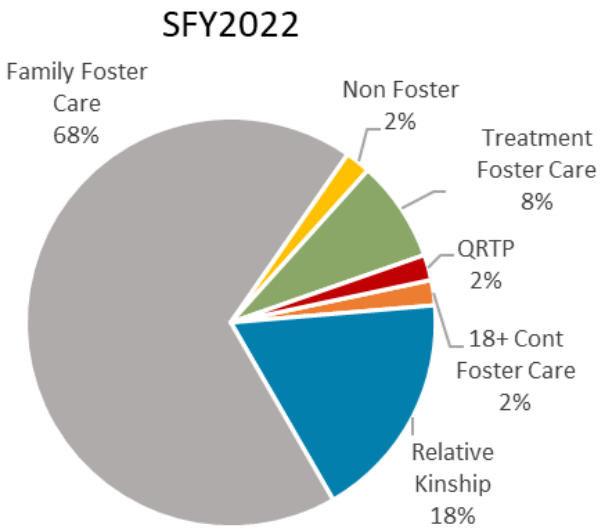
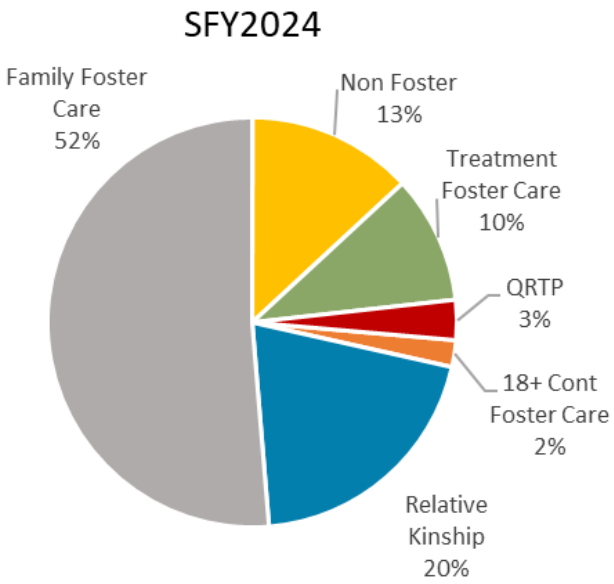
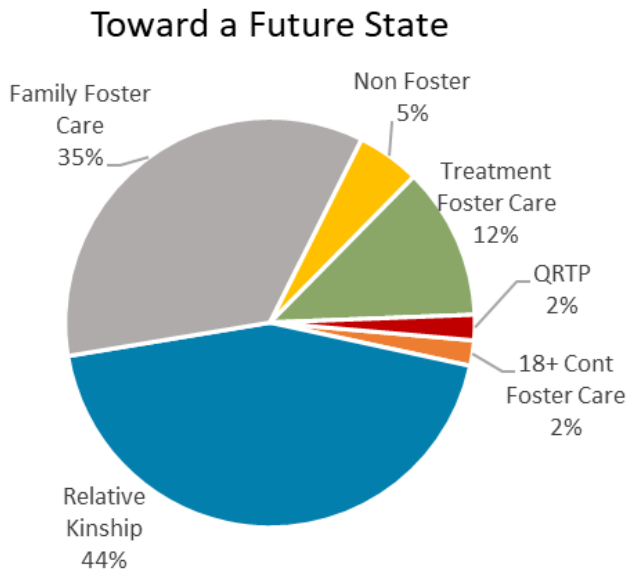
Children and Family Services



Shifting Resources to Support What Research Indicates since 2018 has shown success for Children and Families

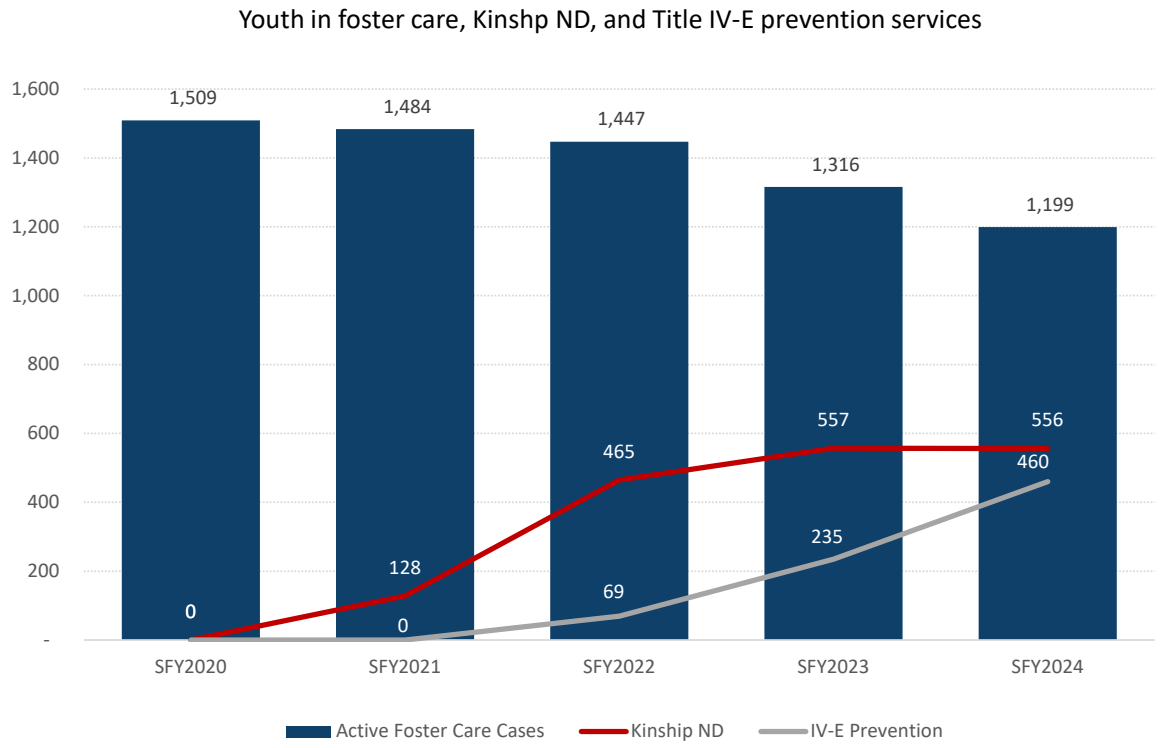


De-scale investment in **approaches** that are **not proven effective**



Invest in approaches with **proven results** for the populations being served

Increasing the prevalence of Relative / Kinship Care in ND should support more positive outcomes for kids

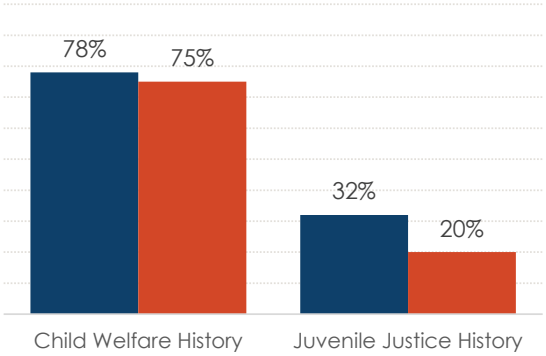


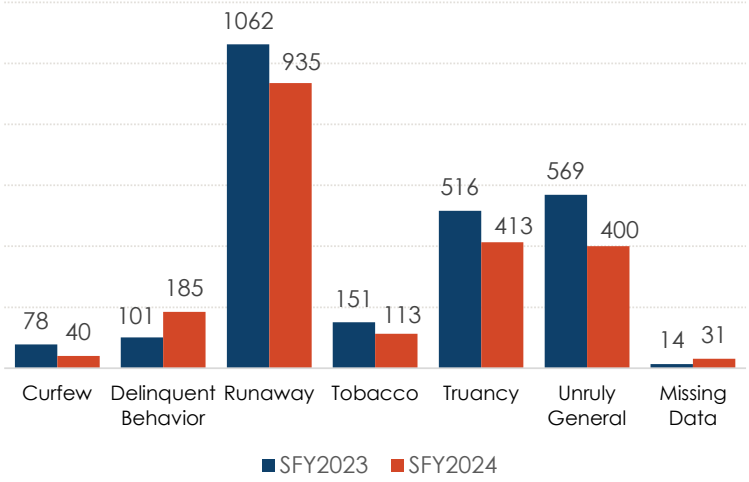
Rethink child welfare Finding ways for kids to be cared for by relatives or other adults with whom they have existing, significant relationships creates better outcomes

NORTH Dakota Be Legendary. | Health & Human Services

Kin caregiving represents an increasing portion of services to children

Progress and Improvements for Children and Families





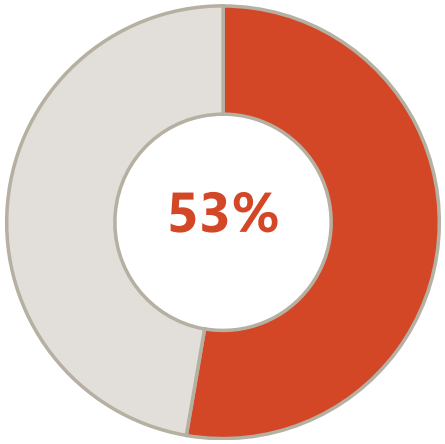
NORTH Dakota | Health & Human Services
Be Legendary.

Diverting children from "system" involvement can have long-lasting positive impacts

CHINS
As part of *Juvenile Justice Reform* efforts in North Dakota, the 2021 Legislature approved changes to NDCC 27-20.3 for services to be provided by the child welfare system so that **children** in need of services **who have not committed crimes** can be **served** in the community and be maintained **outside of the Juvenile Court system**.

CHINS Program Goals

- **Connect** children and their families **to appropriate services** in the community;
- Focus on **prevention**, **treatment** services and **support**; and
- **Divert** individuals **from** entering the **foster care** and **juvenile justice** system.



Child behaviors appropriate for CHINS program

- Truancy from school
- Regularly disobeying their parents
- Using and possessing tobacco and related products under 14
- Running away/Curfew

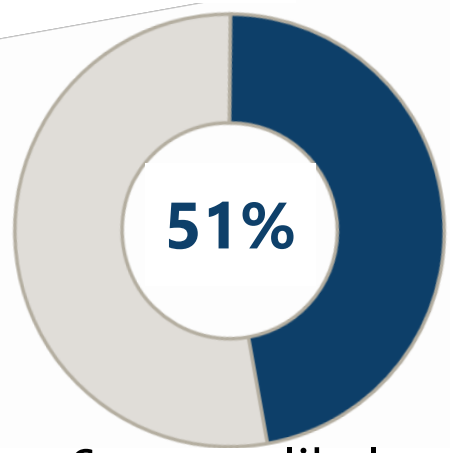
Foster Care in North Dakota – 2024 Snapshot

645

1 in 2 age 0-7



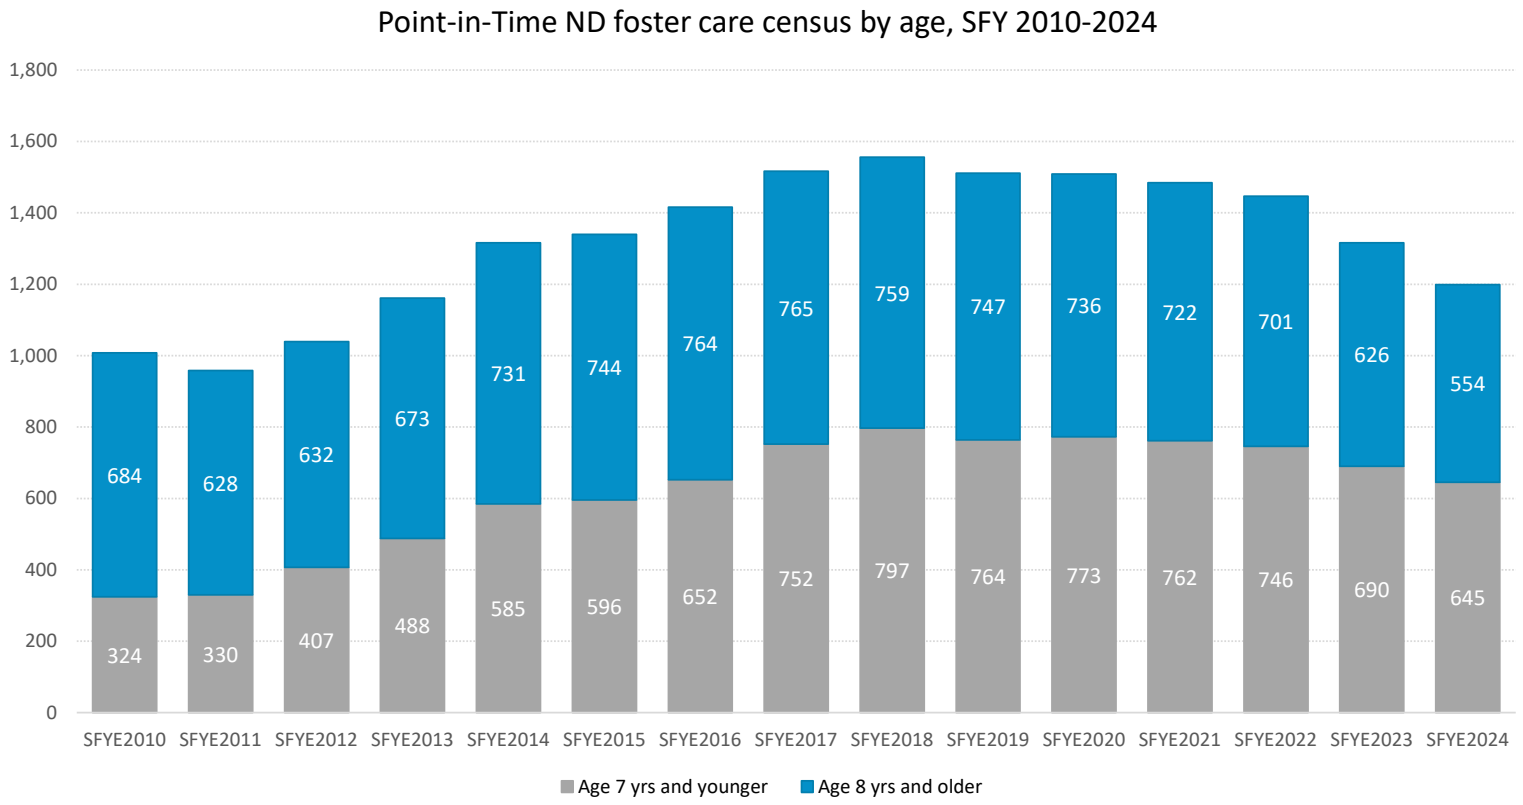
Half of the 1,199 children in foster care in North Dakota are age 7 or younger. (SFY2024)

44%

Intense level of care

Of the 169 kids receiving treatment foster care in SFY2024, 74 (44%) were age 7 or younger.

615

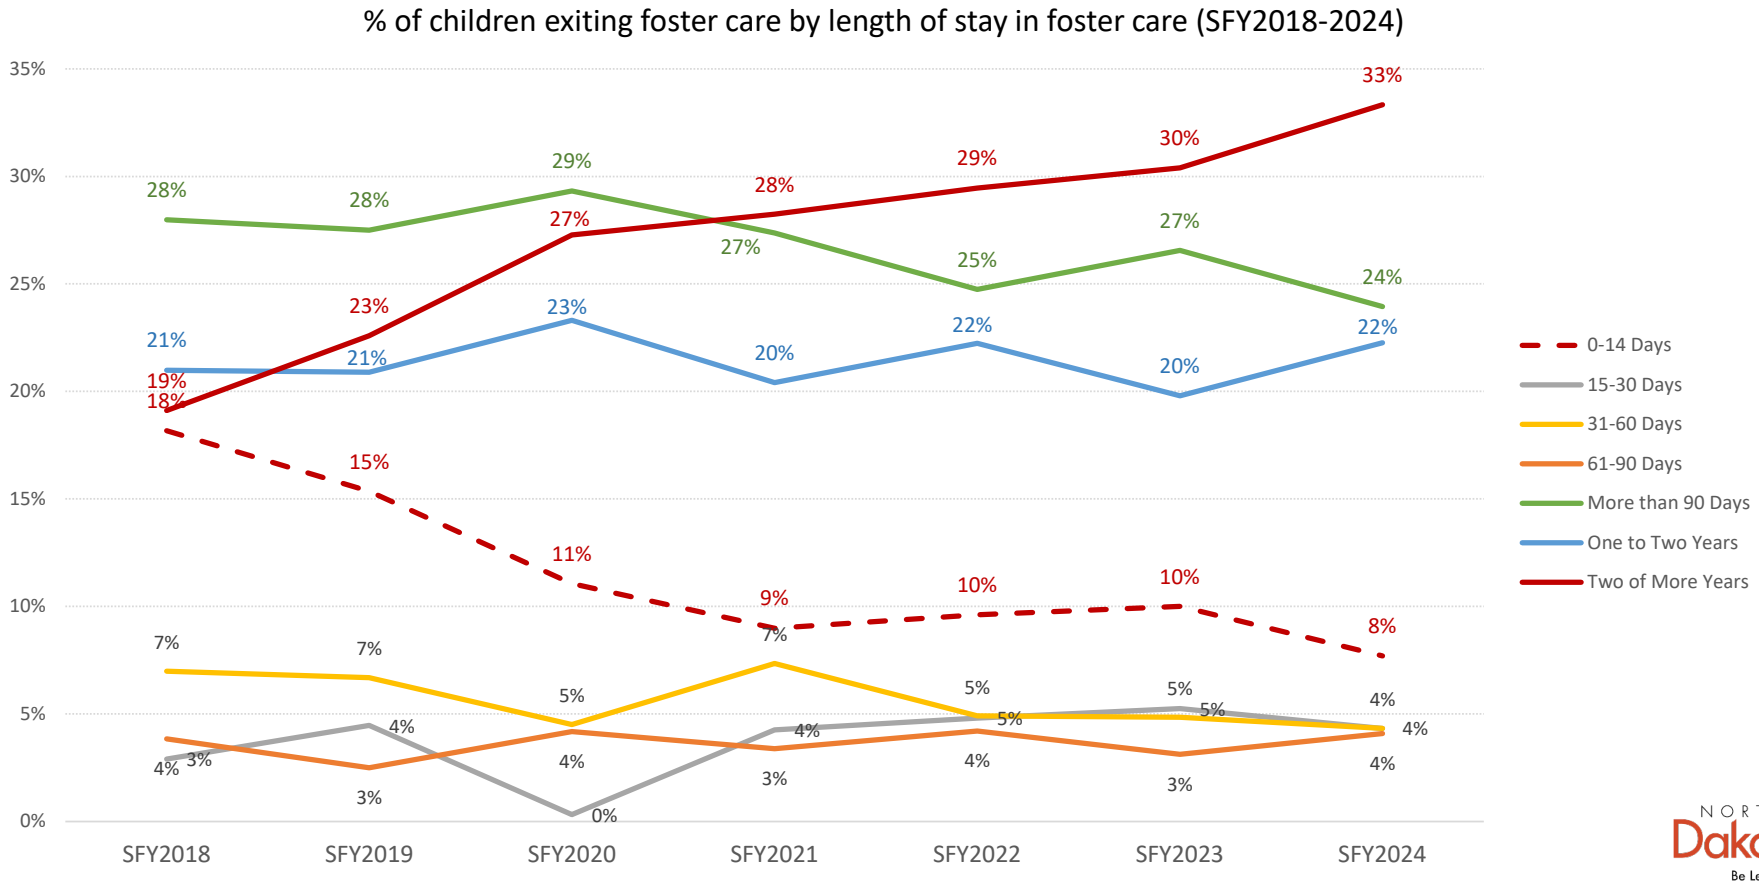


6x more likely

Native American children make up 47% of the total number of children in foster care in ND (615 of 1,199).

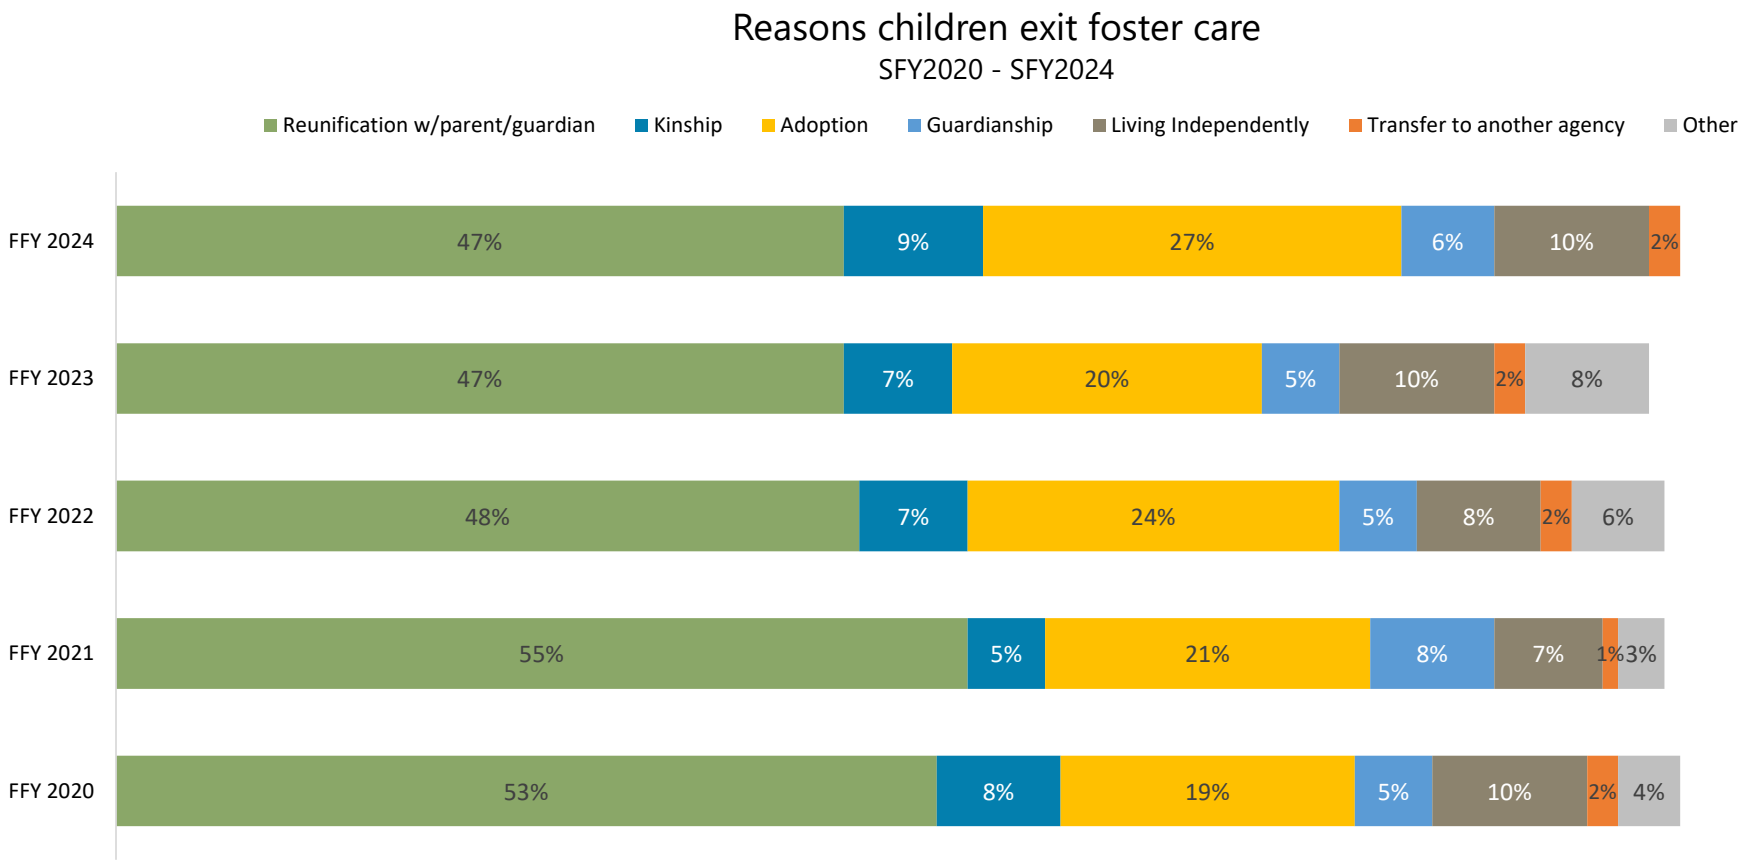
Native American children make up 8% of kids under age 18 in ND.

In FY24 54% of the 1,199 children in foster care are younger than age 7



Rethink child welfare

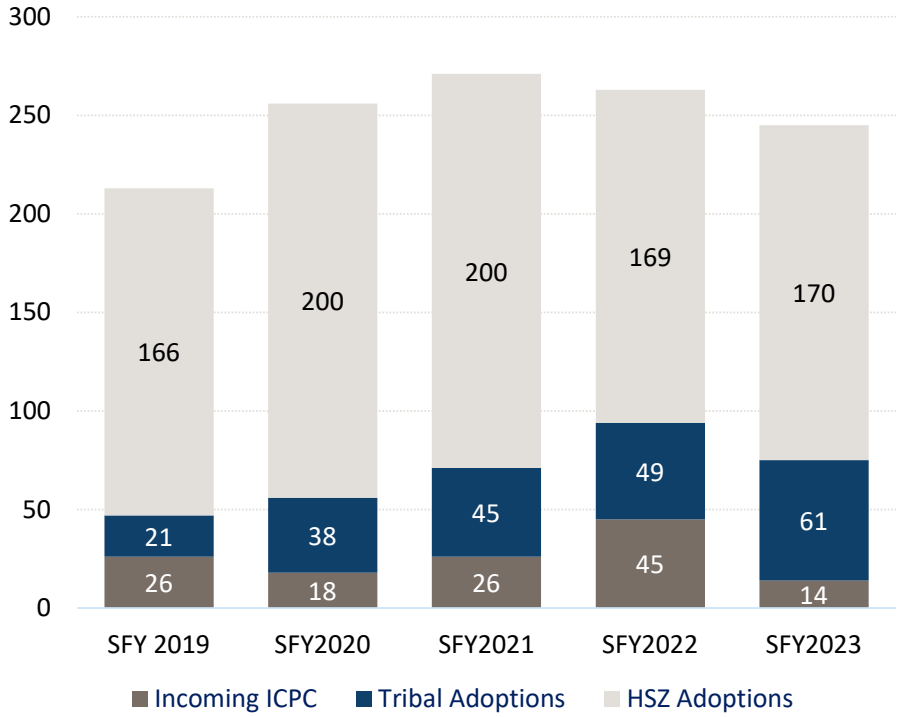
Early interventions with young families are key to reducing foster care placement for the youngest children.



NORTH Dakota Be Legendary. | Health & Human Services

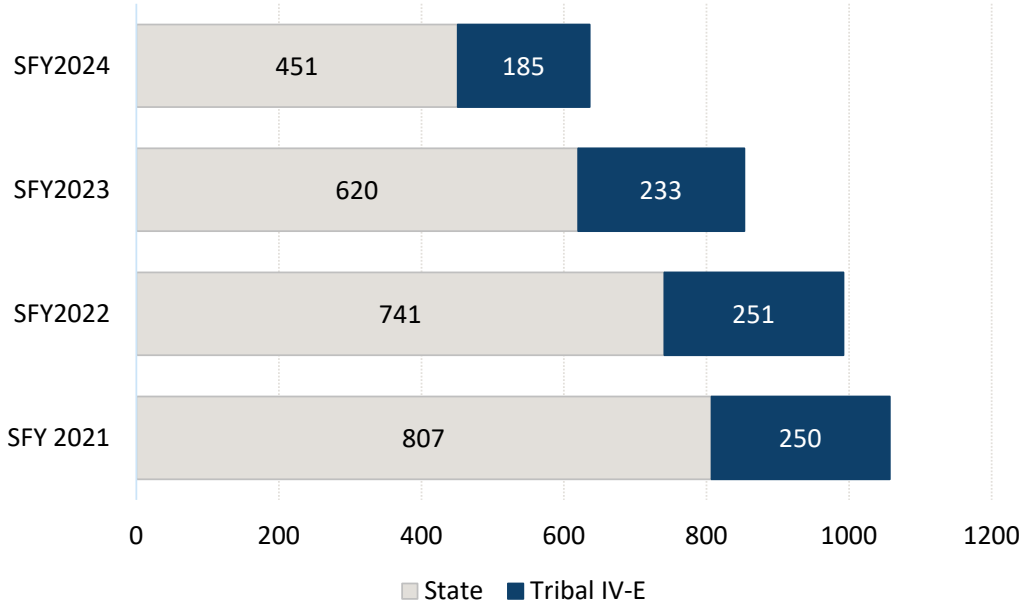
Changes in the child welfare practice model are resulting in fewer short-stay placements and more long-stay exits

NORTH Dakota Be Legendary. | Health & Human Services



Almost half of children in foster care exit to reunify with family

Source: HHS FRAME, Jan 2025



ND is seeing the impact of increased adoptions out of foster care and efforts to exit long-stayers

Finalizations of Public Agency Adoptions

Included in Executive Budget Request

Quality Representation for Families

- States can leverage federal IV-E funds to make sure that families are well represented through what can be a complex and life-changing legal process.
- This request would support 2 defense attorneys to be contracted by ND Indigent Defense; the attorneys would be trained to specialize in child welfare law. These attorneys would be supported by a licensed social worker and parent with lived experience, to support the connection with families throughout the life of the case.
- The Quality Legal Representation team would utilize federal IV-E match; all funds would be passed through to ND Indigent Defense as the implementation partner for the initiative (50/50 match; total $700,000).
- While the investment in legal representation for families is a new endeavor, HHS expects this group to be able to work with approximately 75-100 families over the course of the biennium (accounting for time it would take to start-up).

North Dakota Child Welfare Glossary

CHILD PROTECTION

- **ASSESSMENT:** A fact finding process designed to gather information that allows for staff to determine if a child meets the definition of an abused or neglected child. A determination either unconfirmed or confirmed where the subject's name is placed on the ND CPS Index. An assessment could be terminated in progress, which would result in case closure with no further action required.
- **CHILD PROTECTION SERVICES (CPS):** Services performed by an agency after a report of child abuse or neglect has been conducted. Services include assessments, planning, referral of treatment, coordination with referral sources, monitoring and delivery of services.
- **CPS CENTRALIZED INTAKE:** North Dakota's CPS call center where professional staff accept reports of suspected child abuse and neglect over the phone via 1-833-958-3500.
- **CONFIRMED:** It is determined a child meets the definition of an abused or neglected child based on the evidence gathered.
- **UNCONFIRMED:** It is determined based upon the evidence, that a child does not meet the definition of an abused or neglected child.

SERVICES/CASE MANAGEMENT

- **ADOPTION:** Safety decision when the court determines that a child in public custody will not be reunited with their parents. Adoption may be legally granted to an identified family as one of their own.
- **CASE MANAGEMENT:** Agency staff assigned to work with the family to determine the needs and services required to achieve a safe outcome. Staff is responsible to organize visitation, meet regularly with the parent and child/ren, work closely with referral sources for services, provide updates to the Court and coordinate various aspects of the case plan.
- **CASE PLAN:** Individualized set of goals developed with the family to enhance parental protective capacities and establish safety in the home.
- **CUSTODIAN:** Means a person or agency, other than a parent or legal guardian, given legal custody of the child by order of the Court. ND custodial agencies include a Human Service Zone, Division of Juvenile Services or a federally recognized Tribe.
- **GUARDIANSHIP:** Safety decision where the court determines that a child in public custody will not be reunited with their parents. Legal guardianship is permanent custody granted to a caregiver, but the child's parental rights remain intact.
- **PLACEMENT:** When it is determined a child is unsafe, a decision must be made regarding placement. A child may remain in their home with in-home safety plan and supports or a child may be placed in out-of-home care with relatives, placed in a licensed foster home, residential treatment facility, Supervised Independent Living setting, or other.
- **REUNIFICATION:** Safety decision to return the child to the parental home after determining impending danger threats can be controlled and the parent/caregiver protective capacities have been sufficiently enhanced.
- **SAFETY PLAN:** A written arrangement between parents/caregivers and the agency when a child is determined to be unsafe. A safety plan remains active as long as danger threats exist and may include in home or out of home placement arrangements.
- **SAFE CHILD:** When no threats of danger exist within the home, or parents/caregivers can protect the child from threats of danger, or the child is not vulnerable (age/development) to such threats.
- **UNSAFE CHILD:** When threats of danger exist in the home, and the child is vulnerable (age/development) to such threats, and parents/caregivers are unable to protect the child from the threats of danger.

Who Does What in Child Welfare?

ROLES IN NORTH DAKOTA'S HUMAN SERVICE SYSTEM

HUMAN SERVICE ZONES (HSZ) TEAM MEMBERS

☆ *Child Protection Services (CPS) Workers:* Provide protective services for children under age 18, including child protection assessments in response to reports of suspected child abuse or neglect and follow-up services to families.

☆ *CPS Central Intake Unit:* (*Statewide HSZ team*) Is the intake point for reports of suspected child abuse or neglect. Collects facts and provides details to CPS workers at the local HSZ level.

☆ *Child Welfare/CPS Supervisor:* Supervise and support child welfare staff in HSZs.

Foster Care Case Manager: Manages case and is main point of contact for child, parents and foster care provider. *Child is not in the home.*

Child Welfare Case Manager: *(Also called Family/In-Home/ Wrap-around/Family Preservation Case Manager)* Focuses on internal family stability, parental capacities, and identifying needed supports and services. *Child is in the home.*

Family Support/Parent Aide: *(Also called Human Service Aide /Transportation Aide)* Assist parents in building parental capacities and skills to maintain or reunify child with family. Not located in all HSZs. Some only provide transportation to support child and family connections and visits. ■

ND HEALTH AND HUMAN SERVICES (HHS) TEAM

Foster Care Licensing Specialist: Recruits, supports, guides and assesses foster parents through the licensing and renewal process. Works in the HHS Children and Family Services (CFS) Licensing Unit.

☆ *Field Service Specialist:* Monitors fidelity and quality of work related to the Safety Framework child welfare practice model and ND policy, in addition to providing technical assistance to the foster care, child protection and in-home case management units within the Human Service Zones and Division of Juvenile Services (DJS). Is employed by HHS – CFS. ■

Other Non-Child Welfare Support to Families

Children in Need of Services (CHINS): HSZ team connects families and children (whose behaviors Include truancy, disobeying parents, running away and/ or using tobacco products) to local services. hhs.nd.gov/cfs

OTHER INFORMATION

☆ OUT OF HOME PLACEMENT:

- Legal authority to remove a child is authorized by Juvenile Court or Law Enforcement and affirmed by the Courts.
- Deprivation matters are brought forth by the HSZ CPS workers to the removing authorities.
- Out-of-home placements could occur with relatives, kinship care, foster homes, therapeutic foster homes, or QRTP/PRTFs.

CUSTODIAL AGENCY:
In ND, foster children are placed under the public custody of three public agencies:

- *Human Service Zones:* ND's 19 Human Service Zones that represent 53 counties serve the greatest volume of foster children in ND's foster care system.
- *Division of Juvenile Services*
- *Tribal Social Services:* North Dakota has a formal State-Tribal Title IV-E agreement with four Tribal Nations: Standing Rock Sioux Tribe, Spirit Lake Nation, Turtle Mountain Band of Chippewa and MHA Nation.

GUARDIAN AD LITEM:
Appointed by the court to advocate for the best interests of a child in a juvenile court proceeding.

CONNECTING CHILDREN TO HELP

Who Do I Contact?

If a Child is Acting Out

CALL CHILDREN IN NEED OF SERVICES (CHINS) TEAM

CHILD'S BEHAVIORS MAY INCLUDE:

- Truant from school (youth is old enough to get self to and from school)
- Possession/use of tobacco and related products by youth ages 10-13
- Disobeying parents, or
- Running away

REFER TO THE CHILDREN IN NEED OF SERVICES (CHINS) TEAM

1. **Complete** the referral form and learn more.
   Visit: www.hhs.nd.gov/cfs/children-need-services
2. **Submit** referral form by **Fax:** 701.328.0104 or **Email:** chins@nd.gov

Staffed Monday-Friday
8 a.m. - 5 p.m. Central Time
(7 a.m.- 4 p.m. Mountain Time)

IMPORTANT:
In a behavioral health crisis, call 211/988

WHY MAKE A REFERRAL:

- Voluntarily connect children and families to helpful community services
- Divert children/youth from juvenile justice system

LEARN MORE: NDCC 27-20.3

If a Person is Abusing or Neglecting a Child

CALL CHILD PROTECTION SERVICES (CPS) TEAM

A PERSON RESPONSIBLE FOR A CHILD'S WELFARE IS SUSPECTED OF:

- Abuse, causing physical injury
- Educational neglect, failure to make arrangements and/or provide for a child's education
- Emotional abuse
- Neglect, lack of supervision or care
- Sexual abuse

CHILDREN & FAMILY SERVICES

Kinship-ND

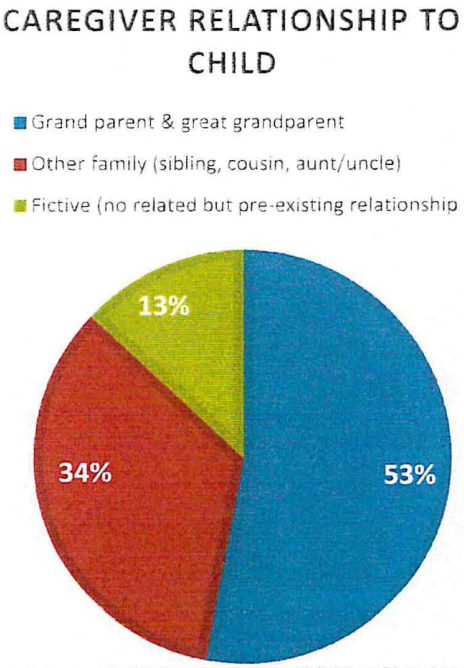
NORTH Dakota | Health & Human Services
Be Legendary.

North Dakota has utilized a yearly grant fund under Family First Prevention Services Act (FFPSA) Title IV-B, as well as state funding to create the Kinship-ND program, which assists both relative and fictive kinship caregivers who have taken on full time care of a child who is not their own.

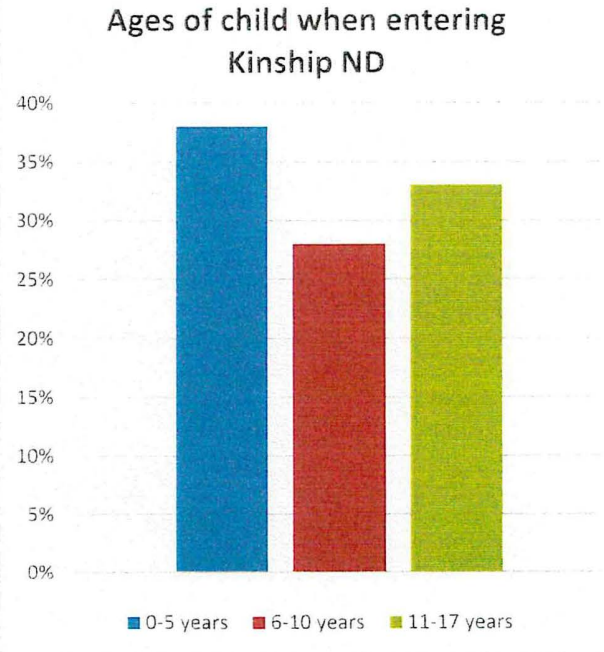
Kinship-ND assists the caregiver with navigating their journey in three main ways:

- 1 on 1 support
- Assistance with resources and information based on their needs
- Limited financial support (2 different funding options: Reimbursement & Allowance)

According to childwelfare.org, "Relatives are the preferred resource for children who must be removed from their birth parents because it helps maintain the children's connections with their families, increases stability, and overall minimizes the trauma of family separation. It is imperative that kinship caregivers have the supports they need when a child is placed in their care."

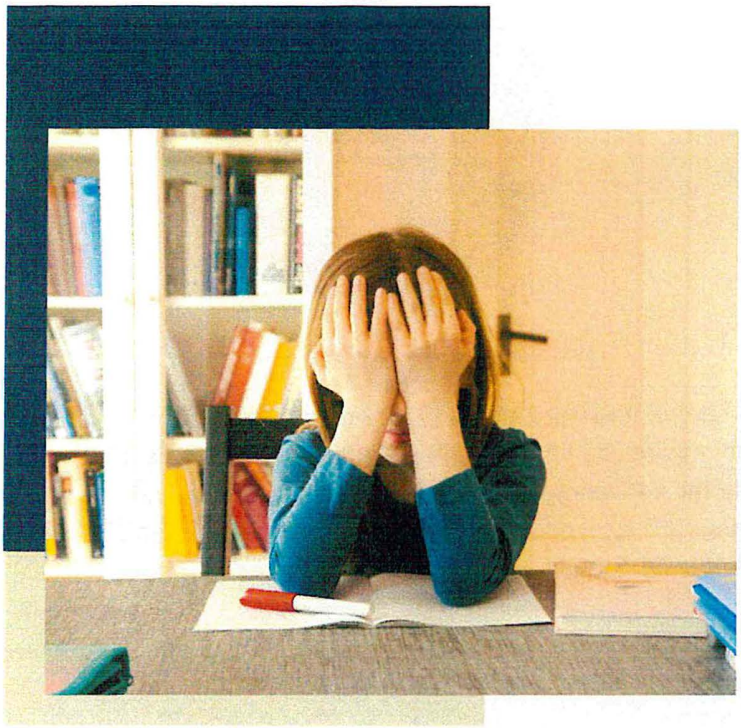


Top needs



- Financial
- Supplies/ food
- Childcare
- Legal
- Mental health

Kinship-ND has been serving caregivers since March 17, 2021



From 3/17/21 – 7/5/24 we have served 937 Caregiver homes with 1,719 Children.

Of those homes there still 635 caregivers who are still caring for 1,134 children in a kinship placement

Grandfamilies.org estimates in North Dakota there are 6,000 children being raised by kin with no parent present and over 9,600 children live in a home where a relative is the head of household.

Children's Treatment Services Level of Care Determinations

Children's Treatment Services- Level of Care Determination

North Dakota Health and Human Services, Behavioral Health, Children and Family Services and Medical Services partnered across sections to implement a unified clinical assessment to aid in securing treatment services for children.

Purpose

- Determine the least restrictive most appropriate level of care.
- Ensure community services have been exhausted before seeking out-of-home or residential treatment for children.
- Ensure children receive the right services, at the right time, for the right duration.

Eligibility

- Children aged 6 through 17 in need of treatment services.
- Families or case workers seeking out-of-home or residential treatment for a child in their care.

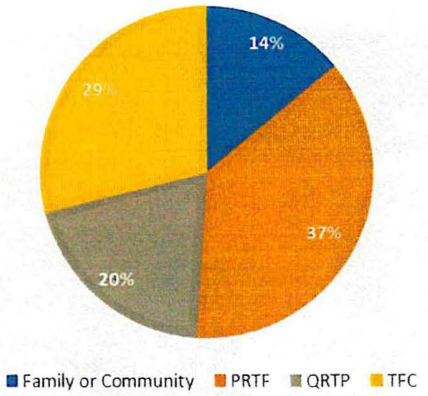
Assessments by Third Party Vendor (Maximus)

- Contracted employees residing in ND use an evidence-based assessment tool.
- Interview with the child, family, therapist, and treatment providers.
- Review clinical and treatment services supporting documentation.
- Review every 90 days when a child is in a residential treatment facility (QRTP/PRTF)
- Review every 180 days when a child is in treatment foster care (TFC)

Placements

- Emergency placements can occur, while the assessment is taking place.
- TFC and QRTP, emergency placements can occur for up to 30 days.
- PRTF, emergency placements can occur for up to 10 days.

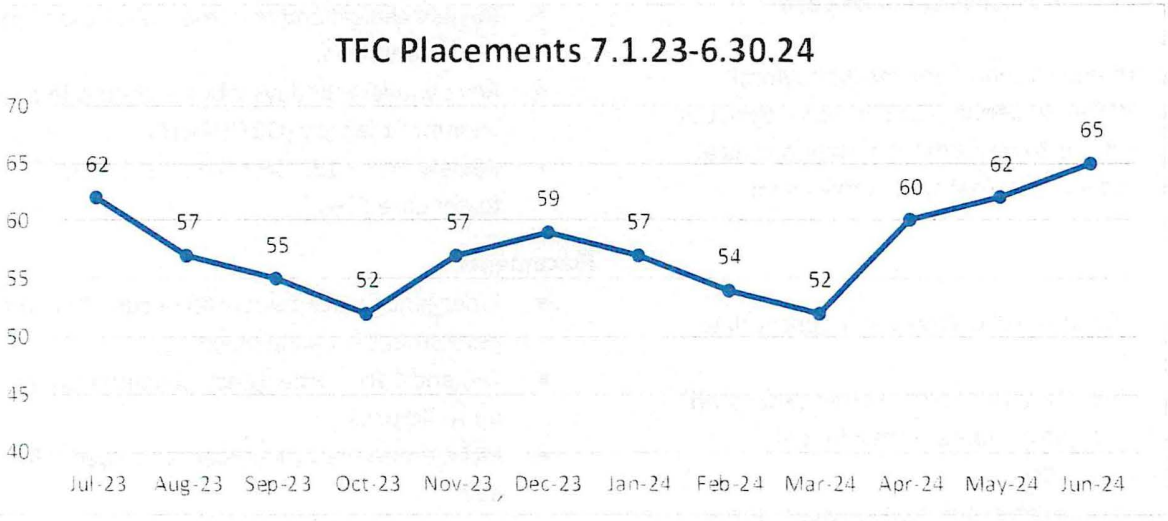
Changing the Trajectory



- Data and outcomes show that children do better in family settings. Research indicating placement in institutional/group setting are associated with poorer outcomes.
- Treatment in out-of-home or residential treatment should be short-term.
- Supporting HHS mission in providing services closer to home.

HHS Clinical Alignment Team

The HHS Clinical Alignment Team has employees from Behavioral Health, Children and Family Services, Medical Services and Maximus. The team meets weekly to review cases, the clinical decision support model, trainings for stakeholders, process changes or policy modifications.



Children and Family Services Section
600 East Boulevard Avenue, Dept. 325
Bismarck, ND 58505-0250
Phone: (701) 328-2316 Fax: (701) 328-3538
Email: hhscfs@nd.gov
https://maximusclinicalservices.com/svcs/north_dakota_cts
https://www.hhs.nd.gov/childrens-treatment-services

CTS-LOC Determinations issued since July 1, 2024
Since July 1, 2024, there have been 413 assessments, completed **234 (57%)** for children in public custody. Majority 89% have been approved for treatment to remain in or enter a PRTF, QRTP or TFC foster home.

Treatment Foster Care
Treatment Foster Care is provided by Nexus PATH Family Healing as a Licensed Child Placing Agency (LCPA) licensed and paid for by HHS Children and Family Services. Treatment Foster Care (TFC) providers receive extra training and support by the agency as children placed in their home require additional in-home supports and services. TFC is an alternative to institutional and residential facilities offering a home environment to meet the complex mental and behavioral health needs of children in a least restrictive family setting. This level of care is for children ages six through 17 who experience frequent, co-occurring symptoms and behaviors that result in the need for increased services, supports and provider training to address complex trauma.

From July 1, 2023, to June 30, 2024, the chart below shows the number of children served in treatment foster care through Nexus PATH Family Healing:

Qualified Residential Treatment Programs
North Dakota has two Qualified Residential Treatment Programs (QRTP), Home on the Range located in Sentinel Butte averaging 94% occupancy in the last six months and Dakota Boys and Girls Ranch located in Minot averaging 69% occupancy in the last six months.

QRTP's are licensed and paid for by HHS Children and Family Services. QRTP's are **short-term** residential treatment providers offering trauma-informed treatment designed to address the serious complex behavioral health needs of children ages 10 through 17. QRTPs must have a trauma-informed treatment model, a registered or licensed nurse and other clinical staff available 24/7. QRTP's must facilitate participation of family members in a child's treatment program, and provide aftercare supports for at least 6 months post discharge.

Interstate Compact for the Placement of Children (ICPC)

General Information:

The Interstate Compact for the Placement of Children (ICPC) is a contract between all 50 states that allow them to work together to ensure that children who are placed across state lines, who are in the care or custody of a state public child welfare agency, for foster care or adoption receive adequate protection and support services. The ICPC establishes procedures for the placement of children and fixes responsibility for agencies and individuals involved in placing children. The purpose of the ICPC is to protect the child and the party states in the interstate placement of children so that:

- The child is placed in a suitable environment;
- The receiving state has the opportunity to assess that the proposed placement is not contrary to the interests of the child and that its applicable laws and policies have been followed before it approves the placement;
- The sending state obtains enough information to evaluate the proposed placement;
- The care of the child is promoted through appropriate jurisdictional arrangements; and
- The sending agency or individual guarantees the child legal and financial protection

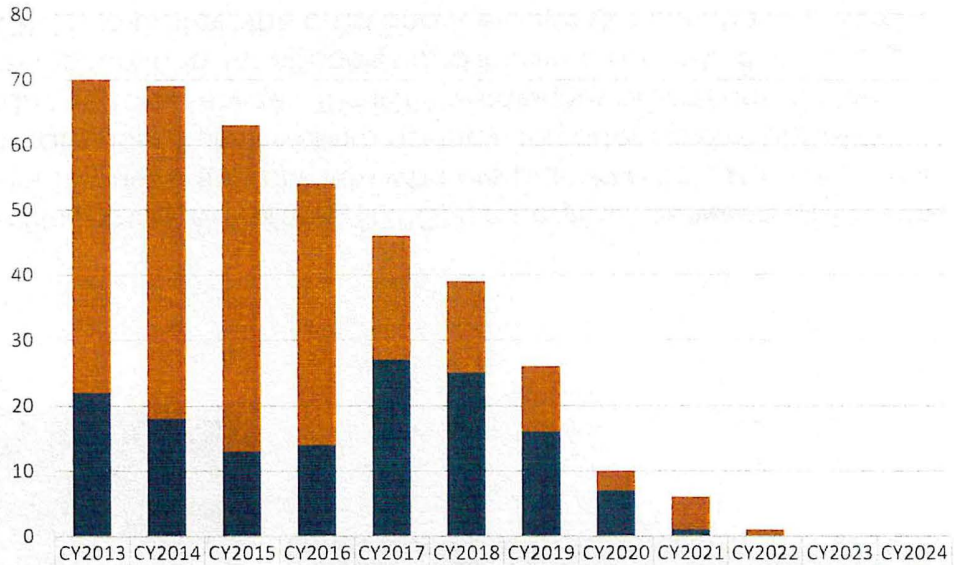
Placement options for which an ICPC be requested:



ICPC can be requested to support several potential placement options

- Parent home
- Relative home
- Foster care provider home
- Adoptive home
- Qualified Residential Treatment Program Facility

ICPC requests processed by North Dakota

- Foster Care and Relative Care – 600 per year (50 per month) both incoming and outgoing
- Adoption – 80 per year both incoming and outgoing
- Out of State Residential Facility Placement – See below

CHILDREN IN NEED OF SERVICES (CHINS)

BACKGROUND

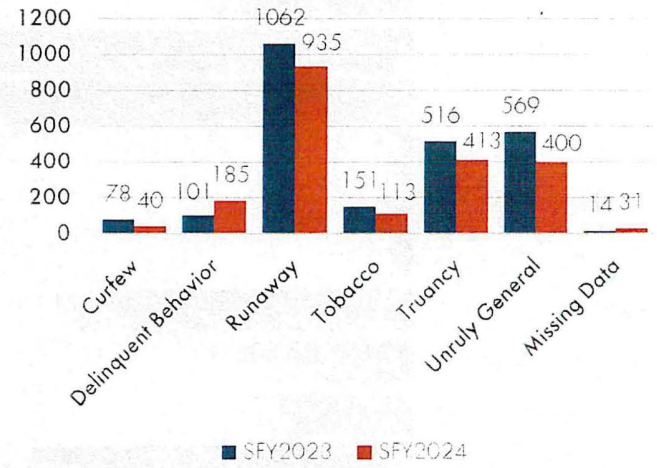
As part of Juvenile Justice Reform efforts in North Dakota, the 2021 Legislature approved changes to NDCC 27-20.3 for services to be provided by the child welfare system so that children in need of services who have not committed crimes can be served in the community and be maintained outside of the Juvenile Court system.

CHINS PROGRAM GOALS

- Connect children and their families to appropriate services in the community;
- Focus on prevention, treatment services and support; and
- Divert individuals from entering the foster care and juvenile justice system.

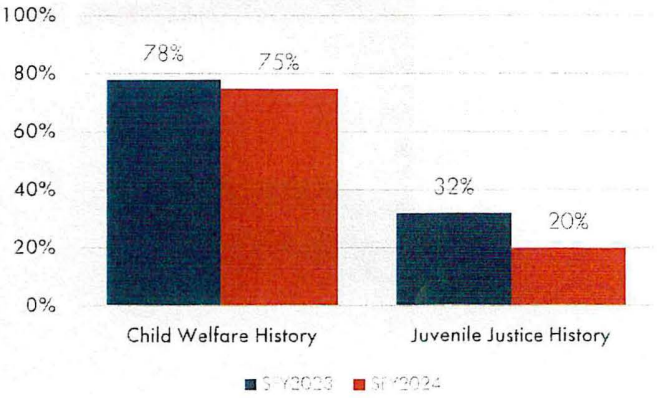
CHILD BEHAVIORS APPROPRIATE FOR THE CHINS PROGRAM

- Truancy from school
- Regularly disobeying their parents
- Using and possessing tobacco and related products
- Running away



TO REFER TO THE CHINS PROGRAM

Parents, guardians, law enforcement officers, and school officials can refer children to the CHINS Team, staffed statewide by Human Service Zone professionals.



1. Complete a CHINS Referral Form
2. Submit the Referral Form
   - Fax: (701) 328-0104
   - Email: chins@nd.gov
3. Questions regarding the program or referrals can be sent via email to chins@nd.gov or by calling 701-889-9864.

	SFY2023	SFY2024
Total Referrals	2,491	2,117
Total Children	1,493	1,452

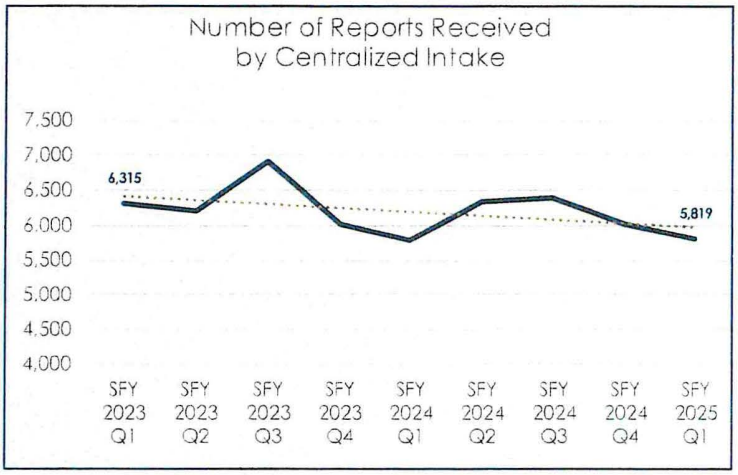
Child Protection Services

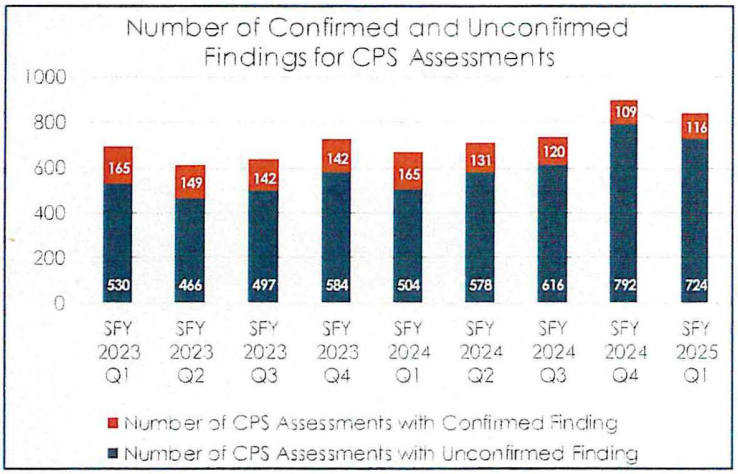
Child Protection Services (CPS) is committed to ensuring the safety and well-being of children by conducting comprehensive assessments upon receipt of a report of suspected child abuse and/or neglect. The purpose of CPS is to assess safety and protect children (anyone under 18 years old) from further maltreatment and identify any ongoing safety threats.

CENTRALIZED INTAKE

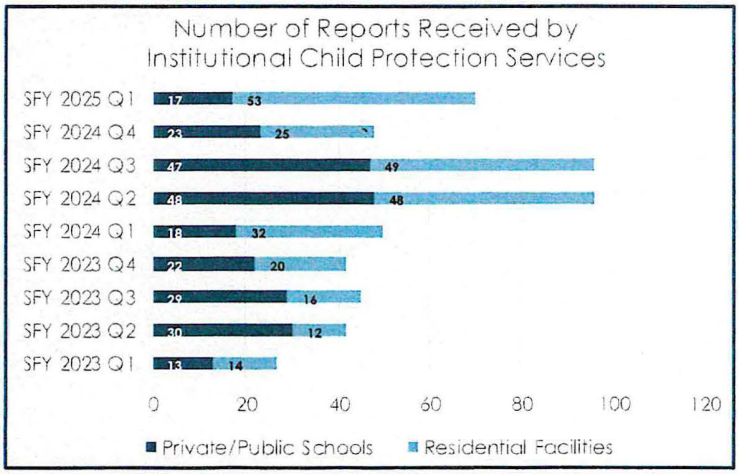
This statewide child abuse and neglect reporting line consists of individuals who are specialized to gather comprehensive information to support the workers in their response to children who are maltreated, unsafe, and/or in need of protection and services.



CPS ASSESSMENT



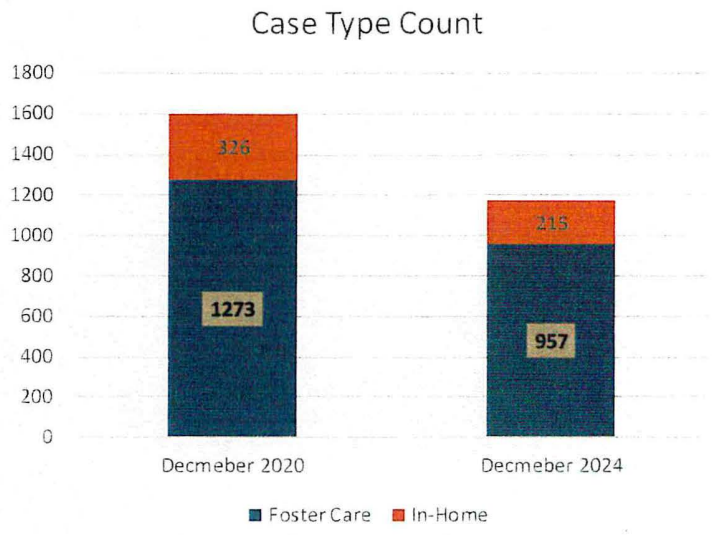
The 19 Human Service Zones are North Dakota's authorized agents who must respond to all reports of suspected child abuse and/or neglect. Zone staff must initiate a CPS assessment of these reports when the information meets the criteria outlined in state statute (NDCC 50-25.1). In most situations, a finding of either "Confirmed" (child was a victim of maltreatment) or "Unconfirmed" (child was not a victim of maltreatment) is made.

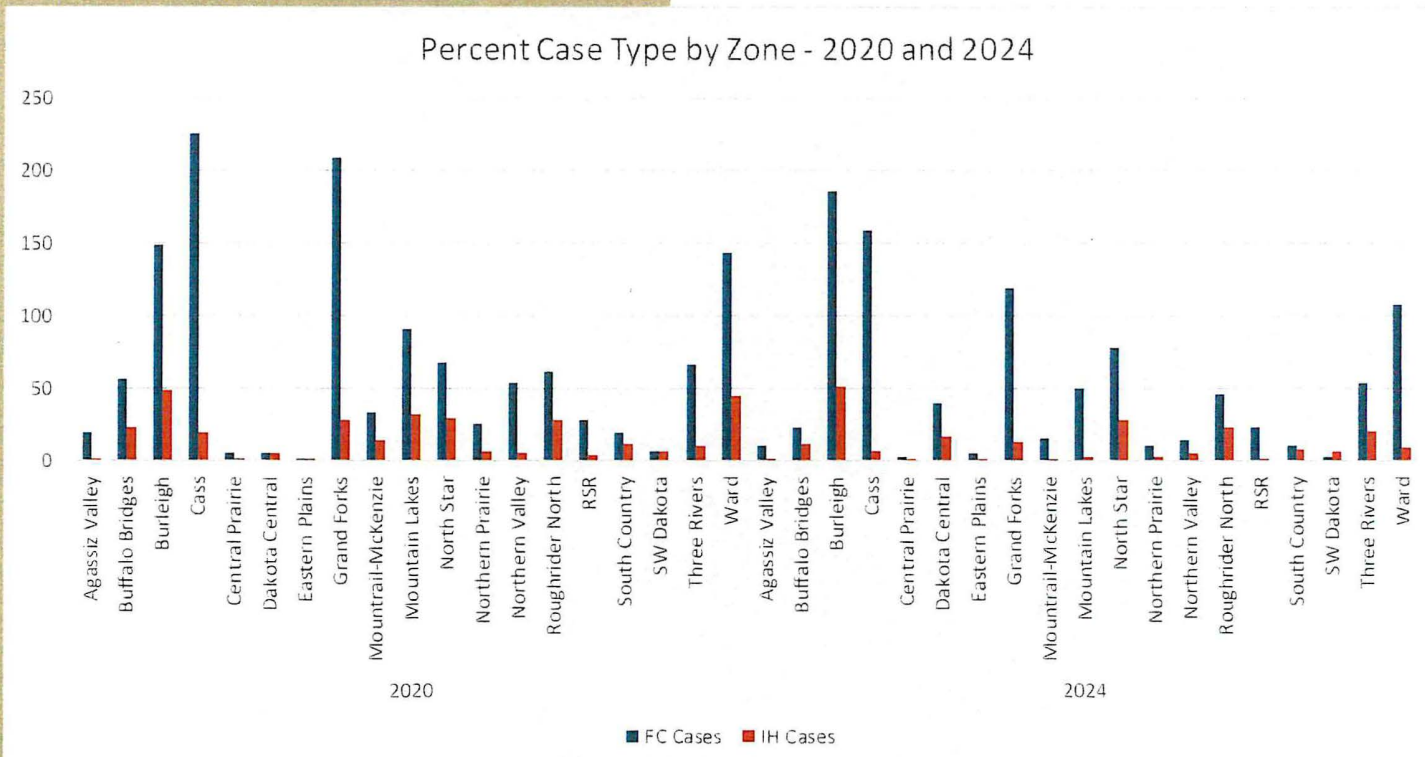


INSTITUTIONAL CHILD PROTECTION SERVICES

Institutional Child Protection Services (ICPS) assesses reports of abuse and/or neglect at institutions that provide services to children to include schools and residential treatment centers. An assessment is completed to assure the children are safe and the institutions adhere to regulations and policies designed to protect the welfare of the children under their care.

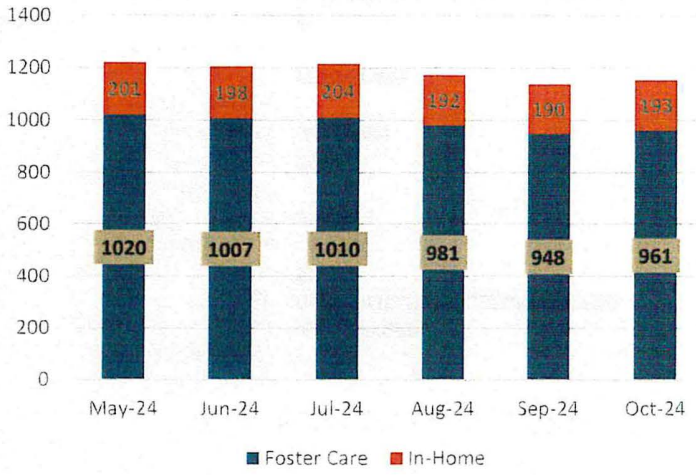
DATA



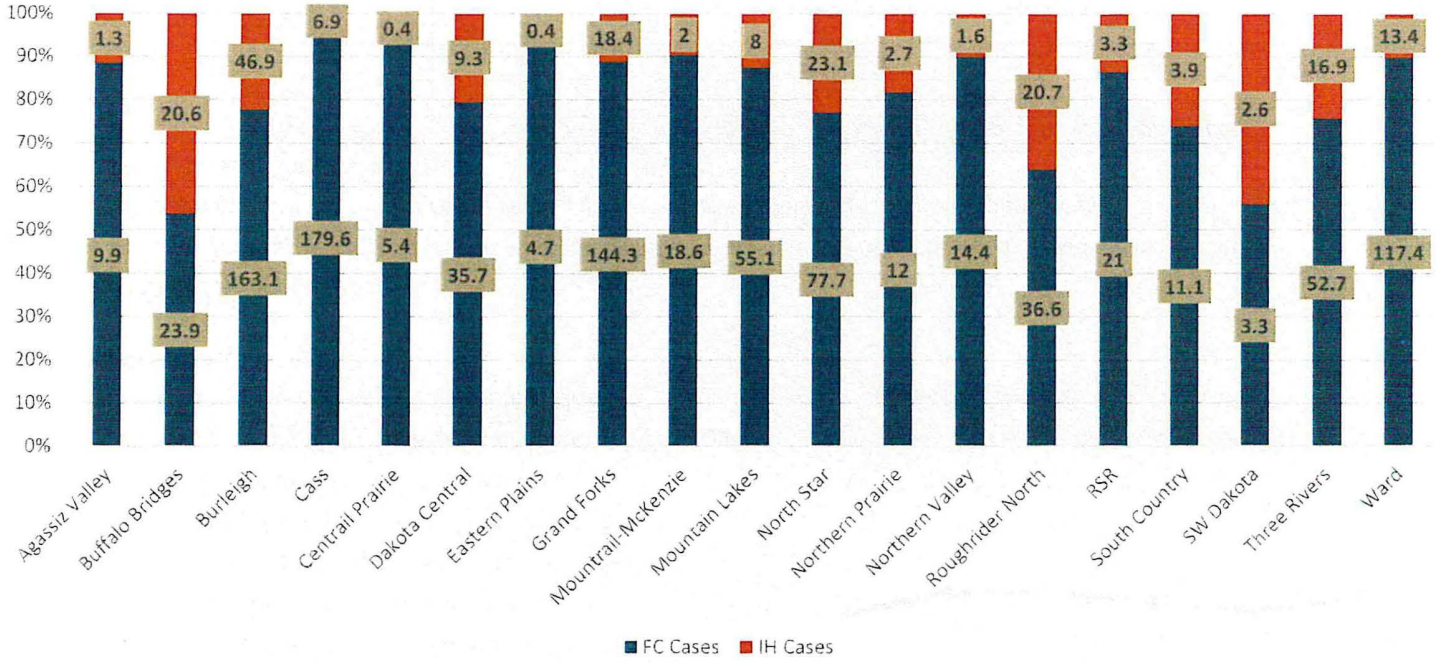


ND Case Management Data Trends – Comparing 2020 to Present

The following data trends represent both foster care and in-home case types with point-in-time data from December 1, 2020 compared to December 1, 2024. In December 2020, the North Dakota child welfare system adopted a new practice model to ensure that services are targeting the right families at the appropriate level of intrusion. Over the past 4 years, implementation training has been maintained and adapted based on the needs of the child welfare workforce. In December 2020, in-home cases constituted 25.6% of all open cases, while in December 2024 this decreased to 22.5%. The total number of cases overall has decreased as well.

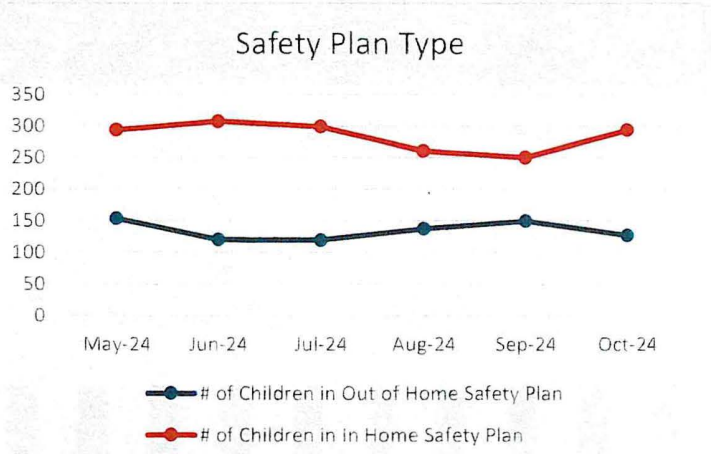


ND Case Management Data Trends



In the North Dakota child welfare system, case management case types are distinguished between in-home and foster care cases. Foster care data tracks the total number of children in each family unit that have entered the foster care system. In-home data focuses on the family unit as a whole, and each family is counted as a single case regardless of the number of children involved with that family. For additional in-depth data trend reporting, in-home cases are sometimes separated out to include the number of children included in each case, as well as the type of safety plan being utilized.

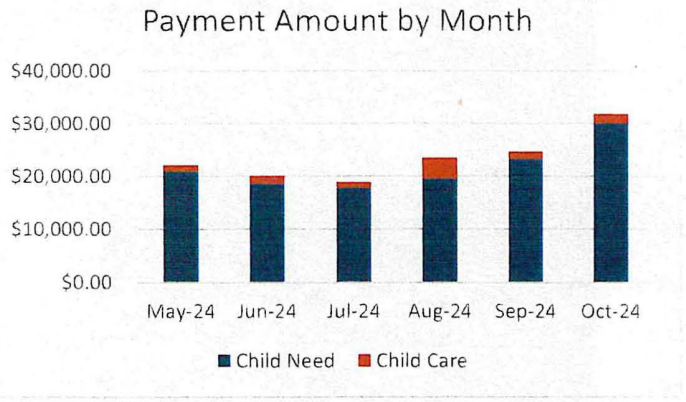
Case Type Count



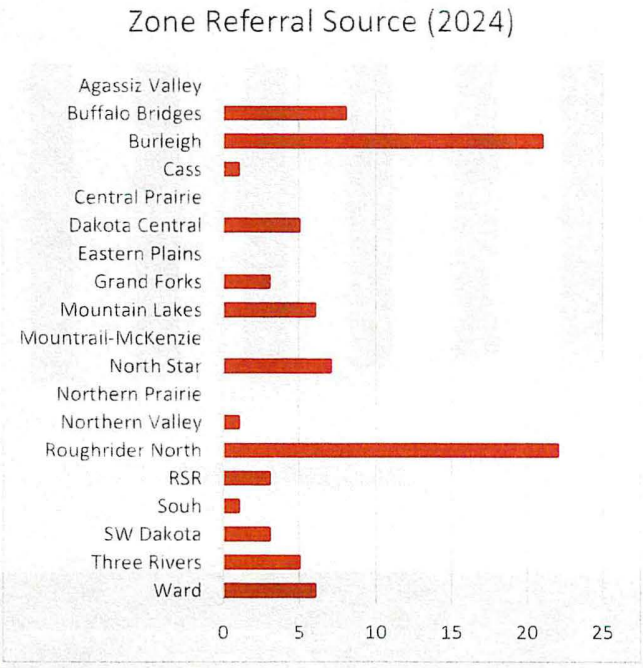
Average Percent Case Type by Zone

Case type average from May-October 2024

Types of Safety Plans



When in-home cases are reported for data tracking purposes, the safety plan type is also considered, as well as how many children that safety plan type involves. This is when it can be more effective to track total number of children in the family unit as opposed to identifying the whole family as the case unit, since there may be situations in which some children in the family unit remain in the home with a safety plan, while other children may need to have an out-of-home safety plan implemented.



Kinship-ND

Kinship-ND is a program that can be utilized to support families in a variety of ways, including supporting kinship providers with children being served in out-of-home safety plans without agency custody, therefore reducing the level of intrusion into the family unit.

Month (2024)	*# of Caregivers*	*# of Children*	*# Cases Closed*	*# New Applications*
May	29	50	5	1
June	25	44	54	4
July	28	43	3	5
August	30	46	6	8
September	39	64	7	1
October	34	56	11	7

*Child Need rate was increased starting with Oct 2024 payments

SAFETY FRAMEWORK PRACTICE MODEL

ND SFPM is the Safety Assessment and Family Evaluation Model (SAFE) ©2025 Action for Child Protection. All rights reserved.

Safety Framework Practice Model (SFPM) was implemented December 2020 per Social Services Redesign (SB 2124, 2019). SFPM brings consistent child welfare practice for all Human Service Zones whereby they intervene in families with children who are unsafe based on the presence of uncontrolled danger threats. SFPM uses standardized tools and decision-making criteria to make well-founded child safety decisions to ensure we intervene in families' lives only when necessary. Caseworkers must consider specific, key questions to determine the least intrusive and most appropriate level of intervention.

SFPM reinforces safety planning within the home to reduce further trauma to the child. Removing children from their parents/caregivers and family home occurs only after a comprehensive assessment indicates in-home safety planning is not possible. When **1)** the family has made significant progress in achieving the expected outcomes of the case; **2)** child safety is being sustained in the child's home; and **3)** the child's safety can be maintained without the ongoing intervention of safety service providers, the case is closed.

IMPACT/OUTCOMES

CFS tracks whether SFPM is having the intended impact and data trends since implementation are encouraging:

- Reduction in the use of paid foster care;
- Increase in the use of kinship caregivers; and
- Progressive approaches for managing child safety, supporting parents in becoming protective and receiving needed services, and ensuring family well-being.

TRAINING & TECHNICAL ASSISTANCE

100% of Human Service Zone staff must complete Child Welfare Certification Training within the first year of employment. SFPM practice requirements are woven throughout the 6-week curriculum.

607-05 Child Welfare Practice Policy Manual includes the SFPM requirements for child welfare workers and supervisors.

The ND SFPM Field Guide was published and disseminated to the workforce in March 2024 to provide further procedural guidance. In addition, tools, forms, and technical assistance opportunities that are consistently offered to the child welfare workforce.

FIDELITY SUPPORT

In July 2023 CFS implemented Courageous Case Management Site Visits (CCMs). CCMs involve Field Service Specialists and the SFPM Statewide Administrator traveling onsite to meet with Human Service Zone case managers, supervisors, and directors to build on their strengths, address any challenges or barriers to implementing SFPM with fidelity, and foster collaborative relationships.

During CCMs, the CFS team meets with zone staff about case situations that are particularly challenging with the end goal of determining which children continue to require our services and which can move/remain home safely with no further agency intervention.

CCMs have been well-received. In 2023, CFS completed seven CCM Site Visits from July-December 2023. Nine additional Human Service Zones have requested CCMs in 2024.

Title IV-E Prevention Services

Under the Family First Prevention Services Act of 2018

The North Dakota Title IV-E Prevention Services Plan allows ND Department of Health and Human Services access to federal Title IV-E funding for approved evidence-based services to children/youth at risk of out of home placement.

DHHS -Children and Family Services Section is responsible for program administration of the Title IV-E Prevention Services Plan. This includes determining eligibility, monitoring agreements with approved providers, meeting federal requirements, completing QA reviews, and funding Title IV-E prevention services.

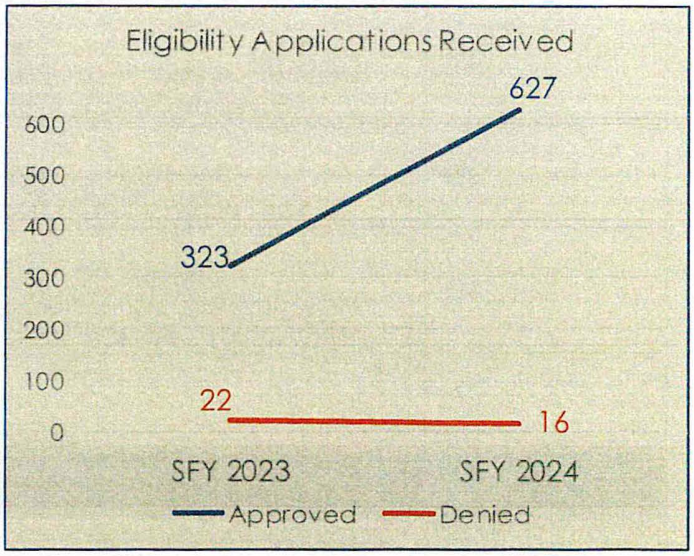
North Dakota's approved prevention services are:

- Healthy Families
- Parents as Teachers
- Nurse-Family Partnership
- Homebuilders
- Brief Strategic Family Therapy
- Parent-Child Interaction Therapy
- Multisystemic Therapy
- Functional Family Therapy
- Family Check-Up/Everyday Parenting

RECRUITMENT OF PROVIDERS

Title IV-E prevention services are available in select areas of the state. Recruitment of public and private providers continues. Grants have been awarded to agencies in an effort to grow the number of providers in implementing and delivering evidence-based Title IV-E prevention services.

ELIGIBLE CHILDREN



Federal guidance defines child eligibility criteria. Children eligible for Title IV-E prevention services must meet the following:

- Birth through 17 years of age;
- Resident of North Dakota and a US citizen;
- Not in an open foster care program *(Exception: A youth who is pregnant or parenting)*;
- Lives in the home of a parent/caregiver; and
- Is at risk of out of home placement if preventative services are not offered.

Once the above criteria are met, a determination of eligibility is completed based on circumstances and characteristics of the child and their parents/caregiver.

APPROVED APPLICATIONS

From SFY 2023 to SFY 2024 North Dakota saw a 94% increase in the number of applications approved for Title IV-E prevention services.

PROGRAMS/SERVICES AND LOCATIONS

Services are provided to both children and their parents/caregivers, based upon their identified needs. Each of the services below has specific outcomes measurements identified as a goal for that service.

PREVENTION SERVICE	LOCATIONS	NUMBER OF CHILDREN SERVED
Healthy Families Home visitation program to strengthen family functioning, reduce risks and build parent protective factors. Target Population: birth-5yrs.	Statewide	312
Brief Strategic Family Therapy Intensive family intervention for youth with behavior/conduct concerns, substance abuse and delinquency. Target population: 6-17yrs.	Bismarck, Dickinson, Fargo, Grand Forks, Jamestown, Mandan, Minot, Watford City, Williston	119
Parent-Child Interaction Therapy Therapy that coaches' parents with children experiencing emotional and behavioral concerns. Target Population: 2-7yrs.	Bismarck, Fargo, Grand Forks, Jamestown, West Fargo	168
Family Check-Up/Everyday Parenting Brief, strengths-based intervention for families with children with emotional, behavioral, and academic concerns and supports positive parenting. Target population: 2-17yrs.	Bismarck, Fargo, Grand Forks, Mandan, Minot, Valley City, West Fargo	123
Multisystemic Therapy Intensive treatment and intervention for high-risk youth that addresses the core causes of delinquent and antisocial conduct. Target Population: 12-17yrs.	Southeast Region: Cass, Richland, Ransom, Traill, Sargent	46
Nurse Family Partnership Home visitation by nurses to improve health, relationships and economic well-being of mothers and their infants. Target Population: birth-2yrs.	Bismarck, Grant, Mercer, Morton, Oliver, and Sioux Counties	1
Functional Family Therapy *(started September 2024)* Family therapy for youth experiencing behavioral or emotional concerns. Target Population: 11-17yrs.	Counties serviced by these Regional Human Service Centers: Badlands, Lake Region, Northwest, South Central, Southeast, West Central	27

List of providers can be found at: https://www.hhs.nd.gov/cfs/title-iv-e-prevention-services

IMPACT/OUTCOMES

DHHS-CFS collects data to monitor effectiveness in reaching the desired outcomes for children and parents/caregivers. Below is the outcome data that shows the average change from initial contact with the child and parents/caregivers to 1) last entered survey, or 2) when the service ended.

Since the prevention plan began, just **3%** of the children served have entered foster care at the 12 or 24mth mark after receiving one or more of the above prevention services. NDHHS-CFS is encouraged by this response and will continue to monitor the effectiveness of these prevention services in helping to reduce the number of children entering foster care. Other promising outcomes include:

- **35%** improvement in demonstrated positive parenting practices
- **39%** increase in demonstrated parent skill development
- **29%** improvement in child's physical and mental health
- **43%** improvement in child's participation in routine and expectations

Family Foster Home Licensing & Certification

North Dakota has three Levels of Licensure administered by Children and Family Services for family foster care providers:

License - Full
- Care to up to six children in need of out of home placement, which may include long term placements, respite or shelter care.
- Care to children in need of treatment by specialized providers thru Nexus PATH.

License – Relative
- Care to up to six relative children only.
- No placement maximums unless in treatment foster care.

Certified
- Care to up to three children in need of an out of home safety plan, short-term only; 30 days or less.
- Emergency shelter care is offered during a crisis for 14 days or less.
- Respite care is planned and offered for 4 days or less.

The CFS Licensing Unit works with Tribal Nations and Nexus PATH to approve family foster homes based on NDCC 50-11, NDAC 75-03-36 and licensing policy 622-05.

Eligibility
- Individuals must be age 21.
- Approved fingerprint based criminal background check, including passed child abuse and neglect index check.
- Approved home study assessment.
- Financially stable with reasonable resources to meet the needs of your home.
- Demonstrate the ability to interpret and understand the laws, rules and policies, child case plans, medication labels, etc.

Services
- Family foster care
- Respite care
- Emergency/ Shelter care on-call
- Treatment foster care
- Specialized care to children with complex behavioral health needs, medically fragile and adolescents under the custody of Division of Juvenile Services.

Roles and Responsibilities
- Provide safe care and basic needs.
- Provide daily cares and supervision.
- Provide transportation to school, visitation, activities and medical appointments.
- Communicate with professionals to ensure services are met for the child.
- Participate in case planning meetings.
- Participate in cultural activities for the child.
- Acknowledge foster care is intended to be temporary and offering foster care is a safety service to the community.

That's a Fact

On any given day in North Dakota, we have roughly:

- 1,150 children in foster care
- 150 licensed relatives
- 600 licensed providers

The data below indicates the volume children in North Dakota foster care is trending downward. This consistent trend is helpful, but there is constant effort made toe ensure provider homes are available and willing to meet the needs of the children in care based on age, gender and complexity of needs.

Children In North Dakota Foster Care vs. Provider Trendline

On average, North Dakota data representing children in foster care includes:

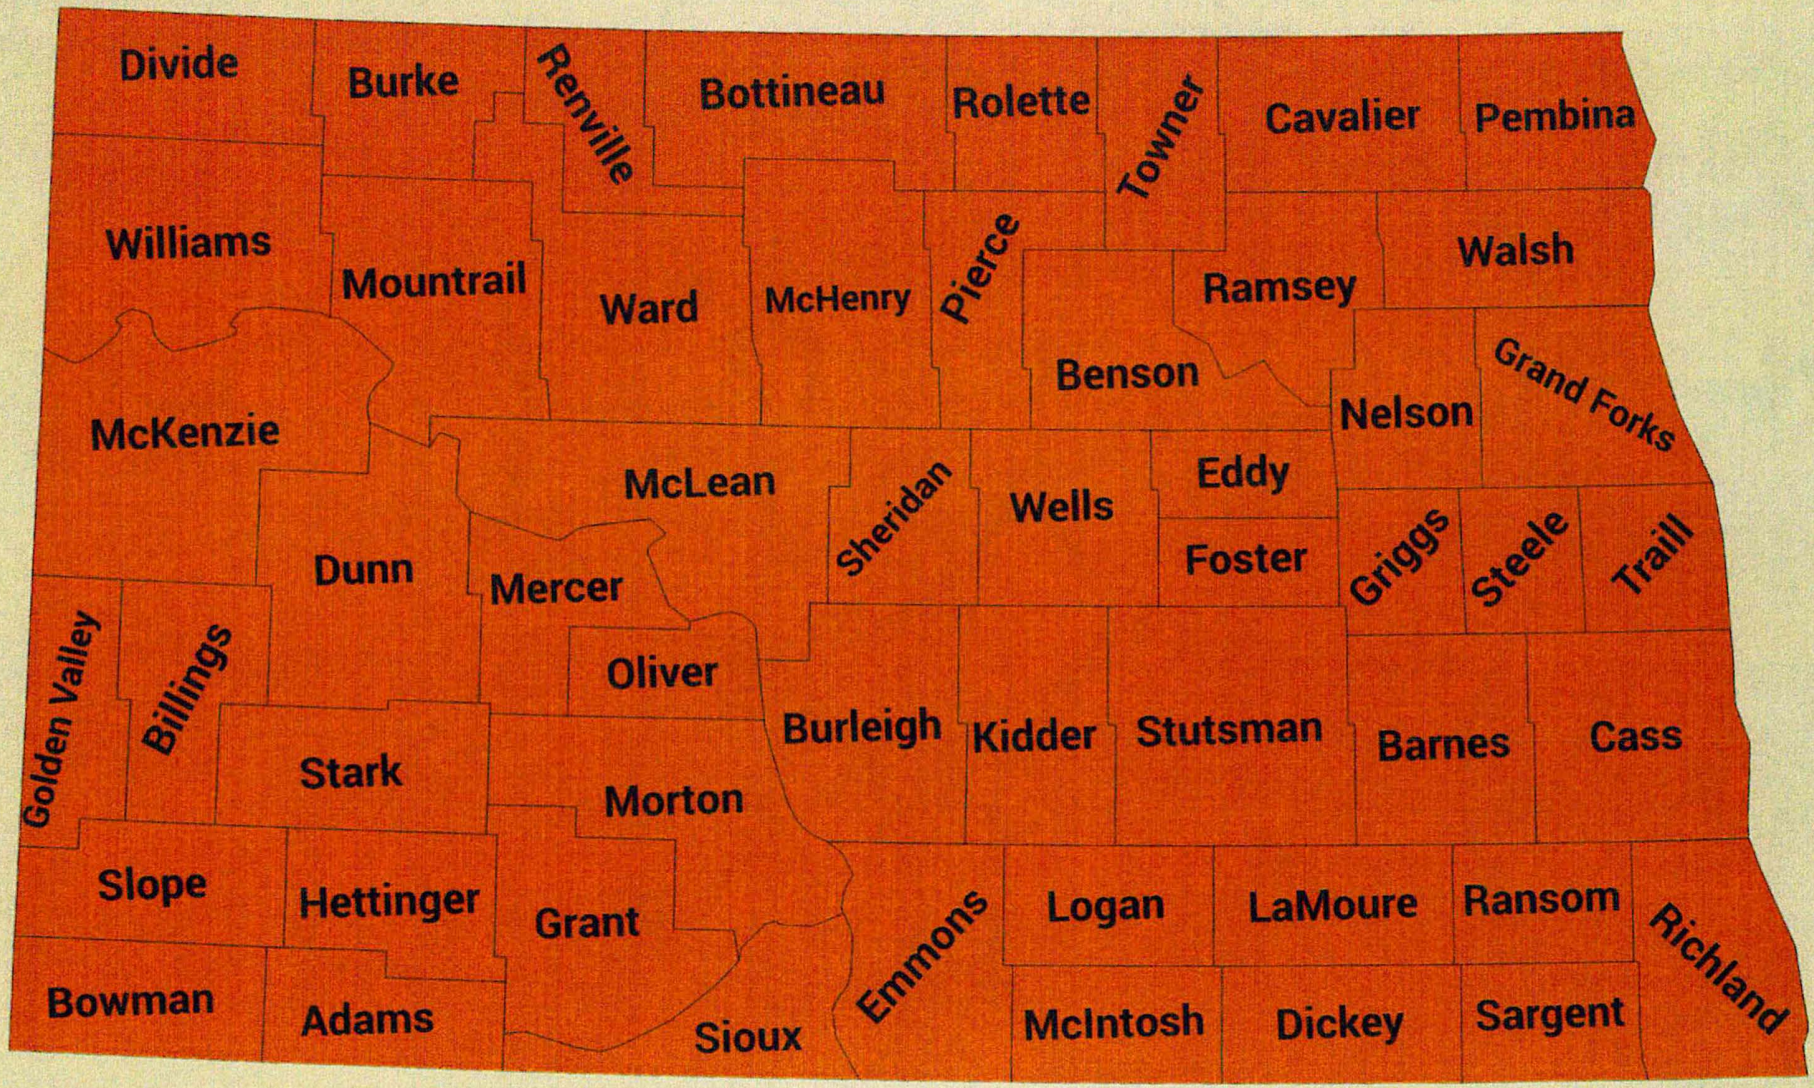
Ages of Children

- 39% ages 5 and under
- 35% ages 6 - 12
- 20% ages 13 - 17
- 6% ages 18+

Custodian of Children

- 81% Human Service Zone and 18+
- 18% Tribal IV-E
- 1% Division of Juvenile Services

Length of Stay for the children in care



- 43% in care less than one year, with 33% of those cases in care 90 days or less
- 23% in care over 1 year, less than 2 years
- 14% in care over 2 years, less than 3 years
- 19% in care greater than 3 years; longest time for a child is 4682 (12.8 years). These cases present with a variety of complex needs, one contributing factor is their length of stay without permanency.

Majority (95%) of the children are placed in a family setting; 16% unlicensed caregivers, 75% with a licensed foster home (relative or unrelated), and 3% in supervised independent living apartments. Case managers work diligently to place children in the least restrictive level of care to meet the child's needs. Since 2019, HHS has seen a reduction in the number of children placed in long term residential settings and an increase in the number of relatives or known caregivers!

Healthy Families - Statewide

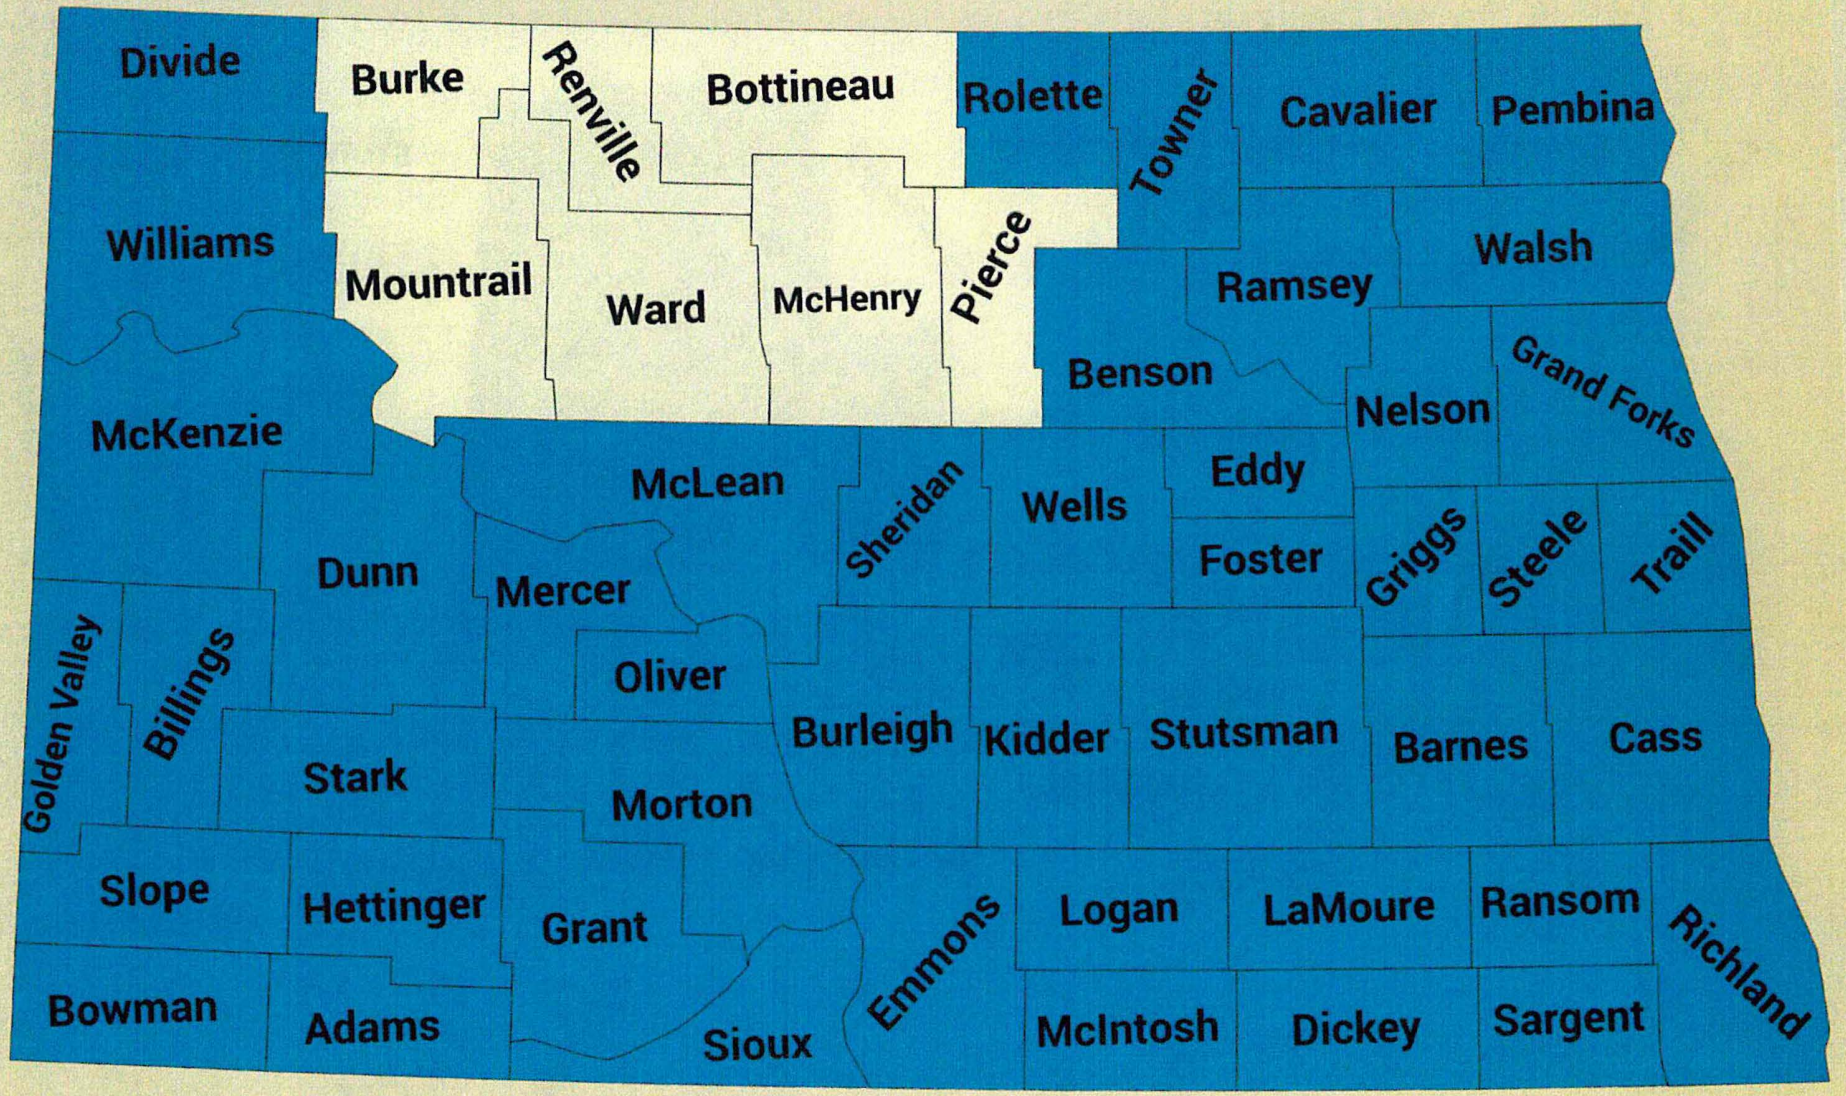
Home visitation program to strengthen family functioning,
reduce risks and build parent protective factors.
Target Population: birth-5yrs
Number of Children Served: 312

IV-E Prevention Services

Outreach services available in family home:

- Brief Strategic Family Therapy
- Functional Family Therapy

Healthy Families available statewide



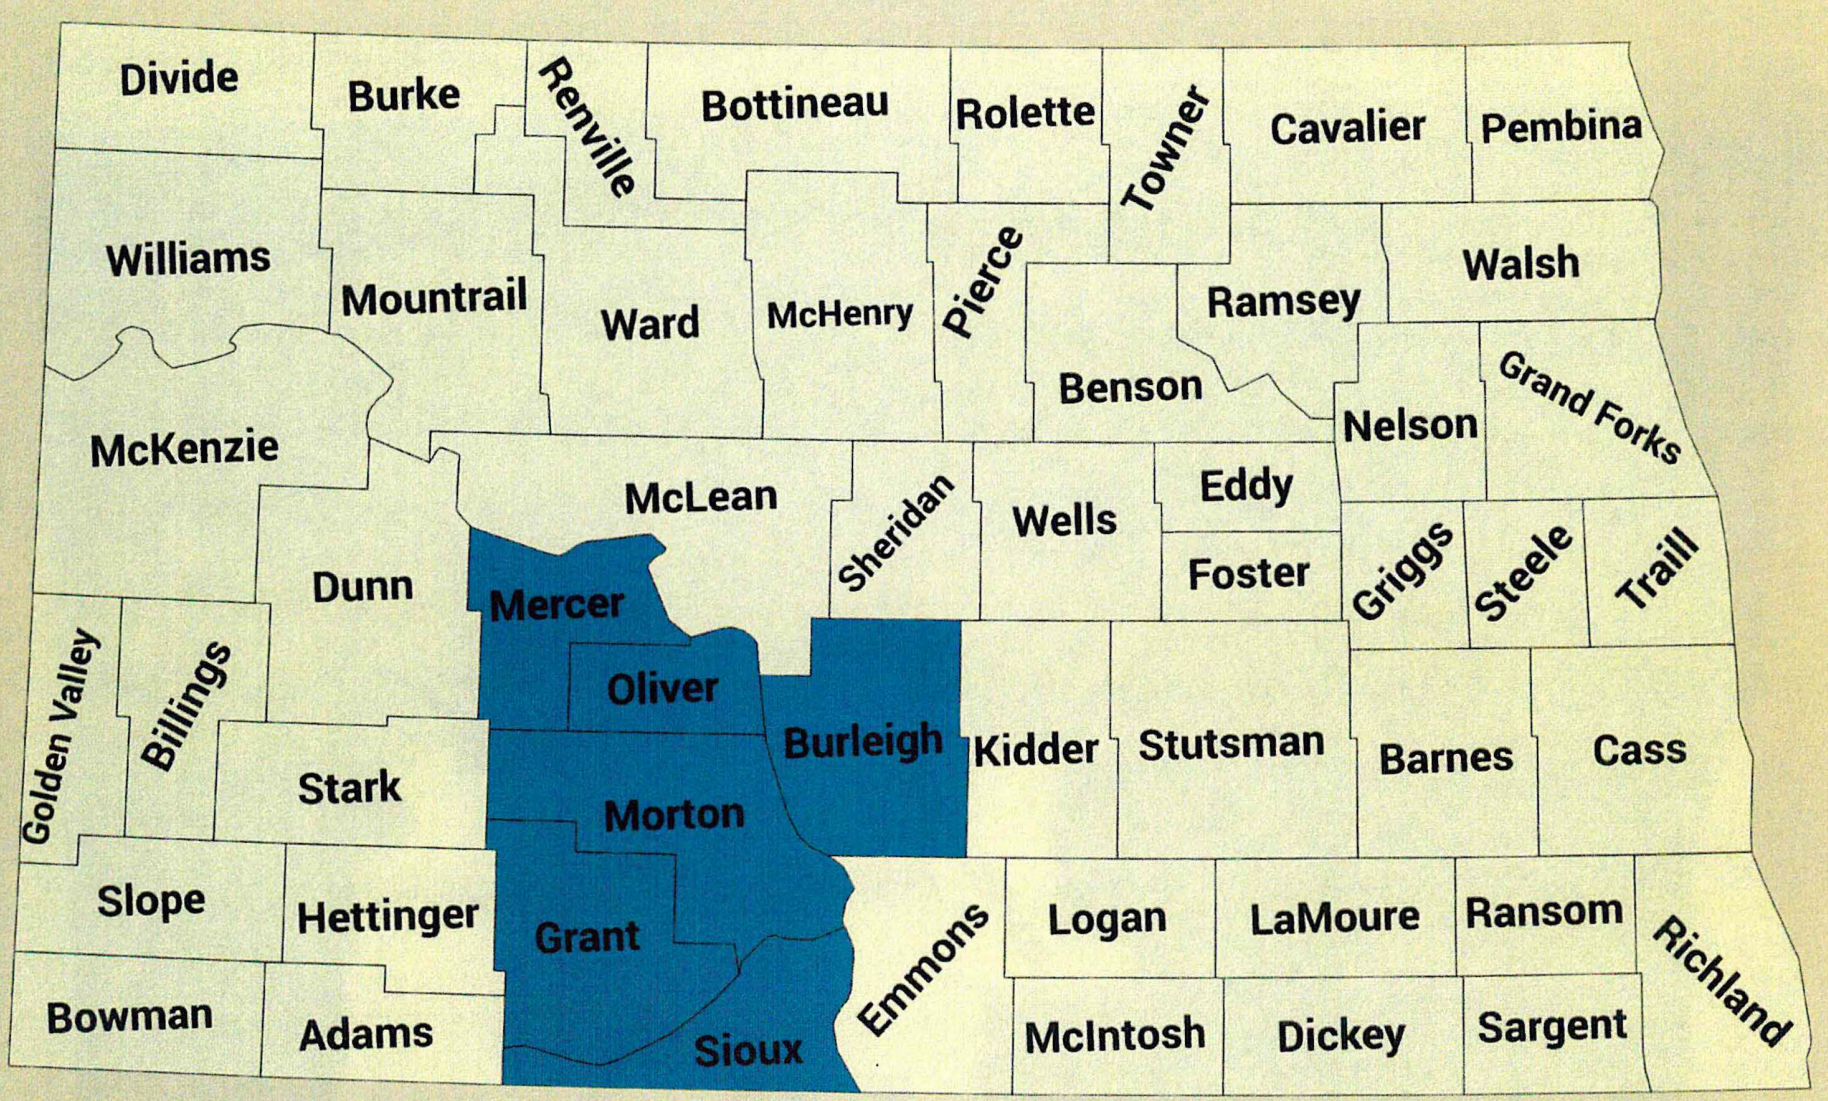
In-office Services:

- Family Check-Up/Everyday Parenting
- Multisystemic Therapy
- Nurse Family Partnership
- Parent Child Interaction Therapy

Screening Provider available statewide

(Circles represent 50 mile radius)

Functional Family Therapy

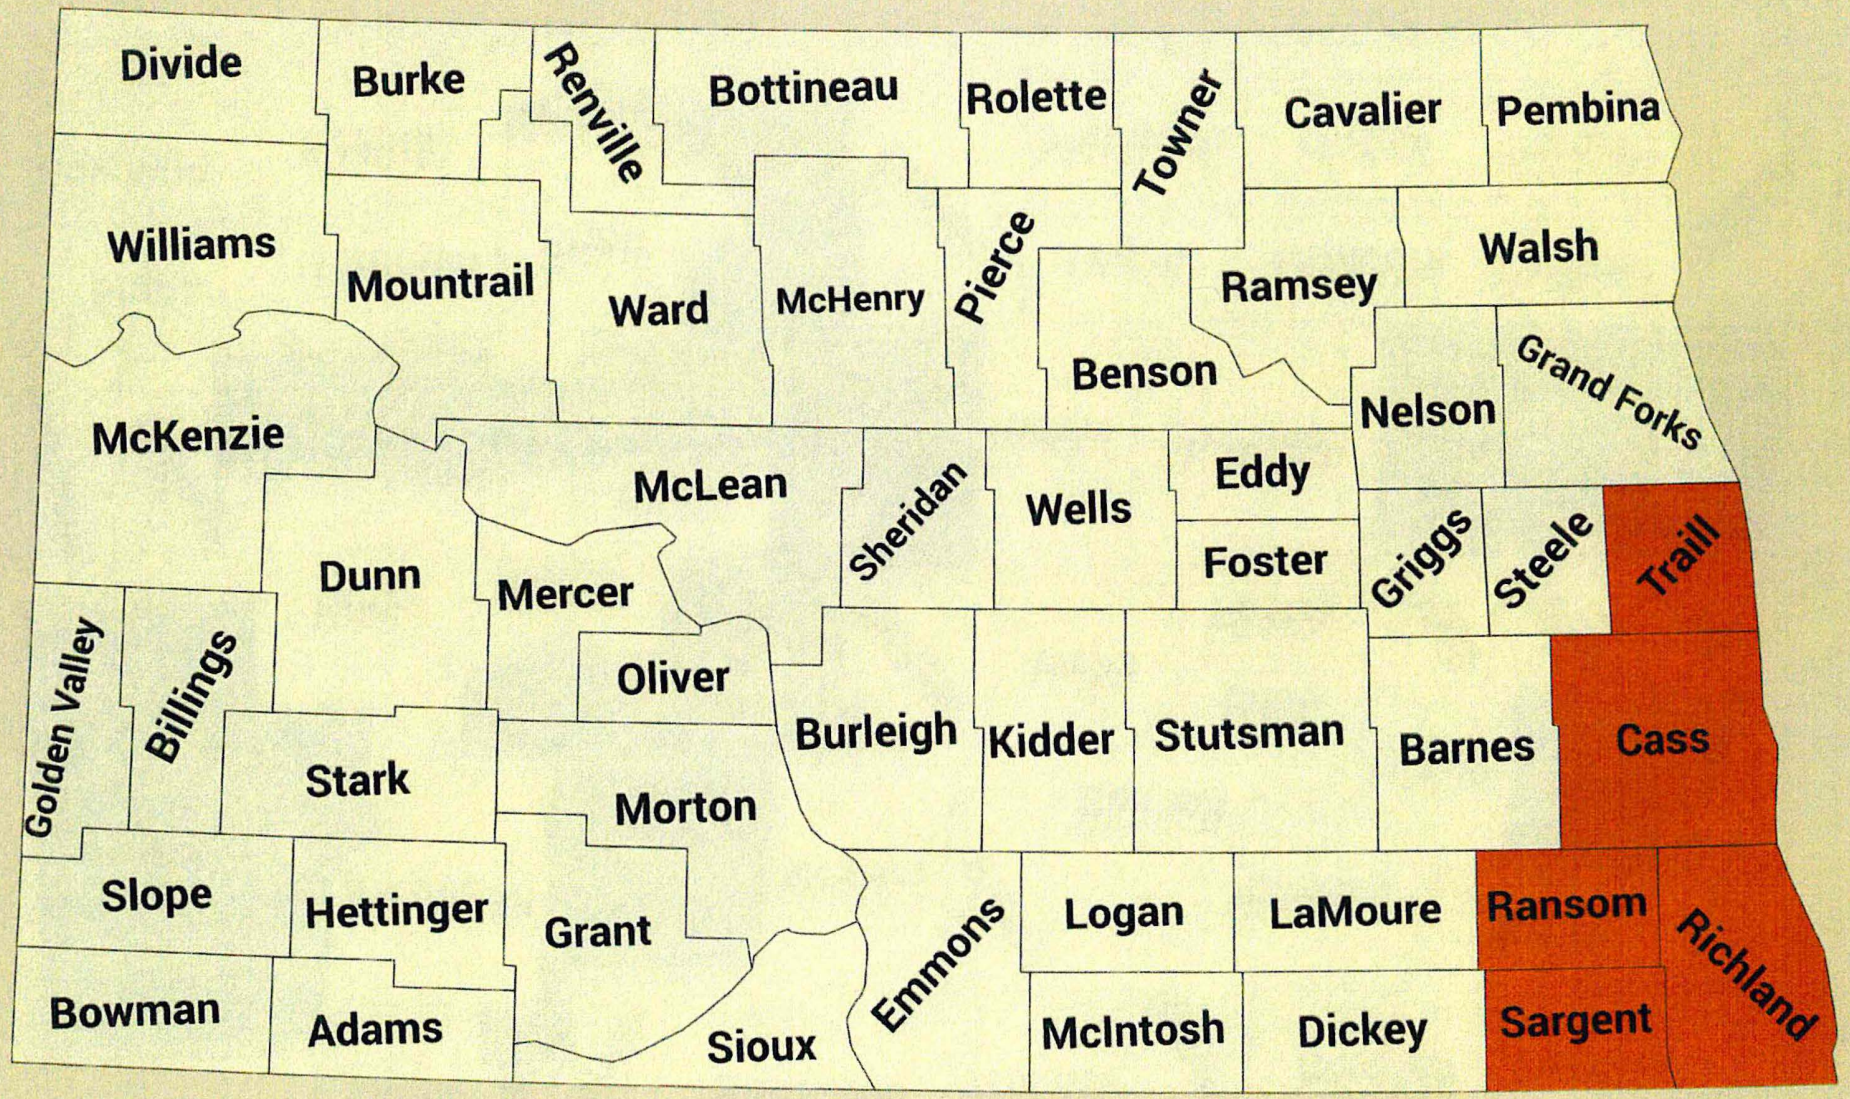


Beginning in September 2024, family therapy for youth experiencing behavioral or emotional concerns.

Target Population: 11-17yrs

Number of Children Served: 27

Nurse Family Partnership

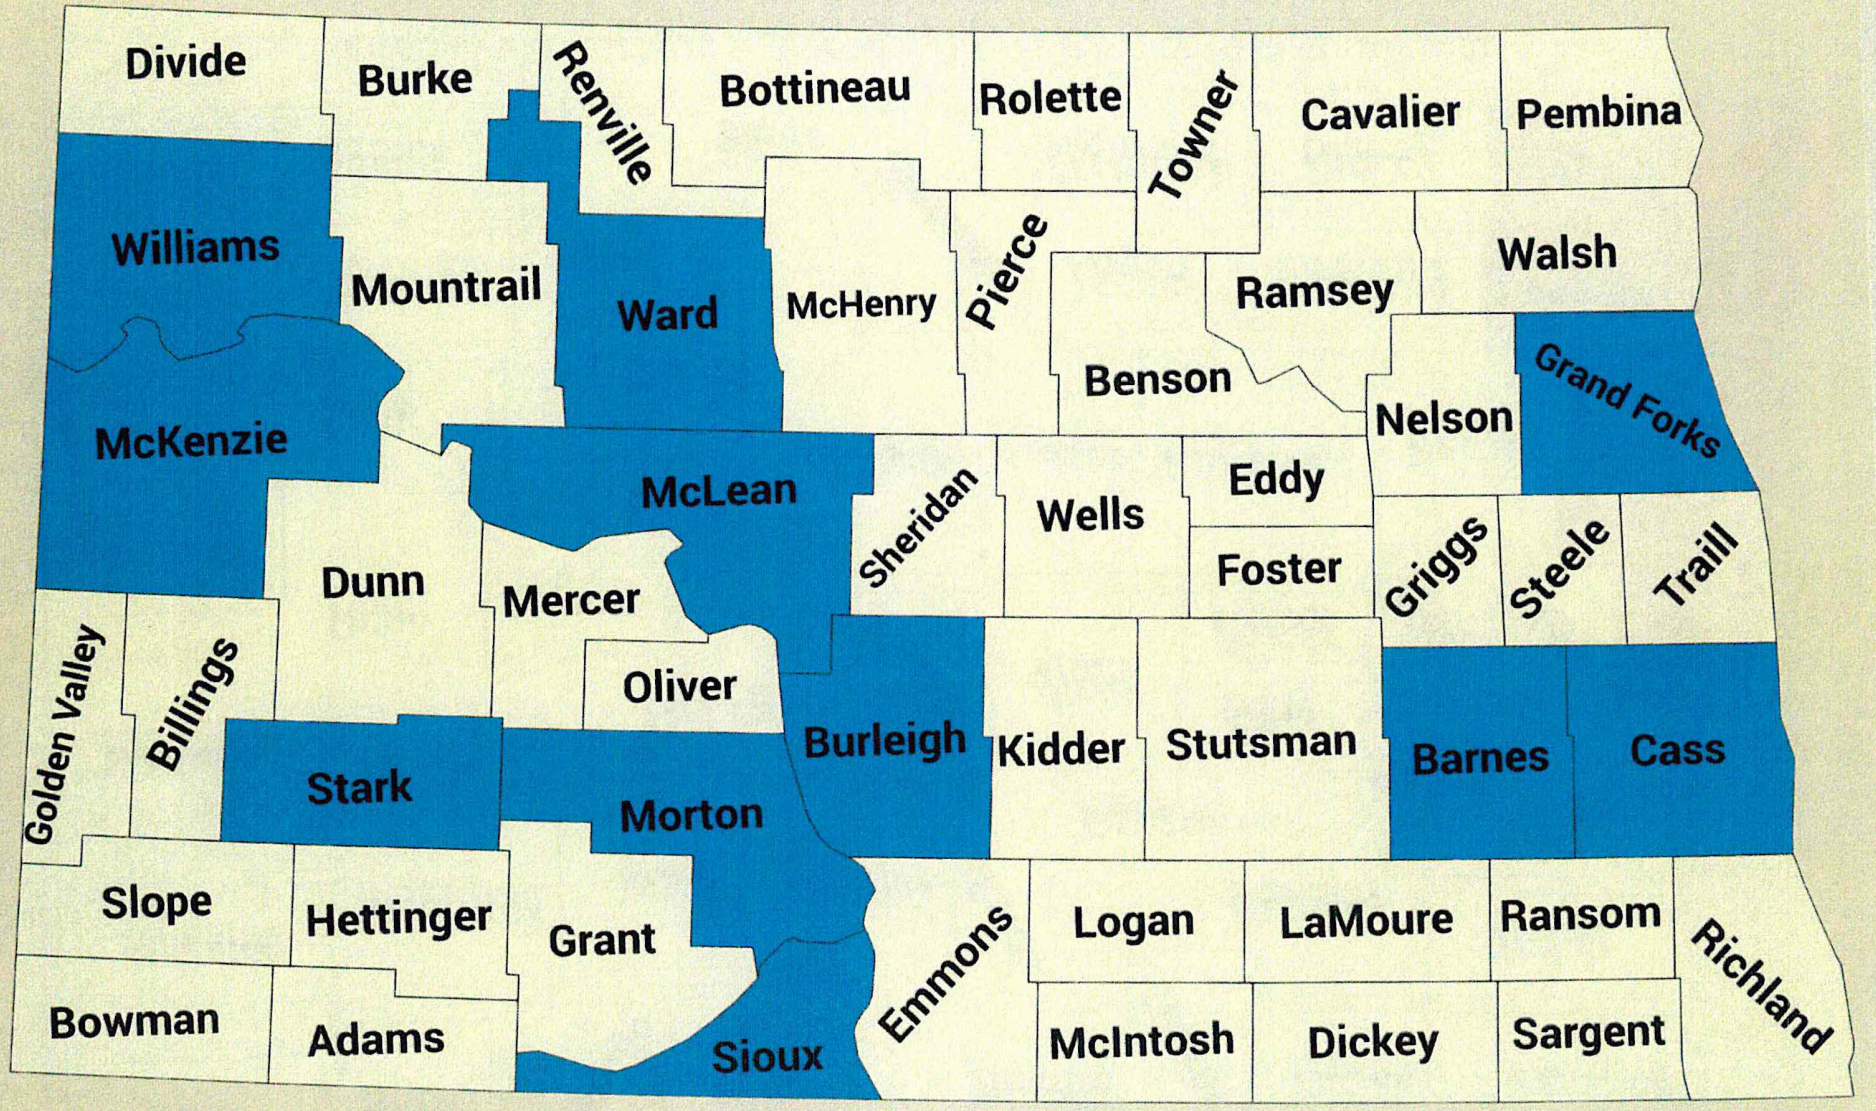


Home visitation by nurses to improve health, relationships and economic well-being of mothers and their infants.

Target Population: birth-2yrs

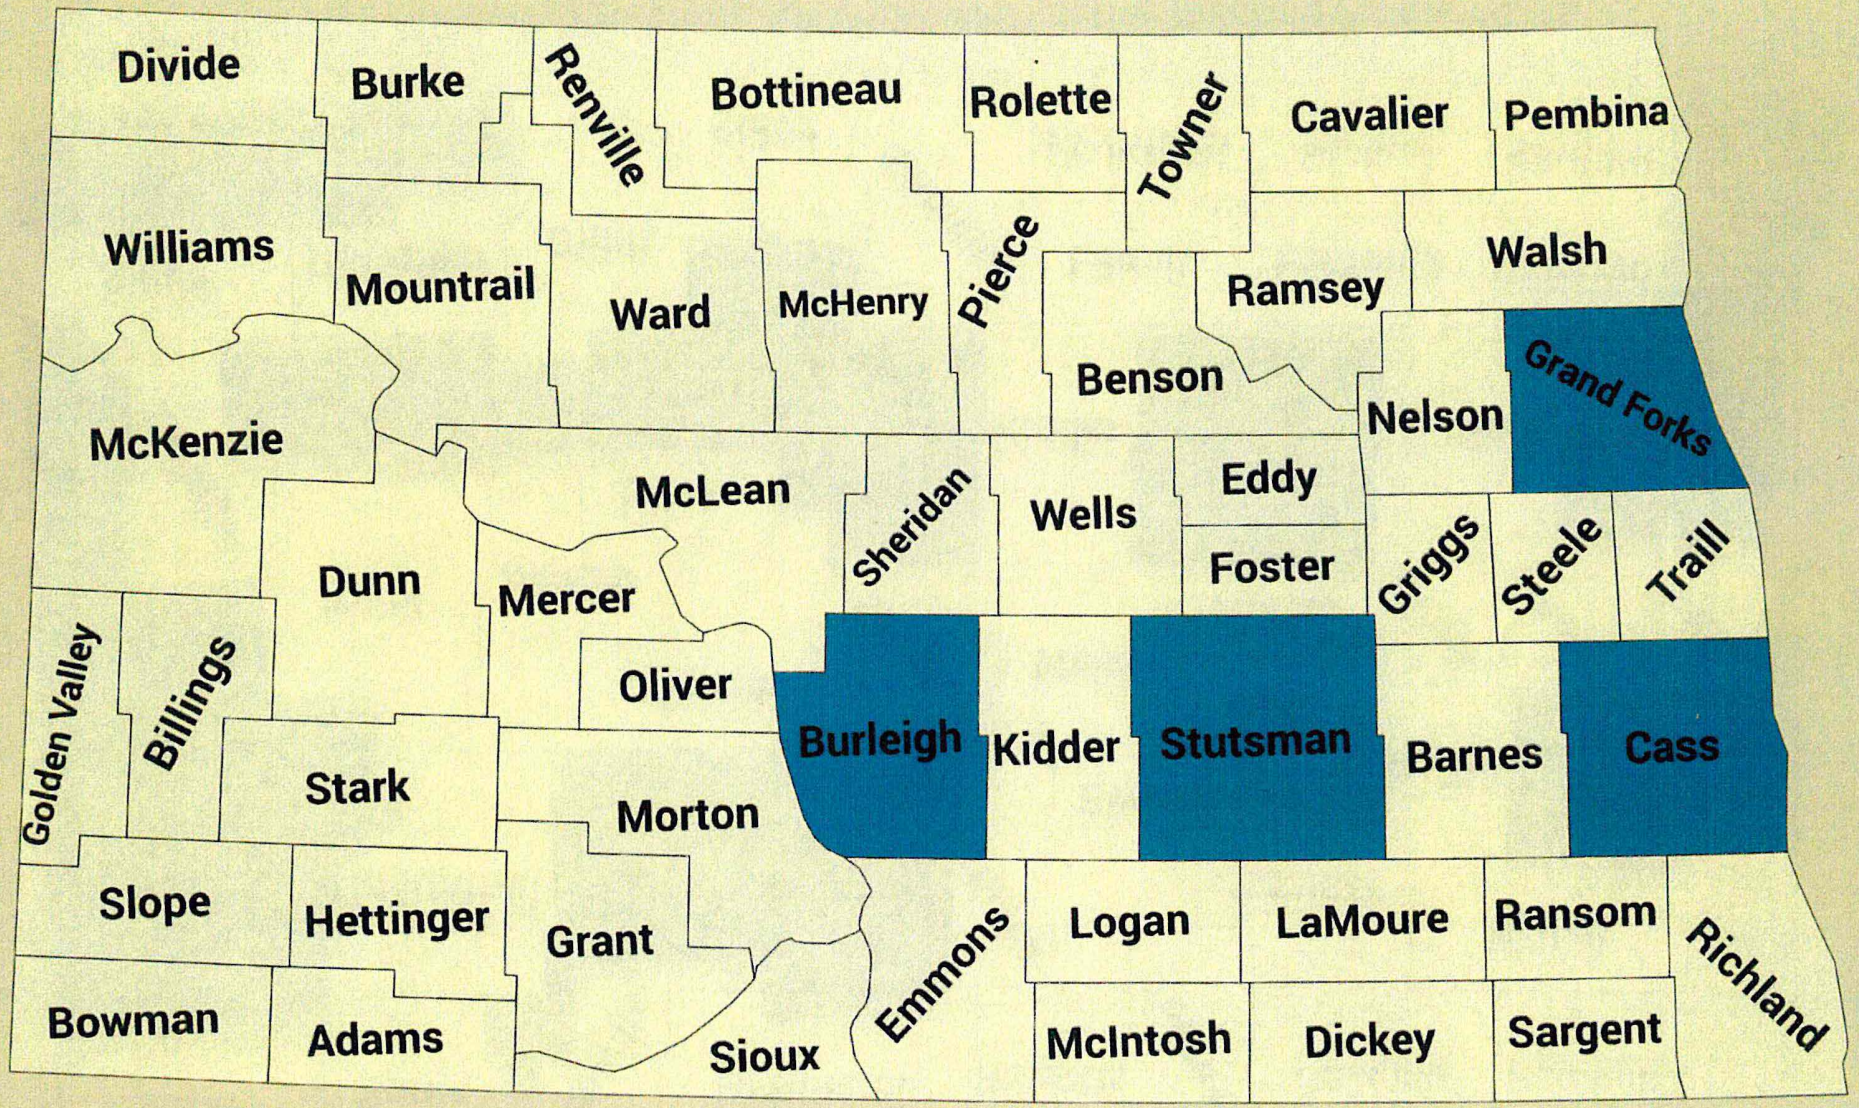
Number of Children Served: 1

Multisystemic Therapy



Intensive treatment and intervention for high-risk youth that addresses the core causes of delinquent and antisocial conduct.

Target Population: 12-17yrs

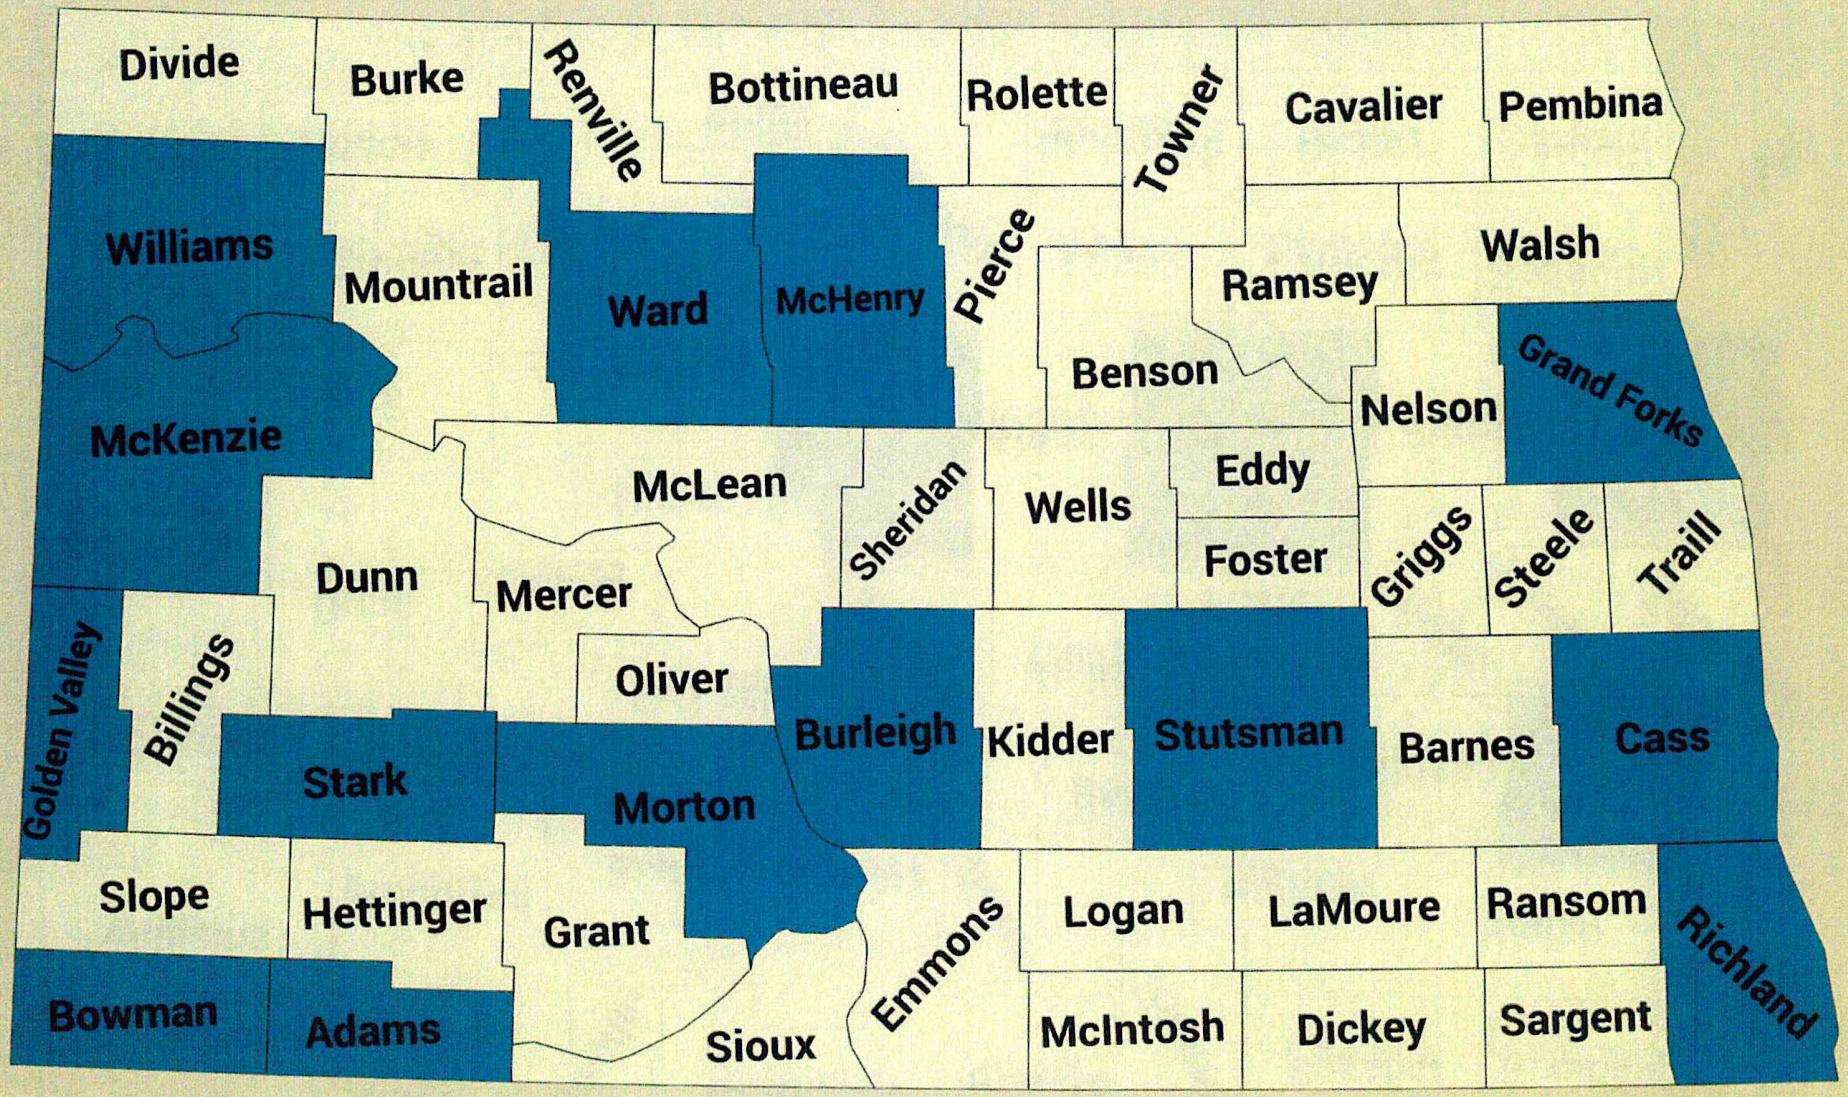


Number of Children Served: 46

Family Check-Up/Everyday Parenting

Brief, strengths-based intervention for families with children
with emotional, behavioral, and academic concerns and supports positive parenting.
Target population: 2-17yrs
Number of Children Served: 123

Parent Child Interaction Therapy



Therapy that coaches' parents with children experiencing emotional and behavioral concerns.

Target Population: 2-7yrs

Number of Children Served: 168

Brief Strategic Family Therapy

Intensive family intervention for youth with behavior/conduct concerns, substance abuse and delinquency.

Target population: 6-17yrs

Number of Children Served: 119

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
013125

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report**.**

8:31 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Outcome Addiction
- Behavioral Health Services
- State Hospital Design
- Project Guiding Principles
- Cost Validation
- Overview of North Dakota State Hospital
- Budget

8:32 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, followed up with committee requests #33156, # 33217, #33216.

8:43 a.m. Mike Van Klei, Tegra Group, testified and presented the plan for the proposed North Dakota State Hospital #33156.

8:48 a.m. Mark Honzay, Principal Healthcare Architect, JLG Architect, testified and presented the design process for the proposed North Dakota State Hospital # 33156.

9:05 a.m. Todd Medd, Health Practice Leader, JLG Architect, testified and presented the design overview for the proposed North Dakota State Hospital # 33156.

9:45 a.m. Joanna Slominski, General Manager, Mortenson Construction, testified and presented projected total project cost for the proposed North Dakota State Hospital #33156.

9:54 a.m. Mark Honzay, Principal Healthcare Architect, JLG Architect, testified on the project schedule of the proposed North Dakota State Hospital #33156.

10:06 a.m. Joanna Slominski, General Manager, Mortenson Construction, testified to the use of local contractors #33156.

10:08 a.m. Mark Honzay, Principal Healthcare Architect, JLG Architect, testified on future progress of the proposed North Dakota State Hospital #33156.

10:08 a.m. Dr. Eduardo Yabut, Medical Director, Behavioral Health Division, Health and Human Services. testified on the future delivery of care in the proposed North Dakota State Hospital #33156.

10:20 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, gave closing comments.

10:32 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, introduced the current State Hospital leadership team # 33157.

10:32 a.m. Dr. Eduardo Yabut, Medical Director, North Dakota State Hospital, Behavioral Health Division, Health and Human Services, presented and testified on the current state of the North Dakota State Hospital #33157.

10:46 a.m. Aaron Olson, Superintendent, North Dakota State Hospital, Behavioral Health Division, spoke to a recent article that highlighted Minnesota's experience that he will share with the committee.

10:49 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, spoke to the four regions that the State Hospital provides acute services for.

10:50 a.m. Dr. Eduardo Yabut, Medical Director, North Dakota State Hospital, Behavioral Health Division, Health and Human Services testified and continued with testimony #33157.

11:26 p.m. Aaron Olson, Superintendent, North Dakota State Hospital, Behavioral Health Division, Health and Human Services testified and presented the budget overview #33157.

11:37 a.m. Courtney Pedersen, Assistant Chief Operating Officer, Health and Human Services spoke to the operational salary budget.

11:38 a.m. Aaron Olson, Superintendent, North Dakota State Hospital, Behavioral Health Division, Health and Human Services testified and continued with testimony #33157.

11:40 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, testified to overtime #33157.

11:41 a.m. Aaron Olson, Superintendent, North Dakota State Hospital, Behavioral Health Division, Health and Human Services testified and continued with testimony #33157.

11:45 a.m. Dr. Eduardo Yabut, Medical Director, North Dakota State Hospital, Behavioral Health Division, Health and Human Services addressed salon services.

11:46 a.m. Aaron Olson, Superintendent, North Dakota State Hospital, Behavioral Health Division, Health and Human Services testified and continued with testimony #33157.

11:49 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, spoke to overtime testified about one-time expenses.

11:51 a.m. Aaron Olson, Superintendent, North Dakota State Hospital, Behavioral Health Division, Health and Human Services testified and continued with testimony #33157.

11:53 a.m. Dr. Eduardo Yabut, Medical Director, North Dakota State Hospital, Behavioral Health Division, Health and Human Services, responded to future growth.

11:54 a.m. Aaron Olson, Superintendent, North Dakota State Hospital, Behavioral Health Division, Health and Human Services testified and continued with testimony #33157.

11:56 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, distributed the State Hospital revenue #33270.

11:57 a.m. Courtney Peterson, Assistant Chief Financial Officer, Health and Human Services testified to the State Hospital revenue #33270.

Additional written testimony:
Tim Mathern, North Dakota Senator, in opposition #33072.

12:00 p.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

January 31, 2025

House Appropriations Committee, Human Resource Division, State Hospital Discussion

Chairman Nelson and members of the Committee,

My name is Tim Mathern. For 50 years I have been working in the field of behavioral health including being guardian ad litem for persons at the state hospital and working as a social worker in outpatient and inpatient settings. Also, I am the senator from District 11.

HB 1012 presents us with a pivotal and historic opportunity to shape a behavioral health care system that will meet the needs of North Dakotans with efficiency, equity, and sustainability for generations to come. I urge you to support a regional psychiatric system of care which suggests a small number of beds needed at the state hospital.

I suspect we share a commitment to finding solutions to a behavioral health crisis. While a new centralized state hospital in Jamestown has been proposed, I believe that approach does not address the long-term needs of our state. Evidence and experience show that centralized care models often fail to provide the accessibility, resilience, and cost-effectiveness required in a state as geographically vast and rural as ours. I am afraid making a big investment at the state hospital takes our legislative eyes and spending off of the bigger picture.

A regional approach aligns with the Council of State Governments' recommendations, which emphasizes the critical role states play in building local crisis systems that move beyond stand-alone services to create comprehensive systems with an integrated continuum of care (Blandford & Ueberall, 2024). Key components include:

Investments in Regional Care: We need to incentivize health facilities in each of the four regions anchored with the largest cities of Fargo, Grand Forks, Minot and Bismarck. Some suggest too that we need to prevent large medical facilities from denying care for persons who suffer from mental illness.

A Focused Role for the State Hospital: Transitioning Jamestown State Hospital to specialize in forensic evaluations, correctional custody, and civil commitments.

Empowering Regional Solutions: Allowing the Department of Health and Human Services to collaborate with local providers on region-specific care models, some acute, some residential, and some outpatient.

This approach ensures that behavioral health care is rooted in the communities it serves. Decentralized care is supported by research, with a study showing a 65% reduction in hospital days and a 50% reduction in costs compared to centralized models (Integrityinc.org, 2015). It also connects individuals to local resources, family networks, and social supports, key elements in achieving and maintaining lasting recovery.

A large facility would outdo specialized staffing resources available in the city of Jamestown and be outdated before even fully operational. By contrast, decentralizing care into our four regions ensures resilience, scalability, and adaptability to changing needs over time. Our present facility in Jamestown is not fully staffed and another sister agency, DOCR, has testified to us in the Senate, that finding staff in Jamestown is the most difficult of the cities they operate in.

This session is more than a debate about infrastructure, it is a chance to build a legacy rooted in North Dakota's values of resilience, innovation, and care for our communities. Are there other important ingredients? Yes, and I note three, 1. Stable top leadership at our largest state agency, ND DHHS, 2. Implementation of the Certified Community Behavioral Health Clinic system, and 3, a Medicaid amendment regarding the IMD, 1965 Institute for Mental Disease provision, which would introduce market principles resulting in additional behavioral health facilities.

Governor Armstrong has urged us to be innovate and bold. I invite you to make this vision a reality. We can lead the way in creating a system that prioritizes accessibility, sustainability, and the well-being of all North Dakotans.

Thank you for your dedication to our state and your leadership on this critical issue.

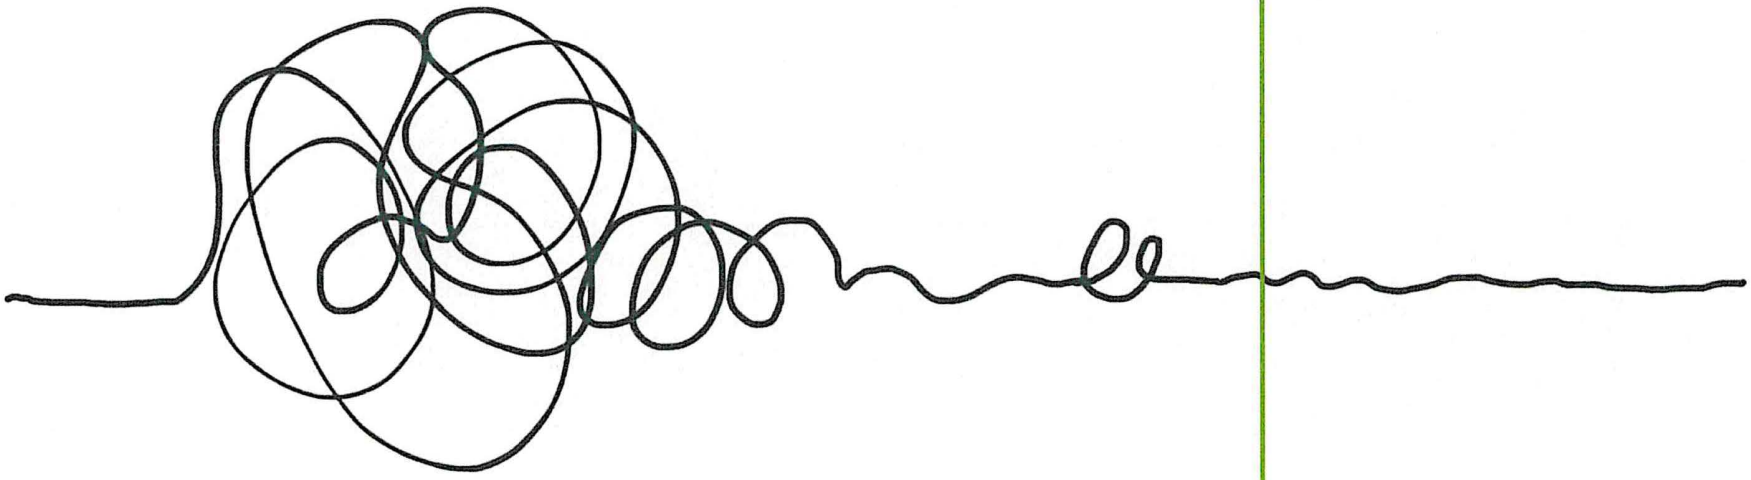
Architect & Engineering	Wayfinding & Signage Design	Design Team	$ 10,000	$ 33,250
Architect & Engineering	Kitchen Shell Design	Design Team		$ 5,698
Architect & Engineering	Low Voltage Design	Design Team	$ 204,058	$ 183,652
Design Reimbursables		Design Team	$ 70,483	$ 25,500
Physcist (X-Ray)				$ 10,000
MEP Systems Commissioning				$ 20,570
Building Envelope Commissioning				$ 85,867
Project Management Services			$ 735,000	$ 220,000
Project Management Services Reimbursables			$ 17,553	$ 5,254
Facility Tours			$ 35,000	
Mock Ups			$ 34,600	$ 20,200
Low Voltage / Technology / Audio/Video			**$ 70,000**	**$ -**
NDIT Fees			$ 70,000	
CONSTRUCTION COSTS			**$ 306,875**	**$ 200,875**
Construction	Preconstruction	Mortenson	$ 306,875	$ 108,125
State Health Department Plan Review and Permit Fees				$ 92,750
OWNER HELD CONTINGENCIES & ALLOWANCES			**$ -**	**$ 101,449**
Owner Contingency				$ 57,971
Design Contingency				$ 43,478
GRAND TOTAL			**$ 12,500,000**	**$ 3,000,000**

OUTCOME OF THE 68TH NORTH DAKOTA LEGISLATIVE ASSEMBLY

- State of ND approved resources to begin design of new state hospital
- JLG Architects was engaged to lead the design process
- Began design process in July of 2023
- JLG teamed with architecture+ out of New York - National psychiatric hospital design expert
- The team was asked to lead an open, engaging, and collaborative design process
- Listen to NDSH and ND HHS stakeholders and users, understand current and future needs
- Understand challenges, goals, opportunities
- Benchmarked program against national public psychiatric hospitals and evidence-based design solutions
- State Procured Owners Representative – Tegra and Construction Manager – Mortenson to understand the construction and total project cost for the determined design solution

The Design Process



Site Selection & Design Overview

Benchmarks & Cost Validation

Project Scope Update

DESIGN PHASES

WE ARE HERE

PREDESIGN

Understand the Problem
Establish the Program
Understand the Budget
Evaluate the Site

SCHEMATIC DESIGN

Refine the Project Scope
Define Space Relationships
Define the Flow of Spaces
Identify Basic Building Systems
Verify the Project Budget

DESIGN DEVELOPMENT

Develop Detailed Plans, Sections, Elevations
Refine Exterior Image/Character
Establish Finishes
Coordinate Building Systems
Confirm Budget
Mock-Ups

CONSTRUCTION DOCUMENTS

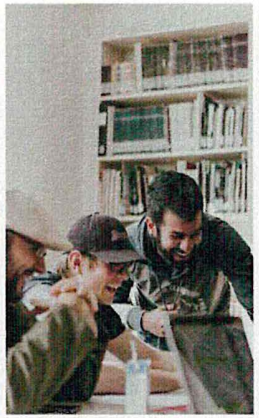
Develop Construction Details and Product Specs
Final Systems Coordination
Perform Final Quality Assurance Review
Verify Construction Cost and Project Budget
Issue for Plan Review and Bidding

PROJECT GUIDING PRINCIPLES

"OUR MISSION IS DEDICATED TO THE CARE, TREATMENT, AND SUPPORT OF EACH INDIVIDUAL'S JOURNEY TOWARD WELLNESS AND RECOVERY WITHIN A SAFE ENVIRONMENT THAT PROMOTES REINTEGRATION IN THE COMMUNITY."

RECOVERY

Foster the reintegration of clients into the community by empowering them to develop the skills and awareness needed to lead successful lives despite illness or injury. The building should facilitate this by ensuring separation from the prison system and incorporating features like enclosed courtyards, outdoor spaces, and natural light to create a supportive environment.



REINTEGRATION

Facilitate individualized reintegration at various levels by designing a home-like environment, offering access to community spaces, creating a familiar and less traumatizing setting, and providing a testing ground for tailored caregiver-patient interactions.

SAFETY

Prioritize comprehensive safety for staff, clients, visitors, contractors, and the community by implementing anti-ligature measures, minimizing blind spots, ensuring the proximity of staff to clients, and integrating alert systems, duress systems, and tracking mechanisms for both clients and staff.

FLEXIBILITY & EFFICIENCY

Maximize space flexibility and efficiency by creating adaptable units capable of shifting or opening specialized care, incorporating smart technology, and strategically placing spaces to enable more efficient and responsive healthcare delivery, and ensuring a dynamic response to changing needs.

COURAGE EVOLUTION & EXPLORATION

Leverage research insights to design an innovative and entirely new environment that actively supports clients in their recovery, fostering a space that encourages courage, exploration, and personal evolution rather than merely rebuilding or rehashing existing models.

CLIENTS FIRST

Prioritize clients by placing their needs and experiences at the forefront of every aspect so that decisions are centered on enhancing the overall client experience.

INTEGRATION | EQUITABLE COMMUNITIES | WELL-BEING | CHANGE | DISCOVERY | ECOSYSTEMS | WATER | ENERGY | RESOURCES | ECONOMY

THE WHY

IMPROVED CARE & EXPERIENCE

- Increase client capacity without significant staff increases
- Increased capacity will contribute to reducing the wait list for admissions
- Improve client & staff safety, security and well-being
- Modern healthcare facility design, appropriate technology, enhanced security and modern amenities including private client rooms, advanced treatment areas, and therapeutic spaces

EFFICIENCY

- The building will be more efficient to maintain, heat, and cool
- More efficient and concise layout which will make it easier to safely and effectively staff the facility
- Consolidated building footprint which will reduce time, staff redundancy, and steps, allowing staff to care for clients more effectively

COST-EFFECTIVE SOLUTION

- Renovating the existing building to the level that's needed is cost prohibitive
- Renovation would be a significant disruption and will likely reduce bed capacity during a long construction period
- New location will visually disassociate the hospital from JRCC, but would still allow specific service agreements & efficiencies to remain
- More cost effective to operate, staff, and maintain a single 295,815 SF facility vs. the existing multi-building 546,037 SF NDSH campus.

1 HENRY LAHAUG BUILDING
142,762 SF

MEETING HISTORY

	MEETING TITLE	DATE	LOCATION	AUDIENCE *(see project team pages for specific individuals)*	HIGH-LEVEL MEETING SUMMARY *(meeting minutes provided in appendix)*
PREDESIGN PHASE MEETINGS	Project Kick-off	June 26, 2023	ND State Capitol, Bismarck, ND	Chris Jones, Mona Sara Stoll, Pam Sagness, Sally Meier, Julie Howe, Todd Medd, Mark Hanzey	Reviewed Project Scope (goals, program), Schedule, Site Selection Process, Stakeholders, Owner's Representatives, construction delivery method, professional services, and next steps.
	Owner Kick-off	August 8, 2023	Remote via MS Teams	Chris Jones, Todd Medd, Mark Hanzey	Reviewed Stakeholders, Owner's Rep timeline, CMAR RFQ and Timeline, Schedule and Workshops, Site Selection Process updates, Professional Services updates, and communication plan.
	Owner Meeting	August 15, 2023	Remote via MS Teams	Chris Jones, Mark Hanzey	Reviewed Stakeholders, Owner's Rep timeline, CMAR RFQ and Timeline, Schedule and Workshops, Site Selection Process updates, Professional Services updates, and communication plan.
	Pre Design Kick-off Workshop	August 16, 2023	Remote via MS Teams	Chris Jones, Pam Sagness, Dr. Eduardo Vallat, Maria Neuet, Todd Medd, Mark Hanzey, Shountel Fett, Frank Pitt, Michael Berger	Introductions, project kick-off, establish project context and preliminary guardrails and guidance. Discuss schedule, preliminary benchmarking, establish user groups, and next steps.
	Owner Meeting	August 22, 2023	Remote via MS Teams	Chris Jones, Todd Medd, Mark Hanzey	Reviewed Stakeholders, Owner's Rep timeline, CMAR RFQ and Timeline, Future Workshops, Site Selection Process updates, Professional Services updates, and communication plan.
	Owner Meeting	August 29, 2023	Remote via MS Teams	Sara Stoll, Amy Jongeling Johnson, Dr. Vallat, Aaron Olson, Ben Tatum, Todd Medd, Mark Hanzey	Reviewed Stakeholders, Owner's Rep timeline, CMAR RFQ and Timeline, Future Workshops, Site Selection Meeting, Professional Services updates, and feedback on first design work session.
	Owner Meeting	September 5, 2023	Remote via MS Teams	Chris Jones, Pam Sagness, Sara Stoll, Amy Jongeling Johnson, Dr. Vallat, Todd Medd, Mark Hanzey	Reviewed Stakeholders, Owner's Rep timeline, CMAR RFQ and Timeline, Future Workshops, Site Selection Meeting, Professional Services updates.
	Governing Body Meeting	September 11, 2023	Remote via MS Teams	ND State Hospital Governing Body	Project updates
	Owner Meeting	September 12, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, JLG	Reviewed Stakeholders, Owner's Rep timeline, CMAR RFQ and Timeline, Future Workshops, Site Selection Meeting, Professional Services updates.
	Pre Design Workshop #1	September 13 & 14, 2023	Onsite at NDSH	NDSH Executive Leadership, JLG, architecture+, A.I. NDSH User Groups	The existing NDSH facilities were toured, and team members visited a number of potential relocation sites. After a virtual visit to some peer hospitals and a discussion about the vision and drivers of those projects and an review of the benchmarks that would help to target NDSH's probable size and cost, participants confirmed the project's key programming drivers in terms of things like the project's overarching vision, goals, and adjacencies together with the number and distribution of beds and other data driving individual program elements. Using questionnaires, individual User Group meetings focused on identifying performance criteria and issues that would influence each department's space program.
	Owner Meeting	September 19, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, JLG	Reviewed Stakeholders, Owner's Rep timeline, CMAR RFQ and Timeline, Future Workshops, Site Selection Meeting, Professional Services updates.
	Site Selection Meeting	September 22, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, JLG	JLG read a site analysis presentation which considered 6 potential options that had been recommended by the NDSH team. Items that were discussed for each site where it's the land currently owned by the State of ND, is the site within city limits, what are the adjacent land uses, access to existing utilities, distances from both JRCC and the existing NDSH campus, access to the site, the buildability of the site, and the potential to creating a healing environment. A site selection scorecard would be created with the topics previously listed for the NDSH team to review and fill out. A follow up meeting with the governor's office was discussed to be scheduled to review the site analysis and selection.
	Owner Meeting	September 26, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, JLG	Reviewed Stakeholders, Owner's Rep timeline, CMAR RFQ and Timeline, Future Workshops, Site Selection Meeting, Professional Services updates.
	Owner Meeting	October 3, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, JLG	Reviewed Stakeholders, Owner's Rep timeline, CMAR Update, Future Workshops, Site Selection Meeting, Professional Services updates.
	Owner Meeting	October 10, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, JLG	Reviewed Stakeholders, Owner's Rep timeline, CMAR Update, Future Workshops, Site Selection Meeting, Professional Services updates.
	Pre Design Workshop #2	October 12 & 13, 2023	Onsite at NDSH	NDSH Executive Leadership, JLG, architecture+, A.I. NDSH User Groups	Updated cost and facility use benchmarks based on the project's more refined scope were shared. Project elements were confirmed as exercised within the updated space program. Leadership confirmed continuing the following operations with existing facilities rather than add to new hospital: Museum, Pool, Tompkins Programs, ECT, lot, community hospitality kitchen, laundry. Updated departmental space programs were reviewed and updated to reflect review comments with all user groups.
	Owner Meeting	October 24, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, JLG	Reviewed Stakeholders, Owner's Rep timeline, CMAR Update, Future Workshops, Site Selection Meeting, Professional Services updates, review workshop 2
	Pre Design Workshop #3	October 31 & November 1 and 2, 2023	Onsite at NDSH	NDSH Executive Leadership, JLG, architecture+, A.I. NDSH User Groups	Potential sites were discussed and evaluated as to suitability as a measure meant to prioritize the options at hand and influence further exploration. Leadership and user groups reviewed the client space program conforming changes made during the last workshop and making some additional changes reflecting more current thinking about the project. Leadership and the individual user groups also reviewed building configurations for peer hospitals as a basis for confirming the overall likely organizational pattern of the hospital and the relationships between the parts of the hospital as well as narrowing down the preferred organizational model for inpatient/residential treatment units.
	Owner Meeting	November 7, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, JLG	Reviewed Stakeholders, Owner's Rep timeline, CMAR Update, Future Workshops, Site Selection Meeting, Professional Services updates, review workshop 2

MEETING HISTORY

PREDESIGN PHASE MEETINGS	Owner Meeting	November 14, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND Health & Human Services, NDSH executive leadership, JLG	Reviewed Stakeholders, Owner's Rep Interview, CMAR update, Future Workshops, Site Selection Meeting, Professional Services update.
	Fit Design Workshop #4	November 15-16, 2023	Onsite at NDSH	NDSH Executive Leadership, JLG, architecture+, All NDSH User Groups	The updated space program was reviewed by user groups with some additional changes. Detailed diagrams of the preferred adult inpatient unit types were reviewed with an eye toward establishing patterns that were functional for purpose, flexible for future changes and with respect to the ability to stack dissimilar user types, and capable of being paired with a workable "whole" hospital armature. A preference was expressed for using the "wedge" model for paired inpatient units with a "butterfly" version of the wedge selected for the stacking of the SOTEP and Geriatric inpatient units. NDSH and DOCR representatives met to confirm integration of support services between the two institutions as anticipated by the draft spoke program for the new NDSH building.
	Owner Meeting	November 21, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND H&HS, NDSH Executive Leadership, Tegra Group, and JLG	Reviewed Stakeholders, CMAR Updates, Future Workshops, Site Selection Meeting, Professional Services updates.
	Owner Meeting	November 28, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND H&HS, NDSH Executive Leadership, Tegra Group, and JLG	Reviewed Stakeholders, CMAR Updates, Future Workshops, Site Selection Meeting, Professional Services updates.
	Owner Meeting	December 5, 2023	Remote via MS Teams	Reps from the State of North Dakota, ND H&HS, NDSH Executive Leadership, Tegra Group, and JLG	Reviewed Stakeholders, CMAR Updates, Future Workshops, Site Selection Meeting, Professional Services updates.
	SOTEP User Meeting	December 5, 2023	Remote via MS Teams	JLG, architecture+, NDSH Executive Leadership, SOTEP User Group	Reviewed Illustrations for SOTEP wing.
	CMAR Onboarding Meeting	December 6, 2023	Remote via MS Teams	architecture+ team, JLG Team, Tegra Team	Prep for CMAR joining the project.
SCHEMATIC DESIGN PHASE MEETINGS	Owner Leadership Meeting	December 13, 2023	Remote via MS Teams	NDSH Executive Leadership, architecture+, JLG, Tegra Group	Walkthrough of predesign report dated 12/8. Review of building concept, site configurations, virtual tour of site visit, conversation around community engagement, approval to move into Schematic Design, SD workshop.
	Governor Meeting	December 19, 2023	Remote via MS Teams	Doug Burgum, Tammy Miller, Jodi Bochler, Mariaa Neset, NDSH Executive Leadership, architecture+, JLG, Tegra Group	Introduction of project team, Site Selection Process, Governor's Office Questions and Comments, Next Steps.
	Owner Meeting	December 19, 2023	Remote via MS Teams	Representatives from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, Tegra Group, and JLG	Reviewed Stakeholders, CMAR Updates, Future Workshops, Site Selection Meeting, Professional Services updates, Potential site visits.
	Owner Meeting	January 2, 2023	Remote via MS Teams	Representatives from the State of North Dakota, ND Health & Human Services, NDSH Executive Leadership, Tegra Group, and JLG	Reviewed Stakeholders, CMAR Updates, Future Workshops, Site Selection Meeting, Professional Services updates, Potential site visits.
	SD Workshop #1	January 16-17, 2024	Onsite at NDSH	NDSH Executive Leadership, JLG, architecture+, All NDSH User Groups	The construction manager started to look at preliminary plans so they could start working on a high-level estimate. There were code discussions about the State Hospital being a statutory hospital and what codes were applicable. The team recognized the importance of community engagement. User groups were brought in to review and react to high-level whole hospital block diagrams. A series of building layout options were reviewed, and the design group gathered feedback from the user groups.
	State Attorney Meeting	January 24, 2023	Remote via MS Teams	NDSH Leadership team, JLG Team, architecture+ team, Tegra Team	Review current regulations and how the will influence the design.
	SD Workshop #2	February 6-8, 2024	Onsite at NDSH	NDSH Executive Leadership, JLG, architecture+, All NDSH User Groups, Tegra Group	Efficiencies in the proposed building design were reviewed. Mortenson presented the current cost model/estimate, architecture+ presented some past projects, experience, and program benchmarks, user groups reviewed developed plans and provided feedback. Civil, mechanical, and electrical systems were reviewed.
	SD Design Systems Workshop	February 21, 2024	Onsite at NDSH	NDSH Executive Leadership, NDSH User Group Assembly, JLG, architecture+, NDSH Facilities MGMT, Tegra Group, Mortenson, CMTA	Electrical systems, including wiring, generators, UPS, lighting, and communications, were discussed with NDSH facilities staff. Mechanical systems, including boilers, chillers, humidifiers, and plumbing fixtures were discussed with NDSH facilities staff. Room data sheets were introduced. Patient safety and security needs were discussed.
	Owner IPU Meeting	February 22, 2023	Remote via MS Teams	NDSH Executive Leadership, JLG, architecture+, Tegra Group	Reviewed current plans and assigned decisions to date.
	SD Workshop #3	March 5-6, 2024	Onsite at NDSH	NDSH Executive Leadership, NDSH User Group Assembly, JLG, architecture+, NDSH Facilities MGMT, Tegra Group, Mortenson, CMTA	The site plan was reviewed and discussed, including parking, courtyards, and the loading dock. Staff from North Dakota Department of Health & Human Services discussed the status of the State Hospital being a statutory hospital and some items in the North Dakota Administrative Code that pose challenges for this building type. Unresolved decisions were discussed, including single vs. double rooms. SOTEP explained that the total number of beds, user groups, we're brought into review more articulated departmental plans including major furniture and assessment and provide feedback.
	Schematic Design User Meetings	March 19-22, 2024	Remote via MS Teams	NDSH Executive Leadership, ALL NDSH user Groups, Tegra Group, JLG, architecture+, Mortenson	User Group meetings were held with each department to discuss Room Data Sheets.
	Preliminary Code Review with AHJ	March 26, 2024	Remote via MS Teams	State and Local AHJ, JLG	Introduction to project, overview of initial code information, questions/comments from AHJs.
	Owner SD Page Turn and Estimate	April 10, 2024	Remote via MS Teams	NDSH Executive Leadership, JLG, architecture+, Tegra Group, Mortenson	Reviewed SD Set and SD Estimate to date.

MEETING HISTORY

DESIGN DEVELOPMENT PHASE MEETINGS	NDIT Meeting	April 17, 2024	Remote via MS Teams	ND Health & Human Services (Robert Hobbelman), NDSH Executive Leadership, Mortenson, Tegra, JLG	Started conversation around responsibilities between NDIT and NDSH
	Governor's Office Meeting & Site Tour	April 17, 2024	On site at NDSH	Tammy Miller, Commissioner Wayne Sitter, State Health Officer Dr. Wahlin, Deputy Commissioner Sara Stolt, NDSH Executive Leadership, architecture+, JLG, Tegra Group	Project Update presentation, Governor's Office Questions and Comments, Next Steps discussion, on-site tour of existing facilities
	Owner SD Scope and Alternate Review	April 19, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH Facilities MGMT, architecture+, JLG, architecture+, Mortenson, Tegra,	Review potential options for Scope Reduction and Alternates
	Hospital Security	April 19, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Low Voltage Security	April 19, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Risk Management Zones	April 23, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Patient Safety - Plumbing and Sprinklers	April 23, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Patient Safety Overview	April 23, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Patient Safety - Terminal Devices	April 24, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Patient Safety - Windows and Glazing	April 24, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Patient Safety - Anti-Barricade and Seclusion	April 26, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Texas Site Visits	April 30, 2024	On-Site at Texas Facilities	NDSH Executive Leadership, Representatives from NDSH User Group Assembly, architecture+, JLG, Mortenson, Tegra	In-person site visits to four Texas State Hospital facilities
	Patient Safety - Bathrooms and Specialties	May 6, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Patient Safety - Electrical systems and lighting	May 7, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Site and Mechanical Decisions	May 7, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH Facilities MGMT, architecture+, JLG, CMTA, Mortenson, Tegra	Review options for Site and Mechanical Systems for decision and direction
	Patient Safety - Door hardware	May 8, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	Patient Safety - Fasteners Sealants and Finishes	May 8, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Safety and Security Review Meeting with architecture+
	DD Workshop #1	May 8-9, 2024	On site at NDSH	NDSH Executive Leadership, NDSH User Group Assembly, JLG, architecture+, NDSH User Groups, Tegra Group, Mortenson, CMTA	JLG and NDSH leadership set up and hosted an NDSH employee community engagement session. The sessions where open house-style where NDSH employees where able to review the presentation documents, engage with the design team and NDSH leadership and provide feedback to the design team. Feedback was collected in three methods: Post-it notes on a white board, note cards in a collection box, and a survey monkey survey.
	Representative Nelson Meeting	May 9, 2024		Jon Nelson, NDSH Executive Leadership, Tegra, Mortenson, JLG	Introductions, Presentation on project progress, possible presentation to legislators, questions
	NDIT Alignment	May 9, 2024	Remote via MS Teams	NDSH Leadership, architecture+ Team, JLG Team, CMTA Mortenson, Tegra	Review Responsibility Matrix between NDSH and NDIT
	ND Forestry Meeting	May 12, 2024	Remote via MS Teams	NDSH Leadership, architecture+, JLG, Tegra, ND Forest Service	Review ND Forestry guidelines and engagement
	Room Data Sheet - Dental	May 29, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room Type detailed information review
	Room Data Sheet - Geriatric	May 29, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room Type detailed information review

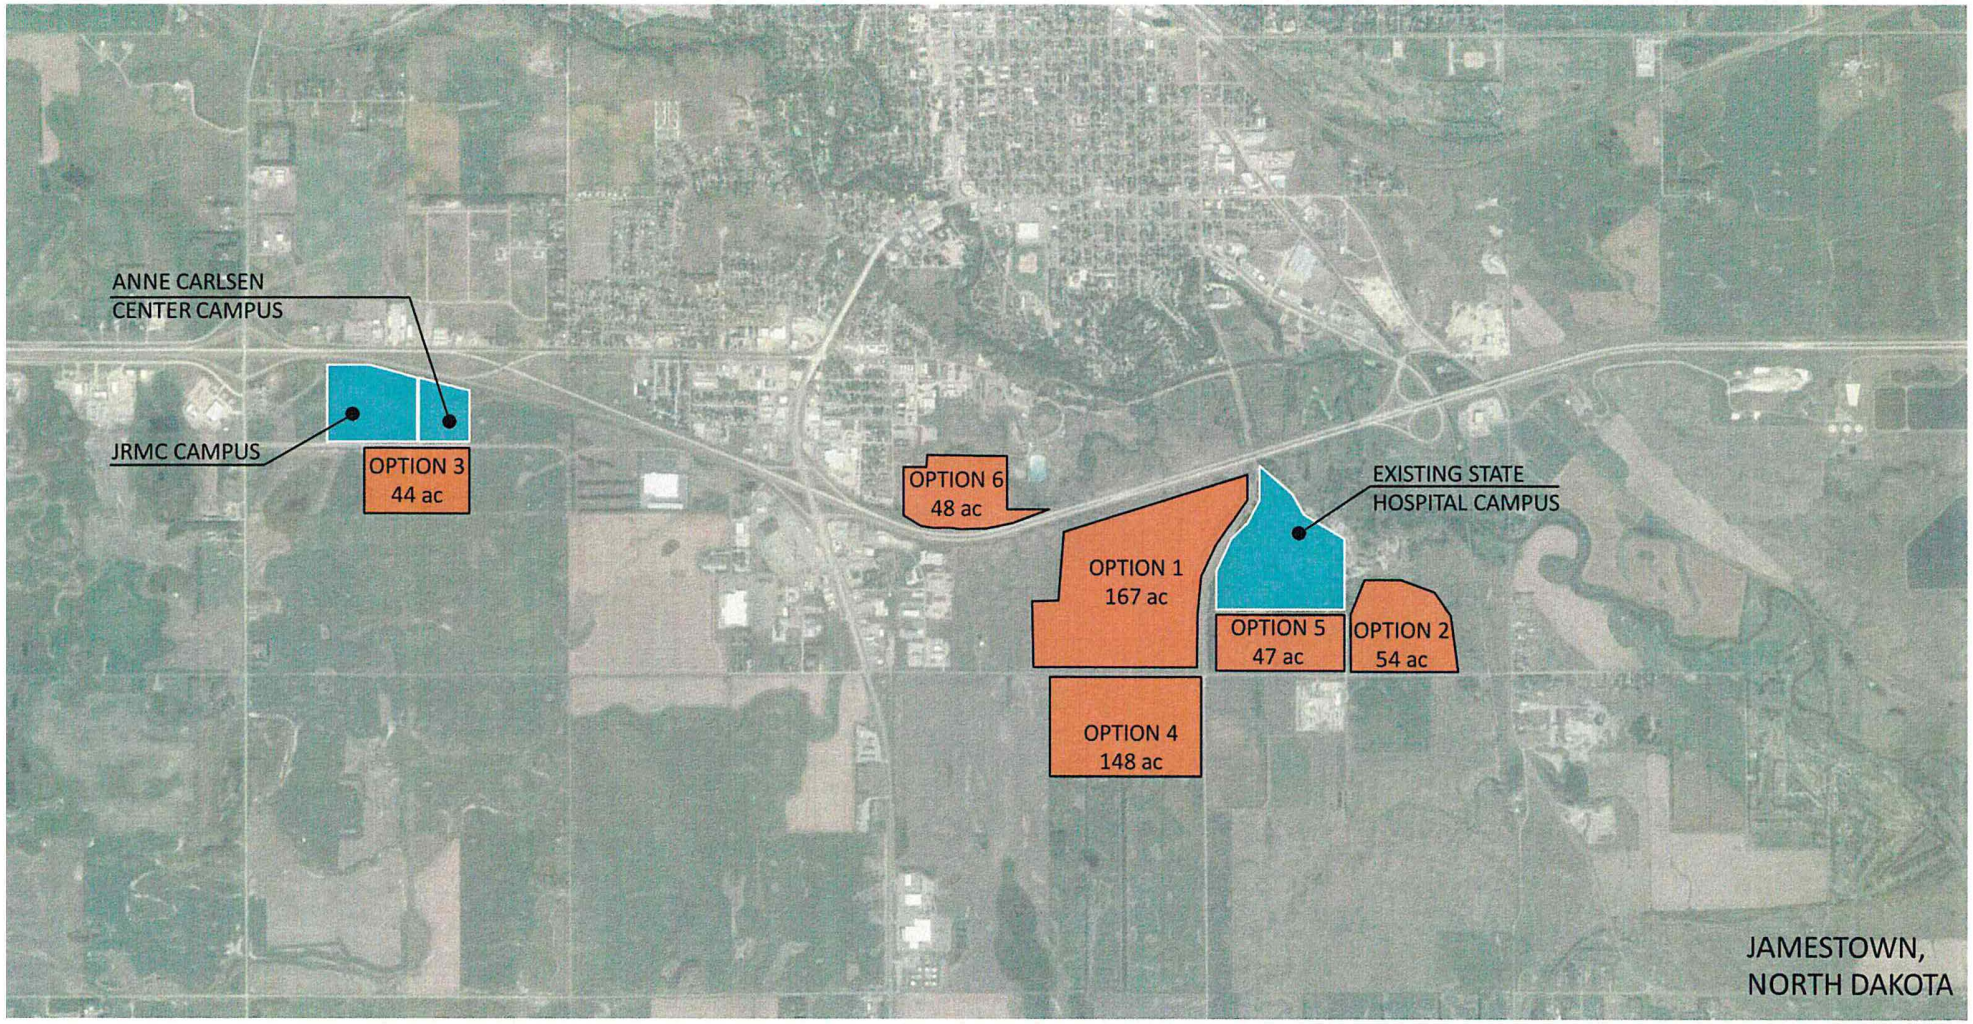
MEETING HISTORY



DESIGN DEVELOPMENT PHASE MEETINGS (CONTINUED)	All Room Meeting	May 31, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH Inpatient Services, architecture+, JLG, Tegra, Mortenson	Review of options for All Room solutions
	Safety and Security	May 31, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH Facilities MGMT, architecture+, JLG, Mortenson, Tegra	Review security plan and risk levels
	DD Workshop #2	June 3-5, 2024	On-site at NDSH	NDSH Executive Leadership, NDSH User Group Assembly, JLG architecture+, NDSH User Groups, Tegra Group, Mortenson, CMTA, Legislative Engagement	JLG and Architecture+ hosted a two-day workshop with NDSH leadership and user group staff. The design team provided updates on the overall design, reviewed physical exterior materials, landscape design, interior and room updates. The design team with NDSH leadership hosted a townhall session to provide a project update. Detailed user group meetings where held that discussed room data sheet refinement doors, as well as furniture and equipment integration
	Room Data Sheet - Lab	June 7, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Pharmacy	June 7, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Teaching Kitchen	June 12, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Music Therapy and Greenhouse	June 12, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Vocational	June 12, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Gym	June 13, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Existing Utilities Meeting	June 17, 2024	Remote via MS Teams	architecture+, NDSH Executive Leadership, NDSH Facilities MGMT, Tegra, JLG, CMTA	Review existing utilities on the NDSH Campus
	Staff Entry and Locker Security	June 18, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH Facilities MGMT, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Laundry and Linen	June 19, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	DD Workshop #3	June 25-27, 2024	On-site at NDSH	NDSH Executive Leadership, NDSH User Group Assembly, JLG architecture+, NDSH User Groups, Tegra Group, Mortenson, CMTA	JLG and Architecture+ hosted a three day workshop with NDSH leadership and user group staff. These where focused meetings that where material on plan elevation and 3D views to cover room layout, doors, windows, casework, furniture, equipment, technology, mechanical and electrical devices.
	Food Service Review	July 1, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH Clinical Ancillaries, architecture+, JLG, FyCO, Mortenson, Tegra	Review Food Service design
	Heat Recovery Chiller Review	July 15, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH Facilities MGMT, JLG, Tegra, Mortenson	Review HRC options and direction
	DD Code Review with City of Jamestown	July 16, 2024	Remote via MS Teams	State and Local AHJ, JLG, architecture+	Overview of Current Project, Code Items, Questions/concerns with City of Jamestown AHJ
	DD Code Review with ND DoH	July 17, 2024	Remote via MS Teams	State and Local AHJ, JLG, architecture+	Overview of Current Project, Code Items, Questions/concerns with ND Dept of Health
	Room Data Sheet - Lab	July 17, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Maintenance Shop	July 17, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Medical Storage	July 18, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Pharmacy	July 22, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Room Data Sheet - Therapy	July 22, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Room type detailed information review
	Patient Safety Wrap-up	July 22, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH User Group, architecture+, JLG, Mortenson, Tegra	Summary Review and Wrap-up of Patient Safety Meeting Series
	NDIT Meeting	July 26, 2024	Remote via MS Teams	ND Health & Human Services, NDIT, NDSH Executive Leadership, Mortenson, Tegra, JLG, architecture+, CMTA	Review NDIT Scoping and responsibility matrix
	DD Workshop #4	July 30-31, 2024	On-site at NDSH	NDSH Executive Leadership, NDSH User Groups, ND DOCR, Tegra, Mortenson, JLG, architecture+	JLG and Architecture+ hosted a two-day workshop with NDSH leadership and user group staff. The first day, was focused on interior finishes. Material types and locations of all finishes were reviewed and discussed. The second day of the workshop was a review of the physical mock-up that was built in the basement of the Lofthus building. The design team and NDSH Leadership met with JLCC to tour the current kitchen, loading dock, and farm that soon will be required to travel for the new location of the state hospital.
	IHE Project Meeting	August 13, 2024	Remote via MS Teams	NDIA Executive Leadership, JLG (Design and Furniture Teams), Tegra, architecture+	Prepare for IHE site visit
	Patient Safety	August 21, 2024	Remote via MS Teams	NDSH Executive Leadership, NDSH Facilities MGMT, architecture+, JLG, Mortenson, Tegra	Review Micrel forensic patient safety products and design decisions
	Fire Protection Review	August 29, 2024	Remote via MS Teams	State and Local AHJ, CMTA, Interstate, JLG	Review of Misc. Items related to fire and building fire protection
	Patient Safety - Inperson product Review	September 18, 2024	Inperson and architecture+ office	NDSH Facilities MGMT, NDSH Inpatient Services, JLG, architecture+	In person review of safety products and safety report

The Design Process

Benchmarks & Cost Validation

Project Scope Update

NORTH DAKOTA STATE HOSPITAL | SITE SELECTION

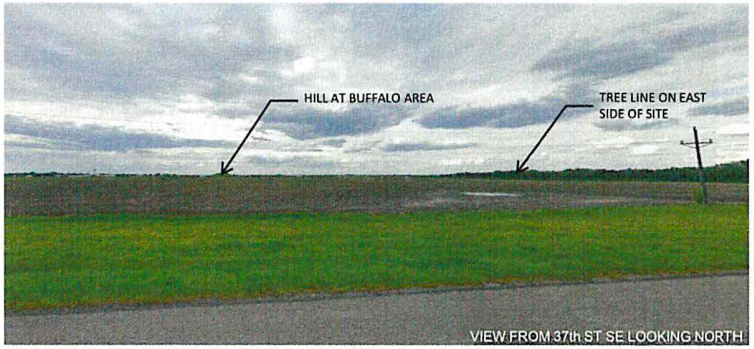
SIZE: 136 ACRES

OWNER: ND State Hospital. Currently Operated by Reimers General Partnership

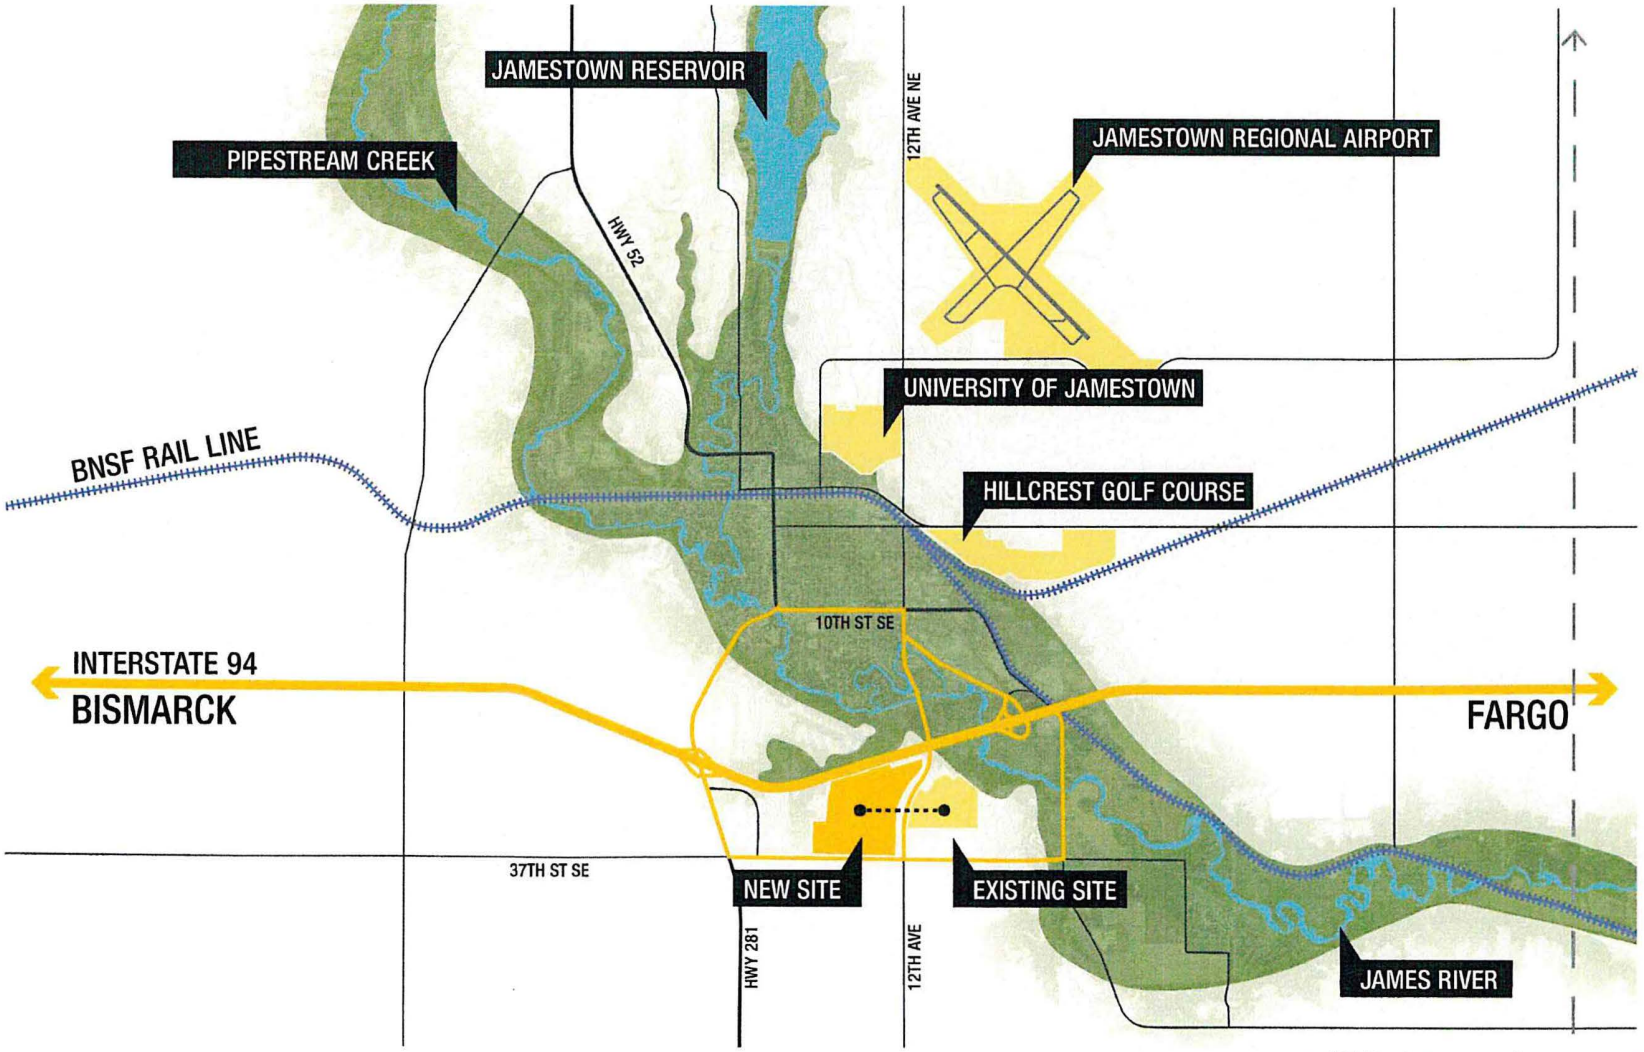
MAIN ACCESS ROAD/INTERSECTION: Access could be from12th Ave or 37th St

ZONING: Out of City Limits - One Mile Extraterritorial Limits POC (Public, Open Development and Conservation District)

STATS:



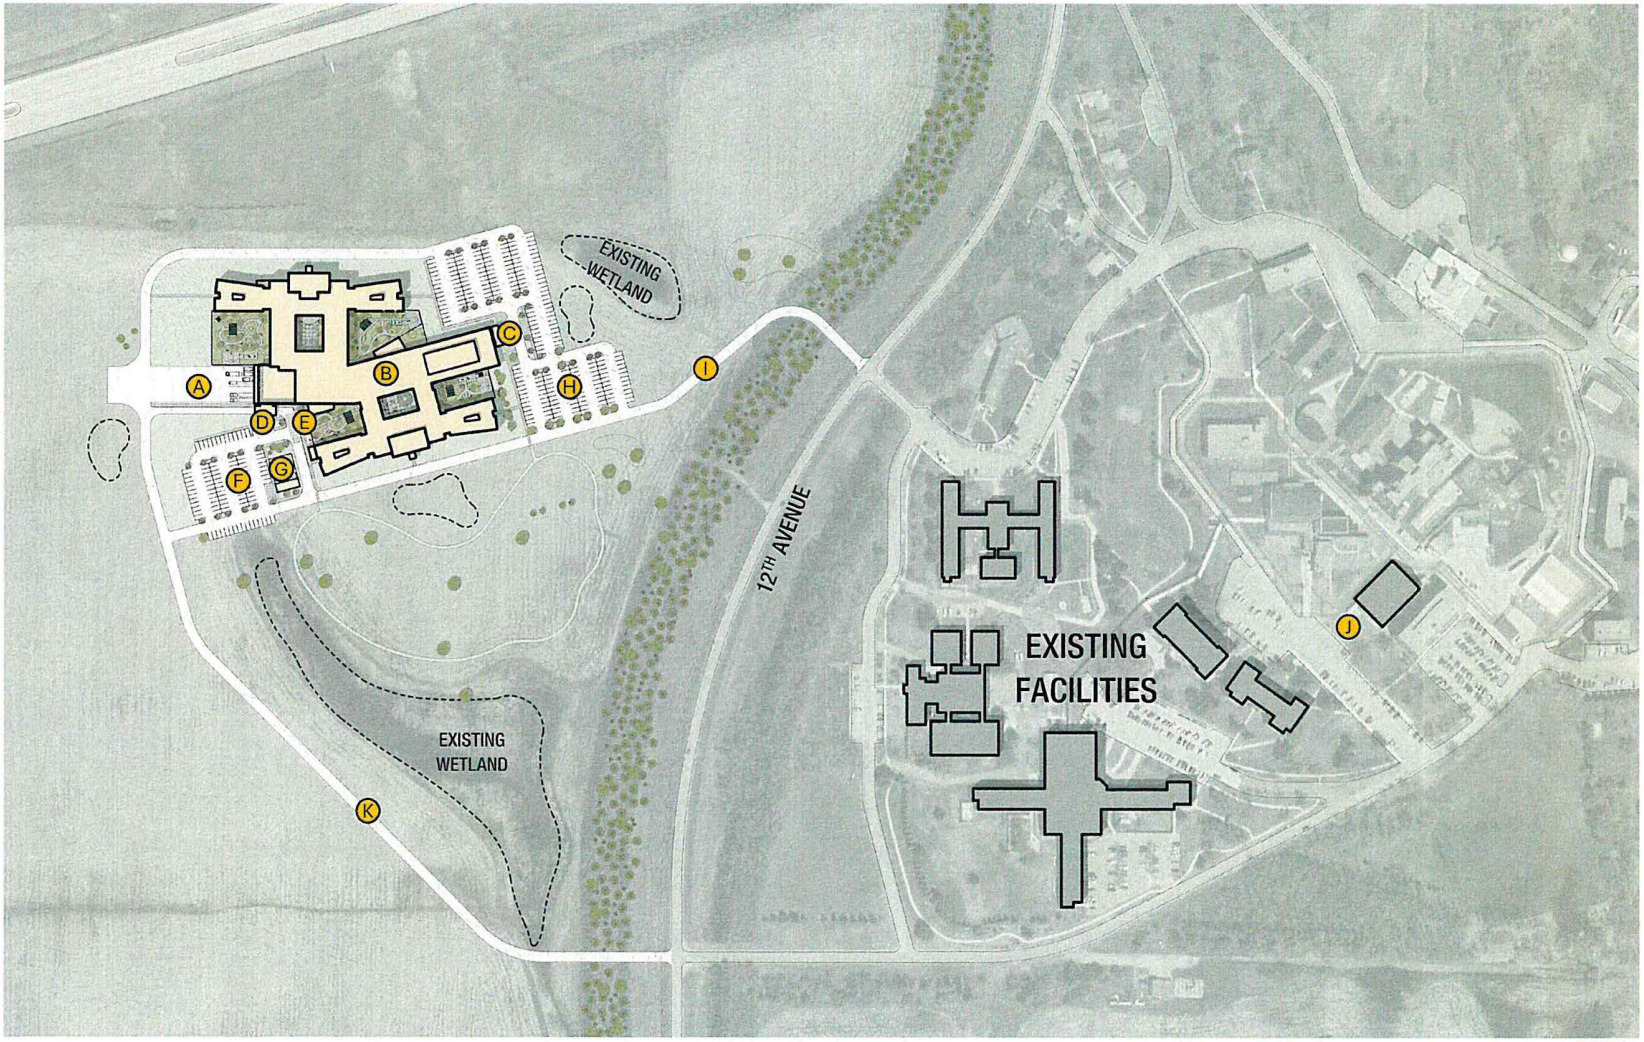
- Owned by the State of ND: Yes
- Within City Limits: Portion of lot is.
- Distance to Existing Hospital: 0.8 miles
- Distance to JRMC: 3.2 miles
- Excellent Vehicle access from Interstate and City
- Minimal site elevation change
- Easy access to Water & Sewer
- Adjacent land: Public, Agriculture
- Minimal Interstate noise pollution



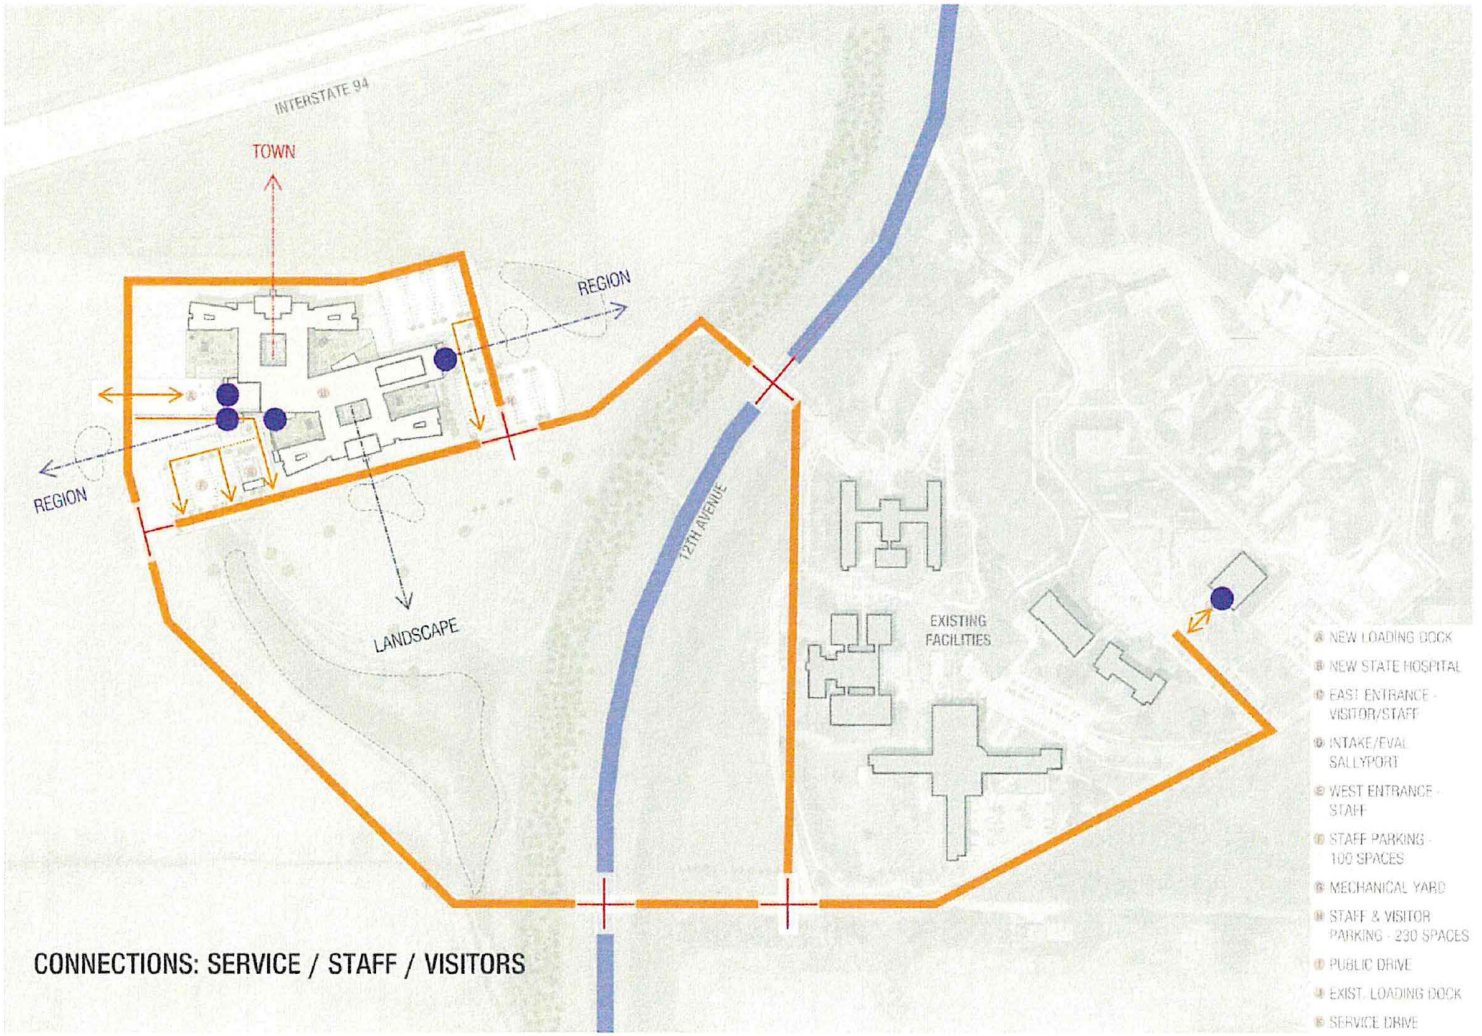
PROS:

- Close proximity to existing/remaining campus functions
- Scenic Views
- Near main traffic corridor but elevated above
- Thick tree line on east side of site
- Excellent Vehicle access from Interstate and City
- Large, relatively flat site.

CONS:

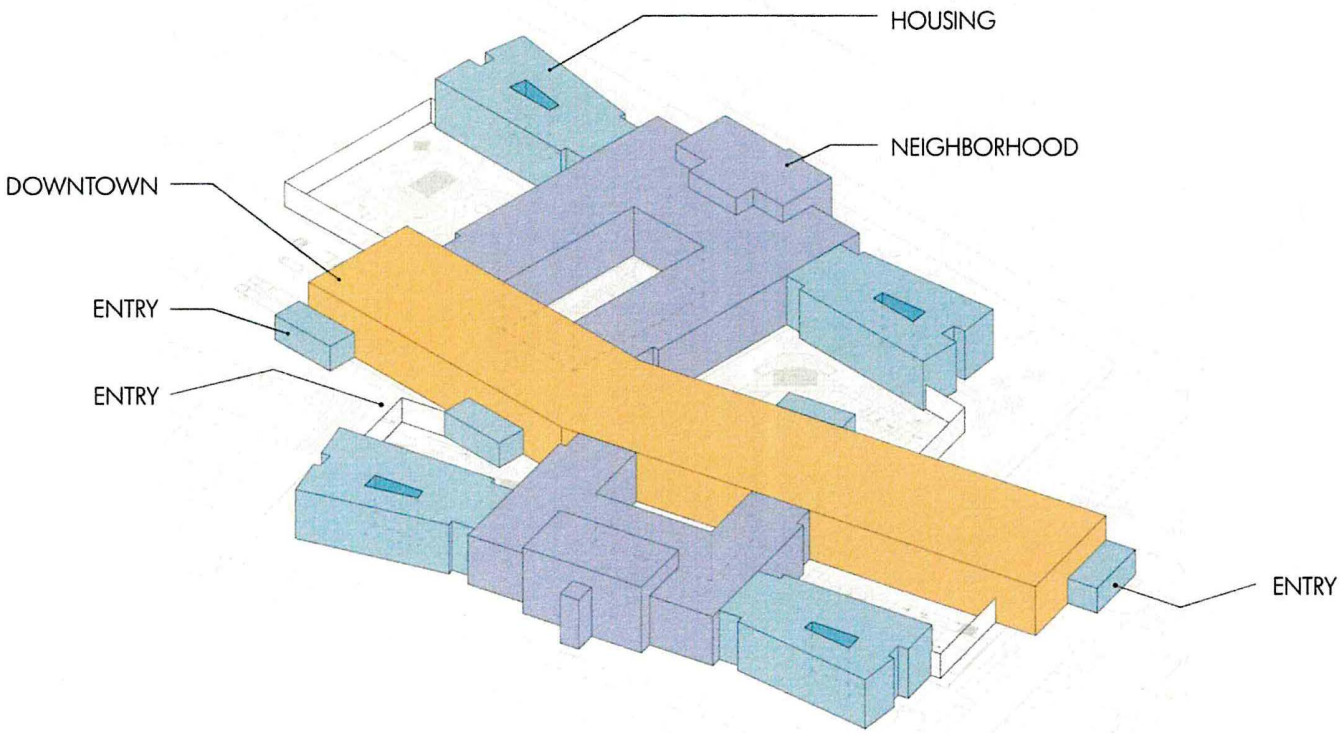


- Proximity to Correctional Center
- Potion of lot outside of City limits
- Minimal Interstate noise pollution



NORTH DAKOTA STATE HOSPITAL | PROJECT SITE VICINITY MAP

- (A) NEW LOADING DOCK
- (B) NEW STATE HOSPITAL
- (C) EAST ENTRACE – VISITOR/STAFF
- (D) INTAKE/EVALUATION SALLYPORT
- (E) WEST ENTRANCE - STAFF
- (F) STAFF PARKING – 100 SPACES
- (G) MECHANICAL YARD
- (H) STAFF & VISITOR PARKING – 230 SPACES
- (I) PUBLIC DRIVE
- (J) EXISTING LOADING DOCK
- (K) SERVICE DRIVE

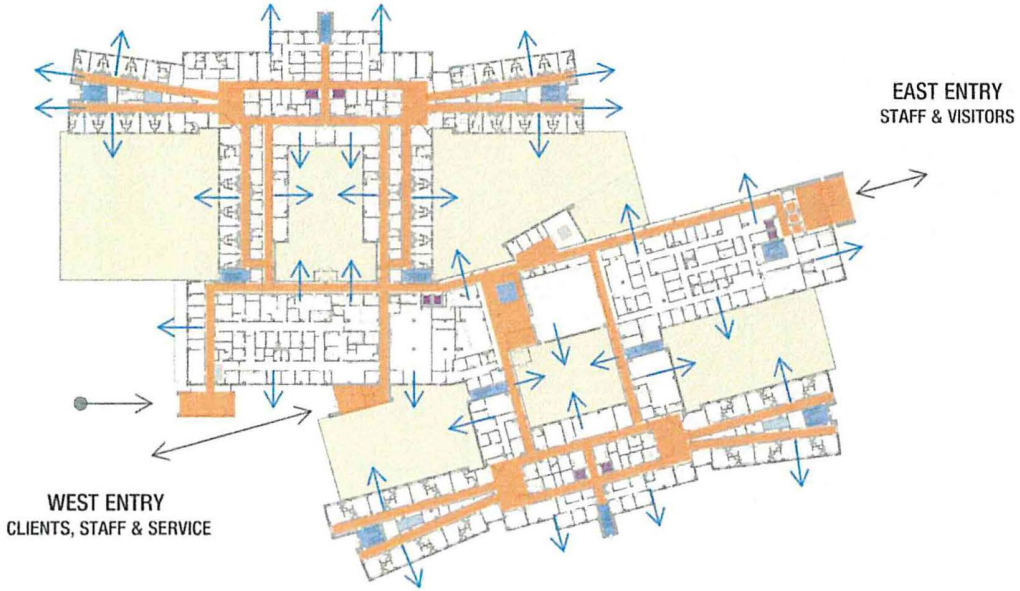


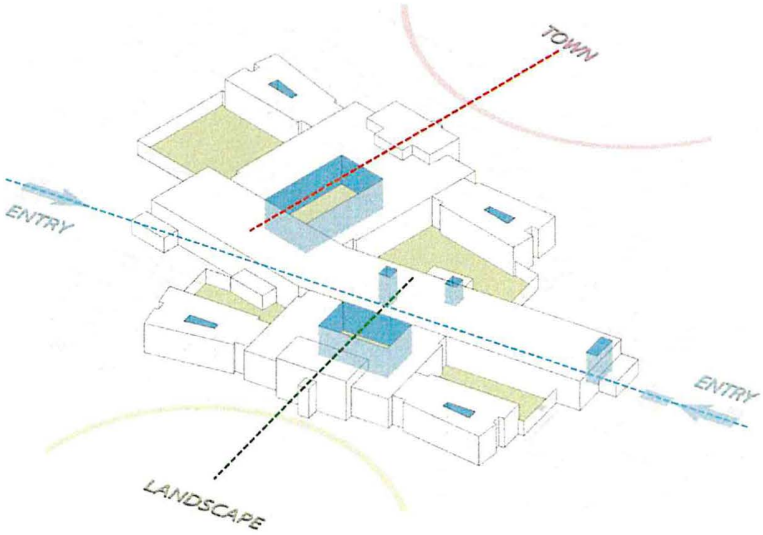
NORTH DAKOTA STATE HOSPITAL | SITE PLAN

NORTH DAKOTA STATE HOSPITAL | SITE CONNECTIONS

BUILDING CONCEPT: A HEALING COMMUNITY SETTLED IN THE LIGHT AND LANDSCAPE ABOVE JAMESTOWN

The building is organized around three major programs: Housing, Neighborhood, and Downtown. This organization mimics the sequence in a typical town with Downtown as the primary hub or heartbeat of the facility, servicing as the primary connections to the outside. The Neighborhoods, serve as a transition from the active Downtown to the more intimate spaces of the Housing wings.

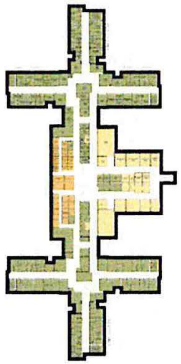




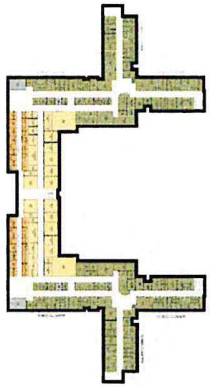
100% PRIVATE BEDROOMS

- Improved sleep.
- Reduction in general violence and aggression
- Reduction in person-on-person patient room predation
- Increased social interaction and therapy participation
- Infection control (having an all-private environment was a boon during the pandemic)
- Greater flexibility in room assignment and resulting higher occupancy rates and shorter wait times for hospitalization
- Improved patient satisfaction
- Reduced average length of stay
- Easier to use a patient-safe bathroom door while safeguarding patient toileting privacy in a private bedroom

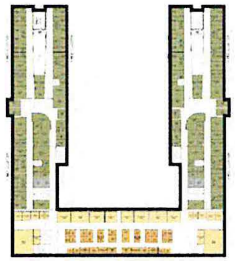
CONNECTIONS: MOVEMENT/DAYLIGHT/VIEW



As part of the healing experience, access to natural light and outdoor space is an important goal. Each Housing wing hosts a central lightwell with adjacent quiet spaces to bring sunlight into the center of these areas. Each of the Neighborhoods then provides access to dedicated courtyards for different patient groups, simultaneously providing more access to views and light.



INPATIENT UNIT (IPU) LAYOUT ANALYSIS



The design team, NDSH Leadership, and NDSH staff reviewed 7 options on layouts for the Inpatient Units. The 'WEDGE' layout was selected for various reasons related to patient care and safety and also was the most efficient layout.

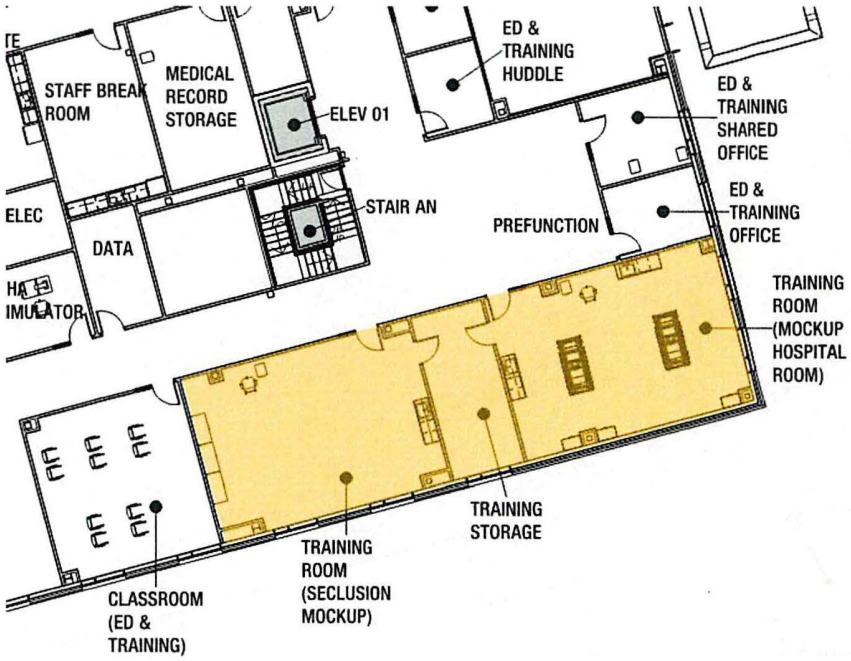
INPATIENT UNIT (IPU) LAYOUT ANALYSIS

SELECTED DESIGN

IPU – WEDGE

38,445 SF	**Unit SF**
50 BEDS	# of Beds
769 SF/BED	SF per BED

- Selected by NDSH staff and leadership as most aligned to care model
- Most efficient construction/cost
  - Smallest footprint
  - Smallest wall to floor ratio
  - Least expensive option
- Efficient to staff: No client bedrooms are across the hall from each other – less client agitation = less staff intervention
- Evidence Based Care Results: 7 to 9 client subclusters allow smaller relationship circles = less disruption and conflict

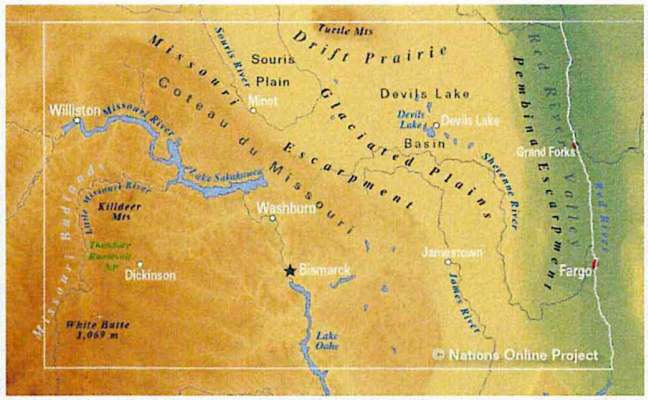


GROWING THE WORKFORCE, TRAIN, AND RECRUIT

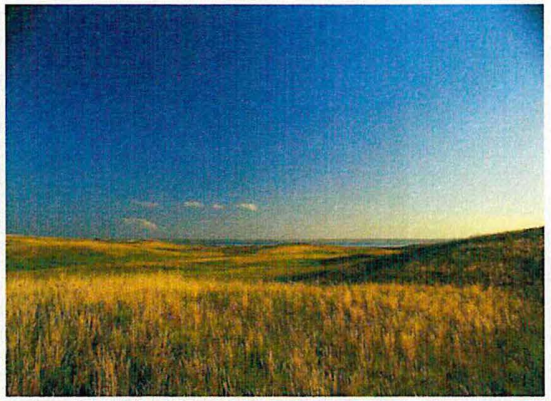
- The new State Hospital Design features dedicated, flexible, and state of the art training and simulation spaces

- NDSH is the only public health care institution in ND that provides inpatient training and education for medical, nursing, and university students
  - School of medicine
  - Nursing schools
  - High school students
  - Private college students

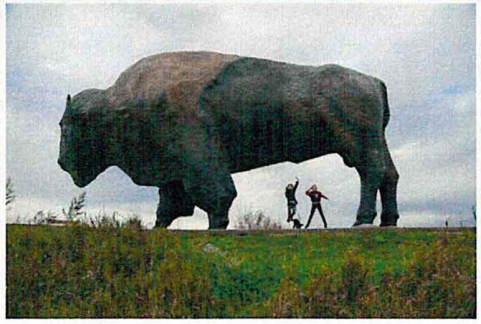
- 40 students per biennium come to NDSH for training for inpatient psychiatric education training



- Allowing them to train and receive on-site residency programs in North Dakota, and at NDSH, improves the likelihood of those future health care providers remaining in ND to practice



REGIONAL CONTEXT



The new facility is being planned south of Interstate 94, overlooking the James River Valley and surrounding glaciated plains. The design draws inspiration from the North Dakota prairies and the existing brick structures within Jamestown, celebrating the state's culture and history.

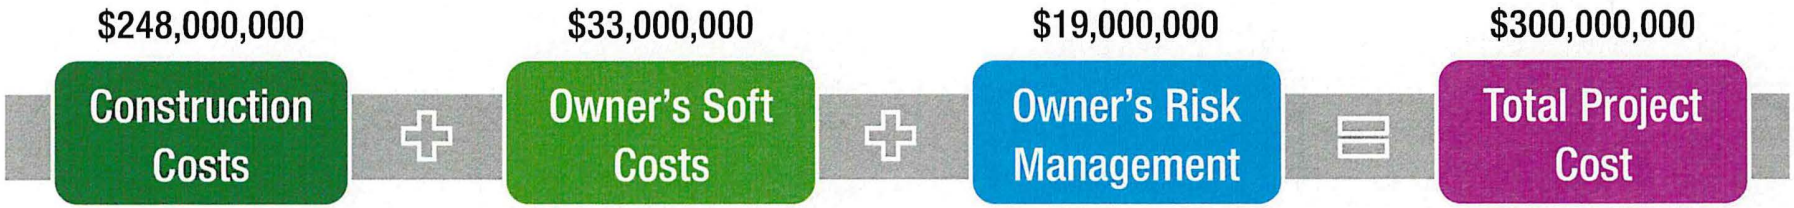
Project Scope Update



NORTH DAKOTA STATE HOSPITAL

PROGRAM ALIGNMENT

The following list of spaces and building elements were, at one point in the design process, requested by NDSH staff, users, or leadership stakeholders. After the design team reviewed the requests against National Inpatient Psychiatric Hospital benchmarks and project goals, these spaces and building elements were either eliminated or reduced in size from the original request to better align with the project goals.

1. All office and workstation sizes were standardized based upon general practice in new state hospitals elsewhere. Many existing offices and workstations are currently larger than what is planned in the new NDSH
2. Shared offices for part-time staff in lieu of private offices
3. Vocational Technology space size and scope reduced to reflect current needs and practices
4. Movement studio and staff/client exercise spaces adjusted in size and number reflecting more efficient use patterns and actual likely usage by staff and clients
5. The total number of elevators was reduced
6. Size of main gymnasium reduced from a full-sized basketball court to a half-sized basketball court to reflect practices at peer state hospitals
7. Recreation and Social space provided in amounts consistent with peer state hospitals
8. Aquatics/Pool Eliminated
9. Grounds Building reduced in size to only support equipment needing in the immediate proximity of the new hospital
10. Transportation/Fleet Vehicle Storage Building eliminated
11. Artifact/Museum not provided
12. SUD (Residential Treatment) Facility/Wing not included in project
13. Central Laundry not included in project
14. Full Central Kitchen not included in project
15. Warehousing beyond the immediate needs for the new hospital with longer term warehousing retained elsewhere on campus
16. Even as the number of handicapped-accessible and skilled nursing bedrooms increased, we've managed to minimize impacts on overall project sizes by optimizing during design with a series of small adjustments:
    a. Reduced the number of Medication Rooms in Geriatric Psychiatry
    b. Shared support space between units at core space within the Adult IPU's
    c. Fine tuning of support staff accommodations within the building basement

Name	Location	Beds	Construction Cost	Year of Cost	Construction Cost for 2025 and Adjusted for Jamestown	Construction Costs Per Bed	Total Project Costs Per Bed	Construction Costs Per SF	Comments
Caro Center	Caro, MI	100	$69,698,852	2021	$110,269,551	$1,102,696	$1,433,504		Worked into a budget developed on the basis of an erroneous assumption. Cut corners at every opportunity. This is a new building on an existing campus that is relying on services and supports from elsewhere on the campus. As such, the investment in food support services, administrative spaces, and adjunctive therapy spaces is far less than at NDSH.
Eastern State Hospital, Kentucky	Lexington, KY	230	$108,000,000	2011	$289,192,888	$1,257,360	$1,634,568		Less expensive RTF beds are a significant part of the project, nearly 20% of the bed complement. This is an older project budgeted by the State with more than half the bds being semi-private
Center for Forensic Psychiatry	Ann Arbor, MI	210	$93,000,000	2002	$326,979,811	$1,557,047	$2,024,160		
Rusk State Hospital	Rusk, TX	200	$168,681,096	2020	$320,714,388	$1,603,572	$2,084,643	$954	This is a new bed building on an existing campus with clinical ancillary services, adjunctive therapies, administration, IT, Ed and Training and building/hotel support services being provided elsewhere on the campus.
North Dakota State Hospital	**Jamestown, ND**	**141**	**$248,000,000**	**2024**	**$248,000,000**	**$1,758,865**	**$2,127,660**	**$838**	
Austin State Hospital	Austin, TX	240	$210,000,000	2020	$389,641,095	$1,623,505	$2,110,555	$861	This is a new bed building on an existing campus with building/hotel support services being provided elsewhere on the campus.
San Antonio State Hospital	San Antonio, TX	296	$282,224,723	2020	$532,721,236	$1,799,734	$2,339,654	$990	Comparable to NDSH, but adds kitchen and warehousing supporting the hospital.
Hawaii State Hospital, Forensic Patient Care Facility	Kaneohe, Hawaii	144	$140,000,000	2017	$260,256,686	$1,807,338	$2,349,539		
UW/MC Northwest Behavioral Health Teaching Facility	Seattle, WA	150	$224,500,000	2021	$290,354,217	$1,935,695	$2,516,403

NORTH DAKOTA STATE HOSPITAL | PATH FORWARD

$	332,000,000	Current Total Project (CTP) Estimate
$	(32,163,504)	Proposed Changes
$	299,836,496	Adjusted CTP with Proposed Changes
$	300,000,000	Total Project Budget Goal

PROGRAM/SCOPE CHANGE OPTIONS			
Remove Greenhouse from Project	$	(551,250)	Remove program space from building. Clients and staff would not be able to utilize plants for year round therapy and treatment activities.
Remove Fit Up of 1 Courtyard	$	(350,000)	This will include the removal of benches, plantings, trees, client exercise equipment, and shade structures.
Remove Fit Up of 1 Additional Courtyard	$	(350,000)	This will include the removal of benches, plantings, trees, client exercise equipment, and shade structures.
Eliminate Maintenance Out Building	$	(300,000)	This building was requested to provide on-site storage for maintenance equipment needed in the immediate vicinity of the new building.
Remove 24 Psych Rehab Beds on 2nd Floor (Provide Design Provisions for future Vertical	$	(9,373,200)	Remove entire 24
PROGRAM/SCOPE CHANGE TOTALS:	**$**	**(10,924,450)**	

BUILDING QUALITY CHANGE OPTIONS			
Remove South Site Access Loop Road	$	(900,000)	This will eliminate the dedicated site service road. Public, staff, and service traffic will need to share a single road into site from the east. This will increase potential traffic conflicts between service, staff, and visitor vehicles.
Provide Asphalt Paving at site	$	(1,700,000)	Provide asphalt paving in lieu of concrete paving. This will increase maintenance costs (seal coat every 5 - 10 years, mill and overlay every 15 years)
Remove Irrigation System	$	(891,000)	This will remove 100% of the irrigation planned for planted outdoor spaces. This will require NDSH to have staff manually water landscaping/turf areas or hire a contractor on a yearly basis to water these areas.
Remove Screenwall At Mechanical Yard	$	(322,000)	Removal of this screen will make the generators, electrical transformers, and CT cabinets exposed to view in staff parking lot.
Remove Screenwall At Second Story Mechanical Yard	$	(300,000)	Removal of this screen will make the chillers and rooftop equipment exposed to view.
Remove Second Patient Window	$	(400,000)	This will decrease the amount of natural light available in client bedrooms by 16%.
Reduce Interior Glazing by 10%	$	(250,000)	Removing glazing from the major public spaces on the interior of the building.
Reduce Exterior Glazing by 10%	$	(500,000)	Removing glazing from the major public spaces on the exterior of the building.
Replace Terrazzo flooring with Ceramic Tile	$	(300,000)	This material is being planned in the high traffic public and staff/client circulation spaces. Replacing with Ceramic Tile will increase grout lines and joints and will increase maintenance and cleaning frequency and costs.
Replace Solid Surface Shower surround with Ceramic Tile	$	(513,000)	Solid surface was selected to reduce the grout lines required to be cleaned in all client rooms. Changing to ceramic tile will increase grout lines and joints and will increase maintenance and cleaning frequency and costs.
Reduce quantity of wood pane by 25%	$	(200,000)	Removing a portion of wood paneling from the major public spaces.
Remove Wall and Door Protection	$	(176,000)	Removes all hand rails, bumper rails, wall protection sheets, and corner guards (except hand rails at geriatric unit). This will increase the amount of damage the wall will be susceptible to and increase maintenance and patching/repair costs.
Remove Folding Partition (Training Room)	$	(106,000)	Removes room divider in admin training/conference room. This will eliminate 2 medium sized rooms from the room inventory, which will increase scheduling challenges and may require NDSH to rent space off campus for certain meetings.
Reduce VAVs by 10%	$	(750,000)	This will remove about 10% of HVAC zoning throughout the building, which will limit individual temperature control zones. This may increase the frequency of staff/client human comfort complaints, which add to staff and maintenance workload.
Remove Snow Melt System	$	(270,000)	This will remove the exterior below slab snow melt systems from the project. This will increase the workload for facilities staff to clear snow and may lead to decreased response times and access issues during snow/ice events.
Remove Heat Recovery Chiller	$	(500,000)	This would remove the heat recovery chiller from the project, reduce chilled water redundancy and impact energy use and operational cost.
Backup Generator (Life Safety Only)	$	(250,000)	This will remove electrical redundancy for full facility backup and limit the amount of electrical devices not provided with generator backup. This may lead to loss of supplies, features, and functions during power outages.
Defer Saloon Bathroom Doors at Client Rooms to next Biennium	$	(310,000)	Defer purchasing of client toilet room doors.
BUILDING QUALITY CHANGE TOTALS:	**$**	**(8,638,000)**	

$	332,000,000	Current Total Project (CTP) Estimate
$	(32,163,504)	Proposed Changes
$	299,836,496	Adjusted CTP with Proposed Changes
$	300,000,000	Total Project Budget Goal

PROJECT SOFT COST CHANGE OPTIONS			
Reduce Project Contingencies aligned with budget/scope reduction	$	(5,700,000)	Reduction of contingency based on reduction of overall project scope and cost.
Furniture Reduction for Bed Count Reduction	$	(220,400)	Remove 44 bedrooms and 2nd Floor Psych Rehab Wing Furniture
Furniture Budget Alignment	$	(1,329,765)	Original Budget was $7,978,589, New Estimate is $6,648,824. Align with new estimate.
Low Voltage/IT Design Service Fee Reduction	$	(235,709)	Original Fee was $816,230, New Fee is $580,521. Align with new fee.
Move all Vehicles to Owner Budget, not Project Budget	$	(410,000)	Expense could be delayed until a subsequent biennium or moved to an operations budget. This includes forklifts, delivery trucks, bobcats, etc.
Building Envelope Commissioning	$	(124,467)	Remove all building envelope commissioning items above code minimum. This eliminates initial costs, but also eliminates the potential savings of $50,000 per year of reduced energy costs to heat/cool the building.
FS Smallware's	$	(100,000)	Expense could be delayed until a subsequent biennium. Procurement and installation would need to be managed by NDSH.
Equipment Relocation Expense (Medical Equipment)	$	(80,000)	Expense could be delayed until a subsequent biennium. Procurement and installation would need to be managed by NDSH.
Equipment Relocation Expense (Facilities Equipment)	$	(30,000)	Expense could be delayed until a subsequent biennium. Procurement and installation would need to be managed by NDSH.
Moving Expense Delayed until next Biennium	$	(300,000)	Expense could be delayed until a subsequent biennium. Procurement and installation would need to be managed by NDSH.
Specialty Equipment	$	(250,000)	Remove from project budget, NDSH would need to manage procurement and installation, or plan for as a future operating expense.
Artwork Expense Delayed until next Biennium	$	(400,000)	Remove from project, NDSH will manage procurement and installation directly.
Disposal of existing equipment	$	(175,000)	Remove from project, NDSH will manage directly.
Specialty Technology Relocation	$	(150,000)	Remove from project, NDSH will manage internally.
Network Printers / Copiers	$	(151,875)	Remove from project , NDSH will manage internally.
Duress Alarm System (Panic/Personal Protection)	$	(230,857)	Remove from project NDSH will need to continue to use existing radios.
Public Address System	$	(958,246)	Remove from project. Will require staff to use cell phones, walkie-talkies, fire alarm system, or other means to communicate across entire facility.
Sound Masking	$	(329,735)	Remove from project. Will reduce the acoustic performance of some spaces which may lead to increased client and staff concerns with privacy and acoustic separation.
JRCC Loading Dock (Existing Loading Dock at Warehouse)	$	(1,425,000)	Remove from project. NDSH & JRCC will need to finalize an operational plan to utilize the existing loading dock, or plan for this as a stand-alone project.
PROJECT SOFT COST CHANGE TOTALS:	**$**	**(12,601,054)**

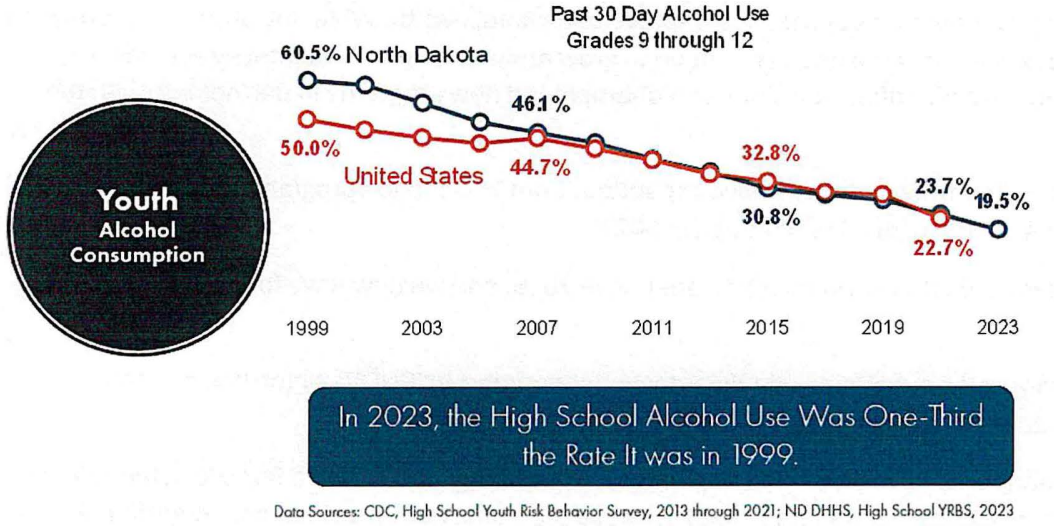
North Dakota Outcomes in Addiction - 2024 Wrap Up & Data

Although not a new problem, addiction has been a growing concern across the United States and unfortunately, North Dakota is not immune. It is estimated that 20% of ND's adult population will struggle with addiction.

ce 2014 there has been a coordinated approach to improve behavioral health. While the state has made great strides in expanding services, we know the needs continue to grow amid our nation's mental health crisis. Legislators are engaged and have identified solutions and championed new programs in partnership with the executive branch.

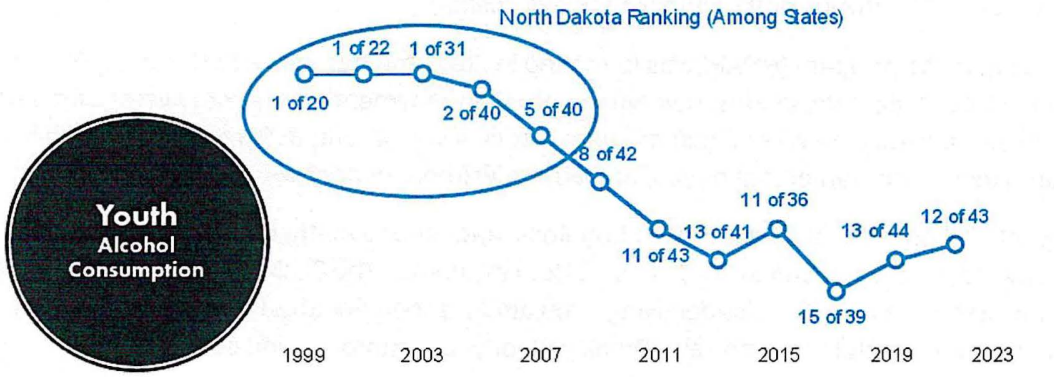
- Since 2016, addiction treatment services have expanded, from 75 licensed programs, including 25 residential programs, to 107 with 40 residential, in 2024.
- The first Opioid Treatment Program in the state opened in 2016, and we now have four programs serving 1,125 individuals.
- The legislature authorized a substance use disorder voucher program (SUDV) which has created opportunity for 8,500 individuals to access treatment from private providers.
- Recovery support programs have also been implemented including Free Through Recovery, launched in 2018, and Community Connect, launched in 2021. These programs have provided care coordination, peer support, and recovery support for over 14,000 North Dakotans. These programs reimburse community providers based on outcomes and show consistent monthly success of 70% of participants achieving 3 of 4 goals (housing, employment, recovery, and criminal justice domains).
- A recovery housing assistance program (RHAP) was launched in 2022 and has supported over 1,100 individuals. 58% of RHAP participants saw improvement in their employment status with average income growth of 149%. 72% saw improvement with their criminal justice involvement, 81% report reduction in their emergency room use for non-emergent needs, and 90% saw improvement with overdose risk.
- As a recent participant shared, "When I arrived I was hopeless, addicted to meth, depressed, I was a broken man. I literally didn't care if I lived or died. I had $12 to my name. The SUDV paid for my treatment and RHAP paid for my first three months of sober living. I am clean, sober, healthy, I have three jobs, am happy, I'm a dad again, I am hopeful for tomorrow. Thank you for your generosity and saving my life!"

Like the rest of the country, ND is facing a growing workforce shortage. However, we continue to take steps to address this need.



- Since 2018, over 1,200 individuals have been trained as peer support specialists, expanding recovery support into rural areas of the state.
- Through Opioid Settlement Funds, the Training Academy of Addiction Professionals has 28 trainees working towards licensure and offers 16 clinical training sites.

For the first time in years, we have seen a decrease in deaths by drug overdose and suicide.



- HHS has disseminated an average of 11,000 naloxone kits annually leading to 3,292 known overdose reversals since 2017.

As presented at the recent Day For Prevention, North Dakota has also made significant progress in youth alcohol consumption. In 2023 the High School alcohol use was 1/3 the rate it was in 1999.

North Dakota Outcomes in Addiction - 2024 Wrap Up & Data

Data Sources: CDC, High School Youth Risk Behavior Survey, 2013 through 2021; ND DHHS, High School YRBS, 2023

Data Sources: CDC, High School Youth Risk Behavior Survey, 2013 through 2021; ND DHHS, High School YRBS, 2023

Even with these advances, there is much work to do. Current estimates suggest only 22% of those needing addiction treatment in the state receive it. As you are all aware, we cannot continue to use the criminal justice system as a behavioral health intervention. Solutions will require comprehensive system collaboration with community and state leadership.

Thank you for your leadership and advocacy.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/3/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:34 p.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Early Intervention
- Program Management
- Corporate Guardianship
- Intermediate Care Facilities
- Home and Community Based Waiver Services
- Developmental Disabilities Budget
- Residential
- Non-Residential
- Crisis and Stabilization Services
- Life Skills Budget

2:35 p.m. Tina Bay, Director, Developmental Disabilities Section, Health and Human Services, testified and presented on Developmental Disabilities #33838.

3:32 p.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, addressed overtime.

3:33 p.m. Tina Bay, Director, Developmental Disabilities, Health and Human Services, testified and continued with testimony #33838.

3:37 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, spoke to the Information Technology expenses.

3:38 p.m. Tina Bay, Director, Developmental Disabilities, Health and Human Services, testified and continued with testimony #33838.

3:54 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, testified on utilization and budget projection.

3:56 p.m. Tina Bay, Director, Developmental Disabilities, Health and Human Services, testified and continued with testimony #33838.

4:06 p.m. Heather Jenkins, Superintendent, Life Skills Transition Center, Health and Human Resources, Health and Human Services, testified and presented on Life Skills Transition #34020.

5:18 p.m. Jessica Thomasson, Executive Director, Human Services Division, Health and Human Services, addressed SB 2112.

5:24 p.m. Heather Jenkins, Superintendent, Life Skills Transition Center, Health and Human Resources, Health and Human Services, testified and continued with testimony # 34020.

Additional written testimony:

Ashley Rasmussen, Ericka Sickler, Inspiration Station, Dickinson, ND, in favor #33147.
Bailee Saltzman, Kids First Daycare, Surrey, ND, in favor #33254.
Cody Kurtz, Program Director, Dakota Center for Independent Living, Bismarck ND, in favor #33920.

5:26 p.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

House Appropriations – Human Resources Division
HB 1012 and funding for Early Childhood Education

Introduction

The Inspiration Station LLC is a daycare and preschool center located in Dickinson, ND, owned and operated by Ashley Rasmussen and Erika Sickler. We have been providing childcare services for a combined 8+ years. We started out as a small in-home, group daycare ran out of Ashley's house. We were able to care for 12 children under our license. Ms. Ashley "gave up" her home to provide these services – to follow code and licensure requirements, Ashley had to install flood lights, No Smoking stickers, floor plans, etc. throughout her house – all of which you would not find in a normal household. All the "extras" not only created a burden on her home, but it also created a financial burden that we were expected to come up with funds to make sure we were up to code. During that time, we were able to use a government supported grant to help offset the costs.

Fast forward to 2025, we have been operating The Inspiration Station for 2.5 years and able to care for up to 57 children under our license in our new facility. The decision to expand was not made easy. During the process, we researched many statistics and ran many business plans to make sure we could be financially stable as childcare is an expensive business to run. We had to consider our own personal bills at home, and the expenses included in running a small business. Please note on top of the usual water, heat, and internet bills, we also had to consider nutritious and delicious groceries, a large printer for all the fun activities, large playground equipment, and most importantly a fair wage to ensure reliable, dedicated staff. Although our license can hold up to 57 children, that does not mean we can meet that number without appropriate staffing. We have relied heavily on grants such as the Quality Improvement Grants and the Inclusion Grants to purchase adequate materials, needed supplies, and costly business expenses to help keep our tuition low but also maintain our dedicated staff by supporting their classroom needs.

The Effect

There are many statistics reporting that childcare is becoming more and more unaffordable for families due to high operating costs, staffing shortages, and inadequate public funding. Many workplaces can offer annual raises and a benefit package, and as a childcare center we always hope we can do the same for our employees. Childcare is the foundation for our children's future. Childcare workers are some of the most important people in the children's lives as 90% of brain development happens before age 5. To maintain a high quality, reliable staff, we have always kept up on training and other programs that help us improve. Some of the programs and grants we have worked with include the Bright and Early, Quality Improvement Grant, Inclusion Grant and working with USpire. Currently we are rated a Step 2 and would love to continue to achieve a Step 3 status. If the funding of 7 million is reduced to 5 million, many childcare programs would be placed in a burden. These funds have helped so many facilities improve their program through supportive training and resourceful materials. To continue this kind of care, childcare programs would have no other option than to increase tuition, putting families into a burden on whether it works in their budget to pay for childcare. This creates a domino effect. A mother, who works as a nurse, decided she must stay home now to watch over her children, leading to the ER being short staffed when your grandmother needs immediate care. A trucking company, who has lost too many drivers due to

not having reliable childcare, can no longer make deadlines for delivery. Whether you have children or not, everyone needs childcare, everyone is relying on that worker to show up to their shift to create that chain reaction and make things happen. Don't be the first domino. Don't reduce childcare funding.

Conclusion

The Inspiration Station has a total of 7 employees. Some of whom are mothers to children, and others young adults just starting out. We like to brag about how wonderful and dedicated our staff truly is – showing up to work each day for a below average wage. We do it because we truly love and care about the children in our care, just as you show up to fight for the people, because you have a passion for the job. And just like politics, childcare is not a business for the faint of heart. We have relied on the childcare funding for materials, supplies, and staffing throughout all our years of providing childcare. We are asking for continued support of the funds at $7 million. Reducing funding will have a very heavy impact on childcare facilities to operate at a safe ratio, finding reliable staff, and being able to provide affordable care to families in need. Inspiration Station is a place where little minds are inspired to learn and create brilliant ideas; a fun and caring childcare center for children to play and explore. This is our motto we live by daily, please help us continue.

Thank you for your time and consideration,

Ashley Rasmussen & Erika Sickler

1/27/2025

To whom it may concern,

This letter is in regard to the bill HB1012. The Inclusion grant is one that we current receive from ND Health & Human Services, and it is of great help our children.

I have worked at a daycare for over 5 years. I started when it was a small at home daycare with 13 children. Now our daycare is at 2 locations with up to 30 children at each location. Since I have started working at a daycare, the number of children needing more 1 on 1 care has increased substantially. We currently have 15 children in our care that have more needs than many daycares can work with.

Whether it is speech delays, OT services, or behavioral needs, the Inclusion grant has been able to provide our daycare with the ability to not only buy specialized supplies that help the children grow, but to be able to keep on more staff so that the children with needs get more care.

Many daycares' staff to children ratios are around 1:10, whereas our daycare has been able to have ratios of around 1:5. This not only helps the children to have that extra support from us, but it helps the mental wellbeing of the staff members. Daycare work is very rewarding, but it is also very mentally and physically exhausting.

We all know that quality daycares in the state are very much needed. Having grants like the Inclusion grant help daycares out in so many ways.

Please do not take away much needed funding that helps the children that need it most.

Thank you for your time,

Bailee Saltzman

Developmental Disabilities programs and services

Early Intervention

Services in a family's home, teaching parents' hands-on activities that they can do with their child (birth through age 2) to promote child development.

Program Management

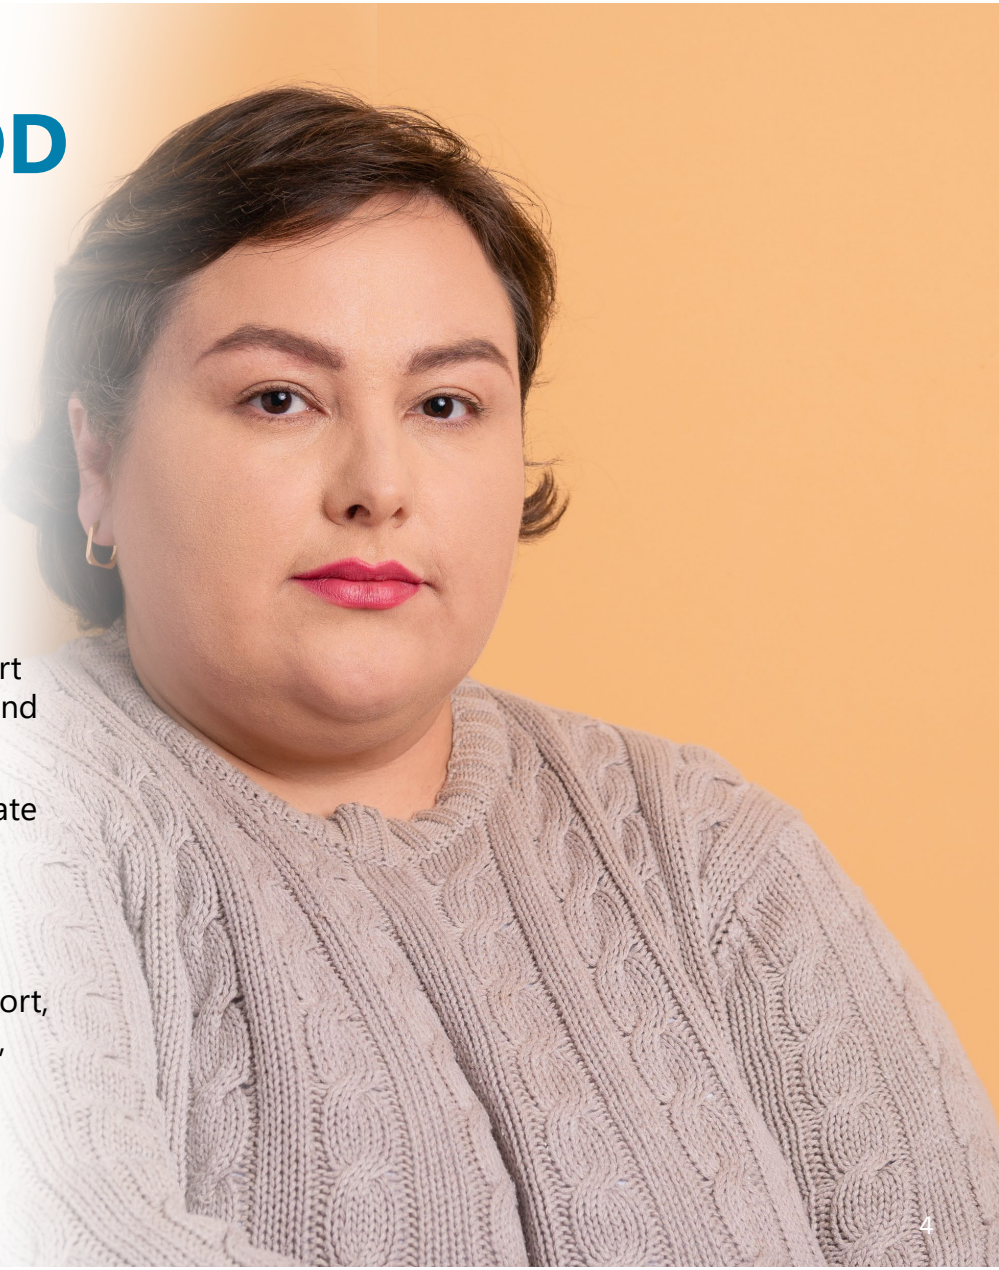
Provides information, referral and support to eligible individuals so they can access services and achieve their outcomes.

Corporate Guardianship

Support vulnerable individuals 18 years and older who need assistance making life choices.

Intermediate Care Facilities

Residential facility that provides health or rehabilitative services for individuals who require active treatment.



Home and Community Based Waiver Services

Provides individuals the opportunity to receive services in their own home and community rather than an institution.

What does it mean to be "DD Eligible" in ND

- To qualify to receive **case management supports** from a DD Program Manager (i.e., **DDPM-eligible**):
  - Determined to have either (1) an intellectual disability or (2) related condition such as autism, cerebral palsy, etc., which also results in substantial functional limitations in 3 or more areas of major life activities.
  - Eligibility defined in: NDAC 75-04-06
  - Services available: assistance with locating and coordinating support services, providing general information, and monitoring supports and services.
- To qualify for **residential and non-residential services** via an Intermediate Care Facility or the DD HCBS Waiver (i.e., **DD-eligible**):
  - DDPM-Eligible and determined to need an "ICF/IID level of care".
  - "ICF/IID level of care" defined in: 42 CFR §440.150(a)(2)
  - Services available: range of DD authorized services like family support, intermediate care facility, residential habilitation, day programming, employment supports, respite, and equipment and supplies.

Self Directed Services are a mode of service delivery that is growing in terms of utilization in the DD Waiver

What are "Self Directed Services"?

With the support of a fiscal agent, families can hire their own staff, set wages, provide training, and create schedules for staff they hire, offering greater flexibility and personalization in the care and support they receive.

- **Respite & In home supports**
- **Equipment & Supplies**
  - Nutritional supplements
  - Adaptive kitchen utensils
  - Switches/adaptive controls
  - Sensory items (noise cancelling headphones, weighted vests/blankets)
  - Assistive technology (smart thermostat, smart lock, smart lights, sensors, alarms, automatic soap dispenser, switches, and iGuard stove controller)
- **Environmental Modifications**
  - Widening of doorways in homes
  - Track lift system
  - Lifts for vehicles
  - Accessible showers
  - Ramps

How does the supportive role of the DDPM change based on the setting where someone lives?

Accomplishments: Filling Gaps & Improving Services

Enhancements to DD HCBS Waiver

In-Home Supports

- New flexibility: Individuals can now utilize both Provider managed and Self-Directed services.

Equipment & Supplies

- Increase in limit: from $4,000 to $5,000 per waiver year.

Environmental Modifications

- Increase in limit: from $20,000 to $40,000 per waiver period (5 years)
- Added that modifications can be made to homes rented by participant or primary caregiver.

Respite Service

- Created stand-alone service that allows for 600 hours per year of support.

What might 600 hours of respite mean for a family?
600 hours/year =
50 hrs / month OR
11.5 hrs/week OR
3.5 wks/year

NORTH Dakota Be Legendary. | Health & Human Services

Accomplishments: Filling Gaps & Improving Services

Enhancements to DD services

Youth Social Supports & Community Integration Grant

- Grant provided funding to three agencies aimed at supporting community integration for youth aged 12-21.
- 46 youth participated
- Participants took part in various community activities, including visits to local parks, water parks, street fairs, movies, fishing trips, and the zoo.
- The pilot was operational from June 1 – August 31, 2024. *Funding Source: ARPA 10% HCBS Fund*

Guardianship Establishment Fund

- Provides funds to cover petitioning costs for family and friends who are willing to serve as guardian but may not have the financial resources to complete the legal process.
- $3,000 max per request; 112 requests approved

Components of Quality

How are we doing?
Can we do it better?

National Standards

Evidence Based Practices

Applying or translating research findings into care practices and decision making that will result in the best client outcomes

Accreditation

Assures quality, consistency and relevant approaches through application of research-based standards and a peer-review process

State Standards

Licensure and Certification

Granting of authority to practice within health and safety guidelines and/or scope of practice

Incident Reporting

Tracking of health and safety events that occur in the course of delivering care to clients

Outputs and Outcomes

National Core Indicators

Standard measures used across states to assess the outcomes of services provided to individuals and families

Core Set Performance Measures

National standards of care and treatment processes for common health conditions

Processes

Quality Assurance / Quality Control

Monitoring desired level of quality in service delivery by examination of processes and procedures

Accreditation as part of the ND Quality Framework

Accreditation is about more than regulatory compliance. It represents a quality standard that evaluates how well an agency is supporting the people it serves.

- Allows for an outside, unbiased, third-party review of policies and practices and the experiences of those receiving services.
- Measures these items against national practices, experiences, and established standards. In turn, this allows for the ability to keep North Dakota services and supports truly person-centered.
- Encourages providers to collect data and use the data to make informed decisions or changes toward policy and practices.

Regulatory Monitoring

Licensing, monitoring and training, and the HCBS survey process focus on ensuring that providers meet minimum standards for health, safety, and compliance with state policies.

Accreditation

Accreditation goes further by emphasizing person-centered care and aligning practices with nationally recognized best practices.

Discharge can be Voluntary or Involuntary

Voluntary Discharge: the person chooses to exit services or choose another provider

- Personal preference
- Move to a different city
- Move to a short term stay in a skilled nursing facility (ex. rehab, recovery)

Involuntary Discharge: the person is discharged from services against his or her own wishes.

- Provider "not able to meet needs"
  - Short staffing
  - Safety needs for both client and staff
  - Client-to-client interactions
  - Guardian or family challenges, including preventing the provider from providing supports

Involuntary Discharges (July-December 2024)**: 9**
People living in ICF or ResHab setting (12-31-24 snapshot): **5,527**

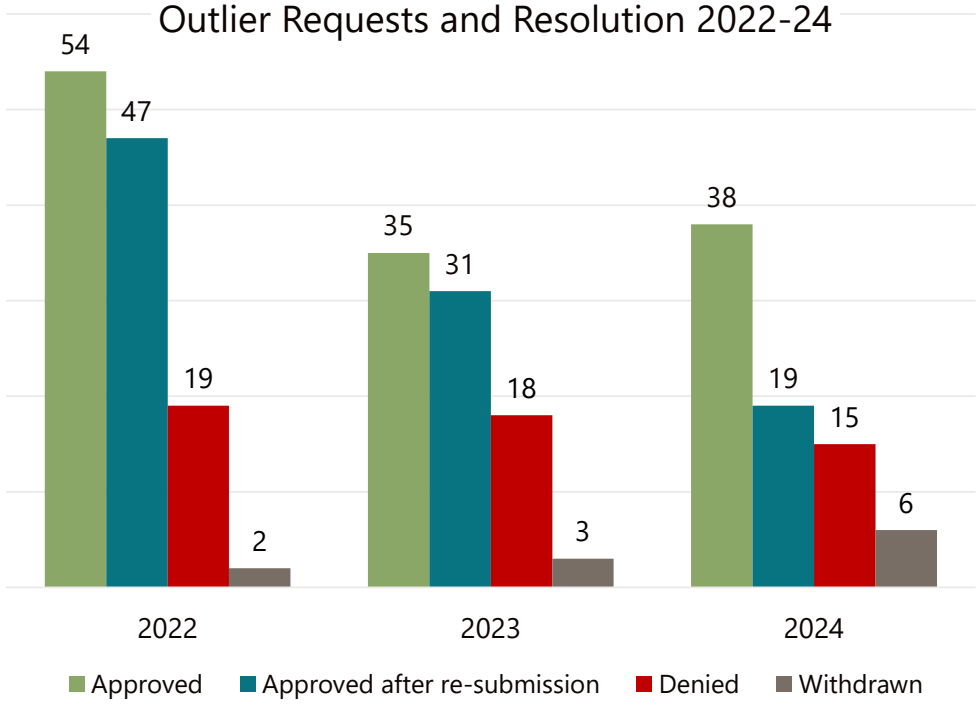
	Total	Details
Total Involuntary Discharges	**9**	**1-Medical Needs 1-Substance Abuse 7-Behavior**
Continued with Provider	2	Team Problem Solving Resulted in Stabilization
Accepted by a New Provider	5	
Back with Family	1	
At LSTC (Life Skills and Transition Center)	0	
At NDSH (North Dakota State Hospital)	0	
Homeless	1	Due to Substance Abuse

**Involuntary Discharge means that the individual's care team did not concur with the discharge decision.*

NORTH Dakota Be Legendary. | Health & Human Services

Examining opportunities to think differently about discharge

- HHS assembled a “Discharge Policy Work Group” to develop recommendations to improve involuntary discharge practices and policy. Work group is examining:
  - Reasons for involuntary discharge
  - Current challenges in the system related to involuntary discharge
  - Multiple case studies of those that have been given notice of involuntary discharge
- Work Group membership includes: HHS DD section policy (2) and field staff (2), P&A (2), DD provider CEOs (3), Guardians (2), LSTC (1)
- Results from the group’s recommendations could potentially lead to policy change.



Outlier Requests are a systematized part of the service auth process designed to account for extraordinary needs

If an individual's needs exceed the support service hours authorized as per the information gleaned from the SIS or ICAP assessment, they can request consideration for additional Medicaid-funded staff support.

1. Meet a medical or behavioral qualifier, and
2. Pose an imminent risk of harm to health/safety (self or others), and
3. Support needs exceed hours identified, and
4. Other mitigation options were pursued before requesting additional staffing

The Outlier Policy helps ND **apply consistent principles** *across unique situations* and helps ensure that the system is supporting the **least restrictive level of staffing** that is *necessary to meet a person's needs*.

Common Denial reasons

- Hours in setting meet the level of staffing requested
- No data included or it is incomplete
- Frequency or intensity does not meet the policy requirements

Assistive devices and technologies are opening up new avenues for people to support their “life activity” needs without relying on staffing as the sole solution

Assistive devices and various home and vehicle modifications have always been part of how families and providers have worked together to modify the physical environment to meet a person’s unique needs.

- Ramps and Lifts
- No-step showers, grab bars
- Walkers, canes and

The environment, expectations, and opportunities surrounding environmental modification are ever-changing

- Sensory issues
- Technology-enabled devices
- Smart-home improvements paired with physical home modification

Access to assistive devices/technologies is growing.

Navigating how to access a growing array of options can be difficult for families.

	Medicaid State Plan	DD waiver	Autism waiver	Med Fragile waiver	Aged & Disabled waiver	Other (MFP, SPED, ExSPED)	Other (housing rehab)
Benefit Limits	Specific to individual need	Equip & Supplies - $5k/yr Env Mod - $40k (over 5 yrs)	Assistive Tech - $5k (over 5 yrs)	Assistive Tech & Env Mod - $25,300/waiver yr (all services)	Specific to individual need	Unique to each program	Unique to each program
Eligible settings	Own home (rent or own)	Own home (rent or own)	Own home (rent or own)	Own home (if mod cannot be moved, must own)	Own home (rent or own)	Unique to each program	Unique to each program
How to access	Enroll as Medicaid provider	Veridian (contracted intermediary)	Purchased by HHS and shipped to home	Veridian (contracted intermediary)	Enroll as Medicaid provider	Each program has a pathway	Each program has a pathway
Eligible items	Medically necessary as defined in NDAC 75-02-02	All 4 Medicaid 1915c waivers note that approval of any item is dependent on the disability and the need (i.e., prevent institutionalization by addressing ADL/IADLs)				Unique to each program	Unique to each program

- For waivers that serve children, if an item is generic, availability depends in part on the age of the participant. As a general principle, if a child without a disability would need it, Medicaid will not cover it because the need is not specific to a child's disability. (ex. a highchair for a 3-year-old v a 15-year-old)

Included in Executive Budget Request

Convert the DD Youth Assessment Tool from ICAP to SIS-C

- Currently HHS-DD section uses the ICAP assessment for the resource allocation process for children birth - 15.
- The tool was selected in 2018 in part because the child-version of the SIS assessment (which ND uses for adults) was not yet available. As of 2024, the ICAP is no longer being normed or updated.
- HHS has proposed replacing the ICAP with the child-SIS (SIS-C) to reduce the impact of changing from the child assessment to adult, as both assessments will focus on support needs rather than deficiencies.
- This is expected to be a multi-year project that involves both testing the new assessment and adjusting the allocation formula based on the scoring results in the new assessment. This funding is for the use of the assessment and the consultant needed to do the allocation work.

Total	General	Federal	Other
$400,000	$200,000	$200,000	$0

This is a one-time funding request.

Included in Executive Budget Request

Implement a Host Home Service in the DD HCBS Waiver

- One of the highest priority gaps in the DD service delivery system involves appropriate service settings for youth who need at least some level of residential care outside of their family home.
- This request establishes a host home service in the DD waiver; it replaces the Family Care Option service which has been a part of the DD waiver for many years but has not effectively deployed.
- Host homes will infuse therapeutic level supports for both the youth and for the youth's family / support system to foster continued opportunities for family involvement as the youth navigates challenging symptoms and nears adulthood.
- Funds are for service delivery (paid to providers) in support of 20 operational host homes serving approximately 20 youth.

Total	General	Federal	Other
$3,379,800	$1,689,900	$1,689,900	$0

This is an ongoing funding request.

  - 45 agency providers
  - 580 individual providers (self-directed)

Total	General	Federal	Other
$16,808,241	$8,293,006	$8,515,235	$0

This is an ongoing funding request.

Included in Executive Budget Request

Cross Disability Waiver Implementation

- Address existing disparities in access to home and community-based services for children with disabilities, taking meaningful steps to expand access and resources to people who may not be well served by the current system of care.
- Modernize the current system, ensuring equitable access to essential services for children aged 3 to 21 who have mild to moderate support needs.

2025-2027 Biennium Activities:

1. Design and Test New Level of Care for Cross Disability Waiver and Developmental Disabilities Waiver
2. Design Cross Disability Waiver (Service Array, Access, Quality, Provider Qualifications & Rates)
3. Start Building Service Infrastructure

- Anticipated start date for delivery of services is July 2028.

Total	General	Federal	Other
$4,948,452	$2,474,226	$2,474,226	$0

This is an ongoing funding request.

Part of the Cross-Disability Waiver work will change what it means to be "DD-eligible"

Modifying and Refining Level of Care

CURRENT STATE

North Dakota uses an older federal definition of developmental disability to decide who qualifies for services. This definition focuses mainly on things like learning, self-care, and mobility.

NEXT STEP

Update North Dakota's definition to match more modern standards, like those used by the AAIDD, DSM-5, and ICD-11.

- The update will include "social" functioning as part of what qualifies someone for services.
- This change will help the state better identify and support people with intellectual and developmental disabilities.

HOW DO WE GET THERE?

To make this happen, the state will work with a contracted entity to:

- ✓ Review the best practices from across the country,
- ✓ Test new tools alongside the current system,
- ✓ Select a new tool, and
- ✓ Develop an implementation plan.

What does it actually mean to modify the DD "level of care"?

4 primary domains affect a person's ability to execute life activities

	ND Today	ND Future
1 Intellectual or Developmental Significant limitations in both Intellectual functioning (general mental capacity) & adaptive behavior; originates before age 22	✓	✓
	+	+
2 Conceptual Language and literacy, money, time, number concepts, self direction	✓	✓
		+
3 Social Interpersonal skills, social responsibility, self-esteem, gullibility, naivete (wariness), social problem solving, ability to follow rules/obey laws, avoid victimization		✓
	+	+
4 Practical Activities of daily living (personal care), occupational skills, healthcare, travel/transportation, schedules/routines, safety, use of money, use of the telephone	✓	✓

What stays the same?

- Definition of and understanding of each individual element of diagnosis / deficit
- Definition of an ICF/IDD level of care

What changes?

Our understanding, assessment and recognition of the interplay between the diagnosis of intellectual disability and various adaptive deficits (conceptual, social, practical), and the impact the cumulative effect has on a person's ability to execute life activities

Appendix

More about the ND Level of Care for DD eligibility, excerpted from Alvarez and Marsal reports.

- ND Developmental Disabilities Study, presented to ND Legislature on June 30, 2022 (Alvarez and Marsal)
- Cross-Disability Children's Waiver Update, presented to ND Legislature on September 25, 2024 (Alvarez and Marsal)

Understanding Level of Care

- In order to receive waiver services, eligible individuals must demonstrate the need for a Level of Care (LOC) that would meet the state's eligibility requirements for services in an institutional setting.
  - Waivers target a population of people in need of LTSS (for example: people with intellectual and developmental disabilities; people with autism; people with physical disabilities; seniors) and use functional eligibility criteria (LOC)
  - Eligibility for Medicaid HCBS waivers is directly linked to institutional level of care, because waivers are an alternative to institutionalization in facilities like Intermediate Care Facilities for Individuals with Intellectual Disabilities and Nursing Facilities
  - Level of Care is determined initially at admission and then recertified annually.
- The overall goal of Level of Care determinations is to ensure that the right people are getting the right amount of care, in the right environment.
  - People most in need have access to Long Term Services & Supports (LTSS)
  - Limited state resources are used to provide LTSS for that population of people
  - Those people have the opportunity to receive LTSS in the least restrictive environment that meets their needs

Modernizing the DD Definition to Recognize Adaptive Social Deficits

FUTURE STATE	• Update definition of developmental disability to match AAIDD, DSM-5, & ICD-11 definition. • Continue to require that a person meet at least 3 functional limitations. • Add requirement that functional limitations cross two adaptive areas.

- North Dakota currently uses the federal definition of developmental disability from the Developmental Disabilities Assistance and Bill of Rights Act of 2000 as part of determining eligibility for services. The definition aligns major life activities with adaptive deficits that are conceptual: receptive and expressive language, learning, and self-direction; and practical: self-care, mobility, capacity of independent living, and economic self-sufficiency.
- The AAIDD, DSM-5, and ICD-11 definitions also consider adaptive deficits in social functioning. Examples include: interpersonal skills, social responsibility, self-esteem, gullibility, naïveté (i.e., wariness), social problem solving, and the ability to follow rules/obey laws and to avoid being victimized.
- A&M recommends **modernizing the statutory definition of developmental disability and**, accordingly, level of care, to align with these more modern definitions, **requiring significant functional limitations in two of the following three areas of adaptive functioning: conceptual, social, and practical**.
- Examples of peer states that use all three categories of adaptive deficits include: Nebraska, Iowa, Kansas, and South Dakota.

Intellectual or Developmental Disability Definitions (1 of 2)

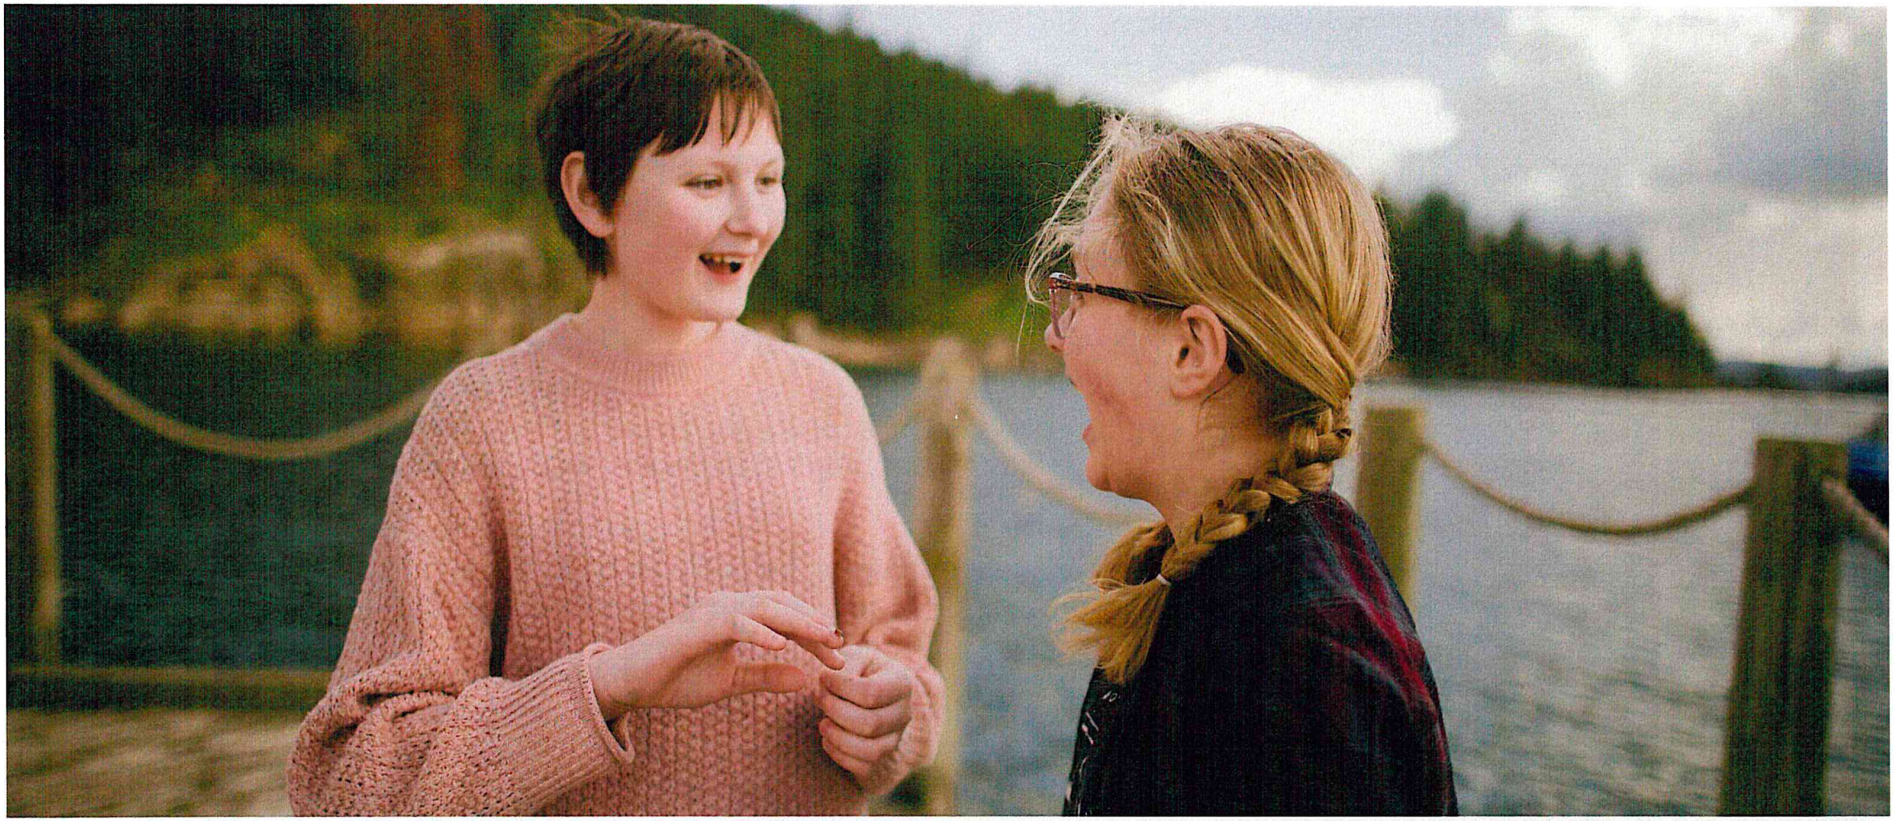
	North Dakota	AAIDD
Intellectual or Developmental Disability Definition **Recommendation**: 1. Recognize adaptive social deficits 2. Require substantial functional limitations in 3 or more major life activities, that cross at least 2 of the 3 domains: conceptual, social, and practical	The term "developmental disability" means a severe, chronic disability of a person which: A. is attributable to a mental or physical impairment or combination of mental and physical impairments; B. is manifested before the person attains age twenty-two; C. is likely to continue indefinitely; D. results in **substantial functional limitations in three or more of the following areas of major life activity**: [SEE BELOW] E. reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services that are of lifelong or extended duration and are individually planned and coordinated.	Intellectual disability is a disability characterized by **significant limitations in** both intellectual functioning and in **adaptive behavior**, which covers many everyday social and practical skills. This disability originates before the age of 18. Intellectual functioning—also called intelligence—refers to general mental capacity, such as learning, reasoning, problem solving, and so on. One way to measure intellectual functioning is an IQ test. Generally, an IQ test score of around 70 or as high as 75 indicates a limitation in intellectual functioning.
Adaptive Deficit: Conceptual	Receptive and expressive language Learning Self-direction	Conceptual skills—language and literacy; money, time, and number concepts; and self-direction.
Adaptive Deficit: Social		Social skills—interpersonal skills, social responsibility, self-esteem, gullibility, naïveté (i.e., wariness), social problem solving, and the ability to follow rules/obey laws and to avoid being victimized.
Adaptive Deficit: Practical	Self-care Mobility Capacity of independent living, and Economic self-sufficiency	Practical skills—activities of daily living (personal care), occupational skills, healthcare, travel/transportation, schedules/routines, safety, use of money, use of the telephone.

Intellectual or Developmental Disability Definitions (2 of 2)

	DSM-5	ICD-11
Intellectual or Developmental Disability Definition	Intellectual disability involves impairments of general mental abilities **that impact adaptive functioning in three domains, or areas.** These domains determine how well an individual copes with everyday tasks. While intellectual disability does not have a specific age requirement, an individual's symptoms must begin during the developmental period and are diagnosed based on the severity of deficits in adaptive functioning.	Neurodevelopmental disorders are behavioral and cognitive disorders that arise during the developmental period that involve significant difficulties in the acquisition and execution of **specific intellectual, motor, or social functions.** Although behavioral and cognitive deficits are present in many mental and behavioral disorders that can arise during the developmental period (e.g., Schizophrenia, Bipolar disorder), only disorders whose core features are neurodevelopmental are included in this grouping. The presumptive etiology for neurodevelopmental disorders is complex, and in many individual cases is unknown.
Adaptive Deficit: Conceptual	The conceptual domain includes skills in language, reading, writing, math, reasoning, knowledge, and memory.	Conceptual skills are related to the application of knowledge (e.g., reading, writing, calculating, solving problems, decision-making) and communication
Adaptive Deficit: Social	The social domain refers to empathy, social judgment, interpersonal communication skills, the ability to make and retain friendships, and similar capacities.	Social skills are those related to managing interpersonal interactions, relationships, social responsibility, following rules, obeying laws as well as avoiding victimization.
Adaptive Deficit: Practical	The practical domain centers on self-management in areas such as personal care, job responsibilities, money management, recreation, and organizing school and work tasks.	Practical skills are those related to activities such as self-care, health and safety, occupational skills, recreation, use of money, transportation, and use of home appliances and devices.

See Appendix, Intellectual & Developmental Disabilities Definitions, for peer state examples.

House Bill 1012
House Appropriations – Human Resource Division
Representative Jon Nelson, Chairman



Chairman Nelson and members of the House Appropriations – Human Resource Division Committee. My name is Cody Kurtz, and I am the MFP/NDPP Program Director for the Dakota Center for Independent Living. Dakota Center for Independent Living, along with the other three Centers for Independent Living throughout the state of North Dakota have been working with the North Dakota Department of Human Services to provide contractual work for the grant program called the North Dakota Transition and Diversion Pilot Project. This project started out with dollars from COVID and has continued for the last few years. The intentions of the grant program are to assist low-income individuals either on Medicaid, Medicaid Expansion, or receiving services through ND Aging Services Home and Community Based Cares. The program is intended to provide assistance to help keep individuals eligible for the program, living independently in their homes, and preventing them from having to go to a more restrictive environment like a Basic Care or Skilled Nursing Facility.

The program has provided individuals with funding to build ramps onto their homes, do bathroom modifications to make them more accessible for them, and has put in stair lifts. The program also provides assistive equipment for individuals, such as shower chairs, Hoyer lifts, PAL lifts, grab bars, and a number of other equipment that they may not be able to afford themselves. The ultimate goal of the program is to assist individuals to be more independent in their homes for longer and to reduce the need for long term care in a facility setting.

Dakota Center for Independent Living completed 82 diversions through this program from 10/1/2023 to 9/30/2024, the last reporting year for numbers with that program. However, we continue to do the same work this reporting year with similar results.

This program is crucial for residents of North Dakota who are low-income and could not otherwise afford to pay for the items mentioned and would likely need to move into a more restrictive environment. Although Basic Care, Assisted Living, and Skilled Nursing facilities may serve some individuals well, they are not for everyone, and sometimes staying in your own home is the most important place to keep your quality of life high.

Cody Kurtz
MFP/NDPP Program Director
Dakota Center for Independent Living

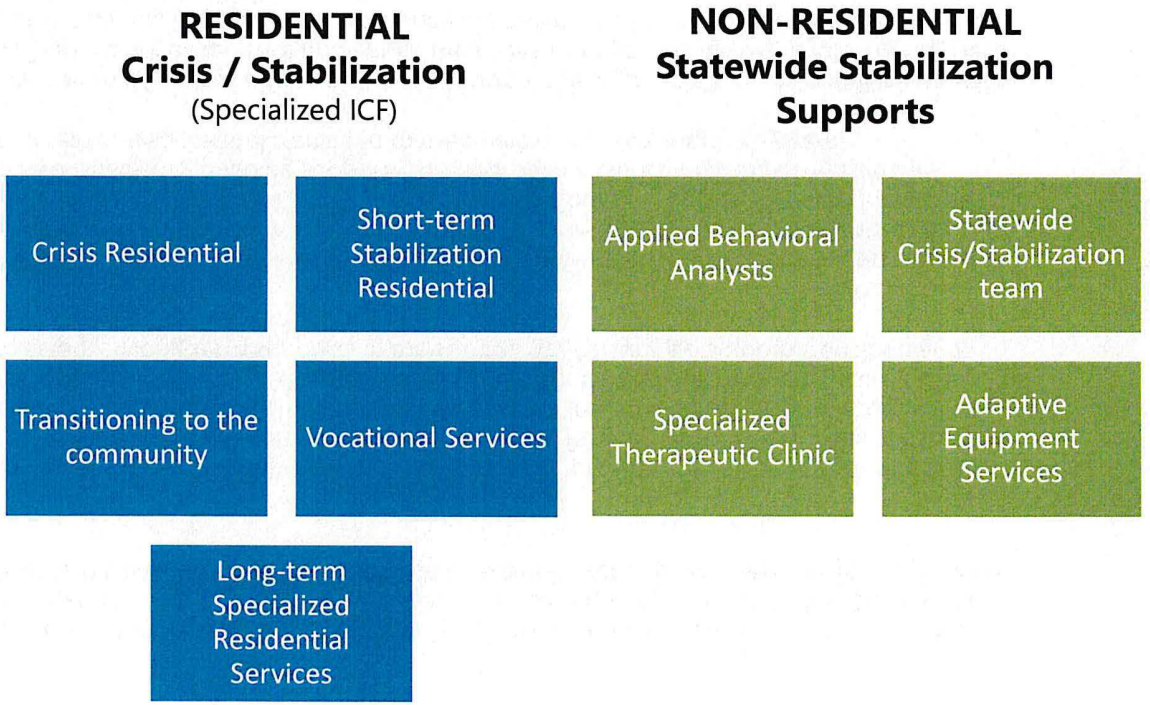
LSTC Purpose and Century Code

Chapter	Chapter Name
25-04	Care of Developmentally Disabled

- Serve as a specialized crisis and stabilization resource to the network of private residential facilities and the thousands of families who are caregivers for a loved one with intellectual and/or developmental disabilities.
- Provide critical, temporary support for children and adults with complex and co-occurring disabilities who are not always well-served by the current service system.
- LSTC is not a permanent home, but rather the right service at the right time, helping individuals stabilize, build skills, and prepare for future independence.

Who does LSTC serve? Children and adults with complex and co-occurring disabilities who are not always well-served by the current continuum of services.

How does LSTC serve? Residential Crisis / Stabilization and Non-Residential Statewide Stabilization Supports



NORTH Dakota | Health & Human Services
Be Legendary.

LSTC provides both Residential and Non-Residential services

Person-centered care that goes beyond traditional models, offering specialized support to individuals with intellectual disabilities who need more than others can offer.

Multidisciplinary team works together to create personalized plans for each person, offering specialty care and crisis stabilization to help individuals regain stability.

Work to ensure that every person has a clear path to a community-based life whenever possible.

NORTH Dakota | Health & Human Services
Be Legendary.

Residential Services | Crisis/Stabilization

Crisis Residential

$$ Medicaid (fed/gen)

Crisis Residential Services: Intermediate care facility (ICF) provides 24-hour comprehensive services and support including medical and clinical programming. This includes services for those requiring skilled nursing, behavioral health services, services for youth in transition from the agency to community settings, and services for adults with sexual offending behaviors.

Short-term Stabilization

$$ Medicaid (fed/gen)

Short-term Stabilization Services: Short-term Stabilization Services at LSTC provide critical support during times of crisis when individuals with intellectual and developmental disabilities (I/DD) face temporary gaps in care. This may occur due to a sudden worsening of behavioral or physical health needs, the loss of a caregiver or home, homelessness, or a short interruption in services. LSTC crisis admissions offer immediate, temporary care to keep the person safe while we work to establish long-term supports in the community, ensuring a smooth transition and stability for the individual.

Transition Supports

$$ General Fund

Transition Supports: When someone moves from LSTC to other private supports, LSTC transition teams provide a customized transition plan/schedule to ensure a smooth and successful process. LSTC staff provide on-site support during the move, and both a Behavior Analyst (ABA) and Crisis Stabilization Coordinator (CSC) are assigned to assist with the adjustment, remaining available for ongoing support. This approach ensures individuals receive the necessary guidance and resources for a successful transition to their new home and support system.

Vocational Services

$$ Medicaid (fed/gen)

Vocational Services: LSTC's Vocational Services offer a robust and supportive approach to helping individuals with intellectual disabilities gain valuable work experience and enrich their lives through community involvement. These services combine hands-on work training, therapy, and community engagement to help individuals develop essential skills and realize their full work potential

Long-term Specialized Res

$$ Medicaid (fed/gen)

Long-Term Specialized Residential: Long-term specialized residential services provide a safe, supportive, and structured environment for individuals who have lived at LSTC for most of their lives. This legacy service allows each individual person, their guardian(s) and their care team to make the decision that is right for them. LSTC works with all residents to identify options for transition, including long-staying individuals.

JTO

Non-Residential Services

Applied Behavioral Analysts

$$ Medicaid (fed/gen)

Applied Behavior Analysts (ABA)- LSTC' team of ABAs provide professional behavior analysis services to private providers and families across the state. They conduct detailed functional assessments to develop intervention plans that help address challenging behaviors. Using evidence-based methods, ABAs design teaching strategies and support teams with intervention planning, staff training, coaching, and ongoing performance analysis.

Statewide Crisis/ Stabilization Team

$$ General Fund

Statewide Crisis/Stabilization Team (CSC)- CSCs provide response to people with intellectual/ developmental disabilities who are experiencing a de-stabilizing crisis while in their home setting. CSC's work directly with families, providers and community partners to provide individualized and responsive services to help people live successfully in their communities.

JTO

Therapeutic Clinic

$$ Private Insurance / Contracts

Specialized Therapeutic Clinic - Outpatient occupational and physical therapy services for infants to older adults, including physical, occupational, speech, and aquatic therapy with specialized resources designed to support improved mobility.

Adaptive Equipment Services

$$ General Fund / Pvt Pay Sliding Scale / Medicare / Contract

Adaptive Equipment Services- Custom-built and custom-modification of existing assistive equipment and devices to support independence and mobility within the community. Multidisciplinary team assesses, designs and builds/modifies equipment to meet each individual's unique needs.

- LSTC's non-residential services are available to anyone living in North Dakota (in individual or congregate settings, school settings, vocational sites).
- While the teams have specialized experience serving people with developmental disabilities, these services also fill needs for people with physical disabilities, as well as other medical or behavioral health needs.

LSTC Census Snapshot

Characteristics of people receiving Residential Services | December 2024

Current Census as of 12-31-24

46

32 Adults (age 22+)
14 Youth (age 13-21)

- Range of Intellectual Disability (ID) from Profound ID to Low average IQ
- Majority of residents with severe co-occurring behavioral health conditions

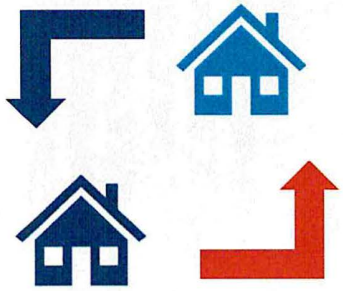
Non-residential Services

Transition Services to support a person's move to another setting

Transition services actively support successful transition from LSTC to another setting by development and implementing comprehensive transition plans. LSTC staff:

- Facilitate meetings between new provider(s) and individual served pre-transition
- Offer training to new provider staff pre- and post-transition (to the extent the new provider is interested), focusing on details of each person's behavior support plan
- Provide direct staffing support in the new environment post-transition (timeframe dependent on circumstances)
- Follow up post-transition 2 weeks, 1 month, 3 months, at times up to 6 months to help problem solve as needed



Average Days of Support	Average Hours of Support	Days of Support Range	Hours of Support range
9.6	115	1 to 32	1 to 46,935

Once a person is discharged from LSTC, transition support services costs are paid with General Fund (i.e., not Medicaid-billable).

Residential Services

Focusing on a mission of crisis and stabilization is resulting in shorter duration of residential stays

5.5%

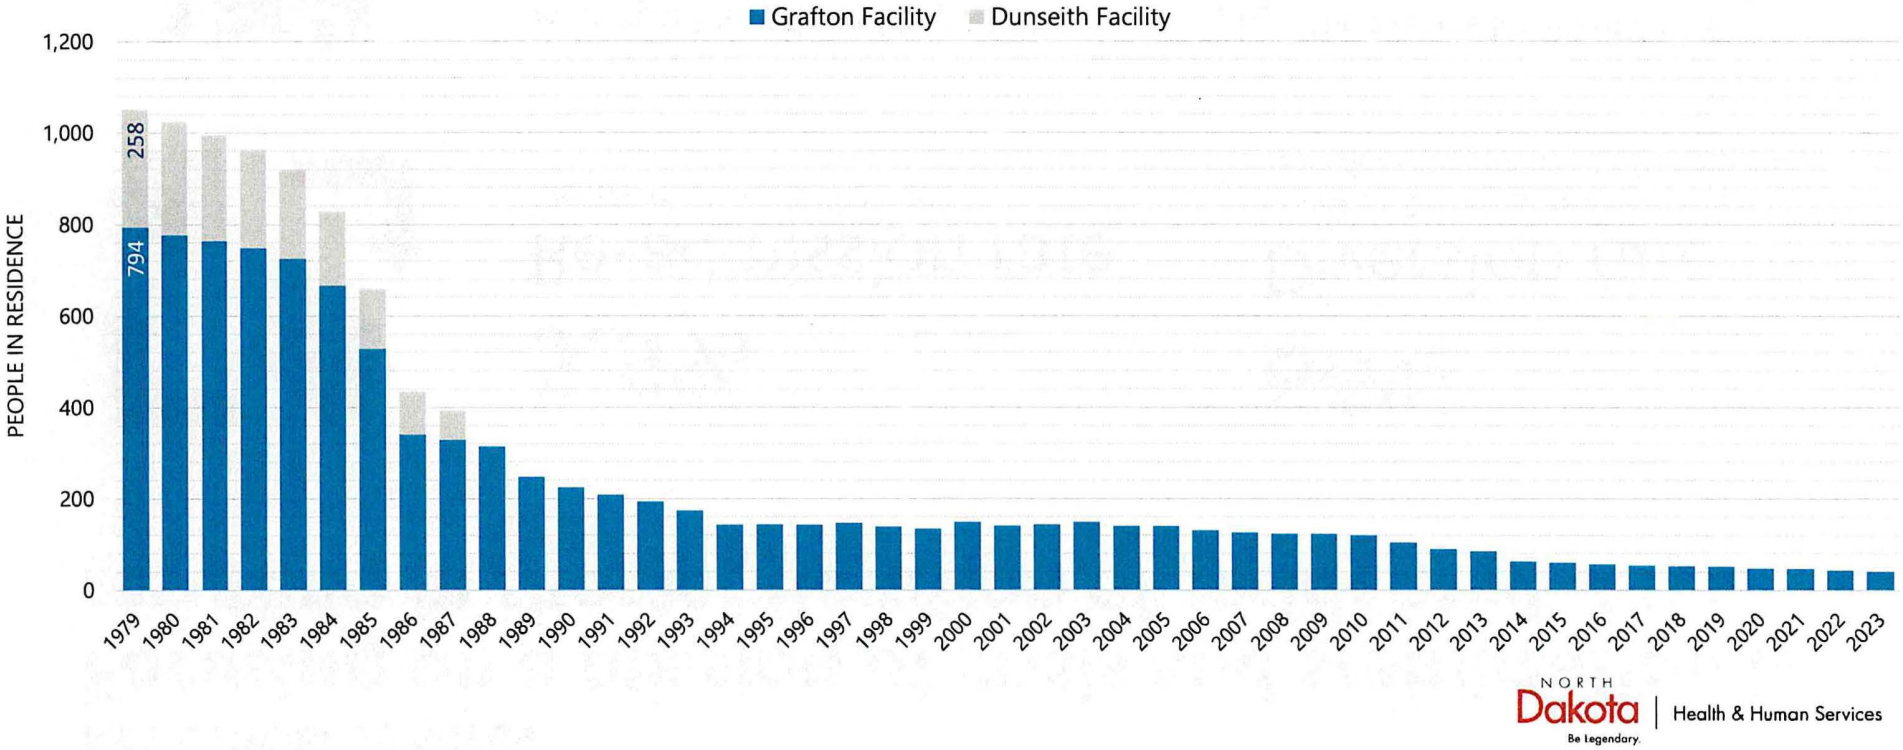
Re-admission rate

*People discharged 2023-2024

66%

Diversion rate

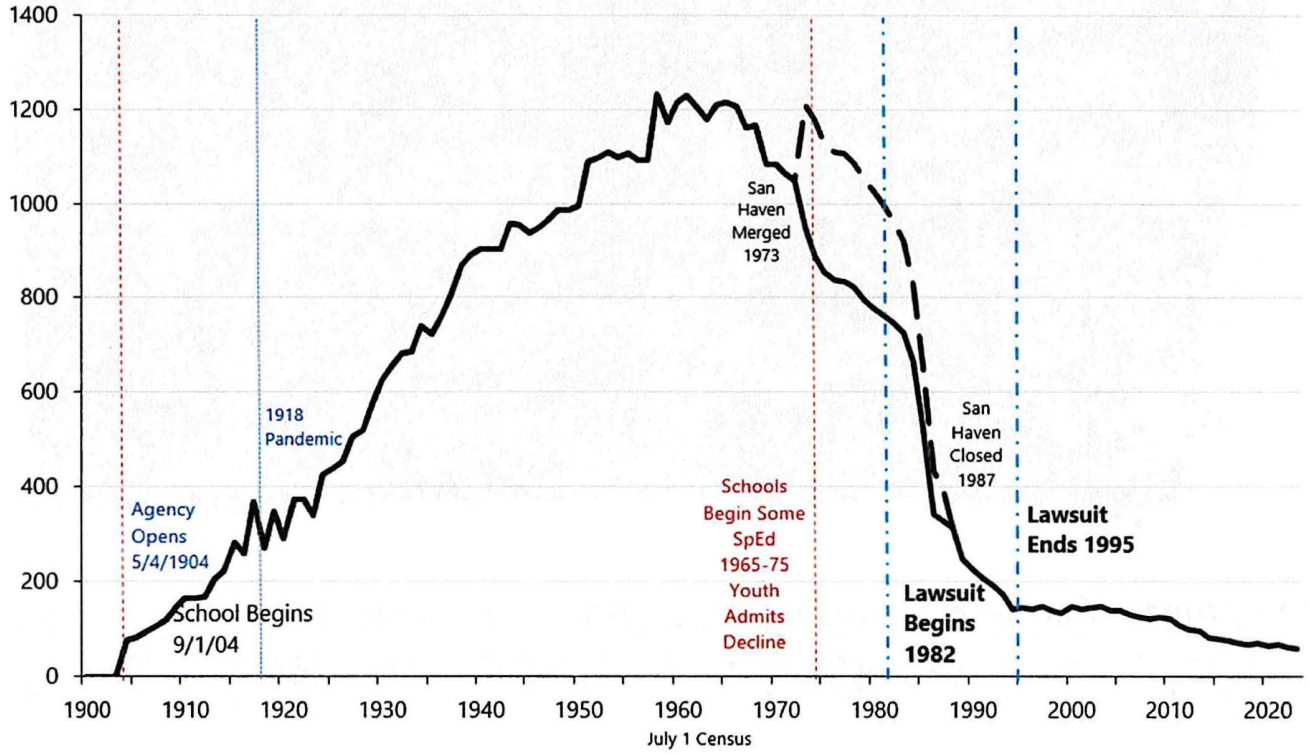
*14 of 21 30-day notices referred to LSTC did NOT result in LSTC admission



Average Length of Stay at LSTC

2023: **8.1 years**
2024: **2.4 years**

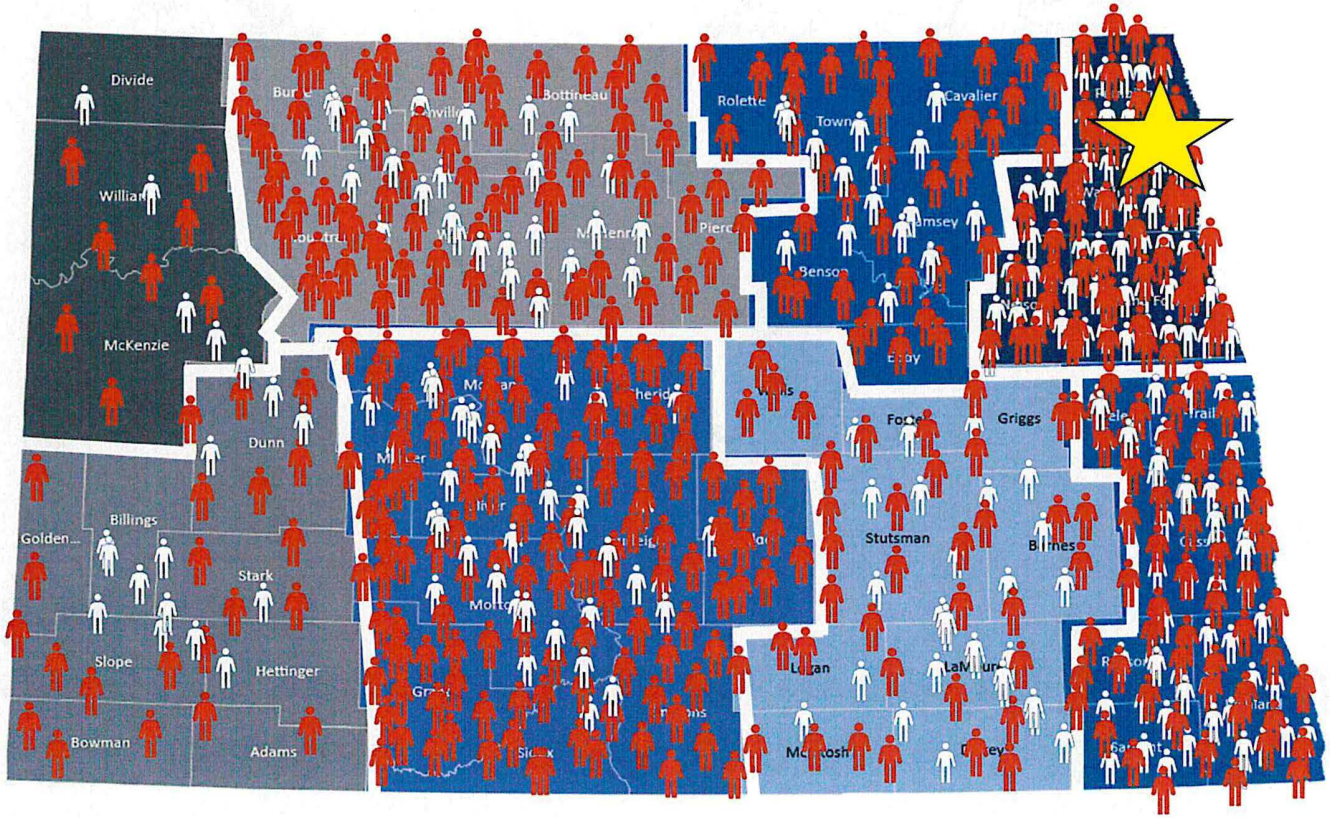
The average length of stay is decreasing due to an increase in shorter-term crisis admissions, as well as a growing number of long-term stays transitioning to community settings.



LSTC's role in ND has changed significantly in the last 40 years

1979 - 2023 Census | Grafton & Dunseith

NORTH Dakota | Health & Human Services
Be Legendary.



LSTC reached its peak census in 1958, when 1,231 children and adults lived in the state's residential institution

NORTH Dakota | Health & Human Services
Be Legendary.

Statewide outreach is a hallmark of LSTCs work today

LSTC is no longer strictly a campus-based residential facility located in Grafton.

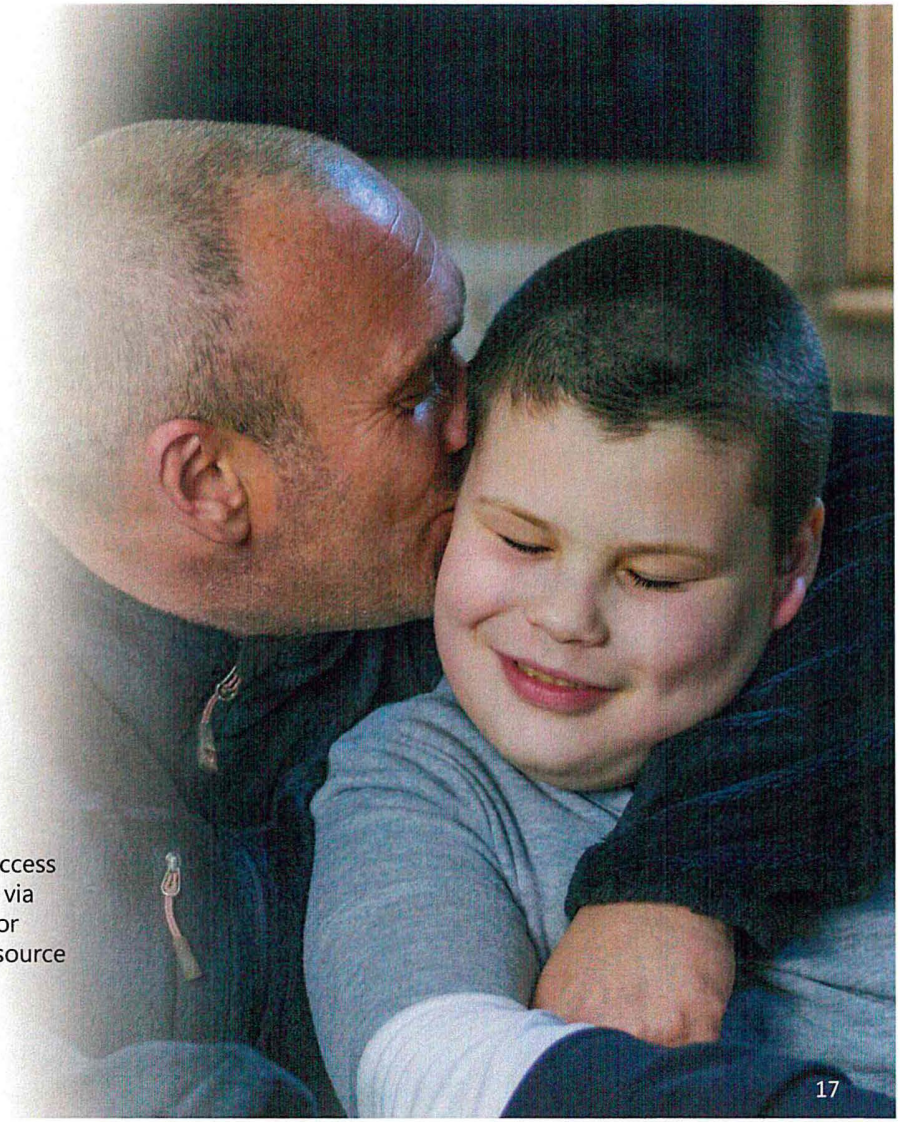
NORTH Dakota | Health & Human Services
Be Legendary.

Non-Residential Services



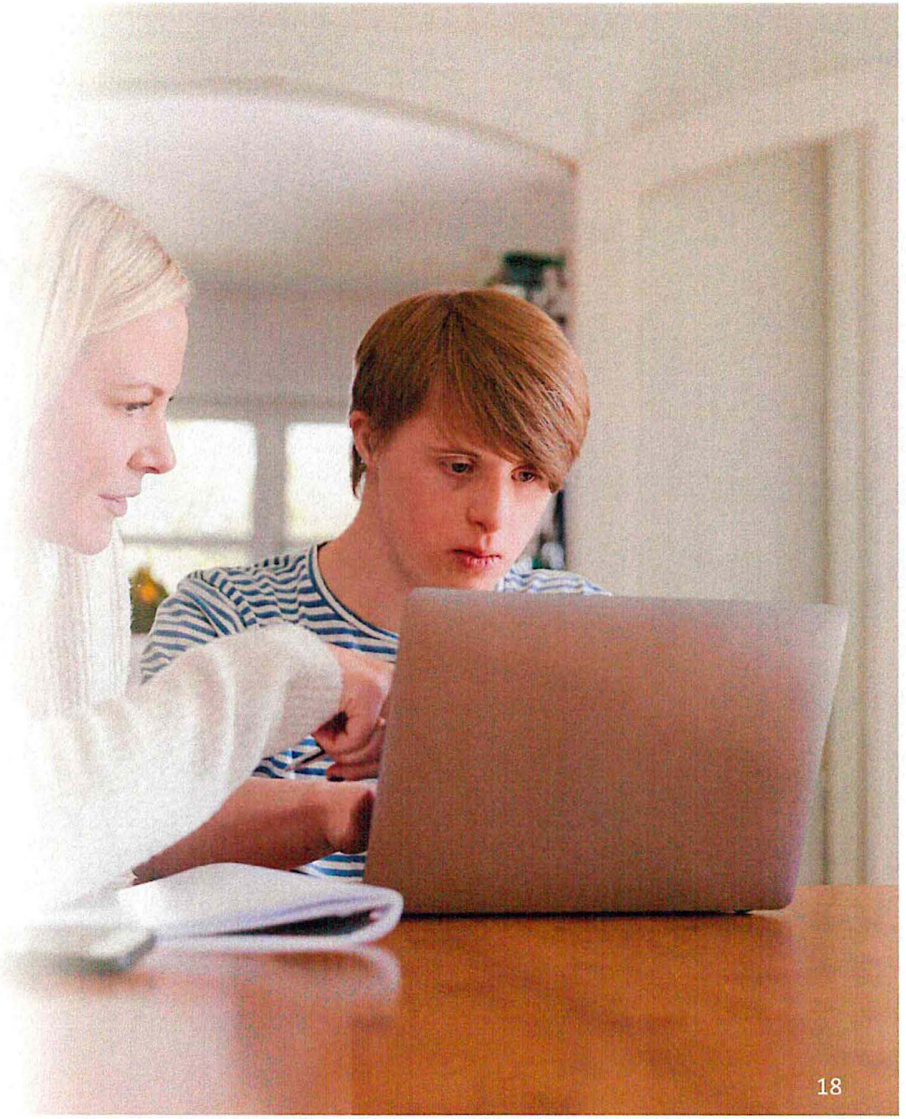
Statewide Crisis and Stabilization Services (CSC)

- Provide response to people with intellectual/developmental disabilities who are experiencing a de-stabilizing crisis while in their home setting.

- CSC's work with families, providers and community partners to provide individualized and responsive services to help people live successfully in their communities.
  - Program & Behavior Plan Consultation
  - Staff Training and personal coaching
  - Specialized resources for complex healthcare needs, significant behavioral issues, and inappropriate sexual behaviors

- Services paid for with General Fund (i.e., not Medicaid-billable).

People can access CSC services via their DDPM or statewide resource (988 or 211)



NORTH Dakota | Health & Human Services
Be Legendary.

Non-Residential Services

Statewide Applied Behavior Analysts (ABA)

- Provide professional behavior analysis services to the private providers and families of both adults and children throughout the state.
- Behavior Analysts use evidence-based learning technologies to design teaching methods, helping care teams with:
  - Behavior intervention planning
  - Staff training plans
  - Delivery of staff training and coaching, and
  - Ongoing performance analysis and problem solving
- LSTC has 10 ABAs located statewide.
- Services paid for with General/Federal Fund (i.e., Medicaid-billable).

Non-Residential Services

Adaptive Equipment Center

- Creation of customized equipment that helps improve a person's mobility and supports independence.
- LSTC Physical and Occupational therapists work hand-in-hand with a team of custom fabricators to custom-build or modify existing equipment.
- Assessments most often occur wherever the person is living, going to school, or receiving care as that is the environment they are adapting to,
- Services are provided on a sliding fee scale, based on ability to pay. LSTC is accredited by Medicare to bill for custom-seating systems. General Funds pay for balance of service costs.

LSTC is also an AT4All provider, offering free access to gently used adaptive equipment for short-term use.

Non-Residential Services

Specialized Therapy Clinic

Provide a range of therapy services, serving infants through older adults, both at LSTC and in community. Team has specialized experience serving people with developmental disabilities, integrating across various disciplines.

- Physical therapy (helps people function and move better)
- Occupational therapy (makes it easier to do daily living activities)
- Speech therapy (improves communication skills)
- Aquatic therapy (therapy in an environment that allows people to move in ways they're not able to on land)
- Universal Exercise Unit (improves movement by decreasing the effects of gravity on the body)
- Sensory processing (helps adjust to different kinds of information, like smells, touch, sounds, movement and body awareness)

Services available upon referral from other providers who are not able to meet a person's needs. Services are billed to each individual's insurance or can be private pay.

Life Skills & Transition Center

2023-2025 Outcomes and Accomplishments

Transitions & Diversions

- ✓ **31 Transitions and 21 Diversions completed**

Facilities

- ✓ Underground repairs completed
- ✓ Cooling Tower Pumps Replaced
- ✓ Fire Panel Repair and Replacement Projects- Midway & Prairieview
- ✓ Parking lot improvements

Operations

- ✓ CQL Accreditation (45 out of 46 Indicators Present) in January 2024
- ✓ Implemented real-time scheduling software (CareWare).
- ✓ Expanded statewide crisis/stabilization supports and adaptive equipment services
- ✓ Statewide referrals for all individuals served residing at LSTC

Staffing

- ✓ Increased success hiring (**55 in 2024**, 49 in 2023)
- ✓ Stable staffing Contracts; recruitment

JTO

Collaborations

- ✓ Work closely with many other HHS partners, Behavioral Health, DD Division on Transition and Diversions, NDSH on Transition Supports for ID/DD people served to return to the community, Vocational Rehabilitation services and HHS/DOH oversight for LSTC Lab Services
- ✓ ND Community Provider Association
- ✓ Walsh County Behavioral Health Team
- ✓ North Valley Vocational/Technical Program/ Grafton Public School in Grafton for Job shadow and Internship opportunities
- ✓ Lutheran Sunset Nursing Home in Grafton (PT/OT Services)

Billing

- ✓ Made progress on billing for services delivered wherever possible to increase service and reduce reliance on general fund. New accreditation through HQAA has allowed us to now bill for our molded wheelchair systems through within the AES program.
- ✓ In process establishing a billing system for Applied Behavior Analyst (ABA) support in schools.

Included in Executive Budget Request

LSTC Cedar Grove Roof Replacement

- The campus that is today known as the Life Skills Transition Center, was established in 1909 and today includes 23 separate buildings on approximately 40 acres. LSTC buildings that are still in use range in age from 1909 to 1984.
- Cedar Grove is an intermediate care facility (ICF), which is one of the two residential buildings at LSTC; it is a setting that provides residential services to 28 individuals.
- The roof has been repeatedly patched, but these temporary fixes can no longer maintain the building's integrity. Without full replacement, the roof will continue to deteriorate, causing leaks and further damage, ultimately making the building unsafe for occupants and staff. The recent remodel was a significant investment, and securing funding to replace the roof is essential to protect that investment, ensure the building remains functional, and prevent escalating repair costs.

Total	General	Federal	Other

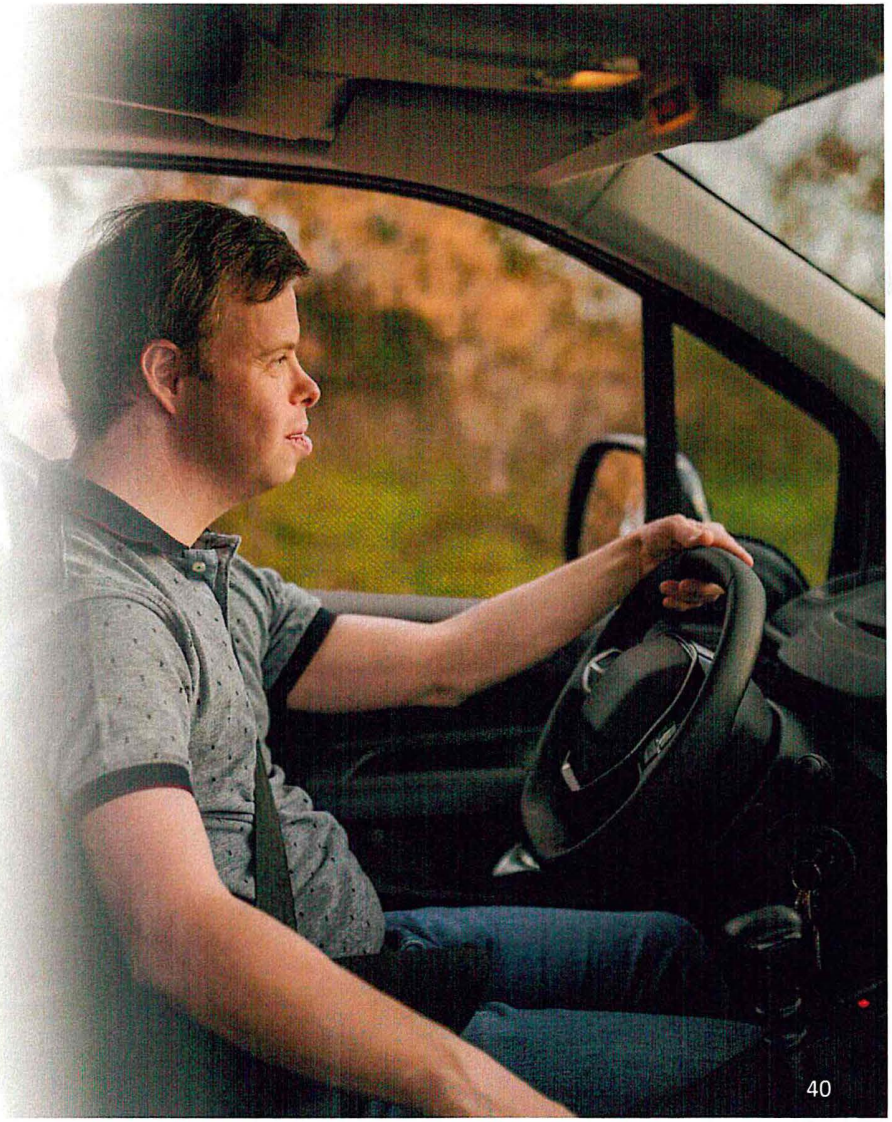
LSTC-related Policy Bills with Budget Impact

		Federal	General
HB 1548	A BILL for an Act to provide an appropriation to the department of health and human services for a fitness center grant at the life skills and transition center.		$10,000,000 *(proposed one-time appropriation)*
SB 2112	Amend NDCC to allow non-DD eligible individuals to be served by LSTC with approval of Commissioner		$87,969

On the horizon for LSTC



- Review and adjust services to better meet the needs of ND citizens with ID/DD, filling gaps by **working with system partners** to create strong non-institutional living options that promote autonomy, choice, self-direction, and community integration.
- Continue to build LSTC's **capacity to focus more on stabilization and diversion.**
- Continue to work on **billing for services delivered** wherever possible to increase service and reduce reliance on general fund (Crisis/Stabilization Supports, Transition Supports, Adaptive Equipment Services, etc.)
- Working towards **dual accreditation** with Council on Quality and Leadership (CQL) and National Association on Dual Diagnosis (NADD) to address the changing populations needs.
- Continue to explore avenues to consolidate and **modernize the LSTC footprint**, including how to make use of under-utilized buildings and space on LSTC campus.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/4/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:29 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Paternity
- Customer Service
- Establish Court Orders
- Enforcement
- Account Management
- Child Support Budget
- Pre-employment Transition Services
- Services to Business
- Supported and Customized Employment
- Vision Services
- Specialized Programs
- Vocational Rehabilitation Budget

8:30 a.m. Jim Fleming, Director, Child Support Section, Health and Human Services, testified and presented on the Child Support Section #34425.

9:39 a.m. Jim Fleming, Interim Director, Vocational Rehabilitation Section, Health and Human Services testified and presented on the Vocational Rehabilitation Section #34466.

10:16 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, addressed the future funding for technology.

10:17 a.m. Jim Fleming, Interim Director, Vocational Rehabilitation Section, Health and Human Services, testified and continued with testimony #34466.

10:24 a.m. April Haring, Account Budget Specialist, Health and Human Services explained the reduction of other fees #34466.

10:25 a.m. Jim Fleming, Interim Director, Vocational Rehabilitation Section, Health and Human Services, testified and continued with testimony #34466.

10:49 a.m. April Haring, Account Budget Specialist, Health and Human Services, discussed the increase of the federal grant award.

10:51 a.m. Jim Fleming, Interim Director, Vocational Rehabilitation Section, Health and Human Services, testified and continued with testimony #34466.

10:55 a.m. Allan Peterson, North Dakota Association of the Blind, testified in favor of HB 1012, #33981, #33982.

11:01 a.m. Nikki Wegner, President of the North Dakota Long Term Care Association testified in support of an amendment to HB 1012 that would allow for an implementation of a specialized behavioral health program #34421.

11:07 a.m. Dr. Kristina Kovacs, Chief Clinical Officer and Co-Founder, Behavioral Health Solutions, testified and presented on a behavioral complex care program #34096.

11:34 a.m. Nikki Wegner, President of Long Term Care Association, spoke to potential pilot sites.

11:38 a.m. Dr. Kristina Kovacs, Chief Clinical Officer and Co-Founder, Behavioral Health Solutions, continued with testimony #34096.

11:48 a.m. Nikki Wegner, President of Long Term Care Association, requested the committee consider the proposal.

11:49 a.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

Testimony HB1012 Older Individuals Who Are Blind (OIB) Program Appropriation.

To: Representative Jon Nelson, Chair, and Members of the ND House Appropriations Subcommittee, Human Resources Division, 69th Legislative Session.

From: Allan Peterson, Legislative Representative, North Dakota Association of the Blind (NDAB). Home address: 7009 Horseshoe Bend, Horace, ND 58047.
H: 701-282-4644; c: 701-429-7209; Email: allan.c.peterson@gmail.com

Re: Testimony in support of the state Appropriation for the Older Individuals Who Are Blind (OIB) Program, Division of Vocational Rehabilitation, Dept. of Human Services

Greetings Chair Jon Nelson, Vice Chair Bert Anderson, Representatives Mike Berg, Alisa Mitskog, Eric Murphy, Emily O'Brien, Gregory Stemen, Scott Wagner members of the House Appropriations Subcommittee, Human Resources Division.

We are testifying on our own behalf, as well as, to represent the advocacy goals of the North Dakota Association of the Blind (NDAB). This testimony is given in **support of the Appropriation** for the Older Individuals Who Are Blind Program within the Division of Vocational Rehabilitation for its operation in the next biennium of 2025-2027.

Included with this testimony is a resolution adopted at our 2024 Convention which supports the appropriation request of the OIB Program in North Dakota.

In North Dakota, the OIB Program is administrated by the Division of Vocational Rehabilitation within the Department of Human Services. Funding for the program is generated through a 90% grant from the federal government which requires a minimum state appropriation of 10%. Federal funding for the program is authorized under the U.S. Rehabilitation Act.

Federal funding for the Older Individuals Who Are Blind program is allocated to the states based on population size. Because North Dakota's population base is small in comparison to other more populated states, it receives what is termed a minimal distribution. Minimal federal funding is a problem for the program here in North Dakota because our state is geographically large in relation to its population size. Second, our state has a higher proportion of people in the older age categories, which experience a significantly higher incidence of sight loss. The Older Individuals Who Are Blind Program is specifically directed to serve individuals who are 55 years of age and older.

Another major deterrent the OIB program continues to experience is that federal funding for the program has not increased since 1987. This is in the light of the fact that expenses to operate the program have risen significantly for all costs since then.

Although many significant advances in eye care are being made, sight problems such as macular degeneration, diabetic retinopathy, glaucoma, & cataracts continue to be primary sources of sight loss, particularly, for people who are 55 and older, and this is the segment of the population which is **disproportionately** increasing in size.

The professional staff who are trained to provide the services for the Older Blind Program are classified as vision rehabilitation specialists. In North Dakota there are currently 7 vision rehabilitation specialists assigned to work in each of the state's 8 defined Human Service regions. Vision specialists, employed in the older blind program, travel to a client's home to do an assessment of needs, and provide the services and counseling that is needed in that person's home environment. The services of this program have helped thousands of our older citizens, who after having lost some or all their eyesight, have been able to enjoy more independence and a productive life.

The skills and aids that the vision rehabilitation specialists provide to older citizens with sight loss helps them stay in their own homes and postpone or avoid institutionalized nursing home care. The cost savings that are gained by postponing or avoiding institutionalized care and the increased sense of wellbeing and dignity that are realized by being more independent are compelling reasons for the state to provide the appropriation needed for this program in North Dakota. In most instances, the clients served are elderly and live on very fixed incomes so for them to purchase a vision aid that would help them is difficult or impossible. The rural character of ND and limitations on access to public transportation, can mean those who experience severe sight loss are isolated and very dependent on others.

. Demographics indicate that the average age of North Dakotans is increasing and that the need for this program will steadily increase in the next biennium and beyond.

In 2023 the population of North Dakota was estimated to be 783,926. Credible studies have demonstrated that, conservatively, **3.3%** among the general population will have medical conditions that mildly, moderately, or severely compromise their eyesight – which would mean that more than 20,000 individuals in North Dakota could be affected by some degree of uncorrectable sight loss and that a quarter of them, about 5,000, may have significant sight loss and/or are "legally blind". Undoubtedly, many affected would benefit from the services of the OIB program.

NDAB Resolution 2022-03:

State 2025 – 2027 Appropriation for the Older Individuals Who Are Blind (OIB) Program in North Dakota

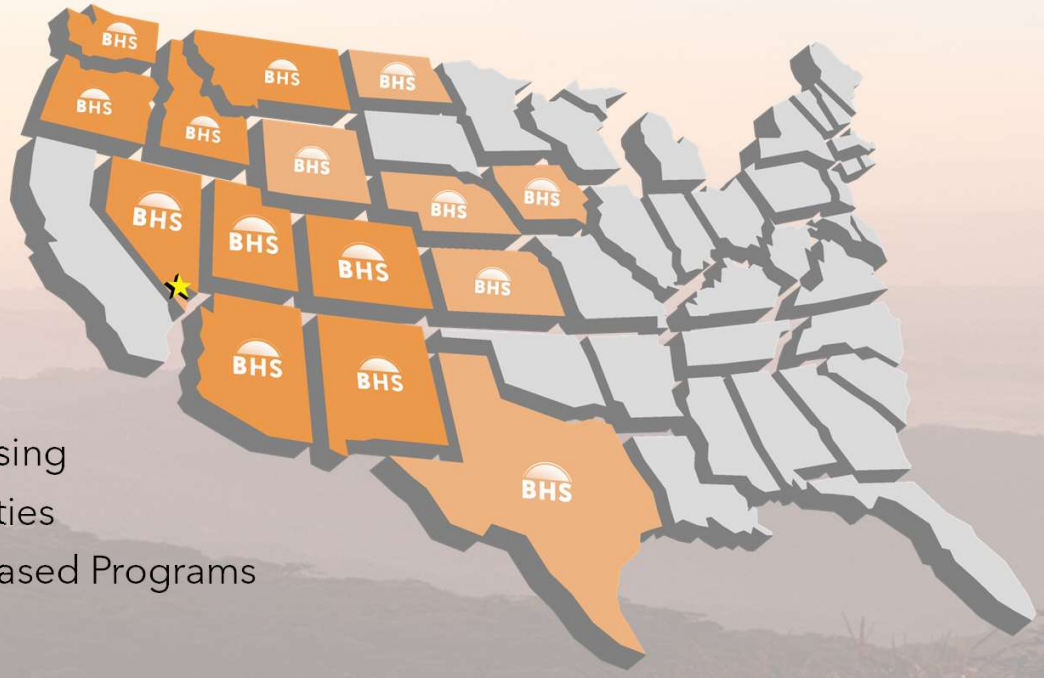
Whereas, demographically, North Dakota is among the states that has the highest proportion of people per capita who are 55 years of age and older, and this is the subpopulation of people who have the highest incidence of significant sight loss that is not medically correctable; and,

Whereas seniors who receive rehabilitation skills training to adjust to sight loss can postpone or avoid institutionalized care and live more productive and fulfilling lives; and,

Whereas, the appropriation that is made for the Older Individuals Who Are Blind (OIB) program in the state budget is critical to meet the costs that this program realizes because, (1) the federal government funds the program in North Dakota at a minimal base level rate due to the size of our population compared to other states, and (2) travel costs are significant because the vision specialists employed in the program need to meet in the client's home setting to make a proper evaluation to assess the skills training needed for that individual person;

Now, be it resolved by the North Dakota Association of the Blind in Convention assembled at the Enchanted Castle in Regent, ND on this Sunday, June 9, 2024, that we, given the increasing demand for vision rehabilitation skills training services available from the Older Individuals Who Are Blind Program, strongly urge the newly elected Governor and the 69th State Legislature that will convene on January 7, 2025, to maintain and increase the state appropriation that is allocated in the 2025-2027 biennial budget within the SB2012 Human Services budget for the Older Individuals Who Are Blind (OIB) Program and that our state appropriation for this program be increased to a 25% match of the federal appropriation that North Dakota receives for this program.

Further be it resolved that we urge our elected federal congressional delegation, to work to maintain and increase the appropriation for the Older Blind Program in the federal budget and that they would work to have the formula for the federal appropriation be based, not only on the state's population size, but also on a state's per capita percentage of people who are 55 years of age and older.



BEHAVIORAL
HEALTH SOLUTIONS
North Dakota Program

Behavioral Health Solutions

Who we are

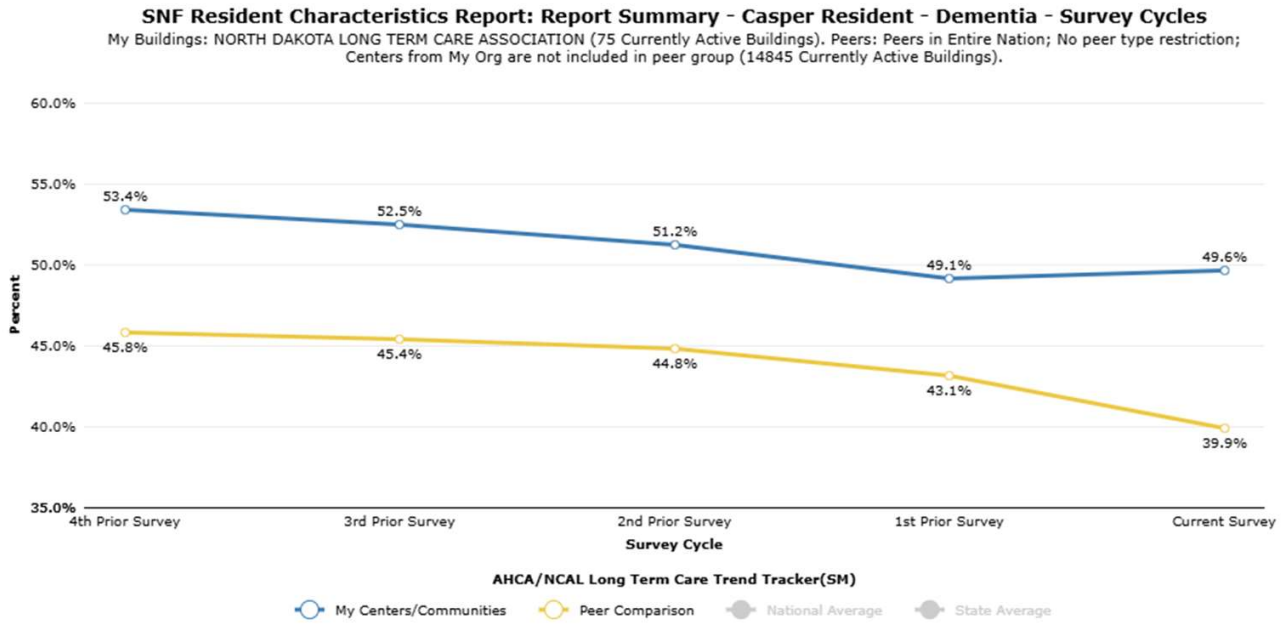
Established in 2017 through the development of a specialized program within Skilled Nursing Facilities (SNFs), Behavioral Health Solutions (BHS) has become a trusted provider in behavioral health. With its roots in Henderson, Nevada, BHS has steadily expanded its reach and now provides services to over 350 Skilled Nursing Facilities across 9 states. This growth reflects the commitment of BHS to delivering high-quality behavioral health solutions to the communities it serves.

- **Services**
  - Administration of Behavioral Programs
  - Psychiatry
  - Medication Management
  - Therapy
- **Areas of Expertise**
  - Behavioral Health Programs in Skilled Nursing
  - Skilled Nursing and Long-Term Care Facilities
  - Stabilization of Residents through Value-Based Programs

Behavioral Health and Facility Trends

- **Younger demographic** is entering facilities due to SUD and conditions
- **Increased demand** for behavioral health services due to the psychological effects of COVID-19, such as social isolation, trauma, and stress
- **Complex patient populations** with co-occurring mental and physical health conditions, such as homelessness, substance abuse disorder, dementia, and chronic diseases
- **Staffing challenges** due to the nursing shortage, staff turnover, burnout, and lack of education and training on behavioral health issues
- **Regulatory changes** that require SNFs to provide behavioral health services as part of the comprehensive person-centered care plan, and to monitor and report the quality of those services

Patient Demographic

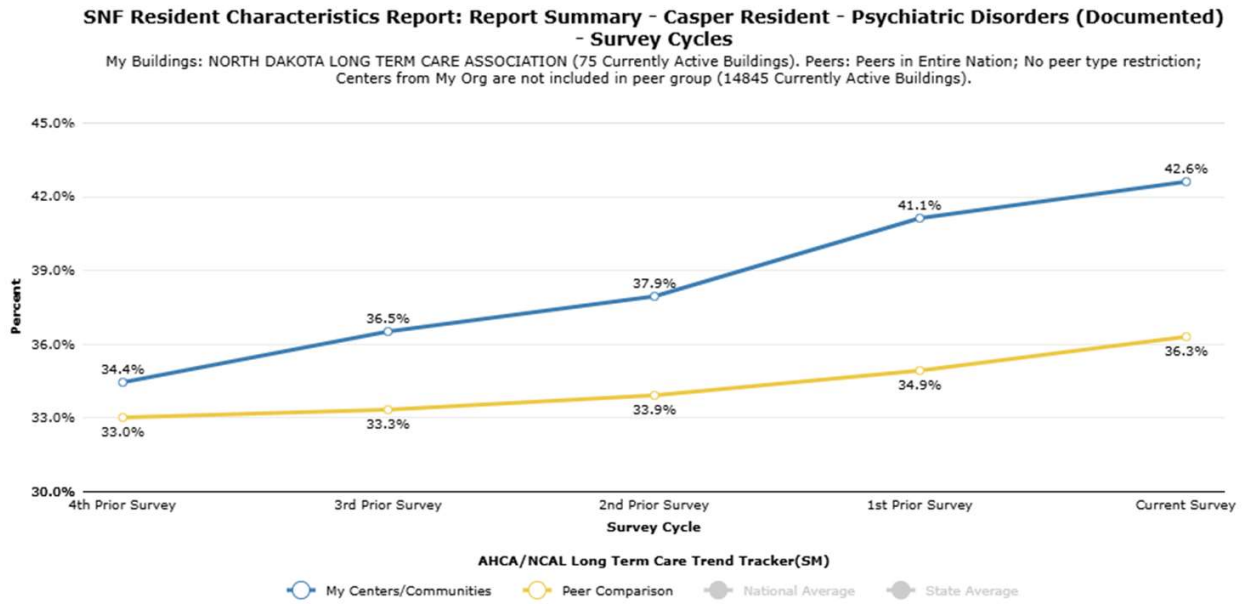


Facility trends

- **Rising Prevalence of Dementia:**
  - With the increasing median age of nursing facility residents, there's a notable surge in the prevalence of dementia at later stages.
  - Residents aged over 85 face a 50/50 chance of developing Alzheimer's disease, underlining the need for specialized care.
- **Impact of State Inpatient Facility Closures:**
  - The closure of state inpatient facilities has led to a shift in the landscape, with nursing facilities now catering to a diverse range of patients, including the Chronically Mentally Ill (CMI).
- **Rehabilitation Trends:**
  - Conditions like traumatic brain injury, stroke, and other rehabilitative needs are increasingly being addressed in long-term care (LTC) facilities rather than hospital-based settings, reflecting a shift in the delivery of specialized care.
- **Psychiatric Disorders on the Rise:**
  - Recent studies illuminate a concerning trend, indicating that over 70% of residents in LTC facilities grapple with various psychiatric disorders or disturbances that demand specialized treatment.
  - A comprehensive study published in the Journal of Long-Term Care revealed that more than 51% of LTC facility residents are prescribed psychoactive medications, emphasizing the critical role of mental health care in these settings.

North Dakota Long Term Care Association

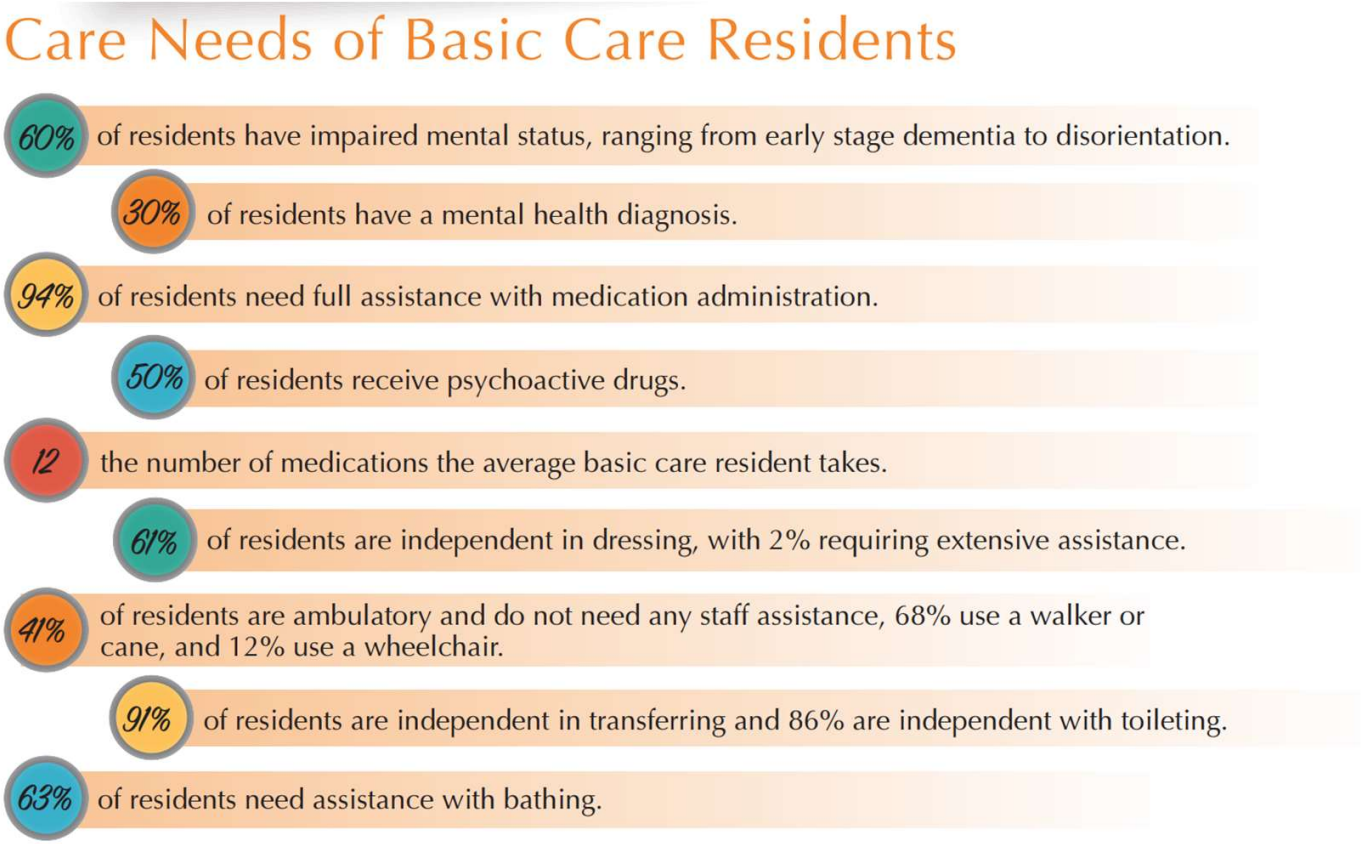
NDLTCA Facts and Figures



- North Dakota nursing facilities care for a higher number of people living with dementia, almost half vs. 40% nationally.

North Dakota Long Term Care Association

NDLTCA Facts and Figures



- North Dakota nursing facilities also care for a higher percentage of people with psychiatric disorders than their peers nationally. 42.6% in ND vs. 36.3% nationally, this likely explains why ND has a higher rate of antipsychotic use than other states.

North Dakota Long Term Care Association

NDLTCA Facts and Figures

- Basic care providers report 60% of the residents have impaired mental status and 30% have a mental health diagnosis.

Benefits of State Behavioral Programs

- Allows SNFs to better partner with acute hospitals to address difficult to discharge patients
- Provides funding to increase resources to behaviorally complex patients
- Increases staff retention through additional funding, training, and staff resources
- Reduces acute transfers and decreases acute length of stay
- Reduces out of state placements
- Helps to stabilize patients in the lowest care setting
- Overall savings to the healthcare system

Behavioral Health Programs

Current programs and rates

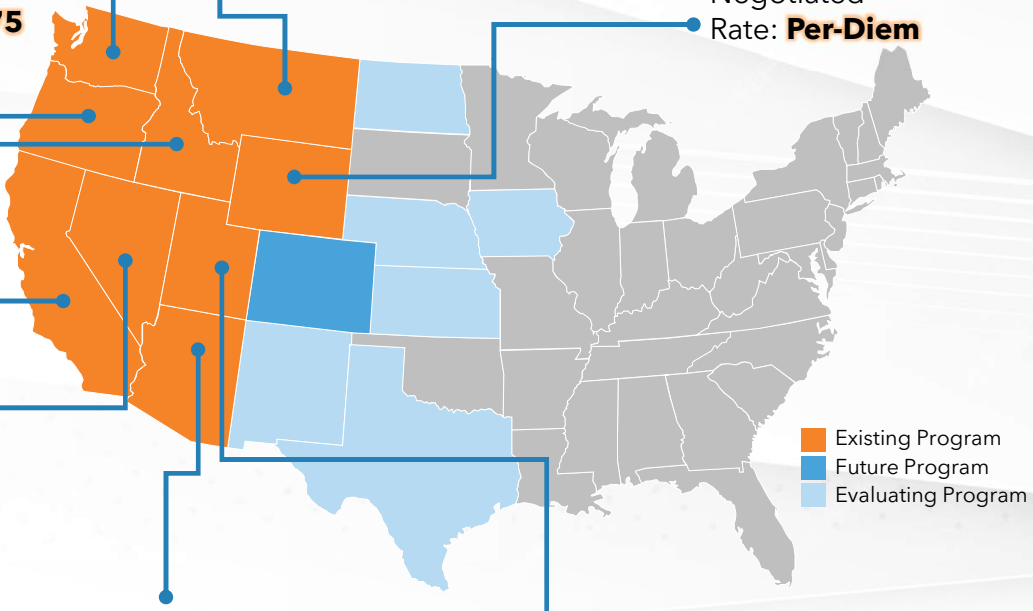
BEHAVIORAL HEALTH SOLUTIONS

Expanded Behavioral Supports (EBS & EBS+)
Add-on Rate: $80 - $175

Medicaid Nursing Facility Add-on
Add-on Rate: $80 - $225

Extraordinary Care Negotiated Rate: **Per-Diem**

Locked Specialized Units (ECU)
Rate: $765



Behavioral Care Units (BCU's)
Add-on Rate: $150 - $200

STP/PATCH Program
Add-on Rate: $200 - $800

Behaviorally Complex Care Program (BCCP)
Add-on Rate: $111 - $326

Behavioral Care Units (locked units)
Negotiated Enhanced Rate: $125 - $500

Behaviorally Complex Program (BCP)
Add-on Rate: $7.50

- States are creating behavioral health programs to assist with consistent challenges:
  - Difficult to discharge patients
  - Lack of available behavioral care
  - High utilizers bouncing from acute to homelessness to jails to psych hospital
  - Significant inpatient lengths of stay

NV Impact Study

SUD Patients

- Study highlights SUD treatment outcomes from NV nursing home residents- Nov 2022 through Oct 2023.
- Data includes patient demographics, reduction in antipsychotic use, and an overall savings to healthcare system.

Impact Study

SUD Treatment Demographics

Nevada Nursing Facility Program Participants

Study Dates: November 2022 – October 2023

Impact Study

Behavioral Health Solutions commenced an impact study in collaboration with 3x Advisors, an independent consulting firm, focusing on Nevada nursing facilities. The objective is to showcase the efficacy of state funding programs when combined with behavioral health supportive services. Preliminary findings highlight a positive influence on individual patient well-being, along with a significant and favorable economic impact on the financial landscape of the healthcare system.

Substance Abuse Landscape

As per the Centers for Disease Control and Prevention, Nevada stands in the top 10 states for drug use, experiencing a concerning 55% surge in drug overdose deaths from 2019 to 2020. The Nevada Department of Health and Human Services further revealed that among the individuals who succumbed in 2020, half had associated mental health concerns.

In top **10**

1 in 2 suffered with their mental health

Geographical Focus

Seventeen Nevada facilities actively engaged in the state-funded behavioral program, which included mental health services provided by Behavioral Health Solutions, contributed data spanning from November 2022 to October 2023 for the purposes of this study.

Statistical Data (NV Program Patients)

# Facilities	Patients	Age Range
17	7,798	19 – 97

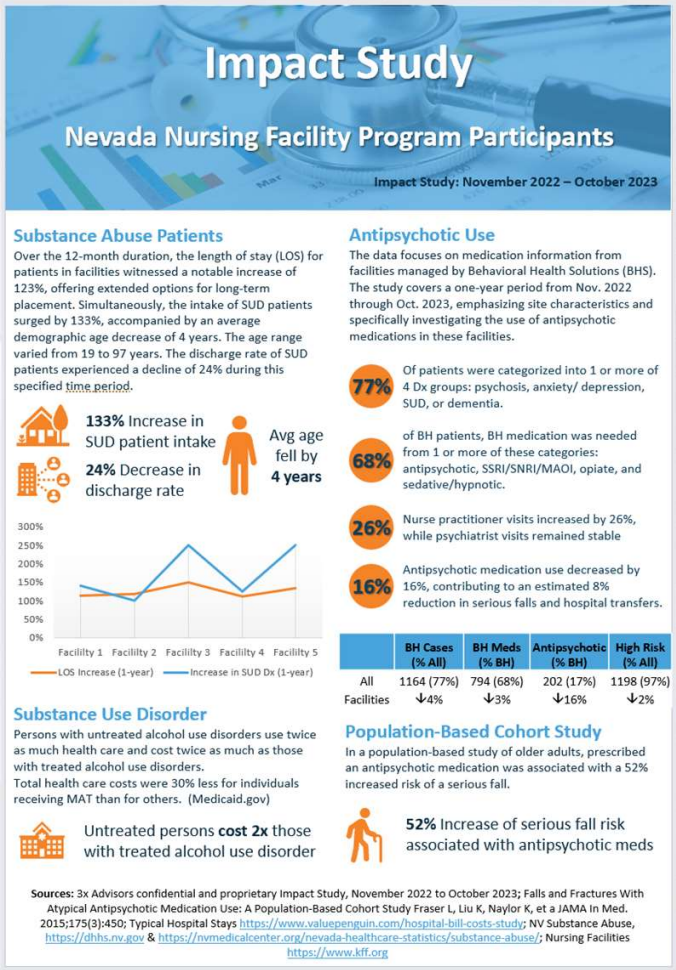
882 patients under 60 years old

Male	Female
48.7%	51.3%

Healthcare System Result

$125,752 est. savings to the healthcare system (per 8 patients)

Estimated hospital stay is **$15,719**



The partnership between BHS and BCCP facilities resulted in the prevention of 8 hospital admissions per 100 SUD patients over the 1-year period. For every 8 patient admissions avoided this resulted in a savings of $125,752 to the healthcare system. **If modeled across the 68 SNF's it would result in a cost savings of $3,073,379.**

68 facilities

2,444 Est. SUD Patients

$3,073,379 estimated total 12-month savings to healthcare system

Description	Data
Nevada Study Data	
NV facilities in study	17
SUD population over 12 months	611
Average # SUD patients per SNF	35.94
Facility Estimates	
# of facilities	68
Total # of SUD patients (Est. SUD per facility ratio)	2,444
Avoided Admissions (8 admits per 100 SUD patients)	196
Cost of hospital stay	$15,719
Savings over 12 months	**$3,073,379**

Impact Study

Nevada Nursing Facility Program Participants

Impact Study: November 2022 – October 2023

Substance Abuse Patients

Over the 12-month duration, the length of stay (LOS) for patients in facilities witnessed a notable increase of 123%, offering extended options for long-term placement. Simultaneously, the intake of SUD patients surged by 133%, accompanied by an average demographic age decrease of 4 years. The age range varied from 19 to 97 years. The discharge rate of SUD patients experienced a decline of 24% during this specified time period.

133% Increase in SUD patient intake

24% Decrease in discharge rate

Avg age fell by **4 years**

Substance Use Disorder

Persons with untreated alcohol use disorders use twice as much health care and cost twice as much as those with treated alcohol use disorders.
Total health care costs were 30% less for individuals receiving MAT than for others. (Medicaid.gov)

Untreated persons **cost 2x** those with treated alcohol use disorder

Antipsychotic Use

The data focuses on medication information from facilities managed by Behavioral Health Solutions (BHS). The study covers a one-year period from Nov. 2022 through Oct. 2023, emphasizing site characteristics and specifically investigating the use of antipsychotic medications in these facilities.

77% Of patients were categorized into 1 or more of 4 Dx groups: psychosis, anxiety/ depression, SUD, or dementia.

68% of BH patients, BH medication was needed from 1 or more of these categories: antipsychotic, SSRI/SNRI/MAOI, opiate, and sedative/hypnotic.

26% Nurse practitioner visits increased by 26%, while psychiatrist visits remained stable

16% Antipsychotic medication use decreased by 16%, contributing to an estimated 8% reduction in serious falls and hospital transfers.

	BH Cases (% All)	BH Meds (% BH)	Antipsychotic (% BH)	High Risk (% All)
All Facilities	1164 (77%) ↓4%	794 (68%) ↓3%	202 (17%) ↓16%	1198 (97%) ↓2%

Population-Based Cohort Study

In a population-based study of older adults, prescribed an antipsychotic medication was associated with a 52% increased risk of a serious fall.

52% Increase of serious fall risk associated with antipsychotic meds

BEHAVIORAL HEALTH SOLUTIONS

Length of Stay in Acute Care Settings

- The CMS 2024 Measure Updates and Specifications Report for the SNF Value-Based Purchasing Program highlights prior hospital lengths of stay (LOS) distribution for SNF patients:

1–3 days: **23.1%**	4–7 days: **44.3%** (largest segment)	8–14 days: **23.4%**	>14 days: **9.2%**

- A focus on proactive care seeks to minimize acute care transfers, enabling patients to remain in lower-cost, high-quality SNF settings for the entirety of their care needs.

Reduction in ER Transfers and Visits

The NV Impact Study (2023) demonstrated a significant reduction in ER transfers, driven by:

- Enhanced care coordination and proactive oversight, particularly for behavioral health needs.
- Advanced patient monitoring and early interventions to address potential acute episodes before escalation.

Acute Length of Stay- SNF: https://www.cms.gov/files/document/snfrm-pdf.pdf

BHS Services to Support Program
Under Capitated Model

- Staffing training on topics related to managing difficult behaviors (de-escalation, management of psychiatric disorders, trauma informed care, substance use disorder, etc.)
- Creation of person-centered behavioral support and modification plans
- Creation of crisis plans
- Training individual care givers on behavioral modification plans and interventions for behaviorally complex patients
- 1:1 psychosocial activities and application of behavioral interventions by paraprofessionals
- Group psychosocial activities
- CMS regulatory compliance guidance related to behavioral services (i.e.. schizophrenia audits)
- Assistance with resolving urgent facility, resident, or family concerns related to behavioral complexities

Clinical Services Offered to Facility

- Consistent and available Psychotherapy
- Routine Psychiatric Care & Medication Management
- Neuropsychological Assessment
- Cognitive Care Planning
- Peer Support Services
- Collaborative Care Needs
- Crisis or Urgent Care Planning
- Monthly Gradual Dose Reduction Meetings

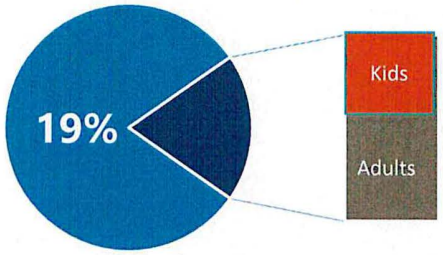
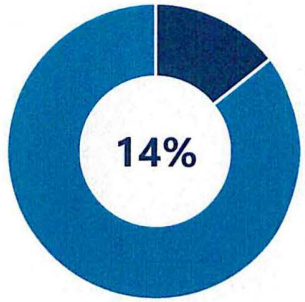
Child Support - Who We Serve



66,325

1 in 3 ND kids

In 2024, 66,325 children received child support services. That is more than 1 of every 3 children under age 18 in the state.

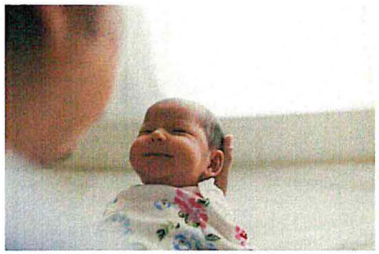


151,536

1 in 5 North Dakotans

151,536 people received child support services in North Dakota in 2024.

85,211



1 in 7 ND adults

In 2024, 85,211 parents received child support services. That means nearly 1 of every 7 adults (age 18+) in the state has a connection to the child support division.

NORTH Dakota | Health & Human Services

Meet Bobbi Jo & Tanner

Bobbi Jo is 22 years old and lives in Devils Lake. She used to live with the father of her two-year old son Tanner.

Tanner's father acknowledged his paternity in the hospital when Tanner was born but broke up with Bobbi Jo when Tanner was a baby.

Bobbi Jo has a part-time job at a local convenience store. She is receiving health coverage for herself and Tanner under the Medicaid program.

She is struggling to make ends meet, but currently makes too much income to be eligible for SNAP or TANF.

NORTH Dakota | Health & Human Services
Be Legendary.

Meet Molly and Mark

Molly and Mark's dad got divorced when Mark was 5. Mark's dad has been in and out of jail and has not been a regular part of Mark's life since the divorce.

Molly lost her job and started drinking too much. Eventually, Mark was placed in Foster Care at age 16.

HHS is working with Molly, who is committed to overcoming her addiction, regaining employment, and reuniting with Mark in her home.

NORTH Dakota | Health & Human Services

- Employers
- Judges
- Clerks of court
- Sheriffs
- ND state and local government agencies
- Other state and tribal child support programs
- Private attorneys
- Car dealers
- Gaming operators

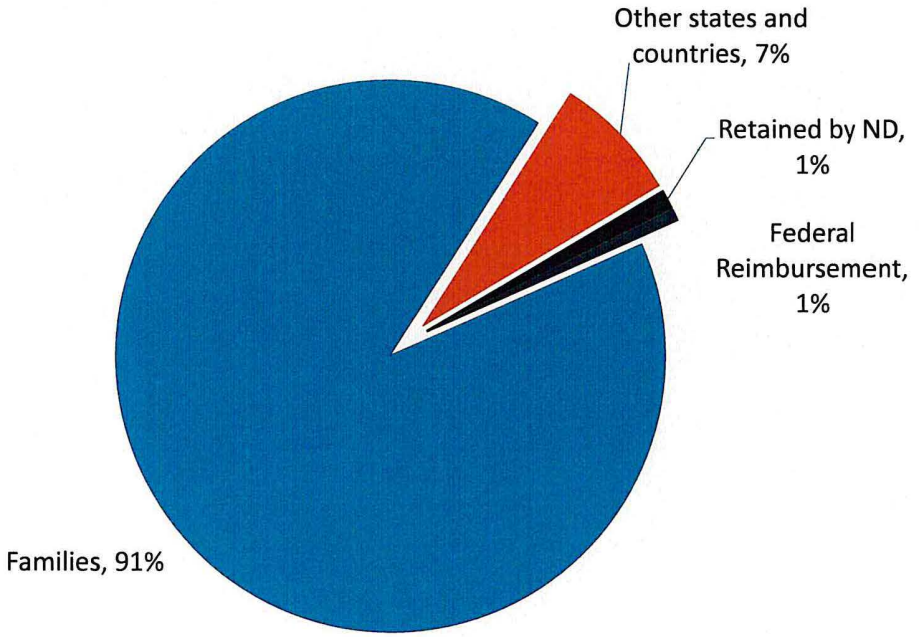
NORTH Dakota Be Legendary. | Health & Human Services

Child Support Tribal Partnerships

- "Lack of jurisdiction" cases are excluded from federal performance measures
- Partnership with Three Affiliated Tribes and Standing Rock Sioux Tribe child support programs
- Bring actions in Turtle Mountain and Spirit Lake tribal courts
- Host Tribal Offset Partnership so tribes can access federal offset services

Child Support Return on Investment

When child support is received, the child is able to grow up in a more secure and stable environment.



- Studies have shown that for every **$1.00** a family **receive**s in child support, **$0.19** is **saved** in reduced need for TANF, SNAP, Medicaid and other programs (nearly $20 million in FY 2024)
- Every **$1.00 spent** on Child Support generated **$6.52 for family recipients**
- Every **$1.00 in state General Funds spent** on Child Support generates **$19.18 in support for family** recipients

NORTH Dakota | Health & Human Services

Be Legendary.

On the Horizon

Supporting Family Stability & Economic Health

20,000

Over 20,000 families who are owed child support are not receiving the program's full services

$25.5 million

More than $25.5 million in child support per year is not received in the month when it is due

$254 million

More than $254 million is owed in past-due support in full-service cases and over $437.4 million total in all cases

Summary and key takeaways

- **Program efficiency** continues to improve
- **Revised referral strategies** will further improve program integration
- **Program performance** is strong but has further room for improvement
- **Service improvements** are anticipated from a modern case management system

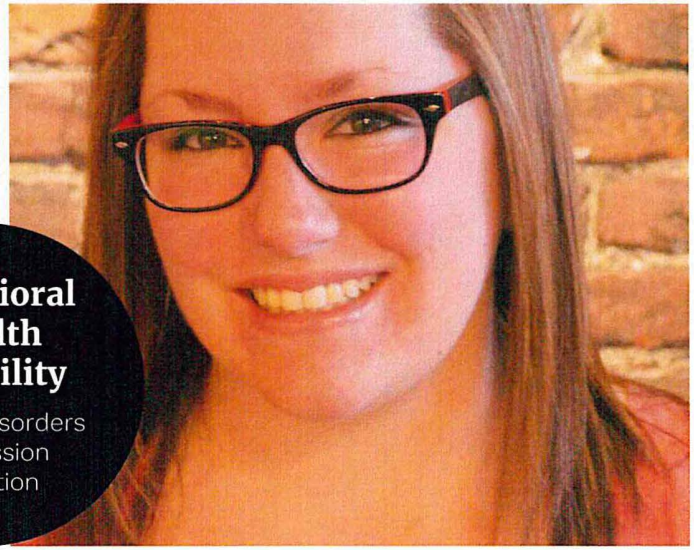
House Bill 1012 – Vocational Rehabilitation

House Appropriations Committee| HR Division
Representative Jon Nelson, Chairman

NORTH Dakota | Health & Human Services
Be Legendary.

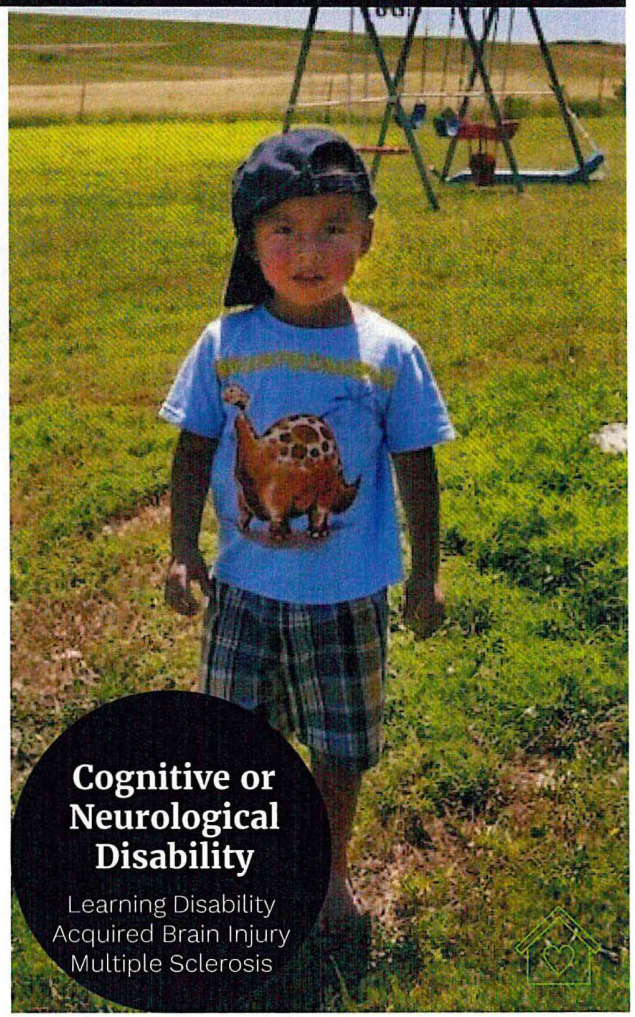
February 4, 2025 | Jim Fleming, Interim Director | Vocational Rehabilitation Section

HHS serves people with Disabilities



Intellectual Disability

Fetal Alcohol Syndrome
Autism Spectrum
Down Syndrome



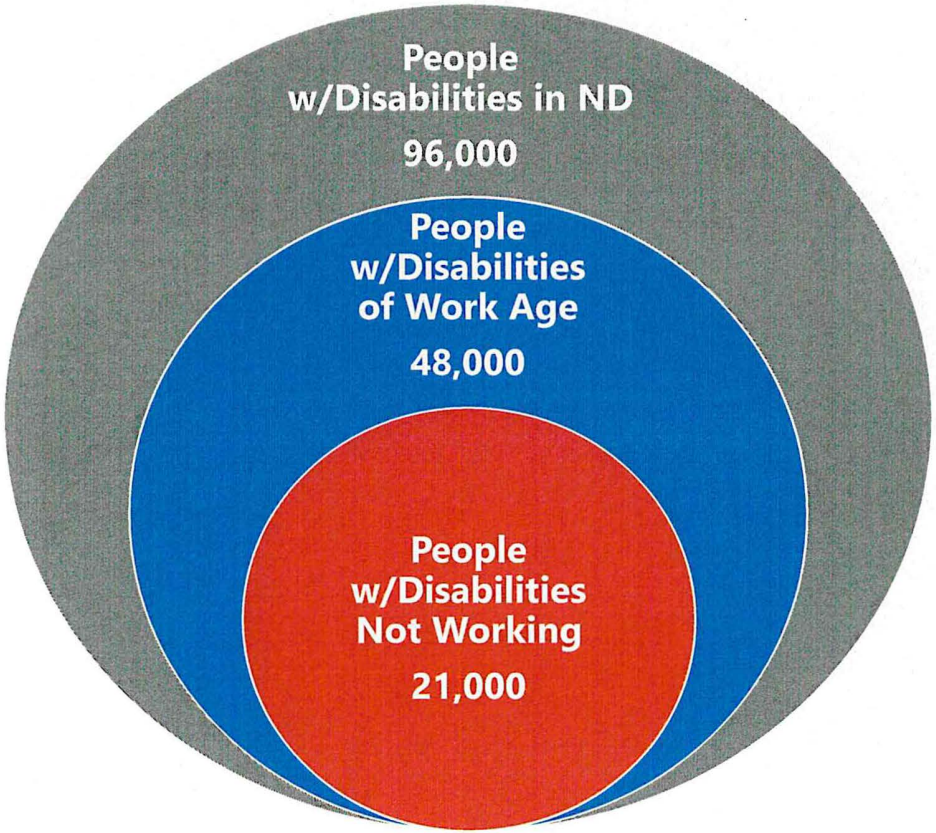
Physical or Sensory Disability

Mobility Impairment
Vision Impairment
Hearing Impairment

Behavioral Health Disability

Anxiety Disorders
Depression
Addiction

Cognitive or Neurological Disability



Learning Disability
Acquired Brain Injury
Multiple Sclerosis

Who might choose to seek services from Voc Rehab?

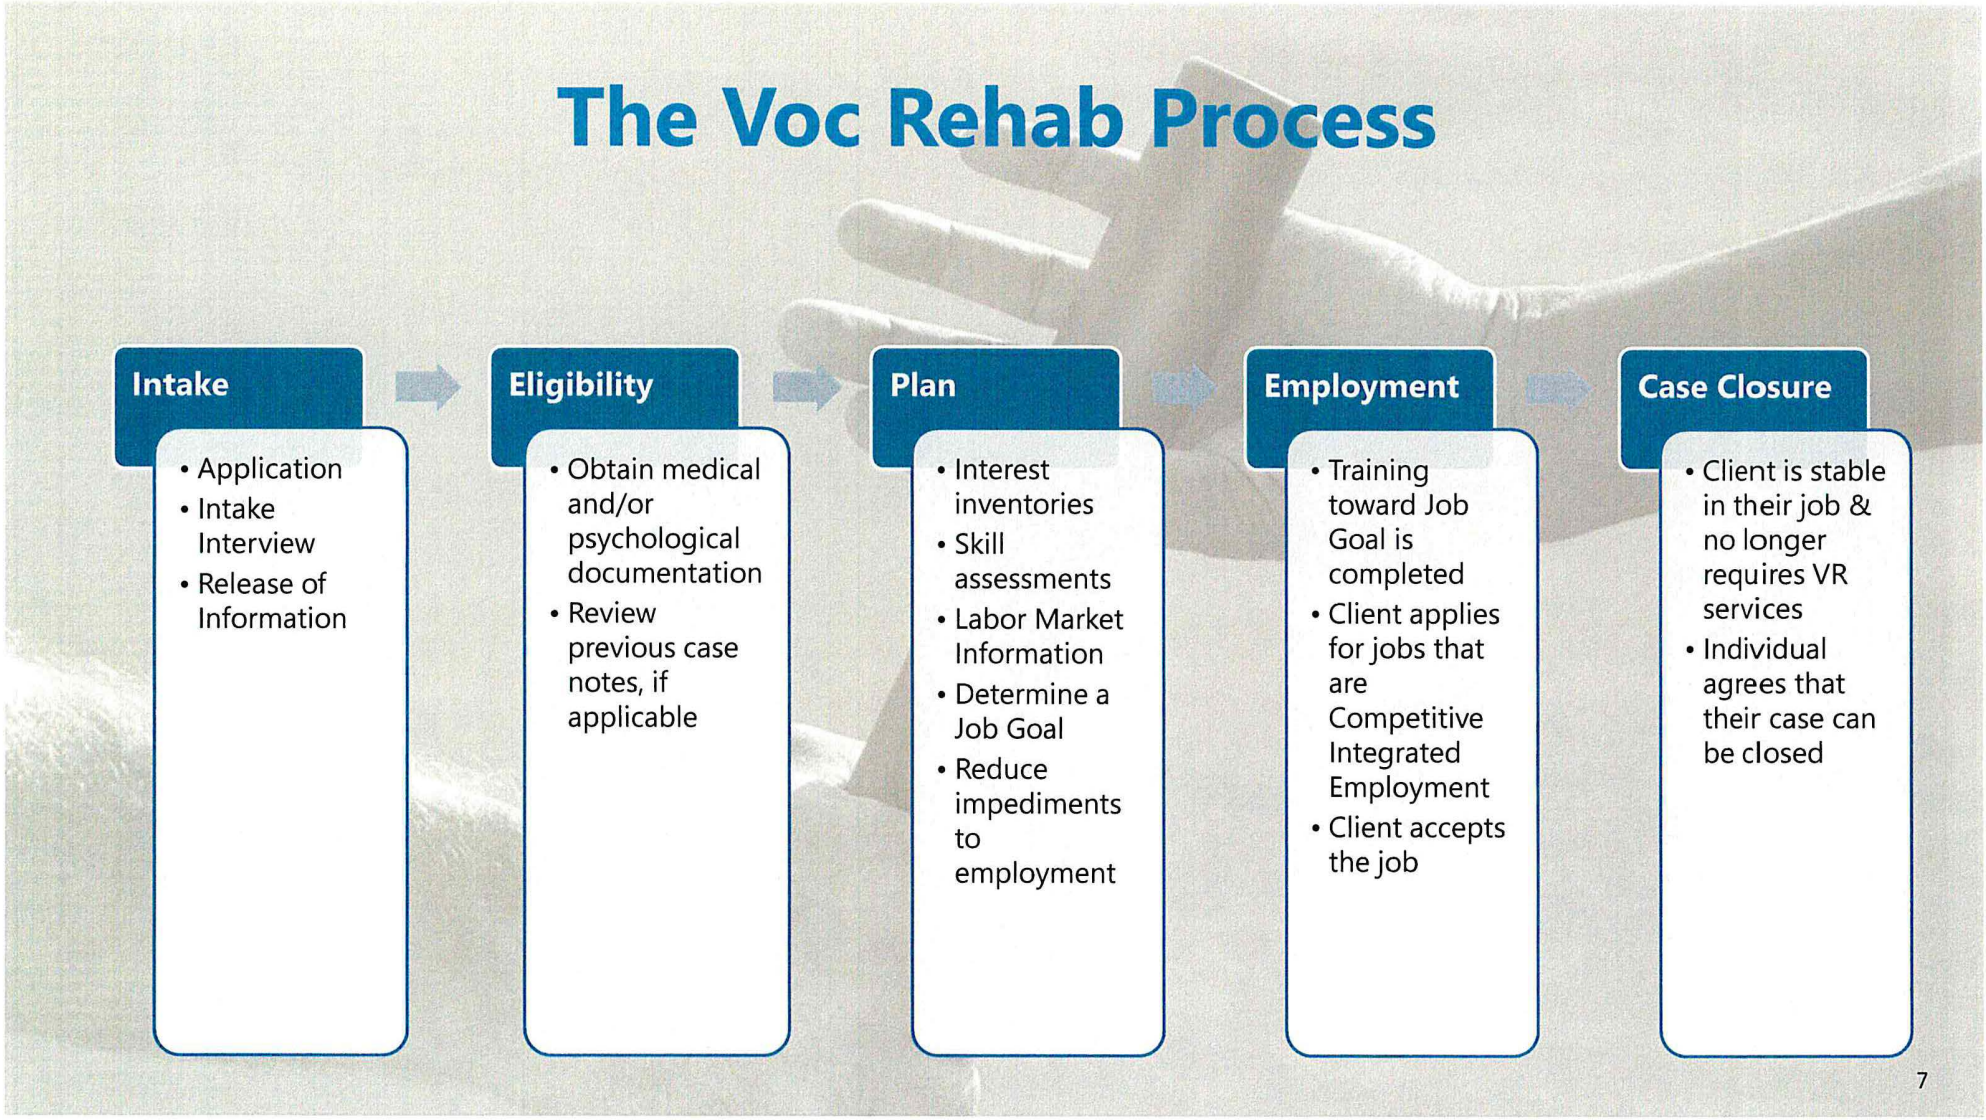
- Individual seeking service can have a congenital or acquired disability
- Services are inclusive of all types of disability – learning, developmental, physical, cognitive, behavioral
- Barrier to seeking, maintaining, or advancing in employment due to disability
- Jobs acquired are from entry-level to professional
- Clients can come back through the process for career progression, change in career goal or job situation

Vocational Rehabilitation: An Essential Part of the Workforce Solution

Source: 2024 Disability Statistics Compendium (2022 data)

Connecting with Employers: Services to Businesses

Any ND employer is eligible for VR services (non-profit or for-profit business or government agency)



- Assist employers in connecting to an untapped labor pool of people with disabilities
- Retaining existing, well-trained and productive workers who may have developed or have a worsening disability
- Providing education on disability awareness, tax incentives and the Americans with Disabilities Act

What is Vocational Rehabilitation? What do we do?

Pre-employment Transition Services (Pre-ETS)	Services to Business	Supported Employment/ Customized Employment	Vision Services (OIB-Older Individuals who are Blind)	Specialized Programs
• Students ages 14-21 • Job exploration • Job readiness training • VR has contracts w/ 71 school in ND	• Connect to qualified applicants • Retaining existing employees w/ developed or have a worsening disability • ADA accommodation consultation • Education on disability awareness, tax incentives	• Additional support during Rehab Process • Job search, interviewing skills, resume writing, tuition assistance, negotiate job tasks w/employer, on-the-job training, etc. • Coordinate supports once VR case is closed	• Individuals 55+ with a significant visual impairment • Home or environmental accommodations/ equipment • Assistive technology – magnifiers, lighting • Communication skills	• Senior Community Service Employment Program (SCSEP) – part of Older Americans Act – 55+, unskilled • Randolph-Sheppard – blind vendors in cafeteria settings in federal buildings

The Voc Rehab Process

Additional Programs

Senior Community Service Employment Program (SCSEP)

- Adults age 55+, and below 125% of poverty threshold, gain skills toward re-entering the workforce. Participants may not necessarily have a disability.

Federal Plan Responsibility

- WIOA Unified State Plan for Workforce – DOL (along with JSND, Adult Education and English Literacy, Dept of Commerce, and DPI)
- State Plan for Independent Living – Admin for Comm Living/HHS

North Dakota Assistive

Randolph-Sheppard

Councils and Commissions

- Statewide Rehabilitation Council
- State Independent Living Council

Designated State Entity for Centers for Independent Living

- Independent living skills training
- Information and referrals for orientation and mobility
- Transition services – from institutions to home/community based; also youth transition to independent living
- Peer mentoring
- Advocacy

VR Expands Workforce and Improves Lives

Employer Assistance:

Northwest Auto Body

Business Success Story - Northwest Auto Body

Fargo business meets workforce needs with inclusive team

Located on Fargo's busy Main Avenue, Northwest Auto Body is a family-owned collision repair business that is having an impact on the community.

Inside, it's more than just a repair shop, which is why they were named 2024 North Dakota Vocational Rehabilitation (VR) Employer of the Year.

Manager Scott Johnson and his team have made it a warm and welcoming place for people of all abilities.

Being familiar with VR, Johnson was excited at the opportunity to work with VR to help people with disabilities gain valuable work experience.

"People need chances, and I feel that just giving someone a shot is important," Johnson said. "In this industry, there are so many different jobs that a person can do."

VR Expands Workforce and Improves Lives

Hearing Assistance:

Lori Davidson

Client Success Story - Lori Davidson

Overcoming hearing loss to remain in the workforce

Having crystal-clear hearing at work is a must for Lori Davidson. She spends her workday answering phone calls and interacting face-to-face with patients at a Grand Forks clinic.

"I love working with people," she said.

Three years ago, she noticed that her hearing started to change. It began impacting her work productivity, performance and efficiency.

"I was struggling to hear on the phone and had to ask people to repeat themselves to make sure I heard their information correctly," she said.

Davidson is not alone. Last year, nearly one in four people who were successfully employed and received services from North Dakota Health and Human Services' Vocational Rehabilitation Program (VR) were deaf or hard of hearing, which impacted their job.

To continue working, Davidson knew she needed help. She made an appointment with an audiologist who did an assessment and recommended hearing aids, but the cost was too much and not covered by her

Vision Assistance:

Marcy Peterson

Client Success Story - Marcy Peterson

Inspirational Fargo woman thrives despite vision loss

There is not a day that goes by that 91-year-old Marcy Peterson isn't either writing, painting or cooking in the comfort of her own home.

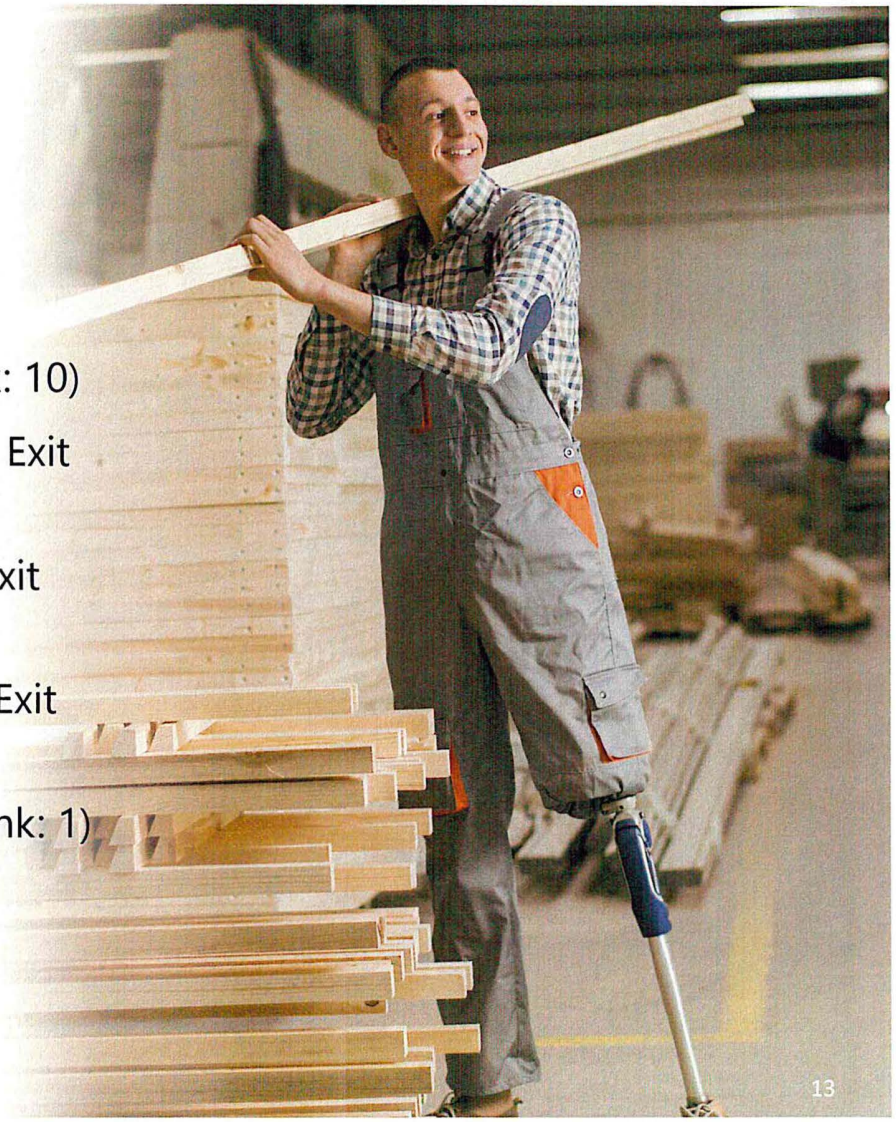
"I try to learn something new every day," she said.

Twenty years ago, she helped care for her husband as he battled the challenges of macular degeneration.

Little did she know that she would soon walk in his shoes. Life with legal blindness created obstacles, but she didn't let them stop her from remaining independent.

"I'm determined, and that's what keeps me going," she said. "You find a way of doing things that you never thought of before, and you have to be willing to not only look for help but to accept it."

Simple solutions that support independence



In 2011, Marcy and her husband moved to Fargo and two years later he went into nursing home. Afraid to live

Testimony on Behavioral Health Funding for Nursing Facilities and Basic Care
House Appropriations Human Resources Division
February 4, 2025
House Bill 1012

Chairman Nelson and members of the Committee, my name is Nikki Wegner, President of the North Dakota Long Term Care Association (NDLTCA). Thank you for the opportunity to testify. I represent 182 nursing, basic care, and assisted living facilities. I urge support for an amendment to HB 1012, allocating $3 million to implement a specialized behavioral health program for individuals with complex behavioral symptoms in skilled nursing and basic care settings. This proven approach will enhance care while reducing overall healthcare costs.

Background

As Pam Sagness mentioned last week, a diverse group of stakeholders have been working together to identify and address persistent challenges experienced by long term care and hospital providers, some of which were also highlighted in North Dakota's behavioral health studies.

North Dakota Long-Term Care and Psychiatric Facility Collaborative – Behavioral Health

Collaborative members: ND Long Term Care Association, ND Hospital Association, Alzheimer's Association, Health & Human Services-Behavioral Health, Good Samaritan Society, Sanford Health, Prairie St. John's, SMP Health-St. Raphael, Dept of Corrections & Rehabilitation, Altru, Hill Top Home-Killdeer, LTC State Ombudsman, Benedictine Living-Ellendale

Purpose of Collaborative: Identify and address behavioral health specific issues impacting populations served by long term care facilities and psychiatric facilities in North Dakota.

Ongoing Work of the Collaborative:

- Definitions Workgroup (stable, acute, level of care, safety)
- Engage Medicaid
- Data Gathering
- Length of Stay Review
- Strategize Solutions
- State Hospital Role

WHO	**Justice-involved** (DOCR and civilly committed sex offender population)	**Residents with Challenging Behavior** (not specifically gero-psych)	**Gero-Psych**	**Community-Based**
CONSIDERATIONS / PROBLEM STATEMENTS	Individuals who are justice-involved currently or by history remain in state facilities due to a lack of options. • Aging DOCR • Sex-Offenders • Violent Crime History Facility proximity to schools can be an issue in community. Insurance issues for long term care providers. • Case by case review but mostly no.	Medicaid eligibility delays. Medicaid residents under 65 that are hospitalized, SNFs cannot bill for bed hold days. Provider hesitancy to support individuals with difficult behaviors due to concern support won't be available if things escalate. CMS very low risk tolerance for potential harm in SNFs. Lack of care coordination to assist individuals across systems. Need for consulting specialists to assist facilities in maintaining or returning individuals with high need. Reimbursement considerations.	When acute situations arise, the closest inpatient facility isn't necessarily best care for this population (mixed milieu). Neuro-cognitive disorder difficulty. Gero-psych language does not represent current population with many younger individuals. Connecting with peers of similar age is limited in current system. Specialty contracted beds located in existing Long-Term Care facilities are full. (3 providers) Reimbursement considerations. There is a significant delay in discharge/admission to a facility while reapplying for Medicaid which adds cost to the state and reduces revenue for the facility. NDCC 50-24.4-29 edit to avoid NDSH admission prior to Gero-psych admission.	Missing level of service for long term therapeutic interventions? Transitional living facility identity – what is a transitional time frame for a chronic disease? Does ND need Intermediate Care Facilities (ICF) for individuals with mental health conditions? Risk mitigation fund for gero-psych if qualifying issues? "Basic care for SMI"

Regulatory & Discharge Challenges

Nursing (NF) and basic care (BC) facilities and psychiatric providers report major challenges in accessing crisis response services and timely inpatient psychiatric care, creating unsafe situations for both residents and staff. When NF and BC residents experience acute psychiatric episodes—characterized by severe agitation, aggression, or self-harm—facilities often lack the necessary resources to provide effective interventions.

Strict regulations require NFs to maintain an environment free from abuse or the threat of abuse, making it extremely difficult to care for individuals who exhibit or have a history of exhibiting violent verbal or physical behaviors. Facilities risk citations and penalties, creating a barrier to admission for residents with complex behavioral health needs.

LTC facilities and hospitals struggle with delays in transferring patients to the appropriate setting, whether for long term care placement or inpatient psychiatric stabilization. These delays are worsened by Medicaid eligibility delays, and an overburdened State Hospital system, which operates at full capacity due to a lack of step-down options for patients who no longer need hospitalization and cannot safely transition elsewhere. This situation is not only costly but also prevents these individuals from receiving the specialized and consistent care they require in a more home-like setting.

This crisis stems from a shortage of behavioral health specialists and reimbursement barriers. While some necessary services are billable, many essential interventions are not. Facilities must contract for these services, yet current payment structures do not cover these costs.

LTC providers operate under tight financial constraints, making it impossible to fund non-billable but essential behavioral health services, including:

- Training caregivers in behavioral interventions
- One-on-one and group psychosocial activities
- Acute assessment and referrals for uninsured individuals
- Compliance guidance for CMS schizophrenia audits
- Crisis resolution for residents and families

Other states have successfully addressed this gap with add-on payments, ensuring residents receive appropriate care. They've demonstrated that targeted behavioral health programs in long term care facilities can:

- Stabilize residents with behavioral health needs.
- Reduce reliance on emergency departments and hospital admissions.
- Enhance the quality of care and outcomes for residents while decreasing costs to the healthcare system.

Proposed Model

The requested $3 million will provide funding for this biennium to launch and scale a proven care model, demonstrating its effectiveness and cost-saving potential. By starting on a targeted scale, we can fine-tune implementation, gather meaningful data, and build a compelling case for future statewide expansion.

Other states have **proven cost savings** from implementing similar behavioral health support programs. In Nevada, emergency room visits among participating residents dropped **by 72%**, reducing unnecessary hospitalizations and **saving millions in healthcare costs**. A similar approach here in North Dakota will allow us to:

- **Decrease costly acute care transfers** and stabilize residents in lower-cost settings.
- **Equip nursing and basic cares facilities with specialized behavioral health training** to manage complex cases.
- **Reduce staff turnover** by ensuring facilities have the resources to safely care for residents with behavioral health needs.

This isn't just a funding request—it's a solution to a growing problem that, if left unaddressed, will continue to burden **hospitals, emergency departments, and the state's budget**.

To expand on the specifics, I now introduce **Dr. Kristina Kovacs**, who will share data from Behavioral Health Solutions and outline the significant return on investment for implementing targeted behavioral health services in our long term care facilities.

I respectfully urge your **support for this $3 million funding request**, which will **save money, improve care, and prevent avoidable hospitalizations**.

Thank you for your time, and I welcome any questions.

Nikki Wegner MS, OTR/L, President
North Dakota Long Term Care Association

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/4/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:39 p.m. Chairman J. Nelson called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Availability
- Affordability
- Quality
- Stability

2:39 p.m. Jessica Thomasson, Executive Director, Human Services Division, Health and Human Services testified and presented on removing childcare and housing as barriers to work #34704, #34792.

4:08 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, responded to cost to continue and turnback.

4:19 p.m. Jessica Thomasson, Executive Director, Human Services Division, Health and Human Services Division, testified and continued with testimony #34704.

Additional written testimony:
Tania Zerr, Executive Director, YMCA Learning Center, Fargo, ND, in favor #33865.
Kathy Busche, The Children's Playhouse, Hazen, ND, in favor #33957.
Carol Mauer, Ragamuffins Ranch Daycare, Stanely, ND, in favor #33986.

5:13 p.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

Written Testimony for North Dakota HB 1012

Submitted by: YMCA of the Northern Sky

Good morning, Chair and Members of the Committee,
My name is Tania Zerr, and I am the Executive Director of Child Care Programs for the YMCA of the Northern Sky. I want to thank you for the opportunity to share how the Best in Class (BIC) program has positively impacted our organization, the children and families we serve, and our community as a whole. I strongly urge your continued support of this vital initiative and we fully support this bill.

Overview of Our Child Care Programs
The YMCA of the Northern Sky provides care for approximately 2,500 children daily across the community. With four Early Childhood Learning Centers and 21 school-age programs, we are deeply committed to providing high-quality care and education for children of all backgrounds.

The Best-in-Class program has been transformative for our organization, especially as we face a national child care staffing crisis and increasing demands for quality in early childhood education.

Benefits of Best in Class (BIC) for Children and Families

The Best in Class (BIC) program is a transformative initiative that benefits not only children and families but also early childhood educators and the profession as a whole. By investing in high-quality early childhood education, we are fostering developmental growth, school readiness, and long-term success for young learners while strengthening the child care workforce and advancing the field of early education.

The BIC program ensures that children receive individualized, developmentally appropriate instruction and support, fostering their cognitive, social-emotional, and physical growth. Early learning environments enriched by BIC practices promote:

- **Early Skill Development:** Children gain foundational literacy and numeracy skills, social-emotional regulation, and motor development, preparing them for future academic success.
- **Health and Developmental Screenings:** Early identification of potential delays allows for timely interventions, reducing long-term educational disparities.
- **Parental Support and Engagement:** Families receive guidance and resources to reinforce learning at home, creating a cohesive support system between educators and parents.

Testimonial from Kari and Douglas Uzzle

The BIC program's impact is best illustrated through real-life experiences. One such story comes from Kari Uzzle, whose daughter, Charlotte, benefited immensely from the YMCA's Early Learning program:

"Our daughter, Charlotte, was born prematurely at 30 weeks and spent three months in the NICU. She faced challenges with feeding and slow growth. While Early Intervention Services provided valuable support, we noticed significant growth in Charlotte after she started at the YMCA's Early Learning program. Before enrolling, she was making good progress but still slightly behind her peers. However, at the YMCA, she blossomed! Her speech improved dramatically; she went from using single words to forming full sentences. Her fine motor skills also developed significantly, and she even learned to jump!

We were initially concerned about her readiness for kindergarten, but the YMCA program instilled in her the confidence and social skills she needed to thrive. She grew in her color knowledge, number and letter recognition, and even sight words! Her teachers were incredibly knowledgeable and supportive, providing regular updates on her progress and offering valuable guidance for us to support her learning at home.

Thanks to the Best-in-Class program's health screenings, we discovered Charlotte had mild hearing loss. This early detection will allow her to receive necessary treatment (ear tubes) before the start of her kindergarten year, preventing potential academic delays. We are incredibly grateful for the positive impact the YMCA's Early Learning Program has had on Charlotte's development and our family's peace of mind. We highly recommend their programs to any family seeking a nurturing and enriching environment for their child."

Financial Support for Families
The sliding fee scale plays a vital role in ensuring families of all income levels can access high-quality early childhood education. For many families in our community, this has been transformative, providing affordable care they might not otherwise be able to afford.

Benefits for Educators and the Early Childhood Profession

The BIC program provides invaluable support to child care staff and strengthens the early childhood education profession by:

- **Enhanced Professional Development:** Teachers receive ongoing training in best practices, including curriculum implementation, behavior guidance, and inclusive teaching strategies.
- **Teacher Coaching and Professional Development**
    - Best in Class provides coaches who work directly with our teachers to:
        - Ensure the curriculum supports all areas of development and aligns with the North Dakota Early Learning Standards.
        - Foster inclusive environments.
        - Administer Ages and Stages screenings for developmental progress.
        - Deliver specialized training for BIC teachers, which enhances their ability to support children and families.
        - Through this support, we've seen measurable improvements in teacher effectiveness and classroom quality.
- **Increased Job Satisfaction and Retention:** Supportive work environments, clear pathways for advancement, and access to resources empower educators and reduce turnover.
- **Strengthened Workforce Pipeline:** By prioritizing workforce development, the BIC program attracts and retains skilled professionals, ensuring consistent, high-quality care for children.
- **Classroom Enhancements**
    - In 2023 and 2024, BIC grant dollars allowed us to invest in classroom furniture, materials, and equipment, updating and improving our learning environments.

  - Teachers collaborate with coaches to create prioritized purchasing lists based on need and budget.
  - Coaches guide teachers in implementing new materials effectively.
- **Increased Teacher Wages**
  - Thanks to Best-in-Class funding, we have been able to increase wages for our early childhood teachers significantly: Licensing requires minimum qualifications, at the YMCA we have three levels of teacher based upon their credentials with wages ranging from $17.74 to $22.05.
  - This has allowed us to better recruit and retain qualified staff in a highly competitive job market. However, we know that we will never be able to return to pre-BIC pay rates. Sustaining these wage increases is critical to maintaining a stable workforce and ensuring consistent, high-quality care.

Strengthening Early Childhood Education for the Future

The passage of House Bill 1497 would further the mission of the BIC program, ensuring more children and families benefit from high-quality early learning experiences. By investing in this initiative, we are not only supporting our youngest learners but also building a stronger, more resilient early childhood education system that benefits children, families, educators, and society as a whole.

Closing
The benefits of the Best-in-Class program extend beyond individual child care centers—they strengthen families, prepare children for school, and build a foundation for future community success.

Sincerely,

Tania Zerr
YMCA Learning Center
Executive Director
zerr@ymcanorthernsky.org / 218-359-2331

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division:

My name is Kathy Busche. I own and operate two childcare programs in Hazen. One program is a group facility licensed for 30. I own the facility and operate a 0-5 program with a current enrollment of 33 children. The second program is my home where I operate a school age program with a license for 30 with 25 children enrolled. The facility is Step 2 in Bright and Early QRIS. Our home program is Step 1 QRIS. I have been operating my business out of my home since 2007 and purchased and renovated the facility opening the second location in January 2022. I have a bachelor's degree in early childhood education from MSUM and providing quality childcare is my passion.

I am sorry I cannot be present to testify in person, but unfortunately, I do not have the backup staff required to be away from our programs at the present time.

I am writing today to urge you to approve HB 1012, specifically funding for childcare. During the previous biennium funding was approved that greatly impacted my ability to provide childcare in an area where childcare is lacking. Mercer county is known as a childcare desert and because of the funding approved in 2023 I have been able to continue to care for 60 children in our community. Some of the funding that has been most beneficial was funding related to CCAP for employees. I currently employ 11 individuals. Five of them have children who are of childcare age. In previous years I would not have gotten paid for those spots in our program. I have increased my income by five spots. I have also been receiving increased income from CCAP in the form of quality rating payments and increased payment for infants and toddlers. The combination of these three funding sources has allowed me the ability to give my staff monthly bonuses to retain quality staff which has made providing quality early childhood experiences to the children in our community much easier.

The second funding source that has been of great importance to our program is the inclusion grant. Of the 60 children in our programs currently 21 of them have some kind of special needs ranging from speech delays to non-verbal autism. Caring for children with special needs is a passion of mine and having extra funding to provide staffing to care for these children has been essential. Currently ratio requires us to have 5 or 6 staff each day and because of the inclusion grant we are able to staff our program with 7 or 8 staff each day. This has allowed my staff to work one on one with children who have disabilities.

I greatly appreciate all that North Dakota has done in the past to support child care and urge you to continue to invest in the children of North Dakota at the previous biennium funding of $7mil.

Thank you for your time, if you have any questions please reach out as I would be happy to discuss this more.

Kathy Busche

To Whom it may concern.

We currently have the capacity for 30 Children and are a QRIS Step 3 Program We are a second term (each term being 3 years' time), Step 3 Program. April / 2024 completing a 10-month cohort to recertify, our Step 3 Quality. Step 1-3 are 10-month cohorts individually. I explain this to help the reader understand our level of commitment to quality practices. Currently we are active in our Step 4 Cohort. Each Cohort (Step) is a 10-month process of onsite coaching, classes, assessments and observations of our program implementing short- and long-term goals, ensuring best practices are always being met. We are a Best-In-Class Kindergarten readiness program offering a sliding fee scale for the Best-In-Class children in the program, we are a member of the Childcare Aware Alliance program offering The Learning Beyond Paper Curriculum for our 0–4-year-old children incorporating purposeful play and meaningful teaching. We work with inclusions (Uspire), also Early Childhood intervention for speech. We are a Unique Program going above and beyond the day-to-day operations in childcare as the programs we participate in are not mandatory rather voluntary it takes a tremendous amount of dedication, time and effort to continue our education in maintaining Quality Practices, our goal is to provide a Quality Childcare Center with a focus on early childhood development incorporating social and emotional growth educating the whole child. We follow the practices of the ND Learning Standards in our curriculum, individual learning plans, documentations and assessments being purposeful in filling all the gaps the year before kindergarten.

We are a unique group of staff members; we are a very strong unit as a team effort in training all new staff. We have a 7-year staff member who came to us as a stay home mom wanting to get social for her young child, she is now nearing completion of her (CDA) Child Development Associates Certificate, We have a 3-year staff member with her Degree in Early Childhood Development, we have a 5-year Staff working towards her (CDA) who started with us through the high school work program part time and is now full time, and a one-year staff who came to us wanting to work nearer to young children with a focus in college on inclusions in early childhood development, alongside myself with 21 years of experience in childcare holding a (CDA). These walks of life are potential staff we seek out as they are the puzzle pieces that help to create quality care in childcare. This is what makes Ragamuffins Ranch Daycare Unique! We will be starting our new building of a center offering 120 spots for children in our area Mountrail County, we are a rural area and the needs are tremendous! We utilize the services through Bright and Early, Uspire, Right Track and take children on the CCA (Childcare Assistance). We remained committed to childcare services throughout Covid 19 and believe beyond a shadow of a doubt that the service and grant funding is what has held us above water and has been fortunate to remain open for 12 years in our rural area.

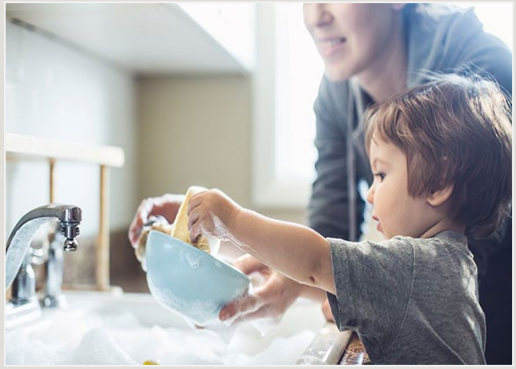
Aligning our Efforts to Remove Child Care & Housing as Barriers to Work

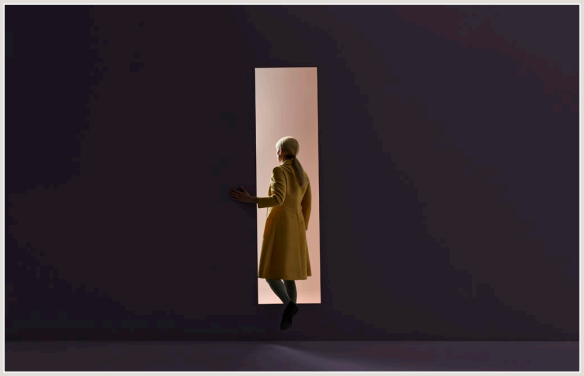
February 4, 2025

House Appropriations | HR Division



Representative Jon Nelson, Chairman

Presentation by Jessica Thomasson, Executive Director,
Human Services Division



NORTH Dakota | Health & Human Services
Be Legendary.

HSD Threads relevant to Appropriations

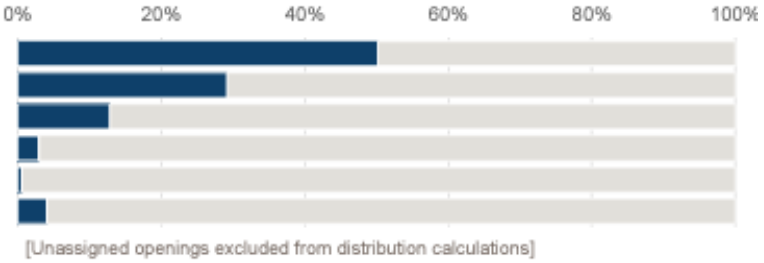
1 Growing a strong, stable workforce requires strong, stable families

- Family caregiving supports
- Child care as a stable resource
- Housing stability

2 Filling gaps in the system of care can prevent crisis

- Evolving safety net for targeted needs
- Preventing justice system involvement
- Complexity of layered / co-occurring factors
- Transition & diversion across housing-service continuum

3 Pushing toward simplicity improves citizen experience



- Incremental progress
- Person centered design
- Reduced administrative burden

46% of ND job openings pay an average hiring wage of <$20/hr and require minimal training/education to start

What do people want?

To **build a life** for themselves & their families.

What does it take to **Build a Life?**

2021

- Best in Class (HB 1466)
- Consolidate many early childhood functions (HB 1416)

2023

- Investments in Child Care Assistance, provider grants, and child care infrastructure (HB 1540)
- Research informed year-before-kindergarten programs *(Best in Class / Waterford Upstart)* (SB 2012)

2025

- Continue pushing toward a healthier child care sector and becoming a state where child care is not a barrier to work

North Dakota | Health & Human Services

Child care is a workforce solution that can make a difference for ND employers

Affordability

Connect more working families to child care assistance to keep the cost of child care within 7% of household income

Availability

Make it easier for working families to find child care when and where they need it

Quality

Help kids realize their potential by supporting quality early childhood experiences

ND Child Care Strategy is both comprehensive and targeted

Target investments to ages 0-3

- ✓ Age of highest developmental return for children
- ✓ Period of greatest economic pressure for most young families
- ✓ Critical decision point for individual-level decisions about how/if to rejoin the labor force
- ✓ Focus on working families employed in occupations where compensation doesn't offset the cost of child care needed to enable work

Embrace an all-of-the-above approach to child care

- ✓ Quality early experiences can happen anywhere.
- ✓ Working families should have meaningful choices about child care.
- ✓ Principles of quality are knowable and transferrable to any setting.
- ✓ Sustainable child care businesses will support more sustainability within the workforce.

Help working parents provide for their families by supporting employment, training and education goals

- ✓ Benefits are scaled to family need.
- ✓ Employers have meaningful vehicles to remediate child care as a barrier to work.
- ✓ There are opportunities for children who are least likely to have access to quality early childhood experiences.

The state of child care in North Dakota

2023-25 Snapshot

STRENGTH

- **Help with child care costs** for larger number of working parents
- More **resources to support** quality rated programs
- Increased state-supported options for children and families in **year before kindergarten**

WEAKNESS

- **Uneven distribution** of child care assistance across ND
- Severe mismatch between child care **supply and demand** in many communities
- Lack of timely, consistent cross-system **data**

S W T O

THREAT

- Local **labor market realities** and childcare workforce **wage scale**
- Impact of staff **turnover** on **quality** of care
- **Shifts in age** of children **served** in all-ages child care settings (infant/toddler, school age)

OPPORTUNITY

- Improved **user experience** / **outreach** to working parents re **child care assistance** options
- Coordinated approach to greater **operational sustainability** for child care **businesses**
- Strengthen **stability** of child care **workforce**

What indicators characterize a "healthy" child care sector?

- Broad availability of quality licensed care for infants and toddlers
- Mix of provider types who are licensed
- % of licensed programs operating to full capacity
- Very few/no child care deserts (i.e., areas with critical shortages)
- Equitable distribution of child care assistance statewide
- Inclusion supports that create access for children with special needs
- Growth in capacity is greater than loss of capacity
- Active quality efforts in increasing % of licensed child care slots
- Child care rates cover the cost of delivering quality care
- Increasing % of child care workforce credentialed for promotion
- Parents have options to consider when and where they need them
- Working families w/young children pay no more than 7% of income for quality care

NORTH Dakota | Health & Human Services
Be Legendary.

What does "progress" look like?

- Statewide child care payment model that rewards quality
- Increased # of infant and preschool slots in highest quality settings
- Reduced rates of staff turnover in licensed child care programs
- Increased % of children who are achieving widely held developmental milestones
- Widespread adoption of kindergarten assessment tool by public and private kindergarten programs
- Sector-wide identification and understanding of child care health/safety compliance
- Families have the information they need to feel like they "know what to look for" when seeking quality early childhood experiences for their kids
- Increase in kindergarten readiness on day 1 of kindergarten
- Fewer people who report "child care" as a barrier to work
- Average wage for front line child care workers equal to the average wage for direct care paraprofessionals in other fields (ex. DSP, CNA, QSP)

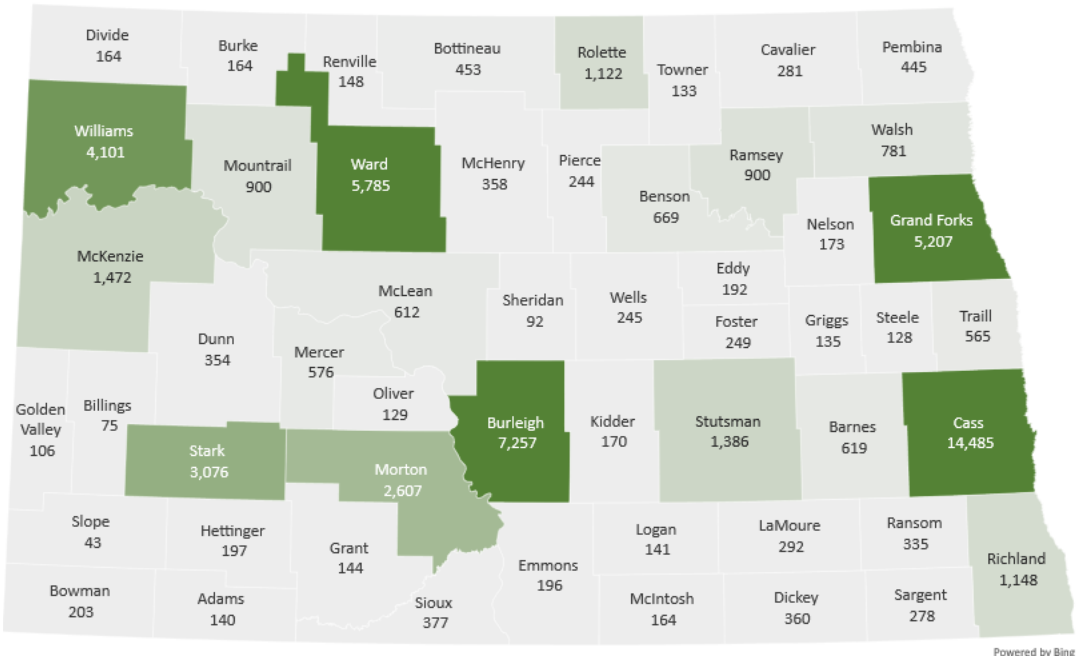
Child Care Availability | Desert

Measure:

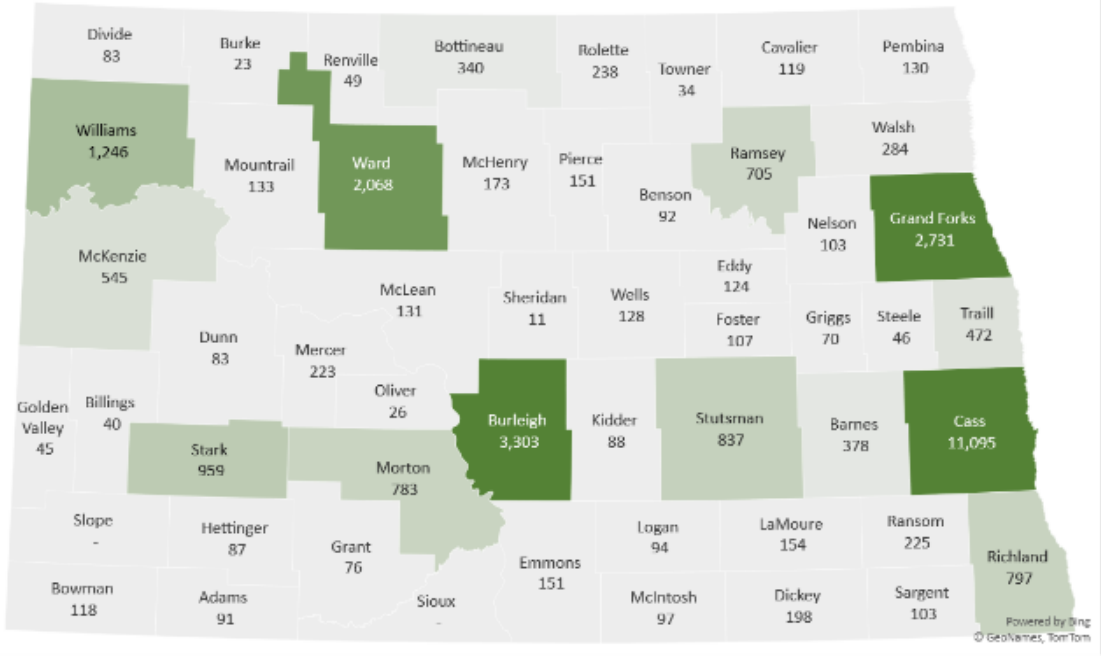
Eliminate conditions of severe undersupply

Communities have sufficient child care capacity to eliminate severe shortages (known as "child care deserts")



Key Indicator: Child Care Availability | Deserts

Availability



Population age 0-5 and Child Care assumed available to 0-5

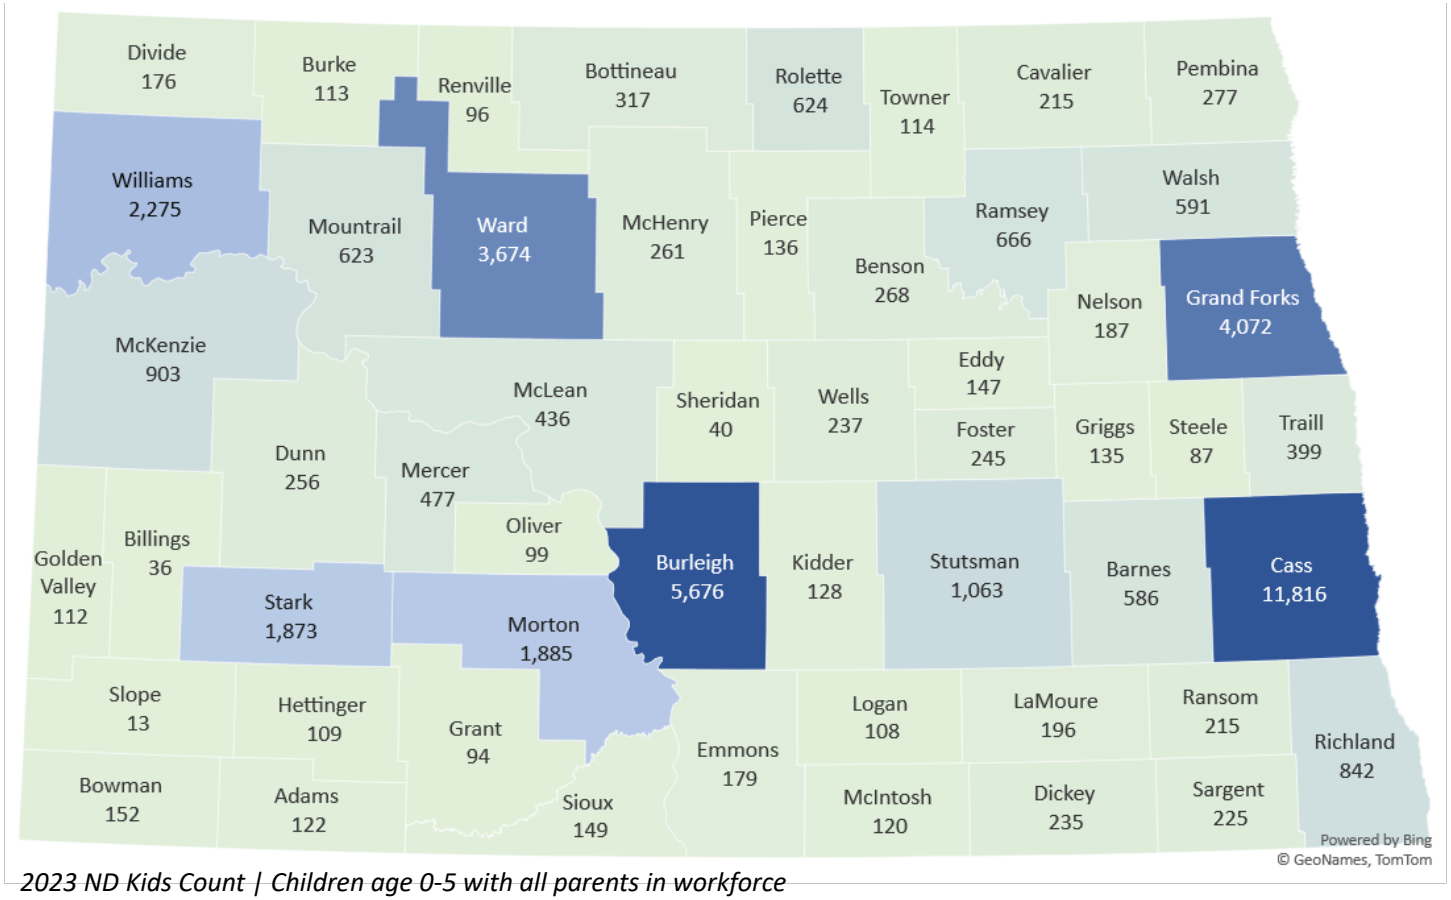
Factors necessary to determine degrees of child care shortage

In 2022 ND was home to 60,576 children ages 0-5

In 2024 ND's 1,198 licensed child care providers offered 30,391 child care spaces to children age 0-5 *(assumes 77% of 39,377 total licensed spaces)*

NORTH Dakota | Health & Human Services
Be Legendary.

Key Indicator: Child Care Availability | Deserts



Availability

In ND there are 44,080 children age 0-5 who may potentially need child care

Factors necessary to determine degrees of child care shortage

% of children ages 0 through 5 with all parents in labor force

Key Indicator: Child Care Availability | Deserts

Severity of Underserved Areas

What are ND goals for access and supply?

What is ND's Capacity Target?

60,576	Children ages 0-5
30,391	Licensed Child Care Capacity assumed available to children 0-5 (based on currently reported enrollment trends)
35%	Threshold for severe child care "undersupply", warranting designation as a "child care desert"
9,189	Statewide capacity in excess of desert threshold

- ✓ Role of spatial barriers to access? Relevance of place.
- ✓ Intersection of cost and quality barriers with access barriers?
- ✓ 3:1 is severe – what is "adequate"?
- ✓ Actual capacity v potential capacity – accounting for child care workforce impacts
- ✓ Kids 6-13? Kids with special needs? Extended hours?

$377

Family of 3 with monthly income of $6,011 would have a CCAP co-pay of $377
If monthly cost of care = $1,082 (average center / infant)
Family pays $377; CCAP pays $705

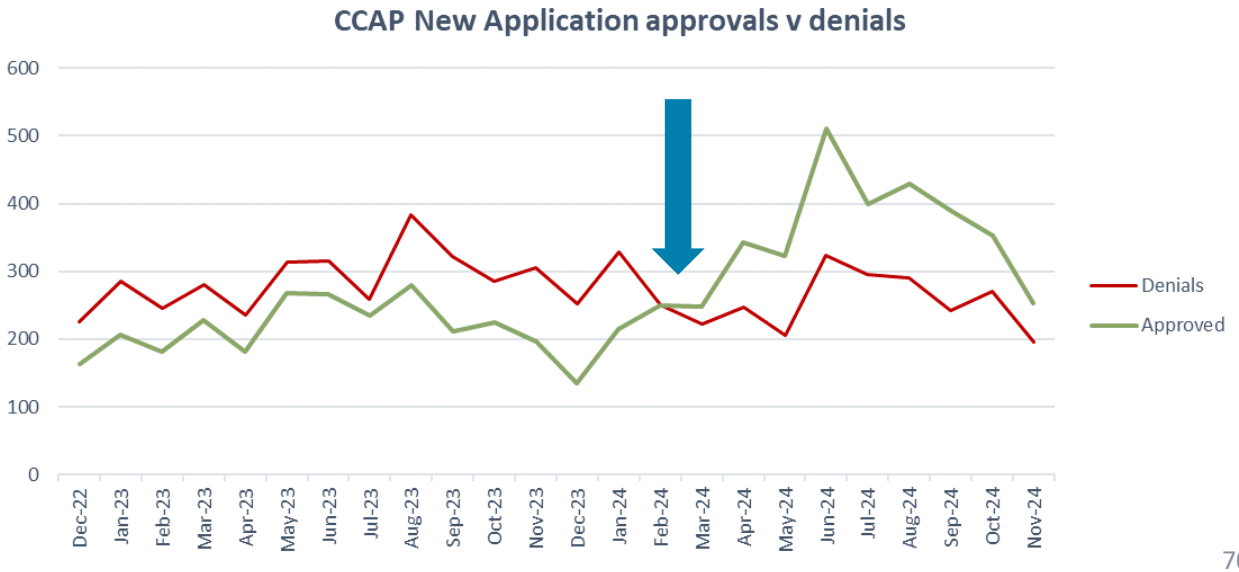
Affordability

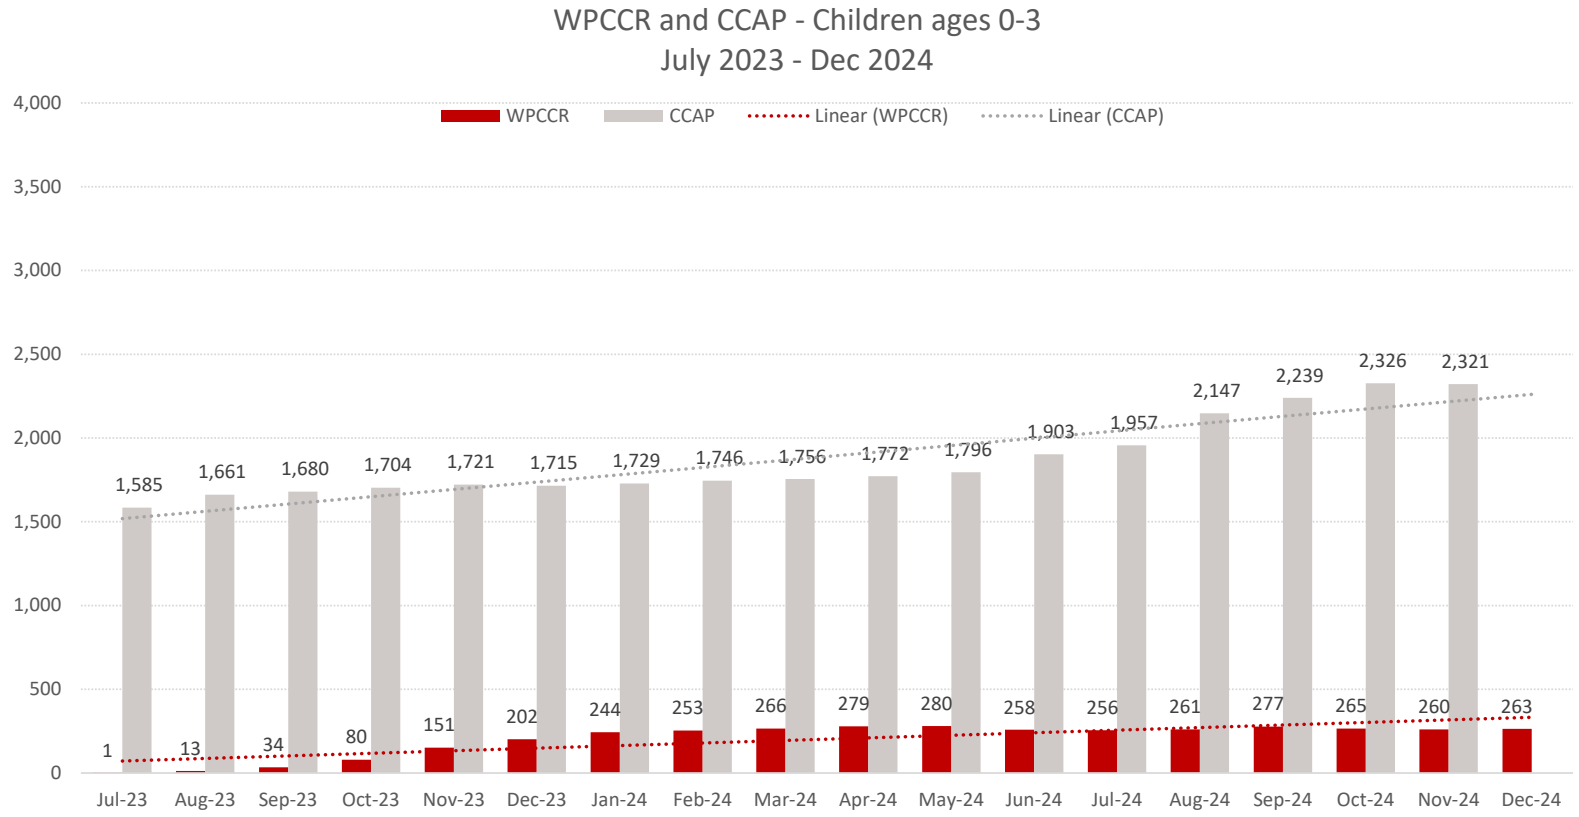


Key Indicator: Child Care Affordability | CCAP Access

Administrative changes impact application success rates

ND Child Care Initiative progress during 23-25 interim

- 30 days to submit documentation
- 18 mo eligibility period
- Job search allowed as eligible activity
- Focus groups to help redesign portal
- 90 day grace period for families in housing crisis to provide verifications
- Adjusting co-pays to no more than 6% of family income
- Redesign of notices



NORTH Dakota | Health & Human Services
Be Legendary.

Affordability

Key Indicator: Child Care Affordability | WPCCR

Working Parent Child Care Relief has grown to serve 4-4.5% of the total number of infants and toddlers who benefit from CCAP

How it works

1. Employer Opts In
2. Employee Applies
3. HHS reviews/approves
4. Employer and state each send employee $300/mo
5. Employee pays child care provider

Quality

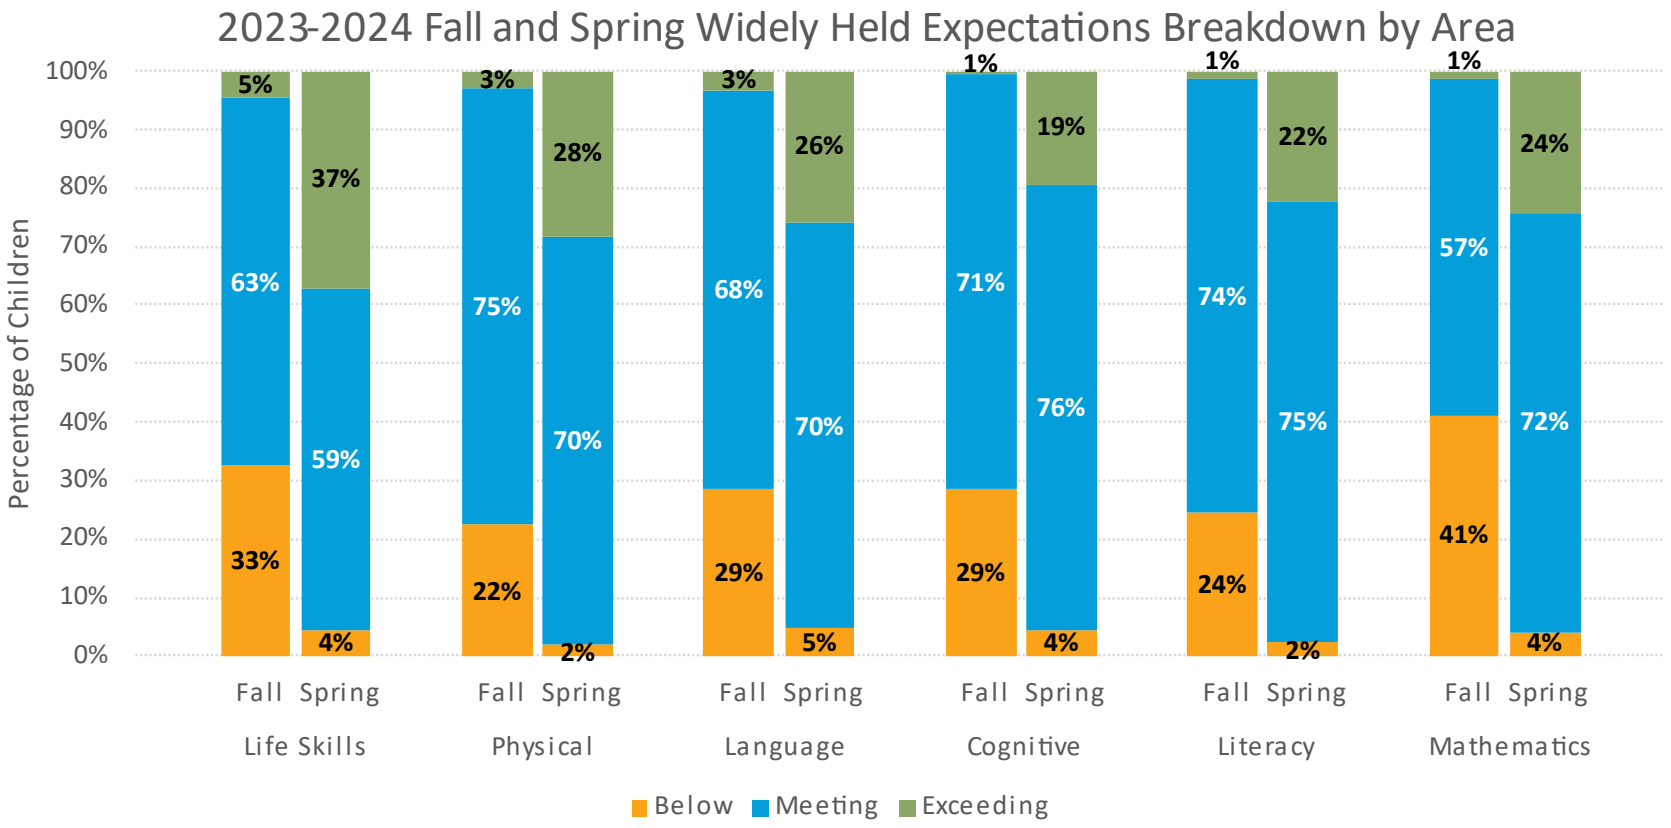
What are Widely Held Expectations?

Widely-Held Expectations describe the **range of knowledge, skills, and abilities that children of a particular age typically demonstrate over a year of life**.

These expectations are based on the latest research in early childhood and are **frames of reference** that help parents and teachers **focus on the development of the individual child.**



- ✓ Unique to each child

*** = partial one-time funding*

Note: *This summary does note include CCAP base budget / expenditure originating from SB2012*

Executive Budget Request

Child Care as Workforce Infrastructure ($17,272,500)

WHAT?

- ✓ Best in Class expansion - $6 million**
- ✓ Child care grants and shared services - $5 million**
- ✓ Early childhood quality infrastructure - $3 million**
- ✓ Inclusion support for child care - $172,500**
- ✓ Outcome measurement tools for quality rated child care programs - $100,000**
- ✓ Quality tiers in Child Care Assistance payments - $3 million**

*** - Designated as one-time funding / SIIF*

WHY?

Addressing child care as a barrier to work requires a comprehensive approach that tackles all 3 elements of the child care dilemma: Affordability, Availability & Quality.

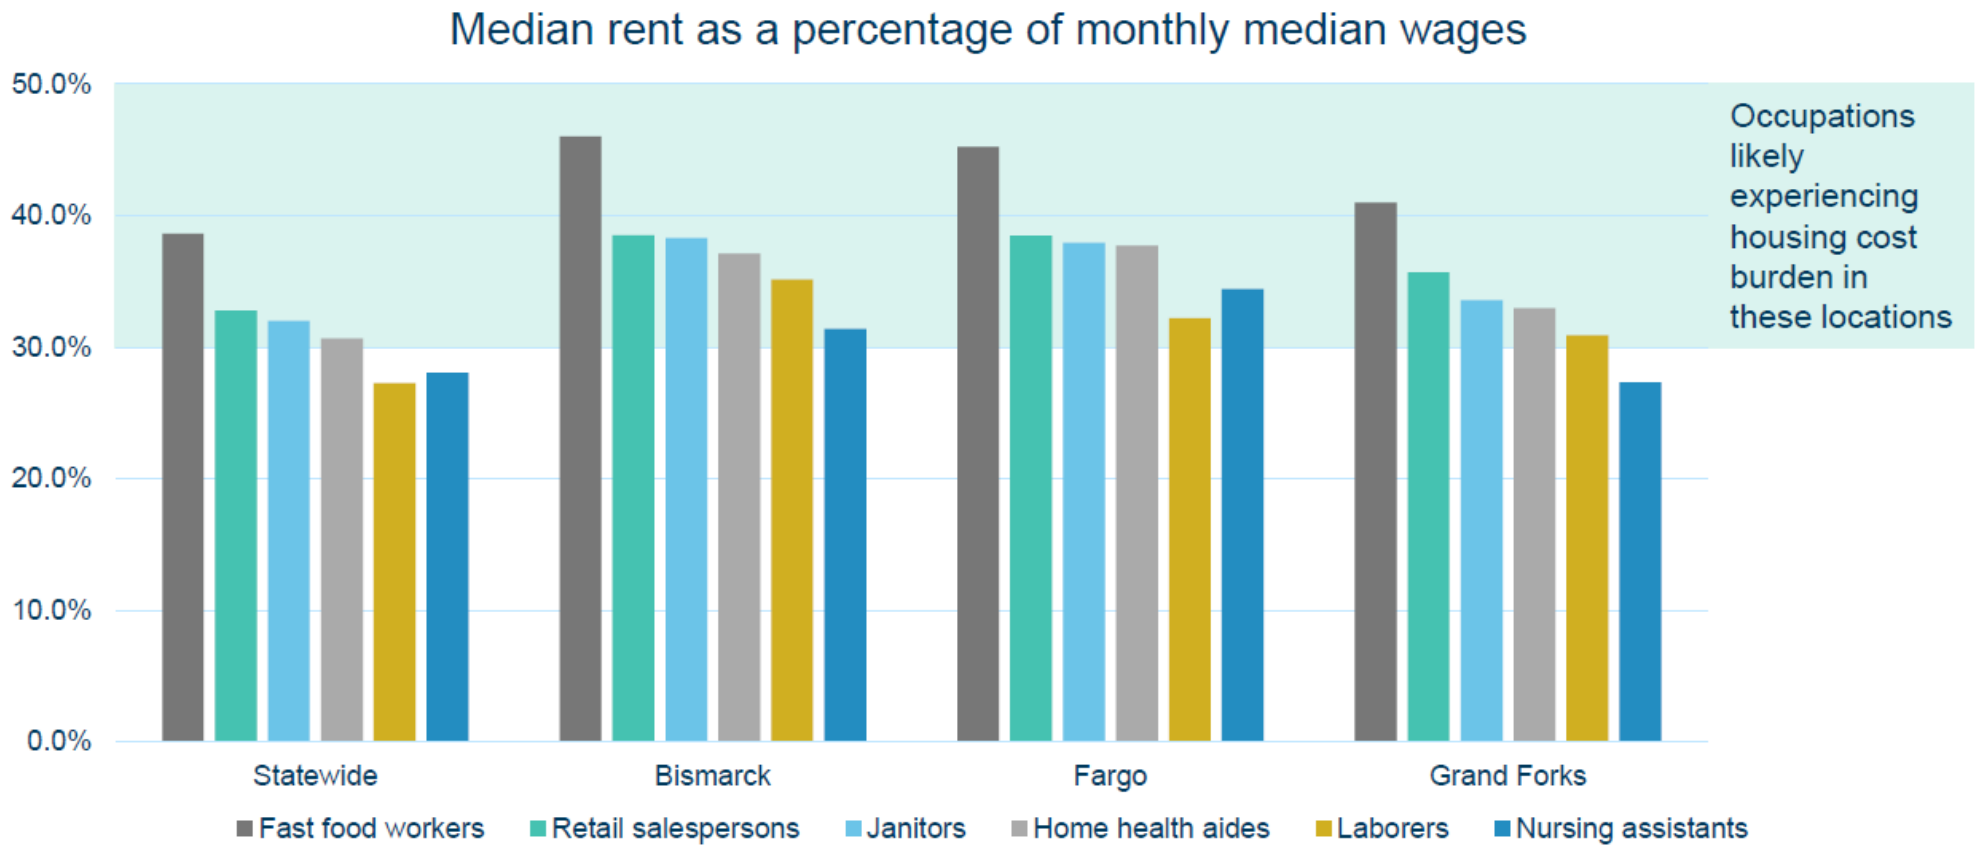
Best in Class | Stanley, ND

Housing is a prerequisite for workforce growth

Can you find it?	*Can you afford it?*	*Can you keep it?*
		
Availability	**Affordability**	**Stability**
Population change Housing supply (new & existing) Housing mix Infrastructure Construction labor force	Housing costs Household income Life stage costs (child care, services) Budget constraints Regulation	Accessibility Income changes Health needs Homelessness Family disruption

HOUSING IS A WORKFORCE ISSUE.

- When workers don't have stable housing, they are universally less able to be fully engaged at work.
- Whether renting or owning, an inability to find, afford, and maintain your place to live is de-stabilizing.



AFFORDABILITY AND THE WORKFORCE

Sample Job Types	Average Wage Range	Affordable Rent / Mortgage
Home Health Care and Personal Care Aides **Service** (retail, restaurants, cleaners) **Education** (child care staff, K-12 teaching assistants)	$37,000 or less ("Affordable" or "Deeply Affordable")	$1,100 or less
Transportation (truck drivers) **Education** (teachers) **Trades** (laborers, maintenance, carpenters, plumbers, roofers) **Administrative** (office workers, clerks)	$37,001 - $59,000 ("Affordable" or "Workforce")	$1,100 - $1,500
Health Care (nurses, dental hygenists) **Professional** (accountants, tech, analysts) **Trades** (electricians, supervisors, heavy equipment) **Energy** (oil and gas)	$59,201 - $89,000 ("Workforce")	$1,500 - $2,220

ALL NEW HOUSING CREATES OPPORTUNITIES.

- We need diverse supply to create affordability.
- Being able to move within markets allows more affordable units to open up as people seek options better suited to their life stage.
- People don't always *want* what they *need*. Preference matters. The most successful local markets are attuned to demand.

HOW NEW HOMES OPEN UP OPPORTUNITY

New housing, even luxury and market-rate units, frees up existing units for lower-income households to move into, thus expanding housing choices.

New market-rate construction

100 new units

Slightly older market-rate housing

Older housing

Within five years: 70 new vacancies in neighborhoods with household incomes below the metro median, including 39 new vacancies from neighborhoods with household incomes from the bottom fifth

Learn more: https://www.minneapolisfed.org/article/2024/how-new-apartments-create-opportunities-for-all

HOUSING MARKETS COUNT ON MOVEMENT.

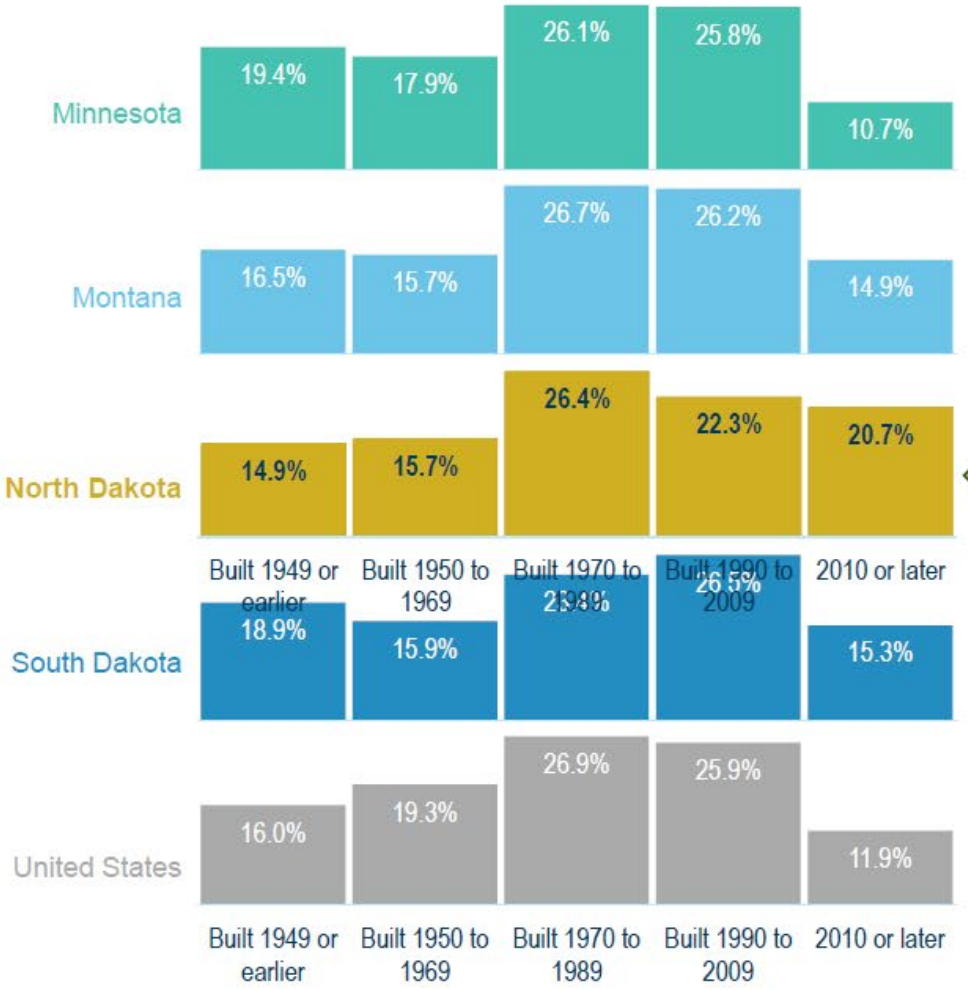
- When fewer people can buy homes, more people remain in the rental market creating rental shortages, driving up costs.
- Housing cost burden is creeping up the income spectrum as housing price increases exceed income increases.

PRICE ONLY MATTERS IN THE CONTEXT OF INCOME.

- Solving housing challenges means that people need to find a place where they want to live that they can afford.
- Healthy markets have options to allow the market forces of supply and demand to work.
- Vital communities need all types of housing – all price points, forms, sizes, characteristics.

DISINVESTMENT IS EXPENSIVE. HOUSING REHAB IS PREVENTATIVE.

- Housing almost always ages into affordability.
- Healthy housing markets balance new construction and existing units.
- Preventing obsolescence during the aging process is key.
  - Functional – features people expect
  - Physical – elements of disrepair
  - Economic – context housing exists in



YOU CAN'T REPLACE YOUR MOST AFFORDABLE HOUSING INVENTORY LIKE FOR LIKE.

- If you have to build it new, you are going to have to be ready to pay for whatever affordability you seek (development or operating subsidy, or both).

- The cost of preserving affordability is – in almost all cases - substantially lower than having to build for affordability.

HOUSING IN NORTH DAKOTA IS YOUNGER THAN NEIGHBORS

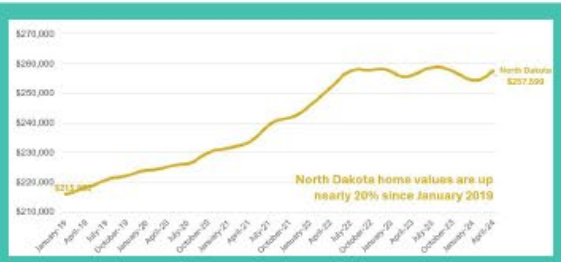
IN ND, HOUSING SUPPLY SHORTAGES ARE NOT THE MOST FUNDAMENTAL ISSUE.

- There are pockets of undersupply but in ND, affordability mismatches are the more widespread issue.
- In many markets there is a lack of necessary diversity in supply. Which means a lack of options for people to move, or to find what they need.

A FEW WAYS TO THINK ABOUT "ENOUGH" HOUSING:



Demographically

- Does the stock of housing align with the needs of households?

Affordably

- Are there enough housing units to avoid demand outstripping supply and driving up prices?

Numerically

- Are there enough housing units for households (both today's and tomorrow's)?

$$\underbrace{\left[\text{Households} + \text{Missing Households}\right] \times 1.05}_{\text{TARGET NUMBER OF HOUSING UNITS}} \ominus \underbrace{\left[\text{Total Housing Units} - \text{2nd and Vacation Homes} - \text{Uninhabitable Units}\right]}_{\text{UNITS THAT ARE RENTER OR OWNER OCCUPIED}}$$

(1+ Target Vacancy Rate)

REALITIES OF PLACE MATTER.

- Some parts of ND have very limited residential construction infrastructure

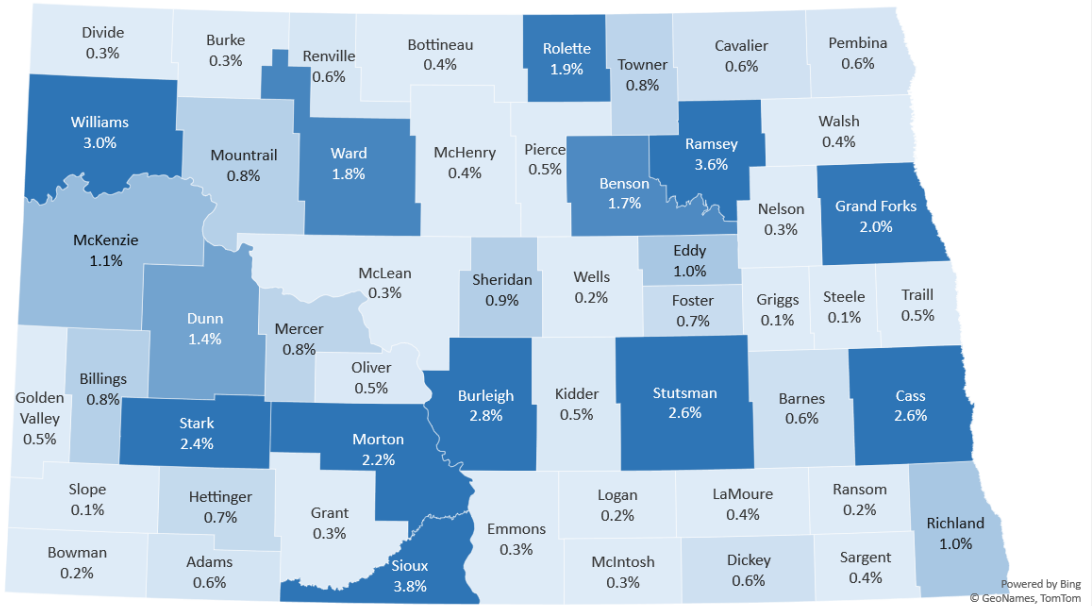
- Adopt an all-of-the above strategy to maximize opportunity to build strong, diverse local markets.
  - Site built, modular, manufactured.
  - Professional, quasi-professional and DIY.
  - New construction, renovation, conversion, infill.

LOWEST INCOME RENTERS NEED HELP TO COMPETE IN THE MARKETPLACE.

- Someone's "willingness to pay" and "ability to pay" are not always the same thing.
- Competition for the lowest cost (market worthy) housing is always greatest.
- Lower income households can only shop in segments of the market where competition is greatest and vacancy rates are lowest.

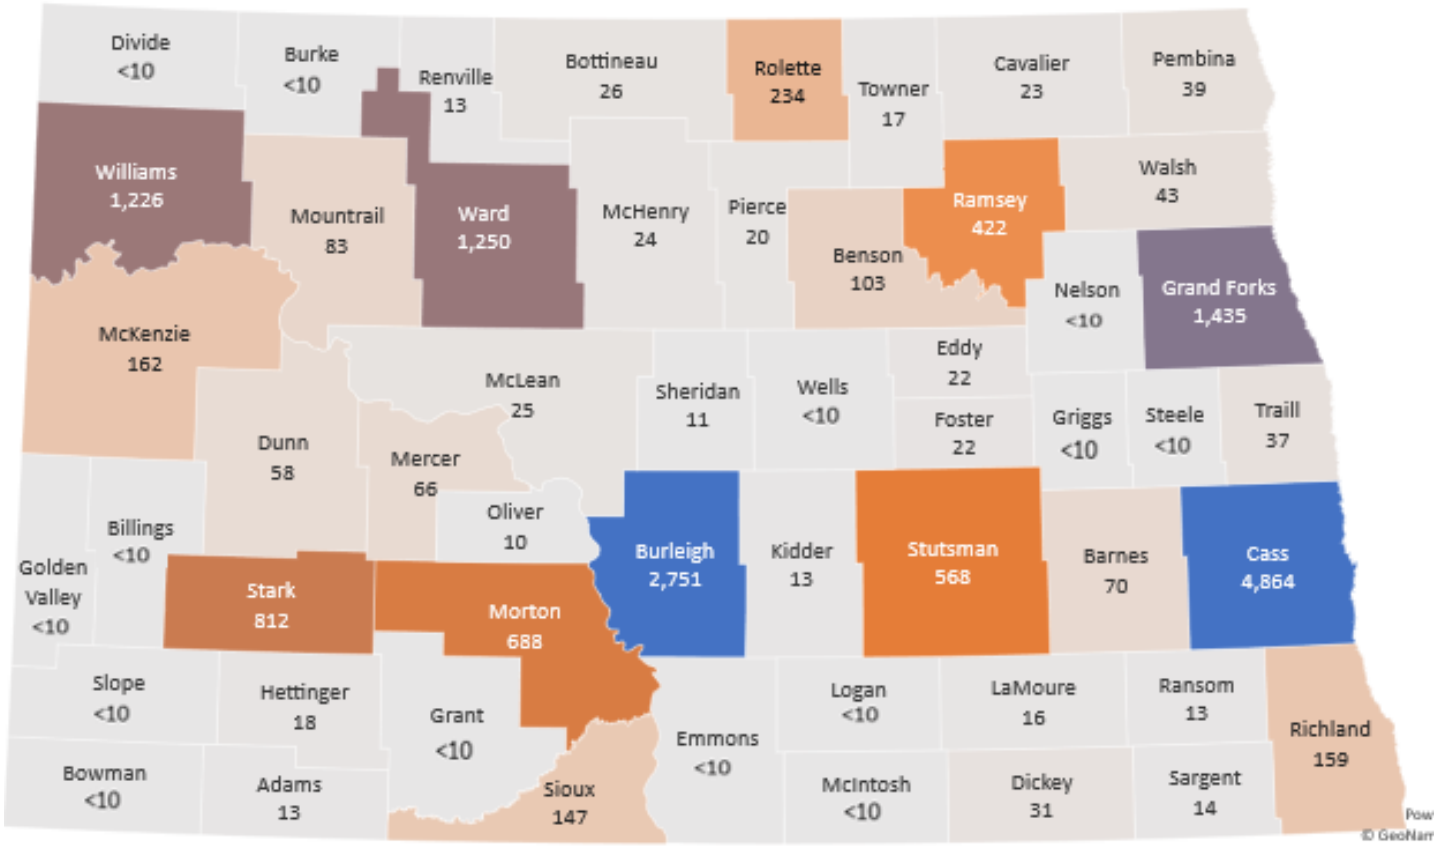
HOUSING CRISIS IS REAL.

- It affects people all over the state
- Make sure when it occurs -- wherever it occurs -- that it's rare, brief and solvable.



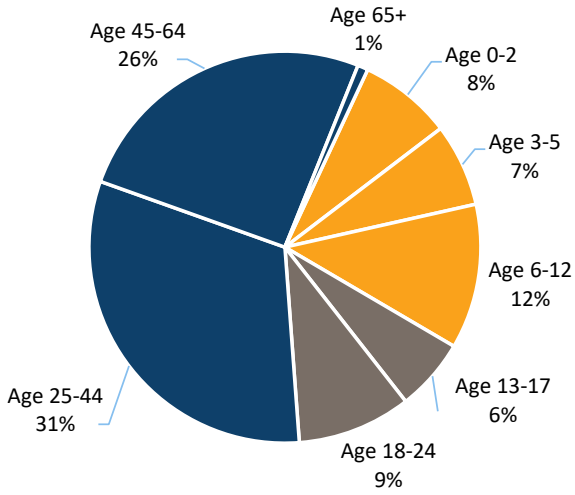
10% of people with income near or below poverty level will cycle in and out of homelessness every year

HOUSING CRISIS IS A DE-STABILIZING FORCE



Homelessness

An individual or family who lacks a fixed, regular, adequate nighttime residence. This includes a living situation where you are temporarily doubled up with another household.



15,528 people were experiencing homelessness at time of NDRH app (Oct 21 – Dec 23)
Shown as a % of total population by county

28% OF THE PEOPLE EXPERIENCING HOMELESSNESS WERE YOUNGER THAN 12 YEARS OLD

Age at time of app

Living situations at time of app varied

- **17%** (1,588 households) **unsheltered** (living in vehicle or other public or private place)
- **44%** (4,156) **doubled up** (temporarily staying with friend of family)
- **9%** (810) reported living in **emergency shelter**

NORTH Dakota Be Legendary. | Health & Human Services

A SINGLE SOLUTION WILL NOT SOLVE ALL PROBLEMS.

- Acknowledge and plan for differences in tools, resources, and approaches unique to each place.

- Build frameworks that allow local and tribal governments to align directionally while maintaining all the flexibility that is needed to address local circumstances.

A SUPPLY STRATEGY ALONE IS NOT ENOUGH.

- Lower income workers can't afford rent levels that even meet minimum property operating costs.
- Some market demand segments don't match up well to market price realities.
- You can't just build your way out of this market mismatch.

A DEMAND STRATEGY ALONE IS NOT ENOUGH.

- Demand side strategies can bridge many market gaps but, alone is not enough.
- People first need to find a place to live that meets their needs and then be able to pay for it.
- Appropriately flexible gap assistance can bridge affordability gaps.

SERVICES WITHOUT HOUSING ARE RARELY EFFECTIVE.

- A person can't focus on their physical health or their mental health if their most basic needs aren't met.
- Having a place to live is a first order need.
- Housing status is foundational to a person's ability to build a life for themselves and their family.

NORTH DAKOTA HOUSING MARKET IN SUMMARY

- Housing growth is keeping up with population growth – North Dakota has largely avoided underproduction of housing
- Home values and rents are rising, but less than nationally and in neighboring states
- Housing affordability is falling in North Dakota and homes are becoming unaffordable in some metros
- Mortgage interest rates may be constraining supply of for-sale homes in the state
- The scale of the housing challenges in North Dakota is still manageable

SUMMARY

- Housing matters for households' economic stability and opportunities.
- Relative to other states, North Dakota's supply of low-cost housing options is high.
- Specificity about affordability levels and subpopulations is important.
- A majority of households earning less than 50 percent of their area's median income are housing cost-burdened, as are 1 in 4 households earning 50-80 percent of their area's median income.
- There was an increase in the housing-burdened rate across all income categories over roughly the past decade (and that does not include data in the wake of more recent price increases).

2025-2027 - $104.5 million

SB 2014 – NDHFA budget
Housing Incentive Fund (HIF) ($25M) and Homelessness (emergency shelter operations) and Rapid Rehousing ($10M)

HB 1012 – HHS budget
Eviction prevention and targeted rental assistance ($13.5M) and home modification grants for accessibility ($1M)

SB 2018 – Dept of Commerce budget
Rural slum and blight program ($5 million)

SB 2225 – Housing for Opportunity, Mobility and Empowerment (**HOME**) program as a matched grant to help local governments create solutions to address housing needs (**Dept of Commerce**) ($50M)

Bank of North Dakota developing a secondary market alternative to help address appraisal gap issues for single family homes, particular in rural areas.

Housing is local. The State has a role.

Supply

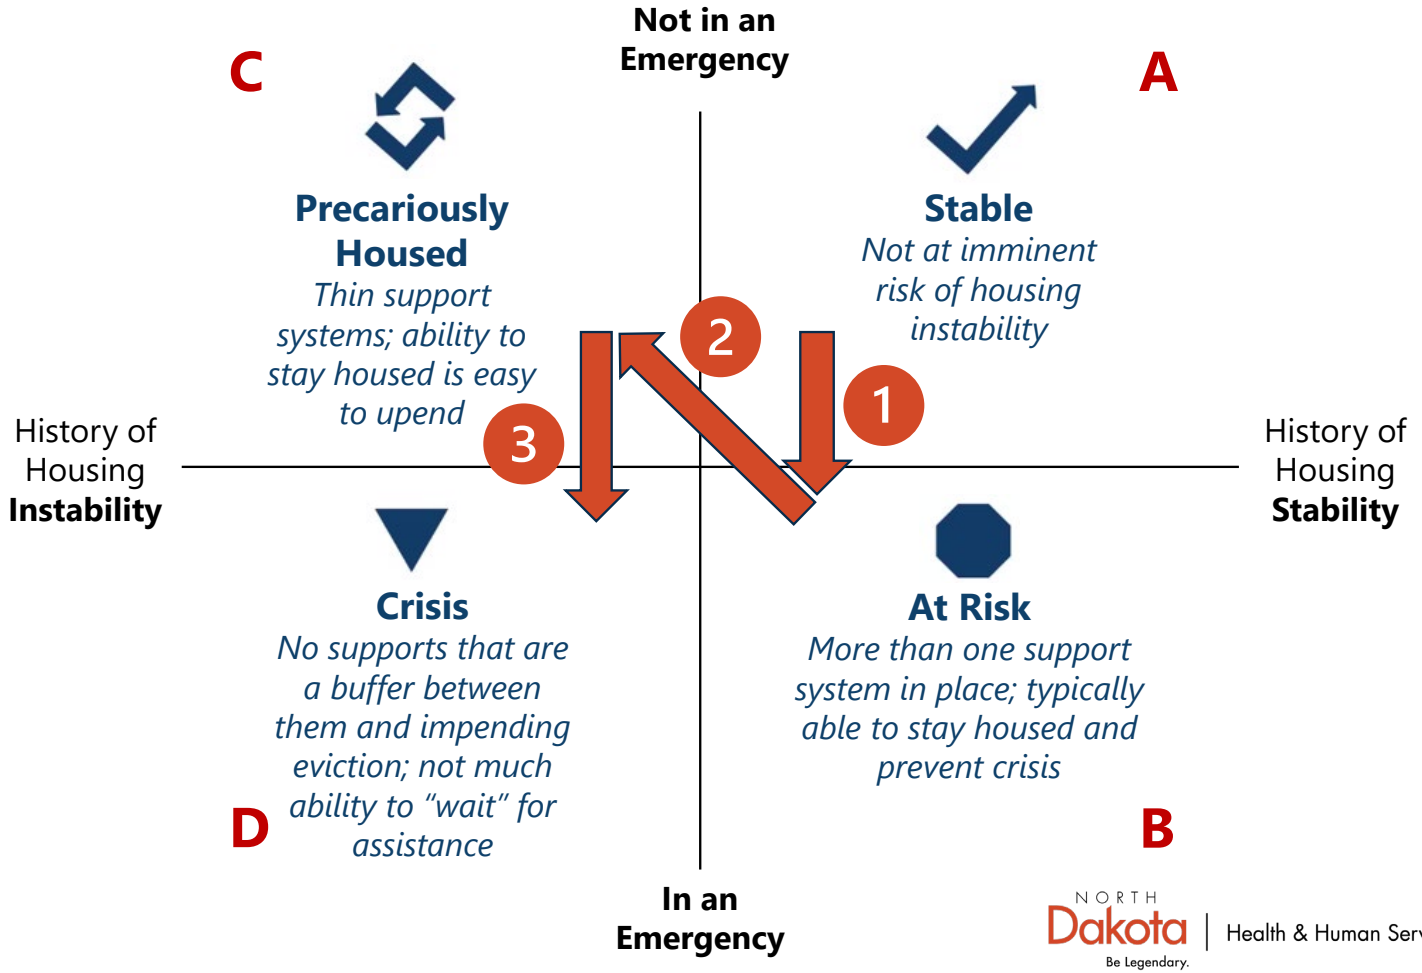
Housing Stability Resources Invested by County Dec 2021-Dec 2024



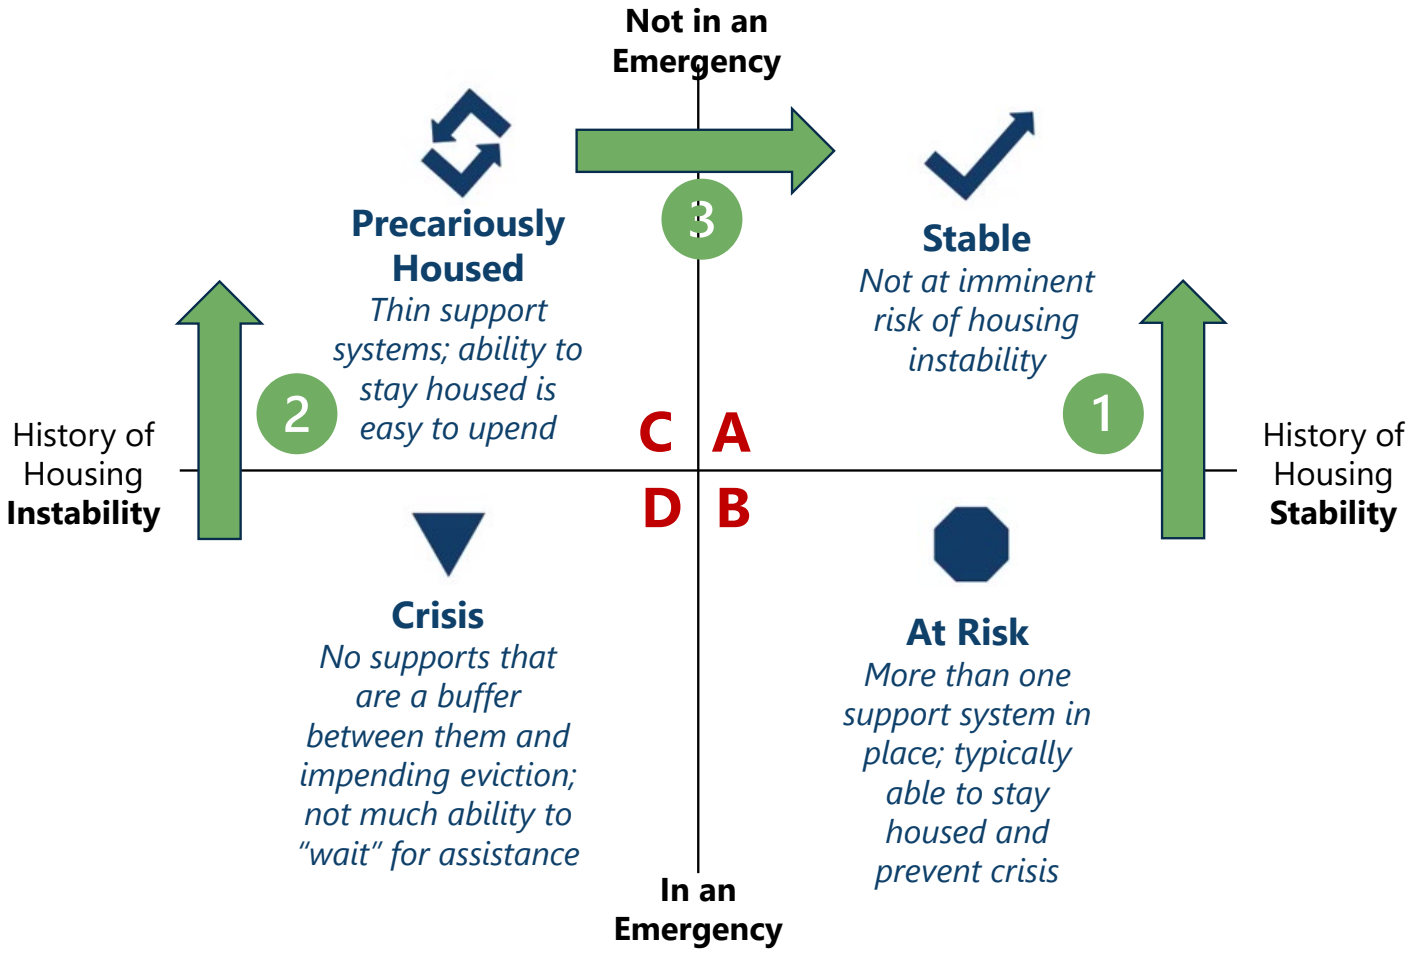
NORTH Dakota | Health & Human Services
Be Legendary.

Piloting a statewide eviction prevention program helped document the nature of housing crises in ND

Scenario 1:
- Income interruption
- Health issue
- Caregiving change
- Unexpected expense

Scenario 2:
- Layering of disruptions – domestic violence, substance use, mental health, job loss, persistence of a health condition

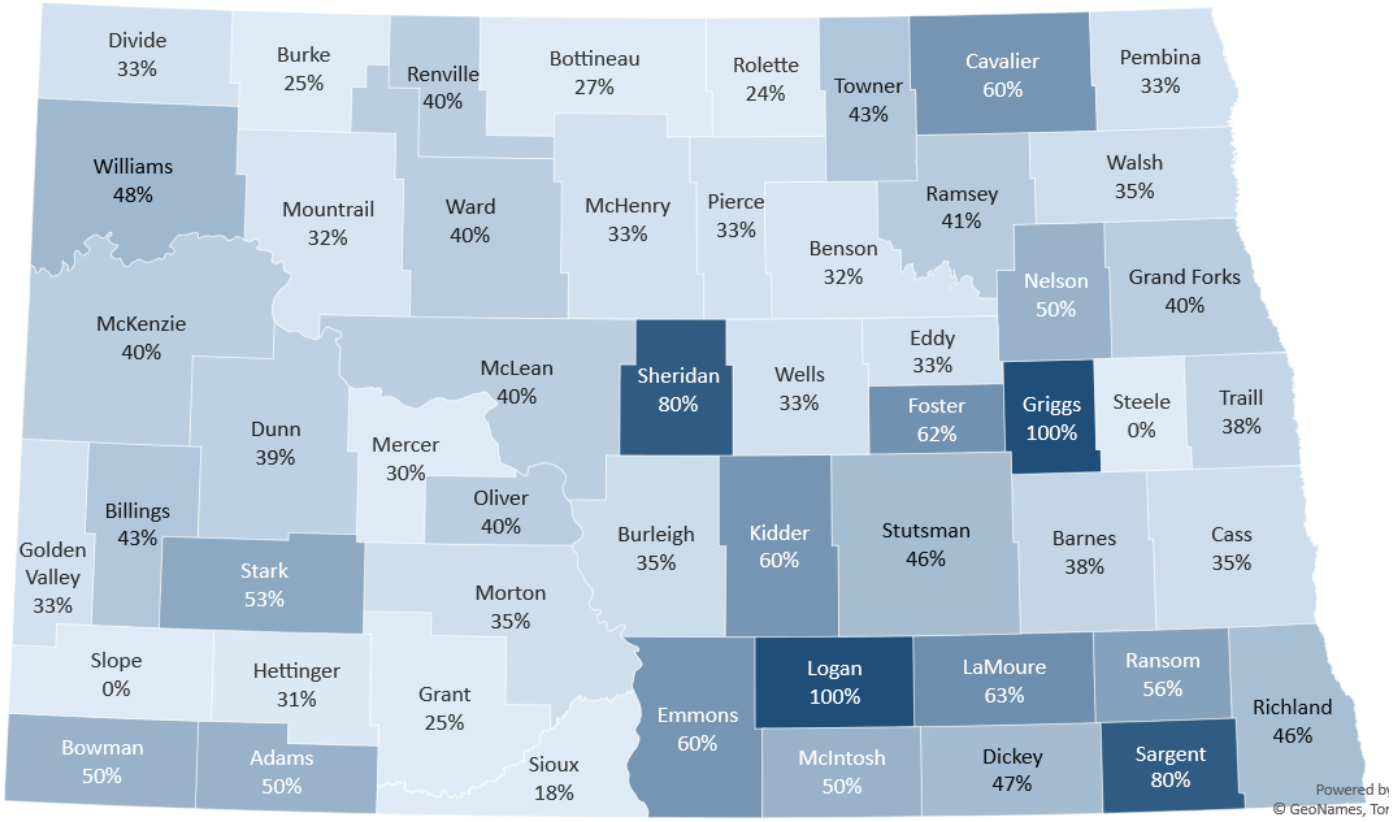
Scenario 3:
- Persistent lack of resolution to family level disruptions – inability to maintain earnings, actions that trigger eviction, worsening health



NORTH Dakota Be Legendary. | Health & Human Services

Intentional interventions can stop de-stabilizing events from taking hold

Scenario 1:
- Rent and utility assistance



Scenario 2:
- Rent and utility assistance
- Back rent/housing debt
- Re-housing assistance
- Mediation
- Peer support/care coord
- Support services (more likely to have a chronic health or disabling condition)

Scenario 3:
- Rent and utility assistance
- Benefit cliff mitigation (income strategy)
- Potential for some support services

39% OF THE HOUSEHOLDS WHO WERE EXPERIENCING HOMELESSNESS AT THE TIME THEY APPLIED FOR ND RENT HELP OBTAINED HOUSING

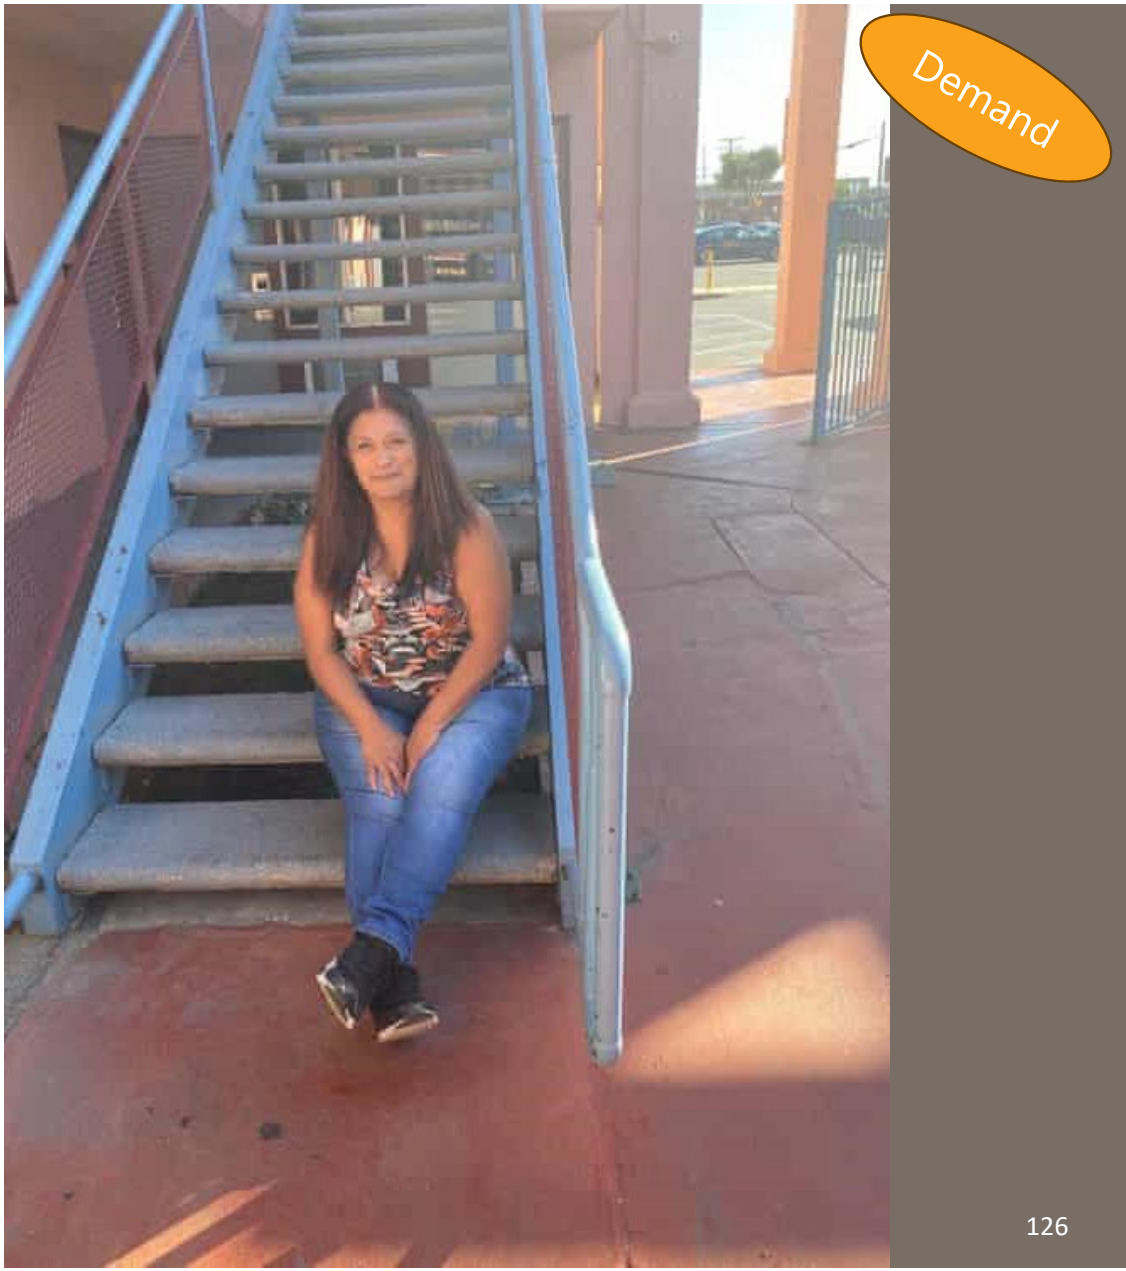
6,450
Individuals

Identify High Impact Inflection points for unique populations



- Layer in housing assistance for transition age youth
- Flex funds for housing as part of FFPSA prevention work
- Layer in housing assistance for svc coord / peer support programs (Comm Connect, FTR, 1915i)
- Re-conceptualize service-connected “room and board” as “housing” and “service” payments
- Explore project-based services vouchers as an element of PSH
- Get clear on housing options (and how we pay) in institutional and non-institutional settings

Connect people in Housing crisis to emergency response built on housing first

- Strengthen funding model for emergency shelter to address immediate need (quadrant D)
- Connect every person in shelter setting with coordinated Rapid Rehousing response
- Letter of Commitment to assure availability of rent and utilities for 3 months
- Housing facilitator to help identify/secure unit
- Peer support/care coordination through existing non-shelter initiatives
- Transition for emergency response to stabilization supports after 3 months housed (no change in address – just in services designed to support ongoing success)

NORTH DAKOTA housing FINANCE AGENCY

Adopt proactive Life Stage Strategies: Aging into older adulthood

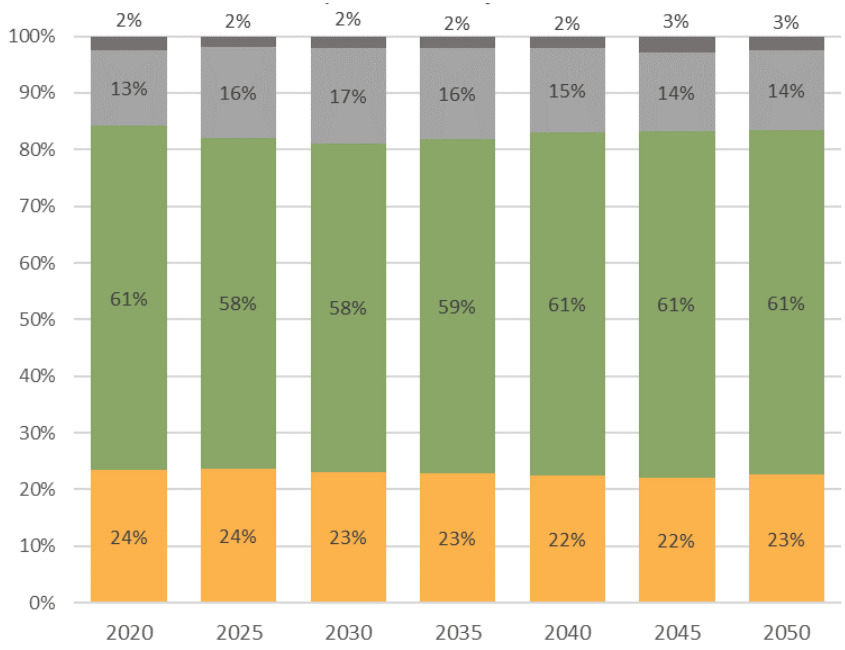
Transitions to "older adulthood" cohort will outweigh all else in the next 10 years.

Older Stay

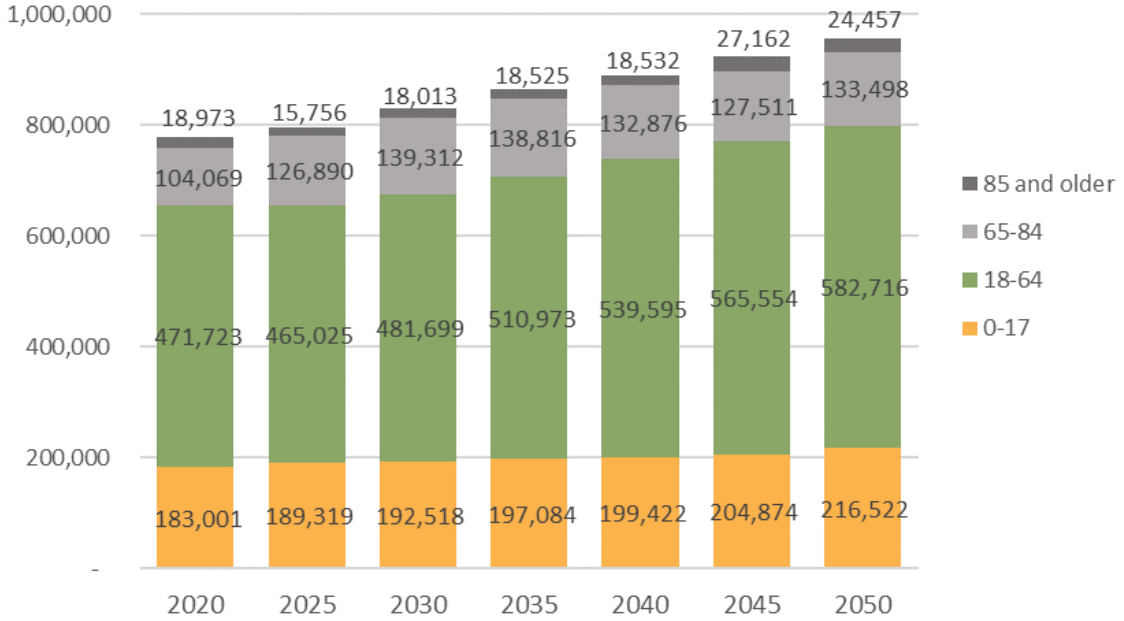
KEY

- Home mods to existing housing
- Maintains ability to stay in your chosen home community as housing needs change
- Preserves existing housing infrastructure
- Creates more affordable option for some future buyer

Older Sell



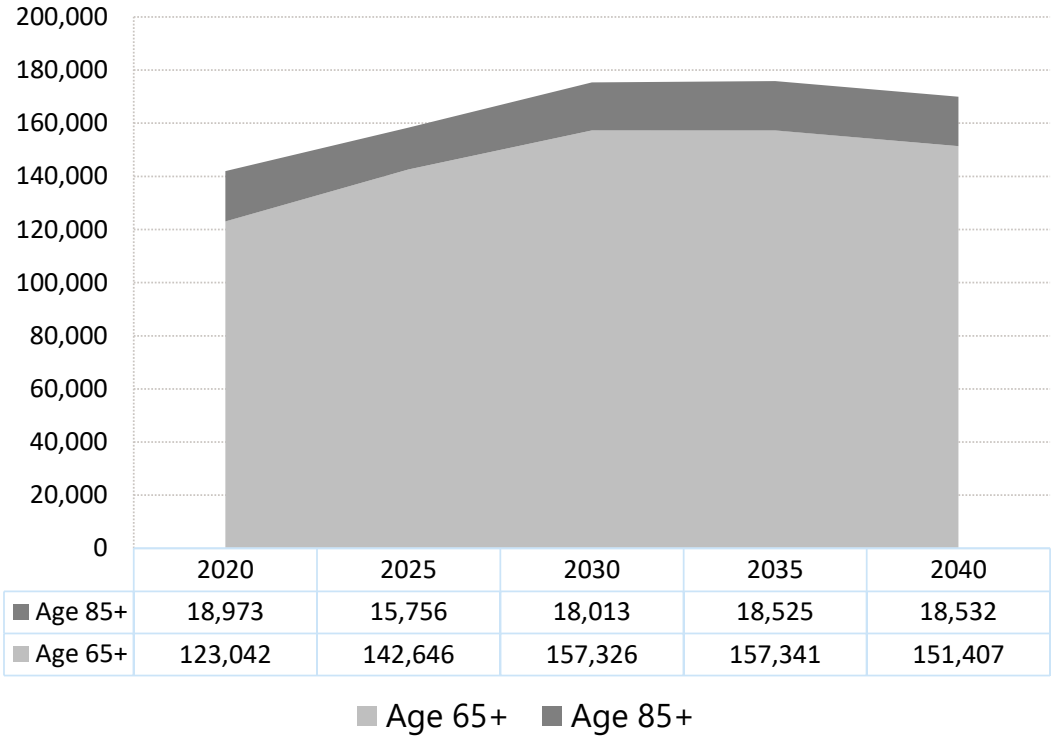
KEY



- Housing options with certain characteristics ("active adult" – not always service-enriched)
- Some change in location will occur
- Opens door for family formation/ younger buyers

NORTH DAKOTA DEMOGRAPHIC TRENDS WILL IMPACT HOUSING MARKETS

North Dakota Population Projections 2020-2050 | ND Department of Commerce State Data Center



Source: ND 2024 Population Projection | State Data Center

The age shifts from 2020-2030 translate to **24-26,000 fewer people** in the peak "workforce ages" of **18-64**

NORTH Dakota Be Legendary. | Health & Human Services

OLDER ADULTS AND ADULTS WITH PHYSICAL DISABILITIES MAKE UP A GROWING PERCENTAGE OF ND'S POPULATION

	2020	2025	2030	2035	2040
Age 85+	18,973	15,756	18,013	18,525	18,532
Age 65+	123,042	142,646	157,326	157,341	151,407

Source: 2024 ND State Data Center Population Projections

The population age 65+ is expected to experience the **largest period of growth between now and 2035**

- People age 65+ represent 18-19% of ND population
- **Age 85+** consistently represents approx. 15% of total pop age 65+ but the **number of people** in that age group will **grow by 3,000** between now and **2035**

7 in 10

Americans 65+ will need LTC services for an average of 5 years

Adopt proactive Life Stage Strategies: Aging into Prime LFP/Family Formation

To reverse expected loss of ages 25-44 adopt housing policies geared to be attractive to this stage of life.

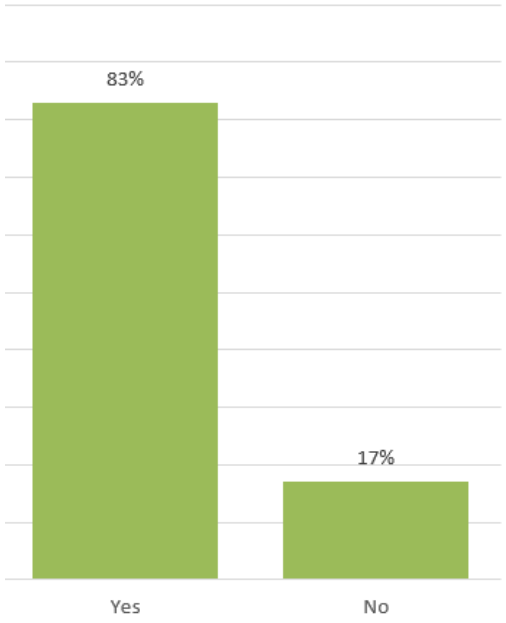
KEY

Housing that can offer expected characteristics

- Home / work spaces – flexible room layouts
- Access to outdoor rec/leisure (both public and private spaces)
- Kitchens and Baths
- Color schemes and materials
- Smart home features / wifi ready

KEY

Housing costs that align to available income



- First time buyer incentives
- Child care assistance for working parents
- Wealth-building strategies
- Community culture of home improvement

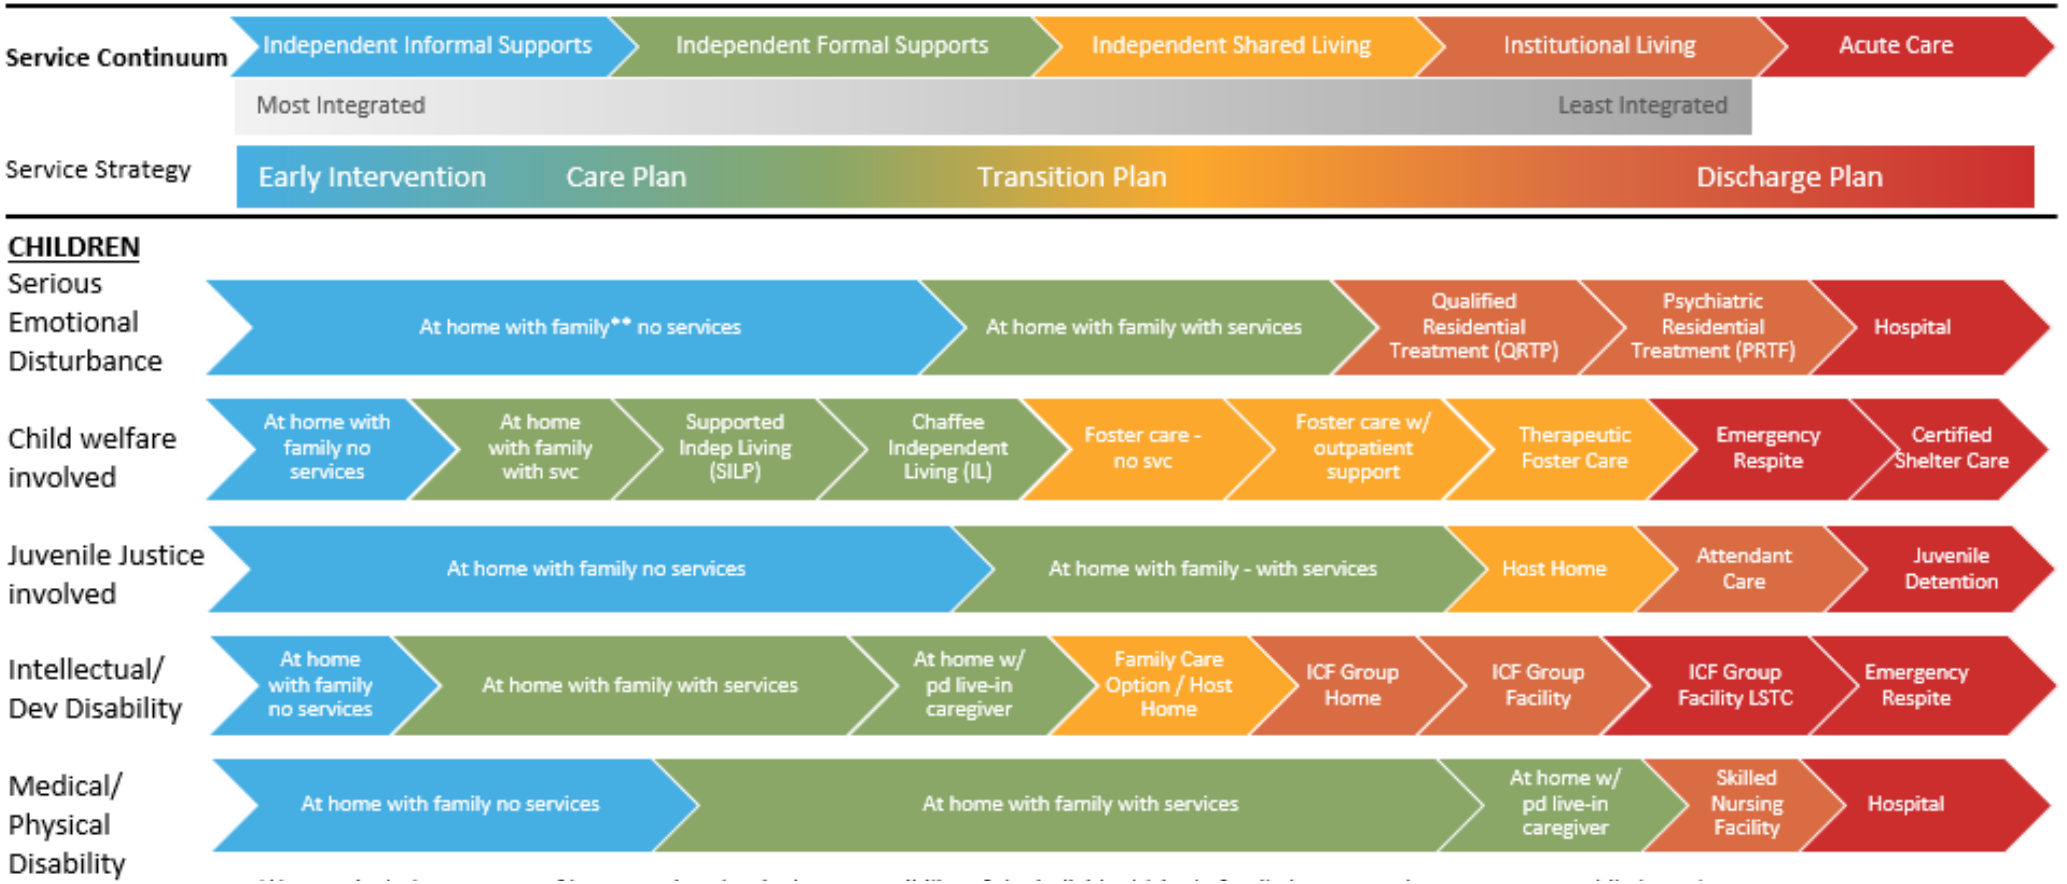
2 Filling gaps in the system of care can prevent crisis

- Evolving safety net for targeted needs
- Preventing justice system involvement / re-involvement
- Complexity of co-occurring factors
- Transition & diversion across housing-service continuum
- Addressing both root causes and immediate symptoms

The Housing-Service Continuum - Adults

A key concept defined



**Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)*

***Family = includes birth family, kin-caregiver, adopted family*

****ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)*

The Housing-Service Continuum - Children

A key concept defined

**Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)*

***Family = includes birth family, kin-caregiver, adopted family*

****ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)*

Connecting what we see and what we need to do

Community-Based Service

Expand outpatient and community-based services; Grow evidence-based service options

Prevention

Invest in prevention and early intervention, including attention to economic wellbeing of families

Access

Ensure all children and families have timely access to Behavioral Health svc; Expand quality child care; Connect housing and employment

Integration

Enhance and streamline system of care for children and youth; Align assessment and eligibility practices; Embrace quality frameworks and tools to measure impact

Executive Budget Request

Housing Initiative | Eviction prevention and Housing stabilization ($14.5 million)

WHAT?

- ✓ Eviction prevention - $3.5 million **
- ✓ Targeted rent assistance for people at highest risk of housing instability - $10 million **
- ✓ Home Renovation incentives to address accessibility modifications - $1 million **

*** - Designated as one-time funding / SIIF*

Housing is…

- The largest item in most household budgets (unless you have small children – then it's likely child care)
- A top barrier to transition from institution to community
- A risk factor in child neglect and a barrier to successful family reunification
- A challenge for successful transition from prison to community and a risk factor for criminal recidivism

WHY?

Strategically targeting interventions that address household budget gaps can prevent the spread of crisis and instability.

"HHS announces new benefit aimed at addressing child care workforce challenges"

"Media invited to launch of innovative project increasing child care availability for parents working non-traditional hours"

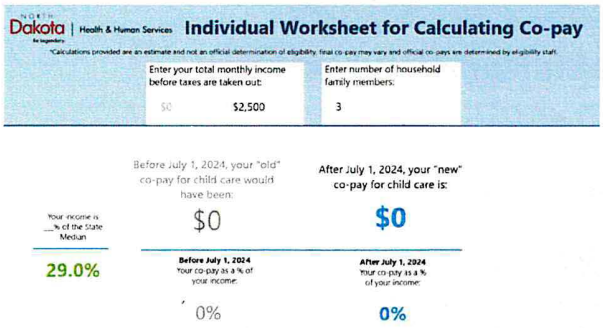
"HHS continues to roll out enhancements to the state's child care assistance program, benefiting both parents and child care providers"

"HHS unveils Toolkit for Employers to streamline resources to support working parents"

(The Bismarck Tribune)

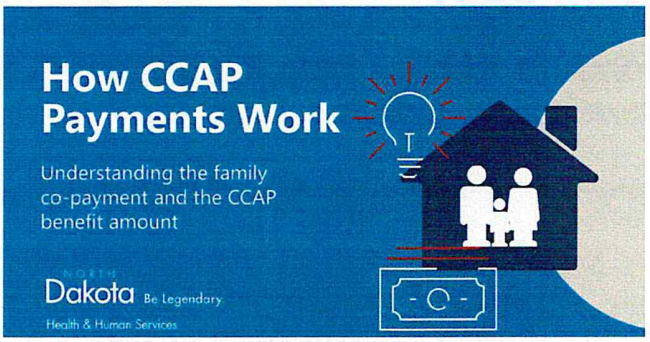
Child care expenses can be one of many factors that influence a person's decision to seek employment or stay in their current job. As a result, a labor shortage is making it difficult for some North Dakota employers to recruit and retain valuable employees.

To help solve this conundrum, NDHHS has launched the North Dakota Employer Toolkit to help businesses find financial assistance that can help cover some of the costs of childcare for their lower-income employees. (KX News)



Expanding reach to more parents through existing HHS communications channels

- Included Child Care Assistance Program information in the Medicaid Member newsletter which was mailed to more than **45,000 members.**
- Provide **quarterly updates** to 2,341 subscribers of Child Care Connections e-newsletter.
- Included Child Care Assistance Program information to 1,000 subscribers of the March Medicaid e-newsletter.



Solid Web presence (Jan. 1-Dec. 31, 2024)
CCAP families page: **112,801 visits**
CCAP providers page: **27,372 visits**
Consistently within the top 10 HHS webpages viewed.

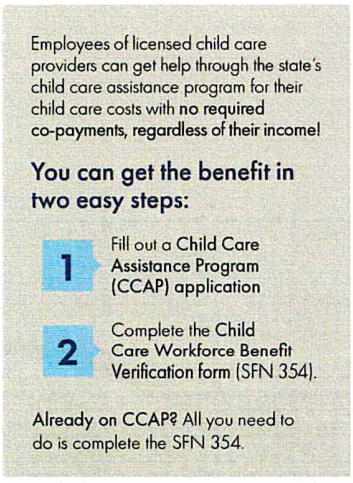
Online tools to help families understand child care assistance payments and process

Easy-to-use calculator helps families know what their co-pay will be

Video explaining how payments work

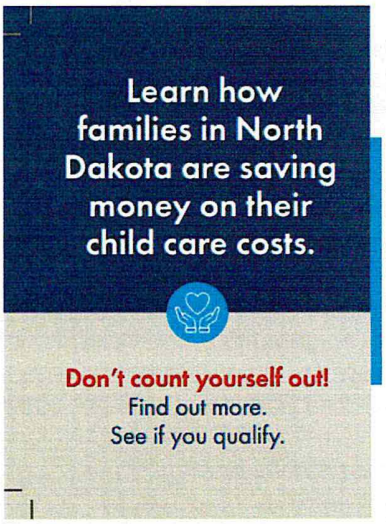
Print materials to directly deliver the message

Promotional material bundles were sent to all child care providers in North Dakota including:



- General Child Care Assistance Program awareness flyers and postcards for providers to share with their families
- Child Care Workforce Benefit flyers and postcards for providers to share with current and future employees

Digital copies of promotional materials are available on the Child Care Assistance Program provider webpage.



In addition, Child Care Assistance Program brochures are provided for all local human service zones.

Workforce outreach

North Dakota Toolkit for Supporting Working Parents launch and partnership efforts to create awareness included:

- Consulted with the Greater North Dakota Chamber to gather insight on how to best deliver the content within the toolkit.
- Met with North Dakota Department of Commerce and Job Service North Dakota to discuss ways that each agency could utilize the toolkit with their partners and audience. Based on the conversations, created materials tailored for each agency based on their delivery methods. For example, created a TV slide for Job Service to use at its local offices.
- Created a library on North Dakota's Asset Bank for partners to share toolkit promotional materials.

11:43 a.m. Donna Byzewski, Program Director, Corporate Guardianship Division/Intellectual Disabilities, Catholic Charities North Dakota, testified in favor #34678.

11:50 a.m. Tom Newberger, Executive Director for Red River Human Services Foundation in Fargo, West Fargo and Wahpeton, North Dakota testified in favor #35396.

11:57 a.m. Tom Newberger, Executive Director for Red River Human Services Foundation in Fargo, West Fargo and Wahpeton, North Dakota testified and continued with additional testimony in favor #35395.

Additional written testimony:
#34588, #34724, #33230,#33460, #33492, #34094, #34442, #34600, #34605, #34608 #34657, #34664, #34689, #33304, #34738, #34742, #34761, #34784, #34793, #34820, #34821, #34827, #34847, #34963, #34965, #35097, #35196, #35197, #34864, #34955, #35040, #35095, #35117, #34929, #35181.

12:05 p.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

Chairman Nelson and Members of the Committee,

My name is Aaron Hall, of Grand Forks. My business partner is Troy Fisher of Devils Lake. We represent All of Us In Recovery a state wide provider for Community Connect and Free Through Recovery programs for Peer Support and Care Coordination. We are in support of HB1012 and their budget expansions for Free Through Recovery and Community Connect.

Previously Troy and I have decades of serving this population in the Human Service field in rural regions. These two programs are a revolutionary bridge to existing services for any participants in rural regions of the state where recovery and mental health services are almost nonexistent. Both of these programs uniquely offer flexibility to remove barriers to the participants by meeting them at their problems and offering solutions.

We have seen the correlation between community-based resource funding caps and upticks in jail population. From our viewpoint, it is clear that every dollar spent on flexible community-based programs like Free Through Recovery and Community Connect lead to direct reductions in rural jails, law enforcement centers, and the State Penitentiary. Furthermore, these programs are cornerstone resources in rural areas where otherwise no other resources exist.

Conversely, when these programs are capped or underfunded, it is the rural regions like Rugby, Harvey, Northwood, Cooperstown, Carrington, Newtown, Hazen, Watford City etc who hurt the most – as they are often devoid of other options, unlike metro areas.

For these reasons, Troy and I support Free Through Recovery and Community Connect budget expansions.

Aaron Hall

Re: Support of HB 1012
From: Amy Anderson

I live in Valley City where the **Open Door Center** serves about 90 individuals with Developmental Disabilities. Out of 180 employees, about 160 are Direct Support Professionals.

I am very familiar with the work DSP do as my 71 year old sister is Developmentally Disabled and lives in an ODC group home. There are 5 clients living in that group home and she is the only verbal client and one of 2 that is ambulatory. The other 3 are in wheelchairs, which makes staffing this group home a challenge. There are normally 3-4 staff on during the day when they are not at day activity plus there is always a need for overnight wake staff. Keeping staff is hard because of the following challenges: some are on feeding tubes; a risk of medication errors due to the number of meds administered throughout the day; transporting in wheelchairs is time consuming when going out during the day and to social functions within the community, and working on holidays and weekends.

I ask that you support a 4% pay raise for DSP. They have to go above and beyond in their work to care for those who cannot care for themselves. Without good pay it is almost impossible to find people willing to work these jobs. Please thoughtfully consider what it means to help those who cannot do for themselves.

Sincerely,
Amy Anderson
315 14 St NE
Valley City, ND 58072
701.840.8468

As parents of a daughter with Down Syndrome who utilizes services provided by the Open Door Center in Valley City, we implore you to increase the state funding in House Bill 1012. We are in strong support of agencies requesting 4% and 3% increases which correlate with federal inflation rates over the last two years.

The Open Door Center in Valley City has been critical in ensuring our daughter leads a purposeful, happy, healthy, and safe life. She is an active member of her community working at a pre-school and local restaurant. She volunteers at Sheyenne Valley Friends of Animals and the ARC thrift store. She participates in Special Olympics, the local wellness center and dance studio. This is only possible because of the dedicated staff at the Open Door Center. It is becoming more difficult to recruit and retain staff due to competing wages in other local businesses. In order to be competitive, they need these increases to continue to provide essential services to our daughter and others in their care. The staff at the Open Door Center helps our daughter live fully with as much independence as possible. Without these increases, potentially her current quality of life could be negatively impacted.

Budgets should not be balanced on the backs of the disability community. We encourage you to approve these inflationary increases so we can continue to move forward in protecting and ensuring a good quality of life for our most vulnerable citizens.

Thank you for your time and consideration, Andre and Marla DeLorme

House Appropriations Committee,

Samuel L. Ihry is my son. He is a client of the Open Door Center in Valley City. Sam has been a resident of the ODC for 15 years. Sam is 27 years old. Sam is non-verbal, not toilet trained, and eats a pureed diet. The ODC has been a blessing to him and to our family. Why??...THE STAFF.

The staff, and I quote one, Crystal, "I love my guys and spending my days with them". She could easily make more money and do less work if she went to McDonald's. However, she chose to apply and work at the ODC. The staff- Direct Support Professionals, of the Open Door Center consists of 165 men and women. Without the support and employment of Direct Support Professionals, 7,000 people of our most vulnerable population in our state could not receive the services and support that they require. The support of daily living, work placement, and most importantly being able to live independently and happily.

Direct Support Professionals work overnights, days and weekends. They are not drawing a large wage. They do it because they truly love their clients, my son, and the other individuals. Sam prays with Nicole and cooks with Michelle. Beka takes him to UND football games. Of Sam's core Direct Support Professionals, 4 of them have been with him all 15 years. These employees love their positions. Compensating them is the right thing to do. Direct Support Professionals have names and they have families. Please consider this when you discuss HB 1012. We need to retain quality staff for clients, my son, Sam.

Your support of a 4% inflationary increase is imperative. State employees may receive a 3% increase and many of them are not leaving the comfort of their kitchen to do their job. Please consider the hours and what fills the hours of Direct Support Professionals when you discuss HB 1012.

Thank you for your time and your support of the special needs community of North Dakota.

Dawn D. Ihry

GRAND FORKS COUNTY
HEART OF THE RED RIVER VALLEY

Office of the State's Attorney

January 30, 2025

Rep. Jon Nelson, Chairman
North Dakota Legislature
House Appropriations Committee/Human Resources Division
600 East Boulevard Avenue
Bismarck, ND 58505

Dear Chairman Nelson and Members of the House Appropriations/HR Division,

As state's attorney for Grand Forks County, I have worked with the Community Violence Intervention Center's (CVIC's) crime victim witness team for several years. This team provides advocacy and emotional support to victims of crime. Our relationship has enabled us to serve a growing need for crime victims in Grand Forks County, which reached record nearly 1,500 individuals in 2024. Of the 1,499 victims served, roughly one-third of them are domestic & sexual assault survivors. CVIC's victim witness specialists attended 1,853 court hearings with or on behalf of crime victims and arranged and attended 339 meetings between crime victims and prosecutors.

We've also appreciated CVIC's support of domestic violence court and violence intervention in its work with those who use violence. In 2024, CVIC served 164 men and women through New Choices, domestic violence intervention programming, which addresses offenders' use of violence and holds them accountable for causing harm to others. Collectively, these participants are parents of more than 300 children. In addition, 92 participants were also ordered into Domestic Violence Court, the specialized post-sentencing review court that works to hold individuals accountable, monitor sentencing progress, and encourage successful completion. The New Choices partner contact reached out to 125 partners of New Choices participants to keep them informed of the participant's status and provide information about CVIC services. Of the partners contacted, 54 received CVIC advocacy services.

Please consider additional state resources to enable CVIC to continue supporting this important work on behalf of both victims and those who use violence.

Sincerely,

Haley Wamstad

Haley Wamstad
Grand Forks County State's Attorney

Chairman Nelson and Members of the Committee,

I am writing in support of HB 1012 and to share my experience with the ND Recovery Housing Assistance Program, which has had a profound impact on my life. Recovery housing has provided me with a stable and supportive environment, which has been crucial in my sobriety journey.

Living in a recovery house has given me access to a community of individuals who are also committed to their recovery. This sense of community has been incredibly beneficial and offers me the emotional support I need. The structured environment has helped me establish a routine, which has been essential in maintaining my focus and commitment to my recovery goals.

My goals in recovery have been focused on rebuilding my life and relationships. I aim to see my son on a regular basis, which motivates me to stay committed. Meeting with my sponsor once a week and completing the 12 steps are crucial in my recovery. I also make it a priority to attend support groups five days a week to stay connected and accountable. Additionally, I am dedicated to meeting sober friends and finding a healthier lifestyle to ensure long-term success in my recovery.

Honestly, I don't know where I would be today if I didn't have this opportunity that helped me change my life, be a better person, and be the best mom I can be. Thanks to the Recovery Housing Assistance Program and my sober living house I have 11 months of sobriety, a stable job, and a new outlook on life.

In conclusion, the 12 weeks of recovery housing has played a pivotal role in my recovery process, in helping get on my feet without the stress of additional financial burdens. It has not only provided me with a safe and supportive living environment but also fostered a sense of community and personal growth and changed my life. I am truly grateful for the opportunities and support that recovery housing has offered me.

Thank you for taking the time to read my letter.

Sincerely,

Kandace P

Chairman Nelson and Members of the Committee,

My name is Mark R. Carlson, I was born in Bismarck and now call Arnegard home. I love North Dakota, it is all I know and all I want to know, I was born here and I will die here. I am extremely proud of my home state!

I am writing you today in reference to HB 1012 for the SUD Voucher Program and the Recovery Housing Assistance Program. Thanks to these two programs I have a life today, they literally saved my life.

Please let me explain why I say saved. After being clean and sober for 17 years in January 2020 I relapsed on methamphetamine. A series of events led to this event, but ultimately the poor choice was made by me. I am no victim here; I am the creator of my problems. On June 20, 2023 I was arrested for drugs in my home in Bismarck and by that time I was a full blown drug addict. Looking back at all of this I like to use the statement I was saved, not arrested on that day. By the time law enforcement came through my door I was all but gone. I went from 240 pounds to 123. I had gone from the position of President of Operations overseeing five Little Caesars stores to unemployed. I crashed my truck, I lost my family, and I had no self-worth or self-respect. The only thing I had left at that point was my apartment, because I had managed the building for 18 years and the owner loved me, and I believe he thought I would beat my addictions. That is not true I would have died in my addiction if not for Law Enforcement and what happened next. After going to jail the court felt I was a good candidate for drug treatment and on October 17, 2023 I was taken to Providence House in Arnegard. When I arrived, I was 100% broken physically and mentally I was a wreck! I was granted this by two things, the ND SUD Voucher and God! I was not going to waste the chance to get better. And that's exactly what I did. I worked very hard in residential treatment, and I utilized all that was offered to me from Providence House. Slowly but surely my health got better, my brain got better, and I started to excel in my recovery. After one month of treatment I had a goal. My goal was to live my life drug free and to give back to the program that saved my life. The only problem is I still had a long, long way to go!

I wanted to go to Endeavor Sober Living to continue on this journey and complete what I had started. And once again North Dakota stepped in and saved me. I received funding through RHAP for 12 weeks of housing in a recovery house. These 12 weeks were the weeks that could have broke me, instead, they made me! In this time was able to focus on my recovery, I completed a day treatment program, and I got a job at a local gas station. Without the 12 weeks grace period I was given I truly believe I would have given up my recovery, at a minimum I would have faced far more difficult struggles during this time.

I hope now you see why I feel like without these two programs I could still be incarcerated and stuck in my meth addiction. Thank you for supporting these programs that saved my life and the lives of many others just like me in our state!

I am happy to report on where I am today. I have 477 days of sobriety. I still live at Endeavor Sober Living and have been promoted to assistant house manager. I help others in the program establish structure and accountability in their day to day lives and get to offer support for others just like me. I was offered a support staff position at Providence House and now I am able to give back to newcomers that come into this program daily. Also, what a journey from a hopeless meth addict to a person that helps people find there hope!

I owe my life to the programs and those that make them happen from the teams at Endeavor Sober Living and Providence House to the behavioral health team that work hard to ensure these programs are accessible and continued for those to come after me. It is almost impossible for me to express my gratitude in words so I try to show it in actions.

If any members of this committee would like to talk to me for additional information on how these programs saved me, I can be reached at (701) 934-7662. I am always willing to make a trip to Bismarck for a face to face meeting as well, I can sneak in time with my kids and family there at the same time! I love you all, thank you for making this possible and saving my life. I now have a life worth living! I will do anything to make sure these programs continue to help others just like me that are all worth saving too!

Sincerely,

Mark R. Carlson

House Bill 1012 Testimony

Amorelle Upton
Former Client, Rape & Abuse Crisis Center, Fargo
Alumnae of Alpha Chi Omega (domestic violence philanthropy focus), UND Campus
Partner/volunteer, Community Violence Intervention Center, Grand Forks

Hello everyone! My name is Amorelle Upton, and I want to start by saying that I am so lucky to be sharing my testimony with you today. I am now a voice for those who don't have one; because I was once that person.

Growing up in Fargo North Dakota with a loving family and a great group of friends was pretty fantastic. I was involved in a variety of activities including dance, swimming, gymnastics, tennis, church, and any new activity I could try. I was involved in clubs and held a multitude of leadership positions that contributed to an otherwise excellent high school experience. All told, my life was exactly what any 16-year-old could want. Unfortunately, a lot of this quickly changed five years ago. Without even knowing it was happening, I found myself in an abusive relationship during my junior year of high school. This is something that I never thought could happen and at first, I was convinced it wasn't happening.

Everything started out seemingly perfect; a relationship that I thought would be forever. In the beginning, signs of love and affection overflowed. I was bombarded with gifts, kindness, and appreciation. However, within weeks of him relocating to another state and without me even realizing it, I slowly began losing myself. I knew deep down I wasn't myself. Some of his demands seemed excessive and unreasonable, but I was doing this for someone I loved, so maybe it was OK.

The first signs seemed subtle. One day, when I was checking my Instagram and Snapchat, I noticed several of my friends missing from my feed. After looking into it a bit more, I discovered that he had blocked several of my friends. At first, I thought it was a protective gesture and didn't give it much thought. However, before I knew it my entire contact list had been wiped out.... family, friends, coaches, mentors, anyone who had meaning in my life. I complied to keep him happy. Afterall, he said he loved me. Brainwashed without even realizing it, I figured that would be the extent of his demands, but sadly, this was just the beginning.

Before I knew it, he was telling me to delete every single picture in my camera roll, my snapchat memories, and even the pictures on Instagram with other people. In his mind, if I really loved him, all I needed was his love, his pictures, his connections. His actions were designed to segregate me from my support system, people I loved and trusted. I knew this was sideways, but if this was all he needed to feel good about our relationship, what could it hurt to comply? The conflicting emotions of the situation were scary and confusing. None of this felt normal either, but maybe this was my new normal. Maybe I really DID only need him. I later learned that was manipulation talking, which I fell for over and over.
What came next stays on my mind to this very day. He demanded that I quit activities and sports. It started with swimming and then gymnastics. Unlike swimming, I loved gymnastics. I was making such great progress within the sport, being elected captain and a leader of my team. As much as I loved the sport, I would rationalize why it was all right to quit. After all, I wasn't planning to pursue the sport after high school.

I felt guilty for letting down my team, but in the back of my mind, it didn't matter because he was all I needed. I wish I had realized earlier how much I let myself down, too. Something that was my passion was lost in an instant. I remember one of my teammates, and best friends expressed to her mom that she was really concerned about me. She felt like something wasn't right. Her mom then reached out to my mom which is when my parents found out that something really was off. At first, I was really angry with my friend. Why would she tell my parents and ruin my so-called "happiness." What I didn't realize at the time is that she probably saved my life, and I'm forever grateful for her genuine concern.

You would not have recognized me back then. As I think about the months in that relationship, I don't either. Far from the person I am today, I don't recognize that girl or the lengths she went to keep peace, follow his rules, and avoid further fear. I wasn't showering, brushing my hair, or putting any effort into an everyday routine. I followed his dress code to a tee – literally – one specific pair of baggy, Under Armour joggers, rotating between two, extra-large shirts.

I was told I wouldn't enjoy the outcome if I were to not follow his rules. The threats became more and more frequent. He was managing my every move. He was miles away and yet constantly in my space. Every minute of every day was directed. I felt suffocated, even walking to class. He also forbid me to talk to anyone, including friends, peers, and even teachers. When I walked to class throughout the day, he required me to Facetime. When I didn't, he would yell and berate me. I remember one specific day on Facetime when I smiled at someone passing by. I immediately heard screaming coming from my phone and instantly regretted even smiling. The control became obsessive and constant.

Alongside my self-esteem, my grades and school performance suffered, too. Once a thriving 4.0 student, my grades plummeted to a 2.1 grade point average. This was far from the stellar track record I was so proud of and nothing I could have ever imagined. More and more people in my life started raising concerns. Consumed by his control, I shared my family's concerns with him. After that, segregating me from my friends was not enough. He wanted division and distance between me and my parents, too. He told me I needed to leave my parent's house and stay with my grandparents. He convinced me to make up a story and tell counselors at school that I didn't feel safe at home. This resulted in my parents being brought to the school and my whole life flipping upside down. I stayed at my grandparents for two weeks and that's when the results of the abuse began to surface, and I realized that something really wasn't right. I wasn't even talking to my parents or sister, all of whom loved me and just wanted the real me back.

The turning point was when I didn't even go home for Thanksgiving. I had never missed this family holiday. That's when I knew I needed to tell someone and get help… but who? All of my contacts were deleted. I no longer had a phone because it was with my parents, and the only form of communication I had with him was a shared google doc on my school computer. Out of some miracle, I remembered one of my teammates' phone numbers. In tears and distraught, I told her everything. I told her I didn't have the courage to end the relationship because I feared what he would do. She ended the relationship for me and in that moment, I felt pounds of weight lifted off my shoulders. I was terrified, I was nervous, I was hopeless, but I knew I needed to be done.

My school quickly introduced me to a counselor from the Rape and Abuse Crisis Center in Fargo. I was grateful for the support, but the healing process was slow. It was hard to face the severity of what had transpired so quickly and as glad as I was to be out of the relationship, I didn't want him to get in trouble. The Sunday after the relationship ended, I went to church for the first time in

eight months. As faith would have it, the lesson was on healing from toxicity and abuse. The pastor asked anyone who needed a healing hand to stand. I stood up and my dad stood up with me as tears started rolling down my face. In this moment, I knew I was ready to begin my healing process and reshape the fear that had become a daily experience.

When I had the courage, I shared my story on Facebook and Instagram. Several people came forward with similar experiences and asked me for help and advice. This is when I knew that the pain that I went through could be used to share hope for other survivors.
In addition to sharing my experience and leading others to abuse resources, I wanted to personally contribute. The following summer, I began fundraising for the Rape and Abuse Crisis Center, so that others could benefit from their free, confidential services. My senior year of high school, I joined Philanthropy and Youth where I had the opportunity to become a leader of the club and chose the topic of domestic violence nonprofits. I then started a mental health club at my school where the goal was to eliminate the stigma surrounding mental health disorders and focused on suicide prevention.
Once at UND, I went through the sorority recruitment process. I found a home away from home in Alpha Chi Omega, another organization who shared my passion for domestic violence awareness, its national philanthropy. The experience led me to an incredible group of women and enabled me to continue investing in a purpose and partnership with CVIC.

Without organizations like Alpha Chi Omega and CVIC, so many stories would go untold, and so many victims would feel stuck, like I was. When I think about the way my 16-year-old life transitioned from such a scary, confusing place to a community that welcomed me with open arms, I hardly recognize who I was. With meaningful prevention and intervention programs, healing can happen; lives can change. Thanks to organizations like Rape and Abuse Crisis Center, mine did.

Reflecting back five years ago, I truly wish that myself and those around me had been more educated on the topic of domestic violence. Although the resources were available to me after I had gotten out of the relationship and I am forever grateful for that, I often wonder if the circumstances would have been different if I were more educated. Would I have recognized the signs sooner? Would my peers in school avoid asking me “why didn’t you leave sooner?” or not have their first thought be to tell me “You’re being dramatic and quit talking about it.” I believe that the education now available through CVIC to all ages in our community could create a great impact on the upcoming generations.

If I would have told 16-year-old me, who thought her world was ending, that she’d be in doctorate program and surrounded by people each and every day that love and care about her, she wouldn’t have believed it. So, if you take one thing away from what I’ve stated today, I want you to know that it’s okay not to be okay. It’s okay to seek help, and it’s okay to feel lost. But it does get better even when it seems impossible. Opportunities are out there waiting for you, even if you feel hopeless. Lastly, help those around you and don’t be afraid to speak up, because you never know when it can save someone’s life. Thank you.

Sixty-ninth
Legislative Assembly
of North Dakota

HOUSE BILL NO. 1012

Introduced by

Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from other funds derived from special funds and federal funds, to the department of health and human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2025, and ending June 30, 2027, as follows:

Subdivision 1.

BUSINESS OPERATIONS

	Base Level	Adjustments or Enhancements	Appropriation
Salaries and wages	$25,763,358	$0	$25,763,358
Operating expenses	155,308,399	0	155,308,399
Capital assets	108,934	0	108,934
Grants	11,812,627	0	11,812,627
Total all funds	192,993,318	0	192,993,318
Less other funds	118,894,310	0	118,894,310
Total general fund	$74,099,008	$0	$74,099,008

Subdivision 2.

BEHAVIORAL HEALTH

	Base Level	Adjustments or Enhancements	Appropriation
Salaries and wages	$8,792,675	$0	$8,792,675
Operating expenses	79,381,458	0	79,381,458
Grants	40,476,298	0	40,476,298
Behavioral health clinics	196,383,945	0	196,383,945

Total general fund	$47,756,180	$0	$47,756,180

TOTAL - SECTION 1

	Base Level	Adjustments or Enhancements	Appropriation
Grand total all funds	$5,553,157,547	$0	$5,553,157,547
Grand total other funds	3,541,730,000	0	3,541,730,000
Grand total general fund	$2,011,427,547	$0	$2,011,427,547
Full-time equivalent positions	2,483.83	0.00	2,483.83

SECTION 2. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, 3, 4, and 5 of section 1 of this Act for the biennium beginning July 1, 2025, and ending June 30, 2027, as

requested by the department of health and human services. The department of health and human services shall notify the legislative council of any transfer made pursuant to this section. The department shall report to the budget section after June 30, 2026, any transfer made in excess of $50,000 and to the appropriations committees of the seventieth legislative assembly regarding any transfers made pursuant to this section.

SECTION 3. OTHER FUNDS - INSURANCE TAX DISTRIBUTION FUND. The other funds line item in subdivision 5 of section 1 of this Act includes the sum of $1,125,000 from the insurance tax distribution fund for rural emergency medical services grants.

SECTION 4. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND. The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $1,867,500 from the community health trust fund for the 988 crisis hotline program and subdivision 5 of section 1 of this Act includes the sum of $27,072,324 from the community health trust fund for the following programs:

Behavioral risk factor survey	$200,000
Behavioral health loan repayment	234,500
Domestic violence offender treatment	1,000,000
Domestic violence prevention	1,000,000
Women's way	329,500
Dentist's loan repayment	360,000
Local public health state aid	3,275,000
Rural emergency medical and ambulance services grants	7,000,000
Cancer programs	580,324
Forensic examiner contract	1,000,000
Tobacco cessation grants	500,000
Youth vaping prevention grants	300,000
Tobacco prevention and control	5,043,000
Tobacco prevention and control grants to local public health units	6,250,000
Total community health trust fund	$27,072,324

SECTION 5. OTHER FUNDS - HUMAN SERVICE FINANCE FUND. The other funds line item in subdivision 3 of section 1 of this Act includes the sum of $226,950,000 from the human service finance fund for state-paid economic assistance and social and human services.

SECTION 6. OTHER FUNDS - HEALTH CARE TRUST FUND. The other funds line item in subdivision 4 of section 1 of this Act includes the sum of $500,000 from the health care trust fund for basic care facility bad debt expense.

SECTION 7. OTHER FUNDS - CHARITABLE GAMING OPERATING FUND. The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $500,000 from the charitable gaming operating fund for costs of gambling disorder prevention services.

SECTION 8. OTHER FUNDS - OPIOID SETTLEMENT FUND. The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $8,000,000 from the opioid settlement fund for opioid remediation and abatement efforts.

HOUSE APPROPRIATIONS COMMITTEE
REPRESENTATIVE JON NELSON, CHAIR
FEBRUARY 3, 2025

NORTH DAKOTA DEPARTMENT OF CORRECTIONS AND REHABILITATION
LISA BJERGAARD, DIRECTOR, DIVISION OF JUVENILE SERVICES
PRESENTING TESTIMONY IN SUPPORT OF HOUSE BILL 1012

Chairman Nelson and members of the Appropriations Committee, my name is Lisa Bjergaard, and I am the Director of the Division of Juvenile Services (DJS) for the North Dakota Department of Corrections and Rehabilitation. I am here to testify in support of House Bill 1012, and more specifically, support for the ongoing Title IV-E match dollars that allow community-based services to grow.

The DJS has enjoyed a long and productive relationship with the Child and Family Services Division (CFS) of the North Dakota Health and Human Services Department. Most recently, DJS has partnered with CFS to deliver an in-home based family intervention, Brief Strategic Family Therapy.

Brief Strategic Family Therapy® (BSFT®):

Brief Strategic Family Therapy® (BSFT®), an evidenced-based, family-focused intervention that treats the family system as a whole and is designed to:

- Prevent, reduce, and/or treat youth behavior problems.
- Improve family functioning, including effective parental leadership and involvement with the youth (Improve youth's behavior by improving family relationships).

The BSFT® Program targets children and adolescents between the ages of 6 and 17 who are displaying or are at risk for developing behavior problems, including substance abuse, conduct problems and delinquency. The BSFT® Program has been implemented as a prevention, early intervention and intervention strategy for delinquent and substance-abusing adolescents.

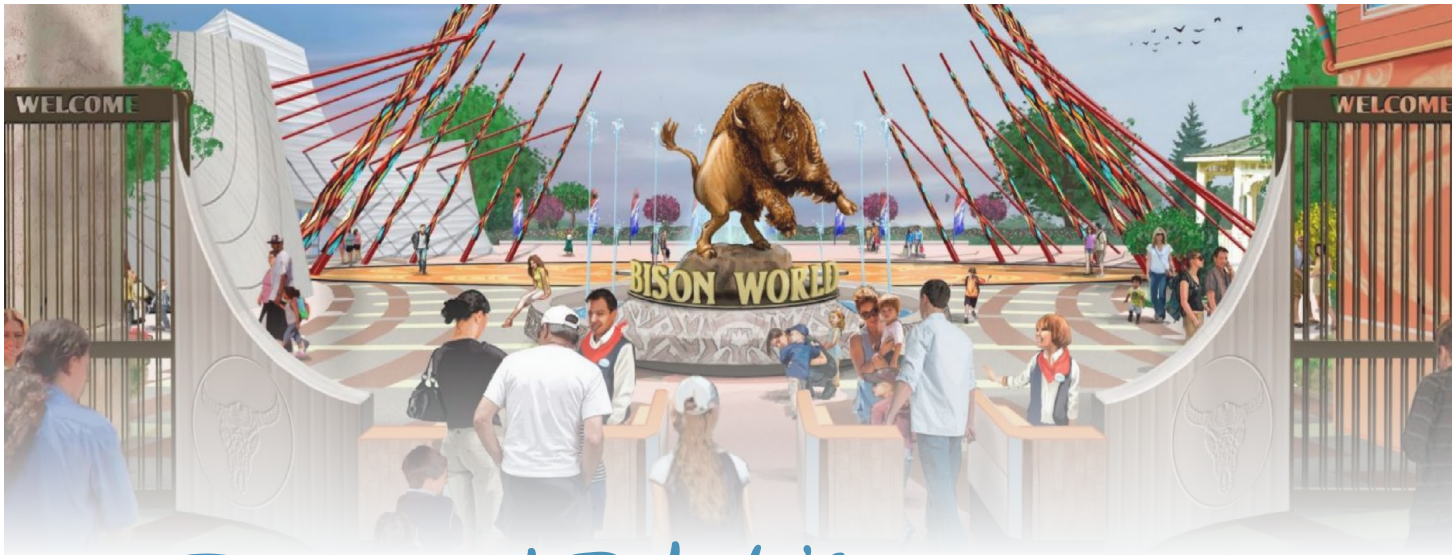
DJS can provide clinicians that deliver the therapy, but without the Title IV-E reimbursements and the state paid portion of the match dollars, this effort would be untenable. The evidence-based prevention and intervention services supported by this budget show great promise, provide a tremendous “bang for the buck”, and form the beginnings of what many of us in the child serving world have long hoped for: a robust network of child and family services that families can access without having to involve formal child welfare and juvenile justice systems.

Thus far, the outcomes associated with the delivery of BSFT® are remarkable. BSFT® is designed to create change in the functioning of the entire identified family system. The clinical target is to develop stability in the family system and restore hierarchy of the parental figures. As of December 2024, 163 youth clients whose behaviors prompted referral to therapy were referred, and services impacted 411 family members. Families are reaching the clinical targets for their family plans after 3-4 months, and research suggests that progress towards symptom reduction will continue post intervention.

Thank you for your time and consideration. I am always grateful for the opportunity to share with you the activities and operations of the youth and family serving division of the Department of Corrections and Rehabilitation.

Chairman Nelson and Members of the Committee,

I am writing to you to let you know how the recovery housing assistance program has helped me move forward in my recovery. If it wasn't for RHAP it would have been a struggle to continue with my SUD treatment. It provided me with a structured and safe environment to work and concentrate on my recovery. After leveling down in treatment I'm able to work and start paying my bills, including rent. This is helping me prepare myself to live on my own again one day. Until then with the structure and safety of my sober living home my recovery is secured because I come home everyday to a safe living environment and for that I'm thankful to be working, working a program, going to treatment, and living a life of recovery from here on out.



Thank you,

Ronni Ironshield

HB 1012 Amendment Request

50-06-06.6. Department may lease real and personal property.

The commissioner of the department or commissioner's designee may lease ~~surplus farm and pastureland at the state hospital and the life skills and transition center. The commissioner or designee also may enter into further leases of~~ real or personal property at the life skills and transition center or the state hospital upon a specific finding that the granting of each such leasehold interest will result in a net economic gain for the department, taking into account all identifiable costs. Any lease of space for the purpose of providing child care services must meet requirements as determined by the department. The commissioner of the department or commissioner's designee may prescribe the terms and conditions of any leases entered into pursuant to this section and may renew existing leases. ~~Any~~The term of any lease ~~entered into must be subject to renewal or cancelable each biennium~~may not exceed ninety-nine years.

North Dakota's BISON WORLD

TOURISM | REVENUE | ENTERTAINMENT | EDUCATION

Bison World is a planned "destination attraction" that will captivate and inspire visitors from all over the world. As the only theme park centered around America's national mammal, Bison World will deliver dynamic guest experiences featuring a Bison Discovery Center filled with interactive exhibits, a children's immersive play area, live entertainment, an aerial skyway and a safari ride offering guests "up close and personal" encounters with the majestic American Bison. Bison World offers visitors of all ages an exciting variety of entertaining and educational experiences at a world-class destination.

Attendance and Financial Highlights

325K VISITORS = 1.5% of ND visitor market share

First year projection of 1.5% of the North Dakota visitor market share consisting of 21.7 million visitors in 2021.

Adjacent Frontier Village draws an average of 240,000 visitors (without much promotion) to take picture with Bison monument annually.

$17M FIRST YEAR REVENUES

23% FIRST YEAR EBITA %

To learn more, scan or click the QR code below.

Location, Location, Location

Best Interstate Exit Left for Tourism Development

The 140 acres of vacant, state-owned land at Exit 258 is the only undeveloped interstate exit left in the country that would have a destination tourism attraction within three blocks of the exit ramp.

Building Upon 60 years of "Brand Equity"

WELL-KNOWN AS THE "BUFFALO CITY" The Jamestown area has over 60 years of 'brand equity" which is waiting to be leveraged and monetized with a new, modern tourism attraction. It is already well-known as the "Buffalo City" with the National Buffalo Museum and the world's largest buffalo monument. **240,000 tourists from all 50 states and 20 foreign countries already visit this roadside attraction annually,** but virtually no revenue is captured for the state from these visitors.

Tourism Gateway

8.8M PEOPLE **TRAVEL PAST EXIT 258 EVERY YEAR,** according to federal and state DOT data. Most of them are west-bound travelers – capturing them early at a destination attraction provides the state with an opportunity to promote other tourist attractions like Medora and the new TR Presidential Library... and everything in between. A separate attendance model shows that Bison World will capture over 3.6% of these travelers.

No Competition

A formal market study found that there is **virtually no competition for a regional themed destination in the eastern part of our state.** Bison World also sits at a "tourism crossroads" where east/west I-94 and north/south U.S 281 intersect.

Millions in Economic Impacts

An independent financial analysis of Bison World found that it passes the capital budgeting test, creates jobs and adds millions of dollars of value to the state of North Dakota.

Highest and Best Use of Land

The state is losing millions of dollars every year – and has been for 65 years since President Eisenhower built the interstate highway system – because it has not turned this extremely productive location into an economic development opportunity that produces revenue. **Real estate advisors have determined that the "highest and best use" for this tract of land is tourism.**

Can Bison World be profitable?

Yes. At 1.5% capture (325k visitors) means $17 million in operating revenue and a 23% profit margin/EBITDA.

Will Bison World Benefit the State of North Dakota?

Yes. At 1.5% capture, the result is 622 indirect jobs. GDP is $45.3 million and $4.6 million in state and local taxes.

Will Bison World Create Jobs?

Yes. A 1.5% capture creates between 30-44 year-round full-time employees and at least 244 part-time jobs.

Additional attendance and financial information along with formal disclosure and disclaimer statements for any information cited above can be attained from The Bison World Fund, P.O Box 293, Jamestown, ND 58402.

BISON WORLD

Designed, Planned and Analyzed by Leading National/International Experts

During the two-year planning process, The Bison World Fund Board of Directors brought in a number of national leaders in their respective fields. They include Apogee Attractions, considered by many to be the #1 theme park designer, developer and operator in the country; David Haukaas, a former senior executive at one of the world's largest sovereign wealth funds; and Eide Bailly, one of the nation's leading accounting and business advisory firms.

Protect and Serve

Members of the House Appropriations Committee Human Resources Division

I, Chief Matthew Anderson, representing the Wahpeton Police Department, am submitting testimony in favor of HB 1012 and in support of Avel eCare.

Avel eCare was implemented at our department in May 2024. Our officers utilized Avel eCare during 64% of the mental health calls for service in 2024 and have used it on 100% of the mental health calls for service in January 2025. When used, telehealth crisis care visits through Avel eCare resulted in citizens staying in their homes 66% of the time after the visit concluded.

Avel eCare has provided our officers with immediate access to mental health professionals for citizens when there is not an underlying threat to themselves or others. Of the people in crisis who spoke with a telehealth professional, our officers have only had one call back to the same individual. Additionally, some individuals who used Avel eCare have followed up with our office, thanking us for the service provided and how they were treated when in crisis.

Our department maintains a minimum mandatory staffing of two uniform officers on duty 24/7. Prior to using Avel eCare, officers had to transport a citizen in a mental health crisis to a medical facility outside our community. This process took an officer out of service for a minimum of 2.5 hours and required calling in another officer to cover the shift. Since implementing Avel eCare, we have significantly reduced the need to transport citizens to medical facilities and minimized the need to call in off-duty officers for coverage.

For a small police department with few local services available to us when someone is experiencing a mental health crisis, Avel eCare has been a game changer for our officers and community. I strongly encourage continued support for Avel eCare.

Thank you,

Matthew Anderson

Chief Matthew Anderson

Wahpeton Police Department

Honorable Members of the Legislature,

My name is Allison Wanner, and I am a Licensed Clinical Addiction Counselor here in North Dakota. I moved to North Dakota almost 12 years ago, and started out my career in this field at the Dakota Women's Correctional and Rehabilitation Center, where I worked as a human relations counselor for many years. I then transitioned and decided to further my career and became an addiction counselor in 2019. I transitioned from the prison, after being there for 10.5 years, and am currently working at the SWMCCC Community Treatment Program, in which we provide many supports and treatment groups for individuals in our county jail, NDSP inmates, parole and probation clients and many community members in Stark County, ND. The SUD voucher program is extremely important to our organization as it provides a financial mean for many of our clients to get the help they need and to start their life over on the right path to recovery.

As a licensed clinical addiction counselor dedicated to supporting individuals on their path to recovery, I urge you to recognize the critical importance of the Substance Use Disorder (SUD) voucher program in North Dakota. This initiative is not merely a financial tool; it is a lifeline for many of our most vulnerable citizens who struggle with substance use disorders and lack the financial resources to access essential treatment services.

Substance use disorder is a chronic, treatable condition that requires timely and comprehensive intervention. However, far too many individuals in our state face significant barriers to accessing care due to financial constraints and gaps in insurance coverage. The SUD voucher addresses these disparities by providing crucial funding for treatment services such as inpatient and outpatient care, peer support, and recovery housing. Without this program, many individuals—especially those in rural and underserved areas—would be left without viable treatment options, exacerbating the ongoing addiction crisis in North Dakota.

From a clinical perspective, early and sustained access to treatment significantly improves outcomes, reducing the social and economic burden of substance use disorders on families, communities, and the healthcare system. Studies consistently show that individuals who receive timely treatment are more likely to achieve long-term recovery, maintain employment, and avoid interactions with the criminal justice system. The SUD voucher directly contributes to these positive outcomes by eliminating financial barriers and ensuring that treatment is based on need rather than the ability to pay.

Furthermore, investing in the SUD voucher program is a fiscally responsible decision. The cost of untreated substance use disorders—including emergency room visits, incarceration, and lost productivity—far outweighs the cost of providing early and effective treatment. By continuing to support and expand this program, North Dakota can proactively address the addiction crisis, strengthen communities, and reduce the long-term economic impact of untreated substance use.

I urge you to support and advocate for continued funding and expansion of the SUD voucher program. This initiative is a testament to North Dakota's commitment to compassionate, evidence-based solutions that prioritize public health and community well-being. Our state must

stand firm in ensuring that all individuals struggling with substance use disorder have the opportunity to receive the treatment they need to reclaim their lives.

Thank you for your time and commitment to this critical issue.

Sincerely,
Allison Wanner, MS LCAC
SWMCCC Community Treatment Program

Honorable Members of the Legislature,

As the Jail Administrator at SWMCCC County Jail in Dickinson, ND, I urge you to recognize the critical importance of the Substance Use Disorder (SUD) voucher program in North Dakota. This initiative is not merely a financial tool; it is a vital resource that can help reduce incarceration rates by providing necessary treatment services to individuals struggling with substance use disorders.

Substance use disorder is a significant contributor to incarceration rates. Many individuals who enter our jail system do so because of offenses directly or indirectly related to substance abuse. Without access to proper treatment, these individuals often cycle through the criminal justice system, leading to higher recidivism rates and increased strain on correctional facilities. The SUD voucher addresses this issue by providing funding for essential treatment services such as inpatient and outpatient care, peer support, and recovery housing, ensuring that individuals receive the help they need before reoffending.

From a correctional perspective, access to early and sustained treatment can significantly reduce the burden on our jails. Studies consistently show that individuals who receive proper substance use disorder treatment are far less likely to return to the criminal justice system. By breaking the cycle of addiction through accessible treatment options, we can help individuals reintegrate into society successfully, maintain employment, and lead productive lives, ultimately reducing the demand for jail beds and law enforcement resources.

Moreover, supporting the SUD voucher program is a fiscally responsible decision. The cost of housing an inmate far exceeds the cost of providing substance use treatment. By prioritizing treatment over incarceration, we can allocate taxpayer dollars more effectively, reducing expenses associated with repeat incarcerations, emergency medical care, and court proceedings. This approach not only benefits individuals in recovery but also strengthens families and communities, making North Dakota a safer and more resilient state.

I strongly urge you to support and advocate for the continued funding and expansion of the SUD voucher program. By investing in effective treatment solutions, we can lower incarceration rates, reduce recidivism, and create a more just and efficient criminal justice system. It is imperative that we provide individuals struggling with substance use disorders the opportunity to reclaim their lives rather than perpetuate a costly cycle of incarceration.

Thank you for your time and commitment to this critical issue.

Sincerely,
Kara Simons
Jail Administrator
SWMCCC County Jail, Dickinson, ND

Catholic Charities North Dakota

House Appropriations – Human Resources Division

Testimony on House Bill 1012

Representative Jon Nelson – Chairman

February 5th, 2025

Chairman Nelson and members of the House Appropriations Committee – Human Resources Division, my name is Donna Byzewski and I am the Program Director of the corporate guardianship program for individuals with intellectual disabilities at Catholic Charities North Dakota. I am testifying in support of HB 1012 as it relates to funding for developmental disability services as well as corporate guardianship services for individuals with intellectual disabilities. The corporate guardianship contract funding in HB 1012 would have an immediate impact on reducing the waiting list for services.

For 37 years, the Developmental Disabilities (DD) Division has contracted with Catholic Charities ND to provide corporate guardianship services on behalf of adults with intellectual disabilities. The contract is very specific. We can only accept referrals from Developmental Disabilities Program Managers from the human service centers. There must be no other appropriate alternative such as family or friends who could serve as guardian. We are the guardian of last resort. The contract also specifies that we cannot refuse to serve a referral because of where that person might live – our services must be available statewide. There are critical times when a person may need the services of a guardian, and if no one else is available or appropriate, a corporate guardianship is a necessity.

On any particular day, a guardianship worker may be assisting an individual on their caseload in working through a diagnosis of a serious or life threatening medical condition which carries the responsibility of being the decision maker for difficult medical decisions which sometimes leads to end of life decisions; finding emergency housing as the person we serve is suddenly homeless and it is 10 below zero; spending hours trying to find inpatient treatment as an individual is struggling with severe alcohol and drug addictions; finding and accessing psychiatric services

COA Council on Accreditation Accredited Agency

United Way

when a person is experiencing mental health struggles (more than 74% of the individuals on our caseload receive the services of a psychiatrist); monitoring and reporting any incidents of suspected abuse, neglect and/or exploitation; as well as assisting an individual in obtaining restraining orders against abusive boyfriends or girlfriends or sexual predators. We are available 24 hours per day/365 days per year for emergencies or crises through our on-call system. Just in the past 6 months, our guardianship workers have made more than 722 calls or contacts after hours, weekends and holidays to manage emergency situations.

We have 16 guardianship workers who carry an average caseload of 33 people. Our guardianship workers must have a four-year degree and be either a licensed social worker or a Qualified Developmental Disabilities Professional (QDDP). They often travel 50 to 140 miles one way to visit each person on their caseload, attend team meetings, court hearings and medical appointments. Our guardianship workers' duties and responsibilities typically include the following: determining the individual's living arrangements; assuring that the person's medical needs are met and providing consent for all medical procedures, surgeries, treatments, medications, end of life decisions, etc.; arranging and authorizing educational and vocational opportunities; legal decision making; and making financial decisions as well as overseeing the individual's assets and social security benefits. Through the provision of guardianship services, we are able to intervene as necessary to ensure that the basic needs of individuals are met, that they have an appropriate place to live, that they have access to ongoing medical care and that they are receiving necessary support services.

Our waiting list continues to grow and, as of 12/31/24, our waiting list had the names of 142 people. To reduce the waiting list, we are respectfully requesting that this committee support the funding as detailed in the Developmental Disabilities portion of the ND Department of Health and Human Services budget.

The corporate guardianship program provides a very efficient, cost-effective and state-wide service. The process is streamlined with almost all of our resources being dedicated to the direct provision of guardianship services. We are a frugal program that takes very seriously that we be good stewards of the funds that we receive from the legislature. Thank you for the opportunity to stand before you today and I would be happy to try to answer any questions you may have.

Testimony prepared for:

NORTH DAKOTA ASSOCIATION OF COUNTIES

Re: HB 1012 – DHHS Children & Family Services Budget

Chair Nelson and committee members, as the Executive Director for the North Dakota Sheriff's and Deputies Association, I am providing testimony in support of House Bill 1012, specifically as it relates the funding for shelter care for Children in Need Services (CHINS). Currently, DHHS Children and Family Services covers all of the costs of shelter care for CHINS youth except for the first 24 hours of a placement made by local law enforcement. Although CHINS youth are not part of the juvenile justice system, there are times when law enforcement responds to situations involving CHINS youth that may result in a temporary placement in shelter care (i.e. runaway or ungovernable situations that involve parent/child conflict). Shelter care provides a safe place for CHINS youth to go so that law enforcement can get back to their regular duties, but the costs should be picked up by DHHS Children and Family Services, consistent with all other CHINS placements that are not made by law enforcement.

In addition, local law enforcement already covers the placement costs of delinquent youth who are part of the justice system; they should not have to cover the costs of CHINS youth who are not.

Mr. Chairman and committee we ask for your support of HB 1012 as it relates to the funding for shelter care costs for CHINS youth.

How our partnership impacts survivors and their families

- When a sexual assault is reported, we activate a Sexual Assault Response Team (SART). This multidisciplinary team includes members from law enforcement, medical professionals and advocates, responding together to ensure that victims of this invasive crime repeat the accounts of their experience the least number of times possible.
- This coordination ensures that evidence is collected, the chain of custody is followed, and evidence is preserved for prosecution, all while providing a trauma-informed response that gives victims the support they need.

What additional funding could do for our communities

- Law enforcement also supports the work of domestic violence and sexual assault organizations by responding to requests for welfare checks, providing police escorts in high danger situations, responding to security threats at shelters and offices when needed, serving and enforcing protection orders and much more.
- Related, our organizations count on the services of these agencies to provide safety, support, and guidance after our officers and deputies leave the scene.
- Through long-term support provided by domestic violence and sexual assault advocates, these complex patterns can be interrupted.

SHERIFF ANDY SCHNEIDER

To: House Appropriations – Human Resources Division
From: Sheriff Andy Schneider
RE: HB 1012
Date: 2/4/2025

Chairman Nelson and Members of the House Appropriations Committee,

My name is Andy Schneider, and I serve as the Sheriff of the Grand Forks County Sheriff's Office. I am writing in support of funding for North Dakota Domestic & Sexual Violence in reference to House Bill 1012.

Law enforcement agencies across the state collaborate almost daily with domestic violence and sexual assault agencies in our local communities. Our organizations work together for mutual benefit by providing shared training to staff, attending collaborative meetings, tracking criminal justice data, and making criminal justice system improvements on an ongoing basis.

Domestic violence cases are some of the most volatile and unpredictable calls for law enforcement. Having support from experienced, trauma-informed resources like CVIC is critical to our success as deputies. One of the biggest benefits to our partnership is our ability to work together to prevent further violence or possibly deaths related to domestic and sexual violence. We now do this more efficiently through the Lethality Assessment Program, connecting victims of violence with a domestic violence advocate at the time of the incident. This increases awareness of safety services available to survivors while decreasing the likelihood that they will be killed during a future incident.

Last year, law enforcement in Grand Forks County screened 132 individuals for potentially lethal risks and more than 80 of them were deemed to be in high-lethality situations. Please support House Bill 1012 and the North Dakota Domestic & Sexual Violence Coalition's request for additional funding.

Thank you for your service to our State and to your communities.

Sincerely,
Andy Schneider

HOUSE APPROPRIATIONS COMMITTEE
HUMAN RESOURCES DIVISION
REPRESENTATIVE JON NELSON, CHAIRMAN
HB 1012
TESTIMONY OF DORI LESLIE, CHI FRIENDSHIP (NDACP MEMBER)
FEBRUARY 4, 2025

Good morning Chairman Nelson and members of the committee. I am Dori Leslie, Executive Director of CHI Friendship, and I am grateful for the opportunity to share with you my thoughts on additional resources needed for the workforce for people with intellectual/developmental disabilities and how this has a direct impact on employment for people with disabilities. CHI Friendship has been providing services to people with disabilities in the Fargo and Grafton/Park River areas since 1974. Today we serve over 250 clients and have about 350 staff. Our major areas of service to people with developmental disabilities are in group homes, apartments, and in vocational/employment settings.

As a state, North Dakota can and should take great pride in the outstanding services it has provided over the years to people with disabilities. Among the reasons North Dakota has been recognized as such a strong leader in this field is because of the outstanding leadership from the Department of Human Services, the quality of care from providers, and the important ongoing support of our state legislators. Thank you. We cannot allow ourselves to slip away from the high benchmarks we have achieved together.

We have come so far in our field. As you are aware of our field's history, years ago, people would only get support for food, shelter, and personal hygiene. We then moved to a model of individualizing supports for the person and placing them into a community. Today, our state has something very exciting in front of us and we are on

the cusp of something very wonderful for people in our state – all people with disabilities becoming contributors to our community and not just consumers in our community.

Our greatest staff are challenging people to not only have good friends, but to be a good friend. Not only to receive from families, coworkers, and neighbors, but to give to our families, coworkers, and neighbors. But, one of the greatest joys we have seen is the smiles on the faces of people we support when they receive their first paycheck on the job. Whether it's Jay getting paid for making his candy bouquets, Dirk collecting his money for his vending business, or Todd getting paid after cleaning the food court at West Acres Mall, we cannot let this dream fade for all people because this is what people want and deserve.

This dream continues with our commitment to invest in our workforce by providing a respectable wage for Direct Support Professionals (DSPs). We need to continue to be able to hire quality staff, stop the revolving door, and keep the best staff that know and develop trust with the people they are working with. Inexperienced and unskilled staff have a direct correlation to people with disabilities achieving the American dream while having meaningful employment.

As the Executive Director, I can give you this personal testimony of how we are finding it increasingly difficult to find these qualified staff. This makes it very challenging to remain in compliance with our industrie's oversight systems in areas such as community integration. More importantly, I have observed how this negatively impacts the lives of people with disabilities. I have seen our clients lose their direct hire jobs and their self-employment businesses. One of the main reasons for this is we are

losing our best employees to jobs where they can earn more and work less. This has caused our vacancy rates to go up and our hiring standards to go down.

To say that Direct Support Professionals have difficult work would be a huge understatement. Direct Support Professionals are the backbone of our industry as they are responsible for administering medications, assisting with personal hygiene, behavior supports, keeping people safe, and helping each person find meaningful employment.

To continue to move momentum forward with our dream of decreasing staff dependency, and finding meaningful employment for all clients, we need qualified and tenured Direct Support Professionals. Direct Support Professionals are a must as this is where the rubber meets the road in our service delivery and they have the greatest impact by bridging a person with a disability to successful employment. Unfortunately, we have seen many of these staff walk away in recent years. Think for a moment how you chose your line of work. You most likely were exposed to a wide variety of options, you most likely changed courses many times, you assessed your strengths and weaknesses, and you followed your passions into the occupation where you are today. These are some of the reasons why finding employment for people with disabilities is such a difficult task.

There are many benefits to people with disabilities being employed. Ronald Reagan said that the best social program is a job and we couldn't agree more. We have seen over and over the impact that employment has on the lives of people with disabilities. Employment has a direct effect on a person's self-esteem, a meaningful life, and friendships. Employment is tied not only to income, but to self-worth, a sense

of accomplishment, and friendships. This is how we are supporting people with disabilities to contribute in our communities and increase their quality of life. We need to continue to partner together and remain committed to the integration mandate of the Olmstead decision, have people with disabilities embedded into the fabric of their communities, and ensure that all people of working age should work, regardless of their disability.

Robert Greenleaf once said that awareness is not a giver of solace, but it is a disturber and an awakener. We should all be awakened and disturbed by our diminishing workforce of our population's most vulnerable and the negative impact it is having. Let's all once again join together and continue to lead our field forward in the direction it needs to be to better employ, to better integrate, and to better dignify the lives of people with disabilities.

I ask that you support the 4% & 3% inflationary increases, to repair our workforce and enhance the extremely difficult service packages people need to succeed in their communities. It is essential to ensure that reimbursement rates are adjusted to account for inflation. Without these adjustments, the ability to recruit and retain qualified staff, as well as maintain service levels, is at serious risk. This increase aligns with the federal inflation levels for the previous two years.

Thank you.

House Appropriations, HR Section
House Bill 1012
Wednesday, February 5, 2025

Chairman Nelson and members of the committee,

My name is Tracey Zaun, and I am the Executive Director of Open Door Center in Valley City, ND, and Lisbon, ND. Open Door Center is a community provider for 90 individuals with disabilities; we've proudly served some of North Dakota's most vulnerable individuals for the past 65 years. I am writing in support of HB 1012.

Open Door Center has struggled with staffing shortages due to wage competition and low unemployment. While we have roughly 160 outstanding, dedicated Direct Support Professionals (DSPs), we struggle to recruit and retain staff due to competitive area wages, low unemployment, and population stagnation in Valley City and Lisbon. Our Direct Support Professionals (DSPs) are heroes; they make it possible to ensure that the incredible people we support are afforded safe, healthy, and happy lives. Our DSP wages have done little to mitigate the effect of inflationary increases. It is essential to ensure that our **state reimbursement rates are adjusted to match 4% and 3%** federal inflation levels so that we can recruit and retain high-quality staff and ensure our services are maintained for the people we support.

Our DSPs work days, nights, weekends, and holidays. They assist people we support in living as independently as possible—from job coaching to assisting with meal preparation to assisting with personal cares. We serve as many people's family away from family; their guardians put a great deal of trust in us to care for and ensure the safety and happiness of their loved ones. We do so with pride. Many of our DSPs could make more money working at McDonalds; yet they chose to stay in their positions due to the genuine care they have for the people we support.

I urge you to support HB 1012, including the 4% and 3% reimbursement rate increases to the Division of Developmental Disabilities. The quality and sustainability of services for individuals with intellectual and developmental disabilities depend on it.

Tracey Zaun

House Appropriations, HR Section

House Bill 1012

Wednesday, February 5, 2025

Chairman Nelson and members of the committee,

My name is Tony Baker and I am the CEO of Pride, Inc. in Bismarck. Pride is one of 31 members of NDACP. Our members employ over 4000 DSP's and provide support to over 7000 of North Dakota's most vulnerable people. Thank you for the opportunity to submit testimony in favor of HB 1012.

1. Inflationary Increase of 4% and 3%

It is essential to ensure that reimbursement rates are adjusted to account for inflation. An increase of 4% and 3% will help providers manage rising costs (i.e. Pride is looking at a 30% increase in health insurance costs in July of this year) while continuing to provide high-quality services to those in need. This increase aligns with the federal inflation levels for the previous two years and helps us remain competitive in the labor market.

2. Increase Reimbursement Rates on ICF and Res Hab to 100%

When the payment system was first implemented back in 2018, a rate matrix was developed which provided an hourly rate for various services provided. $20.02 and $20.10 are used as the average hourly wage for staff providing ICF and Residential Habilitation services. Because the new payment system was to be budget neutral in 2018, the rates for these services were reduced. For Pride, this means we are reimbursed at an average of $18.41 per hour for our residential DSP's. Residential services are 24/7, nights, weekends, and holidays. These are the most difficult shifts to staff.

Pride is currently starting DSP's out at $16.50 an hour with no experience and our average DSP wage is $21.47 per hour. We are also paying $10.00 per hour for sleep time ($7.25 is built into the rate). Pride has about 250 DSPs. Over the last six months we have lost 68 DSPs. This is unsustainable, leads to increased burnout, lower quality, and less continuity for the State's most vulnerable people.

3. Remove the Requirement for Accreditation

The requirement for accreditation is outdated and burdensome for providers without contributing anything to the services we provide. In the last several years the State has

continued to add reviews, audits, and monitoring for providers. Below is a list of monitoring and reviews which have been added:

- Training and Monitoring: This review looks at medication errors/injuries and reports of Abuse, Neglect & Exploitation. These incidents are reviewed by the State, Protection & Advocacy Project, and Regional Program Management. All High-Level incidents have a rigorous review process to ensure health and safety, as well as implementation of risk management steps to ensure the likelihood of a similar incident is minimized.
- HCBS: The survey is just one part of the larger Developmental Disabilities (DD) Division's quality management system. The goal is to provide assurances to The Centers for Medicare and Medicaid Services (CMS) that DD licensed providers are providing, and meeting conditions set forth by the DD Division and to ensure improvement and sustainability of waiver services. The survey is a quality mechanism used for waiver services provided by DD licensed providers. Information gathered through the survey is based on observation, record review, and interview. The purpose of the survey is to: 1) determine the provider's organizational performance of service delivery and improvement; 2)ensure quality services to individuals and services are received as identified in plans; 3) assess compliance with state, federal, and waiver requirements; 4) identify trends and strategies for system-wide improvements; 5) identify and encourage positive practices; and 6) remediate and develop strategies for improvement where there are issues identified.
- Payment Error Rate Measurement (PERM): Completed on Providers to ensure services that are being billed are being provided.
- Provider Case Audit Reviews: The process where the state's Medicaid program examines a healthcare provider's medical records and billing practices to ensure compliance with regulations, identifying potential instances of fraud, waste, or abuse.
- Integrity Audits: Completed by the State of ND on Providers to ensure services that are being billed are being provided.
- Quality Enhancement Reviews (QER): Completed by the DD Program Managers, completed on behalf of the individual, and where applicable, the individual's guardian to assess satisfaction with services as well as implementation of services. QERs involve the state's Department of Human Services conducting regular monitoring of individual service plans, performing quality checks to ensure clients have choice in their services and providers, and actively reviewing provider compliance with regulations through case file reviews, all aimed at improving the overall quality of developmental disability services across the state.
- Office of Inspector General (OIG): This is an audit of ND Department of Health and Human Services, but it's providers and individuals who are being observed and gathering data.

- Environmental Scans: Required for licensure by the department showing that the premises are in fit, safe, sanitary condition, and properly equipped to provide good care and treatment.
- National Core Indicator (NCI) assessment: conducted by a third-party entity to assess satisfaction with services. With a focus on people-driven data, one of the goals is to improve the systems that improve lives.

I urge you to support these items to strengthen the services and support which so many individuals and families depend.

ON THE MARGINS

MINISTRY ON THE MARGINS
P.O. Box 3065
201 N. 24th St., Bismarck, ND 58501
701-223-6315 • MinistryOnTheMargins.com

Chairman Nelson and Members of the House Appropriations/HR Division,

My name is Nathan Mickelson, the Prison Reentry Manager at Ministry on the Margins (MOTM), a nonprofit in Bismarck – Mandan. As a local provider, administrator, and manager of Free Through Recovery and Community Connect programs, MOTM is in staunch support of the proposed budgetary expansions for these programs outlined in HB1012.

Ministry on the Margins has been a community staple serving the underserved, unhoused and re-entering populations for over 10 years. By utilizing Free Through Recovery and Community Connect with this at-risk population, MOTM has continued to help those "falling through the cracks." By identifying and pairing those most in need with wrap around services, gap funding, care coordination and peer support services, these two programs serve an integral part in addressing each participants' unique needs. Even in a "metro" area, identifying and delivering these resources remains a challenge yet with Free Through Recovery and Community Connect, MOTM can utilize these programs serving as a bridge to successful recovery, housing, employment, transportation, basic needs and mental-behavioral health resources.

In the previous biennium, as the budgets for these two programs were rapidly utilized, it became clear that additional financial support was needed. Waitlists and prioritization policies were instituted, leading to time lapses for referrals, often with some waiting months for services. With an overcrowded prison population, growth in the unhoused and dire need for access to mental-behavioral health programs statewide, Free Through Recovery and Community Connect require continued and additional financial support outlined in HB 1012.

Please consider additional state funding for these important programs to continue supporting the important work taking place here in the state of North Dakota.

Nate Mickelson

Prison Reentry Manager

House Appropriations, HR Section

House Bill 1012

Wednesday, February 5, 2025

Chairman Nelson and members of the committee,

My name is Brooke Austin, and I am the Executive Director at Community Living Services, Inc. (CLS), a non-profit organization providing community-based services for individuals with intellectual and developmental disabilities. Thank you for the opportunity to submit testimony in support of HB 1012.

I respectfully request your support for reimbursement rate adjustments that will significantly benefit services for people with disabilities. A proposed increase of 4% and 3% would enhance providers' ability to recruit, retain, and train qualified employees. Without these adjustments, providers may struggle to maintain current service levels and could be forced to decline new referrals, leaving vulnerable North Dakotans without the supports they need.

Additionally, I urge your support for increasing reimbursement rates to 100% for Residential Habilitation and ICF Services. Full reimbursement is essential for sustaining these critical services and ensuring providers can continue delivering care without financial strain.

The individuals who rely on support services to live and work independently within their communities deserve access to consistent, high-quality care. I strongly encourage your support of these rate changes so that CLS and other providers can continue to fulfill our mission of serving people with intellectual and developmental disabilities throughout North Dakota.

Thank you for your time and consideration.

Brooke Austin
Executive Director
baustin@clsnd.org

BETTER TOGETHER
NORTH DAKOTA

Members of the North Dakota Legislature,

My name is Mason Ware, and I am speaking today on behalf of Better Together ND, a provider of services through the North Dakota Community Connect and Free Through Recovery programs. Our organization has had the privilege of working with individuals who have faced housing instability, addiction, and justice system involvement. Through these programs, we have witnessed transformational success stories—clients who were once homeless now have stable housing, individuals battling addiction are achieving long-term recovery, and people who felt hopeless are now building better lives for themselves and their families.

What makes Community Connect and Free Through Recovery so effective is their comprehensive, person-centered approach. These programs address the root causes of instability, providing case management, peer support, and essential resources that empower individuals to rebuild their lives. Rather than simply reacting to crises, these programs proactively invest in people's success, preventing costly cycles of homelessness, incarceration, and emergency services.

At Better Together ND, we have seen firsthand how access to consistent support, housing assistance, and recovery services empowers individuals to break free from the barriers that once held them back. Many of our clients have transitioned from chronic instability to sustained independence—whether it's helping an individual secure stable housing after over 20 years of homelessness or guiding someone through their recovery journey to achieve long-term sobriety and financial independence, these life-changing outcomes are direct results of the resources, guidance, and ongoing support provided through Community Connect and Free Through Recovery.

Both Marie and I, co-founders of Better Together ND, are former North Dakota probation officers. Having worked within the justice system, we understand firsthand the long-term impact that these programs have, not only for the individuals they serve but for the entire community. When people receive the support they need to recover and reintegrate successfully, we see reduced recidivism, stronger families, and safer communities. The difference between someone returning to jail or becoming a thriving, contributing member of society often comes down to having access to the right support at the right time—and these programs provide exactly that.

We strongly encourage continued funding in Community Connect and Free Through Recovery. These initiatives are not just helping people survive; they are helping them rebuild their lives and contribute positively to our communities. North Dakota is stronger when we support those who need it most.

Thank you for your time, attention, and continued commitment to these life-changing programs.

Sincerely,
Mason Ware Co-Founder
Better Together ND

Legislative Testimony
In Support House Bill 1012
Presented to House Appropriations Committee

2/2/25
By: Danica Nelson

Chairperson Nelson and Members of the House Appropriations Committee,

Thank you for the opportunity to testify today in strong support of legislation providing behavioral health services and support grants to school districts. My name is Danica Nelson, and I am Bismarck Public Schools Student Support Services Director, speaking on behalf of students, families, educators, and mental health professionals who are witnessing firsthand the urgent need for increased behavioral health support in our schools.

The Growing Need for Behavioral Health Support in Schools

Schools are the frontline for identifying and addressing students' behavioral health needs. Over the past decade, we have seen a significant increase in students experiencing anxiety, depression, trauma, and other mental health challenges.

According to the National Alliance on Mental Illness (NAMI), one in six youth aged 6–17 experience a mental health disorder each year, yet less than half receive the necessary treatment. Without adequate support, these challenges impact students' academic achievement, relationships, and long-term well-being. Our educators are dedicated professionals, but they are not mental health experts. They need trained professionals and resources to effectively support students.

Bismarck Public Schools use the funding in HB 1012

Bismarck Public Schools has received $705,116.18 for the 23-24 and 24-25 school year. Investing in behavioral health services through school-based grants have enhanced Bismarck Public School systems by:

- An Increase Access to Mental Health Professionals
- Expansion of Intervention Programs
- Building of the RenewED Program
- Support School-Based Services
- Enhance Learning Through Curricular Materials
- Provide Calming Tools and Techniques
- Support Training for Educators

House Bill 1012: Strengthening School-Based Behavioral Health Services

House Bill 1012 includes a $9,500,000.00 budget item (page 2, line item 4 of the budget bill) to support school-based behavioral health services for districts participating in Medicaid billing. This additional funding recovers the 50% of Medicaid funding that school districts do not receive. By filling this funding gap, we can ensure that school districts have the necessary resources to provide sustainable behavioral health services for students in need.

The Economic and Social Benefits of Funding Behavioral Health

Failing to address students' mental health needs carries long-term costs for our communities. Students who struggle with untreated behavioral health issues are at higher risk for dropping out, substance abuse, and involvement in the juvenile justice system. By investing in school-based behavioral health support now, we can reduce these negative outcomes and create healthier, more resilient communities.

Conclusion

Supporting behavioral health services in schools is not just an educational issue—it is a public health imperative. School districts need dedicated funding to provide comprehensive, sustainable mental health support for all students. I urge this committee to prioritize this legislation and allocate the necessary resources to ensure every student has the opportunity to thrive.

Thank you for your time and consideration. I welcome any questions you may have.

House Appropriations, HR Section

House Bill 1012

Wednesday, February 5, 2025

Chairman Nelson and members of the committee,

My name is Jessica Dargis and I am the CEO of Enable Inc, located in Bismarck ND. Thank you for the opportunity to submit testimony in favor of HB 1012.

I am writing to express my strong support for initiatives aimed at improving the quality, accessibility, and sustainability of services for individuals with intellectual and developmental disabilities. These individuals rely on critical services and supports provided by organizations across the state, and it is essential that we continue to strengthen and expand these services to meet their needs."

Inflationary Increase of 4% and 3%

I stand before you advocating for an inflationary increase of 4% and 3% for this biennium for developmental disability service providers. These proposed increases are critical to ensure that providers can continue to attract and retain the highly skilled professionals necessary to deliver the essential services that individuals with developmental disabilities depend on. The job market is tough, and without this increase, we risk further destabilizing a workforce that is already underpaid and overburdened.

The job market today is more competitive than ever. Many sectors are experiencing labor shortages, but the developmental disability services sector faces an even more pressing challenge. We are competing for talent in a market where wages for direct care workers, case managers, therapists, and other support staff in the developmental disability field have remained stagnant for too long. The work these employees do is demanding, often requiring a high level of patience, skill, and emotional resilience. Yet, despite their critical role, compensation has not kept pace with the increasing cost of living or with the demands placed on workers.

This sector already has one of the highest turnover rates of any human services field with a 28% turnover rate for Day program and 45% for residential services based on data pulled from 16 developmental disability providers across the state of North Dakota. Without a substantial wage increase, providers will continue to struggle with workforce shortages, which directly impacts the quality of services delivered to individuals with disabilities.

Employees in the developmental disability sector are not just workers—they are caregivers, advocates, and lifelines to some of the most vulnerable individuals in our communities. These workers often go above and beyond, providing critical services that support independence, dignity, and quality of life for people with disabilities. The importance of their role cannot be overstated.

Without these professionals, the support systems that so many individuals rely on would crumble, leaving people with developmental disabilities at risk of isolation, reduced access to essential care, and a diminished quality of life.

Things we often take for granted, such as going to the mall or store to buy something we want, are being denied to the individuals we support due to staff shortages. We want those individuals to thrive in their homes and communities, but when we have to plan weeks in advance and hope no one gets sick just to take someone shopping, it becomes clear that we are not providing the least restrictive setting. Denying someone the opportunity to use their personal funds to buy a shirt they desire simply because of a lack of staffing is a denial of their basic rights. It is crucial that we have enough support to ensure these individuals can participate in everyday activities like shopping, which are important for their independence and well-being.

Recruiting and retaining qualified staff is one of the most pressing challenges developmental disability providers face today. Without competitive wages, providers will continue to lose talented workers to other industries that offer better pay and benefits with less responsibility. The result is a revolving door of staff that makes it impossible to maintain consistent care and disrupts the relationships that are essential to the well-being of individuals with disabilities.

By offering a 4% and 3% increase, we are not only acknowledging the work of current employees but also signaling to potential recruits that this is a career worth pursuing. Increased wages are a clear investment in the future of this sector and will lead to improved staff morale, better care outcomes, and reduced turnover.

When staff feel valued and supported, they are more likely to stay in their positions, develop strong, trusting relationships with clients, and improve the overall quality of care.

Inadequate pay, on the other hand, leads to burnout, stress, and emotional exhaustion, which can result in lower-quality services for individuals with developmental disabilities. The proposed increases will help combat these challenges, ensuring that the workforce remains strong and capable of providing the care that our most vulnerable citizens deserve.

I urge you to reevaluate the state's budget to allow for a 4% and 3% biennial increase for developmental disability providers. These increases are not just about raising wages—they

are about ensuring that the people who care for our most vulnerable individuals are supported, valued, and equipped to do their jobs effectively. The challenges in the job market are real, and if we do not act now, we risk further destabilizing an already fragile workforce.

Fully Funding ICF and Residential Habilitation Services

I'm also advocating for the full funding of Intermediate Care Facilities (ICF) and Residential Habilitation Services at 100% of the computed and intended rates.

Currently, ICF funding is 89.7% and Res Hab funding is 91.6% of the computed rates falls short of meeting the needs of the individuals we serve. This level of funding is not only insufficient but also sends a troubling message: that the individuals we support are somehow less worthy of the full investment they deserve. When funding is less than 100%, it implies that their care and well-being are not as important as others who are served on the same DD waivers, which is simply unfair and unjust. These individuals deserve the same level of care, respect, and support as anyone else, and that requires fully funding these programs at the rates originally intended.

The ICF and Residential Habilitation programs play a critical role in ensuring that individuals with complex needs receive the appropriate care, support, and opportunities for growth. However, the current funding levels have often fallen short of what is required to sustain and enhance the quality of these services. By fully funding these programs at the intended rates, we can ensure that these essential services remain available and are of the highest quality.

Adequate funding will not only allow providers to maintain service standards but also enable them to improve staffing, increase training, and implement best practices that support long-term outcomes for individuals. It will also reduce the burden on families and caregivers, ensuring that individuals with disabilities receive the attention they deserve.

I urge you to prioritize the full funding of ICF and Residential Habilitation Services at 100% of the computed/intended rates in this budget cycle. Doing so will help safeguard the well-being of those who rely on these services and promote fairness and equity in our healthcare system.

Why Accreditation is Not Necessary for Developmental Disability Providers

The final item I'm advocating for today is to remove the requirement for accreditation in the field of developmental disability services; It is not only unnecessary but may also create unintended barriers to effective and accessible care for individuals who rely on these services. While I acknowledge that quality assurance is critical in this field, accreditation as it stands today may not always be the most effective or efficient means to ensure service quality.

The accreditation process often involves lengthy and resource-intensive procedures that can disproportionately burden smaller, community-based organizations. These organizations are already operating on limited budgets, and the cost, time, and effort required to achieve and maintain accreditation can drain resources that would be better spent directly supporting individuals with developmental disabilities. By placing additional financial and administrative burdens on providers, we risk reducing the availability of services rather than improving their quality.

Developmental disability services cover a wide range of needs, from physical care to emotional and cognitive support, and no single accrediting body can fully address the unique needs of all individuals in every community. Local and state-specific requirements are often more in tune with the unique needs of populations than national standards. The flexibility of state and local oversight can often be more responsive to the specific challenges faced by providers and the individuals they support, rather than a one-size-fits-all accreditation standard.

While accreditation is often viewed as a mark of quality, it does not always guarantee better outcomes for individuals with developmental disabilities. Accreditation bodies typically focus on compliance with process-oriented standards, which may not be directly correlated with the effectiveness of the care being provided. Service providers may focus on meeting the checklist requirements for accreditation rather than on outcomes for individuals we support. This process could inadvertently lead to a situation where an accredited provider is meeting technical standards but may not actually be offering the best services for individuals.

Accreditation is only one form of oversight. Currently providers have the following oversights in place:

- Title XIX Surveys
- Claims Audits
- Financial Audits
- Office of Inspector General Audits

- Environmental Scans
- Health and Safety Inspections
- Home and Community Base Service Surveys
- Quality Enhancement Reviews
- Incident Reporting of Abuse, Neglect, or Exploitation with P & A Oversight & Determinations
- Child & Protective Services Reviews & Determinations
- Case Reviews
- High GERs (General Event Reports) are reviewed by DD Section staff
- Quality Assurance Response System (QARS) Review
- Regional DDPM's are members of all teams of each person in service
- Preemployment screening (background checks, etc.)
- Training requirements for employees

These systems are often more dynamic and capable of reacting to issues as they arise, rather than relying on a static set of standards established by accreditation bodies. These measures can ensure quality of care without the need for costly and time-consuming accreditation processes as the only item listed above that has a substantial out of pocket cost to the provider is Financial Audits.

The requirements for accreditation can sometimes stifle innovation by forcing providers to conform to standardized models of care that may not be appropriate for every individual. Developmental disability services require flexibility, and a rigid accreditation system could discourage providers from experimenting with new, potentially more effective approaches. Providers who are able to innovate within a less restrictive system may be more successful in developing new solutions that better meet the diverse needs of individuals with disabilities.

While accreditation in the developmental disability field may seem like a logical step toward ensuring quality services, it is not always the most effective or necessary approach. The costs and barriers it imposes on providers can limit service availability and innovation, while alternative forms of oversight and accountability are often more nimble and responsive to the real needs of individuals with disabilities. We must prioritize creating a system that balances quality with accessibility, and accreditation, in its current form, does not always contribute to this balance. Therefore, I urge you to reconsider the necessity of accreditation.

I want to thank you for your time and consideration of these items today and urge you to consider them before approving the section of the budget related to developmental disabilities.

Thank you,

Jessica Dargis, CEO
Enable, Inc.

NORTH DAKOTA ASSISTIVE

Discover What's Possible

info@ndassistive.org

800-895-4728

www.ndassistive.org

Chairman Nelson and Members of the House Appropriations Committee – Human Resources Division,

My name is Mike Chaussee, Executive Director at North Dakota Assistive the non-profit organization charged with administering the state's Assistive Technology Act program. ND Assistive is committed to helping people thrive despite their limitations. Through many programs, we empower individuals to live independently, gain and keep meaningful employment, succeed in school, and fully engage with their families and communities by helping them discover what's possible through adoption of assistive technology (AT). I am writing to express our support for House Bill 1012. While this testimony addresses our work primarily with Vocational Rehabilitation and Adult and Aging Services, we are also building our relationship with Services to Individuals with Disabilities, the Department of Public Instruction, and we see a path where assistive technology can truly benefit behavioral health services as well.

What I appreciate most about Adult and Aging Services is its vision. The agency constantly explores innovative solutions and takes meaningful action to support the independence and well-being of older North Dakotans. Considering the rapid growth of the aging population in the state, the high rate of dementia, rising costs, a workforce shortage, and an underappreciated stress on unpaid caregivers, the work being done in Adult and Aging Services cannot be supported enough. They understand that aging in place is not just a preference—it is a fundamental component of maintaining dignity and quality of life.

Additionally, ND Assistive works closely with Vocational Rehabilitation. We have noticed a dramatic increase in referrals. Through this partnership, we have successfully helped people with disabilities find and keep meaningful work in their communities benefiting not only the individuals involved, but also their employers and the stress on workforce. Our work together highlights the importance of investing in programs that empower North Dakotans to remain active and engaged.

Continued investment in human services is essential. Expanding access to home and community-based services, enhancing workforce recruitment and retention strategies, and leveraging assistive technology are all necessary steps to meet growing demands in North Dakota. The Human Services Division has already demonstrated remarkable leadership in these areas, but sustained legislative support is crucial to maintaining and expanding these vital services.

Thank you for your time and attention,

Mike Chaussee

Executive Director

North Dakota Assistive

Testimony on HB 1012 Behavioral Health Section (Current SUD Shortfall)

House Appropriations

Human Resources Committee

February 5th, 2025

Chairman Nelson and members of the House Human Resources Committee, for the record my name is Dave Marion, and I have privilege working for the Prairie Recovery Center, located near Raleigh, North Dakota. Prairie Recovery Center is a one of a kind, committed residential agency working with individuals seeking addiction and mental health services. PRC provides short-term one of a kind residential service and out-patient services in a rural environment for recovery. With committed staff and therapists experienced in substance use, mental health and trauma informed work. We pride ourselves on being client centered in all our service delivery.

We are in support of HB 1012, especially for the Behavioral Health Division. This includes the full funding of the ND Substance Use Disorder Voucher Program and its amazing impact that it has on so many through ND that received treatment in a timely manner and not sit on waiting lists. The SUD Voucher Program has served as a safety net for those without health insurance or adequate resources to access addiction treatment in ND and has been lifesaving. With the SUD voucher it has allowed more access as a diversion to jail or incarceration for chronic SUD offenses that have not been treated, which has been a major talking point, and the Voucher has made it possible to tackle this concern. Currently, approximately 65-70% of individuals fall into this area. The Prairie Recovery Center works alongside many law enforcement agencies and Parole and Probation to get individuals the help needed to get out of the cycle they are in along with a strong aftercare plan. The Prairie recovery Center also supports great partnerships and work with Community Connect, Free through Recovery and Peer Support services, which are valuable pieces to the continuum of care in recovery

The current funding for the voucher was split up into IMD (Institutions for Mental Disease and more than 16 beds) and Non IMD facilities (16 beds or less). The appropriated funds were split 55% for non IMD and 45% for non IMD's, not knowing how the utilization would be at that time. This opportunity for local providers like Prairie Recovery Center gave more individuals service in a timely manner without long delays to get services on waiting lists that were as long 6-8 weeks. The Dept has been great about letting us know of the dollars being used and the projected shortfall in the IMD provider side and a projected surplus on the non IMD provider side. During the interim committee talk it was brought up that this may need to be tweaked as they did not know what the utilization would be on the IMD side. The Prairie Recovery Center has served 235 individuals since July of 2023. The SUD Voucher is accomplishing its goals, and the shortfall really shows the great need and utilization for those that qualify for this funding for services. PRC works with law enforcement, jails, parole and probation as a diversion to the revolving door on jails and emergency rooms. The Departments SUD Voucher team works with PRC and looks at all the applications and the state qualify them for the voucher program. The SUD Voucher program is supported and endorsed by Dept. Health and Human Services, Behavioral Health Division and has been a great option for many

that want and need help with their Addiction and Mental health concerns at the time they need it. Knowing the Department has the authority to move these funds, we are hoping that the Department will use the surplus projected in non-IMD funds to make up the shortfall projected to the IMD provider side. This will be in the best interest of those needing help without going backwards and being denied access to open beds for services and treatment for their substance use disorder. Thanks for your time on this very important matter.

Dave Marion

House Appropriations, HR Section
House Bill 1012
Wednesday, February 5, 2025

Chariman Nelson and members of the committee,

My name is Kay Metcalf and I have worked for the Open Door Center in Valley City, ND since 1988 in many different capacities. Open Door Center currently serves 90 individuals with disabilities. I am writing in support of HB 1012.

Open Door Center has struggled with retaining staff due to higher wages being offered at less stressful and easier to obtain positions with fast food restaurants and the like. Starting wages for a Direct Support Professional (DSP) is lower than what our McDonalds if offering. We are required to take learning modules that most jobs don't require. I am manager of Thunderbird Ranch Gourmet Foods and Dakota Seasonings, two small dry ingredient food companies that is run by Open Door Center. These two small companies give our folks meaningful employment. But when we can't keep job coaches and DSP's because of the wages, it makes it difficult to keep staff to be able to assist our individuals in our kitchen and production settings.

I urge you to support HB 1012, including the 4% and 3% reimbursement rate increases to the Division of Developmental Disabilities. We need your help if we are to maintain services for our individuals with intellectual and developmental disabilities.

Kay Metcalf
Manager
Open Door Center dba/ Thunderbird Ranch Gourmet Foods / Dakota Seasonings

2025 HB 1012

House Appropriations – Human Resources Division

Representative Jon Nelson, Chairman

February 5, 2025

Chairman Nelson, Vice Chairman Stemen, and esteemed Committee Members,

My name is Mike Delfs, and I serve as the Chief Executive Officer of Jamestown Regional Medical Center. Thank you for the opportunity to speak today about the exceptional work hospitals in North Dakota are doing to improve quality, control costs, and provide outstanding care to our citizens.

Thanks in large part to the funding provided by the legislature, our hospitals and healthcare providers consistently deliver exceptional value. In preparing for this testimony, I compared cost and quality data from the Kaiser Family Foundation with the Bailit Health study for the North Dakota Legislative Healthcare Task Force. The results were identical lending validity to the work by healthcare providers across the state. Both illustrate a vitally important factor affecting cost is our state's smaller population combined with a larger geographic spread. This is true among all of the least populous states in the U.S. Among the ten states with the lowest population, North Dakota ranks as the fourth least populous. More notably, within this comparison group, we rank as the third least costly and the fourth best in quality. In short, North Dakota is achieving some of the best value—high quality care at very low cost—among states with similar population challenges.

This success is no accident. North Dakota healthcare providers are focused on key performance indicators, including:

- Readmission rates
- Preventative care measures (such as mammograms, cervical screenings, and immunizations)
- Management of chronic conditions like diabetes and hypertension
- Fall risk assessments

More specifically, rural and independent hospitals are further strengthening these efforts through collaboration. For example, the Rough Rider High Value Network enables more

than 20 hospitals to work together on quality initiatives, standardizing care and outcomes for all North Dakota citizens.

In addition to these quality initiatives, our hospitals are committed to controlling costs. Many of our programs—both quantitative and qualitative—directly lower healthcare costs by keeping our patients healthier. The results of the HCAHPS (Hospital Consumer Assessment of Healthcare Providers) survey mandated by the Centers for Medicare & Medicaid Services further underscores our success. North Dakota hospitals consistently score above national averages in:

- Communication with Nurses
- Communication with Doctors
- Responsiveness of Hospital Staff
- Communication About Medicines
- Cleanliness of the Hospital Environment
- Quietness of the Hospital
- Discharge Information
- Care Transition
- Willingness to Recommend the Hospital

These performance measures confirm that patients are well cared for and are being prepared for a successful transition from inpatient care. By improving patient management through enhanced access, wellness initiatives, and seamless transitions between healthcare settings, hospitals across North Dakota are actively reducing readmissions and preventing the worsening of medical conditions.

Access to specialty care is also a top priority. Rural and independent hospitals, much like larger systems, are dedicated to ensuring that patients can receive specialty services close to home. Jamestown Regional Medical Center is a prime example. By partnering with Sanford Health, Essentia Health, and the VA, JRMC provides a wide range of services, including:

- Orthopedic Surgery
- Urology
- Otolaryngology
- Podiatric Foot and Ankle Surgery
- Obstetrics & Gynecology
- Advanced Hyperbaric Wound Care
- Oncology
- Rehabilitation Services
- Home Care & Hospice
- Inpatient care along with advanced imaging and laboratory studies

Our approach of combining partnerships, collaboration, and independence increases access to quality healthcare services throughout our region. State funding plays a critical role in elevating care and ensuring that patients in rural areas receive the specialty services they need close to home.

I am also grateful for the legislature's work on enhancing the healthcare workforce. Initiatives such as the Nurse Licensure Compact and the Advanced Practice Registered Nurse (APRN) Compact are instrumental in strengthening our provider base and ensuring that quality medical care remains accessible in North Dakota.

In closing, North Dakota hospitals are delivering tremendous value to our state. We appreciate the continued support of this committee and the legislature, which makes our work possible.

Chairman Nelson, Vice Chairman Stemen, and esteemed Committee Members, I welcome any questions you may have.

Thank you.

House Appropriations

Human Resources Division

SB 1012

February 5, 2025

Chairman Nelson and Committee Members, I'm Courtney Koebele, and I serve as executive director of the North Dakota Medical Association. The North Dakota Medical Association is the professional membership organization for North Dakota physicians, residents, and medical students.

You've heard testimony today that underlines the importance of Medicaid and Medicaid Expansion. Expanding Medicaid provided the much-needed coverage to our low-income patients, improved access to care, improved the health and well-being of the newly insured, and improved the financial stability of our clinics and hospitals.

Medicaid expansion is not simply a budget issue. Lawmakers must also consider the real human effects of this decision, including the health and well-being of those who gain coverage under expansion. Medicaid expansion provided coverage to a population that never before had coverage, including behavioral health coverage.

Medicaid expansion is one of the most consequential state decisions in Medicaid history. The legislature's decision affected the health care and health status of 33,000 of

the state's citizens, with ripple effects throughout the entire healthcare system, the state budget, the economy, employers, and others paying for health insurance.

Our physicians provide the safety net medical services for the most vulnerable of our population – a population of patients who present unique, and often some of the most difficult, challenges. Our Medicaid patients benefit from the services physicians can provide them – from a North Dakota healthcare system that is recognized nationally as a high-quality, efficient healthcare system. However, we have unique healthcare workforce recruitment and retention challenges occurring in our state. Our capital needs continue to grow with aging facilities, technology, and equipment. Costs for medical equipment, new technology, and supplies continue to increase. We must pay the same rates for physicians, nurses, and other health care personnel as the rest of the country.

Physicians in North Dakota continue to do their part in providing good access to quality medical care for Medicaid beneficiaries and showing their ongoing commitment to the long-term sustainability of the Medicaid program. We look forward to working with the Committee to address the future needs for Medicaid medical services.

Thank you for the opportunity to address this committee. I would be happy to answer any questions.

Physicians Dedicated to the Health of North Dakota

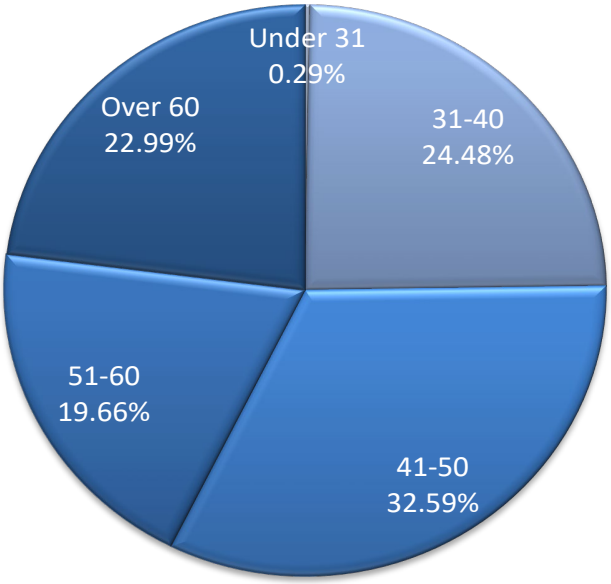
NDMA is a professional membership organization for North Dakota physicians, residents, and medical students. NDMA maintains a database of information on individual physicians and residents for many purposes. The data is comprised of new licensure information obtained routinely from the ND Board of Medicine, health systems and other facilities, and other sources.

Number of Physicians

As of February 4, 2025, North Dakota has an estimated 1,740 regular active physicians. This does not include retired physicians, residents, or medical students.

UND SMHS Graduates

Of the total 1,740 physicians, 636 are UND School of Medicine & Health Sciences graduates; and 327 are primary care physicians. Primary care physicians include family medicine, internal medicine, obstetrics, and pediatrics.



Gender and Age

Of the 1,740 total physicians, 1,157 or 66.5% are male; and 583 or 33.5% are female.

The overall average age of physicians is 50, with the breakdown by age group as follows:

Age	Number	% of Total	Age	Number	% of Total
Under 31	5	0.29%	**51-60**	342	19.66%
31-40	426	24.48%	**Over 60**	400	22.99%
41-50	567	32.59%	**Total**	1740	100.00%

North Dakota Practicing Physicians by Age

Specialty - Primary Care

Of the 1,740 total physicians, 39% or 680 physicians are in primary care. Primary care physicians include family medicine, internal medicine, obstetrics, and pediatrics.

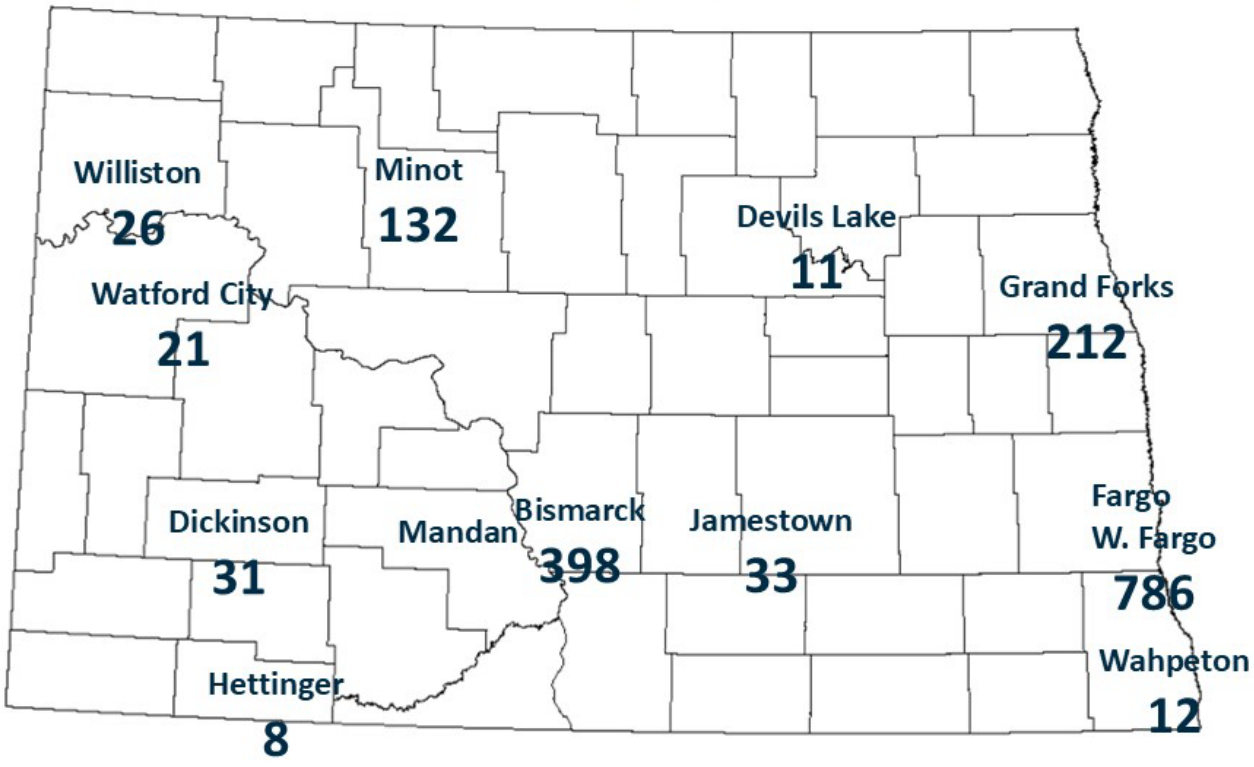
Practice Location



Overall, 87.82% or 1,528 physicians practice in urban areas; and 12.18% or 212 physicians practice in rural areas.

For this purpose, the term “urban” is based on the primary locations of Bismarck-Mandan, Fargo-West Fargo, Grand Forks, and Minot.

When it comes to primary care, 77% of physicians practice in urban areas; and 23% practice in rural areas.

Written Testimony

House Appropriations Committee -Human Resources Section

February 5, 2025

Testimony of Mark Johnston

Avel eCare Crisis Care

Chairman Nelson, Vice Chair Stemen, and members of the committee, thank you for the opportunity to testify today in support of HB1012, and the impact of Avel eCare Crisis Care in supporting the citizens of North Dakota.

Avel eCare Crisis Care is a telemedicine service that provides immediate, 24/7 access to behavioral health professionals, ensuring that citizens in crisis receive timely and appropriate care. Our mission is to strengthen North Dakota's behavioral health system by supporting first responders, and communities with virtual crisis intervention, reducing unnecessary emergency room visits and law enforcement involvement while improving patient outcomes.

Through our partnership with the North Dakota Department of Health and Human Services, law enforcement agencies, and other stakeholders across the state, Avel eCare Crisis Care has significantly improved access to mental health care- especially in rural and underserved areas where provider shortages pose a challenge. By leveraging telemedicine, we bring behavioral health expertise to the point of crisis, allowing for real-time assessments, de-escalation, and care coordination, ultimately keeping individuals in their communities whenever possible.

Since expanding our services in North Dakota, we have:

- Provided nearly 200 virtual crisis consultations, reducing wait times for critical mental health evaluations.
- Partnered with NDHHS and the Regional CMHC's to ensure that patients in crisis receive care without unnecessary transfers.
- Assisted law enforcement by offering immediate access to mental health professionals, reducing the strain on local resources.
- Helped divert individuals from unnecessary hospitalization and incarceration by offering community-based crisis stabilization.

Our work aligns with North Dakota's commitment to strengthening behavioral health services and ensuring access to care for all residents. Continued support for crisis care services, including telemedicine, is essential to addressing workforce shortages, improving patient outcomes, and reducing the financial burden on emergency departments, law enforcement agencies, and ultimately the taxpayers.

We appreciate the legislature's ongoing leadership in addressing behavioral health needs in North Dakota. Avel eCare Crisis Care is committed to being a strong partner in this effort, and we welcome the opportunity to collaborate further to enhance crisis response services across the state.

Thank you for your time and consideration. I would be happy to answer any questions.

Sincerely,

J. Mark Johnston

House Appropriations, HR Section

House Bill 1012

Wednesday, February 5, 2025

Chairman Nelson and members of the committee,

My name is Angela Dinius. I am the Executive Director of the North Dakota Association of Community Providers (NDACP). Our members provide essential services and supports to individuals with developmental disabilities across the state. It is our privilege to do this work, and we are committed to ensuring high-quality care for the people we support. As we often say, we are "doing what matters for people who matter."

We would first like to acknowledge our valued partners, including Tina from the DD Section, Heather and her team at the Life Skills and Transition Center, Donna and her team at Catholic Charities' Guardianship Division, and our advocacy partners across the state. In this field, we achieve the best outcomes and make the greatest impact when we work together to do what's best for the people we support.

NDACP has several critical priorities for this budget, and we urge your support for the following:

1. Inflationary Increase of 4% and 3%

Our payment system was designed to be self-sustaining, provided that inflationary increases align with federal inflation levels. We are requesting a 4% and 3% increase, which directly corresponds to the federal inflation rates for the past two years. Without these adjustments, our ability to maintain quality services will be compromised. We do not have another funding source to offset these funding gaps. Almost all our funding comes from state dollars matched by Medicaid, with only 0.29% of cases during the period of July 1, 2023 – June 30, 2024 being private pay.

2. Full Funding for ICF and Residential Habilitation Services

Intermediate Care Facilities (ICF) and Residential Habilitation (Res Hab) programs are currently funded at only 89.7% and 91.6%, respectively. This funding gap undermines the integrity of our system and places undue strain on providers. For example, the payment system is designed to support an average DSP wage of $17.96 per hour in ICF. However, providers are paying an average of $20.81 per hour—nearly $3 more than the reimbursement rate. Even with this rate, we are still unable to compete with other industries. This makes it increasingly difficult to recruit and retain qualified staff, ultimately impacting the quality of care for the individuals they support.

Our payment system allows us to seek efficiencies within each category, and we have maximized every opportunity to do so. Despite these efforts, we continue to face an unsustainable turnover rate of 45% in residential services and an overall average turnover of 41%. This instability stems, in part, from our inability to offer competitive wages.

To maintain a stable and skilled workforce and ensure the continuity of these essential services, we request full funding for ICF and Residential Habilitation services.

3. Removing the Unfunded Accreditation Mandate

We advocate for making accreditation a voluntary process, rather than a mandatory, unfunded requirement While accreditation can be valuable, mandating it without funding diverts already-limited resources from direct care. Our services are already held to high standards through a variety of state surveys and oversight measures, ensuring accountability and excellence.

SB 2192 has been rereferred to Senate Appropriations with an appropriation of $240,000.

4. Supporting Catholic Charities in Their Request for Corporate Guardianship Funding

Corporate guardianship services are vital for individuals with developmental disabilities who do not have anyone else able to serve in this role. Catholic Charities provides a crucial safety net for these individuals, and we strongly support their funding request to ensure they can continue this important work.

Conclusion

The services our providers deliver are life-changing and essential to the well-being of individuals with developmental disabilities. By ensuring full funding for ICF and Residential Habilitation, providing an inflationary increase that matches federal inflation, and eliminating unnecessary financial burdens by making accreditation optional, we can maintain a system that truly meets the needs of those we serve. We appreciate your commitment to making thoughtful investments in these programs, and we look forward to continuing our work together to ensure that North Dakotans with developmental disabilities receive the care and support they deserve.

Thank you for your time and consideration. I am happy to answer any questions you may have.

Angela Dinius

Executive Director

ND Association of Community Providers

North Dakota Training Academy *for* Addiction Professionals

Testimony of Denise Andress

ND Training Academy for Addiction Professionals

In Support of HB 1012

House Appropriations Committee - Human Resources Division

February 5, 2025

Good morning, Chair Nelson and members of the committee. My name is Denise Andress, and I am the director of the Training Academy for Addiction Professionals (TAAP). I am here today to testify in support of HB 1012, specifically the opioid settlement appropriation outlined on page five, section eight. A few weeks ago, the CEO of the Heartview Foundation, Kurt Snyder, spoke about the OSF funding TAAP received in January 2024. Today, I would like to take a few moments to discuss the impact of this funding on the addiction counseling workforce and share our vision for expanding these efforts across North Dakota.

Becoming an addiction counselor in North Dakota is a lengthy and rigorous process. In addition to earning a bachelor's or master's degree, most addiction counselors must complete between 350 and 960 supervised training hours at TAAP or one of the other five regional consortiums in the state. TAAP was established in 2015 as an apprenticeship model through the Heartview Foundation to provide accessible training opportunities for students where they live.

To address the growing addiction counselor workforce shortage in the state, TAAP received a grant from the opioid settlement committee. While workforce shortages exist across many industries, addiction counseling is unique in that when we effectively treat individuals with substance use disorders, they can return to their families, communities, and workplaces, helping to strengthen other industries as well. This investment in the addiction counseling workforce

has proven highly successful, exceeding the initial goals we presented to the committee.

With this funding, TAAP has made significant strides. First, we hired a full-time TAAP director—myself—fully dedicated to the administration and success of the program. In this role, I guide students through the process of becoming addiction counselors, answer their questions, advocate for them with the Board of Addiction Counselors, and help them navigate academic requirements. Having a dedicated point of contact has provided students with crucial support in what can often be a complex and overwhelming process.

Additionally, we have been able to provide a livable wage to 29 addiction counselor trainees. To put this into perspective, TAAP previously averaged only four trainees per year and had set a goal of 10 for this grant. The increased number of trainees has been made possible through strong partnerships with our training sites and the Heartview Foundation. Before this funding, the addiction counselor trainees had to complete six months (or 960 hours) of unpaid training. Due to the full-time nature of this requirement, many were unable to hold other jobs during this period, creating a financial barrier to entry into the profession.

TAAP has also received 27 scholarship applications from students in their junior and senior years of college. Of these, we awarded 15 scholarships ranging from $1,700 to $10,000. Each recipient signed an agreement to work as an addiction counselor in North Dakota for five years or repay the funding, ensuring that our state continues to benefit from this investment in workforce development.

Furthermore, TAAP has expanded its training sites from nine to 16, all of which are rigorously vetted to provide high-quality, research-based experiences for trainees. A significant portion of this expansion has occurred in rural areas, allowing students to train in their home communities with the goal of remaining there to serve local populations upon graduation.

Recognizing the critical role of clinical supervisors in the training process, we have also allocated funds to provide stipends to supervisors who take on trainees. Training new counselors is time-intensive and requires preparation, often taking time away from other responsibilities. Offering stipends has helped us recruit 19 additional clinical supervisors across the state. Additionally, TAAP has partnered with ND Department of Health and Human Services, CDC and UND's Center for

Rural Health to develop a free, 20-credit online CEU program for those pursuing clinical supervision status, further strengthening the training pipeline.

Beyond these immediate efforts, TAAP is committed to long-term workforce development through outreach initiatives. We have established a pipeline program to promote addiction counseling as a career choice by partnering with ND HOSA-Future Health Professionals, visiting high schools and colleges, and attending job fairs to engage students early in their career exploration.

I have included a document detailing TAAP's accomplishments with the OSF grant, including a map showing where our trainees live or plan to practice. We strongly encourage the Legislature to continue appropriating funding to the Opioid Settlement Committee, ensuring they have the resources to vet applications and support successful initiatives. Addressing the addiction counseling workforce shortage is not a one-time effort. Sustainable funding will allow us to continue building this workforce by engaging high school and college students, offering scholarships, and providing paid training opportunities. Additionally, we have proposed to the Department of Health and Human Services that TAAP be allowed to contract with other regional consortiums to extend paid training opportunities to students in the other consortiums.

Thank you for the opportunity to speak about the work TAAP is doing to address the addiction workforce shortage in North Dakota. I appreciate your commitment to tackling substance use in our state, and I am happy to stand for any questions.

House Appropriations, HR Section
House Bill 1012
Representative Nelson, Chairman
February 5, 2025

Chairman Nelson and members of the HR Committee,

My name is Scott Burtsfield, and I am extremely honored and privileged to serve as the Executive Director for the Vocational Training Center (VTC), a licensed service provider supporting people with intellectual and developmental disabilities, located in Fargo, North Dakota. I want to thank you for the opportunity to submit testimony in favor of HB 1012.

Our organization has been in existence since 1962 and currently provides a wide array of supportive services to nearly 200 of the state's most vulnerable adults - people with Intellectual/Developmental Disabilities (I/DD). Throughout our organization's 60-plus years of existence, we have experienced many changes and reforms in this field. Through it all, the fundamental element to our success, and the success of the individuals we support, has always been our Direct Support Professionals (DSPs).

It is on behalf of our state's supported individuals and the Direct Support Professionals supporting them that I am expressing my deepest concern regarding the lack of quality service enhancements and inflationary increases as proposed in the Governor's budget and recommendations.

North Dakota's DSPs work in a range of settings, including family homes, people's own homes, intermediate care facilities, small community residential group homes, community job sites, vocational and day training programs, and others. They provide critical round-the-clock care and supports to individuals with disabilities - many of whom need help with personal cares such as toileting and bathing, help with managing behavior and severe health issues, support to live and work in their community, and assistance with the simple day-to-day tasks that many of us take for granted. Universally acknowledged, the work of the DSP is back-breaking, hazardous, stressful, and physically and emotionally exhausting.

Unfortunately, often detracting from providing the much-needed support services, North Dakota's DSPs are increasingly held to incredible measures in terms of what is expected of them in their day-to-day work. In the last 5 years we have experienced the development of rigid new standards, added

training criteria, and increased data collection and data entry requirements - much of which falls on the backs of already overburdened and overworked DSPs.

North Dakota's DSPs, in many cases, have greater responsibilities, require higher levels of training and skill sets, and take on greater liability than Certified Nursing Assistants or other professional Health Care Assistants. However, DSPs do so without higher-level credentialing, without the compensation, and without the formal recognition. Rather, much of their time is spent capturing and reporting data, all of which takes time away from providing the actual services they were meant to do.

Unfortunately, our DSPs continue to see the cost-of-living rise while their spending power decreases. They are finding it much easier and tempting to find employment outside of our field, especially when most major retailers and other local industries such as service jobs, warehouse and fast-food positions are offering better pay with much less pressure, responsibility, and regulatory requirements. For example:

- Many local manufacturers' starting pay is nearly $4.00 per hour more for an entry level position.
- Average Administrative assistant salaries statewide are near to over $2 per hour more than our DSP's.
- Locally, McDonald's, Walmart, COSTCO, AMAZON, KFC and many others have starting wages greater than the DSPs in those communities, and without the added data requirements, training, and responsibilities.

Sadly, this has helped culminate into a perfect storm for North Dakota's DD providers. Throughout this recent period of increasing regulatory requirements, miniscule inflationary increases, costly unfunded mandates (such as CQL Accreditation), intensified data requirements, escalating operational costs, skyrocketing inflation, the inability to remain competitive in an overly aggressive labor market, and rising costs of employee- related expenses… provider organizations are being forced to explore ways of doing much more with much less.

As you may be aware, unlike hospitals and many other service industries, our current rate structure prohibits providers of disability services from raising rates to remain competitive or to keep up with increasing costs of doing business, leaving us at the mercy of the legislative process.

In our field, turnover is high. Morale is often tested. Recruitment and retention, while historically problematic, are astonishingly difficult. Waiting lists are growing because there are no staff to deliver support to new people with IDD in their homes or other services. Unfortunately, due to staff shortages

and high vacancy rates, community programs and services for people with IDD across the country have started cutting back, and even closing — many permanently.

In addition to expressing my support for the NDHHS Developmental Disabilities Division budget (which includes a much needed rate adjustment to Day Services) I urge you to please cast aside the Governor's recommendation and support NDACP's request by adding a 4%/3% inflationary increases, respectively, for each year of the biennium for service providers and the Direct Support Professionals we employ.

Furthermore we, members of NDACP, are seeking an increase in reimbursement rates for ICF and Res Hab services as well as eliminating the requirement for the unfunded accreditation mandate, or once again provide the financial assistance to alleviate additional burdens from those already place on providers.

Therefore, I am asking you not to compromise services to the state's most vulnerable population or jeopardize the workforce that supports them. Invest in the state's most vulnerable population as well as those that support them.

Again, I wish to thank you for the opportunity to submit testimony in favor of House Bill 1012.

Scott Burtsfield, Executive Director
The Vocational Training Center
scott@fargovtc.org (701) 551-3149

Chairman Nelson and Members of the Committee,

For the record, my name is Haley Holt, and I reside in Watford City. I work with Endeavor Sober Living serving individuals from across the state at our facilities in McKenzie County and Ward County. I would like to express our support for HB 1012, particularly as it pertains to the North Dakota Behavioral Health Division, Including funding for the Recovery Housing Assistance Program (RHAP) and the Opioid Settlement Fund.

Recovery Housing Assistance Program

Endeavor Sober Living opened its first house in October 2021 in Watford City with eight beds. Recognizing the critical need for recovery housing, we quickly expanded and now have the capacity to serve 34 men in McKenzie County and 20 women in Minot.

Our sober living communities provide individuals in recovery with a safe, supportive and substance-free environment. RHAP enables individuals - often transitioning from residential substance use disorder treatment - to focus on their recovery while rebuilding their lives. It gives them an alternative to unsafe living conditions, high-risk social environments, and, in some cases, family connections that could hinder their recovery.

At present, we have 32 male residents and 12 female residents, with 10 men and 8 women participants enrolled in RHAP. Most of the other individuals residing in our sober living houses have utilized RHAP during their time with us. In 2024, approximately 80 individuals received housing assistance through RHAP while residing in one of our homes.

The proposed budget would support approximately 172 beds, a dramatic decrease to current capacity of 265 approved beds reported by the Behavioral Health Division team. Additionally, there is a waitlist with a reported need for 296 beds for expansion projects and new providers.

Endeavor Sober Living is on the waitlist for two separate programs.

1. A sober living facility in Williston, where no such facilities exist. Currently, individuals seeking recovery housing must go to McKenzie County for men and Minot or Dickinson for women.
2. Our second request is for additional housing in Minot to help ensure that we can offer a safe place for all women including pregnant and parenting women along with their children.

The proposed additional funding is critical to ensure RHAP does not have to turn away individuals who meet the necessary requirements for the program. Without adequate funding, too many people in recovery will be left without the stable, supportive housing they long for to rebuild their lives.

Opioid Settlement Fund

Through the 2023-2025 biennium, $8 million was appropriated to HHS from the Opioid Settlement Fund. From these funds, Endeavor Sober Living received grant funding to establish a women's sober living house in Minot. This grant enabled us to remodel a six-unit apartment complex that we purchased, updating it with modern finishings, new furniture, and appliances. Additionally, we built a playground on-site to provide a safe space for children visiting their mothers. The grant also allowed us to purchase two vans to transport participants to support group meetings, substance use disorder (SUD) treatment, mental health services, medical appointments, and other essential activities.

Our facility can accommodate up to 20 women plus house managers. Since welcoming our first participants in March, we have provided a safe, sober living environment for 44 women, the majority of whom are pregnant and parenting mothers. While in our program, these women are actively engaged in a 12-Step program, volunteering within the Minot community, securing employment, rebuilding their lives, reconnecting with their children and families, and developing a strong support network.

With the remaining funds, we plan to expand our capacity in Minot by creating a sober living environment where mothers and their children can reside together. This initiative will help address the barriers mothers face in accessing SUD

treatment and support services, particularly when securing stable, sober housing for themselves and their children in North Dakota.

Without this funding, the project would have relied solely on self-funding and would have progressed in phases, limiting the number of women we could serve. Thanks to this support, we have been able to make a profound impact on the lives of many women and families in our community.

In summary, these two programs have been instrumental in expanding access to safe, stable, and supportive housing for individuals in recovery. By providing critical funding, these initiatives have removed financial barriers, allowing organizations like ours to create an immediate and lasting change in the lives of individuals overcoming substance use disorders. The impact of this investment extends beyond housing—it fosters recovery, strengthens families, and rebuilds communities. As we continue to expand our services, the ongoing support of these programs will be essential in breaking cycles of addiction, reducing relapse rates, and empowering individuals to build independent, fulfilling lives in sobriety.

Respectfully,

Haley Holt

To Chairman Nelson and fellow committee members,

My name is Tory Queensley, and I am a proud resident of Fargo in District 21. Today, I testify before you in full support of HB 1012, advocating for critical need of funding for the Behavioral Health Division, with a specific focus on the pregnant and parenting sector.

As a mother in recovery, I have lived through the heart-wrenching reality of battling addiction while pregnant. This experience has shown me the dire need for accessible, comprehensive services for women and families facing addiction, especially for those who are pregnant or parenting. I am deeply involved in our community's resources, and I witness firsthand the tremendous gap in services that provide a holistic, supportive approach to recovery.

The lack of adequate support for pregnant women in recovery perpetuates a cycle of generational trauma and addiction. Women struggling with addiction often face intense stigma as I have experienced personally, and this is even more pronounced when they are pregnant or already parents. It's time to break this stigma and offer real support—not just for mothers, but for fathers as well, as they too need access to resources that will help them become better parents and healthier individuals.

Imagine, for a moment, that the person closest to you—whether it's your daughter, your sister, your friend, or someone you care about deeply—has been battling addiction. She's faced unimaginable hardships throughout her life—struggling to find worth, to feel confident, to feel like she's just *normal*. She's never had the support she needs, fighting alone against a world that often doesn't understand her pain.

Now, imagine she finds out she's pregnant.

The fear that comes with pregnancy is overwhelming for anyone. But for a woman in active addiction, the fear is multiplied a hundredfold. She's not just worried about the future of her child—she's terrified for herself. Terrified of being judged. Terrified of what might happen to her baby. Terrified that the cycle of addiction, of hopelessness, will continue and destroy her family. This is not just a moment of fear. This is a crisis—an all-consuming, life-altering crisis. It's the kind of crisis that demands action, not just compassion, but real, tangible support. We cannot turn our backs on these women who are facing the impossible. They need help, they need support, and most importantly, they need the resources that will give them a chance to break free from the vicious cycle of addiction. My story reflects this exact scenario.

My story begins in a family where addiction was a constant presence—an invisible, toxic force shaping everything around me. As a young child, I was exposed to the chaos that came with drug and alcohol use. I remember hearing the fights, the yelling, the arguments that would erupt during the parties, while I lay upstairs, just trying to sleep so I could go to school the next day. I remember hiding when the police would show up, terrified and alone, with no one to comfort me. Or crying and screaming when they would haul my mother away and not knowing when I would see her again. I remember being the one who had to make my own meals and get myself to school because there was no one there to look out for me. No one to remind me that I was just a kid, and I shouldn't have to do any of this on my own.

I was alone a lot, and I felt like no one cared about me. No one saw me. I felt worthless, invisible, as though I didn't matter. I didn't grow up feeling loved or accepted. Confidence was a foreign concept, and I was convinced I wasn't good enough. I never had the chance to join sports or the band, never

learned the social skills needed to make friends. Instead, I found myself desperate for attention and any kind of comfort. That's when I turned to alcohol and drugs—something to fill the emptiness I'd been carrying for so long. The cycle continued, an inevitable result of the environment I was raised in and the lack of support I had.

By high school, I was using drugs regularly, and as I got older, the substances became harder, the behaviors riskier. I didn't feel like I had a reason to live. I didn't know that help was available to me, or that treatment could be a path to recovery—it felt like something you had to do because you were a problem, not a place of healing.

In September of 2019, I felt something was off and went to the doctor. As an addict, I'd never willingly walked into a clinic or hospital, but something told me I needed to find out if I was pregnant. When they confirmed it, I was in shock. I didn't know what to do. I was terrified. Terrified of being judged. Terrified of being seen for who I truly was—an addict.

I was afraid of what people would think, afraid I'd lose my child, so I tried to detox on my own. I tried to stop using the hardest drugs, thinking that if I could just get through it, I could protect my baby. But I had no idea how dangerous it was to try and quit cold turkey when I was pregnant. Even with all the willpower I could muster, I couldn't stay clean.

When I had my daughter, I remember being in that hospital, feeling more alone than ever. The way I was treated in that hospital—it was as though they saw me as the problem, not the person in need of help. They didn't understand what it's like to be alone, to be an addict, to feel like you're constantly fighting an uphill battle.

But that day, something shifted. I realized how lucky I was. By the grace of God, my daughter was okay. The fear of losing her became the catalyst for change. It drove me to start attending meetings, to seek help, and to fight to be better. But it wasn't easy. It took years before I was truly clean.

Today, I see women just like me—women who are still trapped in that cycle of addiction, women who are pregnant and terrified, women who don't have the coping skills or the support they need. They feel like there's no one who understands them, no one to turn to. And the fear they carry—of judgment, of losing their children, of failing—is overwhelming. They need help. They need support.

Women who are pregnant and have children are found lacking support. If a woman showed up pregnant with children in tow on the doors of a treatment center there would be nothing they could do. They would need to be housed or sheltered in order for the mother to gain access to treatment. This is mind blowingly unacceptable. The act it takes to admit you need help can be one of the hardest things an addict can do.

To take that step and then be told they cannot take you in for services until this other area is met is detrimental and people die from this. We know that addiction is often genetic, but early intervention can reduce the risk that future generations will follow the same path. This bill is not just an investment in services—it's an investment in our children, our families, and the future of our community.

My support for this bill goes beyond just funding—it's about making sure our voices are heard. It's about ensuring that future generations aren't doomed to repeat the same cycles of addiction and poor environmental exposure. When we intervene early, before a child is born, we give both the parents and

their children a fighting chance. When parents can break free from addiction and find help, they can become better parents, better individuals, and role models for their children. Women need a recovery housing environment where they are not separated from their children. They can seek out recovery and they can heal in an environment that fosters safety and security with support. They need effective case management throughout their journey and they need follow-up resources to ensure the continuity of care. The State of North Dakota needs a more structured pathway for women to follow and seek out support without the fear of child protective services having to intervene. Imagine a time where CPS can be looked at as a source of help and support and not the bad guys. Imagine being able to end the stigma that women face and being able to help them and their children seek better lives and break that cycle. Imagine actually making a difference in people's lives and changing the way our people see our system.

I urge you to support HB 1012, not just because it addresses a critical need, but because it offers a chance for lasting change, healing, and hope. Thank you for the time you have given to read this testimony and I appreciate the work you do for our state.

February 4th, 2025

Representative Jon Nelson, Chairman
North Dakota State Legislature
House Appropriations Committee, Human Resources Division
600 East Boulevard Avenue
Bismarck, ND 58505

Chairman Nelson and Members of the House Appropriations Committee,

Law enforcement agencies across the state collaborate almost daily with domestic violence and sexual assault agencies in our local communities. These collaborative relationships have grown significantly throughout the past 40 plus years, with law enforcement agencies and domestic violence/sexual assault organizations working closely together for the safety of citizens and their children, while holding individuals responsible for these crimes accountable.

Our organizations work together for mutual benefit by providing shared training to staff, attending collaborative meetings, tracking criminal justice data, and making criminal justice system improvements on an ongoing basis.

When a sexual assault is reported, many of our communities activate a Sexual Assault Response Team. These multidisciplinary teams include members from law enforcement, medical professionals and advocates, responding together to ensure that victims of this invasive crime repeat the accounts of their experience the least number of times possible. This coordination ensures that evidence is collected, the chain of custody is followed, and evidence is preserved for prosecution, all while providing a trauma-informed response that gives victims the support they need.

In cases of domestic violence, officers respond in the heat of the moment during times of elevated risk to themselves and victims and must make decisions that protect the safety of all. Several communities participate in the Lethality Assessment Program, connecting victims of violence with a domestic violence advocate at the time of the incident, increasing awareness of safety services available to them while decreasing the likelihood that they will be killed during a future incident.

Law enforcement also supports the work of domestic violence and sexual assault organizations by responding to requests for welfare checks, providing police escorts in high danger situations, responding to security threats at shelters and offices when needed, serving and enforcing protection orders and much more. Related, our organizations count on the services of these agencies to provide safety, support, and guidance after our officers and deputies leave the scene. Through long-term support provided by domestic violence and sexual assault organizations, these complex patterns can be interrupted. The risk to victims and communities can be lessened through successful investigation, prosecution and ultimately rehabilitation for those who use violence.

The below undersigned fully support increased funding for the critical services provided by domestic violence and sexual assault agencies in our state.

FROM THE DESK OF ADAM MARTIN FOUNDER AND CEO OF F5 PROJECT

Chairman Vigesaa and members of the House Appropriations - Human Resources Division

Today, I stand before you to advocate for support of HB 1012, with a particular focus on Free Through Recovery and Community Connect. These programs have made a significant impact on citizens across North Dakota, providing essential services to our communities. From a provider's perspective, we have been able to offer care to an average of 500 clients each month, helping them secure housing, employment, and recovery.

However, I want to draw your attention to a critical component of our support system: the Recovery Housing Assistance Program (RHAP). This program has been vital in ensuring the success of initiatives like Free Through Recovery and Community Connect. It effectively bridges the gap between incarceration or treatment centers and stable housing. When speaking with providers across North Dakota, the most pressing challenge consistently identified is housing. The need for safe and affordable housing is particularly acute for individuals transitioning from prison or treatment centers. RHAP addresses this need by allowing us to secure temporary housing while we search for permanent solutions.

The program provides funding for participants to stay in sober living environments for up to three months, in stark contrast to the often precarious situations they face—such as living with friends for a week, in drug houses, or reconnecting with old acquaintances. I highlight this issue today because Governor Burgum has recognized the growing demand for sober living options in North Dakota and has proposed $4 million in his budget to address this need. Unfortunately, in the Armstrong budget proposal, this amount was reduced to $1.5 million, which will serve far fewer individuals than originally planned, especially considering the over 1,200 people currently on the RHAP waiting list.

I strongly urge this committee to review this situation and consider the essential amendments needed to support participants, their loved ones, and our communities as a whole. Your action today can make a meaningful difference for countless individuals in need.

Adam Martin, Founder and CEO of F5 Project

Chairman Nelson and members of the committee,

My name is Jeremy Traen, I have been an employee of ShareHouse since 2006 and have served ShareHouse in various roles. I became a licensed addiction counselor in 2011 and the President and CEO of ShareHouse since 2023. My personal mission as an employee of ShareHouse has always been to provide the most robust SUD services for the state. I am testifying today in support of HB1012.

ShareHouse first started as a half-way house in 1975 and since then has expanded services. Today, we operate residential services for all North Dakota residents in Fargo and Grand Forks. We also provide recovery housing, outpatient SUD, standalone mental health services, and medication assisted treatment in Fargo. Several of these services are provided via telehealth, which we intend on continuing to expand, to better reach rural communities in North Dakota. I am proud to say in 2024 ShareHouse served just under 1,500 unique clients through all services. Of those, 380 unique clients were funded by the SUD Voucher offered by the State. Just over 300 unique clients were served in ShareHouse's IMD facility, located in Fargo. At any given time ShareHouse has just over 30 SUD Voucher clients receiving residential services in Fargo.

When I was originally hired by ShareHouse I worked as a Behavioral Health Technician at Robinson Recovery Center, which operated from a North Dakota grant for uninsured citizens who needed residential treatment for methamphetamine use. RRC, as I understand it, was a bit of a preamble to our current SUD Voucher. I have seen the development of the Voucher and witnessed firsthand the enormous impact it has had on North Dakotans throughout the entire State. It all is a sign of how well our providers, state departments, and legislators work together. I would like to share several short success stories from the SUD Voucher written by ShareHouse team members:

- I had one guy in the past year or so that stands out because they did not seem ready for treatment, and we thought they would leave early. They ended up staying a while in treatment and struggled with graduating/ the next steps because they felt like they were learning so much here. Their confidence grew month by month and you could see the hope and belief in themselves returning as they spent more time working on themselves and building themselves back up. They smiled more and more. They laughed more and more. They went from isolating to building a community with the guys here and it was inspiring to see.
- One gentleman found himself in the AA and NA community and dove into step work. He ended up getting a job through his sponsor and helped take care of a property for him. This allowed him to save up to get his own place and building support needed to help. They had a significant loss in the family (their dad) and used their support to get through it and remain sober. He attributed a lot of that to the connections he made through treatment.

- A 30ish year-old female and her parents were grateful for the voucher. She was at an in-between income, didn't have insurance, needed residential services and wanted the full gamut of treatment down through aftercare. Her parents attended sessions with the counselor while in outpatient; in the meetings the entire family expressed their gratitude for the services she was able to attend. She continued with aftercare for a while and was in services with us for nearly a year. She was also became a Recovery Living client.
- There was a 30ish year-old male. His first treatment course was 5 months, residential through LIOP. He did extremely well, however he had a relapse about 6 months later. The relapses and the treatment were both brief. He was in residential for about a month, then LIOP for another month and told us he felt confident to return to his support in the community. He has remained sober and has continued to refer clients to treatment and employed clients.
- There was a female around 30 years old. Her father was suffering from cancer; therefore, she wanted to stay in the area. She was grateful for the opportunity to attend treatment near him in the last weeks of his life. We don't know what is going on in her life now, but we do know she had that opportunity due to the voucher.

The $2.5 million recommended additional dollars to the SUD Voucher is a great help to our field in combating addiction. I know it will go a long way in creating more success stories. I am in full support of such a decision and appreciate this committee's understanding of the level of need in North Dakota for the funds. This will allow for additional services throughout the State by the different participants of the SUD Voucher program.

During the 2023 legislation session, it was decided only 45% of SUD Voucher money would be allocated to IMD facilities. While it is understood the intent was to avoid certain providers using all the money there is a projected shortage allocated to IMD facilities and a projected overage for non-IMD facilities of almost the same amount. I am in full support for this committee to reallocate funding to avoid a shortage of services to North Dakotans. Currently, the only alternative is not admitting any SUD Voucher clients for several months. Should this happen, it would negatively affect upwards of 250 North Dakota citizens when factoring all IMD facilities.

In addition, I am in support to find a way to avoid the same shortage from happening during the 2025-2027 biennium. All in effort to continue the great work we all do in creating success stories for our people of North Dakota.

Thank you for your attention and time on this matter and I will answer any questions if there are any.

Sincerely,

Jeremy Traen
President/CEO
ShareHouse, Inc.

50TH ANNIVERSARY
SHAREHOUSE
Recovery is possible.

Chairman Nelson and members of the committee,

My name is Emma Quinn, and I am a constituent of District 46 in Fargo. I am testifying today in support of HB 1012 regarding fully funding the Behavioral Health Division. I am a consumer of behavioral health services in North Dakota and live with a lifelong serious mental illness. I have worked in the behavioral health field for the past 6 years. I have worked as a peer support specialist and care coordinator for Free Through Recovery and Community Connect. Currently, I work as the Business Development Manager for ShareHouse where I connect with behavioral health providers across the state of North Dakota with one main question "How can I help?". I hold consumer positions on the North Dakota Behavioral Health Planning Council and the Medicaid Medical Advisory Committee. I strongly believe that everyone should have access to good affordable behavioral health services no matter where you live. I have spent the last 6 years studying and advocating for better behavioral health services in North Dakota, and the views I express here today are of my own and not on behalf of an employer or committee.

We have a great team at the state lead by Pam Sagness and the programs implemented by the state have changed countless lives. By investing in behavioral health, we are making a difference in every single North Dakotan's life. Mental health and addiction does not discriminate, and everyone knows someone that has struggled. Investing in behavioral health is more than just helping people get their mental health back on track or helping people find recovery. It is about investing in families, it's about parents not having to bury their children due to overdoses and suicides, and most importantly it's about lifting people up so that they can one day lift others up as well.

North Dakota's peer support program is a great example of this exact concept. Prior to taking the peer support training and working as a peer support, I was working as a part time server in a restaurant. I knew I wanted to do something more with my career, but I felt stuck and unworthy of a career because my mental health had proven to be a challenge in my past. In that peer support training something magical happened, for the first time outside of treatment and waiting rooms I saw myself in others. The people that were in the training not only understood what it felt like to be me, but we all encouraged each other to be the best versions of ourselves. That peer support training changed my life and that was because legislators decided to invest in behavioral health.

We have a lot of things going for us here in North Dakota but there is still plenty of work to be done. The one thing I constantly hear about when talking to other providers is the lack of workforce, so providers are unable to expand services. Right now, companies are just stealing employees from each other. We simply do not have enough behavioral health professionals coming into the workforce to keep up with the demand.

The number of Licensed Addiction Professionals that are entering the workforce is dwindling and this is alarming. Peer supports are a wonderful way to boost the workforce, however they do not replace clinicians and as a state we need to be doing more to invest in our own citizens so that way they want to come work in the behavioral health field and stay in North Dakota. This is why the Behavioral Health Workforce Administrator is vital to growing our workforce. This position is advancing Aim 7 of North Dakota's Behavioral Health strategic plan. Which if you are unfamiliar, Aim 7 has the goal of engaging in targeted efforts to recruit and retain a qualified and competent behavioral health workforce. Private providers are often looking to the state for guidance and without proper staffing across the division the quality of services will be affected.

Despite our behavioral health programs reaching key populations we are still missing a large chunk of people that need help. When I was a young mother and struggling with my mental health, I was forced to make the difficult decision to leave my young son with his father and move back to my home state of Oregon so I could be near my support system and receive mental health treatment. It wasn't until almost 6 years later when my mental health was at a better place that I could move back to North Dakota to be near my son. This is a reality of the choices that many families in North Dakota face. In North Dakota you can get help, or you can be a parent but because of lack of services you cannot do both at the same time, and that frankly is unacceptable.

I encourage you to invest in the future of North Dakota families and fund the development of a robust Pregnant and Parenting Program with wrap around services including recovery living. We have North Dakota providers that are willing to do the work, that have formed partnerships that agree we need this service. These key providers are willing to help, but we need money to purchase or build a facility as well as build programing. Too many families are being split up so a parent can receive treatment. This can not continue to go on, North Dakota families deserve better.

I often wonder what my life would be like if I would have had a program like Free Through Recovery or Community Connect when I was severely struggling. A care coordinator that helped me navigate a system I didn't fully understand and a peer support that understood what I was going through. That type of support would have changed my life. Please continue to fund these vital programs. The number of success stories that have come out of these programs is astounding. I am happy to share stories of how these programs have changed people's lives, but for the sake of time I won't go into detail.

We need to have a robust full continuum of care of services for North Dakotans. This means we need to continue to invest in our community-based programs as well as our most intensive services. When people need intense services such as inpatient care, they

deserve to go to a facility that is therapeutic. Currently the North Dakota State Hospital is far from a therapeutic environment.

As a mentally ill individual, being sent to the current state hospital is my biggest fear. I am not afraid of treatment or how staff will treat me, in fact there are many wonderful people that work at the state hospital and make the best of what they have. However, the building itself is an institution plain and simple.

When I was the chair of the Behavioral Health Planning Council, I started studying the state hospital and have talked with the staff on multiple occasions. When I ask how I can help I always get the same answer, "we need a new building". I would encourage every legislator to tour the state hospital and explore the museum. The history of state hospitals is dark and scary, and it is time that we stop subjecting our citizens to treatment in an institution that is beyond repair.

The new state hospital renderings are of a therapeutic environment. A place where people can actually get help, a place that actually has windows. Please invest in a new state hospital, I am begging you to stop sending people to a rundown institution.

While a new state hospital is one piece to North Dakota's behavioral health puzzle we must remember to continue to invest in other community based programs. We need beds in our local communities as well but not everyone needing services will be comfortable with getting treatment in their home communities. I personally would not choose to get treatment locally as I know too many people and I don't want them to know just how sick I am. Clients of behavioral health services need to have control of some of their choices, it's how we empower people to get actively involved in their treatment.

When people are ready to get help, we must meet them where they are at and reduce as many barriers as we can. The SUD voucher has been and continues to be a vital resource for consumers. The SUD voucher has helped families heal and made our communities safer.

By continuing to invest in the SUD voucher we are providing critical funding to the people that need it the most. I ask that you implement the recommendation of Governor Armstrong's proposed 2.5 million dollar increase to the SUD voucher, so that more North Dakotans can have access to their choice of provider.

Currently the SUD voucher only pays for treatment but not medical care. I did not realize what a barrier this was for people receiving care until my office was placed directly next to ShareHouse's admission department.

If we want to be the healthiest state in the nation, then it is critical that we fund people's medical care when they in are in a residential facility. People in active addiction are not prioritizing their physical health and are often delaying recovery in order get their physical health care under control so that they can be cleared to come to treatment. It is hard enough to make a phone call and ask for help let alone actually show up and do the work, please do not make it harder for people to get help.

Lastly, we need to be investing in recovery housing. Treatment for both mental health and substance use disorder are just one piece to recovery. People cannot focus on getting healthy if they are worried about where they will live and how they will survive. Stable supportive housing is one of the fundamental pieces to the recovery puzzle and there are many barriers that play a part in why people can't find housing. Currently the Recovery Housing Assistance Program (RHAP) has a waitlist of providers wanting to help but there is not enough money in the program to help ensure people find housing after treatment.

I hope my testimony has helped highlight the wonderful programs that we already have in place and shed light on some of the holes that still exist in our system. I have always looked at our state's behavioral health as an echo system where everyone plays a part and where every part is equally important. We must build a new state hospital as well as investing in community based programs, it is the only way we will be able to get a handle on this behavioral health crisis. I ask that you fully fund our behavioral health division and give them room to grow so that every North Dakotan can have the opportunity to be happy and healthy.

Thank you for your time and I am prepared to answer any questions that you may have.

-Emma Quinn

Chairman Nelson and members of the committee,

My name is Emma Quinn, and I am a constituent of District 46 in Fargo. I am testifying today in support of HB 1012 regarding fully funding the Behavioral Health Division. These key providers are willing to help, but we need money to purchase or build a facility as well as build programing. Too many families are being split up so a parent can receive treatment. This can not continue to go on, North Dakota families deserve better.

I often wonder what my life would be like if I would have had a program like Free Through Recovery or Community Connect when I was severely struggling. A care coordinator that helped me navigate a system I didn't fully understand and a peer support that understood what I was going through. That type of support would have changed my life. Please continue to fund these vital programs. The number of success stories that have come out of these programs is astounding. I am happy to share stories of how these programs have changed people's lives, but for the sake of time I won't go into detail.

We need to have a robust full continuum of care of services for North Dakotans. This means we need to continue to invest in our community-based programs as well as our most intensive services. When people need intense services such as inpatient care, they

deserve to go to a facility that is therapeutic. Currently the North Dakota State Hospital is far from a therapeutic environment.

As a mentally ill individual, being sent to the current state hospital is my biggest fear. I am not afraid of treatment or how staff will treat me, in fact there are many wonderful people that work at the state hospital and make the best of what they have. However, the building itself is an institution plain and simple.

When I was the chair of the Behavioral Health Planning Council, I started studying the state hospital and have talked with the staff on multiple occasions. When I ask how I can help I always get the same answer, "we need a new building". I would encourage every legislator to tour the state hospital and explore the museum. The history of state hospitals is dark and scary, and it is time that we stop subjecting our citizens to treatment in an institution that is beyond repair.

The new state hospital renderings are of a therapeutic environment. A place where people can actually get help, a place that actually has windows. Please invest in a new state hospital, I am begging you to stop sending people to a rundown institution.

While a new state hospital is one piece to North Dakota's behavioral health puzzle we must remember to continue to invest in other community based programs. We need beds in our local communities as well but not everyone needing services will be comfortable with getting treatment in their home communities. I personally would not choose to get treatment locally as I know too many people and I don't want them to know just how sick I am. Clients of behavioral health services need to have control of some of their choices, it's how we empower people to get actively involved in their treatment.

When people are ready to get help, we must meet them where they are at and reduce as many barriers as we can. The SUD voucher has been and continues to be a vital resource for consumers. The SUD voucher has helped families heal and made our communities safer.

By continuing to invest in the SUD voucher we are providing critical funding to the people that need it the most. I ask that you implement the recommendation of Governor Armstrong's proposed 2.5 million dollar increase to the SUD voucher, so that more North Dakotans can have access to their choice of provider.

Currently the SUD voucher only pays for treatment but not medical care. I did not realize what a barrier this was for people receiving care until my office was placed directly next to ShareHouse's admission department.

If we want to be the healthiest state in the nation, then it is critical that we fund people's medical care when they in are in a residential facility. People in active addiction are not prioritizing their physical health and are often delaying recovery in order get their physical health care under control so that they can be cleared to come to treatment. It is hard enough to make a phone call and ask for help let alone actually show up and do the work, please do not make it harder for people to get help.

Lastly, we need to be investing in recovery housing. Treatment for both mental health and substance use disorder are just one piece to recovery. People cannot focus on getting healthy if they are worried about where they will live and how they will survive. Stable supportive housing is one of the fundamental pieces to the recovery puzzle and there are many barriers that play a part in why people can't find housing. Currently the Recovery Housing Assistance Program (RHAP) has a waitlist of providers wanting to help but there is not enough money in the program to help ensure people find housing after treatment.

I hope my testimony has helped highlight the wonderful programs that we already have in place and shed light on some of the holes that still exist in our system. I have always looked at our state's behavioral health as an echo system where everyone plays a part and where every part is equally important. We must build a new state hospital as well as investing in community based programs, it is the only way we will be able to get a handle on this behavioral health crisis. I ask that you fully fund our behavioral health division and give them room to grow so that every North Dakotan can have the opportunity to be happy and healthy.

Thank you for your time and I am prepared to answer any questions that you may have.

-Emma Quinn

Chairman Nelson and members of the committee,

My name is Emma Quinn, and I am a constituent of District 46 in Fargo. I am testifying today in support of HB 1012 regarding fully funding the Behavioral Health Division. I am a consumer of behavioral health services in North Dakota and live with a lifelong serious mental illness. I have worked in the behavioral health field for the past 6 years. I have worked as a peer support specialist and care coordinator for Free Through Recovery and Community Connect. Currently, I work as the Business Development Manager for ShareHouse where I connect with behavioral health providers across the state of North Dakota with one main question "How can I help?". I hold consumer positions on the North Dakota Behavioral Health Planning Council and the Medicaid Medical Advisory Committee. I strongly believe that everyone should have access to good affordable behavioral health services no matter where you live. I have spent the last 6 years studying and advocating for better behavioral health services in North Dakota, and the views I express here today are of my own and not on behalf of an employer or committee.

We have a great team at the state lead by Pam Sagness and the programs implemented by the state have changed countless lives. By investing in behavioral health, we are making a difference in every single North Dakotan's life. Mental health and addiction does not discriminate, and everyone knows someone that has struggled. Investing in behavioral health is more than just helping people get their mental health back on track or helping people find recovery. It is about investing in families, it's about parents not having to bury their children due to overdoses and suicides, and most importantly it's about lifting people up so that they can one day lift others up as well.

North Dakota's peer support program is a great example of this exact concept. Prior to taking the peer support training and working as a peer support, I was working as a part time server in a restaurant. I knew I wanted to do something more with my career, but I felt stuck and unworthy of a career because my mental health had proven to be a challenge in my past. In that peer support training something magical happened, for the first time outside of treatment and waiting rooms I saw myself in others. The people that were in the training not only understood what it felt like to be me, but we all encouraged each other to be the best versions of ourselves. That peer support training changed my life and that was because legislators decided to invest in behavioral health.

We have a lot of things going for us here in North Dakota but there is still plenty of work to be done. The one thing I constantly hear about when talking to other providers is the lack of workforce, so providers are unable to expand services. Right now, companies are just stealing employees from each other. We simply do not have enough behavioral health professionals coming into the workforce to keep up with the demand.

The number of Licensed Addiction Professionals that are entering the workforce is dwindling and this is alarming. Peer supports are a wonderful way to boost the workforce, however they do not replace clinicians and as a state we need to be doing more to invest in our own citizens so that way they want to come work in the behavioral health field and stay in North Dakota. This is why the Behavioral Health Workforce Administrator is vital to growing our workforce. This position is advancing Aim 7 of North Dakota's Behavioral Health strategic plan. Which if you are unfamiliar, Aim 7 has the goal of engaging in targeted efforts to recruit and retain a qualified and competent behavioral health workforce. Private providers are often looking to the state for guidance and without proper staffing across the division the quality of services will be affected.

Despite our behavioral health programs reaching key populations we are still missing a large chunk of people that need help. When I was a young mother and struggling with my mental health, I was forced to make the difficult decision to leave my young son with his father and move back to my home state of Oregon so I could be near my support system and receive mental health treatment. It wasn't until almost 6 years later when my mental health was at a better place that I could move back to North Dakota to be near my son. This is a reality of the choices that many families in North Dakota face. In North Dakota you can get help, or you can be a parent but because of lack of services you cannot do both at the same time, and that frankly is unacceptable.

I encourage you to invest in the future of North Dakota families and fund the development of a robust Pregnant and Parenting Program with wrap around services including recovery living. We have North Dakota providers that are willing to do the work, that have formed partnerships that agree we need this service. These key providers are willing to help, but we need money to purchase or build a facility as well as build programing. Too many families are being split up so a parent can receive treatment. This can not continue to go on, North Dakota families deserve better.

I often wonder what my life would be like if I would have had a program like Free Through Recovery or Community Connect when I was severely struggling. A care coordinator that helped me navigate a system I didn't fully understand and a peer support that understood what I was going through. That type of support would have changed my life. Please continue to fund these vital programs. The number of success stories that have come out of these programs is astounding. I am happy to share stories of how these programs have changed people's lives, but for the sake of time I won't go into detail.

We need to have a robust full continuum of care of services for North Dakotans. This means we need to continue to invest in our community-based programs as well as our most intensive services. When people need intense services such as inpatient care, they

deserve to go to a facility that is therapeutic. Currently the North Dakota State Hospital is far from a therapeutic environment.

As a mentally ill individual, being sent to the current state hospital is my biggest fear. -Emma Quinn

GREATER NORTH DAKOTA CHAMBER
HB 1012
House Appropriations Committee
Human Resources Division
Chair Jon Nelson
February 5, 2025

Mr. Chairman and members of the Committee, my name is Andrea Pfennig, and I am the Vice President of Government Affairs for the Greater North Dakota Chamber. GNDC is North Dakota's largest statewide business advocacy organization, with membership represented by small and large businesses, local chambers, and trade and industry associations across the state. We stand in **support** of House Bill 1012 as it relates to childcare.

Labor availability has been identified as the top business concern facing companies in North Dakota. In our 2024 ND Economics and Employer Survey of our membership:

- 70% of respondents indicated they were having trouble hiring employees.
- 69% of respondents indicated that childcare was an issue for their organization.

In the 2023 legislative session, a historic $65.6 million funding package was passed to help address childcare shortages within the state. GNDC would like to express its appreciation to the legislative body for recognizing the impacts lack of childcare can have on the workforce. Coverage of childcare expenses for childcare staff, which became available in June of 2024, has been beneficial.

The Working Parents Child Care Relief Program, which was part of the package, was a positive step in addressing childcare issues and worked well for some of our members. However, there were also some challenges with the program.

- The established income thresholds for eligibility excluded some employees.
- Age limitations were a challenge as only ages 0-3 qualify.
- Companies with a large number of employees may find it administratively burdensome.
- The defined contribution amounts limit flexibility. For example, at the inception of the program employers were required to provide $300/month/employee. Currently there is an additional $150/month/employee option.

The biggest issue with the program was lack of awareness. Only 33% of respondents indicated awareness of the program.

Are you aware of the state childcare employer match program?

GNDC hosted a Policy Outlook regarding the program in October of 2023. These are virtual meetings designed to provide our members with the opportunity to directly interact with policy

leaders and subject matter experts. We reached over 60 members through this event. We also provided DHHS with some feedback on their Employer Toolkit at their request. We feel that collaboration efforts could be strengthened. There have been other instances in which GNDC offered the DHHS an opportunity to reach our membership, but we did not receive a response. Whether done in collaboration with GNDC or through some other method, based on the results of our survey, we do feel additional outreach is needed in some way.

Childcare remains an issue for our members, and we would like to express our support for effective and rapidly deployed solutions.

To whom it may concern,

Prior to entering treatment I lived a life consumed with alcohol and drugs, where a day could not go by without getting high or drunk which led me to end up doing things negative things to get my drugs. I've been addicted to drugs and alcohol since I was 15 years old. My addiction forced me to fee my addiction, which led to joining a gang and selling drugs. I learned these behaviors from watching my father steal cars and sell drugs from a young age. I didn't see the harm in these things, it was all I knew, and I didn't realize where these behaviors would take me in life. I chose drugs over my children and their mothers over and over. Living with my addiction and trying to become a man was one of the toughest parts of my life. My mother told me I needed to move so I came to North Dakota, within months I was right back to drinking and using. I lost my job and went back to finding ways to feed my addiction. I ended up losing my kids, my wife, my housing, and started pushing everyone who loved me and wanted me to get help away. I ended up in jail facing four felonies on November 7, 2023 and was looking at up to 25 years in prison at the age of 29. I was truly beat in life and was over the way I was living. I reached out to a fellow inmate for help with my drug problem. He told me to ask for an evaluation, through that I learned about the SUD Voucher program. When I was accepted into this program the only place that would take me was Providence House. I waited for two months for the courts to let me go get help. On February 29, 2024 I started my treatment at Providence and I quickly realized there was a way to break free from my addiction. With the help of my counselors and a 12-step program I started to learn how to live a life without using drugs or drinking alcohol. After I completed my residential program I knew I needed more time in treatment. With the help of the recovery housing program I was able to move into Endeavor Sober Living and step down to a day treatment program at Providence. I was able to get a sponsor and started working the steps every other week. I then gained employment in the community and started night programming in a lower level of care. I started to learn responsibilities in life and how to live the right way in life. Over the last year I worked through the 12 steps and continued with treatment and successfully graduated treatment. I still reside in sober living, I am sponsoring other people in the program and give back to the community regularly. My life today has changed 100%. The way I look at life is completely different now also. I have my family back and not a day goes by that I think about using or drinking. I have made the decision to stay in the Watford area and bring my family here. I have been offered a job at Providence that will allow me to stay involved and help the new guys coming into the program. The decision to change is the best choice I have ever made in my life. Thanks to Providence, Endeavor, the SUD Voucher program, and the Recovery Housing Program I have been given the opportunity to change my life and help others find hope in recovery.

Sincerely,

Timothy Mitchell

Testimony Prepared for the

House Appropriations Committee/Human Resources Division

February 4, 2025

By: Matthew Johansen, McKenzie County Sheriff Re: HB 1012

Dear Chairman Nelson and Members of the House Appropriations Committee/HR Division,

My name is Matthew Johansen, McKenzie County Sheriff, and I am here today to support HB 1012.

As a community, we face significant challenges when it comes to providing crisis care for individuals actively in crisis within McKenzie County. The resources available are exceedingly sparse, with the McKenzie County Hospital lacking on-site psychiatric care and no 24-hour crisis care locations in existence. Additionally, all in-patient crisis care facilities are located outside of McKenzie County.

Current State of Crisis Care in McKenzie County

- **Limited Facilities**: There are no local facilities providing inpatient crisis care, necessitating transportation of individuals in crisis to locations outside McKenzie County.
- **High Volume of Calls**: In 2023, the McKenzie County Sheriff's Office responded to 49 calls originating as suicide threats, with a similar number (48) in 2024. This does not account for incidents where threats of suicide evolved from other calls.
- **Committal Transports**:
  - In 2023, the Sheriff's Office completed 46 committal transports, with deputies traveling 5,888 miles, including 12 emergency committals issued by a physician.
  - In 2024, the total committal transports were 39, covering 16,490 miles, with 31 emergency committals issued by a physician, indicating an increased burden on deputies.

Challenges in Crisis Response

- **Initial Response**: Deputies must determine the nature of the incident and decide, often without immediate physician support, whether the person should be brought to the

emergency room. This process involves gathering facts and evidence surrounding the crisis.

- **Physician Consultation**: The emergency room physician then confers with a psychiatric physician from another facility to determine if an emergency committal is necessary, a process that can take hours and frustrate the individual in crisis.

Benefits of AVEL eCare

- **Comfortable Crisis Resolution**: Individuals in crisis are more willing to open up in familiar surroundings. AVEL eCare allows deputies to offer the opportunity for the individual to speak with a mental health professional via video chat in their current, comfortable location.
- **Visible Assessment**: Video chat enables professionals to visibly assess the patient's demeanor and accurately evaluate their condition, versus solely relying on audible assessments.
- **Enhanced Decision Making**: Deputies retain authority in decision-making, considering the professional's recommendations while assessing the viability of the patient remaining in place.
- **Follow-Up Resources**: Introduction of follow-up through Human Services ensures that patients receive additional resources and support post-crisis, a system that did not exist before AVEL eCare.
- **Efficiency in Staffing**: If a decision is made for the patient to remain in place, deputies can return to other calls for service more quickly, rather than waiting in an emergency room.

Endorsement of AVEL eCare's Crisis Care Program

In today's world, law enforcement agencies are increasingly being called upon to respond to mental health and substance abuse crises. While officers and deputies are dedicated to serving their communities and genuinely want to help, they often lack the clinical training necessary to effectively assess and support individuals in crisis. This is where Avel eCare's Crisis Care program makes a transformative difference.

Since the McKenzie County Sheriff's Office implemented the program in March of 2024, we have utilized it multiple times and it has saved countless trips to the local emergency room and mental health facilities across the state. Avel eCare's innovative virtual co-responder program has been a game-changer for McKenzie County. By providing 24/7 access to behavioral health professionals, this program bridges the gap between immediate crisis response and professional mental health care. Utilizing cellular-enabled tablets, behavioral health professionals can connect

with law enforcement officers on the scene, assisting with de-escalation, stabilization, and safety assessments during crisis situations—whether on the side of the road or in a living room.

What truly sets Avel eCare's Crisis Care program apart is its comprehensive approach. The support does not end after the initial crisis response. Instead, the program ensures that individuals who were in crisis are seamlessly connected to local mental health resources for follow-up care. This continuity of care is essential in fostering long-term recovery and stability for those affected by mental health crises.

I wholeheartedly endorse Avel eCare's Crisis Care program for its dedication to improving outcomes for individuals in crisis and its unwavering support for law enforcement officers. This program is a testament to the power of innovative solutions in addressing critical gaps in our mental health and public safety systems.

I respectfully request that funding is maintained for this program now and in the future.

Thank you.

Matthew Johansen

McKenzie County Sheriff

SANFORD HEALTH

House Appropriations Human Services Division
Representative Jon Nelson, Chair
February 5, 2025
HB 1012

Chairman Nelson and members of the House Appropriations Human Services Division,
Good morning. For the record my name is Todd Schaffer and I serve as Sanford Health Bismarck President/CEO and president of the N.D. Hospital Association.

Thank you for this opportunity to testify in support of HB 1012 and thank you for supporting the multitude of programs funded through this important budget bill. I would like to use this time to talk about successful initiatives you have fostered through strategic initiatives and sustainable Medicaid reimbursement rates and how we are partnering with the N.D. Department of Health and Human Services (DHS) to better serve patients and their families.

Quality/VBP
We appreciated the opportunity to participate in the Health Care Task Force over the last 18 months to tackle the topic of health care costs, access to services and information sharing. One of the task force's recommendations was to focus on improving quality. We strongly support that recommendation and see great potential of bringing multiple stakeholders together to address specific areas needing improvement.

Improving quality entails many things - maximizing the use of preventive services such as vaccinations and well-child visits, increasing compliance with screenings such as mammograms and colonoscopies and managing chronic diseases such as diabetes and heart disease. More than half of healthcare costs in the United States are attributed to preventable chronic diseases; by working together we can help patients and their families prevent illness and make positive choices to improve overall health.

Improving quality is increasingly embedded in value-based purchasing (VBP) programs, meaning reimbursement from Medicaid, Medicare and private payors is based upon meeting quality metrics. This is an important transition from fee-for-service care models to pay-for-performance.

N.D. Medicaid VBP The traditional Medicaid VBP program is an excellent example of a successful public-private partnership designed to improve healthcare. North Dakota PPS hospitals have been working with N.D. Medicaid for more than two years to create the meaningful, sustainable program now underway.

Initial conversations with DHS were focused on selecting the right metrics to truly improve the wellbeing and outcomes for North Dakota's Medicaid-covered individuals and families. One of the recommendations from the State was fluoride treatments for children**.** Although this is not a treatment typically offered in medical clinics, as you have heard N.D. Medicaid Director Sarah Aker explain, our

Medicaid-covered children have poor access to dental services. Recognizing the important need to provide this preventive service, we are in the process of building workflows to offer fluoride treatments to Medicaid-covered children.

As you have seen, North Dakota is below average on this measure, but keep in mind we are just beginning to focus on fluoride as a quality measure. Providers are ramping up to offer this service consistently to Medicaid-covered families and we anticipate the measure will increase markedly within a year.

Another measure – depression screenings – is a metric we are working to improve in multiple ways. You may recall the metrics you saw for North Dakota providers were also below national averages. One of the reasons the reported scores on this measure are low is that there is a gap in reporting data to the State. As you heard Ms. Aker explain, by working together we realized Medicaid's data does not reflect visits that are covered by other payers. With depression screenings, as an example, if a patient has both Blue Cross Blue Shield and Medicaid coverage, the bill is first sent to BCBS; if BCBS covers the service, Medicaid is not billed (i.e. Medicaid is informed the service was provided). In the case of depression screenings, we are working with the State's vendor to submit supplemental data in an ingestible form for the State's system.

In addition to addressing data gaps, we are working on operational improvements to increase the number of patients screened. One example of this work is automating the screening for those patients who use MyChart. If you have had an appointment lately, you may have noticed that when you complete the online check-in process, MyChart asks you a couple of questions related to depression. Depending on how you answer, it will trigger additional screening questions when you have your visit. Additional changes to better meet patients' needs in the area of depression include:

- Embedding behavioral health providers in our primary care clinics and specialty clinics
- Deploying technology to periodically check in on patients through text messages
- Expanded tele-behavioral

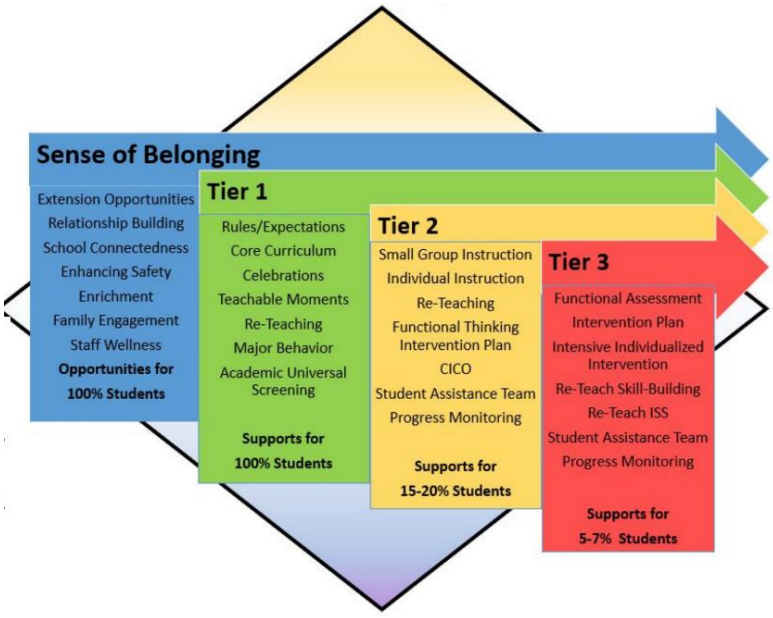
Challenges to serving patients and their families covered by Medicaid are unique in that this population struggles disproportionately with social determinants of health. Increasing the number of well-child visits, as another example, requires focused resources and operational changes to support families who need housing, transportation, childcare, expanded hours and access to nutritious food.

The bottom line is that the VBP partnership is going well, and we are moving in the right direction. Next steps will include increased collaboration on how we – the State, hospitals and additional partners such as public health – can work together to find innovative ways to continually improve quality.

It is important to note that North Dakota hospitals have been successful in numerous value-based, quality improvement programs. In the last two years, Sanford Fargo and Sanford Bismarck received 5-

star and 4-star status awards, respectively, from the Centers for Medicare and Medicaid Services (CMS). Hospitals throughout the state have achieved similar awards recognizing quality and affordability.

BEHAVIORAL HEALTH



As with the N.D. Medicaid program, partnering with DHS behavioral leadership team is appreciated and making a positive impact on the patients we serve. Our team had the opportunity to share a comprehensive overview of our behavioral health program at the April 8, 2024 interim Human Services Committee meeting. The presentation[1,2] included a bottom-up overview of our services, i.e. our community partnerships, State partnerships, outpatient services, acute inpatient services and growth.

Thank you for the many policy decisions you have supported to help private providers increase access to behavioral health, including:

- PSYPACT
- Counselor training supervision
- Medicaid reimbursement for predoctoral psychology interns

School-based care: Multiple tiered systems of support (MTSS)

Initiated in 2017 by the DHS Behavioral Health Services Division and funded by this committee, the multiple tiered systems of support (MTSS) pilot program began as a partnership between the State, Simle Middle School and Sanford Health. Designed to support students and their families, the model improves student outcomes while conserving limited behavioral health provider resources. The model teaches school teams to provide a tiered approach to interventions, problem solving and collaboration.

The tiered support program helps 100s of students and their families get the help they need; those students that are identified as needing support from a licensed therapist are referred to our behavioral health provider who meets with the student at the school (or virtually), removing barriers to care and improving

[1] https://ndlegis.gov/sites/default/files/committees/68-2023/25.5103.02000presentation0940.pdf
[2] https://video.ndlegis.gov/en/PowerBrowser/PowerBrowserV2/20240408/-1/31970 (video begins 9:32:30)

collaboration with the school's team. The successful model has achieved reductions in disciplinary actions such as visits to the principal's office and referrals to youth police services.

Sanford's school partnerships have grown to seven schools located in Bismarck, Wilton and Dickinson. We are committed to continuing this work with all schools that commit to completing the MTSS training. In 2024 we provided more than 2,000 visits to students.

Behavioral health in western North Dakota

We have prioritized creating access to services in our Dickinson footprint, essentially building an entire service line where previously one did not exist. We have hired a psychologist, an LPCC and licensed certified social workers. Our care coordinators – supported by an NDDHHS grant – manage high-risk patients, providing critically important coordination and crisis services.

In terms of **overall behavioral health workforce**, we have focused on growing our outpatient and acute care services on all levels. Over the last five years, our Fargo market increased from 73 providers (psychiatrists, psychologists, nurse practitioners and master's level therapists) to 98. Our Bismarck market nearly doubled, growing from 20 providers to 39.

A key to growing our behavioral health workforce is to train students in our North Dakota facilities. Sanford provides the following training programs:

- **Psychiatry:** Adult psychiatry residency program, psychiatric nursing, psychiatric mental health nurse practitioner clinical rotations and supervision for rural communities
- **Psychology:** Practicum students, predoctoral internship, postdoctoral residency (launching this year)
- **Master's level therapists:** Student-led clinics, sponsorships, supervision for independent licensure

Workforce development

Switching gears to workforce development in general, all North Dakota healthcare providers have been working hard to find innovative and sustainable ways to recruit and retain workforce. As part of the legislature's study on the topic of contract nursing, note Sanford Health Human Resources Vice President DJ Campbell gave a comprehensive overview[3,4] of Sanford's workforce development initiatives at the Aug. 30, 2023 interim Health Care Committee.

Sanford provides more than 150,000 hours of clinical training for nursing students each year and we train medical students and residents in primary care and several specialty areas including neurology, psychiatry and orthopedic surgery. Between now and next year we will launch fellowship programs in cardiology and surgical critical care in Fargo and an internal medicine residency program in Bismarck. We

[3] https://ndlegis.gov/sites/default/files/committees/68-2023/25.5026.02000_presentation1415c.pdf
[4] https://video.ndlegis.gov/en/PowerBrowser/PowerBrowserV2/20230829/-1/31797 (video begins 2:08:40)

also train radiology technologists, respiratory therapists, emergency medical responders and paramedics.

Internationally-educated nurses Last session you approved the creation of a state Office of Legal Immigration. The acknowledgment and support for recruiting much-needed workers from other countries is sincerely appreciated. Sanford has hired 446 internationally-educated nurses in our Fargo and Bismarck facilities. The nurses are highly-qualified – they must pass the National Council Licensure Examination (NCLEX) and an English proficiency exam – and they are eager to join our workforce. By working to create a well-designed orientation program (360 hours per nurse) and robust community support program aimed at helping nurses and their families find housing and community connections. Our retention rate thus far is over 75 percent.

Collectively, our workforce development programs and IEN successes have helped us reduce the number of contract nurses, a.k.a. travel nurses, necessary to staff our hospitals and clinics. In 2020, Sanford spent more than $25 million to hire 464 independent contract labor staff on varying assignments to offset staffing gaps in our clinics and hospitals. Flash forward to 2025 and we have reduced our need for contract labor to about 100 contracted nurses thanks in large part to workforce development programs created and supported by our state legislature.

Capital investments

With your support, hospitals across the state have been able to invest in expanding access via programming and capital construction products. At Sanford Bismarck we have maximized every square inch of our facilities and are working hard to meet growing demand. Our hospital operates beyond capacity most days, setting record-high visits in our emergency room, hospital admissions and deliveries. To accommodate demand we staff every bed, expanded our emergency room capacity and have implemented multiple initiatives and construction projects to improve efficiency. To alleviate some of the pressure our emergency room, we built an urgent care center in south Bismarck and are adding 36 hospital rooms. We could not make these improvements without your support.

Chairman Nelson and members of the committee – I want to again thank you for your time today and for supporting the many programs that positively impact the patients and communities we serve.
I would welcome any questions you might have.

Todd Schaffer, M.D.
Sanford Bismarck President/CEO
Todd.Schaffer@SanfordHealth.org

To whom it may concern,

I am providing testimony today in support of funding a new North Dakota State Hospital. I am currently a third-year medical student at the University of North Dakota. Prior to my psychiatry rotation I doubt I would have been able to locate The State Hospital on a map. However, after rotating there I now know that it is a critical and irreplaceable resource for the people of North Dakota. I spent two weeks rotating at The State Hospital and was provided a cottage to stay in with two other medical students. During our time there we worked closely with staff members and learned about the many services provided by The State Hospital including but not limited to a pharmacy, radiology office, medical laboratory, and a comprehensive interprofessional care team. I was impressed by the dedication of the providers at The State Hospital to provide care to patients who truly had no other place to go.

During my stay it also became apparent how old the buildings themselves were. I was there for an initially temperate first week, but when temperatures dipped the second week it was noticeable cooler inside as the buildings as older infrastructure struggled to keep pace with the elements. Lastly, I want to note that The State Hospital is the only public institution that medical students rotate through in the entire state, the rest of our rotations are through private clinics. The time it takes to onboard, instruct, and house medical students is an apt example of The State Hospital providing a not always intangible, but important good. The State Hospital is a net good for North Dakota and its residents, please consider funding the new State Hospital.

Sincerely,
Henry Elsenpeter

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

I am a third-year medical student attending the University of North Dakota who is currently in clinical rotations in Bismarck, North Dakota. As a part of my psychiatry rotation, I was able to study at the State Hospital in Jamestown, primarily under the guidance of Dr. Eduardo Yabut, the medical director at the institution. I consider my time spent at the state hospital invaluable, as it helped me decide to pursue a career in psychiatry after graduating from medical school.

While at the State Hospital, I witnessed and partook in an environment uniquely suited to fit the behavioral health needs of the state of North Dakota, yet I also saw a system that was being stretched thin in ways nobody could have imagined when the current institution was originally built. At the time it was built, the current institution was perfectly suited for behavioral health care with the tools available at the time. In today's environment, however, the current institution is starting to show its age. There are multiple safety and logistical features in the current hospital that, while adequate, could be drastically improved, which would provide a better level of care for patients at the facility, as well as provide increased safety for all residents and employees at the institution.

Another unforeseen complication that the current institution has had to adapt to is the increase in long-term care patients that have remained at the state hospital after initial admission. Behavioral symptoms are common in neurocognitive disorders such as Alzheimer's or Parkinson disease as they progress, which can lead to patient difficulties in being cared for, whether it is by family or by a long-term care facility. When these behavioral altercations occur, patients are often referred to the state hospital due to their complex neurocognitive illnesses. Once at the state hospital, patients are stabilized with specialized medical care, but due to their history of behavioral issues, no long-term care facility will accept the patient as a resident. With no other location to go, these patients remain at the state hospital indefinitely. The state hospital in its current building is inadequately prepared to properly care for a growing population of long-term care residents, yet it has been forced to adapt to this change due to the inability or unwillingness of other long-term care facilities to accept residents with histories of behavioral challenges.

With HB 1012, the state of North Dakota has the ability to completely overhaul a vital facility in the behavioral health framework within the state. The current facility is outdated and unprepared for the growing and changing behavioral health needs of the state. A new

facility is needed to continue to provide excellent care for the growing and changing needs of behavioral health professionals across the state of North Dakota. I implore all members of the committee to support HB 1012 to provide adequate funding for a new state hospital that will provide excellent behavioral care for the people of North Dakota for decades to come.

Sincerely,

Nolan Christenson

Testimony
House Bill 1012
House Appropriations
Wednesday February 5, 2025
Rolette County Public Health District

Testimony on the Importance of Enhanced State Aid Support
for Local Public Health

Chairperson Nelson and members of House Appropriation committee. Thank you for the opportunity to submit written testimony today on the critical importance of state aid support for the Rolette County Public Health District.

My name is Barbara Frydenlund, Administrator and I represent the Rolette County Public Health District, serving the county of Rolette and dedicated to safeguarding the global health and well-being of our county. Rolette County is within District 9.

As with all Public health entities in North Dakota, Rolette County Public Health is fundamental to the well-being of our community. We provide services including immunizations, maternal and child health programs, disease prevention, health education and prevention programs, and emergency preparedness. These services are crucial in promoting public health, preventing outbreaks, and ensuring that all community members have access to preventive health services.

Rolette County continues to be one of the poorest counties within the state and country. Our mill levy value is limited, by our low land values and non-taxable tribal lands and tribal trust lands within our county. Despite the federal designation of tribal lands in Rolette County, federal impact aid in lieu of tax base from tribal lands is not available to public health services. This is in sharp contrast to federal impact aid allocated to school districts within our service area. Though this is an important part of public-school finances we do have to be cognizant of the fact that children must be healthy to learn effectively. Current state aid does not factor in the poverty rate and health status of our population. The greater poverty the greater the health needs.

Currently Rolette County state aid payment accounts for three (3%) percent ($57,000.00) of our annual budget. As per the North Dakota Century Code, the max levy of local tax dollars that may be allocated to local public health is five mills and for us that equates to approximately. $117,000.00. With currently no additional local dollars available to our agency, the importance of state aid is monumental. For reference thirty-three (33%) of our revenue is generated through fee for service. Currently fifty-one (51%) of our revenue is received through federal to state passthrough grants. These grants are decreasing in availability. Again, for your reference our current immunization grant funding is $4800.00 per year, Emergency preparedness funding $3704.00 per year, Maternal Child Health funding is $17,500.00 with a required match of $13,125.00. From the above description you can see why supplemental funding such as state aid is essential to the viability of Rolette County Public Health.

State aid and local tax dollars are the only flexible funding available to local public health to address grant funding match, local community health priorities and foundational public health services. These two sources also supplement programs including programs such as North Dakota health tracks and immunizations, in which state reimbursement does not equate with the costs of delivery of these essential services. For us, these funds are extremely limited and pose a barrier to providing local services and having adequate match for grants.

Our public health workforce has decreased due to lack of available funding and additional cuts are inevitable due to decreased federal and state funding, increasing cost of supplies, the increased cost of living, the ever-increasing health insurance costs. Our public health nursing salaries are non-competitive compared to other agencies.

In addition to the above fiscal description, as all local public health offices do, our public health district acts as a gap filler in the community. We find ourselves spending more time providing case management for families, connecting people to services within or outside of the area, providing educational services that do not have a funding source. Some of these services include chronic disease services, school health services, mental health first aid, CPR, fluoride varnish applications, car seat programs, babysitting programs, breast pump loaner program, breast feeding support and policy development, clinical care such as dressing changes, injections, sexual disease testing, just to name a few. Without additional local public health funding these services simply cannot continue.

As I reference health services provided by Rolette County Public Health, the Medicaid Health Tracks program is critical to the health of Medicaid eligible children. This program is a federal program that each state is to implement with the goal of identifying potential physical, and developmental health concerns prior to the conditions manifesting into serious or debilitating and costly health issues. Children receive a head-to-toe assessment by a Registered Nurse and referred to additional health services as deemed necessary or requested by the parent/guardian or the client themselves.

We assumed this program in 2005 and for the next ten years we received staff support from Rolette County Social Services and a regional health tracks coordinator who was a ND Human Services employee. The support from social services ended in 2015, but due to the importance of this program we maintained it independently. Program costs were greater than revenue obtained from ND Medicaid, and we supplemented the program with state aid funding.

Beginning in 2016, up to $63,901.00 in “Program Administration” reimbursement was available to Rolette County Public Health instead of to Rolette County Social Services. In 2016 we had assumed the entire program including the full administration as well as the actual screenings. The administrative funding and the assistance of the regional health tracks coordinator facilitated a breakeven Health Tracks budget. In June of 2022, the then Executive Director of ND Human Services ended the Health Tracks Administration funding, citing in written form that North Dakota was revamping the Health Tracks Program, and the current funding would end in June 2022. He cited that we were the only public health district receiving this funding and that it was simply not fair. Further discussion was a moot point. During this period other health districts who were offering Health Tracks continued to receive health tracks administrative assistance from their local social services. Since 2022 this program has not been fiscally solvent

but deemed essential for our population. Since 2005, we have 600-900 children participate annually in this program. I say it is essential due to the number of children who lack a medical home, the families that need support beyond a 15-minute primary care appointment and the significant health concerns identified. Over the years we have identified children who are deaf, markedly decreased vision, malformed heads, skull fracture, orthopedic concerns, sexual and physical abuse, suicidal ideology, malnourishment, obesity, dangerously high blood lead levels, diabetes, hypertension, massive dental needs, chronic school absenteeism, growth and development delays just to name a few. All of which no one cannot put a price on. The amount of case management that families are needing continues to escalate, the amount of time assisting families to find a dentist, orthodontist, or mental health service is monumental due to the lack of providers accepting Medicaid clients all of which consumes more staff time and increasing program costs.

The saving grace for the 2024-2025 Health Tracks Program is the Statewide Strategies Grant that we received during the fall of 2024. This funding is one time funding that appropriated by the 2023 legislature and was a competitive grant with a June 2025 end date. I urge you to please consider again allocating such funding. The funding was distributed across the state and included grantees other than local public health. The grant did have a 100% match.

Immunization is one of the most effective public health interventions. It prevents the spread of infectious diseases and protects vulnerable populations. State aid support enables Rolette County Public Health District to procure vaccines and run immunization clinics, ensuring high vaccination coverage and herd immunity.

Maternal and child health programs are vital for reducing infant and maternal mortality rates. State Aid funding helps to ensures that these essential services are accessible to all mothers and children in the county, regardless of their socio-economic status.

Preventing diseases before they occur is more cost-effective than treating them after they have manifested. Rolette County Public Health District runs various health education programs, including those focused on chronic disease management, nutrition, and physical activity. State aid support facilitates these educational campaigns, helping to reduce the incidence of diseases such as diabetes, heart disease, and obesity.

We know extremely well that in times of crisis, such as natural disasters or pandemics, local public health districts are on the front lines of response. Adequate state aid can ensure that Rolette County Public Health District is well-prepared with emergency plans, supplies, and trained personnel to manage such situations efficiently and effectively.

State aid support is a lifeline for public health districts. It ensures that they have the financial resources necessary to maintain and/or expand their services. For Rolette County Public Health District, <u>increased</u> state aid means:

1. Ensuring a competent workforce
2. Delivering effective public health strategies to engage the community in prevention programming
3. Addressing the health disparities that exist within our community, ensuring that everyone has the equal opportunity to achieve optimal health.

Without an increase in state aid funding, Rolette County Public Health District would face significant challenges:

1. A lack of funding would force the district to cut back on services, leaving community members without essential healthcare. Immunization rates could drop, disease outbreaks could rise, and maternal and child health programs could suffer.

2. Health inequities could widen as vulnerable populations lose access to critical services. This would exacerbate existing disparities and lead to poorer health outcomes for the community.

3. Without preventive services, more people would rely on emergency care for conditions that could have been managed or prevented. This would strain the healthcare system and increase costs for both individuals and the state.

4. State aid support is crucial for the sustainability and effectiveness of Rolette County Public Health District. It enables the district to provide comprehensive, high-quality care to all community members, regardless of their circumstances.

Investing in public health through state aid not only improves individual health outcomes but also strengthens the entire community, leading to a thriving and healthier future for all.

<u>The importance of state aid support cannot be overstated. It is the backbone of public health infrastructure, ensuring that districts like Rolette County Public Health can continue to serve their communities effectively.</u>

By securing and enhancing state aid support, we invest in a healthier, more resilient future for everyone.

Thank you for your time and consideration of allocating an additional $2,000,000.00 for local public health state aid to the NDHHS for the 2025-2027 biennium.

Sincerely,
Barbara Frydenlund, RN
Administrator
Rolette County Public Health District
bfrydenlund@nd.gov

Chairman Nelson and Members of the Committee,

For the record, my name is Morgan Layne, and I reside in Watford City. I serve as the Director of Operations for both Providence House and Providence House Minot. I am writing today to express our strong support for House Bill 1012, particularly as it pertains to the Behavioral Health Division and the Substance Use Disorder (SUD) Voucher Program. This program is a vital resource in expanding treatment access for underserved populations and individuals in rural areas who might otherwise fall through the cracks.

Providence House welcomed its first clients July 2022 in McKenzie County, followed by the opening of Providence House Minot in December 2023. Each facility offers 16 residential treatment beds, ensuring individuals with ND Medicaid and Medicaid Expansion can receive services. In addition to residential care, we provide outpatient treatment services to support long-term recovery. Our dedicated team of 50 professionals brings diverse expertise, enriching our programs and enhancing client outcomes. We collaborate closely with external agencies, including Free Through Recovery and Community Connect providers, ND and Federal Probation & Parole, and other state programs to ensure individuals receive comprehensive support throughout their recovery journey.

The SUD Voucher Program acts as a critical safety net for individuals seeking treatment who lack insurance or the financial means to cover care costs – one of the most significant barriers to recovery. Many clients arrive at our facilities with limited resources due to the devastating effects of addiction. This program allows them to begin necessary treatment while they work toward securing insurance coverage. In 2024 alone, 64 individuals served benefited from the SUD Voucher, with many others entering treatment with acceptance into the program, but transitioning to insurance-covered care for costs associated with their treatment.

The the BHD and SUD Voucher team plays an essential role in ensuring its success. Their hard work and dedication make this program possible by streamlining processes, coordinating with providers, and ensuring funding reaches those who need it most. Through their commitment to expanding access, reducing barriers, and maintaining program integrity, they help individuals receive life-changing treatment in a timely manner. Providence House is incredibly grateful for their dedication and the invaluable work they do every day.

A key feature of the SUD Voucher Program is that it allows individuals to choose their treatment providers. This flexibility is crucial, as it empowers individuals to select services that best meet their unique needs, ultimately increasing the likelihood of a successful recovery. House Bill 1012 ensures that a portion of the funding is allocated to Non-IMD programs with sixteen or fewer beds—an essential step in maintaining a diverse range of treatment options. Community-based programs like ours offer flexibility in tailoring treatment to individual needs, emphasize recovery-oriented approaches, and are adaptable to serve diverse populations, particularly in rural areas. At Providence House, we strive to provide an environment that fosters long-term recovery and stability, with a home-like atmosphere, step-down services, and a strong recovery

community where individuals receive support and encouragement from those who have walked a similar path.

Investing in the SUD Voucher Program has far-reaching economic and social benefits that extend beyond individual recovery. Effective treatment reduces the burden on healthcare systems by lowering emergency room visits, hospitalizations, and long-term medical costs associated with untreated substance use disorders. Additionally, it decreases crime rates linked to substance use by addressing the root causes of addiction, leading to fewer instances of incarceration and recidivism.

Furthermore we believe that investing in accessible treatment fosters safer, healthier communities by breaking the cycle of addiction and improving overall public health. When individuals receive the support they need, the ripple effects extend to families, schools, workplaces, and entire neighborhoods, creating a more stable and prosperous society for all. House Bill 1012 ensures the continued success of this vital program, helping individuals on their recovery journey while delivering lasting economic and social benefits.

In conclusion, House Bill 1012 and the SUD Voucher Program represent a compassionate and practical approach to addressing substance use disorders in North Dakota. This funding is critical to the continued success of this program, ensuring individuals receive the care they need when they need it. We urge you to support this bill and continue to invest in the health and well-being of our fellow residents.

Thank you for your time and consideration.

Sincerely

Morgan Layne

February 4th, 2025

Chairman Nelson and Members of the House Appropriations Committee (Human Resources Division),

Last week, we shared with you several data points that underscore the importance of the partnerships we are so fortunate to have with area law enforcement and our local court system. Many times, they are the first to respond to unsafe, unpredictable or potentially life-threatening calls.

Deputies' and officers' swift responses and referrals to our advocates often mean the difference between another night of fear or the first step toward freedom. We also partner with our local state's attorney's office to provide emotional support, court updates and case communication for victims of crime. Several of our agencies also support those who use violence through domestic violence intervention education. Haley Wamstad, a state's attorney in Grand Forks County, shares more in her written testimony which is attached to this bill hearing.

Because it is often unsafe or financially limited for survivors to leave, our national counterparts would tell you that it takes an average of seven times for individuals to exit abusive relationships. These partnerships are airtight, and we try not to take them for granted because sadly, they're still necessary. We trust officers and deputies with those we serve, and they trust us with next steps.

For some that means a few nights in a warm bed with fully stocked kitchen and a private door no one will break. For others, it's a welcome transition toward transportation, housing and therapy services. For individuals who come full circle, these first interactions with law enforcement not only provide a safe place to land, but they also serve as a conduit for healing and with any luck, prevention of future violence.

As someone who spends a lot of time with area law enforcement, I can tell you they will be the first to say that unpredictable domestic calls just come with the job. For our advocates, we think that's too humble. We also think that lately it's come with too a high of a price, for both officers and clients. As we shared with you last week, nearly 40 percent of the 346 homicides that have transpired within the past 10 years are domestic violence related. Officers who show up ready for anything are not just doing their jobs. They're providing life-saving referrals to clients who avoid potentially fatal situations because of their trauma-informed approach. These partnerships honestly are priceless.

Amorelle Upton, a past client served by the Rape & Abuse Crisis Center in Fargo understands this firsthand. She has become a remarkable advocate and ambassador for our work. You can learn more about her lived experience in her written testimony, which is also attached to this bill hearing. To share more about why these partnerships are so important to those we serve, I'd like to yield the rest of my time to two of my most respected colleagues: Sheriff Andy Schneider and Lt. Jeremy Moe, Grand Forks Police.

Sincerely,

Coiya Nompkins Inman

Coiya T. Inman
Legislative Chair/Coalition Member Program

CC: Seth O'Neill, Executive Director, North Dakota Domestic & Sexual Violence Coalition

Chairman Nelson and Members of the Committee,

For the record, my name is Jonathan Layne, and I live in Watford City. I am the founder/owner of Providence House, Providence House Minot, and Endeavor Sober Living. I am here today to express my strong support for House Bill 1012, particularly as it pertains to Behavioral Health Division programs - the Substance Use Disorder (SUD) Voucher Program, the Recovery Housing Assistance Program (RHAP), and the Opioid Settlement Fund. These programs are not just policy measures - they are lifelines that allow individuals to reclaim their lives, rebuild relationships, and reintegrate into our communities.

The greatest gift I have ever received is sobriety. My journey through addiction took me to some of the darkest places imaginable, but through the grace of recovery, I have found freedom, purpose, and a life beyond my wildest dreams. This gift was not something I found on my own - it was given to me because someone took the time to show me that recovery was possible. They extended their hand when I was lost, and because of that act and gift of kindness, I stand here today.

Without a safe place to heal, to learn, and to rebuild, I don't know where I would be. These programs, these lifelines, are what so many in our community rely on as a foundation to begin their journey. Today, in North Dakota, we have the incredible opportunity to be that light for others. To offer hope where there was once despair. To help more people than I ever imagined possible.

The programs that the state of North Dakota and BHD have put in place are not just initiatives; they are beacons of hope. They give people a fighting chance when the world feels like it's closing in. Without them, so many would be left with nowhere to turn.

I am beyond honored and deeply proud to be a small part of something so much bigger than myself. Recovery is not just about getting sober, it's about rebuilding lives, restoring families, and giving people a chance to truly live again. I am living proof that it works. And as long as I have the ability to give back, I will continue to do so, because someone once did it for me.

Providence House opened in July 2022 and is located in McKenzie County, just outside of Watford City. We were initially a coed program but have transitioned into a facility for men. We have served 315 unique individuals through January 2025. In December 2023 we opened Providence House Minot for women, focusing on pregnant and parenting women, and have served 168 unique clients through January 2025.

We are excited for the next phase of this program that will allow for parenting women to receive residential treatment with their children. This project aims to address a gap

identified in the state and a huge barrier faced by moms in our state. We are in the construction phase and anticipate opening late spring early summer this year.

Along with many of the individuals we currently serve, we anticipate individuals we will serve in this program we are pioneering will rely on programs covered under HB 1012 such as SUD Voucher and RHAP.

SUD Voucher Program

At Providence House, we see firsthand how the SUD Voucher Program removes barriers to treatment. Addiction often leaves individuals financially devastated, making access to care nearly impossible for many. The SUD Voucher ensures that those without insurance or financial resources can receive the critical support they need. In 2024 Providence house served 64 individuals that accessed care through this program. We had many other individuals that were approved for the program but were able to obtain insurance before needing to use funds from the SUD Voucher program.

As a Non-IMD program we feel it is important to ensure funds are allocated separately as laid out in House Bill 1012. This allows for smaller community based programs like ours to continue serving clients on a smaller scale with an emphasis placed on person centered care and a building a strong recovery community that supports and encourages those around them.

Recovery Housing Assistance Program (RHAP)

At Endeavor Sober Living, we know that stable, sober housing is a cornerstone of recovery. Since opening in 2021, we have expanded to serve 34 men in McKenzie County and 20 women in Minot. RHAP provides funding for individuals to reside in a safe, structured environment where they can continue their recovery while rebuilding their lives. Without this support, many would be forced into unsafe living situations that can jeopardize their sobriety.

In 2024, RHAP helped approximately 80 individuals in our homes. However, the proposed budget supports only 172 beds statewide, far below the current 265 approved beds and a waitlist for an additional 296. Endeavor Sober Living is on the waitlist to open the first sober living facility in Williston—where no such resource currently exists—as well as additional housing in Minot to support women, including pregnant and parenting mothers. Increased funding is crucial to ensure that no one who qualifies for RHAP is turned away.

Opioid Settlement Funds

Through an Opioid Settlement Fund grant, Endeavor Sober Living was able to open a women's sober living house in Minot, transforming a six-unit apartment complex into a

safe, supportive space for up to 20 women. Many of these women are pregnant or parenting, working hard to rebuild their lives while staying engaged in 12-Step programs, securing employment, and reconnecting with their families.

These funds have allowed us to make an immediate impact, including adding a playground for children and purchasing transportation to help residents attend treatment, medical appointments, and support meetings. Moving forward, we plan to create a sober living environment where mothers and their children can reside together, a much-needed resource in North Dakota. Without this funding, this project would have been delayed or significantly limited in its reach.

I cannot overstate the dedication of the HHS and BHD teams, who have been invaluable partners in helping us navigate challenges, refine programs, and ensure we are connected with the right resources to best serve our clients. Their commitment and willingness to assist do not go unnoticed. Their work in coordinating providers, facilitating timely funding, and expanding access to care has a direct and lasting impact on the lives of those we serve. We are deeply grateful for their unwavering support and the critical role they play in these initiatives.

In conclusion, House Bill 1012 is a compassionate, practical, and necessary step in addressing substance use disorders in North Dakota. Investing in the SUD Voucher Program, RHAP, and the Opioid Settlement Fund is more than just funding treatment—it is an investment in people, families, and the strength of our communities. These programs not only provide immediate relief but also create lasting change, restoring dignity and hope to those working toward a better future. We urge you to support this bill and continue prioritizing the health and well-being of our residents.

Thank you for your consideration.

Sincerely,

Jonathan Layne

Feeding Grandma 2025

We are ND Senior Service Providers, serving older adults across the entire state. **THANK YOU to the ND Legislature for working collaboratively in a proactive way so that essential services, such as senior meals can continue to serve a growing, aging population.**

19,059 ND seniors ate 1,418,902 meals FFY 23!

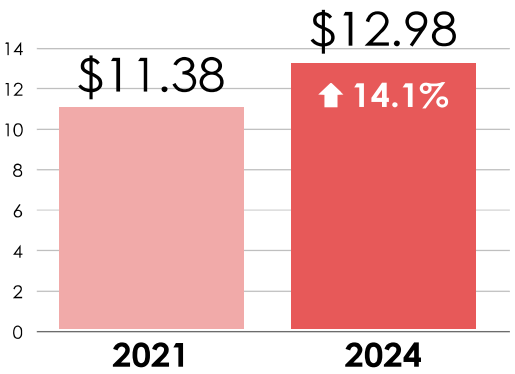
- 10,439 people ate 375,467 Congregate meals which are served in a social, group setting
- 11,986 people ate 1,043,435 Home Delivered meals which are served to homebound seniors through programs like Meals on Wheels and Home Delivered Meals. This category also includes grab-n-go, take-out and drive-thru meal pick-up.

Senior meals are cost effective!

Senior meals are a cost-effective way to promote good health so that older adults can remain healthy and independent.
*Meals on Wheels America

Meals save ND Medicaid Money!

In FFY 23, 212 of the 11,986 home-delivered meal clients scored with 3+ ADL (Activities of Daily Living) limitations AND were Medicaid eligible. With the average cost of a ND nursing home at $403/day*, this **saves the state over $31.18 million in Medicaid funding annually**. *ND Medicaid LTC Services as of 1/1/2024.



How much does it cost?

The full cost of a senior meal is $12.98. Funding sources are:

- 38.2% Federal (Older Americans Act and NSIP (Nutrition Services Incentive Program)
- 17.8% State
- 17.7% Suggested contribution from clients
- 26.3% Local Providers required match and additional funding

The cost to produce a meal continues to increase with food, supplies and labor costs increasing 14.1% from 2021-June 2024. (See graph to the right.)

****We request the Department of Health and Human Services Cost of Living increases be included in the budget and that the $520,000 reduction in funding in the Governor's Budget be reinstated.****

Testimony

House Bill 1012 – Department of Human Services and Health

Aging Services Budget

House Appropriations – Human Resources Division

February 5, 2025

Chairman Nelson and members of the committee, my name is Colette Iseminger. I am the executive director and registered dietitian for Grand Forks Senior Center, providing services for senior citizens in the four counties in Northeast North Dakota. I am also a member of the North Dakota Senior Services Providers, an association of agencies that provide federal Older American Act Services to the senior population of this state.

Attached to my testimony is a copy of a Feeding Grandma 2025. This is our seventh in a series that we have provided during the legislative session. Each session we have updated it to provide the most current and in-depth data on senior hunger, how our program helps prevent this from happening in North Dakota and why it is one of the most cost-effective methods for keeping seniors in their homes.

The basic premise behind this handout is that providing a stable source of healthy, nutrient dense meals is a key factor in successful aging. In addition, because this service is very cost effective – the cost of providing senior meals for a year equals the cost of two days in the hospital or ten days in a nursing home – it makes good fiscal sense for our state and for the people we serve.

However, the Senior Nutrition Program is so much more than just a meal. At senior centers, it is a chance for our seniors to engage and socialize with other people. In addition, our "Meals on Wheels" programs provide meals to our community's most vulnerable seniors, those that are unable to leave their homes. Home delivered meals also provide our homebound seniors with a daily wellness check. Many times, this might be the only human contact the person may have throughout their day. This happens every day in our most rural communities and in our largest cities.

In the state of North Dakota, the total population of adults age 60+ is 176,929 (22.9%).

- 9% or 14,631 live below the poverty line
- Seniors age 65+ who lack income to pay for basic living needs
    - Singles: 44.0% and Couples: 21.4%
- 27.9% or 45,932 live alone
- ND state ranking for risk of social isolation at 65+: 17th in the U.S.

Meals save ND Medicaid money. In FFY 23, 212 of the 11,986 home delivered meals clients were nursing home eligible with 3+ ADL (Activities of Daily Living) limitations and were Medicaid eligible. Keeping these people in their homes with meals and services saves the state over $31.18 million annually.

In Grand Forks and the other large cities, we are seeing more younger seniors coming on the meal program who have physical and/or financial limitations, more with behavioral health issues, are homeless due to substance abuse and more low income people. Grand Forks started a pilot program with 3 food pantries to get OAA frozen meals to their clients over the age of 60. This gets food to seniors who really need it and frees up the food pantry resources for younger clients in a time when they are seeing decreased donations and increasing numbers. 81 seniors accessed these meals in Nov and Dec 2024.

Across the state the average program income (the part participants contribute) has decreased from a high of $2.51/meal in 2012 to $2.30/meal in 2023. More participants are finding it hard to make ends meet and these meals are a place where they can cut expenses, freeing up money to be used for other things like rent and medications.

A BIG thank you is owed to the state. Over the past few sessions, our senior meal programs have had great support from legislators in adding state dollars to the Aging Services budget to work toward our Associations goal – to have enough combined Federal Title III and State Funds so that ALL senior meals provided by Title III agencies receive the unit rate of reimbursement of $7.62 for congregate and $8.89 for home delivered meals. This rate is not intended to cover the full cost of the meal. The total cost, estimated to be $12.98 in 2024, is about a 14% increase from 2021, and is covered with participants' program income contributions, required local match, Nutrition Services Incentive Program (NSIP) dollars and additional funds raised locally. We would like the funding that Aging Services has cut from the budget ($521,499) to be added back in and we hope that the committee will look at cost of living increases for all of the DHHS agencies as costs continue to increase.

Thank you for your time. I am happy to answer and questions you might have.

GRAND FORKS
HOUSING AUTHORITY

Commissioners
Joan Johnson, Chair
Bret Weber, Vice Chair
Tricia Berg
Kimisean Liggett
Jennifer Tarlin

Testimony in Support of HB 1012
House Appropriations – Human Resources Division

February 5th, 2025

Chairman Nelson and members of the committee,

My name is Katie Jo Armbrust and I work for the Grand Forks Housing Authority. We are the primary provider of housing assistance in Region IV, with some client services as well as emergency shelter, to more than 2,000 households in the Grand Forks area.

I provide testimony today in support of HB 1012, specifically for the Permanent Supportive Housing grants, of which we receive for LaGrave on First. For those that may not be as familiar, LaGrave on First is a Housing-First Permanent Supportive Housing project with 42 units of one-bedroom, one-bathroom, fully furnished units, that opened in August of 2018. Our tenants are referred to us using a coordinated system which works with homeless providers in the area and across the state; LaGrave on First is specifically for people who have experienced chronic homelessness, which means twelve-plus months of homelessness and they have a disability. Permanent Supportive Housing: permanent meaning there are no restrictions on the length of tenancy, we use typical 12-month leases; supportive meaning there are voluntary services offered on-site and coordinated for off-site to support tenants with their goals and help keep them housed; housing is affordable to each tenant through Federally funded Project-Based Vouchers, each tenant pays approximately 30% of their monthly income towards rent.

During the 2021 legislative session, the administration of these funds changed to the Behavioral Health Division and greatly improved our ability to provide wraparound, supportive services to our tenants. We have housed and supported 55 people since July 1st of 2023 through the end of 2024. We have utilized these dollars to meet tenant needs by not only funding our 24/7 housing support service staff, but also our occupational therapy and nutritional program services.

As we are well aware, ending homelessness requires robust services, this grant provides that. We are grateful for the support provided by the Behavioral Health Division and the continued funding of PSH Grants by you all.

Respectfully submitted,

Katie Jo Armbrust

Testimony in Favor of HB 1012

House Appropriations – Human Resources Subdivision

February 5th, 2025

Chairman Nelson and members of the committee,

My name is Katie Jo Armbrust and I'm testifying in general support for all of HB 1012 on behalf of the North Dakota Coalition for Homeless People, albeit providing nuanced support. Yesterday you heard about the housing initiative, which came from the taskforce started under the previous administration and what has been included in the current administration's budget for the Department of Health & Human Services (DHHS). I provide this information and the following as a summary of background and experiences from the organizations providing direct services and short-term housing assistance to people and families at risk of, or experiencing, homelessness across the state.

First, I'd like to comment that we agree with most of the information you were provided; we have known for a long time that the answer to homelessness is housing and services. We know that addressing the housing crisis takes more than just the development of affordable housing, it takes housing of all types and income levels. We know that it is the provision of housing and services that stabilize people, and that's what our providers have been doing for years. We adhere to evidence-based models, follow best practices with person-centered approaches, and do everything within our power to provide a hand up, not a handout.

While COVID funding for rental assistance was directed to DHHS for a variety of reasons, the North Dakota Housing Finance Agency (NDHFA) has been the primary administrator of homeless-related funding after the transition from the Department of Commerce to NDHFA during the last legislative session. NDHFA holds annual competitive grant rounds and subgrants funding out to local agencies throughout the state to provide direct assistance. Agencies use a database and coordinated-entry system that track and support the provision of both financial assistance and services.

Despite the more than $140 million in assistance provided by the DHHS RentHelp program with helping more than 20,000 households, there are many untold stories of peoples' experiences that were marred by delayed payments, inefficient communication with local landlords as well as providers. Unfortunately, today we're seeing the number of households experiencing homelessness increase.

The membership of NDCHP respectfully requests all homeless-related funding currently allocated to DHHS be redirected to the North Dakota Housing Finance Agency to ensure appropriate, effective and efficient use of funding. When we think about the provision of services and housing assistance, we look to the experience and strength of agencies who have a long history of doing so. NDHFA is experienced and knowledgeable in administering funding to local agencies to address local needs. Although DHHS had the difficult task of administering emergency funds under unprecedented times, when we consider long term solutions, NDCHP, as the representative of organizations doing this work every day, knows that the best way to administer funding is at the local level. Housing is a local issue; let's invest in the agencies doing this work boots on the ground, rather than at the state level.

Respectfully submitted,

Katie Jo Armbrust
Lobbyist #1692
North Dakota Coalition for Homeless People

Testimony in Support of House Bill 1012

House Appropriations
Human Resource Section
Representative Jon Nelson, Chair
Wednesday, February 5, 2025

Good afternoon, Chairman Nelson and Members of the House Appropriations, Human Resources Section. My name is Tim Eissinger, and I have the privilege of serving as President and CEO of Anne Carlsen. Anne Carlsen has been providing services to individuals and their families with intellectual and/or developmental disabilities or delays for over 83 years. We offer services in eight communities in North Dakota, including treatment, services and supports for nearly 3,000 children and adolescents with some of the most medically and behaviorally complex needs in the state.

Medically Complex Population

Examples illustrating this level of care include the children and young adults we serve through the Intermediate Care Facility (ICF) on our new Jamestown campus. We have just settled into this much-needed and long-awaited campus, which was designed to better address the specialized needs of this medically-complex population. At present, we are providing care for over 20 individuals with high-risk multi-system complexity, including 13 who have tracheostomies and 11 of whom require ventilator support. The level of support they require underscores the critical need for sustainable funding and policies that ensure access to the specialized services essential for their health, safety, and quality of life.

Today, I would like to highlight the significant financial challenges Anne Carlsen has faced in serving these individuals with medically and/or behaviorally complex needs at the intermediate care facility care level or ICF. Over the past three years, the state's own cost report data, charted below, clearly indicates continuing and significant operating losses at the ICF level for Anne Carlsen that have progressively increased. We expect additional, growing losses this next biennium.

Anne Carlsen Center Intermediate Care Facility Financial Performance

Year	*Total Revenue*	*Total Expenses*	*Net Loss*
2022	$17,291,019	$19,288,833	($1,997,814)
2023	$17,592,781	$19,748,040	($2,155,259)
2024	$19,114,847	$21,877,247	($2,762,400)

There are numerous contributions to these repeated, year-over-year losses:

(1) *Staff Wages & Benefit Costs:* Due to an ultra-competitive labor market for nurses, respiratory therapists and other specialized medical personnel, we have been forced to increase wages at a pace disproportionate to reimbursement rate adjustments. Retaining high-quality staff, particularly specialized medical personnel—remains critical to serving some the most vulnerable children and adolescents in the State of North Dakota.

(2) *Staffing Availability & Reliance on Contracted Staff:* Workforce shortages have led to a 272% increase in spending on traveling staff from 2022 to 2024. These contracted professionals cost approximately 50% more than full-time employees, further impacting the financial strain.

(3) *Rising Operational Costs:* Non-wage expenses have also surged beyond reimbursement levels. Additionally, supply costs rose 4% in 2023 and another 8% in 2024. These compounding increases make it increasingly difficult to maintain essential services at our Jamestown facility.

(4) Revenue constraints: Anne Carlsen would request that any legacy constraints present in the rate calculation be eliminated, and that the people we serve have access to the full rate as calculated for their care and treatment.

Square Peg in Round Hole

Working collaboratively with the department on better, systematic solutions for the future, we understand that our services for children and adolescents with medically and behaviorally complex issues are frequently referenced as "the square peg in a round hole" in the DD system. The department has referred to us as an "extreme outlier," which we very much agree and appreciate. We have held a number of meaningful discussions on-site in Jamestown with Jessica Thomasson, Sarah Aker, and Tina Bay as we've worked towards finding the best health system as well as a fiscally sound approach to this level of care. We have appreciated their efforts to fully understand both our accomplishments and challenges in providing this level of treatment and care required for the medically complex.

Solution #1: Change from an ICF to a Specialty Hospital

As a group, we believe our best option at this point is to change our licensing from an ICF license to a Specialty Hospital license, as has been recommended by the department. This change, we understand, will allow the state to reimburse us in a way that more accurately and fairly reflects the complexity of needs of the individuals for whom we provide care. Legislation is not needed for this change and it can be implemented by administrative rule, which the department has indicated it will lead.

Solution #2: Support to Offset Current and Expected Operating Losses

In consideration of the three years of operating losses previously incurred, Anne Carlsen would respectfully request consideration of an additional appropriation sufficient to cover 50% of the ICF operating losses from 2022, 2023 and 2024. Total losses for the previous three-year

period amounted to $6,915,473. 50% of the $6.9M operating loss would translate to an appropriation request of $3,457,736 in an attempt to make Anne Carlsen partially whole. We think 50% of these losses is rational and disciplined as we have shared skin in the game with these losses.

In consideration of the upcoming biennium, Anne Carlsen would also respectfully request consideration of an additional appropriation sufficient to cover expected losses over the time period while working to secure and implement the Specialty Hospital license with Anne Carlsen in Jamestown, which we believe could be at least a year, if not two. That amount would be calculated at $2.2M for each year of the upcoming biennium or a total of $4.4M.

I acknowledge both the size of the request as well as the major task in front of this committee in regards to managing the largest section of the state budget. Please know that Anne Carlsen is open to continued discussions to find the best and most fair solution possible.

Conclusion

That concludes my testimony, and I would be happy to address any questions the committee might have.

Sincerely,

Tim Eissinger, CEO
Anne Carlsen

TESTIMONY House Bill 1012
House Appropriations
February 5, 2025

Good morning Mr. Chairman Jon Nelson and members of Committee. For the record, my name is Tom Newberger and I am the Executive Director for Red River Human Services Foundation in Fargo, West Fargo and Wahpeton, ND. Our agency supports approximately 500 people with developmental disabilities in Residential, Day and Social programs. The focus of my testimony today is related to the latter – Social programs.

I am here today to ask you to add an amendment to HB 1012 to support two non-profit who continue to lose funds every year for this specific service. The two Development Disability providers are Red River Human Services Foundation (RRHSF) in Fargo and LISTEN in Grand Forks. RRHSF operates the Activity Center and the Activity Center opened originally in the late 1970's by Lutheran Social Services because they provide many needed services that other DD Providers are not able to do for people with disabilities. People with disabilities go to the Activity Center to recreate, socialize and to find a place where they can receive services that gives them a better life. I have been in this business for nearly 39 years and I have seen where our traditional DD services come up short and are not able to give people the choices they need or want. This is where the Activity Center in Fargo and the LISTEN Center in Grand Forks plays a vital role.

The Activity Center adds meanings to people's lives by being a common place where people come together to learn and develop social skills, friendships and how to access the community. It also acts as a safety net when other support systems have failed. For example, many winters ago, a member of the Activity Center called and said she had been sick to her stomach for 3 days and was out of toilet paper, medicine and nearly out of food. Our Activity Center staff went to her apartment, bought her the items she lacked and possibly saved her life. While this is an extreme example, it shows what we do for the less fortunate.

More common activities provided by us include going camping, to ball games, such as the Minnesota Twins who give us free tickets and to parks. These activities add meaning to people's lives by getting them involved, rather than sitting in a group home that is not staffed adequately. We have 7 group homes in Fargo/West Fargo for a total of 35 people. Each home usually has 1-2 Direct Support Professionals (DSP's) in the evenings and it's not possible for the staff to take someone to the park, drop them off, take another

person to a movie and work with 3 people at home at the same time. This again is where the Activity Center fills a void by providing staff for other DD providers too who are short-staffed.

The story of the Activity Center and LISTEN Center is a long and winding road due to funding constraints. The Activity Center has nearly closed many times, such as when Lutheran Social Services ran the program and many times almost eliminated the program because of the financial drain. The Activity Center merged with Red River Human Services Foundation in 2001 and currently we lost $200,000 last year operating it. We operated without State funds until 2013, when the Legislature approved $150,000 per Biennium for the two DD providers or $37,500 per year per provider. This is why I am asking for your support to increase the funding by $300,000 per Biennium, which will give the two providers $75,000 more per year. I would also really appreciate if you could add an annual inflationary increase to the amendment in HB 1012 to help us with annual inflationary increases. Please support the Activity Center and the LISTEN Center by increasing the total Biennial funding from $150,000 per Biennium to $450,000 per Biennium. This is a small amount compared to other requests you receive, but it will keep us up and running our programs to support people with disabilities immensely. Again, an inflationary increase would be very helpful too. Thank you and I'll be happy to answer any questions.

TESTIMONY House Bill 1012
House Appropriations
February 5, 2025

Good morning Mr. Chairman Jon Nelson and members of Committee. For the record, my name is Tom Newberger and I am the Executive Director for Red River Human Services Foundation in Fargo, West Fargo and Wahpeton, ND. Our agency supports approximately 500 people with developmental disabilities in Residential, Day and Social programs. The focus of my testimony today will be brief and discuss inflationary increases for DD Provider along with funding Accreditation cost that the State has nearly always done in the past.

I am here today to ask for 4% and 3 % inflationary increases for DD Providers across the State for the upcoming Biennium. Currently HB 1012 has a 1½% and a 1½% increases for a total of 3% for the next two years. When comparing this to what State employees receive in HB 1012 for the next two years is a 3% and a 3% a total of 6%. So you are aware, we provide services to people with intellectual disabilities that live in group homes, Day programs where we support them in schools, working jobs, in our facilities if they are unable to work a job or if they are too old. We provide services 24 hours per day and on nights, weekends and holidays. State employees who work in the intellectual disabilities field only, such as DD Program Manager or Administrators come into our group homes nearly always from 8:30AM to no later than 4:00PM. They do not visit us on nights, week-ends or holidays. Our staff sometime get hit by people we support in our programs and we have a much higher turnover rate than the State.

In addition, Walmart and Dairy Queens are paying their staff a higher starting wage than our agency, based on feedback from many staff in Wahpeton. Based on the rate matrix (which the State uses to pay DD Providers) it has a wage of $20.02 per hour for all staff. We take this $20.02 and lower new staff's starting wages, so we can increase long term staff wages above the $20.02. Also, we get no funding when staff work over-time, which is much needed when we are sort staffed. Again, please help us by using a 4% and a 3% inflationary increase for DD Providers in HB 1012.

Lastly and briefly, please have the State reimburse us for Accreditation costs. The State mandates these services and has reimbursed DD Providers for decades and now they have back away from supporting us for Accreditation costs.

Please let me know if you have any questions. Thank you

ROUGH RIDER NETWORK

Building a Healthier, More Sustainable Rural North Dakota

Our Mission
The Rough Rider High-Value Network (RRHVN) is committed to strengthening rural North Dakota's independent hospitals and clinics by enhancing clinical quality, pooling resources, managing financial risk, and improving community health. Our mission is built on three core beliefs:

1. Healthcare costs in the U.S. do not reflect the quality of care provided.
2. Value-based care improves both quality and cost efficiency.
3. Rural North Dakotans deserve access to high-quality, local healthcare.

Our Members & Reach
RRHVN represents 23 rural hospitals and 40+ clinics statewide, working collaboratively to empower North Dakota's rural healthcare system. Serving over 350,000 residents, we ensure our communities receive affordable, high-quality care while fostering long-term health and sustainability.

Our Impact & Progress
Expanding Value-Based Care

- Four network-wide value-based payer agreements in place for 2025.

Leveraging Technology for Population Health

- Implementing a network-wide IT platform to integrate and analyze healthcare data.
- Using advanced analytics to track high-risk populations, flag care gaps, and optimize resource allocation

Smarter Referrals Through Data

- Over 50% of rural patient healthcare costs occur outside our network.
- Members use real-time analytics to guide referrals based on quality, cost, access, and patient-centered care.

Medicaid Care Coordination Success

- More than 1,000 Medicaid recipients are receiving personalized care coordination through our partnership with Caret Health.
- In just three months, 563 quality tasks completed, preventing hospitalizations and strengthening community health.

Our Future

- Value-based arrangements with all payers
- Enhanced access to specialty care and services
- Paving the path for value-based, accountable rural healthcare across the US

We are transforming rural healthcare in North Dakota—ensuring affordable, high-quality, and sustainable care for all.

Testimony Prepared for the
House Appropriations – Human Resource Committee
February 5, 2025
By: Rhonda Allery, Mountain Lakes Human Service Zone Director
RE: House Bill 1012 – Human Service Zone Budget and related Impact

---

Chair Nelson and members of the House Appropriations Human Resources Committee, my name is Rhonda Allery. I serve as the Mountain Lakes Human Service Zone Director, which includes the service area of Benson, Ramsey, Rolette, and Towner counties. In addition, I am a member of the North Dakota Human Service Zone Director Association. Thank you for this opportunity to testify in support of HB 1012.

The human service zone model launched in January 2020 as part of a property tax reform effort. Human service zones provide the local delivery of economic assistance and child welfare programs to the citizens of North Dakota, and there are 19 throughout the state. House Bill 1012 appropriates funding for human service zone operations as part of the Health and Human Services budget (457-fund).

Your packet includes three handouts that help illustrate the roles, achievements, and needs of North Dakota's human service zones.

- **"What Do Human Service Zones (HSZ) Do?"** provides a snapshot of core zone-administered services, which are included in the proposed budget.
- **"The State of Human Service Zones"** maps out geographical zone boundaries. It also provides a summary of significant zone achievements
- **"HSZ and HHS Budget Relationships"** highlights many of the connections between the human service zone and department budgets.

We hope these handouts will be useful references as the committee evaluates and finalizes funding.

The Health and Human Services Zone Operations Team collaborates with zone directors to develop the human service zone budget. We utilize a standardized chart of accounts to support consistency in zone budgets and expenditure reporting. This guides our projection of future costs and identification of opportunities to enhance efficiency. The funding provided by the 68th Legislative Assembly related to equity and compression was instrumental in addressing salary disparities between zone employees. Considerable progress was made toward addressing salary disparities and compensating zone employees for their hard work and expertise. In addition, zone team member turnover and vacancy rates

have been stabilized. This support was crucial to these accomplishments, and we appreciate the support we've received.

We also recognize and appreciate the broader investment of transition to human service zones. Over the past four years, staffing models have changed to better address service needs and zone operations. Combined with a standardized chart of accounts, shared budgeting responsibilities, and enhanced communication, we are able to budget with increased accuracy and efficacy. Our proposed budget is, in part, a byproduct of those improvements.

We are pleased that the proposed biennial budget for human service zones reflects only a 7.7% increase to accommodate necessary adjustments to compensation packages and zone-administered programs. In particular, we would like to highlight four highly impactful and interrelated programs for which we request your support.

CHINS (children in need of service): Prior to August 2022, the Juvenile Court system served children in need of services. As part of juvenile justice reforms, this was transition to human service zones.

This program helps to prevent unnecessary youth involvement with the juvenile justice system by recognizing that youth are NOT adults, and that punitive juvenile justice worsens mental, behavioral, and relational health outcomes. It also puts them at risk for the denial of programs and services that are essential to their development into healthy adults, and for increased interactions with law enforcement, child welfare, and juvenile or adult criminal justice systems. Because of this, we cannot overstate the importance of treating youth with dignity, which includes ensuring that our services factor in their physical and emotional development.

In light of these considerations, we respectfully urge you to support the CHINS line item within HB 1012. We also ask for your support of appropriations related to a truancy study (HB 1129) and the North Dakota Children's Cabinet (SB 2176). These line items and bills do not merely support the continuance of the CHINS program. CHINS is still in the early stages of development, and the budgetary support that we're requesting is, at its core, an essential resource in ongoing program development. By supporting children in need of service through studies and additional networking, you are supporting practical, evidence-based program design.

To that end, we also support the proposed amendment to HB 1129, which provides funding to the Department of Public Instruction to address student attendance and

absenteeism. While it may be tempting to simply increase CHINS headcount, this is unlikely to produce the desired impact on truancy. The adequate resourcing of our schools is both an urgent need and a crucial measure to address truancy concerns, including where those concerns are compounded by unique community challenges.

Similarly, an anticipated amendment to HB 1328 would provide funding for diversion programming, providing schools with an additional resource to address “unruly” behavior. Diversion services were previously provided via a variety of contracted vendors as a means for schools to identify problematic behaviors and resolve them with accountability. Diversion programs are considered effective, as studies show it can reduce recidivism rates compared to traditional court processing, particularly when implemented with low-risk youth.

Child Care Assistance Program and Housing Supports: Strong, healthy families — including healthy and functional foster families — cannot exist without the provision of housing and childcare. Human service zones regularly work with citizens who struggle to access these fundamental needs. As a result, we request your support in expanding childcare assistance programs to include foster youth.

Technology: We urge you to support the technology requests with special emphasis on the eligibility system (SPACES) and the child welfare case management system (OCEANS). These investments have a daily impact on zone work. Reliable and modern technology systems are critical to effective, compliant program administration, employee performance management, data-driven decisioning, and documentation for federal reporting.

CFS Budget: The Children and Family Services (CFS) budget has a significant impact on the delivery of child welfare services at the zone level. In particular, we urge you to support post-adoption services to mitigate the risk of disruption that children and their adoptive families face.

In addition, your support is requested for the ICWA Family Preservationist Program along with pre-petition legal representation (Legal Services ND), social work stipends (University of North Dakota), and Kinship legal representation for legal guardianship. The increased funding request for Title IV-E Prevention services includes as-needed support for families and children (including CHINS).

Furthermore, we support the request for shelter care funding, Nexus PATH therapeutic treatment foster care, and Chafee/Independent Living Services. These services are critical to the zone's child welfare service continuum, and to the wellbeing of North Dakota residents.

We urge support for this budgetary item and for the continuation of performance-based contract funding.

Thank you for your consideration. I stand for questions from the committee.

WHAT DO HUMAN SERVICE ZONES (HSZ) DO?

There are 53 counties in North Dakota. Local Human Services are provided by 19 Human Service Zones (HSZ) in accordance with HHS policies and ND Century Code.

Services Provided include:

CHILD WELFARE SERVICES

CHILD PROTECTION SERVICES

- The Centralized Intake Unit gathers information about suspected child abuse or neglect, with 14 Zone workers stationed across the state.
- Reports of suspected child abuse or neglect are thoroughly assessed.
- During the assessment process, collaboration occurs with law enforcement, medical providers, schools, and other partners.
- Workers conduct CPS assessments to establish whether maltreatment has taken place or if other unsafe conditions exist in the household, leading to a maltreatment decision.

FOSTER CARE CASE MANGEMENT

- The HSZ Director is the legal custodian of foster youth
- Zone team members provides case management services such as ensuring foster youth's mental health, dental, vision, and education needs are met
- Meets with the youth monthly
- Prepares affidavits, maintains court orders, provides testimony
- Collaborates with foster care providers, States Attorney, law enforcement, schools, medical providers, other family members, and identified partners

CHILD IN NEED OF SERVICES (CHINS)

Statewide unit serving all Zones; Richland-Sargent-Ranson (RSR) HSZ is the state-selected host zone

- CHINS specialists role is to engage, educate, and empower parents/caregivers to be responsive to their child(ren)'s needs
- Receive referrals for youth exhibiting underage tobacco/vaping use, truancy, runaway and ungovernable behavior
- Provides a needs assessment and referrals to community services
- Serve as Dual Status Youth (DSY) liasons to help families, juvenile court and child welfare collaboratively to develop family-driven plans to resolve identified concerns

IN HOME CASE MANAGEMENT

Involves case management services to the family with an unsafe child, with the goal of mitigating threats of danger through an in-home safety plan

Face to Face visits two times a month

Provides referrals and assists families in accessing additional community services

Assists parents/caregivers to enhance parenting skills and increase safety in the home

PARENT AIDE SERVICES

Partners with the case manager to implement case plan

Assisting with ensuring child safety and enhancing parent /caregiver protective capacities through teaching and coaching

Connects the family with community resources and enhance informal support systems

Supports reunification efforts

HUMAN SERVICE ZONES

ECONOMIC ASSISTANCE

- Determine eligibility for Healthcare, SNAP, Child Care Assistance, LIHEAP, and TANF programs
- Leveled caseload ensure benefits are processed timely by leveling caseloads statewide
- Statewide customer Support Center (CSC)
- Human Service Zones provide walk-in services and technical support

CONTRACTED SERVICES

Specialty services provided through Zone contracts in collaboration with HHS (e.g. Adult Protective Service (APS) and Unaccompanied Refugee Minor (URM) Program)

- APS: assess safety of vulnerable adults who are at risk of harm for possible abuse, neglect, exploitation of self-neglect
- URM: Provides services to approved minors who have arrived to the United States without a parent or guardian.
  - Agassiz Valley HSZ is the federal sub-recipient grantee with oversight provided by NDHHS-ORS. Foster care services and benefits to meet cultural and linguistic needs are provided.

GENERAL ASSISTANCE

Determines eligibility for applicants seeking final disposition or General Assistance services

Communicate with surviving family members and funeral providers regarding eligibility

All other community resources must be exhausted prior to approving General Assistance applications

DIRECT CARE ASSOCIATES (QUALIFIED SERVICE PROVIDERS-QSPS)

- Provides services to qualified individuals (e.g. elderly, permanently or temporally disabled) in their own home
  - Personal Care Services (e.g. bathing, dress/undress, hair care)
  - Homemaker services (e.g. housekeeping, laundry, meal prep, chore services
  - Non-Emergency medical transportation
- Determined by local Need and alternative service availability-Offered in 14 Zones
- Collaborates with HCBS case managers for state-funded services
- Offer private pay and locally administered services

LOCAL SERVICES

Each Zone Offers unique local services based on community need

- Food Pantry-Help Organize the local food pantry or is a part of the food pantry in some capacity
- Collaborate with local agencies to provide services (e.g. telehealth options within the community
- Collaborate with other county departments and local partners (e.g. emergency responses)
- Services for citizens in need (e.g. back to school supply drives, holiday giving projects, emergency supplies and supports)
- Engage in local community coalitions as a representative of the HSZ
- Flexibility to be creative to help meet the needs or our local citizens

The State of Human Service Zones

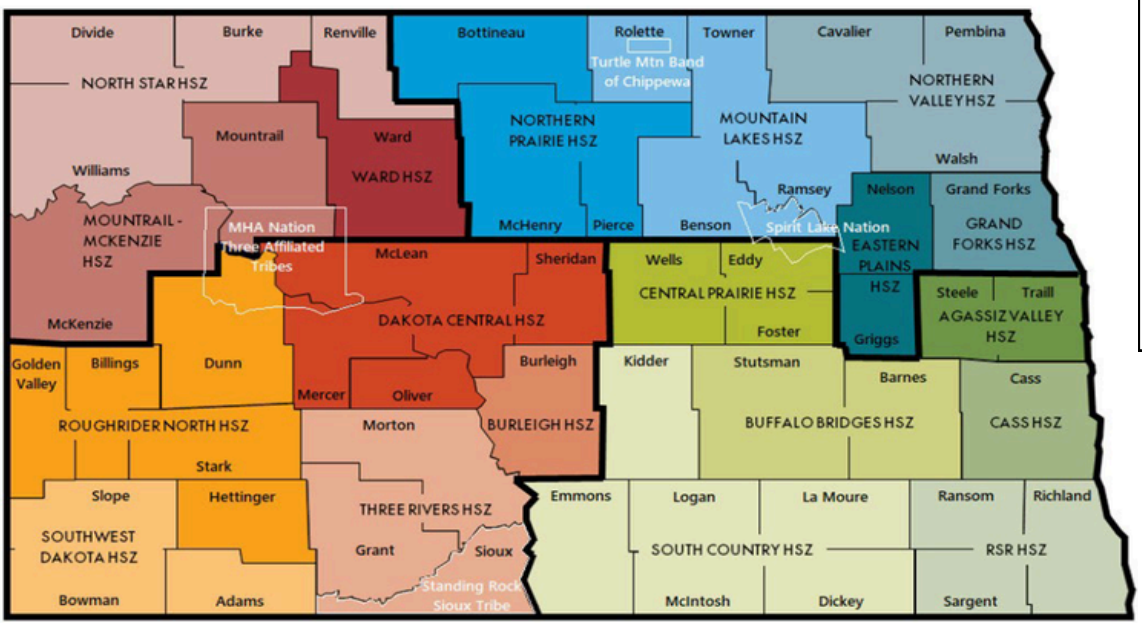
Human Service Zones were statutorily operationalized on January 1, 2020. Significant administrative, fiscal and programmatic transformation has occurred in all operations areas over the past four years.

As of November 2024, there are currently 19 Human Service Zones employing 921 FTEs across the state.

In addition to the 921 FTE, there are 25 temporary employees, which include interns and other team members. Each of the positions represents a county employee.

The service delivery model in North Dakota is a "state supervised, locally administered" model. Ongoing efforts to join with the department of Health and Human Services to work as "one" to ensure timely, efficiently service delivery to the citizens of North Dakota.

We stand firm that the current model of state supervised, local administered services best meets the unique and diverse needs of North Dakota citizens.



In 2024, the North Dakota Human Service Zone Director Association completed a Strategic Plan, committing to the following goals:

- Manage, secure, and share resources to effectively deliver Human Services across North Dakota.
- Strengthen the Association's impact on the shaping and implementation of state human service policy.
- Foster collaboration and implement efficient decision-making practices for the benefit of those we serve.

The ND Human Service Zone Director Association remain committed to continuing the work that has been done since 2020 to benefit all of North Dakota Citizens.

Ongoing Achievements

- Increased Adminstrative Efficiency
- Clarity on indirect costs
- Tapping into hidden capacity within the statewide workforce
- Enhancing colloborative efforts
- Increase merit system compliance
- Focus on & advocate for local needs

Success of Human Service Zones

Substantial & Ongoing Achievements

Administrative Efficiency

- 19 Human Service Zones; 18 HSZ Directors vs. 43 County Directors
- Consistent budget building & review processes
- Consistent account coding & tracking
- Flexibility in adjusting local funding needs (staffing, vehicles, etc)
- Unified Human Resources Policies
- Unified General Assistance & indent burial policies
- Unified Client compliant policy
- Statewide Speciality Program (CHINS Unit, URM)

Utilizing Hidden Workforce Capacity

- Statewide collaboration for economic assistance administration (e.g. caseload leveling, CSC support)
- Cross-zonal service, support, & collaboration to ensure child safety & service needs are met
- Cross-zonal collaboration for program and people supervision for Economic Assistance and Child Family Services
- Statewide Child Protection Service Intake Unit
- State Economic Assistance Customer Support Center (CSC) & missed interview team
- Utilizing telecommute options when available; enhanced workforce opportunities, and growth & advancement

Clarity on Indirect Costs

- Updated legislative clarity in 2023 legislative session
- Increased oversight & support from HHS in countywide cost plan processes

Increased Merit System Compliance

- Efforts to address salary equity statewide among positions & years of service
- Benefits packages vary by host county

Enhancing Collaborative Efforts to Serve Citizens with Increased Efficiency

- Shifting FTE's to where needs are greatest
- Zone-to-Zone collaboration to serve clients locally; locally administered programs
- Preserving local partnerships (law enforcement, courts, schools, etc)
- Coordinated response & timely implementation of "surge support" to resolve backlog in a program area
- Administrative support for statewide units provided by multiple zones
- identifying subject matter experts to train/mentor other zones in Qualified Service Provider enrollment, billing practices, etc.
- Development of standard performance metrics

Focus on & Advocate for Local Needs

- HSZ Director Association strategic planning
- Coordinated legislative priorities, monitoring & advocacy
- Unified position statements on critical topics/needs
- Continuation & expansion of locally provided services to address service deserts
- Local Community partnerships & engagement
- Local presence & response

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/5/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:15 p.m. Chairman J. Nelson called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- 24/7 Crisis Services
- Special Needs Childhood Program
- Healthy Families
- Childcare Costs
- Disabilities
- Tourism
- ND State Hospital

2:16 p.m. Doug Wilson, President, Integrated Telehealth Partners, testified in favor #35239.

2:29 p.m. Shane Gettle, North Dakota Veterinary Medical Association introduced Dr. Erica Schumacher.

2:30 p.m. Dr. Erika Schumacher, Director 3, North Dakota Veterinary Medical Association testified in favor #35034.

2:40 p.m. Missi Baranko, Executive Director, USpireND, testified in favor #35043.

2:51 p.m. Amy Cleary, Lobbyist, Director of Public Affairs, GA Group, introduced Steve Smith and Bill Bauman.

2:52 p.m. Steve Smith, Chief Executive Officer, YMCA Northern Sky, testified in favor #34967.

2:54 p.m. Bill Bauman, Missouri Valley Family YMCA, continued in favor #34967.

3:00 p.m. Steve Smith, Chief Executive Officer, YMCA Northern Sky testified and continued testimony #34967.

3:03 p.m. Jana Bruhschwein, Director and Founder, Peace Academy, testified in favor #35307.

3:07 p.m. Kendra Vander Wal, Executive Director, Designer Genes of North Dakota, testified in favor #34681.

3:13 p.m. Richard Yonick, Executive Director, Progress Enterprise, testified in favor verbally.

3:18 p.m. Samantha Schmidt, Director of Nursing, Progress Enterprise, testified in favor verbally.

3:27 p.m. Brian Barrett, Lobbyist, North Dakota Senior Service Providers, testified in favor #35273.

3:27 p.m. Roger Reich, Executive Director, Minot Commission on Aging, continued in favor #35273.

3:34 p.m. Erin Sorenson, Owner and Registered Nurse, Home Instead, testified in favor #34798.

3:38 p.m. Amy Cleary Lobbyist, Director of Public Affairs, GA Group, introduced Alex Schweitzer.

3:39 p.m. Alex Schweitzer, Board Chairman, Bison World, testified in favor #34638.

3:45 p.m. Denise Andress, Director, Training Academy for Addiction Professionals, testified in favor #35631.

3:58 p.m. Madison Hanson, ND, testified in opposition #35632.

4:22 p.m. Trevor Vannett, Program Advocate, Development Disabilities Services and Adult and Aging Services, Health and Human Services, testified in favor verbally.

4:42 p.m. Bruce Murry, Lobbyist, Elevate Nursing, testified in favor verbally.

4:44 p.m. Mathew Schwarz, Program Representative, Developmental Disabilities Services Division of North Dakota Health and Human Services, testified in favor #35553.

5:02 p.m. Chaz Brobst, Program Advocate, Behavioral Health Division, Health and Human Services, testified in favor #35319.

5:12 p.m. Kirsten Dvorak, Executive Director, The Arc of North Dakota, testified in favor #35096.

5:21 p.m. Lorraine Davis, Founder and CEO of NATIVE, Inc., testified in favor #35637.

5:41 p.m. Julie Ellingson, Executive Vice President, Stockmen's Association, testified in favor verbally.

5:43 p.m. Angela Dinius, Executive Director, North Dakota Association of Community Providers, continued in favor # 34910, #35457.

5:47 p.m. Lorrena Poppe, Owner and Chief Executive Officer, Poppy's Promise, testified in favor #34998, #35012.

5:55 p.m. Sargianna Wutzke, Lead Operations Officer, Community Options, testified in favor #34702.

Additional written testimony:
#34652, #34853, #35287, #35292, #35299, #35397, #35400, #35410, #35417, #34668, #34695, #35018, #35312, #35055, #35407, #33913.

6: 03 p.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

To whom it may concern,

My name is Ali Lenertz, I have worked in childcare for 4 years. I am asking to continue to fully fund the bill HB1012 with the original proposed amount of $7 million dollars.
Kiddie Korral 2.0 in Minot ND thrives off of this income and we would be nowhere near the center we are today without these funds, such as the QRIS bonus. This bonus has allowed our facility to purchase high quality, interactive toys, learning resources and materials to nearly 120 children in my hometown.

This funding allows us to hire more qualified staff, improve our facilities, and offer additional resources to children in need of early education. This extension of funding not only helps us meet the growing demand for childcare services but also ensures that we can maintain high standards of care for years to come. It’s a vital investment in the future of our children.

Thank you for your time and consideration,
Ali Lenertz

February 5, 2025

Chairman Nelson and Members of the House Appropriations Human Resources Division,

Thank you for the opportunity to testify on HB 1012. I am here on behalf of Bison World, a cultural and bison-themed destination tourist attraction designed for development along I-94 at Exit 258 in Jamestown. The state-owned parcels of land where Bison World would be located are north of the interstate and designated as State Hospital land. I served the State of North Dakota as the Superintendent of the North Dakota State Hospital from 1995 to 2015. During my tenure, no one approached the Hospital about leasing the land, which has been the case for several years. The property is currently not leased but is a good fit for the Bison World project.

About Bison World

Bison World is envisioned as a premier tourist destination that celebrates North Dakota's cultural heritage, history of the bison, and capitalizes on a growing industry of niche tourism, offering true economic potential for North Dakota. The project aims to attract visitors from all around the nation, boost the state's tourism industry, and generate economic activity by leveraging underutilized state land.

The Need for a Long-Term Lease

Under the current statute, lease renewals are limited to two-year terms. While this structure may have met past administrative needs, it creates significant barriers to attracting private investment for large-scale development into the future. Investors require stability and certainty before committing capital. Short-term leases introduce unnecessary risk, making it difficult to secure financing, plan long-term operations, or implement sustainable infrastructure.

A long-term lease would:

- **Encourage Private Investment** – Investors will only commit funds when they have sufficient time to recoup costs and generate returns.
- **Minimize Policy Risks** – A stable lease reduces the likelihood of policy changes disrupting any project, allowing for responsible planning and development.
- **Ensure Public-Private Balance** – The state retains ownership while benefiting from economic activity, infrastructure improvements, and increased public engagement with the site.

Proposed Legislative Amendment

With the guidance of Jonathan Alm at the Department of Health and Human Services, we are proposing amendment language that grants the department the discretion to approve long-term leases, with a maximum term of 99 years. This flexibility would allow the state to evaluate projects on a case-by-case basis while ensuring long-term economic and community benefits:

50-06-06.6. Department may lease real and personal property.

The commissioner of the department or commissioner's designee may lease ~~surplus farm and pastureland at the state hospital and the life skills and transition center. The commissioner or designee also may enter into further leases of~~ real or personal property at the life skills and transition center or the state hospital upon a specific finding that the granting of each such leasehold interest will result in a net economic gain for the department, taking into account all identifiable costs. Any lease of space for the purpose of providing child care services must meet requirements as determined by the department. The commissioner of the department or commissioner's designee may prescribe the terms and conditions of any leases entered into pursuant to this section and may renew existing leases. ~~Any~~The term of any lease ~~entered into must be subject to renewal or cancelable each biennium~~may not exceed ninety-nine years.

Conclusion

Over the past four years, we have worked diligently to finalize the design of Bison World, pursue state support, and attract private investment. This project will strengthen North Dakota's tourism industry, capture visitors from within and outside the state, stimulate economic activity on underutilized public land, and generate new revenue for the state.

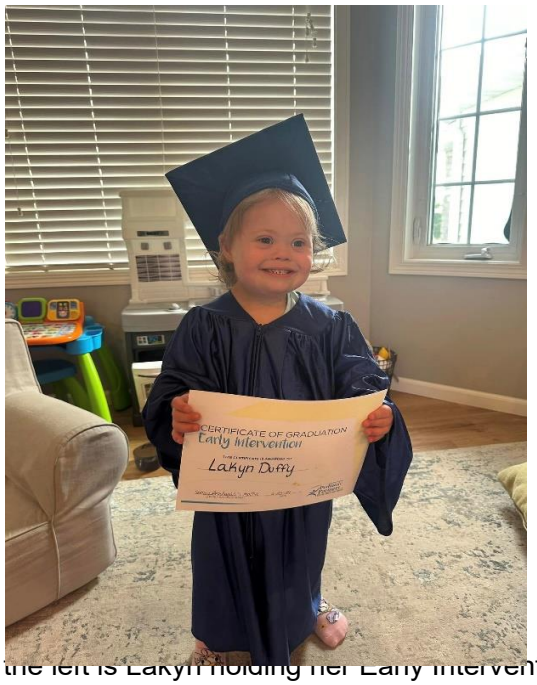
Updating the statute to allow for a long-term lease is a practical solution that will unlock economic potential while ensuring the land remains a valuable asset for the state. We urge the committee's support for this amendment and thank you for your time and consideration.

Alex Schweitzer

Board Chairman, Bison World, Fund

Chairman Nelson and Members of the House Appropriations – Human Resources Division:

As you discuss HB 1012 and the Developmental Disabilities section, I'd like to provide insight and testimony to the impact this section of the bill has on the citizens of ND with disabilities.

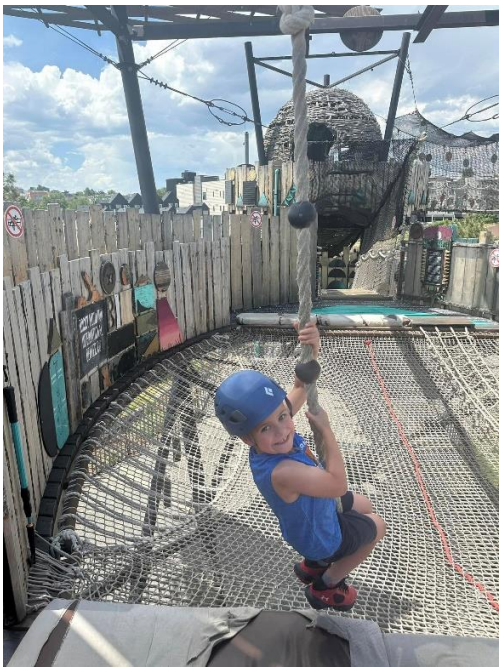


My name is Annalise Duffy and I'm writing as a representative of GiGi's Playhouse Fargo, citizen of North Dakota, and parent to a child with Down syndrome. Please see her beautiful smile below.

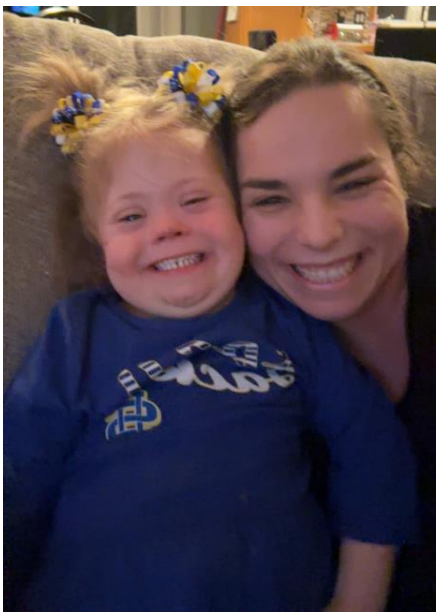
I'm testifying in support of the Disabilities/developmental (IID/DD) 1915c Medicaid Waiver but want to express concern regarding the proposed budget for the DD waiver. The DD section is where provider increases lie for the services that we hold dearly in the disability community- Eary Intervention, In-Home Supports, and Residential and day Supports for adults. Right now, there is a proposed 1.5/1.5% increase for the next biennium to fund the DD waiver. In comparison, there is a 4/3% increase for state employees.

I don't want to go without saying how appreciative we are to have the DD waiver and the support that comes from it but feel the community that the waiver support is being discriminated against by having a smaller number of moneys allocated in comparison to the rest of the disability community ask.

One thing that is important to note is that our families who have individuals eligible for our Medicaid waivers depend on the service options within the waivers but also depend on having access to State Plan Medicaid for their loved ones. Quality waiver service and State Plan options are one of our advocacy priorities as individuals with Down syndrome and their families can achieve quality lives in their communities with the formal supports of the Medicaid waivers and State Plan Medicaid.



Below you will see some pictures of my daughter, Lakyn, who is 3.5 and how the waiver supports her along with what an inadequate amount of funding and increase could mean for individuals like her.



On the left is Lakyn holding her Early Intervention Diploma a ight is a picture of her with Sidney, her Early Intervention provider. When Lakyn came home fro the hospital after a 34 day NICU stay, Sidney was at our house helping support Lakyn and areas of development and growth within a few days. These visits continued every week during Lakyn's first year of life, and then every other week when she turned 2 until these pictures were taken. Sidney's services through Early Intervention helped Lakyn with crucial developmental milestones. From holding her head up, to sitting up, to walking, navigating concerns, and helping us navigate Lakyn's transition to Preschool, without support from the DD waiver, Lakyn's care and progress would have looked different.

Next you can see Lakyn on the left holding her Starbucks treat. This was when she was on a special adventure with our Respite and In-Home Support Staff, Allison. Words cannot express how thankful we are for our Support Staff. Without this support, I'm not sure we'd be able to give our son, Ronyn, who is 2.5 years older than Lakyn, the experience and one on one time he deserves. Whether it's taking him to sporting events, where the noise and people cause Lakyn extreme stress and discomfort, or being able to help coach his basketball team without worrying about Lakyn being safe or stuck in front of an iPad for "entertainment," Having support staff is crucial in ensuring our family can participate in "normal" activities while respecting the environmental needs/concerns that arise with taking Lakyn to unfamiliar or new places.

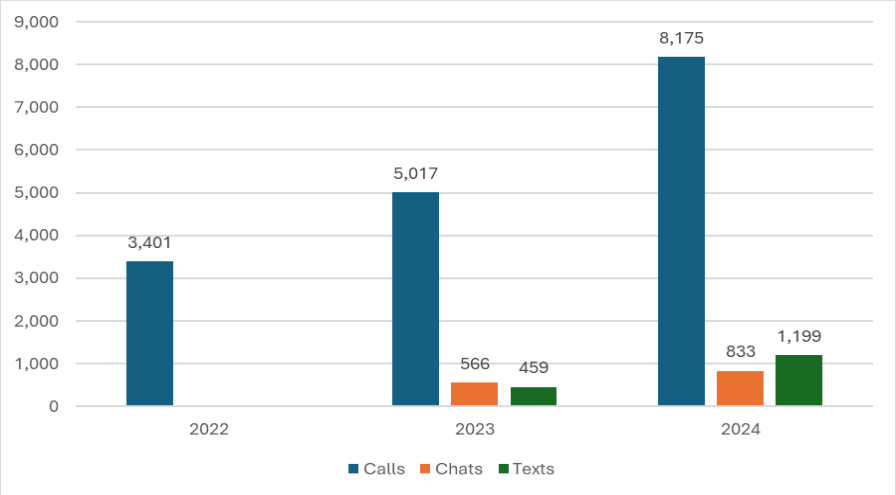
This is Lakyn and Allison. Allison has also been with us since Lakyn came home from the Hospital and as you can see, the two adore each other. (Yes, we're proud Jackrabbit Fans in the wonderful state of North Dakota.)

I hope that through this testimony, you are able to understand the importance of the continued support of the DD Waiver, and why equal funding is necessary. I ask that you please consider this request and vote to provide the same increase in funding, if not more, as other programs, (4%), so individuals with disabilities can continue to have support they need through Early Intervention and Quality Support Staff.

Thank you for your time and service,

Annalise Duffy

annaliseduffy@gmail.com



Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

My name is Jennifer Illich, and I am the Executive Director of FirstLink. I am in favor of House Bill 1012, I urge you to continue and even increase funding for FirstLink. FirstLink has funding in this bill to support

- Answering the 988 Suicide and Crisis Lifeline
- 211 Information and Referral Helpline
- Screen, triage and deploy mobile crisis
- Providing follow-up calls for suicide prevention through our Care and Support Program
- Answering calls to the National Gambling Helpline from North Dakota seeking assistance
- collaborating with 911 to handle behavioral health-related calls efficiently

These services are all provided 24/7/365.

We are witnessing an **alarming and growing demand** for crisis support. **Every month, more North Dakotans** are reaching out—by call, chat, or text—desperate for guidance, reassurance, and immediate intervention. The need for these services is undeniable.

Budget Needs & Accountability

Payroll-related expenses account for approximately **80% of our total budget**, reflecting our service-oriented mission and reliance on highly trained personnel.

At FirstLink, we are **deeply committed to transparency and fiscal responsibility**. We take a **conservative** approach to spending, ensuring that every dollar is used efficiently to **maximize our impact** while keeping overhead costs minimal.

Your support directly translates into **saving lives** and **strengthening the mental health safety net** for our communities. We ask for your continued investment in FirstLink so that we may **expand our reach** and **serve those who need us most**.

Thank you for your time and consideration.

HB 1012
February 5th, 2025

Chairperson Nelson and Members of the Committee,

My name is Kendra Vander Wal, and I am representing Designer Genes of ND. Designer Genes represents roughly 270 individuals with Down syndrome and their families across the state. Designer Genes' mission is to strengthen opportunities for individuals with Down syndrome and those who support them to earn, learn, and belong. My passion in the organization is primarily driven by my background as an early intervention and pediatric occupational therapist and being a mom to a six-year-old son with Down syndrome.

Although individuals with Down syndrome have benefited from support within the Developmental Disabilities Section, there continues to be significant gaps in the areas of early intervention, early childhood services, program management, and home and community-based waiver services. As heard in Tina Bay's testimony yesterday, of the 8,400 individuals served in 2024, 41% of those individuals were under the age of three. Nearly all individuals with either a prenatal or birth diagnosis of Down syndrome, are referred to early intervention (EI) services, which is why program management and EI are key intersections within the continuum of services available to individuals with Down syndrome and their families. Our family has experienced the importance of EI and its foundational impact from birth. Thanks to skilled speech therapists and his EI team, we were able to effectively teach our son sign language and other communication and social skills during his early years, which tremendously decreased his frustration and allowed him to communicate with our family.

Now that he is six, we are witnessing firsthand the workforce shortage of providers through the process of applying for DD waiver-based services. Even though our son didn't have to wait for a waiver slot, for over two months, our family has been on the waitlist for in-home support at multiple provider organizations and therefore we have been unable to receive waiver-based services. Although we could utilize the self-directed services—which over 790 claims were made in 2024 and is a huge win for many families in North Dakota — our family has not been able to dedicate additional time and resources to utilize this option and continue to wait due to the provider shortage at local agencies.

Early Intervention, early childhood services, and in-home support are valuable resources for families. Due to their home-based model and providing services in the least restrictive environment - families know quality providers make an impactful difference. Almost all individuals with Down syndrome are faced with a level of complex feeding, communication, behavioral and motor difficulties making it challenging for families to choose the best childhood support service for their loved one. This is why inclusive child care grants and an inclusion support coach are being requested in the Early Childhood Section executive budget to support facility and program needs. The Inclusion Support Program maintained 97% of all of the child care placements that they supported. This program helps to keep little kids with Down syndrome in their child care placements.

I am also advocating for increased provider wages so that competitive salaries reduce provider turnover and help cover inflation costs as well as improve service quality. The Developmental Disability Section is critical because it supports services that are foundational to the well-being and success of individuals with Down syndrome across their lifespan. Although I have highlighted early childhood and in-home supports, the DD section also covers residential services and day supports for adults. Again, the providers delivering these services are essential, yet provider organizations face significant challenges in maintaining a stable, qualified workforce due to wage disparities. It is why we are advocating for an inflationary increase to 4/3% as aligned with The North Dakota Association of Community Providers (NDACP). Residential and day supports ensure adults with Down syndrome can live meaningful, engaged lives with purpose.

Without sufficient investment in the developmental disability and early childhood sections, we risk service disruptions that can have profound impacts on individuals and families who rely on these supports daily. Our family specifically, has experienced the disruption in services due to provider shortages and therefore are feeling stretched with finding the appropriate community support for our son. Continuing to invest in the Developmental Disability section within our state is not just a budgetary decision; it is a reflection of our state's commitment to its most vulnerable citizens. It acknowledges the importance of these services to help our community thrive as well as investing in the providers to sustain and strengthen services essential to so many individuals with Down syndrome and their families in North Dakota. We know that this work cannot be done alone and Designer Genes is willing to partner in any way that would be helpful.

Thank you for your time and consideration.

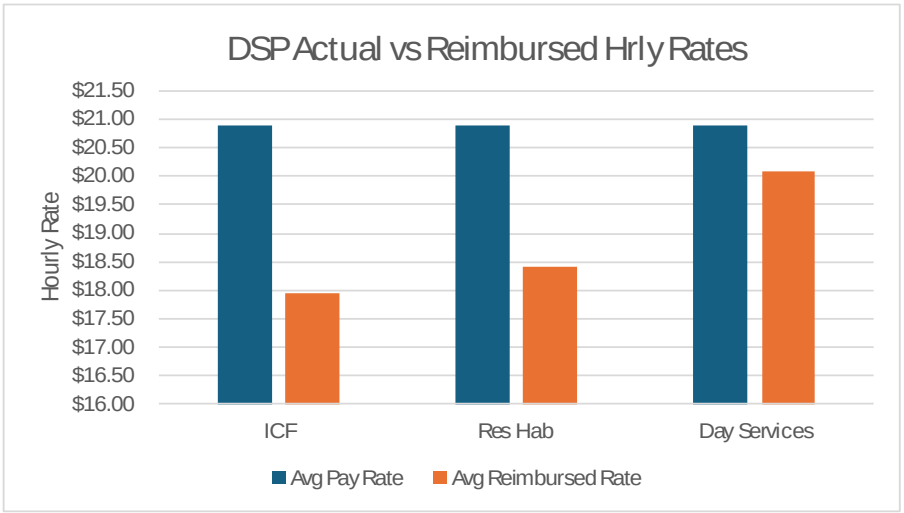
HB 2012 Testimony: DD Provider Rates & Rules

Good morning Representative Nelson and members of the House Appropriations Human Resources Section. My name is Mike Remboldt, I am the CEO of HIT, Inc. in Mandan and one of the 31 DD providers that belong to NDACP. I am here to testify on behalf of NDACP by providing information and statistics that support our requests. My testimony will include four requests:

1. Funding ICF and Residential Habilitation (Res Hab) services at 100% of computed/intended rates.
2. Providing annual inflationary increases of 4% in the first year and 3% in the second year of the biennium for all DD services.
3. Removing the accreditation requirement for DD providers.
4. Increasing Corporate Guardianship by seventy-one (71) slots along with an increase in the daily rate.



During the twelve month period ended 6/30/2024, sixteen of the NDACP member organizations (sample included all geographic areas of State and various size providers) reported a Direct Support Professional (DSP) **turnover rate of 28.18% (177/628) in day services with a median stay of 12 months, and 45.04% in residential services (931/2,067) with a median stay of only 8 months**. This means that 465 of these 931 people that left did not even stay for 8 months. To compound this high turnover issue, Day Service providers reported a 7.2% vacancy rate (45 open positions) and Residential Service providers reported a 14.3% vacancy rate (296 open positions).

NDACP members are struggling and are finding it increasingly difficult to be able to offer a competitive wage in this difficult labor market. I know that our industry is not the only one with this issue, however our members report paying **$20.89 as an average hourly rate** for DSPs. This number means nothing until you

understand that the **payment we receive** from the State for these services includes the hourly wage component of **$20.02 for day services, $18.41 for Res Hab services, and only $17.96 per hour for ICF services**.

Fund ICF and Res Hab Services at 100% of Computed/Intended Rates

We are requesting that the State follow through with their commitment to the payment system and providers by fully funding the ICF and Res Hab rates consistent with the rate methodology original design. When the Sate implemented the new payment system on April 1, 2018, they decided to not fully fund ICF and Res Hab rates solely because they wanted the payment system to be budget neutral at the time of implementation. The solution was for the DD Section to fund **ICF's at 89.7%** and **Res Hab's at 91.6%** of the rates, and we are still living with these "Funded Percentages." The hourly staff paid/reimbursed rate for these services **should be $20.02 for ICF and $20.10 for Res Hab,** but because of the "funded percentages", providers are only paid a wage rate of **$17.96 for ICFs and $18.41 for Res Hab.** By comparison, Day Services rates are fully funded (100%) with a wage rate of $20.08 per staff intervention hour. **Remember, providers are paying $20.89/hour on average.**

To explain further, the rates (Rate Matrix) are driven off an hourly rate for DSPs with percentages added on for fringe benefits, relief staff, program support, and administration. About 70% (Wages, Fringe Benefits, & Relief Staff) of the total rate providers are paid/reimbursed is for direct care intervention staff while providers are spending 78% of their expenses on wages and benefits. When the direct care rate is underfunded, all other costs of operation are also underfunded, exemplifying the financial hardship.

Annual Inflationary Increases of 4% & 3% for the respective years of the biennium

Per the **Federal Reserve Bank of Minneapolis, the CPI for 2023-2024 was 4.1% and 3.2%, respectively.** We are requesting reasonable annual inflationary increases to help our providers remain competitive. Our members can share horror stories about health insurance premiums increasing 15-40%, property/liability insurance premiums increasing by 25-50%, and the amount of hours/$ being paid out in overtime. We all know what has happened to food, vehicle, and supply costs. Based on recent DD payment data, NDACP member Providers have had their revenues **increased 17.93% during the last 7 years, which averages out to an annual increase of only 2.5% +/- per year.** This number also includes caseload growth and is not just an increase in payments for the same number of people. These increases over the last 7 years (implementation of the new payment system) paid to providers are quite modest.

Remove Accreditation Requirement for DD

All DD licensed providers are required to become and maintain accreditation by 1 of 5 accrediting bodies. The cost of this accreditation is substantial and duplicative of all the other quality ensuring practices, required certifications, and systems that providers comply with to ensure that quality is maintained. Below is a list that is **not** all-inclusive, but a sampling of the things that providers do & comply with to support/prove the services being provided maintain a minimum level of quality.

- Title XIX Surveys
- Claims Audits
- Financial Audits
- Environmental Scans
- Health and Safety Inspections

- HCBS Surveys
- Quality Enhancement Reviews
- Incident Reporting of Abuse, Neglect, or Exploitation
- P & A Oversight & Determinations
- Child & Protective Services Reviews & Determinations
- Case Reviews
- High GERs (General Event Reports) are reviewed by DD Section staff
- Regional DDPM representation on each person's team
- Employee training requirements
- Pre-employment screening (background checks, driving records, drug tests, etc.)

Removing this accreditation requirement will not cost the taxpayers any money, will save the DD provider's money, and will decrease administrative burden for providers. All of these benefits can be realized without affecting the quality of the services being provided.

<u>Increase Corporate Guardianship by Seventy-one (71) Slots and Increase the Daily Rate</u>

Corporate Guardianship is an integral part of providing services to people with Intellectual Disabilities. Everybody does not have a family member or friend that has an interest in their well-being. Catholic Charities will provide further testimony about the waiting list and cost of providing this service.

In conclusion, my testimony on behalf of NDACP is requesting your help with these four items:

1. Fund ICF and Residential Habilitation services at 100% of computed/intended rates,
2. Provide an annual inflationary increase of 4% in the first year and 3% in the second year of the biennium for all DD services,
3. Remove the accreditation requirement for DD providers,
4. Increase Corporate Guardianship by seventy-one (71) slots while increasing in the daily rate.

Thank you for the opportunity to testify before you today. I stand for any questions.

House Bill 1012 – Department of Health and Human Services Budget
House Appropriations – Human Resources Division
February 5, 2025

Representative Nelson and Members of the House Appropriations-Human Resources Division Committee-

My name is Sargianna Wutzke, and I am the Lead Operations Officer for Community Options. Community Options is a member of the North Dakota Association of Community Providers, a group of 31 Developmental Disabilities providers across the state of North Dakota. Each of the agencies has their own unique services but we all have one common goal and that is to be able to deliver individualized, community-based services to individuals with developmental disabilities.

Our agencies provide individualized services to individuals throughout the continuum of life, from birth to death, throughout the state. Our agencies strive to be able to meet the needs of individuals where they would like to live in our state. Community Options has assisted individuals to remain living in their communities of Lisbon, Carrington, Forman, Cavalier, Milnor and Gladstone instead of the individuals having to move to bigger cities to receive the necessary services. We also have supported individuals to move to bigger cities and then move back to their small hometown when they realize the big city is not where they want to reside anymore. There are many other developmental disabilities providers who also offer services in bigger communities as well as rural areas to meet the needs of people who receive services from the organizations.

DD providers work with the most vulnerable populations in the state. We are all committed to ensuring that each person is valued as an individual and each person is in charge of their services. The amount of services each individual receives is based on the support needs of the person. One individual may have staff just a few times a week for two hours each time where another individual may have twenty four hour support from staff.
.
Direct Support Professionals or DSPS are the staff that work directly with the individuals receiving services. In the state, there are over 5,000 direct support professionals. DSPS have many different roles they fulfill to the individuals they support including teacher, medical caregiver, driver, shopper, and cook. On a typical day, a direct support professional will assist individuals with their medical needs including medication administration, catheter care and feedings via g-tube along with taking individuals to appointments and ensuring they are assisting individuals to follow doctor's

recommendations. DSPS assist individuals with their needed personal cares such as showering, freshening, applying deodorant and toothbrushing. They prompt individuals and assist as needed with maintaining their home, ensuring safety in their home, cooking and communicating with their landlords. DSPS transport individuals into the community to shop, go to community activities and to meet their friends and family.

Many direct support professionals have to deal with situations that the general public finds unpleasant. Some of these include individuals hitting, kicking, throwing items, spitting, pulling hair and chasing after the direct support professionals. DSPS receive ongoing training to ensure they are equipped to handle situations like these.

Along with assisting individuals in these aspects of their lives, DSPS also have required documentation that needs to be completed including data taken on each individual's goals and objectives as well as writing a narrative of what they did with each individual during their shift. They also have to document incidents that occur, complete data on behavior support plans and data on medical protocols.

The turnover rate for DSPS in ND is 40%. The turnover rate for the state of ND overall is 5.1%. Tina Bay testified on Monday that the turnover rate in her department is 7%. Our turnover rate has such a negative effect on the individuals we support as it is hard for them to have that much change when it comes to their staff who assist them with the most personal things in their lives. Last session our turnover rate for Direct Support Professionals was 47%. Last session, DD provider staff received a 2% each year along with a dollar an hour increase for DSPS. We believe this has assisted in being more competitive with other field-related jobs, however we are still not close to field-related positions such as CNAs who start at an average of $3 more an hour. DD agencies also have increased wages for our staff to ensure we were able to have the amount of staff needed to support individuals receiving services. Currently our average wage for DSPS is $20.89 an hour. Agencies are paying an average of $3 an hour more than what we are being reimbursed with our funding. We are asking that all of our programs be fully funded. We are also asking for an inflationary increase of 4% and 3%. When doing research these amounts were the amounts that made us able to keep up with federal inflation.

We are also asking that accreditation be voluntary. Organizations feel that the state does a very thorough job with their oversight of provider agencies, which is far greater than the accreditation that takes place by an outside organization. The state ensures quality assurance of each agency by monitoring all general event reports (incident reports) of each agency as well as doing training and monitoring with each agency every three years where they go over those incident reports with administration as well as the DD Program Administrator. Every three years, the State Home and Community Based Surveyor comes and does a comprehensive survey of each agency.

Agencies that provide ICF level of care have surveys by Title 19 yearly. On top of these quality assurance safeguards, any agency that is representative payee for an individual is subject to extremely thorough financial audits by Protection and Advocacy. Accreditation is expensive for an organization. In 2024, Community Options had our accreditation through CQL, and it cost us approximately $25,000. SB 2192 is a bill this session for payment for accreditation for provider organizations, however the fiscal note with the bill currently is probably one third of what would be needed to cover accreditation costs for agencies.

I strongly encourage you to support fully funding all of our programs as well as the inflationary increase for DD providers. Wages are the biggest issue to keeping staff in our field. Many of our staff come into the field because they want to make a difference in the lives of the people we support. An overwhelming response as to why they leave is wages. We do voluntary exit surveys when our staff leave our agency and, in those interviews, the huge majority of DSPS state they are leaving to go somewhere else to get paid more and many times to have less responsibilities.

As providers who serve individuals with developmental disabilities, we want to be able to serve individuals with the services they want, unfortunately right now we are falling short of being able to do that. I urge you to please consider one of our most vulnerable populations and their needs as you look at the inflationary increase for the staff who do so much for them.

Sargianna Wutzke

Lead Operations Officer, Community Options Inc.

Testimony in Support of House Bill 1012
House Appropriations Committee – Human Resources Division
2025-27 Health and Human Services Executive Budget Recommendation for Appropriations Supporting Home and Community-Based Services
Wednesday, February 5, 2025 | 2:00 PM | Roughrider Room, State Capitol

Chairman Nelson, Vice Chairman Stemen, and Members of the Committee,

My name is Erin Sorensen. I was born and raised on a farm in rural North Dakota, and I am a Registered Nurse and owner of Home Instead, a North Dakota Qualified Service Provider (QSP) Agency. Our agency serves communities across Minot, Bismarck, Hazen, and many small rural areas throughout the state. Additionally, in the fall of 2024, we opened an Agency Foster Home for Adults in Bismarck to further support North Dakotans in need of care.

Home Instead provides high-quality, in-home care services that allow seniors and individuals with disabilities to remain safely in their homes for as long as possible. We offer personalized care ranging from two hours a day to 24-hour support, assisting with activities of daily living, mobility, personal care, homemaking, companionship, transportation, medication reminders, and more.

I want to express my appreciation for previous state appropriations supporting home and community-based services. Today, I ask for your continued support by approving the North Dakota Department of Health and Human Services Executive Budget in House Bill 1012, which includes critical funding for increasing Medicaid reimbursement rates for home care providers.

Without adequate reimbursement rates, home care agencies like mine struggle to recruit and retain skilled caregivers, leading to workforce shortages that put North Dakota's most vulnerable citizens at risk. Many caregivers travel over 45 miles just to reach their clients, and while they are deeply committed to their work, we must ensure they receive fair wages in addition to proper training, licensing, and the resources necessary to continue providing compassionate, quality care.

By investing in home and community-based services, North Dakota can:

- Ensure that seniors and individuals with disabilities receive care in their preferred setting—at home.

Each Home Instead® office is an independently owned and operated franchise of Home Instead, Inc., an Honor Company. © 2024 Home Instead, Inc.

- Increase caregiver wages and benefits to help recruit and retain dedicated professionals in this essential industry.
- Reduce the strain on institutional care facilities, which are significantly more expensive than home care services.

Supporting home care is not just a moral obligation, it is a financially responsible decision that benefits families, caregivers, and small businesses across North Dakota. Without caregivers, there is no home care. We must invest in this workforce to meet the growing demand for in-home services and ensure that North Dakota remains a place where people can age with dignity.

I urge you to vote in favor of HB 1012 to help sustain and strengthen home and community-based services across our great state.

Thank you for your time and consideration. I would be happy to answer any questions you may have.

Please feel free to contact me at 701-748-9953 or erin.sorensen@homeinstead.com if you would like to discuss this further.

Sincerely,

Erin Sorensen RN, BSN

Testimony in Support of HB 1012
Appropriations – Human Resources Division
Chairman: Representative Jon O. Nelson
February 5, 2025

Submitted by: Dan Madler, Chief Executive Officer - Beyond Shelter, Inc.
701-730-2734, dmadler@beyondshelterinc.com, Lobbyist #30

Chairman Nelson and members of the Committee, my name is Dan Madler, I live in ND District 27, and I am the CEO of Beyond Shelter, Inc., (BSI) a mission driven North Dakota nonprofit developer of affordable housing. I would like to express my support for House Bill 1012 as it relates to the Permanent Supportive Housing (PSH) component.

BSI in partnership with several stakeholders/partners has developed three (3) Permanent Supportive Housing developments serving the communities of Fargo (Cooper House), Grand Forks (LaGrave on First), and Bismarck (Edwinton Place) and by utilizing best practices, combined with the PSH funding provided in HB 1012, these three (3) developments have been effective in providing stabilized housing to chronically homeless persons.

In closing, I respectively request your support for HB 1012.

Thank you for your time and consideration.

February 5, 2025
Re: HB 1012

Chairman Nelson and Members of the House Appropriations Human Resources Division,

Thank you for the opportunity to testify in support of House Bill 1012 on behalf of the North Dakota Alliance of YMCAs.

Child Care Impacts
The YMCAs are collectively the largest provider of childcare services in the state, serving over 3,200 children in our licensed facilities in Bismarck, Grand Forks, and Fargo. Childcare and early education are fundamental to the well-being of our children and the economic stability of our families—which is all part of the YMCA mission. According to recent studies, about 78% of families with children under 18 have both parents in the workforce. This underscores the necessity of robust childcare services to support these working parents.

We know that quality childcare provides improved employee satisfaction, reduced absenteeism, and increased productivity. Offering child care-related benefits helps attract and retain talent, which is crucial in a competitive job market. For families, accessible and affordable childcare is essential, allowing parents to participate fully in the workforce. This participation not only enhances family income but also contributes significantly to the broader economy.

We believe a true partnership between providers and the state is critical to impacting workforce and youth development.

Child Care Incentives
The state's historical investment in child care programs and funding last biennium provided through the Department of Health and Human Services have significantly helped families manage child care costs and offered providers helpful grants. Additionally, the child care worker benefit program allowing child care workers to receive assistance when they bring their own children to work has been an invaluable resource for the YMCAs in recruiting and retaining staff.

However, despite these important steps, we have yet to scratch the surface of the financial strain child care providers are facing—particularly in classrooms dedicated to our youngest children aged 0-3.

The Reality for Infant & Toddler Care Providers
Caring for infants and toddlers is one of the most resource-intensive services a provider can offer. Strict staffing ratios (1:4 for infants, 1:5 for toddlers), higher operating and wage costs, and

evolving regulatory requirements all contribute to the challenge of keeping these programs financially stable. Our YMCAs are paying between $18-22 dollars an hour for infant and toddler staff to remain competitive in the market and retain quality employees.

Tuition rates alone, however, cannot offset these costs. Market rates are set based on what families can reasonably pay, not on what providers need to cover expenses. Even with tuition ranging from $800-$1,200 per month for infants and toddlers, the reality is that monthly cost hovers closer to $2,000 per child for staff, supplies, food, insurance, utilities, facility maintenance, cleaning and more. We are operating on razor-thin margins, but really, losses of up to $80,000 a year in our YMCA child care programs.

Limited Pricing Flexibility

The U.S. Department of Health and Human Services (HHS) recommends that child care should not exceed 7% of a family's household income to be considered affordable. Yet we understand families spend between 10-20% of their income on child care, with some paying even higher percentages depending on their location and the age of their children.

To understand the real impact, let's break down the typical family's income and expenses. The median household income in Cass County is $73,742 per year. After taxes and benefits, this leaves a family with $63,220 in take-home pay, or about $5,268 per month to cover expenses. Like most families, their income is quickly allocated to necessities (taken from cost-of-living averages):

- Housing (Rent/Mortgage & Utilities): $975
- Household Expenses (Groceries, Utilities, Internet, Phone, etc.): $1200
- Car & Health Insurance: $500
- Gas & Transportation: $200
- Other Essentials (Clothing, Personal Care, etc.): $150
- Total Basic Expenses: $3,025

That leaves $2,243 before factoring in one of the biggest expenses—child care. For families with young children, child care costs are unavoidable. In Cass County, infant care hovers around $1,140 per month, with toddler care at $908 per month. For a family with one infant and one toddler, that's $2,048 per month. After paying for child care, this family has less than $200 remaining each month for emergencies, savings, unexpected costs like medical bills, car repairs, or home maintenance, or family fun.

Monthly child care costs can match or even double a mortgage or rent payment. Over four years, child care expenses can rival the cost of a four-year college degree—an expense families typically spend years preparing for. Families are pushing the limits of what they can afford or dropping out of the workforce to care for their children. Many middle-income families receive no financial assistance at all and still struggle to afford child care tuition, leaving providers unable to raise rates without pricing families out entirely.

Provider Grant Proposal

As the legislature evaluates the 2023 child care package, we believe there is an opportunity to further support providers and incentivize care for the 0-3 age group with a unique funding stream.

We're asking for a dedicated provider grant and corresponding $30 million appropriation to directly support child care providers serving infants and toddlers, ensuring sustainability, affordability, and quality in the ecosystem.

We would encourage that this type of grant support our child care workforce through wages and hiring incentives. It should be directed to infant and toddler care, specifically, where operating costs are highest. And it should recognize providers who participate in the state's Bright and Early quality rating system at a level 2 or higher, to ensure quality measures and support skilled caregivers. **To ensure the grant reaches those who need it most, eligibility should prioritize:**

- **Licensed child care centers, family providers, and nonprofit early childhood programs;**
- **Providers who serve a significant percentage of infants and toddlers; and**
- **Programs that are quality rated at a level greater than or equal to a 2 Star rating.**

Conclusion

The state is providing key support for families with limited income to increase child care affordability. It has helped providers with individual infrastructure and quality grants, our YMCAs included. New child cares are opening in desert areas, easing the strain for those in rural communities and where child care offerings are scarce—and we applaud all of those programs. **Now we ask you for your efforts to fund the gap with direct support for providers of infant and toddler care.**

Thank you for your consideration as we work together to address an issue with a direct impact on workforce development in North Dakota.

Thank you,

NORTH DAKOTA ALLIANCE OF YMCAS
2024 COMMUNITY IMPACT REPORT

$1,736,663 in financial assistance was given to support kids and families from economically disadvantaged backgrounds to participate in North Dakota YMCA programs and activities

3,230 children were enrolled in YMCA licensed childcare centers

29,555 youth participated in out-of-school-time activities at the Y that focus on holistically fostering the physical, social and emotional development of kids

IN ADDITION TO FULL TIME STAFF AT ALL LOCATIONS, YMCAS ARE OFTEN THE FIRST EMPLOYERS OF YOUNG PEOPLE. YMCAS ALSO OFFER OLDER ADULTS OPPORTUNITIES TO SUPPLEMENT THEIR INCOME WHILE BEING PART OF A HEALTHY COMMUNITY.

2,113 individuals are employed by North Dakota YMCAs

$25,477,591 was paid in wages and benefits by North Dakota YMCAs

WE ARE COMMUNITY

The YMCA makes accessible the support and opportunities that empower people and communities to learn, grow and thrive. There is no other nonprofit quite like the YMCA. That's because in 10,000 neighborhoods across the nation, we have the presence and partnerships to not just promise, but to deliver, lasting personal and social change.

Communities with high rates of volunteerism tend to have greater income equality than similar communities that do not.

When members make a friend they are 50% more likely to stay with the YMCA.

North Dakota YMCA's have over 100 community partnerships, some of which include:

- •Foster Families
- •Military Families
- •Easter Seals
- •United Way

- American Red Cross
- AmeriCorps
- Area Churches
- Local Hospitals
- Boys & Girls Club
- Chamber of Commerce
- City Governments
- Schools, Colleges & Universities

- Department of Corrections
- Dakota Boys & Girls Ranch
- Dakota Medica
- Foundation Ministerial Association
- Healthy North Dakota
- Home School Groups

CARING | HONESTY | RESPECT | RESPONSIBILITY

"I love the friendships and coffee at the Y. For many of us that are seniors, it provides a primary social time in our lives."

"Thank you for providing such a wonderful place for fitness and socializing!"

Testimony
House Bill 1012 – Department of Health and Human Services Budget
House Appropriations – HR Section
Representative Jon Nelson, Chair

February 5, 2025

Chairman Nelson and Members of the Committee:

My name is Lorena Poppe. I am the owner and CEO of Poppy's Promise, a Bismarck-based provider of Developmental Disabilities services, and the current President of the ND Association of Community Providers (NDACP). I am testifying today in support of HB 1012. NDACP is comprised of both large and small providers, newer organizations, and those that have operated for decades. There is diversity in the types of services we provide but we are on common ground when it comes to matters of reimbursement of services, hiring and maintaining quality staff, and providing a sense of belonging and security for the people we support.

We are requesting an inflationary increase for DD providers of 4% and 3% during the 2025-2027 biennium. This request aligns with national inflation levels over the past two years and is essential to the recruitment of employees in a competitive job market. It is also critical to the retention of staff who are already invested in the people they are supporting. Imagine that you have a child or grandchild that is born with a condition that requires complex medical and personal cares. As a family, you learn about services that can be beneficial and often lifesaving. You get connected to a provider whose staff is dedicated to learning and performing intensive procedures, administering medications, and providing the level of care that is expected and deserved. Your whole family gets to know and trust that staff and sees them as a member of the family. Then with very little notice, that staff announces they are leaving to work in a different industry that pays higher and offers more long-term employment stability. Your family member's progress could suffer while introducing and teaching new staff vital procedures. Bonds formed with staff would go away and building trust with new staff will start again. Now imagine having to go through that every four or six months. Without the ability to meet levels of inflation and provide stability we providers are often seeing turnover like that.

NDACP is also requesting that the requirement for accreditation be removed as a condition of DD licensure and that it become voluntary for providers. Achieving accreditation was initially part of the requirements for providers after the de-

institutionalization of the state institution in Grafton as a means to help assure quality services were provided by community-based organizations. Since that time, a number of required quality assurance oversight processes have been added for DD providers that are often duplicative and most certainly create an administrative burden. Our goal should never be to pull staff away from providing direct care to complete nondirect tasks associated with each required oversight process. This interrupts relationships with staff and continuity of care for people receiving services. The cost is excessive ($20,000 - $40,000 for a 4-year accreditation term) and overreach exists as most accrediting bodies won't focus on DD services alone, even when DD is the only service requiring accreditation.

You will hear from directors of other NDACP member organizations this morning who can share detailed information about our request that reimbursement rates for Intermediate Care Facility (ICF) and Residential Habilitation services be increased to 100%. They will be able to answer your questions in detail.

I urge you to support these requests so that providers can build and maintain a strong workforce and focus on services and supports that are truly person-centered. Thank you for your time today, and I would be happy to answer any questions you may have.

Lorena Poppe

House Appropriations, HR Section

House Bill 1012

Wednesday, February 5, 2025

Chairman Nelson and members of the committee,

My name is Mercedes Flores, and I am a doctoral Occupational Therapy student at the University of Mary. I am testifying today in support of HB 1012. This semester, I am completing my Capstone Project at Poppy's Promise in Bismarck. My project focuses on collaborating with staff to build a support and resource system for caregivers of children and young adults with disabilities. The time that you, our legislators, take to understand the developmental disabilities system and the needs of providers like Poppy's Promise is invaluable. These providers not only provide valuable services but also help ensure that hands-on learning and collaboration opportunities exist for students like me who want to positively impact the lives of others as we move into our chosen careers.

As a former employee of Poppy's Promise, I have witnessed firsthand the profound impact person-centered services make in the lives of children and their families. These services strive to meet families where they are at and offer crucial support in helping them navigate the unique challenges associated with a disability. The impact of these services extends beyond the families served, and into the broader community.

I urge you to provide an appropriation that allows providers to maintain dedicated, quality employees by staying competitive with other industries. This support is vital to ensuring that these services continue to thrive and support our community.

Thank you for the opportunity to speak with you today and for your consideration of this important issue.

Mercedes Flores
Doctoral Occupational Therapy Student
floreshove@gmail.com

Good morning, Chairman Nelson and the House Appropriations Committee. My name is Chris Haseleu, and I am speaking as a member of NDACP and the President and CEO of Kalix, a non-profit Developmental Disability provider located in Minot, Belcourt, and Rolla North Dakota. I am a Doctor of Nursing Practice and align much of my oversight to leading the path of caring for people. Kalix's mission is to provide privacy, purpose, and dignity for each person. The people we are fortunate to work with daily deserve adequate services, jobs, and a place to live. As a larger Developmental Disability Service provider in North Dakota our organization houses 160 people, enrolls 137 in day programs, provides employment assistance and vocational rehabilitation for 75 people, and 34 people receive in Home Supports. Modest funding for low-income individuals with disabilities is allocated with Medicaid and rates are set within the Support Intensity Scale (SIS) score. Reimbursements to providers are not always allowing for breakeven financials. A few programs that I would like to point out are our Day Services, Independent Habilitation, and Individual Employment. Varying net losses year after year have made these programs a service offered as the primary representation of why we are a non-profit, by putting people first before our budget.

Kalix and many other providers continue home care and community employment programs that deinstitutionalize people with disabilities from the Life Skills Transition Center in Grafton. As NDACP is asking for a 4 and 3 percent inflationary increase I agree that meeting inflationary needs for programs is necessary to maintain current functions. Kalix does provide home settings as large as 40 beds to small housing opportunities for 4 people. These living arrangements include Intermediate Care Facilities and Residential Habilitation. These settings allow for daily rate payments that support a consistent funding source based on a SIS score. Variable payments for SIS program enrollees in Day Service attendance, Independent Habilitation client refusals for services, or adjustments in a person's employment impact the variability of service hours and reimbursement. The demand for home support is increasing as well as the ability for people to be employed in the community. As an organization we strive to provide freedoms for people to live independently whether at home or their choice of competitive employment.

Kalix is seeing an increase in comorbidities and mental health issues as well as increased life expectancies that impact the ability to take in new clients. I would like to list some of the most common mental health diagnosis impacting developmental and intellectual disabilities settings which include autism, anxiety, depression, attention deficit hyperactivity disorder, and obsessive-compulsive disorder. Our primary Direct Service Providers (DSPs), provide firsthand service based on guidance from physicians, state Board Certified Behavior Analysts, and Behavior Coordinators. In order for a DSP to handle these mental health issues consistently they must be long tenured employees that work with

these people to maintain their daily routines. The funding for services which include mental health outcomes for people is a need across all of North Dakota. The 4 and 3 increases would allow us to maintain the current workforce that these people need to uphold daily programs that promote the physical and emotional well beings of people. We have people who are assisted with Individual Employment that because of mental health needs do not go to work and are terminated. As a provider who is helping people with mental health there is no reimbursement for working with an employer that is going to terminate a person because they do not show up to work. When the person can no longer mentally handle employment, they are terminated, and parts of Individual Employment are not funded to help them through their struggles. If a person becomes unemployed, they can utilize Day Habilitation services or Independent Living services, however their mental health services are not directly funded, and it is up to the providers to decide how to set new person-centered plans and implement behavior needs without further reimbursement. Kalix has multiple clients that go between ending employment and starting habilitation programs and these transition hours can be a struggle to be reimbursable.

We provide services as a non-profit provider with reimbursements that are both variable, 15-minute payments, and daily set rates. Our non-profit vision is people, and we put them first. My request is to continue to fund Disability Services at a rate that meets inflation. Meeting inflation allows Disability Service Providers to maintain current programs, even if that is mental health services that are not fully funded or lost revenue in Independent Habilitation. If programs do not meet inflationary expectations Service Providers will continue to review feasibility for certain programs within their operations. Community involved programs of Day Services, Independent Habilitations, and Individual Employment are noted areas of not meeting funding but as a nonprofit provider we will continue these programs regardless. Providing resources for Disability Services reimbursement depends on the state of North Dakota and its continued funding for services supported to people. I thank you Chairman Nelson and the House Appropriations Committee. I am open to any questions.

Chris Haseleu

In Support of HB 1012 (Veterinary Medicine Loan Repayment Program)
February 4, 2025

Chair Nelson and Members of the House Appropriations Human Resources Division,

My name is Dr. Erika Schumacher, and I serve as a director 3 of the North Dakota Veterinary Medical Association (NDVMA). Our organization proudly represents over 300 veterinarians across diverse disciplines, including companion animal, exotic, livestock, food and fiber animal, and equine medicine, as well as veterinarians in research, academia, and government. For more than a century, the NDVMA has been a steadfast advocate for the veterinary profession. We are committed to ensuring that statutory changes not only protect the interests of the public, our clients, and patients, but also recognize the practical realities of veterinary practice and support the ability of veterinarians to provide safe and effective veterinary services.

I am an owner and mixed animal veterinarian practicing at West Dakota Veterinary Clinic in Dickinson, North Dakota. I am here today to voice support on behalf of the North Dakota Veterinary Medical Association (NDVMA) HB 1012, specifically as it relates to the Veterinary Medicine Loan Repayment Program (VMLRP).

My professional career has been shaped by two incredible programs: the Professional Student Exchange Program (PSEP) and the Veterinary Medicine Loan Repayment Program (VMLRP). These programs helped me overcome significant obstacles in my journey, and I am here today to share my story with you—one that is proof of the far-reaching impact these programs can have, not just on individual careers, but on rural communities like mine.

I am a GED graduate who never attended traditional K-12 schooling. My journey into veterinary medicine was far from conventional. When I was accepted into veterinary school, I was also a mother to a 2-year-old child. Balancing the demands of motherhood with the rigorous coursework of veterinary school was no small feat. Yet, thanks to the PSEP program, attending veterinary school became a reasonable career option while raising my family. The PSEP financial support that covered the out-of state portion of the tuition costs made it possible for me to attend veterinary school and begin building the career that would eventually allow me to give back to the community I serve.

Upon completing my education, I returned to a rural North Dakota community, where I was able to begin practicing immediately. It was VMLRP's loan repayment assistance that made it financially feasible for me to commit to working in a rural area, where access to veterinary care for food animals is often limited. Veterinarians that are considering working in these areas are having to balance the financial impacts of an average debt of $ 179,505 at time of graduation and are earning an average starting salary of $90,000.

I am proud to say that I'm still in the same practice I started in right out of veterinary school, and in less than 10 years, I have become an owner in an all-women-owned veterinary practice. In fact, I'm evidence of

the VMLRP success in recruiting large animal veterinarians and retaining them; this program has an overall retention rate of 79% after fulfilling the contract. In addition, this program has facilitated the buy-in to a practice or starting of a practice with nearly 43% of those completing their contract becoming practice owners in North Dakota. Through this ownership, I can support my family, provide for my community and contribute to the region's agricultural economy.

None of this would have been possible without the opportunities provided by PSEP and VMLRP. These programs didn't just help me pay down student loans—they helped me build a life, a career, and a business that benefits the entire community. They gave me the chance to return to a rural area that desperately needed veterinary care and to stay here, raise my family, and serve the people and animals who rely on us.

But the need for these programs is not just personal—it's also about the future of rural America. Our rural communities depend on dedicated professionals who are willing to serve in areas that often struggle to attract qualified individuals. The VMLRP is not just life-changing for individuals like me; they are essential to ensuring that rural communities continue to have access to the services they need to thrive.

As you consider policies and programs that affect rural North Dakota, I urge you to continue supporting the VMLRP. This program is vital in addressing the shortage of veterinarians and other essential professionals in rural and underserved areas. It helps promote economic growth through attracting and retaining veterinarians, allowing them to build careers and practices, provide for their families, and contribute to the wellbeing of rural communities that are the backbone of our state's economy.

Thank you for your time, and for your continued support of programs that make a meaningful difference in the lives of individuals and communities across our state.

I'm grateful for the opportunity to share my story with you today, and I am confident that with continued support, many more like me will be able to make a lasting impact in rural communities.

Sincerely,

Dr. Erika Schumacher
NDVMA
Director 3

USpireND
WITH YOU ON YOUR JOURNEY

House Bill 1012
House Appropriations Committee – Human Resource Division
February 3, 2025
Representative Nelson, Chair

Chairman Nelson and Members of the House Appropriations, Human Resources Committee, my name is Missi Baranko and I am the Executive Director of USpireND, a nonprofit organization in North Dakota that serves children, families and child care providers. USpireND has two main programs, Inclusion Support ND and Healthy Families ND. Both programs receive financial support in the forms of grants and contracts administered by the Department of Health and Human Services and part of HB1012.

I am here today to testify in support of HB1012 and to share the impact it has on children, families and childcare providers.

The first program I am going to talk about is our Inclusion Support program. For your reference, Inclusion Support is one of the contracting partners with the Early Childhood Section of the Department. We are specifically tasked with providing outreach and technical assistance, in the forms of consultation and coaching, to early childhood providers caring for children with special needs and children who require additional support due to challenges related to behavioral, health or developmental needs.

We have five Inclusion Coaches dedicated to supporting early childhood providers across the entire state. In FY24, we offered coaching and consultation to 259 separate early childhood programs with over 1700 instances of support. The support provided is tailored to the unique needs of each child and provider. Our goal is to leverage our expertise in inclusive practices to ensure all children with special needs and disabilities are included in child care settings and routines, and that providers have the necessary support and resources to achieve this.

We know that being a childcare provider can be difficult and meeting the individual needs of all children while also balancing the other needs of the program can feel overwhelming. We also know that early childhood providers want the best for all children in their care.

USpireND
WITH YOU ON YOUR JOURNEY

USpireND
WITH YOU ON YOUR JOURNEY

Child care providers often seek coaching and consultation to better support children with disabilities in their care. For example, a provider might reach out for guidance on creating an inclusive early childhood space for a child with autism. They may need strategies to help the child engage in group activities and communicate effectively with peers.

Another provider might request assistance in adapting daily routines for a child with physical disabilities. They could need advice on modifying play areas to ensure accessibility and safety, or on using adaptive equipment to support the child's participation in various activities. Additionally, a provider caring for a child with sensory processing issues might seek consultation on managing sensory sensitivity. They might need tips on creating a sensory-friendly space and incorporating sensory breaks into the daily schedule to help the child regulate their sensory input.

In each case, the Inclusion Coaches offer tailored support, drawing on their expertise to provide practical solutions and resources. This ensures that all children, regardless of their abilities, can thrive in a nurturing and inclusive child care setting.

Inclusion Coaches also provide coaching and consultation to early childhood providers in applying for and receiving the Inclusive Care Support Grant, which is administered by the Department. This grant is designed to provide financial support to licensed or self-declared early childhood programs in creating and maintaining inclusive environments that support children with disabilities or developmental delays to learn, grow, play and develop alongside their peers. This funding has had a huge impact on providers' ability to care for and continue caring for children with unique needs. We have seen programs use this funding to add staff to lower ratios so they can provide more 1x1 care for a child, completed remodeling to ensure their facility is accessible, purchased materials such as sensory equipment, specialized seating or communication devices and participated in training opportunities to gain knowledge to be able to better support children with disabilities.

On January 30, Kay Larson, Early Childhood Section Director provided you with an overview of the Early Childhood Section. I want to draw attention to page 35 of this slide deck as you will notice a decrease from $7,000,000 to $5,000,000 related to Providers Grants and Shared Services. I encourage you to consider adjusting this amount back to $7,000,000 to ensure providers continue to have access to both Inclusion Support Services and the Inclusive Care Support Grant as well as other early childhood focused grants and consultation. In addition, on slide 25, you will see information related to a one time, SIIF, funding request for Inclusion

USpireND
WITH YOU ON YOUR JOURNEY

USpireND
WITH YOU ON YOUR JOURNEY

Support. This funding ensures we can maintain the employment of five Inclusion Coaches, which allows us to respond in a timely manner to all requests received for Inclusion Support. I also encourage you to take time to read testimonies, already uploaded, from child care providers related to their passion for this work and how funds in HB1012 will impact their day to day abilities to stay in business and care for children in our state.

At this time, I would entertain any questions related to our Inclusion Support Work and then would like to proceed with my testimony regarding our Healthy Families ND Program.

Healthy Families North Dakota is a home visiting program, and we are thrilled to announce that we are celebrating 25 years of offering free home visiting services to families across our state! Our longevity and success in this space is due to the strong partnerships we have with the Department of Health and Human Services.

Healthy Families ND currently offers home visiting services to families in ALL 53 counties across North Dakota. It is our focus to ensure we are reaching out and connecting with families, including our most rural areas, bringing services and supports to them in their home and community. Although we do not use income as a factor for eligibility, our most recent data indicates that 52% of enrolled families had an income of $20,000 or less at enrollment.

Healthy Families North Dakota (HFND) focuses on improving maternal and child health, increasing child development, school readiness & family economic self-sufficiency while also preventing family violence and child abuse and neglect. Through this work we strengthen families while creating thriving communities and saving tax payer dollars. Healthy Families ND is accredited through *Healthy Families America*, the nationally recognized, evidence-based home visiting program of Prevent Child Abuse America. Using a two-generation approach, home visiting through HFND assists parents in developing the skills and confidence to raise healthy children and increases family well-being by preventing adversity and building resilience during the most critical years.

HFND is always free & voluntary, with services beginning at a variety of times, focusing on the first three years of a child's life. By using a two-gen approach, HFND builds well-being by intentionally and simultaneously working with children and adults in their lives. This approach aligns opportunities to optimize each person's potential. The results are healthy parents with

USpireND
WITH YOU ON YOUR JOURNEY

family-supporting jobs, healthy children meeting developmental milestones, and better-connected individuals able to participate in civic and family life.

Due to partnerships with the Department, specifically Title IV-E Prevention Services under the Children and Family Services, A2A (Alternatives to Abortion) under Public Health, Women's Health Services and Opioid Settlement Funding under the Behavioral Health Division, we were able to complete over 4000 visits with families across the state in FY24.

This blended approach to funding ensures sustainability for our program and supports families with unique backgrounds, risks and needs in accessing vital home visiting supports regardless of where they may live in North Dakota.

Healthy Families ND was the first program in the state to partner with the Department to access Title IV-E Prevention services. Healthy Families is one of the programs rated as "Well supported" by the Evidenced Based Clearinghouse for Child Welfare which allows our program to access this funding. This means the program has been researched and proven to prevent child abuse and neglect and reduce the number of children entering child welfare and foster care, which is a cost savings to both the state and federal government.

In FY24, we provided vital home visiting services to 207 families due to Title IV-E Funding. Without this funding we would be unable to provide services to these families and would not be able to offer services statewide.

The second funding source I would like to highlight is the A2A, Alternatives to Abortion, through Public Health, Women's Health Services. A2A provides reimbursement for home visits with pregnant women and parents caring for children twelve months of age or younger. Through this work we provide prenatal, postnatal and parenting education supports to families.

The last funding source I want to mention is Opioid Settlement Funding. In December 2023, we participated in the competitive grant application process with the Behavioral Health Division to receive funds from the Opioid Settlement. Our USpireND Healthy Families ND program was one of 14 programs chosen to receive funding. This funding has allowed us to receive reimbursement for costs related to providing home visits to parents who are struggling with substance use, in recovery or incarcerated. The funding also supported reimbursement for training costs to provide professional development opportunities to all staff, specific to working with parents experiencing challenges with substance use.

USpireND
WITH YOU ON YOUR JOURNEY

Our Healthy Families ND program has over 50 separate funding sources and funders to create a sustainable program, but without the above-mentioned partnerships and funding we would not be able to continue to provide services to all referred families in all counties in North Dakota.

Thank you for your time today, allowing me to share the impact HB1012 has on vital home visiting services in our state. I encourage you to support funding in this budget request related to Title IV-E Prevention Services, A2A and Opioid Settlement Funds.

Missi.baranko@uspirend.org

House Bill 1012 – Support
February 5, 2025
House Appropriations, Human Resources Division
Janelle Moos, AARP ND jmoos@aarp.org

Chairman Nelson and Members of the Committee,

My name is Janelle Moos, Associate State Director of Advocacy with AARP North Dakota. AARP is a nonpartisan, nonprofit, nationwide organization with nearly 38 million members. Approximately 82,000 of those members live in North Dakota.

We appreciate this committee's work to dig into issues important to older North Dakotans and this need will continue to grow. Today our population age 50+ is almost 230,000 or 32% and over 50% of those households are age 65 or older. Today in North Dakota over 9 counties have a mean age of over 50 and a number of others are right on their heels.

In 2023, AARP conducted a survey of 703 people over 45 in North Dakota asking them how they feel about issues such as health care, financial security, energy costs, caregiving, livable communities and more. North Dakotans provided three primary takeaways including: 1- retirement is on their minds, 2- affordable healthcare is important to them and 3-They want to remain independent and age in place (click to watch discussion). The third takeaway relates directly to programs and funding outlined in HB 1012- Aging and Adult Services Division including:

- Over half of respondents rated their communities as good or very good places to live.
- Seven in ten would prefer to receive care for themselves or a loved one at home.
- 65% are either currently providing or have provided care in the past to an adult relative or friend.
- 79% want to have services available to age in place
- 78% want to say in their home as they age
- 81% told us that getting places independently is important

Investments in Home and Community Based Services (HCBS) like those in the Aging and Adults Services will support older North Dakotans deserve to know they have options for care as they

age. Overwhelmingly they prefer to stay in their homes and communities and the budget should continue the state moving in a direction that prioritizes Home and Community Based care.

A couple of other notes related to the Aging and Adults Services portion of the DHS budget that we support:

- $500,000 in SPED program to support a “capable like” program that would be offered to people 65 and older access to a handyman and assessment by OT/PT and nurse that would go into their home when first experiencing functional decline to assess the home and make modifications.

- Home health private nurse increases and targeted rate increase for unit rate increase in order to competitive with other states—

- Strengthen HCBS -transition and diversion program—other congregate living- other people on Medicaid and need to transition out of nursing home or to a private home

- Need for one new Ombudsman and Adult Protective Services- two new FTEs

In addition, SNAP is an important program that ensures older adults and families get the nutrition needed. It is an especially important program for Americans over 50 because many face challenges to employment, live on fixed incomes, live alone, and have limited financial resources to pay for necessities like food, housing, and essential medicine. To people struggling to put food on the table, hunger is not a political issue, it is a daily reality. SNAP is a vital lifeline that feeds 23,840 North Dakota households. 35% of those recipients are either elderly or disabled. Also remember, participants generally spend their SNAP dollars locally, soon after receiving them, boosting local economies.

LIHEAP has served as a lifeline for low-income families. As you may know, AARP believe utility issues and rates are a key pocketbook issue. We have intervened in various cases in front of the North Dakota Public Service Commission on behalf of older adults and consumers and know the struggle of families to afford their utility payments. Having a safety net for families especially in our climate is not only the right thing it is the moral thing to do.

Finally, there are important investments in housing including in HB 1012 – HHS budget Eviction prevention and targeted rental assistance ($13.5M) and home modification grants for accessibility ($1M)- that will support as way to ensure older North Dakotans can continue to live in their homes and communities.

Surveys by AARP show that most Americans, including older North Dakotas, prefer to live in walkable neighborhoods that offer a mix of housing and transportation options and are close to

jobs, schools, shopping, entertainment, and green spaces. Missing Middle Housing can meet these needs. “Missing Middle Housing” describes a set of residential building types that exist in the middle of the continuum between detached single-family houses and large apartment buildings. The word “middle” as used in the term “Missing Middle Housing” principally refers to the midsized housing types that exist between single family homes and large (often high-rise) apartment or condominium buildings. However, “middle” also relates to the home type’s level of affordability, given that this home type uses land more efficiently, designs small yet spacious residences, employs lower-cost-but-still-quality construction methods and reduces the reliance on automobile owners.

With a growing aging population, construction of a variety of housing options will become more important. Currently, we have thousands of older adults who are “house rich but cash poor.” Some would like to sell their home and buy something more affordable or accessible in their community, but in most cases, that type of housing does not exist.

Thank you for your work on this important budget that provides the resources and support that allows so many North Dakotans to live and age in their homes and communities.

House Appropriations - Human Resources Division
HB 1012
February 5th, 2025

My name is Kirsten Dvorak, Executive Director of The Arc of North Dakota, an organization dedicated to promoting and protecting the human rights of individuals with intellectual and developmental disabilities (IDD). For 65 years, we have advocated for inclusive services that empower individuals with disabilities to lead meaningful, independent lives in their communities.

In 1980, The Arc of North Dakota and four courageous families took a stand against the horrific conditions at state-run facilities, notably San Haven and Grafton State School, now called the Life Skills and Transition Center (LSTC). These institutions faced issues of overcrowding, neglect, and abuse, trapping individuals with disabilities in unsafe, unsanitary environments without adequate medical care or educational opportunities. Reports documented the use of physical restraints due to inadequate staffing and resources, illustrating a grim picture of widespread mistreatment.

The 16-year legal battle that followed exposed these injustices and led to critical reforms, ensuring that individuals with disabilities were no longer warehoused in inhumane conditions or stripped of their basic rights. While significant progress has been made, the history of these institutions is a stark reminder of why continued investment in community-based services is essential. Without proper funding and oversight, we risk regressing into outdated practices that isolate and fail individuals with disabilities. We must remain vigilant in protecting their right to live with dignity and full participation in their communities.

We appreciate the remarkable turnout at Disability Awareness Day. However, while raising awareness is important, it must be paired with concrete action. Individuals with exceptional needs—including those who require personalized support, crisis intervention, and ongoing assistance—cannot thrive on awareness alone. They need dedicated staff, comprehensive services, and sufficient funding to succeed within the community.

According to the latest U.S. Census data, approximately 12% of North Dakotans have a disability, highlighting the urgent need for strong support systems. Data from the Department of Health and Human Services shows an increasing demand for developmental disability (DD) services. As of 2024, more than 8,400 children and adults are receiving case management services, and this demand continues to rise. Without adequate staffing, individuals with disabilities risk losing their ability to live independently, work in their communities, and engage in meaningful activities.

It is particularly concerning that involuntary discharges due to "inability to meet needs" continue. Between July and December 2024, nine individuals were involuntarily discharged, some due to behavioral or medical challenges and others because of staffing shortages. These are real people—our neighbors, friends, and family members—who found themselves without the services they rely on simply because there wasn't enough staff to support them.
A critical approach to addressing this crisis involves securing adequate funding. The executive budget request outlines a 1.5% inflationary increase for providers; however, this is inadequate. Direct Support Professionals (DSPs) form the foundation of community-based services, facilitating individuals with disabilities in leading fulfilling and independent lives. Their wages must remain competitive to attract and retain a proficient workforce. Without substantial investment in provider rates, we risk increased staff shortages, involuntary discharges, and the deterioration of essential services.

We fully support the proposal for $9 million to expand the Autism Waiver. This funding is essential for delivering timely and appropriate services to children and adults with autism, reducing long waitlists, and improving access to necessary therapies and support programs, such as ABA.

We support the state's commitment to the Cross-Disability Waiver, which ensures individuals with diverse disabilities receive the services they need. Last week, we testified in strong support of the $5 million request to hire experts and refine the level of care framework. This funding is crucial to creating an accurate, equitable system that fairly assesses individuals' needs and provides them with appropriate support.

The Arc of North Dakota is encouraged by the recent decrease in population at LSTC, reflecting progress toward community-based care and independent living. However, we remain deeply concerned about the continued placement of youth at LSTC. Institutional settings are not appropriate for young individuals with disabilities, particularly those with a dual diagnosis who require specialized, community-based support. Sustainable funding solutions must be found to expand community services, ensuring that no child is forced into an institution due to a lack of appropriate resources.

Vocational Rehabilitation (VR) services are essential for helping individuals with disabilities achieve employment and independence. These services provide job training, skill development, and workplace accommodations, enabling individuals to contribute actively to the workforce.
A major concern is the implementation of Order of Selection, a federally mandated process that limits services when funding is insufficient. If enacted in North Dakota, this would create a system where only those with the most severe disabilities receive immediate assistance. In contrast, others are placed on a waiting list with no clear timeline for support. We strongly oppose implementing Order of Selection and urge full funding for VR services to ensure all eligible individuals receive timely support.

The State Hospital has long played a vital role in providing services for individuals with developmental disabilities and mental health needs. Developing a new State Hospital presents a crucial opportunity to modernize care, enhance accessibility, and ensure comprehensive, person-centered support. We strongly support the establishment of this new facility and urge the state to prioritize funding that sustains and expands access to these essential services.

I respectfully urge this committee to recognize the long-term benefits of investing in Home and Community-Based Services (HCBS) and provider rates. As demographic trends indicate, an aging population coupled with increasing disability rates will significantly amplify the demand for services. Proactive investment in community-based care is not only necessary but also cost-effective. Supporting individuals in community settings is far less expensive than institutional care and helps prevent costly crisis interventions and unnecessary institutional placements. This funding is not merely a financial consideration but a commitment to upholding the dignity, independence, and well-being of individuals with disabilities. By prioritizing these essential investments, we can establish a sustainable system that ensures individuals with disabilities have access to the care and support they need to thrive in their communities.

Kirsten Dvorak
Executive Director
The Arc of North Dakota
701-222-1854

I have included a link to *Abolition of Shame*, a documenty by The Arc of Upper Valley that details the lawsuit: https://youtu.be/LBMBx6UFyC0?si=HsYqlZ8D5Jth-TZb

The language used to describe individuals with disabilities has evolved significantly. Some once-common terms are now considered offensive and dehumanizing. While specific historical terms are referenced in this program due to their relevance to the lawsuit, The Arc does not use or condone any derogatory language. This includes the R-word, which was previously part of The Arc's name but has since been removed to reflect a commitment to respect and dignity. Moving forward, The Arc should always be referenced as The Arc, not as an acronym (ARC or The ARC). It is a name that signifies advocacy and inclusion, and it should be recognized as such in all contexts.

ITP
Integrated Telehealth Partners

Chairman Nelson and Members of the House Appropriation Committee.

I am Doug Wilson, the President of Integrated Telehealth Partners. We provide telebehavioral health services throughout North Dakota. We provide 24/7 Crisis Services in two hospital emergency departments, Park River and Northwood, and we are in contract discussions with several others. We provide outpatient telepsychiatry and telethearpy in 10 communities Bowman, Crosby, Dickinson, Garrison, Grafton, Lisbon, Northwood, Park River, Stanley, and we are onboarding services in Williston.

In October 2023, Integrated Telehealth Partners entered into an agreement with the North Dakota Department of Health and Human Services to provide behavioral healthcare in the county jails, thanks to many of the representatives here today and this committee. We appreciate the opportunity to provide such valuable services in supporting the Sheriffs, Jailers, Corrections Staff, and most importantly those struggling with behavioral health conditions.

After signing the agreement with HHS, we estimated it would take 18 months to get buy-in and onboard every county jail. After making several onsite visits to each jail across the state and tremendous support from Pam Sagness, Shauna Eberhardt, each of the Resource Centers, and several HHS staff we were able to onboard all 18 jails in just 8 months. We are serving more than 150 inmates a month and feel there is an opportunity to help even more. We continue to have ongoing dialogue and periodical visits with each jail, the Resource Centers, and HHS. Next Thursday, I personally will be in Fargo meeting with the Southeast Resource Center and Cass County Jail to discuss how we can help streamline to the commitment process.

This year we are working to help jails with their suicide risk assessment processes. We understand some jails have effective evidence-based screening processes in place which we don't want to disrupt. However, several jails have come to us raising their hands and asking for assistance because they don't feel qualified to determine who should be on suicide watch and who is safe to come off suicide watch. We have collected materials to provide jail staff and are developing training videos to help train staff on evidence-based process. In addition, we are working to make substance use providers available to the jails since we are seeing a growing prevalence of substance use disorders among inmates.

We feel good about the rollout of our services to the jails, and I think you will agree in saying that it's been a success after hearing the letters of support that we've received.

2/4/2025

Honorable members of the legislature,

I want to highlight the critical role of telepsychiatry services in our jails, particularly in a state like North Dakota, where there is a notable shortage of healthcare providers in rural North Dakota, especially in specialties such as psychiatry care. Telepsychiatry has emerged as a transformative solution, bridging the gap between incarcerated individuals and the mental health care they desperately need.

Across our state, approximately 75% of inmates struggle with substance use disorders, often coupled with serious mental illnesses. The prevalence of these conditions in our jails is three to six times higher than in the general population. Without proper intervention, these individuals tend to remain incarcerated longer and face a greater risk of recidivism upon release. If we fail to provide essential mental health support, we will only perpetuate a cycle of incarceration and missed opportunities for rehabilitation.

Despite the dedicated efforts of our counties, the challenges remain daunting. Historically, 75% of inmates with serious mental illnesses will go untreated or await sentencing or will be released back into the community without care. Telepsychiatry services have provided a vital lifeline, ensuring that individuals receive necessary treatment, even in the most remote corners of our state. However, the demand for these services far exceeds the available resources, with provider shortages and increasing mental health needs compounding the issue.

The importance of telepsychiatry cannot be overstated. Without it, large numbers of individuals with mental illnesses will continue to cycle through our criminal justice system, leading to tragic outcomes and missed opportunities to improve both lives and public safety. It is our duty to expand and strengthen these services, ensuring that every inmate with a mental health condition has access to the care they need. Doing so can reduce recidivism, ease the burden on our small county correctional facilities, and create a safer and healthier future for our communities.

I urge you to fund and expand telepsychiatry services in our state's jails. This will help break the cycle and provide a path toward recovery and reintegration for those who need it most.

Bob Werlinger
Administrator, McKenzie County Jail
701-421-3675/701690-6480
rwerlinger@co.mckenzie.nd.us

2/4/2025

Mountrail County Correctional Center was part of a working group that included jail Administrators and Executive Director Sagness in partnership with ITP Telepsychiatry to implement Telepsychiatry in ND Jails that was funded through the biennium. Telepsychiatry has become a widely acceptable method for delivering psychiatric care. Studies have shown its effectiveness is equal to in-person psychiatric visits. ITP is providing an alternative to transporting inmates for psychiatric care and has the potential to decrease inmate waiting time to receive care. ND Department of Health and Human Services, Behavioral Health Division (BHD), partnering with Integrated Telehealth Partners (ITP) began to offer our facility services in December of 2023.

ITP has provided psychiatric evaluations and medication management for inmates using telehealth technology. HHS paid ITP's administrative costs and provider costs associated with this service allowing it to be available to incarcerated individuals.

Jail staff, administrative staff and medical staff received training to establish an efficient process to exchange inmate medical records and deliver medication prescriptions to our local pharmacy. Mountrail County Correctional Center provided the hardware for web conferencing (typically a computer & webcam or Ipad) and a high-speed internet connection. ITP supplied the software needed.

Mountrail County Correctional Center found the following benefits just to name a few.

- Not limited to the services of the nearest mental health treatment center
- Safety and security of Doctor's and inmates by eliminating direct contact
- Improved access to mental health specialty care, especially in rural areas.
- Behavioral health care for better outcomes.
- Safe and secure environment for video calls.
- Increased access to specialists.
- Reduced costs; the Correctional Center paid for medications prescribed only
  Eliminates transport times and costs to and from out of town providers
- Time optimization for staff
- Increased patient satisfaction; as most incarcerated individuals have never received mental health care prior to incarceration and those who did were unable to maintain that care for a variety of reasons.
- Ease of making appointments and follow-up appointments
- Continuity of care to quality providers upon release as our local medical center contracts with ITP as well

Overall, having ITP available to Mountrail County inmates has been a valuable addition to the services offered in the Correctional Center. ITP has given the Correctional Center the ability to

provide Inmates with timely services to mental health care with qualified medical professionals without a long wait time. Which has been immensely beneficial for the Inmates utilizing the service as they are able to address their mental health concerns, receive a diagnosis and treatment, including medication management, faster than the nearby providers and treatment centers are able to accommodate. This in turn provides a safer environment not only for Correctional Center staff but for the other Inmates housed within the facility.

Laurie Johnson, Administrator

Mountrail County Correctional Center

2/4/2025

Dear Members of the Legislature,

I am writing on behalf of the Lake Region Correctional Facility in Devils Lake to express my strong support for increased funding for telepsychiatry services for county jails.

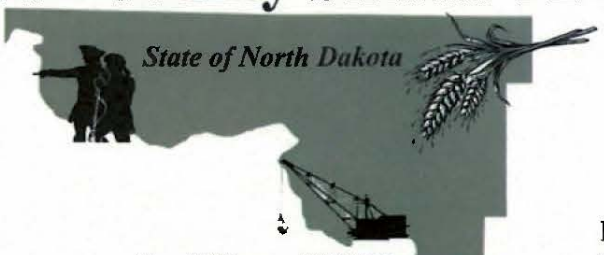
As you are well aware, our state is facing a critical shortage of behavioral health services. This shortage is further exacerbated by the challenges faced by incarcerated individuals, where access to treatment is often limited to the basic needs of safety, rather than comprehensive care. It is time to move beyond outdated practices and embrace a progressive approach that provides incarcerated individuals with the mental health services they need to foster rehabilitation and reduce the risk factors associated with recidivism.

Since February 2024, our facility has successfully utilized telepsychiatry services, specifically ITP, allowing inmates to receive timely and professional mental health support. These providers bring both empathy and expertise, offering education and treatment that many of our inmates have never previously had access to. Through these services, we have seen firsthand how telepsychiatry has provided a sense of hope and demonstrated that change is possible when individuals are given the proper support.

I urge you to consider expanding funding for telepsychiatry services so that incarcerated individuals across our state can continue to connect with healthcare professionals and receive the mental health care they urgently need and deserve.
Thank you for your attention to this critical matter.

Thank you,
Victoria Church
Behavioral Health Case Manager
Lake Region Law Enforcement Center
vchurch@lrlec.org
701-662-0745

My name is Joelle Schmuck, and I have been a public health nurse at Walsh County Health District as well as a correctional nurse at Walsh County Jail since 2021. Since implementing Integrated Telehealth Partners (ITP) in the spring of 2023, our jail has experienced a profound shift in psychiatric care access and outcomes. Before ITP, our inmates faced significant barriers to receiving timely and specialized mental health medication management. Transporting them to outside clinics was not only costly and logistically challenging but also delayed necessary care, often leaving primary care providers struggling to manage complex psychiatric cases beyond their expertise.



ITP made it possible to have direct access to psychiatric specialists through telehealth. Our inmates now receive prompt, high-quality medication management which ultimately leads to better treatment outcomes and a more dignified healthcare experience. Instead of enduring long waits or facing the added stigma of attending appointments in restraints and a jail uniform, they can now receive care in a setting that respects their privacy and dignity. Appointments are readily available, scheduling is seamless, and ITP's providers are professional, responsive, and committed to collaboration.

This partnership has saved our jail invaluable time and resources while significantly improving the mental health and well-being of our inmate population. ITP's services have been vital to the success of many inmates after release. I am incredibly grateful for the impact they have made, not only in Walsh County jail but across the entire state.

Sincerely,

Joelle Schmuck, BSN, RN

Fax: (701) 462-3780

Dear Members of the Legislature,

I am writing on behalf of a small county jail that has been utilizing ITP resources over the past year. These services have truly been a game changer in how we approach and manage mental health issues within our facility.

Before this program, it was a constant struggle to access the appropriate mental health resources. However, the ease of access provided by ITP has significantly alleviated this challenge. As an administrator, the support we've received has helped not only reduce my frustrations but also directly improved the well-being of the individuals in our care.

In the course of the last year, I've witnessed firsthand the impact of these services—particularly in situations where individuals have previously exhibited violent or disruptive behavior, both verbal and physical. Once these individuals were connected with the mental health resources offered through ITP, I've seen a complete shift. They've been able to reach out for help, receive proper psychiatric care, including medication, and benefit from ongoing aftercare support.

The positive feedback from both staff and residents has been overwhelmingly supportive. The reduction in incidents, as well as the improvement in overall well-being, would not have been possible without these critical resources. I wholeheartedly support the continuation and expansion of ITP services, as they have proven to be invaluable to the safety and mental health of everyone in our facility.

Thank you for your time and consideration.

Sincerely,
C. Howe
Captain
Mclean County Sheriff's Office/Jail

In closing, I want to thank you Chairman Nelson and Members of the Committee for giving us the opportunity to provide care in your jails. I have genuinely enjoyed traveling across the state meeting with the Sheriff Departments and discussing ways for us to make behavioral healthcare more accessible. I am asking for your continued support for the services we are providing to we can continue to expand the number of individuals we serve and provide the care that so many need.

Thank you

Testimony

House Bill 1012 – Department of Human Services and Health

Aging Services Budget

House Appropriations – Human Resources Division

February 5, 2025

Chairman Nelson and members of the committee, my name is Roger Reich. I am the executive director of Minot Commission on Aging providing services for senior citizens in the seven counties in North Central North Dakota. I am also a member of the North Dakota Senior Services Providers, an association of agencies that provide federal Older American Act Services to the senior population of this state.

Attached to my testimony is a copy of a Feeding Grandma 2025. This is our seventh in a series that we have provided during the legislative session. Each session we have updated it to provide the most current and in-depth data on senior hunger, how our program helps prevent this from happening in North Dakota and why it is one of the most cost-effective methods for keeping seniors in their homes.

The basic premise behind this handout is that providing a stable source of healthy, nutrient dense meals is a key factor in successful aging. In addition, because this service is very cost effective – the cost of providing senior meals for a year equals the cost of two days in the hospital or ten days in a nursing home – it makes good fiscal sense for our state and for the people we serve.

However, the Senior Nutrition Program is so much more than just a meal. At senior centers, it is a chance for our seniors to engage and socialize with other people. In addition, our "Meals on Wheels" programs provide meals to our community's most vulnerable seniors, those that are unable to leave their homes. Home delivered meals also provide our homebound seniors with a daily wellness check. Many times, this might be the only human contact the person may have throughout their day. This happens every day in our most rural communities and in our largest cities.

In the state of North Dakota, the total population of adults age 60+ is 176,929 (22.9%).

- 9% or 14,631 live below the poverty line
- Seniors age 65+ who lack income to pay for basic living needs
    - Singles: 44.0% and Couples: 21.4%
- 27.9% or 45,932 live alone
- ND state ranking for risk of social isolation at 65+: 17th in the U.S.

Meals save ND Medicaid money. In FFY 23, 212 of the 11,986 home delivered meals clients were nursing home eligible with 3+ ADL (Activities of Daily Living) limitations and were Medicaid eligible. Keeping these people in their homes with meals and services saves the state over $31.18 million annually.

Across the state the average program income (the part participants contribute) has decreased from a high of $2.51/meal in 2012 to $2.30/meal in 2023. More participants are finding it hard to make ends meet and these meals are a place where they can cut expenses, freeing up money to be used for other things like rent and medications.

A BIG thank you is owed to the state. Over the past few sessions, our senior meal programs have had great support from legislators in adding state dollars to the Aging Services budget to work toward our Associations goal – to have enough combined Federal Title III and State Funds so that ALL senior meals provided by Title III agencies receive the unit rate of reimbursement of $7.62 for congregate and $8.89 for home delivered meals. This rate is not intended to cover the full cost of the meal. The total cost, estimated to be $12.98 in 2024, is about a 14% increase from 2021, and is covered with participants' program income contributions, required local match, Nutrition Services Incentive Program (NSIP) dollars and additional funds raised locally. We would like the funding that Aging Services has cut from the budget ($521,499) to be added back in and we hope that the committee will look at cost of living increases for all of the DHHS agencies as costs continue to increase.

Thank you for your time. I am happy to answer and questions you might have.

Statistics reference: Meals on Wheels America February 2024

Feeding Grandma 2025

We are ND Senior Service Providers, serving older adults across the entire state. **THANK YOU to the ND Legislature for working collaboratively in a proactive way so that essential services, such as senior meals can continue to serve a growing, aging population.**

19,059 ND seniors ate 1,418,902 meals FFY 23!

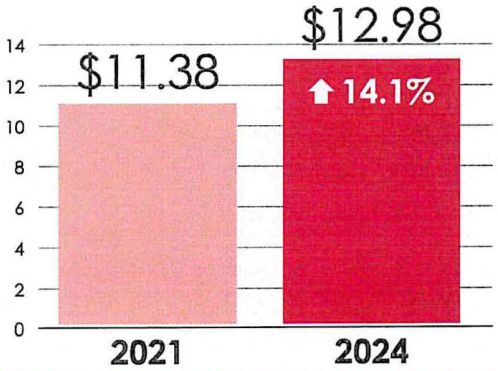
- 10,439 people ate 375,467 Congregate meals which are served in a social, group setting
- 11,986 people ate 1,043,435 Home Delivered meals which are served to homebound seniors through programs like Meals on Wheels and Home Delivered Meals. This category also includes grab-n-go, take-out and drive-thru meal pick-up.

Senior meals are cost effective!

Senior meals are a cost-effective way to promote good health so that older adults can remain healthy and independent.
*Meals on Wheels America

Meals save ND Medicaid Money!

In FFY 23, 212 of the 11,986 home-delivered meal clients scored with 3+ ADL (Activities of Daily Living) limitations AND were Medicaid eligible. With the average cost of a ND nursing home at $403/day*, this **saves the state over $31.18 million in Medicaid funding annually**. *ND Medicaid LTC Services as of 1/1/2024.



How much does it cost?

The full cost of a senior meal is $12.98. Funding sources are:

- 38.2% Federal (Older Americans Act and NSIP (Nutrition Services Incentive Program)
- 17.8% State
- 17.7% Suggested contribution from clients
- 26.3% Local Providers required match and additional funding

The cost to produce a meal continues to increase with food, supplies and labor costs increasing 14.1% from 2021-June 2024. (See graph to the right.)

****We request the Department of Health and Human Services Cost of Living increases be included in the budget and that the $520,000 reduction in funding in the Governor's Budget be reinstated.****

To Whom It May Concern:

I am writing to you as a consumer that has/is using the North Dakota Transition and Diversion Pilot Project (formerly ADRL) with Options Center for Independent Living.

When I started I was in desperate need of moving out of my apartment into an apartment that didn't have steps at the entrance. I need a first-floor apartment with no stairs.

Because of the assistance the Center for Independent Living my life has changed in the following ways: I moved out of my last apartment that had a lot of stairs at the door. My Transition Coordinator helped buy me blankets, pillows, stuff for my kitchen. The grant assisted me with deposit to include first month's rent.

Consumers would like to receive services in their home rather than an institutional setting and the North Dakota Transition and Diversion Pilot Project can assist with that. Please support HB 1012 for continued funding for NDTDPP and allow consumers to live independently.

Sincerely,

Joseph Restemayer

January 30th, 2025

To Whom It May Concern:

I am writing to you as a consumer that has/is using the North Dakota Transition and Diversion Pilot Project (formerly ADRL) with Options Center for Independent Living.

When I started I was in desperate need of a job and a new apartment. NDTDP helped me with my deposit to include first month's rent. The grant helped me get on my feet when I moved to Grand Forks so I wasn't alone.

Because of the assistance the Center for Independent Living my life has changed in the following ways: I was living in a Transitional Living Home in Jamestown but I like to be on my own. I am able to take care of my medications. I have a job at Dairy Queen, which I like a lot. The grant helped me pay for pots and pans and everything I need for cooking. I am warm during the winter when it is cold so the included heat is helpful. The air conditioner is included too. I like where I live because it is close to my job.

Consumers would like to receive services in their home rather than an institutional setting and the North Dakota Transition and Diversion Pilot Project can assist with that. Please support HB 1012 for continued funding for NDTDPP and allow consumers to live independently.

Sincerely,

Seleen Pankratz

January 30th, 2025

To Whom It May Concern:

I am writing to you as a consumer that has/is using the North Dakota Transition and Diversion Pilot Project (formerly ADRL) with Options Center for Independent Living.

When I started I was in desperate need of a phone, furniture, dishes, and everything you need to get set up in an apartment. All I had was a tv, bed, and chair. My Transition Coordinator was able to get me a couch, kitchen table and chairs, dishes, and pots and pans. NDTDPP was able to pay for my deposit to include first month's rent to get me set up at home. Things are going really good.

Because of the assistance the Center for Independent Living my life has changed in the following ways: I am almost totally independent now. I have people that come into my apartment that help me with my dishes and vacuuming. I can't see the floor very well because I am blind. I was in a basic care facility and I did not like people coming into my room and bugging me. I get to keep my own schedule, can have guests, and pretty much do whatever I want. My Transition Coordinator also got me motorized scooter so that I can go to the grocery store and run errands. I also have a friend that helps me with my grocery shopping.

Consumers would like to receive services in their home rather than an institutional setting and the North Dakota Transition and Diversion Pilot Project can assist with that. Please support HB 1012 for continued funding for NDTDPP and allow consumers to live independently.

Sincerely,

Leslie Hilliard

February 4th, 2025

To Whom It May Concern:

I am writing to you as a consumer that has/is using the North Dakota Transition and Diversion Pilot Project (formerly ADRL) with Options Center for Independent Living.

When starting the grant, I was learning how to navigate my life with my new amputation. I had close friends build a ramp with wood planks for me to get into my home and a lift to get out of bed made out of rope. Although I appreciated this it was not safe. My transition coordinator and team were able to assist me in getting a ramp and lifts for my home. My whole life has been changed by being able to get up and move around in and out of the house. I am able to have my caregiver assist me with the lift in my restroom to take a bath. It's the things you do every day that you don't realize how much they are affected with a new disability.

After a few months I found out that I would be needing a second leg amputation. Although this was new I knew I still had the assistance of my transition coordinator to help navigate this change. My transition coordinator was able to get me a lift chair so I could sit in the living room with my wife as I used to. I was given a wheel chair cushion to be comfortable outside my bed. Additionally, I was supplied with many cleaning supplies so my caregiver can keep my environment clean.

Because of my involvement in the grant and my transition coordinator I am able to stay independent at home. Without the help from my transition coordinator I would be in a facility and not be able to be around my family which is most important to me.

Consumers would like to receive services in their home rather than an institutional setting and the North Dakota Transition and Diversion Pilot Project can assist with that. Please support HB 1012 for continued funding for NDTDPP and allow consumers to live independently.

Sincerely,

Darryl LaPorte

House Bill 1012 – Department of Health and Human Services Budget House Appropriations – Human Resources Division February 5, 2025

My name is Brenda Schmid. I live in Fargo in District 46 along with my husband and daughter.

We have a beautiful daughter who is 27 years old who has significant physical and intellectual disabilities along with complex medical needs. She relies 100% on others to live (nursing home level of care) She lives at home with us and will do so as long as we are on this earth together. For 27 years I have been her primary caregiver, and my husband (of 32 years) has taken the role of sole financial provider. I have attempted to work outside of the home many times over the past 27 years, only to have to resign as our daughter needs me. My husband travels for his work (same company for 33 years) he needs me to take care of our daughter and our home so he can do his job and focus on it to ensure financial support for our family.

The DD waiver is a lifeline to our daughter and our family. The DD waiver enables her to live in her own accessible home (with us) and have access to her community (has her own accessible van) where she volunteers, spends time with her friends, participates in many recreational and leisure activities. She has a beautiful, inclusive life that is meaningful, purposeful and dignified. Her medical needs and day-to-day care are carried out with quality and dignity in her own home.

Through the DD Waiver we participate in the Self-Directed option for in-home support staff and respite staff. Our daughter requires 1:1 care. Due to the caregiving/workforce shortage, providers simply do not have the staff to support her 1:1. Therefore, we elected to participate in Self-Directed where I recruit, hire, train, manage schedules and time sheets. We have 2 caregivers who help support her.

Her caregivers help me shower her, transfer her, provide me with a second set of hands to care for her. In addition, her caregivers provide companionship and help her access her community and do things she wants to do that are meaningful and purposeful to her and prevent her from being isolated.

Another essential piece of the DD waiver are the funds available as the last pay source for durable medical equipment she needs in her home (shower chair, adjustable bed frame that adjusts to help prevent reflux and pressure sores, iv poles and feeding pump, suction machine, standing frame, hoyer lift).

The essential funds that are available to be used for modification of a vehicle (van with a ramp or lift for wheelchairs). Funds to make modifications to the home for accessibility (roll in showers, ramps to access the home, lifts to navigate stairs, etc.)

We are asking that all our programs be fully funded. We are also asking for an inflationary increase of 4% and 3%.

As I write this testimony it helps me reflect on the last 27 years of our daughter's life and how far we have come as a state supporting individuals with DD and their families. In 27 years, I have never been this fearful of losing supports and services for our daughter. I am a firm

believer of not living in the past but we do learn from history. The history of disability is dark and disturbing. Individuals with disabilities are now recognized not only equals but as amazing humans who give far more than they receive and are valuable members of their communities.

Thank you for this opportunity to provide testimony to the incredible importance of the DD waiver and disability supports and services. Your time and consideration are greatly appreciated.

Brenda Schmid

Hannah's Mom

Testimony in Support of HB 1012
House Appropriations – Human Resources Division

February 5th, 2025

Chairman Nelson and members of the committee,

My name is Jana Bruhschwein and I'm the Executive Director and Founder of Peace Academy which opened in 2022. We are a nonprofit preschool and childcare provider in the Fargo area and have utilized a few of the programs offered by the Department of Health and Human Services. I'm here today to testify in support of HB 1012 and the inclusion of these programs, with consideration of recommendations for improved utilization.

I'd like to share my sincere appreciation and highlight the tremendous benefits the Child Workforce Benefit program has had. We have three current staff members that are able to work with us thanks to the program and we have an additional three that will be returning to the workforce as part of our expansion. At a time when hourly salary rates for providing childcare can't keep up with the cost of having childcare this program has been huge for attracting and retaining a workforce in the childcare industry. As more people realize this program is an option, I anticipate an increase in the need for continued and additional funding to support the childcare workforce needs within Fargo and the rest of the state.

Next, I'd like to provide comments on the Start Up grants. In the fall of 2025 Peace Academy will be expanding to a new location with additional capacity to serve two classrooms of infants, max capacity of ten infants, per room and one classroom of toddlers with a maximum of fifteen children. Once licensed and open, we would then be eligible to receive funding for two of the three classrooms from the Start Up grants. It is important to know that the third classroom is ineligible for funding as the Department has capped the number of rooms per license that are eligible for funding. At a time when opening and operating a childcare facility for infants is already cost prohibitive, capping funding for the Start Up grants does not support the desperate need to increase care for this age.

Respectfully,

Jana Bruhschwein

From: Benjamin Galbreath, DVM

Subject: Commentary on **HB 1012 – Appropriations for the Veterinary Medical Loan Repayment Program (VMLRP)**

Date: 2/4/25

Members of the committee,

I am writing neither in support or opposition to funding of this program, but offering background & insight on the current true need and hopefully some useful suggestions on how to determine if funding is appropriate and then allocate the funds to areas of true need.

As one of the earliest recipients of veterinary student loan funding in 2008 I am aware of the positive impact this funding can have on an individual. However, over the past 15 years I have seen funding from both the state & federal programs diverted from areas of true need or shortage based upon very subjective criteria. When I was awarded funding there were a total of 6 veterinarians offering large animal services in the combined counties of Lamoure, Ransom, Dickey & Sargent. There are currently at least 15 veterinarians in this 4 county area now. The cattle population has also steadily declined in this region, resulting in a massive over-supply of veterinarians in this area. As a matter of fact, numerous new graduates have been lured to the area under the false notion of a need or shortage, some of whom started up their own large animal practices, only to find there is not sufficient work. Some are even seen working second jobs at emergency small animal clinics to get by. To compound matters, there have been numerous attempts to secure loan repayment funding though the federal VMLRP program based upon falsified data and statistics in this area. The ND253 VMLRP nomination, for example, contains numerous misleading and outright false statements.

Similarly, the counties to the north of my area (Barnes, Stutsman & Cass) have shown a steady and predictable decline in cattle populations, resulting in less need for large animal veterinarians. To compound declining numbers in these counties, the livestock auction market in Stutsman county utilizes veterinary services from a clinic in

Kidder county. This results in many producers using that clinic for routine work and then expecting the local county clinics to be available for emergencies. I have personally had numerous cattle producers from the Jamestown area ask if I would do their calving emergency since it is inconvenient to haul animals all the way to Kidder county. They all, however, wanted to continue to utilize the sale barn vet clinic for routine work since they come to the area weekly with extra help. This does not constitute a shortage of veterinarians. There is adequate access to veterinary care, but the producers are not fully supporting their local clinics. This is not likely a sustainable business model when cattle numbers are declining. Recruiting a subsidized veterinarian to this type of business climate will not solve the underlying problems. In fact, the ND254 VMLRP nomination fully acknowledges that there is insufficient cattle business to financially support another veterinarian.

There are obvious areas adequate veterinary access in the state of North Dakota. There are also certainly areas of true need. The problem appears to be how to apply a more objective criteria for selection of shortage areas and then funding those applicants. I have attached copies of numerous documents that are available to the public & easy to access that can be used to determine the need for veterinary services without subjective & emotional bias.

A very useful document could be the USDA Cattle & Calves inventory maps with county statistics. This can be easily Google searched and show yearly trends. It took about 10 minutes of time to put the values from the counties in my area into a spreadsheet and show the trend. As a result, it is very obvious that the 4-year trend of cattle populations in this region is declining. It is very easy for a potential applicant to say there is 160,000 cattle in this area and state that there must be a need for more vets. However, the truth is that there are more vets in Ransom, Dickey, Lamoure & Sargent counties now than any other time in the last decade, and the cattle population continues to drop steadily. It would seem difficult to defend funding this area to any citizen wondering if their tax dollars are being utilized effectively.

Another resource that has become available is the Veterinary Care Accesibility Project. https://www.accesstovetcare.org/vcas-map

This study offers tremendous insight into ACCESS to veterinary care. As you can see in the attached documents, both the ND & NIFA Loan Repayment Programs utilize access to veterinary care as a selection criteria. While this study is geared toward access to companion animal care, it can still be utilized more broadly since EVERY veterinary practice in Ransom, Dickey, Lamoure, Sargent & Richland counties advertise availability of cattle/large animal veterinary services. This study clearly outlines that, for the most part, the state of ND is blessed to have better access to veterinary care than many states in the US. Additionally, it is evident which counties or areas are truly in need of access to veterinary care. For example, Rolette & Benson counties have obvious lack of access and very low access scores, while Ransom & Sargent counties have extremely high access and corresponding scores. When researching the ND Health Profession Loan Repayment Programs, I easily found the shortage area maps for Primary Care, Mental Health & Dentistry. There were no maps for veterinary professionals. The Veterinary Care Accessibility Project seems to be a valid tool to apply the same logical approach to designating shortage areas and thus allocating funding where it is truly needed.

My final comments on this matter should be considered a mixture of fact and opinion. Cattle prices are currently at record high values. Many of the wealthiest individuals in rural communities are farmers & ranchers. If livestock producers in these communities are not willing to support veterinarians financially when revenue is historically high, then it is an indication of a deeper, fundamental problem with how a large animal veterinarian is valued by the producers. Farmers & ranchers are rarely nostalgic for sitting on a combine with no cab or mowing hay with no air conditioning. They embrace those upgrades in technology and modern convenience. They do, however, tend to cling to nostalgic attitudes toward veterinary services. This attitude often revolves around memories of not being charged for a service out of the goodness of a veterinarian's heart. While charity & kindness do have their place, it seems to be often expected and under-appreciated when it involves the veterinary profession. To utilize taxpayer funds to

incentivize practice owners to offer lower wages will perpetually enable livestock producers to expect to spend less on veterinary services. Farmers and ranchers do have access to multiple subsidies and payment programs. Additional indirect subsidies in the form of reduced cost veterinary care through reduced wages are damaging and disrespectful to our profession in the short term and long term.

The information provided herein is accurate to the best of my knowledge. The opinions I have included should be taken as my personal opinion only. I do not speak for any other individuals or groups and have not been approached to comment on this matter. This information is provided voluntarily. My commentary on this matter is for the sole purpose of offering optional tools for designating funding for veterinary loan repayment. I fully support tax dollar funding being judiciously utilized in Health Profession Loan Repayment Programs. If any information today is unclear or if you have any additional questions, please feel free to contact me via telephone or email as provided below. Thank you for your time & consideration.

Respectfully submitted,

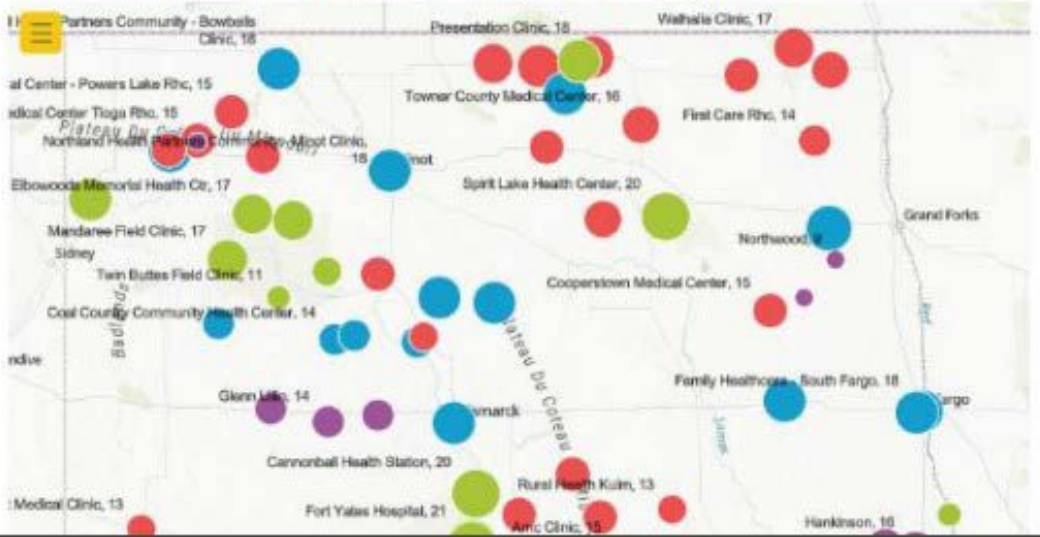
43-29.1-04. Community selection criteria.



1. In selecting a community with a defined need for the services of a veterinarian, the department of health and human services shall consider:
   a. The size of the community and give priority:
      (1) First to rural communities having a population under five thousand;
      (2) Second to communities having a population between five thousand and ten thousand; and
      (3) Third to communities having a population greater than ten thousand.
   b. The number of veterinarians practicing in the community and the surrounding area.
   c. The access by residents to veterinarians practicing in the community and the surrounding area.
   d. The degree to which residents support the addition of a veterinarian within the community.
2. The department of health and human services shall give priority for participation to a community that demonstrates a need for a veterinarian.
3. In evaluating communities for participation in this program, the department of health and human services may consult with public and private entities and visit the communities.

Testimony
HB 1012
February 5, 2025

Chairperson Rep. Nelson and Members of the Committee

My name is Chaz Brobst. I am encouraging you to pass HB 1012. I have previously submitted testimony on HB 1012 and would like to expand on some points. There are many pieces of HB 1012 that affect both my personal life and my professional life.

The behavioral health funding, especially mental health services, are things that I rely on to live my best life and to do my work to the best of my ability. My job requires me to be in a good place mentally. I have struggled with mental health issues for the past 20+ years. I have worked hard to get to the place I am now. Staying in a stable place is important for both my work life and my mental and physical health.

There are many pieces of this bill that are near and dear to my heart. As an individual who has dealt with serious mental illness for over half my life at this point, I know how important funding is for Behavioral Health. Things like 988, mobile crisis units, Peer Support, Behavioral Health Clinics and others. I know what it is like to have to go out of state for mental health care because services have not been offered in North Dakota. This should not be happening. If the Vision of Health and Human Services is really to be the healthiest state, then we need to be providing the funding to provide the services to do just that. Without this funding symptoms of mental illness will increase, and this would include suicide rates in our state. They are already too high. I have gotten lucky that none of my attempts have ended my life. For that I am grateful. I have been given the chance to provide testimony asking you to continue to fund these programs. To some it may be dollar signs, to others it is more time. More time to spend with a loved one. More time for doing the things they enjoy. It is another day on earth. Without funding for behavioral health, lives will be cut short because they cannot receive the care they need in a reasonable amount of time. Until someone has been to that very dark hole you don't know just how long a five-minute hold while trying to access critical mental health care really is. Or how long a month wait is to see a counselor, until every breath seems like an eternity and breathing seems too difficult to do.

In my early 20's, I was hospitalized for the first time at the State Hospital. Since then, I have been hospitalized multiple times at the State Hospital with my last stay about two years ago. Not only is there the stigma of just hearing that you will be admitted to the State Hospital, there is also the condition and feel of being in the State Hospital. The current condition of the State Hospital does not provide a healing environment. A new State Hospital is in the best interest of the state and the people it serves.

For the past six years, I have also been dealing with significant physical health issues. As someone who not only struggles with my mental health but also deals with a lot of medical issues, having a Certified Community Behavioral Health Clinic (CCBHC) approach would be very beneficial to me and many North Dakotans. These CCBHCs focus on all parts of a person. They take a holistic approach and see the whole person. Having professionals know how much

medical issues affect a person's mental health and how mental health issues can show up in physical symptoms is something that needs to be addressed. Having a whole person approach will help with both medical and behavioral health costs. Treating physical health issues will help so that chronic pain, misdiagnosis, and life-threatening illness does not severely impact mental health. Treating mental health issues will help prevent some of the physical symptoms of mental health such as anxiety attacks, unexplained pain, increase of heart rate, and nausea among many others. The CCBHC's will also provide me appropriate community-based care so that I don't have to be unnecessarily admitted to the higher level of care at the State Hospital.

Peer Support is evidence-based practice and is something that should be used on a regular basis. Youth and new clients just coming into the mental health system have a better and quicker chance of recovery if they have someone to guide and answer questions as they navigate an often-confusing system. Even for individuals that have been struggling with mental illness for a long time and navigating the system benefit from peer support by having a story of hope. Peer Support Specialists show that recovery is possible.

Funding organizations such Mental Health America of North Dakota (MHAND) and Consumer Family Network (CFN) is important as MHAND provides a place to help with the navigation of the system and the entire process. CFN provides a safe network for individuals to find hope among their peers. Organizations like North Dakota Federation of Families for Children with Mental Health (NDFFCMH) focuses on getting kids and youth help early enough so they have a better chance at leading productive, healthy adult lives. When kids and youth get the help they need early in life the risk of legal charges lessens. This helps keep youth and adults both to stay out of jail helping with an already crowded system. The Department of Justice (DOJ) is not only already crowded but struggles with funding. Treating and keeping people out of the Justice System helps create stronger and better funded communities.

As I said in the beginning, HB 1012 affects both my personal and professional life. I work in the Developmental Disability (DD) field. Not only does that require me to be in a good, stable place, mentally to do my job effectively. I am also able see how individuals with disabilities face constant hurdles in their lives. A person with a disability is not less than any other person. They deserve to be treated with the same respect and dignity any other person is treated with.

The North Dakota State Council on Developmental Disabilities (NDSCDD) focuses on making North Dakota a place that people with a disability wants to and can live comfortably. NDSCDD works to make positive changes for ALL people to live a safe, happy life.

Focusing on Autism Services and continuing to fund the Autism Waiver (without the decrease of funding) is important for each person with Autism to live their best life. By having the funding available, and having the staff available, to treat and teach someone to cope with their Autism so they can be productive adults and do amazing things. I have people with Autism in my life and they are public speakers, they are graphic designers, they positively make an impact on society. Everyone with Autism or any disability deserves that chance.

Programs like Family Voices, Special Education, and Fetal Alcohol Services each plays an important role in helping children, youth, young adults and adults create a life that is important to

them. In my recovery I was taught to the phrase “Build a Life Worth Living”. That phrase applies to every person. All people, disability or not, neurotypical or neurodivergent, every person deserves a chance to “Build a Life Worth Living”. It is up to us, as people in the DD field, to create those opportunities. It is up to you, the Legislatures, to provide the funding for us to make that happen.

In conclusion, I am asking that you support HB 1012, without any cuts. By providing the needed Behavioral Health funding for things like CCBHCs, and Peer Support you are giving people back their lives that was taken away due to Mental Illness. When you support services for those with Disabilities, like the DD Council, Autism Waiver and others you are helping create opportunities for people that, not that long ago weren’t given a chance to succeed. We cannot be taking that chance away now. Together, let’s help “Build a Life Worth Living” for each person in North Dakota. Let’s create and live up to our vision of being the healthiest state.

Thank you for your time today.

Bismarck, ND

Testimony in support of:
House Bill 1012, with the 2025-27 Health & Human Services Executive Budget
January 27, 2025

Chairman Nelson, Vice Chair Stemen, and Committee Members:

My name is Kayla Weber, and I am pleased to provide my testimony to the North Dakota State Legislature. These are my own viewpoints and not my employers. I am testifying in support of bill number 1012. I sincerely appreciate the invitation to provide testimony.

In my career working with people with disabilities, I have come to believe that one of the most difficult things for the disabled community is seeing their role in society not being valued. I am a Support Coordinator at ABLE Inc., a company that helps support people with disabilities. We are like many of the businesses in this economy struggling to find staff. We have a high turnover rate, and the work can be hard on ones body.

Bill 1012 to increase the budget to the DD waiver would benefit not only the people supported by getting more quality staff but would also help keep our current staff. We have a higher-than-average starting wage but with the cost of living, we don't pay a living wage. This has caused us to lower our hiring age. At the group home I work at we have an average age of 21. They are very responsible and often juggle working full-time and going to school. Once they get a 4-year degree we lose them to jobs who can pay a better wage.

We need this bill to pass for the lively hoods of the people we support. The 6 men at the group home I work at do not have verbal communication. They rely heavily on staff to maintain connections to loved ones and friends. Often when we lose staff who built those relations by being the bridge to connection. The relationship feels that hardship when they quit. I know there is a misunderstanding out there that people who cannot talk do not need social activities, but it is more they need the right people to help show the world how they communicate. I hope that people will see that individuals with disabilities are valuable citizens of the community and play an important role in moving our society forward.

Although there are many issues that cannot be solved simply by allotting more money, it is a step in the right direction. I ask you to support bill 1012 for the continuation forward in human rights.

Thank you

Best regards,

Kayla Weber

Kayla Weber

Dear Chairman Nelson and members of the House Appropriations Committee,

My name is Addison Krueger. I am providing this testimony as a representation of my own thoughts and not on behalf of my employer. I am a North Dakota native, born and raised in Dickinson. I am currently a residential manager at ABLE, Inc., an agency that provides residential services to adults with disabilities. I am writing to you in support of Senate bill HB1012, asking for a 4% budget increase the first year and 3% increase the second year.

As mentioned, I work at ABLE, Inc. and the relationships I have built with the people I support have truly changed my life. I began my employment with ABLE when I was 19 and I will forever be grateful for all the amazing people I've grown to know. While my last three years with this agency have been incredible, they have not been without many challenges. The primary challenge being the limited budget ABLE must abide by.

Throughout my time as a DSP and as a manager, staff turnover has been a constant stressor. I have watched upwards of 40 staff resign since May 2021. This is at my worksite alone, not accounting for the various other sites within the agency. We are aware of this issue and have made great efforts to recruit and retain staff. We've attended job fairs, started a program through the local high school, held open interviews, posted flyers around town, and so much more. While recruiting is difficult in itself, the retention of these staff proves to be the most challenging.

What's the reason for this? It's the compensation ABLE has to offer employees. The wages are simply not livable in today's economy. As a supervisor, I hear the reasons for resignation. More often than not, employees are leaving to pursue "better" opportunities, and "better" in these cases almost always equates to a higher wage.

I have primarily addressed the impact of wages on the staff employed by ABLE Inc. However, it's also important to consider the effect that constant turnover has on the people we support, who have seen hundreds of faces come and go. Our inability to retain staff has led to near constant instability in the lives of the people supported by ABLE, Inc. There's a reluctance to build relationships and trust due to turnover, which are foundational to what we do at ABLE.

The State of North Dakota needs to increase wages for support staff to improve the lives of not only those staff, but also the people with disabilities supported by them. I ask that you support Senate Bill HB 1012. Thank you for your time and consideration. Please reach out if you have any questions.

Addison Krueger
akrueger@ablend.net

Melanie Heitkamp
Executive Director, Mountain Plains Youth Services (DBA: Youthworks)
Testimony in support of HB 1012
House Appropriations Committee – Human Resource Division
February 5, 2025

Good morning. My name is Melanie Heitkamp, and I am the Executive Director of Youthworks, a private non-profit youth-serving agency. We have provided services in North Dakota since 1987. Our age demographic is 11 to 24, primarily adolescents and young adults. The services we provide are emergency shelter, housing for homeless youth, family counseling, individual counseling, skills groups, anger management, case management, crisis response, street outreach, drop-in services for basic needs, day programming for youth suspended or expelled from school, and anti-trafficking work with survivors of human trafficking and exploitation. We are the Attendant Care provider for law enforcement in Bismarck, Fargo, and Minot. We have emergency shelters in those same communities.

I am also a Licensed Clinical Social Worker and have worked with thousands of families in my 45 years working with Youthworks and in my early practice, in rural county social services. Our mission at Youthworks is to provide a service where all youth feel safe and belong. We provide a non-judgmental place where youth and their parents can receive the immediate help and support. Our goal is to prevent youth from entering the child welfare and juvenile justice systems by providing such services. Our results in achieving these goals are excellent.

I am here to testify on the importance of the funding for the first day of shelter for CHINS youth in the emergency shelters, to support the need for crisis intervention ("diversion") funding for CHINS youth identified by the schools, and to support the need for continued and expanded services for homeless youth.

Most of the youth who are admitted into our emergency shelter are CHINS youth where law enforcement has been asked to help because of conflict in the home. In some cases, the youth may have left their home without permission for various reasons and the parents are feeling helpless and hopeless. The issue is a family issue that is not a criminal or law enforcement issue yet the conflict in the home can elevate to where someone could get hurt without intervention. Our shelters and professional staff, provide safety, screening, assessments and discharge services for the families. With the movement of CHINS youth under the DHHS, the unintended consequence was that the funding we received through diversion funding from the courts was

discontinued. These funds were used in conjunction with our shelters to provide a seamless crisis response to the families.

Of the thousands of youth I have personally seen in my time at Youthworks, there were very few who I believed needed to be on formal probation or removed from their home. Instead, they needed early intervention and support. Of those who I believed needed more formal systems involvement, many of these families were already too frustrated to be able to address the concerns safely.

In my experience, families can become frustrated and their relationships with their children worsen without professional intervention. While we refer as many families as we can to services in the community, finances and time away from work are often a problem. Addiction issues, mental health struggles, poverty, and homelessness also contribute to the challenges these youth and families experience in accessing traditional therapy. I am fortunate to have experienced, trained staff who respond in a crisis can serve families and youth without volumes of "red tape" to walk through and understand adolescents and young adults.

Thank you for your time today. I urge your consideration for these areas in your budget to prevent youth and families from unnecessarily entering the child welfare/juvenile justice system that really wouldn't be needed. I may be reached at 701.255.6909 or mheitkamp@youthworksnd.org if you have any questions regarding my testimony today.

Chairman Nelson and members of the House Appropriations Committee:

My name is Danielle Salo and I am providing testimony of my own opinions and not the opinions of my employer. I am in an ICF lead position at ABLE Inc which provides residential services for adults with disabilities. I am writing in support of HB1012 to share my experience as a supervisor and leader in Developmental disabilities Services. I urge you to consider inflationary increases to support staff providing essential support to people with disabilities.

I was born and raised in the great state of North Dakota. Growing up in North Dakota, I have always known that hard work and uncompromising faith can get you through anything. Push through the hard times because it won't last forever, that's what my grandparents would always tell me. It has been increasingly difficult for me to keep that mindset over the last few years. I started my journey in the world of disabilities when I was 16 years old. I partnered in the Special Olympics. There I was surrounded by pure joy from the athletes. The laughter, competition but most of all, the love I felt for just being present in the moment with people that just loved me for me. Because of that love, in 2010 I joined the ABLE team in Dickinson, ND. I started as the residential manager for one of the ICF homes. At that time, it was rare to have an FT opening. We could choose the best fit for the people. We could say no to a staff member we weren't sure about. I feel like there was a large shift in work ethic during and after the pandemic. People don't want to work an 8-5 so finding people willing to work nights and weekends is extremely rare. These past few years have been the most difficult. I have seen things happening as simple as staff continually using their phones and ignoring people to people falling because they don't have enough staff. What do you do with those mediocre staff that allow people to fall because they aren't paying attention? We can't keep them because they cause harm but now, we don't have enough staff to cover a shift. So, we bring in travelers. In the past 2 years, we have needed to utilize 21 travel staff in our 4 ICF homes. Each travel staff works 50-60 hours per week. In 2024, we hired 32 staff for our ICF homes. We have lost 16 of those staff. That is a 50% turnover rate! More pay for employees means we can have better staff than job hoppers. Yes, we do have some wonderful staff, but it is common for those staff not to stay because they cannot live off these wages of a DSP. Increased wages mean increased ability to find the right staff. If staff could afford to stay, the people we support can have the security of knowing they have staff that they trust, that will be here to celebrate their birthday and to get you through that scary surgery. The sad truth is that not just any person can support someone with a disability. It takes a strong person and it's much easier to leave if you aren't getting paid enough to live a life outside of work. Because at the end of the day, burnout will ultimately happen because you don't have enough staff and here you are working your ass off because the love for people trumps it all. I support this bill because the people who need these services deserve staff that care. Staff that want to be at work. Staff that will enrich their life with joy and happiness. Help us get staff that want to build these connections, show up for work, celebrates with people and most importantly, keeps people safe.

Warm Regards, Danielle Salo

Feel free to call 701-290-3023

Chairman Nelson and members of the House Appropriations Committee:

My name is Sarah Carlson. I am resident of Dickinson and I speak on my own behalf and am not representing my employers.
I am writing in support of HB1012 and to share my experience as a supervisor and leader in Developmental Disability Services. I urge you to consider inflationary increases to support staff providing critical supports to people with disabilities.
I wear many hats. I am the Director of an ICF, or group home program that supports 25 adults with disabilities in their homes and with work. I also work for Family Voices of ND and support families in SW ND and beyond that have a child with disabilities by navigating the complex world of supports and services. I also work for the KIDS Program in Dickinson in a similar role, as Experienced Parent, supporting families who have a child with developmental delays or disabilities age birth to 3. I am also a parent of a 12 year old who has complex disabilities.

HB1012 increases funding to these programs, however, I would urge you to reconsider additional inflationary increases of 4% the first year and 3% the second year. We struggle with recruiting and retaining staff. We struggle with finding quality staff. It is an employees arena, and we struggle to compete with organizations and businesses that can increase the cost of their goods to balance the increase of wages of their staff. Baker Boy, a nearby business has entry level jobs up to $28/hour. How can we begin to compete with that, yet let me remind that the duties of our staff are life-giving and not pastries. Our turnover rate in the group homes the last year is nearly 50%.

We have just passed the 40th anniversary of the lawsuit that identified the supports that were needed for people with disabilities. It was in Grafton and San Haven that we identified human warehouses. Staff were thrown into risky scenarios, with poor ratios, little to no training, and mistreatment present. How does it look today? We have constant turnover. Instability in people's lives. A robust training plan that 100% of the time ends up modified because of open shifts and positions and the need to adjust. We are stretched to be creative. We have tremendously, deeply committed people that are creating lives for people, but this represents a small portion of staff. The majority of staff (sometimes) show up to their job, are frequently on their phone, have performance issues, and struggle. Which means the rest of people struggle too. The market works: we need to increase wages to attract a better quality staff person.

We have been creative. We wrote for a commerce grant to recruit people from Puerto Rico, but this was denied and had far more complications than anticipated. We started a high school mentorship program, which has been wildly successful, but high schoolers cannot work all hours of the day and need supervision. We need to change things up for staff, and in order to be competitive, we need to significantly raise wages.
Vote Yes on **HB1012 with additional inflationary increases of 4% the first year and 3% the second year** to support people with disabilities in your communities.
Warm Regards,

Sarah Carlson

skunkriverstudio@gmail.com

House Human Resources Division

Testimony by Mathew C. Schwarz
February 5, 2025

Good Morning!

Chairman Nelson and Members of the Committee.

My name is Matt Schwarz. I am here to briefly provide general comments regarding DD services our family has and continues to experience. I live in Bismarck (District 47) with my daughter Jessica (age 46). Some of you may have met or seen her the other day for Disability Awareness Day here at the Legislature. She was greeted for a few hours by various legislators and friends, including Governor Armstrong. A few of you have recognized me from prior sessions where I have been advocating for decades for my family. For example, yesterday, in preparing for today, I briefly reviewed some of my testimony from the mid '90s. Many of the same issues were addressed in those days.

My wife and both daughters were all diagnosed with Myotonic Muscular Dystrophy in 1978, a very multisystemic neuromuscular disease. My oldest daughter, Stephanie, passed in 2004. My wife, Marcia, passed in 2016. Jessica continues to live with me in our home as we have our entire lives. We have gotten supports throughout the years generally from a program known as Family Support with DD Service Providers. My wife was a nurse (RN), but abandoned her career to care for our children after their diagnoses. I (we) recall vividly watching a child removed from ICU and taken to Grafton, as the Life Skills and Transition Center (LSTC) was referred to at that time. There was no way we were ready to accept that option with our daughter, even though it was commonly recommended by physicians in those days. I eventually retired early from my career as an electrical engineer in my mid fifties to provide care for my wife.

As I listened to the various presentations yesterday, I respect and appreciate the difficult work that staff and legislators perform with the complexity of services in the DD world. However, I know, I speak not only for myself but other families. It makes my head spin!

So, my testimony today is intended to give you a little insight into Jessica and our recent journey in the context of what was presented yesterday.

Jessica has been on her ventilator 12 hours per day (while sleeping) and tethered to oxygen 24/7 for many years through a trach which she got at 10 years of age. Her cares are complex involving proper suctioning, monitoring oxygen saturations, etc. After many years of taking care of Jessica at night ourselves, and after Marcia needed more care of her own which I provided by myself, we finally received Family Support for Jessica 24/7 with DSP's. We provided the necessary training for DSP's and because of evolving technology Jessica has lived in her home with 24/7 supports.

Going on two years ago our DD Provider discharged Jessica from services after giving us a 30-day notice. P&A and her DDPM, attempted to intervene without success! From everything I can tell appropriate policies of both the Provider and the DD Division were not followed. In the evening at 10 pm some of Jessica's caregivers showed up at our home, knowing full well I wouldn't be able to care for Jessica on my own. They didn't ask who was going to pay them. Although, I ended up withdrawing $10K per month from my retirement funds over the next several months. Various advice I had received indicated the State under NDCC 25-01.2-02, which was the result of the ARC lawsuit, was obligated to provide care for Jessica.

It states, "All individuals with developmental disabilities have a RIGHT to appropriate treatment, services, and habilitation for those disabilities. Treatment, services, and habilitation for individuals with a developmental disability MUST be

provided in the least restrictive appropriate setting." (my emphasis on the upper case).

I am not a lawyer, but my understanding is the NDDHHS, and the DD Division in particular, are the agencies responsible for meeting this right. The State has accepted substantial federal funding and in return for taking these funds the state has promised to deliver the programs/services to the people that need them. With the right comes the corresponding responsibility for the State to provide the services described in NDCC-01.2-02.

As is obvious, I couldn't continue paying the caregivers privately out of my retirement funds. Eventually, I had to cave and enroll in the Self Directed Services (SDS) program which essentially made me, (75 year old Dad), responsible, not only for Jessica's cares, but also all the DD requirements typically required of a DD Provider, the Overall Service Plan, Data collection, etc. Obviously, this program (SDS) was never designed for an individual with 24/7 needs on a ventilator. It was designed for families who needed some extra help and had caregivers they chose.

Under the Settlement Agreement of 2020 that was signed by Governor Burgum with the U.S. Department of Justice (DOJ), individuals like Jessica are included in the Protected Class. Nancy Nikolas Maier and the DOJ have personally told me that Jessica is part of the Protected Class under the Settlement Agreement. But it appears anyone with Developmental Disabilities (DD) is referred to the DD Division by Aging Services, who, I am told does not agree. As a result, the DD population part of the Settlement Agreement are ignored.

It is important to note, families like us typically want appropriate supports at home while their children are young. However, as we age out, this isn't possible. My understanding is there are presently numerous families similar to my predicament. We have been caring for family members in our homes. But a life event can suddenly change all that.

For me that life event occurred last summer. Gratefully, fortunately, I survived! Last summer Jessica had been in the hospital ICU and was ready to be discharged. Beyond my control the hospital contacted various Nursing Homes to discharge her to but none of the local Nursing Homes accepted. We were frightened beyond belief where she may have eventually been sent. But there was no place for Jessica to go. Finally, her doctor concluded as Jessica has experienced changes in her care needs, upon returning home, she now needed 24/7 nursing services.

The ICU doctor understood the laws regarding Home and Community Based Services (HCBS) well. She understood not only the medical benefits but the social benefits of home, home routine, family, and friends and how that intertwines with health. We totally agree! Her letter written to ND Medicaid stated "First and foremost, we support and advocate for patients/clients to be maintained in the least restrictive environment as long as it is sustainable and beneficial to the patient/client. Secondary to sharing this statement, Jesssica's increased service needs would best be served by private duty nursing of 24 hours a day, 7 days a week." Fortunately, Medical Services approved for the doctor's orders. However, every 60 days the Provider has to go through a strict protocol of submittals, which if not strictly followed would result in denial of services.

Recently, we received notice on January 2, 2025, from the nursing services Provider that NDDHHS had changed their policy on Private Duty Nursing. Their new policy was to limit the 24/7 services previously approved to what we understood to be a maximum of 8 hours per day (with some other provisions). They also indicated that parents and Guardians were responsible for the remainder of the cares requiring them in advance of signing Attestation SNF 197. This panicked not only our Provider, myself, but our nurses. Furthermore, the policy change was effective back to January 1, 2025. This clearly left Jessica's nurses, some who had left other jobs to work for this Provider, not knowing if they had a job any more, had continued medical insurance, etc. After about a

week the policy was again changed, January 8, 2025, (but still unclear to us) that things wouldn't change for Jessica as of now. Language requiring parents and guardians providing services is still included. Guardians are trained to make decisions, not provide services! How do we know what unexpected changes might be implemented in the future again without appropriate notice, or appeal, from NDDHHS regarding extremely life-threatening issues. Whatever happened to prior notice, public comment, etc. Prior to NDDHHS just changing policy with such important impact why not get input from families/clients that are dependent on these programs.

Two days after Jessica returned home, I endured my life changing event. Fortunately, the wonderful nurses and caregivers took over and Jessica recovered well.

As mentioned previously, had I not survived my life event, Jessica had no place to go, a home with appropriate services, beyond a short term. Individuals with intense medical cares need appropriate homes located around the state. With evolved technology families/clients can receive appropriate services in a Home and Community Based (HCBS) environment. As large malls tenants are relocating to strip malls, Specialty Clinics are performing services that used to be only performed in hospitals, large institutions are not needed to care for people including those with intense medical needs. When more specialized medical services are needed, they get those services, generally short term, at regional hospitals. Smaller homes, like four clients to a home, can and need to be built as soon as possible. Families/clients don't want to travel hundreds of miles to be with each other. Services in those homes should be unbundled just like regular families choose their doctor. Families/clients should be able to choose their needed appropriate services like DD Provider, medical doctor, OT, PT, nursing

services as needed, etc. If a client gets discharged from their Provider, they should not also lose their home!

There are many other details that would take too long to describe in my testimony. However, we continue, as do other families, experience excessive denials for equipment and supplies, which we never experienced while I had private insurance. Even with doctors' letters indicating medical necessity, the process is overly cumbersome often taking months, including appeals, hearings, etc.

An example is our medical supplier, Sanford Equip. They have indicated they perform services to families in Minnesota and ND. But they have much greater difficulty getting approval for families/clients supplies and equipment in ND than Minnesota. I have asked and they have agreed to meet with legislators to discuss their experiences.

There are many other families/clients whose needs are great but different than ours at the present time. Your challenges are great but they cannot have been unanticipated. For families/clients like Jessica that have intensive medical needs, appropriate services in the services in the least restrictive environment include a minority. However, the red lights have been blinking for DHHS and the DD Division for many years.

In closing, I liked what the Chaplain at the State of the State Address by Governor Armstrong said in his prayer. I'm paraphrasing but the message was taking care of the most vulnerable should be a priority!

Thank you for your time and attention.

NDTAAP North Dakota Training Academy *for* Addiction Professionals

Testimony of Denise Andress

ND Training Academy for Addiction Professionals

In Support of HB 1012

House Appropriations Committee - Human Resources Division

February 5, 2025

Good morning, Chair Nelson and members of the committee. My name is Denise Andress, and I am the director of the Training Academy for Addiction Professionals (TAAP). I am here today to testify in support of HB 1012, specifically the opioid settlement appropriation outlined on page five, section eight. A few weeks ago, the CEO of the Heartview Foundation, Kurt Snyder, spoke about the OSF funding TAAP received in January 2024. Today, I would like to take a few moments to discuss the impact of this funding on the addiction counseling workforce and share our vision for expanding these efforts across North Dakota.

Becoming an addiction counselor in North Dakota is a lengthy and rigorous process. In addition to earning a bachelor's or master's degree, most addiction counselors must complete between 350 and 960 supervised training hours at TAAP or one of the other five regional consortiums in the state. TAAP was established in 2015 as an apprenticeship model through the Heartview Foundation to provide accessible training opportunities for students where they live.

To address the growing addiction counselor workforce shortage in the state, TAAP received a grant from the opioid settlement committee. While workforce shortages exist across many industries, addiction counseling is unique in that when we effectively treat individuals with substance use disorders, they can return to their families, communities, and workplaces, helping to strengthen other industries as well. This investment in the addiction counseling workforce

has proven highly successful, exceeding the initial goals we presented to the committee.

With this funding, TAAP has made significant strides. First, we hired a full-time TAAP director—myself—fully dedicated to the administration and success of the program. In this role, I guide students through the process of becoming addiction counselors, answer their questions, advocate for them with the Board of Addiction Counselors, and help them navigate academic requirements. Having a dedicated point of contact has provided students with crucial support in what can often be a complex and overwhelming process.

Additionally, we have been able to provide a livable wage to 29 addiction counselor trainees. To put this into perspective, TAAP previously averaged only four trainees per year and had set a goal of 10 for this grant. The increased number of trainees has been made possible through strong partnerships with our training sites and the Heartview Foundation. Before this funding, the addiction counselor trainees had to complete six months (or 960 hours) of unpaid training. Due to the full-time nature of this requirement, many were unable to hold other jobs during this period, creating a financial barrier to entry into the profession.

TAAP has also received 27 scholarship applications from students in their junior and senior years of college. Of these, we awarded 15 scholarships ranging from $1,700 to $10,000. Each recipient signed an agreement to work as an addiction counselor in North Dakota for five years or repay the funding, ensuring that our state continues to benefit from this investment in workforce development.

Furthermore, TAAP has expanded its training sites from nine to 16, all of which are rigorously vetted to provide high-quality, research-based experiences for trainees. A significant portion of this expansion has occurred in rural areas, allowing students to train in their home communities with the goal of remaining there to serve local populations upon graduation.

Recognizing the critical role of clinical supervisors in the training process, we have also allocated funds to provide stipends to supervisors who take on trainees. Training new counselors is time-intensive and requires preparation, often taking time away from other responsibilities. Offering stipends has helped us recruit 19 additional clinical supervisors across the state. Additionally, TAAP has partnered with ND Department of Health and Human Services, CDC and UND's Center for

Rural Health to develop a free, 20-credit online CEU program for those pursuing clinical supervision status, further strengthening the training pipeline.

Beyond these immediate efforts, TAAP is committed to long-term workforce development through outreach initiatives. We have established a pipeline program to promote addiction counseling as a career choice by partnering with ND HOSA-Future Health Professionals, visiting high schools and colleges, and attending job fairs to engage students early in their career exploration.

I have included a document detailing TAAP's accomplishments with the OSF grant, including a map showing where our trainees live or plan to practice. We strongly encourage the Legislature to continue appropriating funding to the Opioid Settlement Committee, ensuring they have the resources to vet applications and support successful initiatives. Addressing the addiction counseling workforce shortage is not a one-time effort. Sustainable funding will allow us to continue building this workforce by engaging high school and college students, offering scholarships, and providing paid training opportunities. Additionally, we have proposed to the Department of Health and Human Services that TAAP be allowed to contract with other regional consortiums to extend paid training opportunities to students in the other consortiums.

Thank you for the opportunity to speak about the work TAAP is doing to address the addiction workforce shortage in North Dakota. I appreciate your commitment to tackling substance use in our state, and I am happy to stand for any questions.

Training Academy for Addiction Professionals

OPIOID SETTLEMENT FUND GRANT

Project Report

AS OF DECEMBER 2024

NDTAAP
North Dakota Training Academy *for* Addiction Professionals

The TAAP Consortium is increasing North Dakota's workforce by training the next generation of addiction counselors.

	PROJECTS	DETAILS	OUTCOME
15 Academic Scholarships	Scholarships awarded between $1,700-$10,000	OSF funded for one class to one year of school	**Goal to be met Aug. 2024** • DSU, UMary, UND, MSU, BSC, USD, & GCU
28 Paid Trainees	Clinical trainees have completed, are active or will be starting prior to June 20, 2024	OSF funded 10 training positions	**Goal to be met June 2025** • Remaining 16 training positions paid by partner organizations
16 Clinical Training Sites	Increase the number of TAAP Clinical Training Sites	Creates opportunity for trainees to train near home	**Goal Met June 2024** • Active application to increase training sites
19 Additional Clinical Supervisors	Increase the number of Clinical Supervisors	Provided 15 clinical supervisors for training students	**Goal Met June 2024** • Clinical Supervisors supporting ND workforce
250 College & High School Students	Visit 4 college campuses and 10 high schools	Presented addiction workforce education to HOSA-Future Health Professionals	**Goal Met October 2024** • HOSA Fall Leadership Conference • 22 high schools • 4 colleges/universities

Path to Addiction Counseling Licensure

Enrolled Junior/Senior College Student

Bachelor's Degree Graduate

Non-Degree Seeking Student

Dual Licensure Professional

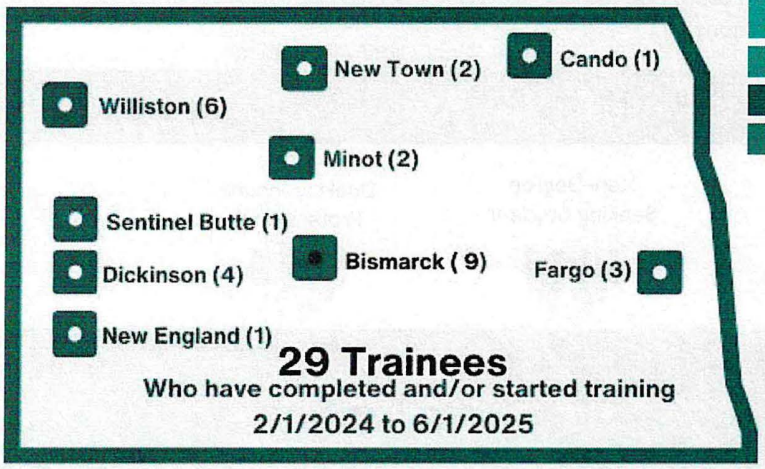
Training Academy for Addiction Professionals

OPIOID SETTLEMENT FUND GRANT

Statewide Program

5 YEAR PROJECTION



NDTAAP
North Dakota Training Academy *for* Addiction Professionals

The TAAP Consortium is increasing North Dakota's workforce by training the next generation of addiction counselors.

	PROJECTS	DETAILS	OUTCOME
20 TAAP Consortium Trainees	TAAP will increase the number of trainees from 10 to 20 trainees per year	TAAP will achieve 28 trainees this OSF Funding cycle	**Goal to complete 20 licensed addiction counselors in ND each year**
25 Trainees in the 5 other regional ND Consortiums	Provide funding to each of the other 5 ND Consortiums	TAAP distributes $100,000 to each consortium for trainee living wage	**Provide inclusive funding for addiction counselor trainees in the state-goal of other consortiums have an additional 25 trainees complete**
50 Additional Clinical Supervisors	Increase the number of Clinical Supervisors	Clinical supervisors paid $200 per week for full time and $200 per week for part time	**Recruit additional 50 clinical supervisors through financial incentive**

Investment

OSF Funding	Heartview	Partners
$613,000	$150,000	$75,000

Future Funding Needed
$1.5 M/Year

TAAP to ncrease paid trainee positions by 10 (total = 20)

TAAP to award 20 scholarships ranging from $1700-$10,000

Fund the 5 other ND consortiums to support addiction counselor trainees (5 trainees per consortium)

Additional administrative support

Additional funding for clinical supervision support

RESULT

North Dakota ADDING 40 licensed addiction counselors in the workforce per year.

The Board of Addiction Counseling Examiners is currently licensing 25 NEW licenses per year.

Testimony on HB 1012- New State Hospital
House Appropriations - Human Resources Division
Feburary 5th, 2025

Chairman Nelson and members of the committee,

My name is Madison Hanson, and I stand before you today as a voice for those most impacted by your decision- to bring to light the devastating consequences Senate Bill 1012, the proposal for a new state hospital, will have on this great state.

The history of the state hospital model, once known as the asylum, can be traced back to Dr. Thomas Kirkbride and his 19th-century philosophy of moral treatment. His approach was based on the belief that individuals with mental illness would heal best when removed from their communities and placed in a peaceful, controlled environment, far from the stressors of daily life. Yet, this very distance severed them from family and meaningful social ties.

Kirkbride's vision emerged during a time when people with mental illness were in overcrowded city jails and almshouses, often chained to walls in dark, cold cells, treated as prisoners rather than patients. Kirkbride sought a more humane approach. He envisioned hospitals where both the physical environment and structured daily routines would serve as critical parts of the healing process. These traces of homeliness would produce an "inconspicuous confinement," in which architectural elements provided comfort and security, masking the appearance of a place of confinement.

The Kirkbride Plan called for long, symmetrical wings, as this design maximized exposure to natural light, beautiful views and good air circulation, which were believed to have restorative properties. Expansive landscaped grounds were another key feature, often including farms that provided food, as well as greenhouses and workshops offering innovative amenities. The hospital was intended to feel like a home, with wide corridors designed to encourage social interaction and a strategic layout that separated patients based on the severity of their condition. Those housed in the outer wings were often the most disruptive, while those closer to the central building were considered nearer to recovery and eventual reintegration into society. The architecture aimed to promote a therapeutic environment, or as Kirkbride described it, "a special apparatus for lunacy."

These psychiatric hospitals became overcrowded institutions, housing individuals with a wide range of misunderstood conditions, developmental disabilities, neurological disorders, and various forms of depression and atypical behaviors. In 1880, Kirkbrides colleague, Pliny Earle, produced evidence revealing how the data produced for annual reports had falsely inflated treatment rates, misleading taxpayers and government officials. As people became more aware of success rates being misrepresented, it led to disillusionment and criticism of the model of the state hospital.

The limits of Kirkbrides belief in architecture as a tool for healing became painfully clear when systemic support failed to sustain his model. While thoughtfully designed spaces can facilitate recovery, they cannot replace the need for properly funded, individualized and community based care. The Kirkbride Plan was ultimately discredited, and the asylum model for treatment was abandoned (Kirkbride, 2024). Yet today, we stand on the precipice of repeating history.

A Modern-Day Kirkbride Plan Disguised as Innovation

Supporters of the new Jamestown state hospital claim it will be a modern, innovative facility, organized along a "house-neighborhood-downtown" model, with wings off of central hubs for patient units, featuring efficient air circulation, large windows for sunlight and beautiful green spaces, located in a rural setting. It would also offer innovative ammenities. But this is not innovation. This is a modern-day Kirkbride Plan.

We have decades of research proving that institutionalization does not improve outcomes. In fact, it does the opposite. Isolation and confinement diminish a person's ability to rebuild their lives. Studies show that loneliness is a significant driver of poor health and social outcomes, and individuals with serious mental illness remain among the most marginalized populations in our society (Killaspy et al., 2022). The *1999 Olmstead decision* reaffirmed that unnecessary institutionalization is a form of discrimination, depriving individuals of their right to live within their communities.

What concerns me most is that, at this very moment, people are sitting in our state hospital, trapped in the limbo of institutional life.

They are likely in a community room, watching the same old movie on repeat, its dialogue blending into the background noise of an occasional scream from a patient who is scared, frustrated, or simply lonely. They are daydreaming of the day they will finally be discharged, picturing every detail- the food they long to taste, the old friend they might try to reconnect with and the feeling of freedom they could once again experience.

While they are trying their hardest to hold onto hope, we sit here, discussing the critical importance of ensuring that youth receive services with their families, and that individuals with disabilities remain integrated in their communities. Yet, somehow, we find no space in our hearts to extend that same humanity to those currently trapped in institutional isolation. Instead of working to free them, we are debating the construction of another facility for them to be isolated in.

We Have a Legal Obligation to Do Better

This is not just a policy issue- it's a legal obligation. We are required to develop community-based alternatives, yet we continue to fail our most vulnerable citizens. In 2023, 40% of patients deemed ready for discharge from the State Hospital remained institutionalized simply because no appropriate community-based services existed (TAC, 2023).

With all due respect to the progress our system has made, we must confront an undeniable reality: North Dakota significantly lacks appropriate community-based services for adults with SMI. The options that do exist are either inaccessible or lack the intensity and level of care required to support this population:

Free Through Recovery requires justice system involvement. Our specific 1915(c) waiver is designed for the elderly and physically disabled. PATH provides outreach, not intensive treatment. 1915(i) is essentially care coordination, not direct care. We have zero psychiatric residential treatment programs for adults. Instead of providing the care they need, we are warehousing them in state hospitals, jails, and emergency rooms- a failure that comes at great human and financial cost.

The 2024 Study of Basic Care and Assisted Living explicitly identified significant gaps in our system, including the absence of supportive housing options for adults with SMI leaving the state hospital. It also shattered the misconception that Basic Care is meeting this need- it is not. So, how can we even discuss building a new state hospital when we have nowhere to discharge its patients to? A bed is not a solution. A system that ensures all people can transition into sustainable, community-based care, is.

"The State cannot justify segregation by showing that it provides treatment or habilitation in the State facility. If the person could receive that support in the community, then segregation in an institution is discriminatory. The State has an affirmative responsibility to provide community alternatives." (Olmstead Decision and Its Aftermath, 2014).

Our focus must be on completing the development of community based services that deinstitutionalization called for: ensuring that our CCBHCs develop Assertive Community Treatment. Investing in regional acute care units, and expanding Psychiatric Residential Treatment programs to serve adults. These are just some evidence based next steps- not another outdated institution disguised as progress.

At the end of the day, Chairman Nelson and members of the committee, your decision will not just shape policy- it will shape lives. This is not about budget lines or administrative pressure or convenience. This is about people. People who have been forgotten, silenced, and locked away for decades.

We are the ones who can change that. I ask you to remember our state's motto: To be bold. To be legendary.

That means learning from history, not repeating its mistakes. That means rejecting Senate Bill 1012 and voting NO to a new state hospital.

Thank you for your time.

Madison Hanson

HB 1012
Appropriations - Human Resources Division

Mr. Chairman Nelson and Members of the Committee,

My name is Lorraine Davis, Founder and CEO of NATIVE, Inc. serving the urban Indian populations and other disproportionate populations in North Dakota. NATIVE, Inc. is a partner with the ND Behavioral Health Division as a community service provider of the Free through Recovery Program, Community Connect Program and 1915i Program serving in the Bismarck and Fargo areas. NATIVE, Inc. provides culturally responsive services and programs. I created NATIVE, Inc. to better meet the cultural needs of Native Americans living in urban areas of ND.

I am here today in **support of HB 1012 with an amendment to include an urban Indian set aside to fiscally support culturally programming for participants and their families involved in the Free through Recovery, Community Connect and 1915i programs.**

Due to the disproportionate representation of Native American adults in prison, Native American youth corrections and at-risk youth, and children involved in foster care and adoptions, it is critical to provide cultural and traditional healing programming amongst Native Americans living off the reservations referred to as the urban Indians within our state.

Thank you for your time and commitment toward addressing human service needs within ND. I stand for any questions.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/6/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:46 p.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- One-time funding
- Block Grant
- Community Health Trust Fund
- State Laboratory
- Certified Community Behavioral Health Clinics
- Opioid Settlement Fund

2:46 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, distributed the budget packets and testified to proposed amendments #36178. #36227.

2:58 p.m. Sara Stolt, Deputy Commissioner, Health and Human Services, addressed the cost of retiring the main frame #36178.

3:08 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, continued with testimony #36178.

3:23 p.m. Sara Aker, Executive Director, Medical Services, Health and Human Services, addressed the system integrator and provider enrollment #36178.

3:24 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, continued with testimony ##36178.

3:40 p.m. Dirk Wilke, Interim Commissioner, Health and Human Services, addressed committee questions #36178.

3:42 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, continued with testimony #36178.

4:07 p.m. Sara Aker, Executive Director, Medical Services, Health and Human Services, spoke to the quality funding for nursing programs.

4:08 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, continued with testimony #36227,

4:19 p.m. Sara Aker, Executive Director, Medical Services, Health and Human Services, spoke to when their IT installation began.

4:22 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, continued with testimony #36178.

4:35 p.m. Karol Riedman, Assistant Chief Financial Officer, Public Health Division, spoke to increased fees #36178.

4:36 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, continued with testimony #36178, #36227.

4:44 p.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

\1 Final revenue and expenditures per state accounting system reports dated June 30, 2023.

\2 Actual July 1, 2023 balance.

\3 Estimated expenditures for the 2023-25 biennium projected by the Department of Health and Human Services.

\4 Estimated revenues based on average actual receipts.

Notes:

The Community Health Trust Fund originated in 1999. The purpose of the fund is to provide for public health programs, including those emphasizing prevention or reduction of tobacco usage in this state. The revenue source for the Community Health Trust Fund is the Tobacco Settlement Trust Fund (North Dakota Century Code Section 54-27-25). All tobacco settlement monies received by the state are to be deposited in the Tobacco Settlement Trust Fund. Prior to the 2019-21 biennium, monies in the fund were allocated as follows:

10.0 percent to the Community Health Trust Fund
45.0 percent to the Common Schools Trust Fund
45.0 percent to the Water Development Trust Fund

In 2017, HB 1012 suspended transfers from the Tobacco Settlement Trust Fund to the Common Schools Trust Fund during the 2017-19 biennium and increased transfers from the Tobacco Settlement Trust Fund to the Community Health Trust Fund from 10.0 percent to 55.0 percent of the tobacco settlement revenues.

Beginning July 1, 2019, all money from the Tobacco Settlement Trust Fund must be transferred within 30 days of receipt to the Community Health Trust Fund.

The Community Health Trust Fund is administered by the Department of Health and Human Services which may use monies in the fund subject to legislative appropriation.

SB 2004, Section 7 directed Office of Management and Budget to transfer any moneys remaining in the Tobacco Prevention and Control Trust Fund to the Community Health Trust Fund on July 1, 2021.

HB 1004, Section 9 directs 80.0 percent of the funds received by the state under the JUUL Lab settlement be deposited into the Community Health Trust Fund.

Public Health Division
Effect of Potential Fee Increases
Health Response and Licensure - Food and Lodging Unit

2023-25 Legislative Base (other funds)	$ 950,634
12.5% increase	118,829
2025-27 Executive Budget Request	$ 1,069,463
7.5% increase	71,298
Potential Request with 20% increase	$ 1,140,761

This schedule illustrates the effect of increasing Food and Lodging fees by 20%.

- The 2025-27 Executive Budget Request included a 12.5% fee increase.
- The additional 7.5% increase provides the 20% total increase.
- A 20% increase in fees would yield **$190,127** in additional funding (other funds) to support the programs.

New State Hospital	0	300,000,000

Total all funds	$173,354,498	$364,333,784
Less estimated income	158,872,326	346,709,784
Total general fund	$14,482,172	$17,624,000

SECTION ~~2.~~3. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, 3, 4, and 5 of section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for the biennium beginning July 1, 2025, and ending June 30, 2027, as requested by the department of health and human services. The department of health and human services shall notify the legislative council of any transfer made pursuant to this section. The department of health and human services shall report to the budget section after June 30, 2026, any transfer made in excess of $50,000 and to the appropriations committees of the seventieth legislative assembly regarding any transfers made pursuant to this section.

SECTION 4. FULL-TIME EQUIVALENT POSITION BLOCK GRANT PROGRAM - REPORT. Section 1 of this Act includes funding for a full-time equivalent position block grant program. This funding, along with salaries and wages funding appropriated by the sixty-ninth legislative assembly, is available to fund full-time equivalent positions as determined by the department of health and human services. Notwithstanding any other provision of law, the department of health and human services is authorized to increase or decrease authorized full-time equivalent positions subject to the availability of funds and the provisions of this section. The department of health and human services may not increase full-time equivalent positions for the purpose of transferring human service zone employees to state employment. Pursuant to section 3 of this Act, the department of health and human services is authorized to transfer funding to and from the salaries and wages block grant line item. The department of health and human services shall report to the office of management and budget and legislative council any adjustments to full-time equivalent positions. The department of health and human services shall provide reports to the legislative management regarding the use of funding for the program.

SECTION ~~3.~~5. OTHER FUNDS - INSURANCE TAX DISTRIBUTION FUND. The other funds line item in subdivision 5 of section 1 of this Act includes the sum of $1,125,000 from the insurance tax distribution fund for rural emergency medical services grants

SECTION ~~4.~~6. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND. The other funds line ~~item~~items in ~~subdivision 2 of~~ section 1 of this Act includes the sum of ~~$1,867,500~~ $39,529,678 from the community health trust fund ~~for the 988 crisis hotline program and subdivision 5 of section 1 of this Act includes the sum of $27,072,324 from the community health trust fund~~ for the following ~~programs~~purposes:

~~Behavioral risk factor survey~~	~~$200,000~~
~~Behavioral health loan repayment~~	~~234,500~~
~~Domestic violence offender treatment~~	~~1,000,000~~
~~Domestic violence prevention~~	~~1,000,000~~
~~Women's way~~	~~329,500~~
~~Dentist's loan repayment~~	~~360,000~~
~~Local public health state aid~~	~~3,275,000~~
~~Rural emergency medical and ambulance services grants~~	~~7,000,000~~
~~Cancer programs~~	~~580,324~~
~~Forensic examiner contract~~	~~1,000,000~~
~~Tobacco cessation grants~~	~~500,000~~
~~Youth vaping prevention grants~~	~~300,000~~
~~Tobacco prevention and control~~	~~5,043,000~~
~~Tobacco prevention and control grants to local public health units~~	~~6,250,000~~
~~Total community health trust fund~~	~~$27,072,324~~

1. The sum of $594,500 for loan repayment programs;
2. The sum of $11,599,698 for tobacco and vaping programs;
3. The sum of $909,824 for cancer and women's way programs;
4. The sum of $200,000 for behavior risk state survey;
5. The sum of $4,250,000 for domestic violence programs;
6. The sum of $3,275,000 for local public health grants;
7. The sum of $1,867,500 for 988 crisis hotline;
8. The sum of $2,866,156 for forensic examiner at UND;
9. The sum of $2,967,000 for various information technology system upgrades;
10. The sum of $7,000,000 for grants to rural ambulances;
11. The sum of $2,000,000 for law enforcement rural crisis support program; and

12. The sum of $2,000,000 for development of partial hospitalization/intensive day treatment.

SECTION ~~5.~~7. OTHER FUNDS - HUMAN SERVICE FINANCE FUND. The other funds line ~~item~~items in ~~subdivision 3 of~~ section 1 of this Act includes up to the ~~sum~~amount of ~~$226,950,000~~$238,112,030 from the human services finance fund to state-paid economic assistance and social and human services.

~~**SECTION 6. OTHER FUNDS - HEALTH CARE TRUST FUND.** The other funds line item in subdivision 4 of section 1 of this Act includes the sum of $500,000 from the health care trust fund for basic care facility bad debt expense.~~

~~**SECTION 7. OTHER FUNDS - CHARITABLE GAMING OPERATING FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $500,000 from the charitable gaming operating fund for costs of gambling disorder prevention services.~~

SECTION 8. OTHER FUNDS - OPIOID SETTLEMENT FUND. The other funds line item in ~~subdivision 2 of~~ section 1 of this Act includes the sum of $8,000,000 from the opioid settlement fund for opioid remediation and abatement efforts.

SECTION 9. OTHER FUNDS - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND. The other funds line item in section 1 of this Act includes the sum of $37,646,784 from the strategic investment and improvements fund for the following purposes:

1. The sum of $7,500,000 for retiring technology from the mainframe;
2. The sum of $2,962,304 to move into the new state lab and purchase security equipment;
3. The sum of $1,684,480 for capital projects in human service centers and life skills and transition center;
4. The sum of $14,500,000 for housing initiative programs; and
5. The sum of $1,000,000 for technology projects at the state hospital.

SECTION 10. LABORATORY BUILDING STEERING COMMITTEE. The department of health and human services shall maintain the laboratory building steering committee to oversee the design and construction of the laboratory building project for the biennium beginning July 1, 2025, and ending June 30, 2027, or until work is completed, whichever occurs earlier. The committee must include representation from the department of health and human services, department of environmental quality, office of management and budget, the governor's office, and the legislative assembly. The legislative assembly representation must include one member

of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 11. CAPITAL PAYMENTS. During the biennium beginning July 1, 2025, and ending June 30, 2027, the department of health and human services is authorized to expend funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center. Pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly. The department of health and human services may transfer funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center ahead of the special assessments schedule. Notwithstanding section 54-27-12, the department of health and human services may spend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 12. CAPITAL PROJECTS - EMERGENCY COMMISSION APPROVAL. During the biennium beginning July 1, 2025, and ending June 30, 2027, pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for capital projects and maintenance pertaining to operation of its facilities, including demolition projects. Notwithstanding section 54-27-12, the department of health and human services may spend up to $10,000,000 for capital projects and maintenance pertaining to operation of its facilities, including demolition projects, under this section and may seek emergency commission approval to spend more than $10,000,000 under this section.

SECTION 13. PERMANENT SUPPORTIVE HOUSING GRANTS. Section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of health and human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department of health and human services, and authorize the department of health and human services to conduct onsite visits to review program operations.

SECTION 14. EXPENDITURES MAY NOT EXCEED APPROPRIATION – MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Section 1 of this Act includes the sum of $662,099,340, of which $66,209,934 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2025, and ending June 30, 2027. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount.
2. The department of health and human services may exceed appropriations for increases in medical assistance expansion program caseload, for the addition of coverage consistent with the traditional Medicaid 1915(i) state plan, utilization rates, and reduction in federal medical assistance percentage.
3. The managed care organization under contract with the department of health and human services to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department of health and human services. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types.
4. The managed care organization and the department of health and human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs and human service centers may not be paid less than one hundred percent of the current traditional Medicaid rate. Behavioral health services involving partial hospitalization, intensive outpatient, professional services, and residential behavioral health services provided in facilities that are not institutions for mental diseases are not subject to the provisions in subsection 6.

5. The department of health and human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

6. Except for the provisions in subsection 4, managed care organization premium payments must be built using the assumption that rates paid to providers under the medical assistance expansion program may not exceed one hundred forty-five percent of Medicare reimbursement rates paid to providers on January 1, 2025.

SECTION 15. HUMAN SERVICE CENTERS - CERTIFIED COMMUNITY BEHAVIORAL HEALTH CLINICS - FULL-TIME EQUIVALENT POSITIONS - REPORT. The department of health and human services shall continue the process of the human service centers becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults. The department of health and human services shall pursue additional federal funding as available. Subject to the availability of generated income, the department of health and human services may add full-time equivalent positions for field services to provide direct services for the period beginning with the effective date of this Act and ending June 30, 2027. The department of health and human services shall report to the office of management and budget and legislative council each time a position is added.

SECTION 16. EXEMPTION - UNEXPENDED APPROPRIATIONS. The following appropriations are not subject to the provisions of section 54-44.1-11 and may be continued into the biennium beginning July 1, 2025, and ending June 30, 2027:

1. The sum of $3,674,757 appropriated from the general fund and the sum of $25,918,566 appropriated from federal funds for the Medicaid management information system modularization technology project in chapter 12 of the 2021 Session Laws;

2. The sum of $14,411,218 appropriated from the general fund and the sum of $14,411,218 appropriated from federal funds for the child welfare technology project in chapter 12 of the 2021 Session Laws;

3. The sum of $20,366,271 appropriated from the community health trust fund and the sum of $39,534,525 appropriated from federal funds for the child support computer replacement project in chapter 44 of the 2023 Session Laws;
4. The sum of $10,989,217 appropriated from the strategic investment and improvement fund for the procurement and grants management system in chapter 44 of the 2023 Session Laws;
5. The sum of $4,150,000 appropriated from the general fund for defraying the expenses of additional human service centers to begin the process of becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults in chapter 44 of the 2023 Session Laws;
6. The sum of $18,941,847 appropriated to the department of health and human services in chapter 549 of the 2021 Special Session Session Laws;
7. The sum of $55,120,000 appropriated from the federal state fiscal recovery fund for a public health laboratory capital project in chapter 4 of the 2023 Session Laws;
8. The sum of $5,000,000 appropriated from the general fund for the purpose of employer-led child care cost-share program in chapter 446 of the 2023 Session Laws;
9. The sum of $986,555 appropriated from the general fund for the purpose of streamlining background checks project in chapter 446 of the 2023 Session Laws;
10. The sum of $2,223,981 appropriated from the federal state fiscal recovery fund for the implementation of a virtual behavioral health crisis care program for rural law enforcement in chapter 44 of the 2023 Session Laws; and
11. The sum of $500,000 appropriated from the general fund and the sum of $500,000 appropriated from federal funds for the purpose of program integrity audits in chapter 44 of the 2023 Session Laws.

SECTION 17. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services seeks a deficiency appropriation from the seventieth legislative assembly for any expenditures that exceed appropriated amounts as a result of underfunding, utilization rates, value-based purchasing for nursing facilities, reduction in federal medical assistance percentage, and

unexpected contract cost increases that exceed ten percent, during the biennium beginning July 1, 2025, and ending June 30, 2027, if funding is not sufficient to pay actual expenses.

SECTION 18. LEGISLATIVE INTENT - PROVIDER RATE INCREASE. Except as otherwise noted, section 1 of this Act includes funding for human service provider inflation increases of one and one half percent for each year of the biennium beginning July 1, 2025, and ending June 30, 2027. The provider inflation increase in this section does not apply to nursing facilities.

SECTION 19. FEDERAL FUNDING APPEAL LIMITATION. Except as otherwise specifically provided by federal law, a person may not appeal a denial, revocation, reduction in services or payment, or the termination of a program or service by the department of health and human services due to the unavailability of federal coronavirus funding received under federal law resulting from the federal coronavirus pandemic emergency declaration for the biennium beginning July 1, 2025, and ending June 30, 2027.

LARGE IT PROJECTS

SPACES AND MMIS

2025-27 BIENNIUM

System Implementation Cost: One-time costs, categorized as a capital expenditure in a new system (or major upgrade of an existing system). Typically involve rolling implementation periods representing multiple phases of work.

Maintenance & Operations (M&O): Recurring costs, categorized as operating expenses rather than capital investments. Ongoing expenses required to operate systems, which includes costs associated with ongoing/minor upgrades, required modifications to account for law/policy changes (fed/state), security protocols, management of data warehouses and interfaces with external systems, operational optimization (manage testing environments, databases, underlying infrastructure), support for operational and programmatic reporting, maintenance of customer portals, hosting and licensing fees (as required), and ongoing efforts to optimize operations through automation and process improvements.

SPACES		
System Implementation Cost^	10/2011-12/2023	$174,890,553

NOTE: The Department turned back $8,228,790.46 after the close of the 2021-23 Biennium.

Victim Services Funding Overview

January 2025

N.D. Health & Human Services (HHS) Funding	Amount	Length of Award	Purpose of Funding
STATE: General Fund (GF), Community Health Trust Fund (CHTF), and marriage license fees			
Domestic Violence and Sexual Assault Services (GF and CHTF) $4,596,285 – GF $1,000,000 - CHTF	$5,596,285	2 years (biennium)	Services to address domestic violence and sexual assault (core safety services, stability services, community services, and specialized services)
Proposed in Governor's Executive Budget (CHTF)	$2,250,000	2 years (biennium)	Services to address domestic violence and sexual assault
Domestic Violence Offender Intervention (formerly DV Offender Treatment) (CHTF)	$1,000,000	2 years (biennium)	Intervention services for individuals that have committed domestic violence against an intimate partner; programming must meet state standards
Supervised visitation/exchange (Safe Havens) (GF)	$425,000	2 years (biennium)	Provides a safe, secure, and respectful environment for the supervision of parenting time and child exchanges; must meet state standards
Sexual Violence Prevention (GF)	$200,000	2 years (biennium)	Sexual violence prevention programs such as Green Dot and school-based programming
Domestic Violence Prevention Fund (marriage license fees)	$340,000	2 years (biennium)	Direct services for victims of domestic and sexual violence
Child Sexual Abuse Prevention Program (formerly Child Sexual Abuse Prevention Task Force) (GF)	$281,715	2 years (biennium)	Child sexual abuse prevention strategies (additional $281,715 in authority allowed, for a total of $563,430)
FEDERAL: Dept of Justice, HHS, CDC			
Family Violence Prevention and Services Act (FVPSA), (U.S. Dept. of Health and Human Services)	$843,009	1 year	Direct services for victims of domestic violence including shelter
FVPSA Sexual Assault ARP (COVID-19 Supplement from HHS)	$890,649	3 years - Ends 9/30/2025	Direct services and programming to increase access for victims of sexual assault
FVPSA Testing, Vaccines, and Mobile Health Units Access ARP (COVID-19 Supplement from HHS)	$1,288,954	3 years – Ends 9/30/2025	Direct services and programming to increase access of services for victims of domestic violence

STOP Violence Against Women (U.S. Dept. of Justice)	$913,616	1 year	Victim Services, law enforcement, prosecution, courts projects (some for sexual assault nurse examiner programs, supervised parenting time)
Sexual Assault Services Program (U.S. Dept. of Justice)	$775,643	1 year	Direct services to victims of sexual assault
Rape Prevention & Education (CDC)	$288,925	1 year	Prevention strategies for sexual violence prevention
Rape Crisis: Preventive Health and Health Services Block Grant Sexual Assault Set-aside (CDC)	$16,265	1 year	Implement prevention strategies; supplements the Rape Prevention and Education program
N.D. Office of the Attorney General Funding	**Amount**	**Length of Award**	**Purpose of Funding**
STATE: General Fund (GF)			
Human Trafficking (GF)	$1,100,000 ($170,000 went to 5 domestic violence/rape crisis centers)	2 years (biennium)	Prevention and treatment services related to victims of human trafficking.
FEDERAL: U.S. Dept of Justice (DOJ)			
Edward Byrne Justice Assistance Grant (JAG) Program (DOJ)	$469,002 (Per federal regulations, $150,000-$200,000 is available to domestic violence/rape crisis agencies.)	1 year	Provides funding for law enforcement, prevention/education, corrections/community corrections, drug treatment, prosecution/ courts, planning/evaluation/technology, and crime victim witness programs. (Funding is for victims of all crimes, not only domestic and sexual violence.)
N.D. Department of Corrections (DOCR) Funding	**Amount**	**Length of Award**	**Purpose of Funding**
STATE: General Fund (GF)			
Legendary Empowerment Grant (GF)	$200,000	2 years (biennium)	Direct services to victims of all crimes (not only domestic and sexual violence)
Proposed in Governor's Executive Budget (Special Funds)	$7,000,000	2 years (biennium)	This would offset the decline in federal VOCA funds.
FEDERAL: Dept of Justice (DOJ)			
Victims of Crime Act (VOCA) (DOJ)	$5,200,000	1 year	Direct services to victims of all crimes (not only domestic and sexual violence)

NOTE: Domestic Violence/Rape Crisis Agencies may not be the only recipients of funds.

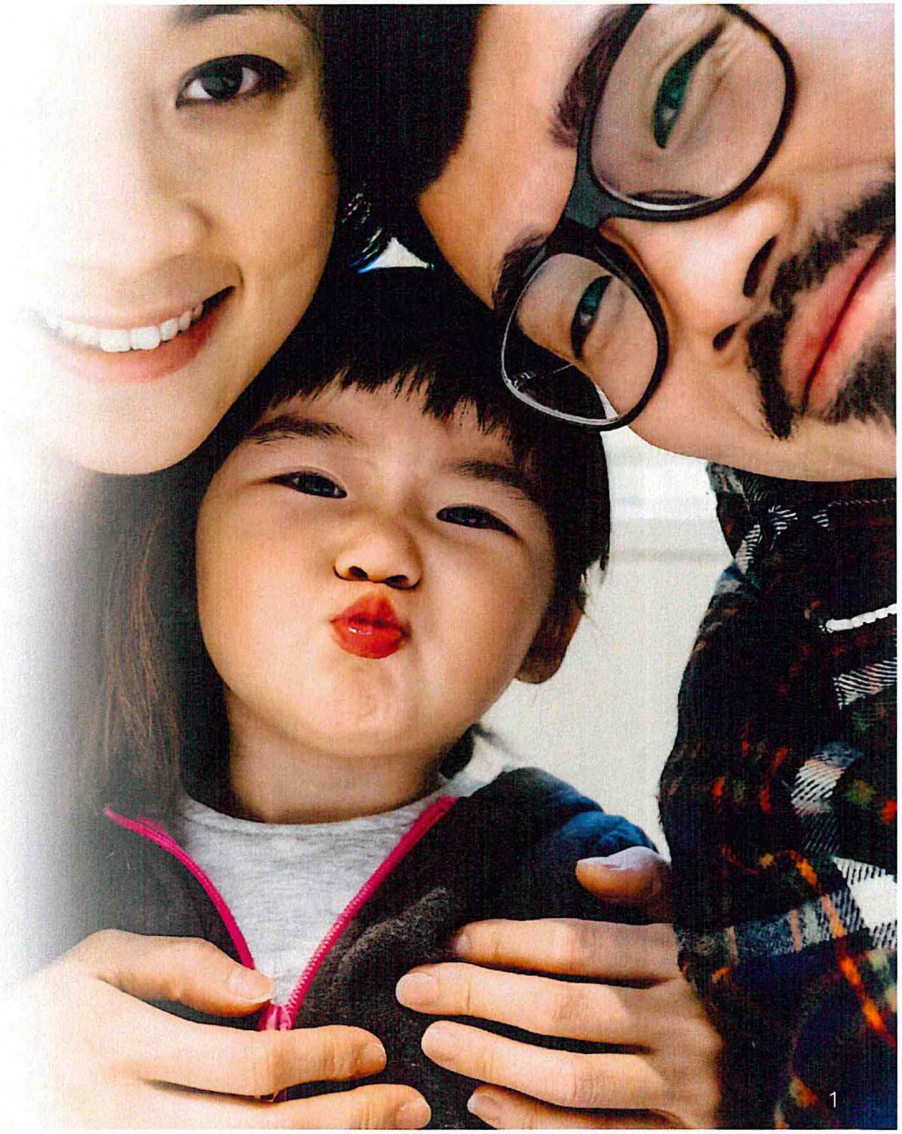
Included in Executive Budget Request

Adoption savings re-investment (aka "de-linked" funding)



- This decision package reflects the reinvestment of savings from subsidized adoption, as determined by the federal funding calculation commonly known as "de-linked" funding.
- The amount of this decision package reflects required re-investment of de-linked adoption savings dollars for 2025-27.

  (Note: Calculation is based on costs associated with maintaining subsidized adoption placement for 172 of the 633 children who were originally deemed as non-IV-E eligible when in foster care but are now eligible for IV-E reimbursement.)

Total	General	Federal	Other
$4,883,205	$4,883,205	$0	$0

This is an ongoing funding request.

NORTH Dakota | Health & Human Services
Be Legendary.

What is "DeLinked Funding"?

- Federal funding for foster care is only available if the child was removed from a home that would have been eligible for Aid to Families with Dependent Children (AFDC) as the program was defined in 1996.
    - Note: Approximately 47% of ND children in foster care are "IV-E eligible"
- Over the last 20 years Congress has taken steps to remove the "AFDC link" for children who move to permanency through adoption (aka "de-linked").
- States are required to document how they are reinvestment the equivalent of federal funds being used to support children who were not originally "IV-E eligible" as a way to further progress toward positive outcomes for children and families. (Fostering Connections to Success and Increasing Adoptions Act of 2008)

Utilization of General Funds designated as "DeLinked Funding"

DESCRIPTION	2023-25 BIENNIUM AMOUNT	INCREASE/ (DECREASE)	2025-27 EXECUTIVE BUDGET RECOMMENDATION

Decision Package Detail

By Ongoing, One-Time and Funding Source

Coordinated Immunization Access

- Purchasing of Hepatitis B and RSV Vaccines for healthcare providers
  - ongoing/one-time
  - Special Funds
    - $2,213,930

Eastern ND Autopsy Contract

- Inflationary increase for University of North Dakota to perform autopsies
  - ongoing
  - Special Funds
    - $1,866,156

Decision Package Detail

By Ongoing, One-Time and Funding Source

Forensic Examiner Electronic Records System

- Purchase of electronic records system to record forensic cases
  - one-time
  - Special Funds
    - $278,000

Executive Compensation Plan

- 3%/3% salary increase plus health insurance increase
  - ongoing
  - General Fund
    - $565,324

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/7/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

10:55 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Refugee services
- Community opportunities

10:56 a.m. Holly Triska-Dally, Executive Director, Office of Refugee Services, Health and Human Services, introduced the recent refugees who have come to live in North Dakota.

10:57 a.m. Donald Moncada, Nicaraguan refugee, testified in favor #35864.

11:08 a.m. Sammuel Guzman, Central America, testified in favor.

11:19 a.m. Natalie Ostapchuk, Ukrainian refugee, testified in favor.

11:33 a.m. Joy GiCiro, Democratic Republic of Congo refugee, testified in favor.

11:52 a.m. Holly Triska-Dally, Executive Director, Office of Refugee Services, Health and Human Services, gave closing remarks.

Additional written testimony:

Amanda McCallum, Minot, ND, in favor #33851.
James Buhr, Valley City, ND, in favor #34303.
Trisha Stibbe, West Fargo, ND, in favor #34673.
Ashley Tanata, Jamestown, ND, in favor #36018.
Carrisa Kraft, Jamestown, ND, in favor #36035.
Amber Osowski, Grafton, ND, in favor #36084.
Carley Randall, Jamestown, ND, in favor #36165.

11:55 a.m. Chairman J. Nelson adjourned the meeting.

2/3/2025

To Whom It May Concern,

I am asking for the continuation of full funding of the bill with the original proposed amount of 7 million dollars.

I am the founder and Executive Director of Kiddie Korral 2.0. I have been in the childcare industry since 2009 and turned my childcare into a non-profit in January 2019. I employ 32 young women, and my husband works as our cook and "fixer of all the things we break".

My center is licensed for 120 children, currently, we have 109 enrolled.

I have participated in Bright and Early since 2015, currently rated Step 3. I want to get to Step 4, however, I don't think it is feasible to have all teachers have their CDA, with the unfortunate rate of turnover in this industry.

The QRIS bonus is a great benefit as we have 52 children on Child Care Assistance. In March 2022, we received $4,500 at Step 2, in April 2023 we received $6,750 at Step 3, and in April 2024 we received $8,000 at Step 3. Every year I divide the money up evenly throughout the center and purchase much-needed items. We would not be able to have the high-quality equipment, toys, and learning resources with out this funding.

In order for us to continue to offer high quality care it is imperative that the funding for these programs stays.

Thank you,

A McCallum

Amanda McCallum

Testimony in support of HB1012

Members of the House Appropriations Committee:

I serve on the Board of Directors of the Open Door Center and as a physician I have been involved with this organization for 40 years. ODC does remarkable work in caring for individuals with developmental disabilities, and I have always been impressed with what the employees can accomplish to help these individuals maximize their independence. This can only happen however when we can hire enough employees and support them adequately. For this we need inflationary increases in funding. I am told this bill does provide for this and I urge you to recommend a DO PASS on HB1012.

Thank you for your consideration.

Subject: HB 1012

February 4, 2025

Dear House Appropriations,

I am writing as a parent, advocate, and board member of GiGi's Playhouse Fargo to share how critical the Developmental Disabilities (DD) Waiver is for families like mine in North Dakota.

My husband and I are parents to four children, two of whom have significant disabilities. Our 14-year-old son, Sam, has global developmental delay, autism, hydrocephalus, and other medical complexities. Our 9-year-old daughter, Claire, has Down syndrome. The DD Waiver has been a lifeline for our family, allowing us to access essential services that help our children thrive while ensuring we can maintain balance in our lives.

One of the most impactful supports the waiver provides is respite care. As a stay-at-home mom to two children with special needs, having access to respite allows me to step away from my full-time caregiving role and recharge. It gives my husband and me the opportunity to strengthen our marriage and spend quality time with our two neurotypical children—something that is often difficult to do when managing the daily challenges of special needs parenting.

The DD Waiver not only supports individual families but also strengthens our entire community. It allows children and adults with disabilities to receive care in their homes and communities rather than institutional settings, preserving family bonds and ensuring a higher quality of life. It helps parents remain in the workforce, reducing the financial strain on families and lessening the burden on state-funded services in the long run. By enabling individuals with disabilities to access the care they need while remaining engaged in their communities, the waiver fosters inclusion, dignity, and opportunity for all.

For parents like me, the future is a constant worry. As our children grow older, the need for consistent, high-quality support becomes even more critical. The uncertainty of what adulthood will look like for them keeps us up at night—wondering if they will have the care, resources, and opportunities they deserve. North Dakota must ensure that our state's program remains strong and fully funded, not only for the families who rely on it today but for the generations to come. We need to set ourselves apart from our neighbors to the east - Minnesota - a state long recognized for its incredible in-home care programs. If North Dakota wants to attract and retain families, we must invest in the services that allow individuals with disabilities to thrive in their homes and communities. Ensuring that our DD Waiver remains robust and forward-thinking is not just an investment in individual families - it's an investment in the future of our state.

I urge you to continue advocating for and protecting the DD Waiver so that families like mine - and many others across North Dakota - can continue to access these vital services. I would be

happy to share more about our experiences and how this program directly impacts the lives of those who rely on it.

One final thought - The proposed 1.5% increase in funding for disability services is simply not enough to meet the growing needs of individuals and families who rely on the DD Waiver. Rising costs, staffing shortages, and increased demand require a stronger commitment. I urge policymakers to re-evaluate this modest increase and instead approve a more meaningful 3% budget increase. This investment is essential to ensuring that families have access to the care and support they need, that providers can recruit and retain qualified staff, and that North Dakota remains a state that values and prioritizes its most vulnerable citizens. Ensuring that our DD Waiver remains robust and forward-thinking is not just an investment in individual families - it's an investment in the future of our state.

Thank you for your time and for considering the real-life impact of this essential program.

Thank you,
Trisha Stibbe
Proud Parent & Advocate
Board Member, GiGi's Playhouse Fargo

House Bill 1012 – Department of Health and Human Services Budget
House Appropriations – Human Resources Division
February 5, 2025

Representative Nelson and Members of the House Appropriations-Human Resources Division Committee-

My name is Sargianna Wutzke, and I am the Lead Operations Officer for Community Options. Community Options is a member of the North Dakota Association of Community Providers, a group of 31 Developmental Disabilities providers across the state of North Dakota. Each of the agencies has their own unique services but we all have one common goal and that is to be able to deliver individualized, community-based services to individuals with developmental disabilities.

Our agencies provide individualized services to individuals throughout the continuum of life, from birth to death, throughout the state. Our agencies strive to be able to meet the needs of individuals where they would like to live in our state. Community Options has assisted individuals to remain living in their communities of Lisbon, Carrington, Forman, Cavalier, Milnor and Gladstone instead of the individuals having to move to bigger cities to receive the necessary services. We also have supported individuals to move to bigger cities and then move back to their small hometown when they realize the big city is not where they want to reside anymore. There are many other developmental disabilities providers who also offer services in bigger communities as well as rural areas to meet the needs of people who receive services from the organizations.

DD providers work with the most vulnerable populations in the state. We are all committed to ensuring that each person is valued as an individual and each person is in charge of their services. The amount of services each individual receives is based on the support needs of the person. One individual may have staff just a few times a week for two hours each time where another individual may have twenty four hour support from staff.
.
Direct Support Professionals or DSPS are the staff that work directly with the individuals receiving services. In the state, there are over 5,000 direct support professionals. DSPS have many different roles they fulfill to the individuals they support including teacher, medical caregiver, driver, shopper, and cook. On a typical day, a direct support professional will assist individuals with their medical needs including medication administration, catheter care and feedings via g-tube along with taking individuals to appointments and ensuring they are assisting individuals to follow doctor's

recommendations. DSPS assist individuals with their needed personal cares such as showering, freshening, applying deodorant and toothbrushing. They prompt individuals and assist as needed with maintaining their home, ensuring safety in their home, cooking and communicating with their landlords. DSPS transport individuals into the community to shop, go to community activities and to meet their friends and family.

Many direct support professionals have to deal with situations that the general public finds unpleasant. Some of these include individuals hitting, kicking, throwing items, spitting, pulling hair and chasing after the direct support professionals. DSPS receive ongoing training to ensure they are equipped to handle situations like these.

Along with assisting individuals in these aspects of their lives, DSPS also have required documentation that needs to be completed including data taken on each individual's goals and objectives as well as writing a narrative of what they did with each individual during their shift. They also have to document incidents that occur, complete data on behavior support plans and data on medical protocols.

The turnover rate for DSPS in ND is 40%. The turnover rate for the state of ND overall is 5.1%. Tina Bay testified on Monday that the turnover rate in her department is 7%. Our turnover rate has such a negative effect on the individuals we support as it is hard for them to have that much change when it comes to their staff who assist them with the most personal things in their lives. Last session our turnover rate for Direct Support Professionals was 47%. Last session, DD provider staff received a 2% each year along with a dollar an hour increase for DSPS. We believe this has assisted in being more competitive with other field-related jobs, however we are still not close to field-related positions such as CNAs who start at an average of $3 more an hour. DD agencies also have increased wages for our staff to ensure we were able to have the amount of staff needed to support individuals receiving services. Currently our average wage for DSPS is $20.89 an hour. Agencies are paying an average of $3 an hour more than what we are being reimbursed with our funding. We are asking that all of our programs be fully funded. We are also asking for an inflationary increase of 4% and 3%. When doing research these amounts were the amounts that made us able to keep up with federal inflation.

We are also asking that accreditation be voluntary. Organizations feel that the state does a very thorough job with their oversight of provider agencies, which is far greater than the accreditation that takes place by an outside organization. The state ensures quality assurance of each agency by monitoring all general event reports (incident reports) of each agency as well as doing training and monitoring with each agency every three years where they go over those incident reports with administration as well as the DD Program Administrator. Every three years, the State Home and Community Based Surveyor comes and does a comprehensive survey of each agency.

Agencies that provide ICF level of care have surveys by Title 19 yearly. On top of these quality assurance safeguards, any agency that is representative payee for an individual is subject to extremely thorough financial audits by Protection and Advocacy. Accreditation is expensive for an organization. In 2024, Community Options had our accreditation through CQL, and it cost us approximately $25,000. SB 2192 is a bill this session for payment for accreditation for provider organizations, however the fiscal note with the bill currently is probably one third of what would be needed to cover accreditation costs for agencies.

I strongly encourage you to support fully funding all of our programs as well as the inflationary increase for DD providers. Wages are the biggest issue to keeping staff in our field. Many of our staff come into the field because they want to make a difference in the lives of the people we support. An overwhelming response as to why they leave is wages. We do voluntary exit surveys when our staff leave our agency and, in those interviews, the huge majority of DSPS state they are leaving to go somewhere else to get paid more and many times to have less responsibilities.

As providers who serve individuals with developmental disabilities, we want to be able to serve individuals with the services they want, unfortunately right now we are falling short of being able to do that. I urge you to please consider one of our most vulnerable populations and their needs as you look at the inflationary increase for the staff who do so much for them.

Sargianna Wutzke

Lead Operations Officer, Community Options Inc.

Good morning, Chairman Nelson members of the committee.

My name is Donald Moncada, and I am a doctor from Nicaragua with over 25 years of experience in healthcare. Throughout my career, I have worked with international organizations, my country's Ministry of Health, and the private sector. My work has focused on health projects and communication initiatives for behavior change, including service organization, institutional strengthening, and quality improvement.

In February 2024, my family and I arrived in North Dakota as refugees. Before that, we had spent five years in Costa Rica after fleeing our home country. We were forced to leave our country due to the repression to all that think different.

When the United Nations Resettlement Program asked about our preferred location, we expressed a desire to avoid major cities—and we were assigned to Bismarck.

Before arriving, we did our research. We read about Bismarck online and learned about the Missouri River, the Heritage Center, the State Capitol, and North Dakota's relatively small population. We even watched live webcams, fascinated by the river freezing over, the vast white plains, and the striking green and white pine trees. These glimpses into our future home filled us with both curiosity and anticipation.

Nothing, however, could quite prepare us for experiencing a North Dakota winter firsthand. The cold was a stark contrast to what we were accustomed to—but the warmth of the people who welcomed us quickly overshadowed the freezing temperatures. Despite not knowing a single person, we were embraced with kindness and hospitality.

Adapting to life here came with challenges, particularly in language and transportation. While we had some basic English skills, using the language constantly was exhausting. Transportation became an issue one cold March evening when we decided to take our children to the mall, assuming it would be open late as it was in our previous homes. We arrived at 7 p.m., only to find it closed. With no car, we attempted to call a ride-sharing service, but after waiting outside in the freezing cold for over two hours, we realized we needed our own vehicle. Fortunately, we found the process of buying a car, registering it, and obtaining a driver's license in North Dakota to be surprisingly smooth.

Now, we truly appreciate the safety and tranquility of Bismarck. The city offers many opportunities, and we are eager to contribute. Personally, I obtained my Certified Nursing Assistant certificate and quickly found work in that field. I am deeply grateful to Job Service for their invaluable support during this process. Four months ago, I started a new role as a Health Navigator at Bismarck Global Neighbors, a wonderful nonprofit organization. This position allows me to give back to the community that has welcomed us so warmly.

Although I am not currently practicing as a doctor, my medical background has allowed me to assist individuals in navigating the healthcare system, particularly those who face barriers due to language, culture, or economic circumstances. I see firsthand how access to healthcare is essential for a thriving community. I hope to continue my studies and earn a Master's Degree in Public Health, which will enable me to contribute even more—helping

bridge gaps in healthcare access and ensuring that all members of our community, including newcomers, receive the care they need.

Bismarck is now our home. Our children are thriving—attending school, receiving a quality education, and being genuinely cared for by their teachers and principal. They have found a sense of belonging here, something we had lost in the years of uncertainty before arriving in North Dakota. We are deeply grateful for the support they receive—from ensuring they are nourished and prepared for the weather to encouraging their academic success.

As a father, my greatest hope is for my children to have a future filled with opportunities. Here in Bismarck, they have the chance to dream, to learn, and to grow in a stable and supportive environment. They are learning what it means to be part of a community that values hard work, kindness, and resilience. Seeing their excitement about their future—whether in science, the arts, or public service—fills me with hope and gratitude.

We are profoundly grateful for the opportunity to rebuild our lives here. Since our arrival, we have felt a special connection to this land and its people. The kindness and generosity of the Bismarck community have made us feel immediately at home.

We are honored to be part of this vibrant city and are deeply committed to contributing to its future. We want to work alongside our neighbors to build a strong, thriving community full of opportunity for generations to come. Our goal is to be good neighbors, responsible citizens, and active members of society—ready to give back in any way we can.

Thank you ...and God Bless You!

House Appropriations, HR Section

House Bill 1012

Wednesday, February 5, 2025

Chairman Nelson and members of the committee,

My name is Ashley Tanata and I am the Training and Quality Assurance Specialist of Triumph, Inc., Jamestown, North Dakota. Thank you for the opportunity to submit testimony in favor of HB 1012.

I am writing to you in hopes you will see a bigger picture of the individuals whom we support, in addition to, the personnel who are the "boots on the ground" for our local agency, as well as other agencies throughout the State of North Dakota. Triumph, Inc. provides active supports to individuals with intellectual and developmental disabilities with a person-centered approach. Active support is helping people to be actively, consistently, and meaningfully engaged in their own lives regardless of their support needs. With daily support our individuals are engaged in a variety of life activities and opportunities of their own choice. They attend community events, volunteer throughout the community, work in the community and so much more. Our services are a training program, not a "do it for you" program. Without funding, our individuals would not have the resources needed to reach their full potential and live their lives to the fullest. These words are forever etched in my mind: "I will never leave a fallen comrade." Without House Bill 1012, essentially this is what the state will be doing to agencies like our own. Without our services, individuals will no longer have individualized plans, support to live on their own, or support to work.

1. Inflationary Increase of 4% and 3%

It is essential to ensure that reimbursement rates are adjusted to account for inflation. An increase of 4% and 3% will help providers manage rising costs while continuing to offer high-quality services to those in need. Without these adjustments, the ability to recruit and retain qualified staff, as well as maintain service levels, is at serious risk. This increase aligns with the federal inflation levels for the previous two years.

2. Increase Reimbursement Rates on ICF and Res Hab to 100%

3. Remove the Requirement for Accreditation

With the demand of accreditation, we are slowly losing valued time that should be focused more on day-to-day engagement with our individuals.

In conclusion, I urge you to support these items to strengthen the services and supports on which so many individuals and families depend.

Ashley Tanata

Ashley Tanata

House Appropriations, HR Section

House Bill 1012

Wednesday, February 5, 2025

Chairman Nelson and members of the committee,

My name is Carissa Kraft, and I am the Scheduling Coordinator of Triumph, Inc., Jamestown, North Dakota. On top of this title I would also like you to know that I help directly with our individuals supported completing Direct Support Professional duties as well as a family member of an individual that we support. Thank you for the opportunity to submit and read my testimony in favor of HB 1012.

I am writing to you with the hopes that you will see how important our services are for those that we support. Starting on a more personal note; being a sibling to an individual with a disability I have experienced first-hand how detrimental this field is for those with any form of disability. I can say with my whole heart that if it weren't for my brother's support system he has through his staff (what I'd formally like to call his hero's) he would never be as far as he is currently which has also encouraged my sister, who has struggled in the same forms, to start the process to also receive services in order to increase her quality of life. Without House Bill 1012, this will detrimentally decrease the supports that my brother currently has in his life who give him the confidence and assistance to accomplish goals, complete everyday tasks, and live as close to an independent life as he possibly can. But this will also make a need for my sister deemed impossible. My brother and sister are the reason why I first started in this field as a Direct Support Professional. Triumph, Inc. provides active supports to individuals with intellectual and developmental disabilities through their unique outlook on "services without walls" by supporting individuals in the community, at their workplace, as well as in their own homes to maintain independence and through my time at Triumph Incorporated, I have always taken an insane amount of pride in being that support system to additional individuals and assisting them in achieving what some may seem like a small silly goal, but to that individual it could be a monumental achievement in their life especially to individuals who have no other supports other than what we provide. Individuals with disabilities have already seen so much mistreatment and a sense of annexation from the public due to not having knowledge about the disability community so on top of maintaining their everyday lifestyles, many strive to just provide knowledge to communities in hopes of change.

1. Inflationary Increase of 4% and 3%

It is essential to ensure that reimbursement rates are adjusted to account for inflation. An increase of 4% and 3% will help providers manage rising costs while continuing to offer high-quality services to those in need. Without these adjustments, the ability to recruit and retain qualified staff, as well as maintain service levels, is at serious risk. This increase aligns with the federal inflation levels for the previous two years.

2. Increase Reimbursement Rates on ICF and Res Hab to 100%

3. Remove the Requirement for Accreditation

In conclusion, I urge you to support these items to strengthen the services and support on which so many individuals and families depend.

Carissa Kraft,
Scheduling Coordinator

#36084

Amber Osowski, Owner

Rocking Horse Child Care

Rep. Vigesaa and members of the House Appropriations Committee:

My name is Amber Osowski, owner of Rocking Horse Child Care, a Quality Rated Step 2 Program in Grafton. As a childcare provider, I strongly support HB 1012, specifically the Economic Assistance Section as programs under the Childcare Assistance Program have had a direct positive impact to move the needle on the childcare crisis in our state. The programs that have been developed since the appropriations of the last legislative session have become a vital piece being able to operate a childcare in what is now an extremely difficult time.

Currently, Rocking Horse Child Care participates in nearly every program offered to providers in our state. The single most impactful is the Childcare Workforce Benefit Program. Since the introduction of the Workforce Benefit Program, I have been able to hire and enroll 4 new staff and their children growing my workforce by over 30%. The additional income provided by the Workforce Benefit Program also allowed me to raise the pay of each staff of Rocking Horse Child Care. Couple this program with the Criminal Background check process being streamlined and I was able to interview and receive a completed background check for a new hire in 5 days. She accepted the teaching position on the spot after I confirmed she would qualify for free childcare under the Workforce Benefit Program. Just 8 days after her interview she began her first day at Rocking Horse Child Care. This is drastically different than the timeline from a year ago.

The support and funding provided by USpire, Child Care Aware, Bright & Early and other programs under the Department of Health and Human Services has allowed my program to expand. By the end of February, we will be moving into the newly constructed Walsh County Childcare Facility as its first tenant. Without these imperative programs the future of Rocking Horse Child Care and the health, wellbeing, and education of the children who attend are at risk.

I implore you to approve HB1012 with the originally proposed amount of 7 million Dollars. The children of North Dakota are worth the investment.

Thank you for your time and commitment to the children and Families of North Dakota.

Amber Osowski

House Appropriations, HR Section

House Bill 1012

Wednesday, February 5, 2025

Chairman Nelson and members of the committee,

My name is Carley Randall, and I am the Program Coordinator of Triumph, Inc. in Jamestown ND. Thank you for the opportunity to submit testimony in favor of HB 1012.

I am writing to express my support to improve the quality, access, and sustainability of services for individuals with intellectual and developmental disabilities who rely on critical services and supports of provider organizations across the state.

1. Inflationary Increase of 4% and 3%

It is essential to ensure that reimbursement rates are adjusted to account for inflation. An increase of 4% and 3% will help providers manage rising costs while continuing to offer high-quality services to those in need. Without these adjustments, the ability to recruit and retain qualified staff, as well as maintain service levels, is at serious risk. This increase aligns with the federal inflation levels for the previous two years.

2. Increase Reimbursement Rates on ICF and Res Hab to 100%

3. Remove the Requirement for Accreditation

I am writing this from both personal and professional experience. I grew up with my uncle Kelly Halvorson, AKA The Thunderman, who had Cerebral Palsy. His legs did not work but his personality could fill up an entire room. My entire life, I watched him struggle both financially and with services in home to assist him. Kelly was an avid sports fan and lived most of his adult life in Grand Forks, ND where he attended every UND game he could. He was well known on campus for his larger than life personality and love for all sports. Kelly has since passed away from complications for Cerebral Palsy. Governor Doug Bergum and his wife attended Kelly's (The Thundeman's) funeral. He was advocate for himself and others with disabilities, so much so that it caught the attention of Governor Doug Bergum. My passion for supporting individuals with disabilities came from my uncle Kelly Halvorson. His passion was contagious and he lit my fire to advocate for people with disabilities. I work tirelessly to provide quality and meaningful supports to the individuals I serve at Triumph, Inc. I will stop at nothing to ensure that individuals live a quality and meaningful life. We serve the most vulnerable population in North Dakota. It is incredibly frustrating that the most vulnerable population has to fight for absolutely everything in their lives, including services. Our jobs are important, and we do amazing things to ensure that our individuals are living their best lives. It is unfortunate that we have to fight tooth and nail to receive funding to support the most vulnerable population. I respectfully ask that we get the increase in funding that is being requested to ensure we have proper staffing to support our individuals to live their best lives. Our agency went through the accreditation process, while there is significant value in this accreditation process, it is

an unreasonable financial burden on agencies. The money it costs for accreditation could be used for pay raises for staff who work tirelessly to ensure that our individuals are living their best most independent lives

In conclusion, I urge you to support these items to strengthen the services and supports on which so many individuals and families depend.

Carley Randall
Program Coordinator, Triumph, Inc.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/11/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:53 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Provider Inflation
- Substance Use Disorder Voucher Funding
- Medicaid Funding
- Options for Closing Service and Delivery Gaps

8:53 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, testified to inflationary increases #37050.

9:01 a.m. Lyndon Jahner, Budget Manager, Health and Human Services, testified to Medicaid expansion #37050

9:03 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, testified to Medicaid expansion rates #37050.

9:13 a.m. Lyndon Jahner, Budget Manager, Health and Human Services, testified to inflation rates.

9:15 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, testified to roll up dollars.

9:16 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, will complete FTE's sheet with comparison to the Burgum/Armstrong budget.

9:43 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, testified SUD (Substance Use Disorder) voucher funding expected to be depleted by April, #37050, #37055.

10:12 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, requested that Sarah Aker address the committee.

10 :12 a.m. Sarah Aker, Executive Director, Medical Services Division, Health and Human Services testified to IMD (Institutions for Mental Disease) wavier and Medicaid payment #37189.

10:24 a.m. Dave Marion, Business Development Director, Prairie Recovery Center, testified to eligibility and payor source.

10:33 a.m. Sarah Aker, Executive Director, Medical Services Division, Health and Human Services continued with testimony #37189.

10:57 a.m. Lorraine Davis, Founder and CEO, Native Inc. responded to questions about budget requests #37193.

11:55 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, spoke to Medicaid reimbursement and overlap.

11:06 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services,
Medicare is currently planning on drafting a state plan amendment on traditional healing.

11:07 a.m. Pam Sagness, Executive Director, Behavioral Health Division, testified cultural practices are reimbursable through other sources.

11:10 a.m. Lorriane Davis, Founder and CEO, Native Inc. distributed a detail budget #37193.

11:14 a.m. Keith Kempenich, State Representative, District 39, requested a Medical Fraud study be considered.

11:22 a.m. Sarah Aker, Executive Director, Medical Services Division, Health and Human, testified that a state plan amendment for traditional healing practices would be submitted by the end of March.

11:27 a.m. Lorriane Davis requested if the amendment being submitted would include Native American Community Based Organizations providing behavioral health services

11:29 a.m. Sarah Aker, Executive Director, Medical Services Division, Health and Human Services, responded to the language that would be included in the proposed state amendment.

11:32 a.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

NORTH Dakota | Health & Human Services
Be Legendary.

Institutions for Mental Disease (IMD) in North Dakota & Medicaid

NORTH Dakota | Health & Human Services
Be Legendary.

What is an Institution for Mental Disease (IMD)?

Federal regulation defines IMDs in §1905(i) of the Social Security Act and 42 CFR 435.1009.

- Institutions for mental diseases (IMDs) are defined as a hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases, including medical attention, nursing care, and related services.
  - Mental diseases include both mental health and substance use disorder conditions.

SUD Service Delivery

Shaded = IMD if 17+ Beds

Inpatient Hospital

Inpatient Hospital
IMD: Prairie St. John's, ND State Hospital

Level 3: Residential/Inpatient

3.1 Low-Intensity Residential

3.2D Social Detoxification

IMD: Sharehouse, Prairie Recovery Center

3.5 High-Intensity Residential

3.7 Intensive Inpatient

IMD: ND State Hospital

Level 2: Intensive Outpatient

2.1 Intensive Outpatient

2.5 Partial Hospitalization/Day Treatment

Level 1: Outpatient

- Teen Challenge Men's Program
- Home on the Range

Mental Health IMD

Substance Use Disorder IMD

NORTH Dakota | Health & Human Services
Be Legendary.

What is the IMD exclusion in Medicaid?

- The IMD exclusion is in §1905(a) of the Social Security Act in paragraph (B).
- Federal financial participation is not available for any medical assistance under title XIX for services provided to any individual who is under age 65 and who is a patient in an IMD unless the payment is for inpatient psychiatric services for individuals under age 21.
  - No Medicaid payment can be made for services provided either in or outside the facility for IMD patients in this age group.

What are the responsibilities of the state Medicaid agency regarding IMDs?

State Medicaid agencies are responsible for designating IMDs based on guidance provided by the Centers for Medicare and Medicaid Services (CMS) in its State Medicaid Manual and ensuring appropriate payment in IMD settings.

ND Medicaid has a published policy to identify IMD settings:

- Step 1: Determine Whether a Facility is an IMD
- Step 2: Evaluate Agencies with Multiple Facility Locations
- Step 3: Periodic Information Gathering from Facilities that Provide Services to Individuals with Mental Diseases

ND Medicaid is also responsible for ensuring appropriate payments for individuals in an IMD.

- Fee for Service: Cannot pay for other FFS services for individuals in an IMD. Must suspend Medicaid eligibility while in an IMD.
- Managed Care: Cannot pay the capitation payment for individuals in an IMD. Must suspend Medicaid eligibility while in an IMD.

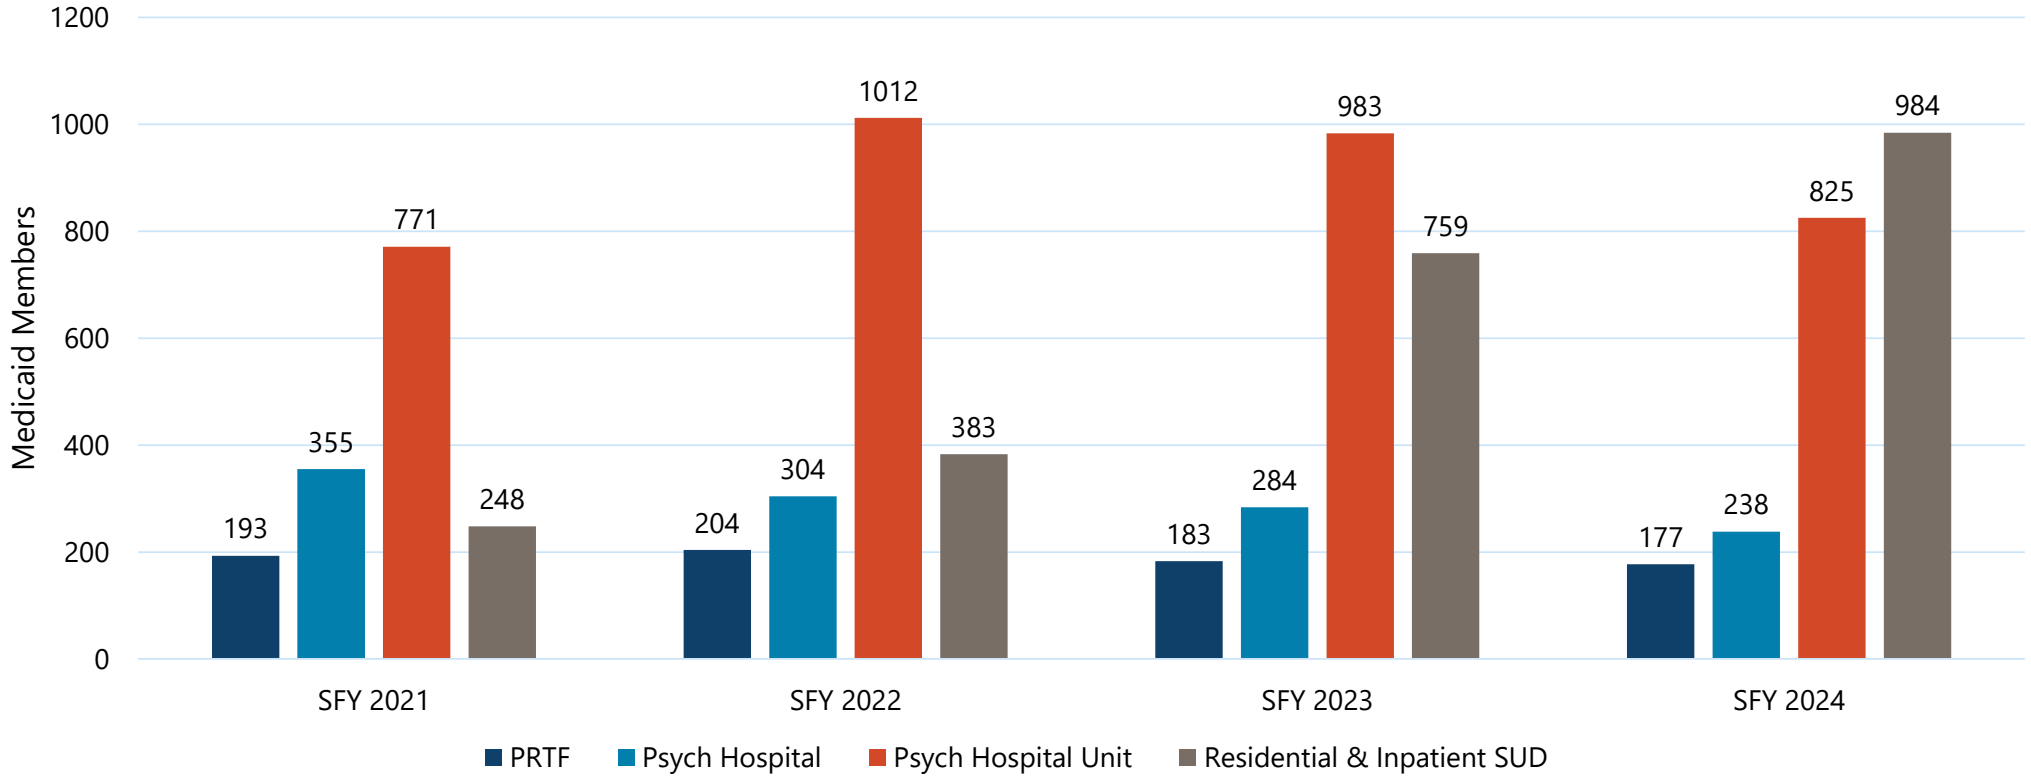
ND HHS Payment for Inpatient & Residential Behavioral Health Services

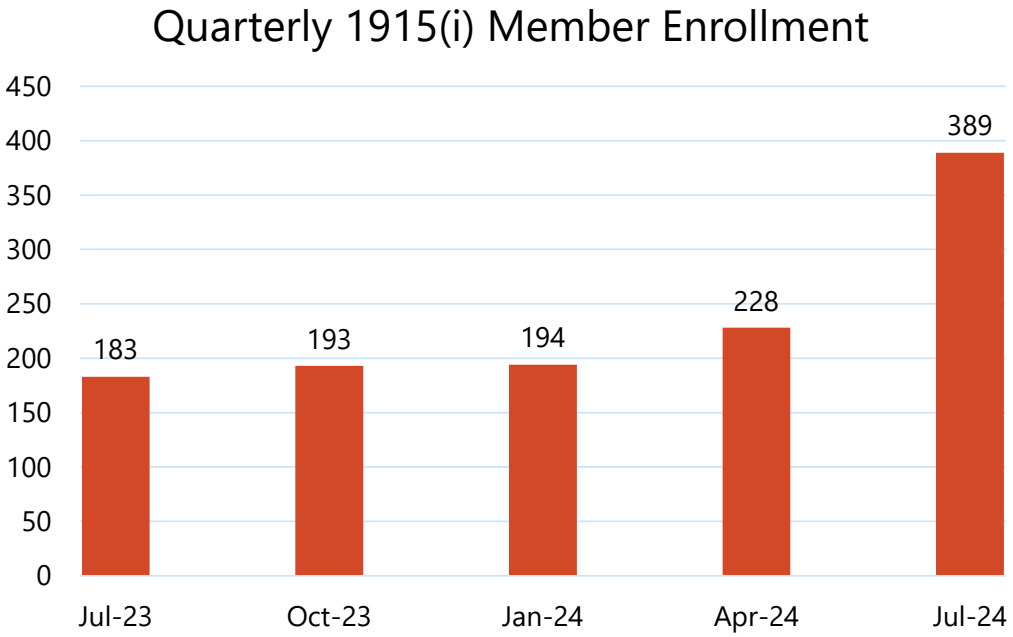
NORTH Dakota | Health & Human Services
Be Legendary.



How does North Dakota HHS pay for Inpatient & Residential Behavioral Health Services today?

North Dakota pays for SUD and Mental Health inpatient & residential services through a variety of funding mechanisms.

- Medicaid
  - Non-IMD Settings
- SUD Voucher
  - IMD Settings
  - Non-IMD Settings & Care for people without a pay source
- Contract Payments
  - Inpatient Mental Health IMD Services (Prairie St. John's)
- Direct Service Delivery
  - ND State Hospital



NORTH Dakota | Health & Human Services

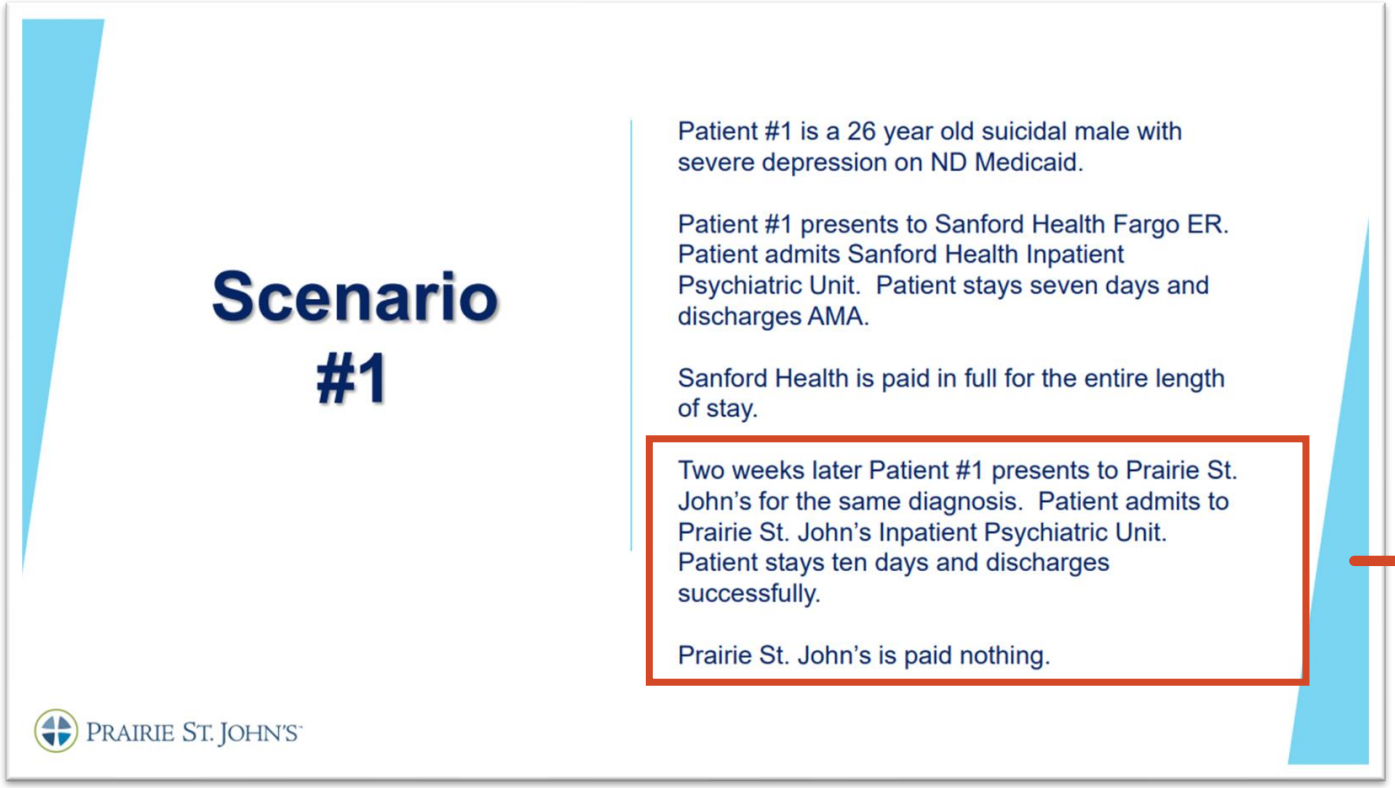
Medicaid Inpatient & Residential Behavioral Health Utilization

NORTH Dakota Be Legendary. | Health & Human Services

1915i – HCBS for Individuals with Behavioral Health Conditions

NORTH Dakota | Health & Human Services
Be Legendary.

Current Enrollment:
697 Individuals



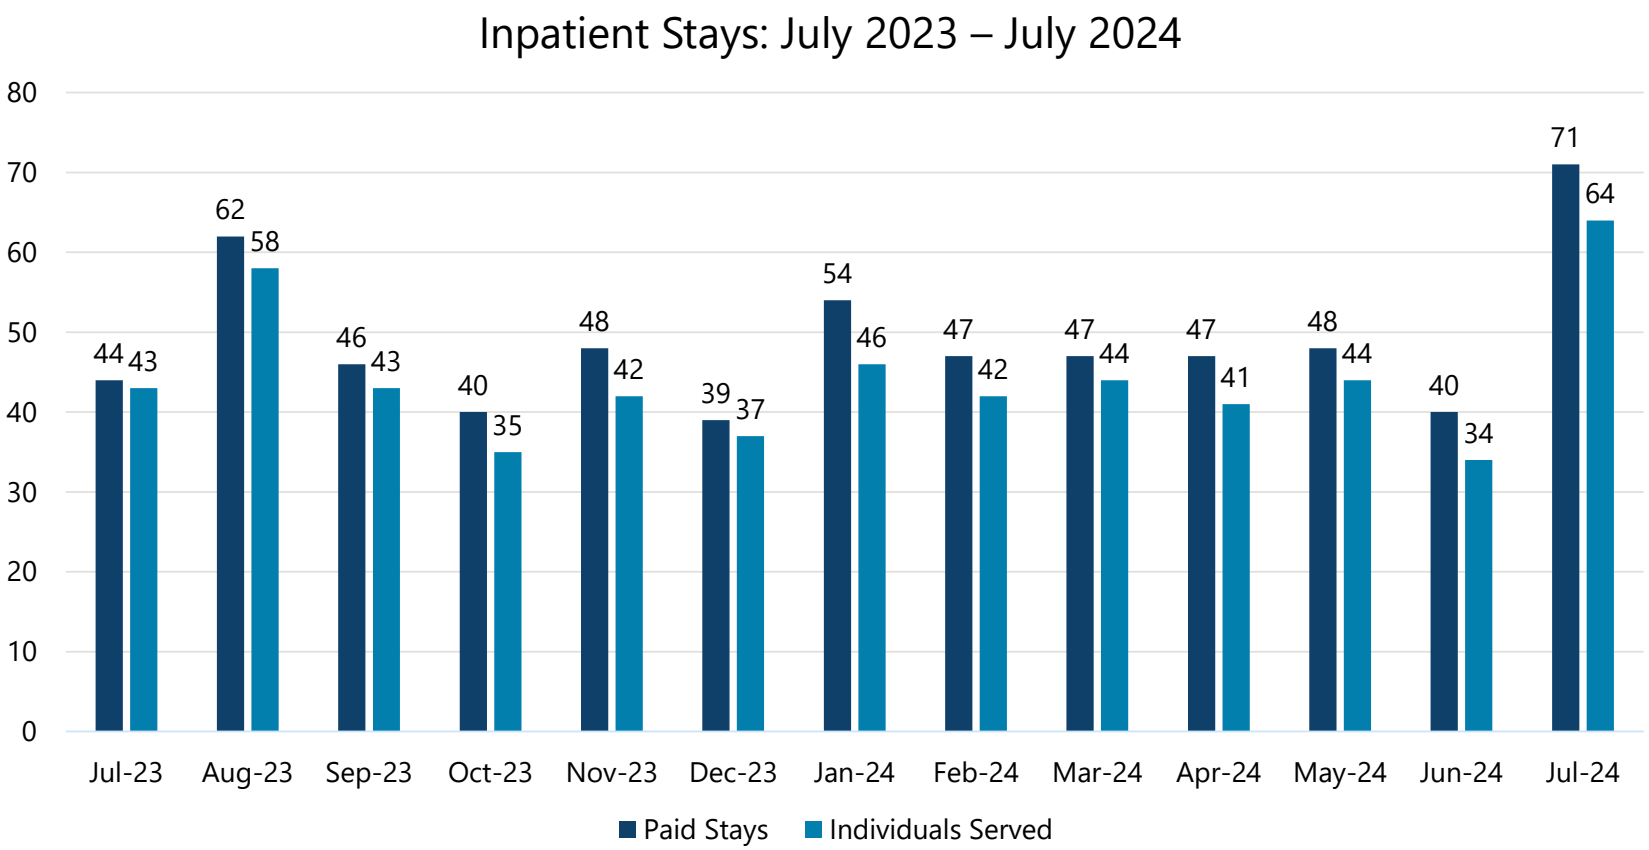
Eligibility Requirements:

- Age: 0+
- Behavioral Health Diagnosis
- WHODAS Score 25+
- Income < 150% FPL

Services:

- Training and Support for Unpaid Caregivers
- Community Transition Services
- Benefits Planning
- Non-Medical Transportation
- Respite
- Pre-Vocational Training
- Supported Education
- Supported Employment
- Housing Support
- Family Peer Support
- Peer Support

Follow-Up from April 8, 2024 Human Services Committee

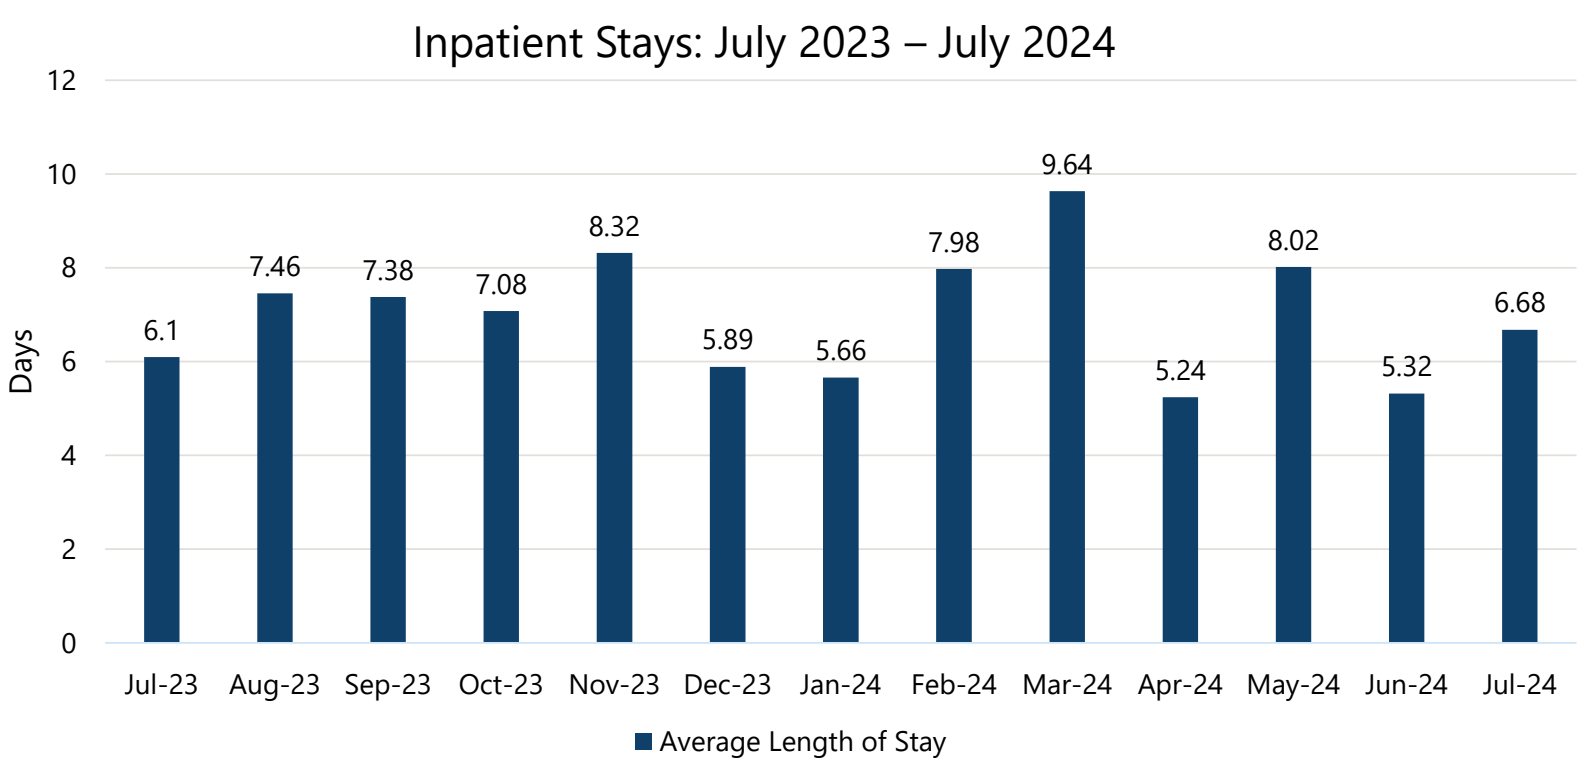


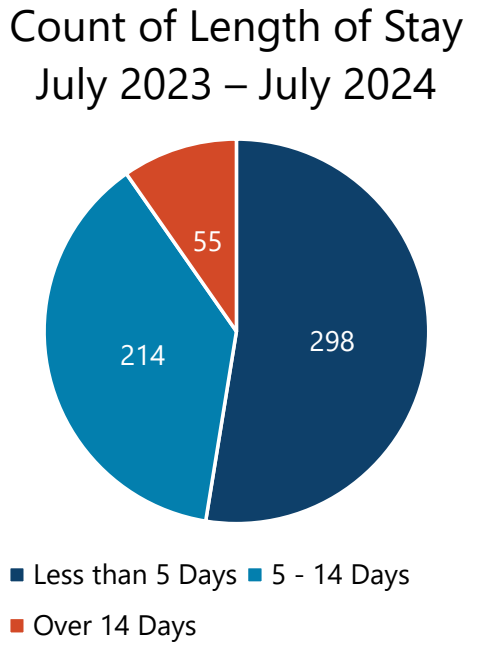
Prairie St. John's is an Institution for Mental Disease. The patient's Medicaid eligibility is suspended during their IMD stay and Prairie St. John's is ineligible for Medicaid payment.

Prairie St. John's could submit to ND HHS for payment through their contract with Southeast Human Service Center for this patient.

NORTH Dakota Be Legendary. | Health & Human Services

Contract Funded: Prairie St. John's



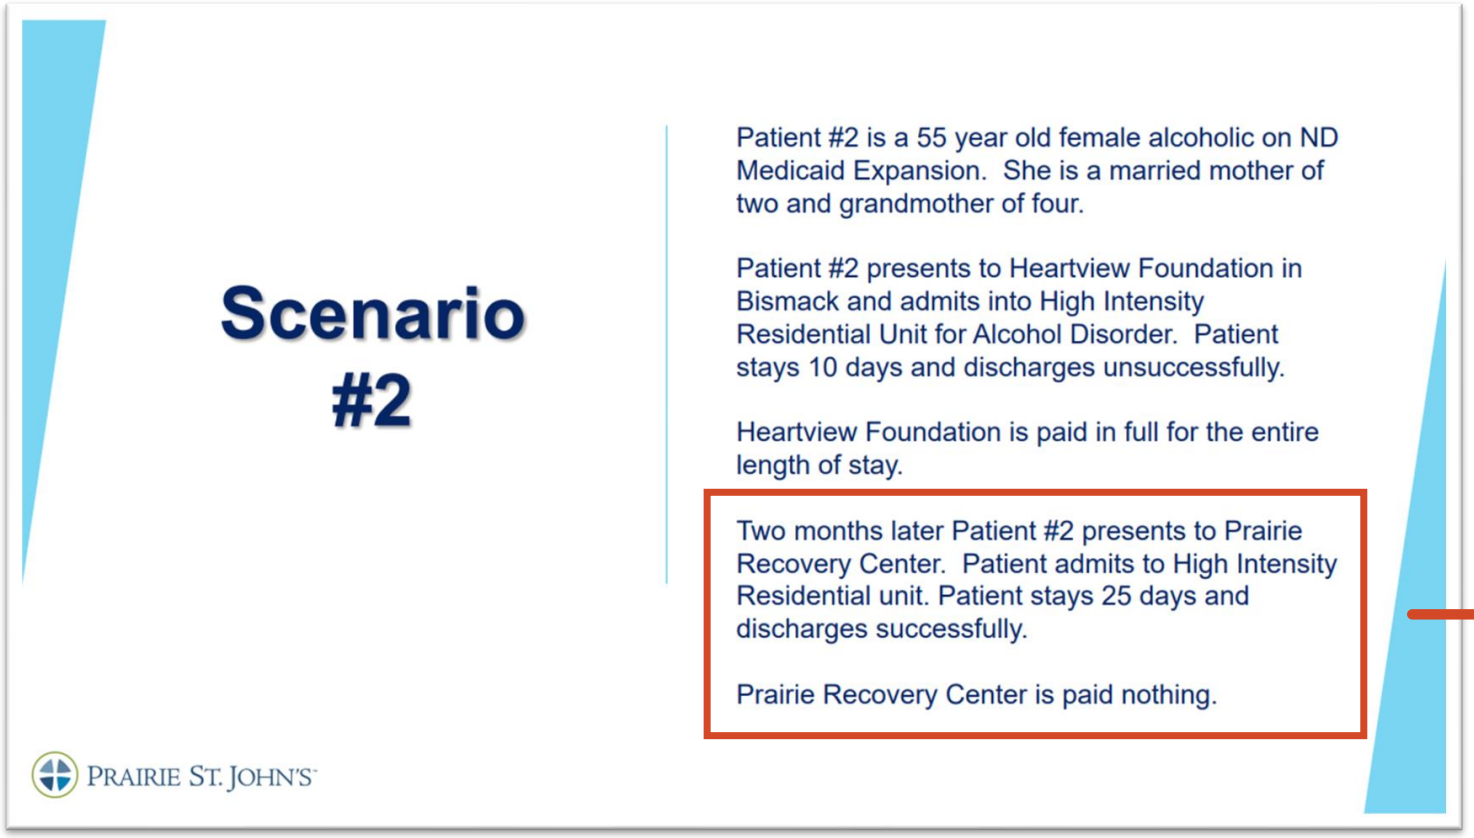


ND HHS and PSJ have a contract to pay for inpatient services for adult Medicaid or Medicaid eligible adults.

- Payment is a per diem for up to 14 days. Current rate for July 2024 – July 2025 is $583.50.
- Total contract amount for biennium is over $4.4 million.
- ND HHS has not declined payment for any patient submitted for payment through the contract.

NORTH Dakota Be Legendary. | Health & Human Services

Contract Funded: Prairie St. John's



Note: Payment is capped at 14 days unless an individual is approved to discharge to the State Hospital.

NORTH Dakota Be Legendary. | Health & Human Services

Follow-Up from April 8, 2024 Human Services Committee

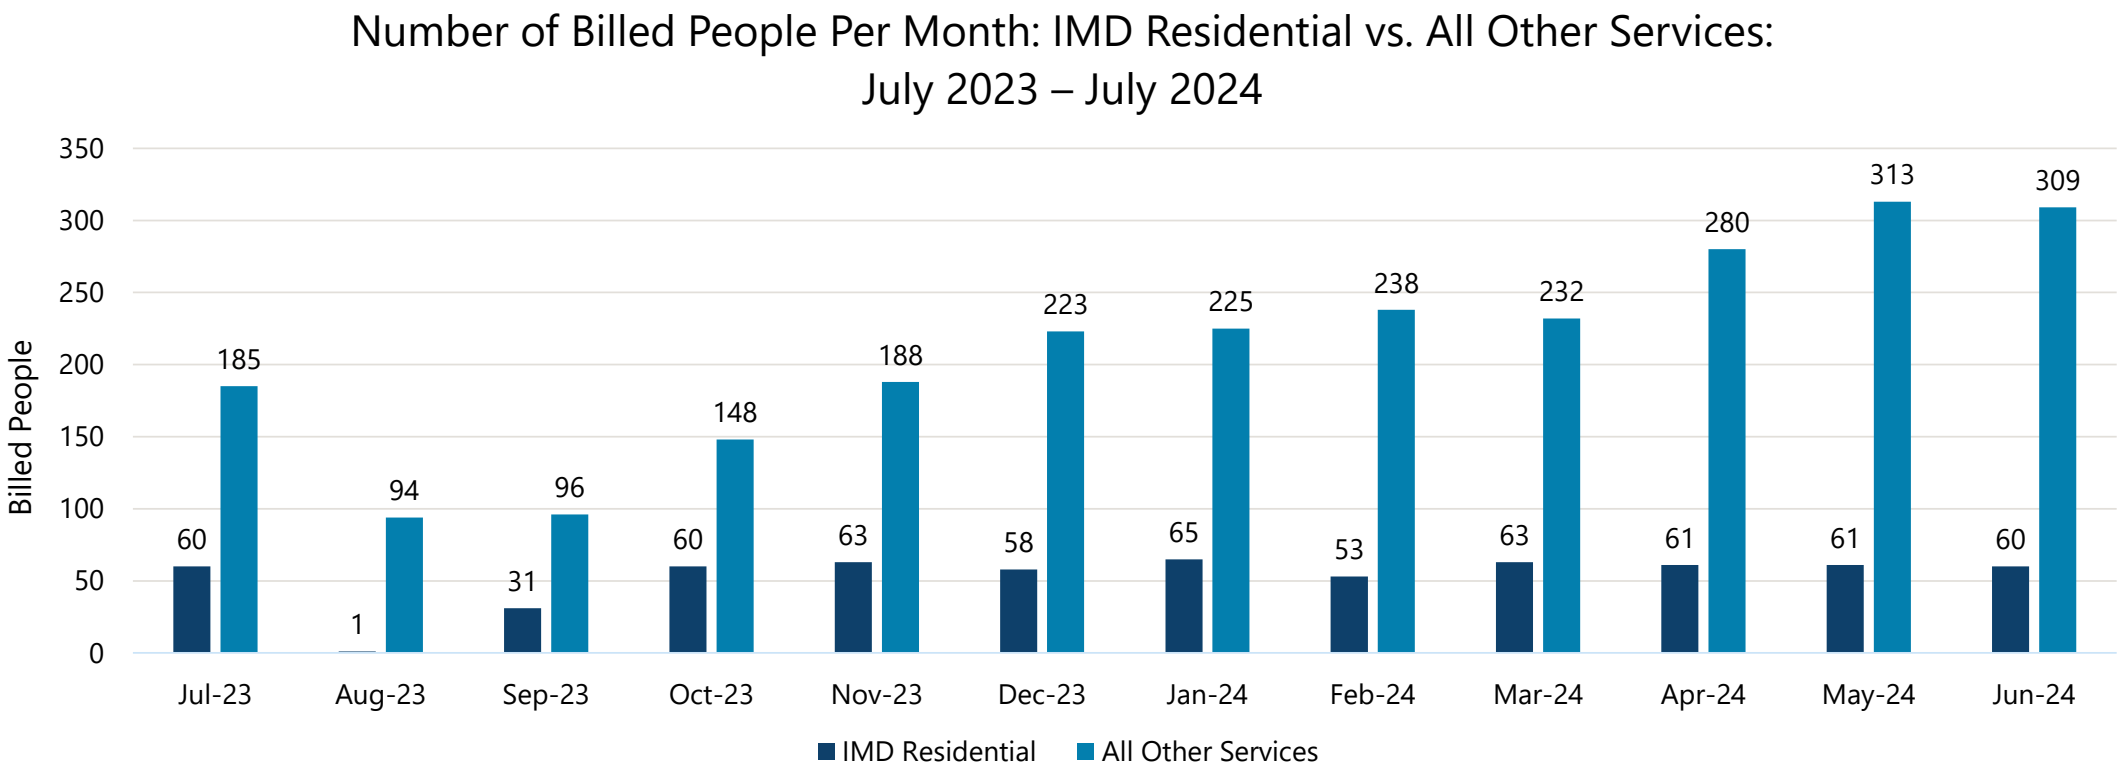
Prairie Recovery Center is an Institution for Mental Disease. The patient's Medicaid eligibility is suspended while at Prairie Recovery Center. Prairie Recovery Center is ineligible for Medicaid payment.

Prairie Recovery Center could submit to HHS for payment through the SUD Voucher for this patient.

NORTH Dakota Be Legendary. | Health & Human Services

Substance Use Disorder (SUD) Voucher

Provides reimbursement for substance use disorder treatment where other third-party reimbursement is not available.

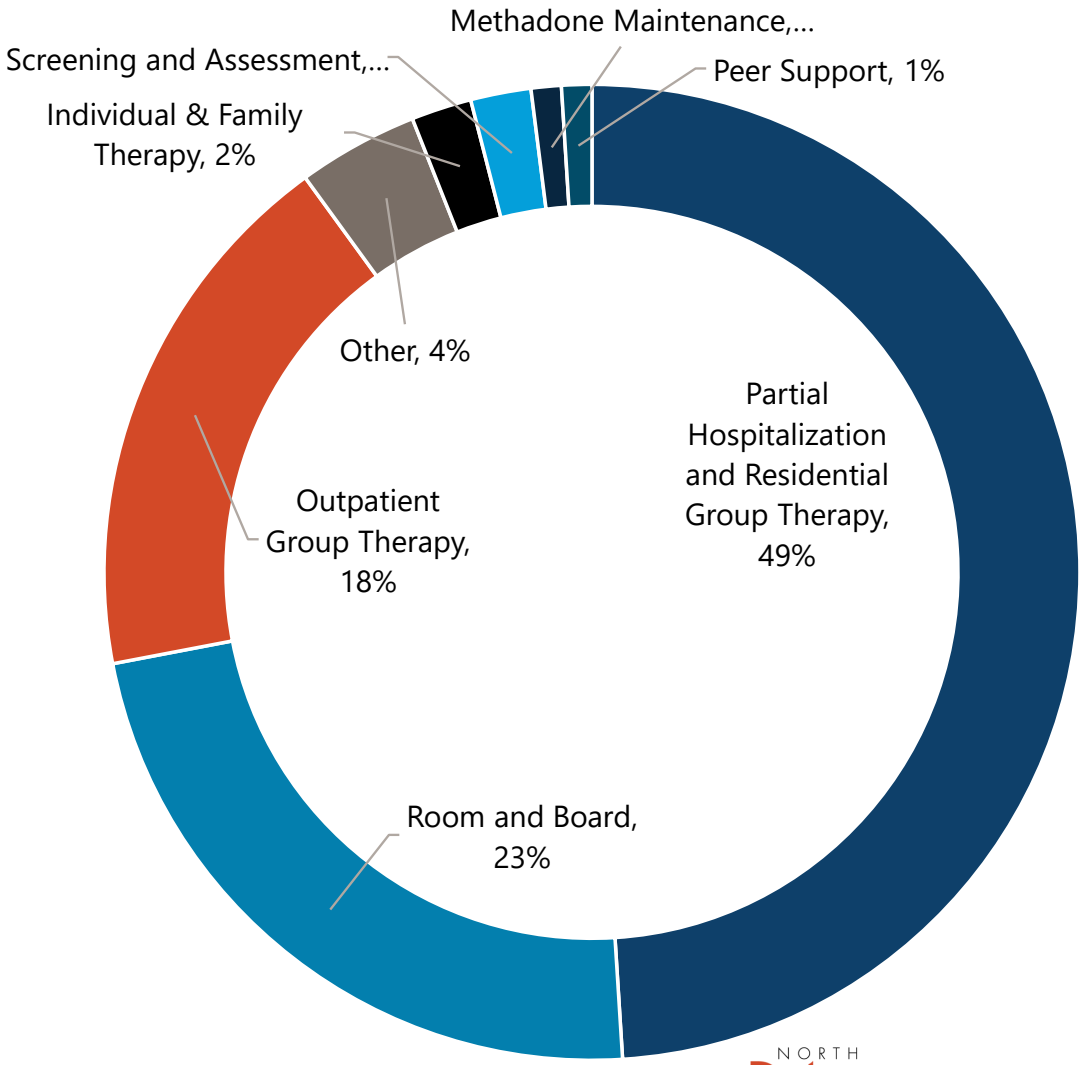


- Initiated during 2015 legislative session (NDCC 50-06-42)
- Began serving individuals in July 2016
- Total Budget for 2023-2025 Biennium: $18,147,874
  - Note: No more than 45% of appropriated amount may be allocated to IMDs
- Uses Medicaid rates for payment to providers

Approximately 8,500 individuals approved through the SUD Voucher since inception.

Forty (40) providers are providing voucher services covering all 8 regions.

NORTH Dakota | Health & Human Services
Be Legendary.



SUD Voucher

Note: NDCC 50-06-42 limits IMD expenditures to 45% of total funding for SUD Voucher.

IMD Payment Options in Medicaid

Federal policy has not changed the IMD exclusion, but several options allow states to cover limited IMD services:

- “In-lieu-of” Payments
- SUD IMD State Plan Option
- Section 1115 Waivers

“In Lieu of” Payments

- Managed Care plans may provide “in lieu of” services as part of their contracts. An “in lieu of” service is a service that is not included under the state plan, but is a clinically appropriate, cost-effective substitution for a similar, covered service.
- The 2016 Managed Care Final Rule issued guidance for states regarding to allow short term IMD stays as an “in lieu of” service. This allows states to continue to pay the capitation to a Managed Care Plan during the partial month an individual is in an IMD.
- To be eligible for capitation payment:
  - The Medicaid member must elect IMD services as an alternative to other covered services;
  - The IMD must be a hospital providing psychiatric or substance use disorder (SUD) inpatient care or a sub-acute facility providing psychiatric or SUD crisis residential services; and
  - The stay in the IMD is for **no more than 15 days**.

SUD IMD State Plan Option

Allows states to cover **up to 30 IMD days** during a 12-month period for a Medicaid member with at least one SUD in an eligible IMD.

- **Provider Requirements:** Eligible IMDs must (1) follow evidence-based practices and (2) offer at least 2 forms of Medication Assisted Treatment (MAT).
- **Continuum of Care Requirements:** States must prove to CMS that the full continuum of care and transitional services are available to Medicaid members in their state.
- **Maintenance of Effort:** To elect this option, states must maintain the annual level of state expenditures for items and services furnished to Medicaid enrollees aged 21 through 64 with at least one SUD in (1) eligible IMDs and (2) outpatient and community-based settings.

Section 1115 Waiver

- IMD waivers are available for both SMI/SED and SUD focused IMDs.
  - Note: States can apply for one option, separately for each option, or submit a dual waiver option for SMI/SED & SUD.
- Allows coverage for short-term IMD stays. States must maintain **an average length of stay of 30 days**.
- Continuum of Service Requirements for each type of waiver.
- Budget Neutrality Requirement
- Outpatient Maintenance of Effort Requirements for Dual SMI/SED & SUD IMD Option
- Specific Goals and Milestones for each waiver requiring states requiring additional state oversight, reporting, and policy development.

What problems are IMD waivers trying to solve?

CMS Goals

1. Increased rates of identification, initiation, and engagement in treatment;
2. Increased adherence to and retention in treatment;
3. Reductions in overdose deaths, particularly those due to opioids;
4. Reduced utilization of emergency departments and inpatient hospital settings for treatment where the utilization is preventable or medically inappropriate through improved access to other continuum of care services;
5. Fewer readmissions to the same or higher level of care where the readmission is preventable or medically inappropriate; and
6. Improved access to care for physical health conditions among beneficiaries

CMS Milestones

1. Access to critical levels of care for OUD and other SUDs;
2. Widespread use of evidence-based, SUD-specific patient placement criteria;
3. Use of nationally recognized, evidence-based SUD program standards to set residential treatment provider qualifications;
4. Sufficient provider capacity at each level of care;
5. Implementation of comprehensive treatment and prevention strategies to address opioid abuse and OUD; and
6. Improved care coordination and transitions between levels of care.

Do 1115 IMD Waivers Work?
SUD IMD 1115 Monitoring Data Analysis

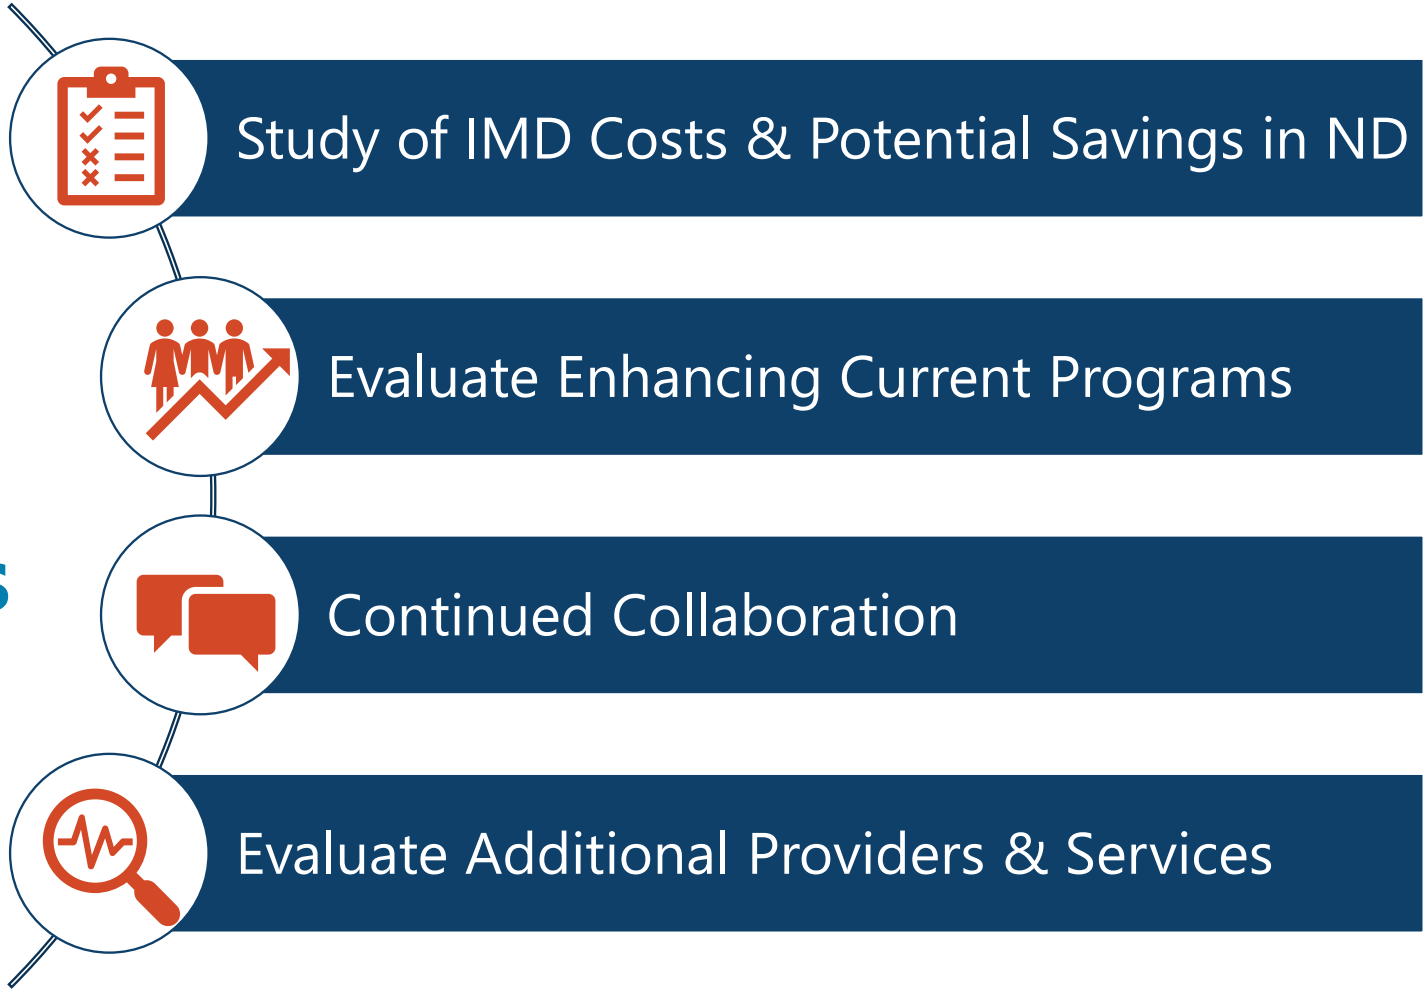
Goal/Milestone	CMS Analysis
Goal #2: Increased adherence to and retention in treatment.	Demonstrations were associated with a 17.1 percent increase in the number of beneficiaries using any SUD treatment but were not associated with shifts in the share of treatment users receiving specific types of treatment.
Goal #3: Reductions in overdose deaths	Rate of overdose deaths significantly increased in 8 of 10 reporting states.
Goal #4: Reduced utilization of EDs and inpatient hospital settings	Implementation was not associated with a significant change in ED visits or inpatient stays.
Goal #6: Improved access to care for physical health conditions	Rate of ambulatory or preventive care use significantly declined in 11 of 14 states.
Milestone #4: Sufficient provider capacity at critical levels of care	SUD providers per 10,000 Medicaid beneficiaries (1) increased significantly in 3 states, (2) decreased significantly in 9, and (3) did not change significantly in 7.

Cross-State Analysis of Section 1115 SUD Demonstration Monitoring Data (medicaid.gov)

Gaps in Behavioral Health Service Delivery in North Dakota

NORTH Dakota | Health & Human Services
Be Legendary.

Current Gaps in Payment & Service Delivery



- Funding
  - Co-occurring Mental Health Diagnosis in SUD Residential Settings
  - Medical Payments in IMD Settings
  - Unfunded IMD Hospital Days
- Continuum of Care
  - Prevention
  - Outpatient Initial Service Entry
  - On-Going Recovery Supports
  - Outpatient Services
  - Supported Housing
- Special Populations

Options for Closing Service Delivery & Payment Gaps

- Close Gaps in Current Funding Streams
  - Create Physical Health Funding Stream for SUD Voucher Settings
  - Ensure Mental Health Delivery & Payment in SUD Residential Settings
  - Evaluate "In Lieu of" Services Option
  - Evaluate State Plan SUD IMD Option
  - Evaluate 1115 SUD or SED/SMI & SUD Dual Diagnosis Option
- Incentivize Provider Outpatient Service Capacity & Delivery
- Invest in Supported Housing Infrastructure
- Develop Care Coordination Model to Connect Individuals to Care

HB 1012
Appropriations - Human Resources Division

Mr. Chairman Nelson and Members of the Committee,

My name is Lorraine Davis, Founder and CEO of NATIVE, Inc. serving the urban Indian populations and other disproportionate populations in North Dakota since 2012. NATIVE, Inc. is a partner with the ND Behavioral Health Division as a community service provider of the Free through Recovery Program, Community Connect Program and 1915i Program serving in the Bismarck and Fargo areas. NATIVE, Inc. provides culturally responsive services and programs. I created NATIVE, Inc. to better meet the cultural needs of Native Americans living in urban areas of ND.

I am asking for $1.9 Million dollars as an amendment to HB 1012 to include an Native American urban set aside to fiscally support culturally programming for participants and their families involved in the Free through Recovery, Community Connect and 1915i programs. $900,000 designated toward cultural programming and $1 M of it designated toward a community cultural center.

Due to the disproportionate representation of Native American adults in prison, Native American youth corrections and at-risk youth, and children involved in foster care and adoptions, it is critical to provide cultural and traditional healing programming amongst Native Americans living off the reservations referred to as the urban Indians within our state. Native Americans live away from their homelands, people and without cultural connections and ways of life. This is a preventive and recovery approach with access to intervention as we provide referrals to treatment centers through all the contracts/grants we have with your department.

Eligible organizations for this funding would need to be Native American behavioral health community-based service organizations serving Native populations living in two or more urban areas who are contracted with the ND Behavioral health's Community Connect, FTR,1915i and involved in the system of care program.

Thank you for your time and commitment toward addressing human service needs within ND. I can be reached on my cell phone at (701) 214-7911 or email lorraine@ndnadc.org, thank you for your time and consideration on this matter.

Respectfully,

Lorraine Davis

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/12/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

9:01 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Budget Comparison
- Health and Human Services
- Business Operations
- Behavioral Health
- Human Services
- Medical Services
- Public Health

9:09 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, presented the long sheets for each division #37419.

9:19 a.m. Stephanie Gullickson, Fiscal Analyst, ND Office of Management and Budget, spoke to additional restoration of funds and FTE's #37419.

9:23 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, discussed base budget salary, pay, under funding, FTE vacancy #37419.

9:38 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, resumed testimony #37419.

9:41 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, addressed integration of services.

9:45 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, resumed testimony #37419.

9:46 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, responded to main frame conversion and restoration.

9:55 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, resumed testimony #37419.

9:57 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, responded to opioid funding.

10:01 a.m. Stephanie Gullickson, Fiscal Analyst, ND Office of Management and Budget, spoke to a revision.

10:02 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, continued with testimony #37419.

10:10 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, spoke to provider carve out.

10:19 a.m. Sara Stolt, Deputy Commissioner, Health and Human Services recommended that Pam Sagness, respond to the committee request #37419.

10:20 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, responded to underfunding.

10:22 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, continued with testimony # 37419.

10:23 a.m. Stephanie Gullickson, Fiscal Analyst, Office of Management and Budget, spoke to partially funded positions.

10:25 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, addressed the roll up.

10:27 a.m. Pam Sagness, Executive Director, Behavioral Health Division, requested that the committee review the decision package #37419.

10:30 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, continued with testimony #37419.

10:31 a.m. Pam Sagness, Executive Director, Behavioral Health Services, will send a response to bathroom remodel #37419.

10:31 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, continued with testimony #37419.

10:40 a.m. Stephanie Gullickson, Fiscal Analyst, Office of Management and Budget, spoke to best in class.

10:44 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, continued with testimony #37419.

10:48 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, spoke to value base purchasing and its flexibility.

10:49 a.m. Nancy Nicholas -Maier, Director, Adult and Aging Services, Health and Human Services, targeted rate increase would be separate to gain access to nursing staff #37419.

10:52 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council continued with testimony #37419.

10:56 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, addressed the block grant.

11:00 a.m. Stephanie Gullickson, Fiscal Analyst, Office of Management and Budget, responded that it was a philosophical difference.

11:01 a.m. Dirk Wilke, Interim Commissioner, Health and Human Services, explained the expansion of maternal child health programs, and vaccine cost purchased at a federal rate. Committee requested more info #37419.

11:08 a.m. Jessica Thomasson, Executive Director, Human Services Division, Health and Human Services, responded to one time request #37419.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/14/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:31 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien. Absent: Representative Wagner.

Discussion Topics:

- Technology Debt
- Behavioral Health Funding
- Budget Comparison
- Information Technology Cost

8:32 a.m. Sara Stolt, Deputy Director, Health and Human Services, testified in favor and presented #37702, #37703, #37705.

9:21 a.m. Craig Felchle, Chief Technology Officer, North Dakota Information Technology, addressed the timeline of implementation.

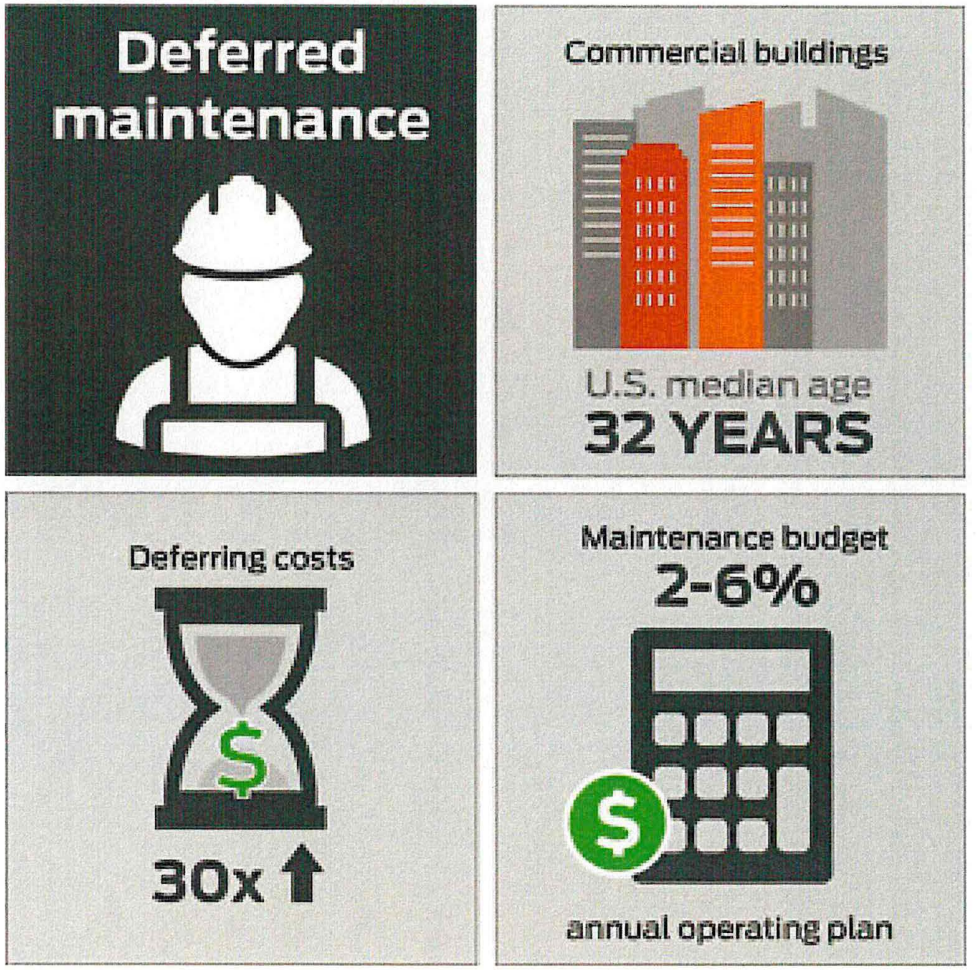
9:26 a.m. Greg Hoffman, Chief Information Officer, North Dakota Information Technology, testified in favor and presented #37733.

10:22 a.m. Pam Sagness, Executive Director, Behavioral Health Division, testified in favor and presented #37731, and previous testimony #29768.

10:31 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, testified neutrally and presented #37710.

10:39 a.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk



HB1012: Technical Debt Details

NORTH Dakota | Health & Human Services
Be Legendary.

Sara Stolt | Deputy Commissioner, ND HHS
February 14, 2024

Deferred Maintenance

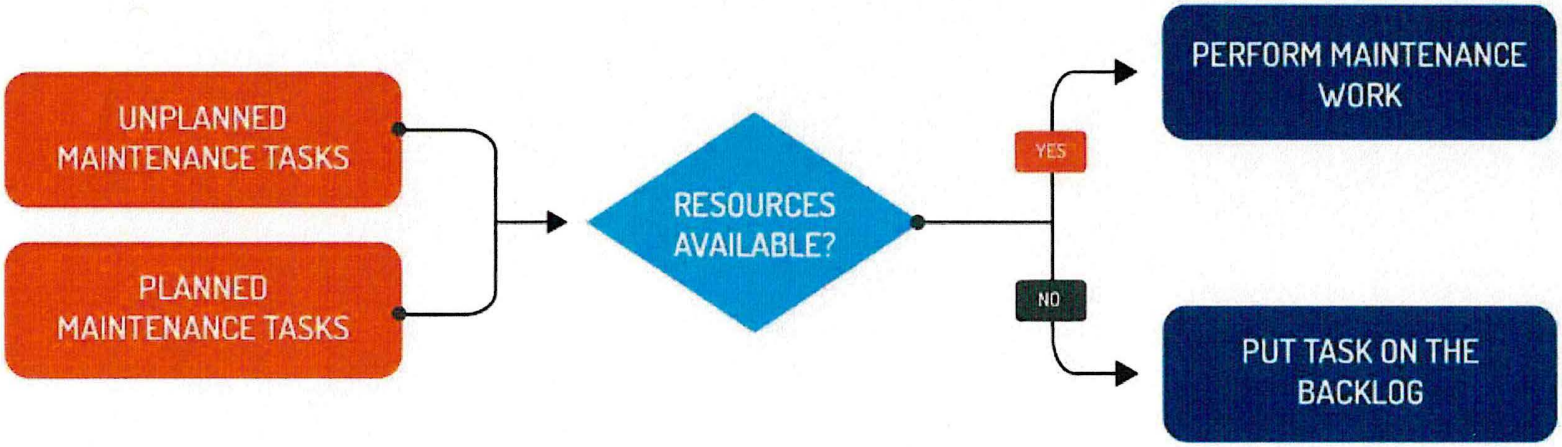
- Deferred maintenance is when maintenance tasks are delayed or postponed.

NORTH Dakota | Health & Human Services
Be Legendary.

Deferred Technology Maintenance

Deferred maintenance on technology is when necessary maintenance tasks are delayed or neglected, which can lead to equipment failure and increased costs.

Causes



- **Budget constraints**: Lack of funds can prevent lifecycle planning and investments
- **Resource limitations**: Not enough staff or parts to address issues as they arise
- **Competing priorities**: Other tasks or projects take precedence

Effects

- **Equipment deterioration**: Small issues escalate into bigger problems
- **Unexpected breakdowns**: Equipment fails without warning
- **Higher maintenance costs**: It costs more to fix problems that have been deferred

Deferred maintenance

Deferred maintenance is the deliberate delay of planned and unplanned maintenance activities on assets or facilities that should have been addressed immediately. If not handled properly, this results in a maintenance backlog that accumulates over time.

NORTH Dakota Be Legendary. | Health & Human Services

25-27 Executive Budget – Technology Debt / Mainframe

IT – Existing		Total	General	Federal	Special
Retire Economic Assistance Legacy Systems on Mainframe – SIIF	Human Services	2,000,000		1,000,000	1,000,000
Retire Electronic Health Record Legacy System Data Extraction & Migration on Mainframe – SIIF	Behavioral Health	1,000,000			1,000,000
Retire Medicaid Legacy Systems on Mainframe - SIIF	Medical Services	2,000,000		1,500,000	500,000
Retire Technical debt remediation, including mainframe and legacy systems - SIIF	Business Operations	10,000,000		5,000,000	5,000,000
IT - Existing Total		**15,000,000**		**7,500,000**	**7,500,000**

What is included?

- Between 27-30 applications (technology tools)
- Updated/New versions of software that are dependent on outdated technology on the mainframe to complete processes
- Not just referencing the mainframe but we need to look at newer systems/technologies and ensure that ongoing maintenance and support is addressed timely
- Hundreds of processes and workflows that run through the mainframe (hooks into the mainframe) and new systems and technologies that were built to depend on the mainframe

Goals

- To **eliminate** dependency on the mainframe (hardware) as quickly as possible
- Migrate the **data**, that is to be retained, to a new data storage tool
- Move the new **business capabilities** to a new platform or to merge to existing **supported solutions**
- Eliminate **unnecessary processes** that were dependent on **unsupported applications**
- Build **new processes** that are required for supported applications

Cost of Doing Nothing

Increasing Costs to Maintain (Workforce and Financial Risks)

- Vendor sourcing costs are increasing
- Software costs are steadily increasing
- Decreasing in-house knowledge on the applications and integrations

Inability to Cost Effectively Deliver on New(er) Capabilities (Efficiency)

- Multi-Factor Authentication
- Stakeholder and Employee Expectations

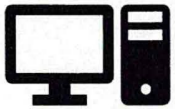
Cybersecurity Risks

- As support options decrease, cyber-risk increases
- What is the cost of a breach?

Software solutions will become unsupported

- **Lead to inability to continue to utilize them or even the ability to extract needed data from them.**

Process that Drives Cost



Business Analysis – Understand what the process is driving and what it's connected to.

Data migration and Data Storage

Project planning and implementation

Application	Stack	Service	Category	Assessment Type	HHS Division	Description
DHS - CCWIPS	Mainframe	N/A	Mainframe Apps	Part of FRAME/CCWIPS project	CFS	Children and Family Services Case Management and Payment application (Case Management for Adoption, Payments for Foster Care)
DHS - FACSES Mainframe System	Mainframe	N/A	Mainframe Apps	Part of FACSES project	Child Support	Child Support Case Management and Payment
DHS - FRAME	Java	DB2, CONNX, Natural Broker	Apps using DB2	Part of FRAME/CCWIPS project	CFS	Children and Family Services Case Management and Payment application (Case Management for Foster Care, CPS, Guardianship, Payments for Guardianship)
DHS-SB68-Basic Care	Mainframe	N/A	Mainframe Apps		Economic Assistance	Basic Care Eligibility Determination
DHS-SS3-Contract System	Mainframe	N/A	Mainframe Apps		Finance	Legacy contract and payment application for contracts, leases. ...
DHS-SS8 Money follows the Person	Mainframe	N/A	Mainframe Apps		Aging	
DHS - ApplyNow	Java	DB2	Apps using DB2	Part of FACSES project	Child Support	Child Support Parent web application to apply for services
DHS - Eligibility Services	Java	DB2, CONNX, Natural Broker	Apps using DB2		Economic Assistance	Provides web services to integrate between SPACES and TECS/Vision (Case conversion, Eligibility History, ...)
DHS - Employer EFT	Java	DB2, Natural Broker	Apps using DB2	Part of FACSES project	Child Support	Allows employers to manage Child Support payment obligations
DHS - FACSES Inquire and Maintain	Java	DB2, Natural Broker	Apps using DB2	Part of FACSES project	Child Support	Child Support Web application to review payment status
DHS - NDVerify	Java	DB2, CONNX	Apps using DB2		Economic Assistance	Provides verification services for Economic Assistance applications (SSN, Vital Records, Motor Vehicle,...)
DHS - Services Hub	Java	DB2, CONNX	Apps using DB2		Multiple	Service Broker between multiple HHS applications (example - SPACES eligibly to MMIS payment application)

Application	Stack	Service	Category	Assessment Type	HHS Division	Description
DHS - MDS (Writes to DB2 for Service Hub transactions)	Java	DB2	Apps using DB2		Medical Services	Maintains nursing home assessments and classifications - provides to MMIS
DHS - FES (Writes to DB2 for Service Hub transactions)	Java	DB2	Apps using DB2		Medical Services	Maintains Level Of Care Determination/Payment Alerts/Hospice Election/Service Authorizations for Waiver Programs - provides to MMIS.
DOH - Children's Special Health Services (CSHS)	PowerBuilder	DB2	Apps using DB2		Public Health	
DHS - CS Services	Java	CONNX, Natural Broker	Interfacing Apps	Part of FACSES project	Child Support	Provides web services to integrates between FACSES and other HHS applications
DHS - Lien Registry	Java	CONNX	Interfacing Apps	Part of FACSES project	Child Support	Public inquiry to Liens of non-custodial parents
DHS - New Hire	Java	Natural Broker	Interfacing Apps	Part of FACSES project	Child Support	Allows employers to report new hires
DHS - QUICK Application	Java	Natural Broker	Interfacing Apps	Part of FACSES project	Child Support	Interstate inquiry to ND Child Support cases. Used by other state Child Support offices
DHS - RETTA - Web Terminations	Java	Natural Broker	Interfacing Apps	Part of FACSES project	Child Support	Allows employers to report job terminations
Legacy MMIS	Mainframe	N/A	Mainframe Apps		Medical Services	Legacy Medicaid Claims Payment
DHS - VISION	CA:Gen	DB2	Mainframe Apps		Economic Assistance	Legacy TANF and Medicaid Eligibility Determination
DHS-ES1-ES4-TECS	Mainframe	N/A	Mainframe Apps		Economic Assistance	Legacy SNAP and Medicaid Eligibility Determination
DHS-SS18-CCAP	Mainframe	N/A	Mainframe Apps		Economic Assistance	Legacy Child Care Assistance Eligibility Determination
DHS-SS4-LIHEAP	Mainframe	N/A	Mainframe Apps		Economic Assistance	Legacy LIHEAP Eligibility Determination
ROAP	AIX	N/A	AIX		Behavioral Health	Legacy Clinical EHR used by HSCs
AIMS	AS/400	N/A	AS400		Behavioral Health	Legacy In-Patient EHR used by State Hospital

Application	Stack	Service	Category	Assessment Type	HHS Division	Description

NORTH Dakota Be Legendary.
Health & Human Services

Example: TECS and VISION (supports SPACES)

Processes Still running for TECS:

1. Bank of North Dakota – Batch process for ACH (Automated Clearing House) for TANF benefits.
2. EFUNDS - EBT (Electronic Benefits Transfer) – Batch process in place for some or all the list activities.
    - SNAP Demographic
    - SNAP Benefit
    - SNAP Administrative
    - SNAP Adjustment
    - SNAP Aging
    - SNAP Account Activity
    - SNAP MIS Detail
3. FASCES (Fully Automated Child Support Enforcement System) – Batch process to send and receive referrals from Child Support
4. Federal Office of Child Support Enforcement New Hire File
5. ND Verify - queries to determine if there is any open case for the individual being inquired upon. NDVerify pulls benefit information from TECS/Vision.
6. SSA (Social Security Administration) - Sends and receives files from FEDS through a mainframe batch process for the information listed below.
    a. Bendex (Beneficiary Data Exchange)
    b. Earnings (BEER) - This provides annual earnings, pension, and self-employment data for all individuals who's SSNs are matched with the data as reported to the Internal Revenue Service on the W-2 and W-2P income statements.
    c. Bendex Benefits - Computer match by SSN between public assistance case files and Social Security records used to verify RSDI benefits in determining eligibility for various public assistance programs.
    d. Bendex COLA (Cost of Living Adjustment) file,
    e. Numident (Numerical Identification System) - A file is sent to the Social Security Administration (SSA) containing the social security number, last name, first name,

sex and date of birth (mm/yy) of all individuals in TECS and Vision that have not been previously verified by NUMIDENT.

f. SDX (SSI State Data Exchange) provides states with information about aged, blind, and disabled persons who apply for or receive Supplemental Security Income (SSI). The SDX record consists of SSI eligibility and payment data collected by the Social Security Administration. The information available on the SDX can be used to determine financial and technical eligibility for SSI-related Medicaid, TANF based on incapacity (when one or both parents receive SSI), and Food Stamps.

g. TPQY - on-line method of verifying Social Security Administration (SSA)/Supplement Security Income (SSI) benefit information, Medicare/Buy-in information and quarters of coverage

h. TPQY 40 quarters

i. TPQY prisoners

j. SSA – LIS

k. SSA – Death Match

7. SOLQ (State Online Query) - Interface allows authorized users to inquire on client information maintained by the Social Security Administration. The SOLQ interface provides direct online access to individual Social Security records, which the interface processes immediately and sends back an online response to the requestor.
8. SVES (State Verification and Exchange) - batch query system that provides states and some federal agencies with a standardized method of SSN verification and uniform data response for Title 2 and/or Title 16 data for benefit program processing. In addition to allowing states to receive SSN Verification, and if requested Title 2 and/or Title 16 data, SVES also allows states to request information from other SSA exchange systems external to SVES (e.g., BENDEX, SDX) via the SVES request.
9. FEDS(Baltimore)

    a. Buyin A and B - Information received back in 2 files (Part A and Part B) for client sent on the outgoing file. TECS Buyin dates and statuses get updated. Medicare Part A Buyin: Hospital Coverage SSI Buy-In (Part B - Medical Coverage): A program under Section 1843 of the Social Security Act in which Medicaid eligible recipients who are in receipt of Supplemental Security income (SSI) benefits and who are eligible for Medicare Part B, are eligible for the state to pay the monthly Medicare Part B premium.

    b. PARIS (Public Assistance Reporting Information System) - a federal-State partnership which provides all fifty States, D.C., and Puerto Rico detailed

information and data to assist them in maintaining program integrity and detecting/ deterring improper payments

c. UFO (Unidentified Financial Objects) interface - File of potential assets that serve as a lead to identify an asset (i.e. interest, dividends, gambling winnings, agriculture subsidies, capital gains, sale of stocks and bonds).

d. MMA (Medicaid Modernization Act) (Part D),

e. Pickle People File - File of individuals who would lose SSI eligibility based on a COLA increase to Social Security income

10. Job Service -

    a. Wage UIB Interface - Create an interface to Job Service of UIB (Unemployment Insurance Benefit) and Wage records.

    b. JOBS (Job Opportunities and Basic Skills) Target Group - JOBS program is an employment and training program for people on public assistance.

    c. JTPA (Job Training Partnership Act) - File containing Workforce Investment Act (WIA) income information.

    d. BEST(Basic Education and Skills Training) Program Employment Communication Workshop

11. FES(Functional Eligibility System) - stores what used to be called screenings, called Level of Cares now. Batch process in TECS creates a transaction for the HUB to load into FES. TECS will retrieve provider information from FES.
12. State Hospital - Interface, admissions and discharges from State Hospital
13. IEVS online menu

    a. IEVS OUTSTANDING INTERFACE

    b. MEDICAID BENEFITS PAID

    c. IEVS OVERPAYMENT ADJUSTMENTS

    d. X-SPED AND BASIC CARE BENEFITS,

    e. QMB DEDUCTIONS/COINS/COPAY PD

    f. PUBLIC ASSIST REPORTING(PARIS)

    g. NATIONAL DIRECTORY OF NEW HIRE

14. MMIS – Batch process to create eligibility determination information sent to Medicaid Claims system

15. NDNH (National Directory of New Hire) Interface

    a. The federal Office of Child Support Enforcement (OCSE) operates the National Directory of New Hires (NDNH), a database established by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) for the purposes of assisting state child support agencies in locating parents and enforcing child support orders. In addition, Congress authorized specific state and federal agencies to receive information from the NDNH for authorized purposes.

16. PeopleSoft

    a. BEST((Basic Education and Skills Training) Program Employment Communication Workshop

    b. SSI (Supplemental Security Income) payments

17. NDM - Network Data Mover - send and receive files electronically

    a. Citicorp for Food Stamps

    b. Federal Government

    c. Other State Agencies

18. NITC-Kansas City (National Information Technology Center)

    - TOP (Treasury Offset Program) - a centralized offset program, administered by the Financial Management Service's (FMS) Debt Management Services (DMS), to collect delinquent debts owed to federal agencies and states including past-due child support.
    - TOP Address Request,
    - TOP Weekly Update (TOP 60 days),
    - TOP Weekly Collections
    - TOP Weekly Update,
    - TOP Address Request

19. SAVE - United States Immigration which verifies citizenship
20. TALX - real time employment verification
21. WSI(Work force safety and insurance)
22. State Treasurer – Batch process to redeemed Warrants

23. EDRS(Electronic Death Registration System)
24. Vital Statistics
25. HUB – Every 15 Minutes a batch jobs process creates a transaction from ES100000 changes or inserts with information such as name, address, and dob and retrieves client living arrangement data.
26. MCI (Master Client Index) – Batch Process executes every 15 minutes, DB2 transaction from the HUB are loaded into MCI
27. DMV
28. Finalist - Batch process for address verification
29. Web service calls from SPACES looking for information on the mainframe. There are 4 web services currently being used.
    a. Check program eligibility – SPACES
    b. Outstanding Claim Inquiry – SPACES
    c. Reuse Case number - SPACES
    d. Conversion - SPACES
30. Automatic conversion from TECS to SPACES is triggered at new application, case re-cert/review, and when a client is added to an ongoing case.
31. Estate Recovery:
    a. Medicaid logs into TECS to pull notices for estate recovery.
    b. Legal logs into TECS for asset tracing associated with asset recovery.
32. TANF claims and lifetime limits are still reviewed in TECS and Vision and recoupments are added in legacy system(s).
33. Web services that create/send to MMIS Datawarehouse.
34. There is a hard tie between SPACES and TECS/VISION – A dummy cases is created in Tecs/Vision and the case number in Tecs/Vision is used in SPACES. The client information from SPACES is stored in the legacy ES100000 file (and it creates the SPACES Client Number), that is so communication with Tecs/Vision and Child Support can continue.
35. Files updated by SPACES:

    ES100000 – Legacy Master Client File

    Create a Denied Medicaid Case effects files

    - CASE_BASIC_DBF
    - PROGRAM_BASIC_DBF
    - INVOLVEMENT_DBF

- PARTICIPATION_DBF
- CASE_COMPOSOITION_DBF
- ADDRESS_DBF

TABLES_DBF – Has the next Case Number/Client Number – each gets incremented when new case/client added.

Conversion Processes – when running conversions (which still runs) we also update files:

a. RECOUPMENTS_DBF – We reduce all converted Claims to zero as they transfer to SPACES

b. PROGRAM_BASIC_DBF – Sets a converted date

Processes Still running for VISION:

1. PeopleSoft - SSI (Supplemental Security Income) payments processed
2. Tanf Reporting
   a. CYBERFUSION send file to NATIONAL INSTITUTE OF HEALTH
   b. High performance bonus report to Feds
   c. JOBS (Job Opportunities and Basic Skills)
      ftp file to job service
3. CONNX
   a. DSS (Decision Support System) file
   b. Send files Truven
   c. USBANK
4. EPC changes – address, demographic information, customer information via NDM.
   a. Bank of North Dakota
   b. ACH (Automated Clearing House) for TANF benefits
5. FASCES (Fully Automated Child Support Enforcement System) – Batch process to send and receive referrals from Child Support
6. MOVE-IT – process to transfer various files from mainframe
7. Job Service - Wage UIB Interface - Create an interface to Job Service of UIB (Unemployment Insurance Benefit) and Wage records
8. c++ code program - Creates notices into lotus notes
9. BLAZE - rules engine for Vision eligibility determination
10. Web Service to Spaces
    a. Tanf Benefits check
    b. Dual eligibility check

11. Lotus Notes
    a. Planet Press – Vision Notices (uses c++code program)
    b. c++ code program - Creates notices into lotus notes
    c. Each County has its own Lotus Notes databases
    d. Central Hub Lotus Notes server that copies county documents and replicates and store here.
12. HUB – Every 15 Minutes a batch jobs process creates a transaction from ES100000 changes or inserts with information such as name, address, and dob and retrieves client living arrangement data.
13. MCI (Master Client Index) – Batch Process executes every 15 minutes, DB2 transaction from the HUB are loaded into MCI
14. Finalist - Batch process for address verification
15. MMIS – Batch process to create eligibility determination information sent to Medicaid Claims system and TPL information received from MMIS
16. FES (Functional Eligibility System) - stores what used to be called screenings, called Level of Cares now. Batch process in TECS creates a transaction for the HUB to load into FES. TECS will retrieve provider information from FES.
17. ND Verify - queries to determine if there is an open case for the individual being inquired upon. ND Verify pulls benefit information from TECS/Vision.
18. TECS – Batch process that posts Case/Client information from Vision to TECS
19. Vision – Uses ES100000 to lookup for client's/Case numbers
20. Automatic conversion from Vision to SPACES is triggered at new application, case re-cert/review, and when a client is added to an ongoing case.
21. Estate Recovery:
    a. Medicaid logs into Vision to pull notices for estate recovery.
    b. Legal logs into Vision for asset tracing associated with asset recovery.
22. TANF claims and lifetime limits are still reviewed in TECS and Vision and recoupment are added in legacy system(s).
23. Workers with Disabilities (WWD) and Children with Disabilities (CWD) logs into Vision to check premium payments and credits on cases.

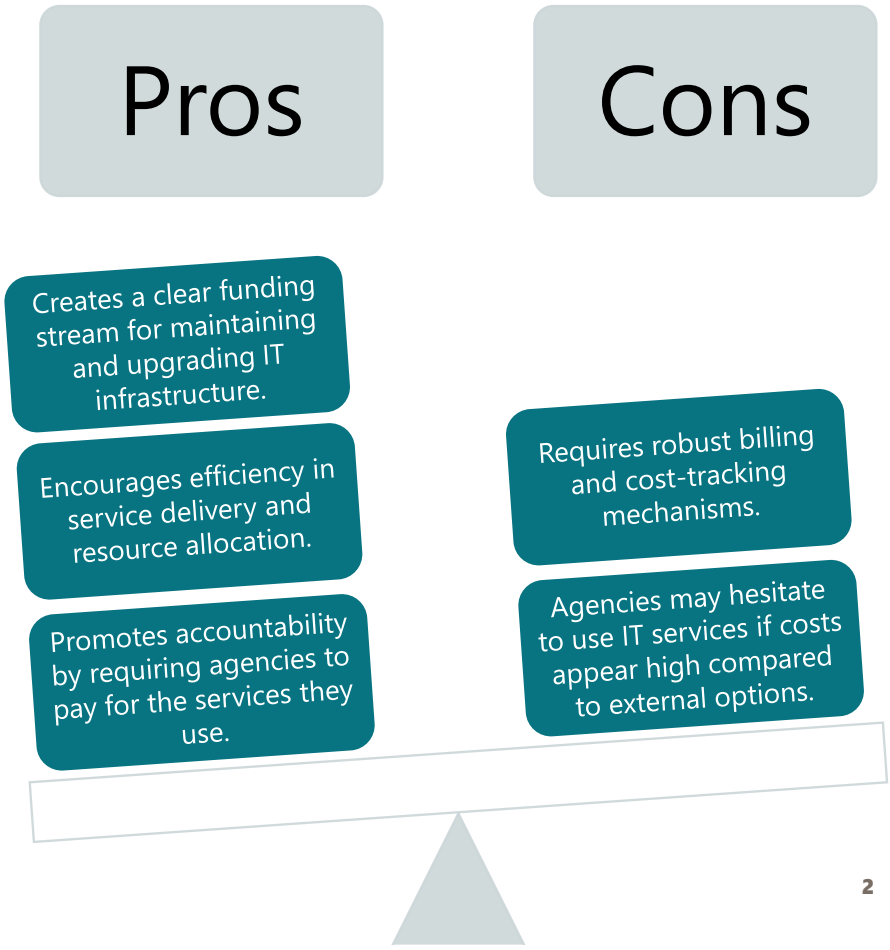
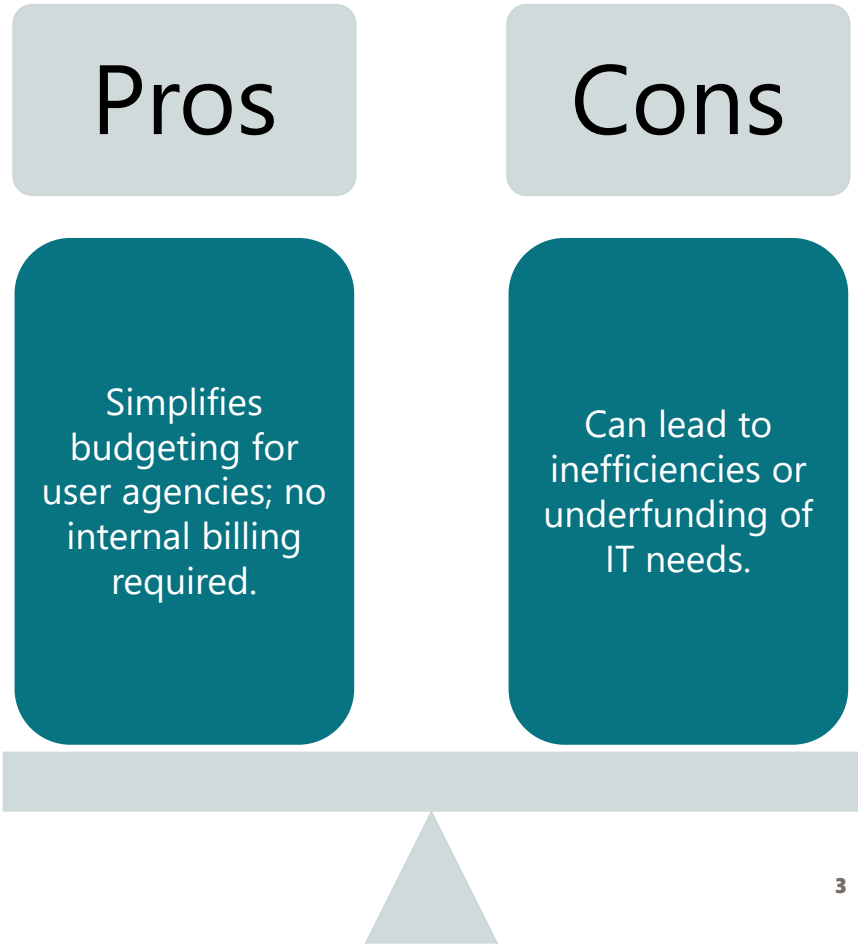
House Appropriations Committee



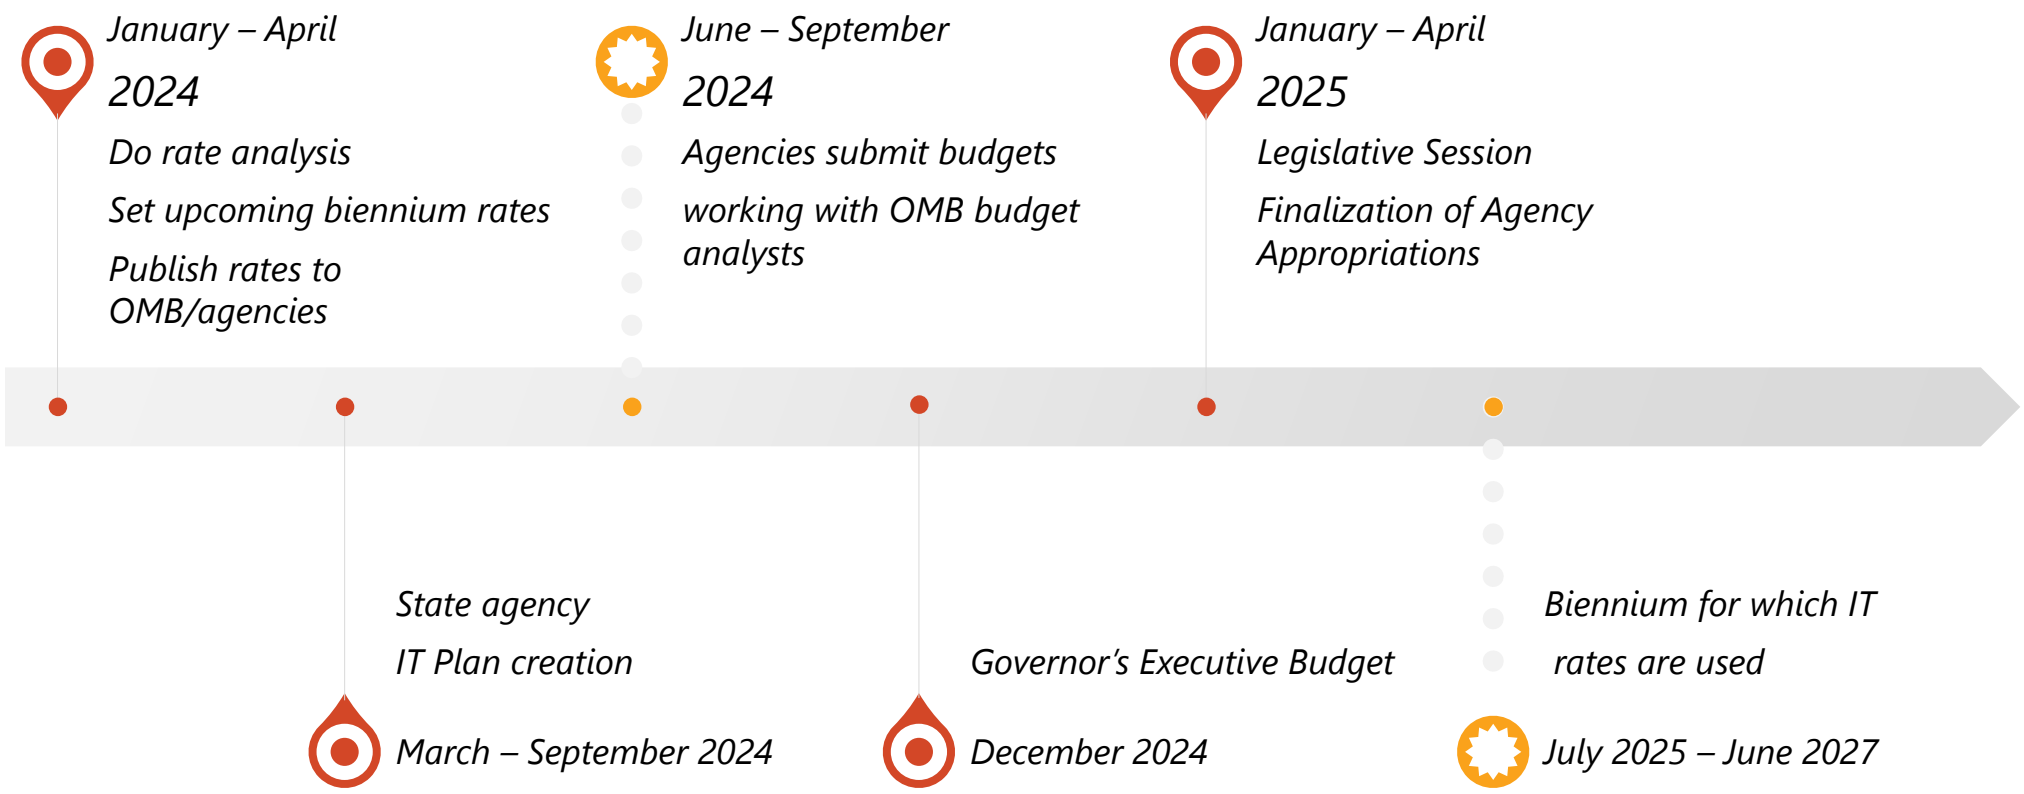
February 14th, 2025

Roughrider Room

Internal Service Fund (ISF)

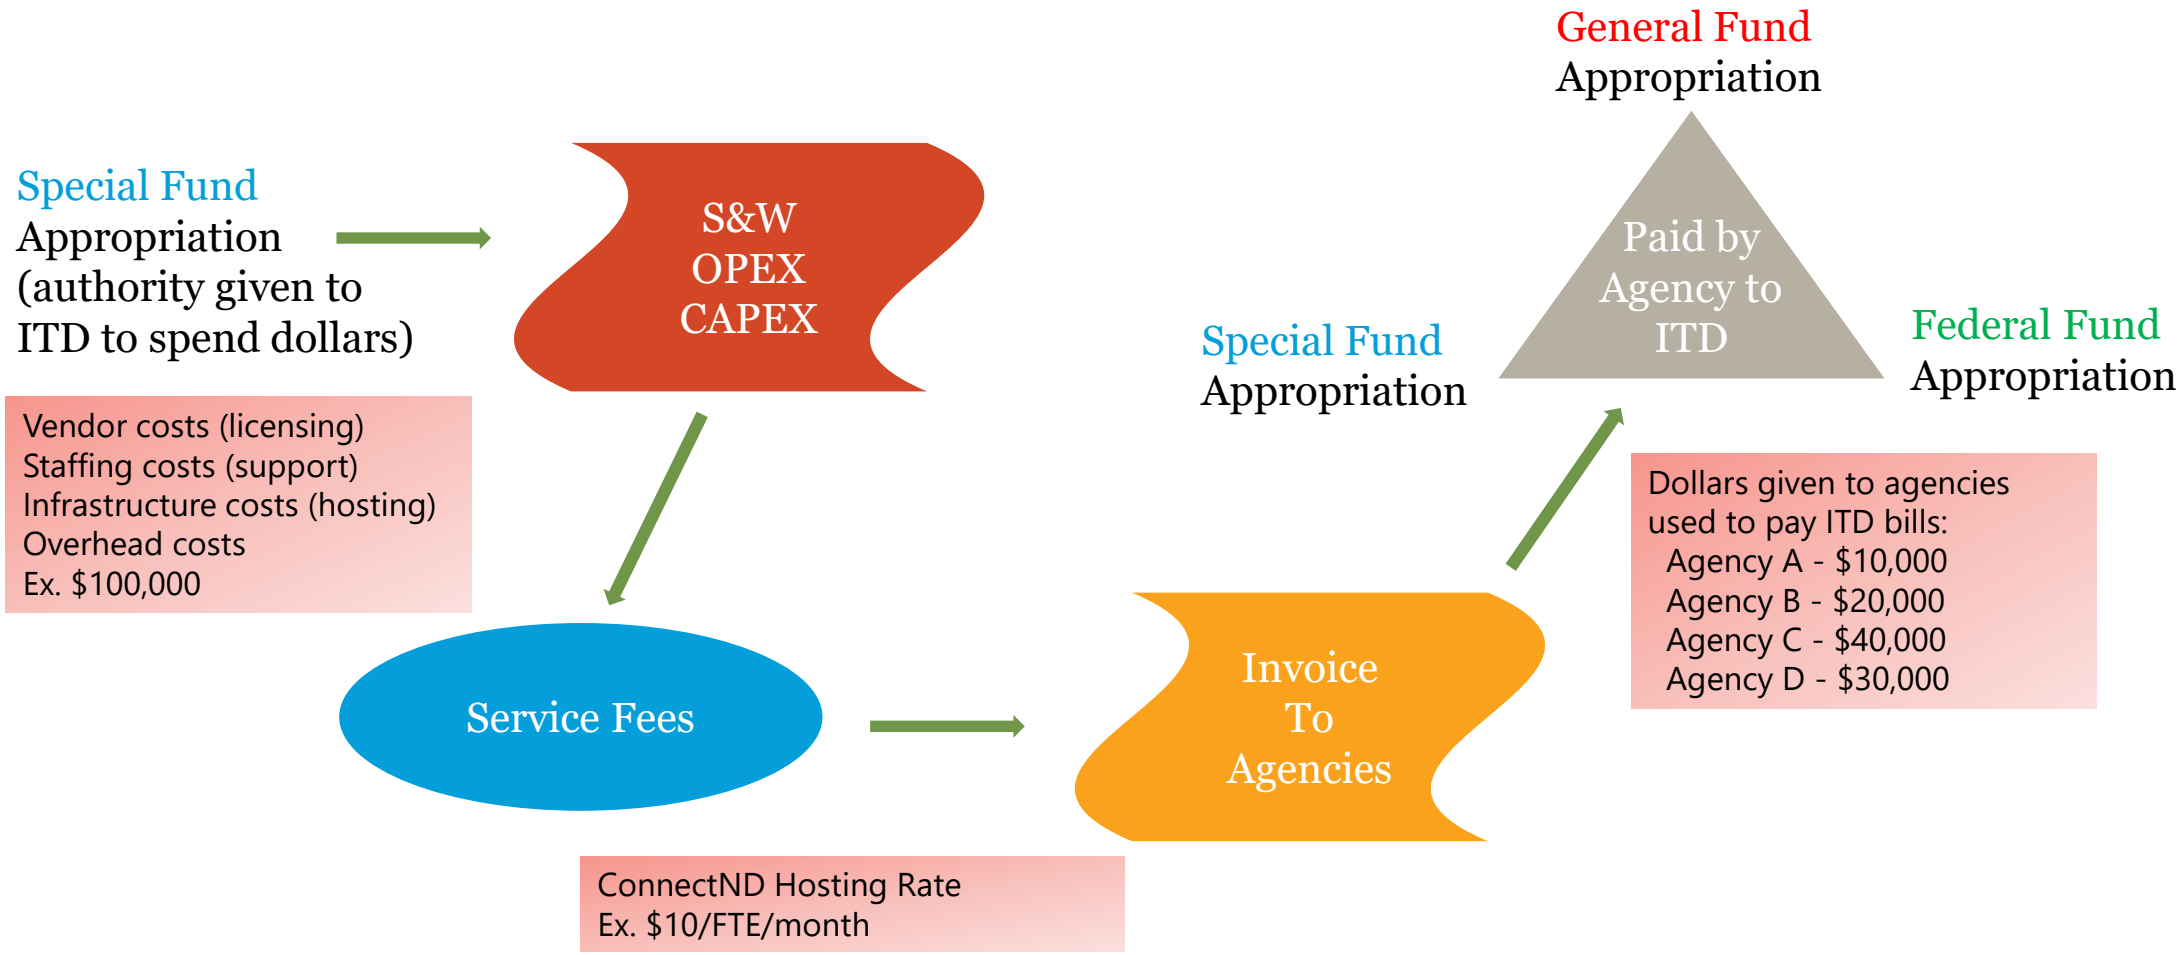


- **Definition:** ISFs are self-sustaining financial models used by government entities to deliver services to other agencies, with costs recovered through chargeback.



Alternative Models

- **General Fund Allocation:** IT services are funded through appropriations from the state's general fund, often making them appear "free" to the receiving agency.



- **Hybrid Models:** Some states use a combination of ISFs and direct appropriations, where certain core services are funded through the general fund and other services operate as ISFs.

Service Fee Timeline

Appropriation & Chargeback Example

Service Fee Example – Legislative IT Committee

What would a service fee for this committee look like?

What happens if you are directed to have 10 meetings?

What if it were an hourly rate per member?

Where does the cost of creating your Legislative Management report go?

Assumptions:
6 meetings during an interim
11 committee members
1 citizen member
2 support staff

Staffing:
- Portion of salaries/benefits for nine committee members
- Travel costs for nine committee members
- Any direct training needed to serve on the committee

Operational:
- Portion of contractor cost (CIO Mock)
- Portion of end user license costs (M365, Adobe, LC applications)
- Portion of end user equipment
- Cost of Harvest Room (includes technology within room)

Overhead:
- Portion of salaries/benefits for chairman/vice chairman (leadership)
- Portion of salaries/benefits for support staff

Billing metric could be a flat rate per meeting.

Costs Absent From 2023-2025 Rates

- Current biennium rates do not include:
  - Equity Package
    - $5.2M, including the 6/4% legislative increase
      - Would increase current rates by 10.2%
  - Legislative Increase of 6/4%
    - Rates only included a 3/3% increase
      - Approx. $1M difference for the biennium
- Efforts to remediate critical security vulnerabilities
  - Unmanaged desktop apps
  - Apps unable to migrate to new hardware
- New technology proof of concepts
  - Artificial Intelligence
  - Robotic Process Automation
  - Low code/No Code platforms

Legacy Technology

The cost of IT increases for all the similar, but different technologies in State government

- 7 versions of Microsoft SQL Database
- 13 versions of Windows or Linux operating systems (oldest is Windows 2003)
- Over 5000 applications across agency desktops
  - 50 pdf applications
  - 5 agencies using Dropbox instead of Teams
  - Every “free” utility downloaded onto a desktop has a back-office cost and risk
- Over 100 unique desktop builds across agencies

- 4D/MacOS (DWR)

Body Cams (HP, DOCR, GNF)

Application Support

Rate History:	
2015-2017	$105/$115/$105
2017-2019	$114/$120/$114
2019-2021	$114/$120/$114
2021-2023	$102/$125/$130
2023-2025	$105/$131.50/$136.50

Consumer Price Index (CPI) – 16.9% increase in last three years

Includes:
- Staffing costs including projected increases
- Operational and administrative costs

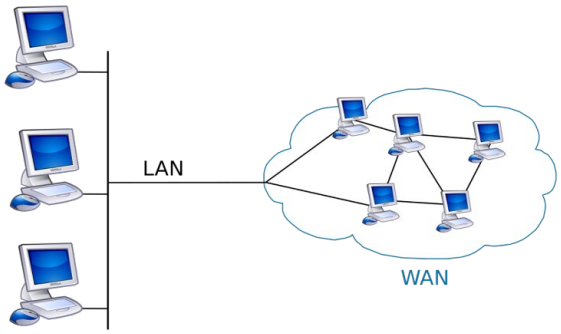
Benefits:
- Human Centric Design with application modernization efforts
- Ability to support future technology solutions – AI, GenAI, Common Datasets
- Data strategy blueprint in preparation for doing insight-driven decision making
- Support for Business Gateway platform

- **2025-2027 Hourly Rates**
  - $120.75/hour – IT Analyst (was $105/hour)
  - $136.30/hour – Business Applications (formerly Development/Business App. Support)
  - $136.30/hour – Business Analysis (was $131.50/hour)
  - $145/hour – Project Management (was $136.50/hour)
  - $159/hour – Data & Insights (new)

Mainframe – zSeries & AS/400

- AS/400 Mainframe
  - Primarily used to access legacy data by *two* agencies
  - Cost to maintain this legacy technology will be split evenly between remaining two agencies
  - Estimated cost to maintain is $15,500 per month
    - If new hardware is needed before retirement, estimates are about $200,000

- IBM zSeries Mainframe
  - Production applications for two agencies remain on this platform
    - Random reductions in CPU usage creates insufficient revenue to cover costs
  - High cost of licensing and third-party vendor support
  - Cost to maintain this legacy technology will be split proportionately between remaining two agencies
  - Estimated cost to maintain is $420,000 per month



Network Connectivity

Rate History:	
2015-2017	$175/$850/$1150
2017-2019	$175/$850/$1150
2019-2021	$175/$850/$1150
2021-2023	$175/$850/$1150
2023-2025	$185/$850/$1150

Consumer Price Index (CPI) – 16.9% increase in last three years

Includes:
- Staffing costs including projected increases
- Hardware/software, including vendor support agreements
- Circuit to the DMARC point

Benefits:
- Supported internet connectivity

- **2025-2027 WAN Connection Rates**
  - Broadband Connection $ 210/connection (was $185/connection)
  - State Agency Fiber/nonFiber $ 975/connection (was $850/connection)
  - Political Sub. Fiber/nonFiber $1380/connection (was $1150/connection)
  - State Radio Circuit $1310/connection (was $1170/connection)
  - County Courthouse $ varies per connection

End User Licenses

Rate History:	
2015-2017	$0/$0/$0
2017-2019	$0/$0/$0
2019-2021	$31.41/$0/$0
2021-2023	$36/$0/$5
2023-2025	$43.25/$24.10/$6.25

Consumer Price Index (CPI) – 16.9% increase in last three years

- Microsoft Products
- Adobe Acrobat Pro
- Agencies charged based on group membership in active directory
- Annual renewals at fixed time, fixed number of licenses
- Requires an inventory of available licenses for responsiveness
- Contract renewal for July 2026

- **2025-2027 License Rates (not all licenses represented)**
  - Microsoft 365 Premium $47.60 (Was $43.25)
  - Microsoft 365 Basic $34.85 (Was $22.40)
  - Microsoft Dynamics CM $37.90 (Was $24.10)
  - Microsoft Dynamics CS $92.75 (Was $73.52)
  - Adobe Acrobat Pro $ 6.60 (Was $6.25)

Technology Fee

Rate History:

2015-2017	$59.00
2017-2019	$64.00
2019-2021	$66.25
2021-2023	$68.25
2023-2025	$63.00 (metric change)

Consumer Price Index (CPI) – 16.9% increase in last three years

Includes:
- Staffing costs including projected increases
- Support of Microsoft M365 and Co-Pilot (infrastructure)
- Datacenter connectivity
  - Hardware/software, including vendor support agreements
- VPN and multi-factor authentication services

Benefits:
- Identity and access management across the Business Gateway
- Solution architecture efforts during application modernization

- Enterprise Architecture (Possibly general funded, would reduce by $8)

- **2025-2027 Service Rate**
  - Technology Fee $75.50/user (was $63.00)

End User Compute

Rate History:

2015-2017	$100/$130
2017-2019	$100/$130
2019-2021	$100/$130
2021-2023	$77.25/$98.50**
2023-2025	$83/$99.75

**removed MS Premium license from fee

Consumer Price Index (CPI) – 16.9% increase in last three years

Includes:
- Staffing costs including projected increases
- Support of devices, including all mobile devices
- Toolsets & licenses needed for real-time support
- 48/60 month replacement cycles

Benefits:
- Simplified end user experience for print services
- Vulnerability management for devices
- Singular experience with mobile device or desktop device

- **2025-2027 Service Rates**
  - Standard PC $92.00/user (was $83.00)
  - Standard Laptop $112.50/user (was $99.75)

Application Hosting, Servers, & Storage

Rate History:	
2015-2017	$360/$.50/$.35/$.20
2017-2019	$360/$.40/$.30/$.20
2019-2021	$335/$.22/$.18/$.10
2021-2023	$300/$.18/$.12/$.10
2023-2025	$300/$.15/$.12/$.11

Consumer Price Index (CPI) – 16.9% increase in last three years

Includes:
- Staffing costs including projected increases
- Hardware/software, including vendor support agreements
- Responsible for new builds and maintaining existing deployments

Benefits:
- Strategic road mapping for cloud computing
- Strategic road mapping of AI cloud services
- Vulnerability management for servers
- Support of the application modernization efforts

- **2025-2027 Hosting Rates**
  - Standard Server — $360/base server (was $300/base server)
  - Storage (Premium) — $.15/gb (No increase)
  - Storage (Basic) — $.12/gb (No increase)
  - Storage (File Share) — $.11/gb (No increase)

PeopleSoft ERP (ConnectND)

Rate History:	
2015-2017	$10.60/$7.27
2017-2019	$11.33/$7.58
2019-2021	$11.72/$9.11
2021-2023	$11.88/$8.66
2023-2025	$11.84/$7.59

Consumer Price Index (CPI) – 16.9% increase in last three years

Includes:
- Staffing costs including projected increases
- Hardware/software, including vendor support agreements
- Responsible for new builds and maintaining existing deployments
- Finance and HR tools in addition to PeopleSoft
- Billing metric based on authorized FTE, historically appropriated budgets also impacted this rate

Benefits:
- Support of enterprise financial and human resource system
- Lease administration software
- Oracle Guided Learning

- **2025-2027 Hosting Rates**
  - Cost per FTE (2021-2023 Approp. Book) $27.31/FTE

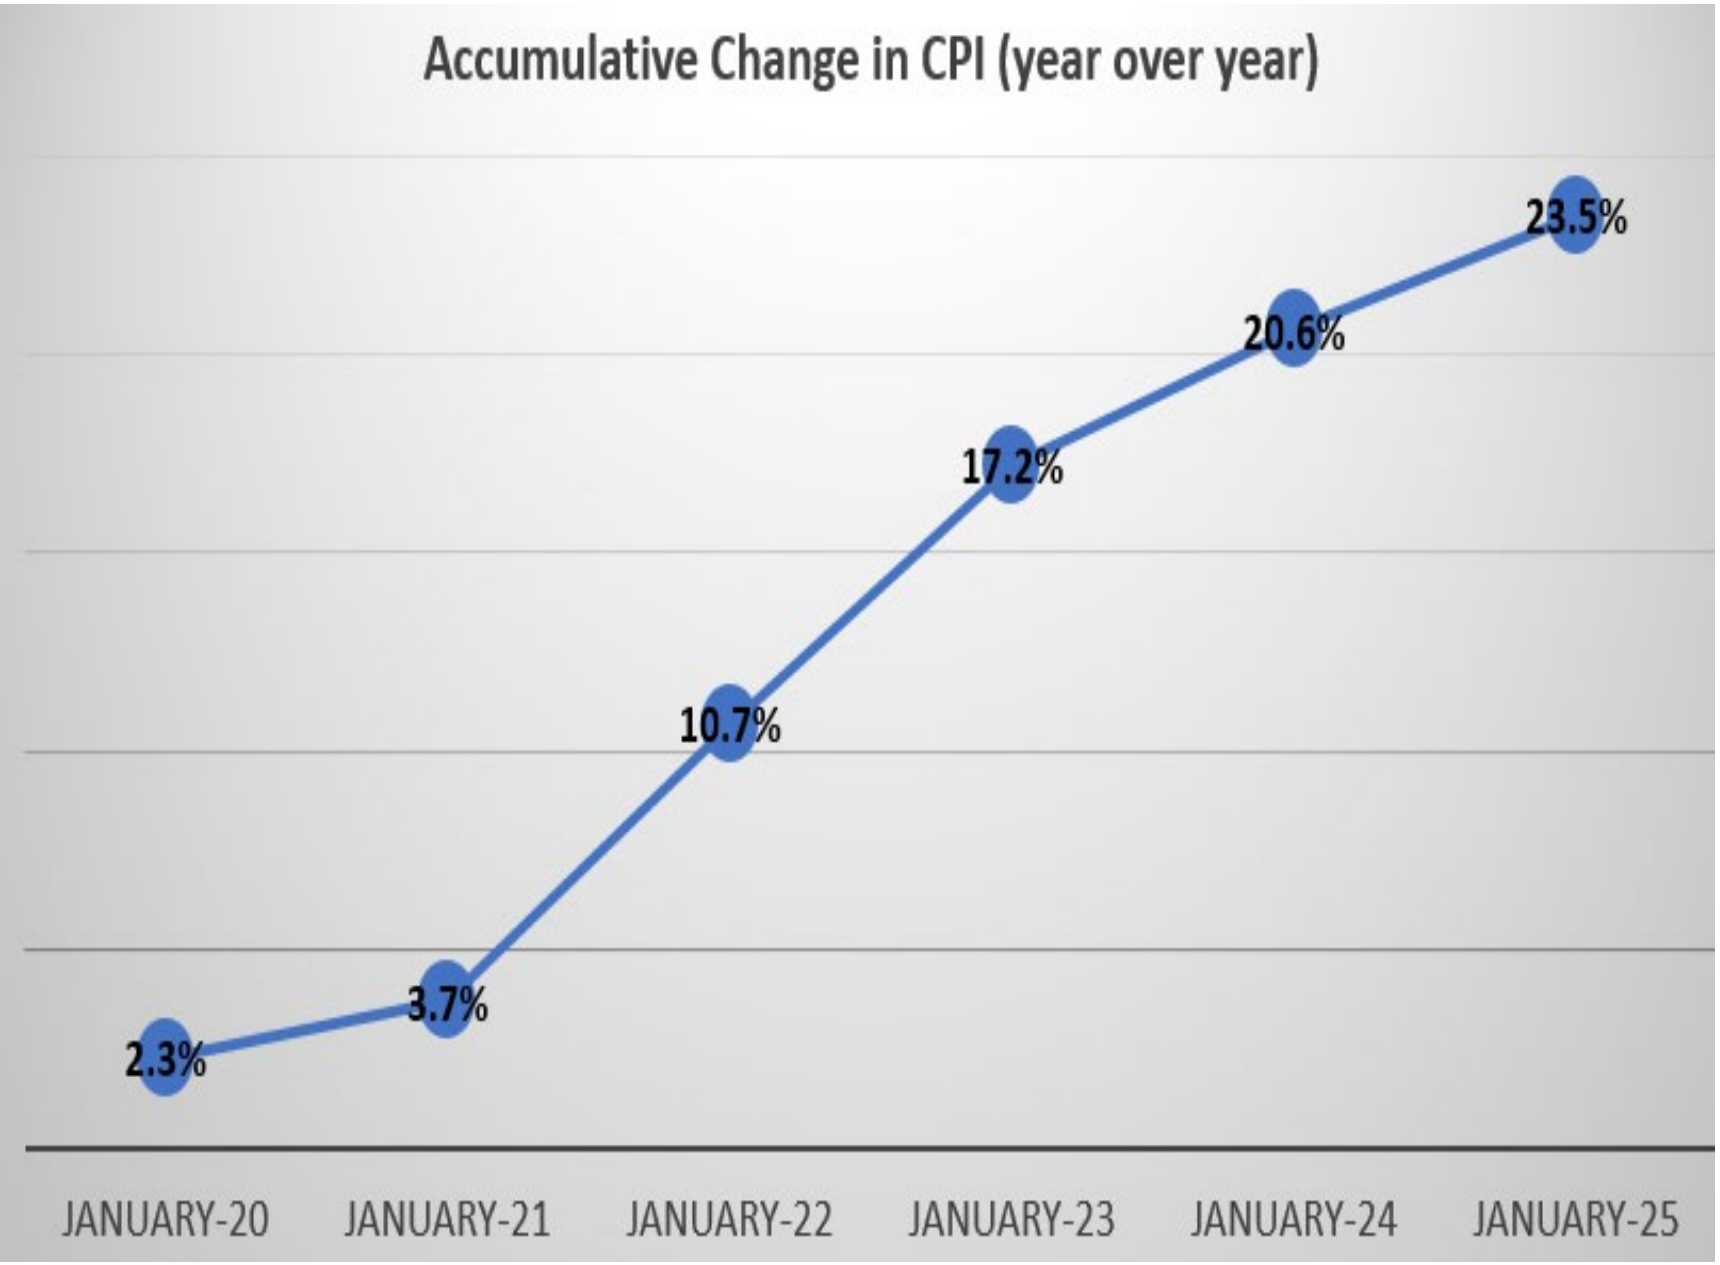
Telecommunications

Rate History:	
2015-2017	$20/$10
2017-2019	$20/$10
2019-2021	$23/$15
2021-2023	$24/$15
2023-2025	$25/$30 or $45

Consumer Price Index (CPI) – 16.9% increase in last three years

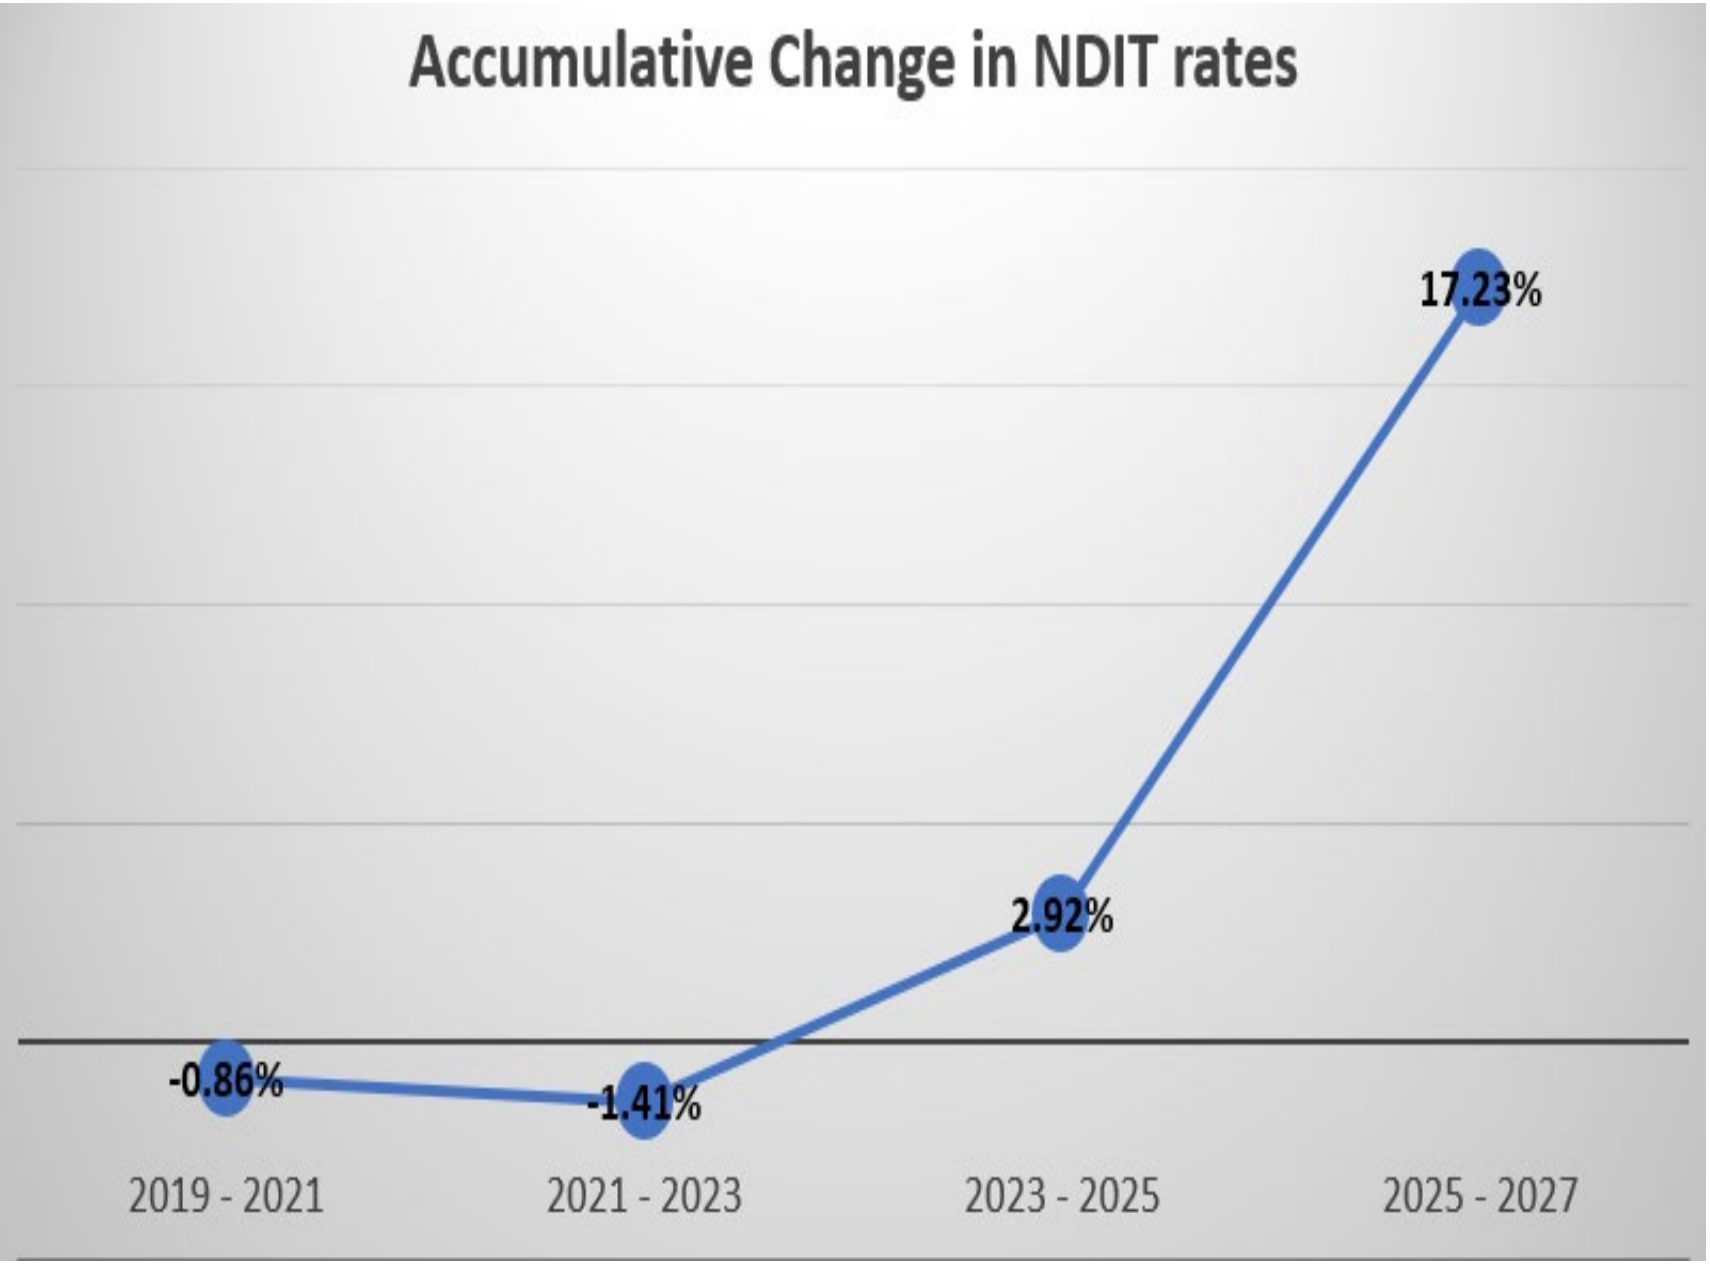
Includes:
- Staffing costs including projected increases
- Teams Voice and legacy Avaya
- Cell phone administration and charge back
- Call Center
- IVR

Benefits:
- Self-service 911 location
- Ability to integrate note taking capabilities with Co-Pilot
- Improved, consistent experience with call center
- Enabling insights for data driven decision making for call center



- **2025-2027 Hosting Rates**
  - Basic Phone $30.00/number (was $25/number)
  - Basic Phone – Legacy Avaya $37.50/number (was $25/number)
  - Call Center Agent $130/agent (was $30/agent)

Desktop Support Examples



- South Dakota
  - January 2025 User Fee
  - $125.00 User/Month

  User Fee: The user fee is assessed based on each domain account or user name used to sign on to a computer. This fee covers services provided by BIT including statewide technical support for hardware and software on workstations and networks, installation of hardware and software, operating system research and development, cloning or developing a standard workstation set-up, Parts Center services (including warranty repair), application deployment, hardware and software inventory, printer support, and file restores.

- ND Legislative Council (estimate)
  - 3 Information Tech Specialists
  - $5,275 monthly salary (assumes mid-range)
  - 141 Devices – Legislative Assembly
  - 48 Devices – Legislative Council
  - $83.73 per device for support
    - (3 * $5275) / (141 + 48)
    - Does not include benefits, operational costs, management costs
  - NDIT Support per Device - $62.00

Rates set in April of 2018, 2020, 2022 and 2024 for next biennium services

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/17/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:31 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Development Disabilities
- Medical Services
- Long Term Care

8:33 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, testified and presented cost comparison #37878.

8:43 a.m. Sarah Aker, Executive Director, Medical Services, Health and Human Services, addressed billing timelines #37878.

8:50 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, continued with testimony #37878.

8:53 a.m. Sarah Aker, Executive Director, Medical Services, Health and Human Services, suggested that a report be prepared to share the claims data for Medicaid expansion.

8:54 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, continued with testimony #37878.

8:57 a.m. Sarah Aker, Executive Director, Medical Services, Health and Human Services, addressed enrollment, cost projection, and utilization.

9:04 a.m. Eric Hass, Assistant Chief Financial Officer, Health and Human Services, continued with testimony #37878.

9:07 a.m. Sarah Aker, Executive Director, Medical Services, Health and Human Services, addressed the building program, volume and provider access.

9:14 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, continued with testimony #37878.

9:15 a.m. Sarah Aker, Executive Director, Medical Services, Health and Human Services, spoked to billed encounters for Indian Health services.

9:17 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, continued with testimony #37878.

9:19 a.m. Sarah Aker, Executive Director, Medical Services, Health and Human Services, explained that enrollment in Medicaid expansion remains flat.

9:20 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, continued with testimony #37878.

9:32 a.m. Sarah Aker, Executive Director, Medical Services, Health and Human Services, spoke to the fact the number of children being served was increased from the last biennium.

9:36 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, continued with testimony #37878.

9:39 a.m. Sarah Aker, Executive Director, Medical Services, Health and Human Services, explained where PACE operates in North Dakota.

9:40 a.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

FACT SHEET
Educational Neglect vs. Truancy

North Dakota Century Code Chapter (NDCC) 15.1-20-01, "Compulsory attendance" directs, that the caregiver(s) for a child "between the ages of seven and 16 years shall ensure that the child is in attendance at a public school for the duration of each school year". This law also says that if a person enrolls a child of age six in a public school, the caregiver shall ensure that the child attends the public school for the duration of the school year. A caregiver may withdraw a child of age six from the public school. This section of the law does not apply if the reason for the withdrawal is the child's relocation to another school district. State statute also provides that a child may receive home education unless the child has a developmental disability that meets the legal definition. There are also other allowable exemptions in NDCC section 15.1-20-02.

WHAT IS EDUCATIONAL NEGLECT?

Educational neglect involves the failure of a caregiver to ensure that a child of mandatory school age attends school or is provided appropriate home schooling.

Educational neglect focuses on the behavior of the caregiver. For a child to be considered to be a suspected victim of educational neglect, the caregiver must have been unable or unwilling to meet the child's educational needs. Suspected educational neglect should be reported to Child Protection Services.

WHAT IS TRUANCY?

North Dakota Century Code Chapter 27-20.3 discusses school absence and children missing school without an authorized excuse for more than three days.

Truancy focuses on the behavior of the child. For a child to be habitually truant, the child must intend to be absent from school. A general presumption is that a child 12 and older is truant, but this is not a hard and fast rule. Some children younger than 12 may intend to be truant from school, even though their caregiver(s) have encouraged attendance.

WHERE DO I REPORT TRUANCY FOR A CHILD IN NEED OF SERVICES?

Make a referral to the Children in Need of Services Team (a statewide human service zone team). See details on how to make a referral at hhs.nd.gov/cfs/children-need-services.

WHEN SHOULD EDUCATIONAL NEGLECT BE REPORTED TO CHILD PROTECTION SERVICES?

The policy manual of the North Dakota Department of Health and Human Services; Children and Family Services Division; 640-15-05-15-30, 'Educational Neglect' states, "Educational neglect may exist when a child aged seven to 16 is not meeting the mandated educational requirements with consent, encouragement or insistence of the caregiver. Caregivers' actions or inaction has direct impact on the child's educational growth. **The school must demonstrate attempts to resolve the issue with the caregiver.**"

Educational neglect should be reported to Child Protection Services when:

- there is reasonable suspicion that a caregiver is not complying with North Dakota's compulsory school attendance law; and

- there is information indicating the caregivers' actions or inaction has direct impact on the child's educational growth; and
- efforts to resolve the situation with the caregiver, on the part of the school, have failed.

WHAT SHOULD BE INCLUDED IN A REPORT?

The North Dakota State Form number **(SFN) 960** **"Report of Suspected Child Abuse or Neglect" should be used in reporting educational neglect** as it is for any other type of suspected child maltreatment. This form is available through your local county social service office, or an electronic version can be completed for printing at: http://www.state.nd.us/eforms/. Include all the information requested on the form. It is also helpful to attach any supporting documentation to your report, such as the child's attendance record, any written excuses or other communication from the caregiver, and any record of contacts with the caregiver the school has made in an attempt to resolve the issues in the report. A social worker will be assigned to analyze and assess the report once it is received at the county social service office. The social worker that is assigned to assess the report may contact you for additional information. You may also contact the social worker to provide additional information or to inquire about the outcome of the assessment. The goal of the assessment is to assess the safety of the child and identify any underlying causes for school non-attendance along with any risk of future child abuse or neglect, and to work with the family to resolve the concerns.

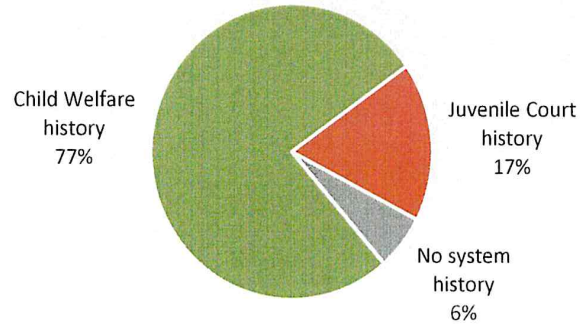
WHY IS CHILD PROTECTION INVOLVED WITH A STUDENT'S EDUCATION?

State law (NDCC 50-25.1-02), commonly known as the Child Abuse and Neglect Law, defines that "Neglected child" means a deprived child as defined in chapter 27-20. NDCC Chapter 27-20-02 defines that "Deprived child" means "a child who is without proper parental care or control, subsistence, **education** (emphasis added) as required by law.....".

North Dakota law (NDCC 50-25.1) gives Child Protection Services the responsibility for "the providing of adequate services for the protection and treatment of abused and neglected children and to protect them from further harm". It is the job of child protection services to receive reports of suspected educational neglect as well as other types of child maltreatment, and to engage in the fact-finding process of an assessment in order to make a decision whether services are required for an abused or neglected child.

WHAT SHOULD *NOT* BE REPORTED TO CPS?

CPS works with protecting children who are suspected of being abused or neglected by a caregiver. Issues of disagreement between caregivers and school systems are generally not actionable through CPS. These types of reports would fall into this category:



- Caregivers who do not attend Individual Education Plan Meetings, parent/teacher conferences or other school meetings
- Caregivers who are not helping a child with homework at home
- Caregivers who do not pay school fees in a timely manner
- Caregivers who refuse to give their child medications that are unrelated to a medical need
- Caregivers who are providing home education and are suspected of not meeting state requirements

Policy Questions?
Contact North Dakota Health and Human Services – Children and Family Section, (701) 328-2316, 711 (TTY) or hhscfs@nd.gov.

More about various topics related to School Attendance

	Define	Ages	Who gets involved?	Notes
Educational Neglect	Failure to make arrangements and/or provide for a child's education *(Source: ND CW Policy: 640-01-15-20-05-50)*	7 to 10/12	School makes referral to CPS (HSZ) CPS conducts assessment • If no safety concerns, close case • If safety concerns exist, proceed to work with family according to child welfare practice (safety plan, svc required, etc.)	Educational neglect may be confirmed when the defined criteria have been met and the criteria below is supported by evidence gathered in the assessment: • The caregiver is aware or should have been aware of the excessive absenteeism and • The caregiver contributed to the problem or failed to take steps to effectively address the problem (i.e. failure to provide a minimum degree of care), and • Educational impairment or harm to the child or danger of impairment or harm results
Truancy	Is habitually and without justification truant from school subject to compulsory school attendance and is absent from school without an authorized excuse more than three days during a school year. *(Source: NDCC 27-20.3-6(1a))*	10/12 to 16	School makes referral to CHINS (HSZ) CHINS works with family and refers to svc • Low = diversion only (refer to services) • Med = quarterly connection w/family • High = monthly connection w/family	Truancy can lead to various risks. Tardiness can escalate into full-day absences. Truancy often acts as a "gateway" behavior. This is because it can lead to students trying drugs and alcohol. It can also lead to kids engaging in other criminal acts, such as vandalism and theft. Sometimes, this misbehavior ultimately leads to dropping out of school altogether.
Chronic Absenteeism	Those who attended school for more than 10 days and who also missed 10 percent or more of their enrolled days within a school year	7 to 16	This is a subset of truancy. Consider distinction b/t "chronic truancy" and "chronic absenteeism" (which can include a wide range of absence types, excused and unexcused)	School attendance is a powerful predictor of student outcomes; irregular attendance can be a better predictor of whether students will drop out of school before graduation than test scores. Children in early grades are particularly susceptible to the impact of irregular attendance, because falling behind in fundamental reading skills can have a snowball effect that impacts future learning.

94% of all CHINS referrals have had interaction with either the child welfare or juvenile court systems at some time in their life

116,600 – # children enrolled in ND K-12

93% - Annual attendance rate (2022, 2023, and 2024) Source:Insights.nd.gov

750 – avg # of individuals reported to CPS for educational neglect (2022-24)

Aug 2022 – Feb 2025

874 – # kids referred to CHINS for truancy since Aug 2022

77% - one referral

23% - multiple referrals (avg 2.8 / child)

STATUS OFFENSES Formerly known as "unruly behavior"	**DELINQUENT ACTS** "Designated a crime under law"
WHAT (IF ANYTHING) HAS CHANGED? (pre- and post- Juvenile Justice Reform)	
• Change: Shift in responsibility. We made a systemic decision to stop criminalizing "unruly behavior" by shifting "connection to services" from Juvenile Court to Human Service Zones. • Change: Who to call. Referrals are going to a CHINS central intake staffed by Human Service Zones rather than individual calls to regional Juvenile Court offices. • No change: # staff. Cases are being processed by the HSZ CHINS team (8 staff); prior, cases were processed by designated Juvenile Court staff (8). • Change: Location of staff. Juvenile Court had one staff in each region; HSZs have 2 staff each in Bismarck and Fargo with 4 covering other areas of state. • No change: Action after referral. 85% of the CHINS-eligible cases (formerly to Juv Ct) receive low intensity diversion svc referrals; services have never been compulsory (either when handled by HSZ or by JC). • Change: Contracted services. Prior to 2017, JC had funds to contract for diversion services (which they then referred families to); there are currently no funds budgeted for juvenile justice diversion services (referrals are made to community resources).	• Change: Formalize processes to identify "alternatives to detention". • Change: Juvenile Court implemented the use of a detention screening tool to assess child for risk and placement (detention, shelter care, or home) • Change: Juvenile Court implements use of a pre-dispositional assessment to determine risk of a child to re-offend before court issues final disposition of the case by the court. Today, Court's final disposition of case always looks for alternatives to detention. *Is there an alternative to detention? Level of safety/security? What is the risk of recidivism? What is the level of supervision a child needs? Options include:* • Juvenile Detention (Juvenile Court) • Probation – formal and informal (Juvenile Court) • Custody to Division of Juvenile Svc (DJS) • Family / Kin, most often with court-ordered services (ex. Kinship navigator, IV-E prevention, HSC, private provider)
WHAT IS THE POTENTIAL CONSEQUENCE(S) FOR THE CHILD?	

• No formal consequence unless behavior becomes a delinquent act or the child is in need of protection (27-20.3-01(5))	• Suspension (in-school or out-of-school)
	• Expulsion
	• Loss of academic credit
	• Losing social connection to school / privileges related to extra-curricular
	
	• Placement outside of home (detention, shelter care)
	• Probation (informal or formal)
	• Drug testing, community service
	• Court-ordered services/classes
	• Custody to Division of Juvenile Services
	• Based on offense:
	  ○ Loss of driving privileges
	  ○ Restitution
	  ○ Drug Court
	
	• Placement outside of home (detention, shelter care)
	• Probation (informal or formal)
	• Drug testing, community service
	• Court-ordered services/classes
	• Custody to Division of Juvenile Services
	• Based on offense:
	  ○ Loss of driving privileges
	  ○ Restitution
	  ○ Drug Court
	• Suspension (in-school or out-of-school)
	• Expulsion
	• Loss of academic credit
	• Losing social connection to school / privileges related to extra-curricular

WHAT IS THE CONSEQUENCE(S) FOR THE PARENT?	
• Instability in the home • Service referrals	• Can be charged with "compulsory attendance" violation (15.1-20-03) • Family disruption (called in to school, missing work, etc) • Pay for classes • Come to appointments / miss work • Arrange for student's transportation (if lose driver's license)

WHO TO CALL IF A CHILD IS "ACTING OUT"

STATUS OFFENSES Formerly known as "unruly behavior" *An act that is illegal for a minor but not for an adult. They are not crimes but are prohibited under the law.*		**DELINQUENT ACTS** "Designated a crime under law" *An act that would be considered a crime if committed by an adult, meaning it is illegal regardless of age.*	
Home / Community Environment Child's behaviors may include: • Truant from school (youth is old enough to get self to/from school and is willfully absent) • Possession/use of tobacco & related products (age 10-13) • Disobeying parents • Running away • Curfew violations	**School Environment** Child's behaviors may include: • Truant from school (youth is old enough to get self to/from school and is willfully absent) (27-20.3-1(6)) • Possession/use of tobacco & related products (age 10-13)	**Home / Community Environment** Child's behaviors (ages 10-18) may include: • Assault of either another child or an adult (12.1-17-01) • Theft of property (12.1-23-02) • Possession/use of alcohol or drugs	**School Environment** Child's behaviors (ages 10-17) may include: • Assault (another student or school staff) (12.1-17-01) • Theft of property (12.1-23-02) • Possession/use of alcohol or drugs • Damage to Property / Vandalism (criminal mischief) (12.1.21.05) • Possession of a weapon • Disorderly Conduct (12-1-31-01) • Disruption of a public school (15.1-06-15)
CONTACT CHINS team	CONTACT CHINS team	CONTACT Local Law Enforcement	CONTACT Local Law Enforcement or make a referral directly to Juvenile Court after attempts are made under 27-20.4
WHY CONTACT?			
• Connect children and families to helpful community services where participation if voluntary and at the discretion of the family • Divert children/youth from getting involved with the juvenile justice system or from out of home placements		• Local law enforcement addresses commission of crime, including crimes committed by juveniles. • Local police/sheriff will refer cases to Juvenile Court per NDCC 27-20.4. • Juvenile Court is designed to address the unique needs of youth who have committed an unlawful act.	
WHY THIS APPROACH?			
• Most status offenses are handled through diversion programs *(Diversion = being held accountable for misbehavior by parents, schools & others in community without resorting to legal sanctions, court oversight or threat of confinement)* • Interventions focus on rehabilitation and prevention, with a goal of helping young people develop coping mechanisms and decision-making skills. • Unlike delinquent offenses, which are illegal for both adults and minors, status offenses are considered non-criminal. • While most children who commit status and other minor offenses never progress to more serious behavior, for some children, status-offending behavior can be a sign of underlying issues such as mental health needs, family conflict, or lack of positive support systems and can contribute to delinquency later in life. Most children will age out of this behavior with the proper services that can be provided in their home community		• Promote public safety, hold juvenile offenders accountable, and increase the capacity of juveniles to contribute productively to their community. • Provide right level of structure and service interventions to the child to reduce risk and prevent future delinquent activity • Prevention of costly out of home placements.	

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/20/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:31 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Block Grant
- Governor Adjustment
- Transfers/Adjustments

8:31 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, distributed and testified to proposed amendments #38164, #38165, #38253.

8:45 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, distributed and testified to department transfers/adjustments #38167, #38176.

8:51 a.m. Chairman Nelson requested proposed amendments from committee members.

9:05 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, clarified the underfunding request, and ARPA funding, #38176.

9:14 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, addressed substance use disorder voucher #38176.

9:22 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, stated they could do a budget adjustment to reflect future state.

9:22 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, clarified that her request was for future state and there is no increase for IMD medical expenses in the current budget.

9:29 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, clarified inflation for vendor increase, and reminded the committee that the worksheet had the corrected numbers.

9:38 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, clarified the corrected numbers.

9:46 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, addressed day programing.

9:51 a.m. Stephanie Gullickson, Fiscal Analyst, Office of Management and Budget, responded that a line of credit is included as an appropriation #38176.

9:54 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, discussed that a budget adjustment for the Fetal Alcohol Disorder Clinic could be included in the Public Health Budget.

9:55 a.m. Dirk Wilke, Interim Commissioner, Health and Human Services, clarified it was in the Public Health Budget prior #38176.

9:59 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, spoke to the delinking of funding of foster care, and the federal fund portion that we are required to spend for permanency.

10:02 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, clarified that the funding for providers will be displayed in separate lines.

10:02 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, clarified f-map funds for transitions and diversion services, zone employee increases and community health trust fund.

10:09 a.m. Jessica Thomasson, Executive Director, Human Services Division, Health and Human Services, spoke to Best-in-Class growth, housing assistance instability, and flexible dollars for housing #38176.

10:22 a.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

PROPOSED AMENDMENTS TO HOUSE BILL NO. 1012

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; ~~and~~ to provide a statement of legislative intent; to provide for a report; to provide for a transfer; and to provide an application.

SECTION 2. ONE-TIME FUNDING. The following amounts reflect the one-time funding items approved by the sixty-eighth legislative assembly for the 2023-25 biennium and the 2025-27 biennium one-time funding items included in the appropriation section of this Act:

One-Time Funding Description	2023-25	2025-27
Public health laboratory capital project	$55,120,000	$0
Technology projects	71,000,000	10,263,000
Human service centers and life skills and transition center projects	735,154	1,684,480
State hospital design	12,500,000	0
Service grants	585,000	0
Cross-disability advisory council	1,400,000	0
Behavioral health facility grants	1,950,000	0
Basic care payment study	600,000	0
Health care task force	750,000	0
Operating inflation	20,564,344	0
Program integrity audits	4,500,000	0
Pregnant parenting residential	1,000,000	0
Law enforcement telehealth	2,650,000	0
Retire mainframe	0	15,000,000
Child care programs	0	17,272,500
Housing programs	0	14,500,000
State lab move and equipment	0	2,962,304
Partial hospitalization day treatment	0	2,000,000
DD eligibility assessment tool for kids	0	400,000
One-time toxicology equipment	0	251,500
New State Hospital	0	300,000,000

Total all funds	$173,354,498	$364,333,784
Less estimated income	158,872,326	346,709,784
Total general fund	$14,482,172	$17,624,000

SECTION ~~2.~~3. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, 3, 4, and 5 of section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for the biennium beginning July 1, 2025, and ending June 30, 2027, as requested by the department of health and human services. The department of health and human services shall notify the legislative council of any transfer made pursuant to this section. The department of health and human services shall report to the budget section after June 30, 2026, any transfer made in excess of $50,000 and to the appropriations committees of the seventieth legislative assembly regarding any transfers made pursuant to this section.

SECTION 4. FULL-TIME EQUIVALENT POSITION BLOCK GRANT PROGRAM - REPORT. Section 1 of this Act includes funding for a full-time equivalent position block grant program. This funding, along with salaries and wages funding appropriated by the sixty-ninth legislative assembly, is available to fund full-time equivalent positions as determined by the department of health and human services. Notwithstanding any other provision of law, the department of health and human services is authorized to increase or decrease authorized full-time equivalent positions subject to the availability of funds and the provisions of this section. The department of health and human services may not increase full-time equivalent positions for the purpose of transferring human service zone employees to state employment. Pursuant to section 3 of this Act, the department of health and human services is authorized to transfer appropriation authority between line items within subdivisions 1, 2, 3, 4, and 5 of section 1 of this Act up to the underfunded amount of $ and to transfer funding to and from the salaries and wages block grant line item. The department of health and human services shall report to the office of management and budget and legislative council any adjustments to full-time equivalent positions. The department of health and human services shall provide reports to the legislative management regarding the use of funding for the program.

SECTION ~~3.~~5. OTHER FUNDS - INSURANCE TAX DISTRIBUTION FUND. The other funds line item in subdivision 5 of section 1 of this Act includes the sum of $1,125,000 from the insurance tax distribution fund for rural emergency medical services grants

SECTION ~~4.~~6. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND. The other funds line ~~item~~items in ~~subdivision 2 of~~ section 1 of this Act includes the sum of ~~$1,867,500~~ $39,529,678 from the community health trust fund ~~for the 988 crisis hotline program and subdivision 5 of section 1 of this Act includes the sum of $27,072,324 from the community health trust fund~~ for the following ~~programs~~purposes:

~~Behavioral risk factor survey~~	~~$200,000~~
~~Behavioral health loan repayment~~	~~234,500~~
~~Domestic violence offender treatment~~	~~1,000,000~~
~~Domestic violence prevention~~	~~1,000,000~~
~~Women's way~~	~~329,500~~
~~Dentist's loan repayment~~	~~360,000~~
~~Local public health state aid~~	~~3,275,000~~
~~Rural emergency medical and ambulance services grants~~	~~7,000,000~~
~~Cancer programs~~	~~580,324~~
~~Forensic examiner contract~~	~~1,000,000~~
~~Tobacco cessation grants~~	~~500,000~~
~~Youth vaping prevention grants~~	~~300,000~~
~~Tobacco prevention and control~~	~~5,043,000~~
~~Tobacco prevention and control grants to local public health units~~	~~6,250,000~~
~~Total community health trust fund~~	~~$27,072,324~~

1. The sum of $594,500 for loan repayment programs;
2. The sum of $11,599,698 for tobacco and vaping programs;
3. The sum of $909,824 for cancer and women's way programs;
4. The sum of $200,000 for behavior risk state survey;
5. The sum of $4,250,000 for domestic violence programs;
6. The sum of $3,275,000 for local public health grants;
7. The sum of $1,867,500 for 988 crisis hotline;
8. The sum of $2,866,156 for forensic examiner at UND;
9. The sum of $2,967,000 for various information technology system upgrades;

10. The sum of $7,000,000 for grants to rural ambulances;

11. The sum of $2,000,000 for law enforcement rural crisis support program; and

12. The sum of $2,000,000 for development of partial hospitalization/intensive day treatment.

SECTION ~~5.~~7. OTHER FUNDS - HUMAN SERVICE FINANCE FUND. The other funds line ~~item~~items in ~~subdivision 3 of~~ section 1 of this Act includes up to the ~~sum~~amount of ~~$226,950,000~~$238,112,030 from the human services finance fund to state-paid economic assistance and social and human services.

~~**SECTION 6. OTHER FUNDS - HEALTH CARE TRUST FUND.** The other funds line item in subdivision 4 of section 1 of this Act includes the sum of $500,000 from the health care trust fund for basic care facility bad debt expense.~~

~~**SECTION 7. OTHER FUNDS - CHARITABLE GAMING OPERATING FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $500,000 from the charitable gaming operating fund for costs of gambling disorder prevention services.~~

SECTION 8. OTHER FUNDS - OPIOID SETTLEMENT FUND. The other funds line item in ~~subdivision 2 of~~ section 1 of this Act includes the sum of $8,000,000 from the opioid settlement fund for opioid remediation and abatement efforts.

SECTION 9. OTHER FUNDS - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND. The other funds line item in section 1 of this Act includes the sum of $37,646,784 from the strategic investment and improvements fund for the following purposes:

1. The sum of $7,500,000 for retiring technology from the mainframe;
2. The sum of $2,962,304 to move into the new state lab and purchase security equipment;
3. The sum of $1,684,480 for capital projects in human service centers and life skills and transition center;
4. The sum of $14,500,000 for housing initiative programs; and
5. The sum of $1,000,000 for technology projects at the state hospital.

SECTION 10. LABORATORY BUILDING STEERING COMMITTEE. The department of health and human services shall maintain the laboratory building steering committee to oversee the design and construction of the laboratory building project for the biennium beginning July 1, 2025, and ending June 30, 2027, or until work is completed, whichever occurs earlier. The committee must include representation from the department of health and human services,

department of environmental quality, office of management and budget, the governor's office, and the legislative assembly. The legislative assembly representation must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 11. CAPITAL PAYMENTS. During the biennium beginning July 1, 2025, and ending June 30, 2027, the department of health and human services is authorized to expend funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center. Pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly. The department of health and human services may transfer funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center ahead of the special assessments schedule. Notwithstanding section 54-27-12, the department of health and human services may spend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 12. CAPITAL PROJECTS - EMERGENCY COMMISSION APPROVAL. During the biennium beginning July 1, 2025, and ending June 30, 2027, pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for capital projects and maintenance pertaining to operation of its facilities, including demolition projects. Notwithstanding section 54-27-12, the department of health and human services may spend up to $10,000,000 for capital projects and maintenance pertaining to operation of its facilities, including demolition projects, under this section and may seek emergency commission approval to spend more than $10,000,000 under this section.

SECTION 13. PERMANENT SUPPORTIVE HOUSING GRANTS. Section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of health and human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome

measures to the department of health and human services, and authorize the department of health and human services to conduct onsite visits to review program operations.

SECTION 14. EXPENDITURES MAY NOT EXCEED APPROPRIATION – MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Section 1 of this Act includes the sum of $662,099,340, of which $66,209,934 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2025, and ending June 30, 2027. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount.
2. The department of health and human services may exceed appropriations for increases in medical assistance expansion program caseload, for the addition of coverage consistent with the traditional Medicaid 1915(i) state plan, utilization rates, and reduction in federal medical assistance percentage.
3. The managed care organization under contract with the department of health and human services to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department of health and human services. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types.
4. The managed care organization and the department of health and human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs and human service centers may not be paid less than one hundred percent of the current traditional Medicaid rate. Behavioral health services involving partial hospitalization, intensive outpatient, professional services, and residential behavioral health services

provided in facilities that are not institutions for mental diseases are not subject to the provisions in subsection 6.

5. The department of health and human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

6. Except for the provisions in subsection 4, managed care organization premium payments must be built using the assumption that rates paid to providers under the medical assistance expansion program may not exceed one hundred forty-five percent of Medicare reimbursement rates paid to providers on January 1, 2025.

SECTION 15. HUMAN SERVICE CENTERS - CERTIFIED COMMUNITY BEHAVIORAL HEALTH CLINICS - FULL-TIME EQUIVALENT POSITIONS - REPORT. The department of health and human services shall continue the process of the human service centers becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults. The department of health and human services shall pursue additional federal funding as available. Subject to the availability of generated income, the department of health and human services may add full-time equivalent positions for field services to provide direct services for the period beginning with the effective date of this Act and ending June 30, 2027. The department of health and human services shall report to the office of management and budget and legislative council each time a position is added.

SECTION 16. EXEMPTION - UNEXPENDED APPROPRIATIONS. The following appropriations are not subject to the provisions of section 54-44.1-11 and may be continued into the biennium beginning July 1, 2025, and ending June 30, 2027:

1. The sum of $3,674,757 appropriated from the general fund and the sum of $25,918,566 appropriated from federal funds for the Medicaid management information system modularization technology project in chapter 12 of the 2021 Session Laws;

2. The sum of $14,411,218 appropriated from the general fund and the sum of $14,411,218 appropriated from federal funds for the child welfare technology project in chapter 12 of the 2021 Session Laws;

3. The sum of $20,366,271 appropriated from the community health trust fund and the sum of $39,534,525 appropriated from federal funds for the child support computer replacement project in chapter 44 of the 2023 Session Laws;
4. The sum of $10,989,217 appropriated from the strategic investment and improvement fund for the procurement and grants management system in chapter 44 of the 2023 Session Laws;
5. The sum of $4,150,000 appropriated from the general fund for defraying the expenses of additional human service centers to begin the process of becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults in chapter 44 of the 2023 Session Laws;
6. The sum of $18,941,847 appropriated to the department of health and human services in chapter 549 of the 2021 Special Session Session Laws;
7. The sum of $55,120,000 appropriated from the federal state fiscal recovery fund for a public health laboratory capital project in chapter 4 of the 2023 Session Laws;
8. The sum of $5,000,000 appropriated from the general fund for the purpose of employer-led child care cost-share program in chapter 446 of the 2023 Session Laws;
9. The sum of $986,555 appropriated from the general fund for the purpose of streamlining background checks project in chapter 446 of the 2023 Session Laws;
10. The sum of $2,223,981 appropriated from the federal state fiscal recovery fund for the implementation of a virtual behavioral health crisis care program for rural law enforcement in chapter 44 of the 2023 Session Laws; and
11. The sum of $500,000 appropriated from the general fund and the sum of $500,000 appropriated from federal funds for the purpose of program integrity audits in chapter 44 of the 2023 Session Laws.

SECTION 17. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services seeks a deficiency appropriation from the seventieth legislative assembly for any expenditures that exceed appropriated amounts as a result of underfunding, utilization rates, value-based purchasing for nursing facilities, reduction in federal medical assistance percentage, and

unexpected contract cost increases that exceed ten percent, during the biennium beginning July 1, 2025, and ending June 30, 2027, if funding is not sufficient to pay actual expenses.

SECTION 18. LEGISLATIVE INTENT - PROVIDER RATE INCREASE. Except as otherwise noted, section 1 of this Act includes funding for human service provider inflation increases of one and one half percent for each year of the biennium beginning July 1, 2025, and ending June 30, 2027. The provider inflation increase in this section does not apply to nursing facilities.

SECTION 19. FEDERAL FUNDING APPEAL LIMITATION. Except as otherwise specifically provided by federal law, a person may not appeal a denial, revocation, reduction in services or payment, or the termination of a program or service by the department of health and human services due to the unavailability of federal coronavirus funding received under federal law resulting from the federal coronavirus pandemic emergency declaration for the biennium beginning July 1, 2025, and ending June 30, 2027.

PROPOSED AMENDMENT FOR HOUSE BILL NO. 1012

SECTION 5. HUMAN SERVICE CENTERS, NORTH DAKOTA STATE HOSPITAL, AND LIFE SKILLS AND TRANSITION CENTER FUNDING. Section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly includes funding for the human service centers, North Dakota state hospital, and life skills and transition center as follows:

1.	Behavioral health clinics:		
	a.	Salaries and wages:	$167,581,103
	b.	Operating and capital:	$ 64,763,965
	c.	Total:	$232,345,068
2.	State hospital:		
	a.	Salaries and wages:	$ 73,941,551
	b.	Operating and capital:	$320,880,155
	c.	Total:	$394,821,706
3.	Life skills and transition center:		
	a.	Salaries and wages:	$ 57,799,213
	b.	Operating and capital:	$ 15,207,658
	c.	Total:	$ 73,006,871

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
2/21/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:00 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Behavioral Health
- Public Health
- Proposed Amendments

8:04 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, discussed merging the three behavioral health vendor contracts previous testimony #38176.

8:06 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, responded to questions from the committee #38176.

8:07 a.m. Jessica Thomasson, Executive Director, Human Services Division, Health and Human Services, addressed adjusted targeted rate increases for providers previous testimony #38176.

8:12 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, moved the f-map percentage line over to Human Services.

8:22 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, spoke to the Community Health Trust Fund.

8:22 a.m. Dirk Wilke, Interim Commissioner, Health and Human Services, stated that a search firm has been enlisted for a State Forensic Pathologist previous testimony# 38176.

8:28 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, commented on one time funding for three projects and a revenue fund.

8:32 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, suggested we move the Fetal Alcohol Spectrum Disorder Clinic to a single line item.

8:32 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, suggested a vendor contract for the Fetal Alcohol Spectrum Disorder Clinic.

8:35 a.m. Dirk Wilke, Interim Commissioner, Health and Human Services, told the committee that the Fetal Alcohol Spectrum Disorder Clinic was previously funded through the Community Health Trust Fund.

8:47 a.m. Keith Mantz, Fiscal Analyst, ND Legislative Council, inquired about removing accreditation requirements for payment.

8:55 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, asked for clarification on roll over funding.

8:55 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, clarified appropriate language to satisfy the block grant previous testimony #38165, #38164.

9:08 a.m. Jessica Thomasson, Executive Director, Human Services Division, Health and Human Services offered a possible cost reduction by placing a moratorium on intermediate care facilities.

9:12 a.m. Krista Fremming, Assistant Director, Medical Services Division, Health and Human Services, spoke on proposed amendment tied to continued stays at facilities and soft limits with flexibility.

9:35 a.m. Pam Sagness, Executive Director, Behavioral Health Division, Health and Human Services, reassured the committee the language was sufficient for the independent medical providers.

9:43 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, distributed a worksheet #38316.

Additional written testimony: Keith Mantz, Legislative Council, submitted neutral testimony #38294 and #38296.

Representative Emily O'Brien submitted testimony #38298 in favor.

9:49 a.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

PROPOSED AMENDMENTS TO HOUSE BILL NO. 1012 (Nelson IMD)

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; ~~and~~to amend and reenact section 50-06-42 of the North Dakota Century Code, relating to substance use disorder treatment voucher system; to provide for a report; and to provide an effective date.

= 500,000

SECTION 9. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services and medical costs provided by licensed substance abuse treatment programs, excluding regional human service centers and hospital- or medical clinic-based programs for medical management of withdrawal. An out-of-state licensed substance abuse treatment program located within a bordering state may participate in the voucher program to serve an underserved area of this state pursuant to the rules adopted by the department. The department shall develop rules to include processes and requirements for an out-of-state provider to receive reimbursement only for outpatient and community-based services upon a provider completing an assessment of need and receiving approval from the department.
2. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures.

3. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

4. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. ~~No~~Except as provided in subdivision c, no more than forty-five percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

   c. The department may reimburse a licensed substance abuse treatment program with more than sixteen beds the incurred direct medical costs of an eligible individual who does not have resources to cover the medical costs. The department may develop rules and may not exceed the total amount appropriated for medical cost reimbursement.

SECTION 10. EFFECTIVE DATE. Section 9 of this Act becomes effective on July 1, 2026.

Nelson, Jon O.

Subject: DHHS amendments

Here you go--study language and Medicaid coverage. Not sure what your thoughts are on trying to get Medicaid coverage. There wasn't any opposition to that bill.

Legislative Management ~~shall~~ may study the health implications of chronic weight management, the impact of obesity on the state, and access to prevention and treatment for the disease of obesity. The study shall include: 1) The cost associated with the disease of obesity; (2) The various health treatments available to reduce the epidemic in this state caused by the disease; and (3) How to promote the use of the data to influence decision making to better understand the cost savings for prevention of chronic weight management.

SECTION 1. A new section to chapter 50-24.1 of the North Dakota Century Code is created and enacted as follows:

Medical assistance benefits - Prescription drug coverage - Antiobesity medication

1. Medical assistance coverage, including Medicaid expansion coverage, must include comprehensive coverage for the treatment of obesity, which includes coverage for intensive behavioral therapy, bariatric surgery, and antiobesity medication approved by the United States food and drug administration for an enrollee with a body mass index of equal to or greater than thirty-five kilograms per square meter. The coverage must include maintenance doses of the antiobesity medication regardless of the enrollee's body mass index.
2. The coverage provided under this section may not be different or separate from coverage provided for any other illness, condition, or disorder for purposes of determining deductibles, lifetime dollar limits, a benefit year maximum for deductibles, and copayment and coinsurance factors.
3. This section may not be construed to preclude the undertaking of utilization management to determine the medical necessity for treatment of obesity, provided all appropriate medical necessity determinations are made in the same manner as those determinations are made for the treatment of any other illness, condition, or disorder covered by medical assistance benefits.

of North Dakota

PROPOSED AMENDMENTS TO

HOUSE BILL NO. 1012

Introduced by

Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to amend and reenact section 50-06-06.6 of the North Dakota Century Code, relating to leasing of real and personal property by the department of health and human services; to provide an exemption; and to provide for a report.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from other funds derived from special funds and federal funds, to the department of health and human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2025, and ending June 30, 2027, as follows:

Subdivision 1.

SECTION 2. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, 3, 4, and 5 of section 1 of this Act for the biennium beginning July 1, 2025, and ending June 30, 2027, as requested by the department of health and human services. The department of health and human services shall notify the legislative council of any transfer made pursuant to this section. The department shall report to the budget section after June 30, 2026, any transfer made in excess of $50,000 and to the appropriations committees of the seventieth legislative assembly regarding any transfers made pursuant to this section.

SECTION 3. OTHER FUNDS - INSURANCE TAX DISTRIBUTION FUND. The other funds line item in subdivision 5 of section 1 of this Act includes the sum of $1,125,000 from the insurance tax distribution fund for rural emergency medical services grants.

SECTION 4. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND. The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $1,867,500 from the community health trust fund for the 988 crisis hotline program and subdivision 5 of section 1 of this Act includes the sum of $27,072,324 from the community health trust fund for the following programs:

Behavioral risk factor survey	$200,000
Behavioral health loan repayment	234,500
Domestic violence offender treatment	1,000,000
Domestic violence prevention	1,000,000
Women's way	329,500
Dentist's loan repayment	360,000
Local public health state aid	3,275,000
Rural emergency medical and ambulance services grants	7,000,000
Cancer programs	580,324
Forensic examiner contract	1,000,000
Tobacco cessation grants	500,000
Youth vaping prevention grants	300,000
Tobacco prevention and control	5,043,000

Tobacco prevention and control grants to local public health units 6,250,000

Total community health trust fund $27,072,324

SECTION 5. OTHER FUNDS - HUMAN SERVICE FINANCE FUND. The other funds line item in subdivision 3 of section 1 of this Act includes the sum of $226,950,000 from the human service finance fund for state-paid economic assistance and social and human services.

SECTION 6. OTHER FUNDS - HEALTH CARE TRUST FUND. The other funds line item in subdivision 4 of section 1 of this Act includes the sum of $500,000 from the health care trust fund for basic care facility bad debt expense.

SECTION 7. OTHER FUNDS - CHARITABLE GAMING OPERATING FUND. The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $500,000 from the charitable gaming operating fund for costs of gambling disorder prevention services.

SECTION 8. OTHER FUNDS - OPIOID SETTLEMENT FUND. The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $8,000,000 from the opioid settlement fund for opioid remediation and abatement efforts.

SECTION 9. AMENDMENT. Section 50-06-06.6 of the North Dakota Century Code is amended and reenacted as follows:

50-06-06.6. Department may lease real and personal property.

The commissioner of the department or commissioner's designee may lease ~~surplus farm and pastureland at the state hospital and the life skills and transition center. The commissioner or designee also may enter into further leases of~~ real or personal property at the life skills and transition center or the state hospital upon a specific finding that the granting of each such leasehold interest will result in a net economic gain for the department, taking into account all identifiable costs. Any lease of space for the purpose of providing child care services must meet requirements as determined by the department. The commissioner of the department or commissioner's designee may prescribe the terms and conditions of any leases entered into pursuant to this section and may renew existing leases. ~~Any~~The term of any lease ~~entered into must be subject to renewal or cancelable each biennium~~may not exceed ninety-nine years.

Jan Kamphuis, Committee Clerk

Prepared by the Legislative Council staff for House Appropriations - Human Resources Division Committee
February 21, 2025

Sixty-ninth
Legislative Assembly
of North Dakota

PROPOSED AMENDMENTS TO

HOUSE BILL NO. 1012

Introduced by

Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to amend and reenact sections 50-06-06.6, 50-06-42, 50-24.5-02.3, and 50-33-05 of the North Dakota Century Code, relating to leases of department of health and human services property, substance use disorder treatment program, basic care payment rates, and state of residence for child care assistance; to provide for a transfer; to authorize a line of credit; to provide legislative intent; to provide for a legislative management study; to provide an application; to provide an exemption; ~~and~~ to provide for a report; and to provide an effective date.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from other funds derived from special funds and federal funds, to the department of health and human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2025, and ending June 30, 2027, as follows:

SECTION 3. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, 3, 4, ~~and~~ 5, and 6 of section 1 of this Act and any other appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly, for the biennium beginning July 1, 2025, and ending June 30, 2027, as requested by the department of health and human

services. The department of health and human services shall notify the legislative council of any transfer made pursuant to this section. The department of health and human services shall report to the budget section after June 30, 2026, any transfer made in excess of $50,000 and to the appropriations committees of the seventieth legislative assembly regarding any transfers made pursuant to this section.

SECTION 4. FULL-TIME EQUIVALENT POSITION BLOCK GRANT PROGRAM - REPORT. Section 1 of this Act includes funding for a full-time equivalent position block grant program. This funding as approved by the sixty-ninth legislative assembly is available for defraying the expense of full-time equivalent positions as determined by the department of health and human services. Notwithstanding any other provision of law, the department is authorized to increase or decrease authorized full-time equivalent positions subject to the availability of funds and the provisions of this section. The department of health and human services many not increase full-time equivalent positions for the purpose of transferring human service zone employees to state employment. Pursuant to section 3 of this Act, the department is authorized to transfer appropriation authority up to the underfunded amount of $20,730,788 to the salaries and wages block grant line item. The department of health and human services shall report to the office of management and budget and legislative council any adjustments to full-time equivalent positions.

SECTION 5. DEPARTMENT OF HEALTH AND HUMAN SERVICES - SALARIES AND WAGES BLOCK GRANT - VACANT POSITIONS - REPORT. The department of health and human services shall report to the budget section quarterly during the 2025-26 interim regarding the status of its salaries and wages block grant and vacant positions and employee turnover. The report must include:

1. The legislative appropriation for salaries and wages allocated by the department to major department programs by funding source and the number of FTE positions the department is allocating to each major program based on the legislative appropriation;
2. Any changes to salaries and wages funding or FTE positions allocated to major department programs;
3. Any new FTE positions added, the cost of the position for the remainder of the biennium, and the cost to continue funding the position in the subsequent biennium by funding source;

4. Any FTE positions removed and related funding;
5. The number of FTE positions that become vacant and the number filled each month;
6. The number of vacant FTE positions at the end of each month;
7. Salaries and wages savings resulting from vacant positions and employee turnover each month by funding source; and
8. The use of salaries and wages savings for other purposes for each month by funding source.

SECTION 6. BEHAVIORAL HEALTH FACILITY GRANT - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND - APPLICATION.

1. Section 1 of this Act includes the sum of $12,960,000 from the strategic investment and improvements fund for a behavioral health facility grant pursuant to this section.
2. A grant of $12,960,000 must be provided to establish a behavioral health facility in the northeast human service region. The grant recipient must provide matching funds of $3,240,000 to establish the facility.
3. The department shall require an entity receiving funding under this section to operate the facility for at least ten years and require the grant amount to be repaid if the entity does not operate the facility for at least ten years.
4. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 7. COMMUNITY CULTURAL CENTER GRANT - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND - APPLICATION. Section 1 of this Act includes the sum of $1,000,000 from the strategic investment and improvements fund for the purpose of providing a one-time community cultural center grant in the west central human service region. An entity may apply for a grant under this section if the entity certifies to the department it has raised adequate funds to complete a project, the project will be completed within two years of receiving the grant funds, and the grants funds will be used only for costs of constructing a community cultural center. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 8. OTHER FUNDS - INSURANCE TAX DISTRIBUTION FUND. The other funds line item in subdivision 5 of section 1 of this Act includes the sum of $1,125,000 from the insurance tax distribution fund for rural emergency medical services grants.

SECTION 9. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND. The other funds line items in section 1 of this Act includes the sum of $39,529,678 from the community health trust fund for the following purposes:

Loan repayment programs	$594,500
Tobacco and vaping programs	11,599,698
Cancer and women's way programs	909,824
Behavior risk state survey	200,000
Domestic violence programs	4,250,000
Local public health grants	3,275,000
988 crisis hotline	1,867,500
Forensic examiner at the university of North Dakota	2,866,156
Various information technology system upgrades	2,967,000
Grants to rural ambulances	7,000,000
Law enforcement rural crisis support program	2,000,000
Development of partial hospitalization/intensive day treatment	2,000,000
Total	$39,529,678

~~**SECTION 7. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $1,867,500 from the community health trust fund for the 988 crisis hotline program and subdivision 5 of section 1 of this Act includes the sum of $27,072,324 from the community health trust fund for the following programs:~~

~~Behavioral risk factor survey $200,000~~
~~Behavioral health loan repayment 234,500~~
~~Domestic violence offender treatment 1,000,000~~
~~Domestic violence prevention 1,000,000~~
~~Women's way 329,500~~
~~Dentist's loan repayment 360,000~~
~~Local public health state aid 3,275,000~~
~~Rural emergency medical and ambulance services grants 7,000,000~~
~~Cancer programs 580,324~~
~~Forensic examiner contract 1,000,000~~

~~Tobacco cessation grants 500,000~~

~~Youth vaping prevention grants 300,000~~

~~Tobacco prevention and control 5,043,000~~

~~Tobacco prevention and control grants to local public health units~~ 6,250,000

~~Total community health trust fund $27,072,324~~

SECTION 10. OTHER FUNDS - HUMAN SERVICE FINANCE FUND. The other funds line ~~item~~items in ~~subdivision 3 of~~ section 1 of this Act includes the sum of ~~$226,950,000~~$239,112,030 from the human service finance fund for state-paid economic assistance and social and human services.

~~**SECTION 9. OTHER FUNDS - HEALTH CARE TRUST FUND.** The other funds line item in subdivision 4 of section 1 of this Act includes the sum of $500,000 from the health care trust fund for basic care facility bad debt expense.~~

~~**SECTION 10. OTHER FUNDS - CHARITABLE GAMING OPERATING FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $500,000 from the charitable gaming operating fund for costs of gambling disorder prevention services.~~

SECTION 11. OTHER FUNDS - OPIOID SETTLEMENT FUND. The other funds line item in ~~subdivision 2 of~~ section 1 of this Act includes the sum of $8,000,000 from the opioid settlement fund for opioid remediation and abatement efforts.

SECTION 12. OTHER FUNDS - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND The other funds line items in section 1 of this Act includes the sum of $241,606,784 from the strategic investment and improvements fund for the following purposes:

Retiring technology from the mainframe	$7,500,000
Move into the new state laboratory and purchase security equipment	2,962,304
Capital projects in human service centers and life skills and transition center	1,684,480
Housing initiative programs	14,500,000
Technology projects at the state hospital	1,000,000
New state hospital	200,000,000
Behavioral health facility grant	12,960,000
Community cultural center grant	1,000,000
Total	$241,606,784

SECTION 13. OTHER FUNDS - BANK OF NORTH DAKOTA LINE OF CREDIT - STATE HOSPITAL PROJECT. The other funds line item in subdivision 2 of section 1 of this Act includes $130,000,000 from a Bank of North Dakota line of credit. The department of health and human services may borrow up to $130,000,000 through a line of credit from the Bank of North Dakota during the biennium beginning July 1, 2025 and ending on June 30, 2027 for costs associated with the construction of a new state hospital. The interest rate on the line of credit may not exceed the prevailing interest rate charged to North Dakota government entities. If the department accesses the line of credit, it shall request a deficiency appropriation from the seventieth legislative assembly to repay the line of credit.

SECTION 14. LABORATORY BUILDING STEERING COMMITTEE. The department of health and human services shall maintain the laboratory building steering committee to oversee the design and construction of the laboratory building project, for the biennium beginning July 1, 2025, and ending on June 30, 2027, or until work is completed, whichever occurs earlier. The committee must include representation from the department of health and human services, department of environmental quality, office of management and budget, the governor's office, and the legislative assembly. The legislative assembly representation must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 15. NEW STATE HOSPITAL - STEERING COMMITTEE. The department of health and human services shall establish a new state hospital facility steering committee to oversee the design and construction of a new state hospital facility, for the biennium beginning July 1, 2025, and ending June 30, 2027. The committee must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 16. CAPITAL PAYMENTS. During the biennium beginning July 1, 2025, and ending June 30, 2027, the department of health and human services is authorized to expend funds for the payment of special assessments at the state hospital, southeast human service center and life skills and transition center. Pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within

section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly. The department of health and human services may transfer funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center ahead of the special needs assessments schedule. Notwithstanding section 54-27-12, the department of health and human services may spend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 17. CAPITAL PROJECTS - EMERGENCY COMMISSION AND BUDGET SECTION APPROVAL. During the biennium beginning July 1, 2025, and ending on June 30, 2027 pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for capital projects and maintenance pertaining to operation of its facilities, including demolition projects. Notwithstanding section 54-27-12, the department of health and human services may spend up to $10,000,000 for capital projects and maintenance pertaining to operation of its facilities, including demolition projects, under this section and may seek emergency commission and budget section approval to spend more than $10,000,000 under this section.

SECTION 18. PERMANENT SUPPORTIVE HOUSING GRANTS. Section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of health and human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department of health and human services, and authorize the department of health and human services to conduct onsite visits to review program operations.

SECTION 19. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Section 1 of this Act includes the sum of $662,099,340, of which $66,209,934 is from the general fund, for the medical assistance expansion program, for the biennium beginning July 1, 2025, and ending June 30, 2027. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount.

2. The department of health and human services may exceed appropriations for increases in medical assistance expansion program caseload, for the addition of coverage consistent with the traditional Medicaid 1915(i) state plan, utilization rates, and reduction in federal medical assistance percentage.
3. The managed care organization under contract with the department of health and human services to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department of health and human services. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types.
4. The managed care organization and the department of health and human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers,and rural health clinics meet the federally required minimum levels of reimbursement. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs and human service centers may not be paid less than one hundred percent of the current traditional Medicaid rate. Behavioral health services involving partial hospitalization, intensive outpatient, professional services, and residential behavioral health services provided in facilities that are not institutions for mental diseases are not subject to the provisions in subsection 6.
5. The department of health and human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance or adequate capacity and services, and coordination and continuity of care.
6. Except for the provisions in subsection 4, managed care organization premium payments must be built using the assumption that rates paid to providers under the

medical assistance expansion program may not exceed one hundred forty-five percent of Medicare reimbursement rates paid to providers on January 1, 2025.

SECTION 20. HUMAN SERVICE CENTERS - CERTIFIED COMMUNITY BEHAVIORAL HEALTH CLINICS - FULL-TIME EQUIVALENT POSITIONS - REPORT. The department of health and human services shall continue the process of the human service centers becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults. The department of health and human services shall pursue additional federal funding as available. Subject to the availability of generated income, the department of health and human services may add full-time equivalent positions for the clinics to provide direct services for the period beginning with the effective date of this Act and ending June 30, 2027. The department of health and human services shall report to the office of management and budget and legislative council each time a position is added.

SECTION 21. INTERMEDIATE CARE FACILITY MORATORIUM - DEVELOPMENTAL DISABILITY RATE REVIEW AND REBASE.

1. The department of health and human services may not add any new licensed intermediate care facility for individuals with intellectual disabilities beds to the state's licensed bed capacity between July 1, 2025, and ending June 30, 2027.
2. The department of health and human services shall complete a rate review and review the utilization limits, amount, duration, coverage, and scope of all developmental disability services and may implement the appropriate adjustments based on the rate review.

SECTION 22. EXEMPTION - UNEXPENDED APPROPRIATIONS. The following appropriations are not subject to the provisions of section 54-44.1-11 and any unexpended appropriation authority may be continued into the biennium beginning July 1, 2025, and ending June 30, 2027:

1. The sum of $3,674,757 appropriated from the general fund and the sum of $25,918,566 appropriated from federal funds for the Medicaid management information system modularization technology project in chapter 12 of the 2021 Session Laws;

2. The sum of $14,411,218 appropriated from the general fund and the sum of $14,411,218 appropriated from federal funds for the child welfare technology project in chapter 12 of the 2021 Session Laws;
3. The sum of $20,366,271 appropriated from the community health trust fund and the sum of $39,534,525 appropriated from federal funds for the child support computer replacement project in chapter 44 of the 2023 Session Laws;
4. The sum of $10,989,217 appropriated from the strategic investment and improvements fund for the procurement and grants management system in chapter 44 of the 2023 Session Laws;
5. The sum of $4,150,000 appropriated from the general fund for defraying the expenses of additional human service centers to begin the process of becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults in chapter 44 of the 2023 Session Laws;
6. The sum of $18,941,847 appropriated to the department of health and human services in chapter 549 of the 2021 Special Session Laws;
7. The sum of $55,120,000 appropriated from the federal state fiscal recovery fund for a public health laboratory capital project in chapter 4 of the 2023 Session Laws;
8. The sum of $5,000,000 appropriated from the general fund for the purpose of employer-led child care cost-share program in chapter 446 of the 2023 Session Laws;
9. The sum of $986,555 appropriated from the general fund for the purpose of streamlining background checks project in chapter 446 of the 2023 Session Laws;
10. The sum of $2,223,981 appropriated from the federal state fiscal recovery fund for the implementation of a virtual behavioral health crisis care program for rural law enforcement in chapter 44 of the 2023 Session Laws; and
11. The sum of $500,000 appropriated from the general fund and the sum of $500,000 appropriated from federal funds for the purpose of program integrity audits in chapter 44 of the 2023 Session Laws.

SECTION 23. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services seek a deficiency appropriation from the seventieth legislative assembly for any expenditures that exceed appropriated amounts as a result of underfunding, utilization rates, value-based

purchasing for nursing facilities, reduction in federal medical assistance percentage, and unexpected contract cost increases that exceed ten percent, during the biennium beginning July 1, 2025, and ending June 30, 2027, if funding is not sufficient to pay actual expenses.

SECTION 24. LEGISLATIVE INTENT - PROVIDER RATE INCREASE. Except as otherwise noted, section 1 of this Act includes funding for human service provider inflation increases of one and one half percent for each year of the biennium beginning July 1, 2025 and ending June 30, 2027. The provider inflation increase in this section does not apply to nursing facilities.

SECTION 25. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITIES PROVIDER ACCREDITATION REQUIREMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services eliminate its administrative rule requirement that providers of developmental disabilities services be accredited as a condition of being eligible for receiving payments for services from the department of health and human services.

SECTION 26. LEGISLATIVE INTENT - MEDICAL ASSISTANCE. It is the intent of the sixty-ninth legislative assembly that the department of health and human services review the amount, duration, coverage, utilization rates, medical necessity, and scope of medical assistance services, and may implement any adjustments the department determines appropriate.

SECTION 27. FEDERAL FUNDING APPEAL LIMITATION. Except as otherwise specifically provided by federal law, a person may not appeal a denial, revocation, reduction in services or payment, or the termination of a program or service by the department of health and human services dues to the unavailability of federal coronavirus funding received under federal law resulting from the federal coronavirus pandemic emergency declarations, for the biennium beginning July 1, 2025, and ending June 30, 2027.

SECTION 28. DEPARTMENT OF HEALTH AND HUMAN SERVICES - LONG-TERM STRUCTURED RESIDENCES PLAN - REPORT. During the 2025-26 interim, the department of health and human services shall review options and develop a plan to establish long-term structured residences. The department shall review necessary changes to statutes, rules, policies, and the estimated fiscal impact of establishing the residences. A long-term structured residence must be a highly structured therapeutic residential mental health treatment facility that is staffed continuously and designed to treat adults under chapters 25-03.01 and 25-04.01

who have severe and persistent mental illness and who have reached the maximum benefit from the mental health resources available elsewhere in the community or hospital. The department shall present a report to the legislative management by October 1, 2026, regarding its plan to establish long-term structured residences.

SECTION 29. AMENDMENT. Section 50-06-06.6 of the North Dakota Century Code is amended and reenacted as follows:

50-06-06.6. Department may lease real and personal property.

The commissioner of the department or commissioner's designee may lease ~~surplus farm and pastureland at the state hospital and the life skills and transition center. The commissioner or designee also may enter into further leases of~~ real or personal property at the life skills and transition center or the state hospital upon a specific finding that the granting of each such leasehold interest will result in a net economic gain for the department, taking into account all identifiable costs. Any lease of space for the purpose of providing child care services must meet requirements as determined by the department. The commissioner of the department or commissioner's designee may prescribe the terms and conditions of any leases entered into pursuant to this section and may renew existing leases. ~~Any~~The term of any lease ~~entered into must be subject to renewal or cancelable each biennium~~may not exceed ninety-nine years.

SECTION 30. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services and medical costs provided by licensed substance abuse treatment programs, excluding regional human service centers and hospital- or medical clinic-based programs for medical management of withdrawal. An out-of-state licensed substance abuse treatment program located within a bordering state may participate in the voucher program to serve an underserved area of this state pursuant to the rules adopted by the department. The department shall develop rules to include processes and requirements for an out-of-state provider to receive reimbursement only for

outpatient and community-based services upon a provider completing an assessment of need and receiving approval from the department.

2. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures.

3. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

4. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   a. ~~No~~Except as provided in subdivision c, no more than ~~forty-five~~fifty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

   b. The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

   c. The department may reimburse a licensed substance abuse treatment program with more than sixteen beds the incurred direct medical costs of an eligible individual who does not have resources to cover the medical costs. The department may develop rules and may not exceed the total amount appropriated for medical cost reimbursement.

SECTION 31. AMENDMENT. Section 50-24.5-02.3 of the North Dakota Century Code is amended and reenacted as follows:

50-24.5-02.3. Basic care payment rates.

1. The department shall determine limits for the care of residents of basic care facilities that qualify as vendors of an aged, blind, and disabled persons program and for

implementing provisions of this chapter based on data demonstrating the most recent costs that must be incurred for the care of residents in efficiently and economically operated basic care facilities. The department shall determine the limits every four years by July first, beginning with July 1, 2023.

2. The department shall establish the limits by using the median rates from the most recent data available. The direct care limit must be the median plus eighteen percent. The indirect care limit must be the median plus twelve percent.
3. For the rate year beginning July 1, 2023, the department shall increase rates and limits three and one-half percent for inflation. For the rate year beginning July 1, 2024, the department shall increase rates and limits three and one-half percent for inflation.
4. The department shall provide a rate increase in the amount of five dollars per day for the period beginning July 1, 2023, and ending June 30, ~~2025~~2027, after which the increase is not effective. This rate increase may not be included in any calculation of inflation increase.
5. Within the limits of legislative appropriations, the department shall establish an uncompensated care expense of three hundred sixty-five days.

SECTION 32. AMENDMENT. Section 50-33-05 of the North Dakota Century Code is amended and reenacted as follows:

50-33-05. State of residence.

Only child care assistance units physically residing within the boundaries of the state are eligible for child care assistance; unless the individual is employed by an early childhood program within the boundaries of the state and the individual has been approved for the state's child care assistance child care workforce benefit.

SECTION 33. HOUSING AVAILABILITY ASSESSMENT - COLLABORATION WITH HOUSING FINANCE AGENCY. The department of health and human services shall collaborate with the North Dakota housing finance agency and other appropriate stakeholders to assess the availability of housing for individuals requiring extraordinary health care support services, for the biennium beginning July 1, 2025, and ending June 30, 2027. Based on the results of the assessment, if necessary, the department shall develop a plan to expand access to housing providing the least restrictive environment for individuals requiring extraordinary health care support services.

SECTION 34. BEHAVIORAL HEALTH CLINICS, NORTH DAKOTA STATE HOSPITAL, AND LIFE SKILLS AND TRANSITION CENTER FUNDING. Section 1 of this Act includes funding for the behavioral health clinics, North Dakota state hospital, and life skills and transition center as follows:

1. Behavioral health clinics:		
a. Salaries and wages	$167,581,103	
b. Operating and capital	64,763,965	
c. Total	$232,345,068	
2. State hospital:		
a. Salaries and wages	$ 73,941,551	
b. Operating and capital	320,880,155	
c. Total	$394,821,706	
3. Life skills and transition center:		
a. Salaries and wages	$ 57,799,213	
b. Operating and capital	15,207,658	
c. Total	$ 73,006,871	

SECTION 35. LEGISLATIVE MANAGEMENT STUDY - STUDENT TRUANCY AND ABSENTEEISM. The legislative management shall consider studying, during the 2025-26 interim, truancy and student absenteeism in kindergarten through grade twelve public schools. The legislative management shall report its findings and recommendations, together with any legislation necessary to implement its recommendations, to the seventieth legislative assembly.

SECTION 36. LEGISLATIVE MANAGEMENT STUDY - ANTIOBESITY MEDICATION - MEDICAID. The legislative management shall consider studying, during the 2025-26 interim, the feasibility and desirability of the state's medical assistance program providing coverage for the treatment of obesity, including coverage for intensive behavioral therapy, bariatric surgery, and antiobesity medication approved by the United State food and drug administration. The legislative management shall report its findings and recommendations, together with any legislation necessary to implement its recommendations, to the seventieth legislative assembly.

SECTION 37. EFFECTIVE DATE. Section 30 of this Act becomes effective on July 1, 2026.

Title.
Fiscal No. 1

Prepared by the Legislative Council staff for House Appropriations - Human Resources Division Committee
February 24, 2025

Sixty-ninth
Legislative Assembly
of North Dakota

PROPOSED AMENDMENTS TO

HOUSE BILL NO. 1012

Introduced by

Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to amend and reenact sections 50-06-06.6, 50-06-42, 50-24.5-02.3, and 50-33-05 of the North Dakota Century Code, relating to leases of department of health and human services property, substance use disorder treatment program, basic care payment rates, and state of residence for child care assistance; to provide for a transfer; to authorize a line of credit; to provide legislative intent; to provide for a legislative management study; to provide an application; to provide an exemption; ~~and~~ to provide for a report; and to provide an effective date.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from other funds derived from special funds and federal funds, to the department of health and human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2025, and ending June 30, 2027, as follows:

Total	$18,031,736	$379,587,784	$397,619,520

SECTION 3. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, 3, 4, ~~and~~ 5, and 6 of section 1 of this Act and any other appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly, for the biennium beginning July 1, 2025, and ending June 30, 2027, as requested by the department of health and human services. The department of health and human services shall notify the legislative council of any transfer made pursuant to this section. The department of health and human services shall report to the budget section after June 30, 2026, any transfer made in excess of $50,000 and to the appropriations committees of the seventieth legislative assembly regarding any transfers made pursuant to this section.

SECTION 4. FULL-TIME EQUIVALENT POSITION BLOCK GRANT PROGRAM - REPORT. Section 1 of this Act includes funding for a full-time equivalent position block grant

program. This funding as approved by the sixty-ninth legislative assembly is available for defraying the expense of full-time equivalent positions as determined by the department of health and human services. Notwithstanding any other provision of law, the department is authorized to increase or decrease authorized full-time equivalent positions subject to the availability of funds and the provisions of this section. The department of health and human services many not increase full-time equivalent positions for the purpose of transferring human service zone employees to state employment. Pursuant to section 3 of this Act, the department is authorized to transfer appropriation authority up to the underfunded amount of $20,157,874 to the salaries and wages block grant line item. The department of health and human services shall report to the office of management and budget and legislative council any adjustments to full-time equivalent positions.

SECTION 5. DEPARTMENT OF HEALTH AND HUMAN SERVICES - SALARIES AND WAGES BLOCK GRANT - VACANT POSITIONS - REPORT. The department of health and human services shall report to the budget section quarterly during the 2025-26 interim regarding the status of its salaries and wages block grant and vacant positions and employee turnover. The report must include:

1. The legislative appropriation for salaries and wages allocated by the department to major department programs by funding source and the number of FTE positions the department is allocating to each major program based on the legislative appropriation;
2. Any changes to salaries and wages funding or FTE positions allocated to major department programs;
3. Any new FTE positions added, the cost of the position for the remainder of the biennium, and the cost to continue funding the position in the subsequent biennium by funding source;
4. Any FTE positions removed and related funding;
5. The number of FTE positions that become vacant and the number filled each month;
6. The number of vacant FTE positions at the end of each month;
7. Salaries and wages savings resulting from vacant positions and employee turnover each month by funding source; and
8. The use of salaries and wages savings for other purposes for each month by funding source.

SECTION 6. BEHAVIORAL HEALTH FACILITY GRANT - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND - APPLICATION.

1. Section 1 of this Act includes the sum of $12,960,000 from the strategic investment and improvements fund for a behavioral health facility grant pursuant to this section.
2. A grant of $12,960,000 must be provided to establish a behavioral health facility in the northeast human service region. The grant recipient must provide matching funds of $3,240,000 to establish the facility.
3. The department shall require an entity receiving funding under this section to operate the facility for at least ten years and require the grant amount to be repaid if the entity does not operate the facility for at least ten years.
4. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 7. COMMUNITY CULTURAL CENTER GRANT - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND - APPLICATION. Section 1 of this Act includes the sum of $1,000,000 from the strategic investment and improvements fund for the purpose of providing a one-time community cultural center grant in the west central human service region. An entity may apply for a grant under this section if the entity certifies to the department it has secured at least fifty percent of funds needed to complete the project, the project will be completed within two years of receiving the grant funds, and the grants funds will be used only for costs of constructing a community cultural center. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 8. JUVENILE JUSTICE DIVERSION SERVICES AND PROGRAMS - TASK FORCE - REPORT. Section 1 of this Act includes the sum of $750,000 from the general fund for juvenile justice diversion services and programs. The department of health and human services must provide the funding to a statewide regional education association for services to youth at risk of juvenile justice involvement but who have not committed delinquent acts as defined in chapter 27-20.4.

The department shall establish a task force with representation from divisions in the department, human service zones, the department of public instruction, elementary and secondary schools, and members of the legislative assembly, to review juvenile justice diversion

services and program. The department shall report its findings and recommendations to the legislative management and children's cabinet.

SECTION 9. ANIMAL SHELTER GRANT - COMMUNITY HEALTH TRUST FUND. Section 1 of this Act includes the sum of $300,000 from the community health trust fund for a grant for the construction of an animal shelter. The department of health and human services may award a grant for the construction of an animal shelter to an organization that provides twenty dollars of nonstate matching funds for every dollar of grant funds received. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 10. STATEWIDE HEALTH STRATEGIES - COMMUNITY HEALTH TRUST FUND. Section 1 of this Act includes the sum of $750,000 of one-time funding from the community health trust fund for the statewide health strategies initiative. The department of health and human services may spend the funding upon securing dollar-for-dollar matching funds.

SECTION 11. OTHER FUNDS - INSURANCE TAX DISTRIBUTION FUND. The other funds line item in subdivision 5 of section 1 of this Act includes the sum of $1,125,000 from the insurance tax distribution fund for rural emergency medical services grants.

SECTION 12. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND. The other funds line items in section 1 of this Act includes the sum of $38,713,522 from the community health trust fund for the following purposes:

Loan repayment programs	$594,500
Tobacco and vaping programs	11,599,698
Cancer and women's way programs	909,824
Behavior risk state survey	200,000
Domestic violence programs	4,250,000
Local public health grants	3,275,000
988 crisis hotline	1,867,500
Various information technology system upgrades	2,967,000
Grants to rural ambulances	7,000,000
Law enforcement rural crisis support program	1,000,000
Development of partial hospitalization/intensive day treatment	2,000,000

Critical access hospital networking	2,000,000
Animal shelter grant	300,000
Statewide health strategies	750,000
Total	$38,713,522

~~**SECTION 7. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $1,867,500 from the community health trust fund for the 988 crisis hotline program and subdivision 5 of section 1 of this Act includes the sum of $27,072,324 from the community health trust fund for the following programs:~~

~~Behavioral risk factor survey~~	~~$200,000~~
~~Behavioral health loan repayment~~	~~234,500~~
~~Domestic violence offender treatment~~	~~1,000,000~~
~~Domestic violence prevention~~	~~1,000,000~~
~~Women's way~~	~~329,500~~
~~Dentist's loan repayment~~	~~360,000~~
~~Local public health state aid~~	~~3,275,000~~
~~Rural emergency medical and ambulance services grants~~	~~7,000,000~~
~~Cancer programs~~	~~580,324~~
~~Forensic examiner contract~~	~~1,000,000~~
~~Tobacco cessation grants~~	~~500,000~~
~~Youth vaping prevention grants~~	~~300,000~~
~~Tobacco prevention and control~~	~~5,043,000~~
~~Tobacco prevention and control grants to local public health units~~	~~6,250,000~~
~~Total community health trust fund~~	~~$27,072,324~~

SECTION 13. OTHER FUNDS - HUMAN SERVICE FINANCE FUND. The other funds line ~~item~~items in ~~subdivision 3 of~~ section 1 of this Act includes the sum of ~~$226,950,000~~$239,112,030 from the human service finance fund for state-paid economic assistance and social and human services.

~~**SECTION 9. OTHER FUNDS - HEALTH CARE TRUST FUND.** The other funds line item in subdivision 4 of section 1 of this Act includes the sum of $500,000 from the health care trust fund for basic care facility bad debt expense.~~

~~**SECTION 10. OTHER FUNDS - CHARITABLE GAMING OPERATING FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $500,000 from the charitable gaming operating fund for costs of gambling disorder prevention services.~~

SECTION 14. OTHER FUNDS - OPIOID SETTLEMENT FUND. The other funds line item in ~~subdivision 2 of~~ section 1 of this Act includes the sum of $8,000,000 from the opioid settlement fund for opioid remediation and abatement efforts.

SECTION 15. OTHER FUNDS - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND The other funds line items in section 1 of this Act includes the sum of $227,474,784 from the strategic investment and improvements fund for the following purposes:

Retiring technology from the mainframe	$7,500,000
Move into the new state laboratory and purchase security equipment	2,962,304
Capital projects in human service centers and life skills and transition center	1,052,480
Housing initiative programs	1,000,000
Technology projects at the state hospital	1,000,000
New state hospital	200,000,000
Behavioral health facility grant	12,960,000
Community cultural center grant	1,000,000
Total	$227,474,784

SECTION 16. OTHER FUNDS - BANK OF NORTH DAKOTA LINE OF CREDIT - STATE HOSPITAL PROJECT. The other funds line item in subdivision 2 of section 1 of this Act includes $130,000,000 from a Bank of North Dakota line of credit. The department of health and human services may borrow up to $130,000,000 through a line of credit from the Bank of North Dakota during the biennium beginning July 1, 2025, and ending June 30, 2027, for costs associated with the construction of a new state hospital. The interest rate on the line of credit may not exceed the prevailing interest rate charged to North Dakota governmental entities. If the department accesses the line of credit, it shall request a deficiency appropriation from the seventieth legislative assembly to repay the line of credit.

SECTION 17. LABORATORY BUILDING STEERING COMMITTEE. The department of health and human services shall maintain the laboratory building steering committee to oversee the design and construction of the laboratory building project, for the biennium beginning July 1, 2025, and ending June 30, 2027, or until work is completed, whichever occurs earlier. The

committee must include representation from the department of health and human services, department of environmental quality, office of management and budget, the governor's office, and the legislative assembly. The legislative assembly representation must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 18. NEW STATE HOSPITAL - STEERING COMMITTEE. The department of health and human services shall establish a new state hospital facility steering committee to oversee the design and construction of a new state hospital facility, for the biennium beginning July 1, 2025, and ending June 30, 2027. The committee must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 19. CAPITAL PAYMENTS. During the biennium beginning July 1, 2025, and ending June 30, 2027, the department of health and human services is authorized to expend funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center. Pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly. The department of health and human services may transfer funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center ahead of the special needs assessments schedule. Notwithstanding section 54-27-12, the department of health and human services may spend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 20. CAPITAL PROJECTS - EMERGENCY COMMISSION AND BUDGET SECTION APPROVAL. During the biennium beginning July 1, 2025, and ending June 30, 2027, pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for capital projects and maintenance pertaining to operation of its

facilities, including demolition projects. Notwithstanding section 54-27-12, the department of health and human services may spend up to $10,000,000 for capital projects and maintenance pertaining to operation of its facilities, including demolition projects, under this section and may seek emergency commission and budget section approval to spend more than $10,000,000 under this section.

SECTION 21. PERMANENT SUPPORTIVE HOUSING GRANTS. Section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of health and human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department of health and human services, and authorize the department of health and human services to conduct onsite visits to review program operations.

SECTION 22. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Section 1 of this Act includes the sum of $662,099,340, of which $66,209,934 is from the general fund, for the medical assistance expansion program, for the biennium beginning July 1, 2025, and ending June 30, 2027. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount.
2. The department of health and human services may exceed appropriations for increases in medical assistance expansion program caseload, for the addition of coverage consistent with the traditional Medicaid 1915(i) state plan, utilization rates, and reduction in federal medical assistance percentage.
3. The managed care organization under contract with the department of health and human services to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department of health and human services. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types.

4. The managed care organization and the department of health and human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers,and rural health clinics meet the federally required minimum levels of reimbursement. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs and human service centers may not be paid less than one hundred percent of the current traditional Medicaid rate. Behavioral health services involving partial hospitalization, intensive outpatient, professional services, and residential behavioral health services provided in facilities that are not institutions for mental diseases are not subject to the provisions in subsection 6.
5. The department of health and human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance or adequate capacity and services, and coordination and continuity of care.
6. Except for the provisions in subsection 4, managed care organization premium payments must be built using the assumption that rates paid to providers under the medical assistance expansion program may not exceed one hundred forty-five percent of Medicare reimbursement rates paid to providers on January 1, 2025.

SECTION 23. HUMAN SERVICE CENTERS - CERTIFIED COMMUNITY BEHAVIORAL HEALTH CLINICS - FULL-TIME EQUIVALENT POSITIONS - REPORT. The department of health and human services shall continue the process of the human service centers becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults. The department of health and human services shall pursue additional federal funding as available. Subject to the availability of generated income, the department of health and human services may add full-time equivalent positions for the clinics to provide direct services for the period beginning with the effective date of this Act and ending June 30, 2027. The department of health and human services shall report to the office of management and budget and legislative council each time a position is added.

SECTION 24. INTERMEDIATE CARE FACILITY MORATORIUM. The department of health and human services may not add any new licensed intermediate care facility for individuals with

intellectual disabilities beds to the state's licensed bed capacity between July 1, 2025, and June 30, 2027.

SECTION 25. EXEMPTION - UNEXPENDED APPROPRIATIONS. The following appropriations are not subject to the provisions of section 54-44.1-11 and any unexpended appropriation authority may be continued into the biennium beginning July 1, 2025, and ending June 30, 2027:

1. The sum of $3,674,757 appropriated from the general fund and the sum of $25,918,566 appropriated from federal funds for the Medicaid management information system modularization technology project in chapter 12 of the 2021 Session Laws;
2. The sum of $14,411,218 appropriated from the general fund and the sum of $14,411,218 appropriated from federal funds for the child welfare technology project in chapter 12 of the 2021 Session Laws;
3. The sum of $20,366,271 appropriated from the community health trust fund and the sum of $39,534,525 appropriated from federal funds for the child support computer replacement project in chapter 44 of the 2023 Session Laws;
4. The sum of $10,989,217 appropriated from the strategic investment and improvements fund for the procurement and grants management system in chapter 44 of the 2023 Session Laws;
5. The sum of $4,150,000 appropriated from the general fund for defraying the expenses of additional human service centers to begin the process of becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults in chapter 44 of the 2023 Session Laws;
6. The sum of $18,941,847 appropriated to the department of health and human services in chapter 549 of the 2021 Special Session Laws;
7. The sum of $55,120,000 appropriated from the federal state fiscal recovery fund for a public health laboratory capital project in chapter 4 of the 2023 Session Laws;
8. The sum of $5,000,000 appropriated from the general fund for the purpose of employer-led child care cost-share program in chapter 446 of the 2023 Session Laws;
9. The sum of $986,555 appropriated from the general fund for the purpose of streamlining background checks project in chapter 446 of the 2023 Session Laws;

10. The sum of $2,223,981 appropriated from the federal state fiscal recovery fund for the implementation of a virtual behavioral health crisis care program for rural law enforcement in chapter 44 of the 2023 Session Laws; and
11. The sum of $500,000 appropriated from the general fund and the sum of $500,000 appropriated from federal funds for the purpose of program integrity audits in chapter 44 of the 2023 Session Laws.

SECTION 26. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services seek a deficiency appropriation from the seventieth legislative assembly for any expenditures that exceed appropriated amounts as a result of underfunding, utilization rates, value-based purchasing for nursing facilities, reduction in federal medical assistance percentage, and unexpected contract cost increases that exceed ten percent, during the biennium beginning July 1, 2025, and ending June 30, 2027, if funding is not sufficient to pay actual expenses.

SECTION 27. LEGISLATIVE INTENT - PROVIDER RATE INCREASE. Except as otherwise noted, section 1 of this Act includes funding for human service provider inflation increases of two percent for each year of the biennium beginning July 1, 2025, and ending June 30, 2027. The provider inflation increase in this section does not apply to nursing facilities.

SECTION 28. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITIES PROVIDER ACCREDITATION REQUIREMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services eliminate its administrative rule requirement that providers of developmental disabilities services be accredited as a condition of being eligible for receiving payments for services from the department of health and human services.

SECTION 29. LEGISLATIVE INTENT - MEDICAL ASSISTANCE. It is the intent of the sixty-ninth legislative assembly that the department of health and human services review the amount, duration, coverage, utilization rates, medical necessity, and scope of medical assistance services, and may implement any adjustments the department determines appropriate.

SECTION 30. FEDERAL FUNDING APPEAL LIMITATION. Except as otherwise specifically provided by federal law, a person may not appeal a denial, revocation, reduction in services or payment, or the termination of a program or service by the department of health and human services dues to the unavailability of federal coronavirus funding received under federal

law resulting from the federal coronavirus pandemic emergency declarations, for the biennium beginning July 1, 2025, and ending June 30, 2027.

SECTION 31. DEPARTMENT OF HEALTH AND HUMAN SERVICES - LONG-TERM STRUCTURED RESIDENCES PLAN - REPORT. During the 2025-26 interim, the department of health and human services shall review options and develop a plan to establish long-term structured residences. The department shall review necessary changes to statutes, rules, policies, and the estimated fiscal impact of establishing the residences. A long-term structured residence must be a highly structured therapeutic residential mental health treatment facility that is staffed continuously and designed to treat adults under chapters 25-03.1 and 25-04 who have severe and persistent mental illness and who have reached the maximum benefit from the mental health resources available elsewhere in the community or hospital. The department shall present a report to the legislative management by October 1, 2026, regarding its plan to establish long-term structured residences.

SECTION 32. AMENDMENT. Section 50-06-06.6 of the North Dakota Century Code is amended and reenacted as follows:

50-06-06.6. Department may lease real and personal property.

The commissioner of the department or commissioner's designee may lease ~~surplus farm and pastureland at the state hospital and the life skills and transition center. The commissioner or designee also may enter into further leases of~~ real or personal property at the life skills and transition center or the state hospital upon a specific finding that the granting of each such leasehold interest will result in a net economic gain for the department, taking into account all identifiable costs. Any lease of space for the purpose of providing child care services must meet requirements as determined by the department. The commissioner of the department or commissioner's designee may prescribe the terms and conditions of any leases entered into pursuant to this section and may renew existing leases. ~~Any~~The term of any lease ~~entered into must be subject to renewal or cancelable each biennium~~may not exceed ninety-nine years.

SECTION 33. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system - Mental health treatment voucher system for incarcerated individuals.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services and medical costs provided by licensed substance abuse treatment programs, excluding regional human service centers and hospital- or medical clinic-based programs for medical management of withdrawal.

   a. An out-of-state licensed substance abuse treatment program located within a bordering state may participate in the voucher program to serve an underserved area of this state pursuant to the rules adopted by the department. The department shall develop rules to include processes and requirements for an out-of-state provider to receive reimbursement only for outpatient and community-based services upon a provider completing an assessment of need and receiving approval from the department.

   ~~2.~~b. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures.

   ~~3.~~c. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

   ~~4.~~d. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

      ~~a.~~(1) ~~No~~Except as provided in paragraphs 3 and 4, no more than ~~forty-five~~fifty percent of the appropriated amount may be allocated for residential

substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

~~b.~~(2) The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

(3) The department, during the last quarter of the biennium, may reallocate projected unused funds that were allocated under paragraph 2 to residential facilities outlined in paragraph 1.

(4) The department may reimburse a licensed substance abuse treatment program with more than sixteen beds the incurred direct medical costs of an eligible individual who does not have resources to cover the medical costs. The department may develop rules and may not exceed the total amount appropriated for medical cost reimbursement.

2. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's mental health treatment system for individuals detained or confined in a county jail or detention center or regional corrections center and to assist in the payment of mental health treatment services provided by a licensed mental health professional acting within their scope of practice, excluding a regional human service center.

a. Services eligible for the voucher program include only diagnostic assessment and mental health therapy for individuals with a mental health concern detained or confined in a county jail or detention center or regional corrections center. The department shall ensure that a licensed mental health professional accepting vouchers collects and reports process and outcome measures.

b. The department shall develop requirements and provide training and technical assistance to licensed mental health professionals accepting vouchers. A licensed mental health professional shall provide evidence-based services.

SECTION 34. AMENDMENT. Section 50-24.5-02.3 of the North Dakota Century Code is amended and reenacted as follows:

50-24.5-02.3. Basic care payment rates.

1. The department shall determine limits for the care of residents of basic care facilities that qualify as vendors of an aged, blind, and disabled persons program and for implementing provisions of this chapter based on data demonstrating the most recent costs that must be incurred for the care of residents in efficiently and economically operated basic care facilities. The department shall determine the limits every four years by July first, beginning with July 1, 2023.
2. The department shall establish the limits by using the median rates from the most recent data available. The direct care limit must be the median plus eighteen percent. The indirect care limit must be the median plus twelve percent.
3. For the rate year beginning July 1, 2023, the department shall increase rates and limits three and one-half percent for inflation. For the rate year beginning July 1, 2024, the department shall increase rates and limits three and one-half percent for inflation.
4. The department shall provide a rate increase in the amount of five dollars per day for the period beginning July 1, 2023, and ending June 30, ~~2025~~2027, after which the increase is not effective. This rate increase may not be included in any calculation of inflation increase.
5. Within the limits of legislative appropriations, the department shall establish an uncompensated care expense of three hundred sixty-five days.

SECTION 35. AMENDMENT. Section 50-33-05 of the North Dakota Century Code is amended and reenacted as follows:

50-33-05. State of residence.

Only child care assistance units physically residing within the boundaries of the state are eligible for child care assistance, unless the individual is employed by an early childhood program within the boundaries of the state and the individual has been approved for the state's child care assistance child care workforce benefit.

SECTION 36. HOUSING AVAILABILITY ASSESSMENT - COLLABORATION WITH HOUSING FINANCE AGENCY. The department of health and human services shall collaborate with the North Dakota housing finance agency and other appropriate stakeholders to assess the availability of housing for individuals requiring extraordinary health care support services, for the biennium beginning July 1, 2025, and ending June 30, 2027. Based on the results of the

assessment, if necessary, the department shall develop a plan to expand access to housing providing the least restrictive environment for individuals requiring extraordinary health care support services.

SECTION 37. BEHAVIORAL HEALTH CLINICS, NORTH DAKOTA STATE HOSPITAL, AND LIFE SKILLS AND TRANSITION CENTER FUNDING. Section 1 of this Act includes funding for the behavioral health clinics, North Dakota state hospital, and life skills and transition center as follows:

1. Behavioral health clinics:		
a. Salaries and wages		$156,967,103
b. Operating and capital		64,131,965
c. Total		$221,099,068
2. State hospital:		
a. Salaries and wages		$68,775,551
b. Operating and capital		350,880,155
c. Total		$419,655,706
3. Life skills and transition center:		
a. Salaries and wages		$55,540,213
b. Operating and capital		15,207,658
c. Total		$70,747,871

SECTION 38. LEGISLATIVE MANAGEMENT STUDY - STUDENT TRUANCY AND ABSENTEEISM. The legislative management shall consider studying, during the 2025-26 interim, truancy and student absenteeism in kindergarten through grade twelve public schools. The legislative management shall report its findings and recommendations, together with any legislation necessary to implement its recommendations, to the seventieth legislative assembly.

SECTION 39. LEGISLATIVE MANAGEMENT STUDY - OBESITY HEALTH IMPLICATIONS. The legislative management shall consider studying, during the 2025-26 interim, the health implications of obesity on the residents of the state and options to increase access to prevention and treatments for obesity. If conducted, the study must review costs associated with obesity including comorbidities, treatments available for obesity, obesity diagnosis guidelines including use of body mass index compared with percentage of body fat, and examining the difference between being an individual who is healthy and overweight as

compared to an obese individual. The legislative management shall report its findings and recommendations, together with any legislation necessary to implement its recommendations, to the seventieth legislative assembly.

SECTION 40. LEGISLATIVE MANAGEMENT REPORT - BEHAVIORAL HEALTH FACILITY GRANTS. During the 2025-26 interim the department of health and human services shall provide reports to the legislative management regarding the award of grant funding to increase the number of behavioral health beds in the state.

SECTION 41. EFFECTIVE DATE. Section 33 of this Act becomes effective on July 1, 2026.

House Bill No. 1012 - Other Changes - House Action

This amendment also:

- Creates a salaries and wages block grant and provides guidelines regarding the use of the block grant and reporting requirements.
- Identifies appropriations from the strategic investment and improvements fund, community health trust fund, opioid settlement fund, and human service finance fund.
- Provides guidelines for the use of funding provided for a behavioral health facility grant, a community cultural center grant, juvenile justice programs, an animal shelter grant, and a statewide health strategies initiative.
- Authorizes DHHS to obtain a $130 million line of credit from the Bank of North Dakota for the State Hospital project.
- Continues the state health laboratory building project steering committee.
- Creates a new state hospital building steering committee.
- Authorizes capital payments for special assessment costs at the State Hospital, Southeast Human Service Center, and Life Skills and Transition Center.

- Authorizes DHHS to expend funds for capital projects at the State Hospital.
- Identifies $4,672,536 from the general fund for permanent supportive housing grants.
- Provides that expenditures for the Medicaid Expansion program may not exceed legislative appropriations.
- Directs DHHS to continue the process of converting human service centers to certified community behavioral health clinics.
- Provides a moratorium on the number of licensed intermediate care facility beds for individuals with a developmental disability.
- Authorizes DHHS to continue certain unexpended appropriations from previous bienniums into the 2025-27 biennium.
- Provides intent that DHHS seeks a deficiency appropriation from the 70th Legislative Assembly if utilization rates exceed estimates.
- Identifies provider inflation increases of 2 percent per year included in the amendment.
- Provides intent that DHHS remove the requirement that developmental disability providers be accredited to receive payment.
- Provides an individual may not appeal a denial of services or payment under a program if certain federal funding is unavailable.
- Provides for DHHS to create a long-term structured residences plan.
- Amends Section 50-06-06.6 to allow land at the State Hospital and Life Skills and Transition Center to be leased for up to 99 years.
- Amends Section 50-06-42 to expand the use of the substance use disorder voucher program for individuals in jail or a treatment facility with more than 16 beds.
- Directs DHHS to collaborate with the Housing Finance Agency to assess the availability of housing for individuals requiring extraordinary health care support services.
- Provides for a Legislative Management study of student truancy and absenteeism.
- Provides for a Legislative Management study of obesity health implications.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
2/25/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to amend and reenact sections 50-06-06.6, 50-06-42, 50-24.5-02.3, and 50-33-05 of the North Dakota Century Code, relating to leases of department of health and human services property, substance use disorder treatment program, basic care payment rates, and state of residence for child care assistance; to provide for a transfer; to authorize a line of credit; to provide legislative intent; to provide for a legislative management study; to provide an application; to provide an exemption; to provide for a report; and to provide an effective date.

1:02 p.m. Chairman Vigesaa opened the meeting.

Members Present: Chairman Vigesaa, Vice Chair Kempenich, Representatives Anderson, Swiontek, Berg, Nelson, Bosch, Brandenburg, Fisher, Hanson, Louser, Martinson, Meier, Mitskog, Monson, Murphy, Nathe, O'Brien, Pyle, Richter, Sanford, Stemen, Wagner

Discussion Topics:

- Committee Action

1:02 p.m. Representative J. Nelson introduced the amendment LC #25.0156.01017, #38399.

1:27 p.m. Representative J. Nelson moved to adopt amendment 25.0156.01017.

1:27 p.m. Representative Stemen Seconded the motion.

Roll call vote.

Fiscal No. 1

Prepared by the Legislative Council staff for House Appropriations Committee
February 25, 2025

Sixty-ninth
Legislative Assembly
of North Dakota

PROPOSED AMENDMENTS TO

HOUSE BILL NO. 1012

Introduced by

Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to amend and reenact sections 50-06-06.6, 50-06-42, 50-24.5-02.3, and 50-33-05 of the North Dakota Century Code, relating to leases of department of health and human services property, substance use disorder treatment program, basic care payment rates, and state of residence for child care assistance; to provide for a transfer; to authorize a line of credit; to provide legislative intent; to provide for a legislative management study; to provide an application; to provide an exemption; ~~and~~ to provide for a report; and to provide an effective date.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from other funds derived from special funds and federal funds, to the department of health and human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2025, and ending June 30, 2027, as follows:

Total	$18,031,736	$379,587,784	$397,619,520

SECTION 3. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, 3, 4, ~~and~~ 5, and 6 of section 1 of this Act and any other appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly, for the biennium beginning July 1, 2025, and ending June 30, 2027, as requested by the department of health and human services. The department of health and human services shall notify the legislative council of any transfer made pursuant to this section. The department of health and human services shall report to the budget section after June 30, 2026, any transfer made in excess of $50,000 and to the appropriations committees of the seventieth legislative assembly regarding any transfers made pursuant to this section.

SECTION 4. FULL-TIME EQUIVALENT POSITION BLOCK GRANT PROGRAM - REPORT. Section 1 of this Act includes funding for a full-time equivalent position block grant

program. This funding as approved by the sixty-ninth legislative assembly is available for defraying the expense of full-time equivalent positions as determined by the department of health and human services. Notwithstanding any other provision of law, the department is authorized to increase or decrease authorized full-time equivalent positions subject to the availability of funds and the provisions of this section. The department of health and human services many not increase full-time equivalent positions for the purpose of transferring human service zone employees to state employment. Pursuant to section 3 of this Act, the department is authorized to transfer appropriation authority of up to the underfunded amount of $30,000,000 to the salaries and wages block grant line item. The department of health and human services shall report to the office of management and budget and legislative council any adjustments to full-time equivalent positions.

SECTION 5. DEPARTMENT OF HEALTH AND HUMAN SERVICES - SALARIES AND WAGES BLOCK GRANT - VACANT POSITIONS - REPORT. The department of health and human services shall report to the budget section quarterly during the 2025-26 interim regarding the status of its salaries and wages block grant and vacant positions and employee turnover. The report must include:

1. The legislative appropriation for salaries and wages allocated by the department to major department programs by funding source and the number of FTE positions the department is allocating to each major program based on the legislative appropriation;
2. Any changes to salaries and wages funding or FTE positions allocated to major department programs;
3. Any new FTE positions added, the cost of the position for the remainder of the biennium, and the cost to continue funding the position in the subsequent biennium by funding source;
4. Any FTE positions removed and related funding;
5. The number of FTE positions that become vacant and the number filled each month;
6. The number of vacant FTE positions at the end of each month;
7. Salaries and wages savings resulting from vacant positions and employee turnover each month by funding source; and
8. The use of salaries and wages savings for other purposes for each month by funding source.

SECTION 6. BEHAVIORAL HEALTH FACILITY GRANT - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND - APPLICATION.

1. Section 1 of this Act includes the sum of $12,960,000 from the strategic investment and improvements fund for a behavioral health facility grant pursuant to this section.
2. A grant of $12,960,000 must be provided to establish a behavioral health facility in the northeast human service region. The grant recipient must provide matching funds of $3,240,000 to establish the facility.
3. The department shall require an entity receiving funding under this section to operate the facility for at least ten years and require the grant amount to be repaid if the entity does not operate the facility for at least ten years.
4. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 7. COMMUNITY CULTURAL CENTER GRANT - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND - APPLICATION. Section 1 of this Act includes the sum of $1,000,000 from the strategic investment and improvements fund for the purpose of providing a one-time community cultural center grant in the west central human service region. An entity may apply for a grant under this section if the entity certifies to the department it has secured at least fifty percent of funds needed to complete the project, the project will be completed within two years of receiving the grant funds, and the grants funds will be used only for costs of constructing a community cultural center. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 8. JUVENILE JUSTICE DIVERSION SERVICES AND PROGRAMS - TASK FORCE - REPORT. Section 1 of this Act includes the sum of $750,000 from the general fund for juvenile justice diversion services and programs. The department of health and human services must use the funding for services to youth at risk of juvenile justice involvement but who have not committed delinquent acts as defined in chapter 27-20.4.

The department shall establish a task force with representation from divisions in the department, human service zones, the department of public instruction, elementary and secondary schools, and members of the legislative assembly, to review juvenile justice diversion services and program. The department shall report its findings and recommendations to the legislative management and children's cabinet.

SECTION 9. ANIMAL SHELTER GRANT - COMMUNITY HEALTH TRUST FUND. Section 1 of this Act includes the sum of $300,000 from the community health trust fund for a grant for the construction of an animal shelter. The department of health and human services may award a grant for the construction of an animal shelter to an organization that provides twenty dollars of nonstate matching funds for every dollar of grant funds received. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 10. STATEWIDE HEALTH STRATEGIES - COMMUNITY HEALTH TRUST FUND. Section 1 of this Act includes the sum of $750,000 of one-time funding from the community health trust fund for the statewide health strategies initiative. The department of health and human services may spend the funding upon securing dollar-for-dollar matching funds.

SECTION 11. OTHER FUNDS - INSURANCE TAX DISTRIBUTION FUND. The other funds line item in subdivision 5 of section 1 of this Act includes the sum of $1,125,000 from the insurance tax distribution fund for rural emergency medical services grants.

SECTION 12. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND. The other funds line items in section 1 of this Act includes the sum of $38,713,522 from the community health trust fund for the following purposes:

Loan repayment programs	$594,500
Tobacco and vaping programs	11,599,698
Cancer and women's way programs	909,824
Behavior risk state survey	200,000
Domestic violence programs	4,250,000
Local public health grants	3,275,000
988 crisis hotline	1,867,500
Various information technology system upgrades	2,967,000
Grants to rural ambulances	7,000,000
Law enforcement rural crisis support program	1,000,000
Development of partial hospitalization/intensive day treatment	2,000,000
Critical access hospital networking	2,000,000
Animal shelter grant	300,000

Statewide health strategies	750,000
Total	$38,713,522

~~**SECTION 7. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $1,867,500 from the community health trust fund for the 988 crisis hotline program and subdivision 5 of section 1 of this Act includes the sum of $27,072,324 from the community health trust fund for the following programs:~~

~~Behavioral risk factor survey~~	~~$200,000~~
~~Behavioral health loan repayment~~	~~234,500~~
~~Domestic violence offender treatment~~	~~1,000,000~~
~~Domestic violence prevention~~	~~1,000,000~~
~~Women's way~~	~~329,500~~
~~Dentist's loan repayment~~	~~360,000~~
~~Local public health state aid~~	~~3,275,000~~
~~Rural emergency medical and ambulance services grants~~	~~7,000,000~~
~~Cancer programs~~	~~580,324~~
~~Forensic examiner contract~~	~~1,000,000~~
~~Tobacco cessation grants~~	~~500,000~~
~~Youth vaping prevention grants~~	~~300,000~~
~~Tobacco prevention and control~~	~~5,043,000~~
~~Tobacco prevention and control grants to local public health units~~	~~6,250,000~~
~~Total community health trust fund~~	~~$27,072,324~~

SECTION 13. OTHER FUNDS - HUMAN SERVICE FINANCE FUND. The other funds line ~~item~~items in ~~subdivision 3 of~~ section 1 of this Act includes the sum of ~~$226,950,000~~$239,112,030 from the human service finance fund for state-paid economic assistance and social and human services.

~~**SECTION 9. OTHER FUNDS - HEALTH CARE TRUST FUND.** The other funds line item in subdivision 4 of section 1 of this Act includes the sum of $500,000 from the health care trust fund for basic care facility bad debt expense.~~

~~**SECTION 10. OTHER FUNDS - CHARITABLE GAMING OPERATING FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $500,000 from the charitable gaming operating fund for costs of gambling disorder prevention services.~~

SECTION 14. OTHER FUNDS - OPIOID SETTLEMENT FUND. The other funds line item in ~~subdivision 2 of~~ section 1 of this Act includes the sum of $8,000,000 from the opioid settlement fund for opioid remediation and abatement efforts.

SECTION 15. OTHER FUNDS - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND The other funds line items in section 1 of this Act includes the sum of $227,474,784 from the strategic investment and improvements fund for the following purposes:

Retiring technology from the mainframe	$7,500,000
Move into the new state laboratory and purchase security equipment	2,962,304
Capital projects in human service centers and life skills and transition center	1,052,480
Housing initiative programs	1,000,000
Technology projects at the state hospital	1,000,000
New state hospital	200,000,000
Behavioral health facility grant	12,960,000
Community cultural center grant	1,000,000
Total	$227,474,784

SECTION 16. OTHER FUNDS - BANK OF NORTH DAKOTA LINE OF CREDIT - STATE HOSPITAL PROJECT. The other funds line item in subdivision 2 of section 1 of this Act includes $130,000,000 from a Bank of North Dakota line of credit. The department of health and human services may borrow up to $130,000,000 through a line of credit from the Bank of North Dakota during the biennium beginning July 1, 2025, and ending June 30, 2027, for costs associated with the construction of a new state hospital. The interest rate on the line of credit may not exceed the prevailing interest rate charged to North Dakota governmental entities. If the department accesses the line of credit, it shall request a deficiency appropriation from the seventieth legislative assembly to repay the line of credit.

SECTION 17. LABORATORY BUILDING STEERING COMMITTEE. The department of health and human services shall maintain the laboratory building steering committee to oversee the design and construction of the laboratory building project, for the biennium beginning July 1, 2025, and ending June 30, 2027, or until work is completed, whichever occurs earlier. The

committee must include representation from the department of health and human services, department of environmental quality, office of management and budget, the governor's office, and the legislative assembly. The legislative assembly representation must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 18. NEW STATE HOSPITAL - STEERING COMMITTEE. The department of health and human services shall establish a new state hospital facility steering committee to oversee the design and construction of a new state hospital facility, for the biennium beginning July 1, 2025, and ending June 30, 2027. The committee must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 19. CAPITAL PAYMENTS. During the biennium beginning July 1, 2025, and ending June 30, 2027, the department of health and human services is authorized to expend funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center. Pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly. The department of health and human services may transfer funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center ahead of the special needs assessments schedule. Notwithstanding section 54-27-12, the department of health and human services may spend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 20. CAPITAL PROJECTS - EMERGENCY COMMISSION AND BUDGET SECTION APPROVAL. During the biennium beginning July 1, 2025, and ending June 30, 2027, pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for capital projects and maintenance pertaining to operation of its

facilities, including demolition projects. Notwithstanding section 54-27-12, the department of health and human services may spend up to $10,000,000 for capital projects and maintenance pertaining to operation of its facilities, including demolition projects, under this section and may seek emergency commission and budget section approval to spend more than $10,000,000 under this section.

SECTION 21. PERMANENT SUPPORTIVE HOUSING GRANTS. Section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of health and human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department of health and human services, and authorize the department of health and human services to conduct onsite visits to review program operations.

SECTION 22. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Section 1 of this Act includes the sum of $662,099,340, of which $66,209,934 is from the general fund, for the medical assistance expansion program, for the biennium beginning July 1, 2025, and ending June 30, 2027. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount.
2. The department of health and human services may exceed appropriations for increases in medical assistance expansion program caseload, for the addition of coverage consistent with the traditional Medicaid 1915(i) state plan, utilization rates, and reduction in federal medical assistance percentage.
3. The managed care organization under contract with the department of health and human services to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department of health and human services. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types.

4. The managed care organization and the department of health and human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers,and rural health clinics meet the federally required minimum levels of reimbursement. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs and human service centers may not be paid less than one hundred percent of the current traditional Medicaid rate. Behavioral health services involving partial hospitalization, intensive outpatient, professional services, and residential behavioral health services provided in facilities that are not institutions for mental diseases are not subject to the provisions in subsection 6.
5. The department of health and human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance or adequate capacity and services, and coordination and continuity of care.
6. Except for the provisions in subsection 4, managed care organization premium payments must be built using the assumption that rates paid to providers under the medical assistance expansion program may not exceed one hundred forty-five percent of Medicare reimbursement rates paid to providers on January 1, 2025.

SECTION 23. HUMAN SERVICE CENTERS - CERTIFIED COMMUNITY BEHAVIORAL HEALTH CLINICS - FULL-TIME EQUIVALENT POSITIONS - REPORT. The department of health and human services shall continue the process of the human service centers becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults. The department of health and human services shall pursue additional federal funding as available. Subject to the availability of generated income, the department of health and human services may add full-time equivalent positions for the clinics to provide direct services for the period beginning with the effective date of this Act and ending June 30, 2027. The department of health and human services shall report to the office of management and budget and legislative council each time a position is added.

SECTION 24. INTERMEDIATE CARE FACILITY MORATORIUM. The department of health and human services may not add any new licensed intermediate care facility for individuals with

intellectual disabilities beds to the state's licensed bed capacity between July 1, 2025, and June 30, 2027.

SECTION 25. EXEMPTION - UNEXPENDED APPROPRIATIONS. The following appropriations are not subject to the provisions of section 54-44.1-11 and any unexpended appropriation authority may be continued into the biennium beginning July 1, 2025, and ending June 30, 2027:

1. The sum of $3,674,757 appropriated from the general fund and the sum of $25,918,566 appropriated from federal funds for the Medicaid management information system modularization technology project in chapter 12 of the 2021 Session Laws;
2. The sum of $14,411,218 appropriated from the general fund and the sum of $14,411,218 appropriated from federal funds for the child welfare technology project in chapter 12 of the 2021 Session Laws;
3. The sum of $20,366,271 appropriated from the community health trust fund and the sum of $39,534,525 appropriated from federal funds for the child support computer replacement project in chapter 44 of the 2023 Session Laws;
4. The sum of $10,989,217 appropriated from the strategic investment and improvements fund for the procurement and grants management system in chapter 44 of the 2023 Session Laws;
5. The sum of $4,150,000 appropriated from the general fund for defraying the expenses of additional human service centers to begin the process of becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults in chapter 44 of the 2023 Session Laws;
6. The sum of $18,941,847 appropriated to the department of health and human services in chapter 549 of the 2021 Special Session Laws;
7. The sum of $55,120,000 appropriated from the federal state fiscal recovery fund for a public health laboratory capital project in chapter 4 of the 2023 Session Laws;
8. The sum of $5,000,000 appropriated from the general fund for the purpose of employer-led child care cost-share program in chapter 446 of the 2023 Session Laws;
9. The sum of $986,555 appropriated from the general fund for the purpose of streamlining background checks project in chapter 446 of the 2023 Session Laws;

10. The sum of $2,223,981 appropriated from the federal state fiscal recovery fund for the implementation of a virtual behavioral health crisis care program for rural law enforcement in chapter 44 of the 2023 Session Laws; and
11. The sum of $500,000 appropriated from the general fund and the sum of $500,000 appropriated from federal funds for the purpose of program integrity audits in chapter 44 of the 2023 Session Laws.
12. The sum of $1,950,000 appropriated from the general fund to the department of health and human services for a northwest human service region behavioral health facility grant in chapter 44 of the 2023 Session Laws.

SECTION 26. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services seek a deficiency appropriation from the seventieth legislative assembly for any expenditures that exceed appropriated amounts as a result of underfunding, utilization rates, value-based purchasing for nursing facilities, reduction in federal medical assistance percentage, and unexpected contract cost increases that exceed ten percent, during the biennium beginning July 1, 2025, and ending June 30, 2027, if funding is not sufficient to pay actual expenses.

SECTION 27. LEGISLATIVE INTENT - PROVIDER RATE INCREASE. Except as otherwise noted, section 1 of this Act includes funding for human service provider inflation increases of two percent for each year of the biennium beginning July 1, 2025, and ending June 30, 2027. The provider inflation increase in this section does not apply to nursing facilities.

SECTION 28. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITIES PROVIDER ACCREDITATION REQUIREMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services eliminate its administrative rule requirement that providers of developmental disabilities services be accredited as a condition of being eligible for receiving payments for services from the department of health and human services.

SECTION 29. LEGISLATIVE INTENT - MEDICAL ASSISTANCE. It is the intent of the sixty-ninth legislative assembly that the department of health and human services review the amount, duration, coverage, utilization rates, medical necessity, and scope of medical assistance services, and may implement any adjustments the department determines appropriate.

SECTION 30. FEDERAL FUNDING APPEAL LIMITATION. Except as otherwise specifically provided by federal law, a person may not appeal a denial, revocation, reduction in services or payment, or the termination of a program or service by the department of health and human services dues to the unavailability of federal coronavirus funding received under federal law resulting from the federal coronavirus pandemic emergency declarations, for the biennium beginning July 1, 2025, and ending June 30, 2027.

SECTION 31. DEPARTMENT OF HEALTH AND HUMAN SERVICES - LONG-TERM STRUCTURED RESIDENCES PLAN - REPORT. During the 2025-26 interim, the department of health and human services shall review options and develop a plan to establish long-term structured residences. The department shall review necessary changes to statutes, rules, policies, and the estimated fiscal impact of establishing the residences. A long-term structured residence must be a highly structured therapeutic residential mental health treatment facility that is staffed continuously and designed to treat adults under chapters 12.1-04.1 and 25-03.1 who have severe and persistent mental illness and who have reached the maximum benefit from the mental health resources available elsewhere in the community or hospital. The department shall present a report to the legislative management by October 1, 2026, regarding its plan to establish long-term structured residences.

SECTION 32. AMENDMENT. Section 50-06-06.6 of the North Dakota Century Code is amended and reenacted as follows:

50-06-06.6. Department may lease real and personal property.

The commissioner of the department or commissioner's designee may lease ~~surplus farm and pastureland at the state hospital and the life skills and transition center. The commissioner or designee also may enter into further leases of~~ real or personal property at the life skills and transition center or the state hospital upon a specific finding that the granting of each such leasehold interest will result in a net economic gain for the department, taking into account all identifiable costs. Any lease of space for the purpose of providing child care services must meet requirements as determined by the department. The commissioner of the department or commissioner's designee may prescribe the terms and conditions of any leases entered into pursuant to this section and may renew existing leases. ~~Any~~The term of any lease ~~entered into must be subject to renewal or cancelable each biennium~~may not exceed ninety-nine years.

SECTION 33. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system - Mental health treatment voucher system for incarcerated individuals.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services and medical costs provided by licensed substance abuse treatment programs, excluding regional human service centers and hospital- or medical clinic-based programs for medical management of withdrawal.

   a. An out-of-state licensed substance abuse treatment program located within a bordering state may participate in the voucher program to serve an underserved area of this state pursuant to the rules adopted by the department. The department shall develop rules to include processes and requirements for an out-of-state provider to receive reimbursement only for outpatient and community-based services upon a provider completing an assessment of need and receiving approval from the department.

   ~~2.~~b. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures.

   ~~3.~~c. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

   ~~4.~~d. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

   ~~a. No~~

(1) Except as provided in paragraphs 3 and 4, no more than ~~forty-five~~fifty percent of the appropriated amount may be allocated for residential substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

~~b.~~(2) The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

(3) The department, during the last quarter of the biennium, may reallocate projected unused funds that were allocated under paragraph 2 to residential facilities outlined in paragraph 1.

(4) The department may reimburse a licensed substance abuse treatment program with more than sixteen beds the incurred direct medical costs of an eligible individual who does not have resources to cover the medical costs. The department may develop rules and may not exceed the total amount appropriated for medical cost reimbursement.

2. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's mental health treatment system for individuals detained or confined in a county jail or detention center or regional corrections center and to assist in the payment of mental health treatment services provided by a licensed mental health professional acting within their scope of practice, excluding a regional human service center.

a. Services eligible for the voucher program include only diagnostic assessment and mental health therapy for individuals with a mental health concern detained or confined in a county jail or detention center or regional corrections center. The department shall ensure that a licensed mental health professional accepting vouchers collects and reports process and outcome measures.

b. The department shall develop requirements and provide training and technical assistance to licensed mental health professionals accepting vouchers. A licensed mental health professional shall provide evidence-based services.

SECTION 34. AMENDMENT. Section 50-24.5-02.3 of the North Dakota Century Code is amended and reenacted as follows:

50-24.5-02.3. Basic care payment rates.

1. The department shall determine limits for the care of residents of basic care facilities that qualify as vendors of an aged, blind, and disabled persons program and for implementing provisions of this chapter based on data demonstrating the most recent costs that must be incurred for the care of residents in efficiently and economically operated basic care facilities. The department shall determine the limits every four years by July first, beginning with July 1, 2023.
2. The department shall establish the limits by using the median rates from the most recent data available. The direct care limit must be the median plus eighteen percent. The indirect care limit must be the median plus twelve percent.
3. For the rate year beginning July 1, 2023, the department shall increase rates and limits three and one-half percent for inflation. For the rate year beginning July 1, 2024, the department shall increase rates and limits three and one-half percent for inflation.
4. The department shall provide a rate increase in the amount of five dollars per day for the period beginning July 1, 2023, and ending June 30, ~~2025~~2027, after which the increase is not effective. This rate increase may not be included in any calculation of inflation increase.
5. Within the limits of legislative appropriations, the department shall establish an uncompensated care expense of three hundred sixty-five days.

SECTION 35. AMENDMENT. Section 50-33-05 of the North Dakota Century Code is amended and reenacted as follows:

50-33-05. State of residence.

Only child care assistance units physically residing within the boundaries of the state are eligible for child care assistance, unless the individual is employed by an early childhood program within the boundaries of the state and the individual has been approved for the state's child care assistance child care workforce benefit.

SECTION 36. HOUSING AVAILABILITY ASSESSMENT - COLLABORATION WITH HOUSING FINANCE AGENCY. The department of health and human services shall collaborate with the North Dakota housing finance agency and other appropriate stakeholders to assess the

availability of housing for individuals requiring extraordinary health care support services, for the biennium beginning July 1, 2025, and ending June 30, 2027. Based on the results of the assessment, if necessary, the department shall develop a plan to expand access to housing providing the least restrictive environment for individuals requiring extraordinary health care support services.

SECTION 37. BEHAVIORAL HEALTH CLINICS, NORTH DAKOTA STATE HOSPITAL, AND LIFE SKILLS AND TRANSITION CENTER FUNDING. Section 1 of this Act includes funding for the behavioral health clinics, North Dakota state hospital, and life skills and transition center as follows:

1. Behavioral health clinics:		
a.	Salaries and wages	$156,967,103
b.	Operating and capital	64,131,965
c.	Total	$221,099,068
2. State hospital:		
a.	Salaries and wages	$68,775,551
b.	Operating and capital	350,880,155
c.	Total	$419,655,706
3. Life skills and transition center:		
a.	Salaries and wages	$55,540,213
b.	Operating and capital	15,207,658
c.	Total	$70,747,871

SECTION 38. LEGISLATIVE MANAGEMENT STUDY - STUDENT TRUANCY AND ABSENTEEISM. The legislative management shall consider studying, during the 2025-26 interim, truancy and student absenteeism in kindergarten through grade twelve public schools. The legislative management shall report its findings and recommendations, together with any legislation necessary to implement its recommendations, to the seventieth legislative assembly.

SECTION 39. LEGISLATIVE MANAGEMENT STUDY - OBESITY HEALTH IMPLICATIONS. The legislative management shall consider studying, during the 2025-26 interim, the health implications of obesity on the residents of the state and options to increase access to prevention and treatments for obesity. If conducted, the study must review costs associated with obesity including comorbidities, treatments available for obesity, obesity

diagnosis guidelines including use of body mass index compared with percentage of body fat, and examining the difference between being an individual who is healthy and overweight as compared to an obese individual. The legislative management shall report its findings and recommendations, together with any legislation necessary to implement its recommendations, to the seventieth legislative assembly.

SECTION 40. LEGISLATIVE MANAGEMENT REPORT - BEHAVIORAL HEALTH FACILITY GRANTS. During the 2025-26 interim the department of health and human services shall provide reports to the legislative management regarding the award of grant funding to increase the number of behavioral health beds in the state.

SECTION 41. EFFECTIVE DATE. Section 33 of this Act becomes effective on July 1, 2026.

STATEMENT OF PURPOSE OF AMENDMENT:

House Bill No. 1012 - Other Changes - House Action

This amendment also:

- Creates a salaries and wages block grant and provides guidelines regarding the use of the block grant and reporting requirements.
- Identifies appropriations from the strategic investment and improvements fund, community health trust fund, opioid settlement fund, and human service finance fund.
- Provides guidelines for the use of funding provided for a behavioral health facility grant, a community cultural center grant, juvenile justice diversion services, an animal shelter grant, and a statewide health strategies initiative.
- Authorizes DHHS to obtain a $130 million line of credit from the Bank of North Dakota for the State Hospital project.
- Continues the state health laboratory building project steering committee.
- Creates a new state hospital building steering committee.
- Authorizes capital payments for special assessment costs at the State Hospital, Southeast Human Service

Center, and Life Skills and Transition Center.

- Authorizes DHHS to expend funds for capital projects at the State Hospital.
- Identifies $4,672,536 from the general fund for permanent supportive housing grants.
- Provides that expenditures for the Medicaid Expansion program may not exceed legislative appropriations.
- Directs DHHS to continue the process of converting human service centers to certified community behavioral health clinics.
- Provides a moratorium on the number of licensed intermediate care facility beds for individuals with a developmental disability.
- Authorizes DHHS to continue certain unexpended appropriations from previous bienniums into the 2025-27 biennium.
- Provides intent that DHHS seeks a deficiency appropriation from the 70th Legislative Assembly if utilization rates exceed estimates.
- Identifies provider inflation increases of 2 percent per year included in the amendment.
- Provides intent that DHHS remove the requirement that developmental disability providers be accredited to receive payment.
- Provides an individual may not appeal a denial of services or payment under a program if certain federal funding is unavailable.
- Provides for DHHS to create a long-term structured residences plan.
- Amends Section 50-06-06.6 to allow land at the State Hospital and Life Skills and Transition Center to be leased for up to 99 years.
- Amends Section 50-06-42 to expand the use of the substance use disorder voucher program for individuals in jail or a treatment facility with more than 16 beds.
- Directs DHHS to collaborate with the Housing Finance Agency to assess the availability of housing for individuals requiring extraordinary health care support services.
- Provides for a Legislative Management study of student truancy and absenteeism.
- Provides for a Legislative Management study of obesity health implications.

REPORT OF STANDING COMMITTEE
HB 1012

Appropriations Committee (Rep. Vigesaa, Chairman) recommends **AMENDMENTS (25.0156.01018)** and when so amended, recommends **DO PASS** (23 YEAS, 0 NAYS, 0 ABSENT OR EXCUSED AND NOT VOTING). HB 1012 was placed on the Sixth order on the calendar.

25.0156.01017
Title.
Fiscal No. 1

Prepared by the Legislative Council staff for House Appropriations - Human Resources Division Committee
February 25, 2025

Sixty-ninth
Legislative Assembly
of North Dakota

PROPOSED AMENDMENTS TO

HOUSE BILL NO. 1012

Introduced by

Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to amend and reenact sections 50-06-06.6, 50-06-42, 50-24.5-02.3, and 50-33-05 of the North Dakota Century Code, relating to leases of department of health and human services property, substance use disorder treatment program, basic care payment rates, and state of residence for child care assistance; to provide for a transfer; to authorize a line of credit; to provide legislative intent; to provide for a legislative management study; to provide an application; to provide an exemption; ~~and~~ to provide for a report; and to provide an effective date.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from other funds derived from special funds and federal funds, to the department of health and human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2025, and ending June 30, 2027, as follows:

Critical access hospital networking	0	2,000,000	2,000,000
Total	$18,031,736	$379,587,784	$397,619,520

SECTION 3. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within subdivisions 1, 2, 3, 4, ~~and~~ 5, and 6 of section 1 of this Act and any other appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly, for the biennium beginning July 1, 2025, and ending June 30, 2027, as requested by the department of health and human services. The department of health and human services shall notify the legislative council of any transfer made pursuant to this section. The department of health and human services shall report to the budget section after June 30, 2026, any transfer made in excess of $50,000 and to the appropriations committees of the seventieth legislative assembly regarding any transfers made pursuant to this section.

SECTION 4. FULL-TIME EQUIVALENT POSITION BLOCK GRANT PROGRAM - REPORT. Section 1 of this Act includes funding for a full-time equivalent position block grant

program. This funding as approved by the sixty-ninth legislative assembly is available for defraying the expense of full-time equivalent positions as determined by the department of health and human services. Notwithstanding any other provision of law, the department is authorized to increase or decrease authorized full-time equivalent positions subject to the availability of funds and the provisions of this section. The department of health and human services many not increase full-time equivalent positions for the purpose of transferring human service zone employees to state employment. Pursuant to section 3 of this Act, the department is authorized to transfer appropriation authority of up to the underfunded amount of $30,000,000 to the salaries and wages block grant line item. The department of health and human services shall report to the office of management and budget and legislative council any adjustments to full-time equivalent positions.

SECTION 5. DEPARTMENT OF HEALTH AND HUMAN SERVICES - SALARIES AND WAGES BLOCK GRANT - VACANT POSITIONS - REPORT. The department of health and human services shall report to the budget section quarterly during the 2025-26 interim regarding the status of its salaries and wages block grant and vacant positions and employee turnover. The report must include:

1. The legislative appropriation for salaries and wages allocated by the department to major department programs by funding source and the number of FTE positions the department is allocating to each major program based on the legislative appropriation;
2. Any changes to salaries and wages funding or FTE positions allocated to major department programs;
3. Any new FTE positions added, the cost of the position for the remainder of the biennium, and the cost to continue funding the position in the subsequent biennium by funding source;
4. Any FTE positions removed and related funding;
5. The number of FTE positions that become vacant and the number filled each month;
6. The number of vacant FTE positions at the end of each month;
7. Salaries and wages savings resulting from vacant positions and employee turnover each month by funding source; and
8. The use of salaries and wages savings for other purposes for each month by funding source.

SECTION 6. BEHAVIORAL HEALTH FACILITY GRANT - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND - APPLICATION.

1. Section 1 of this Act includes the sum of $12,960,000 from the strategic investment and improvements fund for a behavioral health facility grant pursuant to this section.
2. A grant of $12,960,000 must be provided to establish a behavioral health facility in the northeast human service region. The grant recipient must provide matching funds of $3,240,000 to establish the facility.
3. The department shall require an entity receiving funding under this section to operate the facility for at least ten years and require the grant amount to be repaid if the entity does not operate the facility for at least ten years.
4. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 7. COMMUNITY CULTURAL CENTER GRANT - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND - APPLICATION. Section 1 of this Act includes the sum of $1,000,000 from the strategic investment and improvements fund for the purpose of providing a one-time community cultural center grant in the west central human service region. An entity may apply for a grant under this section if the entity certifies to the department it has secured at least fifty percent of funds needed to complete the project, the project will be completed within two years of receiving the grant funds, and the grants funds will be used only for costs of constructing a community cultural center. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 8. JUVENILE JUSTICE DIVERSION SERVICES AND PROGRAMS - TASK FORCE - REPORT. Section 1 of this Act includes the sum of $750,000 from the general fund for juvenile justice diversion services and programs. The department of health and human services must provide the funding to a statewide regional education association for services to youth at risk of juvenile justice involvement but who have not committed delinquent acts as defined in chapter 27-20.4.

The department shall establish a task force with representation from divisions in the department, human service zones, the department of public instruction, elementary and secondary schools, and members of the legislative assembly, to review juvenile justice diversion

services and program. The department shall report its findings and recommendations to the legislative management and children's cabinet.

SECTION 9. ANIMAL SHELTER GRANT - COMMUNITY HEALTH TRUST FUND. Section 1 of this Act includes the sum of $300,000 from the community health trust fund for a grant for the construction of an animal shelter. The department of health and human services may award a grant for the construction of an animal shelter to an organization that provides twenty dollars of nonstate matching funds for every dollar of grant funds received. The requirements of chapter 54-44.4 do not apply to the selection of a grant recipient, the grant award, or payments made under this section.

SECTION 10. STATEWIDE HEALTH STRATEGIES - COMMUNITY HEALTH TRUST FUND. Section 1 of this Act includes the sum of $750,000 of one-time funding from the community health trust fund for the statewide health strategies initiative. The department of health and human services may spend the funding upon securing dollar-for-dollar matching funds.

SECTION 11. OTHER FUNDS - INSURANCE TAX DISTRIBUTION FUND. The other funds line item in subdivision 5 of section 1 of this Act includes the sum of $1,125,000 from the insurance tax distribution fund for rural emergency medical services grants.

SECTION 12. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND. The other funds line items in section 1 of this Act includes the sum of $38,713,522 from the community health trust fund for the following purposes:

Loan repayment programs	$594,500
Tobacco and vaping programs	11,599,698
Cancer and women's way programs	909,824
Behavior risk state survey	200,000
Domestic violence programs	4,250,000
Local public health grants	3,275,000
988 crisis hotline	1,867,500
Various information technology system upgrades	2,967,000
Grants to rural ambulances	7,000,000
Law enforcement rural crisis support program	1,000,000
Development of partial hospitalization/intensive day treatment	2,000,000

Critical access hospital networking	2,000,000
Animal shelter grant	300,000
Statewide health strategies	750,000
Total	$38,713,522

~~**SECTION 7. OTHER FUNDS - COMMUNITY HEALTH TRUST FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $1,867,500 from the community health trust fund for the 988 crisis hotline program and subdivision 5 of section 1 of this Act includes the sum of $27,072,324 from the community health trust fund for the following programs:~~

~~Behavioral risk factor survey~~	~~$200,000~~
~~Behavioral health loan repayment~~	~~234,500~~
~~Domestic violence offender treatment~~	~~1,000,000~~
~~Domestic violence prevention~~	~~1,000,000~~
~~Women's way~~	~~329,500~~
~~Dentist's loan repayment~~	~~360,000~~
~~Local public health state aid~~	~~3,275,000~~
~~Rural emergency medical and ambulance services grants~~	~~7,000,000~~
~~Cancer programs~~	~~580,324~~
~~Forensic examiner contract~~	~~1,000,000~~
~~Tobacco cessation grants~~	~~500,000~~
~~Youth vaping prevention grants~~	~~300,000~~
~~Tobacco prevention and control~~	~~5,043,000~~
~~Tobacco prevention and control grants to local public health units~~	~~6,250,000~~
~~Total community health trust fund~~	~~$27,072,324~~

SECTION 13. OTHER FUNDS - HUMAN SERVICE FINANCE FUND. The other funds line ~~item~~items in ~~subdivision 3 of~~ section 1 of this Act includes the sum of ~~$226,950,000~~$239,112,030 from the human service finance fund for state-paid economic assistance and social and human services.

~~**SECTION 9. OTHER FUNDS - HEALTH CARE TRUST FUND.** The other funds line item in subdivision 4 of section 1 of this Act includes the sum of $500,000 from the health care trust fund for basic care facility bad debt expense.~~

~~**SECTION 10. OTHER FUNDS - CHARITABLE GAMING OPERATING FUND.** The other funds line item in subdivision 2 of section 1 of this Act includes the sum of $500,000 from the charitable gaming operating fund for costs of gambling disorder prevention services.~~

SECTION 14. OTHER FUNDS - OPIOID SETTLEMENT FUND. The other funds line item in ~~subdivision 2 of~~ section 1 of this Act includes the sum of $8,000,000 from the opioid settlement fund for opioid remediation and abatement efforts.

SECTION 15. OTHER FUNDS - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND The other funds line items in section 1 of this Act includes the sum of $227,474,784 from the strategic investment and improvements fund for the following purposes:

Retiring technology from the mainframe	$7,500,000
Move into the new state laboratory and purchase security equipment	2,962,304
Capital projects in human service centers and life skills and transition center	1,052,480
Housing initiative programs	1,000,000
Technology projects at the state hospital	1,000,000
New state hospital	200,000,000
Behavioral health facility grant	12,960,000
Community cultural center grant	1,000,000
Total	$227,474,784

SECTION 16. OTHER FUNDS - BANK OF NORTH DAKOTA LINE OF CREDIT - STATE HOSPITAL PROJECT. The other funds line item in subdivision 2 of section 1 of this Act includes $130,000,000 from a Bank of North Dakota line of credit. The department of health and human services may borrow up to $130,000,000 through a line of credit from the Bank of North Dakota during the biennium beginning July 1, 2025, and ending June 30, 2027, for costs associated with the construction of a new state hospital. The interest rate on the line of credit may not exceed the prevailing interest rate charged to North Dakota governmental entities. If the department accesses the line of credit, it shall request a deficiency appropriation from the seventieth legislative assembly to repay the line of credit.

SECTION 17. LABORATORY BUILDING STEERING COMMITTEE. The department of health and human services shall maintain the laboratory building steering committee to oversee the design and construction of the laboratory building project, for the biennium beginning July 1, 2025, and ending June 30, 2027, or until work is completed, whichever occurs earlier. The

committee must include representation from the department of health and human services, department of environmental quality, office of management and budget, the governor's office, and the legislative assembly. The legislative assembly representation must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 18. NEW STATE HOSPITAL - STEERING COMMITTEE. The department of health and human services shall establish a new state hospital facility steering committee to oversee the design and construction of a new state hospital facility, for the biennium beginning July 1, 2025, and ending June 30, 2027. The committee must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 19. CAPITAL PAYMENTS. During the biennium beginning July 1, 2025, and ending June 30, 2027, the department of health and human services is authorized to expend funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center. Pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly. The department of health and human services may transfer funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center ahead of the special needs assessments schedule. Notwithstanding section 54-27-12, the department of health and human services may spend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 20. CAPITAL PROJECTS - EMERGENCY COMMISSION AND BUDGET SECTION APPROVAL. During the biennium beginning July 1, 2025, and ending June 30, 2027, pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for capital projects and maintenance pertaining to operation of its

facilities, including demolition projects. Notwithstanding section 54-27-12, the department of health and human services may spend up to $10,000,000 for capital projects and maintenance pertaining to operation of its facilities, including demolition projects, under this section and may seek emergency commission and budget section approval to spend more than $10,000,000 under this section.

SECTION 21. PERMANENT SUPPORTIVE HOUSING GRANTS. Section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of health and human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department of health and human services, and authorize the department of health and human services to conduct onsite visits to review program operations.

SECTION 22. EXPENDITURES MAY NOT EXCEED APPROPRIATION - MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Section 1 of this Act includes the sum of $662,099,340, of which $66,209,934 is from the general fund, for the medical assistance expansion program, for the biennium beginning July 1, 2025, and ending June 30, 2027. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount.
2. The department of health and human services may exceed appropriations for increases in medical assistance expansion program caseload, for the addition of coverage consistent with the traditional Medicaid 1915(i) state plan, utilization rates, and reduction in federal medical assistance percentage.
3. The managed care organization under contract with the department of health and human services to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department of health and human services. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types.

4. The managed care organization and the department of health and human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers,and rural health clinics meet the federally required minimum levels of reimbursement. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs and human service centers may not be paid less than one hundred percent of the current traditional Medicaid rate. Behavioral health services involving partial hospitalization, intensive outpatient, professional services, and residential behavioral health services provided in facilities that are not institutions for mental diseases are not subject to the provisions in subsection 6.
5. The department of health and human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance or adequate capacity and services, and coordination and continuity of care.
6. Except for the provisions in subsection 4, managed care organization premium payments must be built using the assumption that rates paid to providers under the medical assistance expansion program may not exceed one hundred forty-five percent of Medicare reimbursement rates paid to providers on January 1, 2025.

SECTION 23. HUMAN SERVICE CENTERS - CERTIFIED COMMUNITY BEHAVIORAL HEALTH CLINICS - FULL-TIME EQUIVALENT POSITIONS - REPORT. The department of health and human services shall continue the process of the human service centers becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults. The department of health and human services shall pursue additional federal funding as available. Subject to the availability of generated income, the department of health and human services may add full-time equivalent positions for the clinics to provide direct services for the period beginning with the effective date of this Act and ending June 30, 2027. The department of health and human services shall report to the office of management and budget and legislative council each time a position is added.

SECTION 24. INTERMEDIATE CARE FACILITY MORATORIUM. The department of health and human services may not add any new licensed intermediate care facility for individuals with

intellectual disabilities beds to the state's licensed bed capacity between July 1, 2025, and June 30, 2027.

SECTION 25. EXEMPTION - UNEXPENDED APPROPRIATIONS. The following appropriations are not subject to the provisions of section 54-44.1-11 and any unexpended appropriation authority may be continued into the biennium beginning July 1, 2025, and ending June 30, 2027:

1. The sum of $3,674,757 appropriated from the general fund and the sum of $25,918,566 appropriated from federal funds for the Medicaid management information system modularization technology project in chapter 12 of the 2021 Session Laws;
2. The sum of $14,411,218 appropriated from the general fund and the sum of $14,411,218 appropriated from federal funds for the child welfare technology project in chapter 12 of the 2021 Session Laws;
3. The sum of $20,366,271 appropriated from the community health trust fund and the sum of $39,534,525 appropriated from federal funds for the child support computer replacement project in chapter 44 of the 2023 Session Laws;
4. The sum of $10,989,217 appropriated from the strategic investment and improvements fund for the procurement and grants management system in chapter 44 of the 2023 Session Laws;
5. The sum of $4,150,000 appropriated from the general fund for defraying the expenses of additional human service centers to begin the process of becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults in chapter 44 of the 2023 Session Laws;
6. The sum of $18,941,847 appropriated to the department of health and human services in chapter 549 of the 2021 Special Session Laws;
7. The sum of $55,120,000 appropriated from the federal state fiscal recovery fund for a public health laboratory capital project in chapter 4 of the 2023 Session Laws;
8. The sum of $5,000,000 appropriated from the general fund for the purpose of employer-led child care cost-share program in chapter 446 of the 2023 Session Laws;
9. The sum of $986,555 appropriated from the general fund for the purpose of streamlining background checks project in chapter 446 of the 2023 Session Laws;

10. The sum of $2,223,981 appropriated from the federal state fiscal recovery fund for the implementation of a virtual behavioral health crisis care program for rural law enforcement in chapter 44 of the 2023 Session Laws; and
11. The sum of $500,000 appropriated from the general fund and the sum of $500,000 appropriated from federal funds for the purpose of program integrity audits in chapter 44 of the 2023 Session Laws.

SECTION 26. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services seek a deficiency appropriation from the seventieth legislative assembly for any expenditures that exceed appropriated amounts as a result of underfunding, utilization rates, value-based purchasing for nursing facilities, reduction in federal medical assistance percentage, and unexpected contract cost increases that exceed ten percent, during the biennium beginning July 1, 2025, and ending June 30, 2027, if funding is not sufficient to pay actual expenses.

SECTION 27. LEGISLATIVE INTENT - PROVIDER RATE INCREASE. Except as otherwise noted, section 1 of this Act includes funding for human service provider inflation increases of two percent for each year of the biennium beginning July 1, 2025, and ending June 30, 2027. The provider inflation increase in this section does not apply to nursing facilities.

SECTION 28. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITIES PROVIDER ACCREDITATION REQUIREMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services eliminate its administrative rule requirement that providers of developmental disabilities services be accredited as a condition of being eligible for receiving payments for services from the department of health and human services.

SECTION 29. LEGISLATIVE INTENT - MEDICAL ASSISTANCE. It is the intent of the sixty-ninth legislative assembly that the department of health and human services review the amount, duration, coverage, utilization rates, medical necessity, and scope of medical assistance services, and may implement any adjustments the department determines appropriate.

SECTION 30. FEDERAL FUNDING APPEAL LIMITATION. Except as otherwise specifically provided by federal law, a person may not appeal a denial, revocation, reduction in services or payment, or the termination of a program or service by the department of health and human services dues to the unavailability of federal coronavirus funding received under federal

law resulting from the federal coronavirus pandemic emergency declarations, for the biennium beginning July 1, 2025, and ending June 30, 2027.

SECTION 31. DEPARTMENT OF HEALTH AND HUMAN SERVICES - LONG-TERM STRUCTURED RESIDENCES PLAN - REPORT. During the 2025-26 interim, the department of health and human services shall review options and develop a plan to establish long-term structured residences. The department shall review necessary changes to statutes, rules, policies, and the estimated fiscal impact of establishing the residences. A long-term structured residence must be a highly structured therapeutic residential mental health treatment facility that is staffed continuously and designed to treat adults under chapters 12.1-04.1 and 25-03.1 who have severe and persistent mental illness and who have reached the maximum benefit from the mental health resources available elsewhere in the community or hospital. The department shall present a report to the legislative management by October 1, 2026, regarding its plan to establish long-term structured residences.

SECTION 32. AMENDMENT. Section 50-06-06.6 of the North Dakota Century Code is amended and reenacted as follows:

50-06-06.6. Department may lease real and personal property.

The commissioner of the department or commissioner's designee may lease ~~surplus farm and pastureland at the state hospital and the life skills and transition center. The commissioner or designee also may enter into further leases of~~ real or personal property at the life skills and transition center or the state hospital upon a specific finding that the granting of each such leasehold interest will result in a net economic gain for the department, taking into account all identifiable costs. Any lease of space for the purpose of providing child care services must meet requirements as determined by the department. The commissioner of the department or commissioner's designee may prescribe the terms and conditions of any leases entered into pursuant to this section and may renew existing leases. ~~Any~~The term of any lease ~~entered into must be subject to renewal or cancelable each biennium~~may not exceed ninety-nine years.

SECTION 33. AMENDMENT. Section 50-06-42 of the North Dakota Century Code is amended and reenacted as follows:

50-06-42. Substance use disorder treatment voucher system - Mental health treatment voucher system for incarcerated individuals.

1. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's substance abuse treatment system and to assist in the payment of addiction treatment services and medical costs provided by licensed substance abuse treatment programs, excluding regional human service centers and hospital- or medical clinic-based programs for medical management of withdrawal.

   a. An out-of-state licensed substance abuse treatment program located within a bordering state may participate in the voucher program to serve an underserved area of this state pursuant to the rules adopted by the department. The department shall develop rules to include processes and requirements for an out-of-state provider to receive reimbursement only for outpatient and community-based services upon a provider completing an assessment of need and receiving approval from the department.

   ~~2.~~b. Services eligible for the voucher program include only those levels of care recognized by the American society of addiction medicine, with particular emphasis given to underserved areas and programs. The department shall ensure that a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers collects and reports process and outcome measures.

   ~~3.~~c. The department shall develop requirements and provide training and technical assistance to a licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers. A licensed substance abuse treatment program, hospital, and medical clinic program accepting vouchers shall provide evidence-based services.

   ~~4.~~d. The department shall allocate funding appropriated for the substance use disorder treatment voucher as follows:

      ~~a.~~(1) ~~No~~Except as provided in paragraphs 3 and 4, no more than ~~forty-five~~fifty percent of the appropriated amount may be allocated for residential

substance use disorder services administered by licensed substance abuse treatment programs with more than sixteen beds.

~~b.~~(2) The remaining appropriation must be allocated for residential programs with sixteen or fewer beds, nonresidential outpatient, and ancillary substance use disorder services administered by licensed substance abuse treatment programs.

(3) The department, during the last quarter of the biennium, may reallocate projected unused funds that were allocated under paragraph 2 to residential facilities outlined in paragraph 1.

(4) The department may reimburse a licensed substance abuse treatment program with more than sixteen beds the incurred direct medical costs of an eligible individual who does not have resources to cover the medical costs. The department may develop rules and may not exceed the total amount appropriated for medical cost reimbursement.

2. The department shall establish and administer, within the limits of legislative appropriations, a voucher system to address underserved areas and gaps in the state's mental health treatment system for individuals detained or confined in a county jail or detention center or regional corrections center and to assist in the payment of mental health treatment services provided by a licensed mental health professional acting within their scope of practice, excluding a regional human service center.

a. Services eligible for the voucher program include only diagnostic assessment and mental health therapy for individuals with a mental health concern detained or confined in a county jail or detention center or regional corrections center. The department shall ensure that a licensed mental health professional accepting vouchers collects and reports process and outcome measures.

b. The department shall develop requirements and provide training and technical assistance to licensed mental health professionals accepting vouchers. A licensed mental health professional shall provide evidence-based services.

SECTION 34. AMENDMENT. Section 50-24.5-02.3 of the North Dakota Century Code is amended and reenacted as follows:

50-24.5-02.3. Basic care payment rates.

1. The department shall determine limits for the care of residents of basic care facilities that qualify as vendors of an aged, blind, and disabled persons program and for implementing provisions of this chapter based on data demonstrating the most recent costs that must be incurred for the care of residents in efficiently and economically operated basic care facilities. The department shall determine the limits every four years by July first, beginning with July 1, 2023.
2. The department shall establish the limits by using the median rates from the most recent data available. The direct care limit must be the median plus eighteen percent. The indirect care limit must be the median plus twelve percent.
3. For the rate year beginning July 1, 2023, the department shall increase rates and limits three and one-half percent for inflation. For the rate year beginning July 1, 2024, the department shall increase rates and limits three and one-half percent for inflation.
