10. Includes funding for developmental disabilities services	$354,261,865	$390,731,726	$744,993,591

Continuing Appropriations

Medical marijuana - North Dakota Century Code Section 19-24.1-40 - Establishes the medical marijuana fund and requires the Department of Health and Human Services (DHHS) deposit in the fund all fees collected under the medical marijuana chapter. The department must administer the fund and money in the fund is appropriated to the department on a continuing basis for use in administering the medical marijuana chapter. For the 2021-23 biennium, the fund had $2,144,824 of revenues, $1,609,657 of expenditures, and a June 30, 2023, fund balance of $1,739,396.

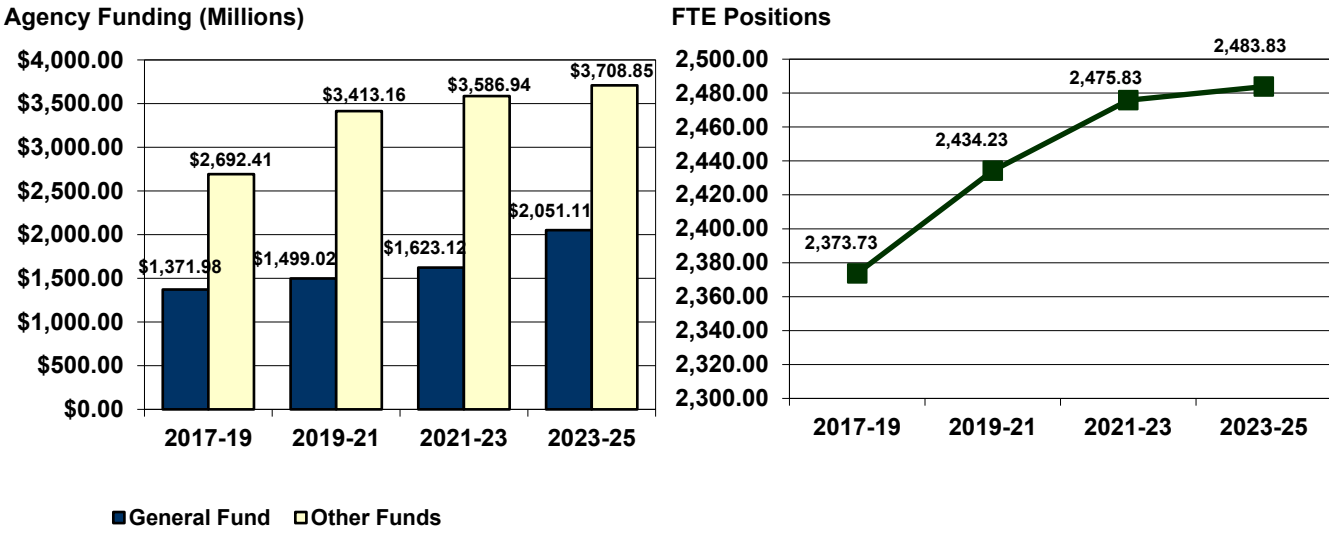
Combined purchasing with local public health units - Section 23-01-28 - Provides DHHS may make combined or joint purchases with or on behalf of local public health units for items or services. Payments received by DHHS from local public health units pursuant to a combined or joint purchase must be deposited in the operating fund and are appropriated as a standing and continuing appropriation to the department for purchases under the section. For the 2021-23 biennium, the department received no payments from the public health units.

Organ tissue transplant fund - Sections 23-01-05.1 and 57-38-35.1 - Provides financial assistance to organ or tissue transplant patients who are residents of North Dakota and demonstrate financial need. Tax refunds of less than $5 are transferred to the organ tissue transplant fund. The State Health Officer is responsible for adopting rules and administering the fund, and the Tax Department collects the funds. For the 2021-23 biennium, the fund had $36,440 of revenues, $12,404 of expenditures, and a June 30, 2023, fund balance of $142,720.

Cardiac ready community grant program - Section 23-38.1-03 - Provides DHHS may accept any gifts, grants, or donations, whether conditional or unconditional. The department or local grantees may contract public or private entities and may expend any available money to obtain matching funds for the purposes of this chapter. All money received by DHHS as gifts, grants, or donations under this section are appropriated on a continuing basis to the department's operations fund for the purpose of funding the grant program. For the 2021-23 biennium, the department received $500 of revenues for the program.

Veterinarian and dental loan repayment - Sections 43-29.1-08 and 43-28.1-09 - The State Health Council may accept any conditional or unconditional gifts, grants, or donations for the purpose of providing funds for the repayment of veterinarians' education loans or dentists' education loans. All money received as gifts, grants, or donations under these sections is appropriated on a continuing basis to the State Health Council for the purpose of providing funds for the repayment of additional veterinarians' or dentists' education loans. If an entity desires to provide funds to the State Health Council to allow an expansion of the program beyond three veterinarians or dentists, the entity must fully fund the expansion for a period of 4 years. For the 2021-23 biennium, the department had $597,910 of expenditures for the dental loan repayment program and $405,000 of expenditures for the veterinarian loan repayment program.

Child support collection and disbursement - Section 14-09-25 - Allows the department to receive child support payments and provide the funds to the custodial parent or appropriate governmental entity for those custodial parents receiving governmental assistance. For the 2021-23 biennium, the department had $271,267,346 of collections and $270,835,407 of disbursements.



Child support improvement account - Section 50-09-15.1 - Allows the department to receive federal child support incentive funds and spend the funds in accordance with its business plan to improve the child support collection process. For the 2021-23 biennium, the department received $3.8 million of revenues from federal child support incentive funds.

Child support cooperative agreements - Section 50-09-33 - Allows the department to accept federal funds and other income generated by the department under a cooperative agreement with an Indian tribe for child support enforcement services for hiring staff and payment of other expenses as necessary for carrying out the department's duties under the agreement. For the 2021-23 biennium, the department received no funds for the program.

Transition to independence - Section 50-06-34 - Allows the department to receive grants and other sources of funding for the development of a program for services to transition-aged youth at risk. For the 2021-23 biennium, the department received no funds for the program.

Historical Appropriations Information

Agency Appropriations and FTE Positions

Ongoing General Fund Appropriations

	2015-17	2017-19	2019-21	2021-23	2023-25
Ongoing general fund appropriations	$1,311,460,589	$1,345,831,659	$1,497,421,474	$1,593,362,809	$2,011,427,547
Increase (decrease) from previous biennium	N/A	$34,371,070	$151,589,815	$95,941,335	$418,064,738
Percentage increase (decrease) from previous biennium	N/A	2.6%	11.3%	6.4%	26.2%
Cumulative percentage increase (decrease) from 2015-17 biennium	N/A	2.6%	14.2%	21.5%	53.4%

Major Increases (Decreases) in Ongoing General Fund Appropriations

2017-19 Biennium

1.	Reduced base budget, including salaries and wages, operating expenses, and grants	($2,031,418)
2.	Removed 6 undesignated FTE positions, including related funding for salaries and wages	($475,736)
3.	Increased funding for state aid grants to local public health units and adjusted the funding sources to provide a total of $5.25 million, of which $3.25 million was from the general fund and $2 million was from the tobacco prevention and control trust fund	($1,000,000)
4.	Adjusted funding for certain programs to provide $2,224,862 from the tobacco prevention and control trust fund instead of the general fund	($2,224,862)
5.	Reduced funding for emergency medical services grants to provide a total of $7,721,000. Emergency medical services rural assistance grants totaled $6,875,000, of which $5,625,000 was from the general fund and $1,250,000 was from the insurance tax distribution fund. Emergency medical services training grants totaled $846,000 from the general fund.	($561,820)
6.	Added ongoing funding and authorization for 6 FTE positions to establish a Medical Marijuana Division, based on the fiscal note for Senate Bill No. 2344, to provide total ongoing funding of $1,465,704, including funding provided for employee health insurance premium increases, of which $723,270 was from the general fund and $742,434 was from the medical marijuana fund	$723,270
7.	Removed 33 FTE positions from the department	($3,127,902)
8.	Reduced funding for staff overtime	($1,082,857)
9.	Adjusted funding for child care assistance eligibility	($2,160,357)
10.	Adjusted the professional fee schedule to 100 percent of Medicare and provided other policy changes	($10,612,966)
11.	Added funding to continue Medicaid Expansion for 19 and 20 year olds as managed care	$1,653,008
12.	Changed a portion of funding sources for various programs from the general fund to the community health trust fund ($18,000,000) and the tobacco prevention and control trust fund ($22,175,000)	($40,175,000)

13. Added funding for nursing home operating margin, rebasing, and incentives	$1,783,181
14. Added funding for money follows the person grants	$527,954
15. Added funding to increase the autism waiver maximum age to 11 years old	$183,609
16. Reduced funding for vacant positions and employee turnover at institutions	($3,250,499)

2019-21 Biennium

1. Adjusted funding for base budget changes, including increases relating to technology, professional development, travel, and other operating expenses; and various grant programs, including the state-funded loan repayment programs and federal grant programs	$1,109,194
2. Provided funding from the general fund and the community health trust fund for various programs funded from the tobacco prevention and control trust fund during the 2017-19 biennium, including the tobacco prevention and control program, state aid to local public health units, the stroke and cardiac care program, cancer programs, medical and behavioral health loan repayment programs, and domestic violence offender treatment	$6,378,195
3. Removed 6.5 FTE undesignated positions and related funding for salaries and wages and operating expenses agencywide	($3,184,844)
4. Removed 1 FTE office assistant III position, including salaries and wages, and related funding for the medical marijuana program because these costs will be paid through a continuing appropriation	($451,267)
5. Transferred the suicide prevention program from the State Department of Health to the Department of Human Services, including 1 FTE position and related funding for salaries and wages, operating expenses, and grants	($1,260,512)
6. Added 1 FTE food and lodging environmental health position, including salaries and wages of $159,720 and operating expenses of $26,185	$185,905
7. Increased funding for temporary salaries related to life safety construction and renovation plan review to provide a total of $130,000, of which $50,000 was from the general fund and $80,000 was from fee revenue	$50,000
8. Added funding to implement an emergency medical services data licensing and records management system	$126,000
9. Added funding for operating expenses related to Microsoft Office 365 licensing expenses	$42,377
10. Changed the funding source for cancer programs and domestic violence offender treatment grants to the tobacco prevention and control trust fund and increased domestic violence offender treatment grants by $50,000. A total of $880,324 was provided from the tobacco prevention and control trust fund for cancer programs ($580,324) and domestic violence offender treatment grants ($300,000).	($830,324)
11. Added funding to transfer reporting of youth access to tobacco from the Department of Human Services to the State Department of Health	$75,000
12. Increased funding for sexual violence primary prevention program grants to provide a total of $2.45 million, of which $2.11 million was from the general fund	$200,000
13. Added funding for provider inflationary increases of 2 percent the 1st year of the biennium and 2.5 percent the 2nd year of the biennium	$30,155,090
14. Adjusted funding for anticipated changes in the regular federal medical assistance percentage (FMAP)	($25,682,840)
15. Adjusted funding for anticipated changes in the FMAP for Medicaid Expansion ($20,254,376) and the children's health insurance program ($6,152,757)	$26,407,133
16. Added funding for grant cost and caseload changes	$51,128,377
17. Replaced funding provided in the 2017-19 biennium from the tobacco prevention and control trust fund	$34,175,000
18. Replaced one-time funding provided in the 2017-19 biennium for Medicaid Expansion commercial rates	$13,300,000
19. Adjusted funding sources to use funding from the community health trust fund rather than the general fund	($32,400,000)
20. Added funding for the free through recovery program to provide services to individuals outside of the corrections system	$4,000,000
21. Added funding to expand crisis services	$4,096,174
22. Added funding for the substance use disorder voucher program	$3,053,523

2021-23 Biennium

1. Transferred 4 FTE data processing coordinator III positions to the Information Technology Department for the information technology unification initiative, including a decrease in the salaries and wages and tobacco prevention line items, and an increase in the operating expenses line item	$2,135

2.	Added 10.5 FTE positions, including funding from the general fund for salaries and wages ($354,335), 7 temporary positions ($436,497), and operating expenses ($3,668,934) for the COVID-19 response. Ongoing funding added for the COVID-19 response totals $4,459,766 from the general fund and was included in Senate Bill No. 2004. In addition, the Legislative Assembly provided $5,608,094 from federal funds in House Bill No. 1394 as a 2019-21 biennium appropriation and allowed the department to continue the funding to the 2021-23 biennium for the COVID-19 response for these items.	$4,459,766
3.	Adjusted the funding source for salaries and wages related to the plans review program within the Life, Safety, and Construction Division from the general fund to special funds from program fees	($312,706)
4.	Adjusted funding for cost-to-continue items, including a shift from professional fees to grants and adjustments to provide funding for certain items from the community health trust fund instead of the tobacco prevention and control trust fund	$1,890,945
5.	Increased funding from the community health trust fund for tobacco prevention and control, including funding for professional fees and grants	($1,108,000)
6.	Adjusted funding for an increase in the federal indirect rate to support agencywide costs	($1,060,000)
7.	Increased funding for operating expenses related to the University of North Dakota forensic examiner contract, to provide a total of $1,625,270, of which $1,000,000 was from the community health trust fund and $625,270 was from the general fund	$105,270
8.	Added funding for cost, caseload, and utilization changes, including $156,789,851 for medical services, $77,698,712 for long-term care, and $41,567,021 for developmental disabilities	$124,345,846
9.	Increased funding for substance use disorder vouchers to $15 million and added $2 million for substance use disorder grants	$9,000,000
10.	Added funding for a new early childhood program	$1,500,000
11.	Reduced funding for long-term care estimated utilization rates	($9,395,558)
12.	Transferred 19 and 20 year old individuals in Medicaid Expansion to a fee-for-service arrangement	($2,413,379)
13.	Adjusted funding based on estimated FMAP rates	($45,779,364)
14.	Added provider inflation funding to provide a 2.0 percent increase the 1st year of the biennium and a 0.25 percent increase the 2nd year of the biennium	$18,998,506
15.	Added funding for technology contractual services and repairs	$4,010,886

2023-25 Biennium

1.	Increased funding to maintain public health registries	$701,553
2.	Increased funding for domestic violence prevention to provide a total of $4,596,285	$2,686,285
3.	Added funding for a child care and workforce initiative, including enhancements to the background check process, increased eligibility and payments for child care assistance, and worker training stipends	$43,600,000
4.	Added funding to provide 3 percent per year inflationary increases, except as noted in medical services, long-term care, and developmental disabilities	$37,253,974
5.	Added funding for estimated cost and caseload increases	$122,273,747
6.	Added funding for FMAP adjustments based on a rate of 52.50 percent for federal fiscal years 2024 and 2025	$21,621,657
7.	Increased the eligibility level for medically needy individuals from 83 to 90 percent of the federal poverty level	$6,300,000
8.	Adjusted inflation as noted in #4 above for prospective payment system hospitals from 3 percent each year to 0 percent the 1st year and 2 percent the 2nd year of the biennium	($4,385,331)
9.	Reduced estimated utilization rates as noted in #5 above for Medicaid Expansion ($110,753,873 total funds) and provided for a realigned rate structure to pay 145 percent of traditional Medicaid costs effective January 1, 2025, ($29,179,602 total funds) except for behavioral health providers	($13,993,347)
10.	Increased funding for home- and community-based services, including an increase in the personal needs allowance, an increase in adult foster care rates, an increase in the family home care rate to $72.50 per day, and other enhancements	$8,288,319
11.	Removed $300,000 from the general fund to eliminate the autism spectrum disorder voucher program and increased funding for the autism waiver program	$3,868,959
12.	Added funding for a long-term care value-based payment program	$6,000,000
13.	Reduced estimated long-term care utilization rates based on the estimated cost and caseload increases as noted in #5 above	($9,949,900)
14.	Added funding to rebase basic care rates effective July 1, 2023	$3,880,000
15.	Increased the basic care daily rate by $5 for the 2023-25 biennium	$4,067,056

16. Increased senior meal rates from $4.60 to $8.89 for home-delivered meals and from $4.60 to $7.62 for congregate meals and provides for up to two home-delivered meals per day — $12,992,444
17. Added funding for foster care to allow temporary assistance for needy families funding to be redirected to economic assistance programs — $7,496,368
18. Increased funding for the community connect program to provide total funding of $15 million — $7,019,514
19. Adjusted funding for the free through recovery program to provide funding directly to DHHS for the program rather than using passthrough funds from the Department of Corrections and Rehabilitation — $15,500,000
20. Added funding for school behavioral health grants to provide total funding of $9.5 million — $6,500,000
21. Provided enhanced payment rates to disabilities providers to provide for a $1 per hour increase for workers and 2 percent annual inflation increases rather than 3 percent each year — $12,888,560
22. Combined the best in class program and the kindergarten readiness program into the research-based 0-4 program — $14,400,000
23. Increased funding for crisis support services — $8,561,700
24. Added funding to establish a certified community behavioral health clinic at a human service center — $3,938,041

One-Time General Fund Appropriations

	2015-17	2017-19	2019-21	2021-23	2023-25
One-time general fund appropriations	$18,508,167	$26,000,000	$1,602,603	$29,761,492	$39,682,172

Major One-Time General Fund Appropriations

2017-19 Biennium

1. Added one-time funding for a county social services pilot program — $26,000,000

2019-21 Biennium

1. Added one-time funding, including funding from federal funds and fee revenue, for microbiology laboratory information technology upgrades, to provide a total of $483,000, of which $90,000 was from the general fund, $360,000 was from federal funds, and $33,000 was from fee revenue — $90,000
2. Added one-time funding for a medically complex children provider funding adjustment — $977,603
3. Added one-time funding for a hyperbaric oxygen therapy pilot project — $335,000

2021-23 Biennium

1. Added one-time funding, including $4,515,296 from the community health trust fund, for costs related to the COVID-19 response, including salaries and wages, grants, and other operating expenses — $4,747,045
2. Added one-time funding, of which $128,769 was from federal funds, for operating expenses ($60,000) and capital assets ($850,000) for forensic examiner equipment ($500,000) and a forensic electronic records system ($350,000) — $781,231
3. Added one-time funding for the first phase of upgrading the Medicaid management information system — $4,326,686
4. Added one-time funding for a child welfare technology project — $15,000,000
5. Added one-time funding for changes associated with the implementation of a new nursing facility payment methodology — $3,348,000
6. Added one-time funding for heat pump and carpet replacement projects at the Southeast Human Service Center — $724,000

2023-25 Biennium

1. Added one-time funding for operating inflation — $10,282,172
2. Added one-time funding for Medicaid program integrity audits — $2,250,000
3. Added one-time funding for a northwest region behavioral health facility — $1,950,000
4. Added one-time funding for a child care and workforce initiative — $19,000,000
5. Added one-time funding for a family caregiver service pilot project — $2,500,000
6. Added one-time funding for State Hospital building demolition — $4,000,000

Department of Health and Human Services
Department No. 325
2025 House Bill No. 1012

EXECUTIVE BUDGET RECOMMENDATION
2025-27 BIENNIUM

Budget Summary

	FTE Positions	General Fund	Other Funds	Total
Executive budget recommendation	**2,762.35**	**$2,360,629,103**	**$3,693,933,879**	**$6,054,562,982**
Base level	2,483.83	2,011,427,547	3,541,730,000	5,553,157,547
Increase (decrease)	278.52[1]	$349,201,556	$152,203,879	$501,405,435
Percentage increase (decrease)	11.2%	17.4%	4.3%	9.0%

[1]Of these positions, 98 FTE positions relate to positions added during the 2023-25 biennium with funding approved by the 2023 Legislative Assembly but for which specific FTE authorization was not increased because of the salary and wages block grant.

NOTE:
More detailed information on the executive budget recommendation is attached as Appendix A.

A copy of the draft appropriations bill reflecting the executive budget recommendation is attached as Appendix B.

Selected Highlights

- Salary increases of up to 4 percent effective July 1, 2025, and 3 percent effective July 1, 2026.
- Health insurance increase of $250 per month (15.23 percent), from $1,643 to $1,893, per employee.
- Provides for an additional 75 FTE positions during the 2025-27 biennium, including 45 FTE positions for the human service centers and other additions across the department. During the 2023-25 biennium, the department added 203.52 FTE positions as part of the salary and wages block grant. The department has not provided detail on the position titles or funding for these positions included in the 2025-27 biennium.
- Provides $93 million, including a reduction of $123.4 million in federal funds and an increase of $176.2 million from the general fund for cost to continue, anticipated cost and caseload adjustments, Medicaid Expansion reductions, federal medical assistance percentage changes, and utilization changes in the department's budget.
- The federal medical assistance percentage is estimated in the budget at 50.00 percent for the 2026 and 2027 federal fiscal years. The actual rate for 2026 federal fiscal year will be 50.99 percent.
- Provides $58.3 million, of which $29.3 million is from the general fund, for inflationary increases of 2 percent the 1st year of the biennium and 2 percent the 2nd year of the biennium for human service providers in the 2025-27 biennium.
- Adds $2.5 million of which $634,154 is from the general fund and $1.8 million from other funds removed from the Public Health Division to replace funding removed in the 2023-25 biennium for the new and vacant FTE funding pool.
- Provides a $14.5 million one-time appropriation from the strategic investment and improvements fund (SIIF) for housing initiatives including $3.5 million for eviction prevention; $1 million for home renovations for accessibility; and $10 million for assistance for citizens at risk for housing instability.
- Provides technology investments of $40.7 million of which $16 million is a one-time appropriation from SIIF to retire systems from outdated platforms and $24.7 million for technology contract inflation.
- Continues funding the rural crisis support pilot program created during the 2023 legislative session with $2 million from the community health trust fund.
- Provides home- and community-based services (HCBS) investments of $18.8 million of which $10.3 million is from the general fund. Enhanced programs include services to support transition and diversion from institutions for $5.3 million; cross-disability waiver implementation for $5.7 million; and targeted rate increases for qualified service providers and home health providers for $7.8 million.
- Provides $12.4 million of which $7.9 is from the general fund to continue the family paid caregiver pilot program.

- Recommends $10 million of one-time funding from SIIF to complete construction planning of a new state hospital and authorize proceeding with a new state hospital under a public-private partnership, North Dakota Century Code Chapter 48-02.1.
- Increases home- and community-based care funding by 69 percent for the 2025-27 biennium, including an increase of $78.5 million from base budget for the aged and disabled waiver and an increase of $23.4 million for personal care services.

Deficiency Appropriations

There are no deficiency appropriations for this agency.

Significant Audit Findings

The June 30,2023, State Auditor's report for the Department of Health and Human Services (DHHS) identified the following audit findings:

- **Workforce retention grants not passed through agencies to caregivers** - The grants are required to be passed through agencies to employees that spend at least 25 percent of their paid time providing direct care and no less than 51 percent of their paid time in a noninstitutional setting. A total of $7,130 in the sample was given to administrative or other employees with a potential of $20,434 in potential ineligible payments made to employees that did not qualify for the grant. All nonagency HCBS caregiver grants were paid in accordance with the policies of the department.
- **Ineligible agency employees received workforce retention grants** - Employees that did not qualify for the grant based on not working more than 51 percent of their time in a noninstitutional setting still received a grant. A total of $26,342 in grants were given to ineligible employees in the sample which projects to potential ineligible payments of $409,783.
- **No measurement of program goals for workforce retention grants** - The workforce retention incentive program purpose was to stabilize and strengthen the network of direct caregivers who provide HCBS care. The department did not identify any metrics to measure the effectiveness of the program in achieving the intended goal.
- **Weak controls over controlled substances at the State Hospital** - No diversion of controlled substances was identified; however, the identified weaknesses increase the risk for diversion of controlled substances to occur. Monthly pharmacist or designee walkthroughs documented unlocked drawers containing controlled substances, controlled substance audits not reconciled to the record book, and medication cart keys not being secured.
- **Controlled substances not secured during onsite walkthrough** - Two nursing units kept the keys to the controlled substances in an unlocked drawer, one nursing unit had the lock combination on a sticky note on the outside of the cart, and one controlled substance count book was signed before the physical count.
- **Controlled substance waste** - All unused or refused medication must be properly disposed in a locked tamper-proof container referred to as "wasting" with dual signature control. Often these are controlled substances with a half tablet prescribed. The remaining half needs to be properly disposed. In 20 of 180 instances tested, the remaining half tablet did not have dual signatures when disposed. In an additional 13 of the same 180 instances, the remaining half tablet was kept and administered later. Policy states that any remaining half tablet must be disposed of properly with two signatures.
- **Automated medication dispensing system access** - There were 11 former employees out of 124 active users that were still active in the medication dispensing system. None of the login credentials for former employees had been used to access the system after the employee's termination.
- **Children in suspected abuse situations not being contacted timely (Prior audit finding)** - DHHS requires face-to-face contact to be made with suspected victims of child abuse or neglect with 24 hours or up to 14 days depending on the severity of the child abuse report. The department is unable to effectively monitor the face-to-face contact due to incorrect dates being entered into the tracking system. Of 30 assessments tested, 12 had incorrect dates and 25 of the 30 assessments did not have face-to-face contact within the required time. This finding was first discovered and reported in the 2014-15 audit. Human service zone employees are responsible for making the contact and entering the information.

Prior audit findings not fully implemented:

- **Unsupported drug rebate and analysis system receivable balances** - Receivable balances need to be supported by a detailed listing of drug manufacturer accounts. The department is working with the system developer to resolve the issue with historical records and there are several outstanding work orders with the developer. The department continues to work toward getting more accurate data.
- **Inaccurate inventory and storage location of COVID-19 vaccine vials** - Recommended to follow the Centers for Disease Control guidance to reconcile all vaccines in storage monthly, including verifying the location. The department inventoried the vaccine count on a regular basis but did not consistently reconcile the storage location of the vaccine which is important for temperature and efficacy and expiration.

Agency Fees

As reported to the Legislative Management, pursuant to Section 54-35-27, this agency has 52 fees. The agency recommended the following changes to its fees:

- Increase the amount charged for Medicaid application fees.
- No other recommended fee changes.

Major Related Legislation

House Bill No. 1037 - Provides appropriations of $750,000 each to the Agriculture Commissioner, Attorney General, Department of Transportation, DHHS, and Department of Career and Technical Education for uncrewed aircraft systems, autonomous vehicles, or other autonomous technologies.

House Bill No. 1067 - Changes the age from 18 to 21 to administer Medicaid waivers to provide in-home services to children with extraordinary medical needs and to children diagnosed with an autism spectrum disorder and would otherwise meet institutional level of care.

House Bill No. 1070 - Changes the modified adjusted gross income eligibility limit for the children's health insurance program from 210 to 205 percent of the federal poverty level.

Senate Bill No. 2029 - Creates the Office of Guardianship and Conservatorship as a division under the Supreme Court and provides an appropriation to defray the expenses of the office.

Senate Bill No. 2033 - Creates a distressed ambulance service program.

Senate Bill No. 2036 - Provides an appropriation to administer the fitness to proceed and remediation of juveniles relating to the age of an offender, suspension or dismissal of proceedings, predispositional assessment, and the definition of a child in need of protection.

Senate Bill No. 2096 - Provides for an appropriation for State Hospital facilities and for regional acute psychiatric treatment and residential supportive housing services.

NOTE:
Please see the Fiscal Impact Report for additional information regarding bills under consideration which contain either a state revenue impact, an appropriation, or a state fiscal impact.

Other Sections in Department of Health and Human Services - Budget No. 325

Section Description	Executive Budget
Funding transfers	Section 3 authorizes the transfer of appropriation authority between line items within Section 1 of the bill.
FTE position block grant program	Section 4 authorizes DHHS to increase or decrease the authorized FTE positions subject to the availability of funds.
Estimated income - Human service finance fund	Section 5 identifies $238,401,207 from the human services finance fund for state-paid economic assistance and social and human services.

Other Sections in Department of Health and Human Services - Budget No. 325

Section Description	Executive Budget
Estimated income - Community health trust fund	Section 6 identifies $40,458,933 from the community health trust fund for the following purposes: loan repayment programs ($594,500), tobacco and vaping programs ($11,191,683), cancer and women's way programs ($909,824), behavioral risk state survey ($200,000), domestic violence programs ($4,501,342), local public health grants ($3,275,000), 988 crisis hotline ($1,867,500), forensic examiner at UND ($2,866,156), various information technology system upgrades ($2,967,000), cross-disability advisory council ($700,000), statewide health strategies ($1,000,000), grants to rural ambulances ($7,000,000), rural crisis support program ($2,000,000), Alzheimer's community living ($150,000), dental health programs ($514,367), and chronic diseases and diabetes prevention ($721,561).
Estimated income - SIIF	Section 7 identifies $37,646,784 from SIIF for the following purposes: retiring technology from the mainframe ($8,500,000), new state lab and purchase security equipment ($2,962,304), capital projects in human service centers ($1,684,480), housing initiative programs ($14,500,000), and re-evaluating the new state hospital capital project ($10,000,000).
Estimated income - Insurance tax distribution fund	Section 8 identifies $1,125,000 from the insurance distribution fund for rural emergency medical services grants.
Laboratory Building Steering Committee	Section 9 provides DHHS will maintain the Laboratory Building Steering Committee to oversee the design and construction of the laboratory building project during the biennium or until the work is completed, whichever is earlier.
Capital payments	Section 10 authorizes DHHS to expend funds for the payment of special assessments at the State Hospital, Southeast Human Service Center, and Life Skills and Transition Center.
Capital projects - Emergency commission approval	Section 11 authorizes transfers from line items within Section 1 of this bill for capital projects and maintenance pertaining to the operation of facilities including demolition projects up to $10 million, DHHS may seek emergency commission approval to spend more than $10 million under this section.
Permanent supportive housing grants	Section 12 directs DHHS to develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit processes and outcome measures to DHHS, and authorize DHHS to conduct onsite visits to review program operations for the funding of $4,672,536 included in Section 1 of the bill.
Expenditures may not exceed appropriation - Medical assistance expansion program	Section 13 identifies the sum of $662,099,340, of which $66,209,934 is from the general fund, for the Medicaid Expansion program for the 2025-27 biennium. The expenditures for individuals enrolled in Medicaid Expansion may not exceed this amount.
Building project lease	Section 14 authorizes the DHHS to act upon the recommendations of an architect to adjust the spacing needs for the human service center locations including the impact to shift the human service centers to certified community behavioral health clinics.

Other Sections in Department of Health and Human Services - Budget No. 325

Section Description	Executive Budget
Lease of land - State Hospital	Section 15 authorizes DHHS and the National Guard to enter an agreement or lease, or both, to lease up to 30 acres of real property for up to 99 years associated with the State Hospital for the National Guard to construct a new training and storage facility. In the alternative, DHHS may transfer its management of up to 30 acres of real property to the National Guard to construct a new training and storage facility.
Human service centers - certified community behavioral health clinics - FTE positions	Section 16 provides DHHS shall continue the process of human service centers becoming certified community behavioral health clinics to provide continuous community-based behavioral health services for children and adults. Federal funding will be pursued and subject to the availability of generated income, DHHS may add FTE positions for field services to provide direct services.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 1 of Section 17 would allow the sum of $3,674,757 appropriated general funds and the sum of $25,918,566 appropriated from federal funds for Medicaid management information system modularization technology.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 2 of Section 17 would allow the sum of $14,411,218 appropriated from the general fund and the sum of $14,411,218 appropriated from federal funds for the child welfare technology project.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 3 of Section 17 would allow the sum of $20,366,271 appropriated from the community health trust fund and the sum of $39,534,525 appropriated from federal funds for the child support computer replacement project.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 4 of Section 17 would allow the sum of $10,989,217 appropriated from SIIF for the procurement and grants management system.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 5 of Section 17 would allow the sum of $4.15 million appropriated from the general fund for defraying the expenses of additional human service centers to begin the process of becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 6 of Section 17 would allow the sum $6.4 million appropriated from SIIF for the use of transitioning the Badlands Human Service Center and Northwest Human Service Center into certified community behavioral health clinics.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 7 of Section 17 would allow any amounts appropriated to DHHS in Chapter 549 of the 2021 Special Session Session Laws.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 8 of Section 17 would allow any amounts appropriated to DHHS in Chapter 550 of the 2021 Special Session Session Laws.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 9 of Section 17 would allow any amounts appropriated to DHHS for COVID-19 relief in Chapters 27 and 28 of the 2021 Session Laws.

Other Sections in Department of Health and Human Services - Budget No. 325

Section Description	Executive Budget
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 10 of Section 17 would allow the sum of $55,120,000 appropriated from the federal state fiscal recovery fund for a public health laboratory capital project.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 11 of Section 17 would allow the sum of $5 million appropriated from the general funds for the purpose of employer-led child care cost-share program.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 12 of Section 17 would allow the sum of $986,555 appropriated from the general fund for the purpose of streamlining background checks.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 13 of Section 17 would allow the sum of $2,223,981 appropriated from the federal state fiscal recovery fund for the implementation of a virtual behavioral health crisis care program for rural law enforcement.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 14 of Section 17 would allow the sum of $2 million appropriated from federal funds for the purpose of completing the public health data modernization project.
Exemption - Unexpended appropriations continued into the biennium beginning on July 1, 2025 and ending on June 30, 2027	Subsection 15 of Section 17 would allow $2.5 million appropriated from SIIF to the pay for success fund in Chapter 419 of the 2023 Session Laws.
Legislative intent - Utilization rate adjustment	Section 18 provides intent that DHHS seek a deficiency appropriation for any expenditures that exceed appropriated amounts as a result of underfunding, utilization rates, value-based purchasing for nursing facilities, reduction in federal medical assistance percentage, and unexpected contract cost increases that exceed 10 percent during the biennium if funding is not sufficient to pay actual expenses.
Legislative intent - Provider rate increase	Section 19 provides a 2 percent increase each year of the biennium for human service provider inflation. The provider inflation increase in this section does not apply to nursing facilities.
Federal funding appeal limitation	Section 20 provides except as otherwise specifically provided by federal law, a person may not appeal a denial, revocation, reduction in services or payment, or the termination of a program or service by DHHS due to the unavailability of federal coronavirus funding received under federal law resulting from the federal coronavirus pandemic emergency declaration.

Sixty-ninth
Legislative Assembly
of North Dakota

HOUSE BILL NO. 1012
(Governor's Recommendation)

Introduced by
Appropriations Committee

(At the request of the Governor)

A bill for an act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; to provide a statement of legislative intent; and to provide for a report.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from special funds derived from federal funds and other income, to the department of health and human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2025, and ending June 30, 2027, as follows:

Subdivision 1.

BUSINESS OPERATIONS DIVISIONS

	Base Level	Adjustment or Enhancements	Appropriation
Salaries and wages	$25,763,358	$30,823,381	$56,586,739
Operating expenses	155,308,399	(68,523,770)	86,784,629
Capital assets	108,934	(108,934)	0
Grants	11,812,627	6,966,375	18,779,002
Total all funds	$192,993,318	$(30,842,948)	$162,150,370
Less estimated income	118,894,310	(55,288,152)	63,606,158
Total general fund	$74,099,008	$24,445,204	$98,544,212

Subdivision 2.

BEHAVIORAL HEALTH DIVISION

	Base Level	Adjustment or Enhancements	Appropriation
Salaries and wages	$8,792,675	$5,992,533	$14,785,208
Operating expenses	79,381,458	36,054,407	115,435,865

Full Time Equivalents	2,483.83	278.52	2,762.35

SECTION 2. ONE-TIME FUNDING. The following amounts reflect the one-time funding items approved by the sixty-eighth legislative assembly for the 2023-25 biennium and the 2025-27 biennium one-time funding items included in the appropriation section of this Act:

One-Time Funding Description	2023-25	2025-27
Public health laboratory capital project	$55,120,000	0$
Technology projects	71,000,000	9,263,000
Human service center projects	735,154	1,684,480
State hospital design	12,500,000	10,000,000
Service grants	585,000	0
Cross-disability advisory council	1,400,000	0
Behavioral health facility grants	1,950,000	0
Base care payment study	600,000	0
Health care task force	750,000	0
Operating inflation	20,564,344	0
Program integrity audits	4,500,000	0
Pregnant and parenting residential	1,000,000	0
Law enforcement telehealth	2,650,000	0
Retire mainframe	0	16,000,000
Child care programs	0	19,272,500
Housing programs	0	14,500,000
State lab move and equipment	0	2,962,304
Partial hospitalization day treatment	0	2,000,000
DD eligibility assessment tool for kids	0	400,000
Family paid caregiver service	0	12,348,651
One-time toxicology equipment	0	251,500
Total all funds	$173,354,498	$88,682,435
Less estimated income	158,872,326	59,192,664
Total general fund	$14,482,172	$29,489,771

The 2025-27 one-time funding amounts are not a part of the entity’s base budget for the 2027-29 biennium. The department of health and human services shall report to the appropriation's committees of the seventieth legislative assembly on the use of this one-time funding for the biennium beginning July 1, 2025 and ending June 30, 2027.

SECTION 3. FUNDING TRANSFERS - EXEMPTION - AUTHORIZATION - REPORT. Notwithstanding section 54-16-04, the director of the office of management and budget shall transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for the biennium beginning July 1,

2025, and ending June 30, 2027, as requested by the department of health and human services. The department of health and human services shall notify the legislative council of any transfer made pursuant to this section. The department of health and human services shall report to the budget section after June 30, 2026, any transfer made in excess of $50,000 and to the appropriations committees of the seventieth legislative assembly regarding any transfers made pursuant to this section.

SECTION 4. FULL-TIME EQUIVALENT POSITION BLOCK GRANT PROGRAM - REPORT. Section 1 of this Act includes funding for a full-time equivalent position block grant program. This funding, along with salaries and wages funding appropriated by the sixty-ninth legislative assembly, is available to fund full-time equivalent positions as determined by the department of health and human services. Notwithstanding any other provision of law, the department of health and human services is authorized to increase or decrease authorized full-time equivalent positions subject to the availability of funds and the provisions of this section. The department of health and human services may not increase full-time equivalent positions for the purpose of transferring human service zone employees to state employment. Pursuant to section 3 of this Act, the department of health and human services is authorized to transfer funding to and from the salaries and wages block grant line item. The department of health and human services shall report to the office of management and budget and legislative council any adjustments to full-time equivalent positions. The department of health and human services shall provide reports to the legislative management regarding the use of funding for the program.

SECTION 5. ESTIMATED INCOME - HUMAN SERVICE FINANCE FUND. The estimated income line items in section 1 of this Act includes up to the amount of $238,401,207 from the human service finance fund for state-paid economic assistance and social and human services.

SECTION 6. ESTIMATED INCOME - COMMUNITY HEALTH TRUST FUND. The estimated income line items in section 1 of this Act includes the sum of $40,458,933 from the community health trust fund for the following purposes:

1. The sum of $594,500 for loan repayment programs;
2. The sum of $11,191,683 for tobacco and vaping programs;
3. The sum of $909,824 for cancer and women’s way programs;
4. The sum of $200,000 for behavior risk state survey;
5. The sum of $4,501,342 for domestic violence programs;
6. The sum of $3,275,000 for local public health grants;
7. The sum of $1,867,500 for 988 crisis hotline;
8. The sum of $2,866,156 for forensic examiner at UND;
9. The sum of $2,967,000 for various information technology system upgrades;
10. The sum of $700,000 for the cross disability advisory council;
11. The sum of $1,000,000 for the statewide health strategies;
12. The sum of $7,000,000 for grants to rural ambulances;
13. The sum of $2,000,000 for law enforcement rural crisis support program;

14. The sum of $150,000 for Alzheimer's community living;

15. The sum of $514,367 for dental health programs; and

16. The sum of $721,561 for chronic disease and diabetes prevention.

SECTION 7. ESTIMATED INCOME - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND. The estimated income line item section 1 of this Act includes the sum of $ 37,646,784 from the strategic investment and improvements fund for the following purposes:

1. The sum of $8,500,000 for retiring technology from the mainframe;

2. The sum of $2,962,304 to move into the new state lab and purchase security equipment;

3. The sum of $1,684,480 for capital projects in human service centers;

4. The sum of $14,500,000 for housing initiative programs; and

5. The sum of $10,000,000 for re-evaluating the new state hospital capital project.

SECTION 8. ESTIMATED INCOME - INSURANCE TAX DISTRIBUTION FUND. The estimated income line item in section 1 of this Act includes the sum of $1,125,000 from the insurance tax distribution fund for rural emergency medical services grants.

SECTION 9. LABORATORY BUILDING STEERING COMMITTEE. The department of health and human services shall maintain the laboratory building steering committee to oversee the design and construction of the laboratory building project for the biennium beginning July 1, 2025, and ending June 30, 2027, or until work is completed, whichever occurs earlier. The committee must include representation from the department of health and human services, department of environmental quality, office of management and budget, the governor's office, and the legislative assembly. The legislative assembly representation must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 10. CAPITAL PAYMENTS. During the biennium beginning July 1, 2025, and ending June 30, 2027, the department of health and human services is authorized to expend funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center. Pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly. The department of health and human services may transfer funds for the payment of special assessments at the state hospital, southeast human service center, and life skills and transition center ahead of the special assessments schedule. Notwithstanding section 54-27-12, the department of health and human services may spend funds for the payment of special assessments at the state hospital and life skills and transition center.

SECTION 11. CAPITAL PROJECTS - EMERGENCY COMMISSION APPROVAL. During the biennium beginning July 1, 2025, and ending June 30, 2027, pursuant to section 3 of this Act, the director of the office of management and budget may transfer appropriation authority between line items within section 1 of this Act and any remaining appropriation authority for the department of health and human services approved by the sixty-ninth legislative assembly for capital projects and maintenance pertaining to operation of its facilities, including demolition projects. Notwithstanding section 54-27-12, the department of health and human services may spend up to $10,000,000 for capital projects and maintenance pertaining to operation of its facilities, including demolition projects, under this section and may seek emergency commission approval to spend more than $10,000,000 under this section.

SECTION 12. PERMANENT SUPPORTIVE HOUSING GRANTS. Section 1 of this Act includes the sum of $4,672,536 from the general fund for permanent supportive housing grants. The department of health and human services shall develop a funding methodology to distribute the funding to qualified entities that utilize best practices for permanent supportive housing, provide recovery-oriented and person-centered services, submit process and outcome measures to the department of health and human services, and authorize the department of health and human services to conduct onsite visits to review program operations.

SECTION 13. EXPENDITURES MAY NOT EXCEED APPROPRIATION – MEDICAL ASSISTANCE EXPANSION PROGRAM - APPLICATION.

1. Section 1 of this Act includes the sum of $662,099,340, of which $66,209,934 is from the general fund, for the medical assistance expansion program for the biennium beginning July 1, 2025, and ending June 30, 2027. The expenditures for individuals eligible for the medical assistance expansion program may not exceed this amount.

2. The department of health and human services may exceed appropriations for increases in medical assistance expansion program caseload, for the addition of coverage consistent with the traditional Medicaid 1915(i) state plan, utilization rates, and reduction in federal medical assistance percentage.

3. The managed care organization under contract with the department of health and human services to manage the medical assistance expansion program shall reimburse providers within the same provider type and specialty at consistent levels and with consistent methodology and may not provide incentive, quality, or supplemental payments to providers, unless part of a value-based program approved by the department of health and human services. The managed care organization shall reimburse all North Dakota substance use providers of American society of addiction medicine level 2.5 at consistent levels and with consistent methodology. The managed care organization may consider urban and rural providers as different provider types.

4. The managed care organization and the department of health and human services shall ensure payments to Indian or Tribal 638 health care providers, federally qualified health centers, and rural health clinics meet the federally required minimum levels of reimbursement. Critical access hospitals may not be paid less than one hundred percent of Medicare allowable costs and human service centers may not be paid less than one hundred percent of the current traditional Medicaid rate. Behavioral health services involving partial hospitalization, intensive outpatient, professional services, and residential behavioral health services provided in facilities that are not institutions for mental diseases are not subject to the provisions in subsection 6.

5. The department of health and human services shall ensure providers within the same provider type and specialty are reimbursed at consistent levels and with consistent methodology and shall ensure the capitation rates under risk contracts are actuarially sound and are adequate to meet managed care organization contractual requirements regarding availability of services, assurance of adequate capacity and services, and coordination and continuity of care.

6. Except for the provisions in subsection 4, managed care organization premium payments must be built using the assumption that rates paid to providers under the medical assistance expansion program may not exceed one hundred forty-five percent of Medicare reimbursement rates paid to providers on January 1, 2025.

SECTION 14. BUILDING PROJECT - LEASE. The department of health and human services is authorized to act upon the recommendations of an architect to adjust the spacing needs for the human service center locations, including the impact to shift the human service centers to certified community behavioral health clinics for the biennium beginning July 1, 2025, and ending June 30, 2027.

SECTION 15. LEASE OF LAND - STATE HOSPITAL. The department of health and human services and national guard may enter into an agreement or lease, or both, to lease up to thirty acres of real property for up to ninety-nine years associated with the state hospital for the national guard to construct a new training and storage facility. In the alternative, the department of health and human services may transfer its management of up to thirty acres of real property to the national guard to construct a new training and storage facility.

SECTION 16. HUMAN SERVICE CENTERS - CERTIFIED COMMUNITY BEHAVIORAL HEALTH CLINICS - FULL-TIME EQUIVALENT POSITIONS - REPORT. The department of health and human services shall continue the process of the human service centers becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults. The department of health and human services shall pursue additional federal funding as available. Subject to the availability of generated income, the department of health and human services may add full-time equivalent positions for field services to provide direct services for the period beginning with the effective date of this Act and ending June 30, 2027. The department of health and human services shall report to the office of management and budget and legislative council each time a position is added.

SECTION 17. EXEMPTION - UNEXPENDED APPROPRIATIONS. The following appropriations are not subject to the provisions of section 54-44.1-11 and may be continued into the biennium beginning July 1, 2025, and ending June 30, 2027:

1. The sum of $3,674,757 appropriated from the general fund and the sum of $25,918,566 appropriated from federal funds for the Medicaid management information system modularization technology project in chapter 12 of the 2021 Session Laws;

2. The sum of $14,411,218 appropriated from the general fund and the sum of $14,411,218 appropriated from federal funds for the child welfare technology project in chapter 12 of the 2021 Session Laws;

3. The sum of $20,366,271 appropriated from the community health trust fund and the sum of $39,534,525 appropriated from federal funds for the child support computer replacement project in chapter 44 of the 2023 Session Laws;

4. The sum of $10,989,217 appropriated from the strategic investment and improvement fund for the procurement and grants management system in chapter 44 of the 2023 Session Laws;

5. The sum of $4,150,000 appropriated from the general fund for defraying the expenses of additional human service centers to begin the process of becoming a certified community behavioral health clinic to provide continuous community-based behavioral health services for children and adults in chapter 44 of the 2023 Session Laws;

6. The sum of $6,400,000 appropriated from the strategic investment and improvement fund for the use of transitioning the badlands and northwest human service centers into certified community behavioral health clinics in chapter 638 of the 2023 Special Session Session Laws;

7. Any amounts appropriated to the department of health and human services in chapter 549 of the 2021 Special Session Session Laws;

8. Any amounts appropriated to the department of health and human services in chapter 550 of the 2021 Special Session Session Laws;

9. Any amounts appropriated to the department of health and human services for COVID-19 relief in chapters 27 and 28 of the 2021 Session Laws;

10. The sum of $55,120,000 appropriated from the federal state fiscal recovery fund for a public health

laboratory capital project in chapter 4 of the 2023 Session Laws;

11. The sum of $5,000,000 appropriated from the general fund for the purpose of employer-led child care cost-share program in chapter 446 of the 2023 Session Laws;

12. The sum of $986,555 appropriated from the general fund for the purpose of streamlining background checks project in chapter 446 of the 2023 Session Laws;

13. The sum of $2,223,981 appropriated from the federal state fiscal recovery fund for the implementation of a virtual behavioral health crisis care program for rural law enforcement in chapter 44 of the 2023 Session Laws;

14. The sum of $2,000,000 appropriated from federal funds for the purpose of completing the public health data modernization project in chapter 4 of the 2023 Session Laws; and

15. The sum of $2,500,000 appropriated from the strategic investment and improvement fund to the pay for success fund in chapter 419 of the 2023 Session Laws.

SECTION 18. LEGISLATIVE INTENT - UTILIZATION RATE ADJUSTMENT. It is the intent of the sixty-ninth legislative assembly that the department of health and human services seeks a deficiency appropriation from the seventieth legislative assembly for any expenditures that exceed appropriated amounts as a result of underfunding, utilization rates, value-based purchasing for nursing facilities, reduction in federal medical assistance percentage, and unexpected contract cost increases that exceed ten percent, during the biennium beginning July 1, 2025, and ending June 30, 2027, if funding is not sufficient to pay actual expenses.

SECTION 19. LEGISLATIVE INTENT - PROVIDER RATE INCREASE. Except as otherwise noted, section 1 of this Act includes funding for human service provider inflation increases of two percent for each year of the biennium beginning July 1, 2025, and ending June 30, 2027. The provider inflation increase in this section does not apply to nursing facilities.

SECTION 20. FEDERAL FUNDING APPEAL LIMITATION. Except as otherwise specifically provided by federal law, a person may not appeal a denial, revocation, reduction in services or payment, or the termination of a program or service by the department of health and human services due to the unavailability of federal coronavirus funding received under federal law resulting from the federal coronavirus pandemic emergency declaration for the biennium beginning July 1, 2025, and ending June 30, 2027.

Department of Health and Human Services
Department No. 325
2025 House Bill No. 1012

REVISED EXECUTIVE BUDGET RECOMMENDATION
2025-27 BIENNIUM

Budget Summary

	FTE Positions	General Fund	Other Funds	Total
Burgum budget recommendation	2762.35	$2,360,629,103	$3,693,933,879	$6,054,562,982
Revisions - Increase (decrease)	(75.00)	(61,047,510)	272,847,806	211,800, 296
Armstrong budget recommendation	**2,687.35**	**$2,299,581,593**	**$3,966,781,685**	**$6,266,363,278**
Base level	2,483.83	2,011,427,547	3,541,730,000	5,553,157,547
Increase (decrease)	203.52[1]	$288,154,046	$425,051,685	$713,205,731
Percentage increase (decrease)	8.2%	14.3%	12.0%	12.8%

[1]Of these positions, 98 FTE positions relate to positions added during the 2023-25 biennium with funding approved by the 2023 Legislative Assembly but for which specific FTE authorization was not increased because of the salary and wages block grant.

NOTE:
More detailed information on the revised executive budget recommendation is attached as an appendix.

Selected Highlights

- Salary increases of up to 3 percent effective July 1, 2025, and 3 percent effective July 1, 2026
- Health insurance increase of $250 per month (15.23 percent), from $1,643 to $1,893 per employee
- Provides additional salary funding of $9.8 million from the general fund
- Provides $93 million, including a reduction of $95.6 million in federal funds and an increase of $176.2 million from the general fund for cost to continue, anticipated cost and caseload adjustments, Medicaid Expansion reductions, federal medical assistance percentage changes, and utilization changes in the department's budget
- Estimates the federal medical assistance percentage at 50.99 percent for federal fiscal years 2026 and 2027
- Provides $43.7 million, of which $21.9 million is from the general fund, for inflationary increases of 1.5 percent the 1st year of the biennium and 1.5 percent the 2nd year of the biennium for human service providers in the 2025-27 biennium
- Adds $2.5 million of which $634,154 is from the general fund and $1.8 million from other funds removed from the Public Health Division to replace funding removed in the 2023-25 biennium for the new and vacant FTE funding pool
- Provides a $14.5 million one-time appropriation from the strategic investment and improvements fund (SIIF) for housing initiatives including $3.5 million for eviction prevention; $1 million for home renovations for accessibility; and $10 million for assistance for citizens at risk for housing instability
- Provides technology investments of $49.7 million of which $16 million is a one-time appropriation from SIIF to retire systems from outdated platforms, $24.7 million for technology contract inflation and $9 million is for new systems
- Continues funding the Avel eCare rural crisis support pilot program created during the 2023 legislative session with $2 million from the community health trust fund
- Provides home- and community-based services (HCBS) investments of $21.8 million of which $12 million is from the general fund. Enhanced programs include services to support transition and diversion from institutions for $5.3 million; cross-disability waiver implementation for $4.9 million; and targeted rate increases for qualified service providers and home health providers for $7.8 million; implement a developmental disability host home service for $3.4 million; and provide housing assistance for targeted populations for $300,000.

- Provides $17.3 million of one-time funding for early childhood programs from the general fund
- Recommends $300 million of bond proceeds to construct a new state hospital

Deficiency Appropriations

There are no deficiency appropriations for this agency.

Significant Audit Findings

The June 30, 2023, State Auditor's report for the Department of Health and Human Services (DHHS) identified the following audit findings:

- **Workforce retention grants not passed through agencies to caregivers** - The grants are required to be passed through agencies to employees that spend at least 25 percent of their paid time providing direct care and no less than 51 percent of their paid time in a noninstitutional setting. A total of $7,130 in the sample was given to administrative or other employees with a potential of $20,434 in potential ineligible payments made to employees that did not qualify for the grant. All nonagency HCBS caregiver grants were paid in accordance with the policies of the department.
- **Ineligible agency employees received workforce retention grants** - Employees that did not qualify for the grant based on not working more than 51 percent of their time in a noninstitutional setting still received a grant. A total of $26,342 in grants were given to ineligible employees in the sample which projects to potential ineligible payments of $409,783.
- **No measurement of program goals for workforce retention grants** - The workforce retention incentive program purpose was to stabilize and strengthen the network of direct caregivers who provide HCBS care. The department did not identify any metrics to measure the effectiveness of the program in achieving the intended goal.
- **Weak controls over controlled substances at the State Hospital** - No diversion of controlled substances was identified; however, the identified weaknesses increase the risk for diversion of controlled substances to occur. Monthly pharmacist or designee walkthroughs documented unlocked drawers containing controlled substances, controlled substance audits not reconciled to the record book, and medication cart keys not being secured.
- **Controlled substances not secured during onsite walkthrough** - Two nursing units kept the keys to the controlled substances in an unlocked drawer, one nursing unit had the lock combination on a sticky note on the outside of the cart, and one controlled substance count book was signed before the physical count.
- **Controlled substance waste** - All unused or refused medication must be properly disposed in a locked tamper-proof container referred to as "wasting" with dual signature control. Often these are controlled substances with a half tablet prescribed. The remaining half needs to be properly disposed. In 20 of 180 instances tested, the remaining half tablet did not have dual signatures when disposed. In an additional 13 of the same 180 instances, the remaining half tablet was kept and administered later. Policy states that any remaining half tablet must be disposed of properly with two signatures.
- **Automated medication dispensing system access** - There were 11 former employees out of 124 active users that were still active in the medication dispensing system. None of the login credentials for former employees had been used to access the system after the employee's termination.
- **Children in suspected abuse situations not being contacted timely (Prior audit finding)** - DHHS requires face-to-face contact to be made with suspected victims of child abuse or neglect with 24 hours or up to 14 days depending on the severity of the child abuse report. The department is unable to effectively monitor the face-to-face contact due to incorrect dates being entered into the tracking system. Of 30 assessments tested, 12 had incorrect dates and 25 of the 30 assessments did not have face-to-face contact within the required time. This finding was first discovered and reported in the 2014-15 audit. Human service zone employees are responsible for making the contact and entering the information.

Prior audit findings not fully implemented:

- **Unsupported drug rebate and analysis system receivable balances** - Receivable balances need to be supported by a detailed listing of drug manufacturer accounts. The department is working with the system developer to resolve the issue with historical records and there are several outstanding work orders with the developer. The department continues to work toward getting more accurate data.
- **Inaccurate inventory and storage location of COVID-19 vaccine vials** - Recommended to follow the Centers for Disease Control guidance to reconcile all vaccines in storage monthly, including verifying the

location. The department inventoried the vaccine count on a regular basis but did not consistently reconcile the storage location of the vaccine which is important for temperature and efficacy and expiration.

Agency Fees

As reported to the Legislative Management, pursuant to Section 54-35-27, this agency has 52 fees. The agency recommended the following changes to its fees:

- Increase the amount charged for Medicaid application fees.
- No other recommended fee changes.

Major Related Legislation

House Bill No. 1037 - Provides appropriations of $750,000 each to the Agriculture Commissioner, Attorney General, Department of Emergency Services, DHHS, and Department of Career and Technical Education for uncrewed aircraft systems, autonomous vehicles, or other autonomous technologies.

House Bill No. 1066 - Provides an increase in the compensation rate paid by DHHS under the senior community service employment program.

House Bill No. 1067 - Changes the age from 18 to 21 to administer Medicaid waivers to provide in-home services to children with extraordinary medical needs and to children diagnosed with an autism spectrum disorder and would otherwise meet institutional level of care.

House Bill No. 1070 - Changes the modified adjusted gross income eligibility limit for the children's health insurance program from 210 to 205 percent of the federal poverty level.

House Bill No. 1119 - Amends early childhood services training and certification requirements.

House Bill No. 1337 - Appropriates $10 million to DHHS to provide mental health and substance use disorder treatment for incarcerated individuals.

House Bill No. 1433 - Provides an appropriation of $250,000 for dementia response.

House Bill No. 1451 - Provides for medical assistance coverage, including Medicaid expansion coverage, for the treatment of obesity including anti-obesity medication.

House Bill No. 1460 - Increases the amount of respite care available to adult foster care providers.

House Bill No. 1467 - Provides an appropriation of $100,000 to establish and administer a system to record and compile reported vaccine adverse event data.

House Bill No. 1468 - Provides an appropriation of $16 million to provide a behavioral health facility grant.

House Bill No. 1548 - Provides an appropriation of $10 million to provide a grant to an organization for the construction of a fitness center to benefit the residents of the life skills and transition center.

Senate Bill No. 2029 - Creates the Office of Guardianship and Conservatorship as a division under the Supreme Court and provides an appropriation to defray the expenses of the office.

Senate Bill No. 2033 - Creates a distressed ambulance service program.

Senate Bill No. 2036 - Provides an appropriation of $4,580,000 from the general fund to administer the fitness to proceed and remediation of juveniles relating to the age of an offender, suspension or dismissal of proceedings, predispositional assessment, and the definition of a child in need of protection.

Senate Bill No. 2096 - Provides for an appropriation for State Hospital facilities and for regional acute psychiatric treatment and residential supportive housing services.

Senate Bill No. 2190 - Provides medical assistance benefits for behavioral analysis to provide coverage for the lifespan of individuals with autism spectrum disorder.

Senate Bill No. 2192 - Provides an appropriation of $240,000 to reimburse community providers serving individuals with disabilities for the cost of obtaining and maintaining accreditation.

Senate Bill No. 2200 - Provides an appropriation of $500,000 to establish and implement a 988 crisis hotline program.

Senate Bill No. 2231 - Provides medical assistance benefits for medically necessary dental services.

Senate Bill No. 2271 - Provides an appropriation of $2.2 million to increase adult residential facility rates.

Senate Bill No. 2305 - Provides an appropriation of $9 million to establish a family paid caregiver service pilot project.

Senate Bill No. 2306 - Establishes a childcare workforce recruitment and retention program.

NOTE:
Please see the Fiscal Impact Report for additional information regarding bills under consideration, which contain either a state revenue impact, an appropriation, or a state fiscal impact.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations Committee
Roughrider Room, State Capitol

HB 1012
1/9/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption, and to provide for a report.

8:30 a.m. Chairman Vigesaa called the meeting to order.

Members Present: Chairman Vigesaa, Vice Chair Kempenich, Representatives Anderson, Berg, Bosch, Brandenburg, Fisher, Hanson, Louser, Martinson, Meier, Mitskog, Monson, Murphy, Nathe, Nelson, O'Brien, Pyle, Richter, Sanford, Stemen, Swiontek, Wagner

Discussion Topics:

- Health and Human Services
- North Dakota Health
- Budget Overview for HHS

8:35 a.m. Dirk Wilke, Department of Health and Human Services, testified in favor and submitted testimony #28316.

8:43 a.m. Donna Aukland, DHHS Chief Financial Officer, testified in favor and continued with testimony #28316.

8:52 a.m. Sarah Aker, DHHS Executive Director of Medical Services, testified in favor,

9:00 a.m. Donna Aukland, DHHS Chief Financial Officer, testified in favor.

9:04 a.m. Dirk Wilke, Department of Health and Human Services, answered questions for the committee.

9:06 a.m. Jessica Thomasson, DHHS Executive Director of Human Services, answered questions for the committee.

9:18 a.m. Pam Sagness, DHHS Executive of Behavioral Health, testified in favor.

9:23 a.m. Chaiman Vigesaa adjourned the meeting.

Sierra Schartz, Committee Clerk

HB 1012: Health and Human Services Overview

Health & Human Services

ND Department of Health & Human Services

Effective January 2025

HHS key accomplishments

Supported state's workforce with investments in child care, making it easier for working parents to work and find quality child care for their children.

Advanced in-home and community services in 2024 by transitioning 526 individuals either from nursing homes back to the community or avoiding higher forms of more costly care through diversion services.

Began construction on a new ND State Lab that will preserve and advance the state's ability to protect North Dakota's public health and environment for future generations.

NORTH Dakota | Health & Human Services
Be Legendary.

HHS key accomplishments

Implementing Functional Family Therapy at Human Service Centers**,** an evidence-based therapeutic approach designed to improve family dynamics and address behavioral health challenges in youth.

Improved care coordination services in all eight at Human Service Centers**.** Care coordinators walk alongside individuals and support them in accessing behavioral health services.

Launched Medicaid value-based care in health systems and nursing facilities, driving quality of life for North Dakotans by incentivizing outcomes and improving care.

NORTH Dakota | Health & Human Services

SFY23 audit of HHS

Findings and programmatic recommendations

Developmental Disabilities

Workforce Retention Grants Not Monitored. Identify whether there were other ineligible payments, and recoup funds for payments made to ineligible caregivers identified in this audit and through the Department's additional procedures. Develop ways to measure whether programs achieve the intended purpose.

North Dakota State Hospital

Internal Controls May Not Safeguard Controlled Substances. Strengthen internal controls to safeguard control substances.

Child Protection Services

Children in Suspected Abuse Situations Not Contracted Timely. Ensure face-to-face contact dates are entered into the Department's tracking system (FRAME) and to make sure those dates are accurate and monitored. Ensure timely face-to-face contract with suspected victims of child abuse or neglect.

SFY22 single audit

Findings and programmatic recommendations

Public Health:

2022-005 Coronavirus Relief Fund. Communicate all required information of 2 CFR 200.332(a) to subrecipients. Develop procedures to ensure that all Coronavirus Relief Fund award information is communicated to subrecipients.

2022-006 Coronavirus Relief Fund. Conduct during-the-award monitoring activities as required for passthrough entities in accordance with 2 CFR 200.332.

2022-007 WIC Special Supplemental Nutrition Program for Woman, Infants and Children. Ensure all subrecipients obtain audits or a certification that an audit is not required in accordance with 2 CFR 200 Subpart F.

Medical Services:

2022-008 Medicaid Cluster. Develop a corrective action plan to address the errors identified in the audit and recover payments made on unsupported claims.

2022-009 Medicaid Cluster. Complete a risk analysis and security review of MMIS biennially.

2022-010 Medicaid Cluster. Ensure the medical loss ratio report is finalized as outlined in the contract and all required documentation is properly maintained.

2022-011 Medicaid Cluster. Review access rights to the Medicaid Management Information System (MMIS) fee schedule and all major Medicaid information systems on a regular basis.

SFY22 single audit

Findings and programmatic recommendations

Human Services:

2022-012 CCDF Cluster. Improve procedures to ensure child care correction orders are resolved before the end of each allowed correction period with accurate tracking of dates.

2022-013 CCDF Cluster. Develop corrective action and perform annual unannounced inspections of child care providers in operation in accordance with 45 CFR 98.42(b)(2)(B) and Department policy.

2022-014 Low-Income Home Energy Assistance. Coordinate with the Department of Commerce to properly report subawards of the state under the LIHEAP program for FFATA reporting.

2022-015 Low-Income Home Energy Assistance. Ensure adequate rental documentation is on file and proper eligibility determinations of the Low-Income Home Energy Assistance Program (LIHEAP) are made.

2022-016 Low-Income Home Energy Assistance. Ensure policies and procedures prevent duplicate payments from being applied to LIHEAP cases. We also recommend the Department of Human Services ensure required documentation is obtained for individuals appearing in multiple cases in accordance with state LIHEAP Policy.

2022-017 Low-Income Home Energy Assistance. Ensure eligibility is verified through the State NDVerify system prior to approval of all LIHEAP applications or revise the State Plan to identify the use of NDVerify as optional for approval by the Federal awarding agency.

SFY22 single audit

Findings and programmatic recommendations

Human Services continued:

2022-012 CCDF Cluster. Improve procedures to ensure child care correction orders are resolved before the end of each allowed correction period with accurate tracking of dates.

2022-013 CCDF Cluster. Develop corrective action and perform annual unannounced inspections of child care providers in operation in accordance with 45 CFR 98.42(b)(2)(B) and Department policy.

2022-014 Low-Income Home Energy Assistance. Coordinate with the Department of Commerce to properly report subawards of the state under the LIHEAP program for FFATA reporting.

2022-015 Low-Income Home Energy Assistance. Ensure adequate rental documentation is on file and proper eligibility determinations of the Low-Income Home Energy Assistance Program (LIHEAP) are made.

2022-016 Low-Income Home Energy Assistance. Ensure policies and procedures prevent duplicate payments from being applied to LIHEAP cases. We also recommend the Department of Human Services ensure required documentation is obtained for individuals appearing in multiple cases in accordance with state LIHEAP Policy.

2022-017 Low-Income Home Energy Assistance. Ensure eligibility is verified through the State NDVerify system prior to approval of all LIHEAP applications or revise the State Plan to identify the use of NDVerify as optional for approval by the Federal awarding agency.

SFY22 single audit

Findings and programmatic recommendations

Human Services:

2022-018 Emergency Rental Assistance Program. Ensure monthly payment amounts are calculated correctly and reviewed for accuracy. Additionally, we recommend the Department ensure the improper payments are recouped through the ERA program's refunding process.

2022-019 Children's Health Insurance Program. Review the SPACES system edit checks and ensure eligibility determinations made for the CHIP programs are proper. We also recommend corrections to payments and Federal reimbursement of CHIP.

Behavioral Health:

2022-020 Block Grants for Prevention and Treatment of Substance Abuse. Develop corrective action and expend, at a minimum, the amount expended by the State for fiscal year 1994, for the availability of treatment services designed for pregnant women and women with dependent children either by establishing new programs or expanding the capacity of existing programs.

Business Operations:

2022-021 Rehabilitation Services Vocational Rehabilitation Grants to States. Follow its procedures to prevent and detect Vocational Rehabilitation payments from occurring outside the period of performance.

What is the HHS FTE block grant?

During the 2023 Legislative Session, lawmakers:

- Approved the HHS salary appropriation
- Removed the **total number** of FTE appropriation

RESULT: HHS is responsible for staying within our salary appropriation but now has flexibility on total number of FTEs

NOTE: Block grant includes all compensation, overtime, bonuses paid, promotional increases, health insurance premiums, etc.

NORTH Dakota | Health & Human Services
Be Legendary.

Why is this important?

Historically limited by a total cap on FTEs each biennium:

- Prohibits adding necessary positions in a timely manner
- Limits repurposing positions
- Inability to be nimble in addressing staffing needs based on client acuity or need

NORTH Dakota | Health & Human Services
Be Legendary.

The FTE Block Grant has allowed HHS …

To quickly respond and hire for immediate or emerging business needs

Flexibility to support new work

To support state workforce by transitioning long-term temp employees to FTE

To address overtime and team member capacity by adding essential positions

Dakota | Health & Human Services
Be Legendary.

How does it work?

Group A: Temporary converting to FTE

- Position is already working 30+ hours per week
- Anticipated to exist for more than 3 years
- Long-term funding is available (now and in future)
- Prioritized within established goals of HHS
- Complete SFN 50

Group B: Refilling basic vacancies

- Natural turnover
- Positions that are being filled with the same role as the previous incumbent
- Repurpose existing vacant position (1.0 FTE)
- Positions must be currently funded in the division's salary budget
- Hiring can occur within HR-established vacancy thresholds
- Complete SFN 50

Group C: Short-term needs

- Short-term
- Less than 720 hours (emergency status)
- Interns, summer students, co-op
- Position is budgeted for or sufficient rollup exists to cover cost
- Prioritized within established goals of HHS
- Complete SFN 50

EXECUTIVE DIRECTOR APPROVAL

Group D: Requesting New FTE

- New FTE requests
- Long-term full-time temp request
- Repurposing more than 1.0 existing FTE
- Prioritized based on identified goals of HHS
- Reviewed for approval by a committee including Operations, Program, Finance, HR and Commissioner.
- Established threshold for turnover/vacancy exists for each operations, direct service and program

COMMITTEE APPROVAL

Examples

- A full time FTE with benefits is available in a rural city in ND. The position has been posted twice with no candidates applying. Historically we would have limited options in how to address this.
- With the block grant, we can explore two college students with alternate schedules who might be each interested in 20 hours per week. They choose to remain on their parents' health insurance.
- We are then able to hire them at an hourly rate, no benefits are paid out, and the client is still receiving the service locally. We have saved ourselves the cost of health insurance and not utilized an FTE, but utilized the block grant to be creative in filling the role.
- **This FTE can now be utilized for a different programmatic need as long as budgeted dollars still exist.**

Salary appropriation for 2023-2025 Biennium

- Total HHS Salary + Benefits = $551,714,842

NOTE: Block grant includes all compensation, overtime, promotional increases, health insurance premiums, bonuses, etc.

Timeline of FTE

23-25 Session	Beginning of Block Grant + FTE Committee July 2023-Present	Current State – As of 12/1/24
Beginning: 2475.83 FTE + 53 Temp to FTE + 53 New FTE 2581.83 Ending FTE*	• 50 long-term vacancies within the Behavioral Health Division were repurposed to fill new needs within Behavioral Health. • 50 additional long-term temps were transferred to FTE • Approved 92.5 new FTE, which are in various phases of being filled • Approved 56 new FTE in Behavioral Health	• 374.63 Vacant FTES • All requests are reviewed by the FTE committee for need and budget • HHS churn (turnover) allows us to be flexible in filling positions and utilize the unspent salary budget • Current filled positions is under 2581.83

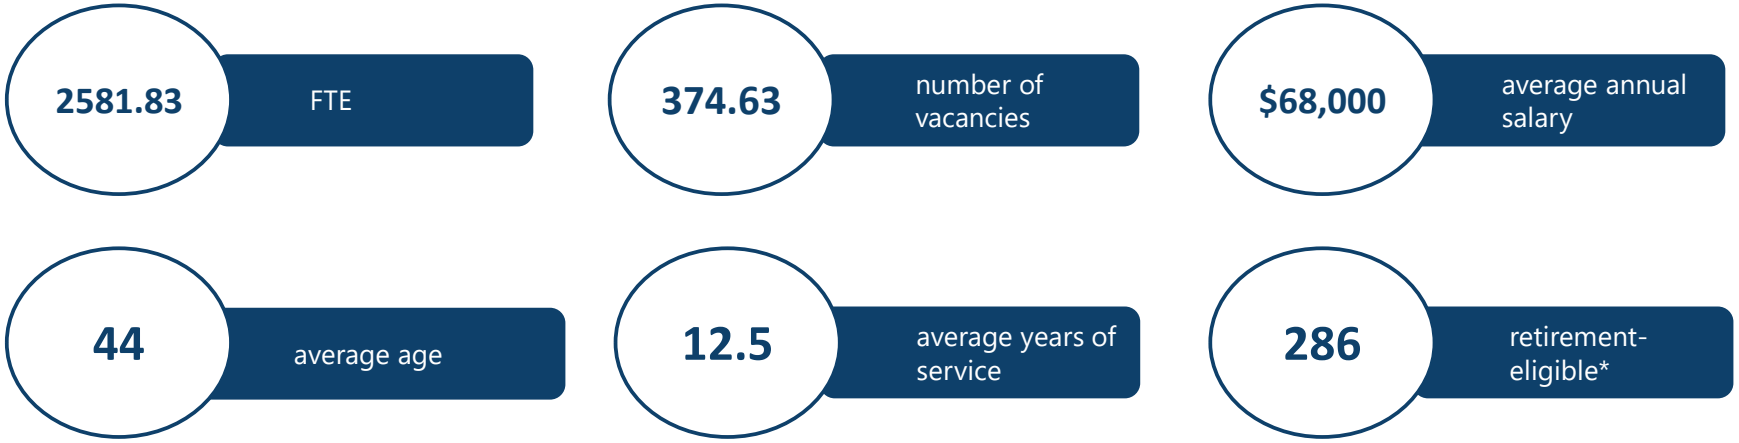
*While the appropriation for the 106 new FTEs was added to the budget bill, the actual number of FTEs were not added because of the conversion to the FTE block grant for HHS.

Current FTE vacancies - point in time (12-1-24)

374.63 Vacant Positions – Phases summarized as follows:

Phase	Description	Number
1	Part of current budget, position number established, job description completed and in process of being classified then posted	109.00
2	Position posted; actively recruiting and has not yet closed	112.52
3	Position posting closed; applications being reviewed and interviews scheduled	42.9
4	Position has been offered and offer is pending	16
5	Position is filled; new team member not started as of 12/1/24	79.5
Remove	Not budgeted for in 23-25 and/or can be deleted	11.71
Freeze	Federal Hiring Freeze does not allow for filling position(s)	3.0
	TOTAL	**374.63**

NORTH Dakota Be Legendary. | Health & Human Services



Budget review to support FTE pool process

Process to reconcile the headcount with the dollars being spent:

- Actual Expenditures analyzed month by HHS leadership
- Compared to budgets for each section and by HHS as a whole
- Projections are established and then modified by trends over the biennium
- Finance reports are available by the fourth week of every month
- Section Director reviews monthly with Finance team accountant

Agency team member statistics

*approximation based on available data

DD Council

The Council is a federally funded program that creates initiatives that give a voice to people with developmental disabilities and their families by promoting leadership and self-advocacy; and developing coalitions to improve public policy. We exist to improve systems and supports across the state of North Dakota.

Successes

Invested in:

- Creation of inclusive daycare summer programs
- Inclusive middle school, high school, and higher education programs
- New housing environments for people living in Grand Forks
- Supported advocacy training in 7 communities
- Funded an Olmstead Plan for the state
- Provided small grants to families so they can learn about disability

THE CHAMBER
FARGO MOORHEAD WEST FARGO

Letter of Support – HB 1012

Monday, January 13th, 2025

Chairman Nelson and Members of the House Appropriations Committee - Human Resources Division,

For the record, my name is Cale Dunwoody, and I have the distinct pleasure of serving as the Vice President of Public Policy for the Fargo Moorhead West Fargo Chamber of Commerce (FMWF Chamber). On behalf of our more than 1,700 members, I respectfully offer testimony in support of House Bill 1012.

At the FMWF Chamber, our mission is to protect and promote business, inspire individuals, cultivate communities, and influence action. One of the significant challenges our members face is the critical shortage of affordable, accessible, and high-quality childcare, which directly impacts workforce availability and stability. Our region continues to grapple with the shortage of childcare slots, particularly for infants and toddlers, due to the high costs associated with providing these essential services.

As the committee considers House Bill 1012, we urge you to prioritize continued funding for existing childcare programs and allocate additional resources to support childcare facilities and expand childcare capacity. Addressing this pressing issue is vital for the well-being of our families, the strength of our workforce, and the growth of the economy.

Thank you for your attention to this matter and your commitment to North Dakota.

Sincerely,

Cale Dunwoody
Vice President of Public Policy
Fargo Moorhead West Fargo Chamber of Commerce

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/13/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

1:50 p.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Public Health Division
- Improvement plan
- Priorities
- Accomplishments
- Challenges
- Audit findings
- Base budget
- State laboratory
- Medical marijuana

1:50 p.m. Dirk Wilke, Interim Health and Human Services Commissioner, testified and presented and overview of the public health division #28445.

2:09 p.m. Kirby Kruger, Director of Disease Control and Forensic Pathology Health and Human Services, spoke to childhood disease infectious rates and prevention.

2:17 p.m. Dirk Wilke, Interim Health and Human Services Commissioner, testified and continued with testimony #28445.

2:36 p.m. Jason Wahl, Director of ND Medical Marijuana Program, spoke on studies related to marijuana.

2:40 p.m. Dirk Wilke, Interim Health and Human Services Commissioner, testified and continued with testimony and related bills #28445.

2:45 p.m. Donna Aukland, Chief Operating Officer Health and Human Services, spoke to the glossary of terms that was distributed #28748.

2:47 p.m. Chairman J. Nelson adjourned the meeting.

STATE HEALTH IMPROVEMENT PLAN 2024-2029

HHS State Health Assessment and Dashboard

https://www.hhs.nd.gov/health/data-and-statistics/SHA

- A requirement for public health accreditation and the Affordable Care Act. Required to be done every 3-5 years.
- Very comprehensive review of all health-related data available to the public health division. Quantity and Quality of Life in ND.
- HHS Health Statistics & Performance analyzed vital records, survey data, census data, hospital discharge information, health care utilization, health care access, etc.
- Focus groups were conducted to get stakeholder input.
- NDSU CSR assisted in data analysis and wrote the final report summary, last completed in 2021.
- Published on the HHS website as a dashboard for the public to use.

NORTH Dakota | Health & Human Services
Be Legendary.

State Health Improvement Plan Priorities

Strengthening Workforce

- Implement effective recruitment, retention, and training strategies for a strong and stable workforce ready to meet the needs of North Dakotans

Cultivating Wellness

- Further the collective commitment to improving the health outcomes of all our communities by investing in developing strategies to:
  - Strengthen childhood opportunities and reduce adverse childhood experiences,
  - Decrease occupational injuries,
  - Curb tobacco and e-cigarette usage, and
  - Enhance the length and quality of life of tribal populations and older adults.

Expand Access and Connection

- Enhance well-being by expanding access to essential healthcare services, such as primary care, cardiac care, oral care, cancer screening, and chronic disease management and prevention.
- Additionally, support strategies to actively connect individuals to referrals for services and programs that support their holistic well-being, ensuring that everyone has the opportunity to receive the care and support they need

Building Community Resilience

- Build capacity and enhance readiness for infectious disease response, emergency preparedness and response,
- Strengthen overall community resilience while being responsive to the challenges of rural communities

2023-25 Accomplishments

State Health Improvement Plan

State Health Improvement Plan (SHIP) launched on April 11, 2024.

Multi-Partner Health Collaborative

Formed the Multi-Partner Health Collaborative which advocates for increasing access to options that foster health and wellness throughout our state.

New Lab Milestones

Held Groundbreaking ceremony on April 16, 2024, and final beam raising ceremony on October 24, 2024.

WIC

In 2023, the WIC Program served 16,225 participants, which included 4,727 infants and in 2024 served 16,601 participants including 4,877 infants

Emergency Operation Missions

Conducted 378 missions for long term care, hospital, gap staffing, and local public health support, 91 missions for patient transport coordination, and 1,359 courier missions of medical cache and lab specimens.

Data Quality

Ranked 3rd and 5th in National Violent Death Registry System rankings in 2023 and 2024 nationally in performance indicators by CDC.

NORTH Dakota | Health & Human Services

New Sections

SECTION 9. LABORATORY BUILDING STEERING COMMITTEE

- The department of health and human services shall maintain the laboratory building steering committee to oversee the design and construction of the laboratory building project for the biennium beginning July 1, 2025, and ending June 30, 2027, or until work is completed, whichever occurs earlier. The committee must include representation from the department of health and human services, department of environmental quality, office of management and budget, the governor's office, and the legislative assembly. The legislative assembly representation must include one member of the senate appointed by the senate majority leader, one member of the house appointed by the house majority leader, and one member of the minority party from either the senate or the house appointed by the minority leaders of the senate and the house.

SECTION 17. EXEMPTION - UNEXPENDED APPROPRIATIONS

- The sum of $55,120,000 appropriated from the federal state fiscal recovery fund for a public health laboratory capital project in chapter 4 of the 2023 Session Laws;

DHHS Public Health Division Related Bills

Bill	Description
HB 1029	Relating to a facility review committee; and to amend and reenact section 48-10-03 of the North Dakota Century Code, relating to the power and duties of the capitol grounds planning commission.
HB 1037	Provide an appropriation to the agriculture commissioner, the attorney general, the department of career and technical education, the department of health and human services, and the department of transportation to increase the use of uncrewed aircraft systems, autonomous vehicles, or other autonomous technologies in the state; to provide for a legislative management study; and to provide for a legislative management report.
HB 1068	Relating to autopsy reports, working papers, and photographs.
HB 1069	Relating to diabetes goals and plans.
SB 1071	Relating to tattooing, body piercing, branding, subdermal implants, and scarification; and to provide a penalty.
SB 2031	Relating to nursing services agencies; and to provide an effective date.
SB 2033	Relating to the distressed ambulance service program; to provide for a legislative management report; and to provide a continuing appropriation.

Summary and Key Takeaways

- Support public health capacity at the state and local levels to meet the needs of a growing population.
- Utilize funding to return to core services and encourage preventative care.
- Adapt to meet the new regulatory environment

GLOSSARY OF TERMINOLOGY

INTERNAL IDENTIFIERS

The following are commonly used terms referring to the HHS organizational structure:

Business Partner – Team members within the Business Divisions that provide strategic business functions across HHS. These include the Finance Division, Human Resources Division, Communications Division, and Legal Division.

Center of Excellence – A body that provides leadership, best practices, research, support and/or training around a specific focus area across program the Program and Business Divisions. The Department has Centers of Excellence for functions including Project Management, Process Improvement, Change Management, and Quality Management.

Division – Program and policy or business vertical; collection of sections or functions (e.g., Public Health Division, Human Resources Division).

Executive Director – Leader of a Programmatic or Business division within HHS.

Function – Subunit of business division (e.g., External Communications function within the Communications Division, Budget Management function within the Finance Division).

Office of Transformation – A function within the Deputy Commissioner's Office that is responsible for the improvement of existing workflows or processes in the Department.

Section – A singular subset of a division (e.g., Early Childhood Section, Aging Services Section).

PARTNERS, PROVIDERS AND PEOPLE WE SERVE

The following are commonly used terms referring to the partners, providers, and people we serve:

Basic Care Facility – Licensed residential facility that provides room and board and services to individuals who need health, social, or personal care services but do not require extensive medical services.

Care Coordinator (child welfare) – Case manager in a child and family case involving severe emotional disturbance.

Child Care Provider – Person, group of persons, or agency responsible for the education and supervision of the child/children in their care in exchange for money, goods, or services.

Licensed Family Child Care – Provider of care for seven or fewer (plus two additional school age children) children in a private residence.

Licensed Group Child Care – Provider of care for up to 30 children in a home or other type of facility, depending on usable space and staff-to-child ratio.
Licensed Preschools – Provider of part-time educational and socialization experiences for children aged two years to kindergarten for no more than three hours per day.

Licensed School-Age Programs – Provider of care for 19 or more school-age children when school is not in session.

Life Skills and Transition Center – State-operated, comprehensive support agency serving people with intellectual and developmental disabilities in Grafton.

LPHU – Local Public Health Unit. One of 28 independent units working in partnership with the North Dakota Department of Health to provide personal and population-based health services to residents in their city and/or county jurisdictions.

MCO – Managed Care Organization. Health care company or a health plan that provides for the delivery of health benefits and additional services to Medicaid beneficiaries through contracted arrangements with Medical Services. This contract helps to improve health plan performance, health care quality, and outcomes while reducing Medicaid program costs.

Peer Support Specialist – Person that uses their lived experience to assist others on their journey to recovery and wellness related to recovery from a mental health disorder, substance use disorder, brain injury, or any combination thereof. They work to help others become and stay engaged in the recovery process by using their lived experience, and skills learned in formal Peer Support training.

PRTF – Psychiatric Residential Treatment Facility. One of six facilities that provide children and adolescents with a comprehensive 24-hour therapeutic environment integrating group living, educational services, and a clinical program based upon an interdisciplinary clinical assessment and an individualized treatment plan that meets the needs of the child and family.

Qualified Service Provider (QSP) – Agency or independent contractor that agrees to meet standards for services and operations established by the Department to provide home and community-based long-term care services to older people and individuals with physical or intellectual disabilities.

Registered Providers – Child care providers who are eligible to participate in the Child Care Assistance Program (CCAP) and who are generally registered by tribal entities. These child care providers may be licensed by tribal entities and subject to their licensing criteria but are not licensed by the state.

SNF – Skilled Nursing Facility. A facility which provides inpatient skilled nursing care and related services to patients who require medical, nursing, or rehabilitative services but does not provide the level of care or treatment available in a hospital. SNF s are licensed by the state and certified by the Centers for Medicare & Medicaid Services (CMS) to participate in the Medicare/Medicaid programs.

CFS – Children and Family Services Division of the Department. CFS has administrative responsibility for the policies and procedures relating to children and families and is responsible for program supervision and technical assistance for the delivery of public child welfare services.

CHIP – Children's Health Insurance Program. Comprehensive health coverage for children 18 years of age and younger. To qualify, a child's family must have a modified adjusted gross income that is greater than the Medicaid eligibility level but does not exceed 175 percent of the federal poverty level.

CPS – Child Protection Services. Services intended to protect the health and welfare of children by encouraging the reporting of children known to be or suspected of being abused or neglected and providing services for the protection and treatment of abused and neglected children to safeguard them from further harm.

Diversion Assistance – Program that provides short-term emergency benefits and services during a "specific crisis or episode of need" for up to four months to families that would otherwise qualify for Temporary Assistance for Needy Families (TANF).

Early Childhood Services (ECS) – Team of Department employees that develops and co-administers the Child Care and Development Fund and reviews and maintains state regulations and policies. ECS supervisors, review and approve licensing studies, issue approved licenses, assess licensing violations, issue appropriate corrective action and supervise licensing specialists. ECS licensing specialists assist potential child care providers through the child care licensing process, conduct child care licensing studies, assess program concerns and work with child care providers to create healthy and safe child care programming.

EA – Economic Assistance. Division of the Department that administers policy for the following programs: Child Care Assistance Program (CCAP), Low Income Home Energy Assistance (LIHEAP), Supplemental Nutrition Assistance Program (SNAP), and Temporary Assistance for Needy Families (TANF), including Diversion Assistance and Job Opportunities and Basic Skills (JOBS). EA policy is also responsible for Alternative to Abortion services, Quality Control/Quality Assurance unit, Policy and System Support unit.

FMAP – Federal Medical Assistance Percentage. Federal matching rate for the Medicaid program. FMAP is evaluated annually on October 1 and is based on the three-year average of North Dakota's per capita personal income as compared to the three-year average of the national per capita personal income.

Food and Nutrition Services (FNS) – Federal agency of the United States Department of Agriculture that, among other duties, administers the Supplemental Nutrition Assistance Program (SNAP).

FTR – Free Through Recovery. Community based behavioral health program designed to increase recovery support services to individuals involved with the criminal justice system who have behavioral health concerns; administered by the Behavioral Health Division of the Department in partnership with the ND Department of Corrections and Rehabilitation.

PRIDE – Parental Responsibility Initiative for the Development of Employment. Collaborative effort involving the Department, Job Service of North Dakota, and district courts to address nonpayment of child support resulting from the unemployment or underemployment of the obligor. PRIDE provides case management, job skills improvement, and job placement to help obligors obtain or improve their employment in order to pay child support.

SAMHSA – Substance Abuse and Mental Health Services Administration. Agency within the US Department of Health and Human Services that leads public health efforts to advance the behavioral health of the nation. The agency's mission is to reduce the impact of substance abuse and mental illness on America's communities.

SNAP – Supplemental Nutrition Assistance Program. Federally funded USDA program intended to raise levels of nutrition among low-income households by supplementing their food purchasing power with monthly benefits distributed through an electronic benefit card. Formerly called the Food Stamp program.

TANF – Temporary Assistance for Needy Families. Federal block grant program established under Title IV-A of the Social Security Act that provides cash assistance to low-income families with children who are deprived of the support of at least one parent while promoting self-sufficiency through work readiness training and job placement services.

VR – Vocational Rehabilitation. Training and employment services provided to individuals with disabilities so that they can become and/or remain employed. Services are designed to assist business owners and employers in developing short and long-term strategies regarding disability-related issues including staffing; education; tapping into financial incentives associated with hiring an individual who has a permanent injury, illness, or impairment; or ensuring accessibility to goods or services.

Vulnerable Adult Protective Services (VAPS) – Program to address the safety of vulnerable adults who are at-risk of harm due to the presence or threat of abuse, neglect or exploitation.

WIC – Special Supplemental Nutrition Program for Women, Infants, and Children. This program offers healthy food for proper growth and development and helps families choose healthier ways of eating. WIC is for eligible pregnant, breastfeeding and postpartum women, infants, and children under 5 years and is available in all North Dakota counties.

SYSTEMS AND TOOLS

The following define commonly used systems and tools across HHS:

CCWIPS – Comprehensive Child Welfare, Information, and Payment System. Computerized case management and payment system for foster care and adoption services

FACSES – Fully Automated Child Support Enforcement System. Federally certified computer system that supports the processing of child support cases in North Dakota and supports the State Disbursement Unit (SDU) in processing child support payments.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/14/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:29 p.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Coverage
- Services
- Challenges
- Opportunities
- Successes
- Areas of risk
- Key priorities
- Goals
- Key budget drivers

2:29 p.m. Sarah Aker, Executive Director, Medical Services Division, North Dakota Health and Human Services, testified and presented an overview of the medical services division #28936.

4:40 p.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

What is Medicaid?

- Medicaid is the nation's publicly financed health care coverage program for low-income people enacted in 1965 under Title XIX of the Social Security Act and Title XXI of the Children's Health Insurance Program (CHIP) enacted in 1997
  - An entitlement program that requires all eligibles to receive services and is funded through federal and state dollars
  - Provides health coverage for eligible individuals
  - It is a Federal – State partnership
- States administer the Medicaid program
  - Each state plan is different due to optional services provided making it difficult to compare states side-by-side
- Medicaid is separate from Medicare
  - Medicare is for individuals 65 years and older for all incomes, and for people with disabilities
  - Medicare is a federally administered and funded program
  - Individuals can be eligible for both Medicare and Medicaid.

Medicaid Regulations

Federal Government

Social Security Act (SSA)	Title XIX - Medicaid Title XXI - CHIP

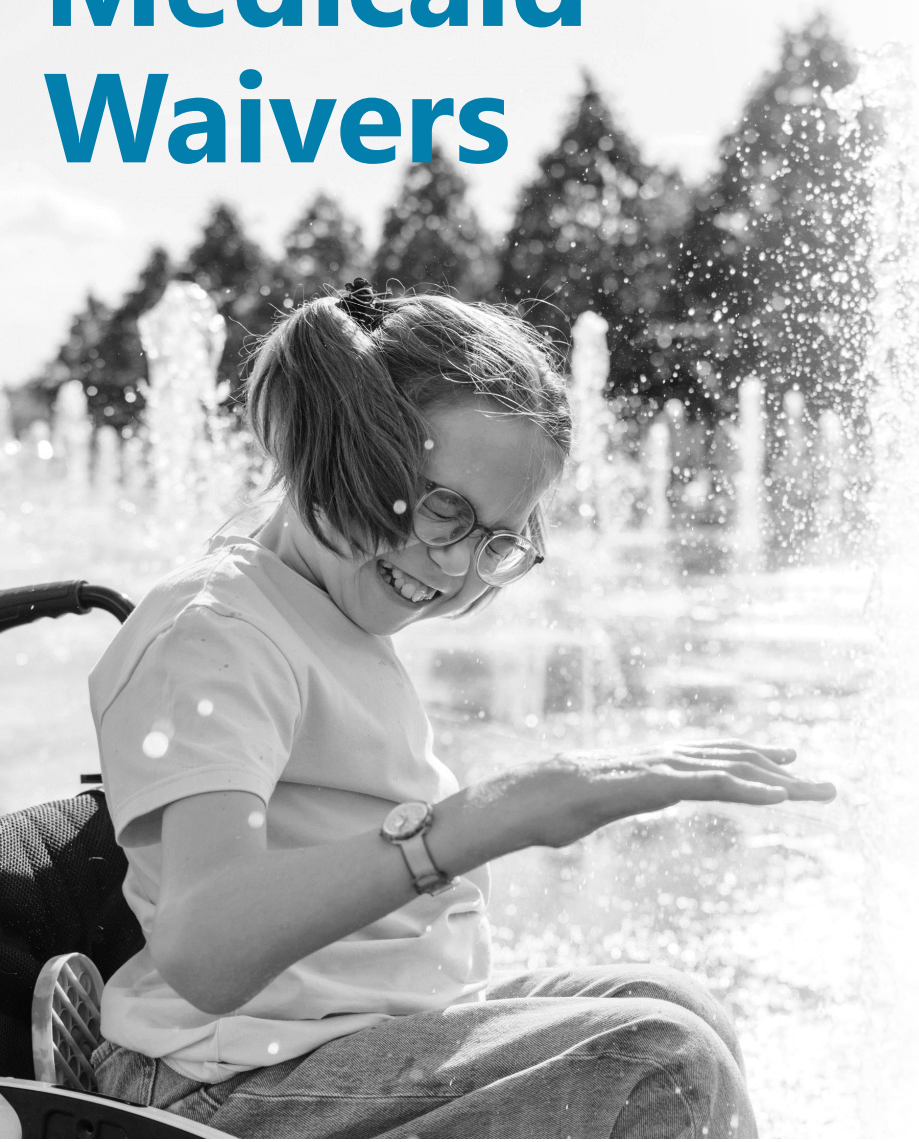
Mandatory and Optional Covered Services



Mandatory Services

- Inpatient hospital
- Outpatient hospital
- EPSDT: Early and Periodic Screening, Diagnostic and Treatment Services
- Nursing facility
- Home health
- Physician services
- Rural health clinic services
- Federally qualified health center services
- Laboratory and x-ray services
- Family planning services
- Nurse midwife services
- Certified Pediatric and Family Nurse Practitioner services
- Transportation to medical care
- Tobacco cessation counseling for pregnant women

North Dakota Optional Services

- Prescription Drugs
- Clinic services
- Physical therapy, occupational therapy and speech, hearing and language disorder services
- Respiratory care services
- Podiatry services
- Optometry services and eyeglasses
- Dental services and dentures
- Prosthetics
- Chiropractic services
- Personal Care and Private Duty Nursing services
- Hospice
- Case Management
- Services for Individuals Age 65 or Older in an IMD
- Services in an ICF for individuals with an intellectual disability
- 1915(i) and 1915(c) Home and Community Based Services
- Inpatient psychiatric services for individuals under age 21
- Basic Care

Medicaid Waivers

- Waivers are a method for a state to test new or different ways to deliver and pay for health care services
  - Cannot waive the basic tenants of Medicaid
  - Cannot cap overall Medicaid enrollment
  - Must be cost/budget neutral
- Can vary from existing federal Medicaid requirements in certain areas
  - Access to services
  - Level of care requirements
  - Services Provided
  - Population Served
- Specific process to obtain Waivers
  - Requires a series of detailed steps, including an application and public notice
  - Requires a series of negotiations between the state and the federal government
- Common waivers include 1915(c) and 1115 waivers.

NORTH Dakota | Health & Human Services
Be Legendary.

North Dakota Medicaid Waivers

1915(c) Home and Community Based Services (HCBS) Waivers

- Autism Spectrum Disorder Waiver
- Children's Hospice Waiver
- Waiver for Medically Fragile Children
- Waiver for Home and Community Based Services
- Traditional Intellectual Disabilities and Developmental Disabilities HCBS Waiver

- 1915(c) waivers have two components of eligibility:
  - Functional Need
    - Assessments are used to measure an individual's needs. The assessment helps shape the care plan in addition to verifying eligibility.
  - Financial
    - For waivers, only the income of the individual applying for the waiver's income is used to determine financial eligibility.
    - Allows coverage of disabled individuals at incomes higher than those that would traditionally qualify for Medicaid.

PROVIDER ENROLLMENT

- Ensures providers meet all federal and state standards to enroll as a Medicaid provider and remain an eligible provider.
- ND Medicaid has over 24,000 enrolled providers.
- On average, new enrollments were processed within 11 days.

CLAIMS PROCESSING

- Processes claims for services from Medicaid providers.
  - Includes claim functions for other state entities (ex. DOCR).
- Over 7 million claims processed annually. Claims were processed within 7 days of receipt during SFY24.
  - Data entered 44,115 paper claims in SFY24.
  - Manually processed 634,972 claims in SFY24.
- Answered over 52,000 annual calls from providers & members.

PROGRAM INTEGRITY

- Conducts federally mandated review process through post-payment provider reviews and investigates reports of fraud, waste and abuse.
- Medical Services staff works alongside the Medicaid Fraud Control Unit (MFCU) & CMS Program Integrity Contractors.

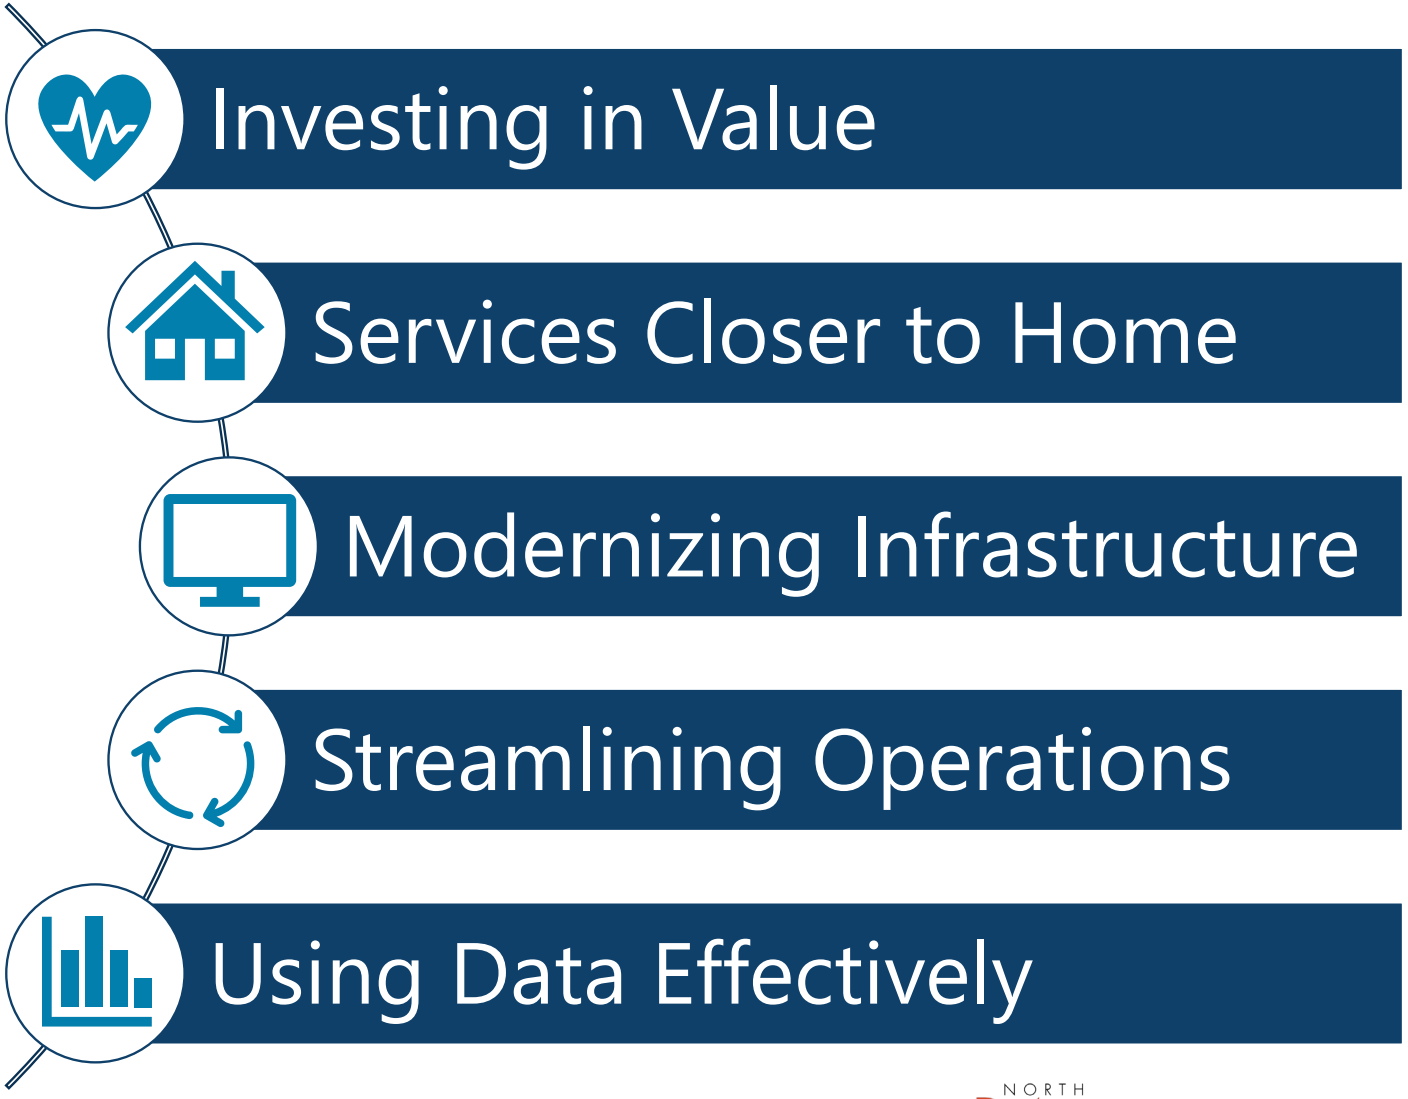
  - Systems Integrator | Leidos | Kicked-Off May 2024
  - Module 1: Provider Enrollment | RFP Draft in Progress

2022 Single Audit
Findings and Programmatic Recommendations

- 2022-008 Medicaid Cluster. Develop a corrective action plan to address the errors identified in the audit and recover payments made on unsupported claims. *The Department recovered payments made on unsupported claims. HHS continues to educate providers about documentation requirements for Medicaid services.*
- 2022-009 Medicaid Cluster. Complete a risk analysis and security review of MMIS biennially. *A security review and penetration test was completed by NDIT in 2023. Another is scheduled for 2025.*
- 2022-010 Medicaid Cluster. Ensure the medical loss ratio report is finalized as outlined in the contract and all required documentation is properly maintained. *The Department re-procured the Medicaid Expansion Managed Care Organization contract with a January 1, 2022 start date. As part of that process, the contract was revised and more specific terms related to the MLR requirements were included in the contract.*
- 2022-011 Medicaid Cluster. Review access rights to the Medicaid Management Information System (MMIS) fee schedule and all major Medicaid information systems on a regular basis. *HHS and NDIT have implemented a quarterly review of all security roles associated to each user within MMIS. These are sent to the individual's manager to either retain or remove their current access. If no response is received, the security roles are automatically removed. The most recent review was completed in December 2024.*
- 2022-019 Children's Health Insurance Program. Review the SPACES system edit checks and ensure eligibility determinations made for the CHIP programs are proper. We also recommend corrections to payments and Federal reimbursement of CHIP. *With the end of the continuous enrollment requirement in April 2023, system edits checks were put back in place as part of the Department's Unwinding activities.*

Successes



- Value Based Purchasing Implementation
- Unwinding
- Systems Integrator Procurement
- D-SNP Implementation
- Medicaid School Based Administrative Claiming Implementation
- Member, Provider, & Tribal Engagement
- Complex Discharge Coordination
- Increased Customer Support
  - QSP Provider Enrollment Portal
- Collaboration Across HHS & State Agencies
  - ND HIN OAPD Funding
  - Cross Disability Waiver Planning
  - Data Sharing with DPI

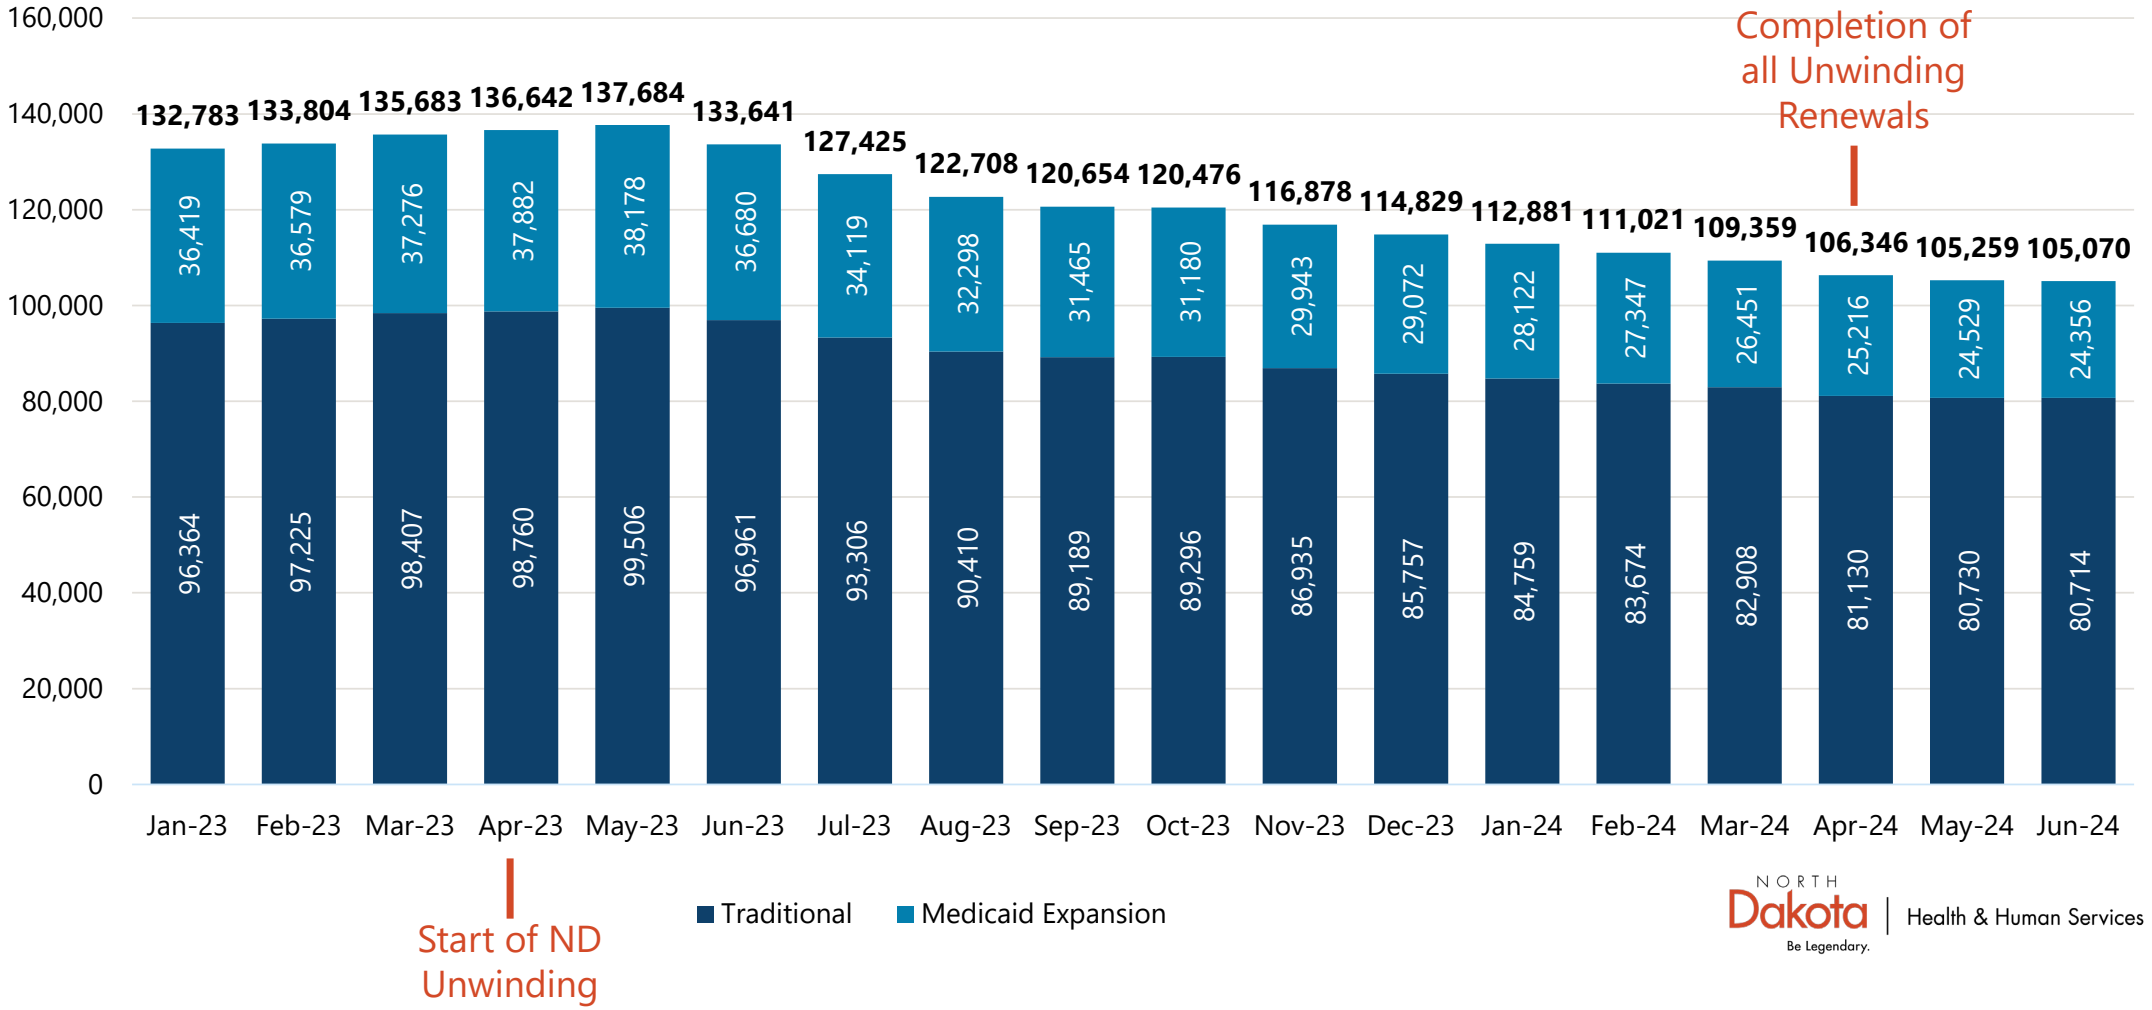
Public Health Emergency Continuous Eligibility Requirement

The Families First Coronavirus Response Act (FFCRA) passed in March 2020 provided an additional 6.2% FMAP to states.



- To receive the enhanced FMAP, states had to meet certain Maintenance of Effort requirements including continuous coverage of all individuals enrolled on or after March 2020.
  - Members could only be disenrolled from a state's Medicaid program if they asked to be disenrolled, moved out of state, or died.
- In December 2022, Congress delinked the Medicaid continuous coverage requirement from the PHE, allowing states to resume Medicaid coverage terminations effective April 1, 2023.
- "Unwinding" is a term used to refer to the return to normal Medicaid eligibility rules.

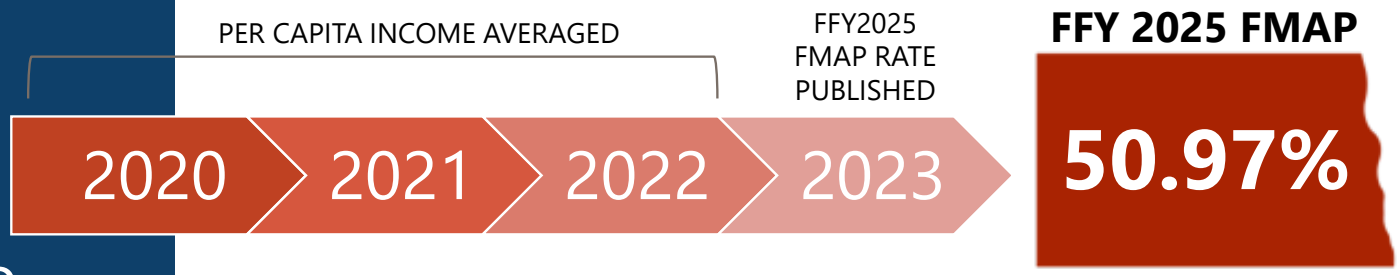
Medicaid Financing

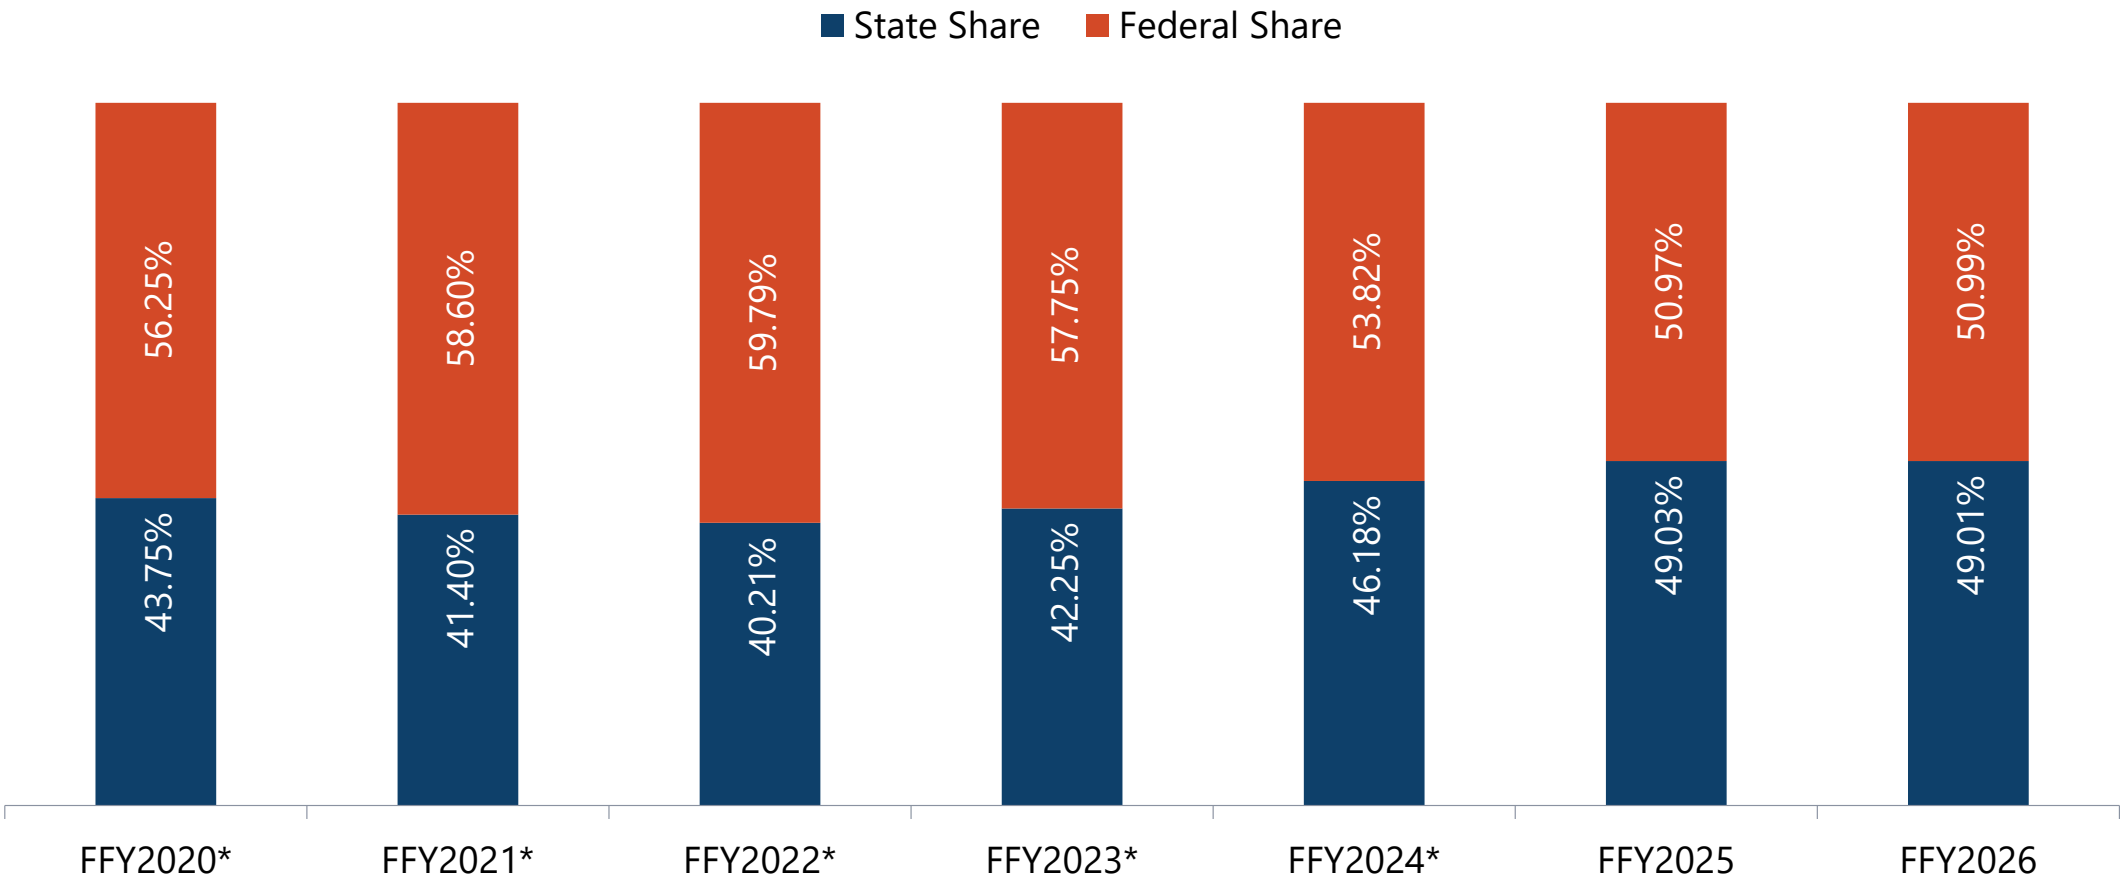
NORTH Dakota | Health & Human Services
Be Legendary.



What is the FMAP?

The federal government's share of a state's Medicaid expenditures is called the Federal Medical Assistance Percentage (FMAP).

States must contribute the remaining portion to qualify for federal funding.



The FMAP changes each federal fiscal year (October 1 – September 30) and is based on a funding formula related to a state's per capita income relative to the national average over a 3 year period.

$$FMAP = 1 - 0.45 \times \left(\frac{State\ Per\ Capita\ Income^2}{US\ Per\ Capita\ Income^2}\right)$$

NORTH Dakota | Health & Human Services
Be Legendary.

FMAP

*The FMAP for FFY 2020 – 2023 includes a 6.2% increase due to the CARES Act during the Public Health Emergency. The FMAP was stepped down during the Unwinding period in FFY2023 and FFY2024

NORTH Dakota Be Legendary. | Health & Human Services

FMAP

Most services are funded with the state's regular FMAP. Certain services, populations, systems and administrative functions are funded with a different percentage:

- Children's Health Insurance Program (CHIP) Members
- Medicaid Expansion Members
- Services Received through Indian Health Service or a Tribal 638 Provider
- Administration
- Professional Medical Staff
- Certified Systems

Rates & Reimbursement

NORTH Dakota | Health & Human Services
Be Legendary.

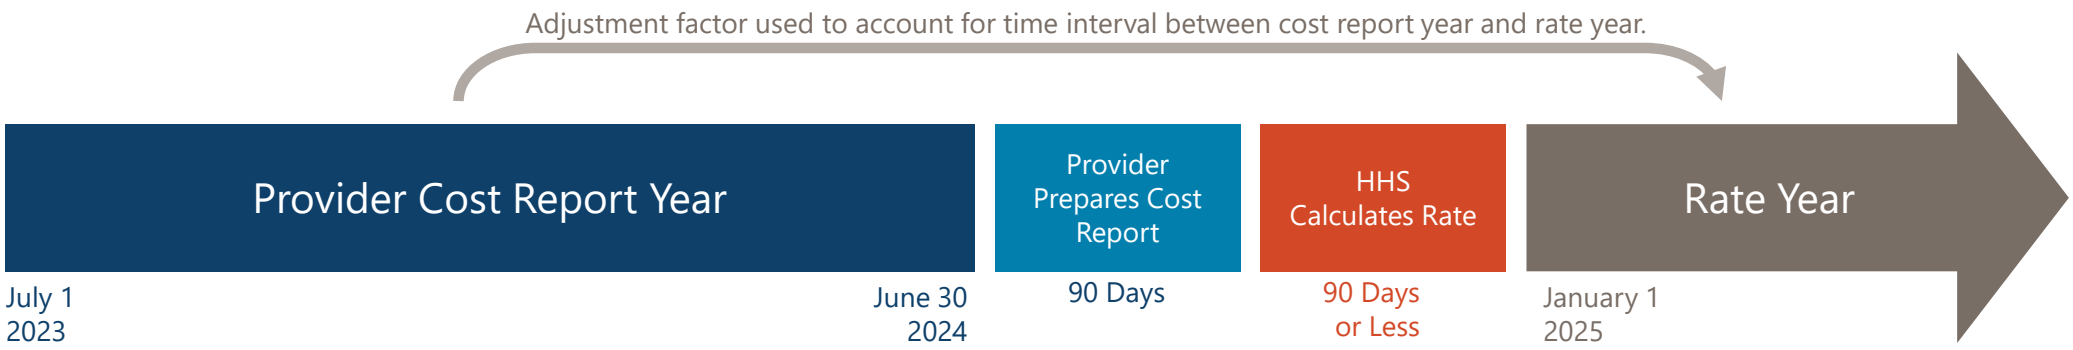
How does ND Medicaid pay for services?

Traditional Medicaid: Fee For Service (FFS)	**Medicaid Expansion: Managed Care Organization (MCO)**
State pays providers directly for each covered service received by a Medicaid member.	State pays a monthly fee called a capitation payment to the managed care organization (MCO).
Only services received by members are paid.	Monthly fee is paid to MCO regardless of member use of services.

Rate Methodology Guiding Principles Traditional Medicaid

- Predictable
- Consistent
- Transparent
- Data Driven
- Population Focused
- Quality & Outcomes Oriented
- Incentivizes Innovation, Efficiency & Community Based Care

Rate Methodologies in Fee For Service Medicaid



- **Cost Based Per Diem** – Uses cost reports as the basis for setting individual facility per diem payments. Per diem payments may be adjusted to account for patient acuity.
- **Classification System** – Defines an episode (ex. inpatient admission or outpatient visit) and assigns a classification based on services provided. May be used in conjunction with cost reports to assign facility specific base rates.
- **Relative Value Units** – Defines the resource intensity of a service. Used in conjunction with a conversion factor.
- **Fees –** List of reimbursements correlated to a nationally defined code set.
- **Percent of Charge –** Uses a defined percentage to reimburse based on billed charges.
- **Cost Settlement –** Compares provider costs to payments made by ND Medicaid.

What is a cost report?

A cost report is a financial document submitted by health care providers and outline the expenses incurred in delivering patient care and include data on operating costs, salaries, supplies, and other expenditures. Cost report data is used to set provider reimbursement rates.

- Cost reports cover a defined time period and are used to detail provider costs during that timeframe.
- Costs are generally broken into a few distinct categories:
  - Direct Care
  - Indirect Care
  - Property
  - Other

How are cost reports used to set rates?

The rate methodology for the service uses cost report data to calculate provider rates.

- An adjustment factor is used to inflate costs forward from the cost report year to the rate year.
- Some costs are not allowable (ex. lobbying) for use in calculating reimbursement rates.
- Cost categories have limits to ensure that costs are reasonable and efficient.
- Provider cost reports and underlying data may be audited to ensure that costs were appropriately reported and allocated.
- The department must prepare/calculate rates for multiple providers within the same 90 day timeframe.

NORTH Dakota | Health & Human Services
Be Legendary.

Upper Payment Limit

- Medicaid payments are required to be "consistent with efficiency, economy, and quality of care."
- CMS requires states to demonstrate compliance that payments for certain providers do not exceed an upper payment limit (UPL).
- The UPL is a reasonable estimate of the amount that would have been paid for the same service under Medicare payment principles.

Required Upper Payment Limit Demonstrations in North Dakota:

- Inpatient Hospital Services
- Outpatient Hospital Services
- Nursing Facility Services
- Institutions for Mental Disease (IMD)
- Clinic Services
- Intermediate Care Facility for the Individuals with Intellectual Disabilities (ICF/IID)
- Psychiatric Residential Treatment Facility (PRTF)

Federal Financial Participation Limit:

- Durable Medical Equipment

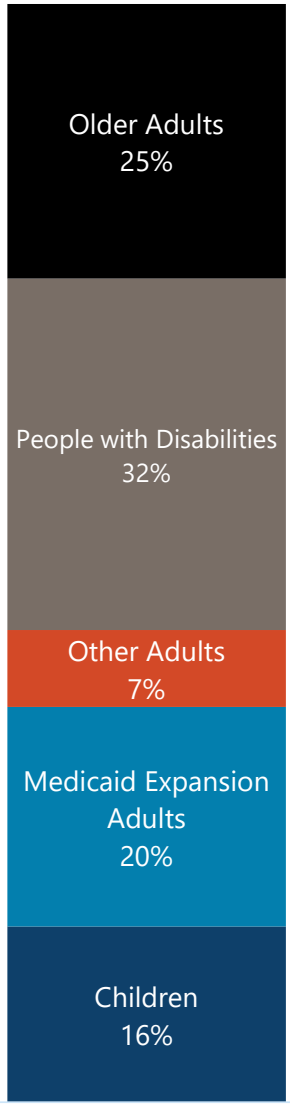
How do we measure results in Medicaid?

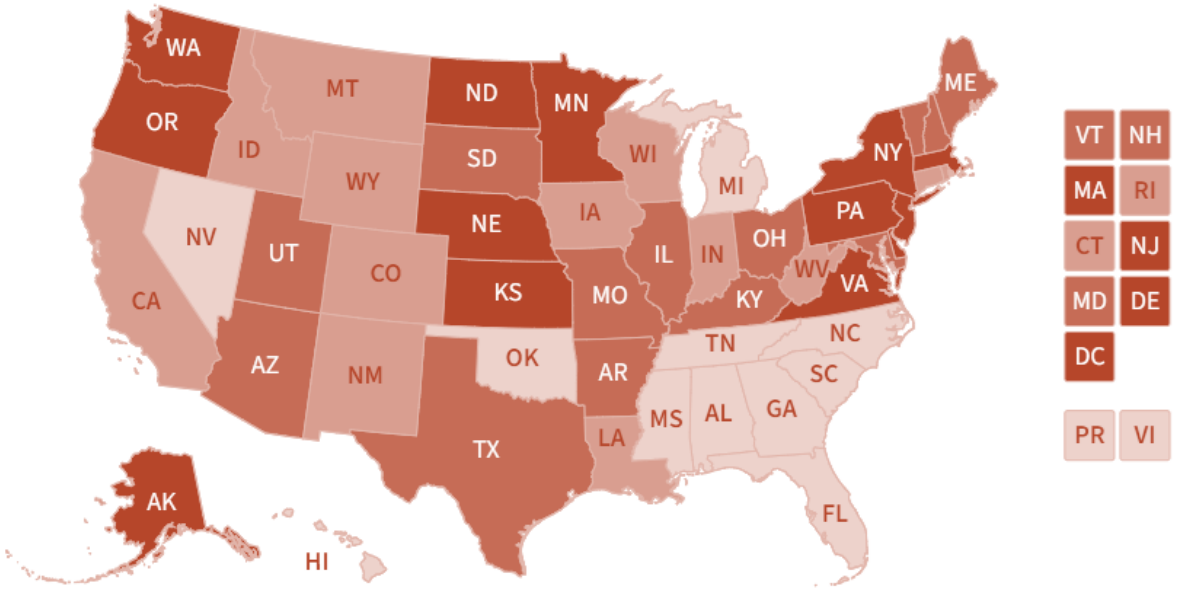
Expenditures & Outcomes



The Center for Medicare and Medicaid Services (CMS) collects and publishes data related to both expenditures and outcomes on the Medicaid & CHIP Scorecard.

- Expenditure data comes from TMSIS and CMS-64 Reports.
  - Expenditures in Medicaid are influenced by both rates and utilization.
- Outcome measures include nationally standardized metrics outlined in the Core Set and other reports.
- Data lags current performance.
  - Most recent data available is for CY 2022 and Core Set Year 2023 (Services in CY 2022).

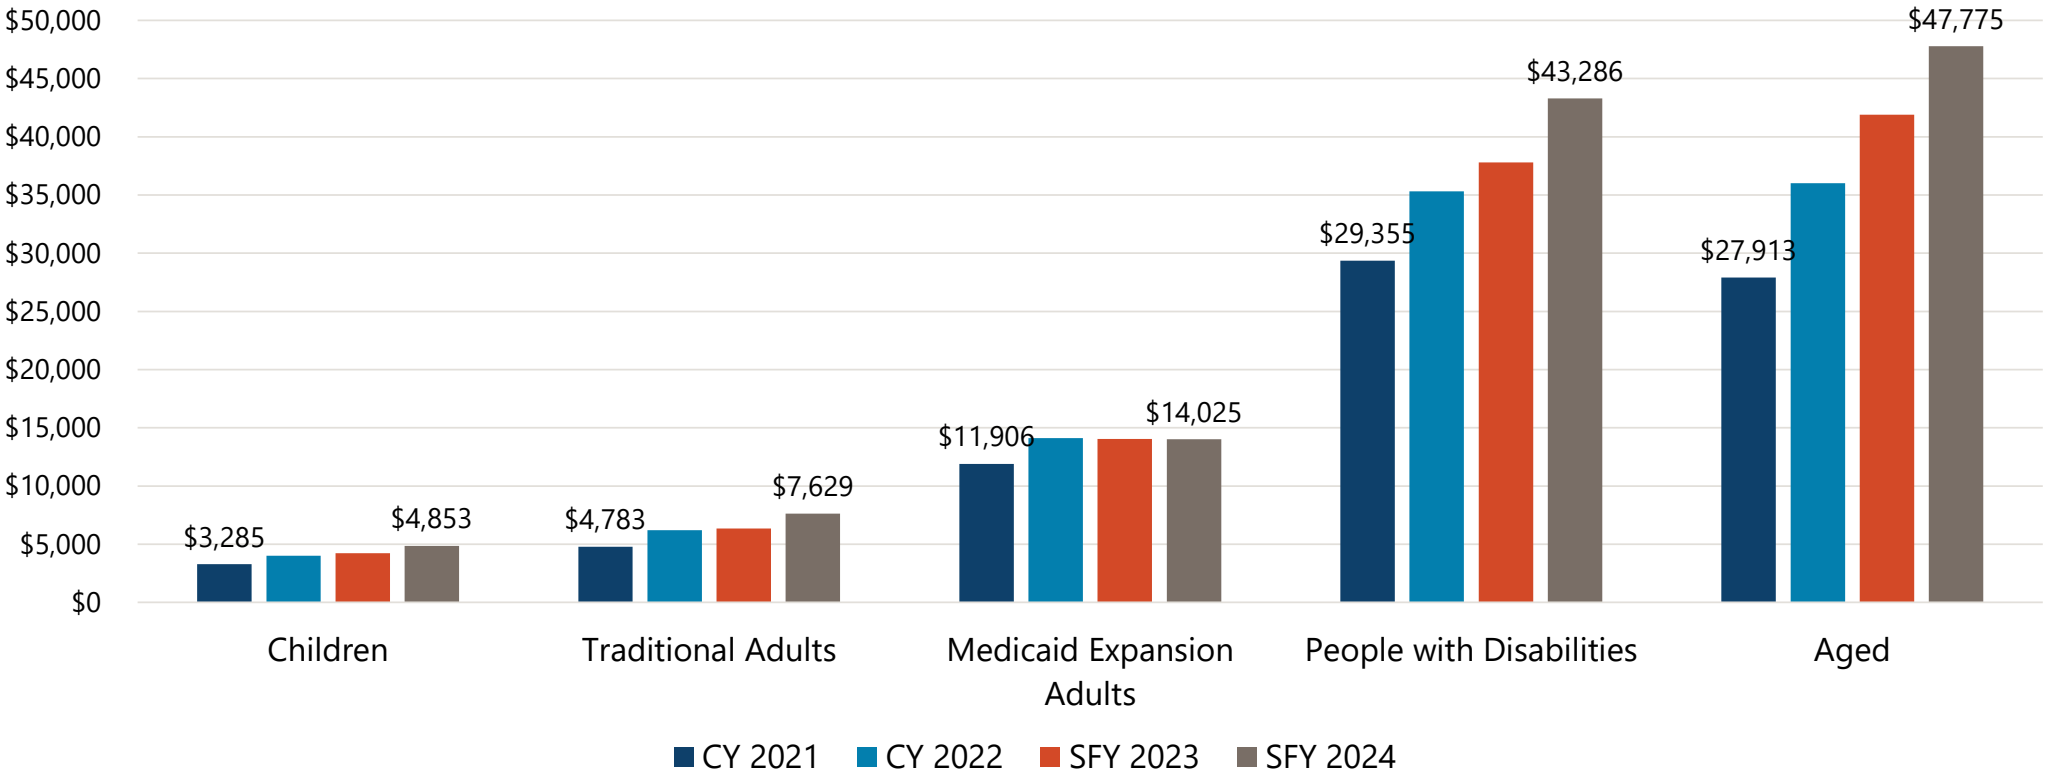
North Dakota Medicaid Enrollment and Expenditures SFY 2024



Enrollment

Expenditures

Per Capita Expenditures: CY 2022



- North Dakota ranked **2nd** in the nation for highest total per capita expenditures.
  - North Dakota ranked **1st for Medicaid Expansion per capita** expenditures
  - ND Medicaid ranked **1st for Aged per capita** expenditures.
  - ND Medicaid ranked 7th for People with Disabilities expenditures.

	Total	Children	Traditional Adults	Medicaid Expansion	Aged	People with Disabilities
North Dakota	**$13,097**	**$4,003**	**$6,207**	**$14,120**	**$36,020**	**$35,311**
National Median	$9,108	$3,822	$6,207	$7,818	$19,079	$25,639
Difference	$3,989	$181	$0	$6,302	$16,941	$9,672

Health System Value-Based Purchasing

Program Start Date: July 1st, 2023

6 Prospective Payment System (PPS) Health Systems are mandatory participants in the model

The PPS Hospital System VBP Program puts a portion of hospital payments at risk for performance on a suite of quality measures for their ND Medicaid patient population. PPS Hospital Systems will see no loss of funding if they meet specific success criteria.

2024
Pay for Reporting

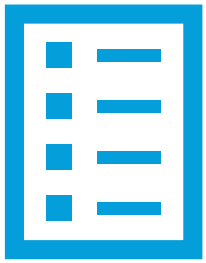
1. Submit Quality Improvement Plans through VBP Reporting Tool
2. VBP Quality Improvement Outcomes Meeting
3. Supplemental Data Submission

2025

Pay for Reporting

+

Pay for Performance
(Initial Measure Set)



2026
Pay for Performance

Initial Measure Set
Well-Child Visits First 15 Months of Life
Child & Adolescent Well-Care Visit
Breast Cancer Screening
Postpartum Care: Prenatal & Postpartum Care
Screening for Depression & Documented Follow-up Plan
Ambulatory Care Emergency Department (ED) Visits
Plan All-Cause Readmissions
Topical Fluoride for Children

Expanded Measure Set
Colorectal Cancer Screening
Controlling High Blood Pressure
Maternal Health Services Optional Measures: (systems must select 1) 1. Prenatal Care: Prenatal Care & Postpartum Care 2. Contraceptive Care: Postpartum Women 3. Structural Measure: Perinatal Collaborative Participation
Behavioral Health Services Optional Measures: (systems must select 1) 1. Follow-up After Emergency Department Visit for Alcohol & Other Drugs Abuse or Dependence 2. Initiation & Engagement of Alcohol & Other Drug Abuse or Dependence Treatment

2024 Pay for Reporting Components

Quality Improvement Plan Submission

February 2024

All 6 PPS Hospital Systems submitted QIPs by the last day in February.

VBP Quality Improvement Outcomes Meeting

Oct - Nov 2024

6 out of 6 PPS Hospital Systems have completed their Outcomes Meetings .

Supplemental Data Submission

January 2025

6 out of 6 PPS Hospital Systems submitted supplemental data.

If the system satisfies the pay-for-reporting requirements, the system retains 100% of the at-risk funding.

If the system does not satisfy all of the reporting requirements, the system must pay the State 100% of the at-risk funds

NORTH Dakota | Health & Human Services

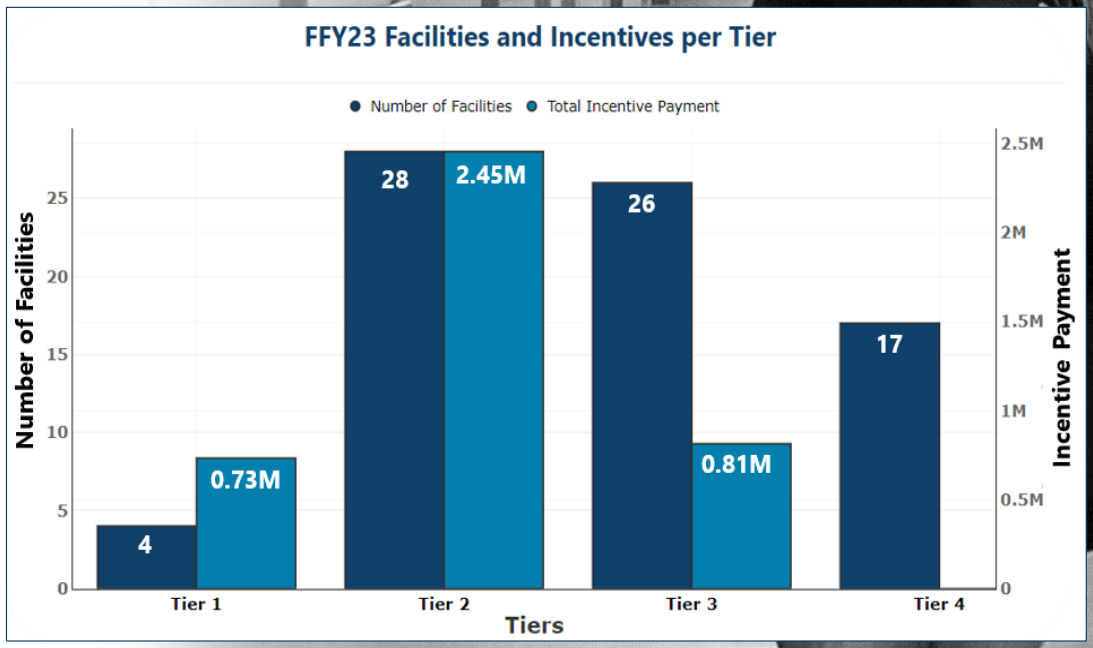
Nursing Facility Incentive Program

Improve resident outcomes through an incentive payment based on specific quality measures.

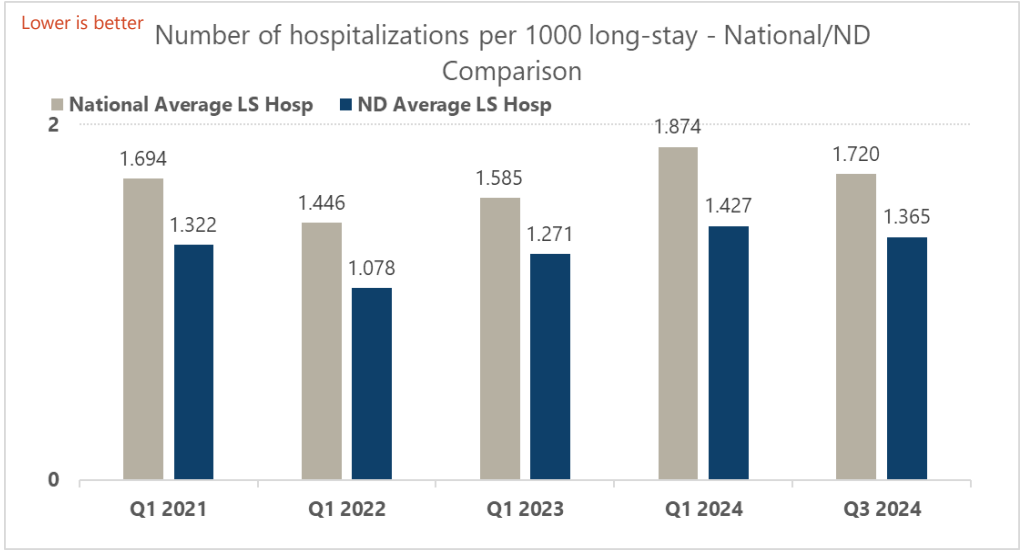


- Incentive program; no payments are at risk.
- All Medicare/Medicaid certified facilities that have been open 10 months will participate.

- Incentive fund distribution is done annually in June.
- Annual payments based on Quality Measure performance:
  - Tier 1: 100% of incentive payment
  - Tier 2: 85% of incentive payment
  - Tier 3: 60% of incentive payment
  - Tier 4: Not eligible for an incentive payment
- Nursing Facility Quality Measures:
  - Patient Care Measures
    - Long-Stay Urinary Tract Infections
    - Long-Stay Antipsychotic use
    - Long-Stay Pressure Ulcers
  - Facility Process Measures
    - Long-Stay Hospitalizations
    - ACHA/NCAL National Quality Award (Baldrige Framework)

NORTH Dakota | Health & Human Services
Be Legendary.

Initial Outcomes



- $4 million dollars distributed in June 2024
- 58 out of 75 Nursing Facilities received incentives to improve quality of care for residents
- Examples of reported use of funds include
  - New mattresses for entire facility
  - Staff bonuses
  - Building renovation
  - Staff training

Be Legendary.

Managed Care & Medicaid Expansion

NORTH Dakota | Health & Human Services
Be Legendary.

Medicaid Expansion Coverage

North Dakota provides Medicaid Expansion through risk based Managed Care.

- Current Vendor: Blue Cross Blue Shield of North Dakota (BCBS ND)

- There are a few key differences between Medicaid Expansion and traditional Medicaid.
- Medicaid Expansion **does not** cover:
  - Skilled Nursing Facility Services[1]
  - Dental Services[2]
  - Vision Services[2]
  - Any waiver services
  - Long Term Care services

[1] Only covers up to 30 days and only covers a skilled level of care
[2] Only covered for 19- and 20-year-olds

NORTH Dakota | Health & Human Services
Be Legendary.

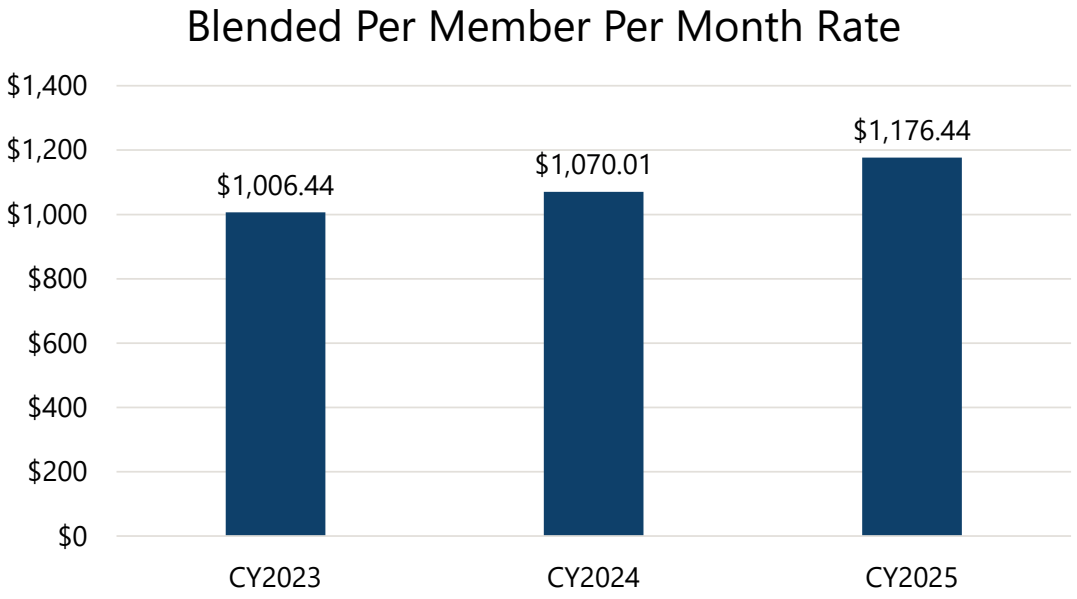
Managed Care

- **Managed Care Plans use their own provider networks.** Providers must enroll in Blue Cross Blue Shield to provide care to Medicaid Expansion members.
- **Managed Care Plans use their own coverage criteria, authorization process, and limits.** Providers must follow Blue Cross Blue Shield policies for Medicaid Expansion members.
- **Managed Care Plans use their own reimbursement methodology and fee schedules.** Providers are paid according to Blue Cross Blue Shield's policy for Medicaid Expansion members.
- **North Dakota Medicaid has carved out pharmacy benefits for Medicaid Expansion members.** Pharmacy benefits are the same for Medicaid Expansion and traditional Medicaid.

How does ND Medicaid pay for services?

Traditional Medicaid: Fee For Service (FFS)	**Medicaid Expansion: Managed Care Organization (MCO)**
State pays providers directly for each covered service received by a Medicaid member.	State pays a monthly fee called a capitation payment to the managed care organization (MCO).
Only services received by members are paid.	Monthly fee is paid to MCO regardless of member use of services.

Capitation Rate Development Process



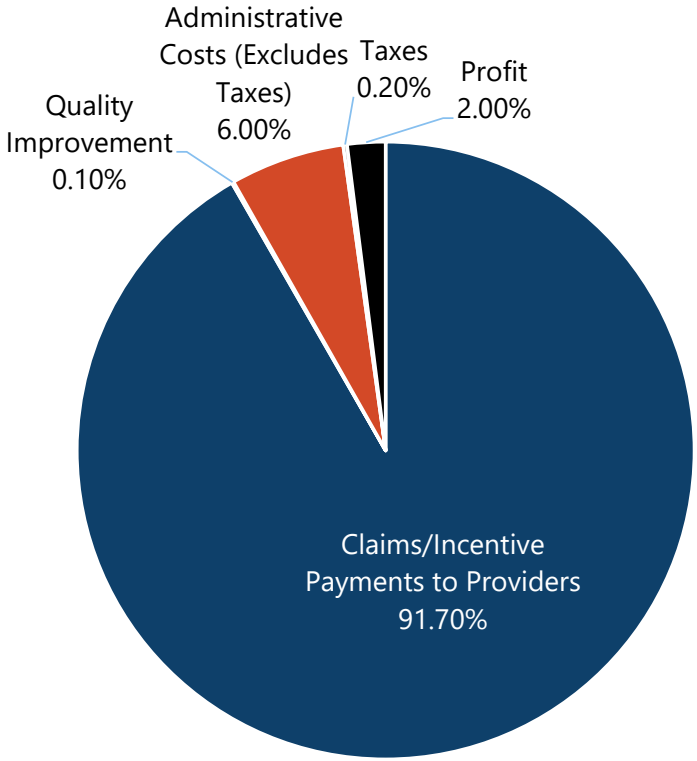
NORTH Dakota Be Legendary. | Health & Human Services

2025 Capitation Rates

CY2025 capitation rates are in development by our actuary in conjunction with HHS and BCBSND.

- CY2025 capitation rates implement Senate Bill 2012 provision to ensure that the capitation rate calculation assumes that MCO rates will not exceed 145% of Medicare reimbursement, except for services noted in Section 22.

- No decrease to the CY2025 Capitation Rates to comply with 145% of Medicare requirement.
  - Actuarial analysis showed BCBS was already at 144.5% in aggregate of Medicare.
- Overall, 9.1% increase in rates for CY2025.



NORTH Dakota Be Legendary. | Health & Human Services

Medical Loss Ratio (MLR) & Profit Cap

- Since reprocuring the Medicaid Expansion contract in 2022, ND Medicaid has used both a Medical Loss Ratio (MLR) and Profit Cap to protect the state.
  - Profit Cap: Overall limit on the amount of profit that can be retained by the plan.
  - Medical Loss Ratio: Requires a specific percentage of the total capitation is spent on services and quality improvement. Protects states from paying for excessive administrative expenses or profits.
- While providing overall protection to the state, a profit cap can be a disincentive to continued innovation and lowering administrative costs.
- For CY 2025, ND Medicaid will use a robust MLR as the key Managed Care risk mitigation strategy.

Allocation of Retained MCO Revenue

NORTH Dakota Be Legendary. | Health & Human Services

Performance Withhold: 2023

- 2% of Capitation Payments were withheld from the monthly premium.
- MCO had opportunity to earn back funds based on meeting quality goals.

Drugs

NORTH Dakota | Health & Human Services
Be Legendary.

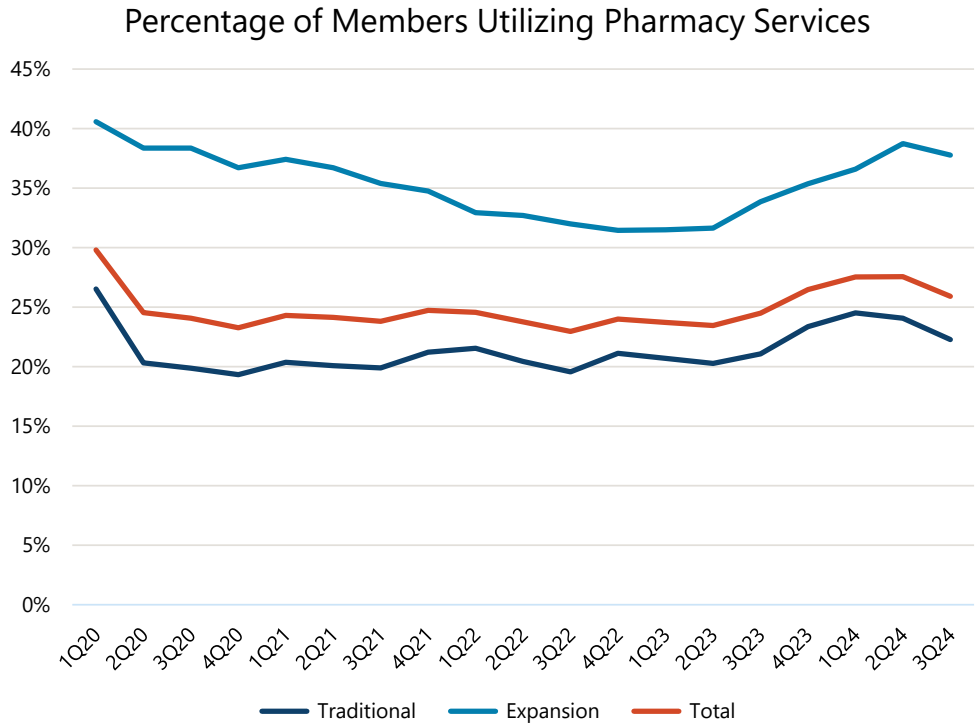
Coverage



- **Prescription Only/Legend Drugs:** federal law requires Medicaid to cover all legend drugs of manufacturers who have signed a Medicaid Drug Rebate Agreement (MDRP)
  - Essentially all legend drugs are covered as most manufacturers participate in the MDRP
- **Over-the-Counter Drugs:** some are covered if they are part of the MDRP as outlined in the Pharmacy Provider Manual
- **Supplements/Vitamins:** some are covered as outlined in the Pharmacy Provider Manual
  - Medicaid works with the health division to cover some supplements required for treatment of diseases
- **Diabetic Supplies:** glucose test strips, meters, lancets, continuous glucose monitors, insulin syringes, tubeless insulin pumps, and pen needles as outlined in the Preferred Drug List (PDL)
- **Other:** inhaler spacers, injectable medication supplies (syringes, needles)

Drug Use Review

- **Drug Use Review (DUR) Board:**
  - Mandated by federal and state law; board meets quarterly to provide recommendations on our pharmacy prior authorization (PA) program and our DUR program. Six physicians and six pharmacists are voting members of the DUR Board.
- **Prior Authorization (PA):**
  - Over 900 PAs received in December 2024
  - A Preferred Drug List (PDL) is a requirement for supplemental drug rebate agreements. ND has decided to use it for our entire PA program. The PDL outlines coverage parameters for many medications, including PA criteria.
- **DUR Program:** Mandated by federal law; includes prospective and retrospective education on therapeutic duplication, drug-disease contraindication, drug-drug interaction, incorrect drug dosage, incorrect duration of drug treatment, drug-allergy, and clinical abuse/misuse edits
  - **Prospective DUR:** Prospective DUR requirements to ensure appropriate payment and provision of prescription drugs as well as drug counseling and patient profile requirements
  - **Retrospective DUR:** Roughly 400 cases reviewed two of every three months; once a quarter, a targeted mailing is done; letters are mailed to pharmacists and prescribers

Utilizers of Pharmacy Services

NORTH Dakota | Health & Human Services
Be Legendary.

Cost Drivers

- **6 Drug Classes:** 6 drug classes make up 36.3% of the drug budget (4Q23 to 3Q24):
  - Cystic Fibrosis, Immunomodulators, Migraine, Non-Insulin Diabetes, Pulmonary Hypertension, Tardive Dyskinesia
  - Spend for these classes increased by 138% between 1Q2020 and 3Q2024 to $10 million per quarter
  - During the same period, claims volume for drugs in these classes only increased by 14%
- **50 Hyper-Cost Drugs:** 50 hyper-cost drugs make up 33.7% of the drug budget (4Q23 to 3Q24):
  - Over $950,000 spent on 22 claims from 4Q23 to 3Q24 on just 3 drugs: Daybue, Gattex, and Oxervate

House Appropriations, Human Resources Section| January 15, 2025
Representative Jon Nelson, Chairman

Presentation by Jessica Thomasson, Executive Director, Human Services Division

#1: Purpose of the Division and its programs

The Human Services Division is responsible for carrying out a range of "Powers and Duties of the Department"

- Social welfare and human service activity initiated by the federal govt
- Research and study in the causes of social problems & define effective techniques for prevention and rehabilitation
- Administration of SNAP, LIHEAP, housing stabilization
- Various licensing activities
- Wellbeing of children
- Child welfare, including CHINS, CHIPS and delinquent children
- Human Service Zone activities
- Special needs adoption, independent living services & Family First Prevention
- Life Skills Transition Center

50-06-05.1. Powers and duties of the department. (Effective through June 30, 2027)

The department has the following powers and duties to be administered by the department through its state office or regional human service centers, human service zones, or otherwise as directed by the department:

1. To act as the official agency of the state in any social welfare or human service activity initiated by the federal government not otherwise by law made the responsibility of another state agency.
2. To administer, allocate, and distribute any state and federal funds that may be made available for the purpose of providing financial assistance, care, and services to eligible persons and families who do not have sufficient income or other resources to provide a reasonable subsistence compatible with decency and health.
3. To provide preventive, rehabilitative, and other human services to help families and individuals to retain or attain capability for independence or self-care.
4. To do needed research and study in the causes of social problems and to define appropriate and effective techniques in providing preventive and rehabilitative services.
5. To provide for the study, and to promote the well-being, of a child in need of protection, a child in need of services, and delinquent children.
6. To provide for the placing and supervision of children in need of substitute parental care, subject to the control of any court having jurisdiction and control of any such child.
7. To recommend appropriate human services related legislation to the legislative assembly.
8. To direct and supervise human service zone activities and administer a statewide program for state-funded human services, staffing, and administration costs related to the administration of human services.
9. To secure, hold, and administer for the purpose for which it is established any property and any funds donated to it either by will or deed, or otherwise, or through court order or otherwise available to the department, and to administer those funds or property in accordance with the instructions in the instrument creating them or in accordance with the instructions in the court order or otherwise.

(cont.)

10. To formulate standards and make appropriate inspections and investigations in accordance with such standards in connection with all licensing activities delegated by law to the department, including early childhood programs, nonmedical adult care facilities and maternity homes, and persons or organizations receiving and placing children, and to require those facilities, persons, and organizations to submit reports and information as the department may determine necessary.
11. To permit the making of any surveys of human service needs and activities if determined to be necessary.
12. To issue subpoenas, administer oaths, and compel attendance of witnesses and production of documents or papers whenever necessary in making the investigations provided for herein or in the discharge of its other duties. A subpoena may not be issued to compel the production of documents or papers relating to any private child-caring or child-placing agency or to compel the attendance as a witness of any officer or employee of those facilities except upon the order of a judge of the district court of the judicial district in which the facilities are located.
13. To provide insofar as staff resources permit appropriate human services, including social histories, social or social-psychological evaluations, individual, group, family, and marital counseling, and related consultation, when referred by self, parent, guardian, human service zone, court, physician, or other individual or agency, and when application is made by self (if an adult or emancipated youth), parent, guardian, or agency having custody; also, on the same basis, to provide human services to children and adults in relation to their placement in or return from the life skills and transition center, state hospital, or North Dakota youth correctional center.
14. To provide insofar as staff resources permit social services, including social-psychological evaluations, predisposition reports, treatment, and aftercare services when requested by the judge of a juvenile court.
15. To provide insofar as staff resources permit social services, including social-psychological evaluations, predisposition reports, and treatment, when requested by the judge in a criminal case.
16. To act as the official agency of the state in the administration of the supplemental nutrition assistance program and to direct and supervise human service zone administration of that program. The department with the consent of the legislative assembly or the budget section if the legislative assembly is not in session may terminate the program if the rate of federal financial participation in administrative costs provided under Public Law 93-347 is decreased or limited, or if the state or counties become financially responsible for all or a portion of the coupon bonus payments under the Food Stamp Act. Any request considered by the budget section must comply with section 54-35-02.9. The department may not deny assistance under the supplemental nutrition assistance program to any individual who has been convicted of a felony offense that has as an element the possession, use, or distribution of a controlled substance as defined in section 102(6) of the Controlled Substances Act [21 U.S.C. 802(6)].
17. To administer, allocate, and distribute any funds made available for the making of direct cash assistance payments, housing stabilization supports, and rental assistance and to promote cooperation and working agreements with public agencies and including the housing finance agency and department of commerce, and private human service agencies.
18. To act as the official agency of the state in the administration of the home energy assistance program; to direct and supervise human service zone administration of that program; and to take such actions, give such directions, and adopt such rules, subject to review in the courts of this state, as may be necessary or desirable to carry out this subsection. For purposes of the administration of the energy assistance program, funds are obligated at the earlier of the time a written commitment is made to pay a vendor or contractor for services or supplies delivered or to be delivered, or at the time payment is made to a vendor or contractor for services or supplies delivered or to be delivered. The provisions of this subsection concerning obligation of funds apply to

(cont.)

payments and commitments made on or after July 1, 1991. The department with the consent of the legislative assembly or the budget section if the legislative assembly is not in session may terminate the program if the rate of federal financial participation in administrative costs is decreased or limited to less than fifty percent of total administrative costs, or if the state or counties become financially responsible for all or a portion of the cost of energy assistance program benefits. Any request considered by the budget section must comply with section 54-35-02.9

19. To administer, allocate, and distribute any funds made available for the payment of the cost of the special needs of any child under the age of twenty-one years, who is living in an adoptive home and would probably go without adoption except for acceptance by the adopted family, and whose adopted family does not have the economic ability and resources, as established by the department, to take care of the special needs of the child, including legal fees, maintenance costs, medical and dental expenses, travel costs, and other costs incidental to the care of the child.
20. To exercise and carry out any other powers and duties granted the department under state law.
21. To administer, allocate, and distribute any funds made available for the payment of supervised independent living services, to develop standards regarding a supervised independent living program, to approve supervised independent living services for the purpose of providing foster care placement, and to apply for and administer federal and other funds that may be made available to undertake any of the activities described in this subsection.
22. With the approval of the governor, to lease or transfer use of any part of the life skills and transition center facilities or properties, located in section thirteen, township one hundred fifty-seven north, range fifty-three west, located in Walsh County, North Dakota, to the federal government, or any public or private agency, organization, or business enterprise, or any worthy undertaking, under the following provisions:
    a. The department determines that the facility or property is not needed to serve any present or reasonably foreseeable need of the life skills and transition center.
    b. The transaction is exempt from the provisions of section 50-06-06.6.
    c. The term of any lease may not exceed ninety-nine years.
    d. All required legal documents, papers, and instruments in any transaction must be reviewed and approved as to form and legality by the attorney general.
    e. Any funds realized by any transaction must be deposited in the state's general fund.
23. To act as a decedent's successor for purposes of collecting amounts due to the department or human service zone, unless otherwise directed or determined by the department. Any affidavit submitted by the department under section 30.1-23-01 must conform to the requirements of that section except that the affidavit may state that twenty days have elapsed since the death of the decedent.
24. To provide those services necessary for the department and for human service zones to comply with the provisions of any law, rule, order, or regulation of the United States or any federal agency or authority requiring civil service or merit standards or classifications as a condition for providing funds administered by the department.
25. For purposes of administration of programs, and subject to legislative appropriation, funds are obligated at the time a written commitment is made to pay a vendor or contractor for services or supplies either delivered or to be delivered. This subsection applies to payments and commitments made on or after January 1, 1997.
26. To determine eligibility for medical assistance and children's health insurance program benefits when the department receives a joint application for these benefits.
27. To develop a system of services and supports to provide behavioral health services and supports in the community for children at risk of or identified as having a behavioral health condition and for the families of these children. This system must include early intervention, treatment, and recovery services and supports and must interface with, but not include, child protective services or juvenile court.
28. To provide resources on mental health awareness and suicide prevention to the behavioral health resource coordinator at each public school and to the designated individual at a nonpublic school. The resources must include information on identifying warning signs, risk factors, and the availability of resources in the community, and also must include an evidence-based, online virtual mental health and suicide prevention simulation-based training program that incorporates hands-on practice, contextual learning, and personalized feedback through interactive role-playing. The provisions of chapter 54-44.4 do not apply to the online virtual mental health and suicide prevention simulation-based training program under this subsection.
29. To administer, allocate, and distribute any funds made available for kinship care services and payments and services in response to the federal Family First Prevention Services Act as part of the Bipartisan Budget Act of 2018 [Pub. L. 115-123].
30. To contract with another human service zone or any other public or private person to discharge any of the department's duties or exercise any of the department's powers to administer human services.
31. To act on behalf of the department of public instruction to administer part B, section 619 of the Individuals with Disabilities Education Act [Pub. L. 108-446; 229 Stat. 2647; 20 U.S.C. 1411 et seq.].
32. In the event of a disruption of operations, to provide meals at a fair value or without a charge to employees of the department at the North Dakota state hospital, life skills and transition center, and regional human service centers twenty-four hour staffed residential units as required by the job assignments of the employees.

Human Services is a frontline resource for Family Stability

The Human Services Division is driven by the belief that communities are stronger when **everyone has a chance to realize their full potential.**

The teams that make up the Human Services Division, together with the state's Human Service Zones, strive to make appropriate **services** and **supports** available **when** and **where people need them.**

Our every action **centers on the person** and on helping that person find their way forward.

HUMAN SERVICES

- Children & Family Services
- Early Childhood
- Child Support
- Economic Assistance
- Vocational Rehab
- Disability Determination
- Human Service Zone Operations
- Life Skills Transition Center
- Developmental Disabilities
- Aging & Adult Services

The Human Services Division is a frontline resource for North Dakotans encountering circumstances that threaten their family's stability.

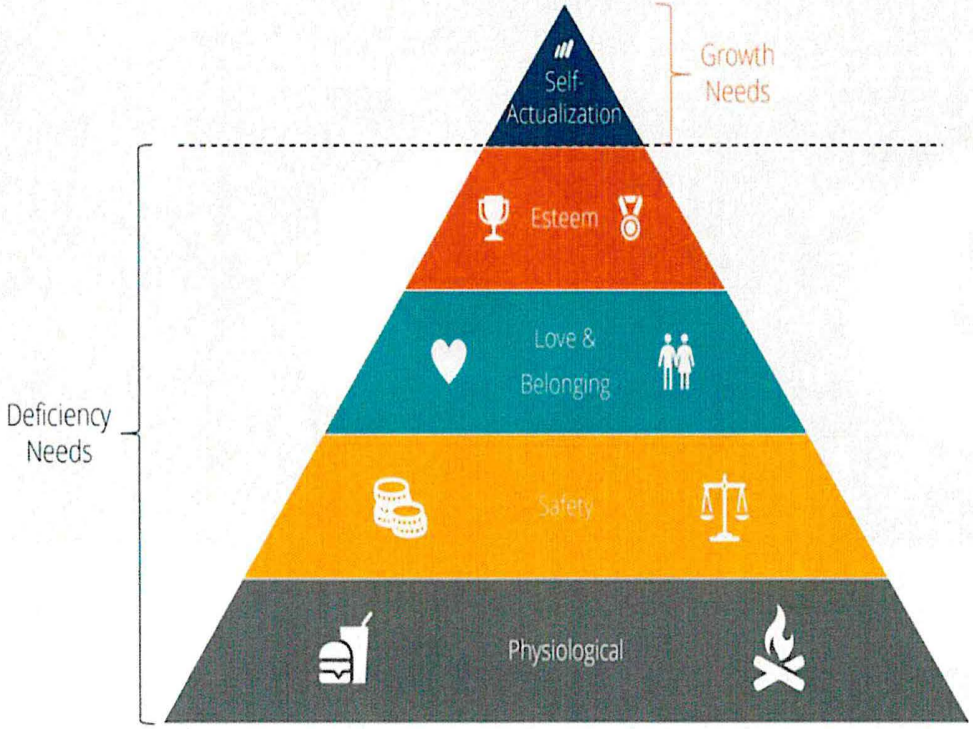
Aging & Adult Services

Together with our state and local partners, the Human Services Division provides resources that help North Dakotans avoid crisis and experience greater stability

Deliver **child protection**, **permanency** and **family wellbeing** services through the **network of Human Service Zones** and other public and private **partners**.

Serve as a **stabilizing resource** for youth and adults with **intellectual and/or developmental disabilities**

Help assure that young families have access to **high quality** experiences for their children by supporting people and programs who provide **early childhood services**.



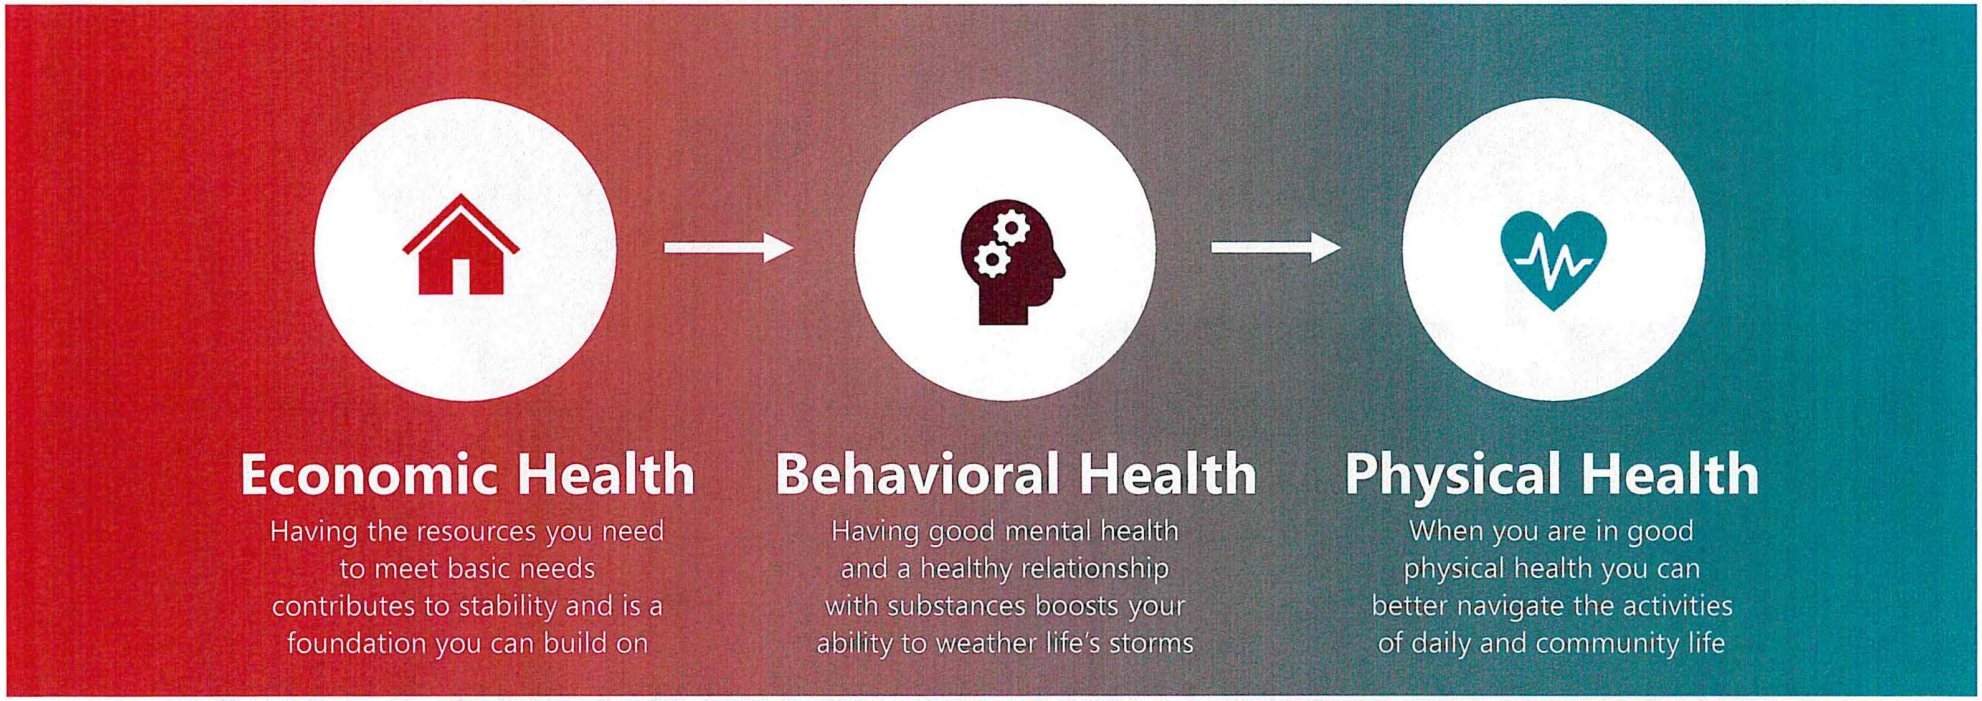
Work together with private partners to create robust **options for non-institutional living**, allowing older adults and people with disabilities (physical, developmental, intellectual) to **choose housing and services** that are right for them.

Provide access to a range of **resources** designed to **help families who are struggling to make ends meet**, including:

- Direct assistance for basic household budget expenses (food, utilities, housing, child care)
- Access to child support services
- Eligibility for health insurance via Medicaid and/or financial support via SSI/SSDI
- Employment supports both for people with disabilities and others who are actively working to improve their employment situation.

People are more alike than they are unalike

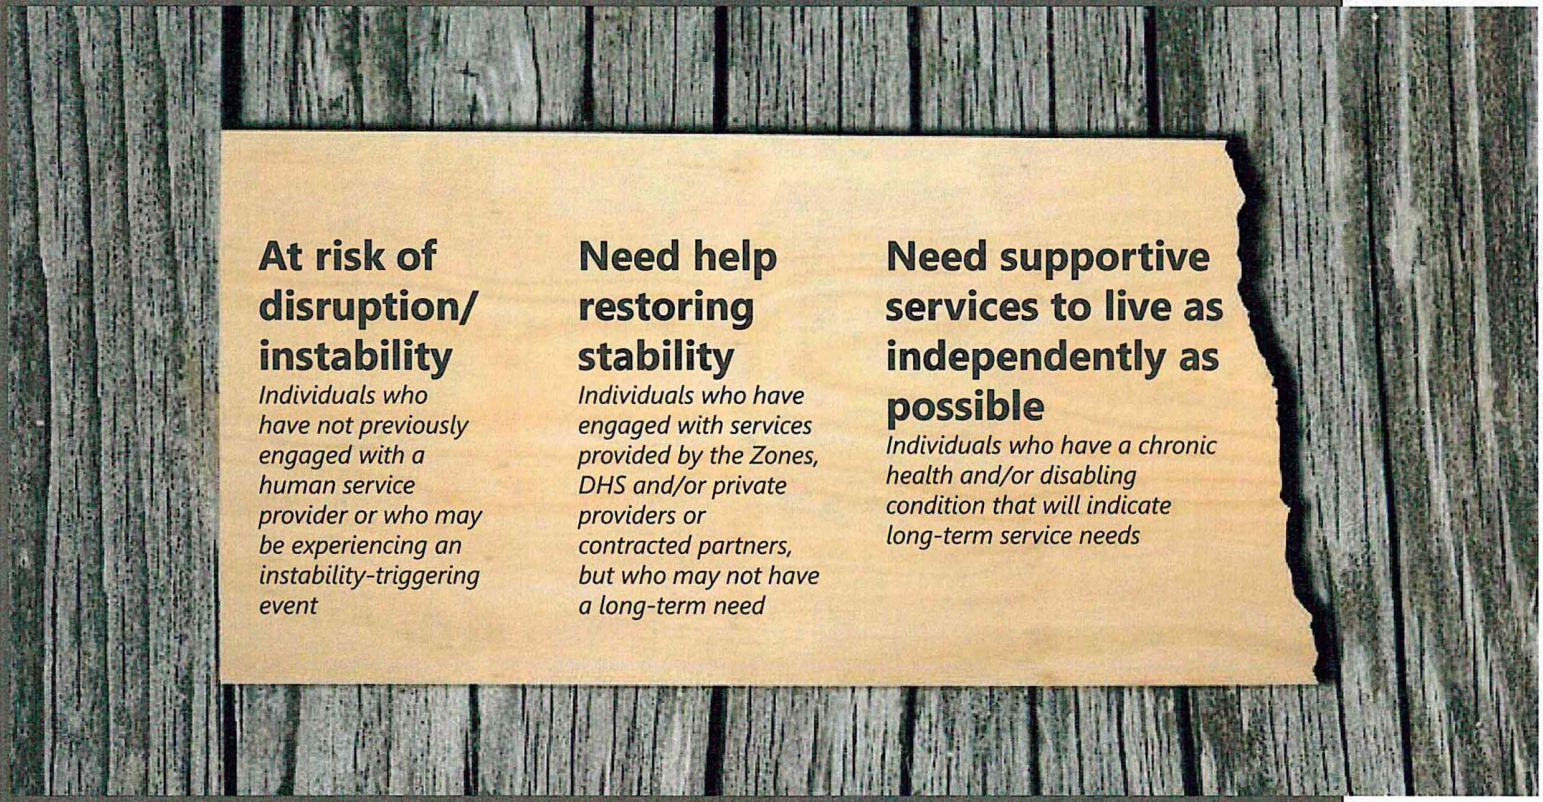
Individual Drivers



Community Infrastructure

NORTH Dakota Be Legendary. | Health & Human Services

The threads that run through every person's life



Foundations of Wellbeing are Interconnected

The stability that comes from good **economic** health can **improve behavioral** health.
The stability that comes from good **physical** and **behavioral** health **enables economic** health.

Helping people realize their potential

Who We Serve

At risk of disruption/ instability

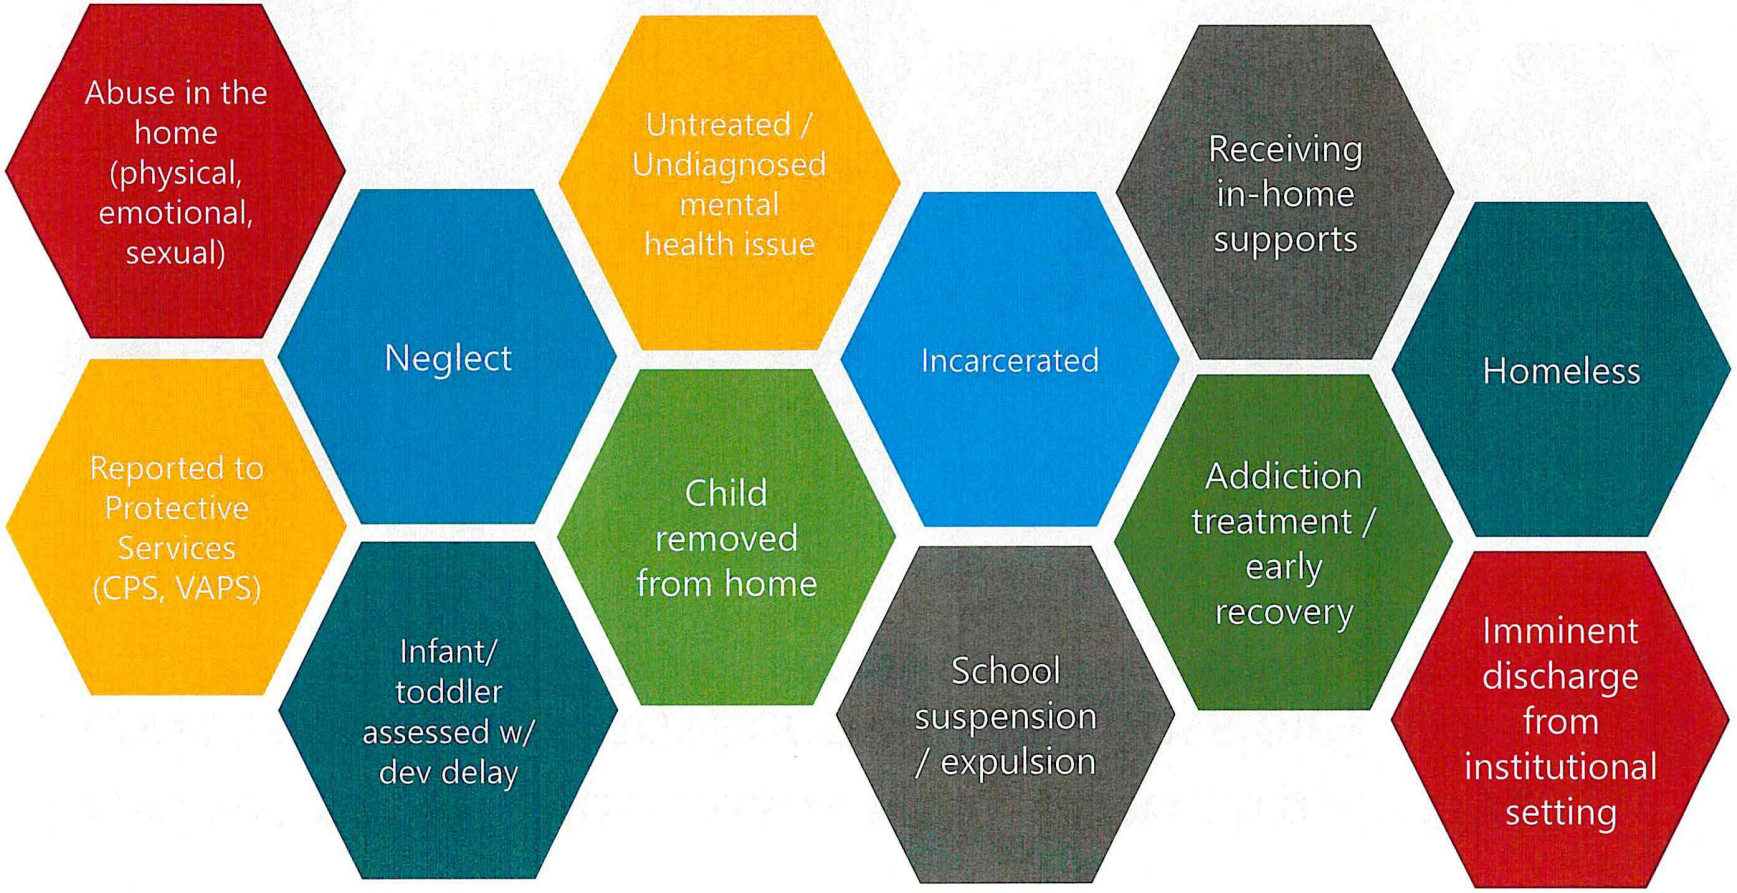
Individuals who have not previously engaged with a human service provider or who may be experiencing an instability-triggering event

Need help restoring stability

Individuals who have engaged with services provided by the Zones, DHS and/or private providers or contracted partners, but who may not have a long-term need

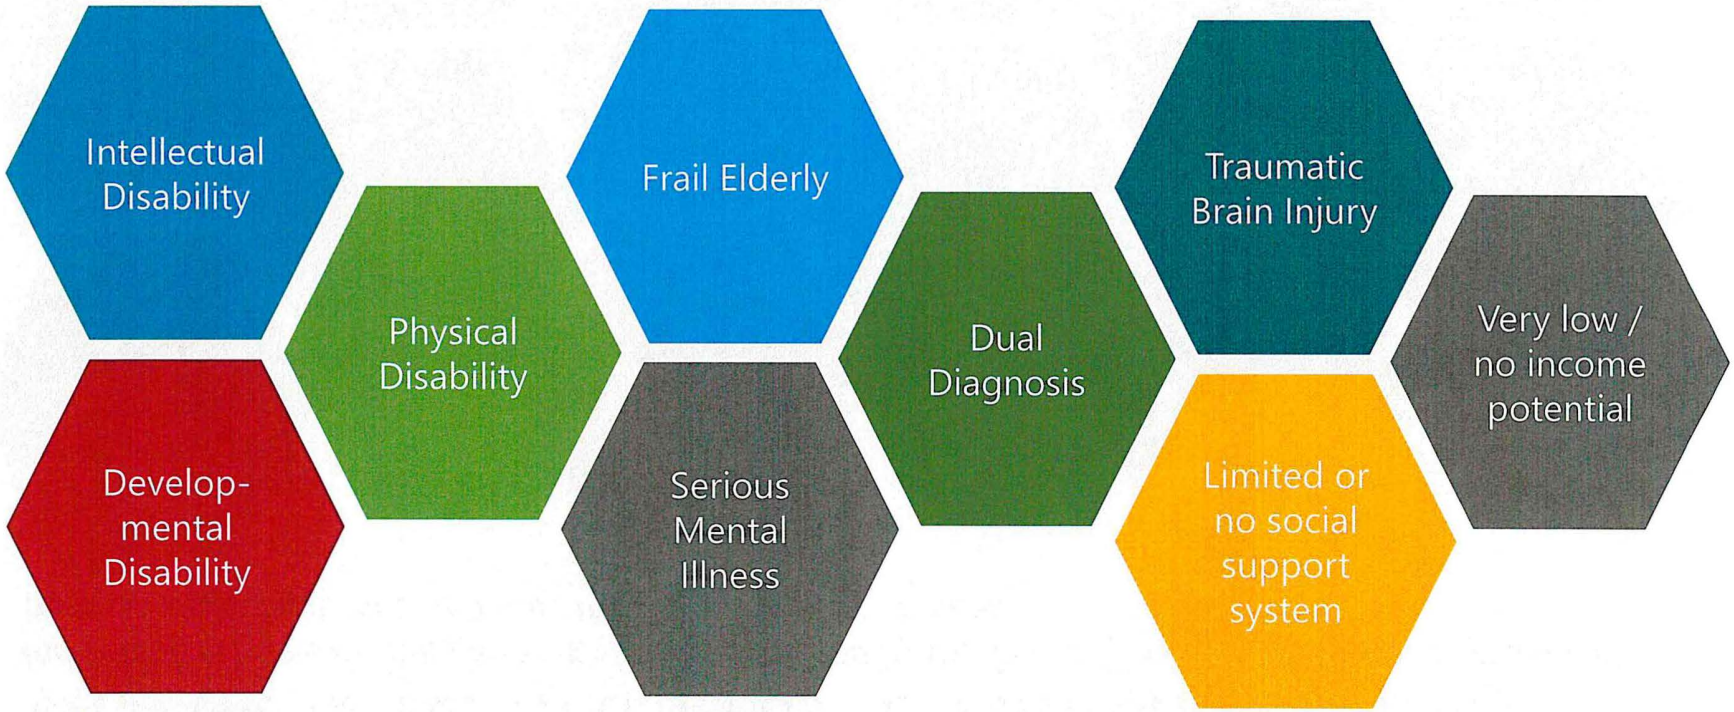
Need supportive services to live as independently as possible

Individuals who have a chronic health and/or disabling condition that will indicate long-term service needs



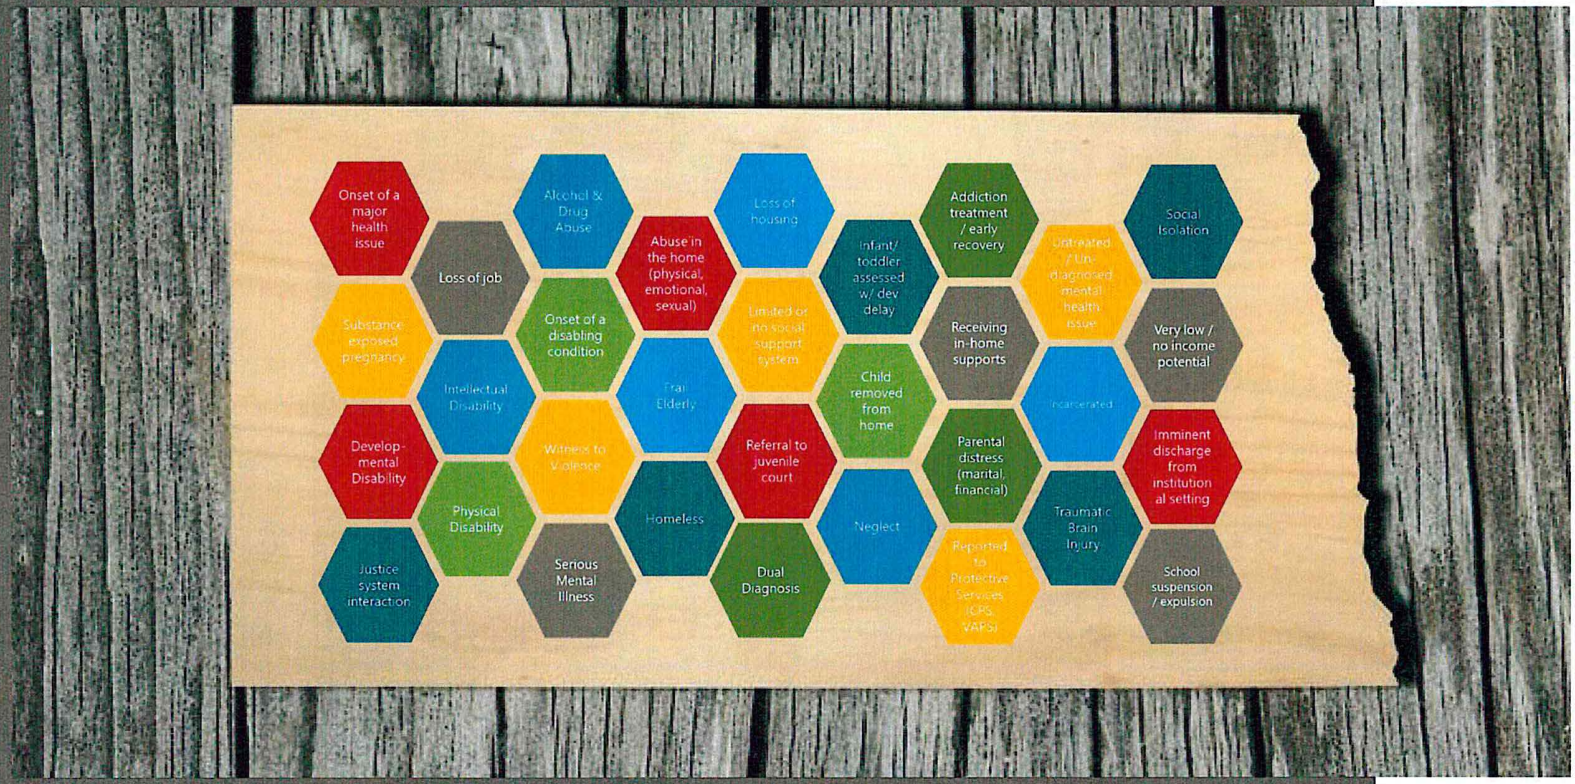
Who we serve: Who's **at risk** of disruption/instability?

Individuals who have not previously engaged with a human service provider or who may be experiencing an instability-triggering event



Who we serve: Who needs help **restoring** stability?

Individuals who have engaged with services provided by the Zones, HHS and/or private providers or contracted partners, but who may not have a long-term need

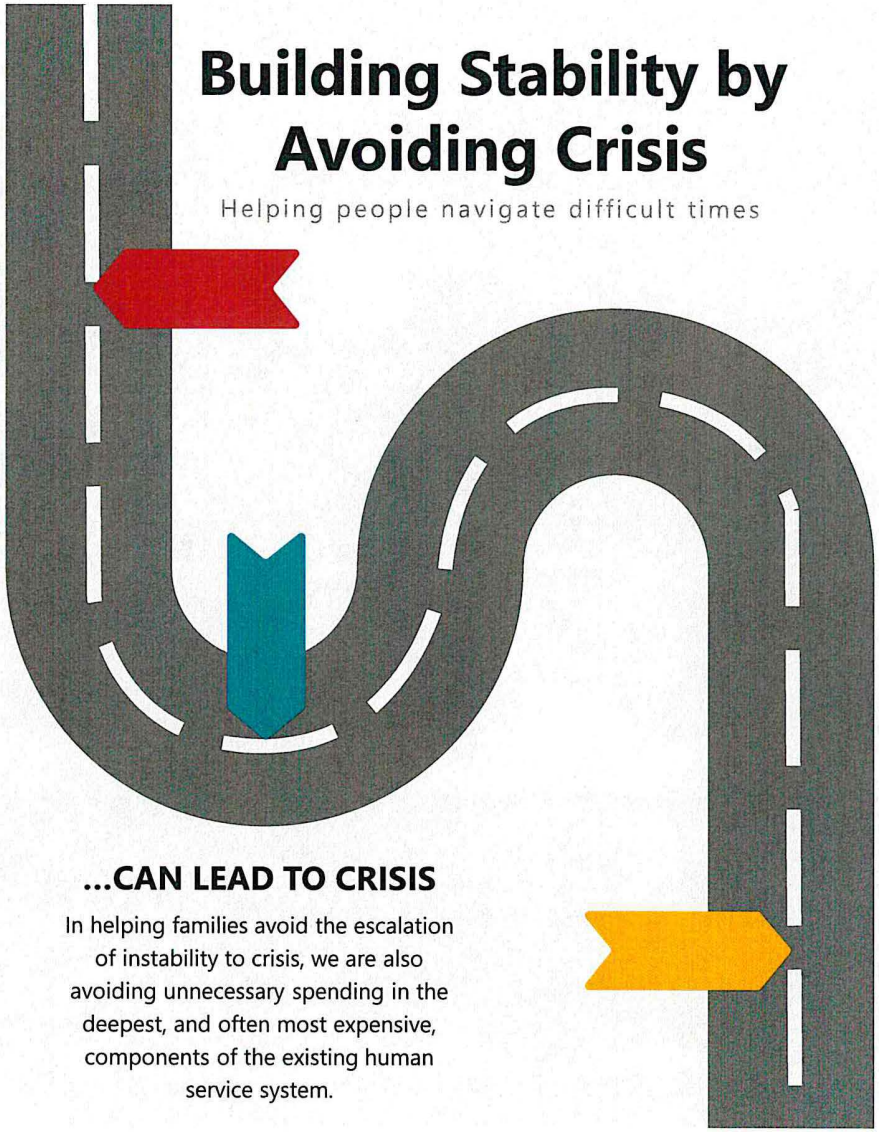


Who we serve: Who needs **long-term supportive services** to live as independently as possible?

Individuals who have a chronic health and/or disabling condition that will indicate long-term service needs

Human Services can be a frontline resource for stability and wellbeing

Prevention | Early Intervention | Crisis Intervention | Long term supports



Building Stability by Avoiding Crisis

Helping people navigate difficult times

DISRUPTION

When families experience disruption, their ability to be a fully engaged, productive member of the community and the workforce is compromised.

...CAN LEAD TO CRISIS

In helping families avoid the escalation of instability to crisis, we are also avoiding unnecessary spending in the deepest, and often most expensive, components of the existing human service system.

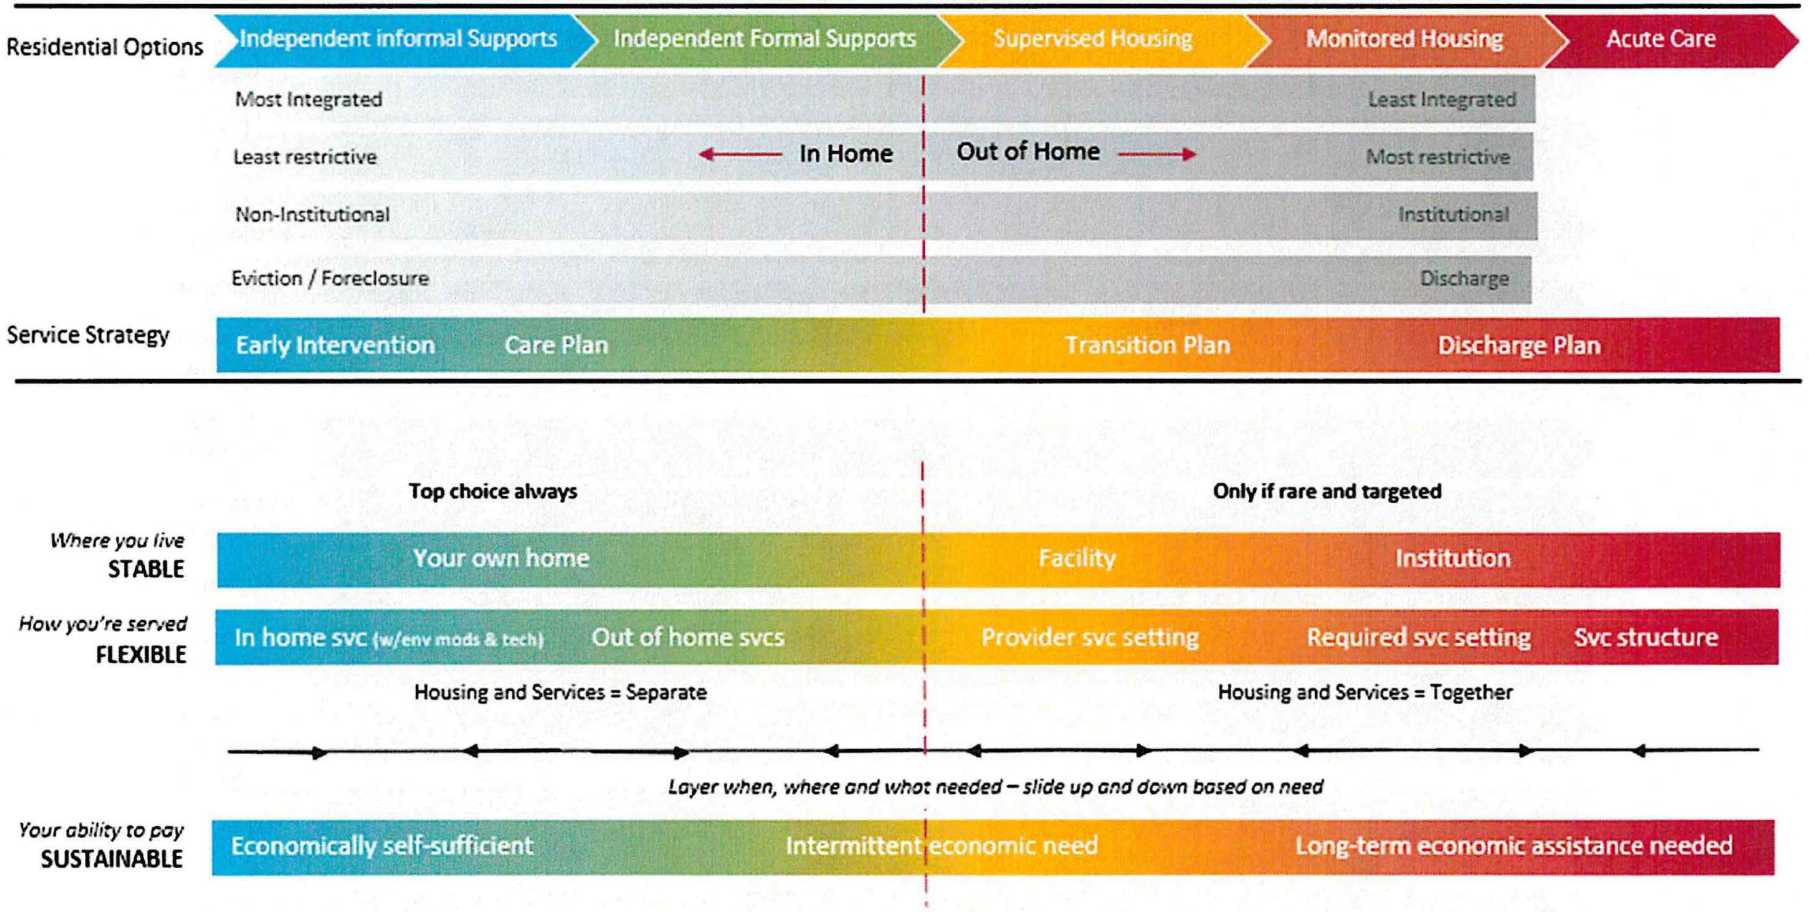
SERVICES SUPPORT STABILITY

Intervening early will both save money and strengthen families. It will allow us to reserve deep end services for the times when they are truly needed, and help people avoid deepening their journey into crisis by diverting from institutions, keeping families together, and helping and sure that people have a place to call home.

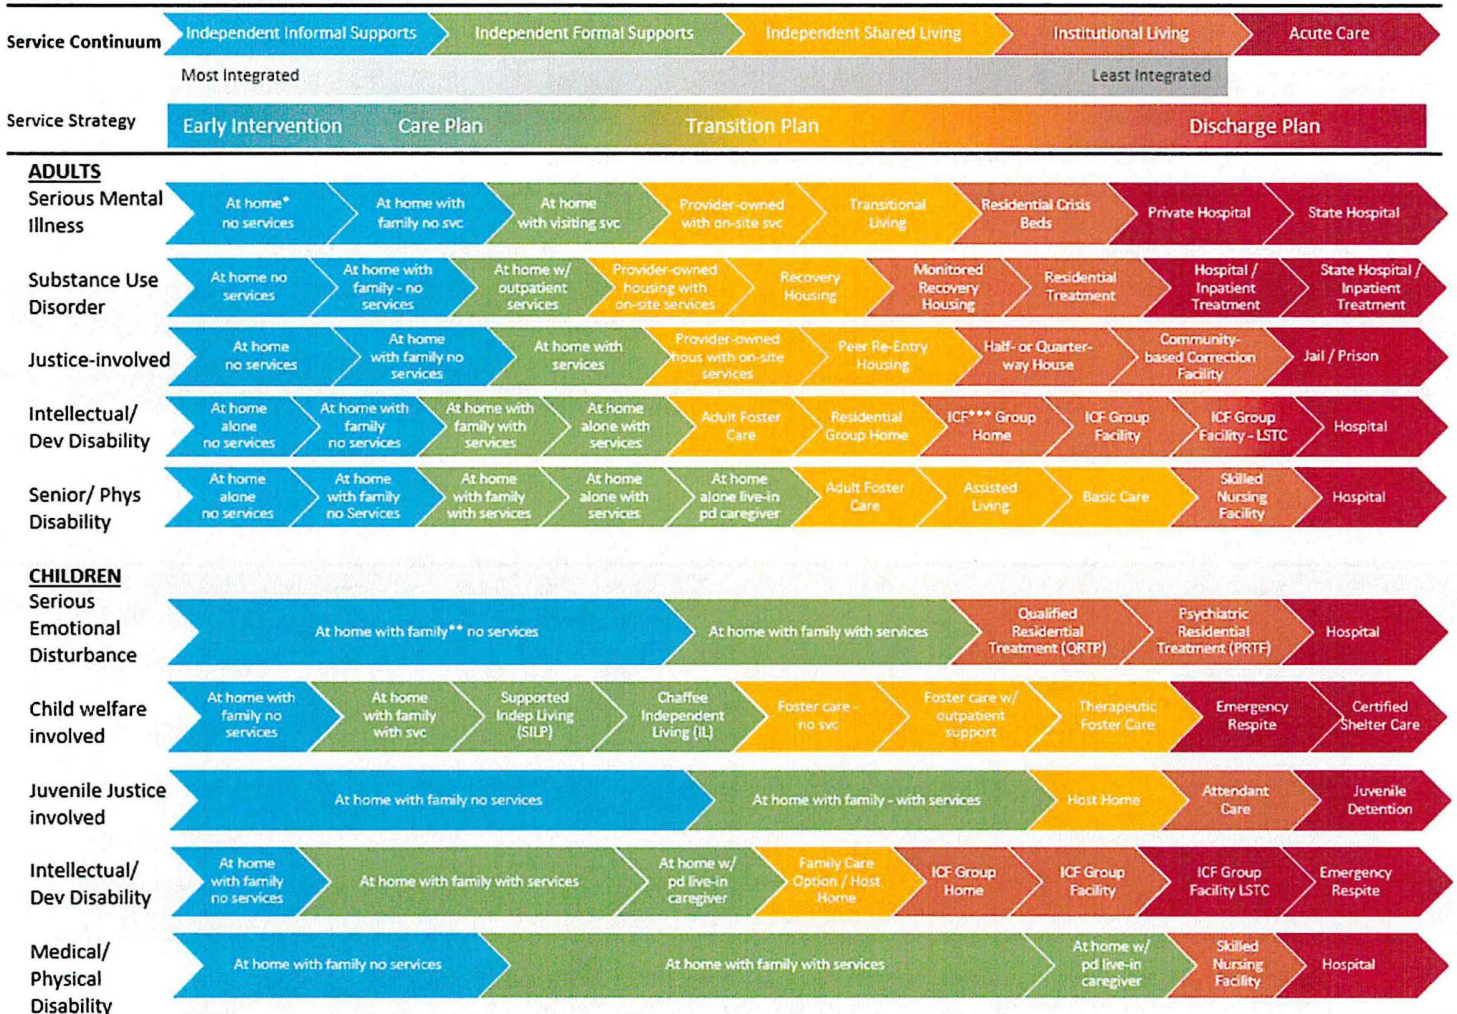
Communities are stronger when everyone has the opportunity to realize their full potential

The Questions that Drive Our Work

What do we need to do to help someone find their way through a situation that threatens to push them into crisis, and instead help them find their way to stability.



What do we need to do to help someone make an informed choice about how they may want to access services in the most integrated setting that is right for them?



What do we need to do to make sure we are delivering the right service in the right place at the right time?

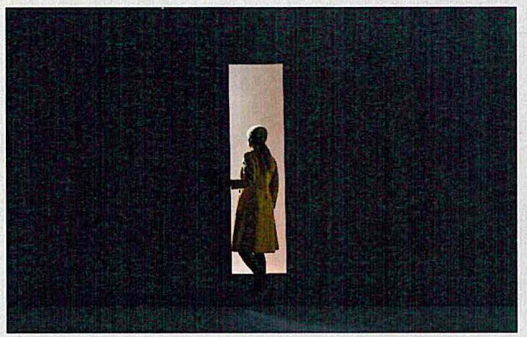
The Housing-Services Continuum

THE HOUSING / SERVICE CONTINUUM

*Home = includes ony type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)

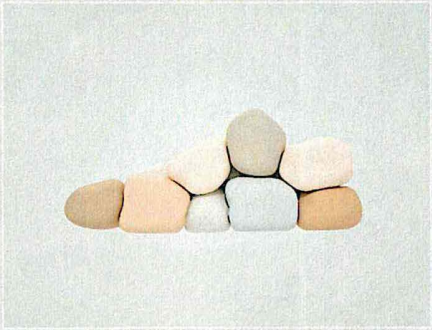
**Family = includes birth family, kin-caregiver, adopted family

***ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)



Last updated 4-1-24

HSD Threads relevant to Appropriations

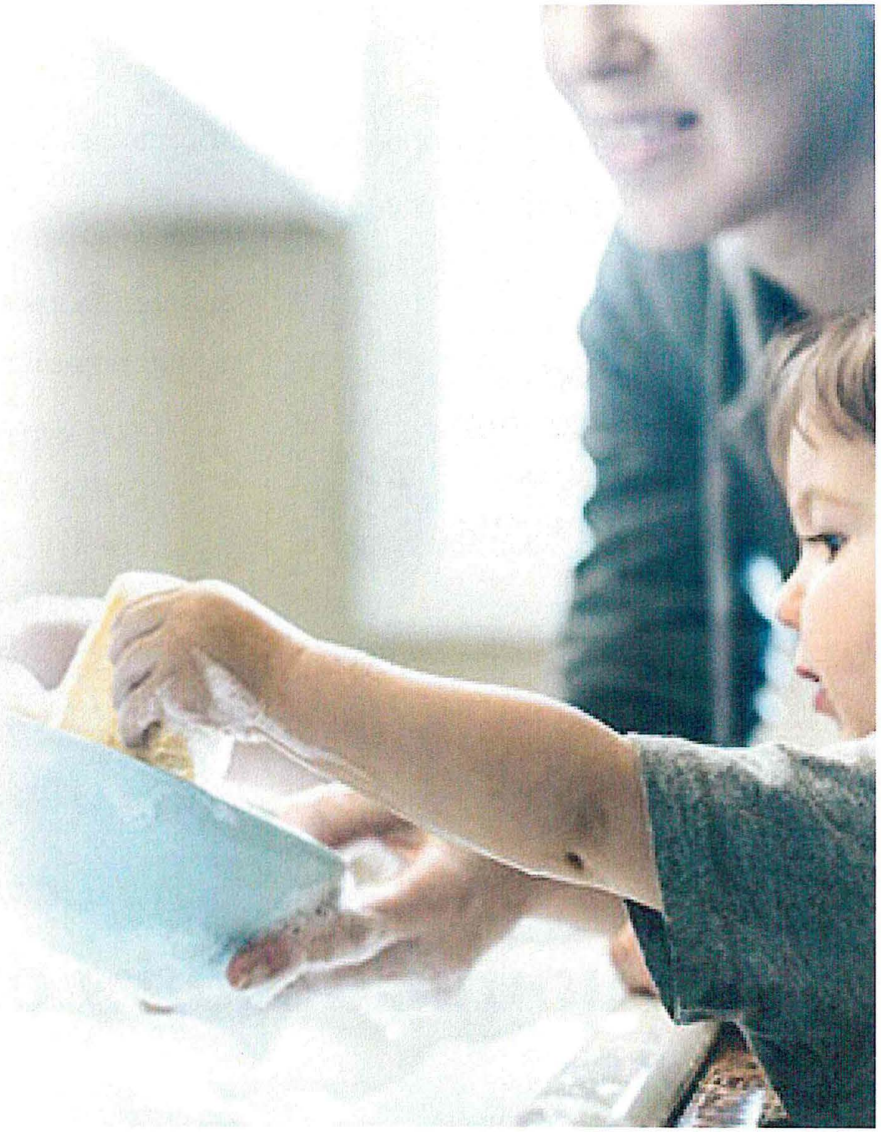


1 Growing a strong, stable workforce requires strong, stable families

- Family caregiving supports
- Child care as a stable resource
- Housing stability

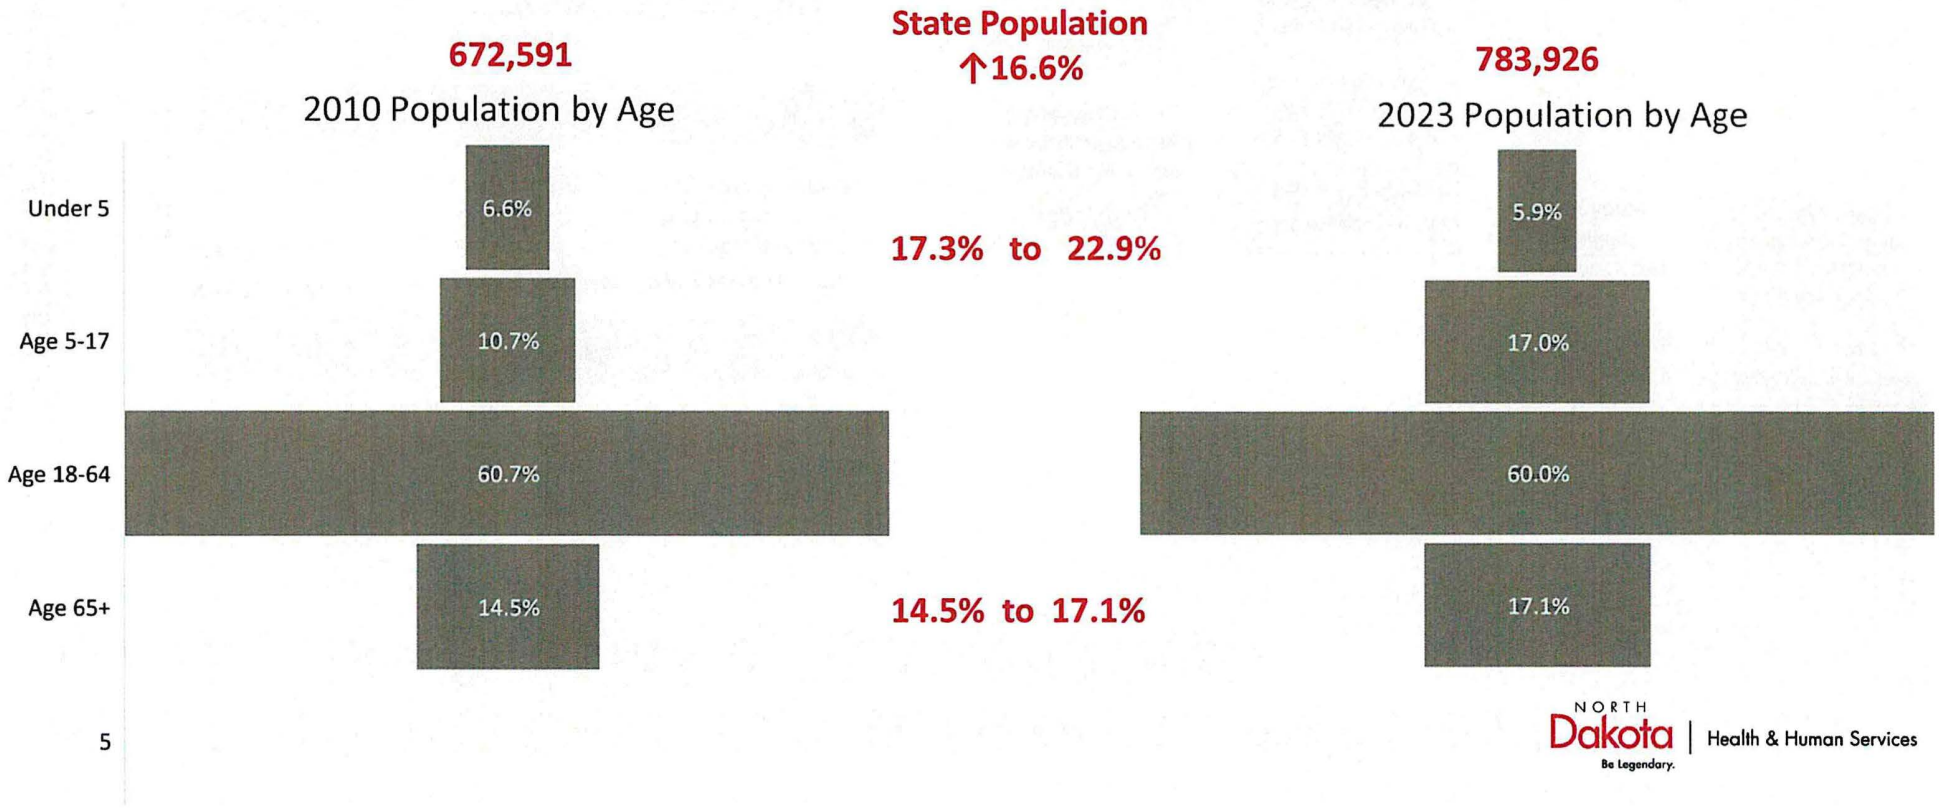
2 Filling gaps in the system of care can prevent crisis

- Evolving safety net for targeted needs
- Preventing justice system involvement
- Complexity of layered / co-occurring factors
- Transition & diversion across housing-service continuum



3 Pushing toward simplicity improves citizen experience

- Incremental progress
- Person centered design
- Reduced administrative burden



1 Growing a strong, stable workforce requires strong, stable families

- Family caregiving and home/community based supports
- Child care as a stable resource
- Housing stability

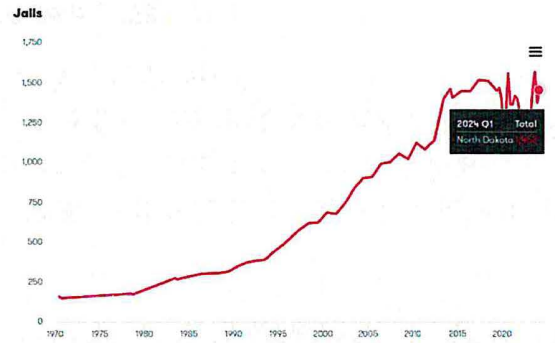
Incarceration impacts families and communities



Source: ND DOCR Dashboard

Source: ND DOCR Dashboard

Source: ND DOCR Dashboard

Source: Vera Incarceration Trends | ND State Profile

NORTH Dakota | Health & Human Services
Be Legendary.

The body of evidence related to a concrete connection between material hardship and family distress has reached a tipping point

"Mothers entering substance use treatment who have difficulty securing child care are **82% more likely to self-report child neglect** *(compared to mothers entering treatment who don't have this difficulty)*"

"Difficulty finding child care was a stronger predictor of maternal neglect than almost any other factor measured in this study, including mental health and severity of drug use."

-Cash, 2003

"Nearly 85% of families investigated by child protective services have **incomes** below 200% of the federal poverty line ($49,720 for a family of 3 in 2023) "

-Dolan, 2011 – Nat'l Survey of Child & Adolescent Well-Being II Baseline

"Households that will experience a foreclosure filing in the next 6-12 months are at **70% greater risk of a CPS investigation** *(compared to households that will not)*"

-Berger, 2015 (WI data 2008-2011)

"Almost **70%** of families with incomes below 200% of the federal poverty line report experiencing a **material hardship** in the past year (difficulty paying for housing, utilities, food, or medical care. Of these families, **61%** experienced a **financial shock** in the past year."

-Urban Institute, 2018

NORTH Dakota | Health & Human Services

Data aggregated by: Anderson, C., Grewal-Kök, Y., Cusick, G., Weiner, D., & Thomas, K. (2023). Family and child well-being system: Economic and concrete supports as a core component. [Power Point slides]. Chapin Hall at the University of Chicago.

Our knowledge of the relationship between material hardship and mental health is well established

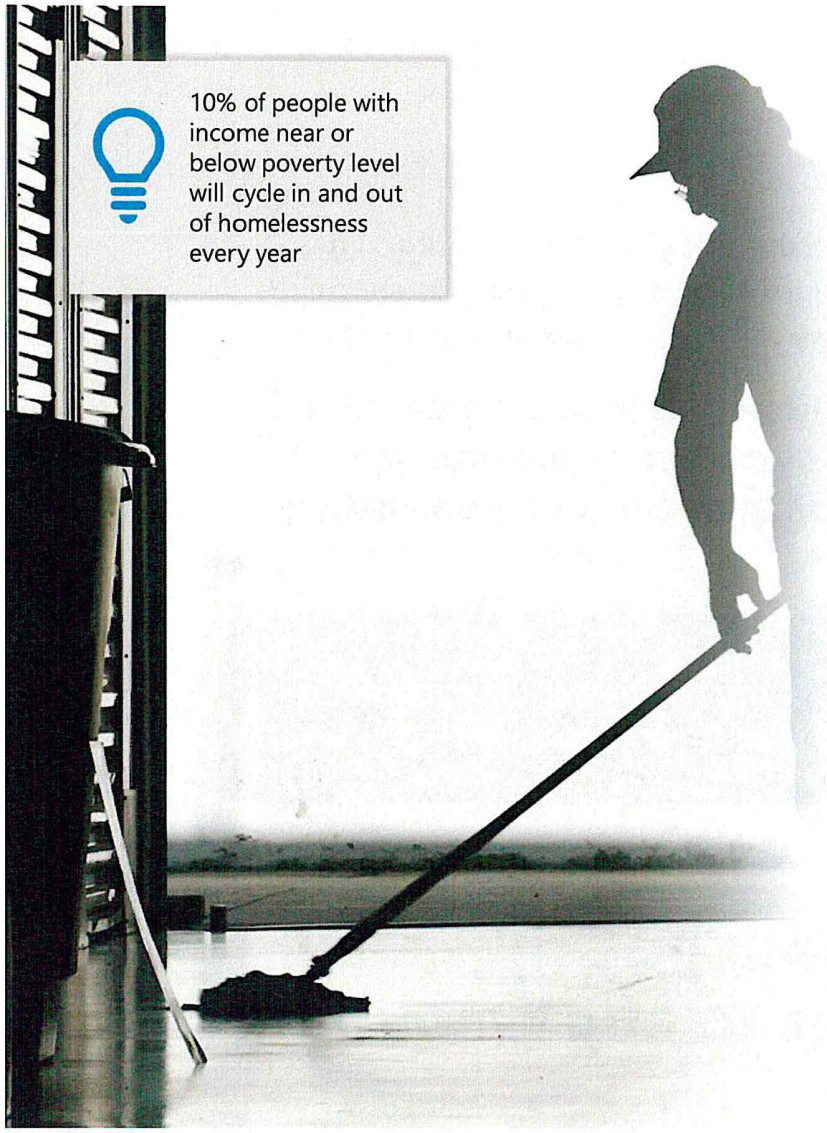
Living with low income is associated with increased risk for poor mental health

Low-income mothers with young children are at particularly increased risk of depression

Studies estimate between **16% and 48%** of low-income mothers with young children suffer from clinically significant depression

Longitudinal studies indicate that *material hardship*, in particular, is associated with & precedes poor mental health

Among low-income mothers with young children, experiencing a material hardship in the last 12 months is associated with an increased risk for depression

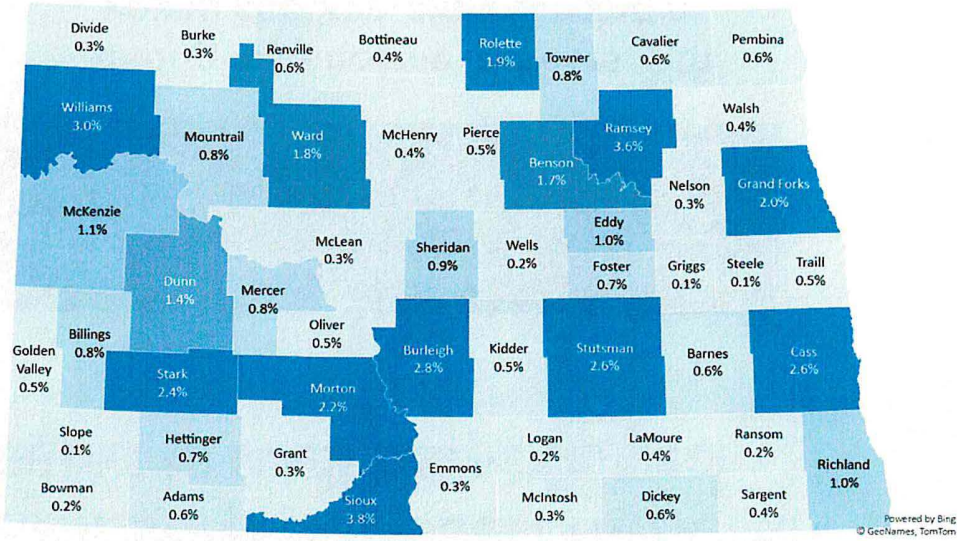


For these mothers, the risk of depression increases with a **greater number** of material hardships reported

(Sareen, 2011)
(Austin, 2017)
(Lanzi, 1999)
(Heflin, 2009)
(Manual, 2012)

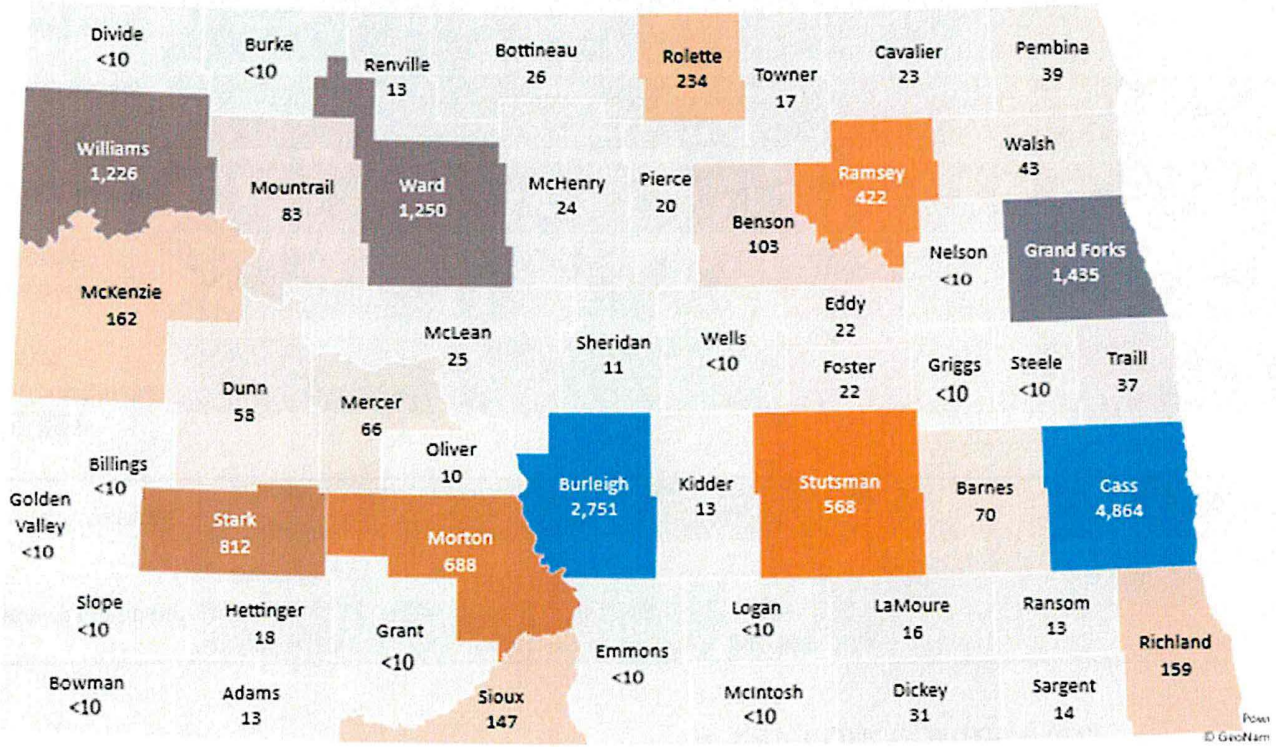
NORTH Dakota | Health & Human Services

Data aggregated by: Anderson, C., Grewal-Kök, Y., Cusick, G., Weiner, D., & Thomas, K. (2023). Family and child well-being system: Economic and concrete supports as a core component. [Power Point slides]. Chapin Hall at the University of Chicago.



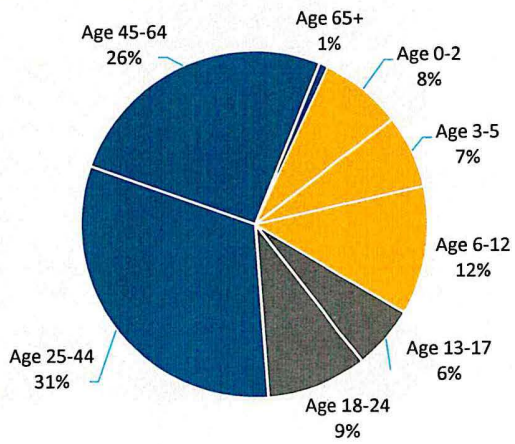
10% of people with income near or below poverty level will cycle in and out of homelessness every year

Housing crisis is a de-stabilizing force



Homelessness

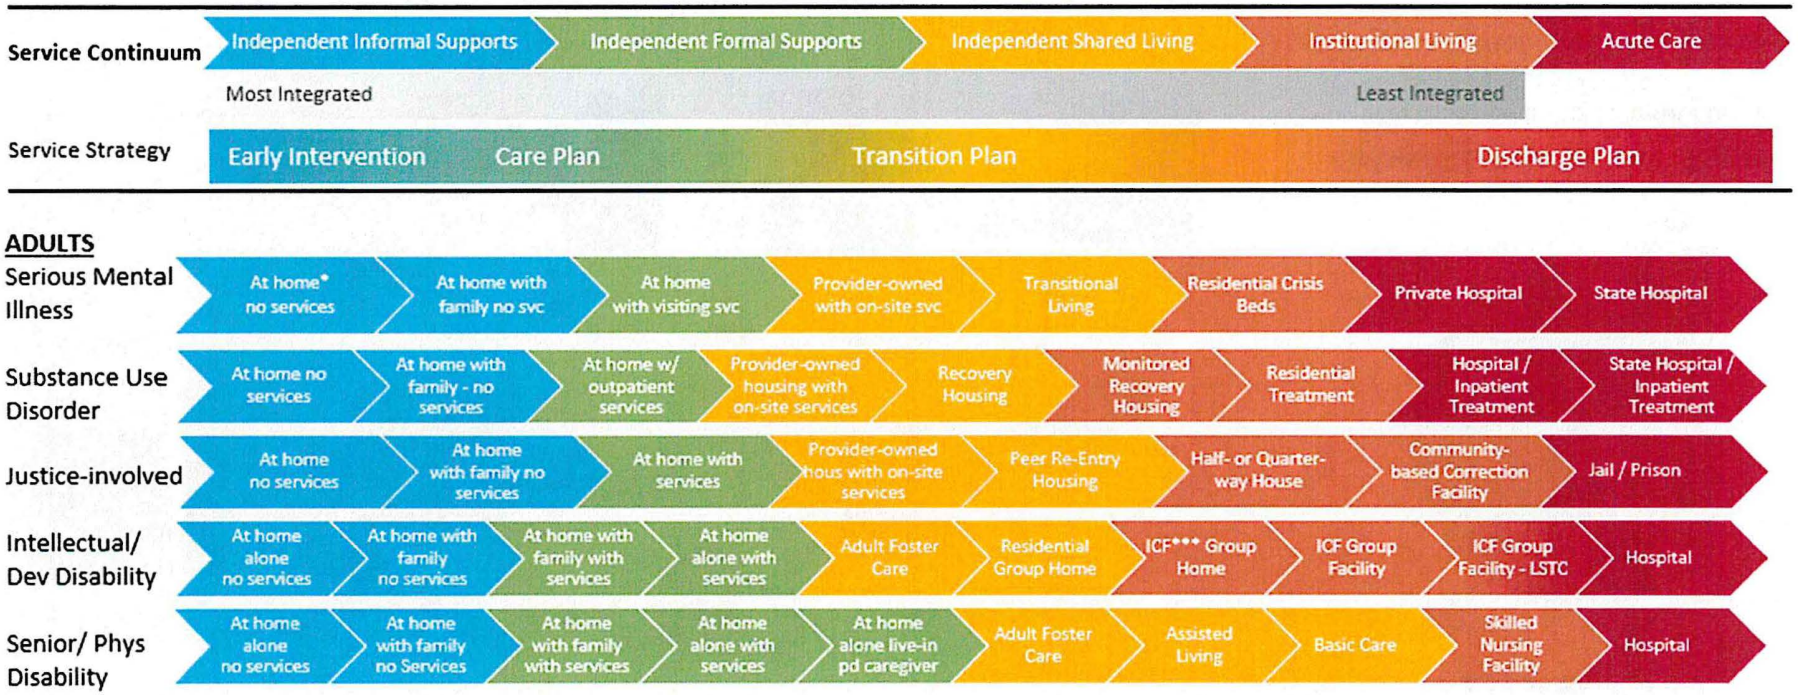
An individual or family who lacks a fixed, regular, adequate nighttime residence. This includes a living situation where you are temporarily doubled up with another household.



15,528 people were experiencing homelessness at time of NDRH app (Oct 21 – Dec 23)
Shown as a % of total population by county

28% of the people experiencing homelessness were younger than 12 years old

Age at time of app



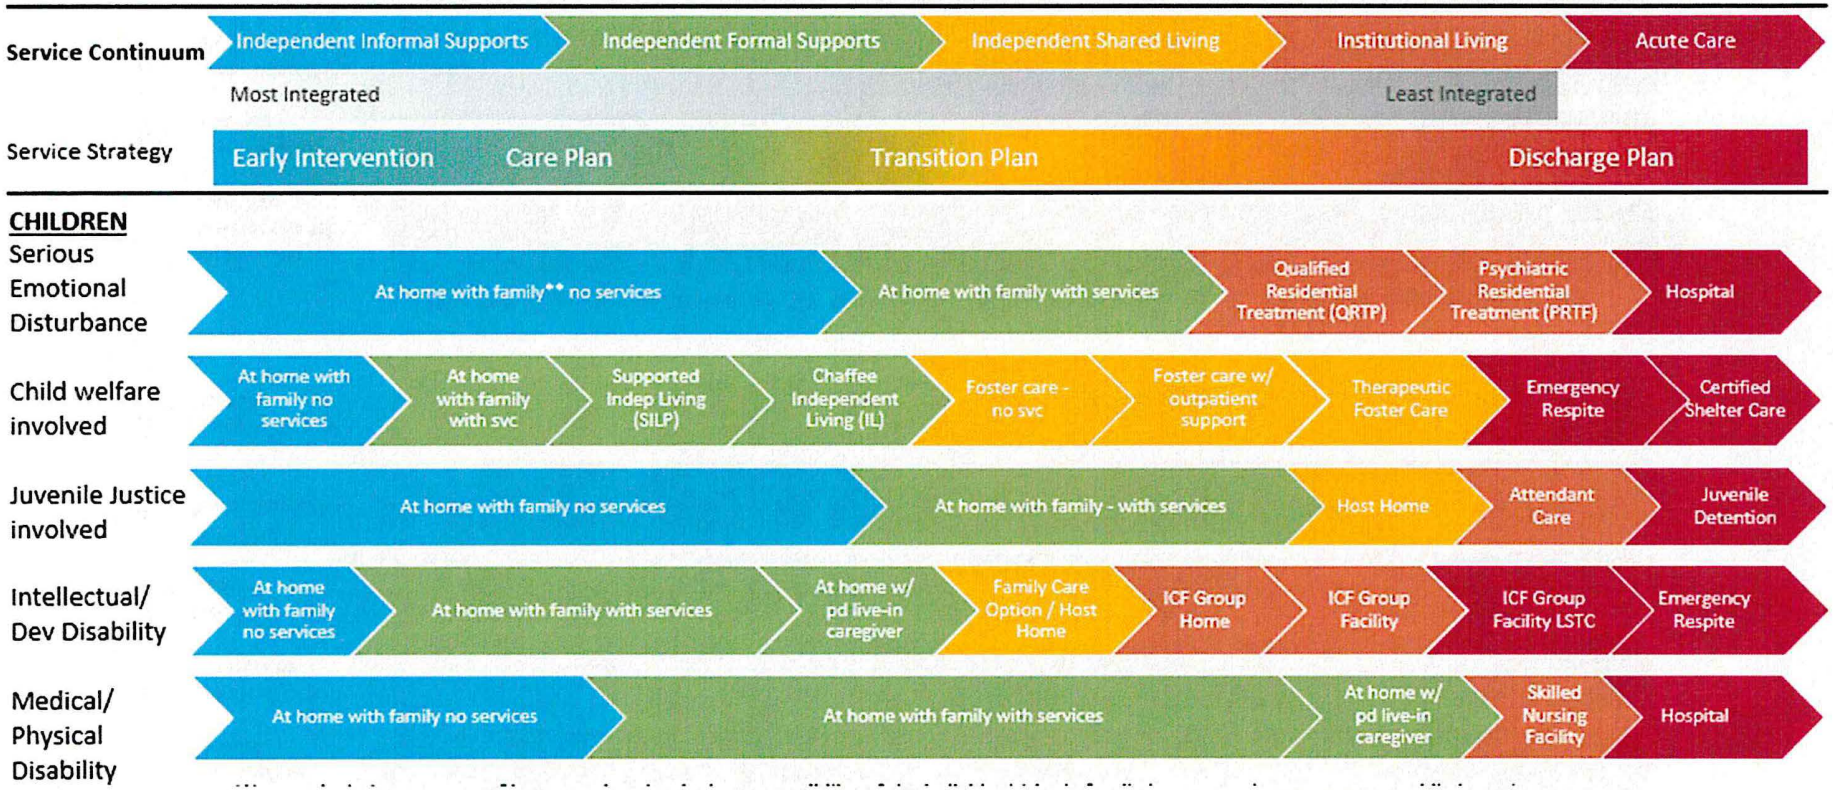
Living situations at time of app varied

- **17%** (1,588 households) **unsheltered** (living in vehicle or other public or private place)
- **44%** (4,156) **doubled up** (temporarily staying with friend of family)
- **9%** (810) reported living in **emergency shelter**

NORTH Dakota | Health & Human Services
Be Legendary.

The Housing-Service Continuum - Adults

A key concept defined



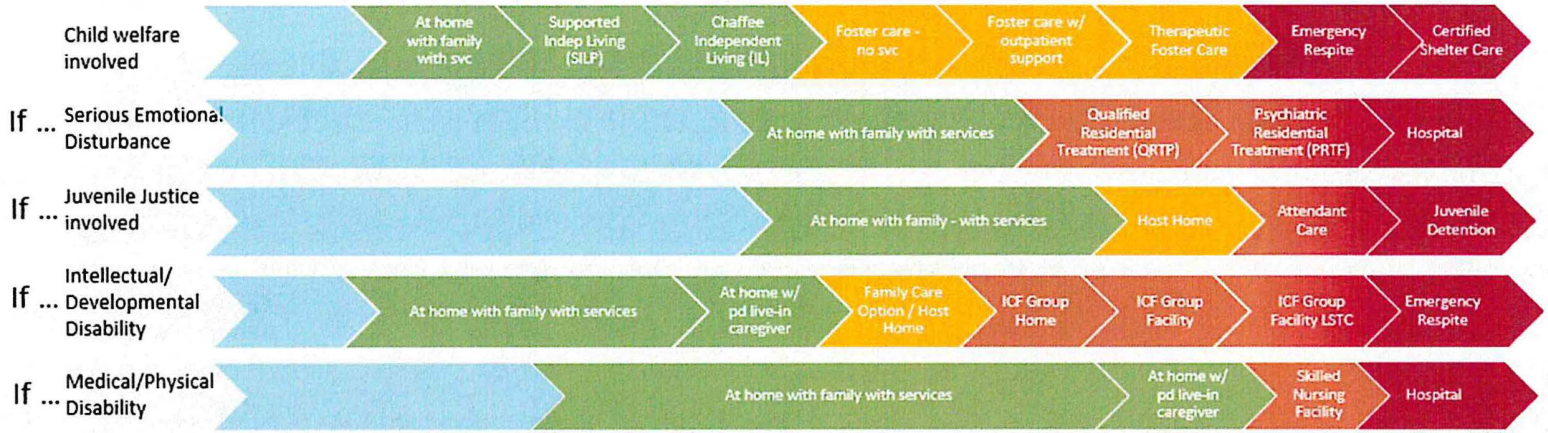
**Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)*

***Family = includes birth family, kin-caregiver, adopted family*

****ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)*

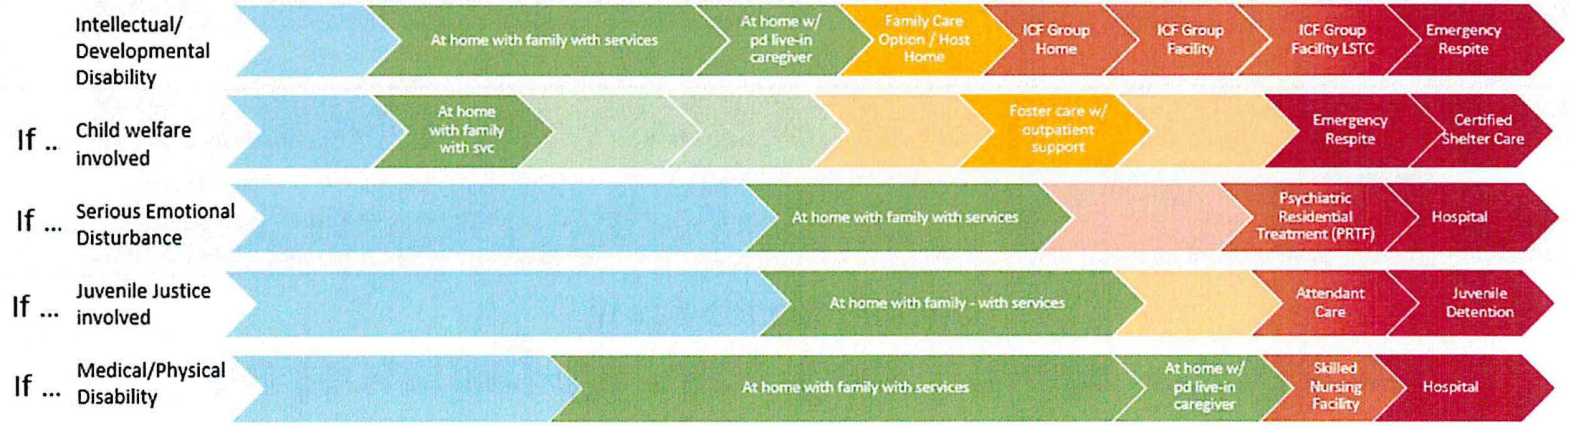
The Housing-Service Continuum - Children

A key concept defined



*Home = includes any type of home setting that is the responsibility of the individual (single family home, condo, apartment, mobile home)

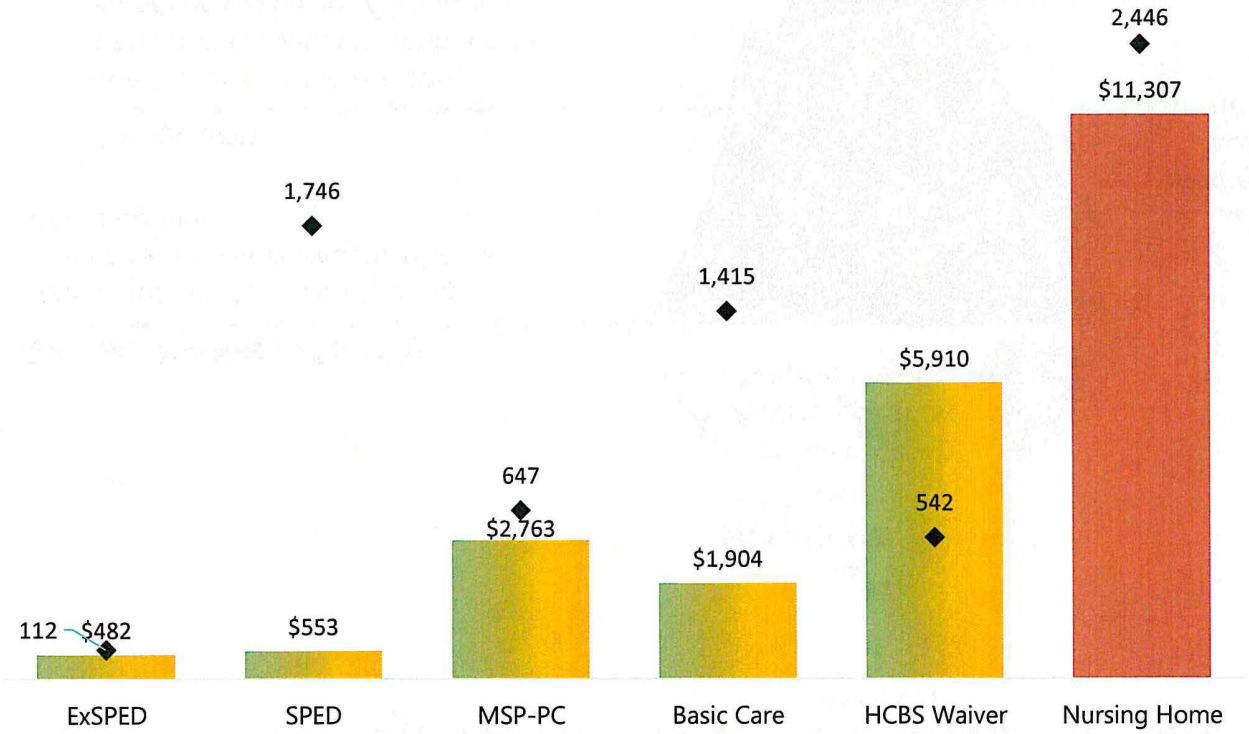
**Family = includes birth family, kin-coregiver, adopted family



***ICF = Intermediate Care Facility. ICF Group Home (less than 8 people); ICF Group Facility (8 or more people); ICF LSTC (Life Skills Transition Center)

Housing-Service Options vary across systems | Access is ultimately determined by a variety of factors

A child who is **Child Welfare-involved** could possibly be served in a number of ways

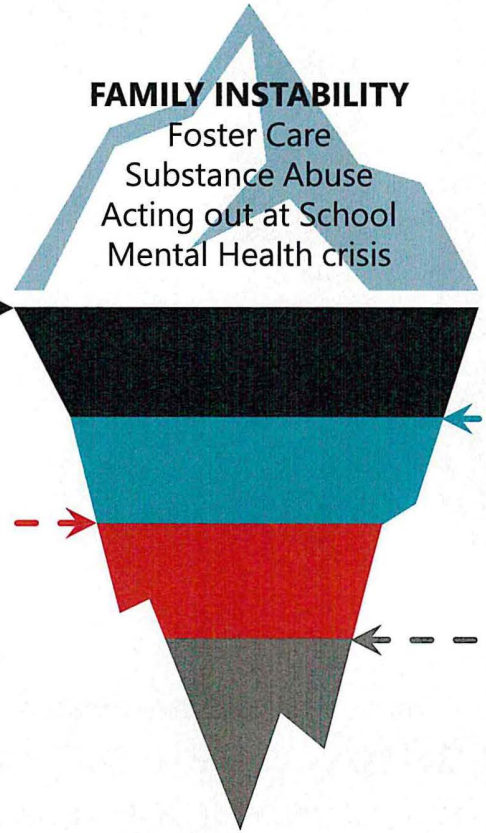


A child with an **Intellectual / Developmental Disability** and who is seeking services, could possibly be served in a number of ways

Connecting the Housing-Service Continuum to Budget

HHS-funded Long Term Care and Adult/Aging HCBS

Analysis of State Fiscal Year (SFY) 2024 claims data | Average cost/month | Avg utilization/month



Eligibility criteria evaluate both a person's functional and financial needs.

- Ex-SPED is the in-home alternative to Basic Care
- HCBS waiver and MSP-PC are in-home alternatives to Nursing Homes
- SPED assists people with higher asset levels (up to $50,000)

NORTH Dakota Be Legendary. | Health & Human Services

Connecting what we see and what we need to do

Community-Based Service

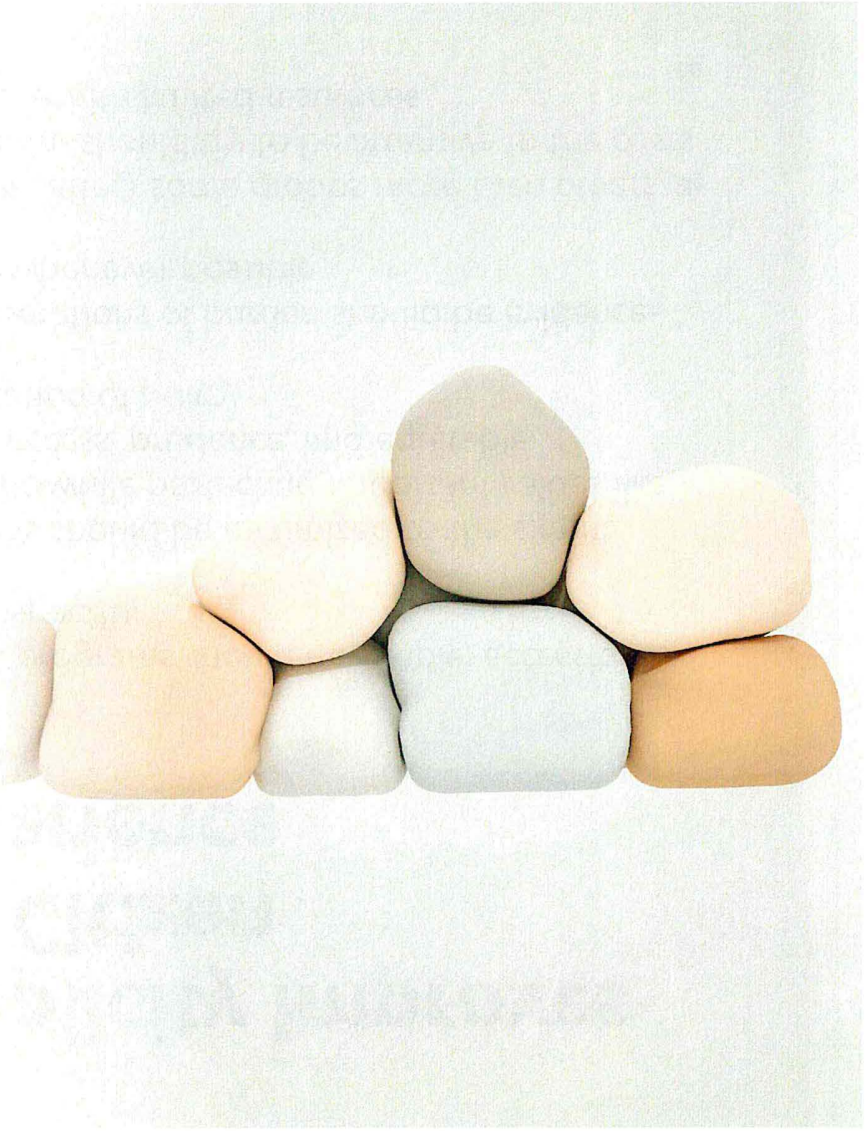
Expand outpatient and community-based services; Grow evidence-based service options

Prevention

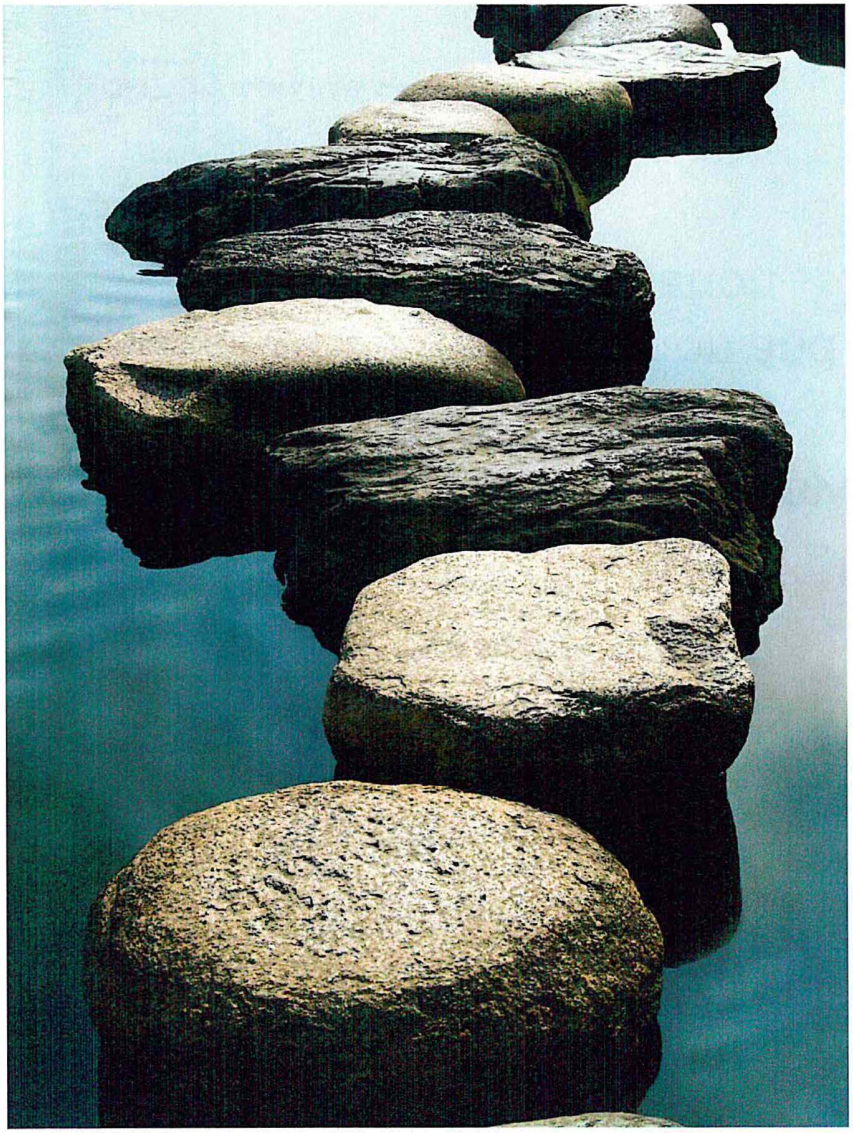
Invest in prevention and early intervention, including attention to economic wellbeing of families

Access

Ensure all children and families have timely access to Behavioral Health svc; Expand quality child care; Connect housing and employment



Integration



Enhance and streamline system of care for children and youth; Align assessment and eligibility practices; Embrace quality frameworks and tools to measure impact

NORTH Dakota | Health & Human Services

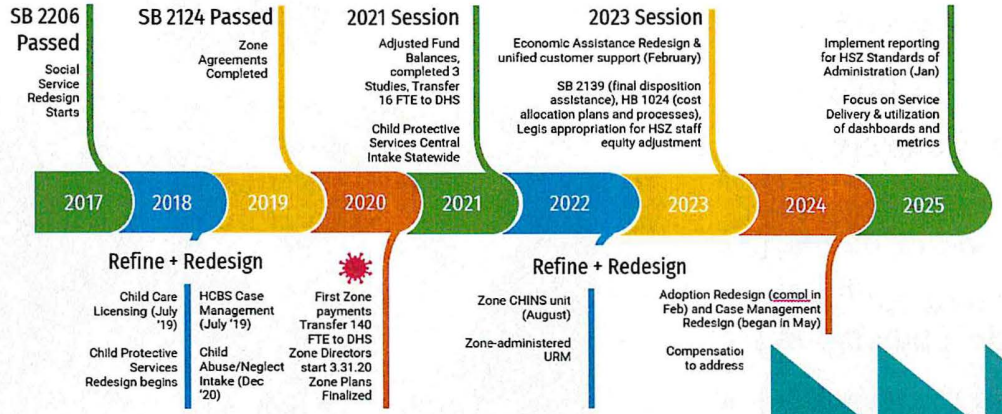
3 Pushing toward simplicity for a better citizen experience

- Incremental progress
- Person centered design
- Reduced administrative burden
- Care coordination and resource navigation

Simplicity Improves the Citizen Experience

- Public programs should be simple, accessible, and respectful
- Burdens should be minimized to the extent possible while protecting important values like equal access, prudence, and equitable application of policy
- Considerations of burden should be evidence-based whenever possible
- Burdens affect some groups more than others; as a state we should try to be attentive to the costs for those with limited resources



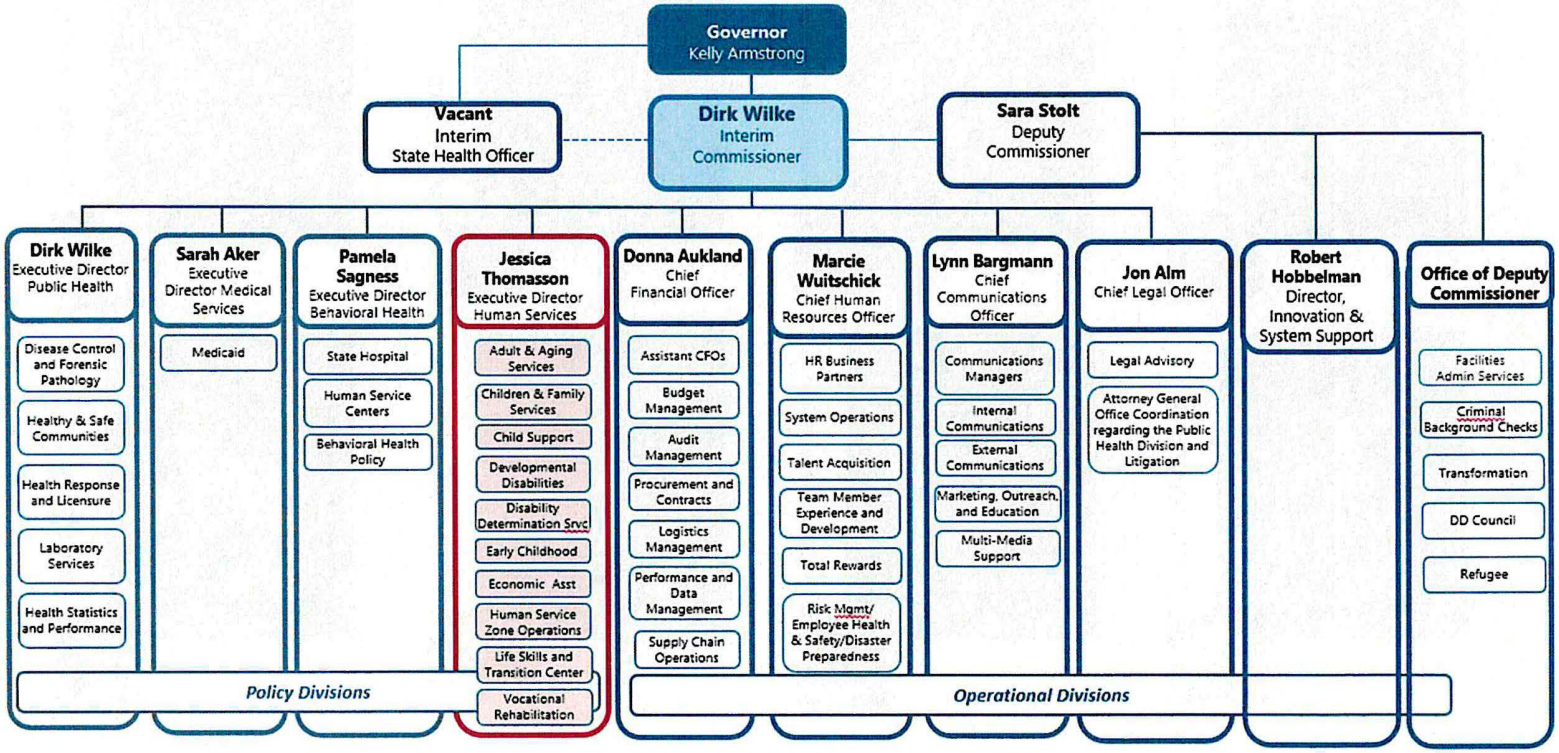
Principles of Person-Centered Systems

- I feel capable
- I am empowered to do what I need to do
- I know what I need to do
- I understand what the system is asking me to do
- The app knows who I am and uses that information to:
  - ✓ Make my journey easier
  - ✓ Path shorter
  - ✓ Success more likely
  - ✓ Experience better
- The app is set up to help me achieve my goal
- The app helps me discover things I may need
- The platform is available when I am, and so is help if I need it
- I have options to receive comms in the way that works for me
  - ✓ I can control how communication comes to me
- Help is available and I don't have to read to get it
  - ✓ Communication of information is not solely literacy based -- icons, colors, videos
- The app is easy enough for me to get it done in the time I have
- I can see the status of my account whenever I want

NORTH Dakota | Health & Human Services

Incremental change can improve systems

ND Human Service Zone Implementation



Child Welfare System Timeline

The Human Services Division is one of four Policy- and Service-Focused teams at HHS

- 10 distinct sections
- 1,000+ employees, plus support of 920+ Human Service Zone team members
- Responsibility for $2.1B budget

NORTH Dakota | Health & Human Services
Be Legendary.

The Human Services Division is comprised of 10 teams

Early Childhood

- Build greater access to quality early childhood experiences, so children ages zero to five from all backgrounds and circumstances have the opportunity to realize their potential.

Life Skills Transition Center

- Serve as a specialized crisis and stabilization resource to the network of private residential facilities and the thousands of families who are caregivers for a loved one with intellectual and/or developmental disabilities.

Children & Family Services

- Facilitate delivery of programs and services that support child safety, permanency and wellbeing, which together are designed to prevent and reduce incidence of child abuse and neglect and support family reunification and stability wherever possible.

Developmental Disabilities

- Provide support and training for individuals and families to maximize community and family inclusion, independence, and self-sufficiency; to prevent institutionalization; and to enable institutionalized individuals to return to the community.

Aging & Adult Services

- Facilitate delivery of programs and services that help older adults and adults with physical disabilities to live safely and productively in the least restrictive setting of their choosing.

Human Svc Zone Operations

- Support the work of the Human Service Zones and Human Service Zone Boards, including review of HSZ Plans, as well as infrastructure support related to various HR and payroll functions.

Economic Assistance

- Facilitate delivery of federal and state resources that support household economic health, including nutrition (SNAP), utility (LIHEAP), child care (CCAP) and housing stability assistance; eligibility for Medicaid coverage; and Temporary Assistance for Needy Families (TANF).

Child Support

- Provide support to parents, employers, and other partners to help ensure children receive court-ordered financial and medical support to reduce child impoverishment.

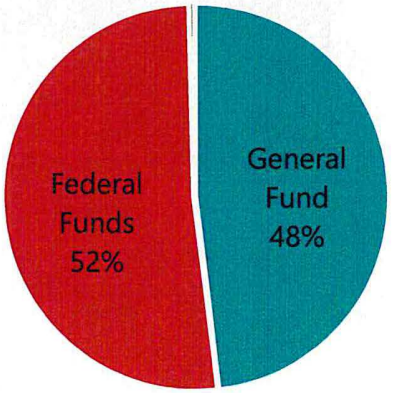
Vocational Rehabilitation

- Help both high school students and adults with disabilities improve both their immediate job opportunities and long term career planning. Partner with businesses to find creative ways to hire or retain employees with disabilities.

Disability Determination

- Determine eligibility for medical disability (SSDI and/or SSI), using Social Security Administration (SSA) guidelines, for people who are unable to work.

NORTH Dakota | Health & Human Services
Be Legendary.



Children and Family Services Summary

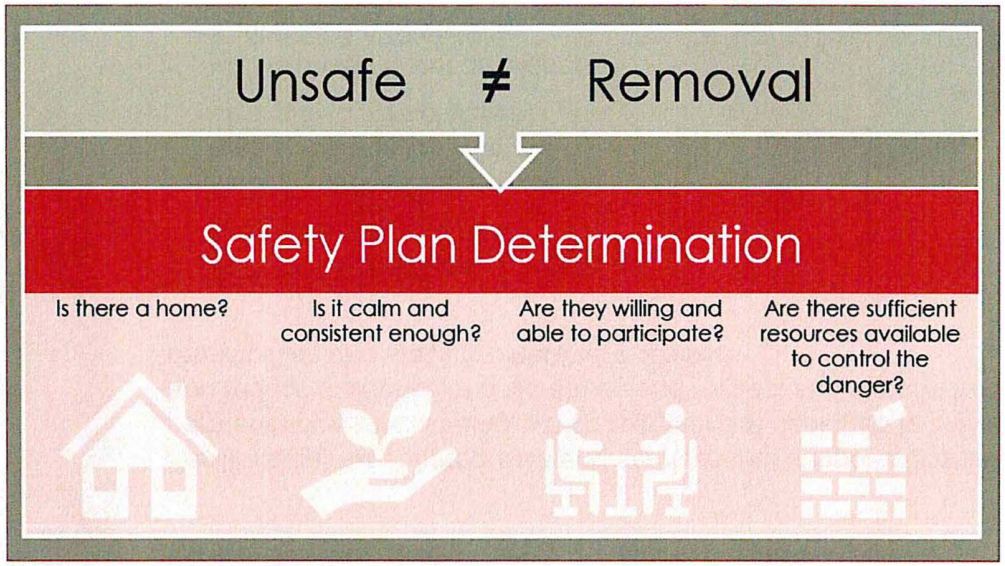
23-25 Budget Base	**$180.2 million**
23-25 Budget Approp	**$181.2 million**
25-27 Budget Base	**$200.9 million (draft)**

Facilitate delivery of programs and services that support child safety, permanency and wellbeing, which together are designed to prevent and reduce incidence of child abuse and neglect and support family reunification and stability wherever possible.

- 627 children receiving prevention service through FFPSA
- Serving over 950 approved kinship caregivers who are caring for 1,700 children
- 750 licensed foster providers caring for 1,170 children
- 36 licensed Qualified Residential Treatment Program (QRTP) beds available; 75% average utilization rate
- 0 children in out of state placements

What is Safety?

When can a child remain safely at home and when is removal necessary



What does it look like when a child is:

SAFE

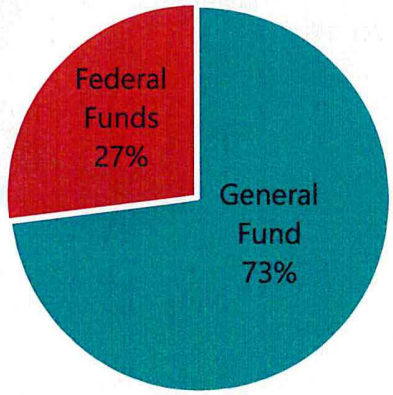
- ✓ No threats of danger exist within the family, or
- ✓ Parents/caregivers possess sufficient protective capacities to control any threat, or
- ✓ The child is not vulnerable to the existing danger.

UNSAFE

- ✓ Threats of danger exist within the family, and
- ✓ Children are vulnerable to such threats, and
- ✓ Parents/caregivers have insufficient protective capacities to manage or control the threats.

IF ALL QUESTIONS ARE "YES" -
Child can remain in the home with necessary supports in place

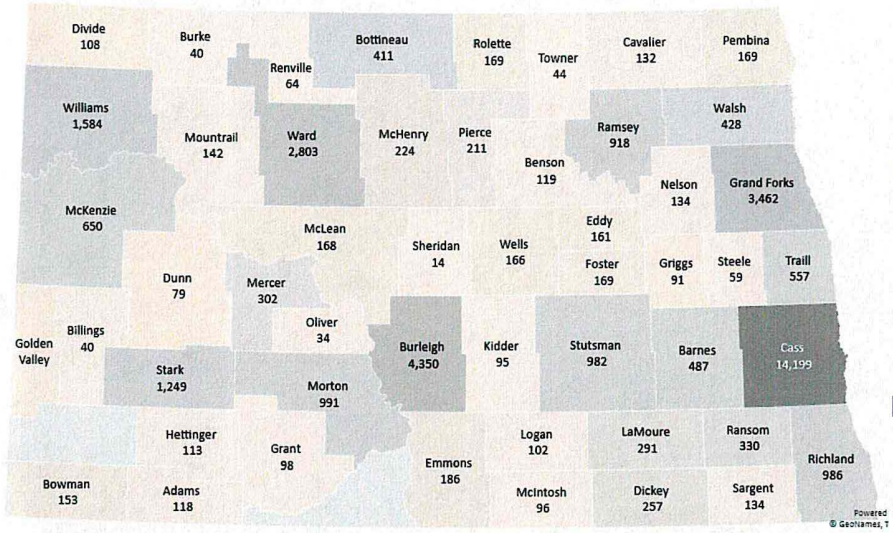
IF ANY QUESTION IS "NO" -
Child safety not assured so removal is necessary



Early Childhood Summary

23-25 Budget Base	**$55.5 million**
23-25 Budget Approp	**$80.0 million**
25-27 Budget Base	**$40.8 million (draft)**

Our goal when children are not with their parents, is that they are in safe and engaging care environments. Investments in quality, inclusive care, facilities, start up, above and beyond training, infrastructure and shared services make it possible for child care providers to create and sustain nurturing environments for children.



HB 1540 created resources for child care providers

- **Grants** for Quality, Facilities, Start-up/Expansion, Inclusion & non-traditional hrs care
- **Shared Service** supports (business mgmt training and operational software, curriculum resources)
- Increased access to Quality cohorts and business coaches
- Worker incentives for above and beyond training

Early Childhood by the Numbers

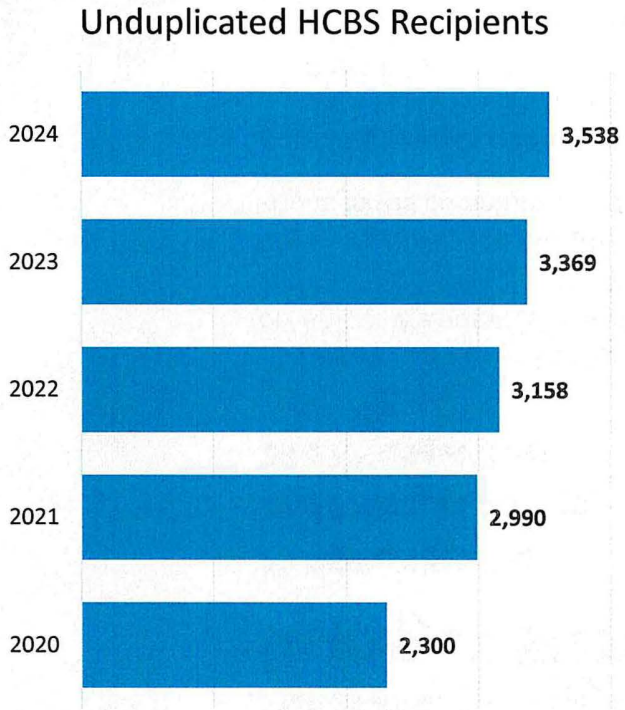
Adult & Aging Services Budget Summary

23-25 Budget Base	**$69.1 million**
23-25 Budget Approp	**$90.4 million**
25-27 Budget Base	**$67.8 million (draft)**

The Adult and Aging Services Section is designated as the State Unit on Aging. We administer and deliver more than 40 in-home and community-based services to eligible North Dakotans.



We also protect the health, safety, welfare and rights of vulnerable adults in the community and long-term care residents.

- **4,329 people** receiving HCBS case mgmt (2024) – 3,538 HCBS and 791 basic care
- **77 case managers** (73 HCBS, 4 Basic Care)
- **8% increase in referrals** 2023 to 2024 – in 2024 avg of 150 new referrals / mo resulting in 80 new open cases
- **1,359 Qualified Service Providers** (QSPs) – 206 agencies, 1,153 individuals

More North Dakotans are choosing home-based community care options every year

- ✓ The **demand** for in-home and community-based services has continued to **increase.**
- ✓ More HCBS participants have **complex needs** (medical and behavioral health needs) that increase the amount of time and skills necessary to provide **quality services.**
- ✓ **Rising acuity levels** have created a demand for more **complex services** and providers who can employ higher trained staff including **nurses and supervisory** staff.

54% increase since 2020

What is HCBS?
Services delivered in an **integrated setting**.

What is an integrated setting?
A private home, apartment etc., owned or rented by the individual or their family, or an individual adult foster care setting.

Types of SUPPORT SERVICES available via HCBS

Adult Day Care	Adult Foster Care	Adult Residential Care
Case Management	Chore	Community Support Services/ Residential Habilitation
Community Transition Services	Companionship	Emergency Response System
Environmental Modification	Extended Personal Care	Family Home Care

Homemaker	Home Delivered Meals	Non-Medical Transportation
Non – Medical Transportation Escort	Nurse Education	Personal Care – daily rate
Personal Care- unit rate	Personal Care – Assisted Living	Respite
Supervision	Supported Employment	Transitional Living

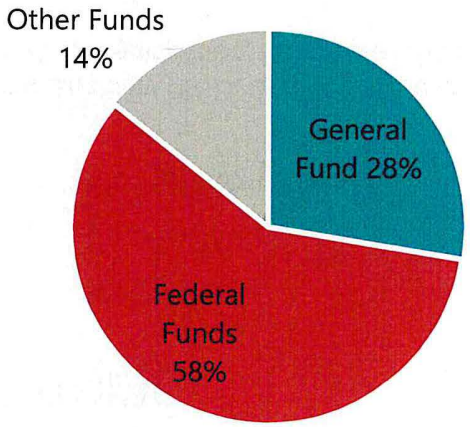
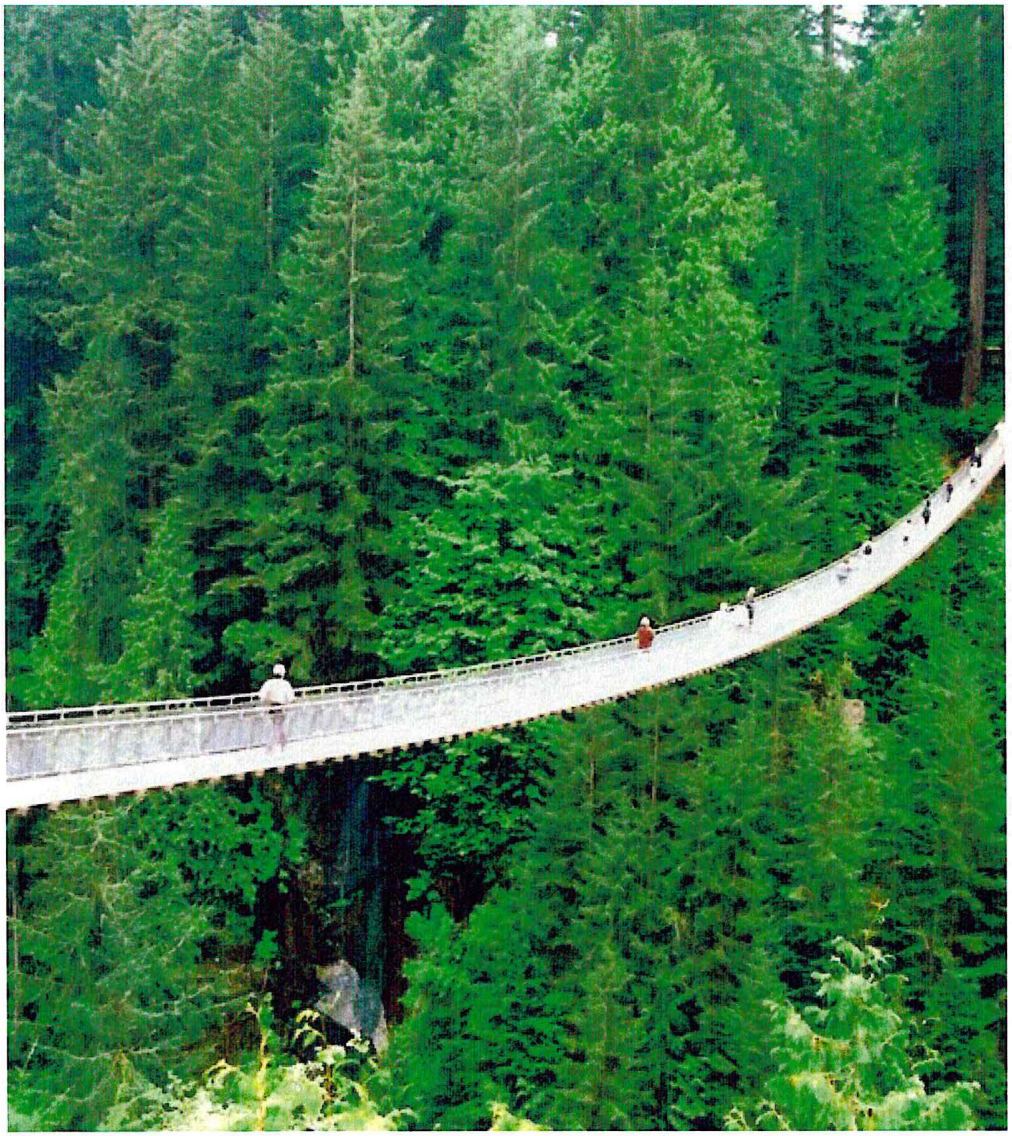
Disability Determination Services Summary

23-25 Budget Base	**$8.0 million**
23-25 Budget Approp	**$8.0 million**
25-27 Budget Base	**$8.3 million (draft)**

Determine eligibility for medical disability (SSDI and/or SSI), using Social Security Administration (SSA) guidelines, for people who are unable to work.

- Number of disability decisions is determined by Social Security Administration (SSA)
- DDS team members make medical disability determinations using SSA guidelines
- Average monthly **SSI** payment in ND is **$638**; total of $4.59 million in monthly benefits to North Dakotans
- Average monthly **SSDI** payment in ND is **$1,317**; total of $20.47 million in monthly benefits



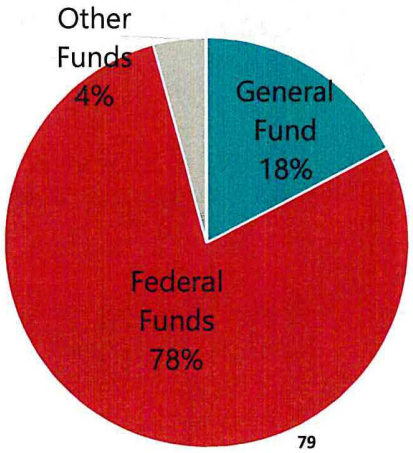


Child Support Budget Summary

23-25 Budget Base	**$41.3 million**
23-25 Budget Approp	**$41.3 million**
25-27 Budget Base	**$37.1 million (draft)**

Provide support to parents, employers, and other partners to help ensure children receive court-ordered financial and medical support to reduce child impoverishment.

- 78.58% - Collection of current monthly support
- 90.32% - Open cases with a support order established
- $254 million – Arrears owed at the end of CY 2024 (lower than what was owed in 2016)
- $192.2 million – Total collections in CY2024 (record high – up from $185.9 in 2023)



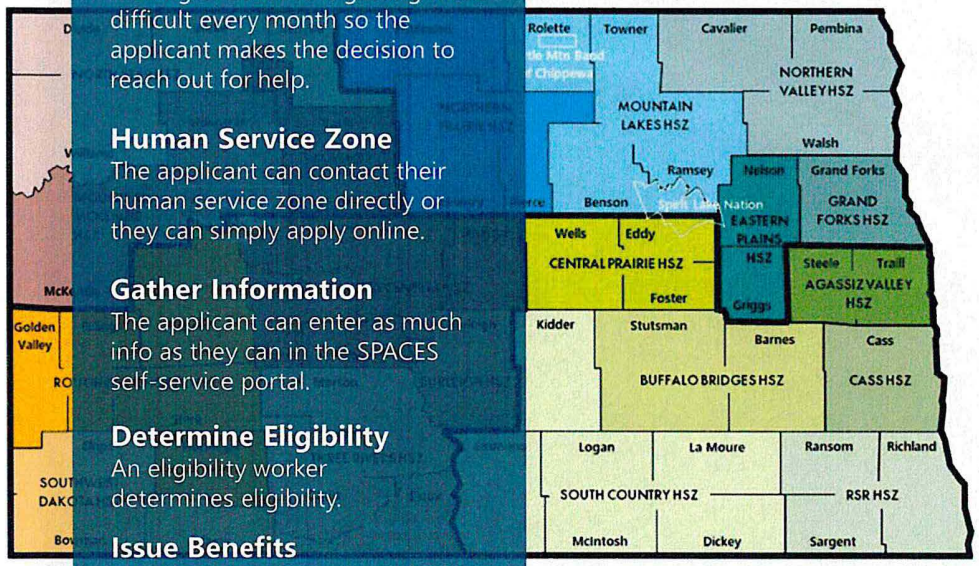
Economic Assistance Budget Summary

23-25 Budget Base	**$458.3 million**
23-25 Budget Approp	**$554.1 million**
25-27 Budget Base	**$529.3 million (draft)**

Facilitate delivery of federal and state resources that support household economic health, including nutrition (SNAP), utility (LIHEAP), child care (CCAP) and housing stability assistance; eligibility for Medicaid coverage; and Temporary Assistance for Needy Families (TANF).

Human Service Zones

Serving North Dakota individuals and families is a partnership. Economic Assistance Policy administers programs, while Human Service Zones deliver benefits.



Person Decides to Apply
Making ends meet is getting more difficult every month so the applicant makes the decision to reach out for help.

Human Service Zone
The applicant can contact their human service zone directly or they can simply apply online.

Gather Information
The applicant can enter as much info as they can in the SPACES self-service portal.

Determine Eligibility
An eligibility worker determines eligibility.

Issue Benefits
If eligible, the state will issue the benefit in the appropriate manner.

How Clients Access Services

One Address. One Phone Number. No Wrong Door.
Eligibility redesign makes it easier for families to get help by simplifying access points.

Centralized Mail Unit

One mail and email address for document submission

Customer Support Center

One phone number to speak to an expert

Local Support

Local offices will remain open for in-person support

Self-Service Portal

Individuals can use the self-service portal to apply, report changes, renew their benefits, view notices, upload documentation, and check their eligibility and benefits.

Application volume remains steady & timeliness continues to improve

Description:
Each federally funded program has expectations related to timely processing, indicated here as "Federal". The state has also established goals related to timely processing, which are represented here as "Excellent" and "Target". "Untimely" processing indicates a timeframe that exceeds allowable federal expectations.

#2: Audit findings included in more recent audit and actions taken to address each finding

Audit Findings
2022-23 SAO Operational Audit

Finding 2023-01: Workforce Retention Grants Not Monitored.

- Identify whether there were other ineligible payments, and recoup funds for payments made to ineligible caregivers identified in this audit and through the Department's additional procedures. Develop ways to measure whether programs achieve the intended purpose.

Finding 2023-03: Children in Suspected Abuse Situations Not Contracted Timely.

- Ensure face-to-face contact dates are entered into the Department's tracking system (FRAME) and to make sure those dates are accurate and monitored. Ensure timely face-to-face contract with suspected victims of child abuse or neglect.

ND's Target Compliance Benchmark: **90%**

Audit Findings
2021-22 Single Audit

- **2022-012 CCDF Cluster**. Improve procedures to ensure child care correction orders are resolved before the end of each allowed correction period with accurate tracking of dates. *Modified processes to utilize system as assist.*
- **2022-013 CCDF Cluster**. Develop corrective action and perform annual unannounced inspections of child care providers in operation in accordance with 45 CFR 98.42(b)(2)(B) and Department policy. *Adjusted staffing patterns.*
- **2022-018 Emergency Rental Assistance Program**. Ensure monthly payment amounts are calculated correctly and reviewed for accuracy. Additionally, we recommend the Department ensure the improper payments are recouped through the ERA program's refunding process. *Reviewed processes and adjusted staffing.*
- **2022-021 Rehabilitation Services Vocational Rehabilitation Grants to States**. Follow its procedures to prevent and detect Vocational Rehabilitation payments from occurring outside the period of performance. *Reviewed processes and provided additional training.*

Audit Findings
2021-22 Single Audit (cont.)

- **2022-014 Low-Income Home Energy Assistance**. Coordinate with the Department of Commerce to properly report subawards of the state under the LIHEAP program for FFATA reporting. *Reviewed processes and adjusted staffing.*
- **2022-015 Low-Income Home Energy Assistance**. Ensure adequate rental documentation is on file and proper eligibility determinations of the Low-Income Home Energy Assistance Program (LIHEAP) are made. *Reviewed processes and provided additional training.*
- **2022-016 Low-Income Home Energy Assistance**. Ensure policies and procedures prevent duplicate payments from being applied to LIHEAP cases. We also recommend the Department of Human Services ensure required documentation is obtained for individuals appearing in multiple cases in accordance with state LIHEAP Policy. *Reviewed processes and provided additional training. LIHEAP Business Process Redesign in process.*
- **2022-017 Low-Income Home Energy Assistance**. Ensure eligibility is verified through the State NDVerify system prior to approval of all LIHEAP applications or revise the State Plan to identify the use of NDVerify as optional for approval by the Federal awarding agency. *Revised Plan; LIHEAP Business Process Redesign in process.*

#3: Current Biennium Accomplishments and Challenges; Next Biennium Goals and Plans

2023-25 Accomplishments
Human Service Division Highlights

Growing a strong, stable workforce requires strong, stable families

Filling gaps in the system of care can prevent crisis

Pushing toward simplicity improves citizen experience

- ✓ Case management redesigns underway to improve service delivery
- ✓ Technology system replacements in progress to meet customer expectations
- ✓ Expanded HCBS service options across multiple sectors
- ✓ Statewide eviction prevention and housing stabilization pilot
- ✓ Big steps forward in strengthening access to quality child care

NORTH Dakota | Health & Human Services
Be Legendary.

Proactive & strategic management of systems is required to meet citizen expectations

Behind the scenes impact: Integrated Eligibility system automation removes need for paper apps

Sun Bucks

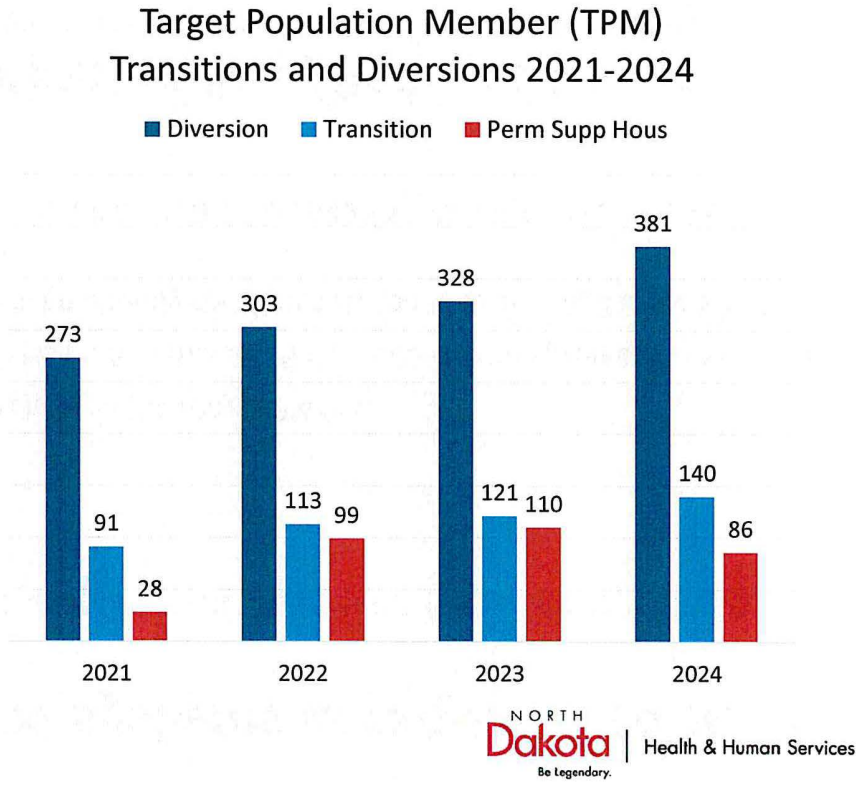
(summer SNAP)

- Summer 2024 - 38,000 children ($4.6M, 100% fed)
- Direct certification process for Summer 2025 = 44,000 children projected to benefit
  - ✓ 24,000 children will be directly certified because they are eligible for SNAP and TANF
  - ✓ Plus 6-8,000 children will be directly certified as eligible for Medicaid-only

Direct Certification for Free/Reduced Meals

- Nov 2024 added automated data exchange to remove the need for children who are already Medicaid eligible to have to apply again for Free / Reduced Meals from their school
- DPI and HHS exchange data between technology systems to eliminate need for families to complete an additional paper application

NORTH Dakota | Health & Human Services
Be Legendary.



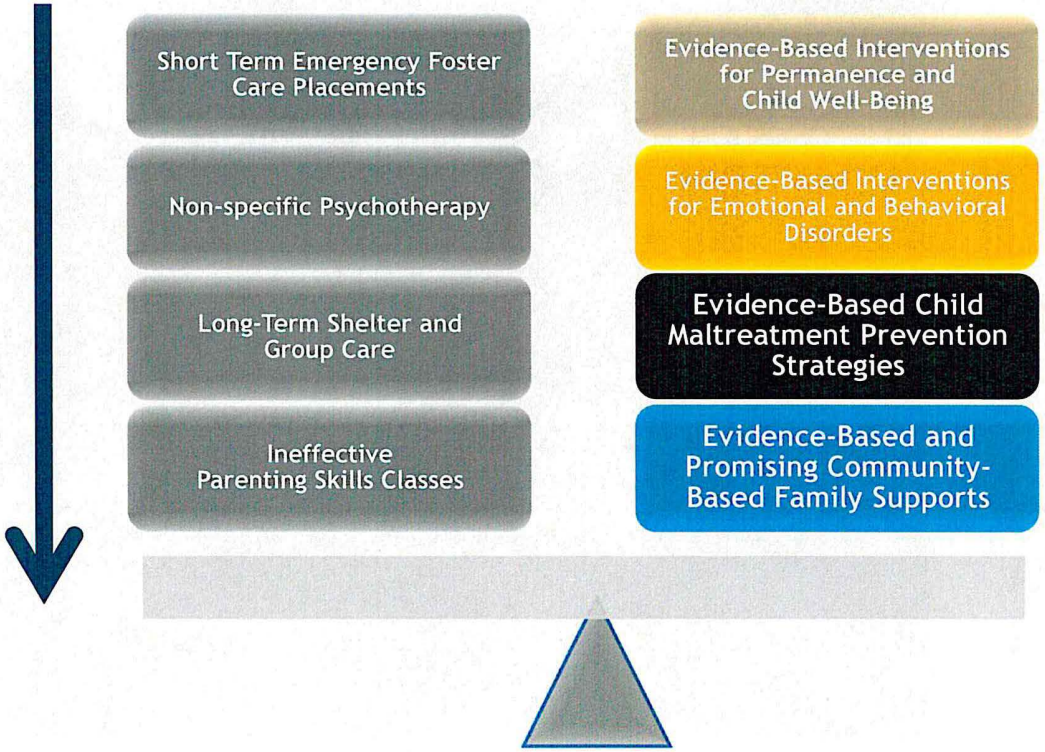
Adult and Aging Services

HCBS is supporting increase in Transition and Diversion from institutional settings

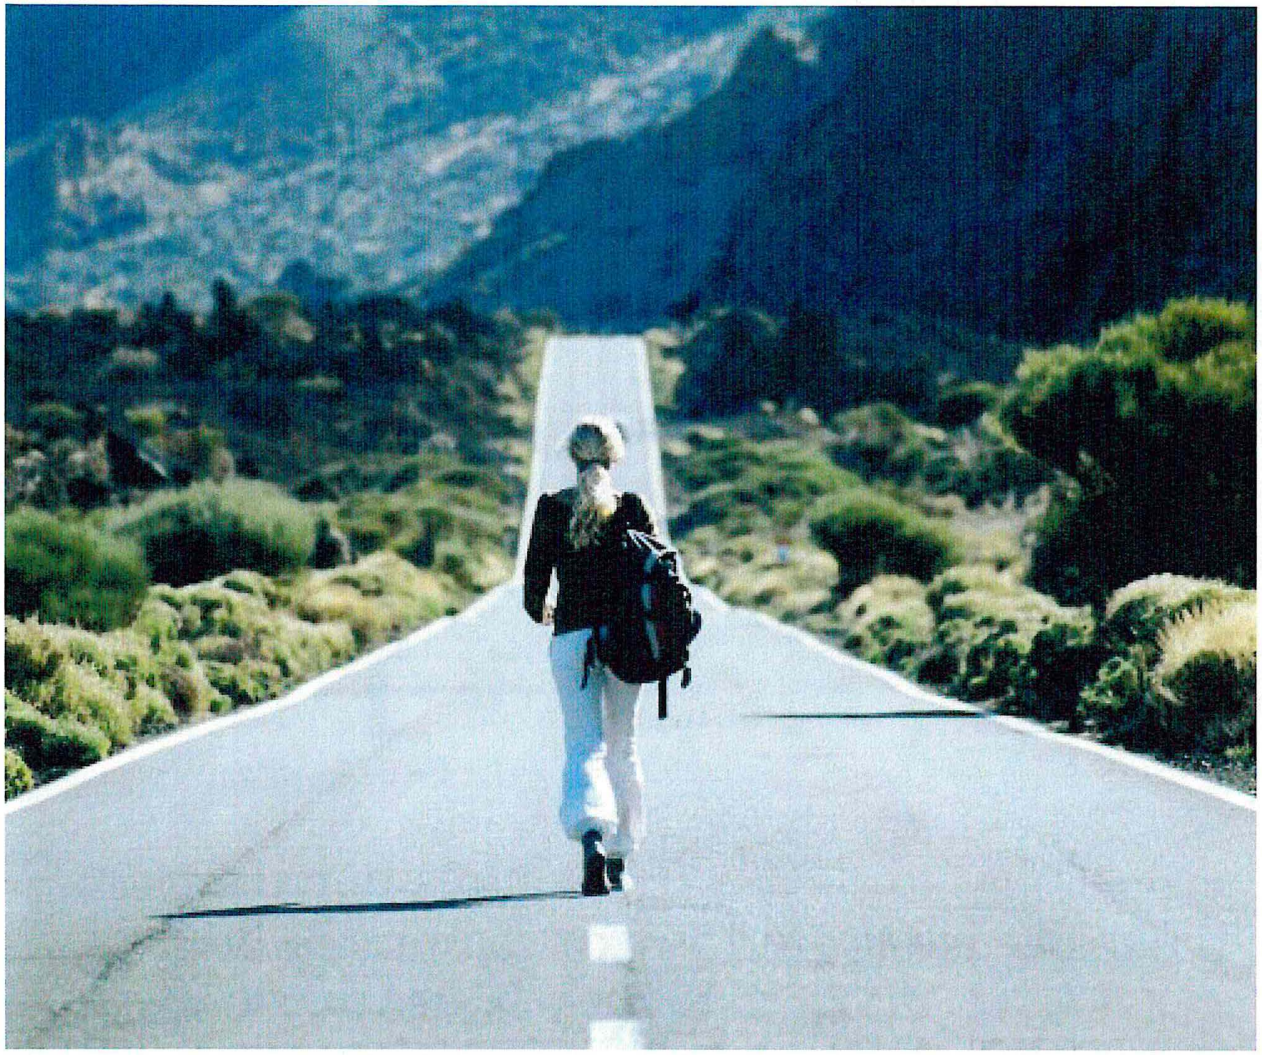
"**Diversion**" happens when a Medicaid eligible individual who screens at a nursing facility level of care receives a set of services (HCBS, housing etc.) that allows them to remain in an integrated setting and avoid institutionalization.

"**Transition**" happens when a Medicaid eligible individual who resides at a nursing facility receives transition supports and a set of services (HCBS, housing etc.) that allows them to move to an integrated setting in the community.

"**Permanent Supported Housing**" is providing affordable housing, rental assistance, meeting with landlords, application assistance etc., in addition to other traditional HCBS that allows an individual to live in a private residence alone or with family, their significant other or roommates of their choosing.



NORTH Dakota | Health & Human Services
Be Legendary.



Children and Family Services

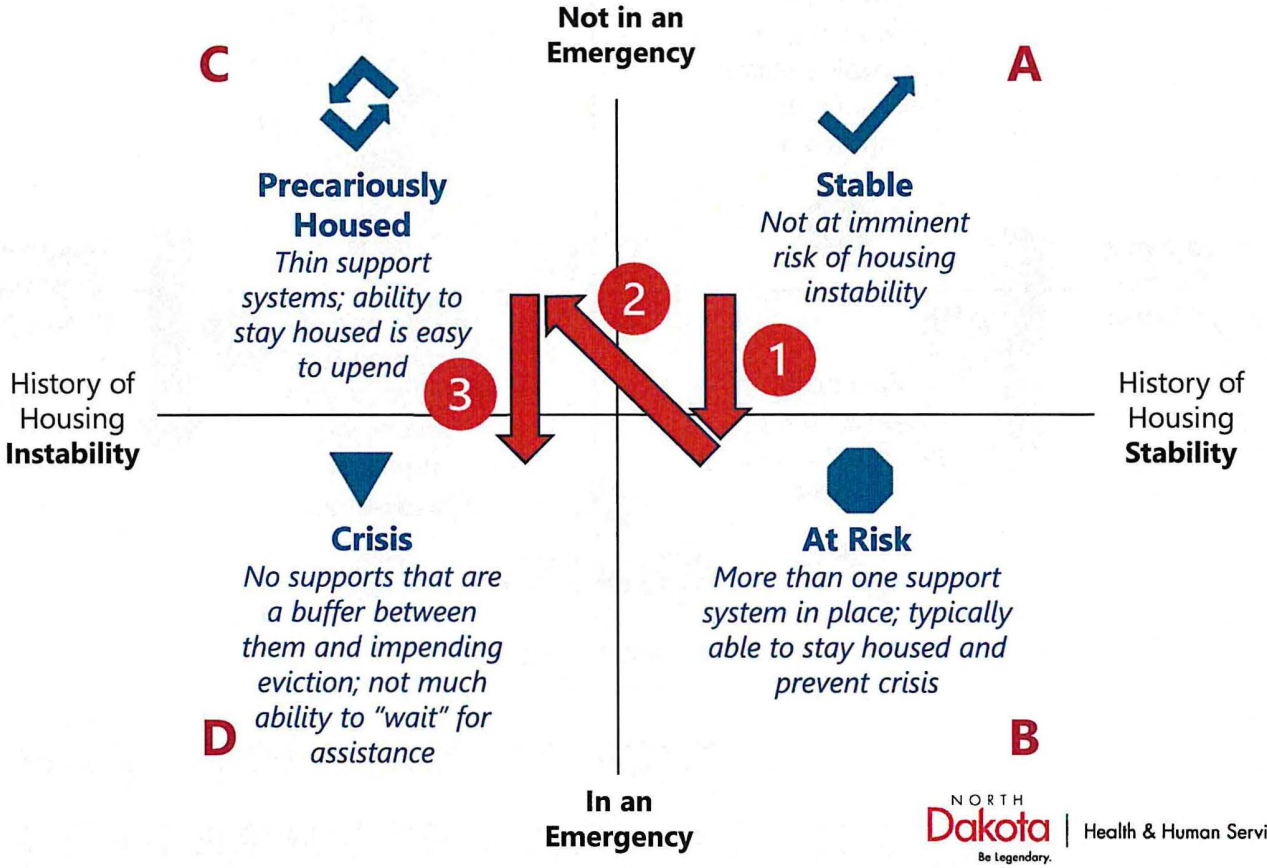
Shifting Resources to Support What Research Indicates will Work for Children and Families

De-scale investment in **approaches** that are **not proven effective**

Invest in approaches with **proven results** for the populations being served

In Child Welfare:

What does "progress" look like?



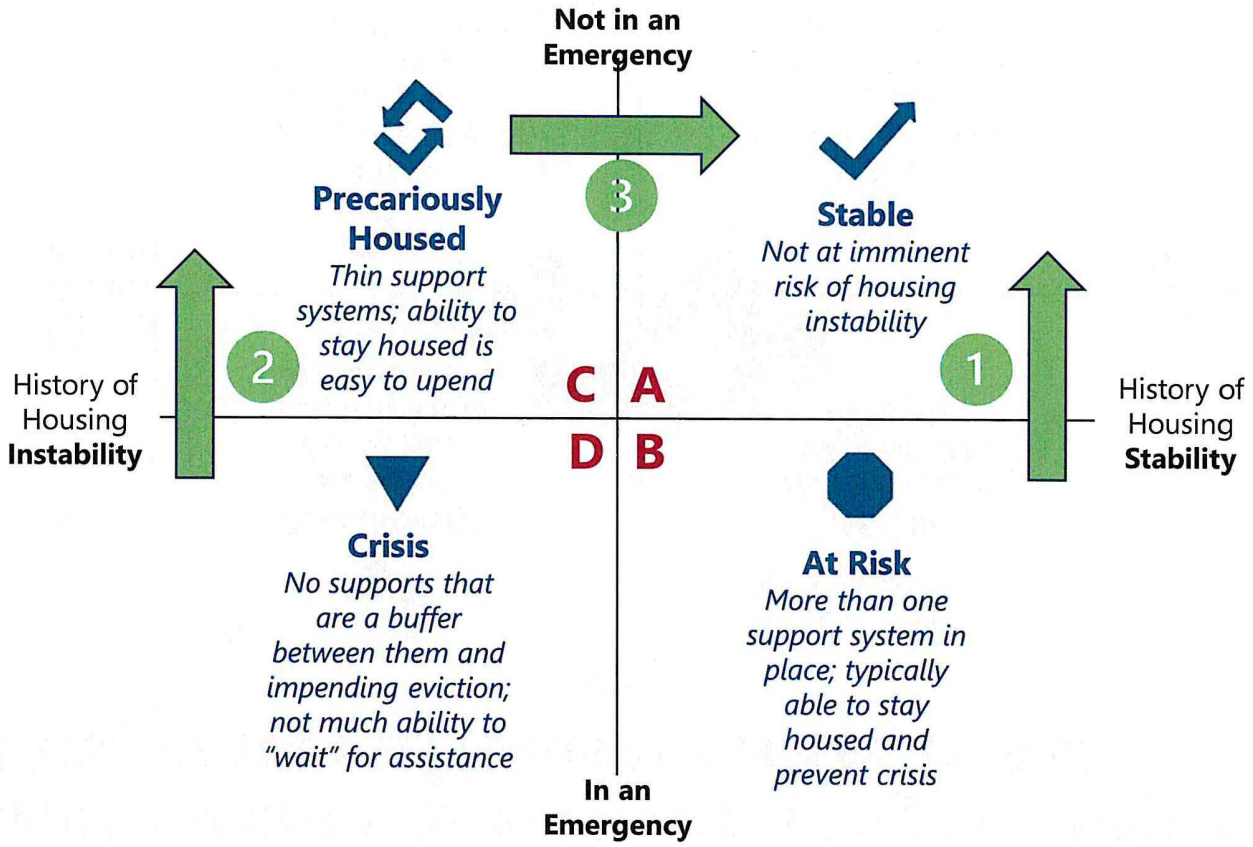
- Reduce Foster Care Numbers
- Reduce Institutional Placements
- Reduce Out of State Placements
- Reduce Substance Abuse as Abuse/Neglect factor
- Increase Kids receiving evidence-based supports
- Reduce severity of school-based behaviors

Piloting a statewide eviction prevention program helped document the nature of housing crises in ND

Scenario 1:
- Income interruption
- Health issue
- Caregiving change
- Unexpected expense

Scenario 2:
- Layering of disruptions – domestic violence, substance use, mental health, job loss, persistence of a health condition

Scenario 3:
- Persistent lack of resolution to family level disruptions – inability to maintain earnings, actions that trigger eviction, worsening health



NORTH Dakota | Health & Human Services
Be Legendary.

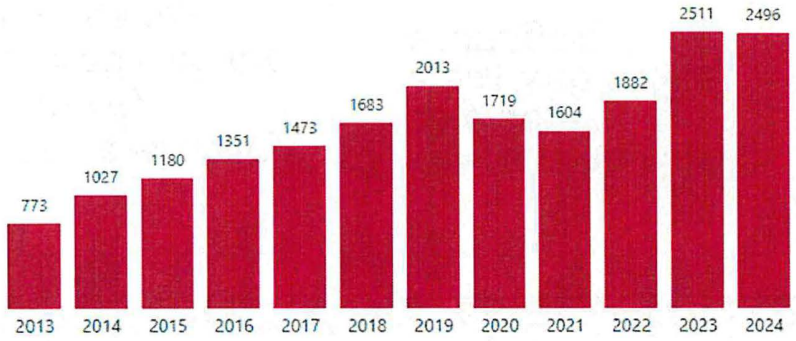
Intentional interventions can stop de-stabilizing events from taking hold

Scenario 1:
- Rent and utility assistance

Scenario 2:
- Rent and utility assistance
- Back rent/housing debt
- Re-housing assistance
- Mediation
- Peer support/care coord
- Support services (more likely to have a chronic health or disabling condition)

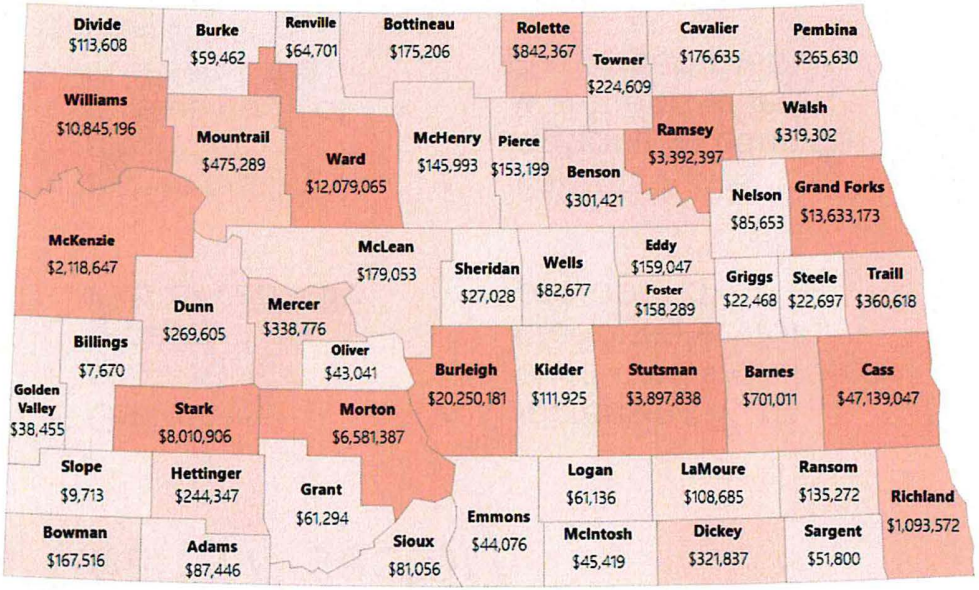
Scenario 3:
- Rent and utility assistance
- Benefit cliff mitigation (income strategy)
- Potential for some support services

Housing crisis is a reality for families of all kinds of backgrounds, in communities across the state



46%

Households that applied have children age 0-18



4%

Renters who applied for help & were age 65+

ND Eviction Judgments by Calendar Year

Housing Stability Resources Invested by County Dec 2021-Dec 2024

NORTH Dakota Be Legendary. | Health & Human Services

In Child Care

What indicators characterize a "healthy" sector?

- Broad availability of quality licensed care for infants and toddlers
- Mix of provider types who are licensed
- % of licensed programs operating to full capacity
- Very few/no child care deserts (i.e., areas with critical shortages)
- Equitable distribution of child care assistance statewide
- Inclusion supports that create access for children with special needs
- Growth in capacity is greater than loss of capacity
- Active quality efforts in increasing % of licensed child care slots
- Child care rates cover the cost of delivering quality care
- Increasing % of child care workforce credentialed for promotion
- Parents have options to consider when and where they need them
- Working families w/young children pay no more than 7% of income for quality care

"Stability" in the child care sector

Example:

Reduced worker vacancy and turnover

Care capacity in licensed child cares is not constrained by workforce shortages

Desired Capacity – Normal Vacancy = Actual Capacity

↑ Net Capacity

Training incentives |
Child Care Assistance for CC workforce |
Stabilizing baseline revenue

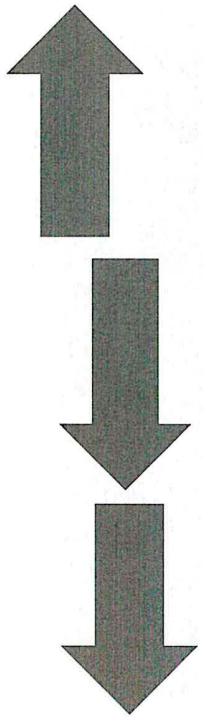
NORTH Dakota Be Legendary. | Health & Human Services

Staffing shortages are a significant driver of lower-than-capacity enrollment of children in licensed settings

Nursing Assistant

10th percentile	Median	*90th percentile*
$15.04	$18.02	$22.14

Teacher's Assistant



10th percentile	Median	*90th percentile*
$13.98	$17.17	$22.42

Home health aide

10th percentile	Median	*90th percentile*
$14.06	$17.07	$21.75

Child care worker

10th percentile	Median	*90th percentile*

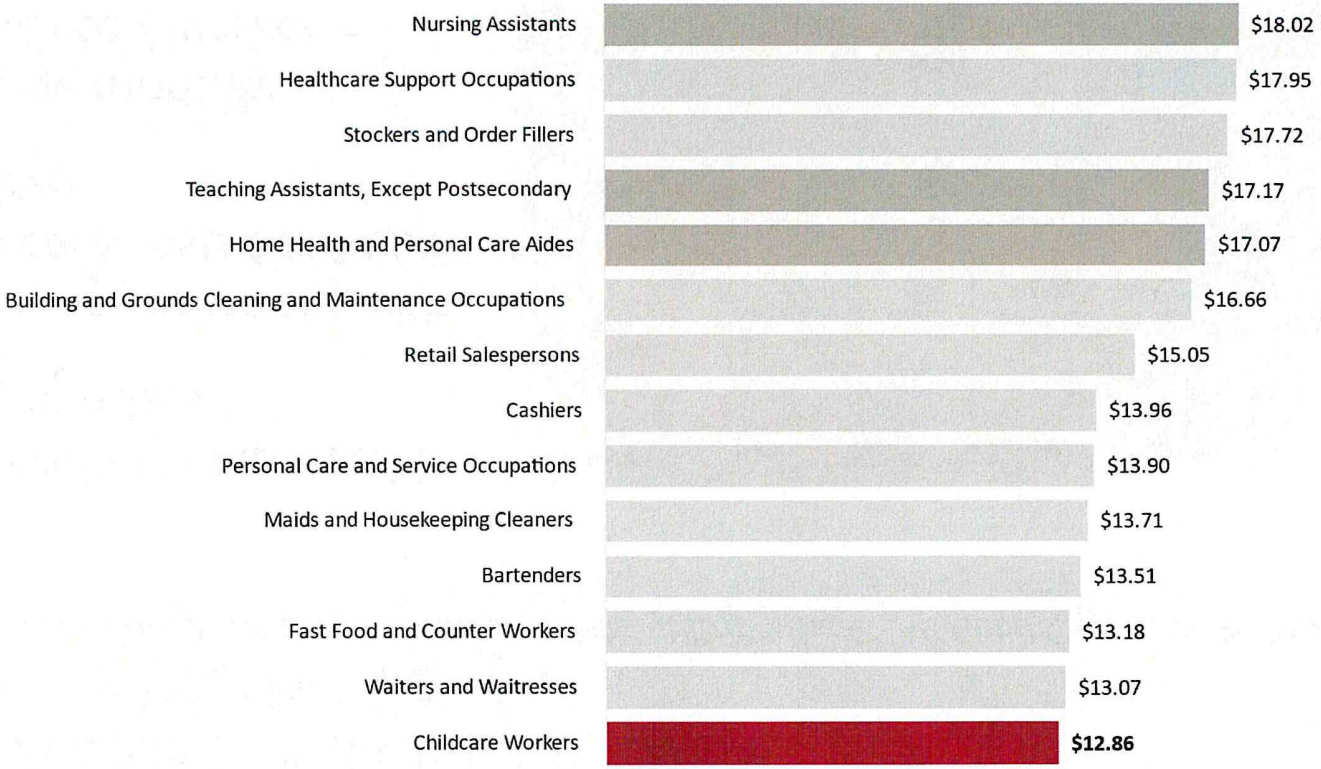
"Licensed Capacity"

38,451

"Desired Capacity"

30,661

"Actual Active Capacity"



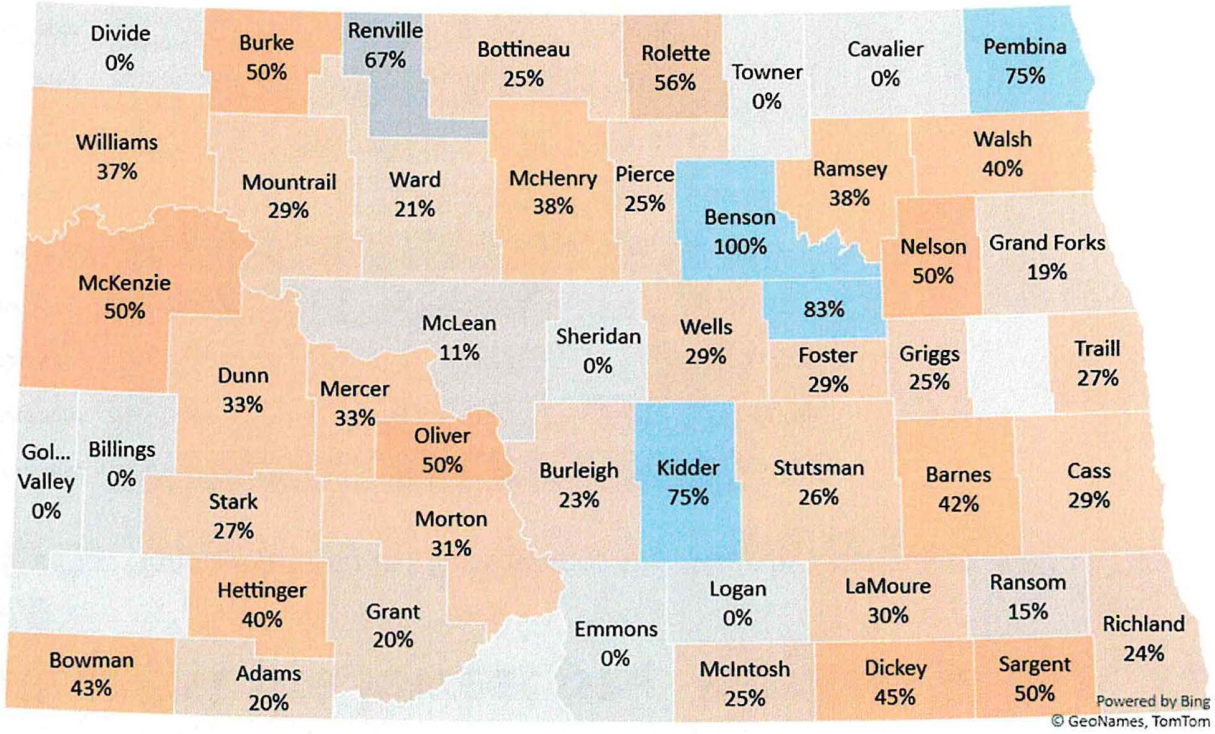
??

Present Day Potential for **20.3%** increase in capacity (based solely on licensing space requirements)

ND Median Wage for Select Occupations | JSND Labor Market Information | Employment and Wage by Occupation 2022

Child care workers are amongst the lowest paid workers in the North Dakota labor force

ND Median Wage for Select Occupations | JSND Labor Market Information | Employment and Wage by Occupation 2022



NORTH Dakota | Health & Human Services

Key Indicator: Child Care Staffing

Child Care Worker Benefit

% Licensed Child Care Providers who have workers utilizing the CCAP Child Care Worker Benefit June-Dec 2024

- 744 workers employed by 302 providers
- Receiving assistance with child care costs for 1,661 children
- Average monthly assistance / worker = **$1,400** which is the **equivalent** to an **$8/hr wage increase**

2025-27 Goals and Plans

Forward progress in areas of focus

- Resources to support Transition and Diversion
- Expansion of home and community based service options
- Improve systems that serve North Dakotans
- Eviction prevention resources and housing resources for transition and diversion
- Child care as workforce infrastructure

RESOURCES TO SUPPORT TRANSITION AND DIVERSION ($5,589,397)

WHAT?

- ✓ Housing assistance to support targeted population members (TPM) - $300,000
- ✓ Services to support transition and diversion from institutional settings - $5,289,397

WHY?

Allows individuals to make informed choices, including the option to receive care while enjoying the benefits of community living in the least restrictive setting.

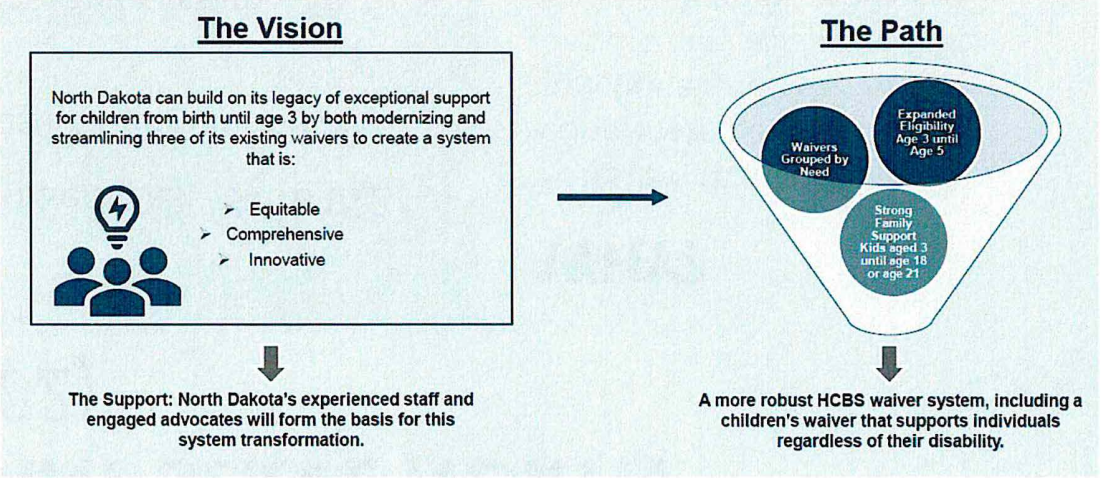
2021 – **2,376**

NORTH Dakota

EXPANSION OF HOME AND COMMUNITY BASED SERVICE OPTIONS ($13,617,649)



WHAT?

- ✓ QSP/HCBS targeted rate increase - $5,392,656*
- ✓ Host Home services in the DD waiver - $3,379,800
- ✓ Cross-Disability waiver implementation - $4,948,452*

** - Medicaid funded service; dollars will be found in Medical Services Division budget with joint implementation with the Human Services Division*

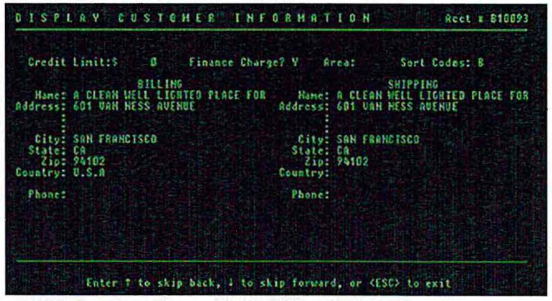
WHY?

Serving people in lowest level of care necessary will return better outcomes. Systems encourage or discourage certain behaviors, based on how services are designed and how payment models are structured.

Source: Presentation by Alvarez & Marsal to Interim Human Services Committee, Cross-Disability Children's Waiver Update (9-25-24)

IMPROVE SYSTEMS THAT SERVE NORTH DAKOTANS ($14,531,002)

WHAT?



- ✓ Delivery of Vulnerable Adult Protection Services - $718,522
- ✓ Quality legal representation for families involved with child welfare - $700,000
- ✓ Comprehensive vocational rehab technology system - $8 million ****
- ✓ Roof for Cedar Grove at Life Skills Transition Ctr - $712,480 **
- ✓ Retirement of Economic Assistance and Medicaid legacy systems on mainframe - $4 million ***
- ✓ Conversion of DD eligibility assessment tool for kids (ICAP to SIS) - $400,000

*** - Designated as one-time funding / SIIF **** - Designated as one-time funding / Community Health Trust Fund*

**** - Designated as one-time funding / SIIF; budget will be found in HHS Ops budget*

WHY?

A system that is well-coordinated and highly functional provides the best opportunity to assure that good outcomes are being achieved for all North Dakotans.

CHILD CARE AS WORKFORCE INFRASTRUCTURE ($17,272,500)

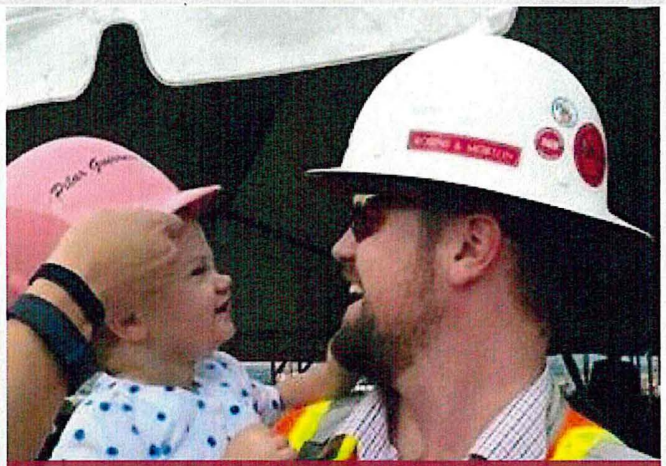
WHAT?

- ✓ Best in Class expansion - $6 million**
- ✓ Child care grants and shared services - $5 million**
- ✓ Early childhood quality infrastructure - $3 million**
- ✓ Inclusion support for child care - $172,500**
- ✓ Outcome measurement tools for quality rated child care programs - $100,000**
- ✓ Quality tiers in Child Care Assistance payments - $3 million**

** - *Designated as one-time funding / SIIF*

WHY?

Addressing child care as a barrier to work requires a comprehensive approach that tackles all 3 elements of the child care dilemma: Affordability, Availability & Quality.



Best in Class | Stanley, ND

Child care is a workforce solution that can make a difference for ND employers

Affordability

Connect more working families to child care assistance to keep the cost of child care within 7% of household income

Availability

Make it easier for working families to find child care when and where they need it

Quality

Help kids realize their potential by supporting quality early childhood experiences

ND Child Care Initiative

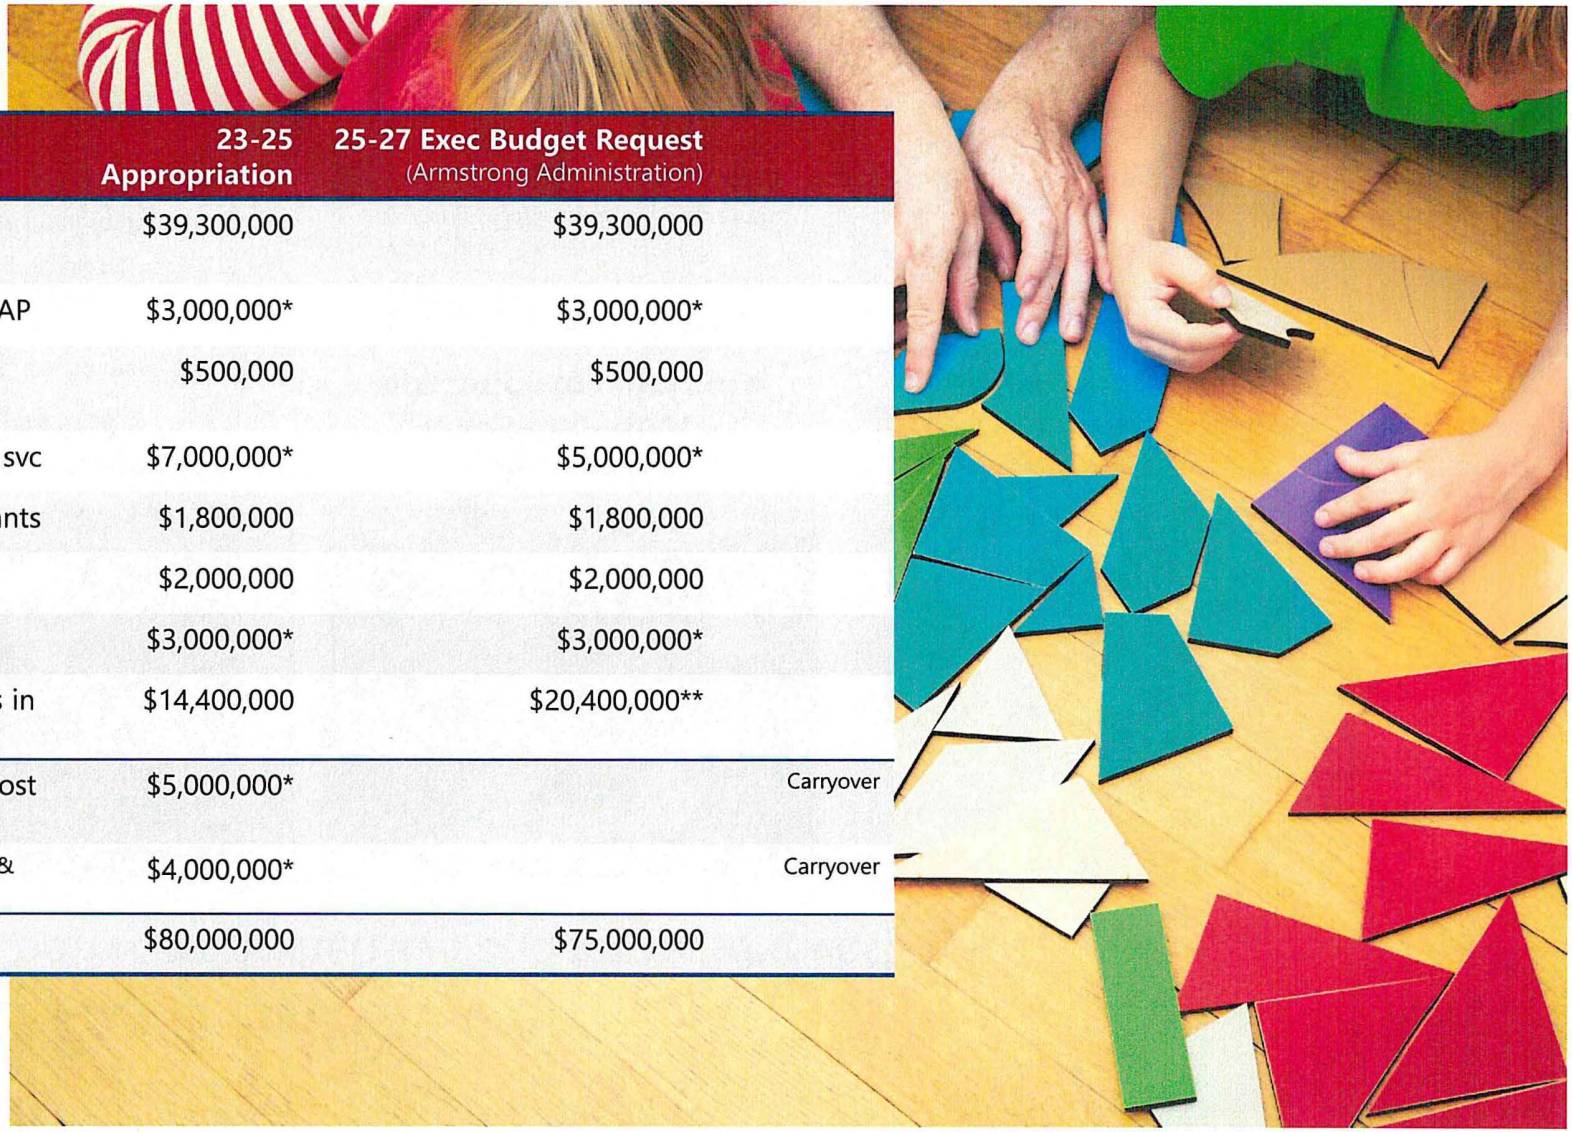
A strategy of both comprehensive and targeted investment

Target investments to ages 0-3

- ✓ Age of highest developmental return for children
- ✓ Period of greatest economic pressure for most young families
- ✓ Critical decision point for individual-level decisions about how/if to rejoin the labor force
- ✓ Focus on working families employed in occupations where compensation doesn't offset the cost of child care needed to enable work

Embrace an all-of-the-above approach to child care

- ✓ Quality early experiences can happen anywhere.
- ✓ Working families should have meaningful choices about child care.
- ✓ Principles of quality are knowable and transferrable to any setting.
- ✓ Sustainable child care businesses will support more sustainability within the workforce.



Help working parents provide for their families by supporting employment, training and education goals

- ✓ Benefits are scaled to family need.
- ✓ Employers have meaningful vehicles to remediate child care as a barrier to work.
- ✓ There are opportunities for children who are least likely to have access to quality early childhood experiences.

	23-25 Appropriation	25-27 Exec Budget Request (Armstrong Administration)	
Child Care Assistance Enhancements (CCAP)	$39,300,000	$39,300,000	
Quality based pmts in CCAP	$3,000,000*	$3,000,000*	
CCAP app outreach & assistance	$500,000	$500,000	
Provider grants & shared svc	$7,000,000*	$5,000,000*	
Non-traditional hours grants	$1,800,000	$1,800,000	
Worker training stipends	$2,000,000	$2,000,000	
Quality infrastructure	$3,000,000*	$3,000,000*	
Evidence based programs in Year Before Kindergarten	$14,400,000	$20,400,000**	
Employer-led child care cost sharing program	$5,000,000*		Carryover
Background Check Automation & State Employer Share WPCCR	$4,000,000*		Carryover
	$80,000,000	$75,000,000

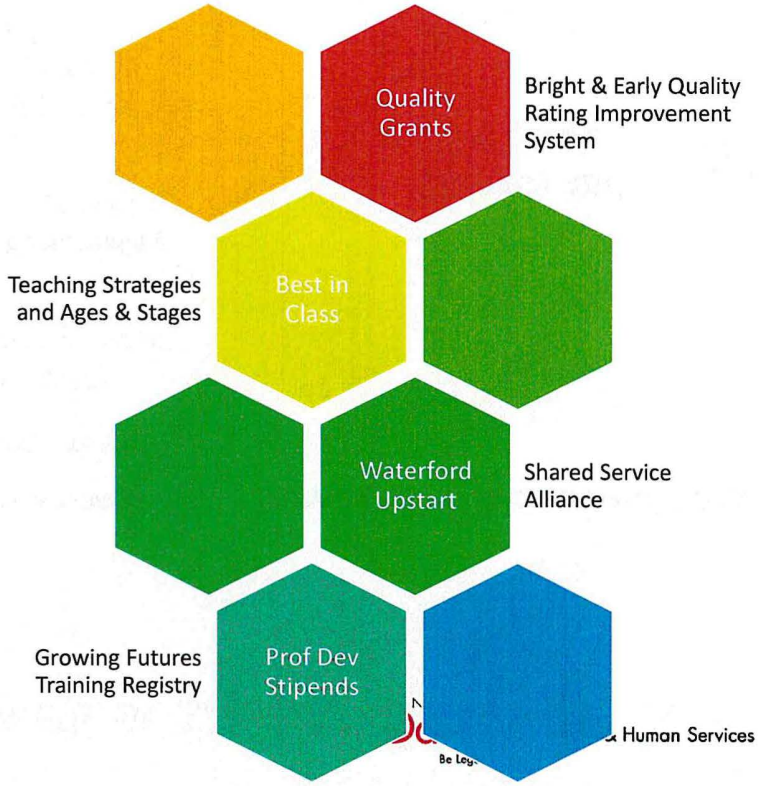
How can early childhood experiences support Emergent Literacy Skills

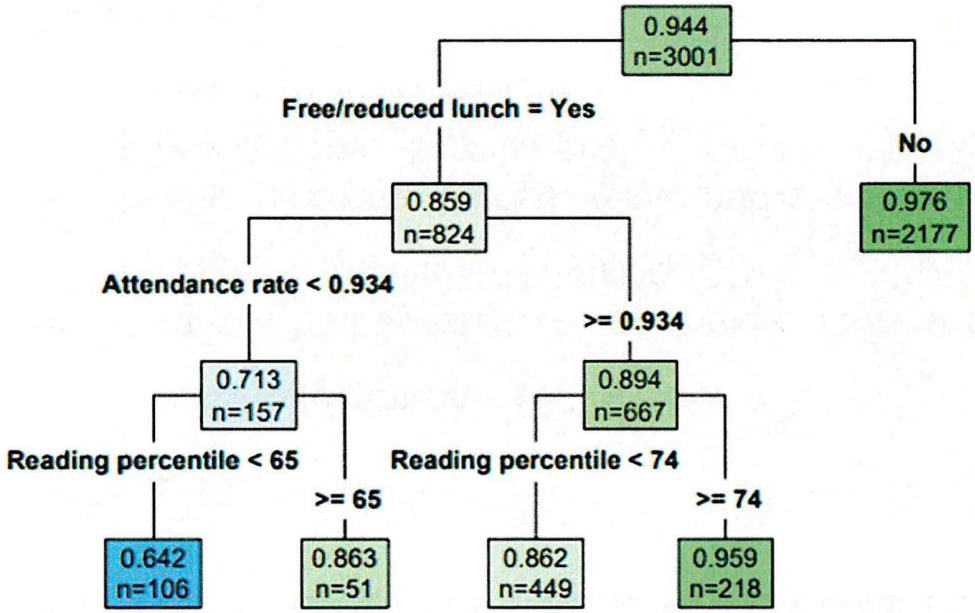
Emergent Readers and Writers

Essential components of Emerging Literacy

- An interest in and enjoyment of print (handling books and relating them to their stories or information)
- Print awareness (how to handle a book, reading from left to right, recognition of pictures symbols, signs, or words)
- An interest in telling and listening to stories (pay attention to stories, repeat, use some rhymes, phrases, or refrains from stories or songs)
- Make marks and use them to represent objects or actions (an understanding that words are made up of letters, recognizing letters when they see them)
- Comprehend meaning from pictures and stories

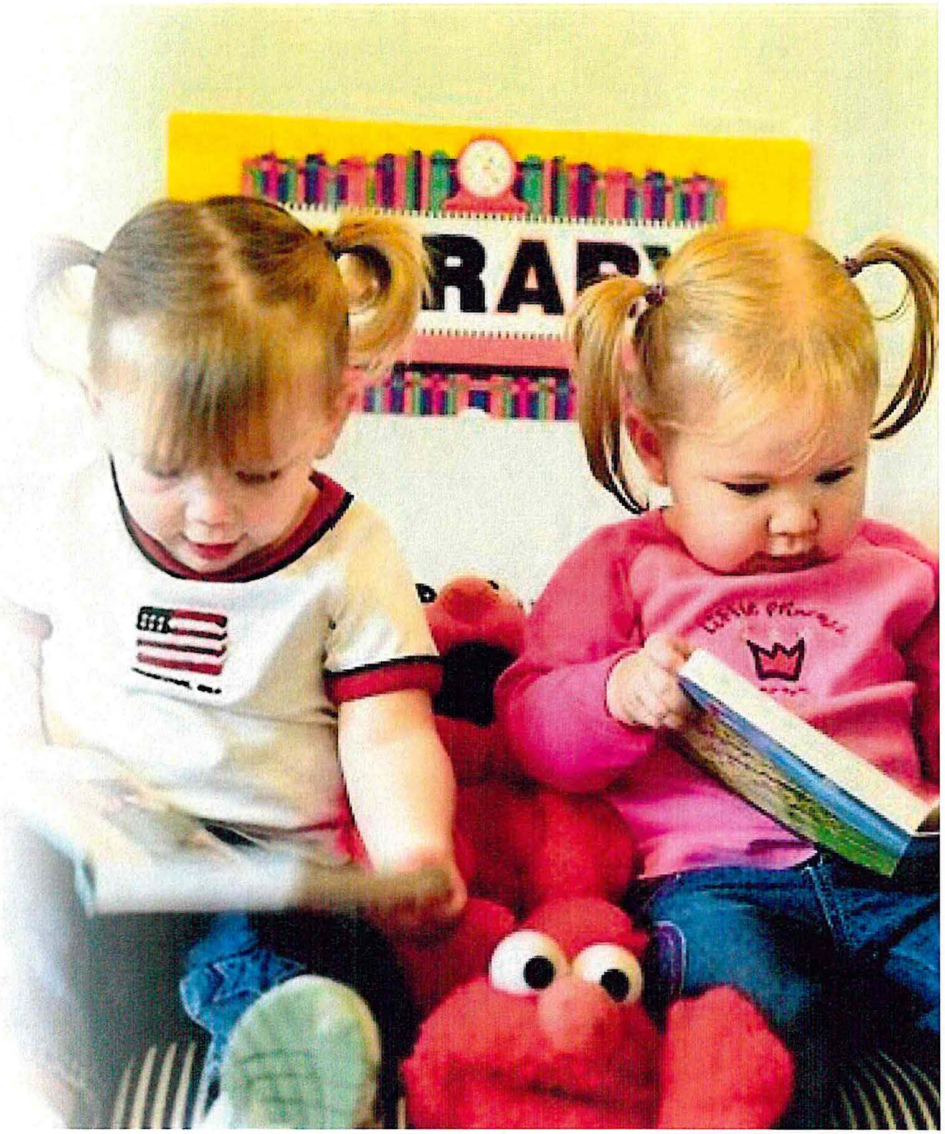


Conventional Readers and Writers



NORTH Dakota | Health & Human Services
Be Legendary.

How can early childhood experiences support Emergent Literacy Skills?



- Literacy Rich **Environments**
  - Colorful cozy spaces where children can read and for small group read alouds
  - Books designed to encourage interaction (tactile, pictures, topics)
  - Sticky notes and pencils in reading area so kids can identify their favorite books
  - Books located where children can easily reach them
  - Interest areas
- **Interactions** that support Literacy
  - Foundations: Scribbling, singing, rhyming, labeling all items in the room to encourage reading/object learning, playing games
  - Read aloud techniques (ex. see, show, say)
  - Talking with children and responding to their communication
  - Encouraging children to communicate by staff initiating conversations and asking appropriate questions
  - Staff use of books with children and encouraging children's use of books through positive interactions

Good Data can point us in the right direction

HOUSING INITIATIVE | EVICTION PREVENTION AND HOUSING STABILIZATION ($14.5 million)

WHAT?

- ✓ Eviction prevention - $3.5 million **
- ✓ Targeted rent assistance for people at highest risk of housing instability - $10 million **
- ✓ Home Renovation incentives to address accessibility modifications - $1 million **

*** - Designated as one-time funding / SIIF*

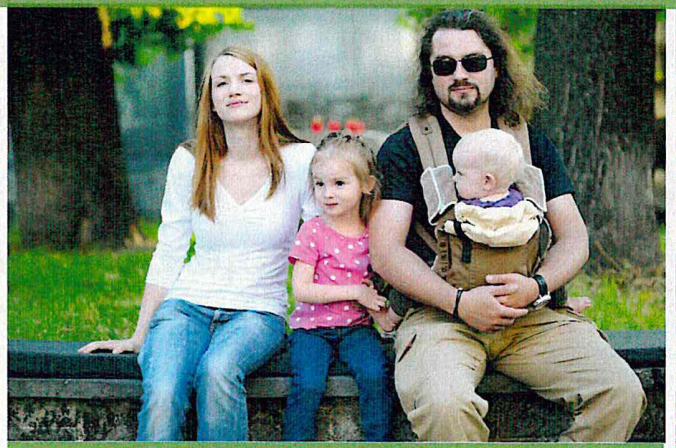
Housing is...

- The largest item in most household budgets (unless you have small children – then it's likely child care)
- A top barrier to transition from institution to community
- A risk factor in child neglect and a barrier to successful family reunification
- A challenge for successful transition from prison to community and a risk factor for criminal recidivism

WHY?

Strategically targeting interventions that address household budget gaps can prevent the spread of crisis and instability.

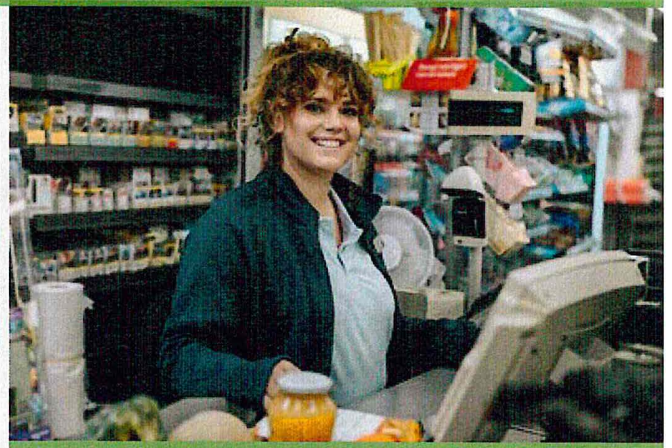
Housing is a prerequisite for workforce growth



Can you find it?

Availability

Population change
Housing supply (new & existing)
Housing mix
Infrastructure
Construction labor force

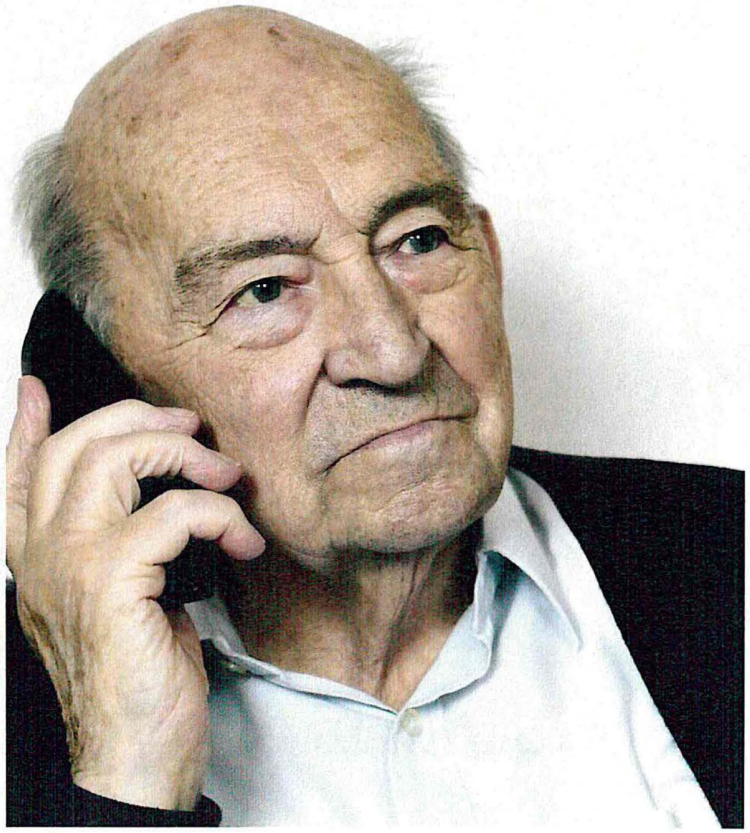


Can you afford it?

Affordability

Housing costs
Household income
Life stage costs
(child care, services)
Budget constraints
Regulation

Can you keep it?



Stability

Accessibility
Income changes
Health needs
Homelessness
Family disruption

Lowest income renters need help to compete in the marketplace.

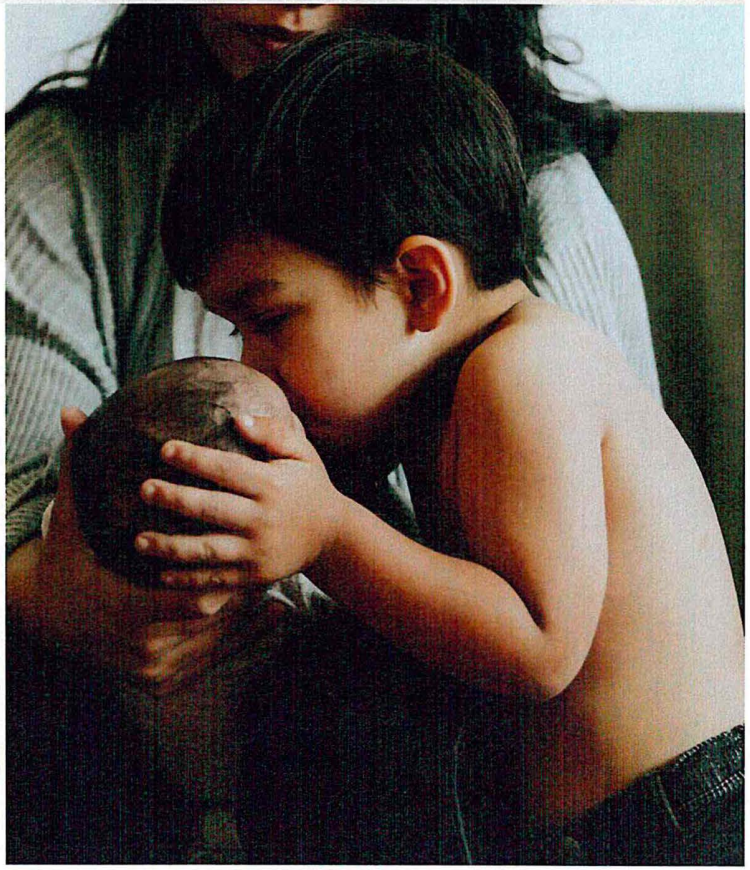
- Someone's "willingness to pay" and "ability to pay" are not always the same thing.
- Competition for the lowest cost (market worthy) housing is always greatest.
- Lower income households can only shop in segments of the market where competition is greatest and vacancy rates are lowest.

Housing crisis is real.

- It affects people all over the state
- Make sure when it occurs -- wherever it occurs -- that it's rare, brief and solvable.

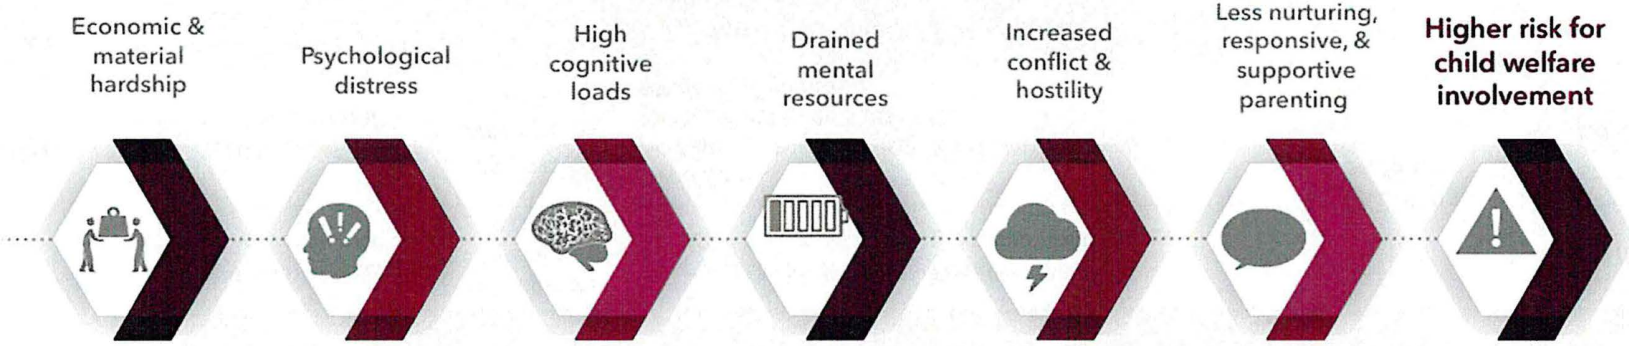
A supply strategy alone is not enough.

- Lower income workers can't afford rent levels that even meet minimum property operating costs.
- Some market demand segments don't match up well to market price realities.
- You can't just build your way out of this market mismatch.



A demand strategy alone is not enough.

- Demand side strategies can bridge many market gaps but, alone is not enough.
- People first need to find a place to live that meets their needs and then be able to pay for it.
- Appropriately flexible gap assistance can bridge affordability gaps.



Services without housing are rarely effective.

- A person can't focus on their physical health or their mental health if their most basic needs aren't met.
- Having a place to live is a first order need.
- Housing status is foundational to a person's ability to build a life for themselves and their family.

How might economic and material hardship Impact parenting and child wellbeing?

Family Stress Model

> It's not that people who are struggling to make end meet aren't well-qualified parents. It's that lack of financial resources creates stressors that make it more difficult to solve problems.

(Conger, 1994) (Neppl, 2016) (Duncan, 2014) (Mistry, 2002) ices

Data aggregated by: Anderson, C., Grewal-Kök, Y., Cusick, G., Weiner, D., & Thomas, K. (2023). Family and child well-being system: Economic and concrete supports as a core component. [Power Point slides]. Chapin Hall at the University of Chicago.

Working families with jobs that don't pay high wages often fall into the "hardship gap"

"Hardship Gap"

Earned Income is greater than poverty level but less than cost of living

Working but falling short of self-sufficiency even after supplementing wages with public benefits

Household Income*		...where programmatic Eligibility Ends	% of state population	Typically able to meet basic needs without assistance
20-50% of federal poverty level	*12% of state median income*	*Temp Assistance for Needy Families (TANF)* *Medicaid (full coverage for the entire family)*	*10-12% of state population*	*No (0%)*
100-140% of federal poverty level	*25-35% of state median income*	*Head Start* *Medicaid (medically needy (aged/blind/disabled))* *Medicaid (children ages 6-19)* *Medicaid (Expansion)*		*No (0%)*
200-250% of federal poverty level	*50-60% of state median income*	*Supplemental Nutrition Assistance (SNAP)* *Children's Health Insurance (CHIP)* *Low Income Home Energy Assistance (LIHEAP)* *Women Infants and Children (WIC)* *Earned Income Tax Credit (EITC)* *Free-Reduced Lunch (FRL)* *Housing Choice Voucher (Sec 8)*	*28-30% of state population*	*Maybe (20%)*

#11: Federal state fiscal relief funds to be spent, including purpose, amount and timeline

State Local Relief Funds

- ARPA State Local Relief Funds yet to expend = $0
  - Child Care Assistance - $7.4 million; 100% expended
  - Working Parent Child Care Relief - $9.6 million; returned $7.8 million to OMB as unobligated in Nov 2024
- Other time-limited funds
  - Housing Stability and Eviction Prevention – 9/30/25 expenditure deadline; $200 million original award; anticipate 100% expenditure by end of grant period
  - Homeowner Assistance Fund – 9/30/26 expenditure deadline; $50 million original award; anticipate 100% expenditure by end of grant award period
  - 10% HCBS Capacity Building Fund (Section 9817) – 12/31/2025 expenditure deadline; anticipate 100% expenditure by end of fund expenditure period

#13: Any other bills being considered and their potential budgetary impact on HHS

Other bills

- HB 1034 – re-establishment of terminated parental rights
- HB 1066 – establishment of a programmatic wage for the Senior Community Employment Program (SECEP)
- HB 1119 – streamlined child care licensing framework
- SB 2107 – child care licensing and training timeline
- SB 2112 – youth served by Life Skills Transition Center
- SB 2138 – grants to organizations providing care for the elderly

#12: Need for any other sections to be added to the Appropriations bill

None at this time

#14: One-page itemized listing of any changes needed to executive budget recommendation

N/A

RE: HHS State Audit Report for the Two-Year Period Ended June 30, 2023
Finding 2023-03: Children in Suspected Abuse Situations Not Being Contacted Timely

The State Auditor's Office (SAO) has examined adherence to child welfare policy for several consecutive audits. While an important tool, SAO reviews as conducted for the purpose of the state audit are not consistent with the practices HHS uses when conducting compliance reviews as per federal guidelines. There are variations in sampling methodology as well as other methodological differences, including as an example, decisions about how to account for allowable exceptions to policy when determining compliance.

North Dakota child welfare policy, as is typical in all states, denotes exceptions to expectations of timely visits for a variety of reasons, including when:

- Law enforcement assistance is necessary because the information indicates a crime may have been committed or worker safety is in question and no law enforcement assistance is immediately available.
- Law enforcement requests a delay.
- Due to the child's location, access within the timeline is not possible (e.g., roads are closed due to extreme weather or the child currently out-of-jurisdiction).
- Additional time is needed for appropriate planning / logistics of the intervention (e.g., child needs to be interviewed separately from the parents and already has left school, etc.).

SAO Recommendation re Finding 2023-03 (2022-23 state audit):

We recommend the Department of Health and Human Services ensures face-to-face contact dates are entered into the Department's tracking system (FRAME) and to make sure those dates are accurate and monitored. We recommend the Department of Health and Human services ensure timely face-to-face contact with suspected victims of child abuse or neglect.

NOTE: 4th consecutive audit with this finding (2016-2017, 2018-2019, 2020-2021, 2022-2023)

HHS Management Response to Finding 2023-03:

HHS agrees with the finding that data related to face-to-face visits is not entered timely or consistently. While improvements have been made, North Dakota has not yet achieved compliance with child protective services policies.

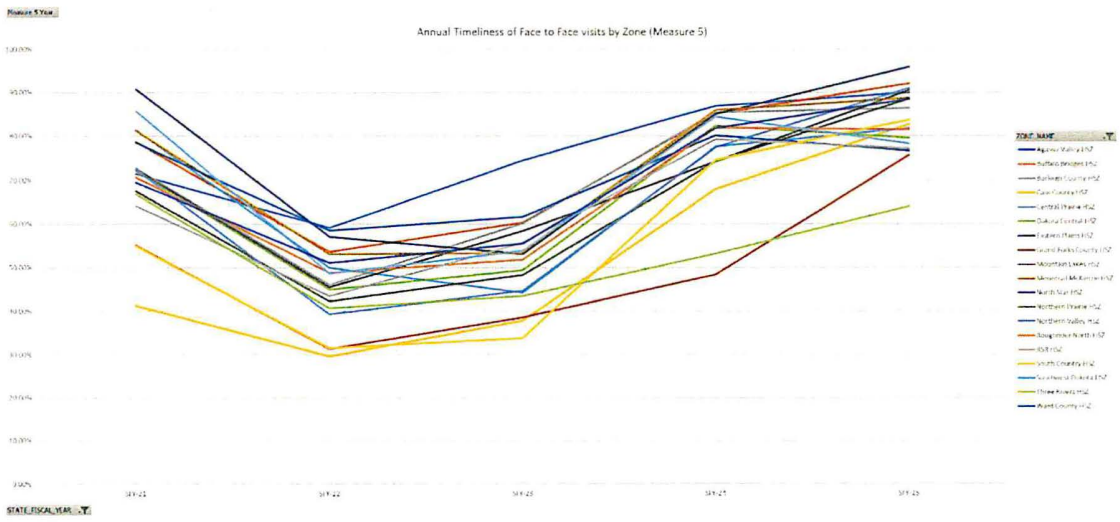
HHS has adopted measures to define Standards of Administration for Human Service Zones, including a goal for 90% of face-to-face contacts within the specified time frames (A = 24 hours, B = 72 hours, C = 14 days), per NDCC 50-01.1-08. HHS provides Human Service Zones with real-time data and quarterly compliance snapshots, along with ongoing coaching and training to improve timeliness and data entry.

- When a child is reported as being in a safe place (e.g., school or hospital), the judgment about the time of the response must take into account the location of the safe place, how long the child will be there, access others have to the child's location, and a plan to keep the child safe until CPS can respond.

In cases where exceptions are warranted, the child protective services worker's timeline is secondary to the lead agency's timeline (ex. law enforcement). These situations are not considered non-compliant; rather they are examples of cross-agency collaboration in situations that are particularly sensitive.

When HHS monitors for compliance with policy related to timeliness of face to face visits, the Quality Assurance (QA) team reviews not only date field indicators in the mainframe system that is currently used to support child welfare services in North Dakota, but also in case notes which is where exceptions to policy are noted today.

Updated data outlining trends in compliance with Timeliness of Face to Face Visits



While HHS would agree that SFY2022 was a particularly challenging time for Human Service Zones regarding completion of timely face to face visits, the 17% reported in the SAO is not consistent with HHS' regularly completed compliance reviews. It is also significantly different than the July 2022 State Audit measure, which was reported at 68%.

Both because the audit time frame is more than 2 years old, and because HHS' ongoing reviews have indicated continued improvement in compliance with this measure, the HHS Children and Family Services QA unit conducted an ad hoc review in September 2024 (in addition to their regular 6-month reviews). In September, HHS' CFS Field Support Specialists reviewed each of 73 randomly selected cases to determine if the case's face to face visits were timely, timely with exception, or untimely.

Of the 73 cases, the overall timeliness rate was 89%.

- 78% (57) - Timely, no exception to policy requested or required
- 11% (8) - Timely, exception to policy due to circumstances of case
- 11% -(8) – Untimely

The chart provides a visual representation of improvements in this measure over time, at a Zone level. The chart is based on 100% of active cases; the lines represent visits completed timely, as recorded in FRAME.

North Dakota is in the midst of its quadrennial federal review, known as CFSR R4. In addition to extensive stakeholder feedback and data gathering, this process will involve a review of North Dakota's compliance with policy that closely replicates the quarterly reviews already being completed by the HHS QS team. As of December 20, 2024, the process is approximately 50% complete. Of the 38 cases that have been reviewed so far, 9 cases were applicable to the Item 1 timeliness measure; 8 of those 9 cases (89%) were found to be in compliance, which means this will be deemed a Strength for ND's child welfare system, according to federal QA guidance.

As reference, when the QA team started its work in 2020, overall performance met expectations in 77% of the 26 cases deemed "applicable" for review (i.e., a face-to-face visit was required because the child remained in the home). Statewide performance declined in 2021 to only 40% of 32 applicable cases. However, statewide performance has since improved. The most recent reviews completed for January – September 2024 reflect compliance with state policy for 68% of the applicable 22 cases. Note: the benchmark established in North Dakota's PIP is 82%; the benchmark established in the Human Service Zone Standards of Administration is more reflective of state goals at 90%.

These numbers represent statewide performance; individual Zones either excel or struggle based on a variety of factors. HHS is committed to working collaboratively with Zones to help optimize performance across the entire state as consistency of service delivery is a hallmark of a quality child welfare delivery system.

Summary of efforts to improve performance related to core child welfare measures

HHS together with Human Service Zones, have been actively engaged in a series of efforts designed to help improve the overall quality of child welfare services in North Dakota, which includes compliance with state and federal policies and standards.

- January 2019 - North Dakota began implementation of its CPS **Social Service Redesign**, which transitioned delivery of human services from an individual county-based system to a network of 19 Human Service Zones. **Redesign of Child Protective Services** started simultaneous with overall Social Service Redesign.

- April 2019 - In response to the Sept 2016 federal review of NDs child welfare services, which include safety, permanency and wellbeing, the State was required to develop a **Program Improvement Plan (PIP)** to increase performance across the federal outcome and key system measures. The PIP was approved by the Children's Bureau in April 2019.

- January 2020 - Created a statewide **Quality Assurance team** to enable ongoing assessment of compliance, identifying in real time opportunities for training and technical assistance to further improve performance. The QA team provides information to field-based staff on 7 outcomes and 7 system measures every 6 months.

- September 2020 - Establishment of **Field Support Specialists** to help problem solve with Human Service Zone teams. FSSs are also able to support Zones who are experiencing temporary staff shortages and/or surges in volume in an effort to help maintain quality of service delivery.

- December 2020 - Began the working of implementing a new child welfare practice model with an updated safety framework to help drive improvements in child and family outcomes.

- January 2021 - Re-implemented **child welfare supervisor training** by UND CFS training center to better support the high number of staff who are new to the field or to their role.

- January 2021 – Implemented a centralized **Child Abuse and Neglect Intake** to improve consistency of response and routing of cases. A team of Zone team members from across the state work together to staff the intake line, coordinated by the Northern Valley Human Service Zone Director.

- August 2022 – Launched the statewide **Children in Need of Services (CHINS) team** to serve children who have not committed crimes out of the Juvenile Court system. A team of Zone team members from across the state work together to staff the CHINS team, coordinated by the RSR Human Service Zone Director.

- November 2022 - Launched the statewide **Continuous Quality Improvement (CQI) program**, including creation of cross-zonal teams to collectively analyze performance

- 2023–2028 – Initiate **major IT project** to implement a modern technology platform that can better support the work of the State, Human Service Zones, and community partners in advancing child safety, permanency and wellbeing in ND. The replacement of FRAME/CCWIPS with OCEANS is a 5 year initiative, projected to be complete in 2028.

- July 2023 – Internal **dashboards** for state and Human Service Zone staff to increase ability to access timely data for a base set of core metrics. The dashboards rely on data as it is reported in the state's current child welfare technology system. While there are some data limitations, the dashboards offer – for the first time - data that is refreshed daily at a Zone level.

- July 2024 – Second set of internal **dashboards** HHS rolled out to each Zone with real-time access to summarized data related to the five child welfare measures included in the HSZ **Standards of Administration** monitoring tool.

- January 2025 – Human Service Zones Standards of Administration **Quarterly Snapshot** available to each Human Service Zone for the first time. The Quarterly Snapshot summarizes Zone-specific data that is also consistent across all Zones. Note: Measure 5 in the snapshot shows performance related to timeliness of face-to-face visits, which is the subject of SAO Finding 2023-03.

- Ongoing – HHS has continued to work with Human Service Zones to shift **staff from foster care to child protective services** wherever appropriate and possible. As of September 2024, there are approximately 115 authorized FTEs who serve as front line CPS workers and supervisors in NDs 19 HSZs.

    - Vacancy rates in CPS worker positions have historically averaged between 10-20% of all authorized positions at any given time. As of December 2024, 5% of authorized front line CPS positions are vacant.
    - Human Services Zones have worked diligently to recruit and retain child welfare team members, particularly CPS workers; consistent and creative recruiting practices are returning results as turnover has begun to decrease over the last couple of years.

RE: HHS State Audit Report for the Two-Year Period Ended June 30, 2023
Finding 2023-01: Workforce Retention Grants Not Monitored

Through American Rescue Plan (ARP) Section 9817, and in conjunction with the Federal Centers for Medicare and Medicaid Services (CMS), North Dakota's Health and Human Services agency was approved to dispense approximately $31.7 million through grants and pilot programs through a spending plan submitted to CMS in June of 2021.

One of the state's early Section 9817 Plan strategies focused on workforce availability and the impact workforce challenges have on access to services for people with disabilities. Recruiting and retaining well trained direct care staff to serve people's needs 24 hours per day, 7 days per week in geographies large and small is an ongoing challenge and consistently reported by the industry as a primary concern.

The "HCBS Workforce Recruitment and Retention Pilot" launched March 2022. (see Attachment A for guidance documents published for Agency providers and Attachment B for Individual providers)

- Program Duration: March 2022 (program guidance released) - October 2023 (last payment issued)
- Participating Providers: 61 agencies (28 DD, 33 AA) plus 525 individual QSPs (AA) and 417 individual DSPs (DD, Autism, and Medically Fragile self-directed)
- Workforce Impacted: 5,530 – approximately 4,588 individuals working for provider agencies and 942 working as individual providers
- Total dollars distributed: $7,899,914.76; $7,421,545.77 for retention and $478,368.99 for recruitment

In Summer 2023 HHS completed a mid-pilot report intended to evaluate how the state's HCBS providers had used the funds and what impact they saw from the pilot related to their ability to improve retention and recruitment of direct care workforce. The evaluation collected both qualitative and quantitative data through an online survey distributed to the 79 eligible agencies. (see Attachment C for copy of the 2023 evaluation report)

Note: The legislature also appropriated $2.5 million from the state's general ARPA State and Local Relief Funds allocation to allow HHS to operate a parallel workforce recruitment/retention program for direct care professionals working in Intermediate Care Facilities (ICFs) as these settings were not eligible for any programs funded through the Section 9817 HCBS initiative. HHS was able to weave these two funding sources together to create opportunities for providers to utilize workforce retention/recruitment incentives across a variety of setting types (see Attachment D for ICF direct care program guidance issued).

2022-23 Audit Report Follow Up

The State Auditor's Office (SAO) selected the HCBS retention element of the Section 9817-funded Workforce Retention and Recruitment Pilot as one of the initiatives it reviewed as part of the 2022-23 state audit.

In conducting its review, the SAO developed a "confirmation form" that was sent to a sampling of participating providers, to gather information directly from providers as to their use of funds.

The following is a summary of HHS' response to each of the items noted during the course of the SAO review.

Provider #1: A Spectrum of Care

SAO indciated that A Spectrum of Care paid 2 employees over the allowed $2,100 maximum.

- Employee A was paid $2,200, which is $100 over the allowed $2,100
- Employee B was paid $2,150, which is $50 over the allowed $2,100.

HHS sent findings and a recoupment letter to A Spectrum of Care on 10/23/2024 requesting the **recoupment of $150.00**. HHS received a check in the amount of $150.00 on 10/29/2024.

SAO Recommendation re Finding 2023-01 (2022-23 state audit):

We recommend DHHS identify whether there were other ineligible payments, and recoup funds for payments made to ineligible caregivers identified in this audit and through the Department's additional procedures.

We recommend DHHS develop ways to measure whether programs achieve the intended purpose.

HHS Management Response to Finding 2023-01:

The Department of Health and Human Services (HHS) agrees with the recommendation. HHS used Section 9817 funds from the American Rescue Plan Act to pilot a program supporting recruitment and retention of the direct care workforce in HCBS. At the time of the audit, the program was ongoing, and a post-implementation evaluation had not yet been completed. HHS will use gathered information to assess the program's efficacy and summarize lessons learned. HHS will follow its existing processes to recoup any funds not used according to program guidance, including those identified in this audit.

Provider #2: Anne Carlsen Center

SAO indicated that Anne Carlsen Center employees were not eligible for the retention incentive because they did not meet the eligibility requirements. The confirmation form Anne Carlsen Center returned to SAO indicated that 7 employees had worked less than 51% of their paid time in a non-institutional setting during the period for which the incentive was being requested.

HHS followed up with Anne Carlsen Center and verified that the above-noted individuals worked in an ICF (not an HCBS) setting and should have been paid under the ICF Workforce Retention incentive. HHS confirmed that these individuals had not already received payment under the ICF workforce retention incentive. HHS determined **no funds needed to be recovered**; HHS completed journal voucher entries to apply the payments made to the corrected program funding source.

HHS conducted an additional review of all retention payments made to Anne Carlsen Center (total of $300,300 paid to 172 employees). As part of this review HHS noted that 165 additional employees were not eligible for the HCBS retention incentive because they worked in an ICF setting and should have been paid under the ICF Workforce Retention Incentive. HHS confirmed that these individuals had not already received payment under the ICF workforce retention incentive. HHS determined **no funds needed to be recovered**; HHS completed journal voucher entries to apply the payments made to the corrected program funding source. HHS sent findings letter to Anne Carlsen Center on 10/31/2024.

Provider #3: Development Homes, Inc.
SAO indicated that Development Homes Inc. (DHI) had two areas of non-compliance.

- Employees were not eligible for the retention incentive because they did not meet the eligibility requirements. Development Homes, Inc. indicated on the confirmation form returned to SAO that one employee worked less than 25% of their paid time providing direct care supports or services to an individual who receives services via a state or federally funded HCBS program.

  HHS sent findings and a recoupment letter to Development Homes, Inc. on 10/13/2024 requesting the **recoupment of $2,000.00** for this finding, because the employee received an incentive not in accordance with program guidelines.

- Development Homes, Inc. was not passing all requested amounts through to employee caregivers, distributed incentive funds to administrative personnel or other personnel.

  HHS conducted a follow-up monitoring with Development Homes, Inc., and concluded that the "administrative personnel or other personnel" indicated on the confirmation form were Residential Habilitation Managers and Qualified Service Professionals; even though their "role" is not solely direct care, these staff did spend over 50% of their time with clients; and the ratio was even higher during the audit period. DHI verified on 11/8/2024 that each employee met the program requirements for providing direct care. HHS determined **no funds needed to be recovered** as the provider paid out the incentives according to guidelines.[1]

HHS conducted an additional review of all retention payments paid to Development Homes, Inc. (total of $251,000 paid to 182 employees). As part of this review HHS found that 2 additional employees were not eligible for the retention incentive because they did not meet the eligibility requirements. Employee A was paid $1,000 and Employee B was paid $1,000.

HHS sent findings and a recoupment letter to Development Homes, Inc. on 10/31/2024 requesting the **recoupment of $2,000.00** for this finding. A check in the amount of $4,000.00 was received 11/13/2024.

Provider #4: Helping Hands Care
SAO indicated that Helping Hands Care was not passing all requested amounts through to direct care employees, and that they had distributed incentive funds to administrative personnel or other personnel.

HHS followed up with Helping Hands Care, LLC and confirmed via e-mail on 4/17/2024 that the provider had mis-interpreted the intent of the SAO confirmation form. They had selected "other" for the two employees in question because their roles in the company are Owner and RN; however, these individuals did spend over 50% of their time with clients; the ratio was higher during the audit period.

Based on the additional information received, HHS determined that the payments were made within the program guidelines and **no repayment is required**. HHS sent findings letter to Helping Hands Care on 10/23/2024.[1]

---

[1] NOTE: HHS notified SAO prior to the finalization of the audit that a person with a job title of "administrative or other" may also provide direct care so it is not accurate to disallow a person soley based on their job title, however, no changes were made to the audit findings.

Provider #5: Pride, Inc.

SAO indicated that Pride Inc. was out of compliance in two areas.

- Employees were not eligible for the retention incentive because they did not meet the eligibility requirements. Pride, Inc. identified on the confirmation form returned to SAO that the sample of 10 employees worked less than 51% of their paid time in a non-institutional setting during the period for which the incentive was being requested.

  HHS followed up with Pride, Inc and confirmed that the provider had made an error in completing the confirmation form. Pride, Inc. is not licensed to provide ICF services; as such, all services provided by Pride, Inc are considered HCBS services. The provider marked 0-50% in error; Pride, Inc. did provide the State an updated confirmation form on 4/8/2024. [2]

  Based on the additional information received, HHS determined that the payment was made within the program guidelines **and no repayment is required**.

- Employee retention incentive exceeded program guidelines.
  - Employee A was paid $2,368.01, which is $268.01 over the allowed $2,100.

HHS conducted an additional review of all retention payments paid to Pride, Inc. (total of $285,312.30 paid to 196 employees). As part of this review HHS found that Pride, Inc. paid 1 additional employee more than the max payment of $2,100. Employee B was paid $2,100.01, which is $0.01 over the allowed $2,100.

HHS sent findings and recoupment letter to Pride, Inc. on 10/23/2024 requesting the **recoupment of $268.02.** Check in the amount of $268.02 was received 11/6/2024.

[2] NOTE: HHS notified SAO prior to the finalization of the audit that the provider indicated they completed the form incorrectly, however, no changes were made to the audit findings.

Summary

SAO selected 10 agency providers (80 employees) in the work they did to determine adherence to program guidelines. These 10 selected agencies employed 1,209 people who received retention incentives, which represents 26% of all agency employees benefitting from the program.

Five of the 10 providers surveyed by SAO were identified as having areas of non compliance (described in detail in the memo above). These five providers received a total of $865,637.30 in incentive payments for 577 employees. HHS' review of each circumstance presented, along with additional validations for the 3 largest providers with areas of potential non-compliance, indicated a need to recover a total of $4,418.02 in payments that were made in a manner that was not in compliance with program guidelines.

Agency Providers	Total incentive received	Total employees receiving incentive	Requested recoupment* / # employees affected	Recoupment as % of total incentive
Anne Carlsen Center **	$300,300.00	172	$0.00 / 0	0.00%
Development Homes, Inc. **	$251,000.00	182	$4,000.00 / 3	1.59%
Pride, Inc. **	$285,312.30	196	$268.02 / 2	0.10%
Helping Hands Care	$9,150.00	6	$0.00 / 0	0.00%
A Spectrum of Care	$19,875.00	21	$150.00 / 1	0.75%
SUBTOTAL – subset of sample with some indication of non-compliance	**$865,637.30**	**577**	**$4,418.02 / 6**	**0.51%**
ABLE, Inc.	$133,110.00	75	$0.00 / 0	0.00%
CHI Friendship	$361,441.90	188	$0.00 / 0	0.00%

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/16/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:30 a.m. Chairman J. Nelson called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Avel eCare
- Promotion/Prevention
- Early intervention
- Treatment
- Recovery
- Key principles
- Health School Grant
- Opioid Settlement Fund
- Vision
- Budget request

8:32 a.m. Mark Johnston, Director of Business Development, Avel eCare, presented an update on North Dakota's implementation.

8:44 a.m. Pam Sagness, Executive Director of Behavioral Health Division, Health and Human Services, testified and presented a division overview #29775.

9:23 a.m. Mark Johnston, Director of Business Development, Avel eCare, spoke to crisis care expansion.

9:24 a.m. Pam Sagness, Executive Director of Behavioral Health Division, Health and Human Services, testified and continued with testimony #29775, #29764, #29768, #29622

10:45 a.m. Laura Anderson, Policy Director of Behavioral Health Division, Health and Human Services, testified in favor of Certified Community Behavioral Health Clinics.

10:49 a.m. Pam Sagness, Executive Director of Behavioral Health Division, Health and Human Services, testified and continued with testimony #29775, #29633.

10:52 a.m. Antonia Berning Seilley, Director of Operational Development and Compliance of Behavioral Health Division, Health and Human Services, testified in favor

10:53 a.m. Pam Sagness, Executive Director of Behavioral Health Division, Health and Human Services, testified and continued with testimony #29775.

10:55 a.m. Dr. Ed Yabut, Medical Director, North Dakota State Hospital, Health and Human Services, testified in favor and presented an overview of services of the North Dakota State Hospital. #29775

11:08 a.m. Pam Sagness, Executive Director of Behavioral Health Division, Health and Human Services, testified and continued with testimony #29775.

11:30 a.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

NORTH [illegible]A BEHAVIORAL HEALTH WORKFORCE
LOGIC MODEL

PROBLEM	INTERVENING VARIABLE	STRATEGY	INTERMEDIATE OUTCOMES	LONG TERM OUTCOMES
Behavioral health workforce shortage (data)	1. Largely un-resourced committees or collaboratives focused on behavioral health workforce (no single entity responsible)	• Identify a single entity responsible to organize, plan, implement and monitor behavioral health workforce efforts	Resourced committees and/or collaboratives focused on behavioral health workforce	Behavioral health workforce is not in a shortage. (change in data)
	2. It is unknown if enough people entering behavioral health field to meet the need (colleges)	• Identify number of students entering and graduating in behavioral health and healthcare related fields in ND Universities/Colleges • Increasing interest among high school students and those entering college/career days	Increased number of people entering behavioral health field	
	3. Unknown capacity of ND Universities/Colleges for behavioral health workforce	• Identify programs/colleges/university options and capacity/number of the programs. • Host summit with universities, hosted by the Governor.	Known capacity of ND Universities/Colleges for behavioral health workforce	
	4. Unknown behavioral health workforce demand	• Determine the workforce demand (how many job postings/availability by profession) – survey current programs	Known behavioral health workforce demand	
	5. Not clearly defined career pathways or pipelines designed for those with no experience	• Assess current tuition assistance/financial support available. • Develop visual, documented paths (easy steps identified) to behavioral health careers – those starting career	Clearly defined career pathways or pipelines designed for those with no experience	
	6. Not clearly defined career pathways or pipelines designed for those with some healthcare experience	• Develop crosswalks for health/behavioral health professionals to enhance training. • Switching careers (peer support, social work, nurses, care coordination, etc.); retirees	Clearly defined career pathways or pipelines designed for those with some healthcare experience	
	7. Limited options for addiction training consortium	• Identify consortium capacity. • Expand addiction training consortium opportunities. • Development of a warm hand-off (colleges/ universities)/better awareness of training site options.	Increased options for addiction training consortium	
	8. Limited number of supervision sites and supervisors for licensing	• Identify capacity of supervision sites. • Identify bottlenecks and opportunities to ensure adequate number of supervision sites and supervisors by profession. • Development of a warm hand-off (colleges/ universities)/better awareness of training site options.	Increased number of supervision sites and supervisors for licensing	
	9. Licensure and certification complexities	• Conduct comprehensive review of licensure and certification requirements identifying barriers. • Identify opportunities to streamline licensure requirements across relevant boards for those seeking dual licensure. • Provide recommendations to licensing boards.	Streamlined licensure and certification requirements/processes	
	10. Licensure and certification reciprocity issues	• Conduct comprehensive review of licensure reciprocity. • Provide recommendations to licensing boards.	Additional reciprocity options for licensure and certification	
	11. Recruitment resources limited	• Research best practices and develop recommendations (i.e., loan repayment). • Develop and provide training and technical assistance resources.	Increased recruitment resources	
	12. Retaining quality behavioral health workforce	• Research best practices and develop recommendations. • Develop and provide training and technical assistance resources.	Quality behavioral health workforce is retained	
	13. Limited providers and access to services in rural communities	• Research best practices and develop recommendations (i.e., options for tele-health). • Develop and provide training and technical assistance resources.	Increased providers and access to services in rural communities	
	14. Underrepresentation of cultural-specific workforce (racially and ethnically diverse)	• Research best practices and develop recommendations. • Develop and provide training and technical assistance resources. • *Integrate with IV #6 work.	Representation of cultural-specific workforce (racially and ethnically diverse)	
	15. Difficulty with billing processes (business expertise)	• Research best practices and develop recommendations. • Develop and provide training and technical assistance resources.	Behavioral health providers have increased business/billing acumen	
	16. No certification/professional credential for prevention workforce	• Research best practices and develop recommendations.	Prevention professionals are certified	
	17. No certification/professional credential for mid-level workforce (care coordinators, rehab, etc.)	• Research best practices and develop recommendations.	Mid-level workforce is certified	

Consideration:

# of people interested in behavioral workforce	=	# Capacity of behavioral health professional training programs (at colleges/universities)	=	# Capacity of training sites	=	# of job opportunities

Acknowledgements

The Western Interstate Commission on Higher Education Behavioral Health Program (WICHE BHP) wishes to acknowledge the members of the North Dakota Behavioral Health Strategic Plan's Aim 7 committee for their leadership role in creating the plan for this project, and their time, energy, and commitment to the cause of moving forward the work on behavioral health workforce in North Dakota. WICHE BHP especially recognizes and thanks Rebecca Quinn, Mandi-Leigh Peterson, Heather Brandt, and Lacresha Graham for their crucial roles in giving direction and assistance to this project, and as the Aim 7 Committee's points-of-contact.

Aim 7 Committee:
Rebecca Quinn, Center for Rural Health, University of North Dakota
Mandi-Leigh Peterson, Healthcare Workforce Initiative, UND School of Medicine & Health Sciences
Lacresha Graham, Behavioral Health Division, Department of Health and Human Services
Heather Brandt, Behavioral Health Division, Department of Health and Human Services
Tami Conrad, Behavioral Health Division, Department of Health and Human Services
Stacy Kusler, Center for Rural Health- Primary Care Office, UND School of Medicine & Health Sciences
Karen Bernhardt, Center for Rural Health, University of North Dakota
Kalee Werner, Primary Care Office, Department of Health and Human Services
Laura Anderson, Behavioral Health Division, Department of Health and Human Services
Kurt Snyder, Heartview Foundation
John Butgereit, North Central Human Service Center
Sonja Bauman, Healthcare Workforce Initiative, University of North Dakota
Kelly Nagel, Systems and Performance, Department of Health and Human Services
(and Bevin Croft and Ebony Flint of the Health Services Research Institute)

Additionally, our sincere appreciation is extended to the dozens of key stakeholders and community members who contributed their time and input for stakeholder interviews, as well as the dozens of North Dakotans who gave of their time, expertise, and experience to participate in the North Dakota Behavioral Health Workforce Summit.

Background and Purpose

This report—*North Dakota Behavioral Health Workforce: Next Steps*—is the result of a collaborative project of the Aim 7 Committee, which was established through the North Dakota Behavioral Health Strategic Plan, and the Western Interstate Commission on Higher Education's Behavioral Health's Behavioral Health Program (WICHE BHP). The project included multiple objectives: research of past and current behavioral health workforce efforts in North Dakota ("discovery report"); conduct key stakeholder interviews; plan and host a Summit with community stakeholders; and, the reporting of a draft strategic plan and recommendations. This *Next Steps* report is the culmination of all of these objectives.

The Discovery

Behavioral Health Strategic Plan and Aim 7 Committee

For the past 15-plus years, behavioral health and workforce stakeholders have sought to understand and improve the behavioral health workforce situation across North Dakota. As early as 2007, North Dakota's behavioral health workforce stakeholders gathered in Bismarck at a Search Conference to discuss the workforce issues then faced. A report prepared by the Schulte Group in 2014 also included issues related to the behavioral health workforce. In 2015 and 2016, the state conducted a behavioral health assessment process resulting in a comprehensive report on gaps and related recommendations. From that report, the state acknowledged the need for a focus on behavioral health workforce and then conducted a thorough discovery and development of a behavioral health strategic plan in 2018. This first iteration of the plan included 13 goals (or "aims"), with the seventh one directed to addressing the behavioral health workforce gaps and needs identified.

Exhibit 1. Thirteen Categories from North Dakota Behavioral Health System Study

APRIL 2018 BEHAVIORAL HEATLH SYSTEM STUDY

Served as a component of interim legislative committee studies during the 65th Legislative Interim.
This report presents the findings from the North Dakota Comprehensive Behavioral Health Systems Analysis, conducted by the Human Services Research Institute (HSRI) for the North Dakota Department of Human Services' Behavioral Health Division.

The 250-page report provides more than 65 recommendations in 13 categories. This set of recommendations is intentionally broad and far-reaching; it is not expected, nor suggested, that stakeholders in North Dakota endeavor to implement all these recommendations at once.

1. Develop a comprehensive implementation plan
2. Invest in prevention and early intervention
3. Ensure all North Dakotans have timely access to behavioral health services
4. Expand outpatient and community-based service array
5. Enhance and streamline system of care for children and youth
6. Continue to implement/refine criminal justice strategy
7. Engage in targeted efforts to recruit/retain competent behavioral health workforce
8. Expand the use of tele-behavioral health
9. Ensure the system reflects its values of person-centeredness, cultural competence, trauma-informed approaches
10. Encourage and support the efforts of communities to promote high-quality services
11. Partner with tribal nations to increase health equity
12. Diversify and enhance funding for behavioral health
13. Conduct ongoing, system-side data-driven monitoring of needs and access

The Aim 7 goal was to: "Engage in targeted efforts to recruit and retain a qualified and competent behavioral health workforce." Within Aim 7 in the 2018 Final Report, the following were the recommendations:

7.1 Establish single entity for supporting workforce implementation (Short Term)
7.2 Develop single database of statewide vacancies for behavioral health positions (Short Term)
7.3 Provide assistance for behavioral health students working in areas of need in the state (Short & Long Term)
7.4 Raise awareness of student internships/rotations (Short & Long Term)
7.5 Conduct comprehensive review of licensure requirements/reciprocity (Short Term)
7.6 Continue establishing training/credentialing program for peer services (Short Term)
7.7 Expand credentialing programs to prevention/rehabilitation practices (Short & Long Term)
7.8 Support a robust peer workforce through training, professional development, competitive wage (Short & Long Term).

As the work progressed and some recommendations were completed, Aim 7 was revised and updated to reflect both the progress made and other needs having been identified since the publishing of the report in 2018. By April 2021, the committee and stakeholders had accomplished 13 percent of the objectives within the Aim. By October of that year, 40% of the objectives were achieved.

By April 2022, 75% of the work assigned under Aim 7 had been accomplished. Revisions were made to the Aim, changing from five goals and 15 objectives to 12 Action Steps, three Goals, and six Objectives.

Exhibit 2. Aim 7, October 2021 Dashboard

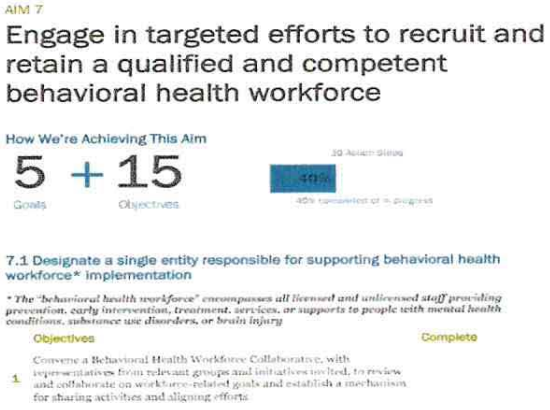

Exhibit 3. Aim 7, April 2022 Dashboard

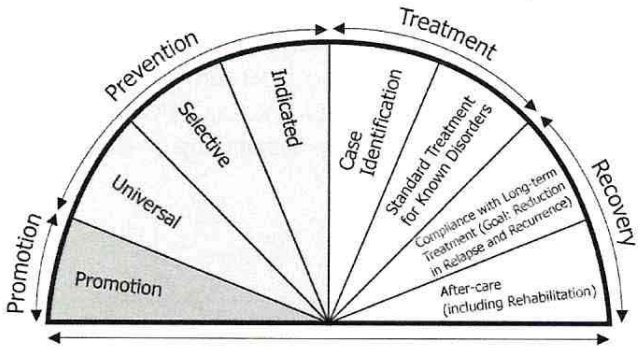


The prior action step of convening a Behavioral Health Workforce Collaborative remained. Notably, the first objective (7.1) had an additional action step added: "Select a contractor with expertise in Behavioral Health Workforce to facilitate a Behavioral Health Summit." Between May and September 2022, the Aim 7 committee worked with WICHE BHP to review the behavioral healthcare workforce efforts to date; design and plan for the Summit; and, participate in—and recommend others to participate in—key stakeholder interviews.

The committee spent significant time developing the agenda with WICHE BHP, with an emphasis on ensuring that there was sufficient opportunity for attendees to learn about current and past behavioral healthcare workforce efforts throughout the state, and also to provide input from their organizational or community perspectives. Additionally, the committee sought to allow for enough time in the agenda to allow for a framework for a strategic plan to develop, while also respecting attendees' time and energy by keeping the Summit to 12 hours over a two-day span.

Key Stakeholder Interviews

Interviews were held over the summer and early autumn. Key stakeholders represented a cross-section of North Dakota, including community- and state-based providers, mental health and substance abuse services, organizational position, and geography. These interviewees also represented every component of the continuum of care, from promotion through recovery. All interviews were conducted virtually, with some as one-on-one and others in groups, at a date and time chosen by the interviewees. Most interviews were an hour in length, although a few exceeded that timeframe, and a few were limited to 30 minutes. Interviewees were asked four broad questions: 1) What is top of mind when it comes to North Dakota's behavioral health workforce?; 2) What information and data best informs their perspective(s)?; 3) What one change would they make to either improve the behavioral health workforce environment or to mitigate known problems?; and, 4) Who else should be interviewed?

A multitude of perspectives and information were gained from these interviews. Seemingly no specific behavioral health workforce issue was left unidentified; taken as a whole, every aspect of the continuum was discussed, from promotion through recovery. Issues were broadly identified as the following:

- ✓ Primary/secondary student recruitment to behavioral health workforce
- ✓ Funding for services and workforce initiatives
- ✓ Career pathway development
- ✓ Career satisfaction
- ✓ Competition for workforce between organizations
- ✓ Internship and supervisory costs
- ✓ Loan repayment
- ✓ Data
- ✓ Occupational licensing boards capacity and coordination
- ✓ Scope of practice and credentialing
- ✓ Executive and legislative, statewide, state-to-local, local-to-local cooperation and coordination

These issues fell into four broad categories:

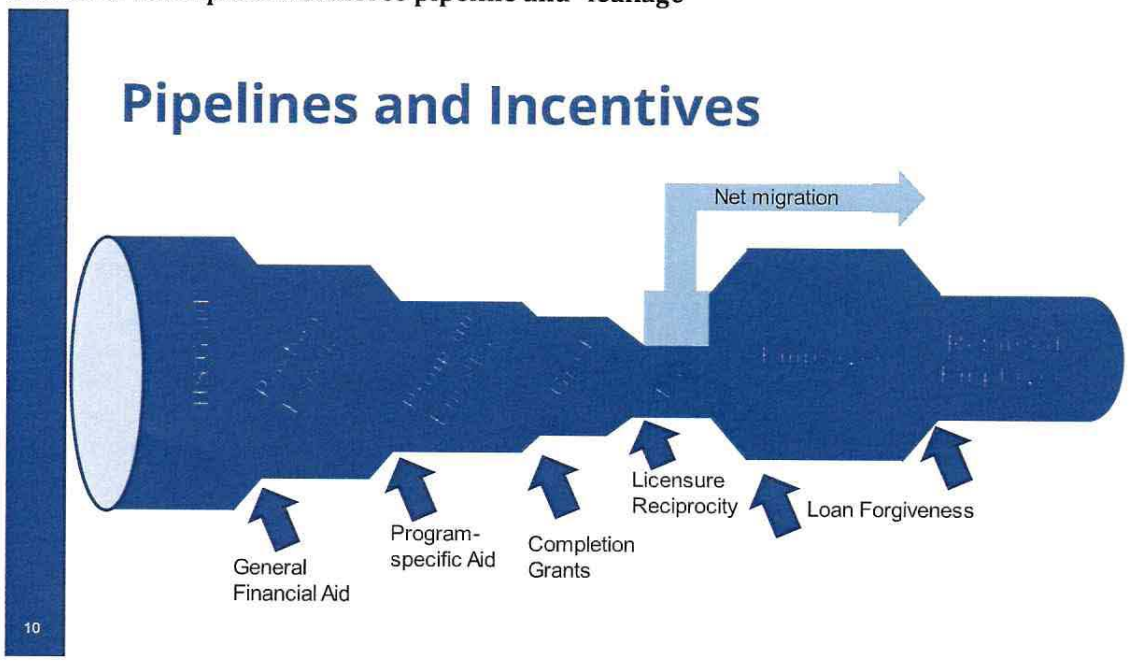
1. Collaboration, coordination, integration
   a. Strategy development and implementation infrastructure
   b. Data, including on varying initiatives and costs
   c. Accountability for decisions, gathering feedback, measuring impact
2. "Pipeline" and workforce recruitment and retention programs
3. Licensure, credentialing, and certification
4. Funding, capacity building, and other resources

The Summit

The Summit was held on September 25 and 26 in Bismarck. The Summit was open to all in the community, with key stakeholders contacted individually as necessary to ensure their participation. Across the two days, there were over 60 attendees hailing from all areas of the state. The intent of the Summit was threefold: 1) Review past and current (or anticipated) behavioral health workforce efforts; 2) Learn of behavioral health workforce efforts from other states; and, 3) Identify specific action steps toward creating a strategic plan.

There were five distinct "desired outcomes" for the Summit:

Desired Outcome #1: Prioritized list of workforce issues
Desired Outcome #2: Agreement on a consolidated list of prioritized work force issues
Desired Outcome #3: A list of workforce issues recommendations with respective recommendation action steps
Desired Outcome #4: Agreement on a consolidated list of work force issues recommendations with respective recommendation action steps
Desired Outcome #5—Agreement on Next Steps: A process for development of a draft strategic plan, drawing from this Workforce Summit's work products:
○ Workforce issues
○ Workforce issues recommendations with respective recommendation action steps



The agenda was designed to provide both sufficient time as a whole group to learn and raise issues, as well as small group opportunities for more in-depth discussion. Further, the agenda was tailored to offer strategic planning frameworks, including those in use by North Dakota in other efforts and from other states, such as the Behavioral Health Workforce Employment and Training project out of Plymouth State University.

Importantly, participants were guided toward identifying overarching categories, goals, objectives, and action steps. Emphasis was placed on answering as many of the following questions as possible about these recommendations and action steps: Who, When, Why, Where, and How. In particular, the breakout groups were asked to consider and identify timeframes for each of these levels and the 'who'. That is, to give some thought to the entity or entities, or groups that should lead and/or implement these action steps. All of the

Summit documents, including key reference material (e.g., North Dakota Behavioral Health Strategic Plan), were uploaded to an unique website for participants and the general public to access: **https://www.wiche.edu/policy-research/data-resources/north-dakota-behavioral-health-materials/**.

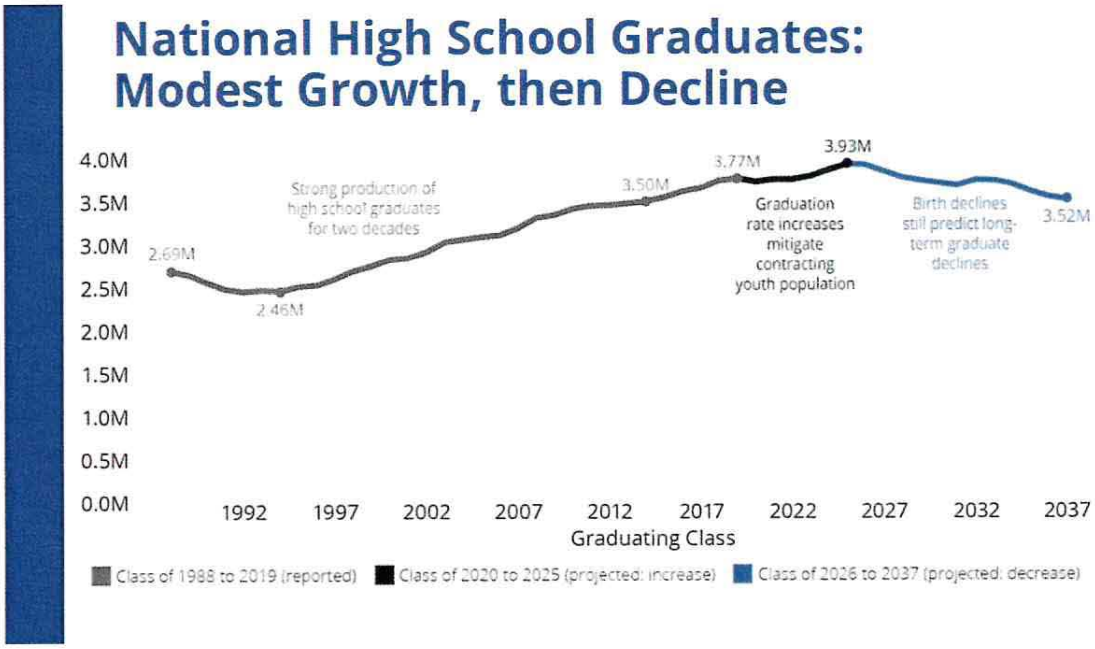
WICHE BHP presented data on the overall workforce environment across the WICHE states from a higher education and 'pipeline' perspective. Participants reviewed data showing areas of challenge and opportunity in North Dakota. Information presented showed that North Dakota, while faced with declining enrollment and completion rates as are neighboring states, also had possible competitive advantages.

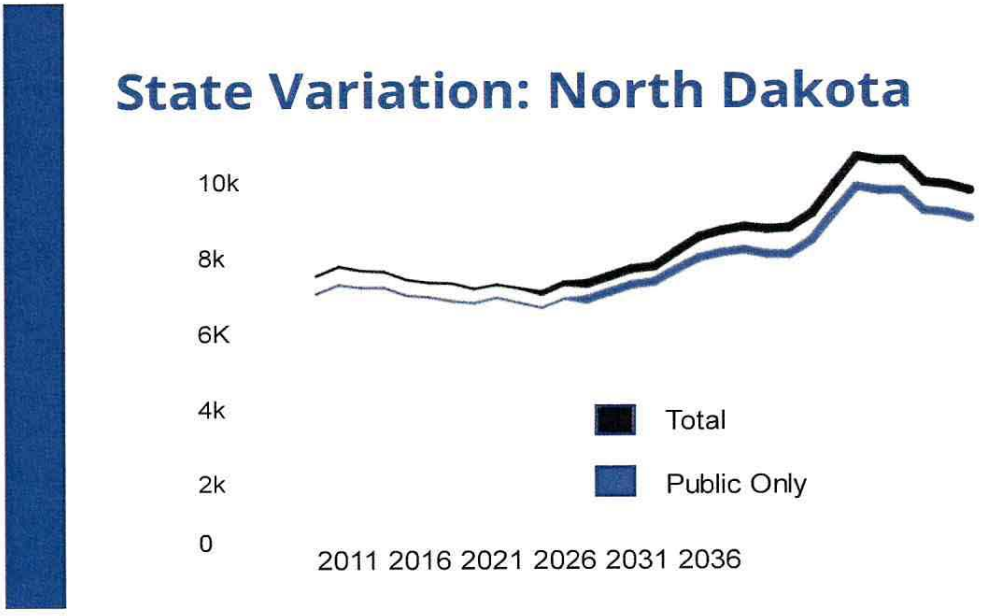
Exhibit 4. Conceptual workforce pipeline and "leakage"

North Dakota is showing an increase in the population that is becoming workforce eligible, a result of the early-century oil boom and aging of children born since—an increase not seen in its neighbors.

These high school graduates are not the only source of potential behavioral health postsecondary students—adults increasingly make up a big chunk of postsecondary enrollees. However, they are representative of a potential source of employees for the behavioral health workforce. This trend is slightly different in North Dakota (below); however, the trend accelerates later but is steeper and longer.

Exhibit 5. National High School Graduation Rates





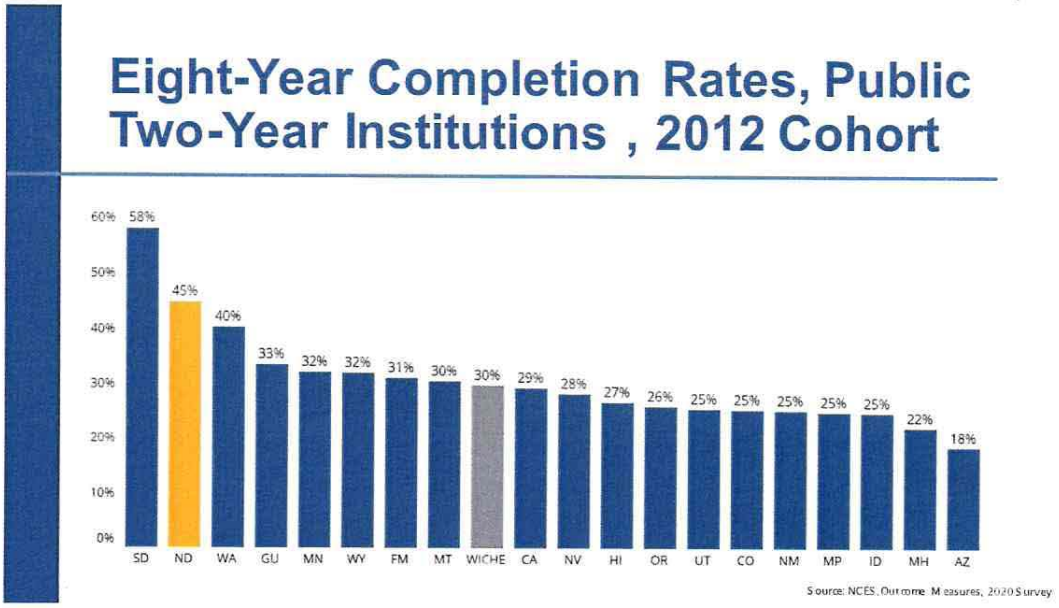


Exhibit 6. North Dakota High School Graduation Rates

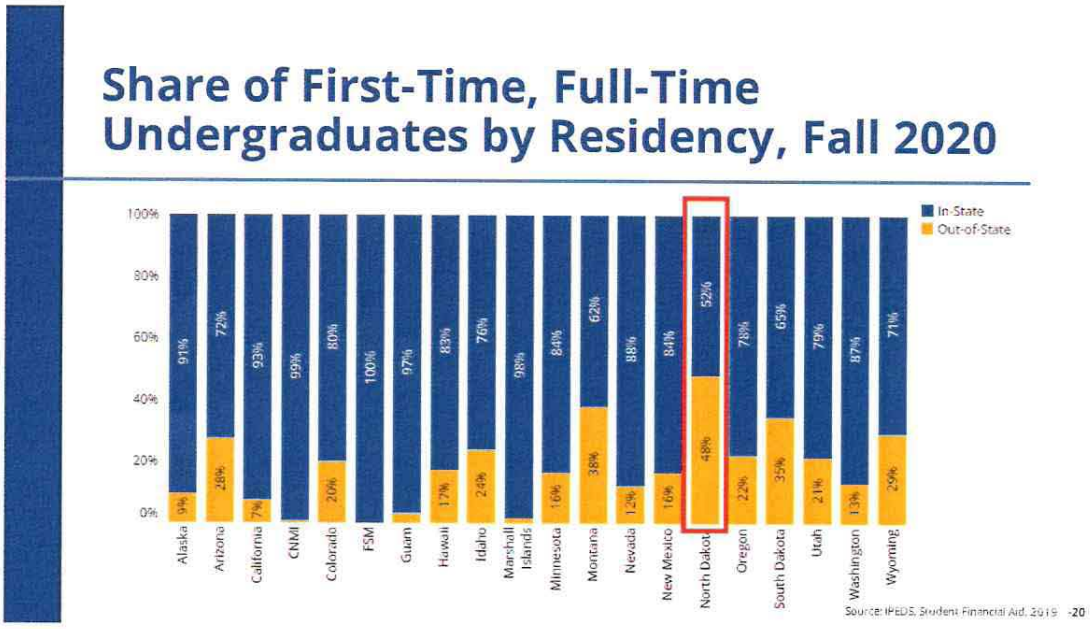
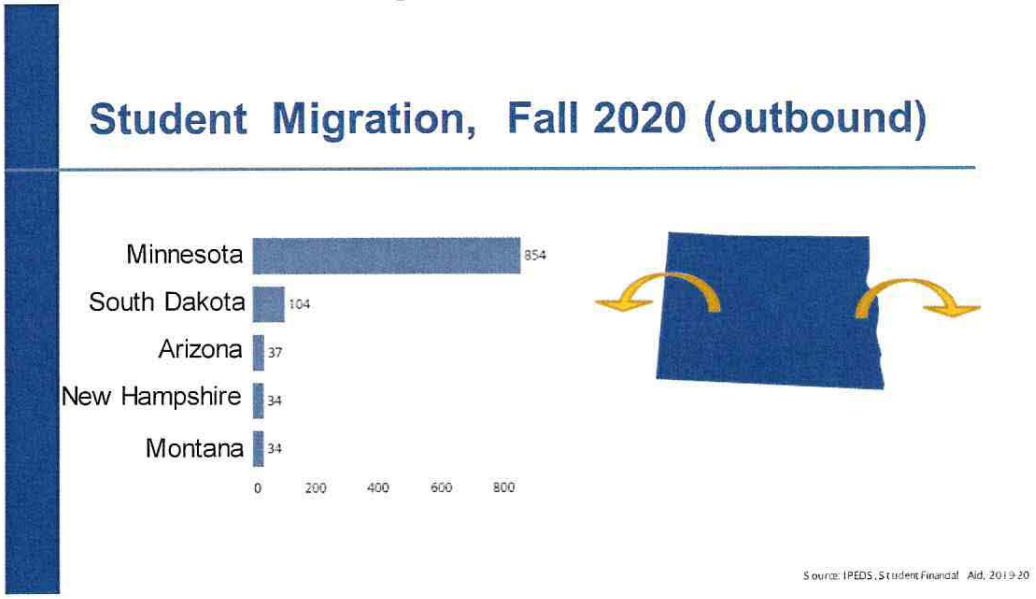


North Dakota is also witnessing a higher completion rate for two-year institutions than all but South Dakota in the western U.S.:

Exhibit 7. North Dakota High School Graduation Rates



A challenge noted, however, is that North Dakota has a lower percentage of undergraduates who reside in North Dakota:

Exhibit 8. Residency of Undergraduates, Fall 2020

And while Minnesotans comprise the vast majority of student in-migration to North Dakota for college, they also are the largest number of students migrating out of North Dakota after graduating.

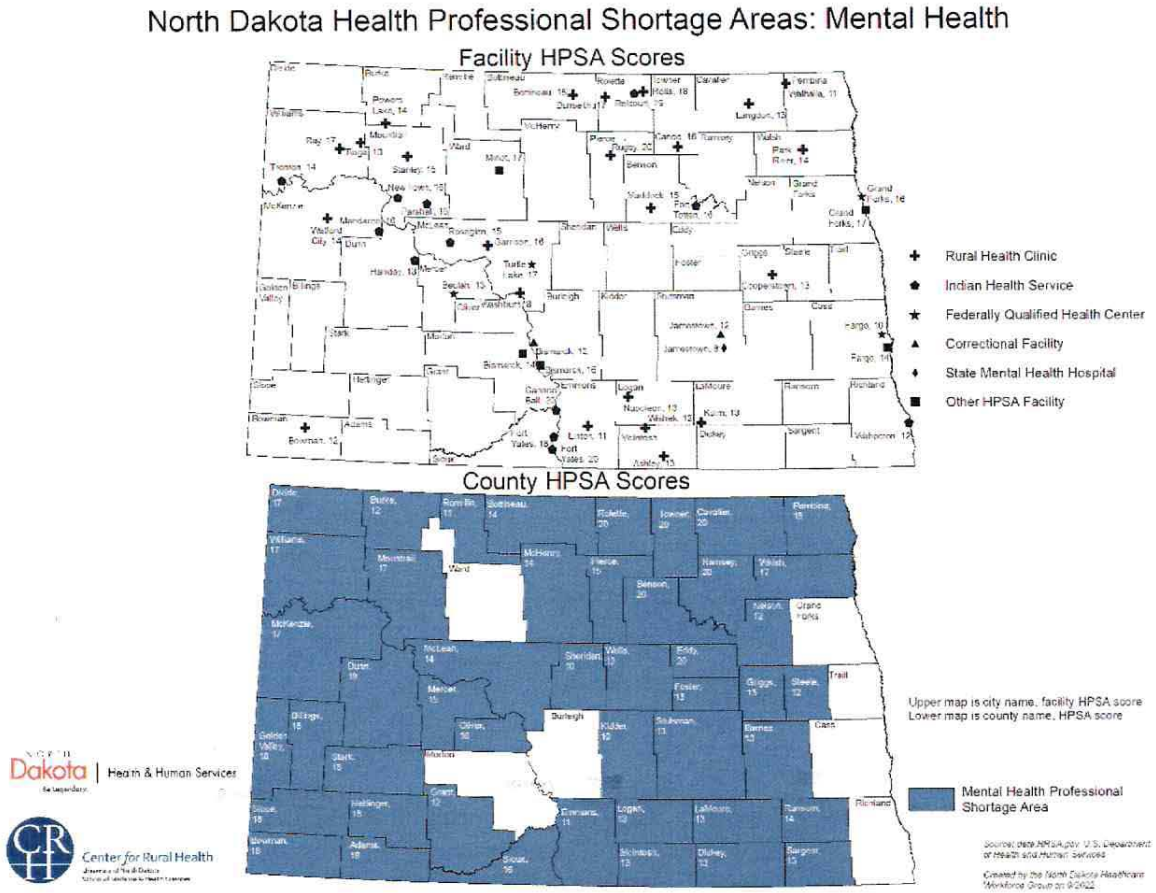


Exhibit 9. Student Outbound Migration

National and North Dakota Behavioral Health Professionals Data

Information was presented touching on some of the behavioral health professional trends and projections in North Dakota and nationally. Several of the maps contained in *The Behavioral Health Workforce in North Dakota: A Status Report, Behavioral Health Workforce Implementation Plan, Sixth Biennial Report (2021)* were presented, including this one displaying the vast parts of North Dakota considered Health Professional Shortage Areas (Exhibit 10):

Exhibit 10. Health Professional Shortage Areas—Mental Health

According to the Health Resources and Services Administration's National Center for Health Workforce Analysis (Exhibit 11):

"Between 2017 and 2030, the total supply of all psychiatrists is projected to decline as retirements exceed new entrants. Rapid growth in supply of psychiatric nurse practitioners and psychiatric physician assistants may help blunt the shortfall of psychiatrists, but not fully offset it. In 2030, the supply of these three types of providers will not be sufficient to provide any higher level of care than the national average in 2017, which does not fully meet need….

Further, the results here illustrate that the nation is producing many social workers trained at the master's level…modeling results suggest that if current trends continue, the overall national supply of social workers will grow rapidly and through 2030 should be more than sufficient to meet demand. However, the role of social workers in care delivery continues to evolve. To the extent that the nation relies greatly on social workers in a patient-centered medical home model that better integrates behavioral health and primary care, the increase in demand for social workers could be substantially higher than the projections in this report."

Exhibit 11. HRSA Behavioral Health Workforce Projections

	Adult Psychiatrists	Child & Adolescent Psychiatrists	Nurse Practitioners	Physician Assistants	Psychologists	Social Workers	Marriage & Family Therapists	Addiction Counselors	Mental Health Counselors	School Counselors
Supply [a]										
Estimated supply, 2017	33,650	8,090	10,450	1,550	91,440	239,410	53,080	91,340	140,760	116,080
New entrants, 2017-2030	10,270	5,000	9,520	1,770	49,400	367,520	39,190	33,300	72,860	158,440

Total Growth, 2017-2030	(6,630)	1,740	6,450	1,340	12,000	273,960	19,570	2,540	23,560	102,050
% growth, 2017-2030	-20%	22%	62%	86%	13%	114%	37%	3%	17%	88%
Demand										
Estimated demand, 2017	38,410	9,240	10,450	1,550	91,440	239,410	53,080	91,340	140,760	116,080
Projected demand, 2030 [d]	39,550	9,190	12,050	1,670	95,600	268,750	57,970	105,410	158,850	119,140
Total growth, 2017-2030	1,140	(50)	1,600	120	4,160	29,340	4,890	14,070	18,090	3,060
% growth, 2017-2030	3%	-1%	15%	8%	5%	12%	9%	15%	13%	3%
Adequacy of Supply, 2030										
Total Projected Supply (minus) Demand	(12,530)	640	4,850	1,220	7,840	244,620	14,680	(11,530)	5,470	98,990

Notes: All numbers reflect full time equivalent (FTEs); Numbers presented are rounded to the nearest ten and may not sum due to rounding; Negative numbers are in parenthesis;

[a] For all professions except psychiatrists, the model assumes that demand and supply are equal in 2017.

[b] Includes retirements and mortality.

[c] For example, changes from full-time to part-time hours, or vice versa.

[d] Demand growth reflects changing demographics.

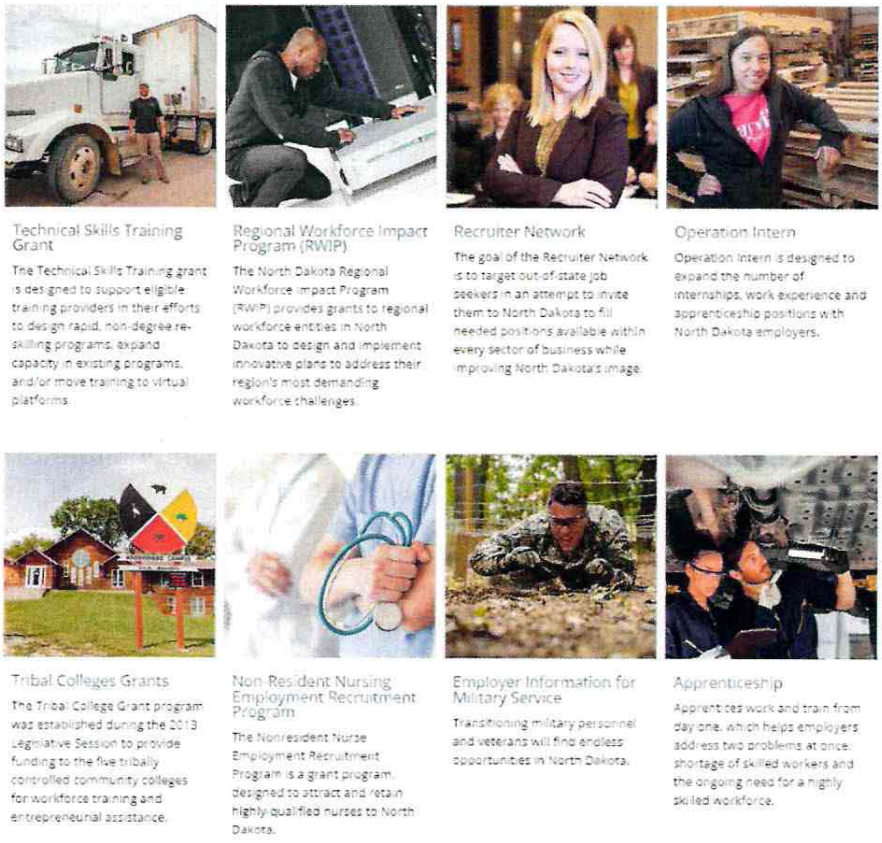
Best Practices

Summit participants were provided with ideas and considerations that have been found important in other states' successful workforce efforts and that should be addressed regarding North Dakota behavioral health workforce efforts:

- Where workers are needed rarely coincides with where workers are educated and trained
- Typical recruitment strategies for professionals focus at the end of the pipeline, or post-graduation, and seek to entice relocation
- Too often higher education views rural/remote learners as "place bound" and not as "community or place committed"
- Need to seek ways to engage place committed learners, extend education and training opportunities to them, and develop local workforce where they are needed

Examples from other states included a 2 + 2 degree initiative (Northern Mariana Islands and University of Alaska-Anchorage), providing degree opportunities while leveraging community-committed students who are far more likely to return home to provide services; Community Behavioral Health Aide credentialing in both Alaska and Minnesota, career development options for extending both the professional career pathway and serving rural and tribal areas that have less access to services; and, the Future Health Professionals program, formerly known as Health Occupations Students of America

(HOSA), that promotes careers in all health fields and that is currently in operation in North Dakota.



Behavioral Health Workforce Initiatives

A number of relevant existing workforce initiatives and various health- and workforce-related plans were noted. These included the Department of Commerce's efforts and the Workforce Development Council, and the State Health Improvement Plan. The Department of Health and Human Services' workforce-related initiatives were also presented:

- 1915i State Plan Amendment: Grants for providers to bill for Medicaid
- Peer Support Services: Certified Peer Support Specialist I and II
- Partnerships for Success: Ensuring trained workforce in prevention
- Free Through Recovery and Community Connect: Peer Support Specialists and Care Coordinators

Other workforce initiatives were discussed. Among these was the North Dakota Primary Care Office's various loan repayment programs: North Dakota Health Care Professional Student Loan Repayment Program, Federal State Loan Repayment Program (SLRP), and National Health Service Corps (NHSC). Also discussed were the workforce programs:

Exhibit 12. North Dakota Department of Commerce Workforce Initiatives

Legislative committee work and legislation was presented. A sample of the recent bills and committee work included (adapted from the *Legislative Bills and Studies Relating to Behavioral Health Workforce*, https://www.ndlegis.gov/files/resource/committee-memorandum/23.9173.01000.pdf):

"Senate Bill No. 2018 (2021) - Appropriation of $250,000 from the general fund to the Department of Commerce in the grants line item for the rural health care grant program to provide matching funds to an organization assisting in the recruitment, distribution, and supply, and enhancing the quality and efficiency of personnel providing health services in rural areas of the state.

Senate Bill No. 2125 (2021) - Relating to the health care professional student loan repayment program.

House Bill No. 1018 (2019) - Appropriation of $200,000 from the general fund, designated from the discretionary funds line item, to the Department of Commerce for the rural health care grant program to provide matching funds to an organization assisting in the recruitment, distribution, and supply, and enhancing the quality and efficiency of personnel providing health services in rural areas of the state.

Senate Bill No. 2143 (2019) - Relating to the health care professional student loan repayment program.

Senate Bill No. 2236 (2019) - Relating to licensure and regulation of behavior analyst professionals and the regulation of applied behavioral analysts of psychologist examiners and to the Board of Integrative Health Care.

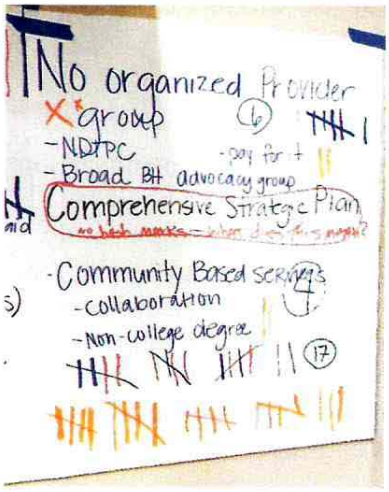
Senate Bill No. 2339 (2019) - Relating to qualification for addiction counseling licensure for an applicant licensed in another jurisdiction.

Senate Bill No. 2361 (2019) - Relating to the licensing of social workers.

Human Services Committee (2019-20 Interim)
Implementation of Behavioral Health System Study Recommendations
The committee studied the implementation of the recommendations of the HSRI study of North Dakota's behavioral health system. The committee received updates regarding the status of implementation of recommendations included in the HSRI study of the state's behavioral health system. The Behavioral Health Planning Council, in conjunction with behavioral health stakeholders, is coordinating the development of a strategic plan to implement the recommendations.

Acute Psychiatric Treatment Committee (2021-2022 Interim)
In September 2021, DHS and HSRI provided a report regarding the implementation of the recommendations from the HSRI report through July 2021. Of the 13 aims identified in the HSRI report, Aim 7 relates to the engagement in targeted efforts to recruit and retain a qualified and competent behavioral health workforce. Through July 2021, HSRI has

completed 20 percent of this aim. The estimated completion date for this aim is the end of June 2022."



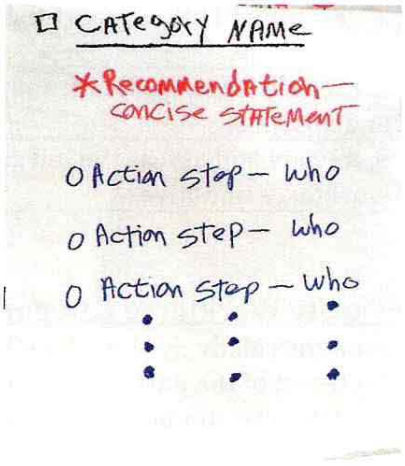
Pre-Summit WICHE BHP System-Level Recommendations

At the Summit, WICHE BHP offered three system-level recommendations for consideration and to serve as a potential starting point for discussion. These recommendations were based on the information gathered throughout the summer. And, perhaps as importantly, they are founded on recommendations that have been proposed across various workforce efforts. These efforts include the Behavioral Heath Strategic Plan, *Behavioral Healthcare Workforce Solutions in North Dakota: Improving Access to Care, The Behavioral Health Workforce in North Dakota: A Status Report, Behavioral Health Workforce Implementation Plan, Sixth Biennial Report (2021): Health Issues For The State Of North Dakota,* and *Behavioral Health Workforce in North Dakota: Education Requirements, Licensing Requirements, and Licensed Professionals*:

1. Create a collaborative task force—or identify and enhance an existing collaborative—to: a. Oversee and implement a state-level behavioral health workforce strategic plan. b. Coordinate, integrate, and communicate behavioral health workforce-related initiatives and efforts, including strategic planning at the regional and local levels. c. Evaluate, and be accountable for, strategic plan outcomes. ▪ Establish as time limited. ▪ Conduct a network mapping exercise to identify existing resources (human, financial, infrastructure) and any gaps. ▪ Sufficiently support the collaborative effort, especially with appropriate staffing levels.
2. Identify and coordinate and/or integrate workforce relevant data collection, reporting, and analysis.
3. Review and assess the full costs to agencies and providers to implement strategic workforce initiatives.

Priority Workforce Categories

Given the relatively short length of the Summit and the diversity of organizations and areas of interest of the participants, direction was provided to first focus on identifying and adopting a recommendation about which categories of behavioral health workforce should be prioritized. These categories, which were to be developed further with goals, objectives, and action steps, are representative of what was at the top of mind for the group, and, in a general sense, align with what key interviews revealed. In some cases, one or more breakout groups went deeper or were more detailed with one or more of the categories. The participants did not rank order or prioritize these categories, although the timing of the implementation of some of the recommended objectives was discussed.



After the first round of breakouts on the first day, there were 20 sheets of potential categories and possible goals, objectives, or action steps. The participants spent the last plenary session reviewing the work of the breakout groups, including asking questions and clarifying individual items. At the end of the first day, participants cast votes to indicate which of the items they thought most relevant, pressing, or achievable. WICHE BHP facilitators counted the tallies, and combined votes across similar items. At the beginning of the second day, participants were presented with the revised recommended categories.

The following are the six Priority Categories that were adopted, although it is important to note that these were not set in a priority order:

Recommended Priority Categories	**1. Licensure**
	2. Retention
	3. Recruitment
	4. Community-based Services
	5. Reimbursement
	6. Marketing/Branding/Communication

Proposed Workforce Action Steps

After adopting the six Priority Categories, the Summit continued with participants spending the bulk of the day in breakout groups reviewing, discussing, clarifying, and agreeing to specific recommendations within each category. Again, participants were encouraged to consider the previously discussed strategic planning components, including taking a "systems thinking" approach that would allow for strategies that address all points along the continuum of care. Where possible, participants were encouraged to identify who—agencies, groups, individuals, communities, etc.—would take the lead on any individual action steps.

After almost four hours of breakout groups, participants reconvened to review and discuss the work products. The group identified 30 individual recommendations. Each Priority Category included at least one recommendation; however, the constraints of the Summit—limited time and a diverse participant group—meant a range of individual recommendations from one to nine. The following are the recommendations by Priority Category:

Priority Category	*Proposed Action Steps*
1. Licensure	1.1 Standardize and make consistent behavioral health workforce policies and practices across licensing boards
	1.2 Identify opportunities to streamline licensure to advantage of emerging workforce trends, e.g. retirees.
2. Retention	2.1 Encourage, incentivize, and innovate collaborations, such as job sharing and shared supervision, across behavioral health agencies and providers
	2.2 Create a workforce culture that is supportive of behavioral health
	2.3 Improve organizational leadership, culture, and training capacities
	2.4 Assist community provider agencies in creating engaging work environments
3. Recruitment	3.1 Create a workforce pipeline that can be utilized in all areas of the state
	3.2 Identify, design, and market a behavioral health workforce-specific career pathway
	3.3 Create a behavioral health workforce scholarship program for North Dakota residents
4. Community-Based Services	4.1 Enhance, address length, and on-going funding of training for non-licensed services
	4.2 Provide funding for innovation and program flexibility for rural and tribal areas
	4.3 Review and consolidate qualifications and disqualifications for peer support and care coordination positions across programs
	4.4 Create and enhance apprenticeships and work-based learning opportunities
	4.5 Consider mirroring Home and Community Based Services cost supports for rural and tribal areas

	4.6 Utilize the 'designee model' of SSI/SSDI to increase pathways for entrance into behavioral health professions
	4.7 Identify and coordinate on local level costs regarding workforce competition
	4.8 Integrate services into existing behavioral health services and systems
	4.9 Designate a behavioral health organization to coordinate services
5. Reimbursement	**5.1 Identify current reimbursement needs, including gaps in service and full provider costs**
	5.2 Ensure full reimbursement for state-funded services
	5.3 Move licensed professions to 100% reimbursement rate
	5.4 Enhance or ensure adequate reimbursement for administrative, legal, and other behavioral health service costs to participate in programs
	5.5 Provide outreach and engagement to rural and tribal areas and organizations
	5.6 Clarify which services and professions can bill and for which programs
6. Marketing/Branding/ Communication	**6.1 Review the Aim 7 committee structure, needed resources, and potential future role(s)**
	6.2 Create a community-based behavioral health workforce backbone organization
	6.3 Implement a systemic, data-driven approach to identifying workforce development needs, including fielding of needs and gaps and a workforce pipeline analysis
	6.4 Consider creation of a statewide organization representing providers
	6.5 Coordinate behavioral health workforce efforts with current allied health and overall workforce efforts
	6.6 Convene behavioral health stakeholders for a statewide workforce conference

The Strategic Plan

Key Takeaways, Recommendations, and Next Steps

The behavioral health community in North Dakota has been improving the workforce situation in the state for decades. This has happened, and continues to this day, even in the face of local and national workforce and behavioral health trends that have complicated, if not negatively impacted, the workforce environment, including population changes, the impact of the SARSCoV2/COVID-19 pandemic, and economic conditions. Because of this history and the accompanying track record of success, the community and the state are well-positioned to take the next steps to address behavioral health care workforce issues faced in 2022 and beyond.

And in fact, in the time between the conclusion of the Summit and the drafting of this report, some of the priority workforce action steps identified are under consideration or have been initiated, including some that are part of, or will be impacted by, larger, related efforts such as changes to licensing boards and changes to the Workforce Development Council. There is momentum; and the Summit and this overall project should serve as additional and crucial energy to enhance current and future efforts.

To that end, the following represent WICHE BHP's key takeaways, recommendations, and next steps based on research, key interviews, and the results of the Summit. A number of these were either known or suspected prior to the Summit but then became clearer and validated afterward.

Key Takeaways

A. There is a visible and tangible commitment from a diverse, statewide community of interest to addressing behavioral health workforce issues.
B. Planning, design, strategy, leadership, and implementation of workforce initiatives are reliant on a relatively small number of dedicated people, organizations, and agencies (especially the Aim 7 Committee, the Division of Behavioral Health, and the Center for Rural Health).
C. Care and intentionality must be given to the behavioral health workforce needs of, and impacts on, local communities, particularly in rural and tribal areas.
D. As well, initiatives must maintain a focus on how impacts are felt across the state with an eye toward a comprehensive, multi-level, systemic approach.
E. There remain important similarities and differences between mental health and substance use/substance abuse/addiction workforce fields, as well as between public and private services and providers.
F. Any initiatives must be designed to have an impact throughout the 'pipeline'—from primary school through retirees/career changers—and across the entire continuum of care—from promotion, to prevention, to early intervention and through treatment and recovery.
G. Leveraging existing efforts, initiatives, and collaboratives by adding or enhancing behavioral health workforce components will be a crucial strategy on achieving both short- and long-term meaningful change and improvement.

H. Sufficient resources, including funding and capacity building across varied agencies, organizations, and communities of interest will be critical to achieving success in any efforts.
I. Time is of the essence to take advantage of—or mitigate against—overall workforce and employment trends.

WICHE BHP Recommendations

Based on the results of the Summit and the work conducted through the summer, the following represent WICHE BHP's priority recommendations for North Dakota. The recommendations made and refined at the Summit align well with the results of the key interviews and with previous workforce efforts. Further, these recommendations are only possible due to the progress made over the past six years. It is important to note that these recommendations are WICHE BHP's best advice on prioritizing the 30 recommendations adopted at the Summit, and that the state and community should seek to achieve as many of the Summit recommendations as is appropriate. Lastly, these recommendations have contingencies and dependencies, both across these four and the 30 Summit Proposed Action Steps; some cannot be implemented before another, others will only work if two or more are implemented at the same time.

1. *Fully fund and resource a 'backbone' organization to lead behavioral health workforce initiatives in North Dakota.*

This recommendation has existed in different forms in various North Dakota behavioral health strategic planning documents, reports, and studies. As noted above in *Key Takeaways*, it is glaringly obvious that the success to-date of workforce initiatives has relied heavily on an array of largely unresourced committees or collaboratives, or on individual organizations and individuals. Future success in the current challenging workforce environment will require a comprehensive, strategic approach. As such this recommendation is foundational to any medium- to long-term workforce efforts; capacity must be built and enhanced to achieve lasting impacts. From the pre-Summit WICHE BHP recommendations:

Create a collaborative task force—or identify and enhance an existing collaborative—to:
a. Oversee and implement a state-level behavioral health workforce strategic plan.
b. Coordinate, integrate, and communicate behavioral health workforce-related. initiatives and efforts, including strategic planning at the regional and local levels.
c. Evaluate, and be accountable for, strategic plan outcomes.
- Establish as time-limited.
- Conduct a network mapping exercise to identify existing resources (human, financial, infrastructure) and any gaps.
- Sufficiently support the collaborative effort, especially with appropriate staffing levels.

This recommendation primarily aligns with Proposed Action Steps 6.1, 6.2, 6.3, 6.5, and 6.6.

2. *Design and field 'pipeline' and workforce costs needs assessment/gaps analyses.*

While there are many data available, both quantitative and qualitative, there is a need to understand the supply and demand to inform a pipeline initiative. Likewise, there were substantial conversations throughout this project, in interviews and at the Summit, regarding whether or not the state knew what real costs providers were facing, including for licensure, e.g., supervision, legal, administrative, etc., and reimbursement for both services provided and workforce recruitment and retention efforts. Further, initiatives to expand the workforce through apprenticeships and work-based learning will depend on which costs are incurred and which are reimbursable (the gap). These analyses should consider the factors noted above in the strategic planning approach undertaken at the Summit, i.e., impacts on rural and tribal areas, the continuum of care, and across the spectrum of behavioral health professionals. A workforce costs analysis should include the costs faced by providers and organizations on the local level from competition for both qualified behavioral health workers and from other industries. This recommendation aligns with Proposed Action Steps 2.1, 3.1, 4.7, 5.1, 5.2, 5.4, and 6.3.

3. *Enhance existing recruitment programs and create new ones.*

This recommendation includes three components that were raised in interviews or at the Summit, outlined below. There are obvious opportunities in the near-term to take advantage of an expected growth in high school graduates, career changes, and other recent employment trends.

a. Create a behavioral health workforce scholarship for North Dakota residents to incentivize residents who are community- or place-committed to remain or return to serve with an emphasis on the professions and areas most in need.
b. Create a career pathway into the workforce for individuals who lack degrees, those who are switching careers, or retirees.
c. Create a 'Behavioral Health Workforce Innovation Fund' to identify and incentivize innovative approaches to community collaboration on workforce needs, such as job- and supervision-sharing, retiree/career changers recruitment, and retention efforts such as organizational leadership culture, workplace environment, training, and career development and satisfaction.

This recommendation aligns with Proposed Action Steps 2.1, 3.2, 3.3, and 4.2.

4. *Collect, review, and report on behavioral health workforce-related licensure regulations, policies, and procedures.*

The area of licensure is complex and continues to receive significant attention by the legislative and executive branches, as well as from the impacted communities. There is no doubt, however, that the multitude of workforce issues identified through this project remain difficult to categorize and to resolve. The intent of this recommendation is to identify any barriers to licensure, such as renewals and current licensees who are seeking dual-licensure and any potential changes that would streamline licensure requirements across the relevant boards. Other examples include reviewing and revising, where appropriate, statutes and regulations that are unnecessarily burdening providers and individuals, such as background checks and disqualification criteria. This recommendation aligns with Proposed Action Steps 1.1, 1.2, and 4.3.

Next Steps

The results of the Summit produced six Priority Workforce Categories and 30 Summit Recommendations across those six categories. These six categories are inter-related, and many of the recommendations either overlap in some way or are contingent on each other for implementation. That said and as mentioned above, some of these recommendations can be pursued individually or in some combination in the short-term and have positive impact. WICHE BHP further refined these recommendations, based on the work done throughout this project, to four next steps.

The following are proposed specifically for completing and implementing the strategic plan. These should serve to guide the anticipated public review and input to this report and its recommendations. It is important to note that these steps do not necessarily need to be taken in consecutive order; it is expected that some of these steps will have to occur concurrently. Ideally, these next steps would take place within the next six months, aiming for initial completion by June 2023:

1. **Review the strategic plan.**
   a. Clarify priority categories and recommendations.
   b. Identify 'quick wins'.
      i. Which recommendation(s) are in progress at the current moment?
      ii. Which can be initiated quickly?
      iii. Which would take advantage of existing circumstances?
   c. Identify other short- or medium-term recommendations or action steps that will require legislative or executive action.

2. **Implement identified 'quick wins'.**
   a. Establish a collaborative group or coalition to represent the behavioral health community on workforce issues in the short-term.
   b. Create a short-term plan of action to achieve identified action steps and recommendations.
   c. Identify state resources necessary to achieve any 'quick wins'.

3. **Finalize the strategic plan.**
   a. Define specific action steps.
   b. Identify lead agencies/organizations and timeframes.
   c. Calculate the needed resources to support goals, objectives, and action steps.

4. **Implement the strategic plan.**
   a. Develop an overall strategic plan calendar to guide and integrate efforts.
   b. Track short-term progress toward any 'quick wins' initiatives.
   c. Establish a mechanism to communicate about the strategic plan to the broader behavioral health community and to gather feedback and input.
   d. Design and field any identified analyses or assessments.

Attachment 1. Proposed Action Steps Fact Sheet

North Dakota Behavioral Health Workforce: Next Steps

North Dakota has been improving the behavioral health workforce situation for decades in the face of local and national workforce and behavioral health trends that have impacted, the workforce environment: population changes, the pandemic, and economic conditions. But because of its history and the accompanying track record of success, North Dakota is well-positioned to take the next steps to address behavioral health care workforce issues in 2023 and beyond.

The report—*North Dakota Behavioral Health Workforce: Next Steps*—is the result of a collaborative project of the Aim 7 Committee and the Western Interstate Commission on Higher Education's Behavioral Health's Behavioral Health Program (WICHE BHP) with multiple objectives: research of past and current behavioral health workforce efforts; key stakeholder interviews; a Summit with community stakeholders; and, a draft strategic plan and recommendations. This has resulted in identification of the following Issue Areas, Key Takeaways, and Recommendations:

Issue Areas

- ✓ Primary/secondary student recruitment to workforce
- ✓ Funding for workforce initiatives
- ✓ Career pathway development
- ✓ Career satisfaction
- ✓ Competition among organizations
- ✓ Internship and supervisory costs
- ✓ Loan repayment
- ✓ Data
- ✓ Occupational licensing boards capacity and coordination
- ✓ Scope of practice and credentialing
- ✓ Executive and legislative, statewide, state-to-local, local-to-local cooperation and coordination

Key Takeaways

A. **Visible and tangible commitment** across the state and in local communities.
B. **Too few dedicated people**, organizations, and agencies working on planning and implementation, very often without any funding or resources.
C. Attention must be paid to **needs of, and impacts on, local communities**, particularly in rural and tribal areas.
D. Initiatives must have a **comprehensive, multi-level, systemic approach**.
E. **Consider similarities and differences** between mental health and substance use/substance abuse/addiction workforce, as well as public and private.
F. **Design impact for the entire 'pipeline'**, from primary school through retirees/career changers—and across the entire continuum of care.
G. **Leverage existing efforts, initiatives, and collaboratives** by adding or enhancing behavioral health workforce components.
H. **Sufficient resources will be critical** to achieving success in any efforts.
I. **Time is of the essence** to take advantage of—or mitigate against—workforce and employment trends.

WICHE BHP Recommendations

Summit participants from communities across North Dakota identified six categories of workforce issues and 30 proposed action steps. Below are four recommendations based on that work that should be considered for immediate action:

1. ***Fully fund and resource a 'backbone' organization to lead behavioral health workforce initiatives in North Dakota (Proposed Action Steps: 6.1, 6.2, 6.3, 6.5, and 6.6)***

Create a collaborative task force—or identify and enhance an existing collaborative—to:

a. Oversee and implement a state-level behavioral health workforce strategic plan;
b. Coordinate, integrate, and communicate behavioral health workforce-related initiatives and efforts, including strategic planning at the regional and local levels;
c. Evaluate, and be accountable for, strategic plan outcomes.

2. ***Design and field 'pipeline' and workforce costs needs assessment/gaps analyses (Proposed Action Steps 2.1, 3.1, 4.7, 5.1, 5.2, 5.4, and 6.3)***

Analyses should consider factors such as impacts on rural and tribal areas, continuum of care, and across the spectrum of behavioral health professionals. A workforce costs analysis should assess costs faced by providers and organizations on the local level.

3. ***Enhance existing recruitment programs and create new ones (Proposed Action Steps 2.1, 3.2, 3.3, and 4.2)***

a. Create a behavioral health workforce scholarship for North Dakota residents.
b. Create a career pathway for individuals who lack degrees, those who are switching careers, or retirees.
c. Create a 'Behavioral Health Workforce Innovation Fund' to identify and incentivize innovative approaches to community collaboration on workforce needs.

4. ***Collect, review, and report on behavioral health workforce-related licensure regulations, policies, and procedures (Proposed Action Steps 1.1, 1.2, and 4.3)***

Identify any barriers to licensure, such as renewals and current licensees, any potential changes that would streamline licensure requirements across the relevant boards, and review and revise statutes and regulations that are unnecessarily burdening providers and individuals, such as background checks and disqualification criteria.

Appendix A: Strategic Plan Template

1. Licensure				
Context				
Known Initiatives				
1.1 Standardize and make consistent behavioral health workforce policies and practices across licensing boards				
Objective/Outcome	**Action Steps**	**Resources**	**Lead(s)**	**Deadline(s)**
1.2 Identify opportunities to streamline licensure to advantage of emerging workforce trends, e.g. retirees				
Objective/Outcome	**Action Steps**	**Resources**	**Lead(s)**	**Deadline(s)**

2. Retention				
Context				
Known Initiatives				
	Objective/Outcome	**Resources**	**Lead(s)**	**Deadline(s)**
2.1 Encourage, incentivize, and innovate collaborations, such as job sharing and shared supervision, across behavioral health agencies and providers				
2.2 Create a workforce culture that is supportive of behavioral health				

2.3 Improve organizational leadership, culture, and training capacities				
2.4 Assist community provider agencies in creating engaging work environments				
3. Recruitment				
Context				
Known Initiatives				
	Objective/Outcome	**Resources**	**Lead(s)**	**Deadline(s)**
3.1 Create a workforce pipeline that can be utilized in all areas of the state				
3.2 Identify, design, and market a behavioral health workforce-specific career pathway				
3.3 Create a behavioral health workforce scholarship program for North Dakota residents				
4. Community-Based Services				
Context				
Known Initiatives				
	Objective/Outcome	**Resources**	**Lead(s)**	**Deadline(s)**
4.1 Enhance, address length, and on-going funding of training for non-licensed services				

4.2 Provide funding for innovation and program flexibility for rural and tribal areas				
4.3 Review and consolidate qualifications and disqualifications for peer support and care coordination positions across programs				
4.4 Create and enhance apprenticeships and work-based learning opportunities				
4.5 Consider mirroring Home and Community Based Services cost supports for rural and tribal areas				
4.6 Utilize the 'designee model' of SSI/SSDI to increase pathways for entrance into behavioral health professions				
4.7 Identify and coordinate on local level costs regarding workforce competition				
4.8 Integrate services into existing behavioral health services and systems				
4.9 Designate a behavioral health organization to coordinate services				
5. Reimbursement				
Context				
Known Initiatives				
	Objective/Outcome	**Resources**	**Lead(s)**	**Deadline(s)**
5.1 Identify current reimbursement needs, including gaps in service and full provider costs				
5.2 Ensure full reimbursement for state-funded services				

5.3 Move licensed professions to 100% reimbursement rate				
5.4 Enhance or ensure adequate reimbursement for administrative, legal, and other behavioral health service costs to participate in programs				
5.5 Provide outreach and engagement to rural and tribal areas and organizations				
5.6 Clarify which services and professions can bill and for which programs				
6. Marketing/Branding/Communication				
Context				
Known Initiatives				
	Objective/Outcome	**Resources**	**Lead(s)**	**Deadline(s)**
6.1 Review the Aim 7 committee structure, needed resources, and potential future role(s)				
6.2 Create a community-based behavioral health workforce backbone organization				
6.3 Implement a systemic, data-driven approach to identifying workforce development needs, including fielding of needs and gaps and a workforce pipeline analysis				
6.4 Consider creation of a statewide organization representing providers				
6.5 Coordinate behavioral health workforce efforts with current allied health and overall workforce efforts				
6.6 Convene behavioral health stakeholders for a statewide workforce conference

Appendix D: Summit Agenda.

North Dakota Behavioral Health Workforce
Summit and Strategic Planning

(https://www.wiche.edu/policy-research/data-resources/north-dakota-behavioral-health-materials/)

Day One: Monday, September 26, 1:00-5:00	
Plenary Meeting Room: ▪ **Judicial Room, 1st floor**	**Breakout Meeting Rooms:** ▪ **Governors Room, 2nd floor** ▪ **Executive Suite 114, 1st floor** ▪ **Executive Suite 106, 1st floor**

12:30-1:00: Check In

1:00-2:30: Plenary

- Welcome and Introductions: Rebecca Quinn and Kurt Snyder (Aim 7 Committee)
- Discovery Report Summary and Strategic Planning (WICHE)
- North Dakota Workforce Pipeline (WICHE)
- Best Practices in Behavioral Health Workforce (WICHE)
- Breakout Objectives and Desired Outcomes (WICHE)

2:45-3:45: Breakout Sessions

- Discuss Discovery Report, North Dakota behavioral health workforce initiatives and needs, and 'best practices'

Desired Outcome #1: Prioritized list of workforce issues

4:00-5:00: Plenary

- Breakout session report outs on prioritized lists of work force issues
- Preview Day Two
- Meeting Review: **+/Δ**
- Adjourn

Day Two: Tuesday, September 27, 9:00-4:00	
Plenary Meeting Room: ▪ **Judicial Room, 1st floor**	**Breakout Meeting Rooms:** ▪ **Governors Room, 2nd floor** ▪ **Executive Suite 114, 1st floor** ▪ **Executive Suite 106, 1st floor**

9:00-10:00: Plenary

- Review of results from Day One
- Further discussion and clarification of identified workforce issues and priorities

Desired Outcome #2: Agreement on a consolidated list of prioritized work force issues (from breakout sessions work of Day One, Desired Outcome #1)

10:15-12:00: Breakout Sessions:

- Prioritize workforce issues
- Begin development of recommendations and next steps

Desired Outcome #3: A list of workforce issues recommendations with respective recommendation action steps

12:00-1:30: Lunch on your own

1:30-2:45: Breakout Sessions, continued:

- Finalize development of workforce recommendations and next steps

Desired Outcome #4: Agreement on a consolidated list of work force issues recommendations with respective recommendation action steps

3:00-4:00: Plenary

- Breakout session report outs on recommendations and next steps
- Final remarks
- Meeting Review: **+/Δ**
- Adjourn

Desired Outcome #5—Agreement on Next Steps: A process for development of a draft strategic plan, drawing from this Workforce Summit's work products:

- Workforce issues
- Workforce issues recommendations with respective recommendation action st

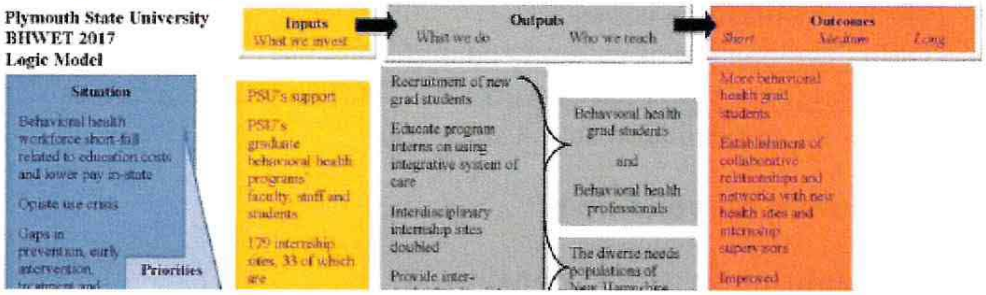
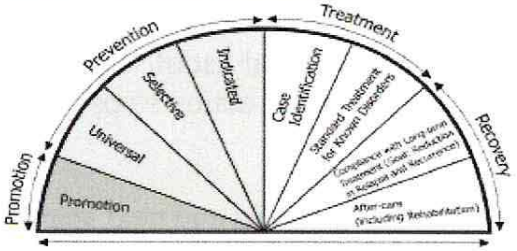
Collaboration across the West – Since 1955



North Dakota Behavioral Health Workforce Summit



Strategic Planning Cheat Sheet

(https://www.wiche.edu/policy-research/data-resources/north-dakota-behavioral-health-materials/)

Strategic Planning Considerations

- Logic model concepts
- "What, Why, Who, When, How"
- Who's in the room, who's not in the room
- Honest, focused, realistic conversation
- "Systems thinking"

FUNDING

WORKFORCE

BEST PRACTICE

Other Planning Considerations

- East and west
- Rural and urban and tribal
- Mental health and substance abuse/addiction
- Levels of care and continuum of care
- Age
- Credentialed/licensed and certified/trained
- Private and public employers
- Funding source(s): federal, state, local, private
- Short-/medium-/long-term

Strategic Plan Framework

Below is a high-level framework of the Strategic Plan's goals and objectives:

Appendix H: Summit Invitation.

A gathering of key stakeholders from across North Dakota to review the Discovery Report findings (a upcoming report by the Western Interstate Commission on Higher Education of existing workforce initiatives); learn of behavioral health workforce initiatives and best practices in other states; and, develop a Behavioral Health Workforce Strategic Plan, including identifying specific action steps to implement the workforce strategic plan.

Monday, September 26, 2022 from 1pm-5pm
Tuesday, September 27, 2022 from 9am-4pm

Ramada by Wyndham, Bismarck

DAY ONE
September 26, 1-5pm

12:30pm **Check in**

1:00pm **Plenary #1**
Welcome and Introduction-Rebecca Quinn and Kurt Snyder
Discovery Report (WICHE)
'Best Practices in Behavioral Health Workforce' (WICHE)

2:45pm **Breakout Sessions**
Objectives:
1. Discuss Discovery Report, behavioral health workforce initiatives 'best practices'
2. Identify and prioritize the top work force issues

4:00pm **Plenary #2**
Facilitated discussion to review breakout reports

DAY TWO
September 27, 9am-4pm

9:00am **Plenary #3**
Facilitated review of results from Day One, discussion of identified workforce issues and priorities

10:00am **Breakout Sessions**
Objectives:
1. Further discuss and prioritize workforce issues
2. Begin development of recommendations and action steps

12:00pm **Lunch on your own**

1:30pm **Breakout Sessions**
Objective:
1. Finalize discussion of workforce recommendations and action steps

3:00pm **Closing Plenary**
Facilitated discussion of recommendations and actions steps, and development of draft strategic plan

Valley City State University	*Bachelors*: human services, psychology
United Tribes Technical College	*Associate*: human & social services
Sitting Bull College	*Bachelors*: social work *Associates*: human services

Appendix J: Behavioral Health Workforce Definitions, Sixth Biennial Report 2021: Health Issues for the State of North Dakota.

DEFINING BEHAVIORAL HEALTH WORKFORCE

There are a variety of ways to define behavioral health workforce. The definition should include the providers who treat individuals with behavioral health disorders and should examine their education, scope of practice, and level of independence in the treatment environment. In North Dakota, a simple method for defining the behavioral health workforce is to utilize the tiered classification system established in 2017 by the North Dakota Legislature. This classification system for mental health professionals was based on a thorough review of education and statutory guidelines along with scope of practice, to ensure that professionals are being fully utilized within their scope of practice.[1] Behavioral health educational programs available in North Dakota, including those that meet licensure requirements, are listed in Table 7.1 and Table 7.2 below.

The Tiered System

Determining which professions are included in the behavioral health workforce is challenging due to varying education requirements, scopes of practice, and levels of responsibility. A broad definition of behavioral health workforce includes providers of substance abuse and mental health services, as well as those providing services in supportive roles. Established in 2017 by the North Dakota Legislature, the tiered classification system is a simple way of defining the behavioral health workforce. This system classifies the various professions based on the required level of education and scope of practice. There are four tiers within this system.[1]

Tier 1

Professionals in Tier 1 are those with the greatest responsibility, scope of practice, education/training, and ability to practice autonomously. This tier is further broken down into two subsections. Tier 1a are the professionals with expertise in behavioral health (i.e., psychiatrists and psychologists) and Tier 1b are the professionals without expertise in behavioral health but may interact and work with aspects of the behavioral health field (i.e., physician assistants, advanced practice registered nurses).[1]

Tier 2

Professionals in Tier 2 are those that are able to work as independent clinicians. This tier is also further broken down into two subsections. Tier 2a are the professionals with comprehensive training in the diagnosis and treatment of a broad array of

behavioral health conditions (i.e., licensed clinical social workers, licensed professional clinical counselors, licensed marriage and family therapists). Tier 2b are the professionals with an area of expertise that is limited to a specific population (i.e., licensed addiction counselors, registered nurses).[1]

Tier 3

Tier 3 has the largest variety of professionals with many different practice descriptions. This includes licensed associate professional counselors, licensed

professional counselors, licensed master social workers, licensed associate marriage and family therapists, occupational therapists, licensed practical nurses, licensed and registered behavior analysts, school psychologists, vocational rehabilitation counselors, and human resource counselors.[1]

Tier 4
Professionals in Tier 4 have the narrowest scope of practice and must work under other behavioral health professionals (i.e., behavior technicians, assistant behavior analysts, mental health technicians, case aids).[1]

Non-Tiered
There are professions that are not currently in the tiered system that provide behavioral health services in North Dakota. These professions include licensed baccalaureate social workers and peer support specialists.[1]

Appendix J: North Dakota Primary Care Office Mental Health Loan Repayment Programs.

Mental/Behavioral Health Loan Repayment Programs

Program Type	North Dakota Health Care Professional Student Loan Repayment Program	Federal State Loan Repayment Program (SLRP)	National Health Service Corps (NHSC)
Program Description	The State of North Dakota has established loan repayment programs for health care professionals willing to provide services in areas of this state that have a defined need for such services.	Federal State partnership to assist sites in the recruitment of health care providers.	The NHSC is part of the Bureau of Health Workforce and coordinates the recruitment and retention of health professions.

Eligible MH/BH Disciplines	• Clinical Psychologists (licensed by the State Board of Psychologist Examiners)
	• Behavioral Health Professionals:
	  • Licensed Addiction Counselors
	  • Licensed Professional Counselors
	  • Licensed Social Workers
	  • Registered Nurses
	  • Specialty Practice Registered Nurses
	  • Behavioral Analyst
		• Clinical Psychologist, Licensed Clinical Social Worker, Licensed Professional Counselor, Marriage and Family Therapist, Psychiatric Nurse Specialist	• Nurse Practitioner (psychiatric/mental health, PNS)
			• Mental and Behavioral Health (psychologist, Licensed Clinical Social Worker, Licensed Professional Counselor, Marriage & Family Therapist, Physician Assistant)
			• Providers who provide SUD treatment at an NHSC approved site; Physicians, NP, CNM, PA, behavioral health professionals, SUD counselors, RN, pharmacists.

Where Providers Serve	Providers must serve in areas of the state with a defined need for such services.	Providers must serve in Health Professional Shortage Areas (HPSAs)	Providers must serve in a Health Professional Shortage Area (HPSA) at an approved NHSC site.

Financial Benefits	Providers can enter into an agreement up to 5 years.
	Clinical Psychologist: State Match $ 60,000; Community Match $15,000
	Behavioral Health: State Match $ 20,000; Community Match $ 2,000
		• Receive up to $50,000/year for year 1 and 2 (Example: $50,000 Federal Funds, $50,000 Community Match)
		• Receive up to $20,000/year for year 3 and 4
		• Receive up to $10,000/year for year 5
		• Site or community organization must provide a 1:1 match.
			• Year 1 and 2
			  • HPSA 14+ $50,000 FT $25,000 PT
			  • HPSA 0-13 $30,000 FT $15,000 PT
			• Years 3 & 4 $20,000 FT $10,000 PT
			• Years 4 & 5 $10,000 FT $5,000 PT

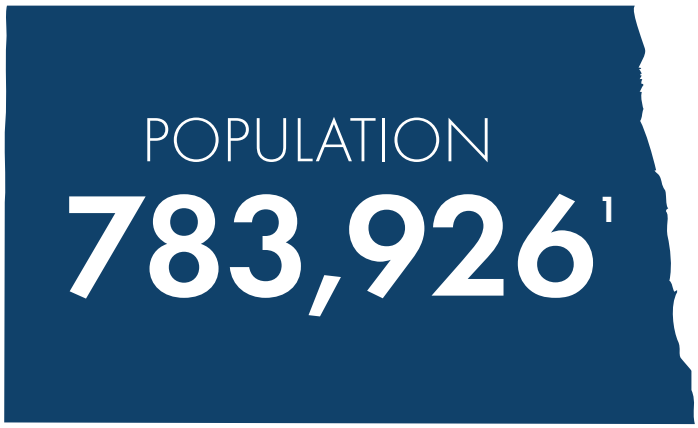
BEHAVIORAL HEALTH

DATA BOOK 2025

This booklet tells the story of behavioral health in North Dakota.

What is Behavioral Health? A state of mental/emotional being and/or choices and actions that affect wellness.



Research shows the importance of using data to guide effective and targeted behavioral health efforts. The data presented in this booklet paints a picture to help guide these efforts across the state.

NORTH DAKOTA Demographics Overview

RACE/ ETHNICITY[2]

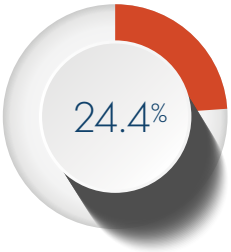
4.9% of North Dakotans identify as Hispanic or Latino.[2]

7.2% of North Dakota's populations are veterans, compared to 6.1% in the United States.[2]

11.3 people per square mile in 2020, compared to 9.7 people per square mile in 2010.[19]

One in ten (9.8%) North Dakotans are currently living in poverty.[2]

There are **five** federally recognized Tribes and one Indian community located at least partially within the state.



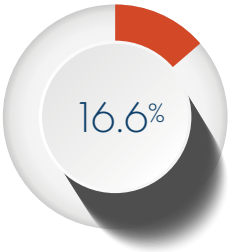
23.6% of North Dakotans are under age 18 and 17% are over age 65.[2]

North Dakota has a **2.3%** unemployment rate.[2]

Behavioral Health

Behavioral health is broad and inclusive of overall wellness.

GAMBLING



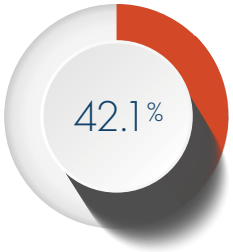
24.4% of ND **high school students** report gambling on sports, the lottery, or the internet in the last year.[3]

Support for problem gambling is available. Visit GamblerND.com for information, resources and links to treatment.

Call (877) 702-7848 to schedule a counseling appointment.

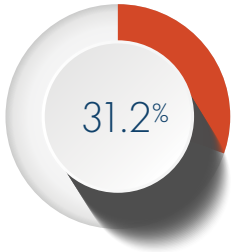
BRAIN INJURY

16.6% of ND **high school students** report having a concussion from playing a sport or being physically active at least once in the last year.[4]



An **increase** from 14.3% in 2021.

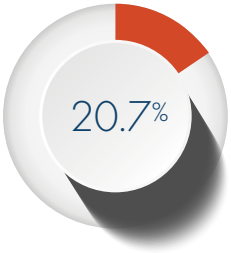
The North Dakota Brain Injury Network has several programs that can help brain injury survivors, family members, professionals, caregivers and friends.



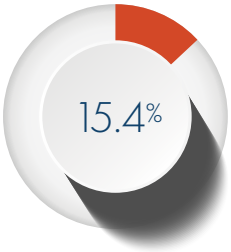
Visit www.ndbin.org

BULLYING

MIDDLE SCHOOL STUDENTS



42.1% of ND **middle school** students report ever being **bullied on school property.**[4]

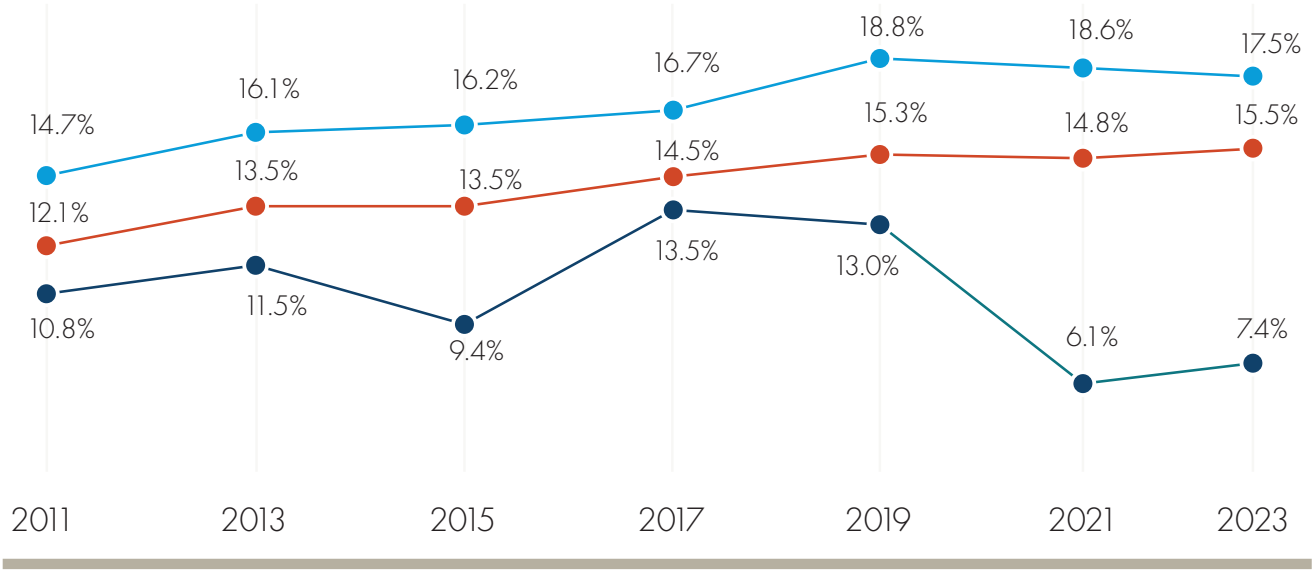


31.2% of ND **middle school** students report ever being **electronically bullied**.[4]

HIGH SCHOOL STUDENTS

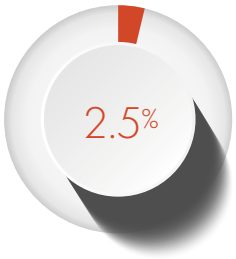
20.7% of ND **high school** students report being **bullied on school property** within the past year.[4]

An increase from 15.8% in 2021.



15.4% of ND **high school** students report being **electronically bullied** within the past year.[4]

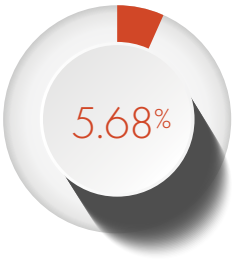
An increase from 13.6% in 2021.



Suicide

YOUTH

NORTH DAKOTA HIGH SCHOOL STUDENTS [4]



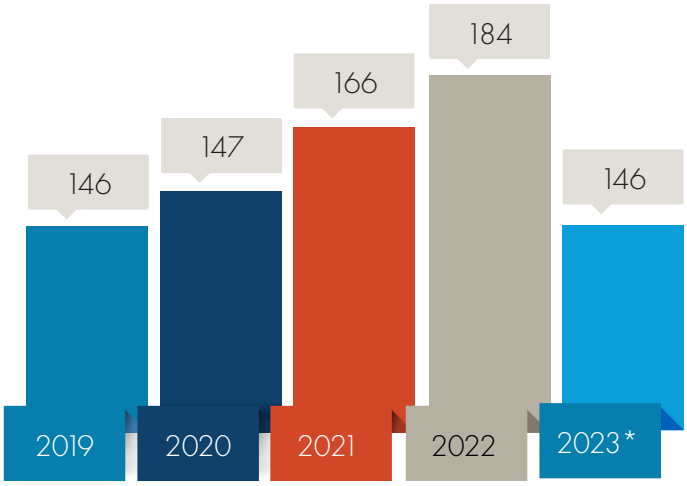
COLLEGE STUDENTS

2.5% of ND college students indicated they had attempted suicide within the last 12 months.[5]

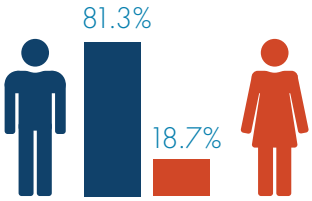
ADULTS

5.68% of ND adults (age 18 and older) had serious thoughts of suicide in the past year.[6]

Suicide & Crisis Lifeline 988 CALL, TEXT OR CHAT



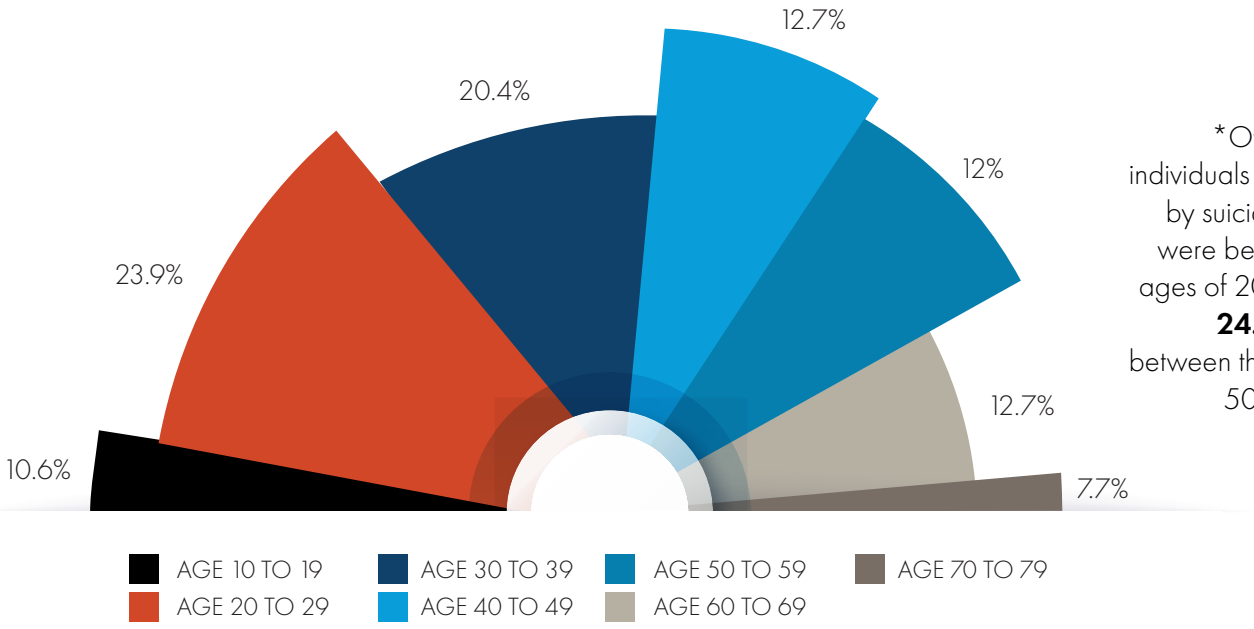
If you or someone you know needs support, call or text 988 or chat 988Lifeline.org.



988 connects you with a trained crisis counselor who can help.

Suicide is preventable. If you or someone you know is experiencing a mental health or substance use crisis, call or text the 988 Suicide and Crisis Lifeline or chat at 988lifeline.org. Help is available 24 hours a day, 7 days a week.

146 North Dakotans died by suicide.[7]



In 2023*, 146 North Dakotans died by suicide. In comparison, 184 North Dakotans died by suicide in 2022.

***81.3%** of individuals who died by suicide in 2023 were male, **18.7%** female.[7]

17.8% of individuals who died by suicide were current or former military (2023).[7]

*Over half of individuals who died by suicide **(57%)** were between the ages of 20 and 49. **24.7%** were between the ages of 50 and 69.[7]

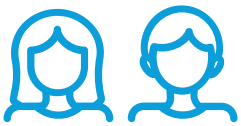
*2023 data is preliminary

Mental Health

YOUTH

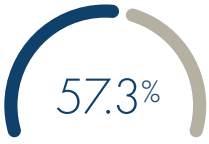
30.9% of ND **middle school** students report feeling sad or hopeless (almost every day for 2 weeks or more in a row so they stopped doing some usual activities in the past year).[4]

24.3% of ND **middle school** students report their mental health was most of the time or always not good in the last 30 days.[4]

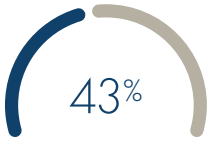


30.6% of ND **high school** students report their mental health was most of the time or always not good in the last 30 days.[4]

35% of ND **high school** students report feeling sad or hopeless (almost every day for 2 weeks or more in a row so they stopped doing some usual activities in the past year).[4]



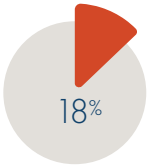
Among those who report feeling sad, empty, hopeless, angry or anxious, **20.1%** of ND **high school** students report they most of the time or always get the kind of help they need.[4]



17.8% of ND **youth** (ages 12-17) had major depressive episode in the past year.[6]

COLLEGE STUDENTS

57.3% of ND college students report having counseling for a mental health condition in the last 12 months.[5]

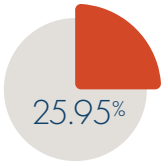


43% of ND college students report high levels of loneliness, based on a standardized loneliness scale.[5]

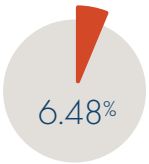
Among ND college students (in their lifetime)[5]:

36.2% diagnosed with anxiety

27.8% diagnosed with depression



ADULTS (ages 18+)



18% reported their **mental health was not good** 8 or more days in the last month.[6]

10.34% reported having a **major depressive episode** in the past year.[6]

25.95% had **any mental illness** in the past year.[6]

6.48% reported a **serious mental illness** in the past year.[6]

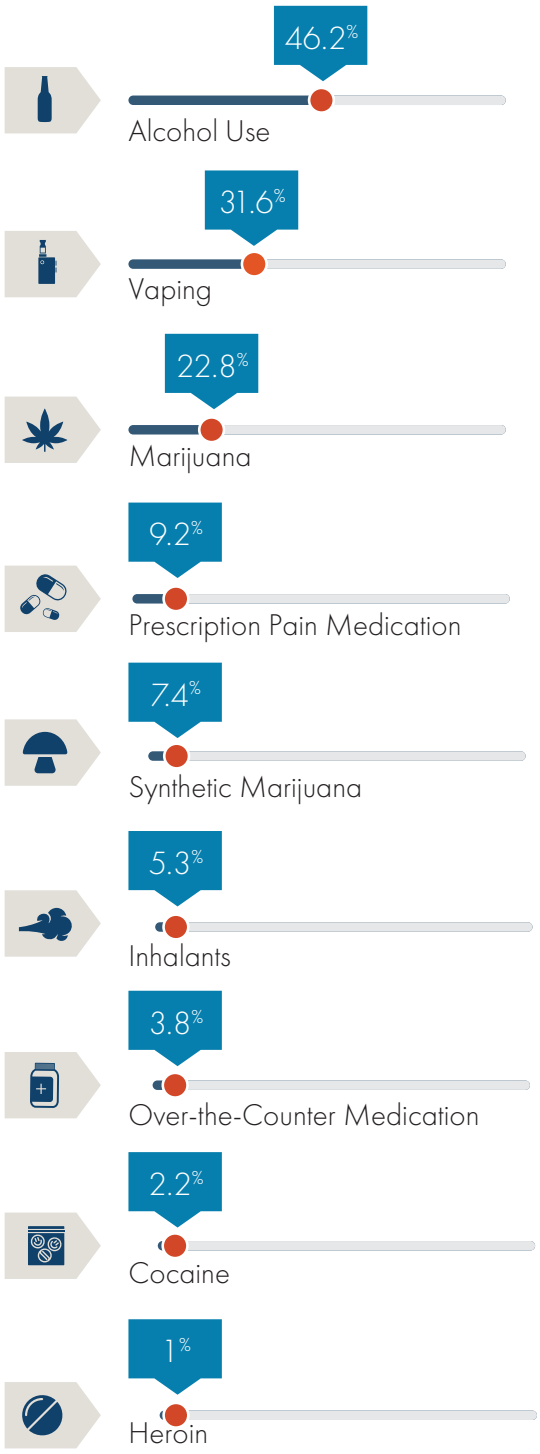
Approximately 155,420 ND adults (18+) had any mental illness in the past year.[6]

Approximately 38,810 ND adults (18+) have serious mental illness in the past year.[6]

25.32% of ND adults (18+) received mental health services in the past year.[6]

MENTAL AND PHYSICAL HEALTH IS FUNDAMENTALLY LINKED.

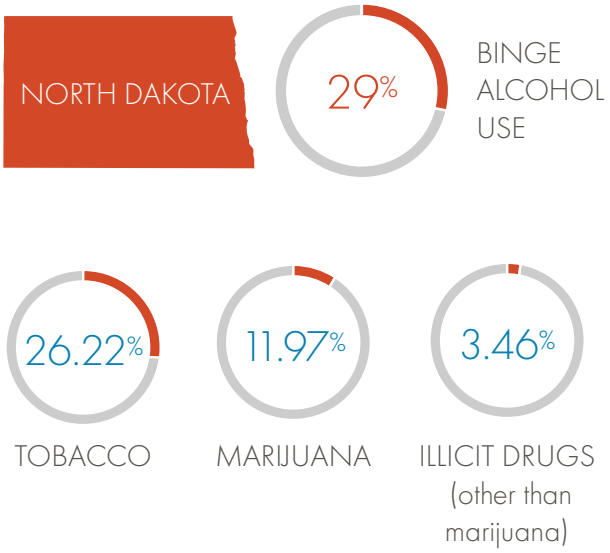
The average life span for people with serious mental illness is 25-30 years less than the general public. People with depression have a 40% higher risk of developing heart diseases than the general population.



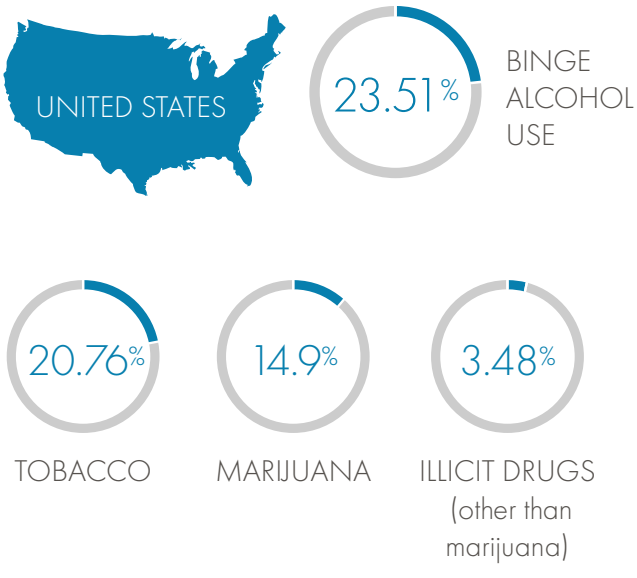
Find mental health services for you or your loved ones through the North Dakota Mental Health Program Directory.

The directory provides a single place for North Dakota citizens to search for mental health services that meet their needs. hhs.nd.gov/behavioral-health/directory

Substance Use



YOUTH (HIGH SCHOOL STUDENTS)[4]



LIFETIME Substance Use

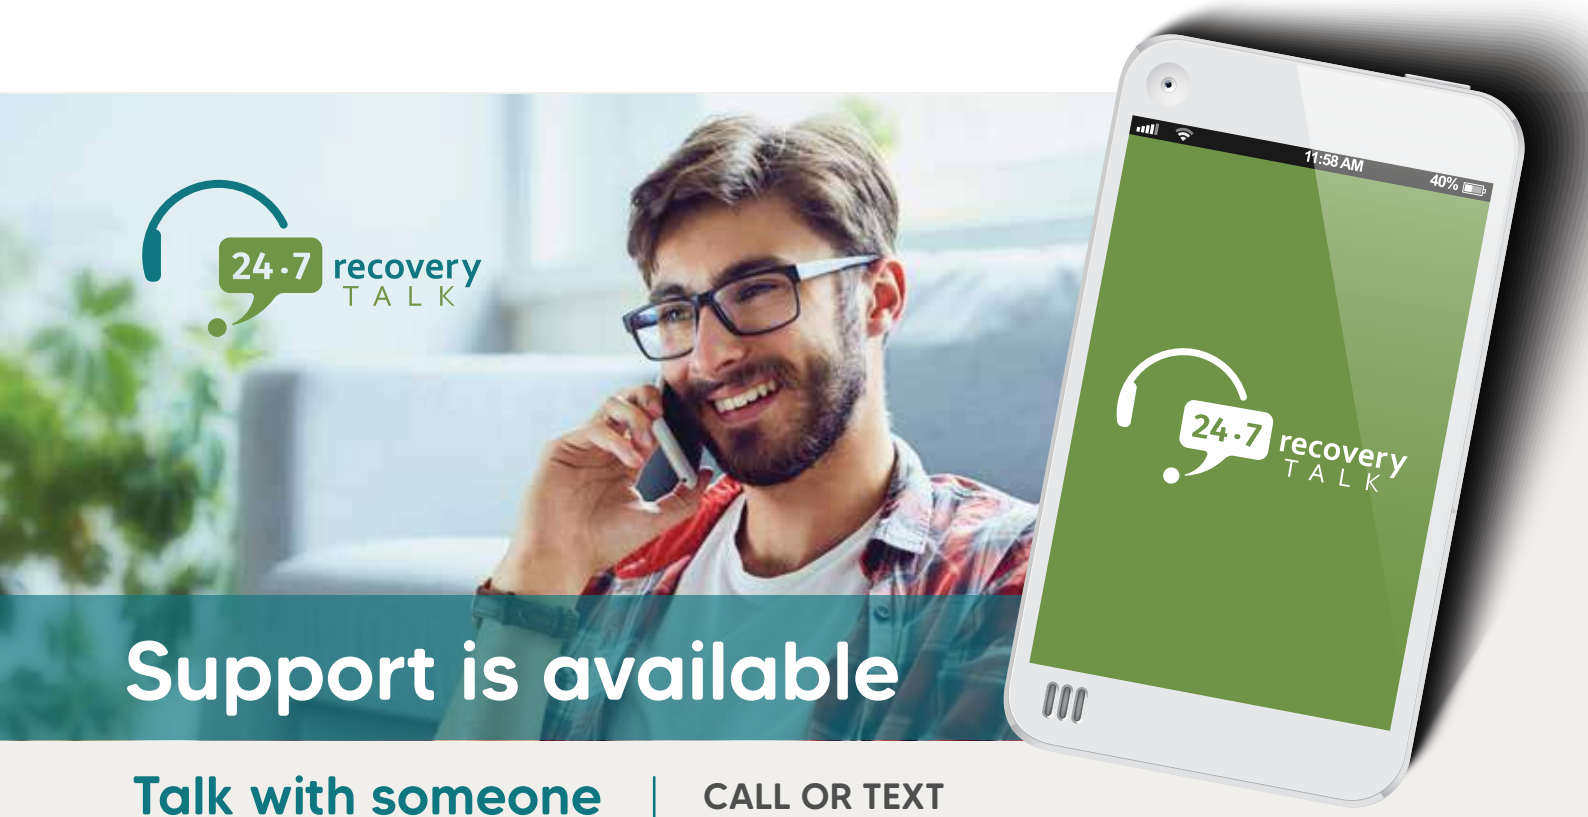
ADULTS (AGES 18+)[6]

PAST 30-DAY Substance Use

NOTE: Binge alcohol use is defined as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least one day in the past 30 days.

Addiction and Recovery

An estimated 20.8% of ND adults (18+) **met the criteria for a Substance Use Disorder** within the last year.[6]

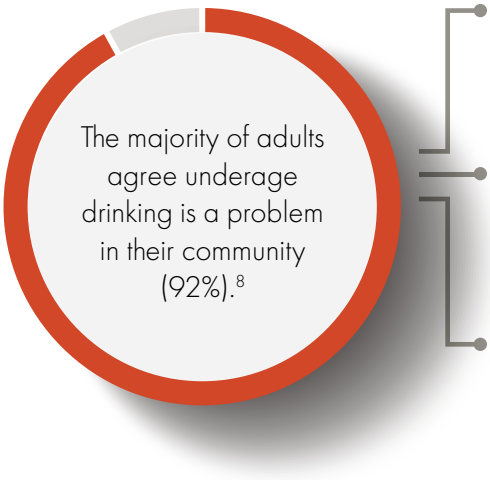


77.62%

An estimated 77.62% of ND adults (18+) who needed treatment for substance use **did not receive treatment in the past year.**[6]

2.5% of ND college students report being in recovery from alcohol or drug use.[5]

105



In North Dakota, there are 105 licensed Substance Use Disorder Treatment programs (as of 10/10/2024).

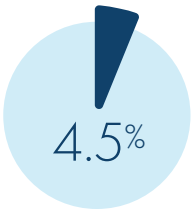
Talk with someone who's been there

CALL OR TEXT
701.291.7901

Alcohol: Underage Drinking

19.1% of ND **middle school** students report alcohol use in their **lifetime**[4]

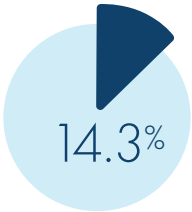
a decrease from **24.8%** in 2013.



19.5% of ND **high school** students report **current alcohol use** (within the past 30 days)[4]

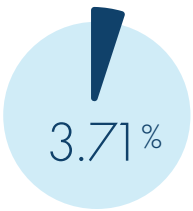
a decrease from **35.3%** in 2013.

10.3% of ND **high school** students report **current binge drinking*** (within the past 30 days)[4]



a decrease from **21.9%** in 2013.

Not only is underage drinking against the law, but there are also many consequences to underage drinking impacting the health and safety of North Dakota youth.



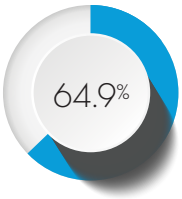
4.5% of ND high school students report **driving after drinking** alcohol within the past 30 days.[4]

a **decrease** from 10.7% in 2013

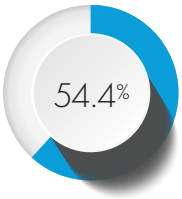
14.3% of ND high school students report **riding with a driver who had been drinking** alcohol within the past 30 days.[4]

a **decrease** from 21.9% in 2013

3.71% of ND youth (ages 12-17) met the criteria for **alcohol use disorder** in the past year.[6]



Research shows brain development is not complete until around age 25.



Among the last parts of the brain to be developed are those responsible for impulse control and extended reasoning. Alcohol use among youth and young adults can result in irreversible changes impacting problem-solving skills, performance at school, and potentially their body, mood and mental health.

*Binge drinking: 5 or more drinks of alcohol on an occasion or in a row

Alcohol: Young Adult & College Students

64.9% of ND **college students** report **using alcohol** in the last three months.[20]

54.4% of ND **college students** report **binge drinking*** one or more times in the last two weeks.[5]

15%

of ND **college students** report **driving after having any alcohol in the last 30 days**
(of those students who reported drinking alcohol in the last 30 days and those who reported driving in the last 30 days).[5]

*binge drinking: five or more drinks (males) or four or more drinks (females) containing any kind of alcohol at a sitting.

ND college students who drank alcohol reported experiencing the following in the last 12 months when drinking alcohol[5]:

19% did something they later regretted

12.4% blackout

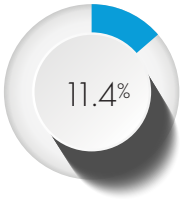
6.8% physically injured themself

Among ND Young Adults (18-25 year olds)[6]

64% report alcohol use in the past month.

Compared to 50.57% nationwide

40.43% report binge drinking in the past month.

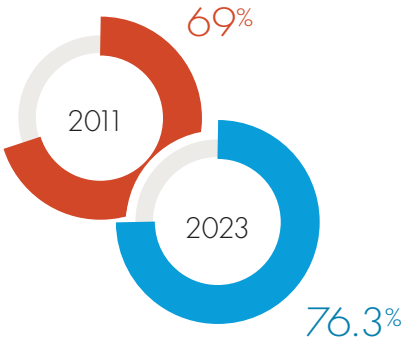


Compared to 29.73% nationwide

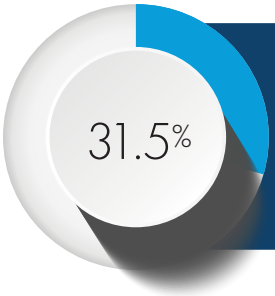
Alcohol: Risk Factors

There are many risk factors that influence a person's likelihood of engaging in illegal or risky substance use. Effective prevention focuses on reducing these risk factors.

Research shows that individuals who start drinking before the age of 15 are four times more likely than individuals who start drinking at the age of 21 to meet criteria for alcohol use disorder at some point in their lives.[20]



4x



11.4% of ND **high school** students report their first use of alcohol before the age of 13.[4]

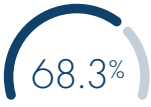
Generally, individuals do NOT believe binge drinking is risky.

The percentage of ND high school students who believe binge drinking one or two times a week does NOT pose a great risk has increased from **69%** in 2011 to **76.3%** in 2023.[4]

31.5% of ND **high school** students report living with someone who had a problem with alcohol or drug use at some point in their life.[4]

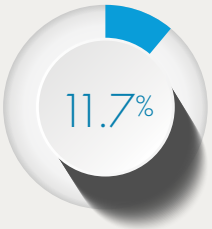
Alcohol: Risk Factors

The easier it is to obtain alcohol, the higher the likelihood for use and abuse.



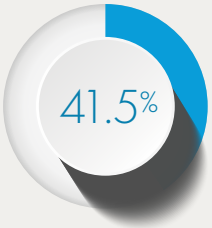
North Dakota ranks highest in the nation for the number of bars per capita, with 49.73 bars per 100,000 people. Compare this to New Hampshire, with 1.54 bars per 100,000 people.[9]

There is one alcohol beverage license (restaurant serving alcohol, bar or liquor store) in ND for every 445.5 people.[10]

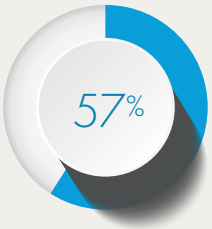


Early intervention is an important piece of the behavioral health continuum of care and helps to reduce the risk of harmful behaviors such as drug and alcohol use.

18



In North Dakota, there are 18 certified Minor in Possession education providers (as of 10/10/2024).



68.3% of ND adults support requiring evidence-based interventions for youth with Minor in Possessions.[8]

11.7% of ND adults believe it is not at all difficult for youth to **buy alcohol at a store** themselves.[8]

41.5% of ND adults believe it is not at all difficult for youth to **get an older person to buy alcohol** for them.[8]

57% of ND adults believe it is not at all difficult for youth to **sneak alcohol from their home** or a friend's home.[8]

Alcohol: Adult

Adult binge drinking in North Dakota is a serious public health issue, resulting in many consequences impacting individuals, families and communities.

91.4% of ND adults agree that **adult alcohol use is a problem in their community.**[8]

Among North Dakota adults age 26 and older:

59.87% used alcohol in the past month.[6]

3rd

ND ranks 3rd in the nation for **binge alcohol use** (past month) (26.81%).[6]

The economic costs of excessive alcohol consumption in ND are estimated at **$487 million**, which is $725 per person or $1.40 a drink.[11]

One in six (16.7%) adult arrests in ND are for driving under the influence.[12]

36% of fatal crashes in ND are alcohol-related.[13]

13.39% of ND adults age 26 or older met the criteria for Alcohol Use Disorder in the past year.[6]

23% of new domestic violence cases in ND involve alcohol.[14]

Not all drinks are created equal. Some can be the equivalent of three and even four drinks, which is why we say speak in volumes and you'll speak volumes about how much you're drinking.

SPEAK VOLUMES .ND.GOV

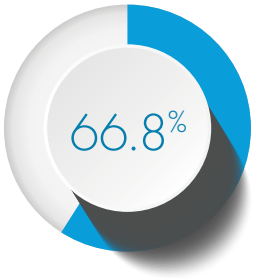
12-ounce beer (5% ABV) = 1 drink

5-ounce glass of wine (12% ABV) = 1 drink

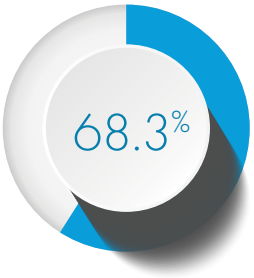
16-ounce craft beer (7.5% ABV) = 2 drinks

Martini = 1.5-2 drinks

Long Island Iced Tea = 3-5 drinks



Margarita = 2-3 drinks



Alcohol: Prevention Works

Prevention is a proactive approach; creating an environment that promotes the health and well-being of individuals, families and communities, which prevents problems before they occur.

ADULTS

believe it is possible to reduce alcohol and other drug problems through prevention.[8]

believe prevention programs are a good investment.[8]

CHANGE COMES FROM

Increased awareness of the risks associated with underage drinking and adult binge drinking.

Strengthened policies to reduce access to alcohol.

65.5% of ND adults believe that alcohol servers and bartenders should be specifically trained.[8]

Enforcement of laws and policies related to alcohol.

75.7% of ND adults support the legal drinking age of 21.[8]

64.3% of ND adults support DUI checkpoints.[8]

83.4% of ND adults support compliance checks.[8]

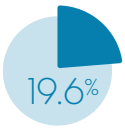
Shifting community norms to be supportive of healthy decisions, and not supportive of excessive alcohol consumption.

72.3% of ND adults support penalties for adults who provide alcohol to minors.[8]

Protective parental behaviors such as ongoing conversations, healthy role-modeling, monitoring, support and engagement.

Tobacco

Generally, cigarette use is declining among youth in the state. However, use of other tobacco products has remained steady or increased.



YOUTH

92.2% of ND adults believe **TOBACCO USE AMONG YOUTH** is a problem in their community.[8]

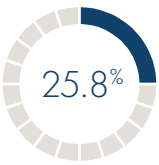
8.9% of ND **middle school** students report cigarette use in their lifetime.[4]

19.6% of ND **high school** students report current (past 30-day) use of tobacco.[4]

5.4% of ND **high school** students report current (past 30-day) use of cigarettes.

decrease from 8.3% in 2019.[4]

ELECTRONIC VAPOR PRODUCTS

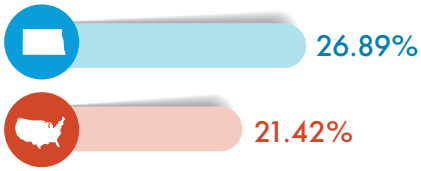


of ND **middle school** students report using electronic vapor products at one point in their life.[4]

of ND **high school** students report current use of electronic vapor products.[4]

decrease from **33.1%** in 2019.

COLLEGE STUDENTS & ADULTS



25.8% of ND **college** students report using tobacco or nicotine delivery products in the last three months.[5]

89.5% of ND adults believe **TOBACCO USE AMONG ADULTS** is a problem in their community.[8]

Among adults age 26 and older, 26.89% of ND adults report tobacco product use in the past month; compared to 21.42% of US adults.[6]

Tobacco is the leading preventable cause of death in the United States and has a tremendous impact on lives in North Dakota. By preventing tobacco use and exposure to secondhand smoke, we reduce disease, alleviate suffering, save lives, and cut health care costs and productivity losses.

The majority

62.9%

of North Dakotans (age 12 or older) believe smoking one or more packs of cigarettes per day poses great risk.[6]

In the 2022-2023 school year, there were 1,234 suspensions/expulsions related to tobacco. This corresponds to 3,373.25 days removed from school.[15]

Exposure to secondhand smoke causes more than 41,000 deaths each year among adults in the United States.[16]

The life expectancy for smokers is at least 10 years shorter than for nonsmokers.[16]

39.4%

of ND high school students report it would be very easy to get tobacco products if they wanted some.[18]

11.6%

of ND **high school** students usually obtain their own cigarettes by buying them in a store or gas station.[18]

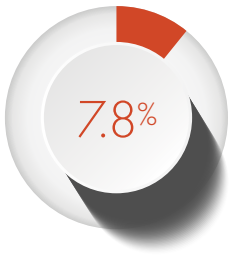
6.5%

of ND **high school** students usually obtain their own electronic vapor products by buying them in a store.[18]

Tobacco affects everyone, even non-users. In North Dakota, smoking-related costs include:[23]

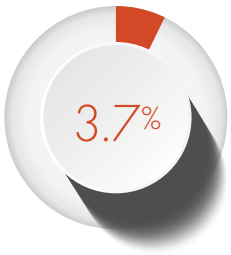
Annual health care costs directly caused by smoking: **$379 million**

Medicaid costs caused by smoking: **$61.1 million**



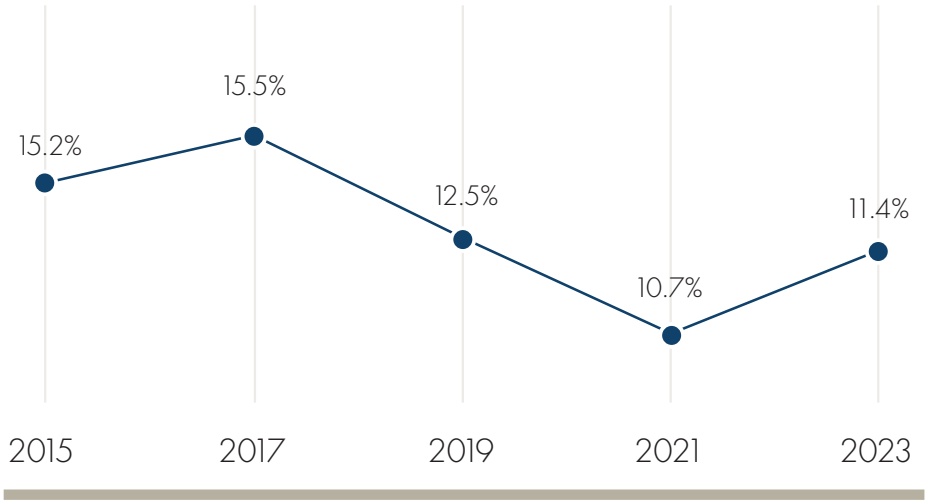
Residents' state and federal tax burden from smoking-caused government expenditures: **$970 per household**

Smoking-caused productivity losses: **$715 million**

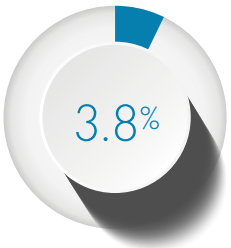


Marijuana

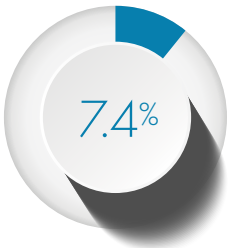
YOUTH



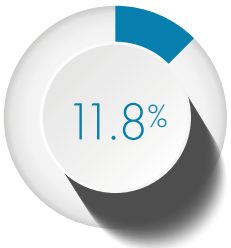
7.8% of ND **middle school** students have used marijuana one or more times in their **lifetime**.[4]

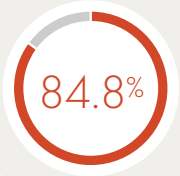


3.7% of ND **middle school** students have used marijuana one or more times in the **last 30 days.**[4]



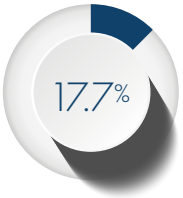
11.4% of ND **high school** students have used marijuana one or more times in the last 30 days.[4]



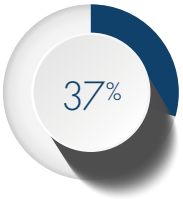


3.8% of ND **high school** students tried marijuana for the first time before the age of 13.[4]

7.4% of ND **high school** students report using synthetic marijuana sometime in their life.[4]



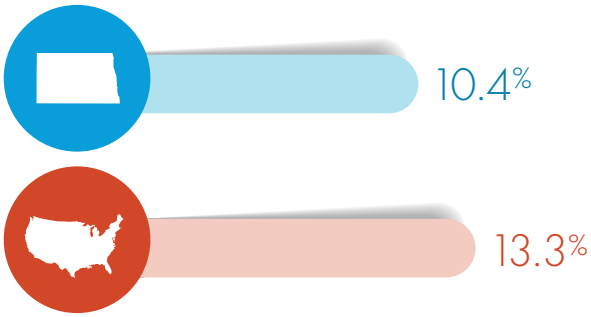
11.8% of ND **high school** students report riding in a car or other vehicle driven by someone who had been using marijuana in the last 30 days.[4]



The majority of ND **adults believe YOUTH** marijuana use is a problem in their community (84.8%).[8]

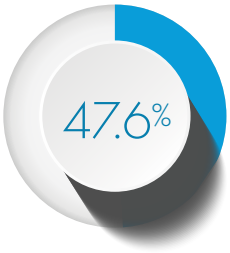
As efforts to legalize marijuana continue, there is an increasing perception marijuana is not harmful or addictive. The reality is marijuana can cause major health, safety, social, and learning problems, especially in adolescents.

COLLEGE STUDENTS



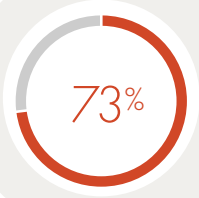
17.7% of ND **college** students reporting using nonmedical use of cannabis in the last three months.[5]

37% of ND **college** students reporting driving within six hours of using cannabis/marijuana in the last 30 days (of those reporting using cannabis in the last 30 days and those reporting driving in the last 30 days).[5]

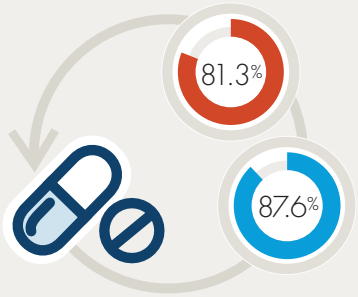


ADULTS

10.4% of ND adults (age 26+) report using marijuana in the past month, compared to **13.3%** nationwide.[6]

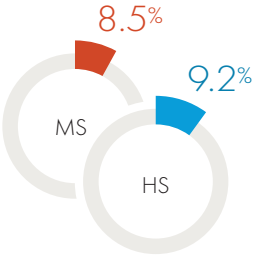


82.2% of North Dakotans (age 12+) do NOT perceive great risk from smoking marijuana once a month.[6]



Marijuana/hashish was found in **47.6%** of cases where drugs were seized in 2023.[12]

Three out of four ND adults believe it is a problem for ADULTS (73%).[8]



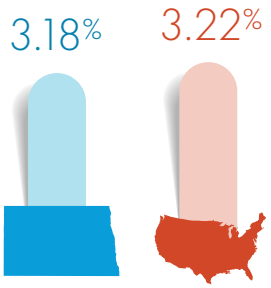
Opioids

Opioid misuse and overdose is a growing concern across the nation and in North Dakota communities.

More than **three quarters of ND adults** believe prescription drug use among both youth (81.3%) and adults (87.6%) is a problem in their community.[8]

YOUTH

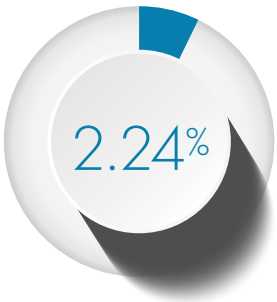
8.5% of ND **middle school students and 9.2%** of ND **high school students** report using prescription pain medication without a doctor's prescription one or more times during their lifetime.[4]



1% 1% of ND **high school** students report using heroin one or more times during their lifetime.[4]

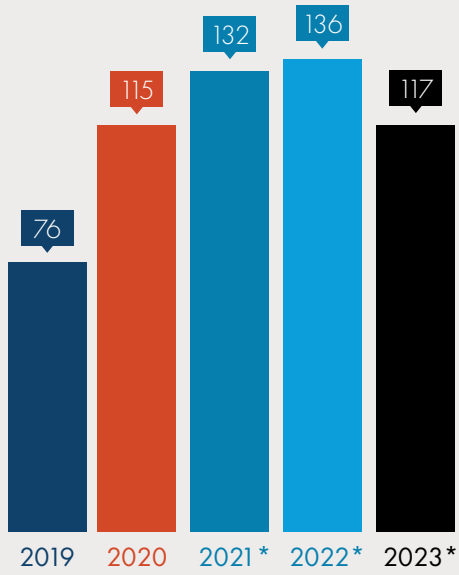
COLLEGE STUDENTS

0.7% of ND college students report nonmedical use of prescription opioids in the last three months.[5]



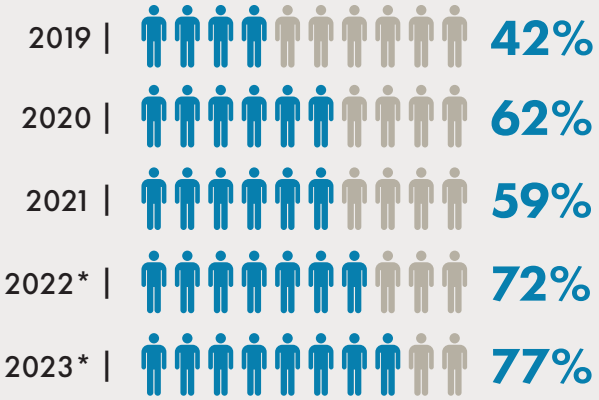
0.3% of ND college students report heroin use in the last three months.[5]

ADULTS



3.18% of ND **adults** (26+) report past year misuse of prescription pain relievers, compared to 3.22% in the U.S.[6]

0.46% of ND **adults** (26+) report past year heroin use.[5]

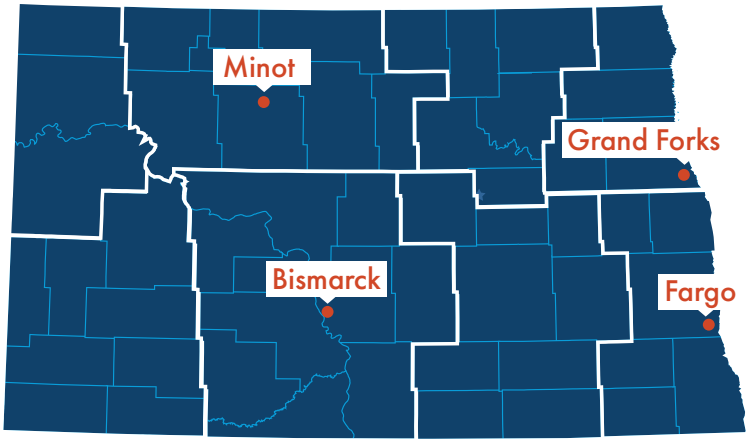


2.24% of ND **adults** (age 26 and older) meet the criteria for opioid use disorder within the past year.[6]

Drug Overdose Deaths in North Dakota[7]

*preliminary data

Percentage of Drug Overdose Deaths Where Fentanyl Was Present in Toxicology[7]



Nearly **84%** of drug overdose deaths in 2023 involved an opioid.[7]

24.5% of ND **adults** believe it is NOT at all difficult for youth or adults to access prescription drugs in their community.[8]

There are four opioid treatment programs in North Dakota.

As of July 1, 2022, 819 individuals were being served.

This is an increase from 761 individuals in July of 2020.

Save a loved one.

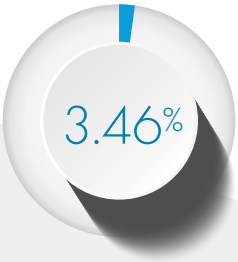
Know how to respond to an opioid overdose

1. Call 911 and administer naloxone.
2. Do rescue breathing or chest compressions. Follow 911 dispatcher directions.
3. Remain onsite until assistance arrives and cooperate with first responders.

Other Illicit Drugs

YOUTH

HIGH SCHOOL STUDENTS[4]
LIFETIME Substance Use



- Inhalants | 5.3%
- Cocaine | 2.2%
- Ecstasy | 2.4%

COLLEGE STUDENT

ND COLLEGE STUDENTS[5]
(Use in last three months)

- Inhalants | 0.7%
- Cocaine | 1.2%
- Hallucinogens | 2.0%
- Methamphetamine | 0.4%

ADULT

3.46% of ND **adults** (age 18 and older) report using illicit drugs (other than marijuana) in the past month.[6]

Drug/ narcotic violations offenses increased by

2.54%

from a total of 5,866 in 2022 to 6,015 in 2023.[12]

1,505 individuals received services at an authorized **syringe service program** in the state in 2023.

Syringe Service Programs are an important component to both disease prevention and connecting people to services. In 2023, **378** individuals were referred to substance use treatment as a result of syringe service programs.

694 individuals indicated that they had used Narcan for a total of **1,403** lives saved.

North Dakota Behavioral Health Principles

To deliver an effective response to people in need, the following principles should be embraced:

- Behavioral health is health.
- Support the full continuum of care across prevention, early intervention, treatment and recovery.
- Ensure behavioral health services and supports are available in the community: avoid institutionalizing and criminalizing.
- Services and supports are built to be person-centered, trauma-informed and recovery-oriented.

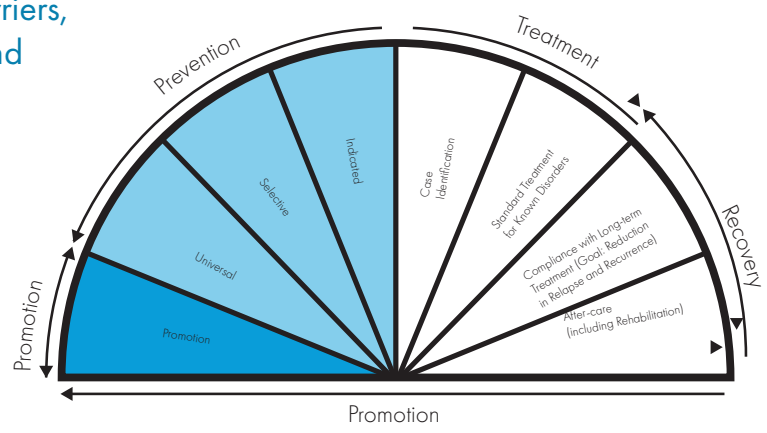
Foundation of Well-being

WE WANT TO SEE:

Individuals and strong, stable families thriving with their behavioral health while supported by communities and businesses that prioritize well-being.

Individuals struggling with behavioral health conditions achieve independence and live a self-directed life in recovery.

WE ACHIEVE THIS BY:



Identifying and addressing the many factors that influence an individual's likelihood to develop a substance misuse or related behavioral health problem.

These can be described as:

- Social determinants of health
- Risk and protective factors
- Building resiliency
- Adverse Childhood Experiences

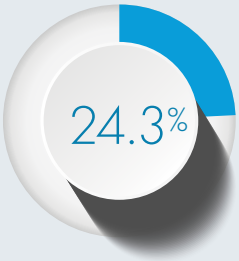
Behavioral health is an essential part of overall health in which promotion removes barriers, prevention works, treatment is useful and people recover.

Services throughout this continuum of care should reflect current knowledge, technology and evidence-based practice. Throughout all levels of the continuum, there should be continuous promotion of healthy behaviors and lifestyles, a primary driver of health outcomes.

SUBSTANCE MISUSE PREVENTION:

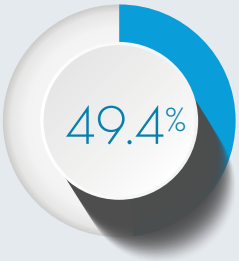
What it is, Why it Matters & What Works

What is Prevention?



Prevention is a proactive approach; creating an environment that promotes the health and well-being of individuals and communities, which prevents problems before they occur.

WHY IS IT IMPORTANT?



- Prevention is cost-effective; saving $64 for every $1 invested (on average).[26]
- Prevention improves the health of individuals, families and communities.
- Prevention decreases consequences and saves lives.

WHAT WORKS?

- Prevention focuses on reducing risk factors, strengthening protective factors and building resiliency of individuals, families and communities.
- Prevention follows the Public Health Model, focusing on population-level change.
- Prevention requires a multi-faceted approach, implementing a variety of evidence-based strategies working toward a common goal.
- It can take time to see the results of prevention.

24.3% of ND **adults** report their community is taking strong action to prevent the misuse of alcohol and other drugs.[8]

Half of ND **adults (49.4%)** are concerned about whether their community has sufficient alcohol and other drug abuse prevention programs.[8]

Behavioral Health Resource Highlights

Find Behavioral Health Services

The North Dakota Mental Health Program Directory provides a single place for North Dakota citizens to search for mental health services that meet their needs. This registry allows users to:

- Search by location and other details
- View program information, including program name, address and phone number

Find a mental health program near you:
hhs.nd.gov/behavioral-health/directory

North Dakota Human Service Centers (Community Behavioral Health Clinics)

North Dakota Health and Human Services' Behavioral Health Division operates eight regional clinics that provide behavioral health services to North Dakotans. Each center serves a designated multi-county area.

Visit www.hhs.nd.gov/HSC to find a location near you.

Behavioral Health Resource Highlights

Recovery Talk

If you don't know where to begin getting help with addiction for yourself or someone you know—start here. Call or text 701.291.7901 to speak to a trained peer support specialist with lived experience in addiction to chat and receive support.

988 Crisis Lifeline

If you or someone you know needs support, call or text 988 or chat 988Lifeline.org. 988 connects you with a trained crisis counselor who can help.

Purpose

This report presents an overview of the North Dakota Department of Health and Human Services' Behavioral Health Division with the intent to outline the division by first providing an overview of roles, responsibilities, and organizational structure; funding and initiatives; and then by aligning current initiatives with recommendations provided by the North Dakota Behavioral Health System Study.

North Dakota Behavioral Health Principles

- Behavioral health is health:
  - Stop the shame and stigma around behavioral health
  - Ensure integration and parity of health and behavioral health
- Support the full continuum of care across prevention, early intervention, treatment and recovery
- Ensure person-centered care:
  - Meet people where they are
  - Engage in individual and family-driven care
  - Provide trauma-informed services
  - Provide services focused on recovery
- Ensure behavioral health services and supports are available in the community: avoid institutionalizing and criminalizing
- Be efficient and effective:
  - Leverage best practices
  - Monitor and evaluate outcomes
  - Measure the return on investments
- Develop, recruit, and retain a competent behavioral health workforce

North Dakota Department of Health and Human Services

The North Dakota Department of Health and Human Services (HHS) is a state government agency with the mission to foster positive, comprehensive outcomes by promoting economic, behavioral, and physical health, ensuring a holistic approach to individual and community well-being.

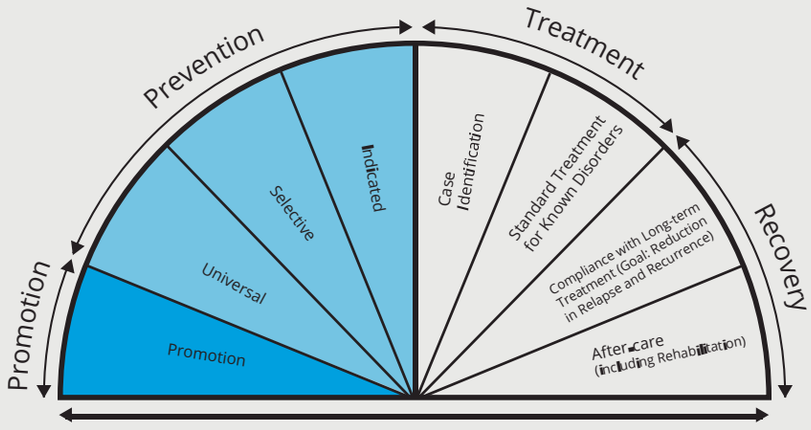
Behavioral Health Organization Chart

Behavioral Health Division

The Behavioral Health Division consists of a Policy and Administration team, the regional Human Service Center Clinics (Behavioral Health Clinics) and the State Hospital.



A Vision for Behavioral Health Services

"Behavioral health is an essential part of overall health in which promotion removes barriers, prevention works, treatment is useful, and people recover. Services throughout the continuum should reflect current knowledge, technology and be grounded in evidence-based practice. Throughout all levels of the continuum, there should be a continuous promotion of healthy behaviors and lifestyles, a primary driver of health outcomes."

Pamela Sagness, Executive Director

Our Approach

Services provided by the division are grounded in the Institute of Medicine's Continuum of Care model. The model recognizes the need for a full range of high-quality services including promotion, prevention, treatment, and recovery [SAMHSA].

Promotion & Prevention

Strategies create an environment that promotes the health and well-being of individuals and communities, which prevents problems before they occur.

Early Intervention

These strategies identify those individuals at risk for or showing the early signs of a disorder with the goals of intervening to prevent progression.

Treatment

Services are clinical interventions designed to address the needs of an individual with a behavioral health diagnosis.

Recovery

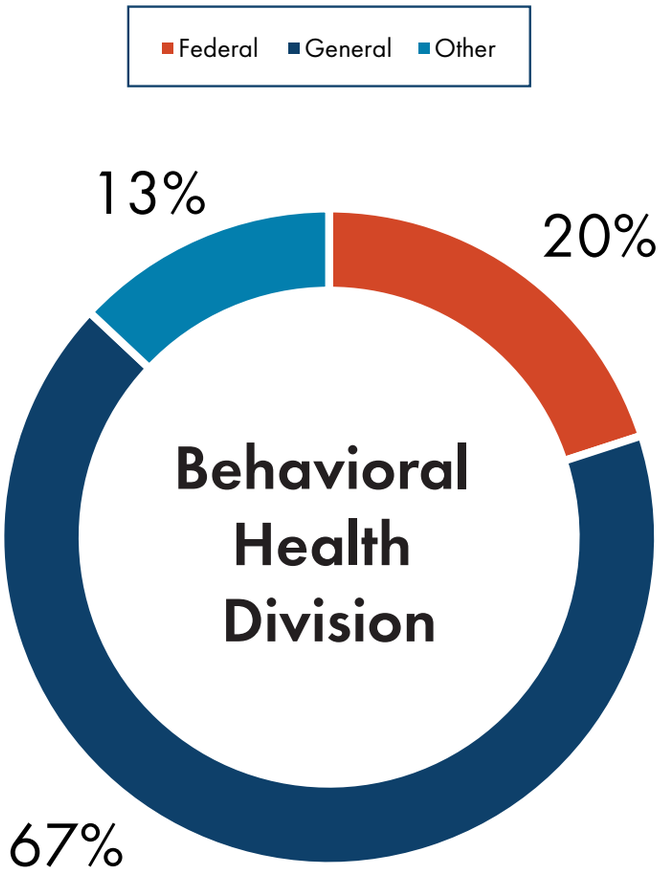
Services support the individuals' ability to live a meaningful, productive life in the community.

WE WANT TO SEE:

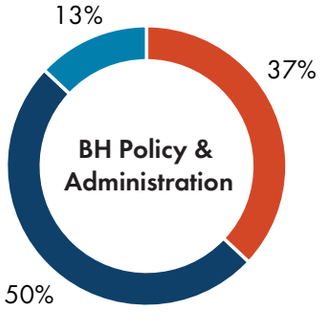
- Individuals, families, communities, and businesses with positive behavioral health.
- Individuals struggling with behavioral health conditions achieve independence and live a self-directed life in recovery.

WE ACHIEVE THIS BY:

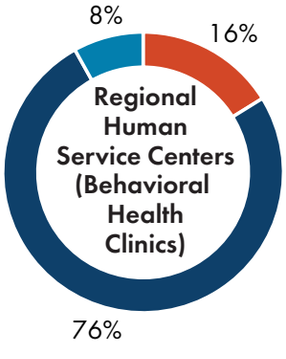
Supporting the full continuum of care



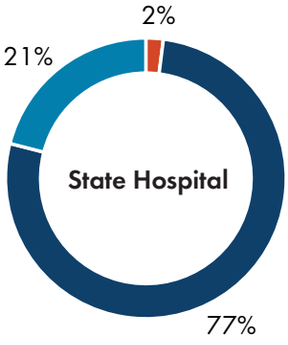
Increasing access to community-based services



Preventing criminal justice involvement



Behavioral Health Funding Overview



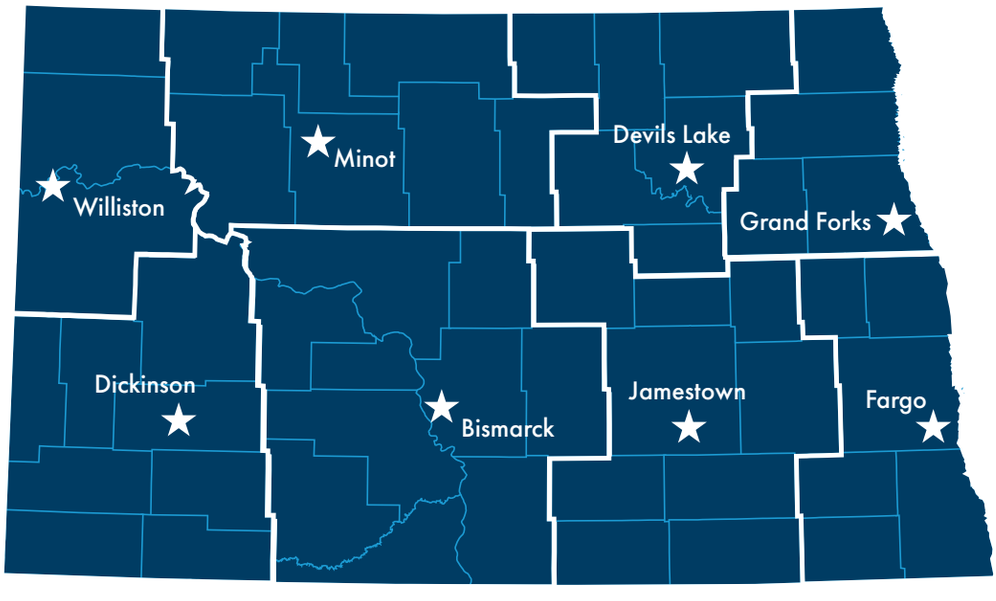
2023-2025 Biennium Appropriation

HHS administers state and federal funding to support the implementation of best practice to ensure the most effective, efficient and comprehensive behavioral health system.

Clinics

Regional Human Service Centers (Behavioral Health Clinics)

North Dakota Health and Human Services operates eight regional Human Service Centers (Behavioral Health Clinics) that provide behavioral health services to North Dakotans. Each center serves a designated multi-county area.



Region I
Northwest Human Service Center

Region II
North Central Human Service Center

Region III
Lake Region Human Service Center

Region IV
Northeast Human Service Center

Region VIII
Badlands Human Service Center

Region VII

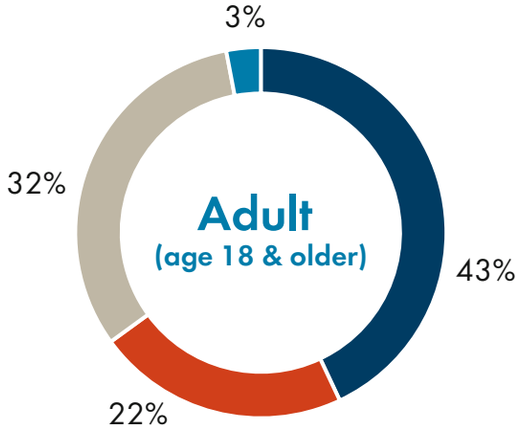
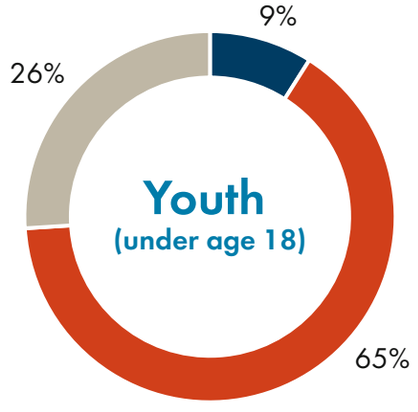
Region V
Southeast Human Service Center



Demographics of People Served

The Behavioral Health Clinics provided services to 18,418 people from January 2022 to June 2024.



55%
Male

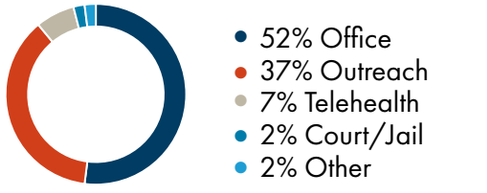
45%
Female

- Both mental health & Substance Use Disorder
- Serious Mental Illness
- Other mental health diagnosis
- Substance Use Disorder

- Both mental health & Substance Use Disorder
- Serious Emotional Disturbance
- Other mental health diagnosis

Services

From January 2022 to June 2024, 13,896 individuals were assessed for a level service with 7,566 being referred for ongoing services provided by the Human Service Center.

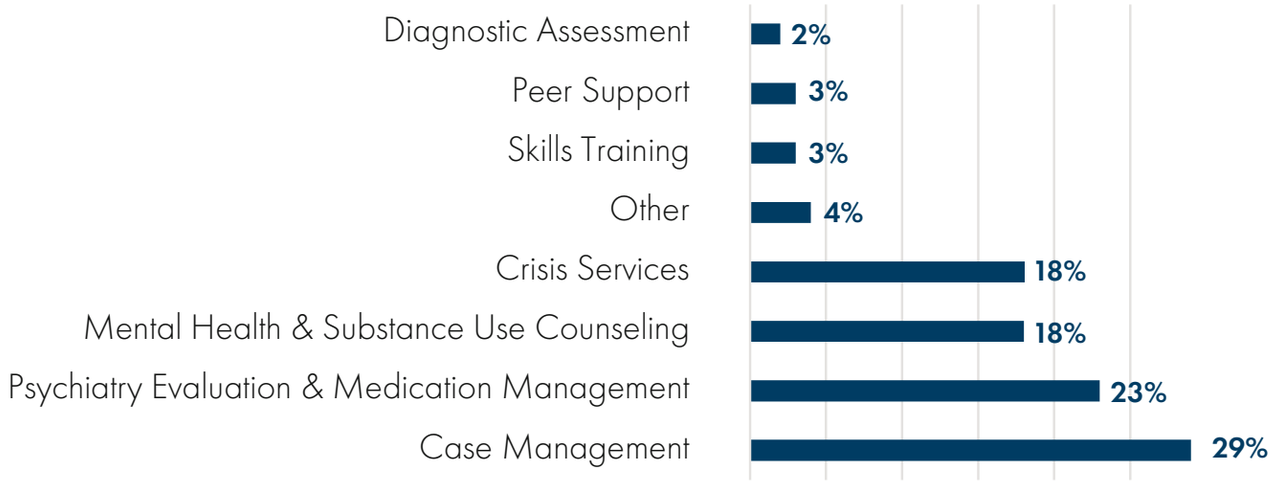


Individuals not referred for ongoing services through the Human Service Centers were referred to community treatment providers and social supports.

Type of Services Provided

- 29,595 assessment services
- 54,228 psychiatric services
- 40,277 crisis services
- 424,244 mental health and substance use services
- 2,784 psychological evaluations

Location at Start of Service



(does not speak to location of all services)

Services to Jails

10,625 services were provided to 2,088 individuals in a jail setting.

Percentage of total services provided to individuals in a jail setting:

Crisis services

Improvements to the clinic's Electronic Health Record (EHR) to better capture crisis services were implemented in September 2023. The following data is from September 2023 through August 2024.
9,084 crisis services were provided to 3,260 individuals.

As a result of the crisis response:

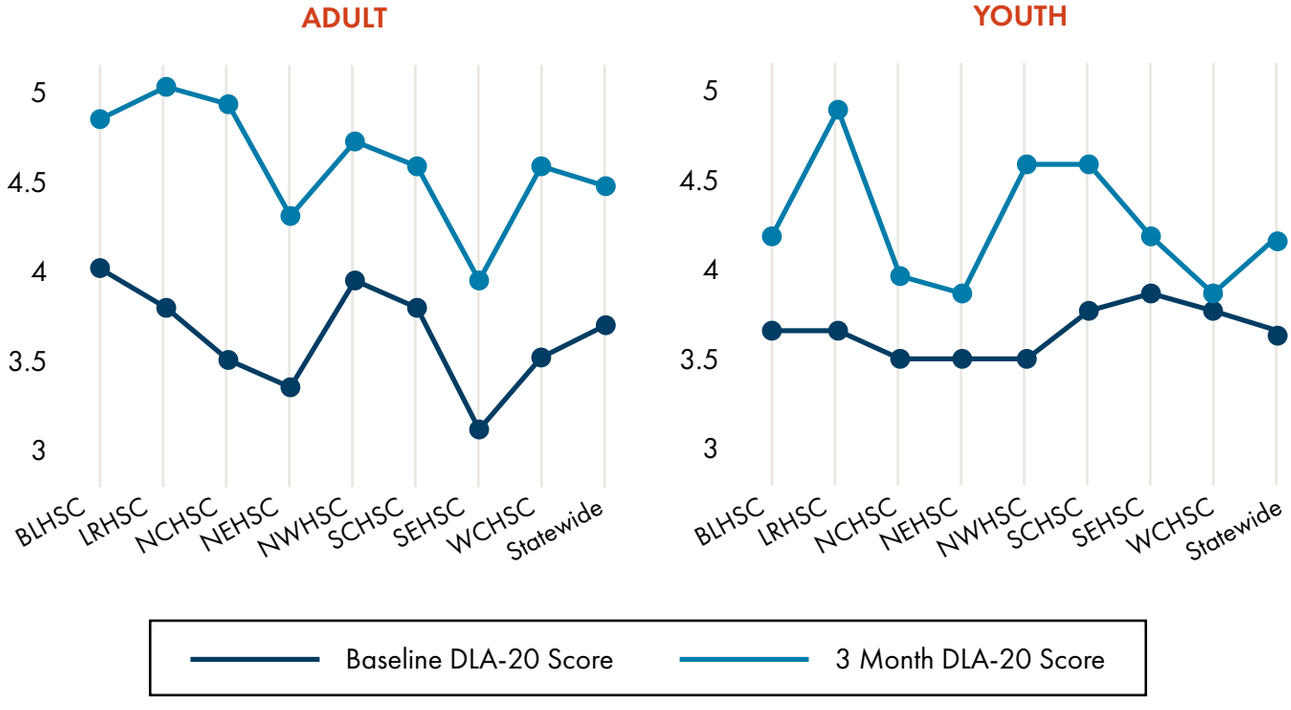
- 46% of individuals went to a crisis stabilization unit.
- 20% of individuals went to other facilities or natural supports.
- 17% of individuals were able to remain home.
- 12% of individuals went the emergency department.
- 5% of individuals went to detention or jail.

Services to Youth and Families

103,499 services were provided to 3,478 youth.

West Central and Lake Region Human Service Centers (WCHSC and LRHSC) are implementing efforts through a federal System of Care (SOC) Grant designed to enhance mental health outcomes for youth through the age of 21. This effort began in the spring of 2023.

Southeast Human Service Center (SEHSC) offers Multisystemic Therapy (MST), which aims to promote pro-social behavior and reduce criminal activity, mental health symptomology, out-of-home placements, and illicit substance use in youth. Since 2022, 64 youth have received MST services through SEHSC.



SEHSC and WCHSC operate a First Episode Psychosis (FEP) program funded by the federal Community Mental Health Services Block Grant (MHBG) which supports young people ages 16-35 experiencing early episodes of psychosis and their families in providing early intervention services. Since 2022, 67 individuals received FEP services.

Impacts

Daily Living Activities (DLA)-20 functional assessments assess the level of functioning or impairment compared to the entire population. Higher scores indicate more independence while lower scores indicate more difficulty with daily activities.

Between October 4, 2023, and October 4, 2024*, average DLA-20 scores improved across all eight Human Service Centers for both adult and youth individuals served from the beginning of service to three months later.

**DLA-20 data collection process was modified on 10/4/2023 thus limiting the ability to analyze data prior to this date.*

State Hospital

State Hospital

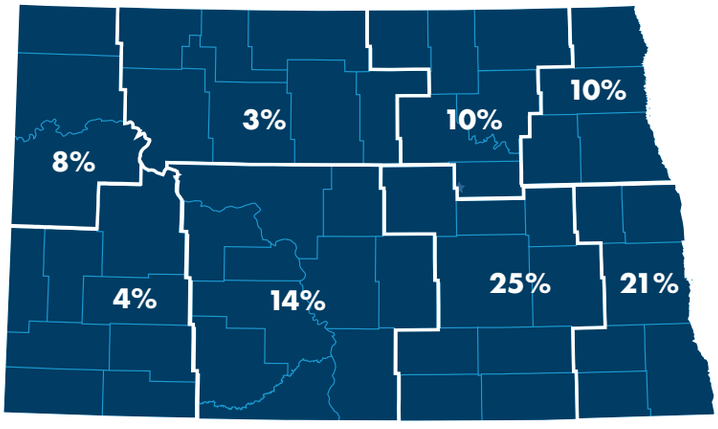
The North Dakota State Hospital, based in Jamestown, offers comprehensive behavioral health services for adults, including acute inpatient psychiatric care, substance use disorder treatment, intermediate psychosocial rehabilitation, forensic evaluations, and safety net services. For individuals requiring residential addiction treatment, the Tompkins Rehabilitation Center (TRC) serves male and female clients within the hospital's continuum of care.

The hospital also provides specialized, secure inpatient evaluation and treatment services for individuals deemed sexually dangerous, ensuring a structured and safe environment tailored to their specific needs.

Article IX, Section 12 of the ND Constitution outlines that the State Hospital must be located in Jamestown, ND.

ND Century Code 25-02 requires the ND Department of Health and Human Services to administer the State Hospital.

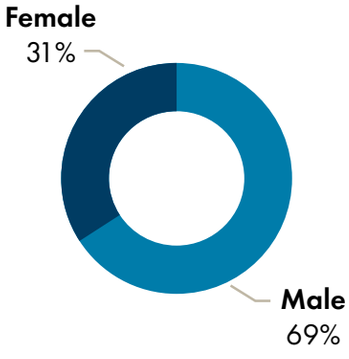
Number of Individuals Served (July 2023 - Nov. 30, 2024)



Total Hospital: 596 People

- **Inpatient Hospital:** 498
- **Sex Offender Treatment and Evaluation Program (SOTEP):** 30
- **Tompkins Rehabilitation Center:** 82

The State Hospital provides the following programs and services:



- Acute Psychiatric services
- Geriatric Psychiatric services
- Psychiatric Rehabilitation services
- Forensic services
- Sex Offender Residential Treatment
- Substance Use Disorder Residential Treatment

Home Region of Patients

Based on discharges between Nov. 29, 2023 and Dec. 19, 2024

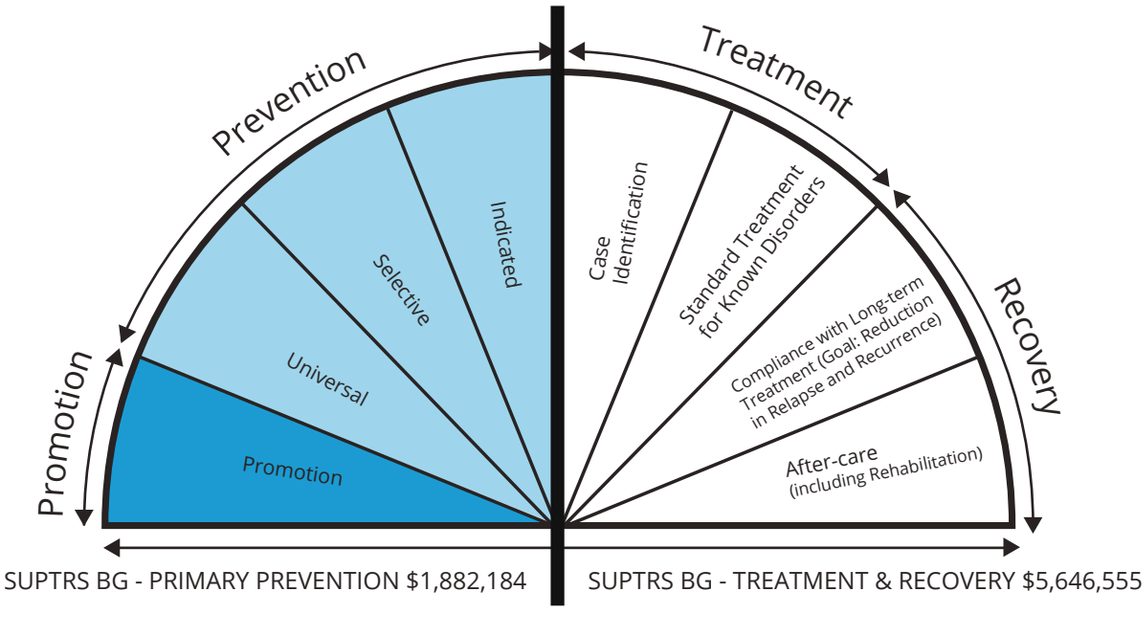
Community Behavioral Health Promotion

Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG)

The SUPTRS BG is authorized by section 1921 of Title XIX, Part B, Subpart II and III of the Public Health Service (PHS) Act. The PHS Act required the secretary of the U.S. Department of Health and Human Services to create regulations as a precondition to making funds available to the states and other grantees under the SABG. Title 45 CODE OF FEDERAL REGULATIONS Part 96 was published on March 31, 1993, and The Tobacco Regulations for Substance Abuse Prevention and Treatment Block Grant; Final Rule, 61 FEDERAL REGISTER 1492 was published on Jan. 19, 1996.

SAMHSA requires that grantees spend no less than 20% of their SUPTRS BG allotment on substance misuse primary prevention strategies. These strategies are directed at creating an environment that promotes the health and well-being of individuals and communities which prevents problems before they occur – and cannot be directed at individuals identified to be in need of treatment.

The Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG) program (through the Substance Abuse and Mental Health Services Administration [SAMHSA]) provides funds and technical assistance to all states and territories.



Health and Human Services utilizes the funds to plan, implement, and evaluate activities supporting the full continuum of care related to substance misuse.

The purpose of the SUPTRS BG is to:

- Provide priority treatment and support services that demonstrate success in improving outcomes and/or supporting recovery for individuals without insurance that are not covered by Medicaid, Medicare, or private insurance, or for whom coverage is terminated for short periods of time.
- Provide primary prevention by supporting universal, selective, and indicated prevention activities and services for persons not identified as needing treatment.
- Collect performance and outcome data to determine the ongoing effectiveness of behavioral health promotion, treatment, and recovery support services.

Funding

HHS receives approximately $7,528,736 per year. As of Oct. 2024, approximately $1,882,184 (25%) is allocated to primary prevention.

North Dakota Goals

Increase access to quality substance misuse-related services across the continuum of care.

PREVENTION

- Increase implementation of effective prevention statewide.
- Decrease underage drinking.
- Decrease adult binge drinking and related consequences.
- Decrease opioid misuse and related consequences.

TREATMENT/RECOVERY

- Increase evidence-based treatment and recovery support services, with a priority on high-risk populations:
  - Pregnant women and women with dependent children.
  - Individuals using drugs intravenously.

Activities

PREVENTION

- Training and technical assistance
- Community and tribal alcohol and other drug prevention programs across the state
- Underage drinking prevention efforts, including Parents Lead
- Adult binge drinking prevention efforts, including the Speak Volumes campaign
- Opioids: Take Care, Be Aware
- DUI education program licensing; provider certification
- Minor in possession education provider certification
- Synar program (youth tobacco enforcement)

TREATMENT/RECOVERY

- Public program funding
- Special Populations
  - Youth residential services program
  - Pregnant and parenting women
  - Tribal programs
- Recovery
  - Recovery Talk program
  - Mobile outreach program
  - Peer support development
- Withdrawal management
- Workforce development

SYNAR

The Synar regulation was formed after an amendment (section 1926) was added to the Alcohol, Drug Abuse, and Mental Health Administration Reorganization Act (PL 102-321) to address youth access to tobacco. The amendment, which is implemented by SAMHSA, requires states to enact and enforce laws prohibiting the sale or distribution of tobacco products to youth.

Currently, the Synar regulations require states to:

- Enforce underage access laws to a degree that reasonably can be expected to reduce the illegal sale of tobacco products.
- Conduct annual, unannounced inspections that provide a valid probability sample of tobacco sales outlets accessible to minors.
- Maintain tobacco retailer violation rate to 20% or less (a violation refers to youth being able to purchase tobacco products).
- Submit an annual report detailing activities to enforce the law.

WHAT IS THE LEGAL AGE TO PURCHASE TOBACCO?

The PL 116-94 Appropriations Bill signed into law by the President on Dec. 20, 2019, increased the minimum age for purchasing tobacco products from 18 to 21. This legislation (kown as "Tobacco 21" or "T21") was effective immediately which made it illegal to sell any tobacco product—including cigarettes, cigars, and e-cigarettes—to anyone under 21. The new federal minimum age of sale applies to all retail establishments and persons with no exceptions. Because of the federal changes, SAMHSA has updated its guidance document for the Synar program to increase the minimum age to 21 and requires states to enforce the new age requirement of 21.

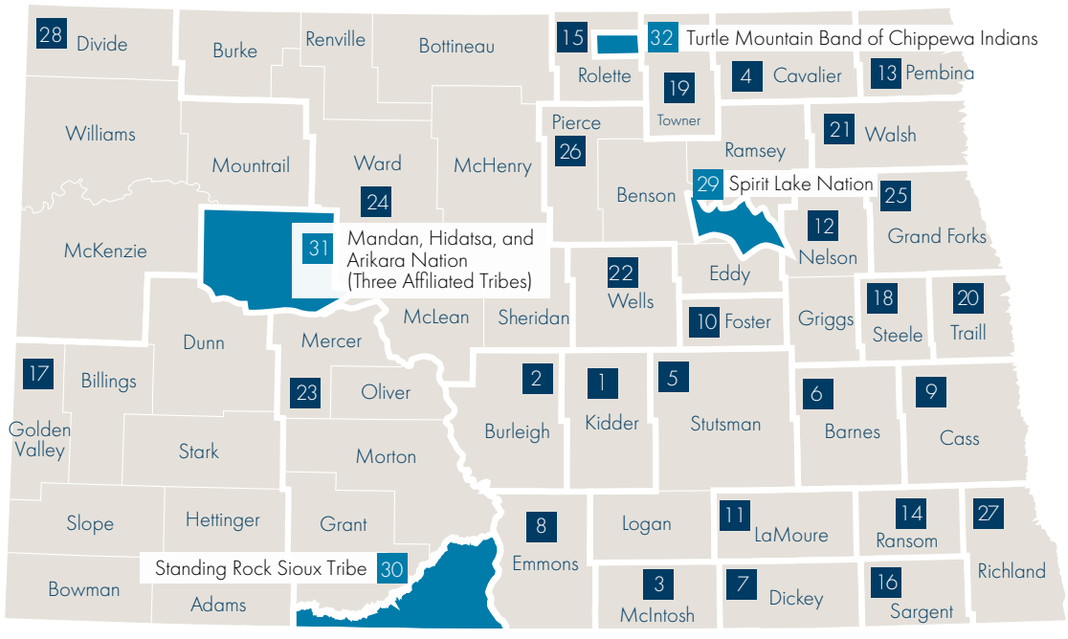
WHY IS SYNAR IMPORTANT TO NORTH DAKOTA?

States must comply with the Synar Amendment to receive the full Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG) award. Specifically, if the violation rate is greater than 20%, the state could lose up to 10% of this funding. North Dakota Health & Human Services receives approximately $7,528,736 annually; a 10% loss would equal $752,874. North Dakota's violation rate in 2024 was 16.8% which is a significant increase from 5.7% in 2020.

IS SYNAR EFFECTIVE?

While the national weighted average retailer violation rate (RVR) for the 50 states and the District of Columbia (weighted by state population) was 40.1% in FY 1997, the RVR has steadily fallen since then to 9.6% in FY 2018 meaning less retailers are selling tobacco to our youth.

Recent research shows the enforcement of youth access laws through the Synar program is directly responsible for a portion of the decline in youth smoking rates. The Synar program has also contributed to a decline in the percentage of youth smokers who report retail sources as their usual source of tobacco products. At the same time, tobacco use among youth has been declining. According to the North Dakota Youth Risk Behavior Survey, the percentage of high school students reporting current cigarette use dropped from 40.6% in 1999 to 5.4% in 2023.



WHAT CAN WE DO?

Active enforcement of youth tobacco access laws is an important component of a comprehensive youth tobacco prevention program and leads to reductions in youth smoking. All efforts to reduce youth tobacco access should be combined with other efforts to reduce youth tobacco use. We need to:

- Collaborate (creation of a youth access tobacco group/committee).
- Enforce youth tobacco access laws – statewide enforcement.
- Mobilize the community to reduce minors' access by implementing local efforts.
- Stronger restrictions/policies on retailer sales of tobacco products.
- Educate retailers (letters and packets to all establishments along with training opportunities).
- Increase the price of tobacco products.
- Implement mass media campaigns.

BG **Substance Use Prevention, Treatment, and Recovery Services Block Grant Substance Abuse Prevention Community and Tribal Grants**

Total award for Oct. 1, 2023 - Sept. 30, 2026 reporting period: $5.46 Million

Priority: Prevention of underage drinking and adult binge drinking

SOR **State Opioid Response Grant (SOR) Community Implementation Grant**

Total SOR award for Sept. 30, 2024 – Sept. 29, 2027: $4 million annually

Priority: Prevention, harm reduction, treatment, and recovery related to opioid and stimulant use and misuse

PFS **Partnership for Success Grant (PFS)**

Total PFS award for Oct. 1, 2023 - Sept. 30, 2028: $5 Million

Priority: Prevention with aims to reduce the onset and progression of alcohol misuse and its related consequences in young adults.

NORTH Dakota Be Legendary. | Health & Human Services

Training and Technical Assistance

Are you...

- Unsure of how to assess the issues within your community?
- Attempting to identify the best solution to a community problem?
- Trying to write a strategic plan for a prevention effort, recovery program or treatment initiative?
- Looking for how other communities accomplished a particular strategy?
- Dealing with low capacity, awareness or readiness within your community or organization?

The ND Training and Techincal Assistance team can assist with all of these and more!

The North Dakota Training and Technical Assistance Team strives to be accessible, responsive, comprehensive, effective and sustainable.

What is Training & Technical Assistance?

A collaborative process of providing targeted assistance and support.

What are the goals of Training & Technical Assistance?

Strengthen the capacity (resources and readiness) of individuals, groups, and organizations to implement and sustain effective strategies and positive outcomes in all areas of the continuum of care.

How is Training & Technical Assistance Delivered?

- In-person training
- Consultations
- Online events
- Collaboration and resource sharing
- Information dissemination
- Statewide and national meetings

The Training and Technical Assistance Team can offer information and support through a wide variety of topics and resources.

TOPICS

- Data collection and assessment
- Strategic planning
- Evidence-based prevention, treatment and recovery policies, programs and practices
- Comprehensive implementation
- Capacity building
- Cultural competency
- Sustainability
- Evaluation
- Data-driven decision-making
- North Dakota Century Code
- Subcontracting
- Risk and protective factors
- Media campaigns and promotion

RESOURCES

- Recorded training events
- Webinars
- Guidance documents on evidence-based strategy implementation
- Training videos
- Sample policies
- Sample Memorandums of Understanding (MOUs) and subcontracting documents
- Marketing tools
- Community success stories
- Access to resources through the Health and Human Service website

Early Intervention

Early intervention strategies identify individuals at risk for or showing the early signs of a disorder with the goal of intervening to prevent progression.

Research suggests that investing in early intervention services can contribute to a reduction in health care costs and help ensure the improved health and well-being of individuals. Early initiation of problem behavior and involvement in the criminal justice system is a risk factor for substance misuse and related consequences. Therefore, ensuring that this population is receiving evidence-based early intervention services is important in preventing further problems.

Minor In Possession Early Intervention

The Department of Health & Human Services (HHS) is authorized to certify Minor in Possession (MIP) instructors (NDCC 50-06-44) in an effort to:

- Prevent the onset of substance use disorders (SUD) among youth who do not yet meet criteria for SUD, but are exhibiting early warning signs.
- Increase capacity of the workforce.
- Increase access to evidence-based early intervention services.

As of October 1, 2024, there are 18 certified MIP education instructors.

MINOR IN POSSESSION (MIP) EARLY INTERVENTION CLASSES		
	July 2022 - June 2023	July 2023 - June 2024
Total classes taught	92	90
Total participants who completed the class	124	114
Total repeat participants	6	5

Driving Under the Influence Early Intervention

HHS licenses ASAM 0.5 Driving Under the Influence (DUI) Seminar Programs (NDCC 50-31) and certifies the instructors who teach these evidence-based classes.

	July 2023 - June 2024
Total classes taught	144
Total participants	513
Total repeat participants	12

39 DUI instructors are certified (as of Oct. 1, 2024).

Partnership for Success (PFS) Grant

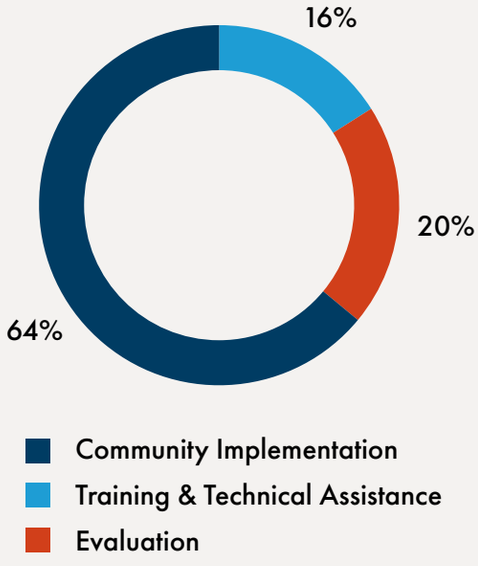
Awarded in September 2023, Health and Human Services (HHS) receives $1.25 million per year, for up to five years, to administer the PFS grant, funded through the Substance Abuse and Mental Health Services Administration (SAMHSA). The purpose of the PFS program is to help reduce the onset and progression of substance misuse and its related problems by supporting the development and delivery of state and community substance misuse prevention.

The PFS program is grounded in the Strategic Prevention Framework (SPF), a community engagement model grounded in public health principles, including providing data-driven evidence-based services to underserved communities.

The North Dakota PFS grant will address youth alcohol use by focusing on selective prevention efforts. Selective prevention measures target subsets of the total population that are considered at-risk for substance use/misuse.

Subgroups at greater risk of substance use/misuse:

- College students.
- Active-duty military members and their families.
- Children of parents with a substance use disorder or mental health condition.



Funding for high-need communities

In October 2024, 64% of the funding was allocated to support community providers. North Dakota identified five high-need communities to fund using a high-need community formula. Measures used in the high need community formula included capacity, consequences, consumption, intervening variables, and target populations.

- First District Public Health, Minot
- Grand Forks Public Health
- Lake Region District Health Unit, Devils Lake
- Richland County Health Department, Wahpeton
- Upper Missouri District Health Unit, Williston

North Dakota PFS funding allocations

Training and technical assistance

Youth Connections provide trainings to community grantees while HHS behavioral health team members also provide ongoing training and technical assistance.

Evaluation

Wyoming Survey and Analysis Center is contracted to conduct required federal evaluation activities of community and state-level activities.

Suicide Prevention

Suicide is a serious public health problem that can have long-lasting effects on individuals, families, and communities. Effective suicide prevention requires multiple approaches. This includes prevention and protective strategies for individuals, families, and communities. Everyone can help prevent suicide by learning the warning signs and promoting prevention and resilience.

NORTH DAKOTA INITIATIVES

988 Suicide and Crisis Lifeline

988 is a three-digit number for help dealing with substance use or mental health crisis. 988 officially launched on July 16, 2022, and is accessible 24/7, to anyone in need, anywhere in the United States.

When a North Dakota resident calls or texts 988, a trained crisis counselor at the state's Lifeline crisis center, FirstLink, answers. FirstLink staff listen to the caller, understand how their problem is affecting them, provide support, and share resources, if needed. If additional support is needed, FirstLink connects the person to their local Human Service Center's (Behavioral Health Clinic) mobile crisis team or in certain circumstances, to necessary emergency services. Along with call and text, a chat feature is also available via the 988 website, accessible by smart phone or computer: **chat.988lifeline.org**.

Since rolling out the 988 Suicide & Crisis Lifeline in July 2022, FirstLink has **answered nearly 14,000** contacts via 988— **over 10,000** more than the previous 12 months. Calls are answered at an average speed of **20 seconds**. With over **11,650** calls to 988, the average talk time is **15.8 minutes**. Since FirstLink began taking 988 chat and texts in February 2023, they have engaged with individuals via **1,015 chats and 1,273 text messages**.

Suicide & Crisis Lifeline

988

CALL, TEXT OR CHAT

Most recent period compared to implementation of 988 chat and text:
TEXTS: 54 in Jan. 2023; 120 in Sept. 2024 = 122% increase
CHATS: 73 in Jan. 2023; 82 in Sept. 2024 = 12% increase

Percentage increase for Sep. 2023-2024 compared to the previous year:
CALLS: 4,541 Sept. 22 - Sept. 23; 7,149 Sept. 23 - Sept. 24 = 57% increase

North Dakota's 988 media campaign carries the goal of reaching members of the general public and increasing call, text and chat volume to the 988 Suicide and Crisis Lifeline. Individuals and agencies can order 988 Suicide Prevention materials at no cost: Behavioral Health Free Resources > Suicide Prevention/988 (x-shops.com)

Suicide Fatality Review Commission

During the 68th Legislative Assembly of North Dakota, in 2023, Gov. Burgum signed House Bill 1390, which created and enacted a new section to chapter 23-07 of the North Dakota Century Code, relating to the creation of a Suicide Fatality Review Commission. This mandated Health and Human Services (HHS) to establish the Commission, which came to fruition in October 2024 with an initial meeting of the commissioned members. The first Commission meeting to review cases occurred in January of 2024.

The Commission is a multidisciplinary group of professionals and community members appointed by the North Dakota Department of Health and Human Services Commissioner that meets to evaluate the circumstances leading to and causing deaths by suicide in North Dakota to improve community and service systems and to take action to prevent further suicides. Suicide fatality review is a professional process aimed at improving system responses to individuals at risk for suicide. Commission reviews are designed to prevent suicide by eliminating stigma, providing access to resources, and increasing connectedness throughout the state of North Dakota well as examine systems issues, and not the performance of individuals.

Members of the North Dakota Suicide Fatality Review Commission are appointed by the Commissioner and include representatives from:

- ND Health and Human Services Behavioral Health Division
- ND Health Statistics and Performance Section in the Public Health Division of HHS, Surveillance & Data Management
- ND Health and Human Services - Human Service Center Clinics
- Sanford Health
- Cass County Coroner's Office
- State Forensic Examiner's Office
- University of North Dakota
- Metro-Area Ambulance Service, Inc.
- FirstLink, North Dakota's 988 Call Center
- Simle Middle School, Bismarck
- Fargo VA Health Care System
- American Foundation for Suicide Prevention
- Minot Police Department
- North Dakota Indian Affairs Office

The Suicide Fatality Review Commission has held four suicide fatality reviews since the beginning of 2024. Each Commission review looked at between four and six individual suicide death cases with a total of 18 cases reviewed. Suicide prevention recommendations were made and the Suicide Fatality Review Commission Report was written based on the findings of the Commission, along with the ND Child Fatality Review Team and the Cass County Suicide Fatality Review Team.

Suicide Prevention Community Program Funding Awards

HHS sought Suicide Prevention Community Programming efforts through an RFP posted Feb. 22, 2024. The RFP sought to procure agencies working to prevent deaths by suicide by supporting the implementation of prevention efforts using life skills and resilience, as well as connectedness, as areas of programmatic focus. The RFP resulted in six contracts beginning work on April 12, 2024. Work within these contracts will continue through June 30, 2025.

Grantee	Goals
Consensus Council – statewide	Consensus Council is partnered with West Fargo Public Schools and Bismarck Public Schools to provide restorative practices as both prevention and intervention from harmful behavior. These services allow students to build and repair relationships and provide an alternative to punitive and exclusionary discipline practices which disconnect and isolate youth from their school community and stigmatize their character upon return. Specifically, facilitators facilitate Belonging and New Student Circles which are six-week sessions designed for students to get to know their peers in a unique and intentional way, and Restorative Conferencing which allows students engaging in and/or impacted by harmful behavior to address and repair harm in a meaningful way. This program also provides an opportunity for students returning from suspension to revisit the incident leading to their discipline and engage them in repairing harm/relationships (when appropriate) and planning to prevent future harm from occurring. • To date, 36 students have been impacted by these services.
Cook Center for Human Connection – statewide	The Cook Center for Human Connection is offering a suicide prevention and awareness campaign by the name of My Life is Worth Living. More specifically, My Life is Worth Living addresses the alarming rise in youth depression, anxiety, and suicide in North Dakota by directly engaging youth and their families with research-backed suicide prevention strategies in compelling media, live interactive virtual events, and rich extended resources.
Eyes on the Horizon, LLC – statewide	This effort targets North Dakota farmers and ranchers, promoting the incorporation of protective factors through a three-pronged approach, farm/ranch couples retreats, presenting at agriculture industry meetings in cooperation with agriculture business partners, and media messaging promoting protective factors. • To date, program planning has occurred, retreats are scheduled for late fall 2024-early winter 2025, and radio ads have been recorded.
Haugen Performance Consulting, PLLC – Grand Forks, ND and statewide	This effort targets sport ecosystem stakeholders through the Ready, Set, Next (RSN) program, which is designed to increase resilience, coping skills, and connection within sport spaces. Courses are available for non-athlete stakeholders (e.g., sports medicine, coaches, administration) and collegiate student-athletes (six module workshop series delivered virtually throughout North Dakota). The programming is just launching as the first several months were preparation-focused while collegiate activities were on summer break.
Minot State University – ND Center for Persons with Disabilities	The Resilience Through Connection ECHO® aims to provide a deep exploration of the various factors that impact social connection and the predictors of loneliness. Sessions will be tailored with strategies to increase life skills, resilience, and foster a sense of connectedness for people with disabilities and individuals with poor mental health. This includes enhancing knowledge of protective factors against suicide, emphasizing the importance of social connectedness, and raising awareness of ND resources and activities that promote a sense of belonging.
Peer Vision – Minot, North Dakota	Peer Vision for Mental Health, through their Vets for Vets program, is working to build peer support availability in their city and region that promotes connection among former service members who are struggling with mental health concerns and interruptions in their overall wellness and quality of life. Peer support offers the opportunity for individuals to interact with others who are facing similar life struggles and promotes connection and belonging. Having a designated gathering space— the Minot Vets for Vets Center—with trained staff and volunteer peer support specialists and open hours that coincide with times when many individuals find a heightened need for support, provides a positive option for coping and connecting with others. Vets for Vets has seen increasing activity in bi-monthly peer support groups, community contacts and outreach.

Suicide Prevention Training Opportunities

American Foundation for Suicide Prevention (AFSP)
AFSP provides three trainings throughout North Dakota that are supported by HHS. These include the Clinical Approach to Preventing Suicide: An Introduction (CAPS), SafeSide Prevention, and Talk Saves Lives.

- As of Dec. 1, 2024, 13 trainings have been provided to 442 individuals across North Dakota.

FirstLink
FirstLink provides the Suicide Risk Assessment training. Through this training, participants learn to effectively use the Columbia-Suicide Severity Rating Scale (C-SSRS) screening tool to assess suicide risk and what appropriate next steps to take in a suicide crisis.

- As of Dec. 1, 2024, six trainings have been provided to 90 individuals across North Dakota.
- FirstLink has also completed six safeTALK trainings to a total of 57 people with this contract. safeTALK is a half-day training in suicide alertness that helps participants recognize a person with thoughts of suicide and connect them with resources who can help them in choosing to live.

Haugen Performance Consulting
HHS contracts with Haugen Performance Consulting, PLLC to provide VitalCog, an evidence-based suicide prevention training course to various stakeholders. Modules available include student athlete, athletics staff, workplace and construction. Courses can be presented virtually or in-person.

- As of Dec. 1, 2024, six trainings have been completed for 37 people.
- The individuals trained interact with 9217 unique student-athletes and 18,122 non-athletes in North Dakota.
- The next virtual training is January 27, 2025. In 2025, they will offer 1-2 trainings monthly.

PARENTS LEAD.ORG

Parents Lead is an evidence-based prevention program that provides parents and caregivers with a wide variety of tools and resources to support them in creating a safe environment for their children that promotes behavioral health.

Look. Listen. Love. Parenting doesn't have to be defined by moments of struggle. Ninety-nine percent of the job is showing up—being there for the small, everyday moments. Those small acts build stronger bonds and prevent issues like underage drinking, drug use, depression, and anxiety.

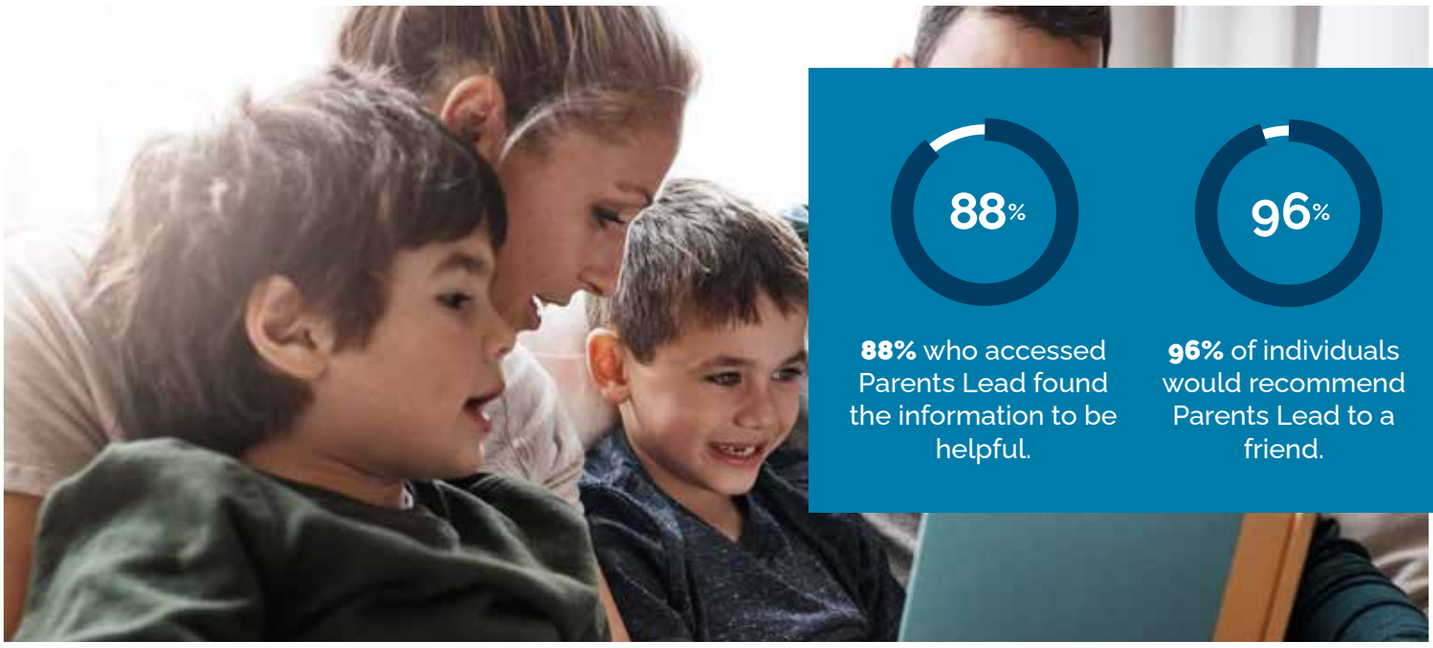
Look. It's as simple as being present. Pay attention to their behaviors, understand their needs, and encourage them in all moments. This builds trust and connection.

Listen. Open communication is key to promoting positive behavioral health. Make sure you and your children talk often, sharing thoughts and feelings freely.

Love. Above all, children need to know they are loved and valued. That sense of security and love is the foundation for their well-being.

Research continually shows when parents engage in **ongoing conversations**, **positive role-modeling**, **effective monitoring** and **support**, children are less likely to develop behavioral health issues like substance abuse, depression, anxiety, and suicidal thoughts.

Of parents exposed to Parents Lead, positive outcomes are seen in the four protective factors:

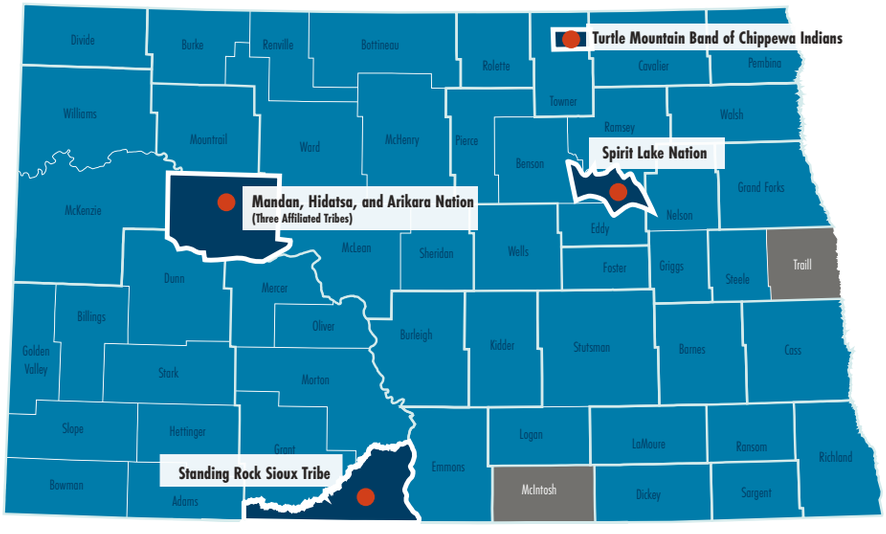


Ongoing Conversations
72% report having more conversations with their child about behavioral health.

Effective Monitoring
63% are more invested in monitoring their children.

Positive Role-Modeling
76% report role modeling responsible behaviors with their child.

Support and Engagement
64% report spending more quality time with their child.



Source: 2022 Pacific Institute for Research and Evaluation (PIRE) Parents Lead Survey results

88% who accessed Parents Lead found the information to be helpful.

96% of individuals would recommend Parents Lead to a friend.

Source: 2022 Pacific Institute for Research and Evaluation (PIRE) Parents Lead Survey results

Local implementation of Parents Lead is occurring in 51 of the 53 counties and 4 federally recognized tribes.

Statewide Communication

From October 2023 to September 2024, 219,736 Parents Lead materials were distributed, reaching countless families and communities. Additionally, a total of 3,008 hours have been dedicated to initiatives and activities that support parents and caregivers in promoting children's behavioral health.

The Parents Lead statewide media campaign has resulted in 21.5 million impressions by mass media, online displays, social media, online videos, and digital radio. (July 1, 2023-June 30, 2024)

Parents Lead Funding Sources

- ☑ State General Funds: $200,000 for 2023-2025 biennium.
- ☑ Department of Transportation NHTSA grant: $75,000 in FFY 2023, $140,000 in FFY 2024.
- ☑ SAMHSA Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG) Prevention dollars up to: $402,150 in FFY 2023

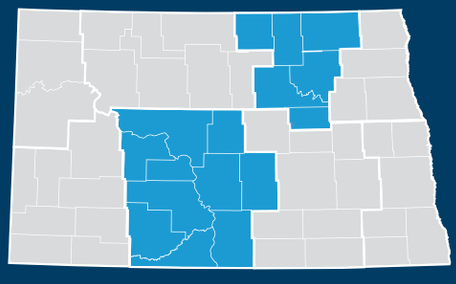
Children's Behavioral Health

System of Care (SOC) Grant

System of Care Framework

A System of Care (SOC) is a spectrum of effective, community-based services and supports for children, youth, and young adults with or at-risk for mental health challenges and their families. The primary goal is to help families function better at home, in school, and in the community. The services and supports aim to:

- Be organized into a coordinated network across the continuum of care.
- Build meaningful partnerships with youth and families.
- Address the unique and cultural and linguistic needs of each child and family.



The dimensions of System of Care include the integration of all child-serving services and supports. These include both professional and natural supports across the lifespan.

The System of Care (SOC) grant is designed to enhance mental health outcomes for children and youth, birth through age 21. The goals of North Dakota's System of Care initiative are:

- To increase access of high-quality and culturally appropriate services and supports available to children with serious emotional disturbances (SED) and their families in the identified regions, and;
- To develop a sustainable infrastructure to support the System of Care approach for North Dakota children with SED and their families.

North Dakota was one of six states to be awarded $3 million per year (starting in 2022) for four years by the federal Substance Abuse and Mental Health Services Administration as part of the System of Care Expansion and Sustainability Grant (SOC). The initial grant efforts will be focused in two regions of the state.

Grant Priorities and Milestones

Infrastructure Development:

- **Local/Regional Empowerment:** Regional SOC Steering Committees have convened since April 2023 to provide guidance on System of Care implementation.
- **Youth and Family Involvement:** Parent with lived experience as part of the SOC state team and engaging individuals with lived experience in SOC steering committees.
- **Cross-system Partnerships:** Investment in developing partnerships across child-serving systems including behavioral health, child welfare, juvenile services, schools, and the private sector.
- **Tribal-State Partnerships:** Development of partnerships and funding streams with MHA Nation, Standing Rock Sioux, Spirit Lake Nation, and Turtle Mountain Band of Chippewa Indians to serve Native American youth and families.
- **Workforce Development:** Hired personnel in regional HSCs and other child-serving settings to provide home and community-based services for children with behavioral health needs and their families. This includes investing in training in Functional Family Therapy, Parent and Caregiver Peer Support, SPARCS, Seeking Safety, TF-CBT, EMDR, Play Therapy, and other evidence-based practices.
- **Sustainability:** Invest directly in the implementation and expansion of reimbursable behavioral health services, 1915(i) home and community-based services, and Title IV-E Prevention Services.
- **Data evaluation:** Completed regional needs assessments and asset mapping. Targeted evaluation focused on assessing clinical and social outcomes of youth and families to support ongoing implementation and sustainability.

Data Highlights

Sept. 30, 2023 - Sept. 29, 2024

745

Individuals trained in behavioral health evidence-based practices.

1,110

Youth and families engaged in program outreach efforts.

1,959*

Youth and families receiving evidence-based mental health services.

*number of individuals served is a duplicated count across quarters for grant year 2.

Note: This work aligns with the Human Services Research Institute's report to enhance and streamline the system of care for children and youth (HSRI Aim 5).

Service Implementation

Prevention and Early Intervention

- Parent Child Interaction Therapy (PCIT) and Parent Child Psychotherapy (CPP) treatment services for early childhood.
- Healthy Families ND expansion of home visitation (ages 0-3).
- Native American community-based cultural programming.

Outpatient and Integrated Care

- Trauma-focused CBT (TF-CBT), Eye Movement and Desensitization and Reprocessing (EMDR), Play Therapy, and other evidence-based practices delivered in outpatient and integrated settings.
- SPARCS and Seeking Safety treatment groups in school settings.
- Parent Support and Psychoeducation Groups.
- School-based Care Coordination for children with behavioral health needs.
- Funded salary and benefits of Clinicians in both SOC regions to expand the capacity to serve and travel to rural and underserved regions.

Intensive Home and Community-Based Services

- Psychiatric Residential Treatment Facility (PRTF) Aftercare intensive care coordination, Functional Family Therapy, intensive in-home treatment.
- Care coordination, peer support, and independent living skill groups for transitional-aged youth (ages 16 through 21).
- Family Check-up/Everyday Parenting program.
- Community-based care coordination, birth through age 21.

Partial Hospitalization or Day Treatment

- Child and Adolescent Partial Hospitalization Program at CHI Alexius Hospital.

Crosscutting Implementation and Planning

- Parent and Caregiver Peer Support
- High Fidelity Wraparound – intensive care coordination for youth in multiple systems
- Parents with lived experience serving parents and caregivers of children with behavioral health needs.

Behavioral Health and Education System Integration – The Basics

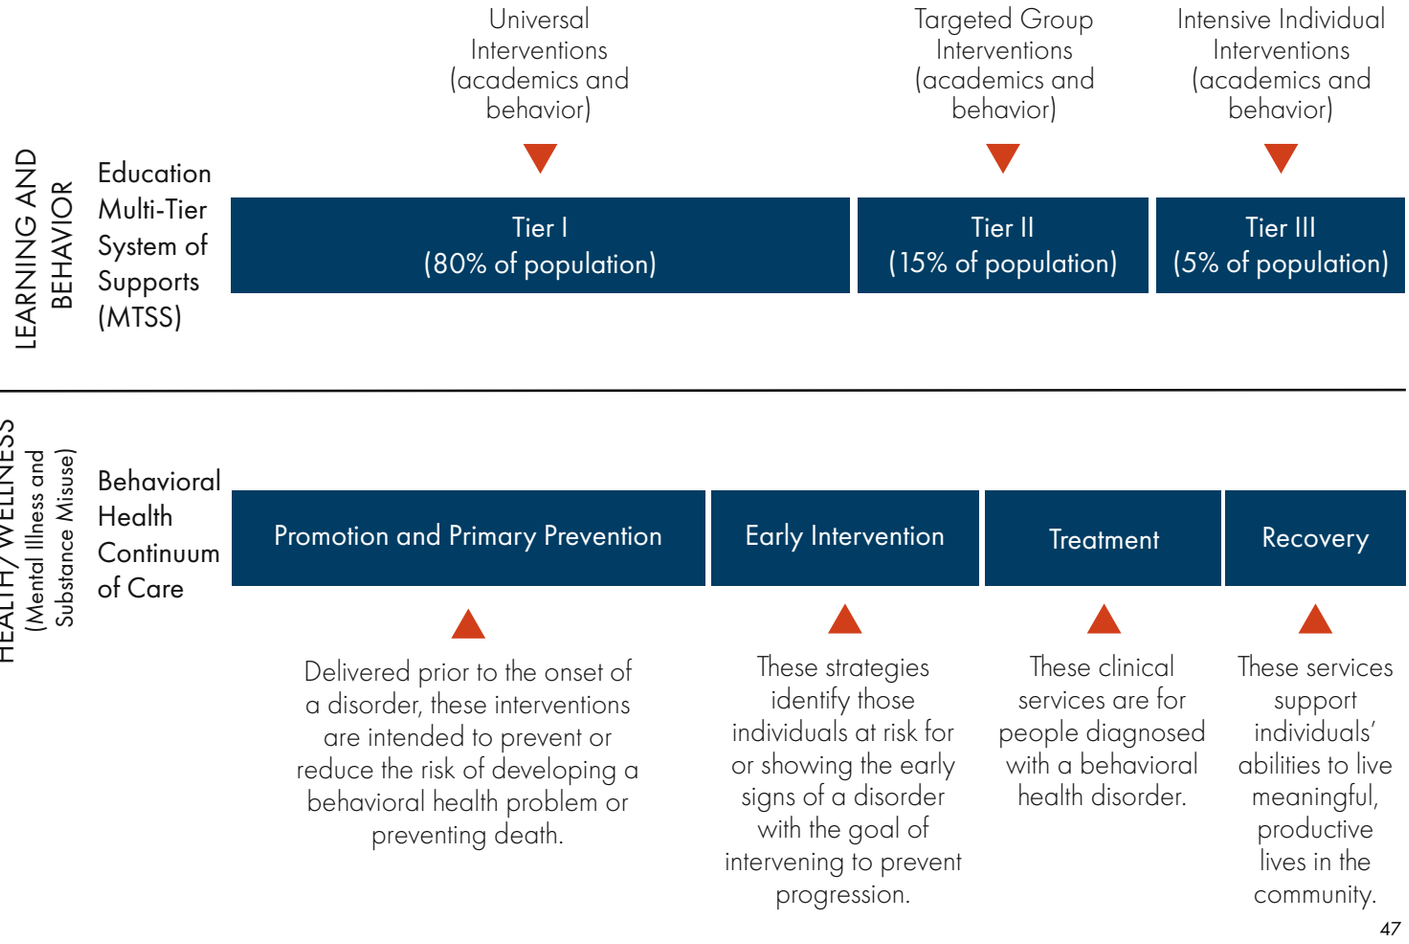
LANGUAGE MATTERS

The behavioral health system and education system speak different languages.

WHAT IS BEHAVIORAL HEALTH?

A state of mental/emotional being and/or choices and actions that affect wellness.

Examples are:



- Preventing and treating depression and anxiety.
- Preventing and treating substance use disorder or other addictions.
- Supporting recovery.
- Creating healthy communities.
- Promoting overall well-being.

Behavioral health needs are not synonymous with:

- The special education needs identified through an Individualized Education Program (IEP).
- School safety issues.

Considerations for Integration of Behavioral Health and Education

What systems are needed for schools to identify behavioral health needs?

Schools report feeling pressured to become behavioral health experts and providers. It is crucial that these services are provided by appropriate behavioral health clinicians for liability and billing reasons.

BEHAVIORAL HEALTH PROFESSIONAL TIERS (NDCC 25-01-01)

The tiered system for behavioral health professionals in North Dakota was established in 2017, by the 65th Legislative Assembly and is found in Chapter 25-01-01 of the ND Century Code. The intent of the tiered system was to establish a basic ranking of behavioral health professionals (both licensed and unlicensed) based on education and scope of practice.

Tier 1 mental health professional

A tier 1a mental health professional is

- a psychiatrist licensed under chapter 43-17 (PHYSICIANS AND SURGEONS)
- a psychologist licensed under chapter 43-32 (PSYCHOLOGISTS)

A tier 1b mental health professional is

- a licensed physician or a physician assistant licensed under chapter 43-17 (PHYSICIANS AND SURGEONS)
- an advanced practice registered nurse licensed under chapter 43-12 (NURSE PRACTICES ACT)

Tier 2 mental health professional

A tier 2a mental health professional is an independent clinician who is

- a licensed clinical social worker under chapter 43-41 (SOCIAL WORKERS)
- a licensed professional clinical counselor licensed under chapter 43-47 (COUNSELORS)
- a licensed marriage and family therapist licensed under chapter 43-53 (MARRIAGE AND FAMILY THERAPY PRACTICE)

A tier 2b mental health professional is

- an addiction counselor licensed under chapter 43-45 (ADDICTION COUNSELORS)
- a registered nurse licensed under chapter 43-12 (NURSE PRACTICES ACT)

Tier 3 mental health professional

- a licensed associate professional counselor licensed under chapter 43-47 (COUNSELORS)
- a licensed master social worker or licensed baccalaureate social worker under chapter 43-41 (SOCIAL WORKERS)
- a licensed professional counselor licensed under chapter 43-47 (COUNSELORS)
- an associate marriage and family therapist licensed under chapter 43-53 (MARRIAGE AND FAMILY THERAPY PRACTICE)
- an occupational therapist licensed under chapter 43-40 (OCCUPATIONAL THERAPISTS)
- a licensed practical nurse licensed under chapter 43-12 (NURSE PRACTICES ACT)
- a behavior analyst licensed or registered under chapter 43-32 (PSYCHOLOGISTS)
- a vocational rehabilitation counselor practicing under chapter 50-06.1 (VOCATIONAL REHABILITATION)
- a school psychologist
- a human relations counselor

Tier 4 mental health professional

- direct care associate or technician

Children's Behavioral Health Prevention and Early Intervention Pilot Grant

The ND 65th Legislative Assembly initiated a children's behavioral health prevention and early intervention pilot project, allocating $150,000 to HHS. With SB 2012, the 66th Assembly provided $300,000 to expand the project to include one rural and one tribal school.

Project goal

To demonstrate improvement to children's behavioral health in a school setting and identify how a fully integrated continuum of support could look in various schools throughout North Dakota.

Three toolkits to support implementing multi-tiered systems of support at the building level are available for all school administrators and staff.

Support is provided to students based on identified need, emphasizing prevention and early intervention. Examples of services provided in the pilot include:

- School-wide positive behavioral supports.
- Whole class lessons on behavioral health topics.
- Individual counseling and/or social skills sessions for students at risk.
- Culturally sensitive staff development.
- Contract with outside mental health professionals to deliver mental health services within the school setting.

Implementation Highlights

Dunseith Elementary

- Funding for identified students to receive support from a mental health provider when insurance, co-pays, or high deductibles are a barrier.
- Collaborative support and consultation for school staff from a mental health provider.
- During the 2023-2024 school year, 154 students received support through these dollars.

Barnes County North

- Funding for identified students to receive support from a mental health provider when insurance, co-pays, or high deductibles are a barrier.
- Travel for mental health provider to travel to support students in the school building.
- Professional Development opportunities for staff.
- During the 2023-2024 school year, 33 students received support through these dollars.

School Behavioral Health Grant

The ND 66th Legislative Assembly passed SB 2012, appropriating general fund dollars to provide behavioral health services and support grants to school districts for addressing student behavioral health needs.

PROJECT GOAL

Identify and address gaps along the behavioral health continuum of care.

This includes:

- Identifying prevention and early intervention services.
- Supporting clinical or treatment services.
- Filling gaps in service coverage.

Grant funds cannot be used where reimbursement or funding is available.

ELIGIBLE APPLICANTS

Applications are accepted from North Dakota public or private elementary or secondary schools which meet the following criteria:

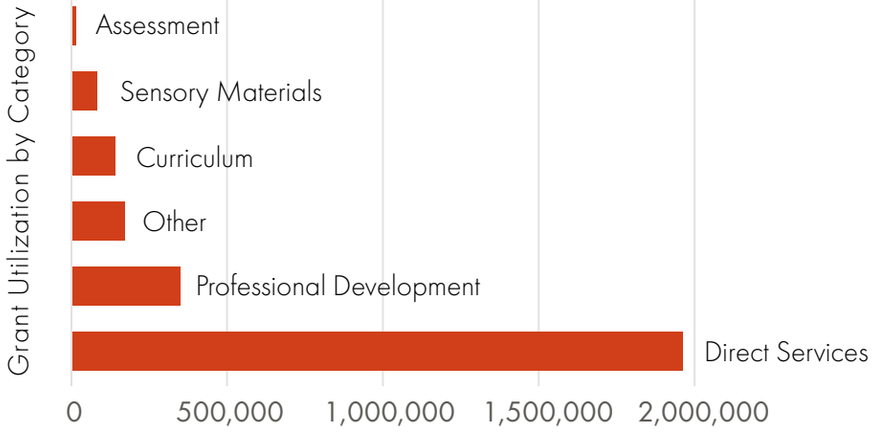
- Utilize ND State Medicaid reimbursement during the previous school year.
- Submit a plan to Health and Human Services detailing collaboration with other regional school districts regarding student behavioral health needs and the use of grant funding to develop student behavioral health interventions.

2021-2023 biennium appropriation: $3 million | 2023-2025 biennium appropriation: $9.5 million

2024-2025 SCHOOL YEAR

25 school districts and special education units are eligible to apply for funding totaling $4,483,793.84.

- As of Nov. 15, 2024, 20 eligible districts/special education units have been approved for funding totaling $3,721,086.96.



The amount billed for school-based services to Medicaid during the 2023 - 2024 school year increased by over $1.5 million from the previous school year. This means school districts and special education units are eligible for $1.5 million more during the 2024-2025 school year than the 2023-2024 school year.

2023-2024 SCHOOL YEAR

Twenty-four ND school districts or special education units received funding. These entities received a total of $2.7 million to use towards the behavioral health needs of students.

- Bismarck Public Schools
- Carrington School District
- Dickinson Public Schools
- East Central Special Education Unit which includes Kensal, Pingree-Buchanan, and Fessenden-Bowdon
- Fargo Public Schools
- Grand Forks Public Schools
- GST Special Education Unit
- James River Special Education Unit
- Jamestown Public Schools
- Lake Region Special Education Unit
- Mandan Public Schools
- Minot Public Schools
- New Rockford Sheyenne District
- Oberon Public School
- Oliver-Mercer Special Education Unit
- Rural Cass Special Education Unit
- Sheyenne Valley Special Education Unit
- Souris Valley Special Education Unit
- South Valley Special Education Unit
- Upper Valley Special Education Unit
- Wahpeton Public Schools
- West Fargo Public Schools

Approved Funding Categories

Examples:

Direct Services – therapy / clinical counseling– for students with no insurance or to cover co-pays, BCBA contracts/consults, targeted case management, extended school psychology services

Professional Development – safety care, trauma training, nonviolent crisis intervention training, restorative practices training

Curriculum –second step curriculum, applied behavior analysis curriculum, autism curriculum, social skills

Sensory Materials – flexible seating, fidgets, sensory room materials

Assessments – functional behavior assessments, Devereux Student Strengths Assessment

Other - transportation costs, survey platforms, student retreats

Behavioral Health in Education Resources and Opportunities Technical Assistance Center (B-HERO)

The ND 66th Legislative Assembly passed Senate Bill 2149, which established the requirement for each school within a district to designate an individual as a Behavioral Health Resource Coordinator, and Senate Bill 2313, which required the Health and Human Services (HHS) Behavioral Health Division to provide resources on mental health awareness and suicide prevention to the Behavioral Health Resource Coordinators.

In November 2020, HHS awarded a contract to the Central Regional Education Association (CREA) – one of 7 regional education associations within North Dakota – to provide resources, information, and support to school Behavioral Health Resource Coordinators (BHRCs). As a result, the Behavioral Health in Education: Resources and Opportunities (B-HERO) Technical Assistance Center was formed.

Who is B-HERO?

A group of educators and advocates passionate about the importance of behavioral health in North Dakota schools and communities.

WE PROVIDE ACCESS TO:

- Trainings
- Technical Assistance
- Opportunities

WE WANT TO HELP:

- Stop the Stigma
- Build Healthier Schools
- Avoid Burnout

Since inception in Spring of 2021, B-HERO has disseminated weekly communications to the 375 unique BHRCs throughout the state and has supported 348 educators through technical assistance and BHRCs communities of practice. Through its weekly messaging, B-HERO has focused on providing evidence-based resources aimed at supporting behavioral health, and has told the stories of programs and services that work in North Dakota schools.

Overall, B-HERO has reached dozens of schools in North Dakota in the past two years through training offerings, including upwards of 2,200 educators.

Since the 2021-2022 school year, B-HERO has implemented and supported the following endorsed training opportunities to BHRCs and other educators throughout the state on a variety of topics, including:

Suicide Prevention & Intervention

- Sources of Strength
  - To date, 9 schools have been supported in some capacity. In total, 366 students and 85 school staff members have received training in Sources of Strength.
- Question, Persuade, Refer Suicide Prevention Gatekeeper Training
  - Since Spring of 2022, over 139 educators have received QPR Training.

Relationship Building & Dropout Prevention

- Harvard Relationship Mapping Protocol
  - B-HERO developed a Facilitator Training on the protocol. Upwards of 242 educators have received training in the Relationship Mapping protocol, with 19 trained as facilitators across the state.
- Check & Connect
  - Since fall of 2021, 10 schools have implemented a dropout intervention program.

Trauma

- Trauma-Sensitive Schools: A New Perspective on Student Behavior and Learning
  - Since June of 2021, B-HERO has facilitated Trauma Sensitive Schools Training for over 300 educators, with 50 receiving certification to deliver the professional learning curriculum. 12 of those trainers are BHRCs.
  - Bounce Back or Support for Students
- Exposed to Trauma
  - Since fall 2023, 120 educators have been trained in these trauma focused interventions for elementary and secondary grade levels.

School Crisis Prevention & Intervention

- PREPaRE School Crisis Prevention & Intervention Training
  - Since Spring of 2022, 81 school staff have been trained in Workshop I and/or II of the model.
  - It is anticipated that 180 educators will be trained during the 2024-2025 school year.

Restorative Practices

- During the 2023-2024 school year, 37 educators have been trained in Restorative Practices.
- It is expected that 265 educators will be trained in this evidence-based intervention during the 2024-2025 school year.

Pediatric Mental Health Care Access Program (PMHCA) Grant

Health and Human Services (HHS) was awarded a three year continuation (2023-2026) grant by the Health Resources and Services Administration (HRSA), Maternal and Child Health Bureau (MCHB) to expand tele-behavioral health services for children and youth within the state.

The Pediatric Mental Health Care Access program is intended to promote behavioral health integration into pediatric primary care by using telehealth services to provide high quality and timely detection, assessment, treatment and referral for children and adolescents, with behavioral health conditions, using evidence-based practices and methods. This is implemented through the following activities:

1. **Promote** behavioral health integration in pediatric primary care in new or existing telehealth access programs.
2. **Provide** training and education to support the treatment of children and adolescents with behavioral disorders.
3. **Support** telehealth consultation and referral to a local pediatric behavioral health provider, to the extent possible.
4. **Serve** as a resource for pediatric primary care providers, psychiatrists, mental health professionals, and care coordinators.

The North Dakota PMHCA program increases pediatric providers' comfort to treat and manage mild to moderate behavioral health concerns in day-to-day practice through:

PROVIDER EDUCATION
Project ECHO is a collaborative model for behavioral health knowledge sharing and care management that helps clinicians and community providers better serve their patients through advanced curriculum and training, along with discussions on current case studies.

BEHAVIORAL HEALTH TELECONSULTATION
Behavioral Health Clinicians provide HIPAA compliant guidance on treatment and management of pediatric behavioral health conditions through telephonic consultation to providers.

REFERRAL NETWORK
Care Coordination services are available for the families that providers serve through the consultation line. Care Coordination is currently done through Family Voices.

FUNDING: 2023-2024- $850,000 | 2024-2025- $858,000 | 2025-2026- $700,000

*Federal awards require a 20% State Match

North Dakota Grant Goals

Goal 1: Increase the capacity of primary care providers to screen, diagnose and treat children for behavioral health disorders in primary care settings.

Goal 2: Develop and create capacity for telehealth programs in community-based settings by expanding partnerships within emergency departments and schools.

Implementation Progress (through Aug. 2024)

- 99 enrolled providers for the PMHCA program within 7 clinics.
- Conducted ECHO training sessions to 241 professionals on different behavioral health topics.
- Provided 18 consultation calls for Primary Care providers to receive collaboration on detection, assessment, treatment and referral for children and adolescents.
- Provided Care Coordination to 18 families within North Dakota.
- Increased sites for care delivery to include Local Public Health Units, Full Service Community Schools, University of North Dakota mobile clinic and other youth serving entities.
- Increased communication to providers and professionals on North Dakota databases to include the Mental Health Directory, FirstLink, Bed Registry and other Behavioral Health resources within the state.
- Implemented various Behavioral Health trainings within 37 schools across North Dakota to include Check and Connect, Bounce Back, Supporting students exposed to trauma, Tough Kids, Nurtured Heart, Trauma Sensitive Schools and other evidence-based trainings.

Treatment Collaborative for Traumatized Youth (TCTY)

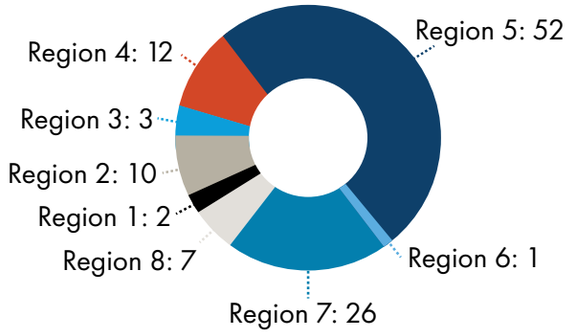
The Treatment Collaborative for Traumatized Youth (TCTY) mission is to enhance the availability of evidence-based mental health treatment for traumatized individuals in North Dakota through implementing evidence-based treatments and building a multidisciplinary collaborative network across the region.
www.tcty-nd.org

Types of Traumatic Events

- Child sexual abuse
- Adult sexual abuse
- Psychological or emotional abuse
- Physical assault
- Domestic violence
- School or community violence
- Military, war, or political violence
- Child neglect
- Serious or medical injury
- Natural disasters
- Forced displacement
- Witnessing death
- Grief/losing a loved one
- Receiving death threats or harassment
- Being a first responder
- Witnessing assault, abuse, or violence

Program Goals & Impact

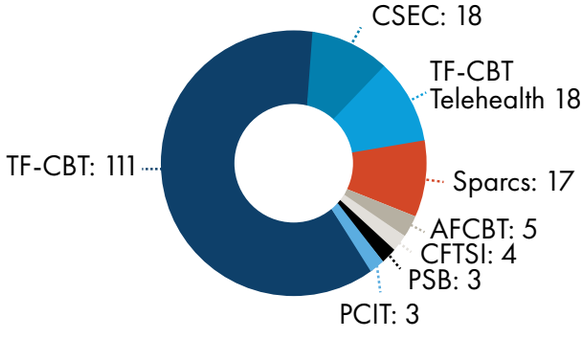
Provide annual TF-CBT training with up to six months technical assistance. Trauma Focused Cognitive Behavioral Therapy (TF-CBT) is an evidence-based treatment for children and adolescents ages 3-18. TF-CBT integrates cognitive behavioral techniques with trauma-specific interventions.



As of June 30, 2024:
Approximately 550 clinicians have been trained since project implementation with approximately 114 of those clinicians actively rostered.*

**Rostered means that the clinician completed the TF-CBT training and six months of consultation calls and is rostered to the directory https://www.tcty-nd.org/clinicians/ and active means they have maintained contact with TCTY and elect to be on the website*

TCTY Website



Currently Rostered & Active:

- **114 Clinicians**
- **77 Agencies**

Summary of Treatments Rostered:

- **Treatments offered by the 114 rostered clinicians across ND**

Additional outcomes from July 1, 2023 – June 30, 2024

- Bring Your Own Lunch and Learn – Complex Trauma Education Series: 10 trainings with 248 attendees.
- Continued engagement with the network through TCTY listserv - 60 emails with resources and training opportunities.
- 161 resources made available through the TCTY website.
- 521 Social Media Posts.
- TCTY team spoke at 22 trainings and community events.

Total Budget for 2023-2025 Biennium: $200,000 General Fund.

Enhancing Trauma Care for Native American Youth to HEAL

PROJECT HEAL

Enhancing Trauma Care for Native American Youth to Heal

The mission of Project HEAL is to develop and expand resources to address gaps and improve access to culturally relevant trauma services for Native American youth to heal.

Project HEAL is a collaboration between Health and Human Services and Sanford Research North – Treatment Collaborative for Traumatized Youth (TCTY). This project is led by:

- **Licensed Clinical Psychologist Dr. Emily Sargent, enrolled member of White Earth Band of Minnesota Chippewa Tribe**
- **Licensed Clinical Psychologist Dr. Samantha Beauchman, enrolled member of the Turtle Mountain Band of Chippewa**

GOAL 1:

Improve knowledge of trauma-informed care of Native American youth for professionals in child-serving systems in our region through education of trauma with Native American youth and communities.

During this reporting period, Project HEAL provided five educational sessions, in-person and virtual, focused on trauma awareness and culturally responsive treatment for Native American youth. These trainings addressed the impacts of historical trauma, culturally relevant strategies for promoting child and family resilience, and caregiving for Native American youth who have experienced trauma. Led by Drs. Beauchman, Sargent, and Victoria Williams, the sessions were attended by 89 professionals from various fields, including prenatal providers, tribal child advocates, and licensed mental health clinicians.

GOAL 2:

Increase access to culturally-informed trauma-focused treatments to Native American youth in our state by training mental health clinicians in culturally-informed treatment applications.

Project Heal hosted Honoring Children, Mending the Circle (HCMC) in November 2023, which is a cultural enhancement of Trauma Focused Cognitive Behavioral Therapy (TF-CBT). The training included 15 clinicians across North Dakota and consultation calls have been taking place over the last year. The 2023-2024 HCMC training cohort will be completing their HCMC calls in November 2024. Twelve clinicians are regularly attending the consultation calls, indicating 21 HCMC cases have been staffed by the clinicians.

GOAL 3:

Increase access to services by allocating time of trained providers to provide in-person and telehealth treatment to Native American youth.

Over the last reporting year, 18 Native American Children were seen by Sanford Traumatic Stress Treatment Center (TSTC). There were five TSTC clinicians trained in Honoring Children Mending the Circle and provided traumatic stress services to Native American children and families. All ND Tribes are utilizing Project Heal.

Tribal Outreach

Over the past year, the Project HEAL team has been building relationships with ND tribal nations, including regular meetings with ND Tribal Liaisons, Sisseton Wahpeton Oyate and MHA Nation Tribes. A total of nine meetings have been held with ND Tribal Nations.

This effort is funded through the Mental Health Block Grant through the Substance Abuse and Mental Health Services Administration (SAMHSA), administered through the North Dakota Department of Health and Human Services – Behavioral Health Division.

*September 1, 2023 - August 31, 2024

Voluntary Treatment Program (VTP)

The Voluntary Treatment Program reimburses for out-of-home treatment services for Medicaid-eligible children with a serious emotional disorder without requiring parents to relinquish custody (NDCC 50-06-06.13). The program will cover maintenance costs associated with the treatment episode, while ND Medicaid will cover treatment costs in accordance with the state plan. Qualified Residential Treatment Providers (QRTPs) and PATH Foster Homes are designated providers through the VTP.

The primary goal of the VTP is to improve the functioning of youth.

ELIGIBILITY

- Up to the age of 18;
- Mental, behavioral, or emotional disorder of sufficient duration to meet diagnostic criteria specified in the DSM 5; and
- Functional impairment that substantially interferes with or limits the child's role or functioning in family, school and community activities.

From July 2023 - September 2024, HHS received 49 applications (compared to 46 applications received during the 2021-2023 biennium).

- **9 youth were admitted to a QRTP**
- **17 applications were denied**
- **23 applications were withdrawn**

Reasons for denial (17):

- Did not have Medicaid, assisted with community based services (4)
- Not all community based services were utilized (8)
- Other residential options available (5)

Reasons for withdrawal (23):

- Other placement occurred prior to decision (5)
- Moved out of state (2)
- Youth placed under custody of zone or DJS (2)
- Parent/Guardian withdrew application (10)
- Applied for Psychiatric Residential Treatment Facility (PRTF) admission (4)

	Cost per youth	Length of stay
Youth 1	$95,018.00	5 months
Youth 2	$33,664.00	3 months
Youth 3	$77,465.00	6 months
Youth 4*	$102,260.00	5 months
Youth 5	$46,708.00	4 months
Youth 6*	$26,264.00	2 months
Youth 7*	$16,616.00	1 month
Youth 8*	$16,616.00	1 month
Youth 9*	$11,107.00	1 month

*Denotes youth still in QRTP

A total of $453,424 was authorized in the HHS budget for the 2023-2025 biennium.

Through Sept. 30, 2024 (63% of the biennium) 94% of the allocation has been expended with 5 youth currently residing in a QRTP.

The average cost of a child in a QRTP for 30 days: $16,117.00.*

The average length of stay for a child in a QRTP is 4.4 months.*

The average cost for a child at a QRTP is $70,914.80.*

*These numbers are based off the 23-25 biennium data.

Of the youth receiving residential services; six youth received services through Home on the Range and three youth received services through Dakota Boys and Girls Ranch.

Parent to Parent

Health and Human Services (HHS) contracts with the ND Federation of Families for Children's Mental Health (NDFFCMH) to administer the Parent to Parent support services program. This initiative is a statewide collaborative effort that engages, trains, educates, and supports parents of children with mental health disorders.

Program responsibilities include:

- Organizing and leading support and educational services for parents.
- Collaborating with other nonprofit entities and linking to both paid and natural supports.
- Coordinating with existing community-based organizations and programs to maximize benefits, avoid duplication, and realign resources.

Services provided by NDFFCMH may include:

- Attending meetings at the request of parents.
- Assisting parents in understanding their child's mental health needs.
- Helping parents become involved in a support network.
- Providing training on how to advocate for their child.
- Assisting parents in locating informal services and supports.
- Accessing information on their rights and responsibilities.

- Total budget of $75,000 for July 1, 2023 - June 30, 2025.
- Number of new parents receiving services - 33
- Number of families provided support and education - 134
- Number of parent contacts - 3,039
- Hours of support to families - 774

Families from 17 counties have received services this biennium:

Barnes	3
Burleigh	34
Cass	25
Foster	4
Grand Forks	11
Hettinger	1
McLean	7
Morton	7
Mountrail	3
Oliver	5
Ramsey	2
Rolette	3
Sheridan	2
Stark	5
Unknown	11
Walsh	2
Ward	6
Williams	3

**The numbers reported are from July 1, 2023 - August 2024. NDFFCMH Parent to Parent Support Program has multiple funding sources, including funding from HHS. The data reported from NDFFCMH reflects data from the entire parent support program, not just the portion supported by HHS.*

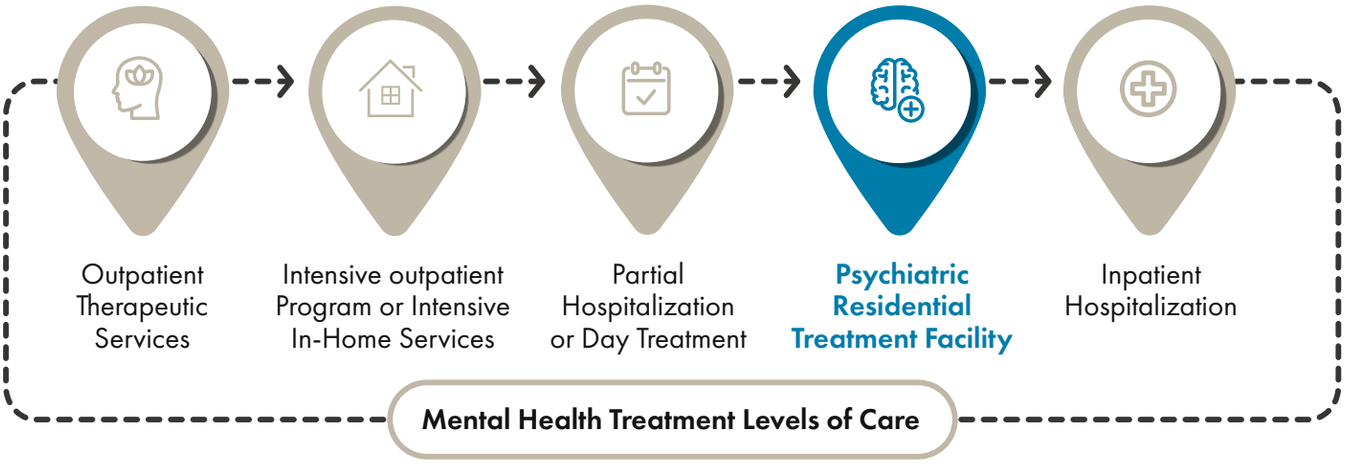
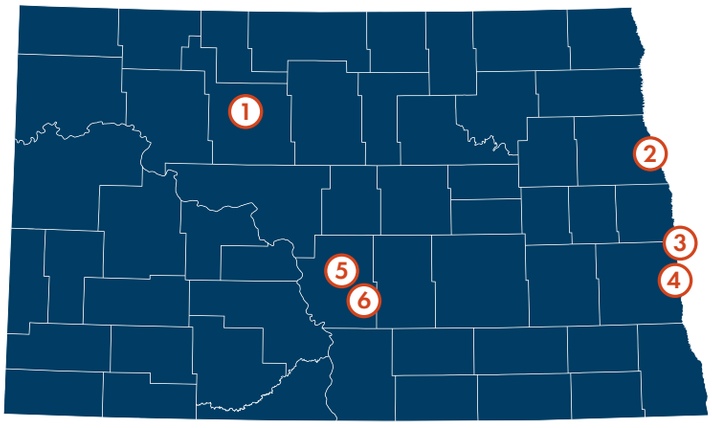
Psychiatric Residential Treatment Facilities for Children (PRTFs)



NDCC 25-03.2-02 requires Health & Human Services to adopt rules and standards for the licensing of Psychiatric Residential Treatment Facilities for Children (PRTFs) operating in North Dakota.



North Dakota Administrative Code (NDAC) 75-03-17 Psychiatric Residential Treatment Facilities for Children are the rules that establish the standards governing PRTFs.

Psychiatric Residential Treatment Facilities (PRTFs) are residential facilities that provide children and adolescents with a comprehensive 24-hour therapeutic environment integrating group living, educational services and a clinical program based upon an interdisciplinary clinical assessment and an individualized treatment plan that meets the needs of the child and family.

PRTFs are available to children in need of and able to respond to active psychotherapeutic intervention and who cannot be effectively treated in their own family, in another home or a less restrictive setting. Admission to a PRTF is based on medical necessity.

LOCATIONS

1. Dakota Boys and Girls Ranch (Minot)
2. Ruth Meiers Adolescent Center (Grand Forks)
3. Dakota Boys and Girls Ranch (Fargo)
4. Luther Hall (Fargo)
5. Dakota Boys and Girls Ranch (Bismarck)
6. Pride Manchester (Bismarck)

PURPOSE

The licensure process aims to ensure health and safety and compliance with minimum standards in care and treatment of children receiving services in the facility.

HHS is required to license PRTFs every two years. There are six licensed PRTFs in ND with a total of 82 beds serving children between the ages of 5 through 18.

Capacity per facility:

- Dakota Boys and Girls Ranch - Minot (ages 10 through 17) - 16
- Ruth Meiers Adolescent Center - Grand Forks (ages 12 through 17) - 10
- Dakota Boys and Girls Ranch - Fargo (ages 10 through 17) - 16
- Luther Hall - Fargo (ages 10 through 17) - 16
- Dakota Boys and Girls Ranch - Bismarck (ages 10 through 17) - 16
- Pride Manchester - Bismarck (ages 5 through 13) - 8

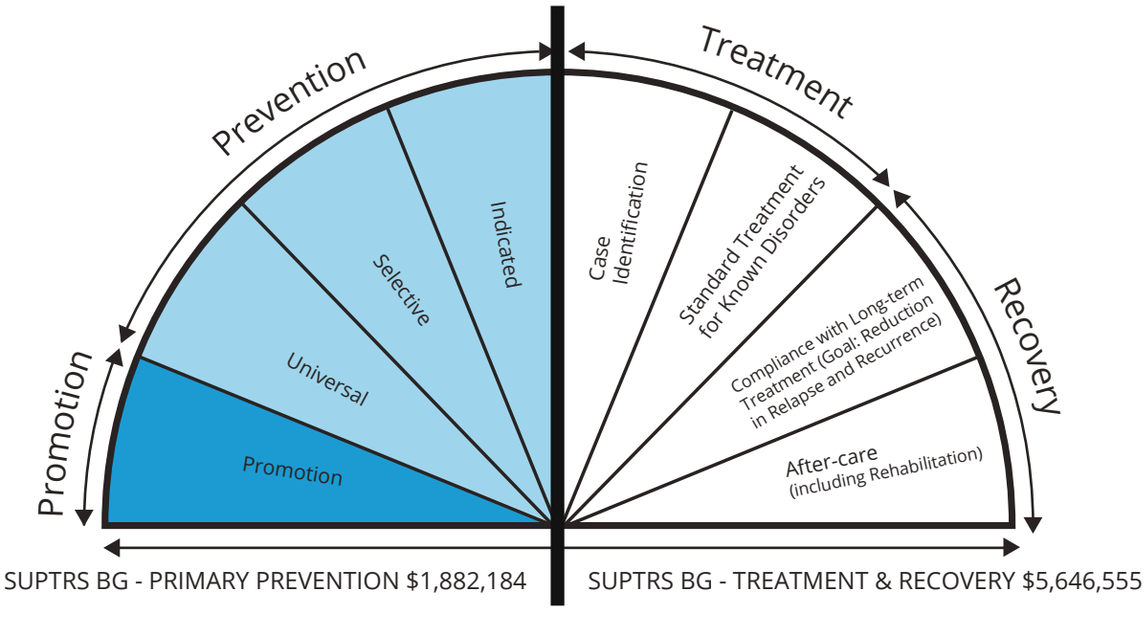
Adult Addiction

Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG)

The SUPTRS BG is authorized by section 1921 of Title XIX, Part B, Subpart II and III of the Public Health Service (PHS) Act. The PHS Act required the secretary of the U.S. Department of Health and Human Services to create regulations as a precondition to making funds available to the states and other grantees under the SABG. Title 45 CODE OF FEDERAL REGULATIONS Part 96 was published on March 31, 1993, and The Tobacco Regulations for Substance Abuse Prevention and Treatment Block Grant; Final Rule, 61 FEDERAL REGISTER 1492 was published on Jan. 19, 1996.

SAMHSA requires that grantees spend no less than 20% of their SUPTRS BG allotment on substance misuse primary prevention strategies. These strategies are directed at creating an environment that promotes the health and well-being of individuals and communities which prevents problems before they occur – and cannot be directed at individuals identified to be in need of treatment.

The Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG) program (through the Substance Abuse and Mental Health Services Administration [SAMHSA]) provides funds and technical assistance to all states and territories.



Health and Human Services utilizes the funds to plan, implement, and evaluate activities supporting the full continuum of care related to substance misuse.

The purpose of the SUPTRS BG is to:

- Provide priority treatment and support services that demonstrate success in improving outcomes and/or supporting recovery for individuals without insurance that are not covered by Medicaid, Medicare, or private insurance, or for whom coverage is terminated for short periods of time.
- Provide primary prevention by supporting universal, selective, and indicated prevention activities and services for persons not identified as needing treatment.
- Collect performance and outcome data to determine the ongoing effectiveness of behavioral health promotion, treatment, and recovery support services.

Funding

HHS receives approximately $7,528,736 per year. As of Oct. 2024, approximately $1,882,184 (25%) is allocated to primary prevention.

North Dakota Goals

Increase access to quality substance misuse-related services across the continuum of care.

PREVENTION

- Increase implementation of effective prevention statewide.
- Decrease underage drinking.
- Decrease adult binge drinking and related consequences.
- Decrease opioid misuse and related consequences.

TREATMENT/RECOVERY

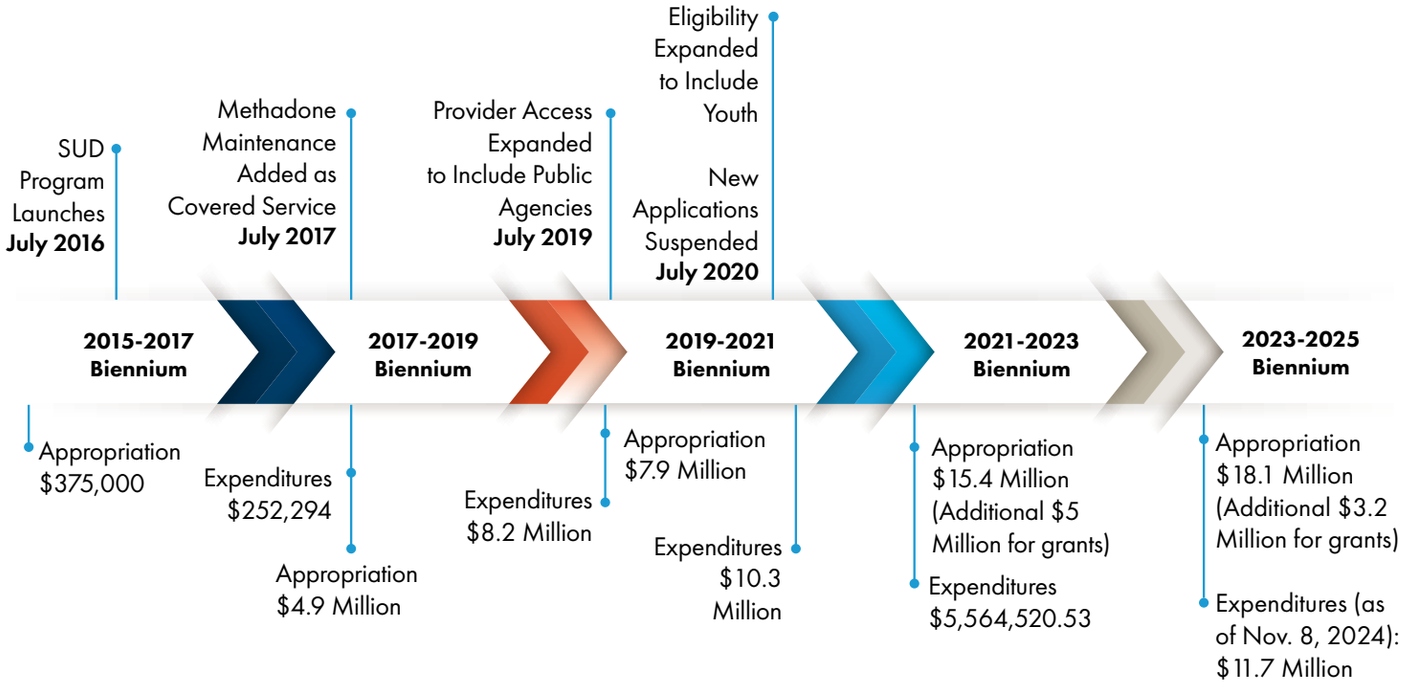
- Increase evidence-based treatment and recovery support services, with a priority on high-risk populations:
  - Pregnant women and women with dependent children.
  - Individuals using drugs intravenously.

Activities

PREVENTION

- Training and technical assistance
- Community and tribal alcohol and other drug prevention programs across the state
- Underage drinking prevention efforts, including Parents Lead
- Adult binge drinking prevention efforts, including the Speak Volumes campaign
- Opioids: Take Care, Be Aware
- DUI education program licensing; provider certification
- Minor in possession education provider certification
- Synar program (youth tobacco enforcement)

TREATMENT/RECOVERY



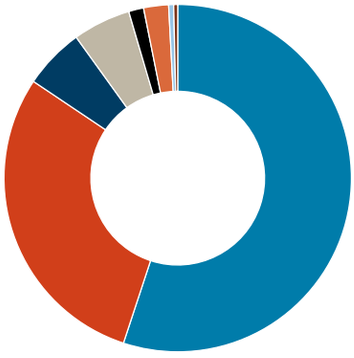
- Public program funding
- Special Populations
  - Youth residential services program
  - Pregnant and parenting women
  - Tribal programs
- Recovery
  - Recovery Talk program
  - Mobile outreach program
  - Peer support development
- Withdrawal management
- Workforce development

Substance Use Disorder (SUD) Voucher

Health & Human Services (HHS) administers the SUD Voucher program, as directed from the 64th Legislative Assembly. The program improves access to quality services and allows for individual choice of providers.

Program Timeline

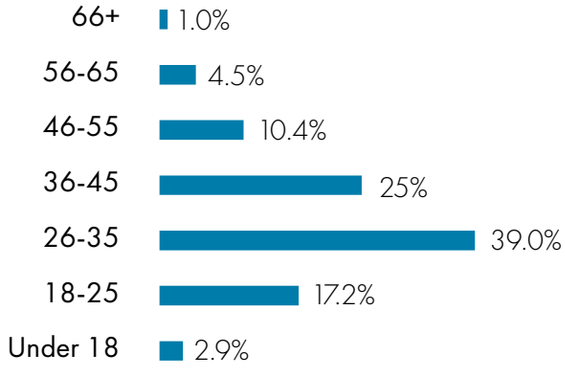
Program Impact



Since its inception in July 2016, approximately 8,650 individuals have been approved for services through the SUD Voucher.

Gender

Male - 61%



Female - 39%

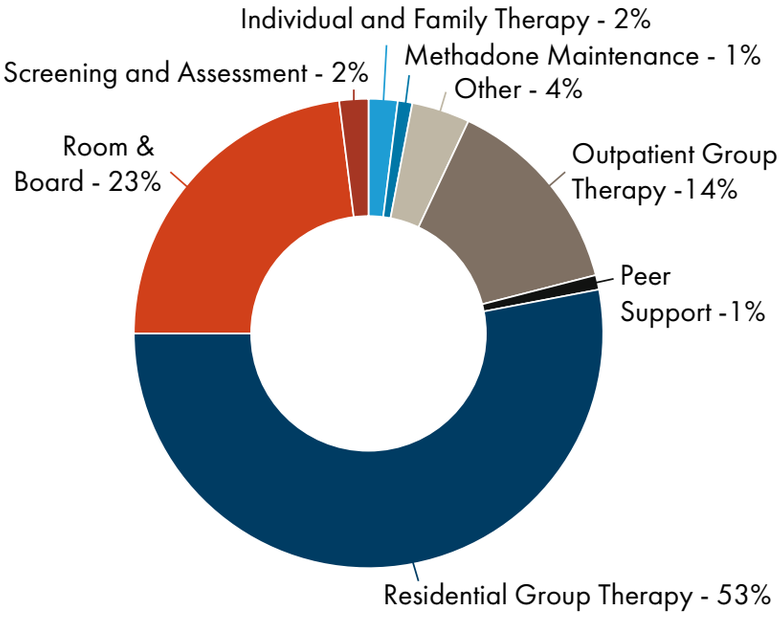
Race

- White - 59.3%
- American Indian - 31.6%
- African American - 6.1%
- Hispanic - 5.8%
- Other 1.5%
- Prefer not to answer - 2.5%
- Asian - 0.5%
- Native Hawaiian - 0.4%

Age

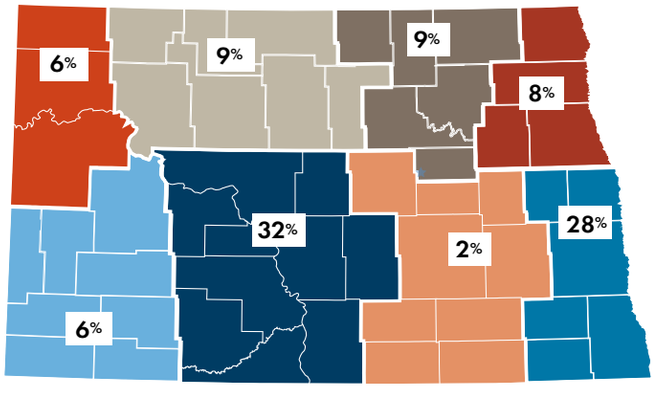
Living Environment

- Independent - 45%
- Homeless - 32%
- Dependent - 23%



As of Dec. 2, 2024 there are 40 participating providers.

An increase from 35 in Feb. 2023.



Expenditures by Service Type

Percentage of expenditures by service type from July 1, 2023 through Sept. 30, 2024.

Program Participants By Human Service Center Region

July 1, 2023 - Sept. 30, 2024

Outcome Measures

Programs utilizing the SUD Voucher are required to assess each individual at the beginning of services and upon completion. The outcome measure uses a 5-point rating scale (1 lowest to 5 highest). The outcomes are based on Substance Abuse and Mental Health Services Administration (SAMHSA) identified recovery dimensions.

The following outcomes are for participants who completed services paid for by the SUD Voucher on or after July 1, 2023. n = 693

Since inception, the averages for all four outcome measures improved following services reimbursed through the SUD Voucher program.

PURPOSE

Identify the extent to which the individual participates in meaningful daily activities (employment, school, volunteering, family caretaking, other activities, etc.).

COMMUNITY

Identify the extent to which the individual's relationships and social networks provide support, friendship, love, and hope for overall wellbeing.

HEALTH

Identify how well the individual makes informed healthy choices supporting their physical health and emotional wellbeing (physical activity, attending medical appointments, taking medications as prescribed etc.)

HOME

Identify the stability and safety of the individual's living environment.

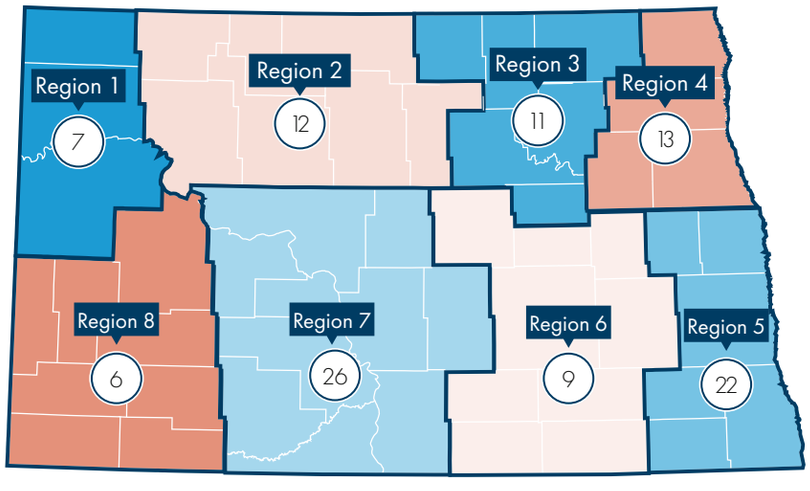
Substance Use Disorder Treatment Program Licensing



Health and Human Services (HHS) is responsible for establishing quality assurance standards for the licensure of substance use disorder treatment programs, as outlined in North Dakota Century Code 50-06 and North Dakota Century Code 50-31. HHS conducts regular reviews of these programs to ensure compliance with North Dakota Administrative Code Article 75-09.1 and monitors the health and safety of clients served.

- Programs are reviewed every two years for compliance with North Dakota Administrative Code Article 75-09.1.
- Programs are monitored for the health and safety of the clients served.

North Dakota has **106** licensed substance use disorder treatment programs (as of October 1, 2024).

37 programs are licensed for residential treatment

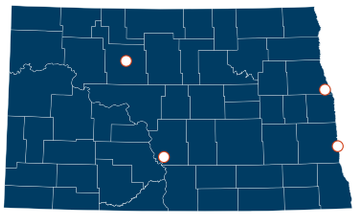
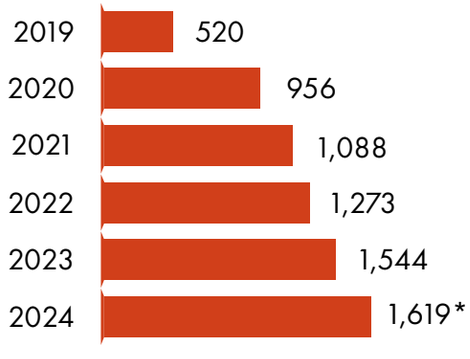
Opioid Treatment Program (OTP) and Medication Unit Licensing



Designated as the state opioid treatment authority (North Dakota Century Code 50-31-07), Health and Human Services administers licensing for OTP and medication units, as well as ensures adherence to state and federal regulations.



- OTPs provide medication for opioid use disorder in conjunction with counseling and supportive services to treat individuals suffering from an opioid use disorder.
- Medication units are a satellite of an OTP that provide remote dispensing of FDA approved medication for opioid use disorder.
- Programs are reviewed on an annual basis for compliance with North Dakota Administrative Code Article 75-09.1, and applicable federal regulation.
- Programs are monitored for the health and safety of the clients served and to establish quality assurance standards for the licensure of programs, services, and facilities.

North Dakota has **4** licensed OTPs in the state

- There are currently **1,140** individuals actively receiving services from an OTP.*
- On average individuals travel **16** miles one way to an OTP for their services.*
- There are currently no licensed medication units in the state.

Unique individuals served by OTPs

Recovery Housing Assistance Program

The Recovery Housing Assistance Program (RHAP) provides financial support for individuals in recovery to access Recovery Housing.

In 2018, the Human Services Research Institute (HSRI) conducted a comprehensive analysis of the current behavioral health system in North Dakota. Relating specifically to housing, the study identified two recommendations:

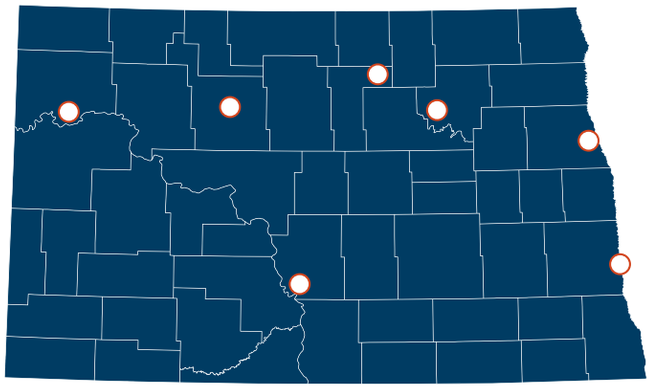
- Address housing needs alongside behavioral health needs
- Promote timely linkage to community-based services following crisis, inpatient, and residential treatment

In consideration of the recommendations for housing outlined in the study, The Health and Human Services (HHS) received funding during the 66th Legislative Assembly to develop and implement a new Recovery Housing Assistance Program (RHAP). Due to COVID-19, implementation was delayed, and the funding was carried-over to the 2021-2022 biennium. The RHAP program launched in May 2022.

RECOVERY HOUSING PROVIDES

- Substance-free home environment
- Space to focus on continued growth and healing
- 24-hour peer-led support and connection
- Resources to support individual life goals

The program pays for up to 12 weeks of an eligible individual's living expenses at an approved Recovery Housing provider.

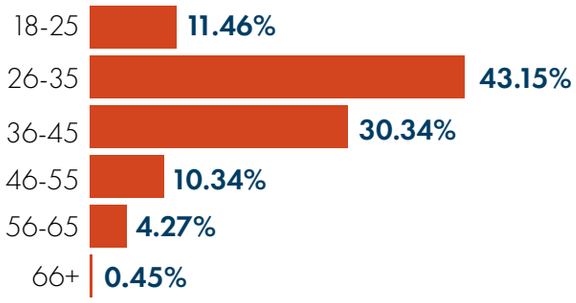


ELIGIBILITY CRITERIA

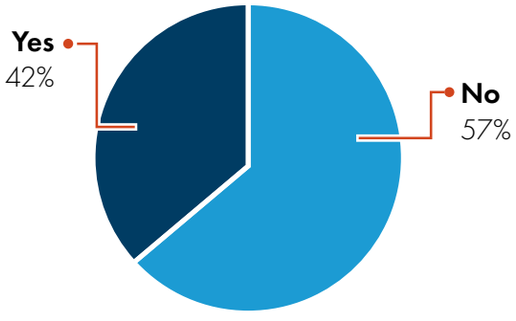
- ND Resident and
- Age 18 or older and
- Experiencing a substance use disorder and
- One of the following:
  - Currently enrolled in a HHS public assistance program or
  - Currently enrolled in a HHS Behavioral Health Division substance use disorder or community program or
  - Household income is at or below 200% Federal Poverty Guidelines

CURRENT RHAP PROVIDERS

(as of Oct. 1, 2024)



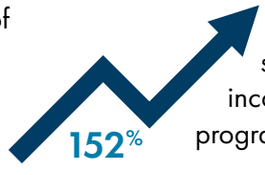
There are **nine** approved providers across the state with **28** recovery homes.



Bismarck – **17**
Devils Lake – **1**
Fargo – **2**
Grand Forks – **1**
Minot – **3**
Watford City – **3**
Wolford – **1**

1,152 individuals have experienced the Recovery Housing Assistance Program benefits from May 2022 through Oct. 2024

Participants by **Age Range**



Participants by **Tribal Affiliation**

Out of **502** participants who reported lack of employment upon entering program, ***57%*** reported improvement in their employment status at the end of programming.

Overall, participants see an average weekly income growth of **152%** at program conclusion.

BUDGET

2023 - 2025 appropriation: $1,509,088
Amount spent as of October 1, 2024: $1,020,122

State Opioid Response (SOR) Grant

Funded through the Substance Abuse and Mental Health Services Administration (SAMHSA), the purpose of this grant is to address the public health crisis caused by escalating opioid misuse, opioid use disorder (OUD), and opioid-related overdose across the nation. The current award is for $4,000,000 from September 30, 2024 through September 29, 2025.

North Dakota Grant Goals

GOAL 1
Prevent opioid and stimulant misuse.

GOAL 2
Reduce harm related to opioids and stimulants.

GOAL 3
Improve access to evidence- based treatment.

GOAL 4
Increase access to recovery support services.

Implementation Overview

Statewide Efforts

NDSU School of Pharmacy implements the **ONE program**. The purpose is to equip pharmacists with tools to screen for opioid use disorder, to identify patient needs, and provide counseling and support to assist them in safely using prescribed opioids.

From September 2023 - September 2024:

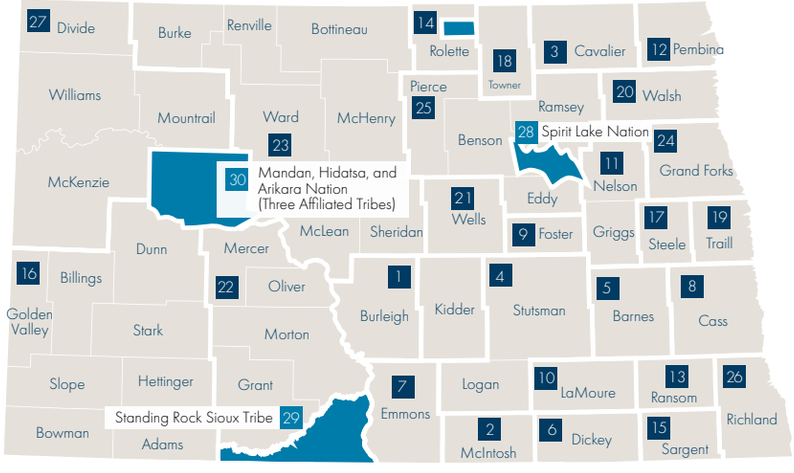
- 73 pharmacists participated in the ONE Program
- 10,212 screenings completed
- 13% of patients were identified at high risk for accidental opioid or opioid use disorder

Department of Corrections and Rehabilitation increasing availability of Medications for Opioid Use Disorder (MOUD).

- From September 2023 – September 2024, 339 individuals received MOUD.

Opioid campaign implementation:

HHS disseminated campaign messaging for the Opioids: Take Care, Be Aware campaign. The messaging aims to increase the understanding of risks of pain medications, know signs of addiction, recognize an overdose and know how to effectively respond to an overdose.



Naloxone purchase and distribution

From September 2023 – September 2024, 28,597 naloxone kits were distributed through both statewide and community efforts.

Community Efforts

The Division is currently in contract with 27 Local Public Health Units and 3 tribes to support community-level implementation of efforts to address the opioid crisis (September 2024 – September 2025).

- 30 communities will operate **Opioid Overdose Prevention Education and Naloxone Distribution (OEND) programs**
- 27 communities will be educating about **safe medication disposal** and providing safe medication disposal products (Deterra bags and DisposeRx)
- 1 community will be **reducing harm** by either operating a Syringe Service Program (SSP), promoting SSP services, or exploring how to start a SSP
- 3 communities will be improving access to **treatment**
- 2 communities will be improving access to **recovery** support services

1. Bismarck-Burleigh Public Health
2. McIntosh District Health Unit
3. Cavalier County Health District
4. Central Valley Health Unit
5. City-County Health Department
6. Dickey County Health District
7. Emmons County (Western Plains Public Health Collaborative)
8. Fargo-Cass Public Health Unit
9. Foster County Health Department
10. LaMoure County Public Health Department
11. Nelson-Griggs District Health Unit
12. Pembina County Health Department
13. Ransom County Public Health
14. Rolette County Public Health Unit
15. Sargent County District Health Unit
16. Southwestern District Health Unit
17. Steele County Public Health Department
18. Towner County Public Health
19. Traill District Health Unit
20. Walsh County Health Department
21. Wells County District Health Unit
22. Western Plains Public Health
23. First District Health Unit
24. Grand Forks Public Health Unit
25. Lake Region District Health Unit
26. Richland County Health Department
27. Upper Missouri District Health Unit
28. Spirit Lake Nation
29. Standing Rock Sioux Tribe
30. Mandan, Hidatsa, and Arikara Nation

From September 2023 to September 2024, HHS contracted with 27 local public health units and 3 Tribes to support community-level implementation of efforts to address the opioid crisis.

From September 2023 – September 2024:

- There were 721 known successful overdose reversals using naloxone.
- 981 people were trained in overdose education and naloxone.
- 10,374 safe medication disposal products (DisposeRX and Deterra bags) were distributed.

Opioid Settlement Funding

Acting through the North Dakota Attorney General's Office, North Dakota (along with many other states) entered into litigation with opioid manufacturers and distributors. As a result, ND is expected to receive $60 million in settlement funding from the various manufacturers and distributers over the next 18 years.

- Through HB 1447 and codified in North Dakota Century Code 50-36, the 68th Legislative Assembly established an opioid settlement fund within the state treasury. $8 million was appropriated in the 2023-2025 biennium to Health and Human Services, with at least 20% to be used for opioid use prevention and overdose prevention, including best practices relating to fentanyl drug overdose, and workforce development.
- The Opioid Settlement Advisory Committee was established to provide input and recommendations for opioid settlement spending. The committee consists of six voting members and a nonvoting presiding officer. The committee was codified in ND Century Code 50-36-03.

2023-2025 Biennium Budget Overview

- Opioid Settlement Fund (OSF) Grant: $7,053,787
- Purchase Narcan (naloxone) to provide the low barrier, no cost medication to individuals across the state: $634,834
- Tribal efforts to address the opioid crisis with activities across the continuum of prevention, treatment, and recovery: $310,833
- Opioid Settlement Advisory Committee Administration: $546

Opioid Settlement Fund (OSF) Grant

Utilizing recommendations and priorities from the Opioid Settlement Advisory Committee, the the OSF Grant opportunity was announced in November 2023. The grant was open to individuals and entities throughout the state proposing opioid remediation and abatement efforts that align with Exhibit E of settlement documents. HHS received 65 applications and awarded 14.

Grant Impacts (as of Oct. 24, 2024):

- Endeavour Sober Living has established a recovery house in Minot to support pregnant and parenting women through their recovery journey.
- Community Connect providers have served an additional 749 individuals throughout the state by providing recovery support services.
- Sanford Medical Center Fargo has established an outpatient treatment program and is providing medications for opioid use disorder.
- Training Academy for Addiction Professionals (TAAP), operated by Heartview Foundation, trained seven new addiction counselors and currently has nine active trainees set to complete their program by winter 2025.

OSF Grantees:

- **Central Valley Health District ($37,409):** Developed a syringe service program in Jamestown to help individuals with a substance use disorder connect to treatment and recovery services.
- **Community Connect Providers ($3.9 million):** Expanded access to the community-based behavioral health program designed to provide behavioral health support services to individuals through the provision of care coordination and peer support in their North Dakota community.
- **Community Medical Services ($452,389):** Expanded the Opioid Treatment Program in Grand Forks by connecting individuals in need of opioid use disorder to evidence-based treatment services.
- **Endeavor Sober Living ($535,000):** Established a recovery house in Minot specifically serving pregnant and parenting women.
- **First District Health Unit ($66,681):** Expanded the syringe service program in Minot to help individuals with a substance use disorder connect to treatment and recovery services.
- H**eartview Foundation ($426,527):** Established medications for opioid use disorder services in southwest North Dakota.
- **Nelson-Griggs District Health Unit ($21,600):** Implemented a system to standardize patient screenings for opioid use disorder within local hospitals to increase access to treatment and recovery services.
- **North Dakota State University Opioid and Naloxone Education (ONE) Program ($82,537):** Worked hand-in-hand with tribal leaders to implement opioid harm prevention in tribal communities.
- **Northeast Central Judicial District Drug Court in Grand Forks/Department of Corrections and Rehabilitation ($51,000):** Provided substance use disorder treatment services and coordination of care to individuals involved in the Northeast Central Judicial District Drug Court in Grand Forks.
- **Richland County Treatment Court ($134,000):** Provided substance use disorder treatment services and coordination of care to individuals involved in the Richland County Treatment Court.
- **Sanford Medical Center Fargo ($397,430):** Provided medications for opioid use disorder education and awareness training to health care providers, expand Screening, Brief Intervention, and Referral to Treatment (SBIRT) and increase distribution of naloxone to uninsured patients.
- **Training Academy of Addiction Professionals /Heartview Foundation ($613,002):** Supported development of behavioral health workforce in North Dakota through increased addiction counselor training opportunities, college scholarships and paid internships.
- **USpireND – Healthy Families North Dakota ($130,075):** Provided home visiting program for parents who are incarcerated and pregnant, parents who are incarcerated and have given birth within the last year, and parents in recovery and parents who have not yet entered recovery.
- **Valley City Public School ($160,000):** Implemented an evidence-based prevention curriculum in the Valley City Junior/Senior High School.

Gambling Disorder Treatment, Awareness and Prevention

The term "gambling disorder" means a chronic, progressive disease that is characterized by a preoccupation with gambling, loss of control over gambling behaviors, and often disregard for the negative consequences as a result of gambling. Gambling disorder includes gambling behavior that compromises, disrupts or damages personal, family or vocational pursuits.

NDCC 50-06-21 requires the Department of Health & Human Services to develop and implement a program for gambling prevention, awareness, crisis intervention, financial counseling and gambling disorder treatment.

IMPLEMENTATION

- Gambling disorder treatment services for individuals with a gambling disorder and affected others.
- Communication efforts (billboards, television ads and bus wraps) to address problem gambling prevention, awareness, crisis intervention and treatment services (www.gamblernd.com).
- Collaboration with the state's Problem Gambling Advisory Council.

FUNDING (2023-2025 biennium)

- $632,800 of lottery funds
- $580,000 of charitable gaming funds

STATE FISCAL YEAR OUTCOMES

	July 2023 - June 2024	July 2024 - Oct. 2024
ND residents received gambling treatment services	177	149
In-person counseling hours	799	344
Tele-behavioral health hours	406	332
ND Residents received brief intervention services	42	30

RESEARCH

Health and Human Services in contract with Gemini Research is completing a North Dakota Recreation Activity Survey with a focus on gambling activities within the state. The purpose is to identify the health, leisure, and recreation needs of North Dakota residents. The survey closed October 11, 2024 with 2,937 responses.

Adult Mental Health

Mental Health Block Grant (MHBG)

The Substance Abuse and Mental Health Services Administration (SAMSHA) administers the Mental Health Block Grant (MHBG), which makes funds available to all 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and six Pacific jurisdictions to provide community mental health services.

Purpose

The purpose of the Mental Health Block Grant is to provide comprehensive, community-based mental health services to adults with serious mental illnesses (SMI) and to children with serious emotional disturbances (SED) and to monitor progress in implementing a comprehensive, community-based mental health system.

Funding

Health and Human Services receives approximately $1,709,742 per year from October 2023 - September 2025.

Targeted Populations

Adults with Serious Mental Illness (SMI)

Includes persons age 18 and older who have a diagnosable behavioral, mental, or emotional condition—as defined by the Psychiatric Association's Diagnostic and Statistical Manual (DSM) of Mental Disorders. Their condition substantially interferes with, or limits one or more major life activities, such as:

- Basic daily living (eating, dressing, etc.).
- Instrumental living (taking prescribed medications or getting around community).
- Participating in family, school, or workplace.

Children with Serious Emotional Disturbance (SED)

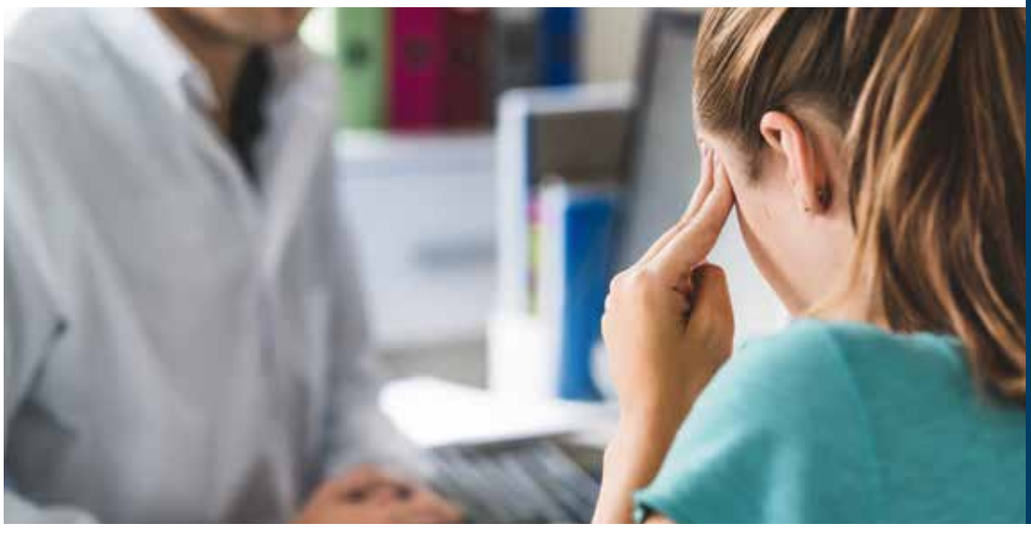
Includes individuals up to age 18, who have a diagnosable behavioral, mental, or emotional issue (as defined by the DSM). This condition results in a functional impairment that substantially interferes with, or limits, a child's role or functioning in family, school, or community activities.

Behavioral Health Planning Council

The Behavioral Health Planning Council is responsible for reviewing, monitoring, and evaluating the adequacy of behavioral health services for its state. The council completes duties as specified in the MHBG statute, as well as advises, consults with, and makes recommendations to state mental health authorities and single state authorities regarding their activities.

The majority (51% or more) of a state's planning council should be comprised of consumers and family members.

Learn more at **hhs.nd.gov/ndmhpc**



Funded Programs and Services

- Consumer Family Network
- Peer Support
- Workforce Training and Development
- Children's Services (Project Heal; trauma trainings)

Brain Injury Services

North Dakota Century Code 50-06.4 established the Department of Health and Human Services as the lead agency in the state for the purpose of coordinating services for individuals who have a brain injury.

What is a brain injury?

Brain Injury encompasses anything that happens to the brain after birth and leading up to but not including degenerative dementia.

- **Traumatic Brain Injury (TBI) -** External events/concussion: assaults, falls, motor vehicle crash, blast injury
- **Non-Traumatic/Acquired Brain Injury -** Internal events: stroke, tumor, anoxia (loss of oxygen to the brain), aneurysm, infections (including COVID-19)

Individuals with brain injuries in North Dakota are eligible to receive services through multiple federal and state programs, including Vocational Rehabilitation, 1915(i), Community Connect and Free Through Recovery.

Is it just a concussion?

A concussion is a type of Traumatic Brain Injury (TBI) caused by a bump, blow, or jolt to the head or a hit to the body that causes the head and brain to move rapidly back and forth.

Brain Injury Advisory Council (BIAC)

PURPOSE

To improve the quality of life for all individuals with brain injury and their families through brain injury awareness, prevention, research, education, collaboration, support services, and advocacy.

Brain Injury Initiatives

North Dakota Brain Injury Network (NDBIN)

www.ndbin.org

PURPOSE

NDBIN provides resource facilitation and navigation to individuals who have a brain injury and their families. NDBIN staff also provide community outreach and education, brain injury screening, support groups and social opportunities, peer support, survivor connections and collaboration with public and private agencies.

$996,483 general fund was allocated in the 2023-25 biennium.
During the 2023-25 biennium, NDBIN utilized increased funding to hire two additional resource facilitators.
NDBIN is administered by the University of North Dakota.

202 individuals were served from July 2023 - September 2024.

- 94 received care coordination
- 108 received information and referral

Between July 2023 and September 2024 NDBIN held 281 community outreach events reaching 3,607 individuals.

Community Living State Partnership Grant Administration

PURPOSE

North Dakota received this federal grant to develop a Brain Injury Advisory Council guidebook, a brain injury state plan, develop a brain injury survivors engagement group, and expand access to brain injury educational materials and trainings. $1,000,890 in federal funds were awarded to North Dakota in 2021 for this five year grant.

OUTCOMES

- Developed a four-year brain injury state plan: www.ndbin.org/about-us/state-plan.
- Established a Brain Injury Voices program.
- Created a network of support and a training curriculum for Native Americans with brain injury.
- Established brain injury screening and referring protocols for criminal justice and behavioral health providers.

Behavioral Health Service Navigation

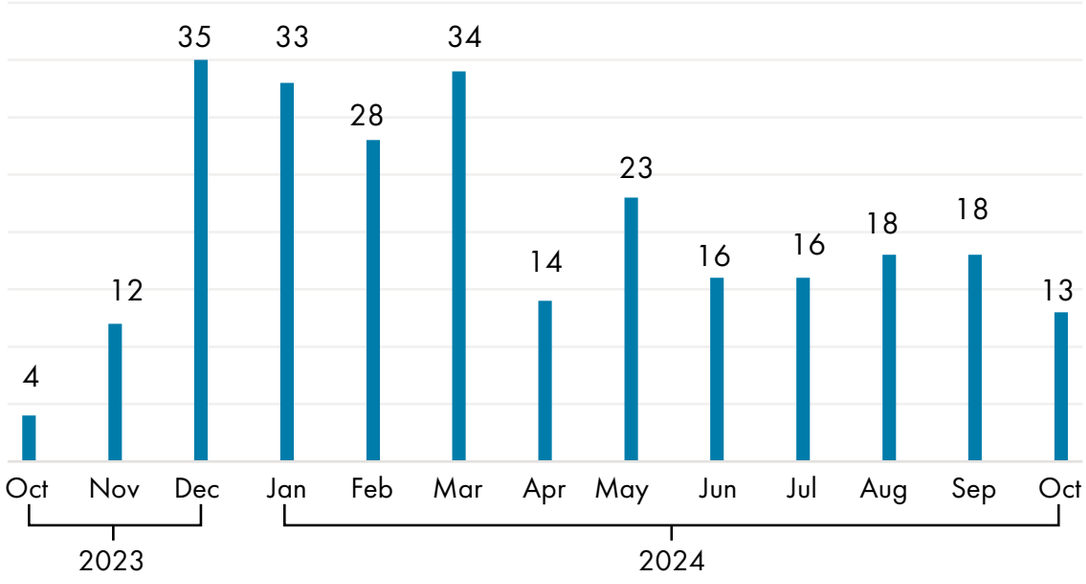
Find behavioral health services: **www.hhs.nd.gov/behavioral-health/find-services**

Mental Health Program Directory

HHS maintains a Mental Health Program Directory, as a directive of SB 2161 from the 67th Legislative Assembly. The goal of this directory is to assist North Dakota citizens with locating and accessing mental health services. The directory allows users to search for mental health programs by location, population served, insurance coverage, type of mental health specialty and intervention. People can also search for programs that offer telehealth services. As of Oct. 22, 2024, **223** mental health programs are registered in the directory, with **295** locations.

For the purpose of this directory, a mental health program is:

- An agency or organization that provides mental health services by a licensed mental health professional
- Individually licensed mental health professionals that operate as a sole proprietor or business.



The directory is online at **hhs.nd.gov/behavioral-health/directory**

From Oct. 2023 through Oct 2024, the behavioral health navigator **assisted 264 individuals.**

Behavioral Health Navigator

Arising from 68th ND Legislative Assembly action, HHS created a behavioral health navigator role to facilitate connection to care by identifying resources for individuals and families and helping them navigate through behavioral health care services. The navigator can also assist in interpreting clinical language to ensure individuals can navigate to the appropriate level of care or service.

Number of Individuals Assisted by the Behavioral Health Navigator, by Month

The behavioral health navigator is available during business hours and can be reached by calling 701-328-8920 or emailing bhnavigator@nd.gov. Individuals experiencing a behavioral health crisis can call or text 988 (available 24/7).

Behavioral Health Bed Management System

HHS launched the behavioral health bed management system October 2024 as directed by the 67th ND Legislative Assembly. The system will allow for visibility into behavioral health bed utilization throughout the state.

Funding for the system is approved through Centers for Medicare & Medicaid Services, at a 90/10 federal match. HHS contracted with Bamboo Health to implement the system on Aug. 16, 2023. As of Nov. 26, 2024, 47 of the 53 residential and inpatient behavioral health treatment facilities are configured into the system.

Total provider facilities will include:

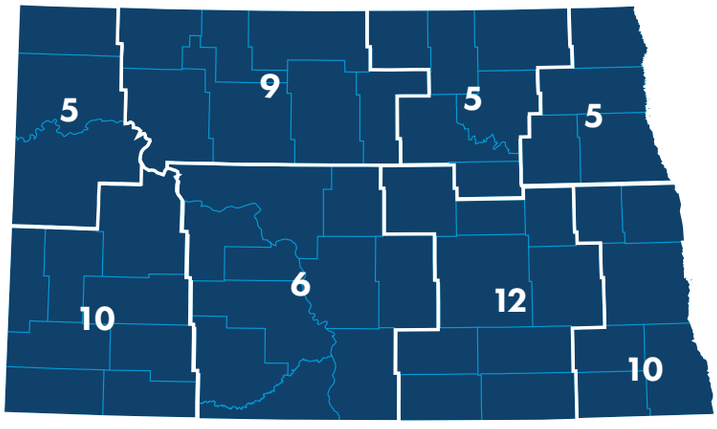
- 7 psychiatric hospitals
- 6 psychiatric residential treatment facilities for youth
- 7 crisis stabilization facilities
- 6 transitional living facilities
- 23 substance use disorder facilities
- 4 geriatric psychiatric facilities

View the Bed Management System here: **www.hhs.nd.gov/behavioral-health/find-services**

Virtual Behavioral Health Crisis Care

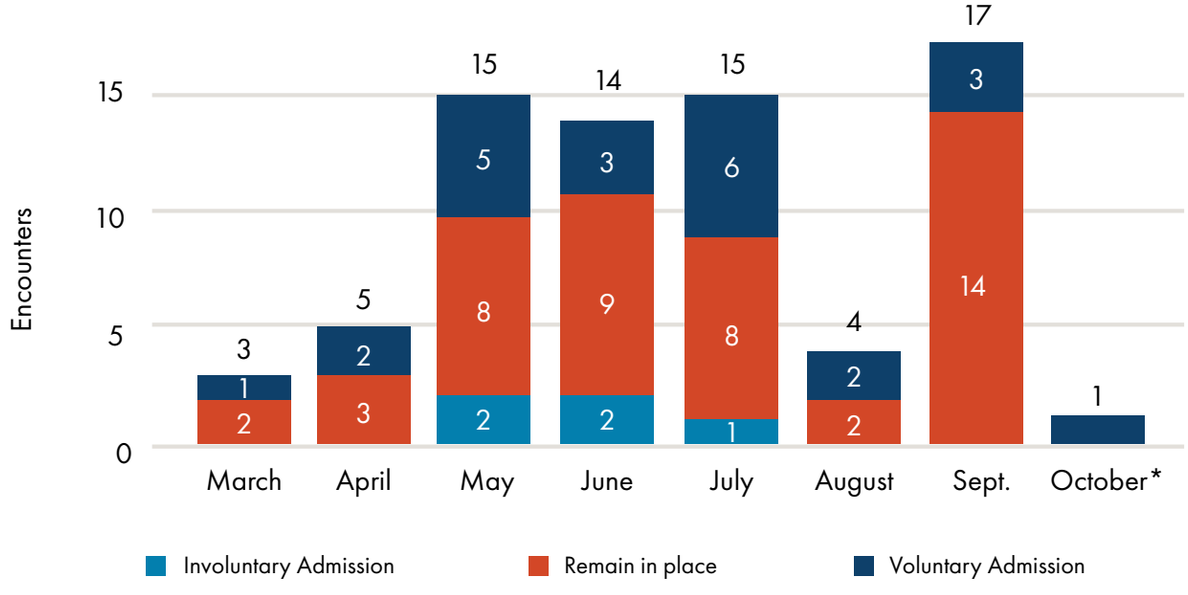
This virtual behavioral health crisis care model equips law enforcement with on-demand access to behavioral health experts who can assess citizens having a mental health crisis and assist with making informed recommendations for managing the situation.

Program highlights:



- Targeting rural areas where mobile crisis response is limited.
- Great opportunity for law enforcement to connect with regional Human Service Centers (Community Behavioral Health Clinics) to learn about local/regional services.
- Avel provides a warm hand off to the regional Human Service Centers (Community Behavioral Health Clinics) when they engage with a citizen and the Clinic follows up with the individual after the crisis.
- Highest request of services are for individuals with suicidal ideation, self-harm and depression.

The Department of Health and Human Services was appropriated funding during the 68th ND Legislative Assembly to enter into contract with an entity to implement a virtual behavioral health crisis care program for rural law enforcement.



Funding

$2,650,000 ARPA funds (2023-2025 Biennium) The Behavioral Health Division entered into contract with Avel eCare.

62 law enforcement agencies and the ND Highway Patrol have signed on to the program as of October 21, 2024

Enounters per month by recommended outcome

*As of October 6, 2024

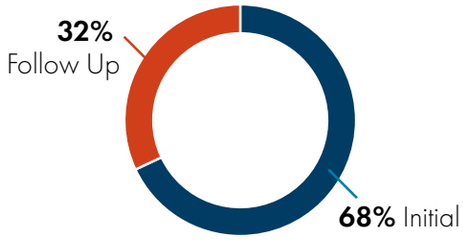
Jail Tele-Psychiatry

The Department of Health and Human Services' Behavioral Health Division was appropriated funding during the 68th ND Legislative Assembly to enter into contract with an entity to provide tele-psychiatry for individuals in jail settings.

Funding

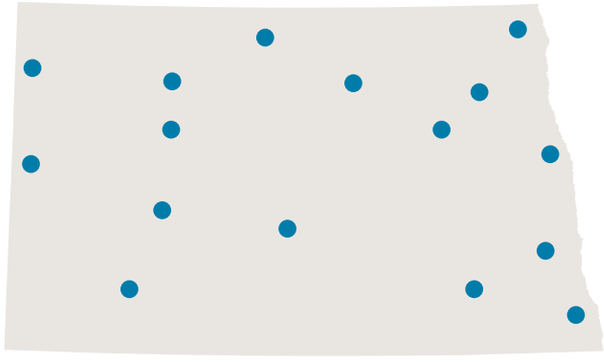
- $1,500,000 General Fund (2023-2025 Biennium).
- The Behavioral Health Division entered into contract with Integrated Telehealth Partners.

Goals



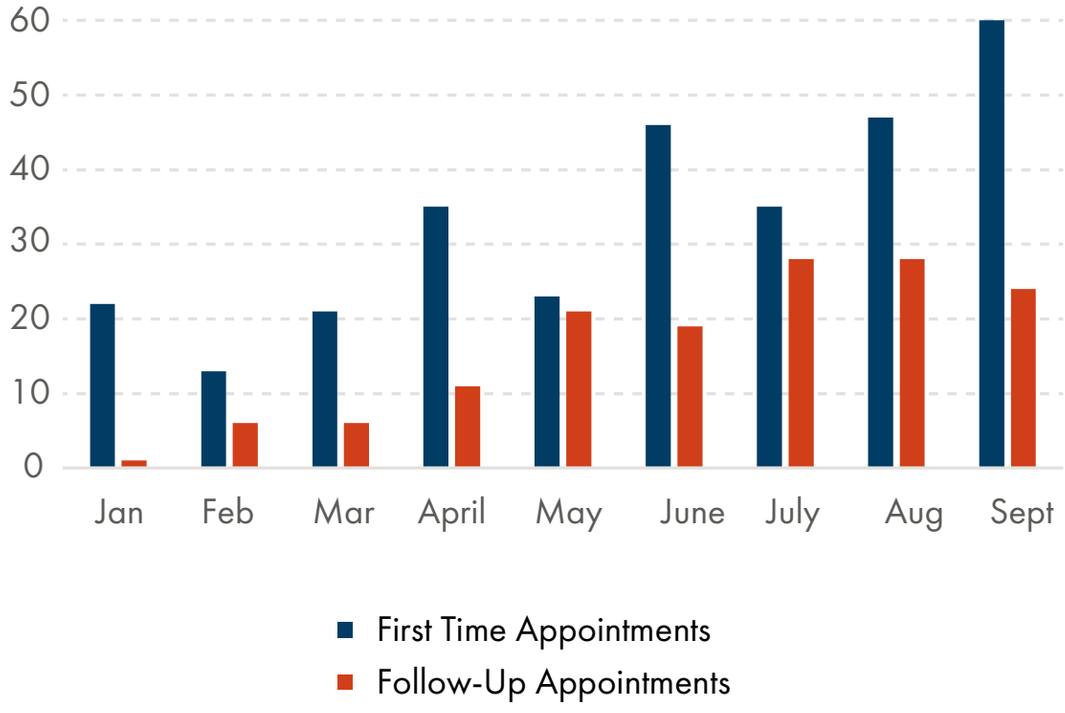
1. Implement jail tele-psychiatry services in jails across all regions in ND.
2. Provide tele-psychiatry services to inmates screened for mental illness in jail prior to release.

Target Population



Adults presently incarcerated in jail settings - Persons ages 18 and older who have a diagnosable behavioral, mental, or emotional condition.

As of September 18, 2024:



- Tele-psychiatry is implemented in 16 jails across the state.
- 446 total services provided from January through Sept. 2024

Community Supports

Peer Support

A peer support specialist is a person who uses his or her lived experience of recovery from mental illness, substance use and/or brain injury and skills learned in formal training to deliver services to promote mind-body recovery and resiliency.

Peer support is recognized as an evidence-based practice for the treatment of mental health and substance use challenges which increases the recovery and wellness of both the peer specialist and the person receiving services.

Peer Support is Effective

Peer support compliments and is supplemental to clinical services. The role of a peer support specialist is distinct and does not replace the clinician.

Role of a Peer Support Specialist

- Provide support and encouragement to achieve goals.
- Assist with connecting to clinical care and community resources.
- Teach skills such as stress management, conflict resolution, and parenting.
- Offer proactive, flexible, and long-term follow-up.

Recovery is a process of change through which individuals improve their health and wellness, live self-directed lives, and strive to reach their full potential.

Health
Choices that support one's overall well-being.

Home
A safe and stable place to live.

Purpose
Meaningful daily activities, such as a job, school, or volunteering.

Community
Relationships and social networks that provide support, friendship and love.

Training

Since 2018, Health and Human Services (HHS) has hosted 48 trainings and trained 1,258 individuals.

Certification

HHS implements a peer support specialist certification program, on the authority of the ND 66th Legislative Assembly.

Administrative Rule 75-03-43 outlines the requirements and process for two levels of peer support specialist certification:

- Certified Peer Support Specialist I (CPSS I)
- Certified Peer Support Specialist II (CPSS II)

As of Nov. 26, 2024, HHS has certified:
386 CPSS I
38 CPSS II

Reimbursement

Reimbursement for peer support services is available through:

- Community Connect
- Free Through Recovery
- Substance Use Disorder Voucher
- 1915(i) Medicaid State Plan Amendment
- Medicaid Expansion
- Blue Cross Blue Shield

Free Through Recovery (FTR)

Free Through Recovery (FTR) is a community-based behavioral health program designed to increase access to recovery support services for individuals engaged with the criminal justice system who have a serious behavioral health concern. Free Through Recovery is a partnership between Health & Human Services and the Department of Corrections and Rehabilitation.

The mission of Free Through Recovery is to improve healthcare outcomes and reduce recidivism by delivering high-quality community behavioral health services linked with effective community supervision. The goals are to improve engagement in quality services and to provide access to individualized services that are responsive to each person's specific needs.

Eligibility

- Be 18 years of age or older.
- Involved with the criminal justice system and at risk for future criminal justice involvement.
- Have a behavioral health condition such as; bipolar disorder, major depression, psychotic disorders of all types, post-traumatic stress disorder, obsessive compulsive disorder, borderline personality disorder, panic disorder, moderate and severe substance use disorder(s).
- Display concerns/challenges in areas of daily living (housing, employment, etc.).

Referrals

Individuals can be referred to the program by a parole and probation officer, or if the person is transitioning from prison, through an internal assessment process at the Department of Corrections and Rehabilitation.

Services

Care Coordination

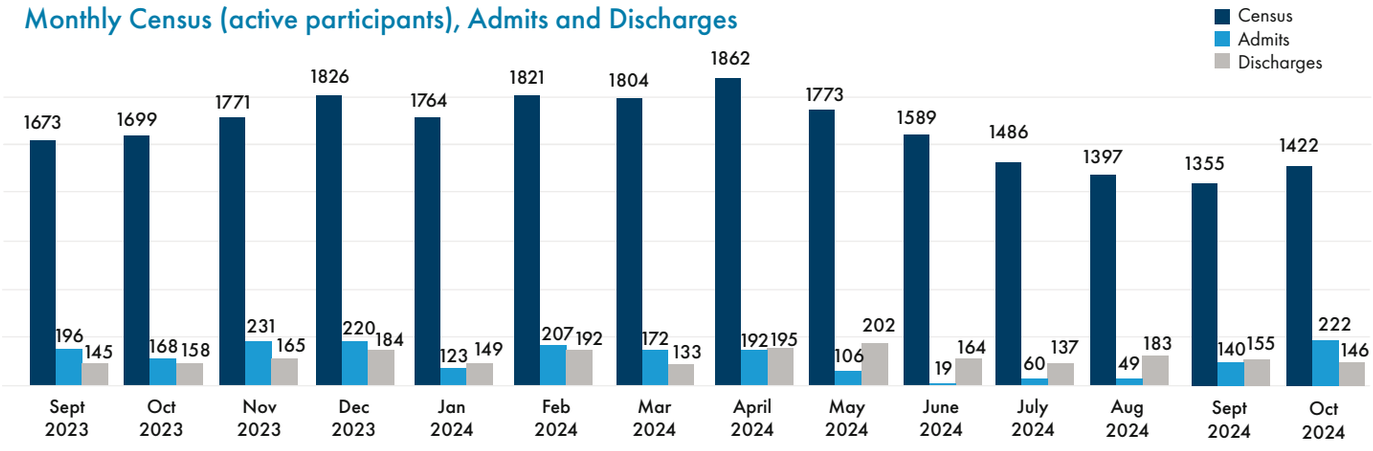
A Care Coordinator assists with support in working towards long and short-term goals.

Recovery Services

Recovery looks different for everyone, a provider can assist with access to individualized resources needed to help lead a healthy and fulfilling life.

Peer Support

A supportive relationship with a peer who has similar lived experience and who serves as an advocate and mentor, offering sound advice and resources.

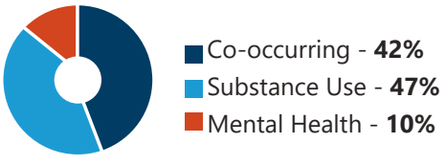


Providers

There are currently **55** providers located throughout the state with the capacity to serve **1,500** participants.

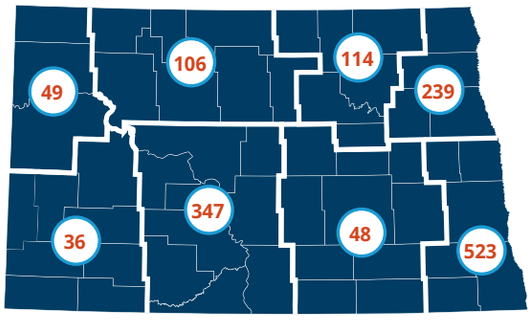
Implementation

Free Through Recovery launched on Feb. 1, 2018. Since then, **7,155** individuals have participated in the program, with **1,462** individuals currently being served (as of Nov. 20, 2024).



Monthly Census (active participants), Admits and Discharges

Of the 7,155 total participants

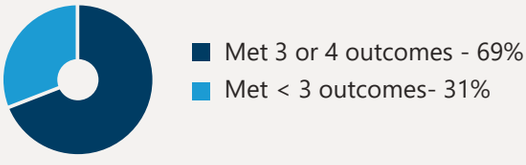


- 42% have a co-occurring (mental health and substance use) behavioral health need.
- 64% are between the ages of 31-50 and a quarter (23%) of the individuals are between the ages of 18-30. One percent of individuals are over the age of 65.
- 28% of participants are Native American; 4% of participants are Hispanic.
- 16% of program participants live within the rural regions of 1, 3, 6 and 8.

Behavioral Health Needs

Referrals by Region

Of the 1,462 individuals currently being served



(As of Nov. 20, 2024)

Outcomes

The Free Through Recovery program utilizes a pay-for-outcomes model. Outcomes in the domains of criminal justice, employment/financial, housing, and recovery are gathered monthly.

Overall, from March 2018 through September 2024, 69% of the time participants achieved 3 of the 4 outcomes.

March 2018 - Sept. 2024 Outcomes

Positive outcomes were achieved by:

- **75%** of the participants in the housing domain
- **67%** of the participants in the employment domain
- **71%** of the participants in the recovery domain
- **73%** of the participants in the law enforcement domain

Community Connect

CommunityConnect

My Recovery. My Story.

The mission of Community Connect is to provide quality, community-based behavioral health services to meet the needs of each person.

Stakeholders in the 2018 HSRI ND Behavioral Health System Study reported that North Dakota's current behavioral health system is, "primarily crisis-oriented and pays inadequate attention to rehabilitative and community-based services." The study identified a recommendation (4.1) to ensure access to needed recovery support services, including providing funds to support the implementation of the "Free Through Recovery" program separate from the criminal justice system. During the 66th ND Legislative Assembly, Senate Bill 2012 passed which created a new section in ND Century Code and provided funding to implement Community Connect.

ELIGIBILITY

- Be 18 years of age or older.
- Reside in North Dakota.
- Have a mental health or substance use disorder impacting functionality in multiple domains, including housing, employment, parenting, physical health, and/or community connections.

Services

Care Coordination

A care coordinator assists with short and long-term goals, barriers, and provides a source of connection and support.

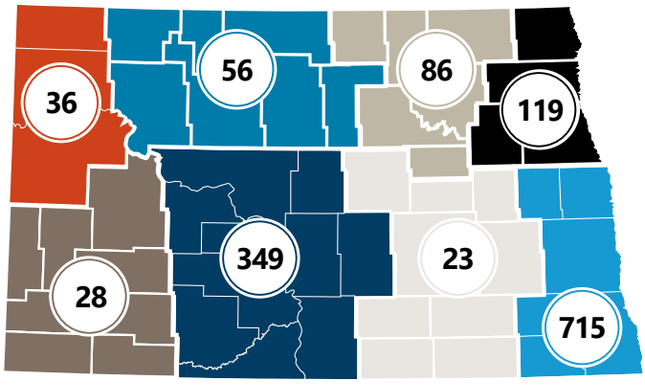
Peer Support

A peer support specialist is an individual with similar lived experience that offers hope, support, and advocacy.

Recovery Services

Access to services or programs to assist an individual with meeting their needs and goals.

Providers

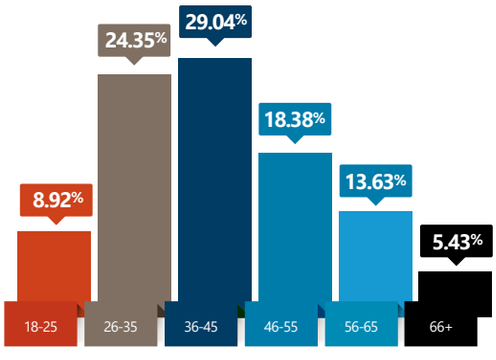


58 providers • **318** Care Coordinators • **147** Peer Support Specialists

Data current as of Nov, 25, 2024

Participants

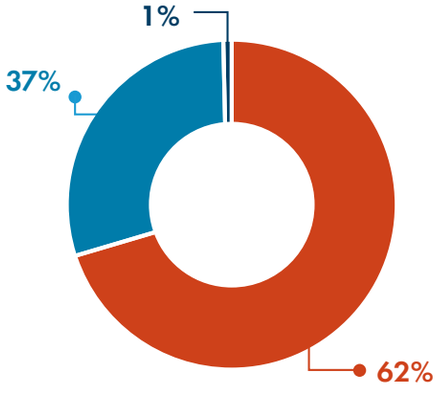
The following charts provide a breakdown of all currently active participants within the Community Connect program.



- Since program inception in February 2021, the program has served 7,654 participants.
- There are currently 1,412 participants within the Community Connect Program.

- Region 1 - Williston
- Region 2 - Minot
- Region 3 - Devils Lake
- Region 4 - Grand Forks
- Region 5 - Fargo
- Region 6 - Jamestown
- Region 7 - Bismarck
- Region 8 - Dickinson

Age Range

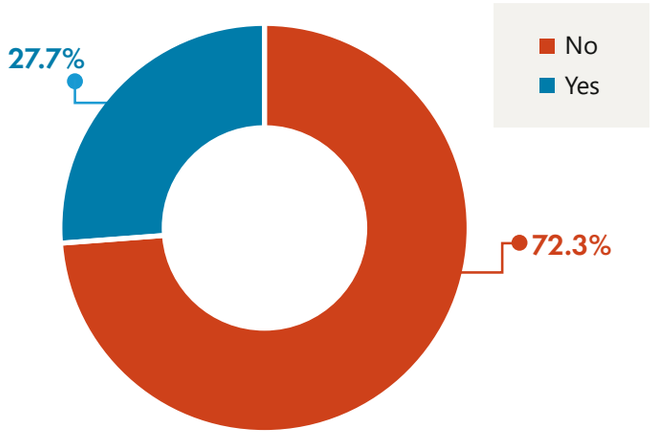


53% of participants are between the ages of 26-45

53%

Living Status

At the time of their application for eligibility, 53% of program participants indicate they are homeless.



Parent/Caregiver

37% of program participants report they are a parent or caregiver.

- No
- Yes
- Unsure

Tribal

27.7% of applicants report they are enrolled in a ND tribe.

- **31.48%** Turtle Mountain Chippewa
- **25.42%** Standing Rock Sioux
- **19.37%** Tribe Other
- **12.59%** Spirit Lake Nation
- **8.47%** Three Affiliated Tribes
- **2.91%** Sisseton Wahpeton Oyate

Peer Support Engagement

Peer support specialists bring hope by sharing their experiences and promoting a sense of belonging. A peer support specialist is an individual who uses their lived experience and skills learned through formal training to deliver services to promote mind-body recovery and resiliency.

1 in 3 Community Connect participants are actively engaging with a certified peer support specialist.

Outcomes

The Community Connect program utilizes a pay-for-outcomes model. Outcomes in the domains of criminal justice, employment/financial, housing, and recovery are gathered monthly.

Of participants actively engaged in services:

Data reflects current biennium: July 1, 2023 - Aug. 31, 2024

78% of participants are actively addressing their housing needs.

75% of participants are actively addressing their employment/ financial needs.

77% of participants have had no negative contact with law enforcement.

76% of participants are actively addressing their recovery needs.

Needs and Progress

Upon intake, and at least every six months, information is collected from program participants around their self-reported well-being in multiple domains. At six months, **80% of program participants self-report improvement** in these domains, which include housing stability, employment/financial stability, physical health, community connections, parenting, use of emergency services, and feelings of worry or anxiety in their daily life.

Permanent Supportive Housing (PSH)

Upon legislative directive in 2021, Health and Human Services (HHS) developed methodology to distribute funds for permanent supportive housing. Funds are distributed to qualified entities that:

- Utilize best practices for permanent supportive housing.
- Provide recovery-oriented and person-centered services.
- Submit process and outcome measures to the department.

PSH is a model that combines affordable housing assistance with voluntary supportive services to address the needs of chronically homeless people. The services are designed to build independent living and tenancy skills and connect people with community-based care, treatment, and employment services. In addition to ending homelessness for people who are chronically homeless, research has demonstrated that permanent supportive housing can increase housing stability and improve health.

Eligibility

New referrals for tenancy at the property shall be accepted from the local Continuum of Care (COC) through the coordinated entry process, by which individuals and households experiencing homelessness are prioritized for housing based on the Coordinated Entry, Assessment, Referral, and Evaluation (CARES) Prioritization Policy.

Services

Services shall be designed to support individuals in solving predictable problems by proactive planning, relationship building, vigilant oversight of critical incidents, and communication and coordination with property managers.

Supportive Services may include:

- Outreach and engagement
- Tenancy support
- Assessments
- Community engagement
- Housing stabilization and service plans

Current Contracts
2023-25 biennium

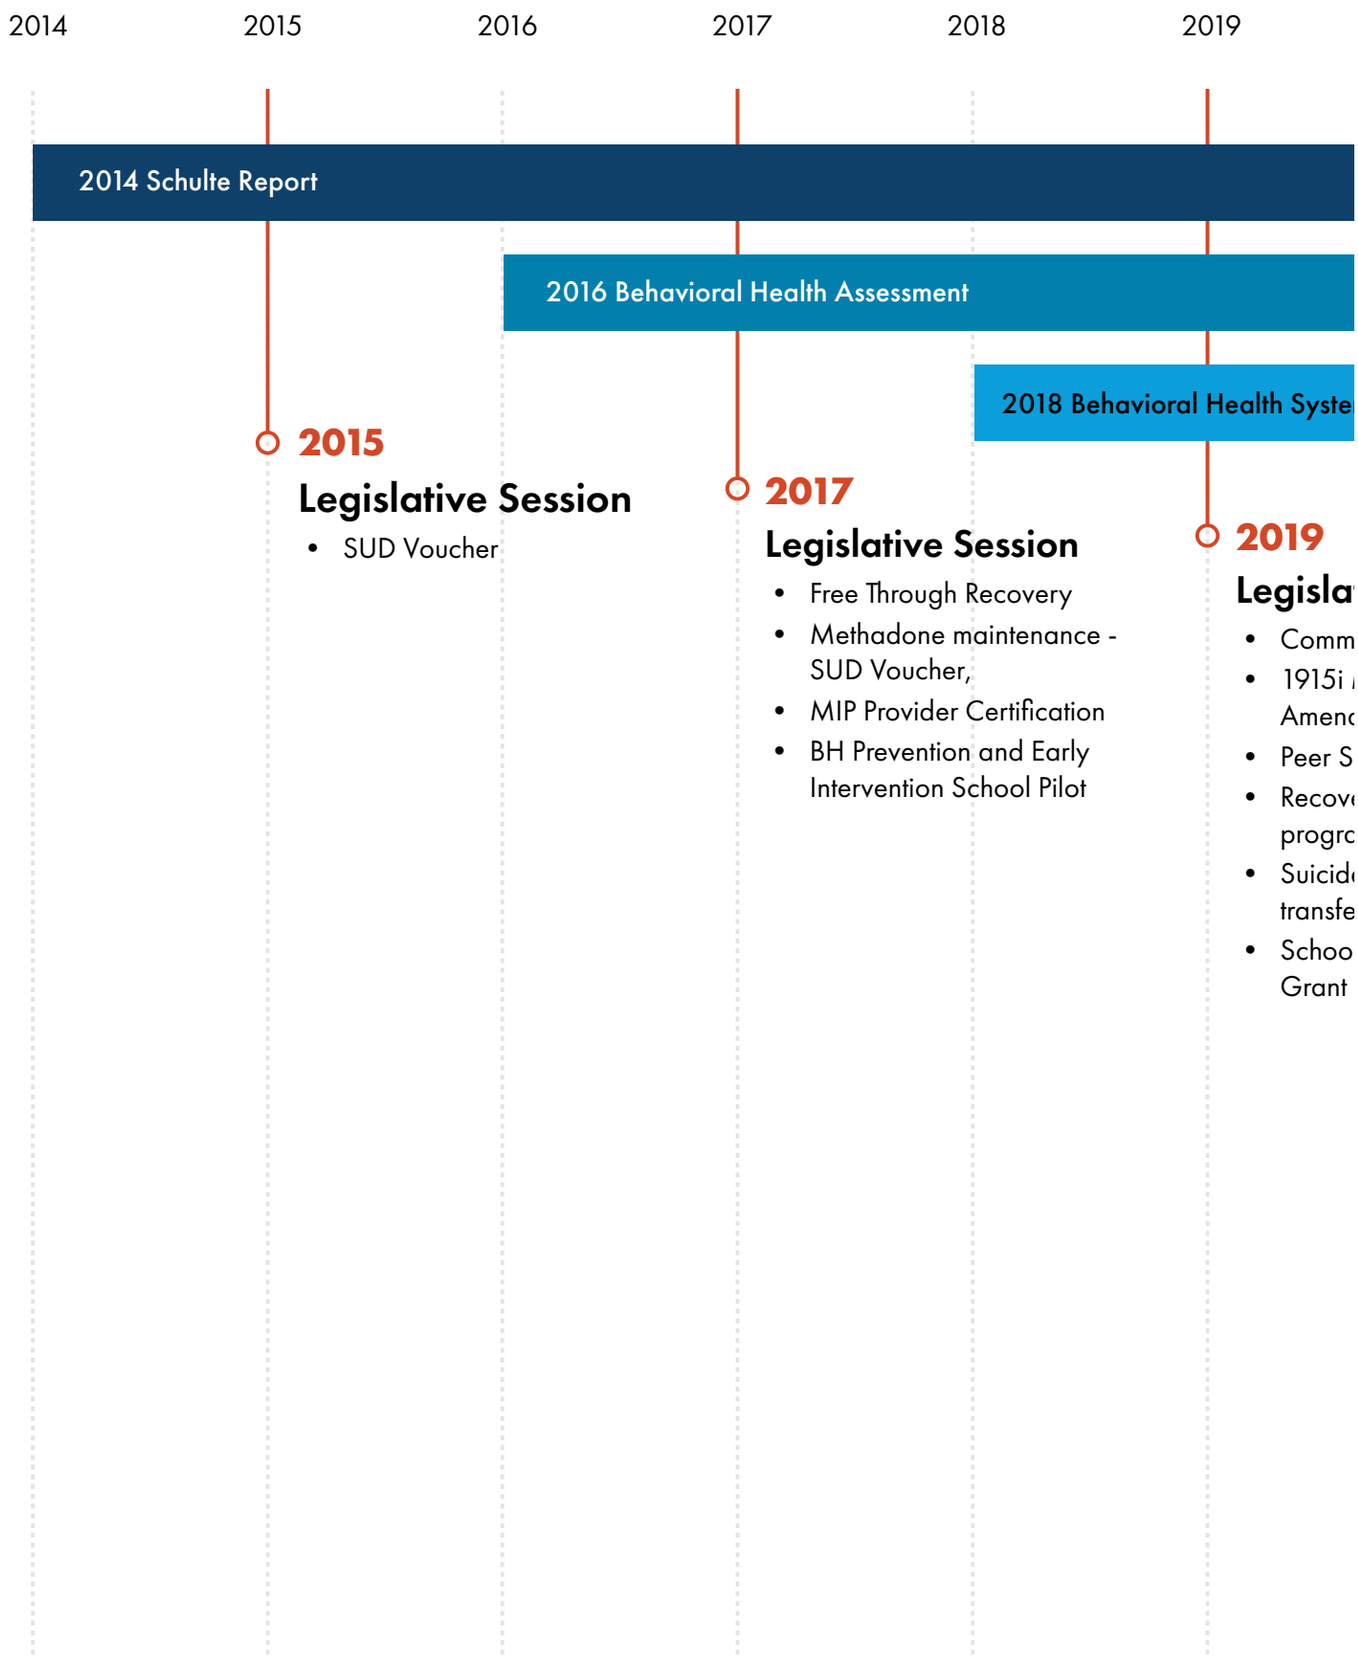
236 total tenants supported from July 2021 to June 2024

PRAIRIE HARVEST MENTAL HEALTH
- Stern Place (9 units): 9 tenants support since July 2021
- Harvest Homes (12 units): 17 tenants supported since July 2021

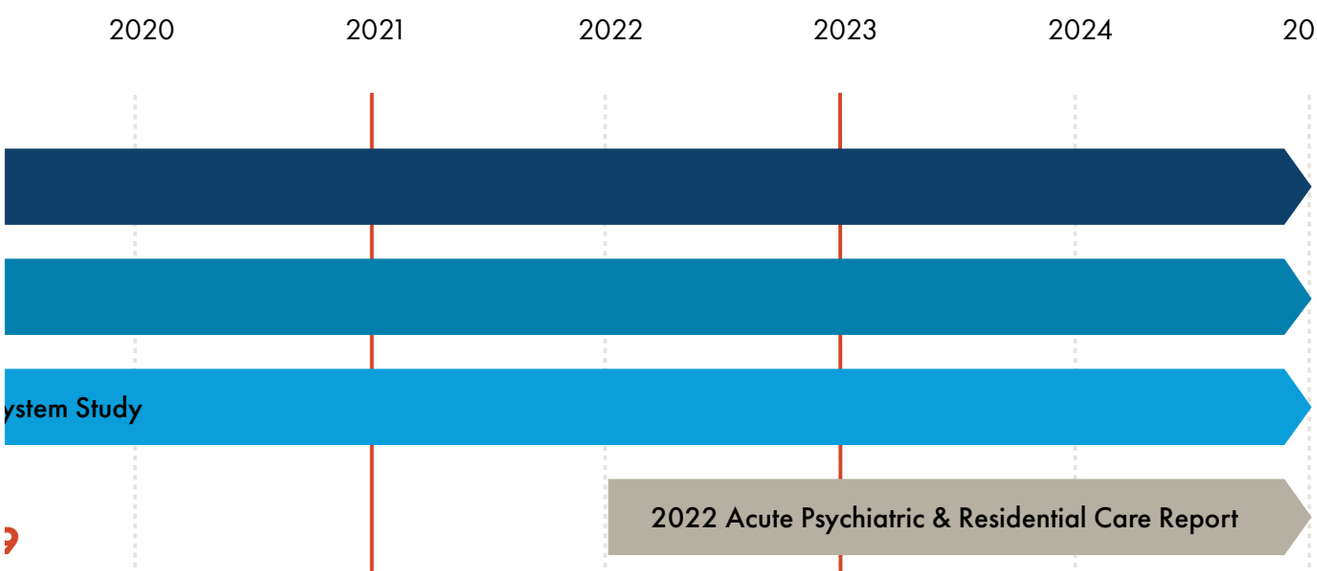
GRAND FORKS HOUSING AUTHORITY
- LaGrave On First (41 units): 77 tenants supported since July 2021

BURLEIGH CO HOUSING
- Edwinton (41 units): 57 tenants supported since July 2021

BEYOND SHELTER (FORMERLY FARGO HOUSING AUTHORITY)
- Cooper House (42 units): 77 tenants supported since July 2021



FARGO HOUSING AUTHORITY
- (40 units): Grant awarded 11/1/2024



Program Outcomes
- Reduction in service calls.
- Partnerships with private providers to come on-site and provide outreach and connection to their services, occupational therapists, addiction counseling, nursing, med management.
- Community integration events designed to bring awareness to the tenants on what services and supports are in the community.
- Onsite housing support specialists.
- Services designed to improve self-sufficiency and learn budgeting skills.
- Resources for training and supporting staff.

North Dakota Behavioral Health System Study

Behavioral Health System Study Timeline

1/1/2017 to 6/30/2018

Behavioral Health Division in contract with Human Services Research Institute (HSRI) to conduct an in-depth review of North Dakota's behavioral health system.

Final report released April 2018.

8/1/2018 to 6/30/2019

Behavioral Health Division in contract with HSRI to initiate and facilitate the implementation of a strategic plan based off the recommendations from the comprehensive study of ND's behavioral health system published April 2018.

2019 - Present

Behavioral Health Division in contract with HSRI to prioritize and refine the strategic plan, including goals and objectives.

Initiation of the strategic plan and monitoring and sustaining this implementation.

www.hsri.org/NDvision-2020

The Human Services Research Institute (www.hsri.org) is an independent, nonprofit research institute that helps public agencies develop effective, sustainable systems to deliver high-quality health and human services and supports in local communities. In the behavioral health space, their goal is to deliver actionable, viable, and culturally relevant strategies that empower service users and promote wellness and recovery

Behavioral Health System Study Recommendations

In 2017-2018 the Human Services Research Institute (HSRI) completed a study of North Dakota's behavioral healthcare system revealing 13 key recommendations. HSRI's recommendations are based on an in-depth analysis of stakeholder feedback, local data and the availability of services in North Dakota in contrast to the Institute of Medicine's Continuum of Care model. These recommendations include:

1. Develop a comprehensive implementation plan.
2. Invest in prevention and early intervention.
3. Ensure all North Dakotans have timely access to behavioral health services.
4. Expand outpatient and community-based service array.
5. Enhance and streamline system of care for children and youth.
6. Continue to implement/refine criminal justice strategy.
7. Engage in targeted efforts to recruit/retain competent behavioral health workforce.
8. Expand the use of tele-behavioral health.
9. Ensure the system reflects its values of person-centeredness, cultural competence, trauma-informed approaches.
10. Encourage and support the efforts of communities to promote high-quality services.
11. Partner with tribal nations to increase health equity.
12. Diversify and enhance funding for behavioral health.
13. Conduct ongoing, system-wide data-driven monitoring of needs and access.

HSRI continues to support the state with system change. A list of 140 strategic goals have been established to improve all aspects of the system. In coming years, North Dakota will achieve its vision for a 'good and modern' behavioral health care system through continued collaboration with stakeholders, ongoing system monitoring, and implementation of strategic planning efforts.

- Behavioral Health is Health
- Improving the Lives of North Dakotans
- Behavioral Health in North Dakota
- Who We Are
- 2025 – 2027 Budget Overview

NORTH Dakota | Health & Human Services
Be Legendary.

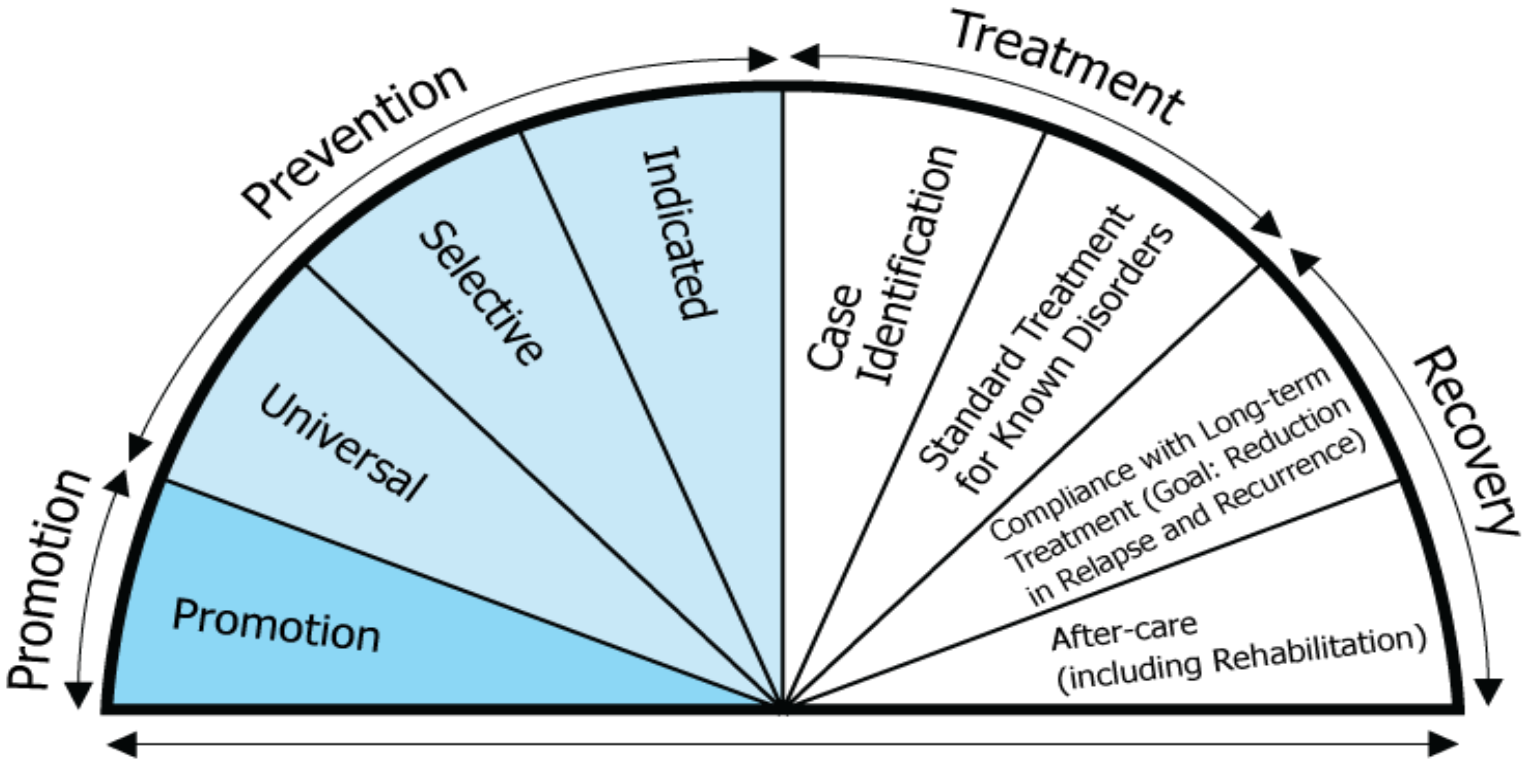
What is Behavioral Health?

A state of mental/emotional being and/or choices and actions that affect WELLNESS.

NORTH Dakota | Health & Human Services
Be Legendary.

Behavioral Health is Health!

Mental Health and Physical Health is Fundamentally Linked.



The average lifespan for individuals with serious mental illness is 25-30 years less than the general public.

Individuals with depression have a 40% higher risk of developing heart diseases than the general population.

NORTH Dakota | Health & Human Services
Be Legendary.

Behavioral Health **Continuum of Care Model**

The goal of this model is to ensure there is access to a full range of high-quality services to meet the various needs of North Dakotans.

Institute of Medicine Continuum of Care

NORTH Dakota Be Legendary. | Health & Human Services

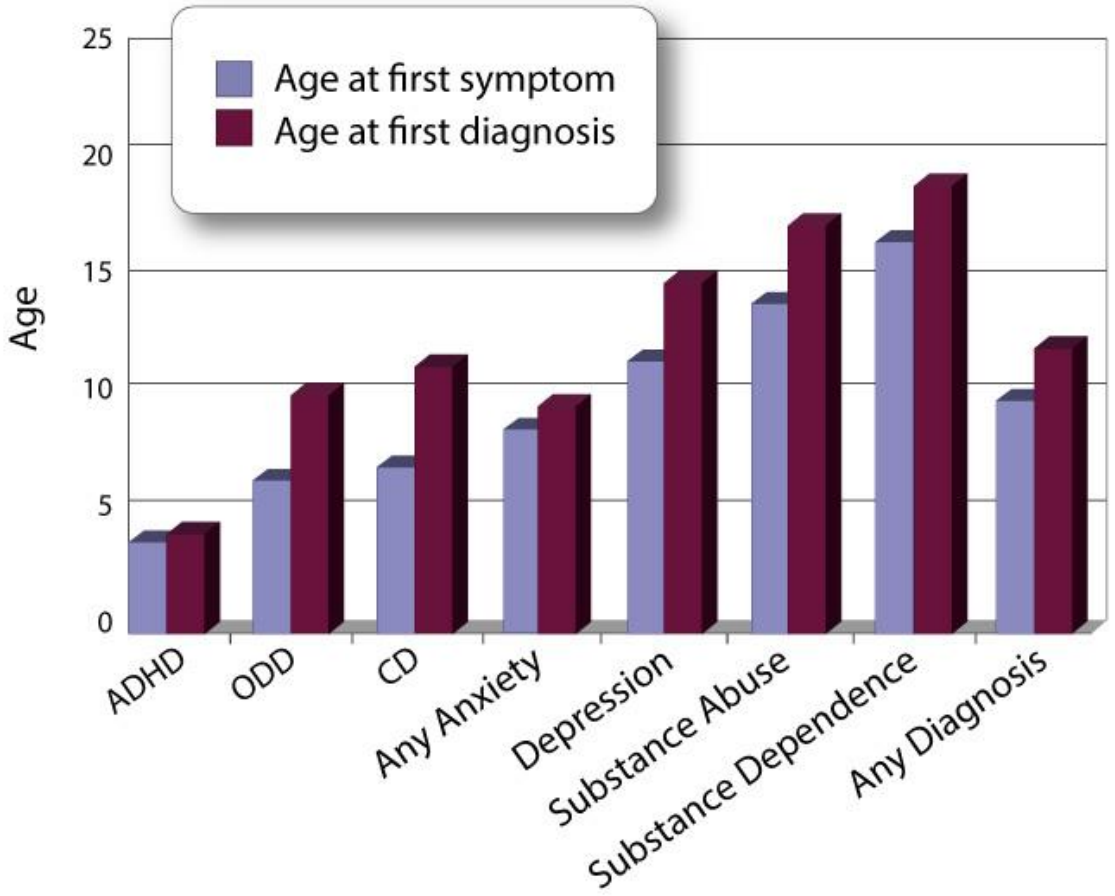
PROMOTION/PREVENTION

Delivered prior to the onset of a disorder, these interventions are intended to prevent or reduce the risk of developing a behavioral health problem or preventing death.

NORTH Dakota | Health & Human Services
Be Legendary.

EARLY INTERVENTION

These strategies identify those individuals at risk for or showing the early signs of a disorder with the goal of intervening to prevent progression.



NORTH Dakota | Health & Human Services
Be Legendary.

EARLY INTERVENTION
Windows of Opportunity

- ½ of all people with mental and/or substance use disorders are diagnosed by age 14

- ¾ of people with these conditions are diagnosed by age 24

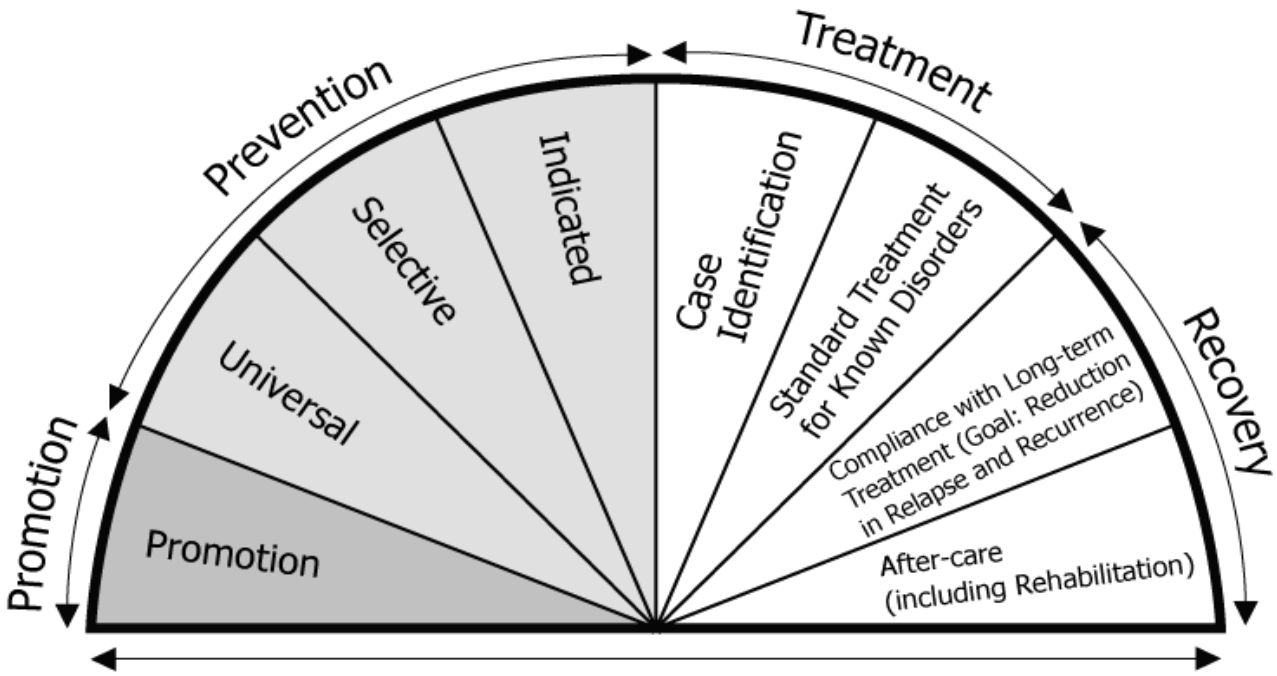
(2009 Preventing Mental, Emotional, and Behavioral Disorders Among Young People: Progress and Institute of Medicine)

Intervening during windows of opportunity, **CAN** prevent the disorder from developing.

TREATMENT

These clinical services are for people diagnosed with a behavioral health disorder.

NORTH Dakota | Health & Human Services
Be Legendary.



RECOVERY

These services support individuals' abilities to live meaningful, productive lives in the community.

2019 - Present

Behavioral Health Division in contract with HSRI to prioritize and refine the strategic plan, including goals and objectives. Initiation of the strategic plan and monitoring and sustaining this implementation.

NORTH Dakota Be Legendary. | Health & Human Services

Implementation Summary

After learning from the community about their priorities for systems change, the Behavioral Health Planning Council selected 13 aims with 28 goals.

Behavioral Health Principles

Behavioral health is health:

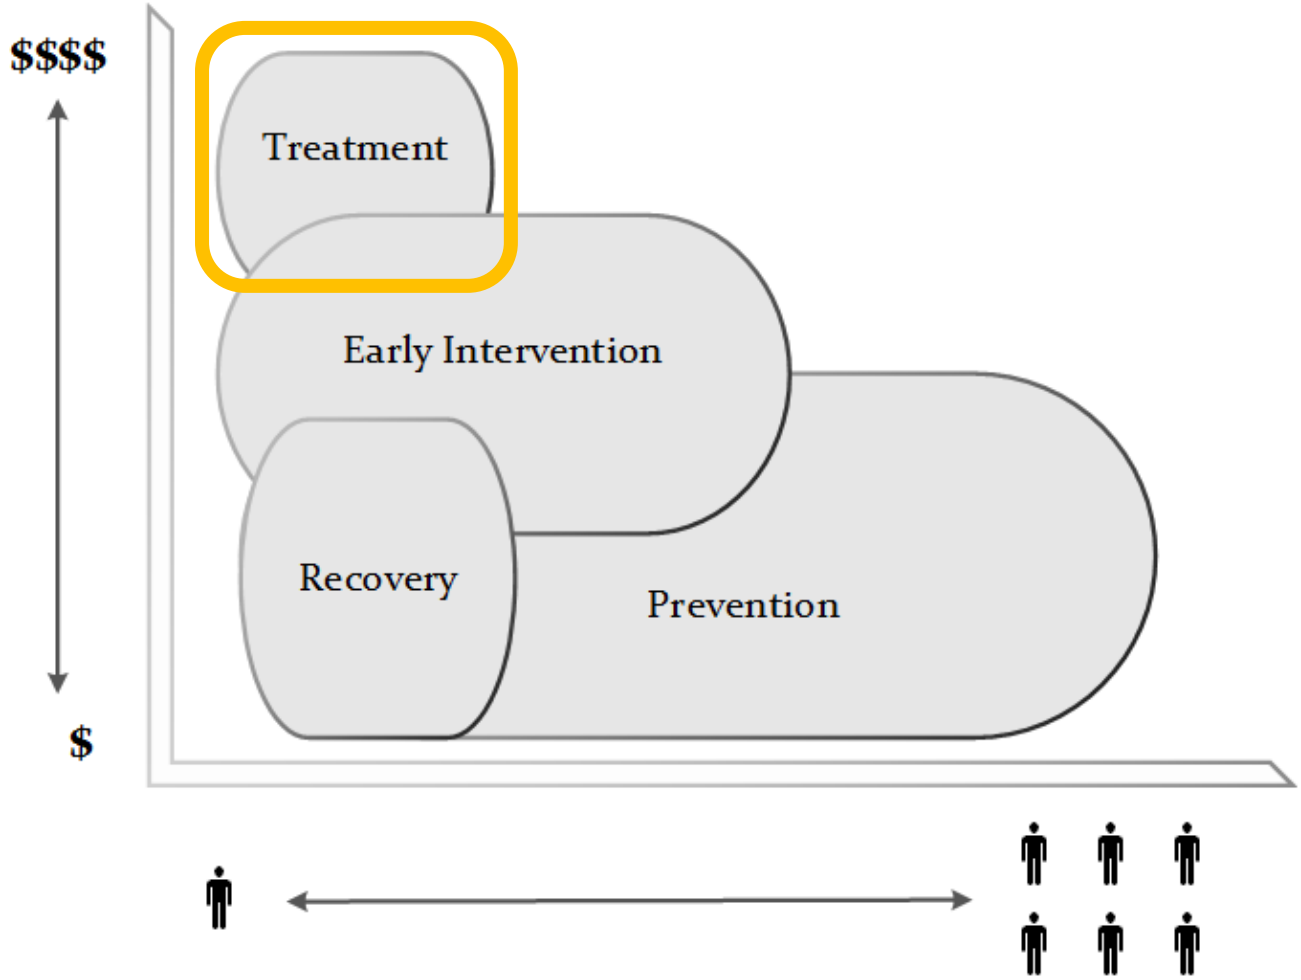
- Stop the shame and stigma around behavioral health
- Ensure integration and parity of health and behavioral health

Support the full continuum of care across prevention, early intervention, treatment and recovery

Ensure person-centered care:

- Meet people where they are
- Engage in individual and family-driven care
- Provide trauma-informed services
- Provide services focused on recovery

Ensure behavioral health services and supports are available in the community: avoid institutionalizing and criminalizing



Be efficient and effective:

- Leverage best practices
- Monitor and evaluate outcomes
- Measure the return on investments

Develop, recruit, and retain a competent behavioral health workforce

Return on Investment

Improving the lives of North Dakotans

Priorities

Supporting the Full Continuum of Care

Increasing Community-Based Services

Preventing Criminal Justice Involvement for Individuals with a Behavioral Health Condition

2023 Session Implementation

Jail Tele-psychiatry

Behavioral Health School Grant

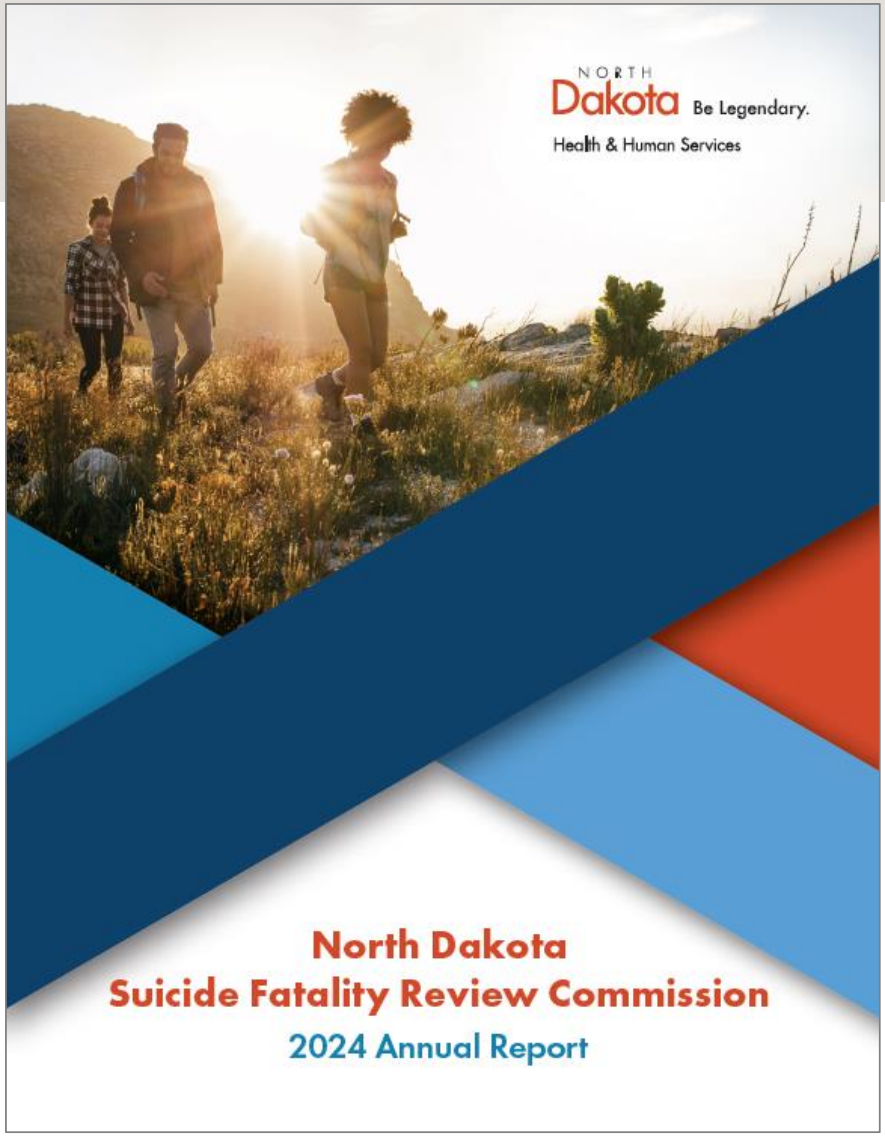
2023-2024 SCHOOL YEAR

24 ND school districts or special education units received **$2.7 million** for behavioral health needs of students.

Approved Funding Categories

2024-2025 SCHOOL YEAR

25 school districts and special education units are eligible to apply for funding totaling $4,483,793.84.



- As of Nov. 15, 2024, **20 eligible districts/special education units** have been approved for funding totaling **$3,721,086.96.**

2021-2023 biennium appropriation: $3 million | 2023-2025 biennium appropriation: $9.5 million

NORTH Dakota Be Legendary. | Health & Human Services

Suicide Fatality Review Commission

- House Bill 1390, passed during the 68th Legislative Assembly, created and enacted a new section to chapter 23-07 of the North Dakota Century Code relating to the creation of a Suicide Fatality Review Commission.
- The first commission meeting to review cases commenced in January 2024.
- The Commission completed thorough case reviews of a sample of suicide deaths that occurred in North Dakota in 2022 (18 of 184 suicide deaths) to identify evidence-based prevention measures.

Opioid Settlement Fund

- Current settlements with 13 manufacturers, distributors or pharmacies (one still pending)
- ND has received 22.7M and expected to receive additional 40M.

Through HB 1447 and codified in North Dakota Century Code 50-36, the 68th Legislative Assembly established an opioid settlement fund within the state treasury.

$8M was appropriated in the 2023-2025 biennium to HHS, with at least 20% to be used for opioid use prevention and overdose prevention, including best practices relating to fentanyl drug overdose, and workforce development.

Opioid Settlement Fund

Following priorities set by the ND Opioid Settlement Advisory Committee and national settlement requirements, HHS opened a grant opportunity November 2023. 65 applications were received; **14 applications** were awarded to begin implementation Feb. 2024.

Grant Impacts (as of Oct. 24, 2024):

- **Endeavour Sober Living** has established a recovery house in Minot to support pregnant and parenting women through their recovery journey.
- **Community Connect** providers have served an additional 749 individuals throughout the state by providing recovery support services.
- **Sanford Medical Center Fargo** has established an outpatient treatment program and is providing medications for opioid use disorder.
- **Training Academy for Addiction Professionals (TAAP),** operated by Heartview Foundation, trained seven new addiction counselors and currently has nine active trainees set to complete their program by winter 2025.

Behavioral Health Navigator

Through 68th ND Legislative Assembly action, HHS created a behavioral health navigator role.

- Facilitate connection to care by identifying resources for individuals and families and helping them navigate through behavioral health care services.
- Assist in interpreting clinical language to ensure individuals can navigate to the appropriate level of care or service.

From Oct. 2023 through Dec 2024, the behavioral health navigator assisted **304 individuals**.

Addiction System Outcomes

Since 2016, **addiction treatment** services have expanded.

- 2016: 75 licensed programs (including 25 residential programs)
- 2024: 106 (including 37 residential)

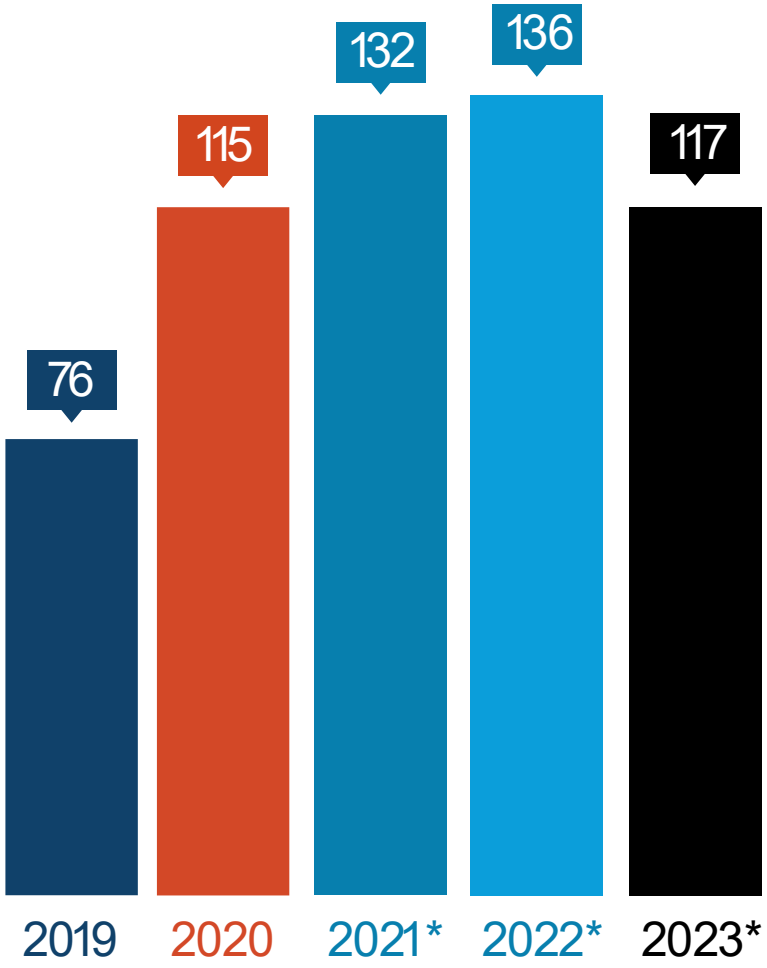
The **first Opioid Treatment Program** in the state opened in 2016

- 2024: Four programs serving 1,125 individuals.

Substance Use Disorder Voucher (SUD Voucher) launched in 2016

- Created the opportunity for 8,500 individuals to access treatment from private providers.

Free Through Recovery launched in 2018 and **Community Connect** launched in 2021.



- Provided care coordination, peer support, and recovery support for over 14,000 North Dakotans.
- Community providers are reimbursed based on outcomes and show consistent monthly success of 70% of participants achieving 3 of 4 goals (housing, employment, recovery, and criminal justice domains).

A **recovery housing assistance program (RHAP)** was launched in 2022

- Over 1,100 individuals have been supported
  - Out of 502 participants who reported lack of employment upon entering program, 57% reported improvement in their employment status at the end of programming.
  - Participants see an average weekly income growth of 152% at program conclusion.

50-06-05.3. Regional Human Service Centers - Powers - Duties

Regional human service centers shall provide human services to all eligible individuals and families to help individuals and families achieve or maintain social, emotional, and economic self-sufficiency by providing human services to:

a. Prevent, reduce, or eliminate dependency;

b. Prevent or reduce inappropriate institutional care by providing for care while institutionalized or providing for community-based or other forms of less restrictive care;

c. Secure referral or admission for institutional care;

d. Provide outpatient diagnostic and treatment services; and

e. Provide rehabilitation and crisis services for patients with mental, emotional, or substance use disorders, an intellectual disability, and other psychiatric conditions, particularly for those patients who have received prior treatment in an inpatient facility.

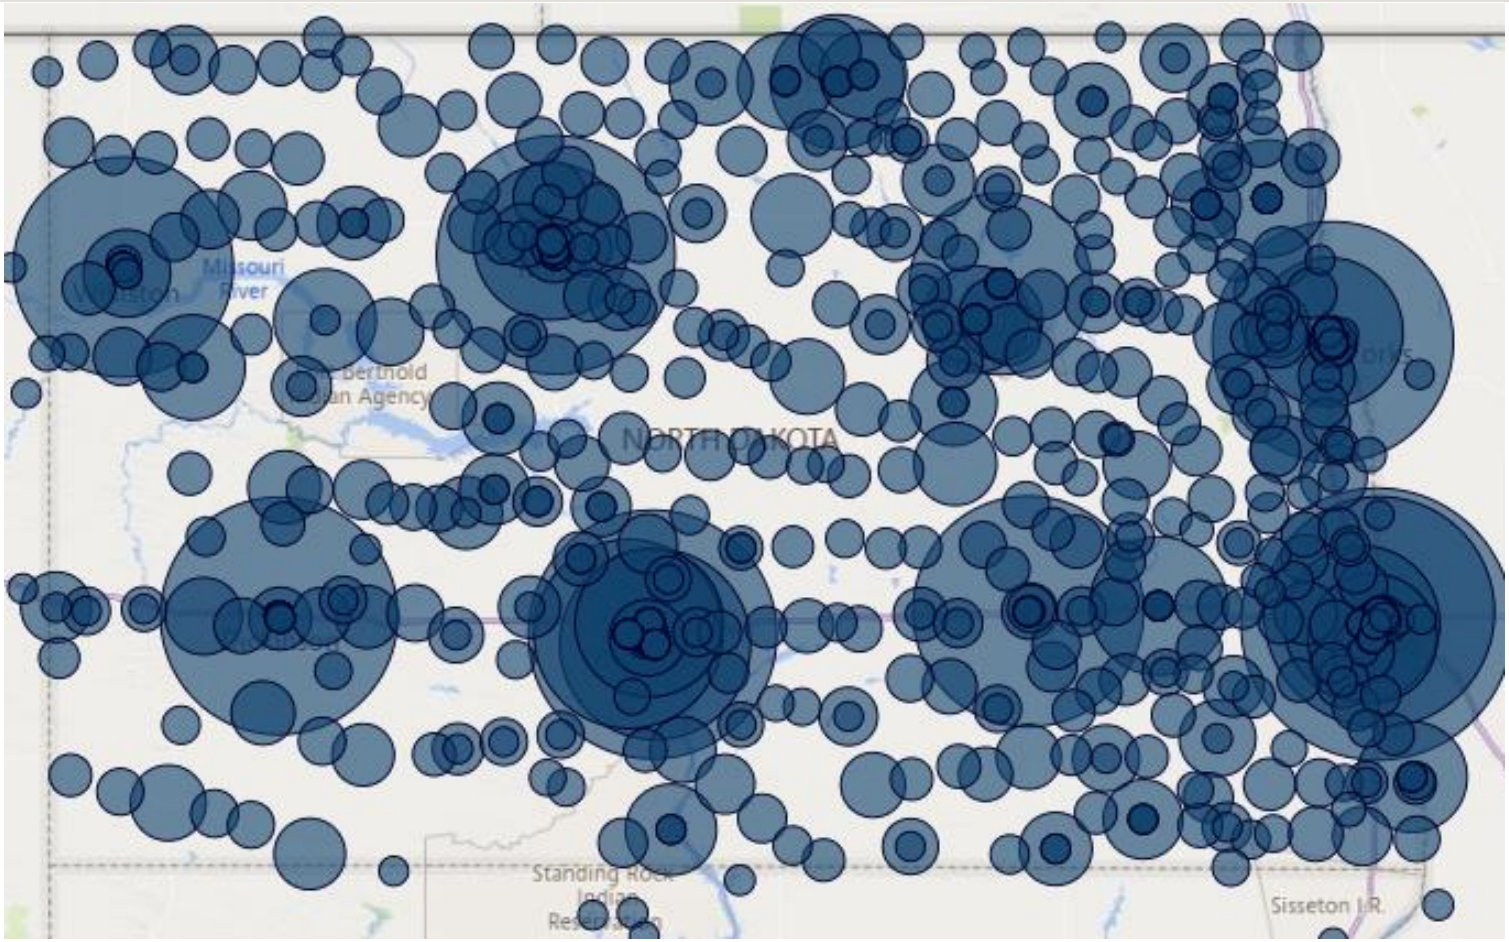
**SB 2113 to update language*

NORTH Dakota Be Legendary. | Health & Human Services

SB 2113

- Name transition from Human Service Centers to Behavioral Health Clinics
- Update in language to align with behavioral health best practice
    - Example: Update “Prevent, reduce, or eliminate dependency” to “Build resilience, self-sufficiency, and independence”

NORTH Dakota | Health & Human Services
Be Legendary.



Key Accomplishments

- All Regional Human Service Centers (behavioral health clinics) achieved 4-year Council on Accreditation (COA) expedited re-accreditation.
- Ruth Meier's Adolescent Center (RMAC) achieved a 3-year Commission on Accreditation of Rehabilitation Facilities (CARF) re-accreditation.
- Badlands, Southeast, Lake Region approved sites for ND Training Academy for Addiction Professionals
    - West Central and South Central application pending approval
- Established Release and Integration program with Department of Corrections and Rehabilitation.
- Through funding approved during 2023-2025 legislative session:
    - Implemented the Centurion Mobile Duress System
    - Established FasPsych and Legacy, LLC contracts in July 2024 in 2 regions
        - provides on-call psychiatry and nursing support during nights, weekends, and holidays at the crisis stabilization center (CSC).
- Roll-out of Avel services in all regions in July 2024 to partner with local law enforcement to provide telehealth crisis support.

2021-23 HHS Agency Operations Audit

FINDING 2023-02 Opportunities to Improve Safeguarding Controlled Substances at State Hospital

- Pyxis Automated Dispensing Cabinet (ADC)
- Monthly Pharmacy Inspection
- Performance Improvement Initiative:
  - Dual Signature Count
- Reduction in Wastage:
  - Dual signature for half tablet use, reducing wastage by 85%.
- Timely Access Removal

FINDING 2023-02

Opportunities to Improve Safeguarding Controlled Substances at the State Hospital

WHAT HAPPENED

Our team found several issues with controls for safeguarding controlled substances at the North Dakota State Hospital. We did not identify any diversion of controlled substances during the audit period. However, the weaknesses in controls for safeguarding these medications increase the risk of diversion to occur.

BACKGROUND

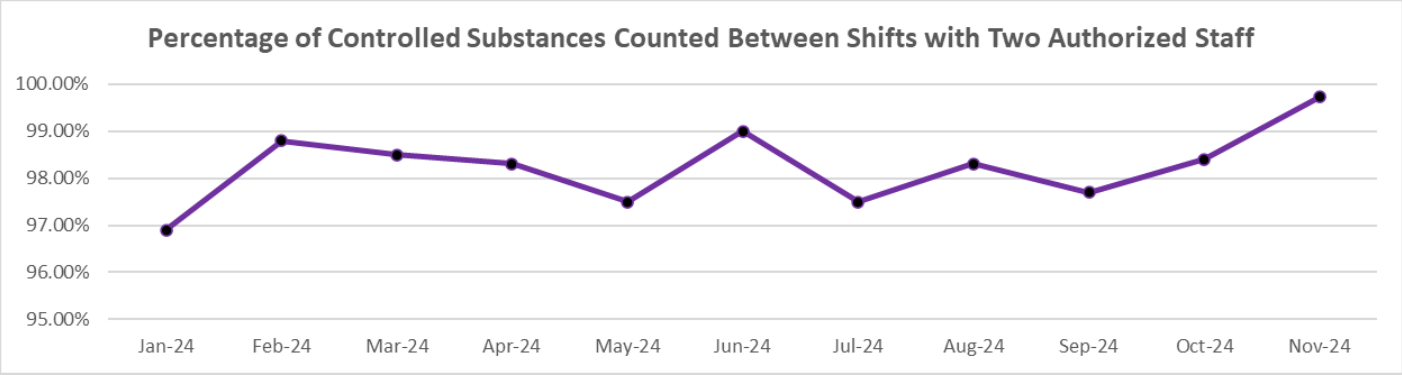
One way to classify medications is by controlled substances or non-controlled substances. Controlled substances are divided into five "schedules". A "Schedule 1" substance would be the most addictive, and a "Schedule 5" substance would be the least addictive. An updated and complete list of the schedules is published annually in Title 21 Code of Federal Regulations. North Dakota state law (N.D.C.C. 19-03.1) identifies controlled substances. Substances are placed in their respective schedules based on whether they have a currently accepted medical treatment in the United States, their relative abuse potential, and the likelihood of causing dependence when abused. Examples of controlled substances are medications such as Xanax and Ativan which are commonly prescribed to manage acute symptoms of anxiety and panic disorders.

Controlled substances that are not monitored are at a greater risk of diversion. Diversion means taking medication from a patient for yourself or others for personal use. Common methods for diverting controlled substances include:

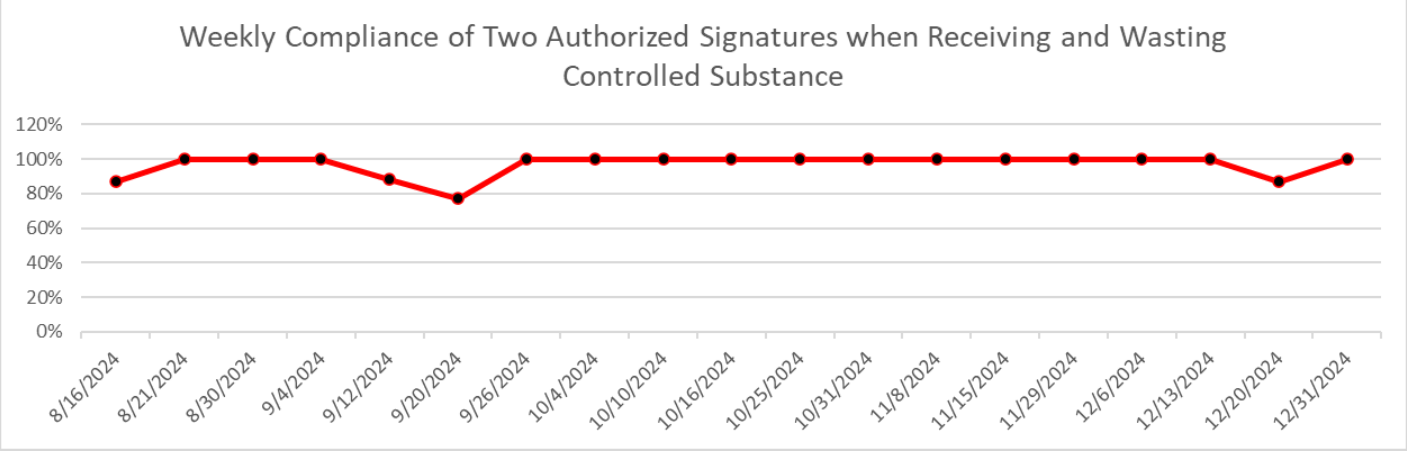
- Stealing syringes or vials.
- Under-dosing patients.
- Replacing controlled substances with another product.
- Taking medications from patients that are given on an as-needed basis.
- Pulling duplicate doses.
- Failing to dispose of or document waste of medications.

The North Dakota State Hospital provides short-term acute inpatient psychiatric and substance abuse treatment, intermediate psycho-social rehabilitation services, forensic services, and safety net services for adults. The hospital also provides residential addiction treatment services for adult male and female clients referred to the Tompkins Rehabilitation Center. There was an average daily census of 121 residential and inpatient patients per day during our audit period. Because of the nature of the illnesses treated and services provided, the State Hospital keeps various controlled substances on hand to meet the patient's treatment needs.

We found **several issues** with controls for safeguarding **controlled substances** at the North Dakota State Hospital.



Our team reviewed the pharmacy practices of the State Hospital and discovered the following issues with controlled substances:



Pharmacy Walk-Throughs – Issues Not Addressed

North Dakota Administrative Code (N.D.A.C. 61-07-01-13) requires a monthly walk-through by the pharmacist or qualified designee that reviews safeguards over the medication inventory and documentation of the findings. These walk-throughs look to identify weaknesses in areas that could increase the risk of diversion occurring such as medications being stored securely, access to keys to open secure storage, and proper logging of controlled substances.

Improvement timeline

Continuous Quality Improvement data

NORTH Dakota Be Legendary. | Health & Human Services

FUTURE
NORTH DAKOTA
STATE HOSPITAL

EFFICIENCY

- The building will be more efficient to maintain, heat, and cool.
- More efficient and concise layout which will make it easier to staff.
- Consolidated building footprint which will reduce time, staff redundancy, and footfall allowing staff to care for patients more effectively.

COST-EFFECTIVE SOLUTION

- Renovating the existing building to the level that's needed is cost prohibitive.
- Renovation would be a significant disruption without reducing capacity during a long construction period.
- New location would visually disassociate the hospital from JRCC, but would still allow specific service agreements to remain
- More cost effective to operate, staff and maintain a single 309,614 sf facility vs the existing multi-building 503,417 sf

IMPROVED CARE & EXPERIENCE

- Increase patient capacity without significant staff increases
- Increase capacity will contribute to reducing the waitlist for admissions.
- Improve patient safety, security and well being
- Modern healthcare facility design, current security technology, etc.

PROJECT GUIDING PRINCIPLES

"OUR MISSION IS DEDICATED TO THE CARE, TREATMENT, AND SUPPORT OF EACH INDIVIDUAL'S JOURNEY TOWARD WELLNESS AND RECOVERY WITHIN A SAFE ENVIRONMENT THAT PROMOTES REINTEGRATION IN THE COMMUNITY."

RECOVERY

Foster the reintegration of clients into the community by empowering them to develop the skills and awareness needed to lead successful lives despite illness or injury. The building should facilitate this by ensuring separation from the prison system and incorporating features like enclosed courtyards, outdoor spaces, and natural light to create a supportive environment.

REINTEGRATION

Facilitate individualized reintegration at various levels by designing a home-like environment, offering access to community spaces, creating a familiar and less traumatizing setting, and providing a testing ground for tailored caregiver-patient interactions.

SAFETY

Prioritize comprehensive safety for staff, clients, visitors, contractors, and the community by implementing anti-ligature measures, minimizing blind spots, ensuring the proximity of staff to clients, and integrating alert systems, duress systems, and tracking mechanisms for both clients and staff.

FLEXIBILITY & EFFICIENCY

Maximize space flexibility and efficiency by creating adaptable units capable of shifting or opening specialized care, incorporating smart technology, and strategically placing spaces to enable more efficient and responsive healthcare delivery, and ensuring a dynamic response to changing needs.

COURAGE EVOLUTION & EXPLORATION

Leverage research insights to design an innovative and entirely new environment that actively supports clients in their recovery, fostering a space that encourages courage, exploration, and personal evolution rather than merely rebuilding or rehashing existing models.

CLIENTS FIRST

Prioritize clients by placing their needs and experiences at the forefront of every aspect so that decisions are centered on enhancing the overall client experience.

11:15 a.m. Chairman J. Nelson closed the hearing.

Jan Kamphuis, Committee Clerk

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

I urge your support for HB 1012 to ensure continued and increased funding for the 988 Suicide and Crisis Lifeline and the 211 Information and Referral Helpline.

These services provide free, confidential, and lifesaving support to North Dakotans, with FirstLink reporting rising call, chat, and text volumes reflecting a growing need. From 2023 to 2024, calls to 988 in our region increased by 59%. Suicide is a leading cause of death in our state, with more than 130 lives lost in 2021—above the national average.

Sustained funding is essential to address urgent mental health crises, particularly in rural areas. Thank you for supporting this vital service.

Sincerely,

Karen Nitzkorski
4711 105th St N
Harwood, ND 58042
Cell: 701-371-9644

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

As you consider House Bill 1012, we urge you to prioritize continued and increased funding for the 988 Suicide and Crisis Lifeline and the 211 Information and Referral Helpline. These critical services are lifelines for our community, providing hope and saving lives when people need it most.

FirstLink, which operates both the 988 Suicide and Crisis Lifeline and the 211 Helpline, has experienced a significant and consistent rise in call, chat, and text volumes. Every month, more individuals turn to these resources, seeking help in their darkest moments. The complexity and urgency of these interactions also continue to grow, with many calls requiring extended time to ensure that individuals in crisis receive the care and compassion they need.

In North Dakota, the urgency of this issue cannot be overstated. Suicide remains a leading cause of death in our state. According to the CDC, North Dakota's suicide rate is above the national average, with more than 130 lives lost to suicide in 2021 alone. These are not just numbers; they represent our neighbors, friends, and family members. Behind every statistic is a person whose life matters and whose potential contributions to our community have been tragically cut short.

Furthermore, rural communities in our state often face unique challenges in accessing mental health care, making the 988 and 211 services even more critical. These helplines bridge gaps in mental health care by providing immediate, confidential, and free support to anyone, anywhere in North Dakota.

We must also acknowledge that no one is immune to the impact of mental health crises—suicide does not discriminate based on age, gender, or socioeconomic status. Supporting House Bill 1012 is not only a legislative action but a moral imperative. By ensuring adequate funding for these helplines, we affirm our commitment to protecting lives and fostering hope in every corner of our state.

We cannot ignore the rising tide of need. Every call answered is an opportunity to prevent tragedy. Every moment of connection provides hope to someone who might otherwise feel hopeless. By funding the 988 Suicide and Crisis Lifeline and the 211 Helpline, we invest in a safer, healthier North Dakota.

Thank you for your consideration and for recognizing the vital importance of these services. We ask for your support of House Bill 1012 to ensure these lifelines remain available for all who need them. Together, we can prevent suicide and build a community where no one feels alone in their struggles.

Sincerely,

Angela Martinez, Suicide Attempt Survivor

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

Sincerely,

Erin Donohoe
Mental Health Advocate, Friend of FirstLink, Suicide Attempt Survivor

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

As a **License Practical Nurse** with years of experience providing care to individuals facing mental health crises, I am writing to strongly urge your **support for HB 1012**. This bill is vital to securing continued and increased funding for the 988 Suicide and Crisis Lifeline and the 211 Information and Referral Helpline. Having worked closely with individuals in crisis, I have witnessed the growing demand for support and the lifesaving impact these helplines have on our community.

In my nursing practice, **I have observed firsthand how critical timely intervention is when someone is experiencing a mental health crisis**. It is imperative that North Dakota financially supports this free, confidential crisis phone line.

I urge you to support HB 1012 and ensure the funding necessary to sustain and expand these essential services. FirstLink needs the funding to have enough staff available to answer the phone lines and to be able to pay their employees professional wages. The people of North Dakota are counting on us to prioritize mental health and crisis intervention.

Thank you for your time and consideration.

Sincerely,

SARA LADE

Sara Lade
Licensed Practical Nurse, Advocate for Mental Health Support

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

As a father of two teenage girls, I witness firsthand the challenges our youth face daily. The pressures of modern life, amplified by social media, academic stress, and societal expectations, have created a perfect storm for mental health struggles. It is imperative that the state of North Dakota maintains and enhances access to critical resources like a 24/7/365 crisis line to answer calls, chats, and texts—services that can quite literally save lives.

I urge your strong support for **HB 1012**, which ensures continued and increased funding for the **988 Suicide and Crisis Lifeline** and the **211 Information and Referral Helpline**. These programs provide free, confidential, and lifesaving support to individuals across our state.

The need is clear: FirstLink has reported rising call, chat, and text volumes, reflecting an alarming and growing demand for mental health services. Suicide is now one of the leading causes of death in North Dakota, claiming over 130 lives in 2021 alone—above the national average. Each of these numbers represents a family devastated, a community shaken, and potential unfulfilled.

For those in rural areas or those who feel isolated, these lifelines are often the only accessible resource during moments of crisis. Sustained and increased funding is not a luxury—it is a necessity to ensure every person in need has somewhere to turn, no matter the time of day or night.

As a parent and a North Dakotan, I implore you to invest in these critical services and provide the necessary support to address our state's mental health crisis. Together, we can make a difference and ensure no one has to face these struggles alone.

Thank you for considering this vital initiative and for your commitment to the well-being of all North Dakotans.

Sincerely,

Roland Lade
roland_lade@hotmail.com

613 Fairway Dr

Casselton, ND 58012

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

My name is Ashley Ladbury Hrichena, and I am submitting testimony in support of House Bill 1012. I am a North Dakota resident and mental health advocate. As you consider House Bill 1012, I urge you to prioritize continued and increased funding for the 988 Suicide and Crisis Lifeline and the 211 Information and Referral Helpline.

FirstLink is the only designated center in North Dakota that answers 988 Suicide and Crisis Lifeline Calls, and the 211 Helpline.

Nationally, 988 is working to create a 24/7 response system for all those in mental health crises with help-seekers being connected to local people that can help connect them to local resources and support. Call Specialists can de-escalate and resolve most crisis calls over the phone. This option helps reduce the burden on health care and emergency services related to mental health response. For those that need a higher level of care, FirstLink can screen and connect the caller to additional in-person resources such as mobile crisis outreach, crisis stabilization, psychiatric hospitalization, or detox. Especially in rural areas like North Dakota, having an easily accessible number is imperative for people to get help before their mental health crisis becomes life-threatening.

From 2023 to 2024, the number of help-seekers contacting 988 has increased. As the 988 Lifeline becomes more well-known it is expected call volume will continue to increase. This means FirstLink needs continued funding to increase staff capacity to meet the increased demand for services.

Thank you for your time and attention to this important bill.

Ashley Ladbury Hrichena

Ashley Ladbury Hrichena

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

As a former Executive Director with 15 years of firsthand experience in overseeing crisis intervention services, I am writing to strongly urge your support for HB 1012. This bill is vital to securing the continued and increased funding for the 988 Suicide and Crisis Lifeline and the 211 Information and Referral Helpline. Having been deeply involved in the day-to-day operations of these services, I have witnessed the growing demand for support and the lifesaving impact these helplines have on our community.

FirstLink, which operates both the 988 suicide and crisis lifeline and the 211 information and referral helpline, has seen consistent increases in call, chat, and text volumes. Beyond the sheer number of interactions, the nature of these engagements has become increasingly complex, requiring more time and specialized attention from trained staff. On many occasions, these calls involve individuals who are already in the process of contemplating or attempting suicide, making immediate response and low answer times absolutely critical. Delays in response can mean the difference between life and death. To meet these challenges, we urgently need additional Full-Time Equivalent (FTE) employees to ensure timely and effective support.

Over my tenure, I observed a significant increase not only in the volume of calls but also in the duration of each interaction. People in crisis often need extended conversations to feel heard, understood, and guided toward safety.

These longer interactions, while essential, also highlight the pressing need for expanded resources and staffing to maintain the level of service our community relies on. Without adequate funding, we risk overburdening existing staff and jeopardizing the quality and timeliness of the support provided.

North Dakota continues to face sobering mental health challenges. Suicide remains a leading cause of death in our state, with more than 130 lives lost in 2021 alone—a figure that tragically exceeds the national average. This reality underscores the importance of bolstering mental health resources, particularly in rural areas where access to care is often limited. By fully funding the 988 and 211 helplines, we affirm our commitment to ensuring that no one in crisis feels abandoned or without hope.

I have seen firsthand how these lifelines save lives, provide comfort, and connect individuals to critical resources. I urge you to support HB 1012 and ensure the funding necessary to sustain and expand these essential services. The people of North Dakota are counting on us to prioritize mental health and crisis intervention.

Thank you for your time and consideration.

Sincerely,

Cindy Miller
Former Executive Director, FirstLink
30-Year Advocate for Crisis Intervention Services

Subject: Support for HB 1012 – A Critical Step for Suicide Prevention

Dear Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

I am writing to express my strong **support for HB 1012** and urge you to vote in its favor. My name is Sandra, and I am the President of TEARS, an organization dedicated to breaking the cycle of despair and preventing future tragedies through education, advocacy, and the promotion of mental wellness.

Suicide remains a silent epidemic, touching countless lives and leaving communities grappling with loss. At TEARS, we believe that everyone has a role to play in suicide prevention. A key part of this effort is ensuring that individuals in crisis have access to immediate, 24/7/365 support.

FirstLink serves as a vital lifeline for individuals in need, providing support through calls, chats, and texts. However, for FirstLink to continue offering these lifesaving services effectively, it must have adequate funding to maintain sufficient staffing levels. **HB 1012 is essential to ensuring that no cry for help goes unanswered.**

Strength is not just about physical resilience—it's about rising in the face of adversity and standing together through life's storms. By supporting this bill, we can work together to build stronger, safer communities where no one feels alone in their darkest moments.

Thank you for your time and for your commitment to suicide prevention. Together, we can create a world where hope replaces despair.

Sincerely,

Sandy Kovar

Sandy Kovar
President, TEARS

Subject: Strong Support for HB 1012 – Funding Lifesaving Crisis Support

We are writing to express our strong support for HB 1012 and urge you to vote in its favor. **Our names are Karla and Ron Forde**, and we are the **founders of *Enough with the Stigma*.** Our foundation was established in memory of our 26-year-old son, Connor, who tragically took his life in December 2022.

Our mission is to educate others about the harmful stigma surrounding mental health and **to encourage young adults to embrace open, honest conversations about their emotions and struggles.** We are committed to challenging the outdated notion that one must remain tough and silent in the face of adversity. Instead, we aim to empower individuals to seek help and know they are not alone.

Having experienced the devastating impact of suicide firsthand, we know how vital it is for individuals in crisis to have immediate access to support. The availability of a 24/7 crisis line, such as the 988 Suicide and Crisis Lifeline and the 211 Information and Referral Helpline, is absolutely critical. These services provide hope and assistance to those who need it most, often serving as the difference between despair and recovery.

We urge you to support HB 1012 to ensure these lifesaving resources are properly funded and staffed to meet the needs of our communities. Together, we can work to break the stigma, save lives, and build a future where no one feels alone in their darkest moments.

Thank you for your time and consideration.

Warm regards,
Karla and Ron Forde
Founders, *Enough with the Stigma*

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

As you deliberate on House Bill 1012, I urge you to prioritize the continued and increased funding for the 988 Suicide and Crisis Lifeline and the 211 Information and Referral Helpline. These services are not merely numbers on a budget line; they are lifelines for individuals in North Dakota who are struggling to find hope in the darkest moments of their lives.

At FirstLink, which operates both the 988 Lifeline and the 211 Helpline, we see firsthand the growing and urgent need for these critical resources. Month after month, more North Dakotans are reaching out—by call, chat, or text—seeking support in moments of overwhelming despair. Many of these calls come from individuals on the brink of giving up, carrying the unbearable weight of loneliness, fear, and pain. The complexity of these interactions is increasing, often requiring extended time and deep compassion to guide people toward safety and hope.

The reality of suicide in North Dakota is devastating. Suicide remains one of the leading causes of death in our state. According to the CDC, over 130 North Dakotans died by suicide in 2021. These aren't just numbers; they are mothers and fathers, sons and daughters, neighbors, coworkers, and friends. They are people whose absence leaves a permanent void in the lives of those who loved them. Each life lost to suicide represents unfulfilled dreams and potential, leaving families and communities grappling with profound grief and unanswered questions.

For rural communities in North Dakota, the stakes are even higher. Access to mental health care is often limited or unavailable, leaving individuals with few options for immediate help. The 988 and 211 helplines provide a critical bridge, offering free, confidential, and lifesaving support to anyone, anywhere in the state, regardless of their circumstances.

Mental health crises touch every demographic, cutting across lines of age, gender, and socioeconomic status. No one is immune, and no one should feel alone in their struggles. Supporting House Bill 1012 is more than a fiscal decision—it is a declaration that we value life and are committed to being there for those in crisis. This funding ensures that every call is answered, every plea for help is heard, and every chance to save a life is taken.

We cannot turn away from the rising tide of need. Every moment of connection is a chance to prevent tragedy and offer hope to someone who feels lost. By funding the 988 Suicide and Crisis Lifeline and the 211 Helpline, we make a tangible investment in saving lives and fostering a community where no one feels forgotten or alone.

Thank you for recognizing the vital importance of these services. We urge you to support House Bill 1012 and ensure these lifelines remain available for all North Dakotans. Together, we can build a state where fewer families endure the pain of losing a loved one to suicide and where everyone knows there is someone to turn to, no matter what.

Sincerely,
Jennifer Illich
Executive Director, FirstLink

HB1012 Overview to House Appropriations

Julianne Horntvedt
January 17, 2025

NORTH Dakota | Health & Human Services
Be Legendary.

Our **Vision**

North Dakota is the healthiest state in the nation.

Our **Mission**

HHS fosters positive, comprehensive outcomes by promoting economic, behavioral and physical health, ensuring a holistic approach to individual and community well-being.

NORTH Dakota | Health & Human Services

Be Legendary.

Our **Strategic Priorities**

Support the advancement of strong, stable, healthy families and communities.

Advance the foundations of well-being through access to high-quality services and supports closer to home.

Optimize disaster and epidemic response and recovery.

Advance excellence in agency infrastructure and operations.

Deliver best-in-class, customer-centered experiences.

Foster a culture of excellence where every team member has a voice, adds value and is empowered to make a difference.

NORTH Dakota | Health & Human Services
Be Legendary.

Our **Guiding Principles**

Continuous improvement and innovation: We embrace continuous improvement and innovation as ways to streamline the delivery of services, drive efficiencies and promote best-in-class, customer-centered experiences.

Responsible stewardship: Our organizational effectiveness and impact is enhanced by our strategic and efficient management of agency funding, assets and resources.

Transparent and open communication: We prioritize transparent and open communication to facilitate trust, organizational and stakeholder awareness, collaboration and unity.

Engaged collaboration: We bring a spirit of teamwork and accountability to every interaction, using our combined strengths to drive solutions and success.

Data-centered decisions: Our decisions are grounded in data; we use facts and metrics to inform and guide our actions and evaluate outcomes.

Section Overview

Who we are

- Federally Funded under ACL
- People with I/DD and family members are leaders in our organization

Our role

- We work to make life better for people with developmental disabilities and their families

Services

- We pick goals 5 years at a time
- We fund projects to reach our goals
- Staff/Members/and Grantees carry out our work

Partners | Providers

- We work with and fund various entities; non-profits, schools, providers, families, state agencies, etc.

NORTH Dakota | Health & Human Services
Be Legendary.

Successes in the last biennium

Project Successes

- Funded the Olmstead Plan
- Funded a Peer 2 Peer research study
- Funded new initiatives around inclusive childcare and new housing arrangements for people with I/DD
- Work with several new self-advocacy groups around the state to provide education to people with I/DD
- Received an extra Federal Grant to research gaps in aging and disability.

NORTH Dakota | Health & Human Services
Be Legendary.

Strategies driving budget

Increase access points

- Hire staff to lead projects vs. granting out work
- Be mindful of our 70/30 ratio
- Continue to prioritize self-advocacy work

Build community support

- We have expanded communities and created diversity in our funded projects through outreach with other state agencies
- Continue to share about our work around the state at various conferences and through partners

Chair, Representative Jon Nelson

Holly Triska-Dally | Office of Refugee Services

Jan. 17, 2025

NORTH Dakota Be Legendary. | Health & Human Services

North Dakota's History of Welcoming

- ND Population 1890: 190,983

- ND Population 1920: 646,872

By 1915, 79% of all North Dakotans were immigrants or the children of immigrants.

Today 38,355 immigrants live in North Dakota
Comprising **5% of the population** but **6.2% of the labor force**
Increase of 123% since 2010

Our Mission

To create community collaborations that strengthen and guide newcomers as they become welcomed neighbors and valued contributors to the economy.

Sheri Seil | Director, Disability Determination Services Section
January 17, 2025

NORTH Dakota | Health & Human Services
Be Legendary.

Who we serve

The Disability Determination Services (DDS) Section delivers disability determinations to those applying for Social Security Disability Benefits

NORTH Dakota | Health & Human Services
Be Legendary.

About Disability Determination Services

The Social Security disability program provides Social Security Disability Insurance (**SSDI**) and/or Supplemental Security Income (**SSI**) benefits to persons with disabilities who are unable to work

100% federally funded

Number of disability decisions is determined by Social Security Administration (SSA)

DDS team members make medical disability determinations using SSA guidelines

3 main claim levels:

- Initial claims
- Reconsideration claims
- Continuing Disability Reviews

NORTH Dakota | Health & Human Services
Be Legendary.

Collaborating with Social Security, medical providers and claimants across North Dakota, using 100% federal funds

Dept of Health and Human Services	Social Security Administration	Medical providers	Claimants
DDS team members and contracted medical consultants review claims for medical evidence to make the disability determination using SSA guidelines	• Receives and reviews disability applications for benefit eligibility, sends to DDS to make the disability determination • Handles the notification and appeals process for claimants • Handles payment processes for those found disabled	• Provide medical records for claimants to assist in the determination process • Provide consultative examination services for those who need further medical evidence for the determination process	Assist in the disability determination process by providing their medical source information, completing forms and attending consultative examinations

Who benefits from the Social Security Disability programs?

SSI

"To be eligible for SSI, beneficiaries must have low incomes, limited assets, and either be age 65 or older or have an impaired ability to work at a substantial gainful level as a result of significant disability."

SSDI

"Unlike SSI, there are no income or asset limits for SSDI eligibility. Instead, to qualify for SSDI, enrollees must have a sufficient work history (generally, 40 quarters) and meet the strict federal disability rules."

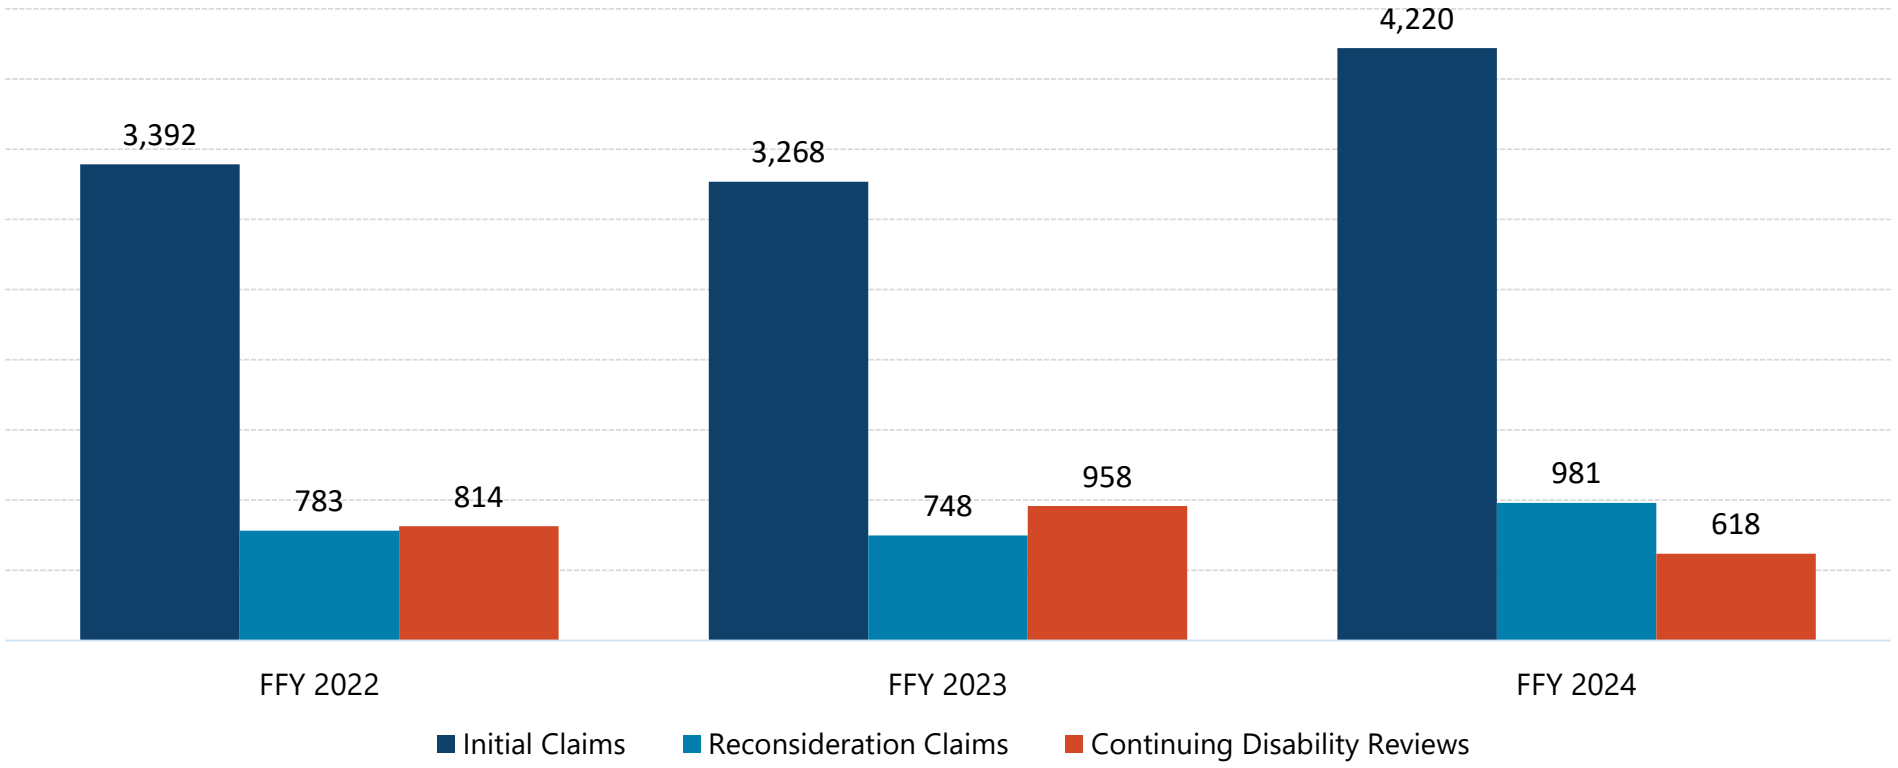
North Dakota data snapshot September 2024

Distribution (by body system) of beneficiaries for SSDI/SSI on initial claims

North Dakota snapshot federal fiscal year 2024



- "The Listing of Impairments describes, for each major body system, impairments considered severe enough to prevent an individual from doing any gainful activity (or in the case of children under age 18 applying for SSI, severe enough to cause marked and severe functional limitations).
- "Most of the listed impairments are permanent or expected to result in death, or the listing includes a specific statement of duration.
- "For all other listings, the evidence must show that the impairment has lasted or is expected to last for a continuous period of at least 12 months.

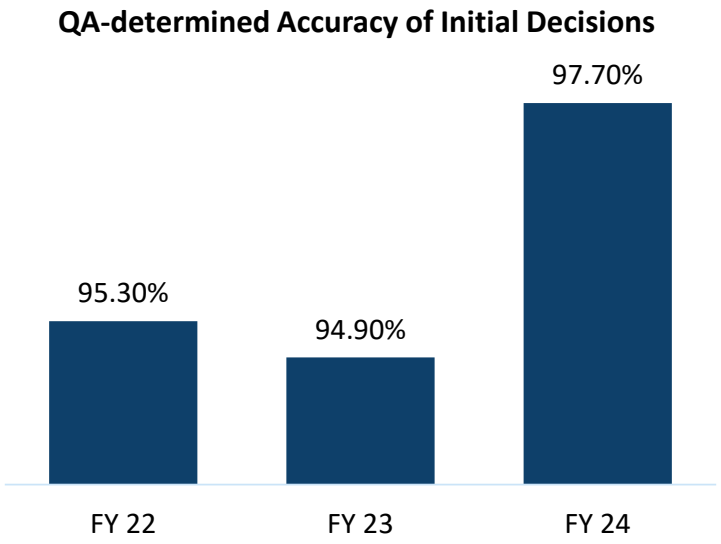
Disability determinations by the numbers

NORTH Dakota Be Legendary. | Health & Human Services



DDS Quality reviews

Federally mandated reviews of disability determinations are conducted by the SSA Office of Quality Review (OQR)

- The quality assurance review of initial DDS disability determinations is mandated by the Regulations (20 CFR 404.1640 – 404.1670). The results of this review are used to measure state agency performance accuracy.
- Performance Accuracy based on calendar quarters (Oct-Dec, Jan-Mar, Apr-June, July-Sept) per Reg 404.1645; Rolling 3-month reports published monthly
- 70 allowances and 70 denials per quarter per state

Initial Performance Accuracy

OQR categorizes deficiencies according to their impact, or potential impact, on the disability determination. OQR further categorizes as either decisional or documentation deficiencies.

Successes in the last year

- DDS has been working to address and decrease the number of initial claims in our backlog and continues to maintain average processing time (68 days on average) once the claim is assigned
- Presumptive disability is applied on SSI claims (when possible) to provide the best customer service for claimants while waiting their disability decision
- Attrition in recent years has decreased after several years of significant turnover
- Analyst team members continue to expand their knowledge/skills which leads to increased production

Challenges for DDS

- Last 2 FFYs have seen increases in initial claim receipts which has created increased processing time/wait time
- Team member attrition and lack of hiring authority from SSA due to budget constraints

NORTH Dakota | Health & Human Services
Be Legendary.

Strategies driving budget

DDS budget is derived from the number of disability determinations SSA requires us to make each year and the cost to do so

The DDS section is 100% federally funded by SSA

NORTH Dakota | Health & Human Services
Be Legendary.

Be Legendary.

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

I urge your support for HB 1012 to ensure continued and increased funding for the 988 Suicide and Crisis Lifeline and the 211 Information and Referral Helpline.

These services provide free, confidential, and lifesaving support to North Dakotans, with FirstLink reporting rising call, chat, and text volumes reflecting a growing need. Suicide is a leading cause of death in our state, with more than 130 lives lost in 2021—above the national average.

In 2024, FirstLink handled over 10,000 interactions from help-seekers in North Dakota reaching the 988 Lifeline. This is a nearly 70% increase from the number of 988 interactions handled in 2023, representing the growing need for crisis intervention and emotional support services in our state.

Sustained funding is essential to address urgent mental health crises, particularly in rural areas, and to ensure no one in need feels alone. Thank you for supporting this vital initiative.

Sincerely,

Jeremy Brown
Advocate for Suicide Prevention
Director of Data Quality, FirstLink

House Appropriations Committee
Jan 17th, 2025 HB 1012
Testimony in Support

Dear Chair Vigesaa and the members of the House Appropriations Committee,

I urge a “Do Pass” on HB 1012

I am a suicide prevention advocate who has dedicated my life to reducing suicide in North Dakota. I do this work because I am a survivor who never wants anyone to go through the trauma I have, but more importantly because I want the people of our state to have hope.

Suicide is complex, it is multifactorial, and a measure of multiple risk and protective factors in a persons life, but consider the information below on public health:

- For every 1 death by suicide there are 135 people impacted (Study)
- In the last 5 years, we’ve averaged approximately 150 suicides per year (NDSO)
- While overlap likely occurs, we can presume more than 10,000 people in our state are impacted by suicide each year

We call this impact suicide contagion and it can result in further trauma and death by suicide. Every life that is saved through 988, in big and small ways, impacts over a hundred people. They took 14,000 calls from folks in crisis last year alone. And took over 90,000 calls total for general services, crisis, and just folks who needed someone to talk to. (Firstlink Data)

They are the last line of defense before an unimaginable tragedy in someone’s life and I strongly recommend continuing to fund them to the utmost power within our state to do so. No dollar in this work goes unused and this investment pays out exponentially in the long term impacts on communities and health.

This is especially important in rural North Dakota, where there are less resources, less support, and smaller communities that feel the full weight of losing one of their own. For these reasons, I strongly urge a do pass.

Thank you for your time, consideration, and service to our state,
Faye Seidler

Chairman Nelson and Members of the House Appropriation Committee – Human Resource Division,

As the Director of Workforce and Culture at FirstLink, I have the privilege of supporting the individuals who operate the 988 Suicide and Crisis Lifeline and the 211 Information and Referral Helpline. These services are vital lifelines for individuals in crisis, and their success depends entirely on the exceptional people who answer the calls, chats, and texts from those in need. Today, I write to highlight the urgent need for increased funding through House Bill 1012 to expand and sustain our team, ensuring no call for help goes unanswered.

The demand for 988 and 211 services has grown exponentially and so has our staffing. In 2022, FirstLink employed 24 Call Specialists to handle incoming calls, chats, and texts. Recognizing the increasing need, we have expanded our team to over 50 individuals today. While this growth is a testament to the importance of these services and our commitment to meeting community needs, it is still not enough. The volume of interactions continues to rise month after month, with many requiring extended time and care to address complex and urgent crises.

This growth has created both challenges and opportunities. Hiring and training staff to meet the demand requires significant resources. While our team has risen admirably to the occasion, additional funding is essential to keep pace with the needs of our community and to ensure our call specialists have the support they need to continue this lifesaving work.

In North Dakota, where the suicide rate remains above the national average and rural areas often lack access to mental health care, the 988 and 211 services are a critical bridge to support. Every call answered is an opportunity to save a life. However, the current demand for services means that our staff often face heavy workloads, which can lead to burnout if not addressed. Sustained and increased funding would allow us to further grow and develop our team, enhance training, and ensure that our staff are equipped to provide the highest quality care.

Supporting House Bill 1012 is more than a financial decision; it is an investment in the lives and well-being of our neighbors, friends, and family members. It is a commitment to every person who reaches out in their darkest moment, knowing they will find someone ready to listen, assist, and guide them toward safety and hope.

Thank you for your consideration and for recognizing the vital importance of the people behind these services. On behalf of the FirstLink team, I urge you to support House Bill 1012 and help us continue to meet the growing demand for crisis intervention and mental health support in our state.

Sincerely,

Ashley Lemke
Director of Workforce and Culture
FirstLink

11:35 a.m. Kim Mertz, Director of Healthy and Safe Communities, Health and Human Services, continued with testimony #29979, #30187.

11:47 a.m. Niel Charvat, Director, Tobacco Prevention and Control Program, Health and Human Services, testified on vaping #29979.

11:57 a.m. Kim Mertz, Director of Healthy and Safe Communities, Health and Human Services, continued with testimony #29979.

Additional written testimony:

Seth O'Neill, Executive Director, North Dakota Domestic and Sexual Violence Coalition in favor #29939.

12:31 p.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

HB1012 Disease Control and Forensic Pathology Detail

Kirby Kruger, Director of Disease Control and Forensic Pathology
Jan. 20, 2025

NORTH Dakota Be Legendary. | Health & Human Services

Our Vision

North Dakota is the healthiest state in the nation.

Our Mission

HHS fosters positive, comprehensive outcomes by promoting economic, behavioral and physical health, ensuring a holistic approach to individual and community well-being.

NORTH Dakota | Health & Human Services

Be Legendary.

Disease Control and Forensic Pathology Section Overview

Who we are

- Public Health
- Program and subject matter specialist
- Epidemiologists
- Investigators

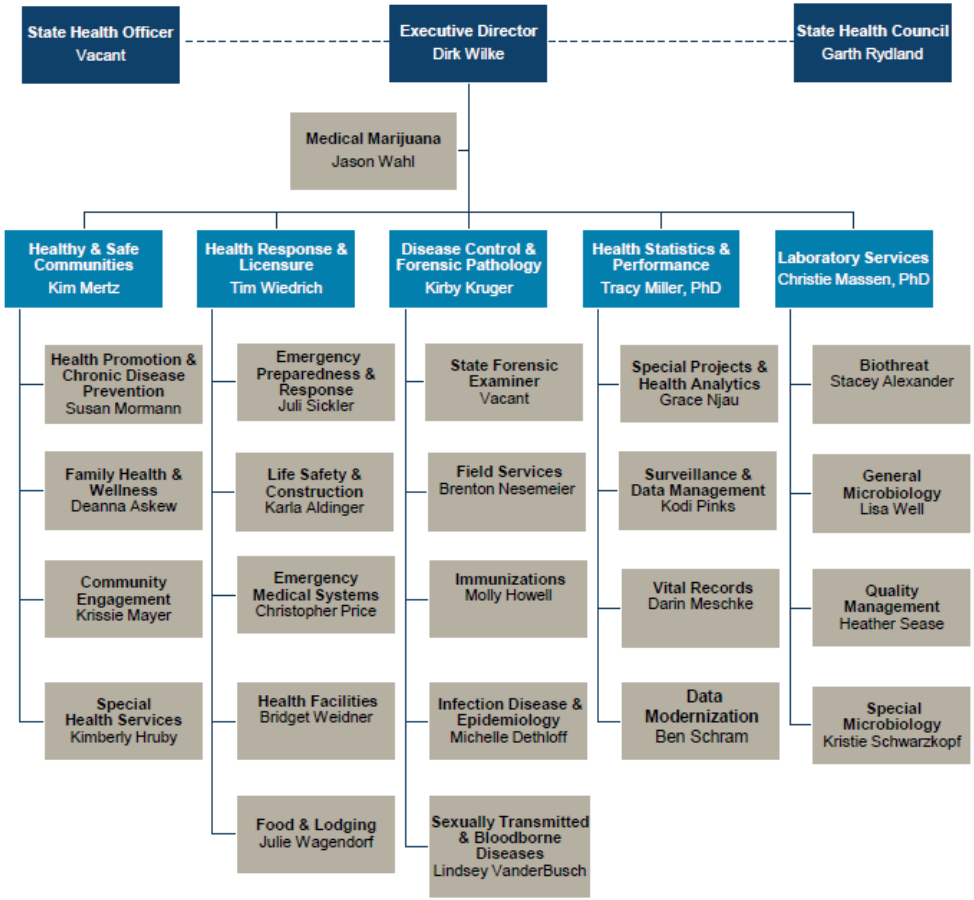
Our role

- Better understand causes of disease and death
- Primary prevention
- Secondary and tertiary prevention

Services

- Autopsies
- Prevention measures and programs
- Disease patterns, data and reports

Partners | Providers



- County coroners
- Law enforcement

State Coverage for Forensic Pathology Services with UND and Health and Human Services

NORTH Dakota Be Legendary. | Health & Human Services

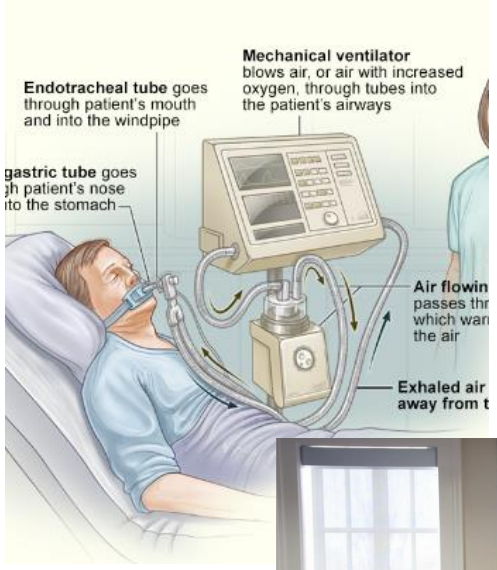
Forensic Examiner's Office

Autopsies

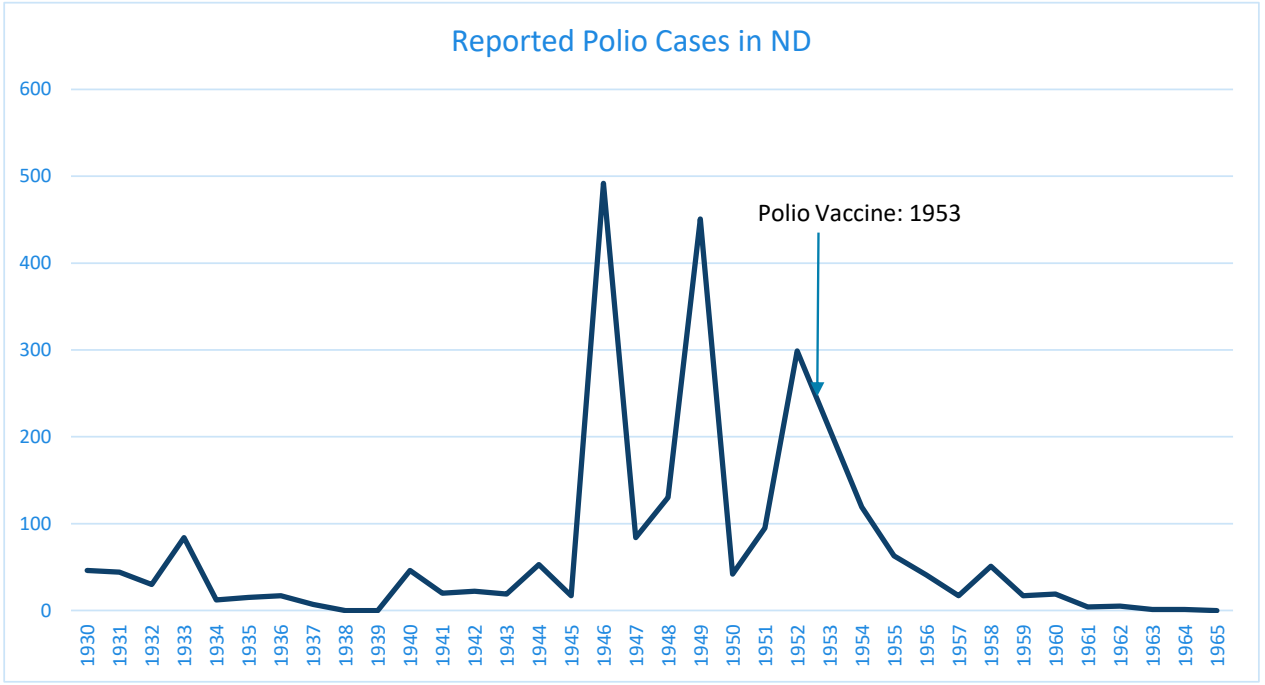
- 2023 – 188
  - 272 at UND
- 2024 – 122 cases (48 referrals to UND)
  - 372 at UND
- Continued work with LifeSource on organ/tissue procurement

Building Improvements

- Updated the heating, ventilation, air conditioning system
- Updated security



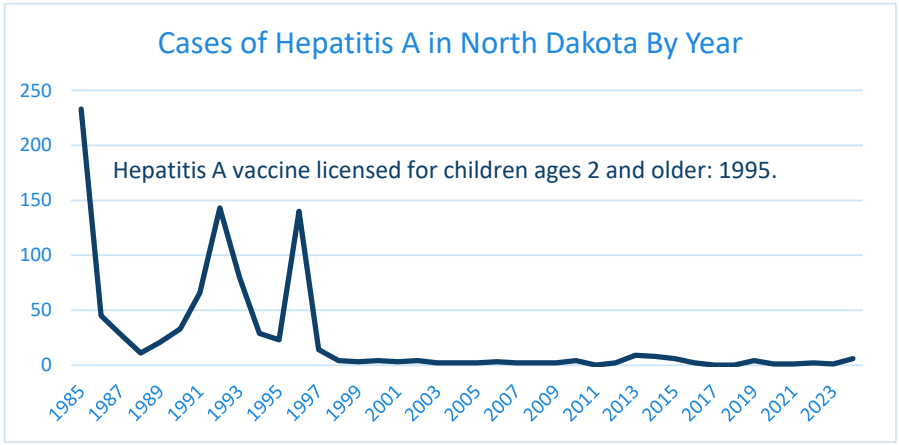
Immunization Unit

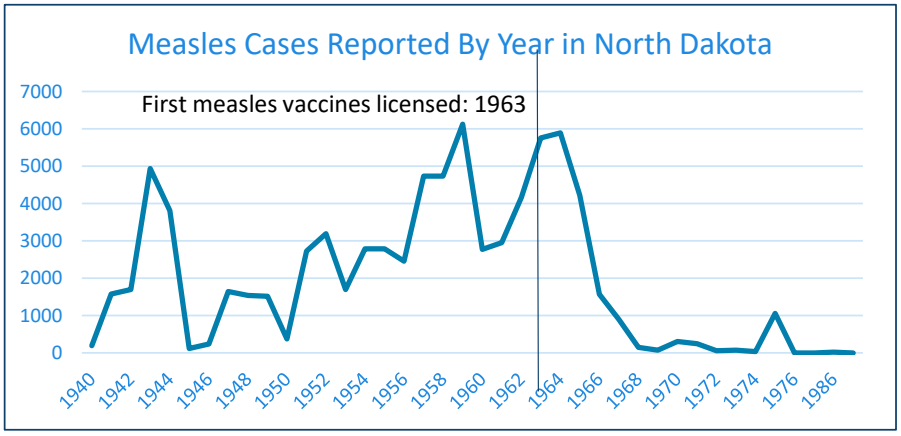


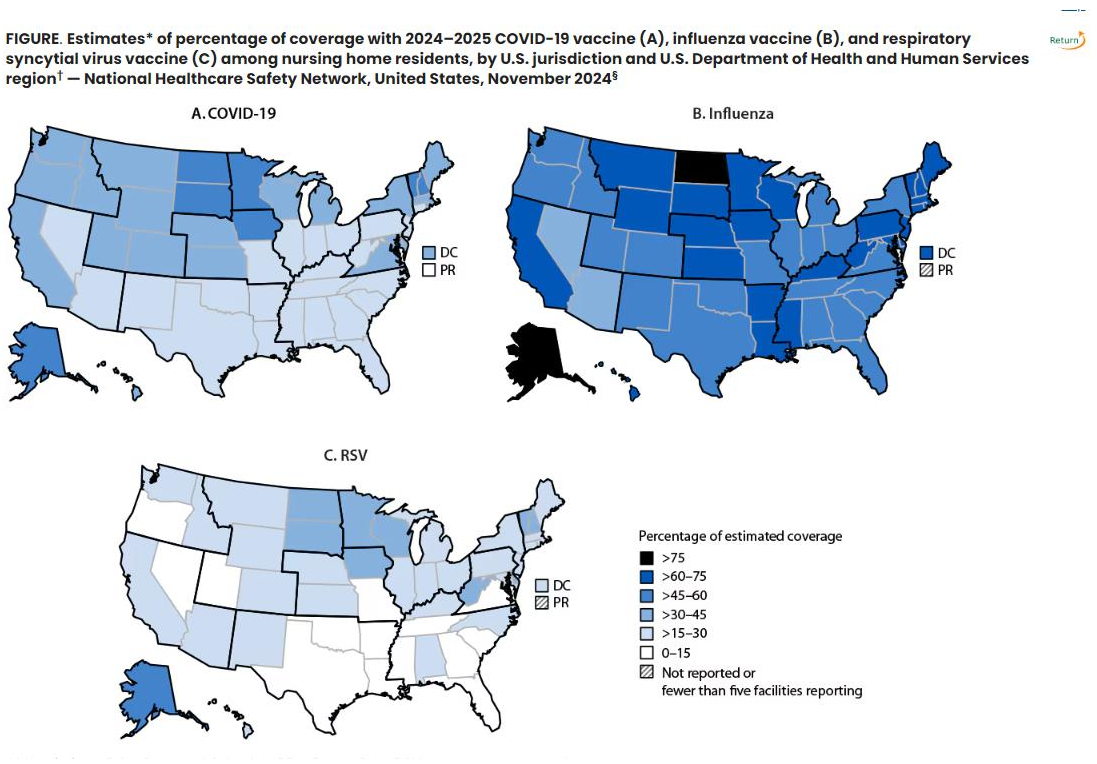
- Working with local public health, health care providers and other key stakeholders to promote the prevention of severe disease and disability through immunizations
- Report immunization coverage rates and assure citizens and healthcare providers have access to immunization records
- Administer the federal Vaccines for Children Program (VFC) for North Dakota
- Provide the most up-to-date information on vaccine recommendations and schedules to citizens and health care providers
- Prevent and respond to vaccine-preventable diseases

NORTH Dakota | Health & Human Services
Be Legendary.

Impacts of Vaccines and Vaccination – Polio







NORTH Dakota | Health & Human Services

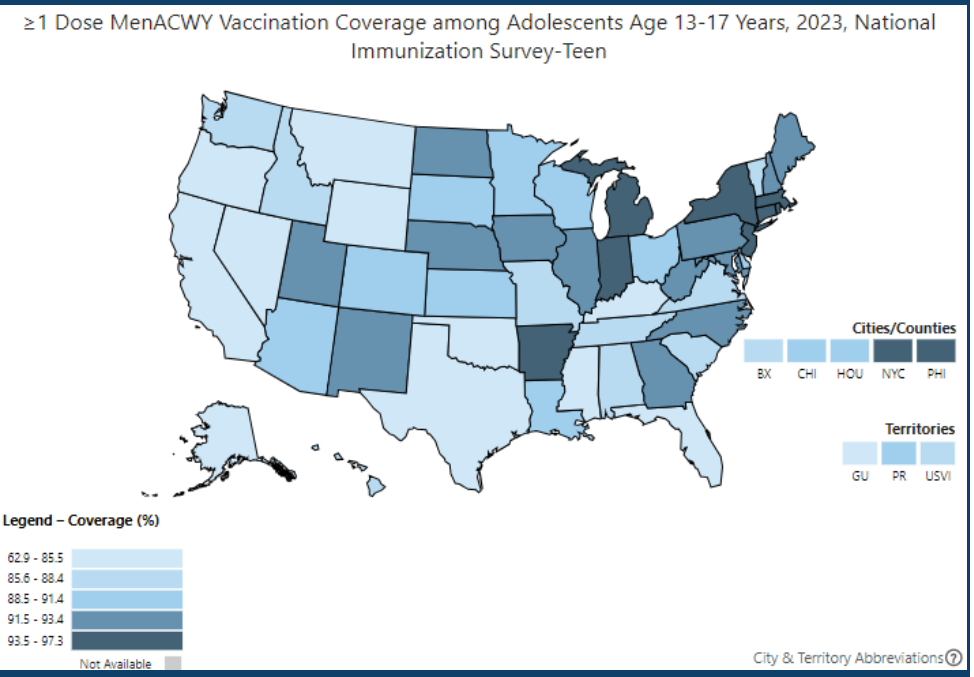
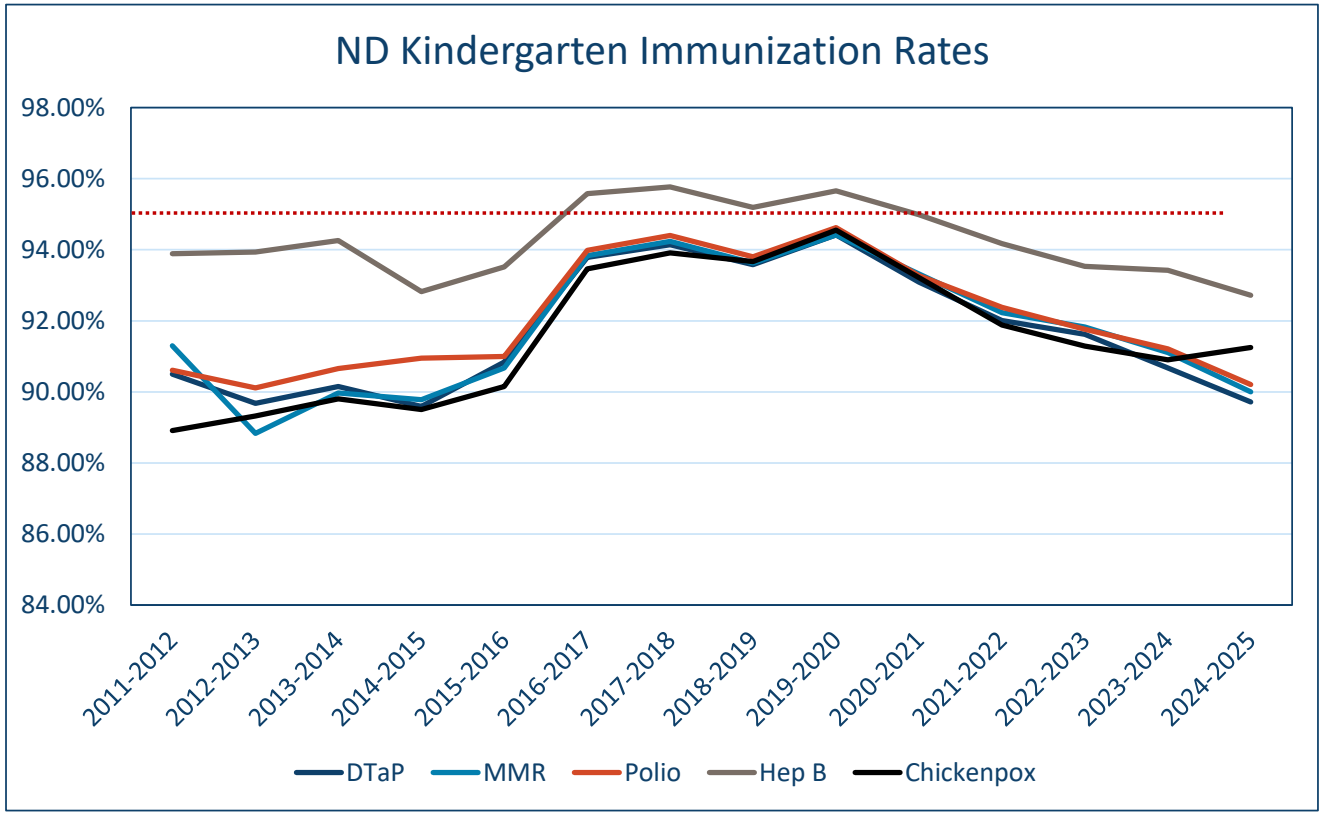
Impact of Vaccines and Vaccination



NORTH Dakota | Health & Human Services
Be Legendary.

Immunization Unit Successes



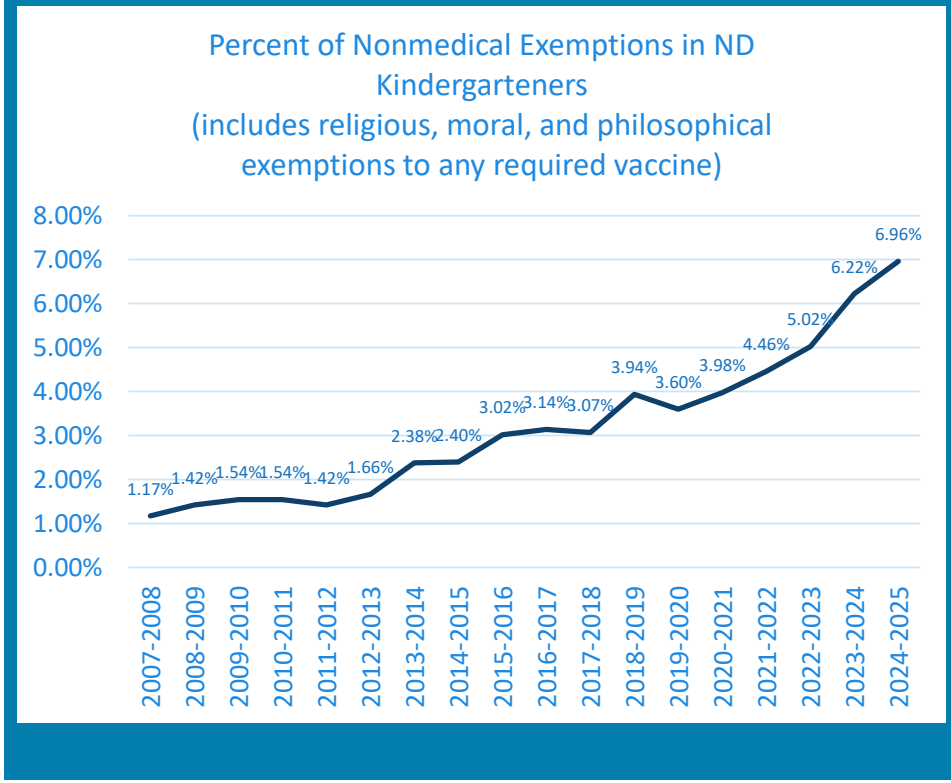
- RSV combined immunization coverage in first year of availability for infants estimated at 55.4%; likely > 70% this year
- 2024 Immunization Conference - 313 attendees
- High adolescent immunization rates
- Fourth in the U.S. for COVID-19 vaccination rates amongst skilled nursing facility residents
- NDIIS Modernization
  - Go-live: November 18, 2024
  - 75 interoperable connections that impact 520 individual sites, 6,015 users and all North Dakotans (provided 761,176 immunization records since July 1, 2023)
  - Improved user experience and modernized security

NORTH Dakota | Health & Human Services
Be Legendary.

Immunization Unit Challenges

2024-2025 ND Kindergarten Immunization Rates By Vaccine:

DTaP	89.72%
MMR	90.00%
Polio	90.21%
Hep B	92.72%
Chickenpox	91.25%



NORTH Dakota | Health & Human Services
Be Legendary.

Preliminary school immunization survey data

Immunization Unit: Challenges

- Challenges:
  - Declining infant/pediatric immunization rates
  - Vaccine hesitancy/exemption rates
  - RSV immunization access at birthing hospitals
  - Access to all immunizations at medical home
  - Flat funding

NORTH Dakota | Health & Human Services
Be Legendary.

Immunization Challenges: VPDs in ND

- Pertussis– 148 cases in 2024
  - 13 infants
  - 8 hospitalizations (max 54 days)
- *Haemophilus influenzae* type B in 2023
  - Unvaccinated infant with meningitis
- Hepatitis A – 6 cases in 2024

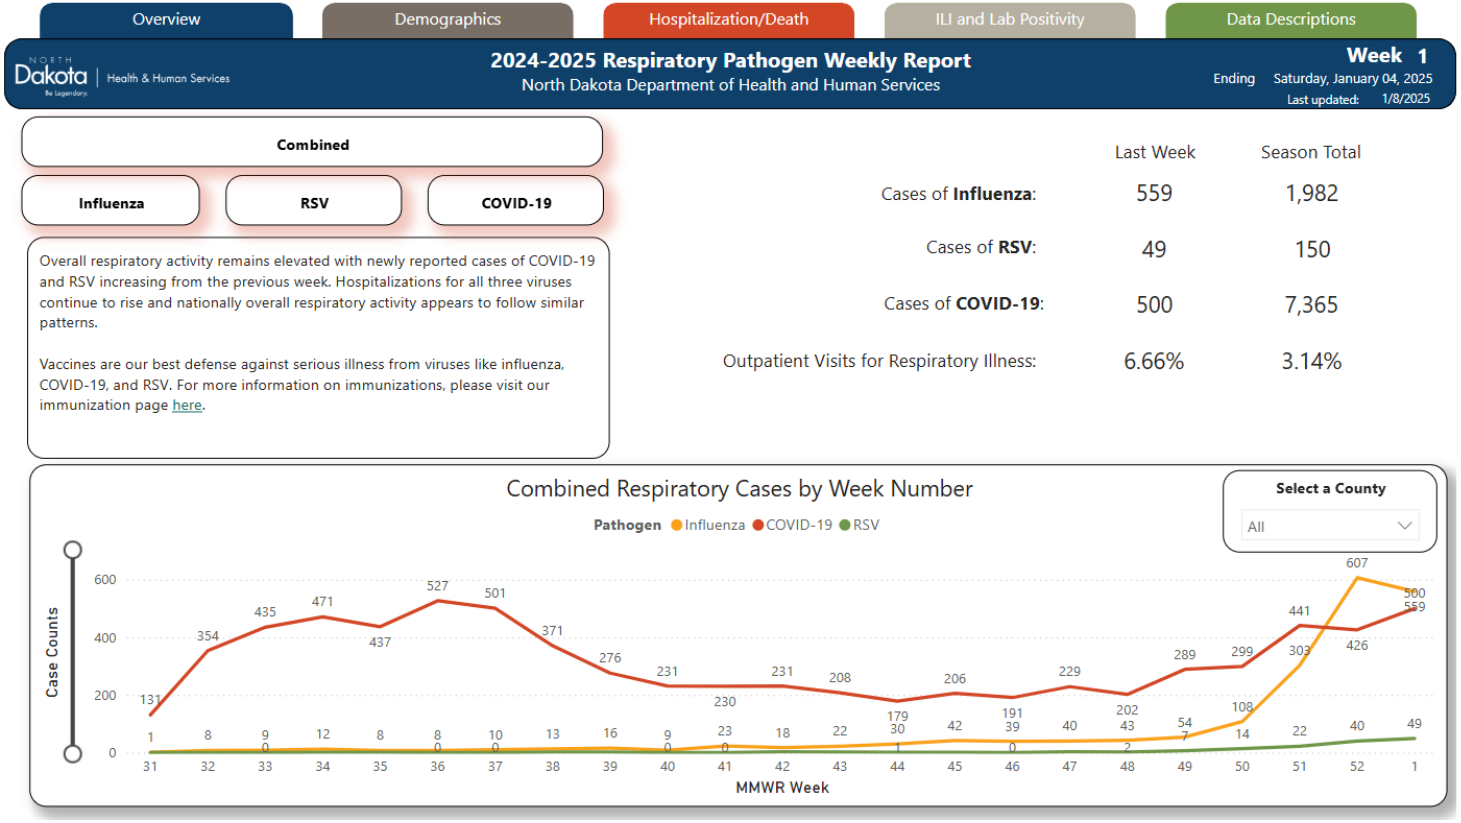
NORTH Dakota | Health & Human Services
Be Legendary.

Immunization Unit Activities to Increase Rates

- Reminder/recall of infants, school-aged children and adolescents who are 30 or more days behind on immunizations
- Immunization Quality Improvement for Providers
- Collaboration to increase rates with key stakeholders: local public health, coalition, NDSU Center for Immunization Research and Education, children's science museum, etc.
- Immunization and motivational interviewing education of healthcare providers and at schools of health
- Get FACTSinated Campaign: A healthy dose of information about immunizations

NORTH Dakota | Health & Human Services
Be Legendary.

Infectious Disease and Epidemiology Unit



- Monitor disease trends and impacted populations/communities
- Provide technical guidance on reducing health care associated infections
- Promote antimicrobial stewardship
- Investigate sources of illness or outbreaks such as foodborne related infections
- Monitor disease vectors such as ticks, mosquitos and animal rabies cases

Infectious Diseases and Epidemiology
Disease Monitoring

Respiratory Dashboard

- Influenza
- RSV
- COVID-19

NORTH Dakota | Health & Human Services
Be Legendary.

Other Activities in Infectious Diseases and Epidemiology

Assisting with rabies investigation

- Human case – non-resident
- Health Care worker follow-up

Enteric Illnesses

- More than 500 reports in 2024
- Try to determine source and spread (DNA sequencing)
- Prevention

Health Care Associated Infections

- Work with facilities (ICARS)
- Assist with MDRO investigations

Antibiotic Stewardship

- Monitor prescribing trends
- Promote appropriate antibiotic prescribing

Antibiotic Stewardship Awards, North Dakota

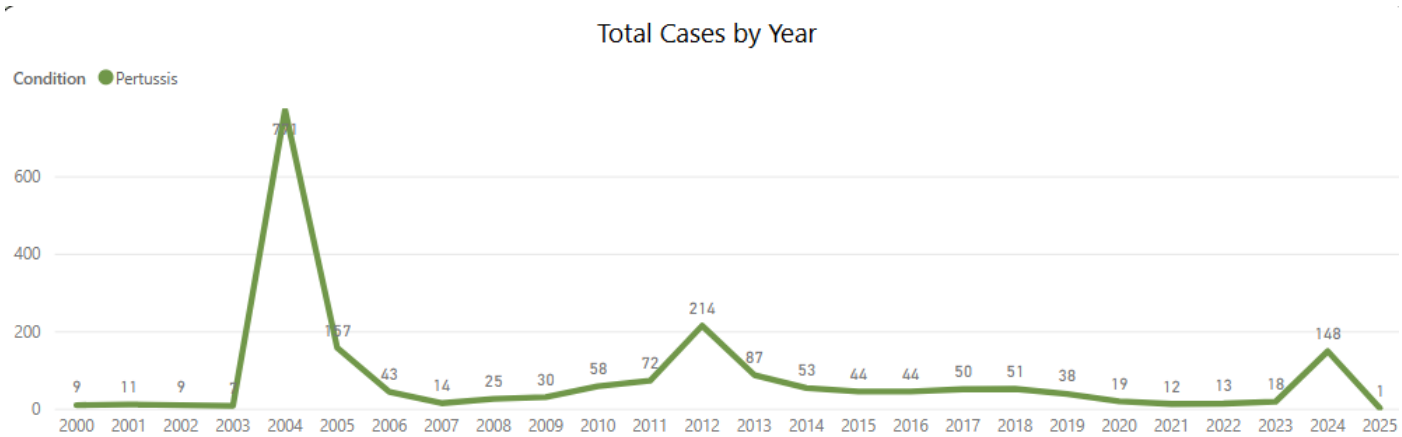
Facility Type	Platinum	Gold	Silver	Bronze
Hospital	3	2	4	1
Long Term Care	2	2	4	3

NORTH Dakota Be Legendary. | Health & Human Services

Infectious Diseases and Epidemiology Goals

- Modernize EDSS (Electronic Disease Surveillance System)
- Analyze antibiotic prescribing and use data for more targeted stewardship interventions
- Automate enteric sequencing data and metadata from SEDRIC to EDSS
- Finalize internal respiratory and enteric disease surveillance dashboards
- Develop comprehensive multi-year historical dashboard of tick surveillance data by species and county and make publicly available

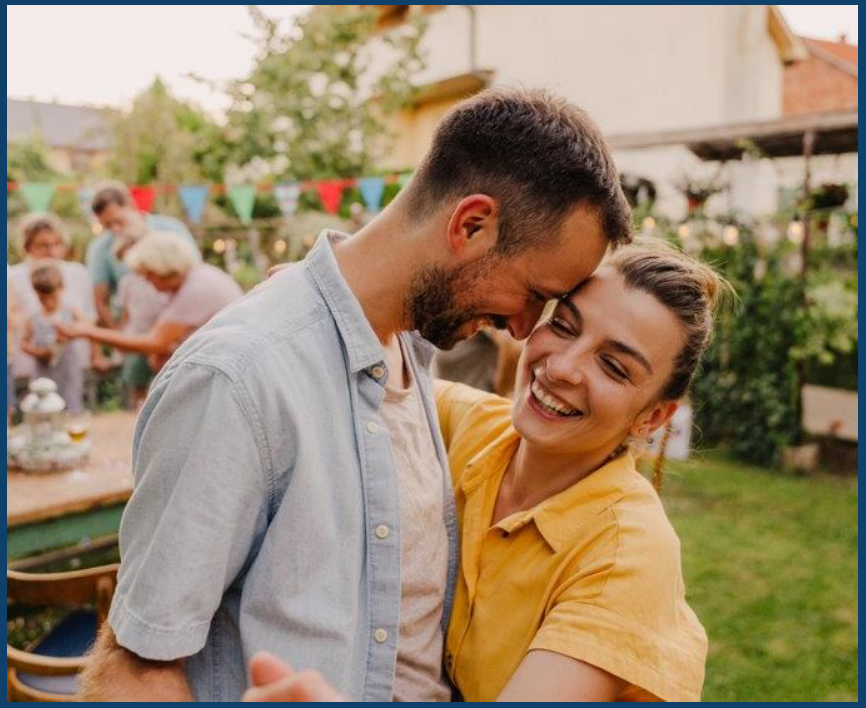
NORTH Dakota | Health & Human Services
Be Legendary.



Field Services

- Verify diagnoses of reportable conditions
- Follow-up with people who have reportable conditions
- Work with people at increased risk for an infectious disease
- Primary, secondary and tertiary disease prevention
- Work with partners and stakeholders

NORTH Dakota | Health & Human Services
Be Legendary.



Field Services and Pertussis

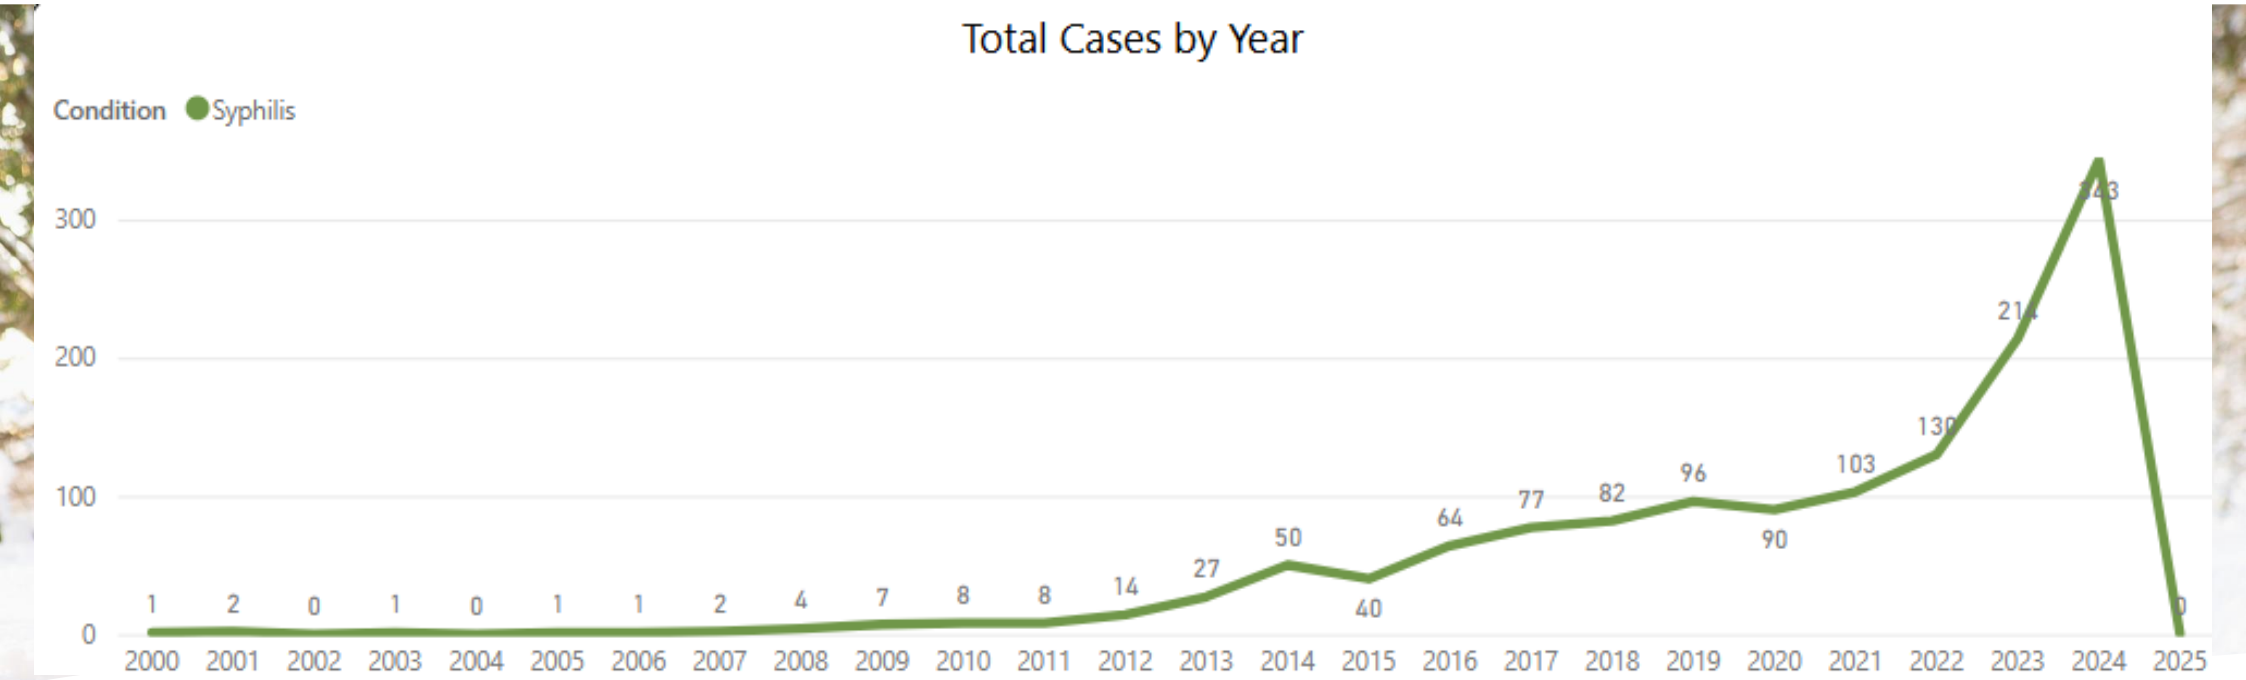
- 148 cases of pertussis reported in 2024
- Work closely with the Immunization Unit and local public health
- Interview cases and or family members
- Notify contacts
- Work with schools and childcare facilities

NORTH Dakota | Health & Human Services
Be Legendary.

Field Services Goals

- Collaborating with local public health to bring Binx boxes to underserved regions of the state – Increase in testing and availability of testing for citizens
- Continue to work with community partners to prevent syphilis cases – especially cases in pregnant women/babies
- Conduct Field Visits and educate providers on importance of testing/treating

NORTH Dakota | Health & Human Services
Be Legendary.

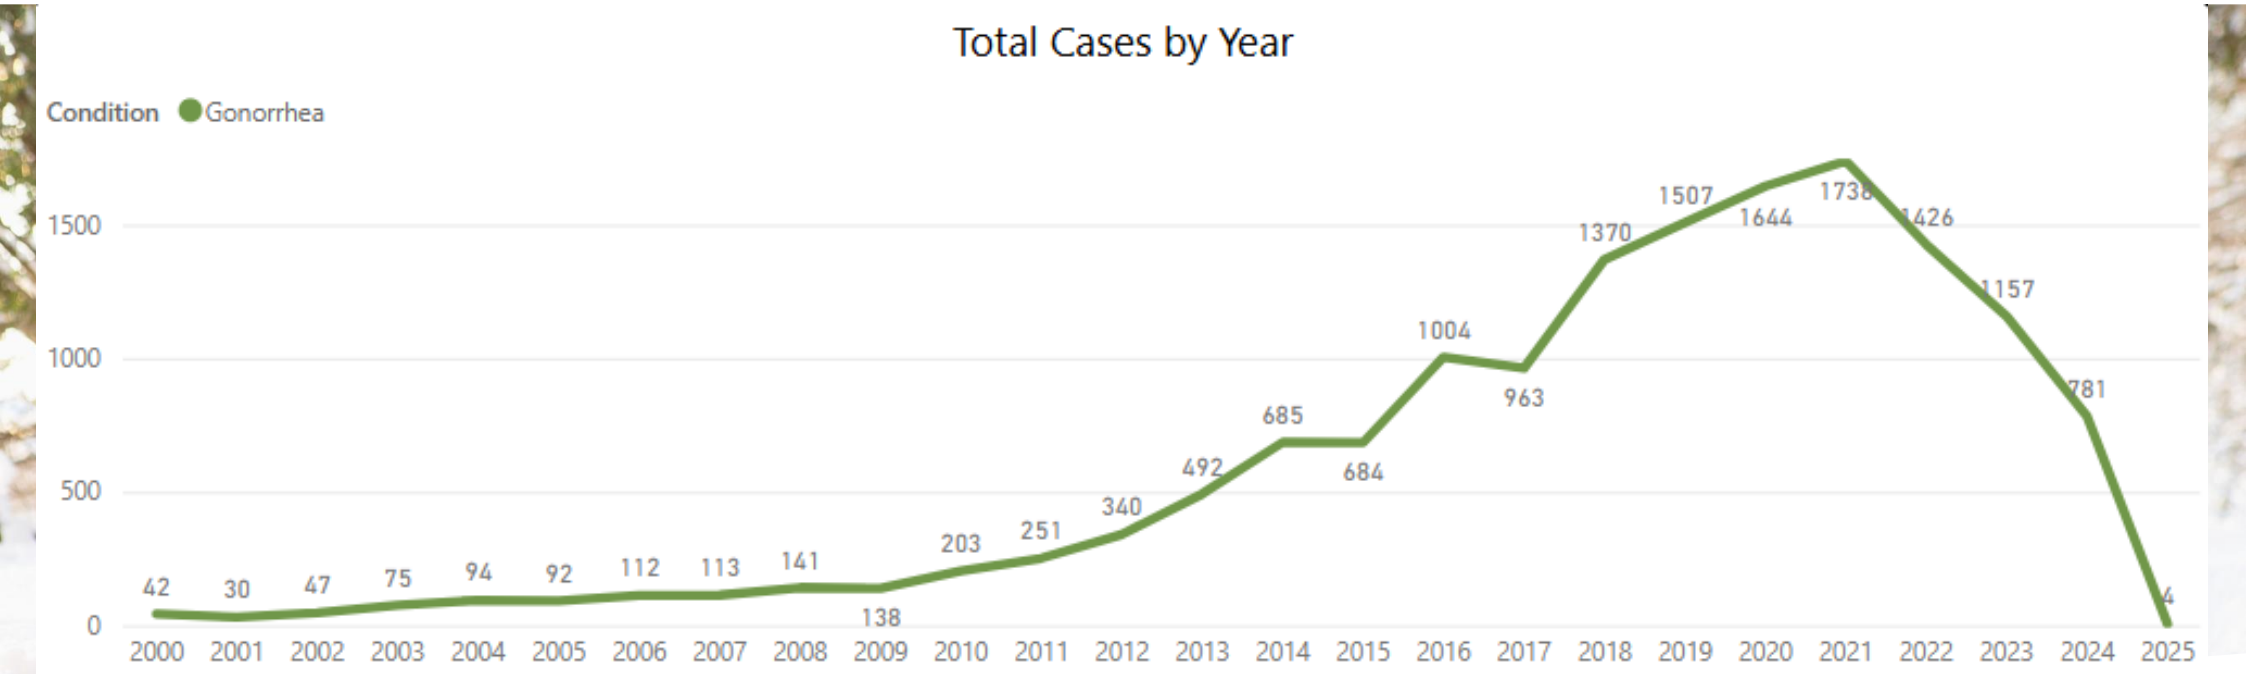


Sexually Transmitted and Bloodborne Diseases (and TB)

Prevention through early detection and treatment

- Congenital Syphilis
- Late effects of syphilis
- Neonatal infections and infertility secondary to gonorrhea and chlamydia infections

- Reducing viral loads to non-detectable levels
  - Hepatitis C (elimination of hepatitis C infection)
  - HIV
- Working with local harm reduction programs
- Assuring TB cases are treated and contacts are notified and offered testing and treatment



NORTH Dakota | Health & Human Services
Be Legendary.

Syphilis In North Dakota

- 343 cases in 2024 up 60% from 2023
- 20% of new cases reported resulted from partner services
- 14/16 pregnant cases successfully treated prior to delivery
  - 2 cases of congenital syphilis in mothers with late or no prenatal care.

NORTH Dakota | Health & Human Services
Be Legendary.

Gonorrhea in North Dakota

- 781 cases in 2024, down 32% from 2023
  - Down 55% from our peak in of 1,738 cases in 2021
  - 18% of cases resulting from partner notification
- Challenges continue with the emergence of strains resistant to main-line antibiotics

NORTH Dakota | Health & Human Services
Be Legendary.

Sexually Transmitted and Bloodborne Disease Goals

- Start Planning for 2026-2031 Integrated HIV Prevention & Care Plan
- Continue to push for community centered approach to syphilis
- Continue fostering collaboration with Community Engagement and Field Services Units

NORTH Dakota | Health & Human Services
Be Legendary.

Collaboration with our Internal Partners

- Medicaid
  - Immunizations
  - Ryan White
  - HIV and Hepatitis
  - Sexually Transmitted Infections

House Bill No. 1012
House Appropriations Committee – Human Resources Division
Written Testimony Presented Seth O'Neill, JD, MSW
Email: soneill@nddsvc.org
January 20, 2025

Chairman Nelson and Members of the House Appropriations Committee, my name is Seth O'Neill and I am representing the North Dakota Domestic & Sexual Violence Coalition in support of House Bill 1012 and more specifically the funding for domestic and sexual violence programs. Our coalition is comprised of the 19 domestic and sexual violence organizations in North Dakota. In January 2024, the Department of Health & Human Services reached out to the coalition in anticipation of our member agencies' intention to seek additional state funds in the next biennium. The current executive budget recommendations for the 69th Legislative Assembly include a $2.25 million increase for domestic and sexual violence. **However, this recommendation is a significant decrease from our original request of $19 million.** We are grateful that incoming Gov. Kelly Armstrong didn't reduce it further, and we'd like the Legislature to consider increasing funds in stronger alignment with our original request.

Currently, our programs have a $7.9M annual gap in which they attempt to seek private funding to fulfill growing client safety, protection and educational needs. In many cases, this private funding supports programming for which our agencies are the designated service provider for state mandated regulations (*see* addendum below). We request that the state consider additional dollars to support services that are provided in alignment with state laws and obligations designed to protect and safeguard North Dakota families.

The following is an itemized breakdown of the request and what each component will do for the more than 7,400 survivors and their families statewide.

Domestic Violence General Funds
Current Amount: $5,936,285 per biennium/Request: $10,820,160 per biennium
The domestic violence general funds allow our programs to provide essential services including 24-hour crisis intervention, counseling, accountability and education for those who have used violence, sexual assault response & advocacy, prevention & outreach, shelter and transitional housing.

Safe Haven
Current Amount: $425,000 per biennium/Request: $2,380,435 per biennium
The Safe Haven funds provide supervised parenting time and exchanges for families. Currently, only eight of our programs are able to provide this service. These programs provide a safe place for children and families to maintain a relationship while addressing underlying concerns. The appropriation amount has not increased since at least the 2013-2015 biennium. In communities without this service, a child may be left unsupervised with a violent parent or a domestic violence victim may have to contact their abuser for child exchanges exposing them to violence and increased lethality risk. The increased budget amount will allow the programs to sustain this service and for new programs to begin this vital service.

Sexual Violence Prevention
Current Amount: $200,000 per biennium/Request: $4,328,064 per biennium
Sexual violence prevention is severely underfunded at the state level. Increasing the funding for sexual violence prevention would better the health and safety of North Dakota and ultimately, move toward eradicating violence and its devastating impacts to the economic standing, health, and wellbeing of our communities.

Domestic Violence Intervention Programming
Current Amount: $1,000,000 per biennium/Request: $1,568,923 per biennium
Domestic violence intervention programs received a healthy increase during the current biennium. This has allowed our programs to sustain these services through staff retention and expanded programming.

2023–2025 DHHS Public Health Section
Domestic Violence & Sexual Assault Programs Request:

Program Category	Description of Service	Source of Funds	2023-2025 Biennium Request	2023 – 2025 Biennium Appropriation	2025-2027 Biennium Request
Domestic Violence & Sexual Assault	Crisis response, advocacy	State General Fund	$10,000,000	$4,596,285	$10,820,160
		Community Health Trust Fund		1,000,000	
		Domestic Violence Prevention Fund		340,000	
Safe Haven	Supervised visitation and exchange	State General Fund	2,200,000	425,000	2,380,435
Sexual Violence Prevention	Bystander intervention program	State General Fund	4,000,000	200,000	4,328,064
Domestic Violence Intervention Programming	Intervention for domestic violence offenders	Community Health Trust Fund	1,425,000	1,000,000	1,568,923
		Total	**$17,625,000.00**	**$7,561,285.00**	**$19,097,582.00**

Until the 2023-25 biennium, funding for domestic and sexual violence remained relatively flat throughout the past 10-12 years. In attempt to make up for increased growth in our programs, which has been significantly subsidized by private funds, we requested $17.5 million last session. This year, we're landing in a similar place based on the above, in addition to inflationary considerations. **The current budget puts us closer, but still $9 million shy of what is truly needed to adequately support survivors and their families.** We look forward to sharing additional data and anecdotal examples during public testimony. Please reach out if you have additional questions or thoughts you'd like us to consider.

Addendum
North Dakota Century Code Mandates:

14-09-29. Parental rights and responsibilities - Best interests and welfare of child.
2. If the court finds that a parent has perpetrated domestic violence and that parent does not have residential responsibility, and there exists one incident of domestic violence which resulted in serious bodily injury or involved the use of a dangerous weapon or there exists a pattern of domestic violence within a reasonable time proximate to the proceeding, the court shall allow only supervised parenting time with that parent unless there is a showing by clear and convincing evidence that unsupervised parenting time would not endanger the child's physical or emotional health.

12.1-17-13. Mandated intervention program for domestic violence offenders.
2. The sentence for an offense under section 12.1-17-01, 12.1-17-01.1, 12.1-17-01.2, 12.1-17-02, 12.1-17-03, 12.1-17-04, 12.1-17-05, 12.1-17-07, 12.1-17-07.1, 12.1-18-02, 12.1-18-03, 12.1-21-05, 12.1-21-06.1, 12.1-31.2-01, 12.1-31.2-02, or 14-07.1-06 against an intimate partner, must include an order to complete a domestic violence offender assessment and intervention program as determined by the court. A court may not order the offender to attend anger management classes or individual counseling unless a domestic violence offender intervention program is not reasonably available to the defendant and the court makes findings for the record explaining why an order to complete a domestic violence offender intervention program would be inappropriate.
3. If an offender who is ordered to complete a domestic violence offender assessment and intervention program is assessed and determined to be inappropriate for the program by the program provider, a court may find the order to complete a domestic violence offender assessment and intervention program to be satisfied or may order the offender to complete other appropriate programming.

APPLICATIONS NOW OPEN! Learn More & Apply »

North Dakota Public Health Leadership Academy

Elevate your impact in public health with the North Dakota Public Health Leadership Academy! This transformative five-month program is designed for emerging and current public health leaders who work in public health (local, state, tribal or academic), Federally Qualified Health Centers (FQHCs) and similar types of healthcare settings. Collaborate with a diverse cohort to tackle complex challenges in your community and implement effective systems change strategies.

Join us for an in-person kick-off on Jan. 16–17 in Bismarck, followed by four engaging virtual sessions. Participants will benefit from a CliftonStrengths assessment and group coaching to enhance their leadership skills.

Apply by Friday, Dec. 6 at 11:59 pm CT using this application link.

For questions, email: phperformance@nd.gov.

SCHEDULE

January – May 2025

In-person sessions:

Jan. 16	1–5 pm CT
Jan. 17	8:30 am–12:30 pm CT

Virtual sessions:

Feb. 20	9 am–12 pm CT
March 20	9 am–12 pm CT
April 17	9 am–12 pm CT
May 15	9 am–12 pm CT

COST

FREE for up to 40 emerging public health leaders.

Individuals who need their travel expenses covered for attending the in-person event can apply for travel reimbursement.

Community Engagement

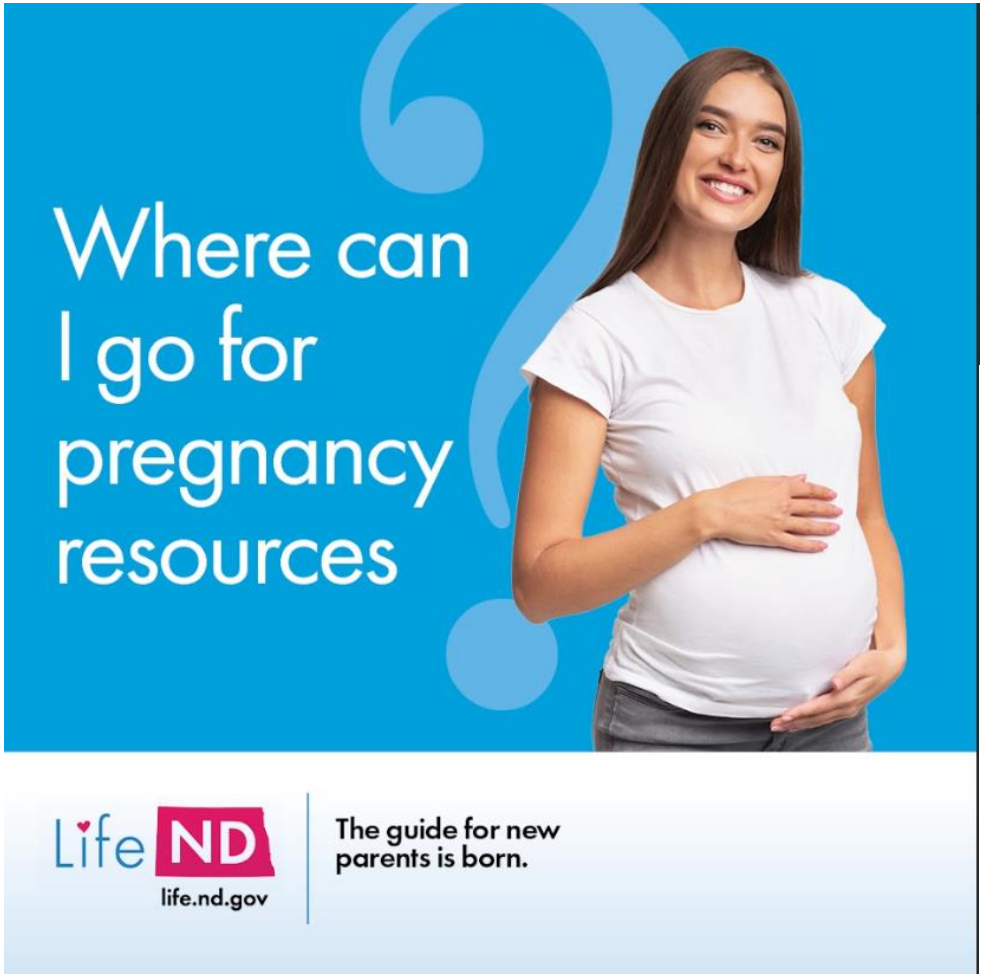
- Tribal and Health Liaisons
- Local Public Health Liaison
- Accreditation
- Public Health Leadership Academy

Family Health & Wellness

Women's and Men's Health

- Reproductive health services to 3,324 females/1,054 males; expanded services to homeless shelters and harm reduction centers
- Alternatives to Abortion Program served 2,313 clients for a total of 6,259 client visits (4,263 prebirth, 1,913 postbirth)
- Created a Maternal and Child Health and Men's Dashboard to monitor data and trends

Breastfeeding/Nutrition



- WIC served 16,601 participants, including 4,877 infants
- 213 workplaces designated Infant Friendly impacting over 45,150 employees across North Dakota
- Supported 22 grantees to implement community strategies
- Seven LPHUs implemented Farm to School or Farm to Early Care and Education projects

Injury Prevention

- 30 car seat distribution programs provided 469 car seats to those who could not afford them
- Provided 341 pack-n-plays to families for infant safe sleep through 46 Cribs for Kids distribution sites (2,964 cribs distributed since program start in 2010)
- The Poison Hotline answered 6,056 calls

CAMPAIGN HIGHLIGHTS

September 2 – December 19, 2024

17,031

Page views across the homepage and 5 main sub-pages. That's an average of 4,866 views per month – over 9x more monthly page views during the campaign than the pre-campaign monthly average.

>1.0%

Click through rate (CTR) from Facebook and Instagram each month. This number is above industry benchmark and underscores the quality of the creative and the relevance of our audience.

99%

Of sessions were Engaged Sessions from Oct-Dec (meaning visitors stayed on site at least 10 seconds or viewed at least 2 pages). That's up from 47% in September and shows the campaign continued to gain traction.

23,471

Engagements with the campaign across all social channels: Facebook, Instagram, and Pinterest.

1,197

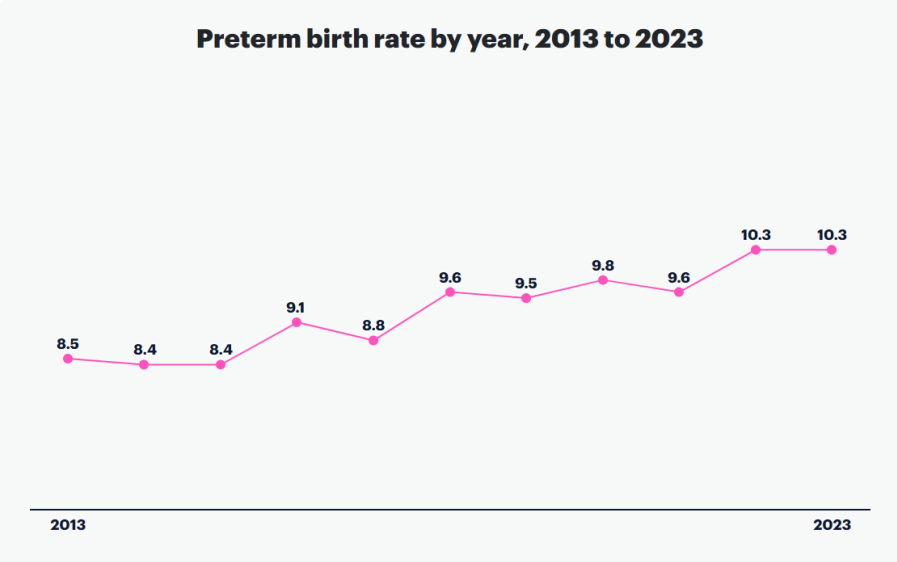
Clicks to hhs.nd.gov or another resource from life.nd.gov. This illustrates how Life ND helped connect people to the right resources.

Data Highlights

- In 2021, 45.2% of women reported a routine checkup in the year prior to becoming pregnant. (North Dakota Pregnancy Risk Assessment Monitoring System - PRAMS)
  - The period before getting pregnant is a critical time to seek preventative health services to ensure a healthy pregnancy and positive birth outcomes.

- In 2023, 79.2% of infants were born to women receiving adequate/adequate plus prenatal care. (March of Dimes Peristats)

- In 2023, 1 in 14 babies (7.1% of live births) was low birthweight (less than 5.5 pounds). (March of Dimes Peristats)



- Breastfeeding: American Indian mothers are less likely to initiate breastfeeding (74.7%), than mothers of other races (white mothers; 92.7%). (2022 PRAMS)

- Childhood Obesity: In 2022, 15.2% of North Dakota children ages 10-17 were obese (BMI at or above the 95th percentile) - an increase of 2.6% from 2020-2021. The national average is 16.6%. (National Survey of Children's Health)

2025-27 Executive Budget Highlight: $2,000,000 for Maternal and Child Health Programs

- Women's health services
- Preconception/reproductive health services
- Enhance postpartum services and recognize urgent maternal warning signs in the postpartum period
- Strengthen chronic disease prevention and management (chronic health conditions make people more likely to have a preterm birth)
- Screenings for obesity, tobacco use, drug and alcohol use, mental health, intimate partner violence, hypertension, substance use disorder, etc.

North Dakota Preterm Birth Rate by Year
(a birth occurring before 37 completed weeks of gestation)
2024 March of Dimes Peristats

Domestic Violence Facts | 2023

6,131
new victims

served by

19
Domestic Violence/Sexual Assault Crisis Centers

OF THOSE CASES:

- **83%** of the victims were women
- **105** women were pregnant at the time they were assaulted
- **21%** of new victims were people with disabilities
- At least **4,205** children were directly impacted by these incidents

A CLOSER LOOK

- At least **58%** of victims served were physically abused.
- Weapons were used in at least **11%** of the cases identified. Guns were used in **23%** of the cases and knives were used in **17%** of the cases involving weapons.
- In at least **33%** of cases, the abuser had a history of abusive behavior with other adults, including previous partners.
- Alcohol use by the abuser was indicated in **23%** of the new cases. Alcohol use by both the victim and offender was indicated at **4%** of the cases.

NORTH Dakota | Health & Human Services
Be Legendary.

Sexual Assault Facts | 2023

1,288 Primary Victims
+ 221 Secondary Victims

served by

19 Domestic Violence/Sexual Assault Crisis Centers

OF THOSE CASES:

- At least **1,042** victims were female
- **55%** of cases were male assailants (795), a female victim
- **221** assailants were female
- **6%** of cases were male assailants, a male victim

A CLOSER LOOK

- At least **242** of primary victims were under the age of 18 years old at the time of the assault(s).
- In adult cases, **6%** of assailants were strangers. In child cases, **4%** of the assailants were strangers.
- In at least **24%** of all cases, the assailant was a friend/acquaintance/date of the victim.
- At least **34%** of the assaults occurred in the victim's or assailant's home.
- **31%** of new victims were people with disabilities. Of those, **17%** were people with developmental disabilities, **29%** had physical disabilities, and **54%** were people with mental health disabilities.

Health Promotion and Chronic Disease Prevention

North Dakota Comprehensive Cancer Control Program

- Completed a new 10-year statewide strategic cancer plan with input from over 70 partners and stakeholders across ND
- Established a new Lung Cancer Roundtable – Seven partner organizations are establishing priorities

- Expanded number of providers in network from 16 to 143
- Increased referrals from 31 in 2023 to 152 in 2024. Major referral sources are *Women's Way* and patients' primary care staff

WOMEN'S WAY
A Breast & Cervical Cancer Early Detection Program

- 998 individuals received breast and cervical cancer screening, including 93 Hispanic and 68 American Indian individuals
- Additionally, 328 individuals received patient navigation-only services, including 45 Hispanic and 63 American Indian individuals

Health Promotion and Chronic Disease Prevention

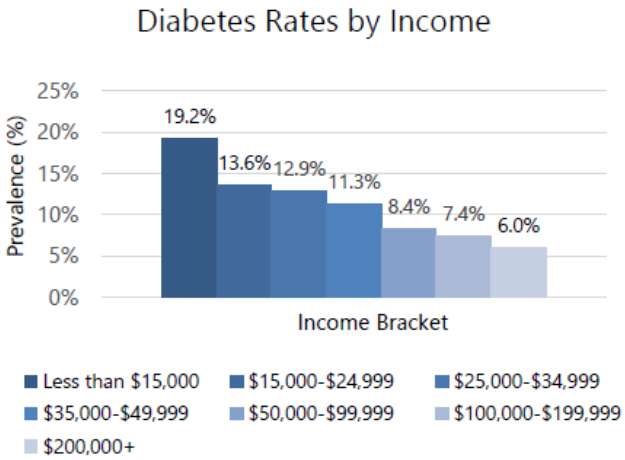
Diabetes Prevention and Control

- Of the partnering health systems, the grantee diabetes control rate is 76.3%; the national average for diabetes control is 67.8%

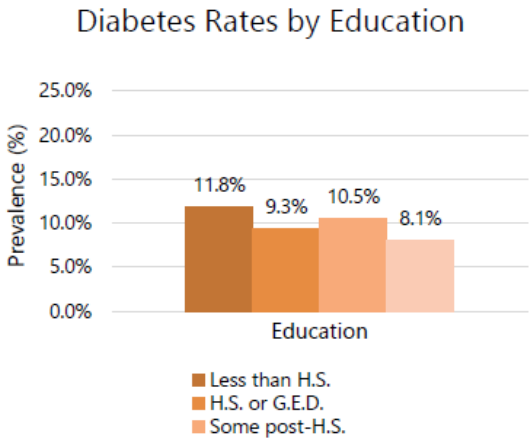
Cardiovascular Health

- Of the partnering health systems, the grantee hypertension control rate is 74.5%; this puts North Dakota in the top 10% of the country for hypertension control. The national average for hypertension control is 32%

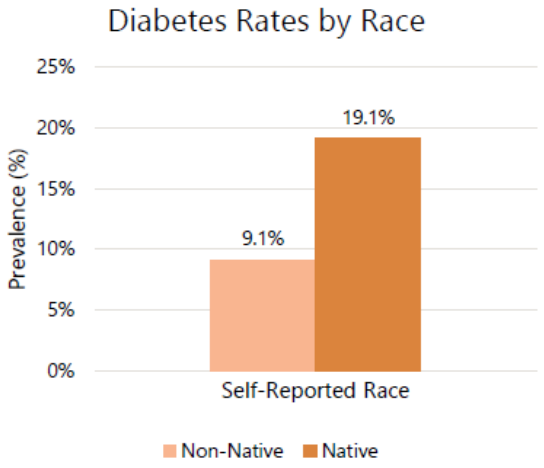
Preventative Health Grant



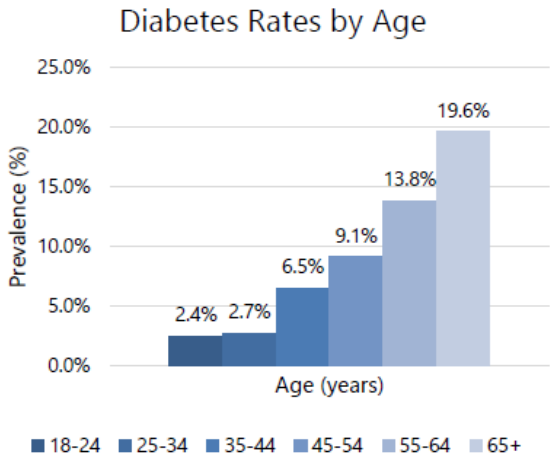
- Community gardens
- Food Security Summit
- Music on the Missouri
- Walk and Talk events
- Winter Solstice Walk
- Local public health regional collaboratives



Data Highlight

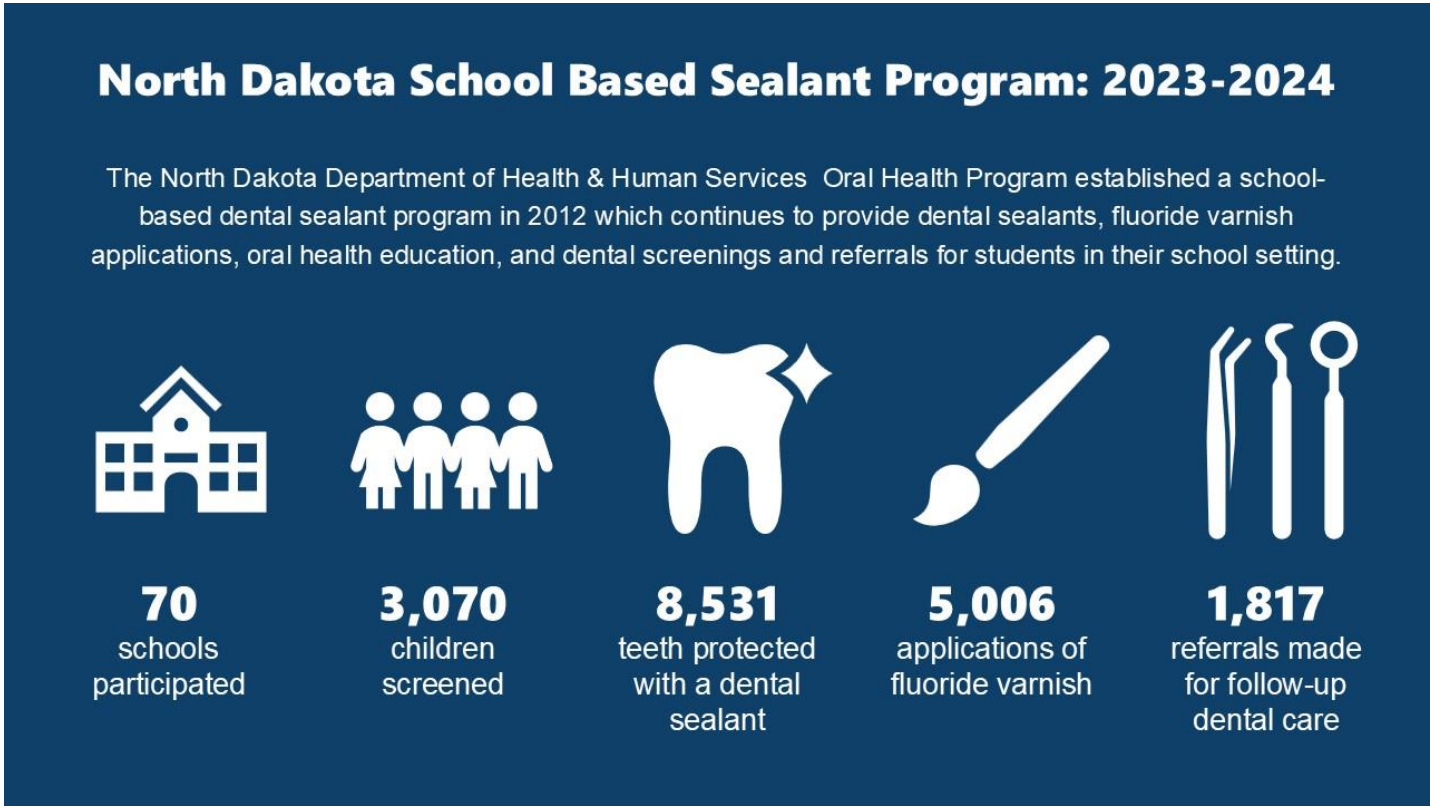


The overall rate of diabetes in North Dakota has consistently fallen below that of the United States average (9.6% vs 11.5% in 2022). (BRFSS)



However, rates vary by demographics and significant disparities exist in the state.

The graphs below illustrate the degree to which the overall rates of diabetes among adults 18 years and older in North Dakota varied by demographic and geography in 2018-2022, based on Behavioral Risk Factor Surveillance System (BRFSS) data[3].



Oral Health: SEAL!ND
School-based Sealant and Fluoride Varnish Program

Donated Dental Services

Program history:

- Established in 1998
- 1,105 total patients served since inception
- $4,860,408 in total care donated by volunteers
- Volunteer network: 94 dentists and 7 laboratories

“I can smile, I can talk without hiding my mouth, I am able to eat without choking. Most of all I‘m regaining my confidence. This organization and the volunteer dental offices that help people like me need to know how greatly you affect so many lives. I am grateful beyond words.”

Ronald McDonald House Care Mobile

Between 7/1/2024 – 12/31/2024, the Care Mobile:

- Visited 13 sites
- Treated 437 children
- Provided a total value of $265,779 in dental services

- About 26% of the children were Medicaid eligible
- 1.5% had private insurance
- 72.5% were uninsured

Tobacco Prevention and Control

TABLE OF CONTENTS

INTRO

This biennial synthesis report of the North Dakota Tobacco Prevention and Control Program (TPCP) is a strategic evaluative effort that culminates in this summary report to the North Dakota Legislature, tobacco control partners, and the public.

01 Who is Using Tobacco Products?

Pages 4–8

+ Definitions in a shifting landscape
+ Youth are using different products
+ Adult use and chronic disease
+ American Indian commercial tobacco use

02 Nicotine Dependence Treatment

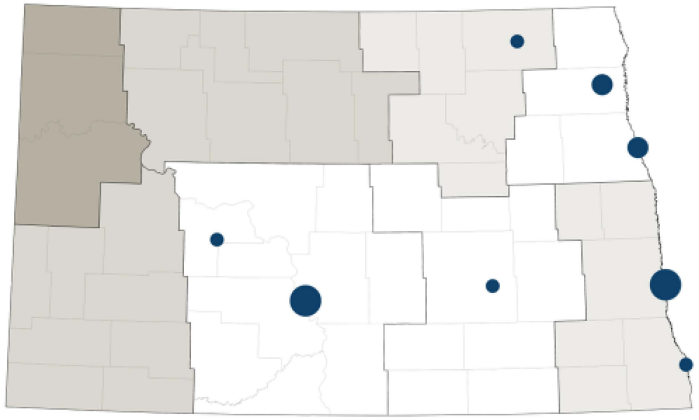
Pages 9–17

+ Effective treatment across products
+ Effective promotion
+ TTS trainings
+ NDQuits Cessation grantees

03 Expanding Access to Treatment

Pages 18–27

+ Building capacity within schools
+ Behavioral health
+ North Dakota Medicaid coverage
+ Building capacity in tribal nation
+ Maternal population



04 Innovative Collaborations to Increase Reach

Pages 28–37

+ Youth and young adults
+ Flavored tobacco products
+ Pharmacist pilot
+ Behavioral health providers
+ Innovative collaborations

Tobacco Treatment Specialists (TTS) Fill A Void for Health Care Staff

Prevalence of tobacco use by Human Service Region, overlaid with NDQC grantee locations. NDQC grantees utilize TTS to provide specialized treatment for tobacco and nicotine dependence.

Tobacco use by region:

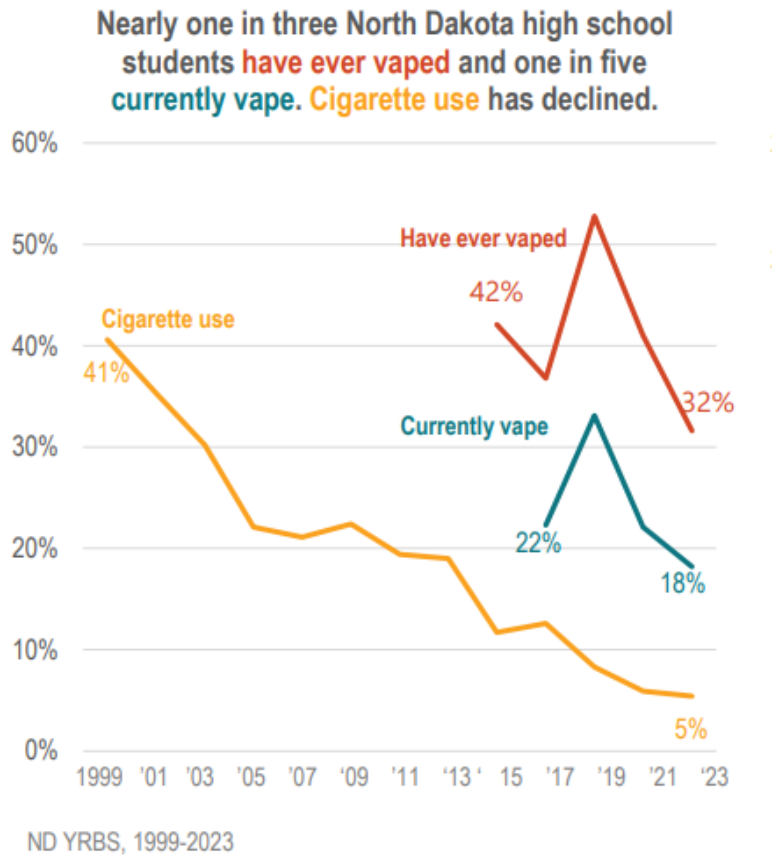
○20-21% ○23% - 24% ●26% ●40%

ND BRFSS, 2023

Note: Larger dots indicate multiple grantees.

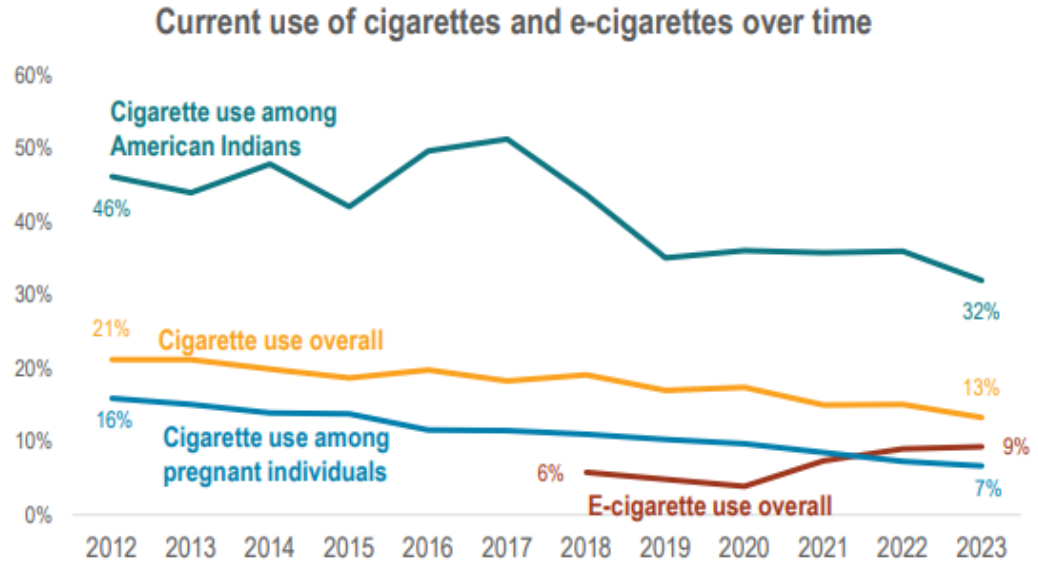
Since 2018, nearly 400 TTS have been trained to provide patient interventions for nicotine dependence.

A TTS training is approximately 35 hours of learning. The content includes the neurobiology of nicotine dependence, health benefits of quitting, recommendations and dosing for cessation medications, and motivational interviewing, which is an evidence-based counseling approach to help patients adhere to treatment recommendations.



TTS training improves a clinician's competency and confidence to offer treatment for nicotine dependence.

The Tobacco Prevention and Control Program continues to expand the treatment skills of its TTS by offering in-state education events and advanced training in motivational interviewing.



The motivational interviewing workshop provides education through staff and attendee interaction to enhance communication skills, which are essential in collaborative conversations between a patient and clinician to assist behavioral change.

Data Highlights – Progress and Challenges

ND YRBS, 1999-2023

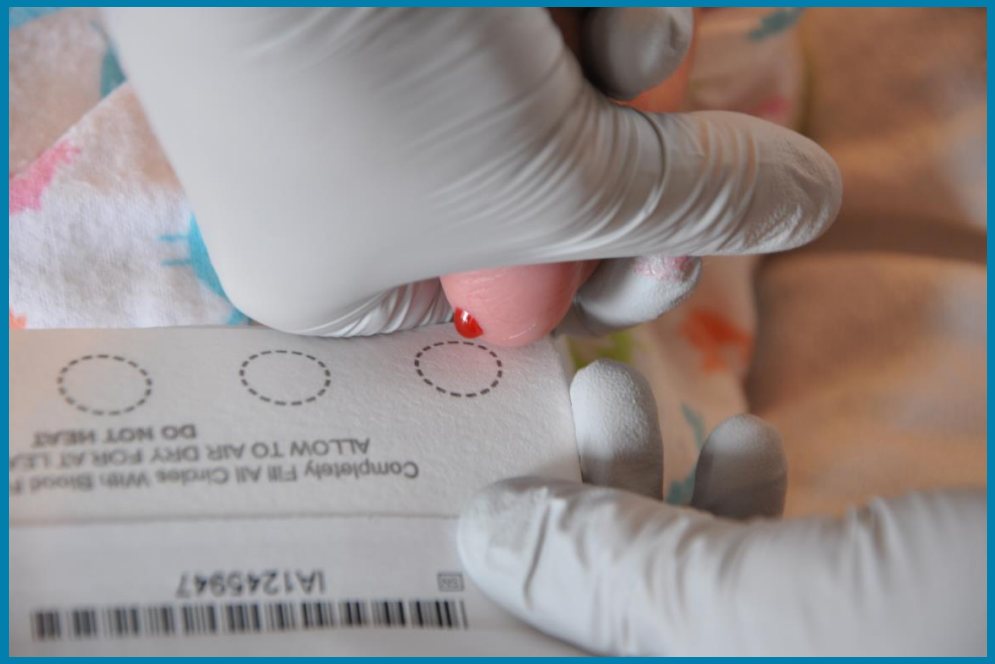
North Dakota BRFSS, 2012 – 2023

Special Health Services

Coordinated Services

- Provided 19 individuals with 90 requests for metabolic food
- 350 children had 1,440 visits to multidisciplinary clinics

Financial Coverage



- Helped families pay for medical services for 272 eligible children, including health care visits and tests to diagnose chronic health conditions early and specialty care needed for treatment

System Enhancement

- 348 children received care coordination
- 390 information and referral requests were completed for families

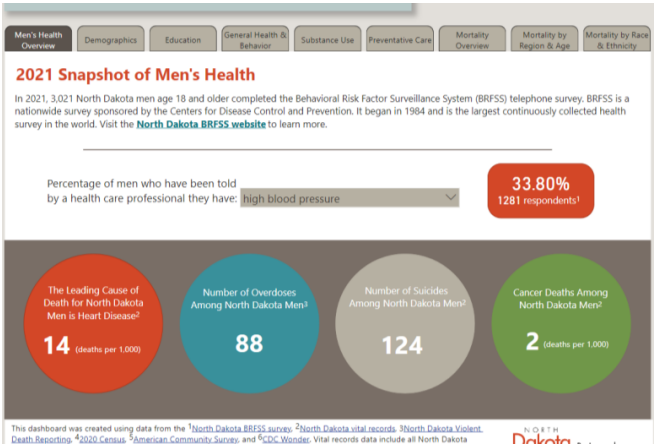
Note: All data is from 2023

Newborn screening identifies conditions that can affect a child's long-term health or survival. Early detection, diagnosis, and intervention can prevent death or disability and enable children to reach their full potential.

Newborn Screening

- Screened 11,034 infants
- 61 children received long-term follow-up
- 34 conditions are included in North Dakota's newborn screening panel
- New grant to enhance and improve ND’s program

Data Highlight



Children with Special Healthcare Needs (CSHCN) Transition to Adult Care:

- 31.8% of North Dakota's CSHCN, ages 12 through 17, received services to prepare for the transition to adult health care, which is above the 2021-2022 percentage (25%) and above the national average (22.3%). (National Survey of Children's Health)

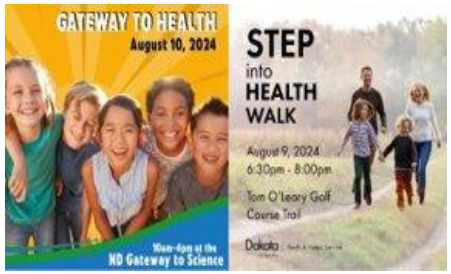
North Dakota

FY 2025 Application/ FY 2023 Annual Report



Created on 6/28/2024 at 2:01 PM

North Dakota Medically Underserved Areas/Populations (MUAs/MUPs)

Healthy and Safe Communities – Supports the advancement of strong, stable, healthy families and communities

Gateway to Health – a free community event to promote health and well-being.

"Fun and interactive booths! I thought this was an event for kids, but I learned things as well."

116 health professionals working in 28 counties across the state in 2024.

"My family and I are truly grateful for this opportunity."
"This program is an asset to the Dickinson community."

Child Passenger Safety – this ND family survived a roller crash in 2023.

"We survived the rollover crash because we were all buckled."

NDQuits
1-800-QUIT-NOW (1-800-784-8669)
hhs.nd.gov/ndquits

Quitting tobacco is a process. NDQuits can help with each step of the way.

"The quitline was a wonderful aid in being able to say I've not even had a one puff since August 20, 2023. Thank you NDQuits!

2025-2027 Biennium

Plans

- Enhanced community engagement
- Streamlined loan repayment application process
- Maternal and Child Health (MCH) Needs Assessment – new priorities
- 10-year Statewide Cancer Plan
- WIC participant portal, new food package, and updating MIS
- Youth nicotine prevention

Challenges

- Return to core public health services
- Childhood obesity
- Changing federal grants and requirements
- Ever expanding diversity of nicotine products
- Domestic Violence/Sexual Assault
- Maternal health care services

Summary and Key Takeaways

Key Strategies and Needs:

- Community Engagement
- Data and Evidence-based decision making
- Policy, Systems and Environmental changes (PSE)
- Infrastructure, Workforce and Data Systems
- Increased support for Domestic Violence/Sexual Assault and maternal health services

Implementing these strategies and meeting these needs is essential to ensure that everyone has the chance to achieve their optimal health – and to make North Dakota the Healthiest State in the Nation!

The State of Tobacco Control in North Dakota: 2023 – 2025

Expanding Access To Treatment and Adapting in a Changing Landscape

Prepared for NORTH Dakota Be Legendary. Health & Human Services

Prepared by Professional Data Analysts

TABLE OF CONTENTS

INTRO

This biennial synthesis report of the North Dakota Tobacco Prevention and Control Program (TPCP) is a strategic evaluative effort that culminates in this summary report to the North Dakota Legislature, tobacco control partners, and the public.

01

Who is Using Tobacco Products?

Pages 4–8

+ Definitions in a shifting landscape
+ Youth are using different products
+ Adult use and chronic disease
+ American Indian commercial tobacco use

02

Nicotine Dependence Treatment

Pages 9–17

+ Effective treatment across products
+ Effective promotion
+ TTS trainings
+ NDQuits Cessation grantees

03

Expanding Access to Treatment

Pages 18–27

+ Building capacity within schools
+ Behavioral health
+ North Dakota Medicaid coverage
+ Building capacity in tribal nation
+ Maternal population

04

Innovative Collaborations to Increase Reach

Pages 28–37

+ Youth and young adults
+ Flavored tobacco products
+ Pharmacist pilot
+ Behavioral health providers
+ Innovative collaborations

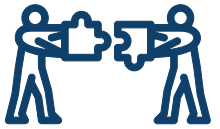
PURPOSE OF THIS REPORT

This report is the culmination of a biennial evaluation and synthesis of the priorities, activities, and future planned work of the North Dakota Tobacco Prevention and Control Program (TPCP). The mission of the TPCP, outlined in the 2020-2025 state strategic plan, is "**to protect the health of North Dakotans by reducing the negative health and economic consequences of the state's No. 1 cause of preventable disease and death – tobacco use**."[1]

The TPCP contracts with an external evaluator, Professional Data Analysts (PDA), for a comprehensive program evaluation. This includes the design and implementation of data collection methods, analysis, and reporting.

PDA's evaluation and statistics teams analyze and make sense of the data so that the TPCP can make data-driven decisions. PDA has deep experience in various public health initiatives and has evaluated programs within the TPCP since 2011 and the entire TPCP since 2017.

This fourth synthesis report by PDA emphasizes the expansion of treatment within the state, aligned with the five guiding principles of North Dakota Health and Human Services (HHS). These principles, highlighted below, are integrated into each section of this report.



Continuous Improvement and Innovation

Responsible Stewardship

Transparent and Open Communication

Engaged Collaboration

Data-Centered Decisions

Questions about the Tobacco Prevention and Control Program should be directed to Neil Charvat, Director, Tobacco Prevention and Control Program, njcharvat@nd.gov.

Questions about the external evaluation should be directed to Melissa Chapman Haynes, PhD, Director of Evaluation, Professional Data Analysts (PDA), mchapman@pdastats.com.

[1] https://www.cdc.gov/mmwr/volumes/72/wr/mm7218a1.htm

Who is using tobacco products in North Dakota?

Responsible Stewardship

Data-Centered Decisions

In 2023, **nearly one in four North Dakota adults currently use at least one kind of tobacco product** (24%). Some groups have higher use – American Indians (32%), individuals with a high school diploma/equivalency or less education (37%), and those reporting poor mental health (43%). While cigarette smoking has continued to decrease for both adults and youth, the use of e-cigarettes has not seen significant changes since 2021.

1

Sources: North Dakota Behavior Risk Factor Surveillance System (ND BRFSS), 2023 and 2021 and North Dakota Youth Risk Behavior Survey (ND YRBS), 2023 and 2021.

THE TOBACCO PRODUCT LANDSCAPE HAS SHIFTED DRASTICALLY

Nicotine is a highly addictive drug that is hard to quit, and the variety of combustible, non-combustible, electronic, and synthetic products has exploded in the retail environment. Defining tobacco products, commercial tobacco, and having a clear position on vaping products is critical.

Tobacco Product

This report defines this as **any product or device** that can deliver nicotine to the human brain, whether derived from tobacco or another source, except for safe and effective nicotine replacement therapies approved by the U.S. Food and Drug Administration (FDA) for tobacco cessation. Tobacco products include, but are not limited to, e-cigarettes, cigarettes, cigars, smokeless tobacco, hookahs, pipe tobacco, heated tobacco products, and nicotine "tobacco-free" pouches.

From: NIDA. 2023, December 14. What is the scope of tobacco, nicotine, and e-cigarette use in the United States?. Retrieved from https://nida.nih.gov/publications/research-reports/tobacco-nicotine-e-cigarettes/what-scope-tobacco-use-its-cost-to-society

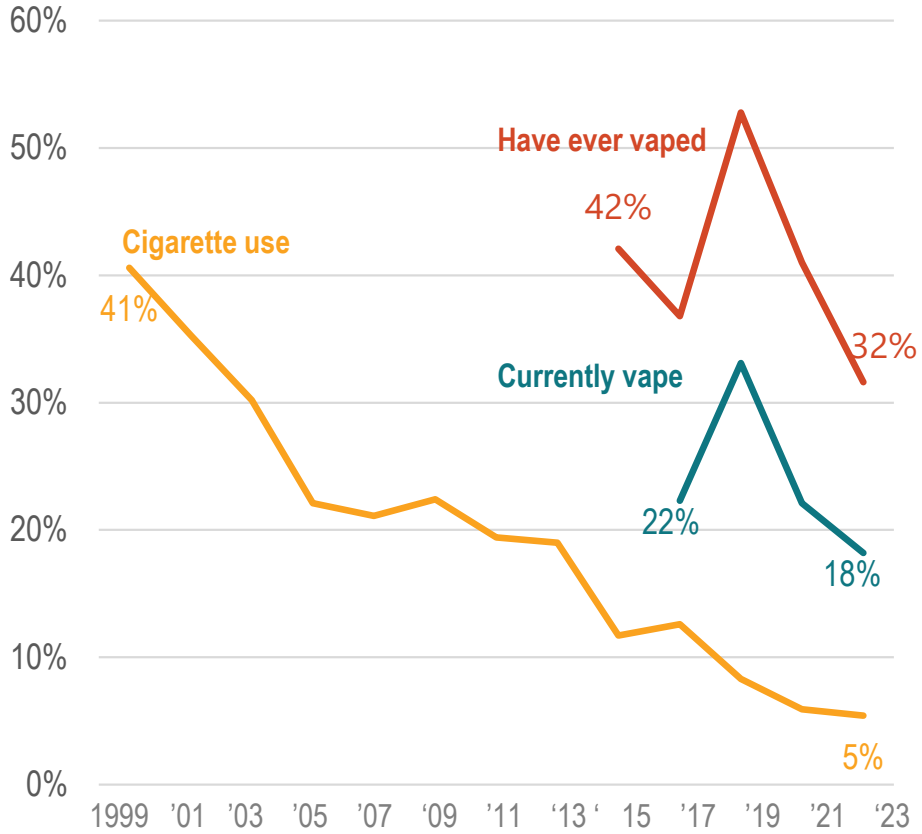
Commercial Tobacco

In this report, we distinguish the use of traditional or sacred tobacco by Indigenous people, including American Indians living in one of the five tribal nations in this geography. Practices vary by tribe, though often, the inner bark of red willow is used and referred to as sacred tobacco.

The National Native Network states "Traditional and commercial tobacco are different in the way that they are planted and grown, harvested, prepared, and used."

Any references to tobacco in this report refer to commercial tobacco unless otherwise noted.

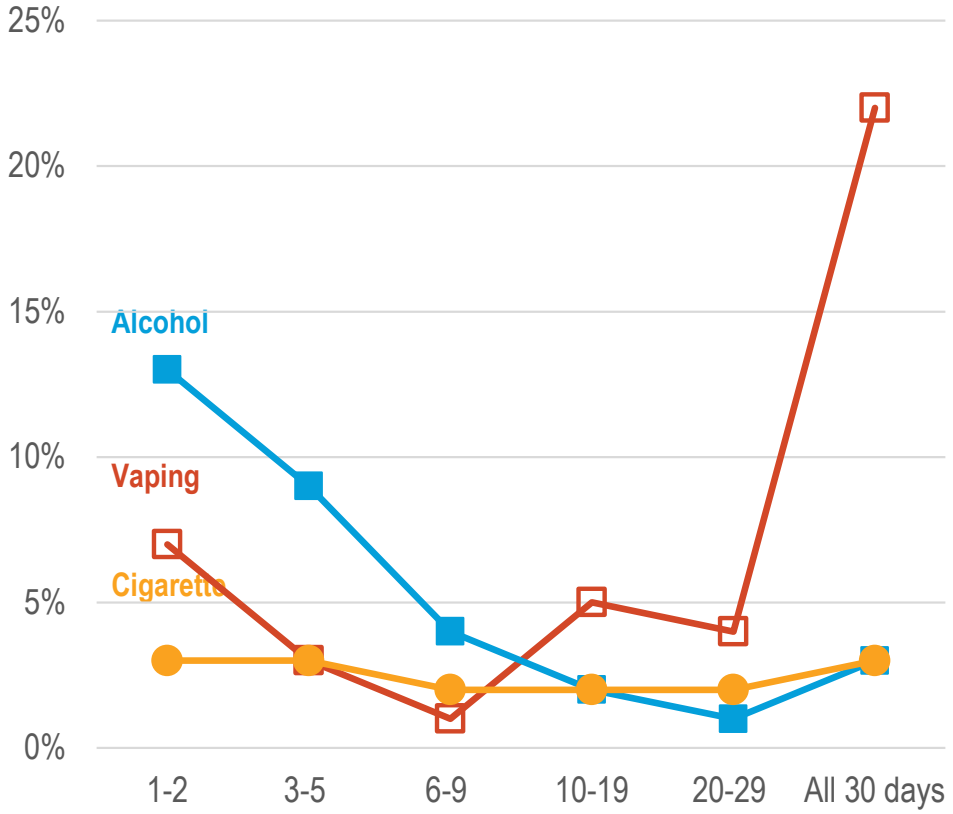
TPCP Position on E-Cigarettes



In September 2018, the TPCP took a data-informed position on Electronic Nicotine Delivery Systems (ENDS), now commonly known as vapes. Following additional studies, the risks outlined remain and ENDS are still not approved by the FDA as a nicotine treatment medication.

- The health risks from ENDS use have not been adequately studied.
- Nicotine from ENDS is highly variable and unregulated.
- Most ENDS products contain and emit potentially toxic substances.
- The FDA does not currently approve ENDS as a quit-smoking aid.

CIGARETTE USE IS HISTORICALLY LOW AMONG YOUTH, THOUGH ONE IN FIVE HIGH SCHOOLERS ARE VAPING

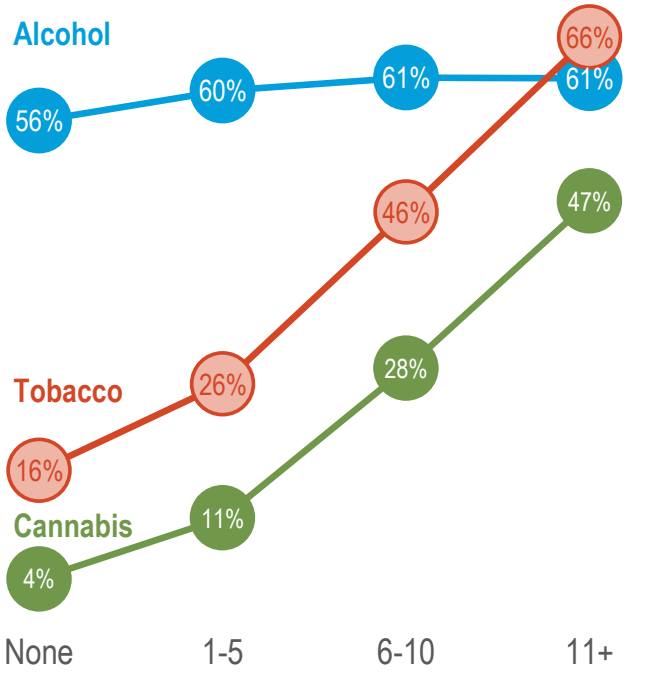


Prevention of use is critical since "tobacco use almost always starts in childhood or adolescence." [2] Further, North Dakotans reporting poor mental health reported a sharp increase in vaping.

Nearly one in three North Dakota high school students have ever vaped and one in five currently vape. Cigarette use has declined.

ND YRBS, 1999-2023

Vaping sharply increases with an increase in poor mental health days, whereas alcohol use declined and cigarette use was steady.



During the past 30 days, how often was your mental health not good

ND YRBS, 2023

[2] Jenssen, et al. (2023). Protecting Children and Adolescents from Nicotine and Tobacco, Pediatrics, 151(5), https://doi.org/10.1542/peds.2023-061804.

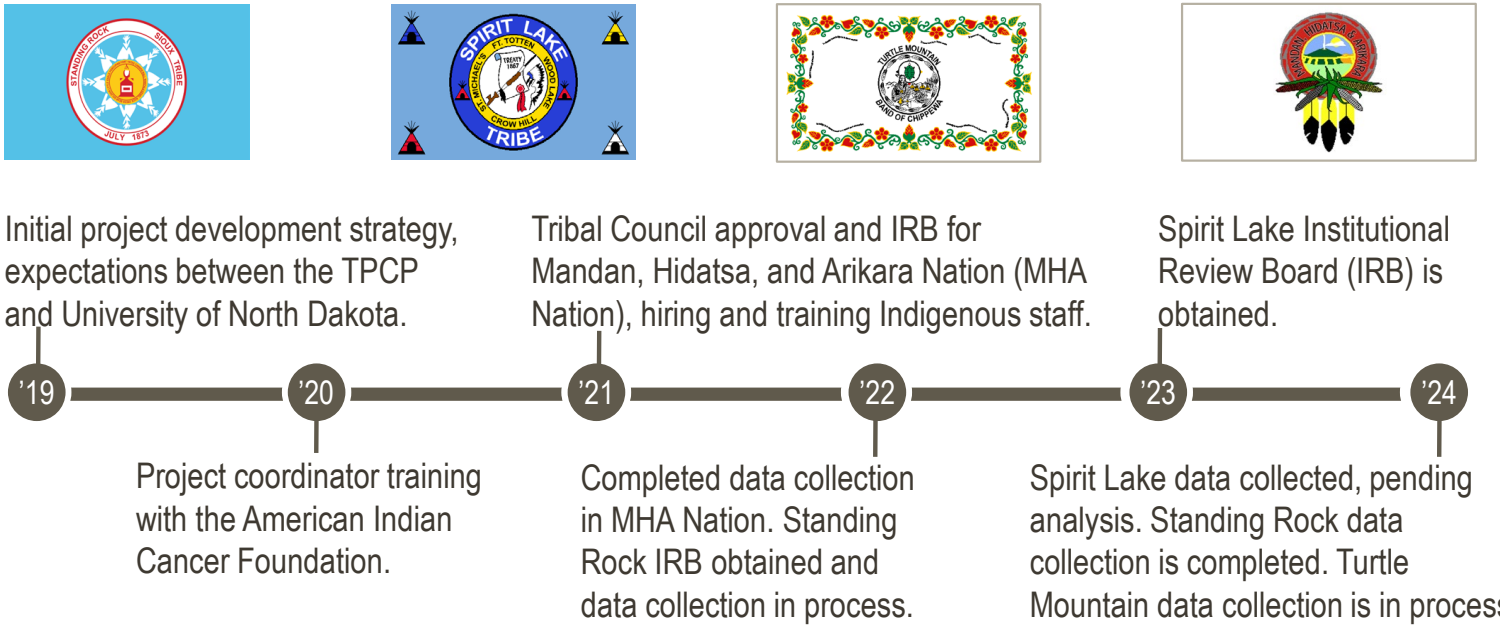
TOBACCO'S ROLE IN SUBSTANCE USE AND MENTAL HEALTH

North Dakota adult tobacco use sharply increases with additional ACEs, more so than with cannabis or alcohol

ND BRFSS, 2022

Data on the relationship between ACEs and substance use informs TPCP program priorities

The use of commercial tobacco and new nicotine products, such as nicotine pouches produced by the tobacco industry, disproportionately impacts individuals experiencing behavioral health conditions nationally and within North Dakota. To help address this issue, the TPCP focuses on those living with a behavioral health condition as a priority population in their tobacco prevention and control work.



The Centers for Disease Control and Prevention (CDC) describes a behavioral health condition as a "mental health or substance use disorder." To inform programmatic priorities, in 2023 Professional Data Analysts (PDA) conducted interviews with nine Tobacco Treatment Specialists (TTS) who work at two Human Service Centers (HSC), North Central and Badlands, and two Federally Qualified Health Centers (FQHC), Coal County Community Health Center and Family HealthCare. The findings indicated patients valued TTS counseling:

> *We also have to be sensitive to people with post-traumatic stress disorder because if you're telling them 'You can't do this, this, this…' …They were told that their whole life. That's going to trigger them and make them not trust you. But if you take the time to hear them out and have the patience to understand their situation, they're more apt to open up to you."*
>
> —HSC TTS

BUILDING DATA SOVEREIGNTY AND CULTURAL CAPACITY

The Native American Adult Tobacco Survey (NA-ATS) is a critical, partnership-based effort. Over the past five years, not only has data been collected with nearly all the tribal nations, the very process of collecting the data has spurred discussions about commercial tobacco use within these communities.

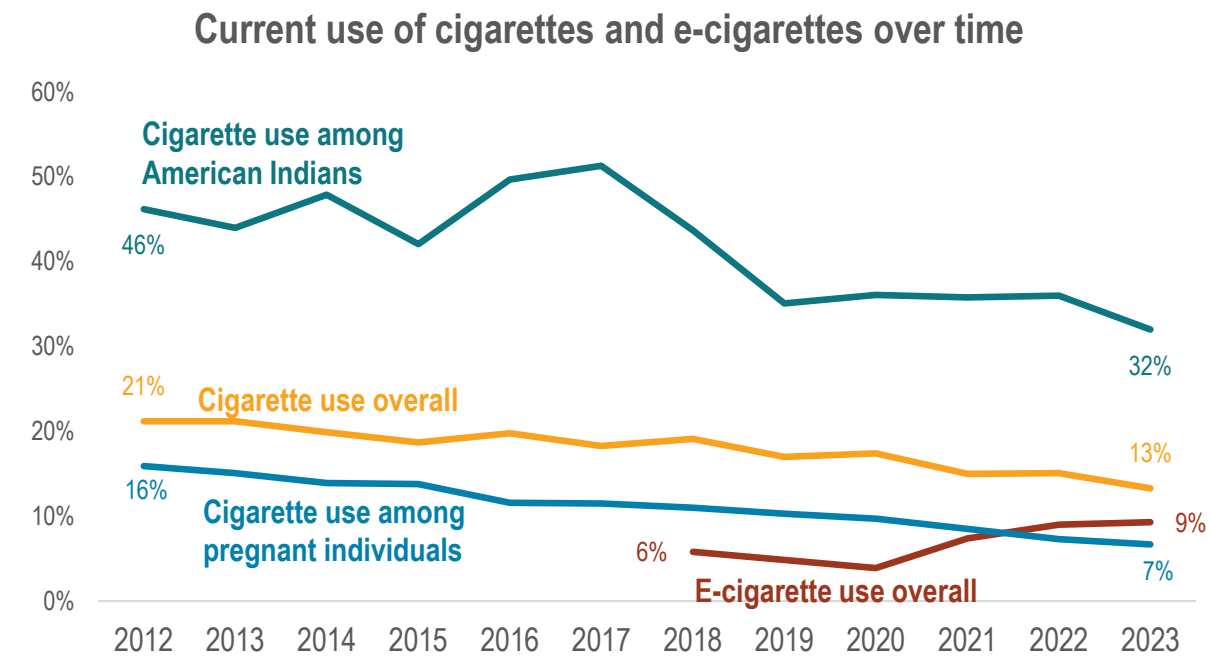
One tribal nation with summarized data found that more than 65% of participants report using Sacred Tobacco within the context of ceremony, prayer, or other traditional practices. About half of Sacred Tobacco use was sourced from a commercial tobacco vendor.

> *I noticed getting the data from the surveys that a lot of people **didn't realize that tobacco is just as bad [as other substance use issues]**. It is something that I've noticed – there isn't that much information getting out to those on the reservation. And the information that is getting out, they're not really interested in sitting there and reading about it.*
>
> *I noticed that during the NA-ATS interviews they were asking me questions about tobacco, and now I'm able to give them a lot more information. And it's not like you're reading from a pamphlet, I'm just kind of like, 'Hey, here's some facts about this or that. If you allow me, I'll be more than glad to share that with you.' And they're like, 'oh, okay, yeah, go ahead.' And so, then I'll tell them. A lot of them are just like, 'wow, I didn't know that.'*
>
> —Tribal Commercial Tobacco Champion

Nicotine dependence treatment in North Dakota

Continuous Improvement and Innovation

Data-Centered Decisions



Incorporating cessation strategies into all commercial tobacco prevention and control efforts can help advance and support smoking cessation for all population groups. Tobacco dependence is a chronic, relapsing condition driven by nicotine addiction, and quitting can be difficult. [3]

2

[3] VanFrank B, Malarcher A, Cornelius ME, Schecter A, Jamal A, Tynan M. Adult Smoking Cessation — United States, 2022. MMWR Morb Mortal Wkly Rep 2024;73:633–641. DOI: http://dx.doi.org/10.15585/mmwr.mm7329a1

ADULT CIGARETTE USE IS TRENDING DOWN, WHILE VAPING IS INCREASING

Over the past decade, there has been a statistically significant reduction in adult cigarette smoking in North Dakota; trending increases in current adult use of electronic vaping products is of concern.

North Dakota BRFSS, 2012 – 2023

> *With all the stuff in my life going on, I started to get into bad anxiety and depression, and it makes it way harder to quit. I am seeing a doctor for it.*
>
> —NDQuits participant

Chronic disease and behavioral health

Commercial tobacco use has been shown to adversely affect both the physical and mental health of users, and there is substantial evidence highlighting the dangers of secondhand smoke for non-smokers. Smoking damages nearly every organ in the body,[4] and there is emerging evidence of the harmful effects of vaping, including the emissions from vaping products.

Two populations of interest in the state are American Indians and pregnant individuals.

[4] NIDA. 2021, What are the physical health consequences of tobacco use?

NORTH DAKOTA OFFERS MULTIPLE TREATMENT PROGRAMS TO "QUIT YOUR WAY"

Healthy People 2030 is the fifth version of a national public health set of priorities and objectives, which includes four nicotine dependence treatment objectives listed to the right. These objectives align well with the multi-decade effort in North Dakota to provide evidence-based treatment. This endeavor includes program availability, increasing treatment coverage through North Dakota Medicaid coverage, supporting health systems change to increase clinician engagement, and using data to inform programmatic decisions.

Addressing successful nicotine treatment is the transtheoretical model of behavior change. This model has been a widely used approach for moving individuals seeking treatment for nicotine addiction through the five stages of change as they move to prepare and take action to treat nicotine dependence. Use of Motivational Interviewing, a person-centered communication approach, helps meet people where they are and works within an individual's ambivalence to change. One of the tribal partners shared:

> *We did a little bit of motivational interviewing during the TTS training, but I went further and did a whole training. I went to Fargo, and they had a two-day training on motivational interviewing. That way when I talk to people, I can kind of pull them in without them feeling like I'm forcing them to talk.*

Healthy People 2030

1. Increase quit attempts
2. Increase successful quit attempts
3. Increase health care provider advice to quit
4. Increase treatment use

NDQuits

Resources are available through NDQuits to any North Dakotan ready to quit all tobacco products, including cigarettes, vapes, smokeless tobacco, and nicotine pouches.

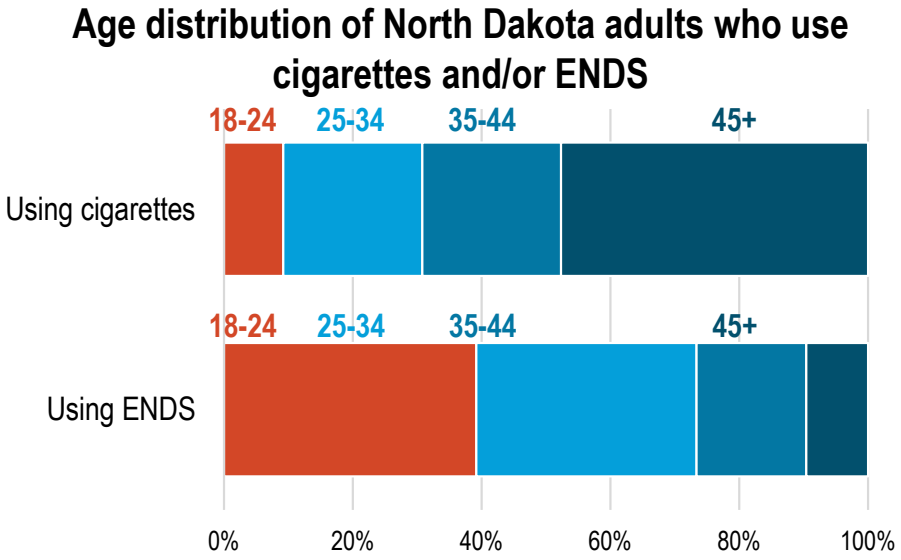
TTS trainings

Beginning in 2018, the TPCP has provided 12 in-state Mayo Tobacco Treatment Specialist (TTS) trainings, adding nearly 400 TTS. TTS are key to in-person or local treatment access.

Clinical initiatives

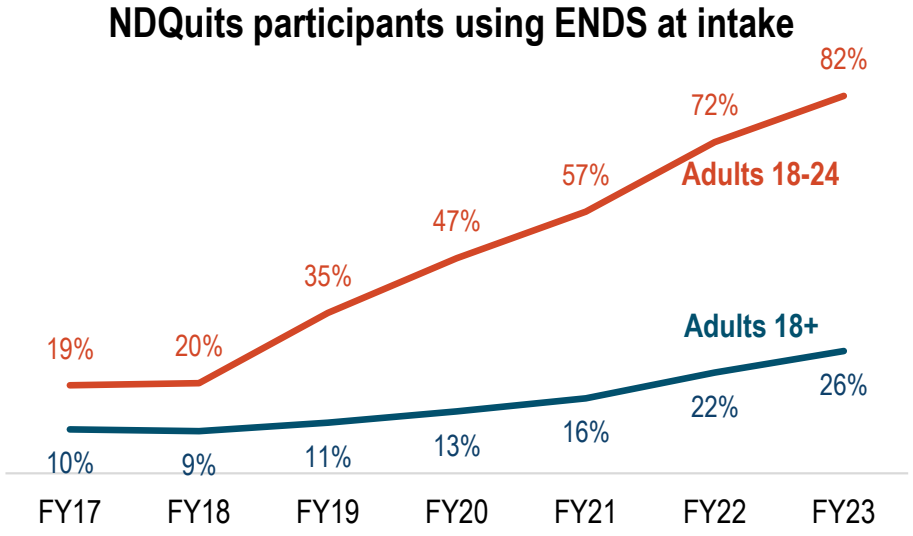
Over a decade of building the NDQuits Cessation Grant Program has laid the groundwork for expanded tobacco use treatment, particularly in behavioral health and pharmacy locations.

Local support is key



Local Public Health Units provide in-person treatment and/or support partners to build treatment support in the community.

NDQUITS PROVIDES TREATMENT AMONG CHANGING PRODUCT USE

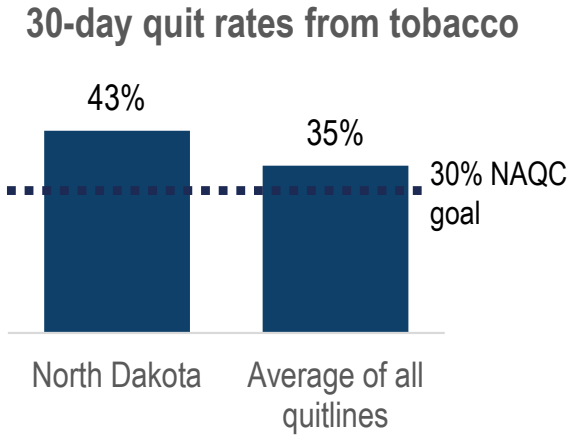


Nearly 2,000 unique North Dakotans called or went online to NDQuits annually during the 2021-2023 biennium. The quitline is cost-effective – **for every $1 spent on NDQuits, North Dakota saves $2.52 - $2.90** under the current tax rate ($0.44 per pack) by factoring in savings from tobacco cessation, such as decreased health care expenses and increased productivity. The landscape of tobacco control and available nicotine products on the market has been rapidly changing since 2017. Subsequently, the trend data for NDQuits enrollment patterns have been shifting since 2020, including the use of ENDS or vape products.

North Dakota adults who use ENDS are much younger than those who use cigarettes. Almost 80% of North Dakota adults who use ENDS are under age 35, compared to less than 30% of those who use cigarettes.

Since 2017, the percentage of young adults who enroll in NDQuits and report using ENDS has nearly tripled. NDQuits is an evidence-based cessation support for ENDS use with counseling and/or nicotine replacement therapy (NRT).

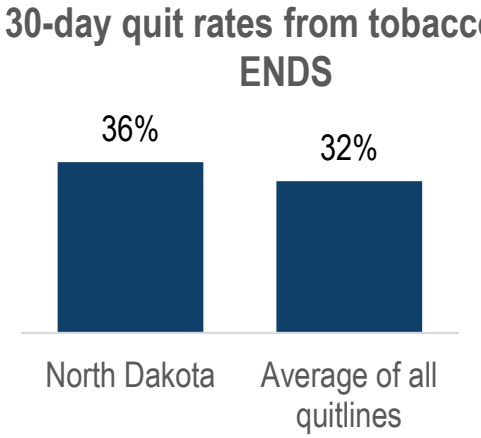
ND BRFSS, 2023



NDQuits enrollment data

NDQUITS PROVIDES EFFECTIVE SUPPORT, ACROSS PRODUCT TYPES

One measure of success is to evaluate the percentage of individuals who have quit all tobacco products seven months after enrolling. NDQuits has three 30-day quit rates to account for tobacco type(s) at registration. The quit rates for NDQuits exceed the national average and the benchmarks set by the National Quitline Consortium (NAQC).



Individuals using cigarettes, cigars, and chew

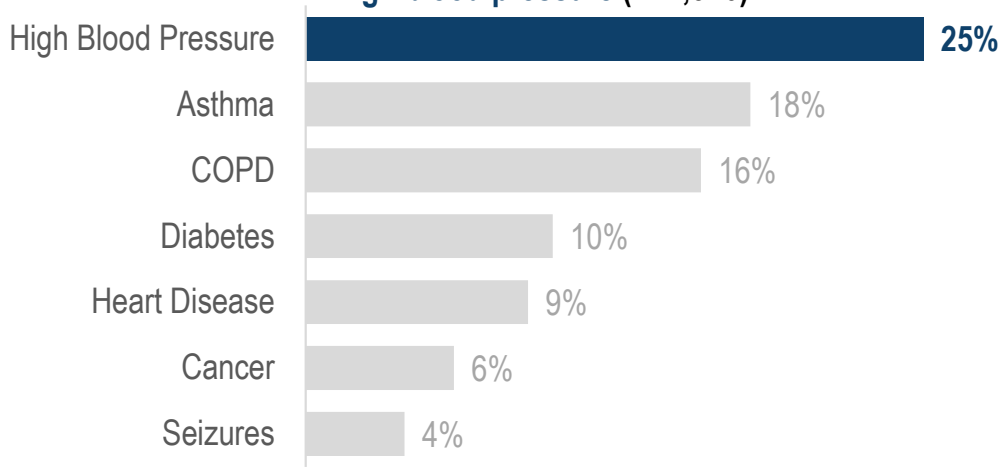
NDQuits performed above the NAQC goal and the national average for 30-day quit rates.

Individuals using ENDS and cigarettes, cigars, and/or chew

NDQuits performed above the national average for 30-day quit rates that include ENDS.

Individuals who are exclusively using ENDS

Between February 2020 and December 2023, there were 104 North Dakotans who registered for NDQuits that only used ENDS. At 7-months after enrolling, the quit rate was:



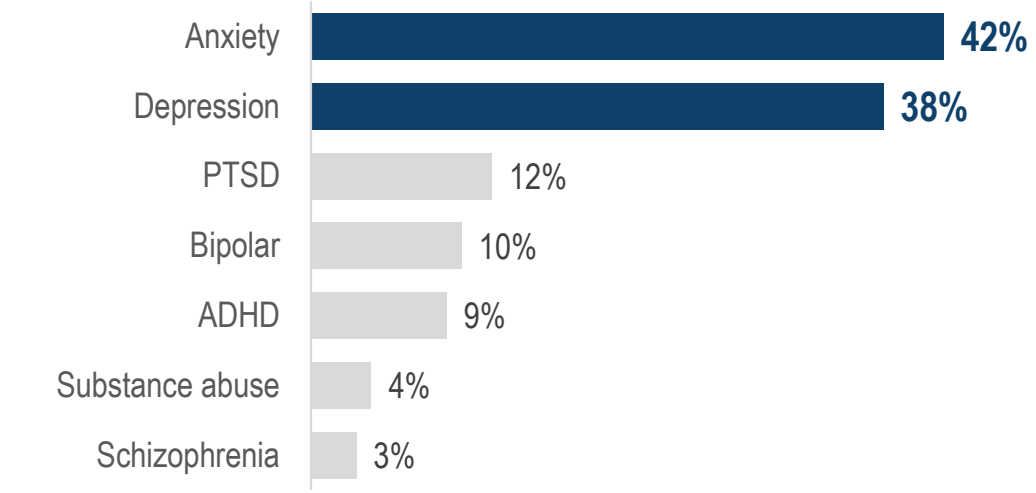
39.6%

> *The information NDQuits provides on the website about the negative impacts of vaping was really helpful. I have been using vaping as a method to help quit smoking cigarettes but did not realize how damaging and addictive the vaping products are. Though I am still smoking cigarettes, I feel the program prevented me from developing another harmful habit, and I am very grateful.*
>
> —NDQuits participant

> *[The quitline was a] wonderful aide in being able to say I've not even had one puff since August 20, 2023. Thank you NDQuits!!*
>
> —NDQuits participant

NDQUITS SERVES INDIVIDUALS LIVING WITH CHRONIC CONDITIONS AND/OR BEHAVIORAL HEALTH CHALLENGES

One in four individuals who used NDQuits and had a chronic disease reported having high blood pressure (n=2,346).



NDQuits enrollment data, 2020 - 2024

Between 2020 and 2024, a total of 9,427 North Dakotans used NDQuits. **Over half (51%) reported at least one chronic disease.**

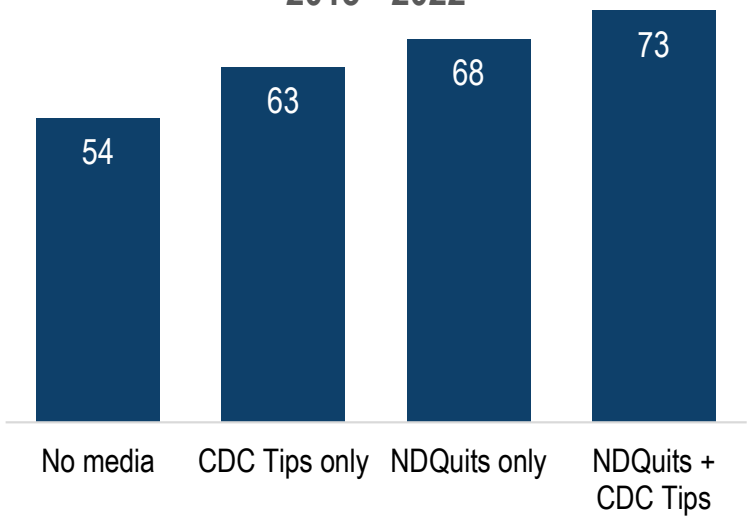
There were 13% who reported two chronic diseases and 10% reported three or more. Those with Medicare were more likely to report high blood pressure (47%) as compared to Medicaid (27%) or private insurance (23%).

Anxiety and Depression were the most frequently reported mental health conditions reported among NDQuits registrants (n=3,792; n=3,443)

NDQuits enrollment data, 2020 - 2024

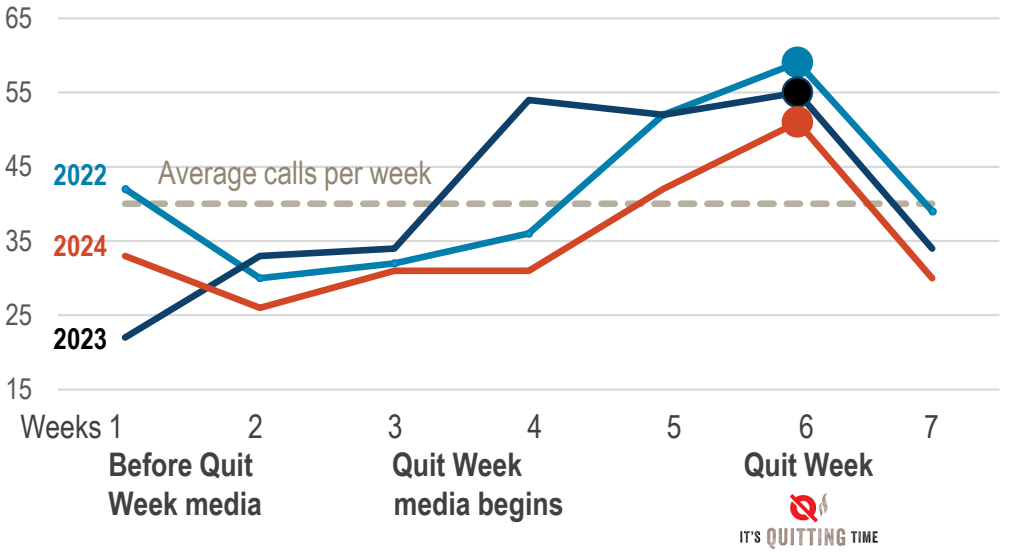
Between 2020 and 2024 a total of 9,427 North Dakotans used NDQuits. **Over half (53%) reported at least one behavioral health condition**.

Young adults reported anxiety at a higher percentage (58%) than those aged 25-54 (43%) or 65 or older (24%). Individuals reporting anxiety were vaping at a high percentage when they enrolled in NDQuits (54%).



EFFECTIVE USE OF MEDIA TO SHARE NDQUITS RESOURCES

Health communications – broadcast, cable, digital, social, and earned media – is an essential and evidence-based component of helping people quit tobacco.



PDA examined the relationship between health communications and calls to NDQuits from July 2013 – December 2022. **When NDQuits television ads are running, there is an average of 14 more calls per week** than when no television ads are running. There are an **average of 19 more calls per week when both NDQuits and CDC Tips ads run**. Media, particularly television, remains essential to driving North Dakotans to NDQuits.

Quit Week is a coordinated media campaign that educates on cessation resources available to North Dakotans and encourages those that use tobacco to make a quit attempt. Messages are coordinated and shared via social media (Instagram, Facebook, Snapchat, YouTube), broadcast TV, radio, digital media, billboards, newspapers, and earned media. From 2020 to 2024, the "It's Quitting Time" brand was established, and engagement per post has improved. **Annually, for the past five years, the number of calls to NDQuits has peaked during Quit Week.**

Average number of calls to NDQuits per week, 2013 - 2022

Number of calls to NDQuits before and during the Quit Week campaign – Quit Week has consistently high calls to NDQuits.

TOBACCO TREATMENT SPECIALIST (TTS) TRAININGS AND ONGOING EDUCATION WITH MAYO CLINIC

TTS trainings

The TPCP began collaborating with the Mayo Nicotine Dependence Center to offer in-state education in North Dakota to facilitate clinician education and increase local access to treatment. Since 2018, nearly 400 TTS have been trained, including over 70 people completing the training in 2024.

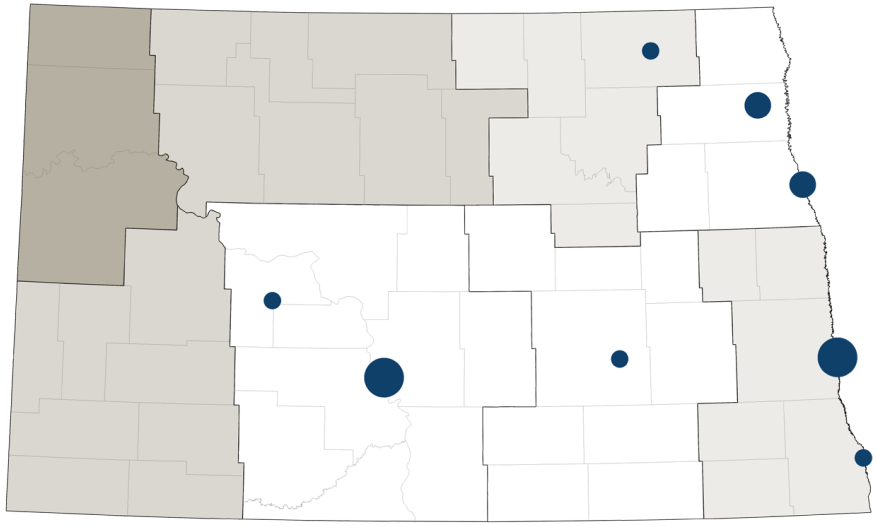
A TTS training is approximately 35 hours of learning. The content includes the neurobiology of nicotine dependence, health benefits of quitting, recommendations and dosing for cessation medications, and motivational interviewing, which is an evidence-based counseling approach to help patients adhere to treatment recommendations.

Mayo staff facilitates a Motivational Interviewing exercise with a TTS participant.

Motivational Interviewing Workshop

The first in-person Advanced Motivational Interviewing Workshop occurred in May 2024. Thirty-two TTS attended the new two-day training by the Mayo Nicotine Dependence Center. The workshop provided education through staff and attendee interaction to enhance communication skills, which are essential in collaborative conversations between a patient and clinician to assist behavioral change.

Motivational Interviewing Workshop



> *I will be more comfortable evoking for change talk and their own motivation and plan to quit tobacco after this training!*
>
> —Motivational Interviewing Workshop participant

NDQUITS BUILDS ON CAPACITY WITHIN THE STATE

North Dakota-specific grantees and counselors provide evidence-based cessation support across the state.

The NDQuits Cessation (NDQC) Grant Program is available throughout the state. The 18 NDQC grantees and other TPCP-funded grantees effectively refer tobacco users to NDQuits. The prevalence of tobacco use varies across the state, with a higher prevalence in the northwest. Of the 796 referrals to NDQuits in fiscal year 2024, **91%** were from TPCP-funded grantees.

Prevalence of tobacco use by Human Service Region, overlaid with NDQC grantee locations.

Tobacco use by region:

○ 20-21% ○ 23% - 24% ○ 26% ○ 40%

ND BRFSS, 2023

Note: Larger dots indicate multiple grantees.

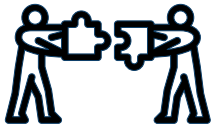
The NDQC grantees also address ENDS use and vaping, which includes:

- Asking patients if they vape.
- Providing tobacco treatment (counseling, NRT) to those who only vape.
- Treating patients who vape and use combustible tobacco products (dual use).

Nicotine Dependence Conferences (NDC)

The TPCP has supported these conferences since 2016. The NDQC grantees plan the content for the two annual in-state NDCs, which include patient interventions, priority populations, and other relevant or emerging topics. Nearly 100 attendees participated in each conference in 2023 and 2024, indicating high interest and engagement around these topics.

> *This [conference] does help with my job performance on giving education and learning the right way to have the discussion on tobacco, vaping, and quitting.*
>
> —2024 NDC attendee



Expanding access to nicotine dependence treatment

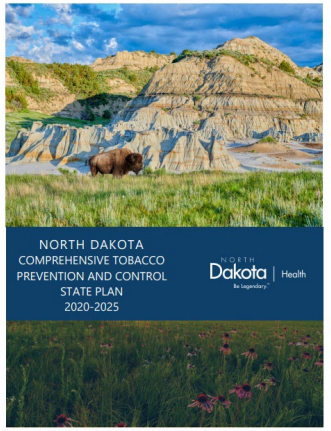
Continuous Improvement and Innovation

Transparent and Open Communication

Engaged Collaboration

Quitting success is increased by health care provider intervention and by use of behavioral counseling and Food and Drug Administration - approved medications, particularly when these treatments are used together.[3]

3



[3] VanFrank B, Malarcher A, Cornelius ME, Schecter A, Jamal A, Tynan M. Adult Smoking Cessation — United States, 2022. MMWR Morb Mortal Wkly Rep 2024;73:633–641. DOI: http://dx.doi.org/10.15585/mmwr.mm7329a1

NORTH DAKOTA HAS BEEN BUILDING ON ESTABLISHED TREATMENT PROGRAMS TO EXPAND ACCESS

As the tobacco product landscape continues to shift, the TPCP has engaged with partners, grounded in the data and evidence base of nicotine dependence treatment, to expand programming to reach specific North Dakotans collaboratively. In the North Dakota Comprehensive Tobacco Prevention and Control State Plan, 2020 – 2025, it is noted that tobacco initiation and use disparately affect subgroups of North Dakotans at higher rates.

The TPCP seeks to address the inequity of tobacco use in the following population groups in North Dakota:

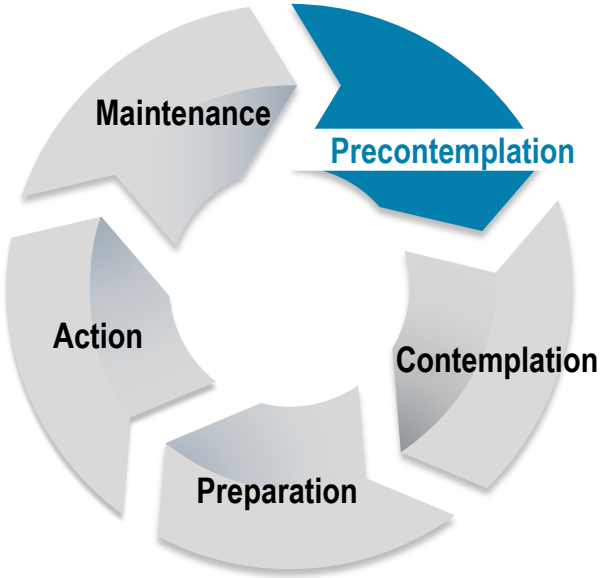
- Youth and young adults
- Individuals with mental health and substance use disorders (Behavioral Health)
- Individuals with low socioeconomic status (Low SES)
- American Indians (AI)
- Pregnant tobacco users

The North Dakota Comprehensive Tobacco Prevention and Control State Plan, 2020 – 2025

> *I don't know that all administrators and teachers know how addictive this stuff is…how addicted a lot of our kids are…They don't realize what kids are going through and how much of a struggle it is.*
>
> —Beulah High School Principal

MEETING THE CHALLENGE OF ADDRESSING VAPING AND NICOTINE ADDICTION WITH YOUTH

A multi-method, comprehensive evaluation of youth nicotine treatment in North Dakota found that while existing treatment options were available for youth ready to take action, additional efforts are needed to support those who are not yet prepared to address their addiction.



In the North Dakota case study, review of existing nicotine dependence treatment work was reviewed, and three cases were selected for a comparative, deep investigation into the work in three counties:

- Mercer County
- Ransom County
- Burleigh County

A cross-site result is that those involved in treatment efforts cited youth, parents, or school staff beliefs about vaping as a barrier to successful treatment. Many youth do not understand that vaping is harmful. Parents and older siblings often vape themselves and, in some cases, engage in vaping with youth as a bonding activity. There is also still a misunderstanding among school staff that simply taking away a vape will lead to quitting – more support to quit is needed.

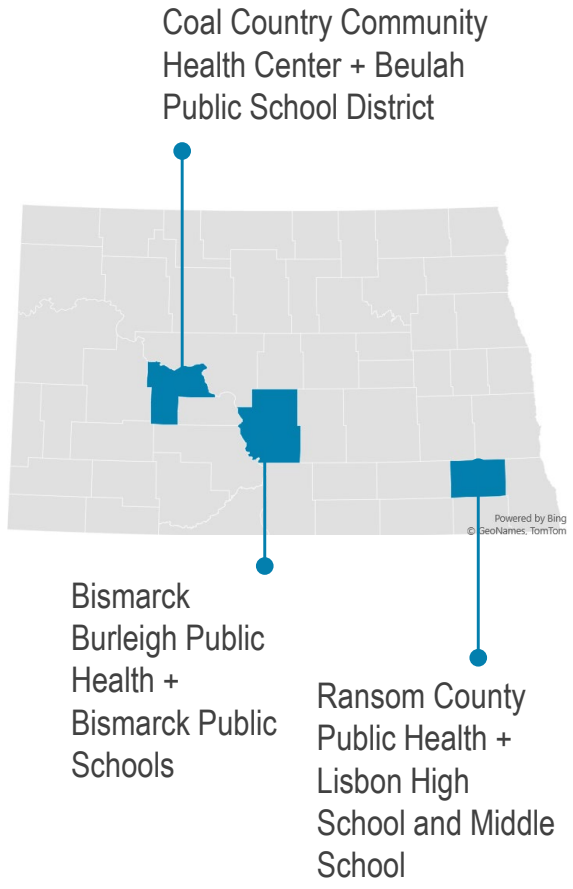
> *People skip class to vape and don't realize that they are hurting themselves.*
>
> —Lisbon High School Student

In published literature, there is evidence that around **half of youth using e-cigarettes are in the pre-contemplation stage**, meaning the individual is not yet acknowledging that there is a problem behavior that would benefit from change. The evaluation of North Dakota youth treatment also found that many youth using tobacco products are at the pre-contemplation stage.

BUILDING CAPACITY WITHIN SCHOOLS TO REACH YOUTH

Community partners in three counties have built treatment for youth based on strong relationships, building resources within the school setting, and partnerships between organizations.

Mercer County



The Coal Country IMPACT School Nurse, a TTS, dedicates half the day at Beulah High School, and one of her responsibilities is delivering nicotine dependence treatment to students. If a student is found vaping, the student receives the option of a three-day, out-of-school suspension or to attend four youth nicotine dependence treatment classes, using the INDEPTH Program. Students are also referred to the NDQuits program for teens, My Life My Quit.

Ransom County

The Tobacco Prevention Coordinator from Ransom County Public Health works on-site at Lisbon Middle and High Schools to deliver both prevention and treatment programming using the INDEPTH Program. Students found vaping may accept either a three-day, in-school suspension as a disciplinary action or they may opt to attend four INDEPTH sessions to treat their nicotine addiction. Students are also referred to the NDQuits program for teens.

Burleigh County

The treatment program offered through schools using TTS-trained nurses within the schools is the most widespread treatment option. In addition, Bismarck Burleigh Public Health continues to provide the same treatment program at its clinic site. If a student is found vaping, they can avoid a citation by attending the treatment program. The student will be put on in-school suspension and will visit the School Resource Officer before meeting with the school nurse.

FACILITATORS AND BARRIERS TO YOUTH TREATMENT

Facilitators

Involved in the community. Successful TTS providers tended to be well-known in their communities (whether it be their small-town community, their school community, or both). One TTS had a child who went to the same school and was a same-aged peer to many of the students she interacted with. Another TTS mentioned that it benefited her in building trust with students when they saw her attending school or community events.

Dedicated space and/or time. It is essential to have protected time for the TTS to reach both students, as well as clear ways for other adults in the school to communicate with the TTS. In Burleigh County, Public Health emphasized the importance of having prearranged and reoccurring gatherings where these partners come together to coordinate efforts.

> *The tenacity [of the TTS] is what made this program stick.*
>
> —Lisbon School Principal

Barriers

Additional guidance on medication for youth under 18 is needed. Guidance from the American Academy of Pediatrics (AAP) supports prescribing youth nicotine medications in some cases. This prescribing guidance is not in place in the organizations in the three youth case study communities. To implement the AAP guidance the TPCP and partners will need to address the following: (1) identification of when prescribing nicotine replacement therapy to youth is appropriate, and (2) identification of the education and support providers (or health care systems) need.

Beliefs and attitudes. Many students, parents, and school staff do not understand how difficult it is to quit, especially e-cigarettes, which can contain higher levels of nicotine delivered to the body. Further, many of the kids who are found vaping have parents who are vaping or smoking; in some cases, students are getting these products from their parents. Generally, having these products around makes it more accessible to their kids. All sites reported that too many parents lack knowledge of the consequences of vaping and that with these cases, there is often a disconnect between what is acceptable at home versus school.

UNDERSTANDING HOW TO EXPAND TTS IN BEHAVIORAL HEALTH SETTINGS

The use of commercial tobacco and alternative nicotine products disproportionately impacts individuals living with behavioral health conditions nationally and within North Dakota. To help address this, the TPCP focuses on this group as a priority population in their tobacco prevention and control work. The CDC describes a behavioral health condition as a "mental health or substance use disorder."

In 2023, the external evaluator, PDA, interviewed nine TTS who work at two Human Service Centers, North Central and Badlands, and two Federally Qualified Health Centers, Coal County Community Health Center and Family HealthCare. The purpose of this evaluation was to explore the needs, supports, successes, and barriers to providing and accessing tobacco and nicotine dependence treatment for individuals experiencing behavioral health conditions. PDA analyzed qualitative data systematically to reveal key themes and patterns.

Overall key findings included:

- **Use of Motivational Interviewing and strength-based messaging was an essential skill.**
- **Incorporation of follow-up with continued support to help prevent and address relapse was critical, though it was implemented differently across sites.**
- **All sites and TTS empowered patients to return for subsequent treatment and recovery interventions.**

Supporting patients living with behavioral health conditions

A key finding from the interviews was that patients experiencing mental health conditions and substance use disorders often need more intensive, individualized support to recover from tobacco use disorder. A TTS fosters support through intentional relationship-building, empathy, compassion, trust, and a sense of safety.

> *I've had countless patients tell me that **the TTS saved their life.***
>
> *I called three patients in a row one day. They had been completely quit for at least a month - and that never happens.*
>
> *I have never had that many people in a day say, 'I don't know what I would've done without you.' They've been smoking for over a decade, said 'thank you so much. I appreciate it so much. I'm feeling really good. I'm feeling like even if anything happens, I can take this on.'*
>
> —Family HealthCare TTS

EXPANDING TTS IN BEHAVIORAL HEALTH SETTINGS: SCREENING AND CONNECTING TO TTS AND REFERRALS

TTS are well positioned to provide counseling and NRT, in some cases, that meet the tobacco and nicotine dependence treatment and recovery needs of patients living with behavioral health issues. Counseling and brief interventions that incorporate motivational interviewing, strengths-based messaging, and education can be effective for patients living with behavioral health conditions despite the many challenges they face.

Screening for tobacco use was the first step in patients receiving tobacco and nicotine treatment and support.

- Badlands Human Service Center uses an **integrated assessment** for all patients, including tobacco use questions at intake. Information is accessed and used to inform TTS services for each patient.
- Coal Country Community Health Center (CCCHC) staff learned about **features in the Epic electronic health record (EHR) system** that provide flow sheets and questions to ask patients to help with the screening and documentation process. The system flags patients when they have a change in tobacco status. Altru shared this EHR option at a past TPCP Quarterly Partners Meeting.

TTS services are adaptable to different settings and contexts. Having TTS in various clinic and non-clinic settings, including pharmacies, affiliate hospitals, residential care facilities, and schools, can help improve patient reach. TTS, located in retail pharmacies, is especially well-positioned to engage with patients when they pick up NRT.

- Family HealthCare connects patients with TTS by having **pharmacists** present when patients pick up their cessation medications. This interaction allows for a brief conversation with a TTS without making an appointment.
- At CCCHC, having a **TTS respiratory therapist** at the affiliate critical access hospital was beneficial when transitioning patients from an inpatient to an outpatient setting and vice versa.
- At North Central Human Service Center, patients receiving addiction treatment in the **residential facility** are easier to reach for in-person sessions with a TTS and maintain regular follow-up. In-person sessions held 2-3 times a week are more helpful than only once a week.
- At CCCHC, a **TTS school nurse** with the IMPACT program provides brief counseling and education to youth who are vaping in school instead of three days of suspension.

REMOVING BARRIERS FOR ACCESSING MEDICAID TOBACCO TREATMENT

North Dakota is a national leader in coverage of tobacco treatment through Medicaid coverage and was part of a national webinar hosted by the American Lung Association in 2024.

North Dakota is a national leader in reducing barriers to Medicaid coverage for evidence-based tobacco treatment, including counseling and FDA-approved nicotine cessation medication. North Dakota Medicaid's coverage includes:

- Nicotine patch (7mg, 14mg, 21mg)
- Nicotine gum (2mg and 4mg)
- Nicotine lozenge (2mg and 4mg)
- Nicotine nasal spray
- Bupropion
- Varenicline

All medications are included for North Dakota Medicaid recipients, and various providers, including pharmacists, can provide medication or counseling. North Dakota was invited to share its benefit with a national audience during a 2024 American Lung Association-sponsored webinar highlighting two states that provided this **tobacco treatment benefit coverage for all individuals, with no age limit**. A forthcoming brief will be published in 2025.

A 2024 Morbidity and Mortality Weekly Report (MMWR),[5] compared state Medicaid coverage for treatment and barriers. Areas for future work to remove barriers for treatment:

- Remove the annual limit on quit attempts
- Remove limits on duration
- Stepped care therapy

> *North Dakota Medicaid coverage has helped expand treatment access. We continue to observe primary nonadherence with patients not picking up prescriptions from the pharmacy when prescribed from the clinic side, so providing nicotine replacement therapy continues to remain of utmost importance for our patients. With the expansion of cessation services in Family HealthCare pharmacy, this has also proved to be a valuable patient access improvement, and coverage helps patients to get their medications on the spot.*
>
> —Brody Maack, Family HealthCare, Fargo

[5] DiGiulio A, Tynan MA, Schecter A, Williams KS, VanFrank B. State Medicaid Coverage for Tobacco Cessation Treatments and Barriers to Accessing Treatments — United States, 2018–2022. MMWR Morb Mortal Wkly Rep 2024;73:301–306. DOI: https://www.cdc.gov/mmwr/volumes/73/wr/mm7314a2.htm

EXPANDING TRIBAL CAPACITY

In 2019, the TPCP shifted strategies from grant giving to partnership-based collaboration with the five tribal nations.

In the TPCP's 2022 Strategic Plan, they identified the goal of having a “functioning health-focused coalition in each Tribal Nation in North Dakota." These coalitions would "assist in carrying out tobacco initiatives in tribal communities." This plan included action items, including further development of the coalition training mentioned prior. It also included a recruitment strategy, funding programming, and regular check-ins with key partners.

In 2023, tribal tobacco coalition-building continued as quarterly Tribal Tobacco Coalition Meetings were conducted. In June 2023, Tobacco Free North Dakota (TFND) hosted a TFND-certified trainer program through the United Tribes Technical College, with participants from the Turtle Mountain Band of Chippewa Indians (TMBCI), Spirit Lake, and Mandan, Hidatsa, Arikara Tribal Nation.

Tribal coalition meetings/trainings were held in January and April 2024,and meetings are planned to continue. The TPCP is currently working with Tribal Health directors to recruit new coalition members, who will include Tribal school nurses. The coalition identified ENDS use in schools as the #1 focus area.

> *Coalitions are action. You want to get action out of your members, then you need to identify those that are well vested into that public health initiative.*
>
> —Turtle Mountain Public Health Champion

2023-2024 outreach

- Shared TMBCI data regarding ENDS with Turtle Mountain Community College Public Health students and inviting students to become members of the newly formed Tobacco Prevention coalition.
- Held discussions with the TMBCI Public Health Communication Specialist identifying tribally specific educational material for vaping and tobacco use.
- Collaborated with TFND, TPCP, and TMBCI Respiratory Therapist to plan the Turtle Mountain Vaping 101 Seminar for youth in grades 6th-8th.

REACHING MATERNAL HEALTH POPULATION USING TOBACCO

North Dakota-specific approach to increase treatment access

North Dakota was one of the earliest states to adopt a program specifically for pregnant and postpartum individuals to treat nicotine dependence. North Dakota partnered with BABY & ME – Tobacco Free Program from 2011 to 2021.

The data from BABY & ME – Tobacco Free Program in North Dakota had some strong overall outcomes in significantly improving birth outcomes such as gestational age and birth weight. However, program implementation varied across sites and had high costs. TPCP developed a state-specific program, Maternal Tobacco Program, which was integrated into the existing NDQuits Cessation (NDQC) Program.

The TPCP continued to monitor the program-level and overall data. Due to continued high cost and overall quit rates that were similar to individuals quitting on their own, the TPCP ended the Maternal Tobacco Program in June 2024. NDQC grantees continue to receive funding to support tobacco and nicotine dependence treatment for all patients. Furthermore, pregnant individuals have access to a special treatment protocol within the NDQuits program.

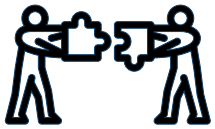
Examples of building processes within clinics to reach maternal health patients

Sanford Southpointe in Fargo is expanding its treatment services from focusing solely on pregnant and postpartum patients to **all patients at its OBGYN clinics**. They recently trained two new TTS at a local TTS training.

Additionally, changes to the medical record include:

- reactivating the referral for TTS consult and treatment and a messaging system to connect with patients
- adding a passive smoke exposure measurement tool
- creating new smart phrases and electronic messaging tools for electronic communication related to tobacco cessation

> *We support women across the lifespan who use tobacco products by providing counseling, education, and engagement on an individualized basis in their cessation journey.*
>
> —Sanford Southpointe TTS



Innovative collaborations to reach youth and other populations

Continuous Improvement and Innovation

Transparent and Open Communication

Engaged Collaboration

Increasing and ensuring awareness of and access to tobacco cessation services, including counseling and medication, is important to maximizing the impact of commercial tobacco control policies…[this] can help advance and support smoking cessation for all population groups and has potential to reduce tobacco-related health disparities. [3]

4

[3] VanFrank B, Malarcher A, Cornelius ME, Schecter A, Jamal A, Tynan M. Adult Smoking Cessation — United States, 2022. MMWR Morb Mortal Wkly Rep 2024;73:633–641. DOI: http://dx.doi.org/10.15585/mmwr.mm7329a1

BUILDING CAPACITY TO SUSTAINABLY AND ACCURATELY MONITOR EFFECTIVENESS OF EXPANDED TREATMENT

Much progress in expansion of nicotine dependence treatment has occurred over the biennium. Initial outcomes and systems for tracking the effectiveness of this expansion are detailed in this section.

The measurement of the success of these efforts takes a **systems approach**, given the interconnected and interrelated programs and organizations at the national, state, and local levels working to reduce disease, disability, and death related to tobacco use. The impact of TPCP's work is measured by long-term outcomes in reduced tobacco product initiation and use (see Section 1). In addition, changes in the program pathways (scale, quality, and comprehensiveness of programs) are needed to improve the alignment and responsiveness between populations of focus and linkages to programs and policies.

Population of focus	Systems outcomes
Youth and young adults	Changing norms
Behavioral health	Reducing barriers to treatment
Low income	Increasing access to treatment
American Indian	Meeting people where they are using Motivational Interviewing and treating based on stage of change and readiness to quit
Pregnant	

CHANGING NORMS AROUND VAPING

The evolving tobacco product landscape, misinformation about nicotine in e-cigarettes, and intertwined behavioral health concerns present a complex challenge.

Vaping education

A significant barrier is that **many students, parents, and school staff do not understand how difficult it is to quit**, especially e-cigarettes, which can contain higher levels of nicotine delivered to the body.

> *I think too many people start using it too young. This causes addiction early and throughout their lives.*
>
> —Enderlin HS Student

> *The dopamine hit makes those feelings go away. And it feels better…until it doesn't. Then those feelings come back even stronger.*
>
> —Nurse Coordinator, Bismarck

Changing landscape

Schools and clinics across the state report challenges in keeping up with the emerging products and devices that deliver nicotine. **Vaping is easy to conceal** – vapes might look like highlighters, inhalers, pens, and the like. A principal noted that keeping up with the emerging nicotine and vape products is a formidable challenge. Further, all sites in the youth treatment evaluation reported **finding elementary-age students in possession of vaping devices**.

Mental health

Almost all students in the youth nicotine dependence treatment program evaluation have either anxiety, depression, or both. Many students in the treatment program also have a trauma history. Further, the use of nicotine products can actually increase anxiety and exacerbate many mental health challenges.[6]

> *Most kids also have some underlying mental health concerns. They need a trusted adult. That's often us.*
>
> —Nurse Coordinator, Bismarck Public Schools

[6] Bataineh, B.S.; Wilkinson, A.V.; Sumbe, A.; Clendennen, S.L.; Chen, B.; Messiah, S.E.; Harrell, M.B. (2023). The Association Between Tobacco and Cannabis Use and the Age of Onset of Depression and Anxiety Symptoms: Among Adolescents and Young Adults, *Nicotine & Tobacco Research*, Volume 25, Issue 8, Pages 1455–1464, https://doi.org/10.1093/ntr/ntad058

BUILDING SUCCESSFUL YOUTH OUTCOMES

For young individuals who are in the early stages of change and may not yet recognize the addictiveness of tobacco products, the desired outcome is to enhance student engagement and openness by fostering a trusted relationship with a knowledgeable adult.

Ransom County Public Health and Lisbon Middle and High School

Because most students engaged in this youth vaping treatment program appear to be operating at an early stage in the process of behavior change (i.e., precontemplation), the impact of this treatment program can be more comprehensively described through examples of changes in beliefs, attitudes, and thought patterns.

School staff credit the vaping education for (1) **students realizing that vaping can be harmful** and (2) students **identifying their vape use as an addiction** rather than a form of rebellion or "being cool."

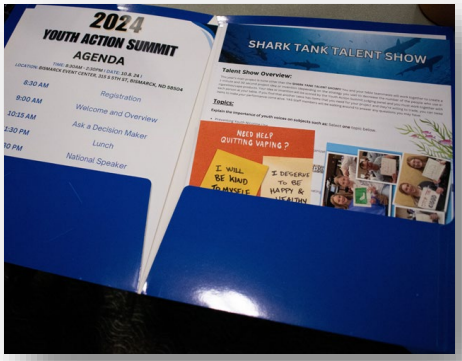
Coal Country and Beulah Public Schools

The focus of change has been on increasing the interest of students to quit nicotine products, using the IMPACT program **to get students thinking about the impact of vaping and considering quitting.**

Five students have been found vaping. When given the choice between suspension or participating in the treatment program, **all students chose to engage in treatment**.

> *Students start to open up once they realize the things they tell me are confidential, but there's still a lot of secrecy around it.*
>
> —Coal Country School Nurse

Bismarck Burleigh Public Health and Bismarck Public Schools



One way success is defined is the percentage of students who successfully quit by the end of the five treatment sessions. During the 2022-2023 school year, 111 Bismarck Public School students participated in the school treatment program. Of those participating, **20% successfully quit**.

Public Health provides education on vaping and nicotine addiction and coordinates efforts among partners. This ensures alternatives to youth purchase, use or possession laws to focus on helping youth access services rather than just penalizing youth found using these products.

YOUTH ACTION SUMMIT TO DEVELOP THE NEXT GENERATION OF LEADERS

The Break Free Youth Action Summit (YAS) has been a statewide annual event for six years. A one-day event is held in two areas of the state, and students and advisors from across the state travel to either Bismarck or Fargo to participate.

Tobacco Free North Dakota (TFND) supports for students representing schools across the state who want to travel to and attend the YAS.

> *Learning how much power us youth have to put an end to the use of nicotine and tobacco products [was valuable].*
>
> —YAS student participant

FLAVORED TOBACCO PRODUCTS

North Dakota State University (NDSU) report on menthol provides comprehensive review of evidence and available data

Menthol is a specific flavor additive common in tobacco products that tastes good and has a "cooling and painkilling effect." [7] In July 2024, a team of nursing researchers at NDSU published a report on the public health implications of menthol in tobacco products, focusing on populations within the state.[8] The TPCP funded the study.

The North Dakota Youth Tobacco Survey data showed that of the 7.3% of 9 – 12th grade youth who were current cigarette smokers in 2019, 44.1% usually smoked menthol cigarettes, 10.5% were unsure what type of cigarettes they smoked, and 45.4% did not smoke menthol cigarettes.[9]

In North Dakota, three communities have local ordinances restricting flavored tobacco products in some manner

- Cando
- Linton
- Valley City

Additionally, the mayors of Fargo, Bismarck, Grand Forks, and Minot, as members of the U.S. Conference of Mayors, supported a 2023 resolution prohibiting all flavored tobacco products, including menthol. The policy options for North Dakota with the greatest potential to reduce the public health harms from menthol tobacco products include sales prohibitions and restrictions.

Valley City residents vote to keep ban on flavored tobacco

In 2016, Valley City leaders banned the sale of flavored e-cigarettes in the city, with their appeal to youth being one of the reasons for passing this policy.

In 2023, the city commissioners discussed this policy and pressure from some retailers who wanted the city to review and reconsider the policy. The city commissioners decided to put the ban on the sale of flavored e-cigarettes to the voters during the next primary election. On June 11, 2024, the residents of Valley City voted. The results: **68% of voters wanted to keep the policy in place**, keeping the sale of flavored e-cigarettes banned in the city.

[7] Menthol cigarettes: The FDA's proposed ban and why they're more harmful. MD Anderson Cancer Center, https://www.mdanderson.org/cancerwise/menthol-cigarettes--the-food-and-drug-administration-fda-ban-and-why-they-are-more-harmful.h00-159460056.html.

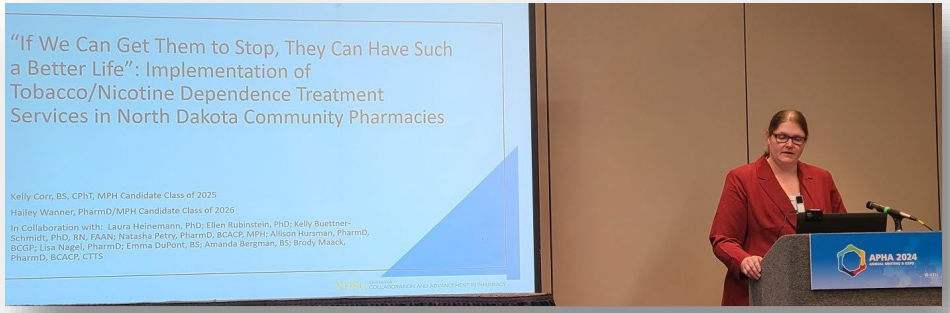
DEVELOPMENT OF PHARMACY SERVICE ENHANCEMENT PROJECT

Background

In April 2023, the multidisciplinary pharmacy service enhancement project team, led by Brody Maack, PharmD, BCACP, CTTS, started piloting an education-based intervention to assist independent community pharmacies and other ambulatory care pharmacy practices in North Dakota with addressing tobacco use and cessation in their patients based on recommendations from stakeholders such as the U.S. Public Health Service and Centers for Disease Control and Prevention.

The project includes online and in-person education on tobacco cessation and service implementation; site visits for observation and documenting; and individual semi-structured interviews with pharmacy owners/pharmacists in charge.



Poster presented by Natasha Petry, PharmD, MPH, BCACP, *Continuing to Pave the Way for Pharmacist Billing in North Dakota*

Progress to-date

The Pharmacy Service Enhancement pilot is running in six sites. It will continue through fiscal year 2025 and, depending on funding, potentially move to implementation. Baseline training modules and a website have been developed; both are resources for a broader audience.

Data metrics/outcomes have been developed and will be shared in fiscal year 2026:

- Number of patients encountered, asked, advised, referred/connected, counseled, and prescribed medications
- Pre-post questionnaire for staff completing baseline training
- Qualitative: site visits, interviews, coaching calls, observations

Presentation at the 2024 American Public Health Association Conference

EXPANDING CO-TREATMENT ACCESS IN BEHAVIORAL FACILITIES

Trauma-informed care education

From January to June 2024, TPCP and Heartview Foundation staff participated in a Trauma and Tobacco Community of Practice Project with the National Council for Mental Wellbeing to expand trauma-informed care in tobacco and nicotine dependence treatment.

Layn Sabot, Heartview Foundation staff and NDQC Grant Coordinator, utilized this project to develop an on-demand orientation training for all employees to prioritize nicotine dependence treatment. The training discusses adverse childhood experiences and trauma-informed care related to tobacco use and other substances. The education highlighted the importance of co-treatment of nicotine dependence treatment while describing how ACEs affect substance use rates. The North Dakota ACEs data was included in this training and is on page eight of this report. Addressing all substances during treatment improves long-term abstinence by 25%.[10] The TPCP plans to expand trauma-informed education to more behavioral health facilities.

Reaching behavioral health clinicians

The September 2024 Behavioral Health Conference featured two presentations by Jim Pavlik, a Senior Program and Policy Analyst at the Behavioral Health & Wellness Program at the University of Colorado.

Jim Pavlik

Mr. Pavlik described unique characteristics of nicotine. It is the first drug experience for many, develops cross-tolerance for other substances, and has rapid onset and withdrawal. High frequency of use creates cross-priming for other substances, such as opioids. Opioids and nicotine used together increase the euphoria associated with opioid use and speed up opioid clearance. Additionally, tobacco smoke affects various medications, including antipsychotics, antidepressants, and others such as insulin and warfarin.

Co-treatment includes trauma-informed approach and identifying inter-relatedness, treating the cause of the drug use. Nearly 90% of conference attendees who responded agreed the information was relevant and helpful.

INNOVATIVE COLLABORATIONS AND SUCCESSES

Tobacco and Nicotine Dependence Treatment is being integrated into many North Dakota settings by a variety of partners across the state.

NDSU tobacco-free policy passage

After seven years of efforts led by the NDSU associate director of campus well-being, NDSU passed a tobacco-free campus policy, a critical policy to protect student, staff, and faculty health and wellness on campus.

NDSU Doctor of Nursing Practice (DNP) curriculum

A recently graduated NDSU Doctor of Nursing Practice student completed her dissertation,[11] a practice improvement study on incorporating tobacco and nicotine dependence treatment education into the doctoral curriculum.

Radon outreach and research and NDQuits partnership

The University of North Dakota School of Medicine and NDQuits partnered to offer free radon tests to individuals using NDQuits between February 2021 and 2023. There were 75 radon tests sent in for testing. More than one-third of the test results were ≥ 4.0 pCi/L, the action level recommended by the EPA.

Only one in five respondents reported knowing that radon caused lung cancer. A brief article highlighting these results was published in Preventive Medicine.[12]

NDQuits Cessation grantee integrates TTS into cancer care

The TTS at Jamestown Regional Medical Center are integrating nicotine dependence treatment into the cancer center as part of a collaboration with the current NDSU DNP student's dissertation project. Further, one TTS was accepted to a training at Kettering Cancer Center in fall 2024.

SUMMARY AND RECOMMENDATIONS

North Dakota TPCP has made notable progress on expanding access to nicotine dependence treatment across the state, using data to monitor how well efforts are working as tobacco product use shifts and ensuring populations of interest are being reached. Key recommendations to continue this progress are included below.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/20/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:18 p.m. Chairman J. Nelson called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Vital Records
- Special Projects and Health Analytics
- Data Modernization Unit
- Surveillance and Data Management
- Budget request
- State Laboratory Infrastructure
- Community Support
- Budget review

2:19 p.m. Tracy K. Miller, Director, State Epidemiologist, Health and Human Services, testified and presented a department overview #30163.

2:24 p.m. Dirk Wilke, Interim Health and Human Services Commissioner, spoke to federally funded CDC positions #30163.

2:25 p.m. Tracy K. Miller, Director, State Epidemiologist, Health and Human Services, continued with testimony #30163, #30287, #30284.

2:52 p.m. Kodi Pinks, Director, Surveillance and Data Management, Health and Human Services, spoke to toxicology deaths #30284.

2:53 p.m. Tracy K. Miller, Director, State Epidemiologist, Health and Human Services, continued with testimony #30163, #30284.

3:06 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, spoke to federally funded grants #30163.

3:16 p.m. Tracy K. Miller, Director, State Epidemiologist, Health and Human Services, continued with testimony #30163.

3:38 p.m. Christie Massen, Director, Laboratory Services, Health and Human Services, testified and presented a department overview # 30052.

3:49 p.m. Dirk Wilke, Interim Health and Human Services Commissioner, spoke to the repurposing of existing lab building #30052.

3:50 p.m. Christie Massen, Director, Laboratory Services, Health and Human Resources, continued with testimony #30052.

3:53 p.m. Karol Riedman, Assistant Chief Financial Officer, Health and Human Services spoke to rent of the new laboratory #30052.

3:54 p.m. Christie Massen, Director, Laboratory Services, Health and Human Resources, continued with testimony #30052.

4:03 p.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

#30052

HB1012 Health Statistics and Performance Detail

TRACY K. MILLER, MPH, PHD | STATE EPIDEMIOLOGIST/SECTION DIRECTOR

JAN. 20, 2025

NORTH Dakota Be Legendary. | Health & Human Services

Our **Vision**

North Dakota is the healthiest state in the nation.

Our **Mission**

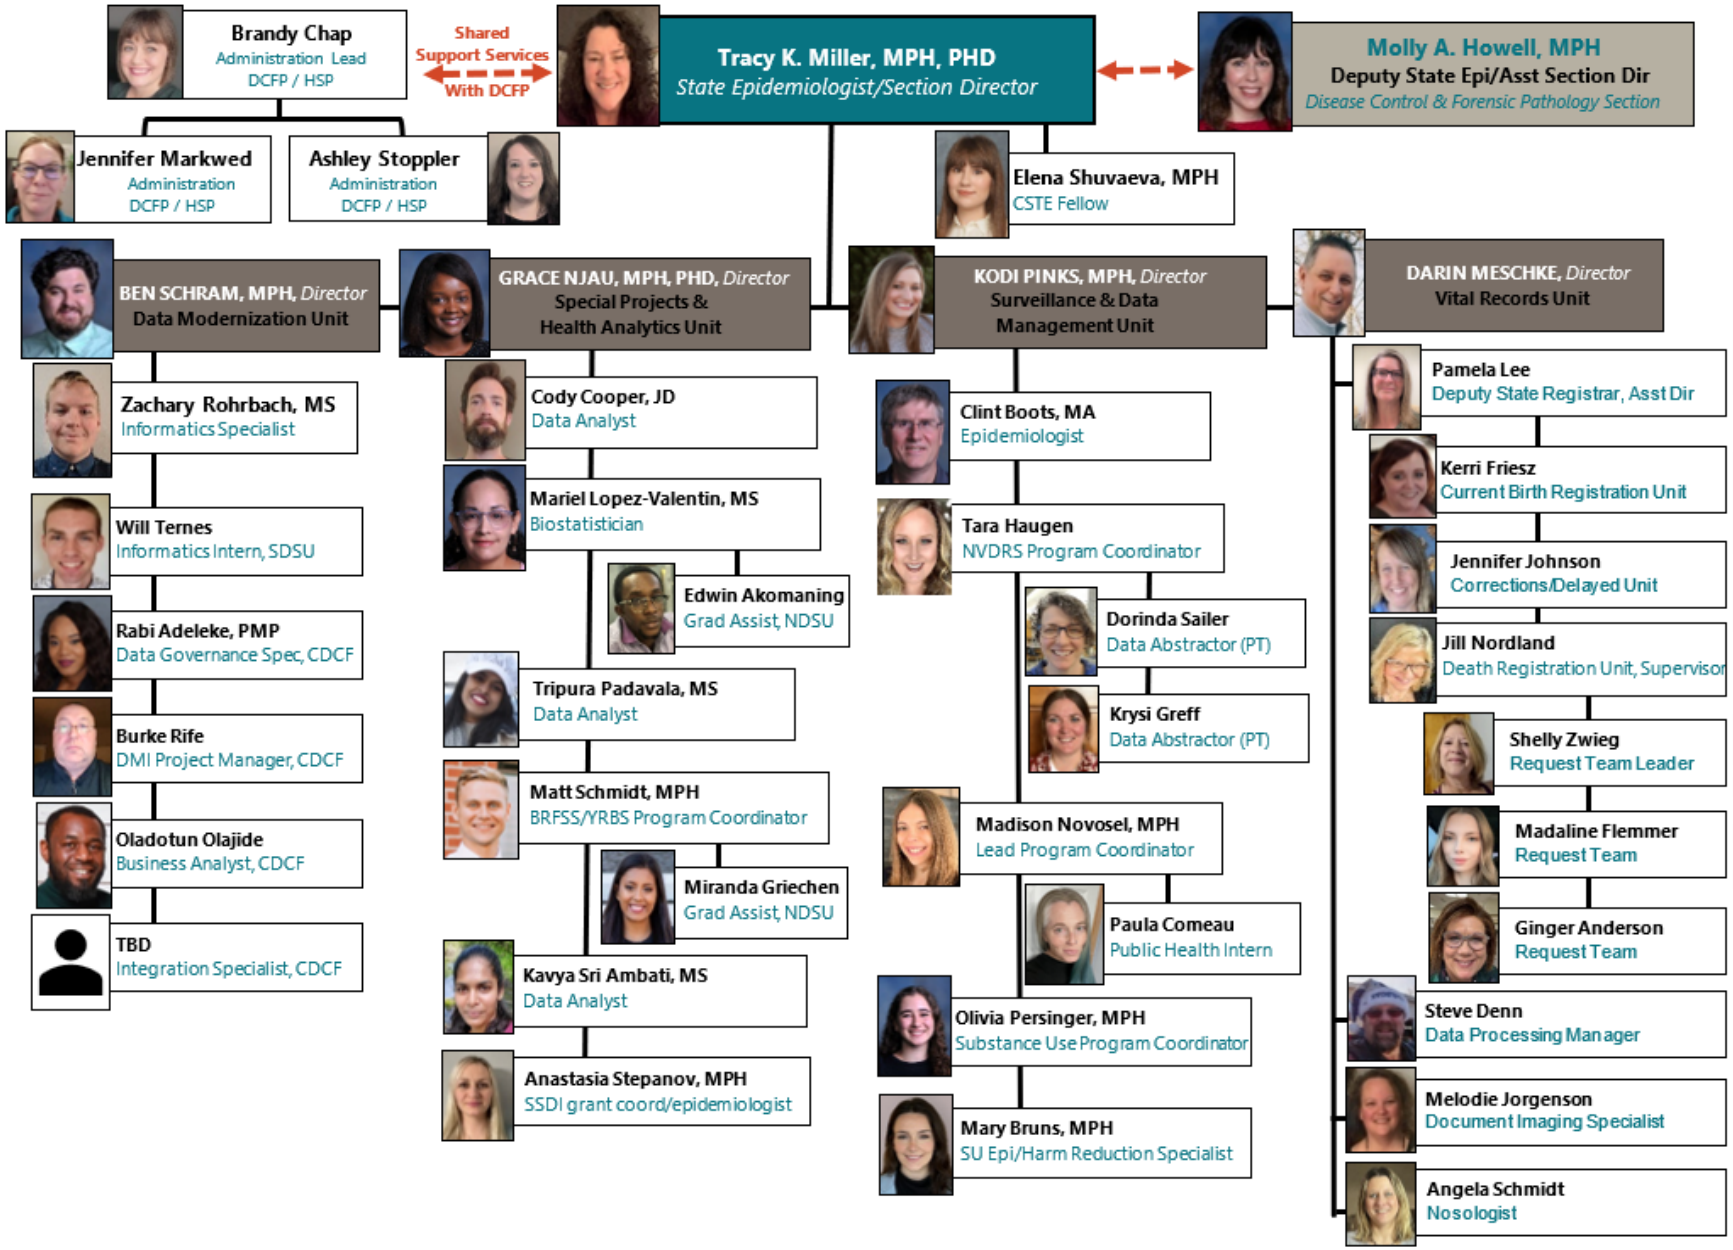
HHS fosters positive, comprehensive outcomes by promoting economic, behavioral and physical health, ensuring a holistic approach to individual and community well-being.

NORTH Dakota | Health & Human Services

Be Legendary.

Health Statistics & Performance

State Epidemiologist
- Section Director of the HSP Section



Deputy State Epidemiologist
- This position is not a part of the HSP section
- The SE and DSE have extensive ID knowledge and are usually the main points of contact for CDC and CSTE in the event of emergencies which are typically infectious disease-related. Having the DSE in the Disease Control Section ensures collaboration and timely information sharing between the two sections.

Team members in this section include:
- 5 FTE Unit Directors and Section Director
- 19 FTE Program Personnel
- 2 PT Temporary positions
- 2 FT Contract positions
- 1 FT ASTHO placement position
- 3 Shared Administration Personnel
- 1 CSTE Fellow
- 3 CDC Foundation placement positions
- 2 Graduate Assistants
- 2 Public Health Interns
- 1 current vacant position (1 CDC Foundation placement)

WHO WE ARE AND WHAT WE DO

Data Modernization Office

Ben Schram, MPH

WHO WE ARE

- DATA MODERNIZATION OFFICE
- SPECIAL PROJECTS & HEALTH ANALYTICS
- SURVEILLANCE & DATA MANAGEMENT
- VITAL RECORDS

Special Projects & Health Analytics

Grace Njau, MPH, PHD

OUR ROLE

- DATA GOVERNANCE
- DATA ANALYTICS
- SURVEILLANCE AND PREVENTION
- CHRONIC DX/ENVIRON
- BIRTH & DEATHS
- FETAL DEATHS

Surveillance & Data Management

Kodi Pinks, MPH

SERVICES

- NEEDS ASSESSMENTS
- PROGRAM EVALUATIONS
- DATA TRAININGS
- STUDENT MENTORING
- INFORMATICS SUPPORT
- BIRTH/DEATH CERTIFICATES
- DATA VISUAL DEVELOPMENT

Vital Records

Darin Meschke

PARTNERS

- HOSPITALS/PHYSICIANS
- FUNERAL HOMES AND COUNTY CORONERS
- DPI/DOT
- INTERNAL DIVISIONS/ PROGRAMS
- UNIVERSITIES, SCHOOLS, COMMUNITY ACTION GROUPS

NORTH Dakota | Health & Human Services
Be Legendary.

Vital Records

Vital Records

What We Do

- Responsible for three primary functions:
- Registration of Records
  - Births, deaths, fetal death, marriages, divorces, abortions
- Certification – Provide Certified Copies
  - Births, deaths, fetal deaths and fetal losses
- Statistics
  - National – NCHS, SSA
  - State agencies, researchers, media, legislative and public

What's NEW in Vital Records?

- Data Modernization Initiative
  - EVERS Modernization – NDIT
    - Originally implemented in 2006
  - HL7 FHIR Data Exchange – Altarum
    - Making use of existing department Rhapsody software

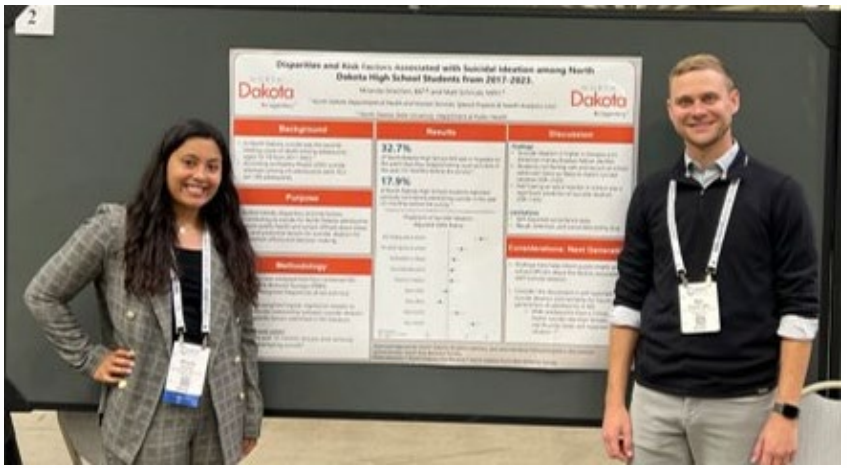
Vault Reconstruction

- Fire Suppression System
  - Room had to be redone to be airtight
  - Chance to reorganize vault area for efficiencies
- VR Accreditation coming in 2025.

Vital Records

Top Priorities - Now and in the next 18 Months

Now:



- Complete ELC Modernization – Phase 1
  - New version of EVERS and HL7 FHIR Implementation

18 Months:

- Complete VRHS Accreditation

Special Projects and Health Analytics

Special Projects & Health Analytics

What We Do

- Analytical Support, Program Evaluation and Quality Improvement of Program(s)
- Data analysis and data interpretation of special projects and emerging issues
  - Covid-19 Data Analyses and Modeling Projects
  - State Health Assessment & Improvement Plan
  - Pregnancy Risk Assessment Monitoring System
  - Youth Risk Behavior Survey
  - Behavioral Risk Factor Surveillance System
  - ND Fatherhood Survey
  - Study of Associated Risks of Stillbirth
  - MCH, Health Equity, and Other Program Evaluations

What's NEW in SPHA?

North Dakota State Health Improvement Plan

- Published in 2024 alongside the Office of Systems and Performance

Multi-Partner Health Collaborative

- Ongoing support of data-driven goals, objectives and outcomes

YRBS

- Since transition from DPI, SPHA has been implementing the Youth Risk Behavior Survey and disseminating data to other agencies, schools and communities.

ND Fatherhood Survey

- Implemented in 2024 to enhance early childhood initiatives
- Responses from 500 dads and counting

NORTH Dakota | Health & Human Services
Be Legendary.

Special Projects & Health Analytics

Top Priorities - Now and in the next 18 Months

Now:

- Dissemination of data from studies on early childhood, youth and adulthood experiences (ND PRAMS, ND Fatherhood Survey, YRBS, BRFSS), and healthcare workforce

18 Months:

- Whole-person social and health data to inform ongoing State Health Improvement Plan initiatives, Multi-Partner Health Collaborative and the Public Health Strategic Plan

Data Modernization Unit

Data Modernization Unit

What We Do

- Lead the Public Health Division (PHD) in Data Modernization activities to establish a modern public health data ecosystem that is leveraged to equitably protect and improve health for North Dakotans and prepared for emergencies.
- Data Modernization Initiative:
  - Modernize Public Health Ecosystem
  - Advance Interoperability
  - Strengthen Data Governance

What's NEW in DM?

This office is new to the section. Established in November 2023

- Informatics Leadership and Support:
  - Provide leadership to drive the strategic goals of the Division.
  - Offer comprehensive support for informatics initiatives.
- Collaboration and Coordination:
  - Foster collaboration among internal teams and external partners.
  - Act as a liaison between the Public Health Division and relevant entities, including the North Dakota Information Technology (NDIT) and the HHS Executive Office.
  - Cultivate strong relationships with external stakeholders.
- Data Enablement and Governance Leadership:
  - Lead establishment and maintenance of robust data enablement and governance practices to ensure integrity, confidentiality, and availability of public health data.
  - Develop and enforce policies and procedures that support effective data management across the organization.

Data Modernization Unit

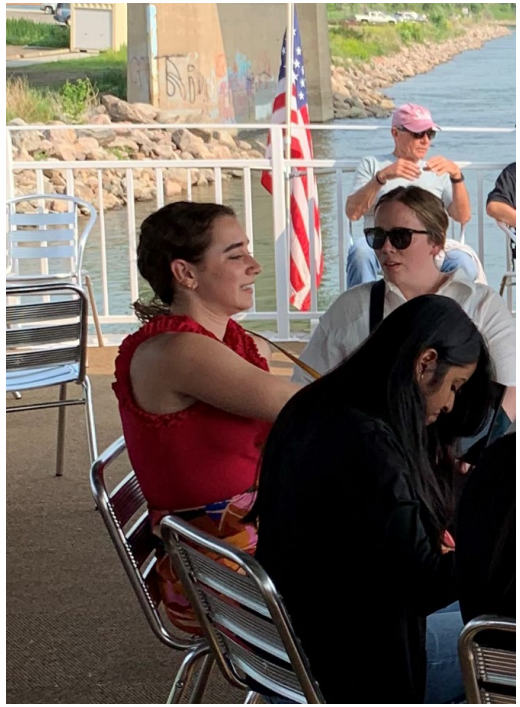
Top Priorities - Now and in the next 18 Months

Now:

- Collaborate with NDIT on Statewide Data Strategy Working Groups and HHS Data Strategy implementation efforts.
- Implement data literacy training program and resources for North Dakota's state, local, and tribal public health workforce

18 Months:

- Development and implementation of a modern data platform to make data more accessible, usable, and secure, improve data sharing and integration, ensure privacy and security control, and support evidence-based decision-making



Surveillance and Data Management

Surveillance and Data Management

What We Do

- Responsible for data analysis and interpretation of non-infectious disease/conditions and injury/violence data

- Emergency room, hospital discharge and EMS data
- Health equity
- Lead Reporting Program
- Medical Marijuana
- Overdoses, suicides, homicides and other violent deaths
- Oral health, diabetes, stroke, MCH
- Trauma, stroke, and cardiac registry
- Tobacco

What's NEW in SDM?

Data Modernization Initiative

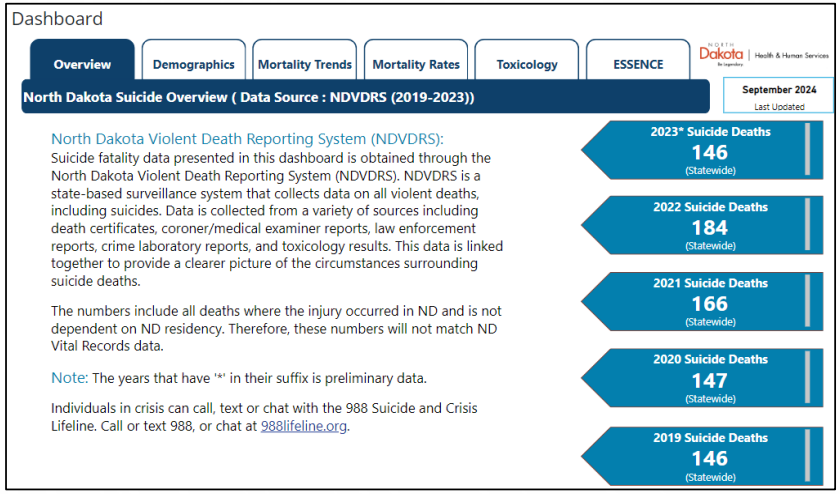
- Utilizing ADT feeds to provide electronic reportable chronic disease cases to Maven. These include autism, birth defects, NAS, FAS, non-fatal OD and suicides
- Collaboration with HIN, Rhapsody coder, Data Modernization Office, and NDIT

Lead Reporting Program

- Took on program in July 2023
- No Funding; ND one of 3 states; Current personnel funded through ASTHO. NOFO for CDC lead grant will be available summer 2026
- Currently, collaborating with ND Medicaid, Health Tracks, Refugee Health and WIC program.

Surveillance and Data Management

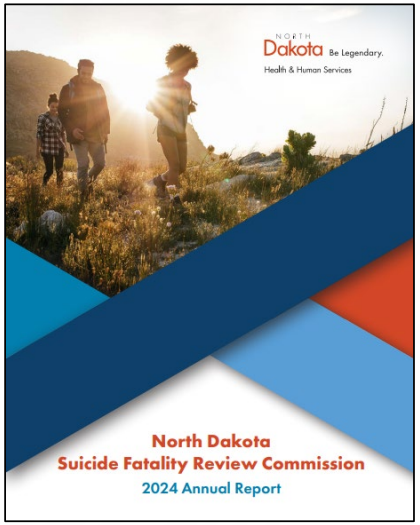
Top Priorities - Now and in the next 18 Months



Now:

- Establish an occupation/injury surveillance program which includes data collection and analysis, and data dissemination (e.g., fact sheets, reports, and data dashboard).

18 Months:



- Apply for funding to support the occupational/injury surveillance program (NIOSH's State Occupational Safety and Health Surveillance Program grant) and lead reporting program (CDC's Childhood Lead Poisoning Prevention and Surveillance of Blood Lead Levels in Children grant).

ND VIOLENT DEATH REPORTING SYSTEM (NDVDRS)

The NDVDRS links data on violent deaths (e.g., homicides, suicides, drug overdose deaths, etc.) from multiple sources into usable data.

- Data is collected from death certificates, as well as reports from coroner/medical examiner, law enforcement, crime laboratory, and toxicology results. Recently added reports from EMS and NDHIN.
- Violent deaths are mandatory reportable conditions
  - North Dakota Administrative Code 33-06-01, North Dakota Century Code 23-07-01
- Data collection started on January 1, 2019. Years with completed data are 2019-2022.

- Each year ND has ranked high for data quality and completeness. Across all 14 performance indicators, North Dakota scored an excellent with each indicator.
- Besides our first year, in which ND ranked 11th, ND has ranked in the top 5 of the nation for data quality and completeness.
- Data collected by this program is widely requested by various agencies because of the credibility of the data.
  - Recovery Reinvented
  - Suicide Fatality Review Commission
  - Military (VA, National Guard, ND Cares, etc.)
  - NDSLIC, LPH, HIDTA, etc.
- Partner with HHS's Division of Behavioral Health to help provide data for action.

NORTH Dakota | Health & Human Services
Be Legendary.

SUCCESSES IN THE LAST YEAR

OUR GOLD STARS!!

- SPHA:
  - SHA/SHIP/MPHC SUPPORT
  - 500 DADS AND COUNTING (NDFS)
- DMO – NEW NOV 2023
  - AWARDED 4 FTES THROUGH CDC FOUNDATION WORKFORCE ACCELERATION INITIATIVE (WAI)
  - HOSTED DATA STRATEGY AND ENABLEMENT WORKSHOP WITH PH DATA STEWARDS
- SDM
  - NVDRS 5TH IN NATION ON DATA COMPLETENESS AND TIMELINESS
  - LEAD PROGRAM DASHBOARD INDICATED TO BE THE GOLD STANDARD
- VITAL RECORDS
  - COMPLETED NEW FIREPROOF VAULT
  - BEGAN ACCREDITATION

Makenna Murray – Great Niece of Tracy Miller

AREAS FOR IMPROVEMENT

- INCREASE VISIBILITY OF AVAILABLE DATA
- IMPROVE PROCESS FOR DASHBOARD REVIEW
- IMPROVE DATA EXCHANGE WITH TRIBES
- INCREASE/IMPROVE INTERACTIONS WITH NON-PH PROGRAMS IN HHS
- ENSURING WORKFORCE IS GETTING THE NEEDED TRAINING

NORTH Dakota | Health & Human Services
Be Legendary.

SMART STRATEGIES TO IMPROVE SECTION OUTPUT AND DRIVE BUDGET

BUILD COMMUNITY SUPPORT

- SHIP/MPHC
- SUICIDE PREVENTION COALITION
- TRIBAL DATA USE AGREEMENTS
- LOCAL PUBLIC HEALTH COMMUNITY HEALTH ASSESSMENT DASHBOARD

INCREASE ACCESS POINTS

- AUTOMATED DATA OPTIONS
- INTEROPERABILITY
- PUBLIC USE DATA SETS
- TRAININGS

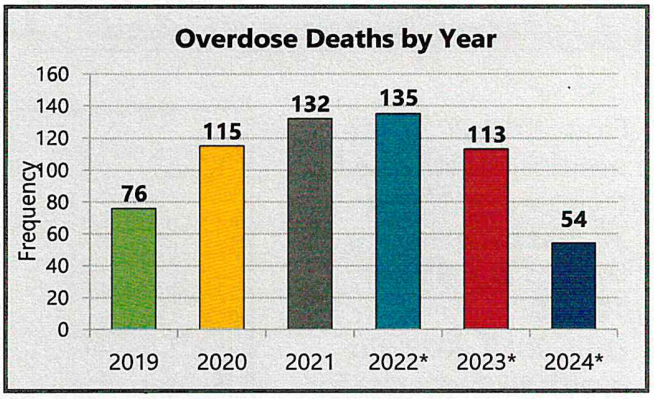
Unintentional Drug Overdose Deaths
2024 Legislative Report

*Preliminary Data for 2022, 2023 and 2024
**Data through July 31, 2024

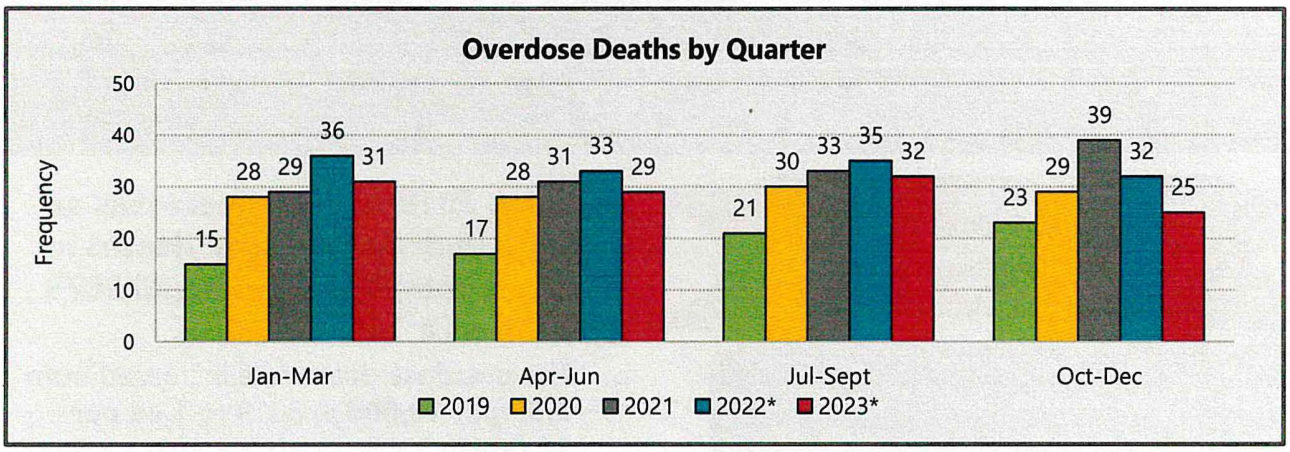
NORTH Dakota Be Legendary.
Health & Human Services

Substances Involved in Drug Overdose Deaths 2019-2024*



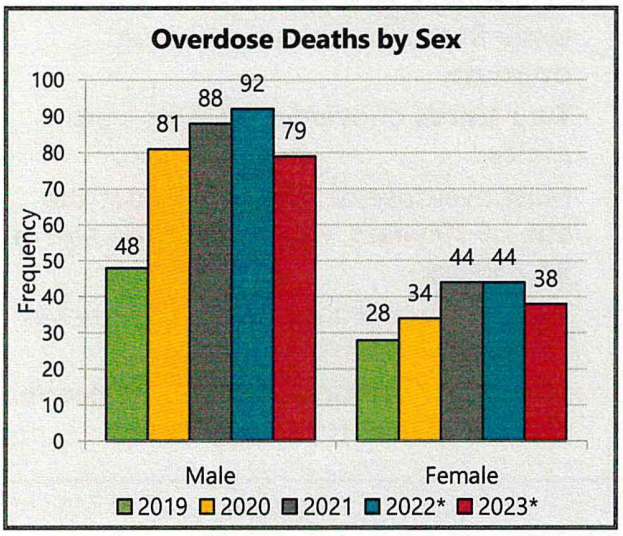
- **630** Total Number of Unintentional Drug Overdose Deaths[1]
- **490** Opioids
- **403** Fentanyl
- **347** Amphetamines
- **190** Alcohol
- **186** Marijuana
- **93** Benzodiazepines

[1]More than one substance may be present in a single case, so subsets will not equal the total.

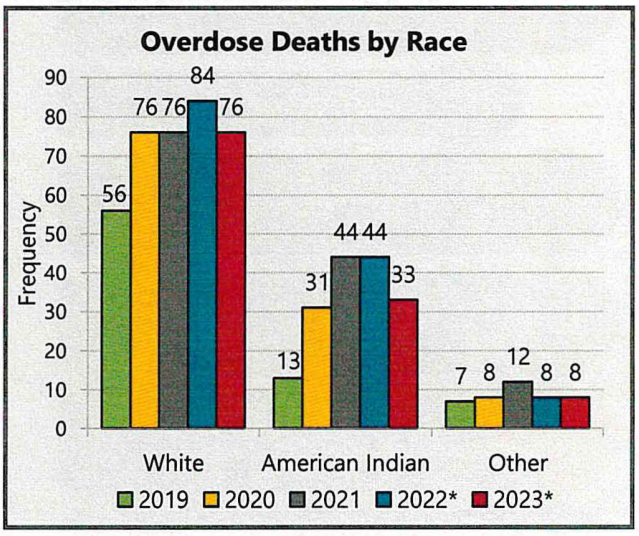


Majority of the deaths had more than one substance (polysubstance) identified in the toxicology results. The most common two-substance combination were **opioids and amphetamines (37%)**.

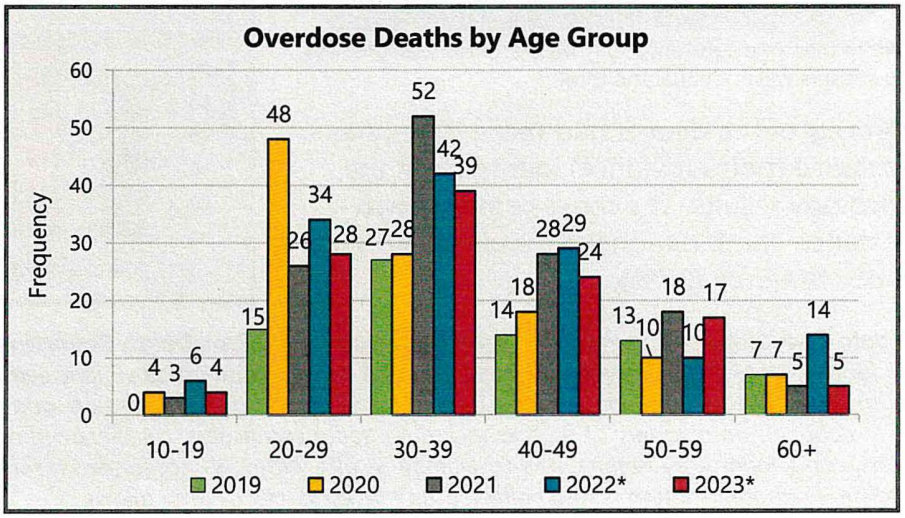
Between 2019 to 2022 there was an increase in drug overdose deaths in North Dakota, but provisional 2023 data shows a 16% decrease.



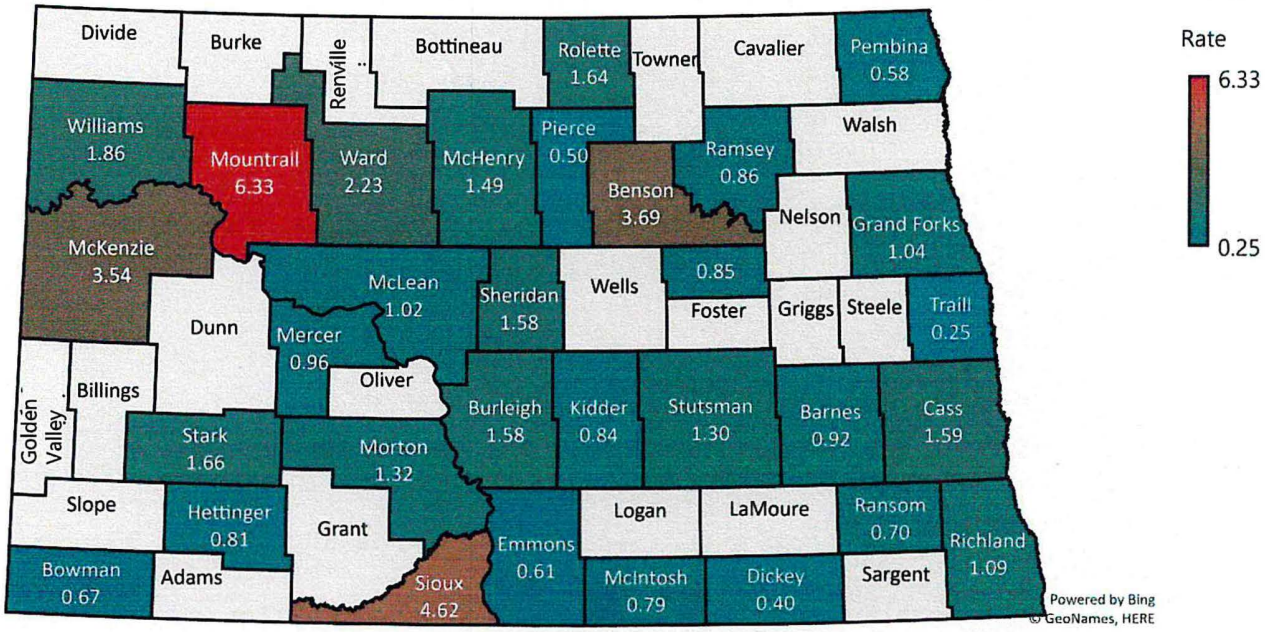
- The overdose death rate increased from **0.98 per 10,000** in 2019 to **1.44 per 10,000** in 2023, which is a **48% increase** during that five-year time period.
- On average, **2** North Dakotans **die each week** from an unintentional drug overdose.
- **Two-thirds** of overdose deaths were **males**.
- Most overdose deaths were **under the age of 39 years,** with an **average age** of **37.2 years**.
- **74%** of the overdose deaths occurred at **home or an apartment**.
- **30%** of the overdose deaths had **alcohol present** in their toxicology results.



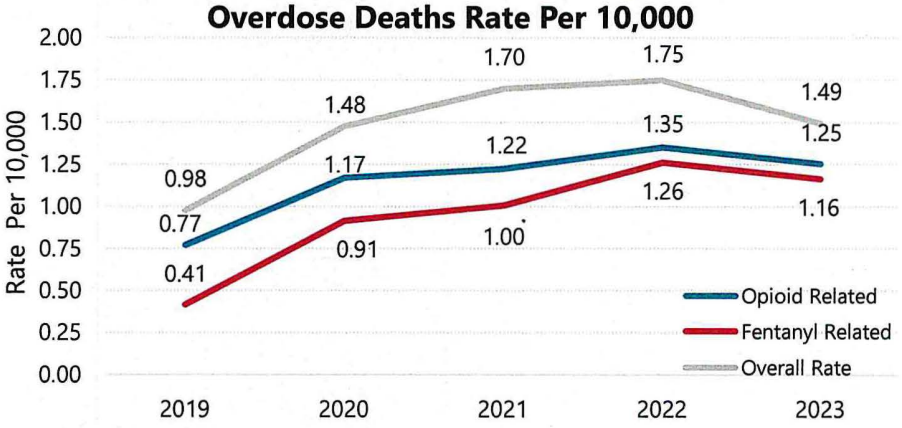
*The data from this report comes from the **North Dakota Violent Death Reporting System (NDVDRS)**. NDVDRS is a CDC funded, state-based surveillance program that collects data on all violent deaths (homicides, suicides, accidental firearm deaths, deaths of undetermined intent, deaths from legal intervention, and terrorism). NDVDRS collects data on violent deaths from a variety of sources including death certificates, coroner/medical examiner reports, law enforcement reports, crime laboratory reports, and toxicology results. Although not funded through this program, unintentional drug overdose death information is also collected and investigated as time allows.*



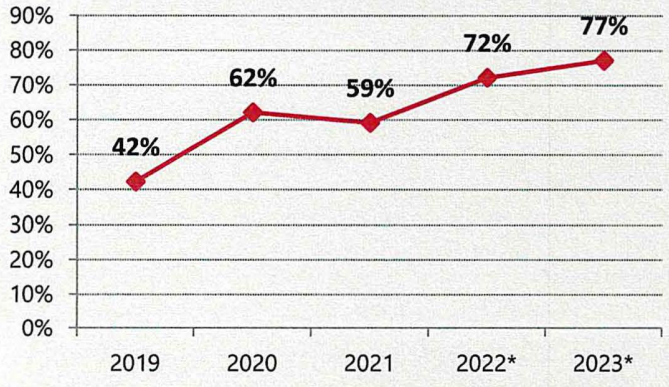
Demographic Characteristics of Unintentional Drug Overdose Deaths



- From 2019-2023, the overdose death rate for males was **1.95 per 10,000** compared to females at **0.99 per 10,000**.
- From 2019-2023, the overdose death rate for the American Indian (AI) population was **8.48 per 10,000** compared to the White population at **1.14 per 10,000**.



Overdose Deaths per 10,000 by County where Injury Occurred, 2019-2023



33 counties in North Dakota (ND) have recorded an overdose death since 2019.

Mountrail, Sioux, and **Benson** Counties have the highest rates of overdose deaths in ND since 2019 with over **2x** the state overdose death rate.

Overdose Deaths Rate Per 10,000

Fentanyl-Involved Deaths by Year

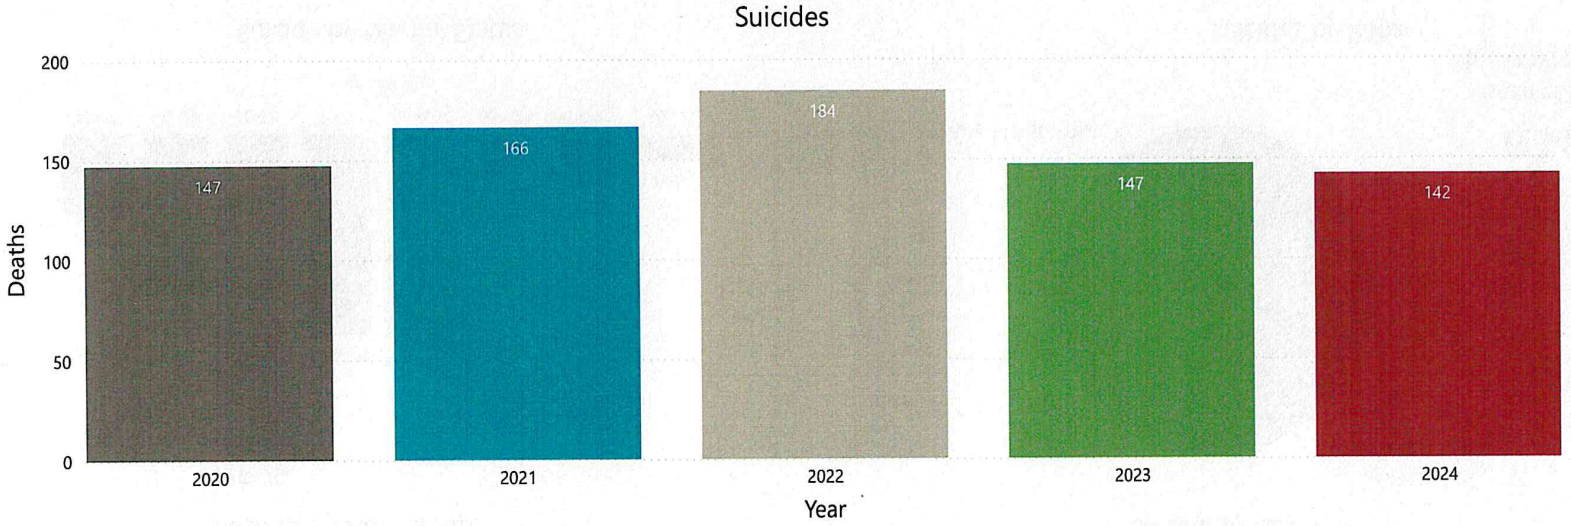
Fentanyl-Involved Overdose Deaths

Fentanyl-involved overdose deaths have risen significantly since 2019 to as high as **1.26 per 10,000 in 2022**. Since 2019, **64%** of the overdose deaths had Fentanyl present in their toxicology results.

Another emerging threat is xylazine; a non-opioid tranquilizer that is combined with fentanyl. Since 2019, ND has had **13 xylazine-positive** overdose deaths

Data source: North Dakota Violent Death Reporting System (NDVDRS); U.S. Census Bureau, Population Division

North Dakota Violent Death Reporting System Suicide Data



Data Notes: Finalized Data for 2019-2022

*Preliminary Data for 2023 and 2024

Numbers represent both ND residents and Out-of-State residents where initial injury occurred in ND

Max of Alcohol BAC

0.18
Median of Alcohol BAC

Alcohol Involvement

0.02%: This is the lowest level of intoxication with some measurable impact on the brain and body.
0.05%: At this level behavior will become exaggerated with impaired judgement and reduction in coordination. Inhibitions will be lowered causing one to potentially engage in risky behaviors.
0.08%: This is the current legal limit in ND that it is considered illegal and unsafe to drive.
0.10%: At this level, reaction time and control will be reduced, speech slurred, thinking and reasoning are slower and coordination of arms and legs is poor.
0.15%: This is a very high level with much less control over balance and voluntary muscles so walking and talking are difficult. May fall and vomiting begins.
0.20%: Stupor, confusion, feeling dazed and disorientation are common. Standing and walking may require help and sensations of pain decrease. Blackouts begin at this level as well as choking/aspiration on vomit.
0.30%: At this level, you may be unconscious and potential for death increases along with loss of understanding, increased heart rate, loss of bladder control.
0.40% and over: This level may put you in a coma or cause sudden death because your heart or breathing will suddenly stop.

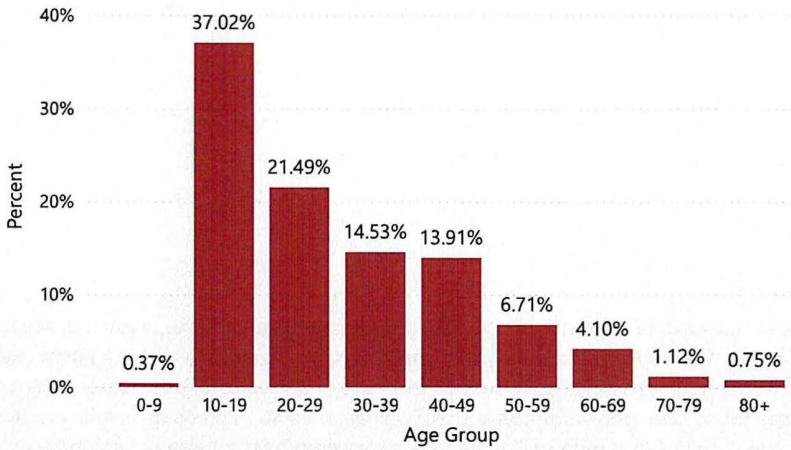
North Dakota ESSENCE Data

The Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE), captures syndromic surveillance data from hospitals in the State. This includes data from all acute care and critical access hospitals. This data consists of emergency department, urgent care and walk-in-clinic visit information. The purpose is to capture and analyze health-indicator data to identify abnormal health conditions, events, and enable early detection of outbreaks.

The data provided on the "Attempts" and "Ideation" pages, was obtained from the ND ESSENCE. Please note the caveats of this data:



1. These numbers represent a syndrome definition that utilizes both ICD-10 codes and chief complaint which looks for key words. These **should not** be considered a true "number of cases." Syndromes may also contain "noise" meaning that the syndrome data may count actual non-related events.
2. NOT every hospital submits both ICD and chief complaint so some visits may be missing.
3. Some hospitals only submit data on ND residents. Transient populations may not be included; therefore, underestimating the impact.
4. Increase in number may be due to actual increases or it may be due to increase in number of facilities participating.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/21/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

9:00 a.m. Chairman J. Nelson called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Emergency Medical Systems
- Emergency Preparedness and Response
- Food and Lodging
- Life Safety and Construction
- Health Facilities
- Budget
- Human Service Centers
- Community Behavioral Health Services
- Budget Request

9:02 a.m. Tim Wiedrich, Director, Health Response and Licensure, Health and Human Services, testified and presented an overview of the department #30452.

9:24 a.m. Julie Wagendorf, Director, Food and Lodging, Health Response and Licensure, Health and Human Services testified to licensure fees #30452.

9:31 a.m. Tim Wiedrich, Director, Health Response and Licensure, Health and Human Services, continued with testimony #30452.

10:28 a.m. Julie Stickler, Director, Emergency Preparedness and Response, Health Response and Licensure, Health and Human Services testified to emergency response staffing #30452.

10:30 a.m. Tim Wiedrich, Director, Health Response and Licensure, Health and Human Services, continued with testimony #30452.

10:32 a.m. Julie Wagendorf, Director, Food and Lodging, Health Response and Licensure, Health and Human Services, testified to replacement software for inspection #30452.

10:38 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, testified that the funding for Food and Lodging would come from the Community Health Trust Fund #30452.

10:39 a.m. Tim Wiedrich, Director, Health Response and Licensure, Health and Human Services, continued with testimony #30452.

10:43 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, clarified a budget issue #30452.

10:48 a.m. Tim Wiedrich, Director, Health Response and Licensure, Health and Human Services, continued with testimony #30452.

11:08 a.m. Pam Sagness, Executive Director of Behavioral Health Division, Health and Human Services, gave a brief introduction of staff.

11:09 a.m. Antonia Berning Scilley, Director of Operational Development and Compliance, Behavioral Health Division, testified and presented an overview the Human Services Centers #30565.

11:42 a.m. Courtney Peterson, Assistant Chief Financial Officer, Behavioral Health Division, Health and Human Services testified to review carry over expenses #30565.

11:44 a.m. Antonia Berning Scilley, Director of Operational Development and Compliance, Behavioral Health Division, Health and Human Services, continued with testimony #30565.

11:46 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, testified to the provider inflation #30565.

11:50 a.m. Antonia Berning Scilley, Director of Operational Development and Compliance, Behavioral Health Division, Health and Human Services, continued with testimony #30565.

11:55 a.m. Donna Aukland, Chief Financial Officer, Behavioral Health Services, testified to the reconciliation of funds #30565.

11:59 a.m. Antonia Berning Scilley, Director of Operational Development and Compliance, Behavioral Health Division, Health and Human Services, continued with testimony #30565.

12: 02 p.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

#30452

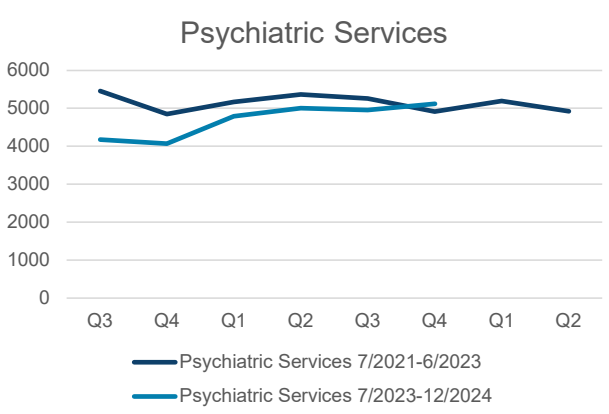
2,380 youth served

63,310 youth services

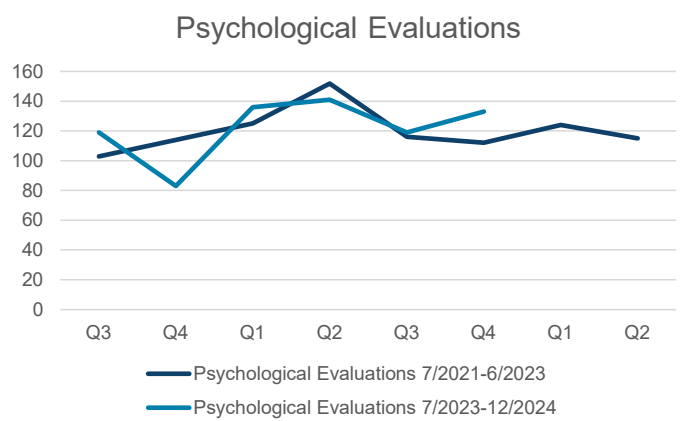
Behavioral Health Division

Clinics Overview: Our role/services

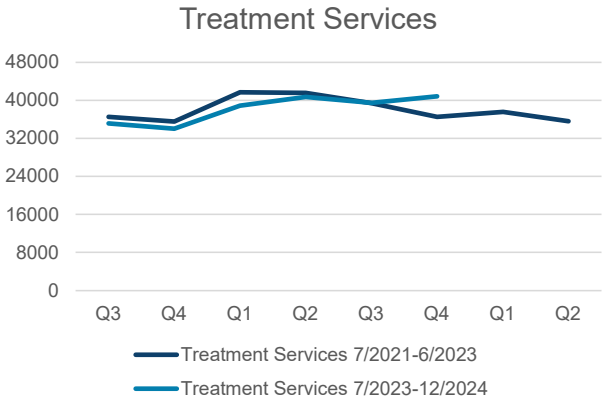
Assessment Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)



- Reduction of individuals seeking services since last biennium
  - Due to community knowledge of previous access requirements
- Number of individuals referred to a full assessment after initial screening increased by 15% (from 55% to 70%).
- 93% of individuals are now recommended for services following a full assessment (previously 88%).



NORTH Dakota Be Legendary. | Health & Human Services



Behavioral Health Division

Clinics Overview: Our role/services

Specialized & Treatment Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)

Psychiatric services saw a bit of a decrease due to turnover of psychiatric provider. Monthly average services dropped from 1713 to 1561, while the average number of people served declined from 846 to 793.

Statutorily required Psychological Evaluations have experienced an increase in need. Average services rose from 80 a month to 91, and the average number of people served remained steady from 35 a month to 36.

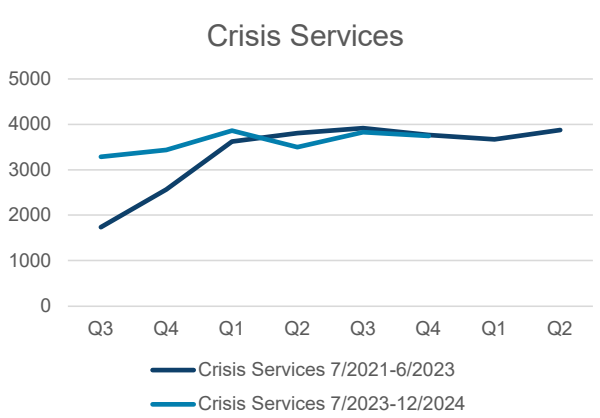
Treatment services include both mental health & SUD services, and services remained relatively stable, with a monthly average of 12,680 services provided a month in 2021-2023 to an average of 12,720

Location of Services

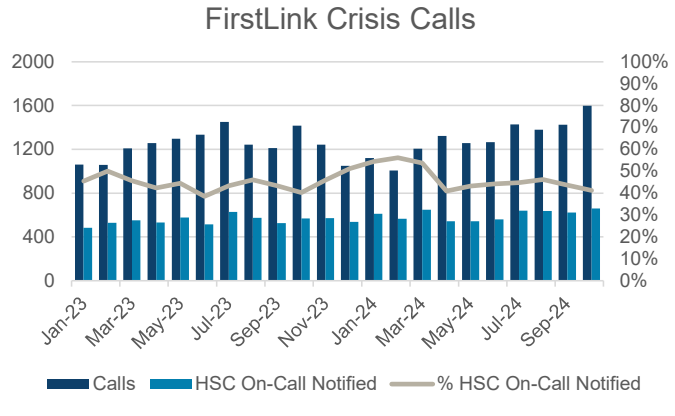
7/1/2023-12/31/2024

- 47%* of services completed in community or through telehealth
- 5957 services provided to individuals currently incarcerated
  - 791 of those services were provided through partnership with Integrated Telehealth Partners

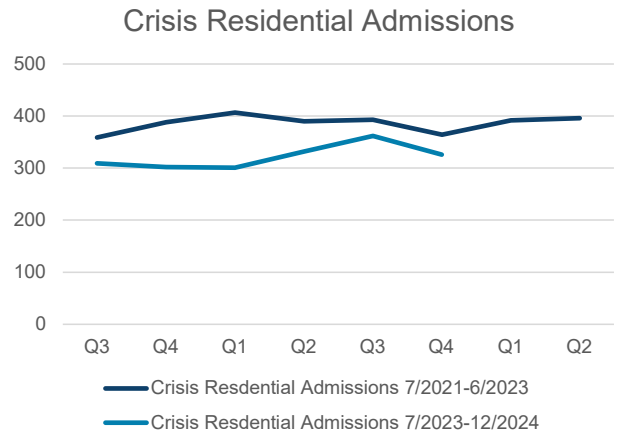
*location of services identifies where the service started



NORTH Dakota Be Legendary. | Health & Human Services



Behavioral Health Division



Clinics Overview: Our role/services

Crisis Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)

**FirstLink data is from 1/2023 – 10/2024*

Crisis service utilization has increased since the start of the previous biennium. We are currently providing an average of 1,199 monthly crisis services this biennium, compared to 1,123 in the previous biennium.

The number of crisis calls into the crisis call center, FirstLink, has been steadily increasing. On average, 46% of these calls require notification of the HSC crisis on-call team.

Count of crisis residential admissions decreased since the last biennium, from a monthly average of 129 admissions to 106. However, two regions had extended periods without a residential facility during this biennium, impacting statewide census.

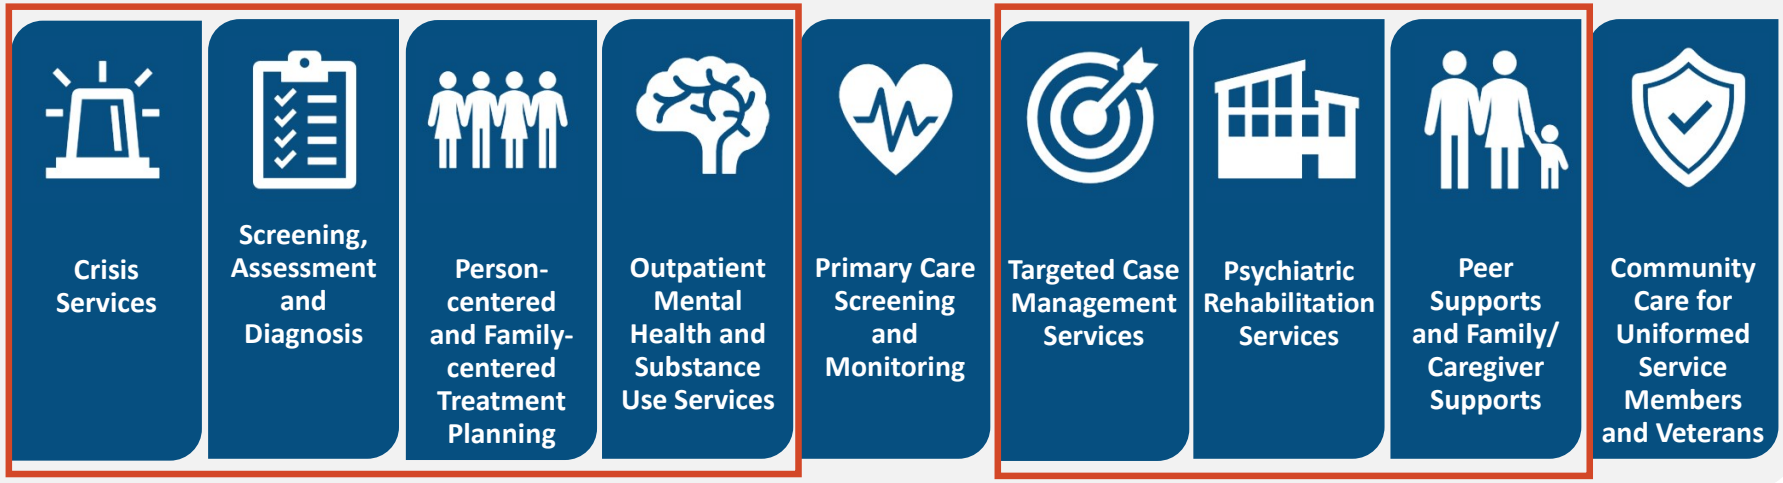
Improving Outcomes

DLA-20 Average Scores, 10/4/2023 – 12/31/2024

- The DLA-20 measures daily living skills across 20 areas, with scores ranging from 1 to 7, where higher scores indicate better functioning.
- 18 % increase in Adult DLA-20 Scores
- 10% increase in Youth DLA-20 Scores
- These increases of scores from baseline to DLA-20s taken again in 3 months suggests measurable progress and highlights the effectiveness of the intervention.

NORTH Dakota Be Legendary. | Health & Human Services

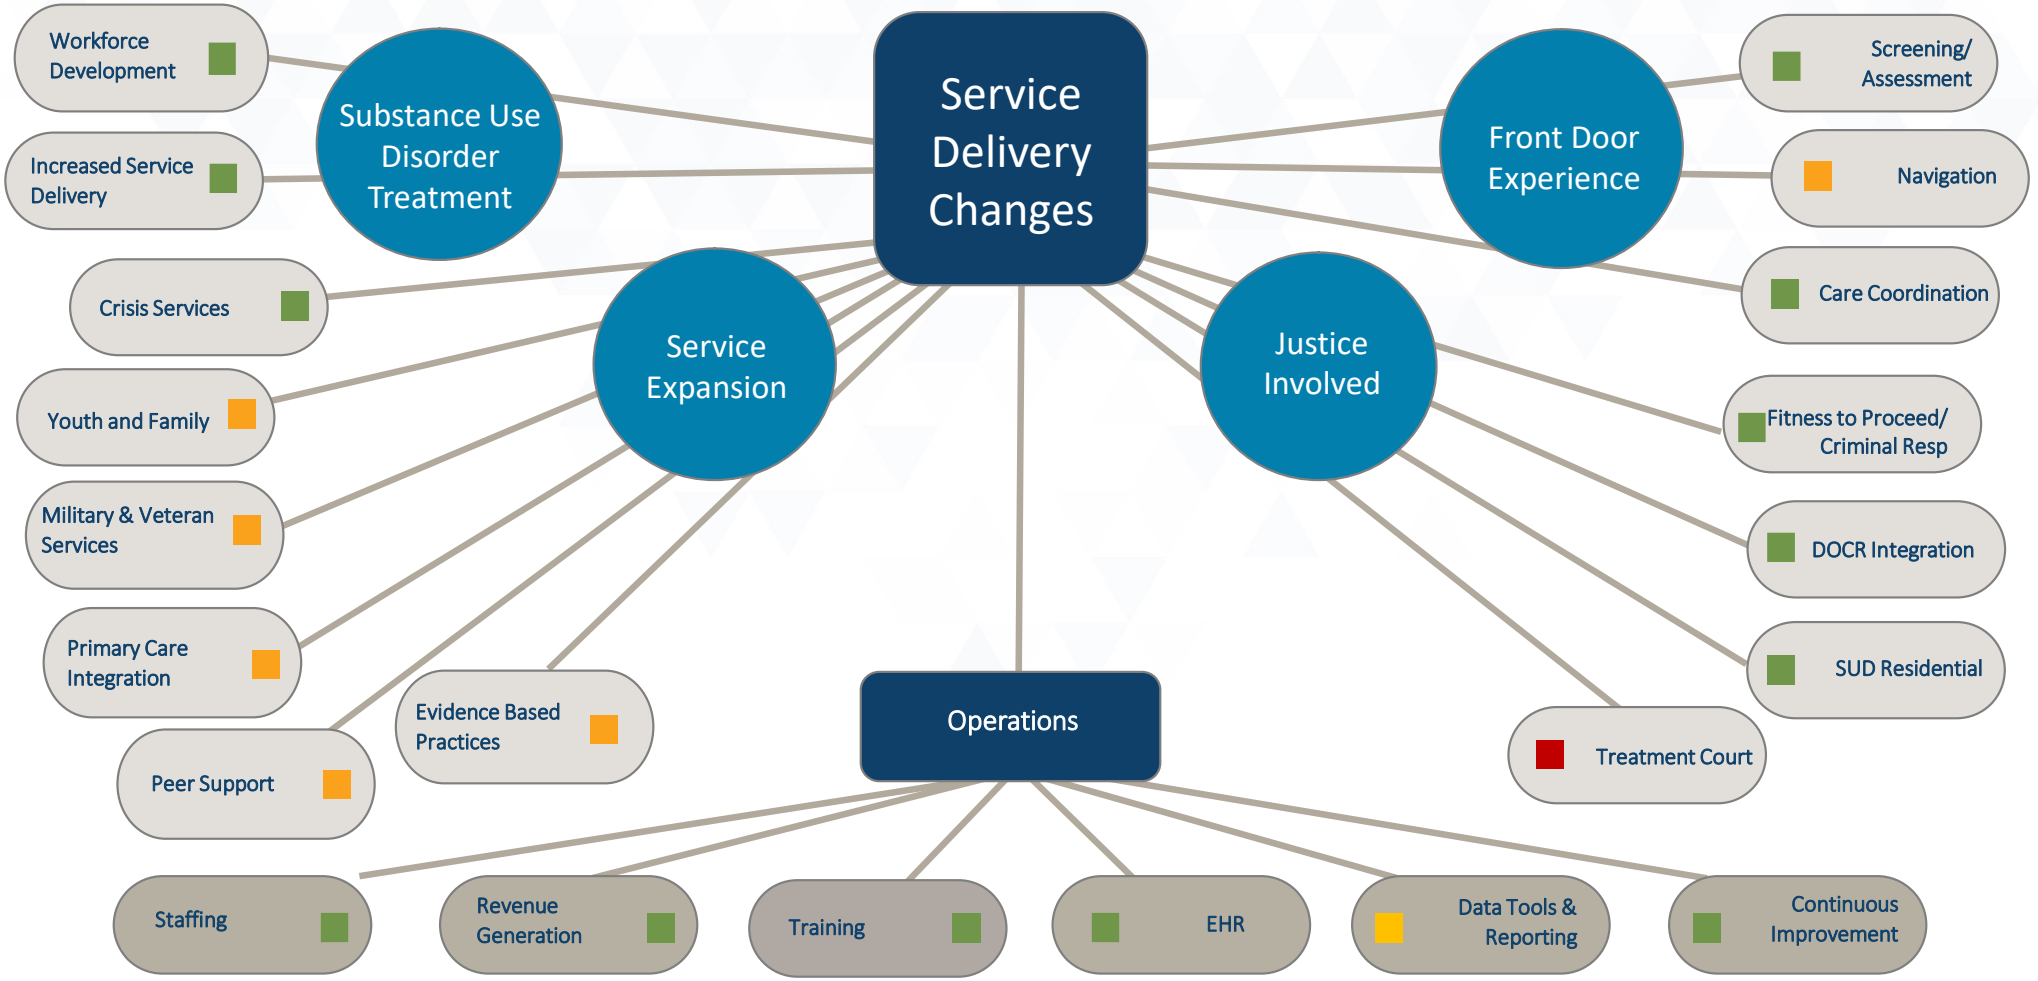


Partners | Providers

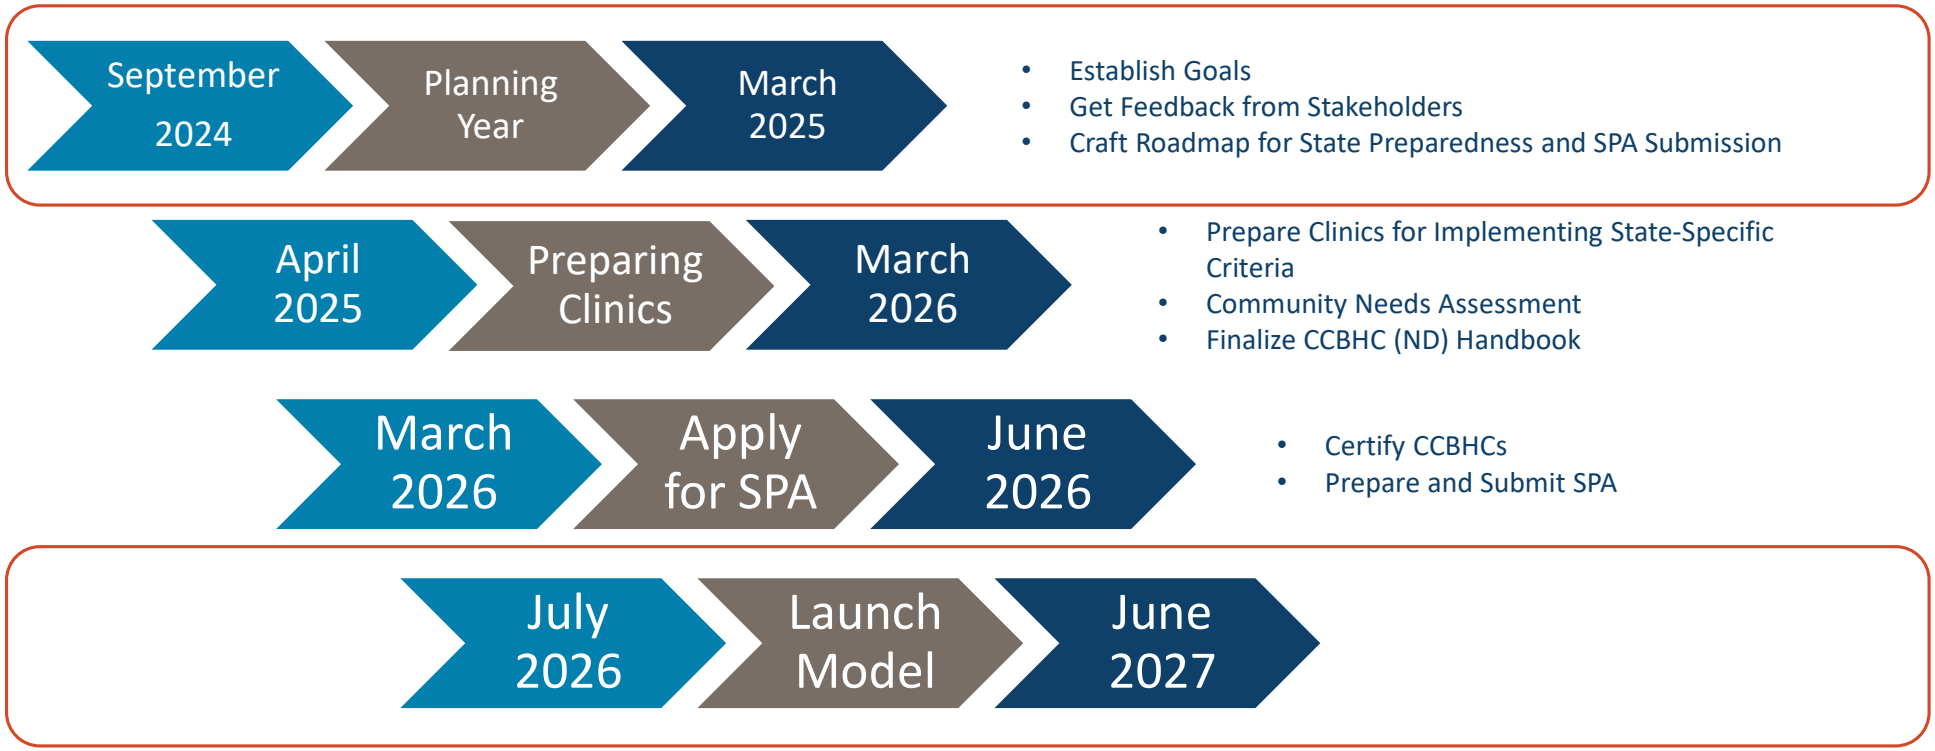
Recovery Centers	Contracted Crisis Units	Transitional Living Facilities	3.1 SUD Residential	Hospitals/ER's/Critical Access Hospitals
Community Inpatient Hospital	Crisis Psychiatric and Nursing (Legacy, LLC, FasPsych)	Consultants (MTM, NatCon, FFT LLC)	Crisis Services (Avel E-Care, Solutions mobile crisis)	Medical Detox (Clay County Receiving Center)
Employment Support (Vocational Rehabilitation)	Sex Offender Treatment (STAND)	Jail Behavioral Health Services (Integrated Telehealth Partners)	UND Med School (UND)	Other (med delivery, taxi, etc.)

Certified Community Behavioral Health Clinics

CCBHC



Services may be delivered directly by the CCBHC or by a Designated Collaborating Organization (DCO). CCBHCs are expected to directly deliver the majority of encounters.



Provision of all services is person- and family-centered.

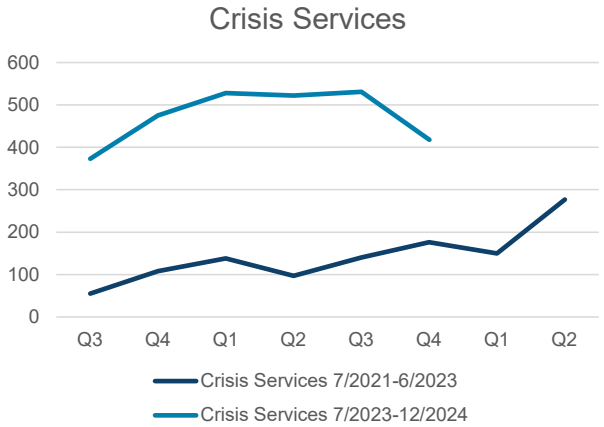
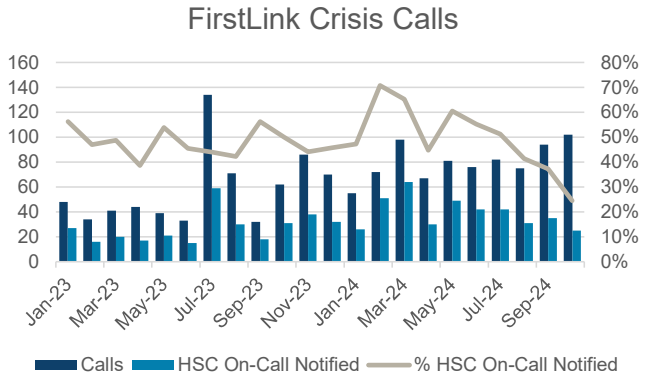
10,734 adult services

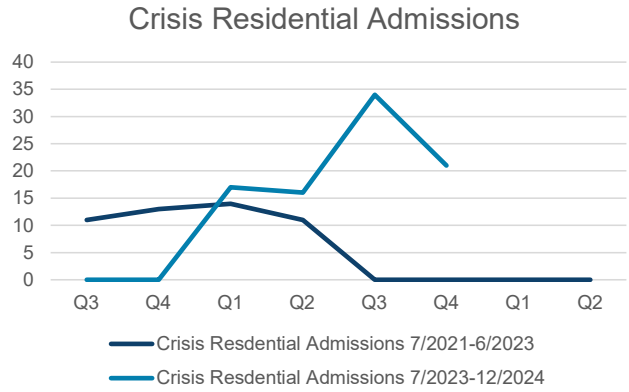
197 youth served



3,034 youth services



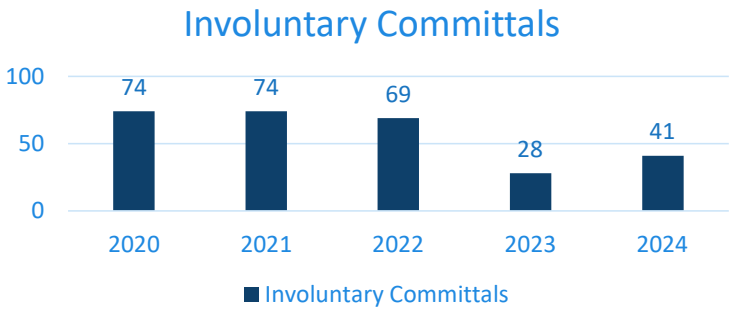
Northwest HSC



Clinics Overview: Our role/services

Crisis Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)

**FirstLink data is from 1/2023 – 10/2024*



Crisis service utilization has significantly increased this biennium. We are currently providing an average of 158 monthly crisis services this biennium, compared to 48 in the previous biennium.

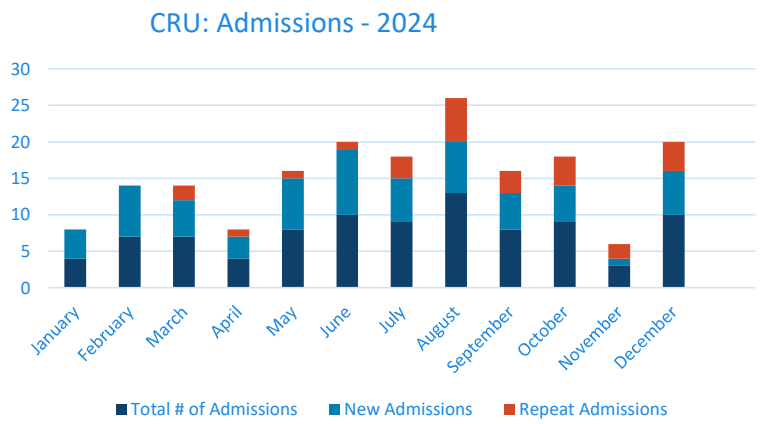
There is an average of 68 crisis calls a month to the crisis center, FirstLink . On average, 49% of these calls require notification of the HSC crisis on-call team.

This region was without a local crisis residential unit for 18 months. Since new contracted facility opened Jan 2024, admissions have increased to a monthly average admission count of 8.

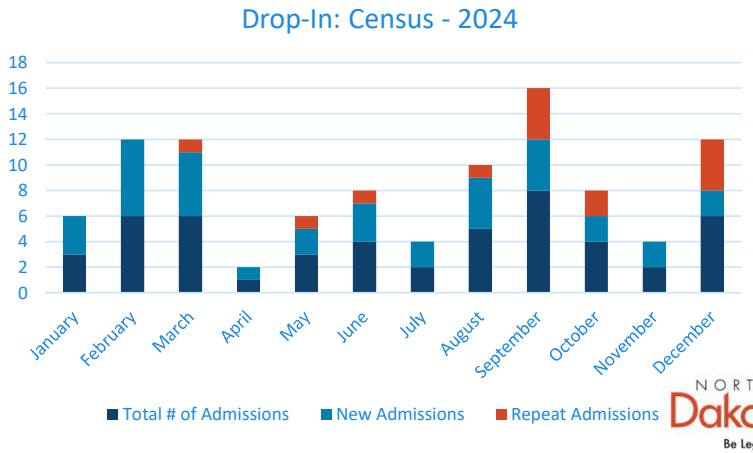
Crisis Services

- ✓ Service Utilization improved from 48 services per month last biennium to 158 services per month current biennium
  - **229% increase in crisis services provided compared to last biennium**
- ✓ Able to respond outside of 45-mile radius during day
- ✓ Rural response managed virtually either by our crisis team, or Avel E-Care at night (next slide)
- ✓ Per Williams County State's Attorney's Office, substantial reduction in involuntary commitments

NORTH Dakota Be Legendary. | Health & Human Services



Avel E-Care



- Went Live February 2024, has had positive impact.
- McKenzie County Sheriff's Department has highest usage in the state
  - Other agencies utilizing
    - Divide County Sheriff's Department
    - Tioga Police Department
    - Williams County Sheriff's Department
    - Williston Police Department
- NW crisis staff notified of Avel interventions and follow up within 24 hours

Crisis Stabilization Unit

- Jan 15, 2025: One year mark of new vendor---Centre, Inc
  - Drop-In Center
    - fully functional
  - Residential
    - capacity for 10 total beds (7 crisis, 3 TL)

NORTH Dakota Be Legendary. | Health & Human Services

Correctional Center Services

- Meet with Williams County Correctional Center (WCCC) weekly regarding needs.
  - WCCC utilizes statewide contract with Integrated Telehealth Partners to service basic depression/anxiety.
  - NWHSC provides services for the more severe inmates
    - 1,207 total services provided in the 2024
- Divide County inmates housed at WCCC
- Provide services as requested to McKenzie County Correctional Center
  - Primarily utilize Integrated Telehealth Partners to meet needs

Progress Towards Certified Community Behavioral Health Clinic

Facility Assessment Needs

Contract to explore options to optimize dollars for space with expansion to CCBHC

Building is a former hospital

Oversized offices and hallways result in higher costs

Having Recovery Center onsite presents safety risk as members have free access to medical unit

Teams segregated by 4 stories

Old and tired facility

Paying one of highest leasing rates in the state

NORTH Dakota Be Legendary. | Health & Human Services

Progress Towards CCBHC

- Letter of Intent submitted
- Psychiatric providers initiating Medication for Substance Use Disorder
- Crisis Drop-In Center fully functioning
- Additional FTE to position NW to meet increased demand
  - ✓Behavioral Health Liaison
  - ✓Community Care Coordinator
  - ✓2 additional Peer Support Specialists
  - ✓Continuous Quality Improvement Manager

NORTH Dakota | Health & Human Services
Be Legendary.

Family Functional Therapy

- 1 of 2 Family Functional Therapists hired
  - Full case load
  - On average 4 evenings per week to meet families
  - Works closely with Youth and Family Team

Recruitment & Retention

Hard-to-fill positions:

- **Licensed Addiction Counselor**—vacated Nov 2021, filled Dec 2024
  - heavily advocated for higher salary offer
  - Two prior applicants declined the equitable offer
- **Psychologist**—vacated 2021, hired telehealth April 2024
- **Independently licensed therapists**—
- **Clinical Director**—vacated Sept 2022, still vacant, 2 years 5 months

Recruitment Challenges

- Region 1 has a 16% higher cost of living

(NDLMI - North Dakota Cost of Living Dashboard)

Region	Per Single Person	Time Period	Cost	Percentage Compared to State Average
Region 1	1 Adult , 0 Children	Q2 2024	$29,754	116%
Region 2	1 Adult , 0 Children	Q2 2024	$26,361	103%
Region 3	1 Adult , 0 Children	Q2 2024	$21,865	85%
Region 4	1 Adult , 0 Children	Q2 2024	$24,868	97%
Region 5	1 Adult , 0 Children	Q2 2024	$24,970	97%
Region 6	1 Adult , 0 Children	Q2 2024	$23,000	90%
Region 7	1 Adult , 0 Children	Q2 2024	$26,618	104%
Region 8	1 Adult , 0 Children	Q2 2024	$26,565	104%
North Dakota	1 Adult (19-51 yrs, FT wrkr); 0 Children	Q2 2024	$25,632	100%

Local Wage Disparity

Agency	Registered Nurse	Licensed Therapist	Direct Care	Support Staff
NWHSC	$5,708	$7,178	$3,450	$3,629
Average Community Partner	$6,685	$7,664	$3,632	$4,281
Percentage Difference from NWHSC	14.61%	6.34%	31.28%	5.00%

Other Workforce Challenges

People we serve

- Diagnoses notably more severe than private practice
- it is not easy work

Counseling board

- Barriers to licensing clinicians coming from out of state

Success in Growing Staff Within

- **Tuition Reimbursement**
  - Psychometrist
  - LAC Spring 2025
  - Therapist 2026
  - PSS to LAC (just starting)
- **Internships**
  - 2 independently licensed therapists completed and stayed
  - 2 currently working toward licensure
- **Satisfaction Surveys**
  - Gallup
  - Triad Survey
  - Stay Interviews
- **Work Culture**
  - Trainings
  - Team-building exercises
  - Activities

North Central HSC

Clinics Overview: Our role/services

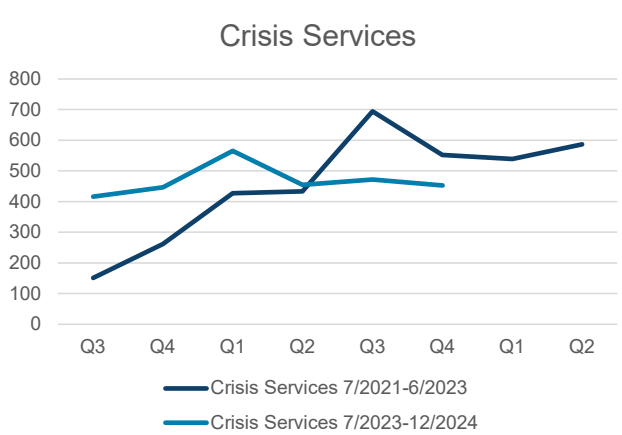
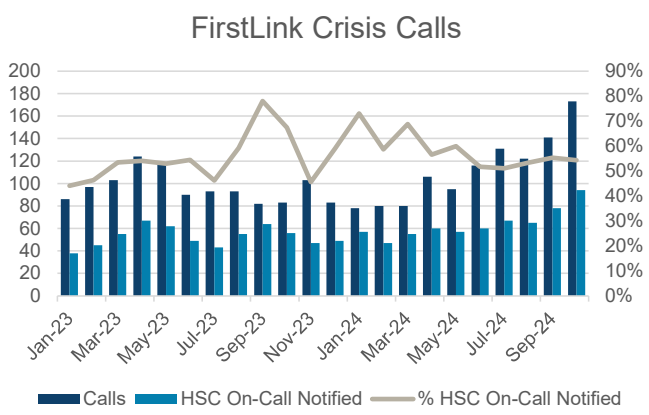
Specialized & Treatment Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)

Psychiatric services remained fairly steady with a monthly average of services dropped from 254 to 233, and the average number of people served decreased from 130 to 122.

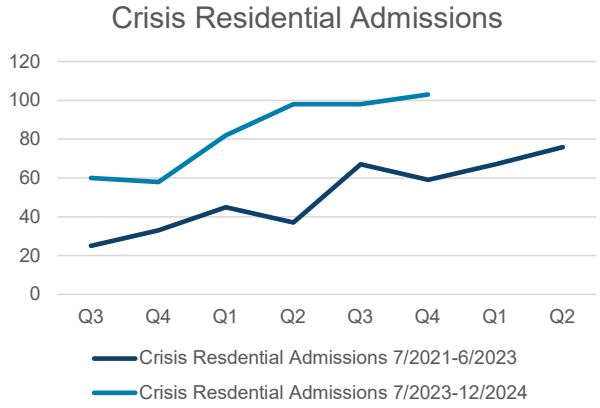
Statutorily required Psychological Evaluations have remained fairly steady with a monthly average of services provided in 7/21-6/23 of 7 to 8 in 7/23-12/24.



Treatment services include both mental health & SUD services, and services increased , with a monthly average of services provided in 7/21-6/23 of 2,655 to 2,872 in 7/23-12/24.



North Central HSC



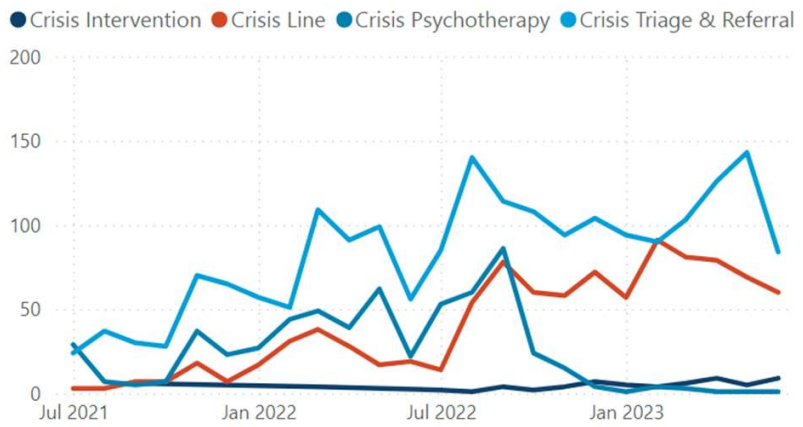
Clinics Overview: Our role/services

Crisis Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)

**FirstLink data is from 1/2023 – 10/2024*

Crisis service utilization has increased slightly this biennium. We are currently providing an average of 156 monthly crisis services this biennium, compared to 152 in the previous biennium.

The number of crisis calls into the crisis call center, FirstLink, has been steadily increasing. On average, 57% of these calls require notification of the HSC crisis on-call team.



Count of crisis residential admissions has increased from the past biennium, with a monthly average admission count of 28 in 7/2023-12/2024 compared to 17 in 7/2021-6/2023.

Crisis Services by Type, 7/2023-12/2024

NORTH Dakota Be Legendary. | Health & Human Services

Crisis Services Continuum

Full region in-person crisis response (no longer limited to 45-mile radius)

Follow-up to all Avel E-Care activations

- Phone outreach at first
- In Person outreach if phone outreach unsuccessful

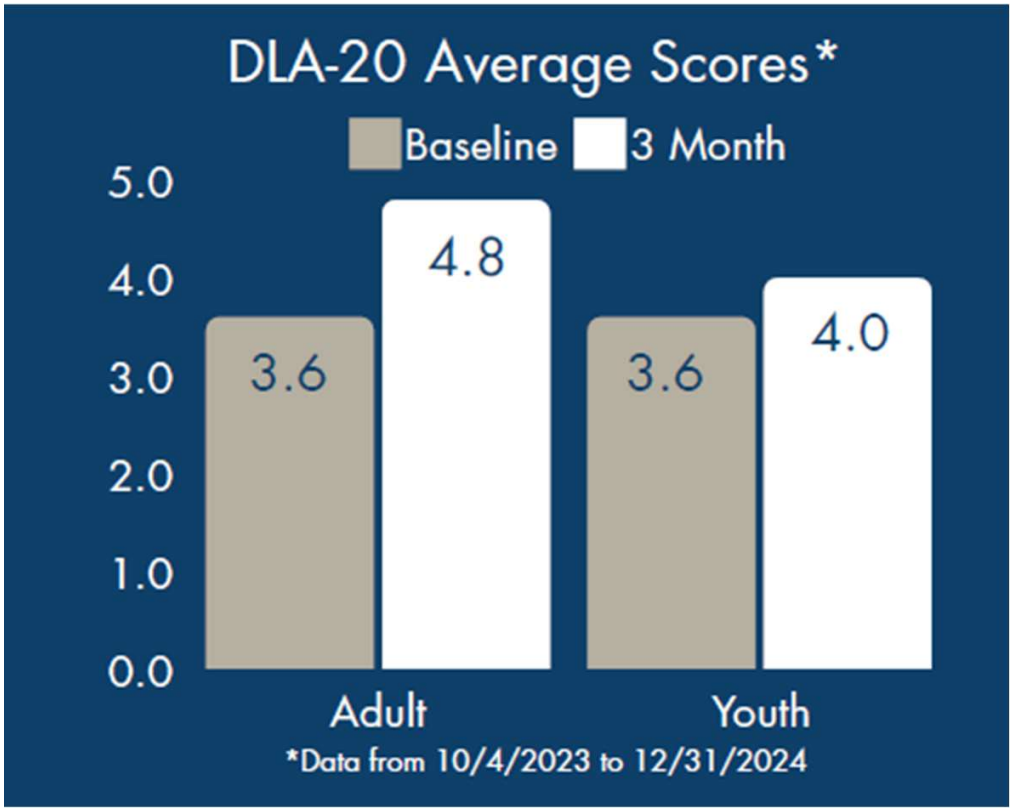
Crisis Stabilization Unit

- 1,508 hours of Crisis Stabilization Respite
- 24/7 Psychiatry with FasPsych
- Therapy Groups at facility

NORTH Dakota Be Legendary. | Health & Human Services

Individuals Served 7/2023-12/2024

1,600 adults served



47,302 adult services

349 youth served

13,943 youth services

Improving Outcomes

DLA-20 Average Scores, 10/4/2023 – 12/31/2024

- The DLA-20 measures daily living skills across 20 areas, with scores ranging from 1 to 7, where higher scores indicate better functioning.
- 33 % increase in Adult DLA-20 Scores
- 11% increase in Youth DLA-20 Scores
- These increases of scores from baseline to DLA-20s taken again in 3 months suggests measurable progress and highlights the effectiveness of the intervention.

Workforce Strategies

- Utilizing a “Grow our own” philosophy- offering internships for employees and non-employees.

- Hiring staff in positions that don’t require licensure while they work towards licensure.

- Tuition Reimbursement and Retention bonuses for hard to fill positions.

CCBHC required services

Required Services

CCBHCs are responsible for providing all nine services, which can be provided directly or through formal relationships with Designated Collaborating Organization (DCOs):

1. Crisis Services
2. Treatment Planning
3. Screening, Assessment, Diagnosis & Risk Assessment
4. Outpatient Mental Health & Substance Use Services
5. Targeted Case Management
6. Outpatient Primary Care Screening and Monitoring
7. Community-Based Mental Health Care for Veterans
8. Peer, Family Support & Counselor Services
9. Psychiatric Rehabilitation Services

Service Expansion towards CCBHC

Peer Support

Medications for Opioid Use Disorder

Substance Use Disorder treatment

7,634 hour increase in overall service (28% increase)

385 Diagnostic Assessment with Medical Services increase of 91 from 2023 (31% increase)

98% satisfaction with Psychiatric Care

NORTH Dakota Be Legendary. | Health & Human Services

CCBHC- Care Coordination Partnerships

- Ward County Jail Opioid Use Taskforce/Minot Area Recovery Community Organization (MARCO): **Peer Support services/Accessibility to Medication Assisted Treatment for Opioid Use Disorders (MOUD)**
- Minot Municipal Court/Drug Court; Domestic Violence Crisis Center; First District Health Unit; Minot Police Department/Ward County Sheriff: **Service Accessibility/Crisis Services**
- Independence Inc.; Minot Alliance to end Homelessness; Continuum of Care ND; Community Action; Minot Housing Authority; Souris Valley United Way: **Addressing the unhoused needs in Region 2**
- Elbowoods Health Clinic-Ft. Berthold Indican Reservation; Region 2 Sheriff Departments; Avel E-care: **Rural Service Accessibility/Crisis Services**
- Region 2 schools: **CCBHC education/Service Accessibility/Crisis Services/Family-Centered Services**
- Vets 4 Vets; Community Action; ND Cares; Harmony Center**: Veterans Support Services**
- Dakota Boys and Girls Ranch; Healthy Families ND; Families in Recovery: **Family-Centered Services**
- Trinity Health/Ward County State's Attorney/Behavioral Health Division: **Involuntary Committal Process**
- Alluma Health – Crookston MN: **CCBHC Modeling**
- Independence Inc.; MARCO; Harmony Center; Community Action-**Community Based Services**
- Ideal Options / Community Medical Services- **Medications for Opioid Use Disorder**

NORTH Dakota Be Legendary. | Health & Human Services

Challenges

- Workforce- Additional professional staff including LACs, Mental Health Therapists, and Psychiatric Providers to achieve full CCBHC potential
- Youth Medication Services are limited
- Shelter for individuals without permanent housing is limited
- Medically managed SUD level of care

Ashley Zabka | Clinical Director – South Central Human Service Center
Jan. 21, 2025

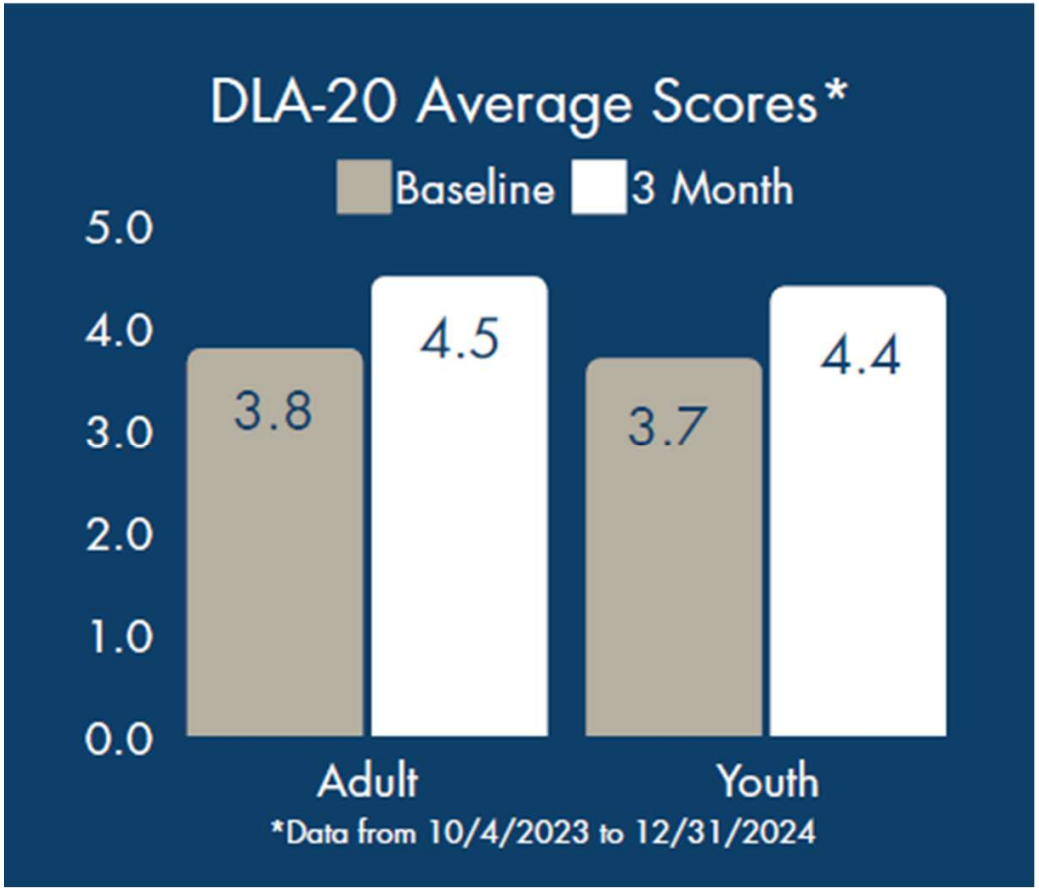
NORTH Dakota Be Legendary. | Health & Human Services

Individuals Served 7/2023-12/2024

1,017 adults served

29,738 adult services

244 youth served



5,041 youth services

Crisis Services

- Avel E-Care
  - Follow-up occurs within 24 hours
  - Efforts to increase agencies utilizing this service continue to occur
- Provide in-person crisis services
  - All of Region 6 during business hours
  - Within 45-mile radius outside of business hours (telehealth services available)
- Crisis Stabilization Unit
  - Drop-in services available 24/7/365
  - Utilized for crisis residential and substance use residential services (social detox and low-intensity)
  - Individuals involved in individual and group treatment

Improving Outcomes

DLA-20 Average Scores, 10/4/2023 – 12/31/2024

- The DLA-20 measures daily living skills across 20 areas, with scores ranging from 1 to 7, where higher scores indicate better functioning.
- 18% increase in Adult DLA-20 Scores
- 19% increase in Youth DLA-20 Scores
- These increases of scores from baseline to DLA-20s taken again in 3 months suggests measurable progress and highlights the effectiveness of the intervention.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/21/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:01 p.m. Chairman J. Nelson called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Clinic Overview
- Crisis Services
- Challenges
- Budget Request

2:01 p.m. Char Ferrell, Regional Director, Northwest Human Service Center, Behavioral Health Division, Health and Human Services testified and presented the clinic overview previous testimony #30565 and #30602.

2:25 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, clarified budget detail #30602.

2:26 p.m. Char Ferrell, Regional Director, Northwest Human Service Center, Behavioral Health Division, Health and Human Services continued with testimony #30565.

2:39 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, clarified budget detail.

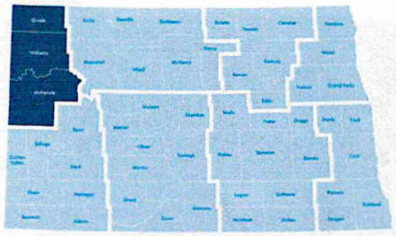
2:40 p.m. Char Ferrell, Regional Director, Northwest Human Service Center, Behavioral Health Division, Health and Human Services continued with testimony #30565.

2:42 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, clarified the underfunded section.

2:43 p.m. John Butgereit, Regional Director, North Central Human Services Center, Behavioral Health Division, Health and Human Services, testified and presented the clinic overview #30565.

3:24 p.m. Julie Baumgarn, Regional Director, Lake Region Human Service Center, Behavioral Health Division, Health and Human Services, testified and presented the clinic overview #30565.

3:49 p.m. Donna Aukland, Chief Financial Officer, requested that public testimony be held Monday on 01/27/25.



3:54 p.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

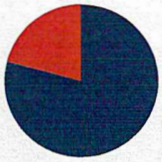
#30602

Northwest Human Service Center



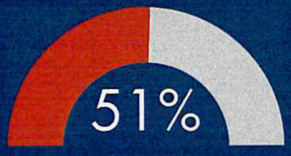
Northwest Human Service Center (NWHSC) provides services to individuals who live in Divide, Williams, and McKenzie counties. This region is comprised of 54,491 residents (7% of North Dakota's population) as estimated by 2021 U.S. Census Bureau.

January 2023 - December 2024

14,876 Services Provided **TO** **1,215** Clients

Services to Youth
3,092

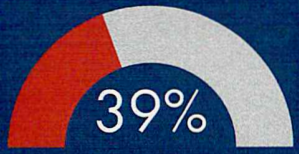
Services to Adults
11,784



Assessment Services

776 Individuals Screened → **359** Full Assessments Completed → **347** Individuals referred to NWHSC following Full Assessment

NWHSC recommended establishing care and providing services for 45% of the individuals screened at their facility.



Crisis Services

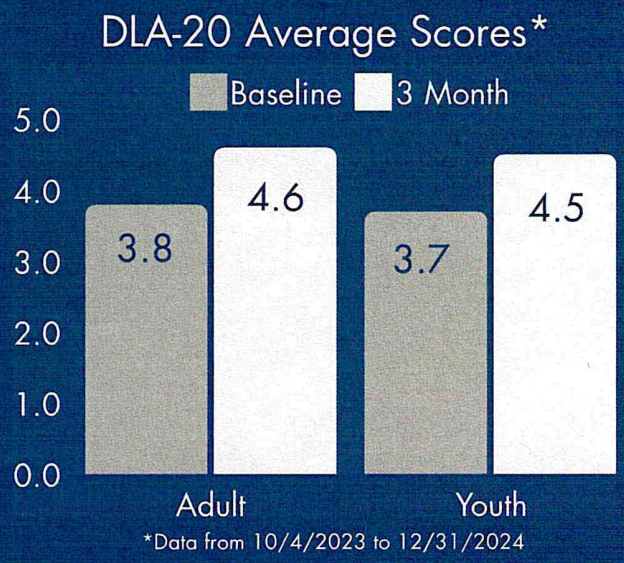
Total number of Crisis Calls to Call Center → **1300**

of Crisis Calls Registered with Call Center resulted in HSC on-call being notified

Total Crisis Services Provided by HSC → **3274**

of Crisis Services resulted in Mobile Response

Increasing Service Needs



1207

Behavioral Health Services provided in Jails

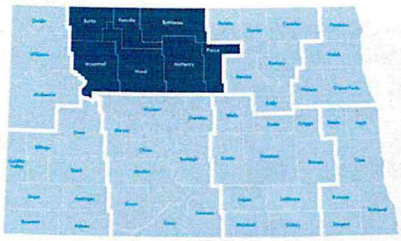
Improving Outcomes

21% increase in Adult DLA-20 Scores

22% increase in Youth DLA-20 Scores

Successes/Challenges

SUCCESSES



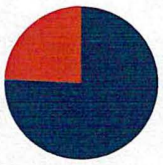
- *Commitment to High Standards of Quality and Compliance:* Successfully maintained its re-accreditation, licensure, and NHSC recertification
- *Community-Driven Crisis Solutions:* Stood up a Crisis Stabilization Unit & partnered with community partners to redesign Crisis Services.
- *Streamlined Care & Enhanced Support:* Increased Clinical Teams productivity and implemented solid service provision within the jail, optimizing our operations and expanded access to high-quality mental health care for a wider range of individuals.

CHALLENGES

- *Staffing Shortages:* High turnover rates and difficulties in recruiting and retaining qualified staff are hindering service delivery.
- *Leadership Gaps*: Insufficient on-site leadership is impacting operational efficiency.
- *Capacity Constraints:* Clinical teams are consistently operating at full capacity, limiting the ability to serve new clients.

NORTH Dakota | Health & Human Services
Be Legendary.

North Central Human Service Center



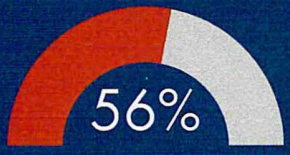
North Central Human Service Center (NCHSC) provides services to individuals who live in Bottineau, Burke, McHenry, Mountrail, Pierce, Renville & Ward counties. This region is comprised of 98,663 residents (13% of North Dakota's population) as estimated by 2021 U.S. Census Bureau.

January 2023 - December 2024

73,693 Services Provided **TO** **2,183** Clients

Services to Youth
17,811

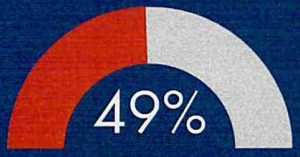
Services to Adults
55,882



Assessment Services

1,515 Individuals Screened → **1,280** Full Assessments Completed → **1,224** Individuals referred to NCHSC following Full Assessment

NCHSC recommended establishing care and providing services for 81% of the individuals screened at their facility.



Crisis Services

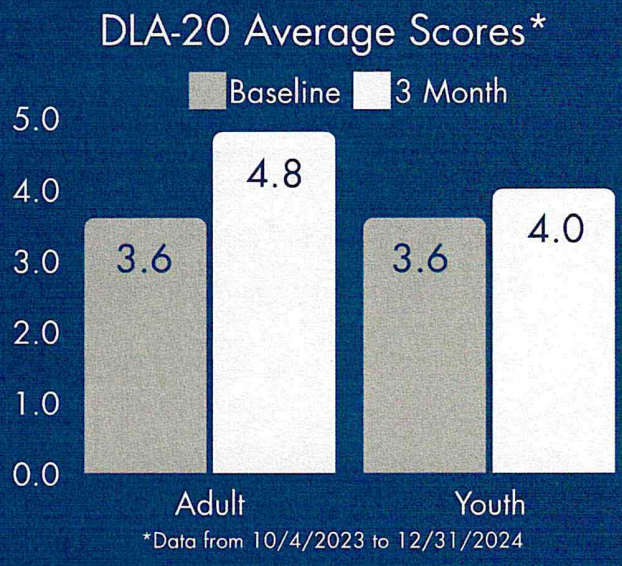
Total number of Crisis Calls to Call Center → **1962**

of Crisis Calls Registered with Call Center resulted in HSC on-call being notified

Total Crisis Services Provided by HSC → **3933**

of Crisis Services resulted in Mobile Response

Increasing Service Needs



220

Behavioral Health Services provided in Jails

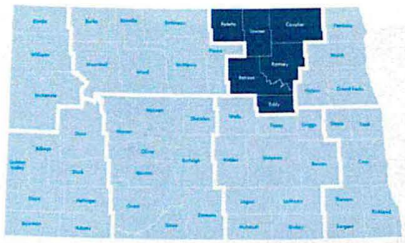
Improving Outcomes

33%
increase in Adult DLA-20 Scores

11%
increase in Youth DLA-20 Scores

Successes/Challenges

SUCCESSES



- *Reduced Out-of-Home Placements:* Collaboration between Zones and community providers to discuss youth cases has led to a reduction in out-of-home placements for Region 2.
- *Substance Use Disorder Services and Partnerships:* Contracts with three Low-Intensity Residential facilities (ASAM 3.1) for substance use treatment, offering a total of 32 beds. NCHSC also provides ASAM 1, 2.1, and Aftercare. NCHSC Psychiatrists can prescribe Suboxone, and the organization actively participates in community efforts to address substance use disorders among individuals in jail.
- *Enhanced Crisis Services:* NCHSC operates a Drop-In Crisis Unit and a 12-bed Crisis Stabilization Unit, providing essential support for individuals experiencing mental health and substance use crises.

CHALLENGES

- *Limited Higher-Level Care:* A shortage of higher-level care options for individuals with mental health and substance use disorders.
- *Insufficient Supported Housing:* A lack of available supported/recovery housing options for individuals seeking a structured living environment.
- *Homelessness Support Gap:* The absence of a homeless shelter within the region.
- *Youth Medication Service Limitations:* Limited access to medication services for youth with mental health needs.

NORTH Dakota | Health & Human Services

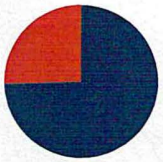
Lake Region Human Service Center



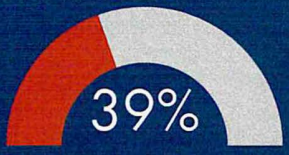
Lake Region Human Service Center (LRHSC) provides services to individuals who live in Benson, Cavalier, Eddy, Ramsey, Rolette, and Towner counties, including Spirit Lake Nation and Turtle Mountain Band of Chippewa. This region is comprised of 37,568 residents (5% of North Dakota's population) as estimated by 2021 U.S. Census Bureau.

January 2023 - December 2024

22,504 Services Provided **TO** **1,500** Clients

Services to Youth
5,743

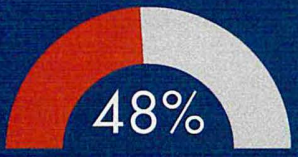
Services to Adults
16,761



Assessment Services

972 Individuals Screened → **667** Full Assessments Completed → **607** Individuals referred to LRHSC following Full Assessment

LRHSC recommended establishing care and providing services for 62% of the individuals screened at their facility.



Crisis Services

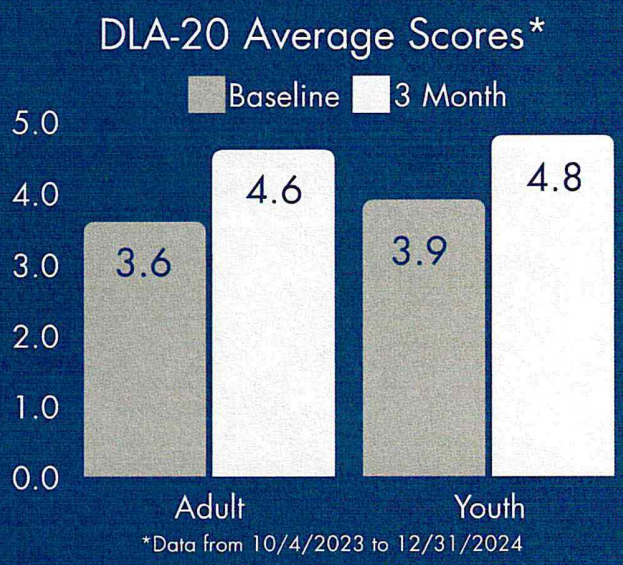
Total number of Crisis Calls to Call Center → **1647**

of Crisis Calls Registered with Call Center resulted in HSC on-call being notified

otal Crisis Services Provided by HSC → **1786**

of Crisis Services resulted in Mobile Response

Increasing Service Needs



406

Behavioral Health Services provided in Jails

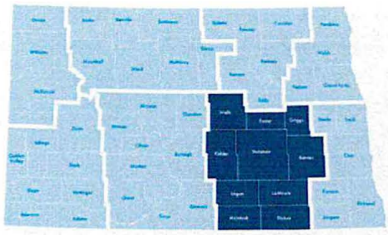
Improving Outcomes

28%
increase in Adult DLA-20 Scores

23%
increase in Youth DLA-20 Scores

Successes/Challenges

SUCCESSES



- *Staffing Successes and Identifying Service Gaps:* Has made progress in filling vacancies and has been successful in identifying and addressing key service needs within the community. Additionally, the agency has been successful in retaining talented interns, demonstrating a commitment to developing future mental health professionals from within.
- *Strong Community Partnerships and Collaboration:* Maintains positive working relationships with schools within the region and collaborates effectively with law enforcement, hospitals, and ambulance services during crisis situations. Additionally, they demonstrate a commitment to providing appropriate referrals and warm hand-offs to other service providers when necessary.

CHALLENGES

- *Avel E-crisis Services Utilization*: The usage of Avel E-crisis services has been relatively low in this region. Efforts are underway to identify and resolve barriers to utilization and increase usage.
- *Staffing Vacancies:* The organization currently has a vacancy for a daytime crisis position and a functional family therapy position.

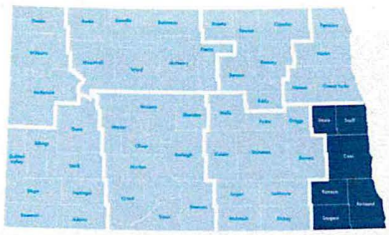
Successes/Challenges

SUCCESSES



- *Enhancing Service Availability and Workforce Development:* Actively expanding service availability through continued collaboration with community providers and by expanding treatment teams. Efforts to increase the workforce of Mental Health and Addiction Clinicians by working with local colleges are also underway.
- *Expanding Treatment Programs:* The organization has seen increased participation in the Rural Drug Court Program and successfully transitioned the Cooperative Treatment Release Program with Stutsman County Correctional Center from NDSH to South Central
-

CHALLENGES

- *Staffing Challenges and Recruitment Difficulties:* Faces significant challenges in filling critical positions due to a shortage of qualified mental health professionals in the region, particularly Psychologists and Licensed Addiction Counselors. This shortage impacts service delivery, including difficulty staffing the crisis team and filling Residential Direct Care Staff positions.

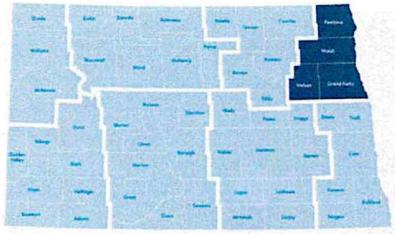
Successes/Challenges

SUCCESSES



- *Expanding Services and Building a Stronger System:* Enhanced youth services by hiring a new family peer support role, continuing to provide evidence-based programming with the Multi Systemic therapy (MST), and expanding to offer Functional Family Therapy (FFT). The First Episode Psychosis (FEP) team hired an Employment Specialist and improved crisis support through the addition of an iPad through grant funding, allowing individuals in the program to have access to 988 and safety planning, and made strides towards becoming a CCBHC, hiring key personnel like Behavioral Health Liaisons and a Care Coordinator.
- *Enhancing Workforce and Maintaining Excellence:* Joined the Training Academy for Addiction Professionals to address workforce shortages and increase the number of Addiction Counselors, achieved 10-year APA Accreditation, and secured COA Re-Accreditation, demonstrating a commitment to professional development and maintaining high-quality services.
- *Enhanced Outreach to the Homeless Population:* Established a Downtown Engagement Team to proactively reach out to homeless individuals, reduce barriers to services, and provide risk assessments and crisis planning.

CHALLENGES

- *Operational and Capacity Constraints:* Workforce shortages leading to a significant waitlist of adult programs, insufficient licensed supervisory staff that limits staff training and development, and limit space are hindering the organization's ability to expand services to meet community needs.
- *Loss of Residential Treatment Options:* The closure of Serenity Residential Facility in June 2024 has reduced the availability of residential treatment bed options in the community.

NORTH Dakota | Health & Human Services

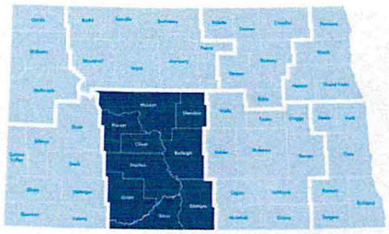
Successes/Challenges

SUCCESSES



- *Enhanced Crisis Support and Community Recognition of Crisis Service Staff* - Improved its crisis support services by implementing full-time night and weekend clinicians, ensuring greater accessibility and responsiveness for individuals in need. This dedication to community well-being was further exemplified by the recognition of Crisis Services staff, Taytum Jones B-mod, and Heather Schake Peer Support with a citizenship award from the GFPD, highlighting the strong and mutually beneficial relationship between the organization and the community it serves.
- *Strengthened Community Partnerships* - Strengthened its relationships with key partners in the community, including a Spectra (FQHCS), law enforcement, and Altru Psychiatry. These strengthened partnerships improve coordination of care, communication, and resource sharing, ultimately benefiting the community and individuals served.

CHALLENGES

- *Lack of Medically Supervised Withdrawal Management:* The region lacks access to local facilities for individuals requiring medically supervised withdrawal management, forcing patients to travel long distances for treatment.
- *Operational and Staffing Crisis:* Facing a shortage of licensed professionals, particularly those willing to work in community-based roles. This staffing crisis, exacerbated by high turnover rates and difficulties in recruiting and retaining qualified personnel, is severely impacting service delivery. Concurrently, clinical teams are consistently operating at full capacity, limiting the ability to serve new clients.

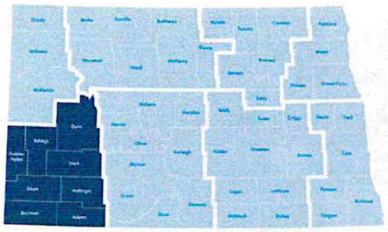
Successes/Challenges

SUCCESSES



- *Enhanced Family Therapy Services:* The establishment of a Functional Family Therapy (FFT) Team signifies a significant step towards providing evidence-based treatment for families struggling with mental health challenges.
- *Expanded School Collaboration:* The extension of MOUs with Bismarck Public Schools demonstrates a commitment to strengthening school-based mental health services.
- *Improved Crisis Response:* The addition of a third overnight Crisis Services Therapist has enabled the team to function at full capacity, ensuring greater availability and responsiveness to individuals in crisis situations

CHALLENGES

- *Uncertainty regarding the current work location:* The listing of Prairie Hills Plaza for sale has created uncertainty about the future of the current work location.
- *Workforce shortages and competitive compensation:* Facing difficulties in recruiting and retaining qualified staff due to a competitive job market and the need to offer competitive compensation packages.
- *Lack of substance use disorder residential programming:* There is a gap in the availability of residential programs for individuals with substance use disorders in the region, limiting acc to essential treatment services for those in need.

*Data from 10/4/2023 to 12/31/2024

Successes/Challenges

SUCCESSES

- *Pioneering Suboxone Treatment and Expanding Access to Services:* Badlands was the first HSC to implement Suboxone prescribing and has significantly increased access to mental health services b eliminating "priority populations" and ensuring comprehensive assessments for nearly all screened individuals.
- *Staffing Successes and Internal Development:* Despite some vacancies, Badlands has successfully hired a psychologist and FFT therapists. The organization joined the TAAP and will soon have its first internal employee graduate as a Licensed Addiction Counselor (LAC) through the program, demonstrating the success of its internal development strategy. Additionally, two other employees are graduating with their MSWs and will enter supervision plans, further strengthening the clinical team through "growing our own" approach.
- *Expanded Group Programming:* Successfully expanded its group programming to both youth and adults, offering increased access to services through both daytime and evening hours.

CHALLENGES

- *Challenges in Recruiting Mental Health Professionals:* Inadequate access to child psychiatry services has resulted in longer wait times, reaching up to 30-60 days. Addressing this challenge requires collaboration with other regions for cross-coverage. Additionally, hiring and training qualified therapists pose significant challenges due to competitive salaries, limited applicant pools, and the time investment required to train trainees when unable to hired trained therapists.
- *Challenges with Current Residential Facility Layout:* The current residential facility lacks adequate space and layout to safely accommodate walk-ins or drop-offs, which is not aligned with SAMHSA best practices. Safety concerns related to line of sight also exist. The organization is currently working with JLG to address these issues.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB1012
1/22/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

9:00 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Clinic overview
- Crisis Services
- Successes
- Challenges
- Budget review

9:01 a.m. Ashley Zabka, Clinical Director, South Central Human Service Center, Health and Human Services, testified and presented an over view of the clinic previous testimonies #30565, #30602.

9:45 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, provided information regarding travel nurse contracts.

9:45 a.m. Ashley Zabka, Clinical Director, South Central Human Service Center, Health and Human Services, continued with testimony #30565.

9: 46 Donna Aukland, Chief Financial Officer, Health and Human Resources, spoke to the impact of grants on Certified Community Behavioral Health Clincs.

9:48 a.m. Pam Sagness, Executive Director, Behavioral Health Services Division, Health and Human Services provided information regarding future grant opportunities.

9:49 a.m. Ashley Zabka, Clinical Director, South Central Human Service Center, Health and Human Services, continued with testimony #30565.

9:52 a.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

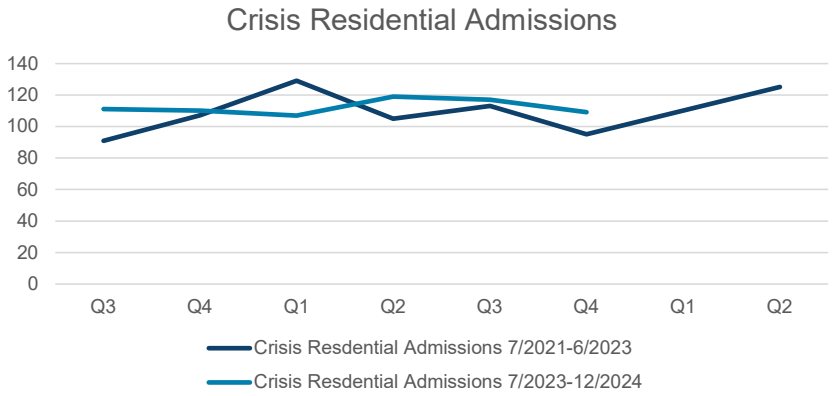
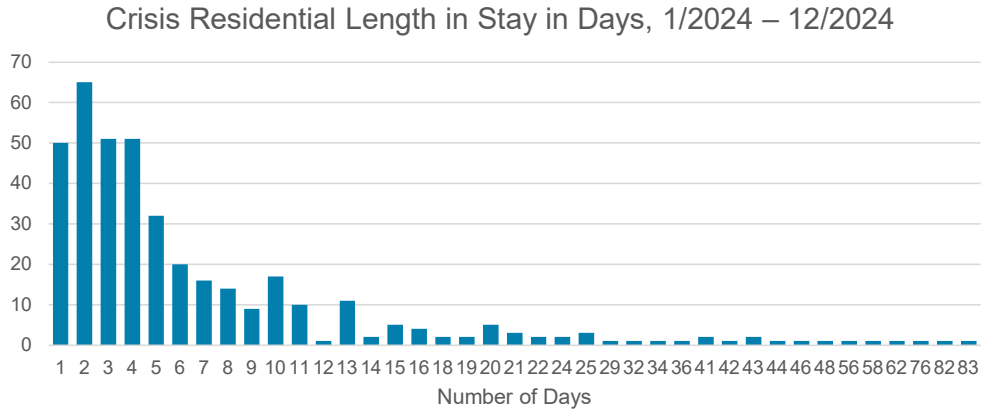
53,832 adult services



362 youth served

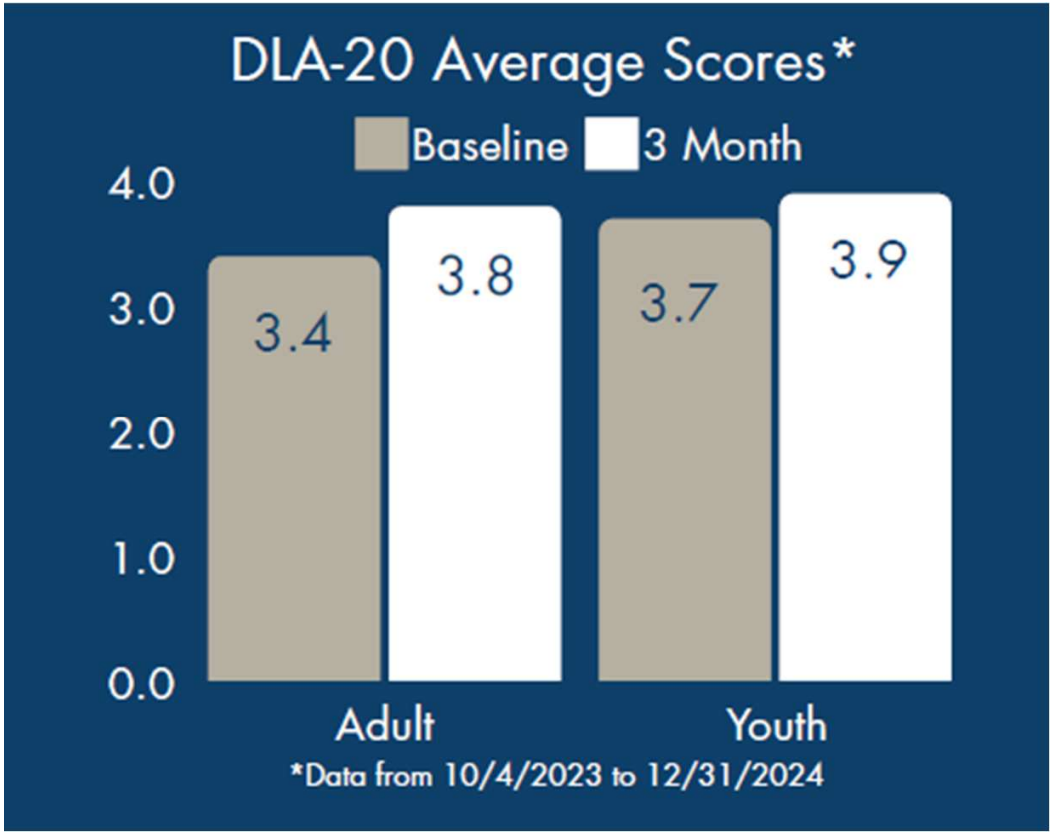


9,237 youth services

Southeast HSC

Clinics Overview: Our role/services

Crisis Residential Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)



Admissions to the crisis residential facility have remained consistent, with an average monthly admission count of 36 in 7/2021-6/2023 and 37 in 7/2023-12/2024. However, capacity was reduced by around 33% the majority of this last biennium due to reduced staffing resources.

According to the *National Council for Mental Wellbeing Roadmap for the Ideal Crisis System*, the average length of stay in residential crisis programs range from 3-5 days to 7-10 days. While the majority of SE CRU length of stays do fall within this range, 28% of stays are longer than 10 days due to meeting a gap in care. These longer stays result in fewer beds available for new admissions.

Improving Outcomes

DLA-20 Average Scores, 10/4/2023 – 12/31/2024

- The DLA-20 measures daily living skills across 20 areas, with scores ranging from 1 to 7, where higher scores indicate better functioning.
- 11% increase in Adult DLA-20 Scores
- 5% increase in Youth DLA-20 Scores
- These increases of scores from baseline to DLA-20s taken again in 3 months suggests measurable progress and highlights the effectiveness of the intervention.

Improving Outcomes

DLA-20 Average Scores, 10/4/2023 – 12/31/2024

- The DLA-20 measures daily living skills across 20 areas, with scores ranging from 1 to 7, where higher scores indicate better functioning.
- 23 % increase in Adult DLA-20 Scores
- 8% increase in Youth DLA-20 Scores
- These increases of scores from baseline to DLA-20s taken again in 3 months suggests measurable progress and highlights the effectiveness of the intervention.

NORTH Dakota | Health & Human Services
Be Legendary.

Key Accomplishments

- Achieved 4-year Council on Accreditation (COA) expedited re-accreditation.
- Ruth Meier's Adolescent Center (RMAC) achieved a 3-year Commission on Accreditation of Rehabilitation Facilities (CARF) re-accreditation.
- Roll-out of Avel services in all regions in June 2024 to partner with local law enforcement to provide telehealth crisis support.
    - Walsh County Sherriff's Office
    - Grafton Police Department
    - Pembina County Sherriff's Office
    - Cavalier Police Department
    - Grand Forks County Sheriff's Office

Be Legendary.

NEHSC Successes

Grafton Satellite Clinic Fully Staffed

RMAC Youth Residential remodeled and 10 beds

Psychiatrist active in Grand Forks County Jail

Functional Family Therapy hired

Enhanced Recruiting and Retaining Workforce

Substance Use Residential at 90% occupancy

NORTH Dakota Be Legendary. | Health & Human Services

Service Expansion Towards CCBHC

- Licensed Addiction Counselors recruiting
- Peer Support
- Clinical Care Coordinator
- Behavioral Health Liaison
- Dr Julius experience in CCBHC
- Grafton Clinic Enhancement

NORTH Dakota Be Legendary. | Health & Human Services

NEHSC Challenges

Crisis Stabilization Unit at 50%

(5 of 10 beds)

Addiction Counselors not applying

Rural Behavioral Health Stigma

Understaffed for Daytime Crisis Staff

RMAC Retention of Direct Care Staff

Higher Rate of Client No-Shows to Psychiatric Med Appointments

NORTH Dakota Be Legendary. | Health & Human Services

Ruth Meiers Adolescent Center (RMAC)

- Construction Remodel
  - Total number of construction days - October 4, 2023, to November 15, 2024, is **409 days**.
  - 10 total beds for Youth

RMAC Positives & Challenges

Positives

- RMAC is a Safety Net
- 5 FTE Direct Care Associates worked at RMAC
- 3 FTE Direct Care Supervisors were hired at RMAC
- 5 additional Direct Care Associates were hired in the fall of 2024

Challenges

- Staff have experienced incidents of physical aggression from residents, including situations where they have been physically harmed while providing care and ensuring safety
- PrimeTime Healthcare Contracting Staff.
  - Aug 2023 to Nov 2024
  - Total Cost $587,601
- Based on current staffing – no contracted staff

Rural Behavioral Health

- **Positives:**
  - Grafton Satellite Clinic has a total of 12 staff on site. Includes therapist, Addiction Counselors, Peer Support, Registered Nurse, Skills Trainers/Integration
  - Attend Walsh County and Pembina County Behavioral Health Workgroup
  - Connected with Public Health (Pembina County, Walsh County, Nelson County) to gather information regarding clients being served and how to increase behavioral health services.

- **Pain Points:**
  - Rural population has an increase in behavioral health Stigma
  - Social Determinants of Health
    - Poverty and Economic Instability
    - Isolation and Loneliness
      - Mental health challenges like depression and anxiety.
    - Recruitment and Retention:
      - Rural areas struggle to attract and retain skilled behavioral health professionals.

16,016 youth services

West Central HSC

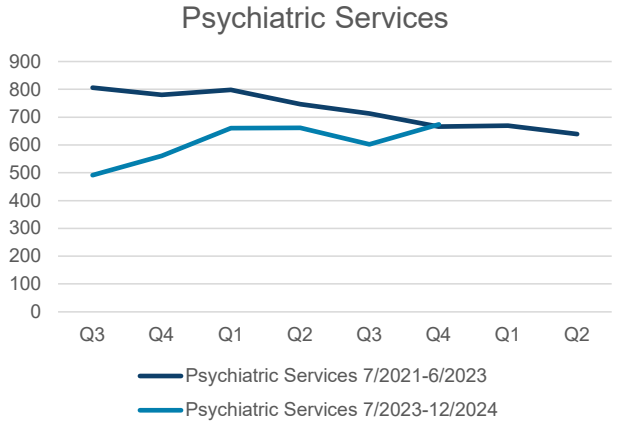
Clinics Overview: Our role/services

Assessment Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)

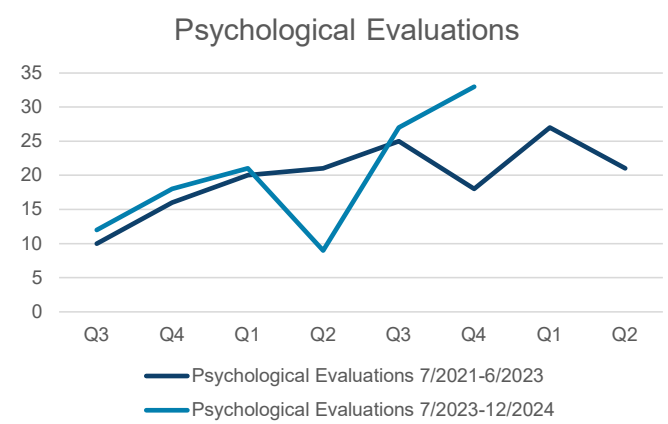
Increased Efficiency:

- Number of individuals who referred to a full assessment after initial screening increased by 25% (from 59% to 74%).

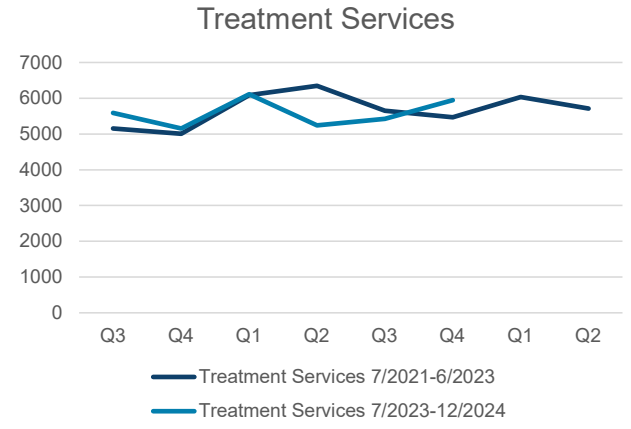
Enhanced Impact:



- 90% of individuals are now recommended for services following a full assessment.



NORTH Dakota Be Legendary. | Health & Human Services



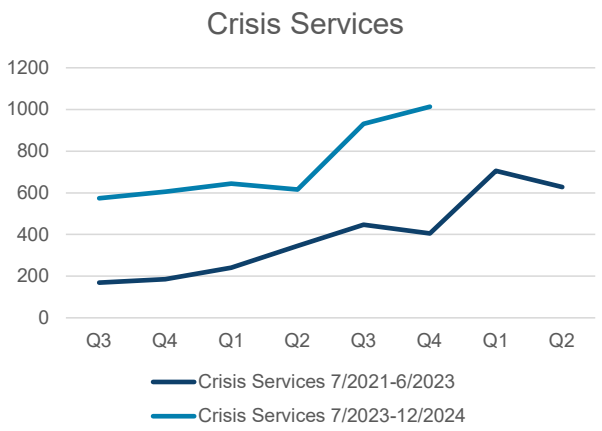
West Central HSC

Clinics Overview: Our role/services

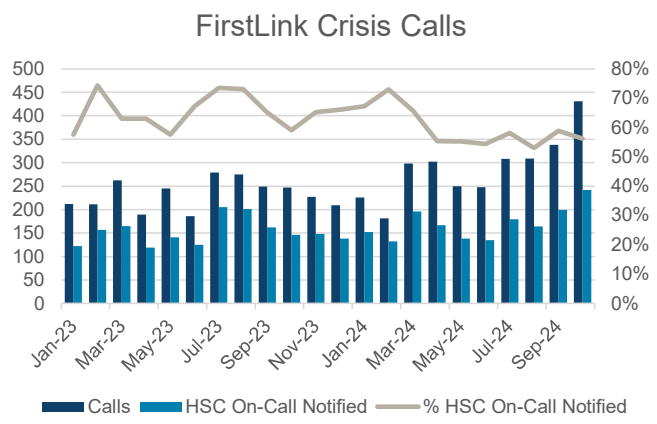
Specialized & Treatment Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)

Psychiatric services saw a bit of a decrease. Monthly average services dropped from 242 to 202, and the average number of people served decreased from 133 to 122.

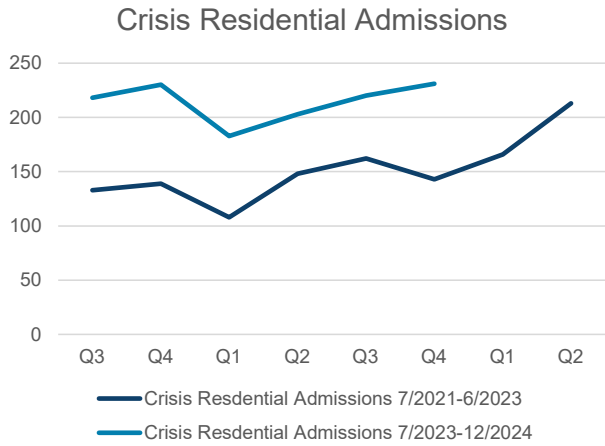
Statutorily required Psychological Evaluations have remained steady over the past couple of bienniums with a monthly average of 7 services.



Treatment services include both mental health & SUD services, and the amount of services provided remained fairly steady with a monthly average of 1,894 services a month in 2021-2023, to 1,860 services a month.



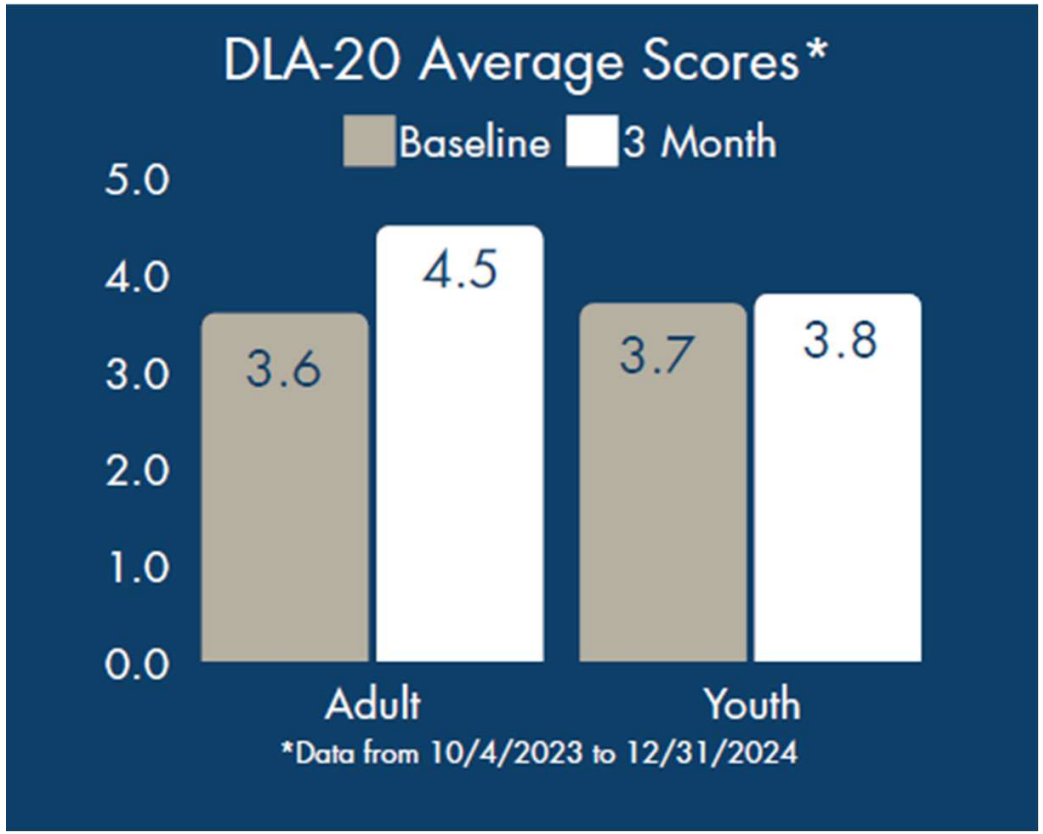
West Central HSC



Clinics Overview: Our role/services

Crisis Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)

**FirstLink data is from 1/2023 – 10/2024*



Crisis service utilization has increased this biennium. We are currently providing an average of 244 monthly crisis services this biennium, compared to 130 in the previous biennium.

There is an average of 258 crisis calls a month to the crisis center, FirstLink . On average, 63% of these calls require notification of the HSC crisis on-call team.

Monthly average admissions to the crisis residential facility have increased, from 51 in 7/2021-6/2023 to 72 in 6/2023-12/2024.

Improving Outcomes

DLA-20 Average Scores, 10/4/2023 – 12/31/2024

- The DLA-20 measures daily living skills across 20 areas, with scores ranging from 1 to 7, where higher scores indicate better functioning.
- 25% increase in Adult DLA-20 Scores
- 3% increase in Youth DLA-20 Scores
- These increases of scores from baseline to DLA-20s taken again in 3 months suggests measurable progress and highlights the effectiveness of the intervention.

Jan. 22, 2025

NORTH Dakota Be Legendary. | Health & Human Services

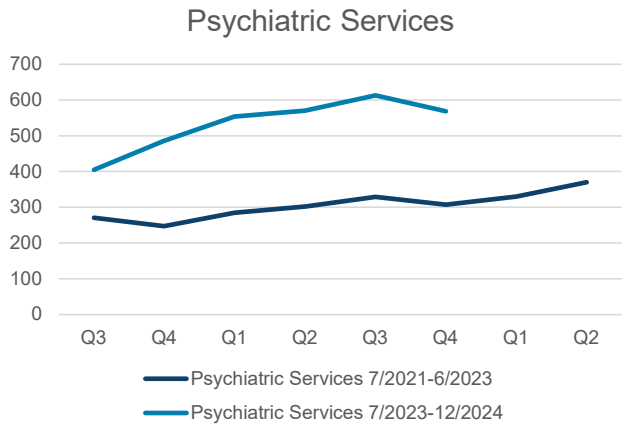
Badlands HSC

Clinics Overview: Our role/services

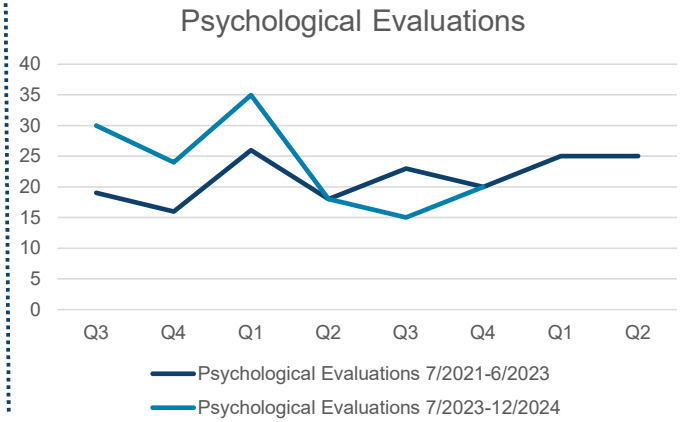
Assessment Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)

Increased Efficiency:

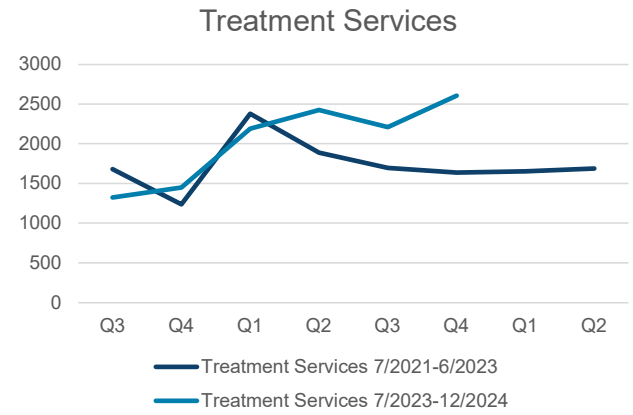
- While there was a reduction in requests for initial screen for services, the number of full assessments provide has maintained.
- Number of individuals who referred to a full assessment after initial screening increased by 52% (from 55% to 85%).



Enhanced Impact:



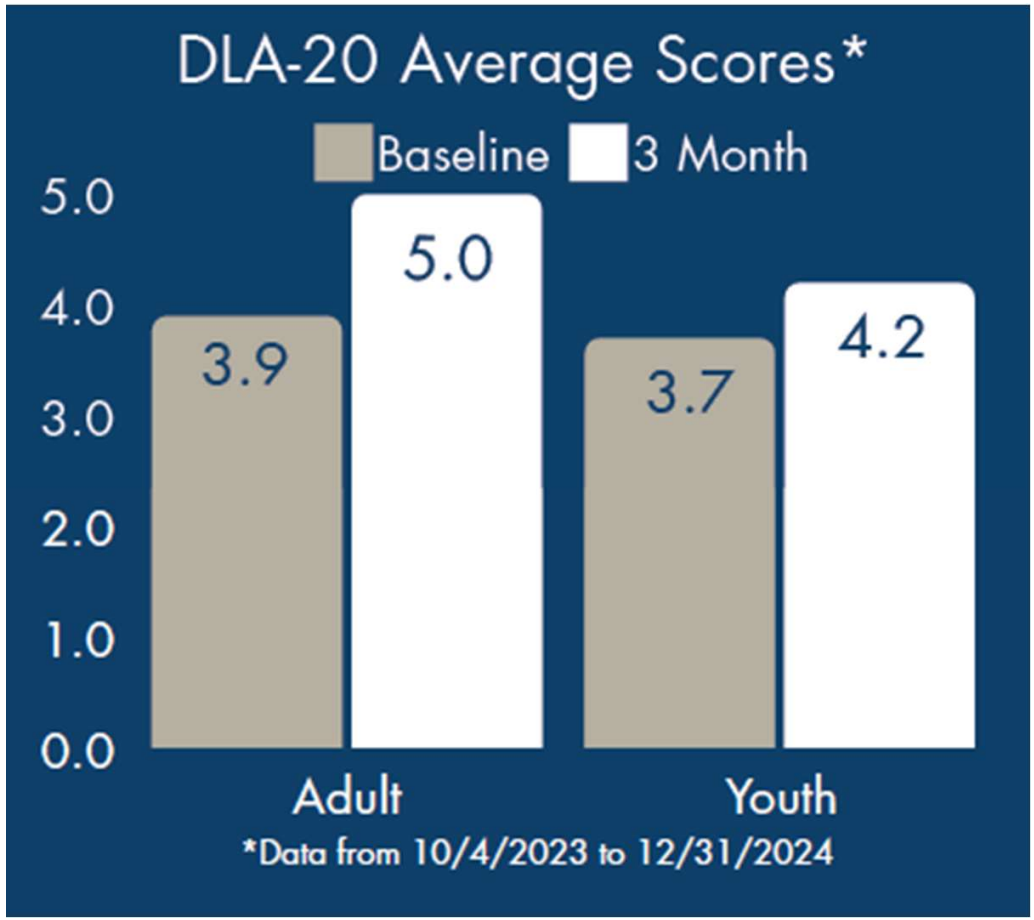
- 95% of individuals are now recommended for services following a full assessment (previously 93%).



Badlands HSC

Clinics Overview: Our role/services

Specialized & Treatment Services: Biennium Comparison (7/2021-6/2023 vs. 7/2023-12/2024)



Psychiatric services saw an increase. Monthly average services rose from 102 to 178, and the average number of people served increased from 64 to 85.

Statutorily required Psychological Average services stayed steady at an average of 8 a month. The average number of people served a month in 7/2021 – 6/2023 was 7 compared to an average of 8 from 7/2023 - 12/2024.

Treatment services include both mental health & SUD services, and services increased, with a monthly average of 578 services provided a month in 2021-2023 to an average of 679.

Improving Outcomes

DLA-20 Average Scores, 10/4/2023 – 12/31/2024

- The DLA-20 measures daily living skills across 20 areas, with scores ranging from 1 to 7, where higher scores indicate better functioning.
- 28 % increase in Adult DLA-20 Scores
- 14% increase in Youth DLA-20 Scores
- These increases of scores from baseline to DLA-20s taken again in 3 months suggests measurable progress and highlights the effectiveness of the intervention.

Successes – Workforce Development

- Two Functional Family Therapy (FFT) providers
- Licensed Psychologist (telehealth)
- Internal growth: “Growing our Own” – focus on retention
- ND Training Academy for Addiction Professionals (TAAP)
- Internship and Licensing

Regional Successes

First Human Service Center to Introduce Suboxone Clinic

Hired a psychiatric mental health nurse practitioner to increase psychiatric services and subsequently has been the first provider to initiate Suboxone prescribing to individuals with an Opioid Use Disorder (OUD).

- Currently serving 29 individuals in the Suboxone clinic.
- Utilizing safety net funds to assist individuals with paying for first month, as needed to ensure access to prescriptions.
- Services are concurrent with substance use treatment with a licensed addiction counselor.
- Working toward enhancement of full care team with prescriber, LAC, case manager, care coordinator, and peer support.

Regional Challenges

Recruiting Licensed Providers

- Functional Family Therapy Wait List
  - High demand for this service throughout full region
- Mental Health Wait List
  - Two mental health therapist vacancies (one youth and one adult)
  - Wait list one week to thirty days depending on intakes
  - Weekly clinical staffing to match individuals to availability and need/specialization
- Youth Psychiatry Wait List
  - Wait list up to six weeks to see provider (previous was up to three months)
  - Working with UND Residency to advocate for maintaining youth rotation
  - Successfully advocated for additional hours of youth psychiatry
- Location, licensing challenges and competitive pay are contributing factors

Regional Challenges

Crisis Drop-In Infrastructure Needs

- Crisis Stabilization Facility (CSU) is not compliant to SAMHSA's National Behavioral Health Crisis Care Guidance to provide crisis drop-in.
  - Space limitations and layout limit the ability to provide a dedicated space for confidentiality and individual safety and security
  - Will offer coordinated drop-in if needed
- Jack-and-Jill bathrooms joining two double-occupancy rooms limit admissions
  - Line of sight issues pose safety risk
  - Limited admission flexibility
  - Individuals in crisis do not tolerate roommates well
- Reduction in bed capacity due to use of room space occupied for other needs such as intake/consult space, telehealth, nursing assessment, director and crisis staff workspace, and waiting area.

Progress Towards Certified Community Behavioral Health Clinic

- Improving Access to Services
- Care Coordination
- Enhancing Relationships
- Expanding Services
- Crisis Services Expansion
- Letter of Intent

NORTH Dakota | Health & Human Services
Be Legendary.

Improving Access to Services

Expand Front Door Access

- No priority population
- Care Coordination first contact
- Risk Screenings and Triage
- Financial Counseling

Time to First Services

- Procedure changes with focus on efficiency in scheduling
- First service within two business days

Evening services

- Expanded on-site hours M-Th
- Continuing FFT and community-based services

NORTH Dakota Be Legendary. | Health & Human Services

Care Coordination Integration

- Access Team Development
  - Three clinical care coordinators
  - Two triage specialists
- Care Coordination is “The Golden Thread”
  - All individuals meet with a care coordinator at the front door to discuss individual needs and preferences
  - Assist with addressing basic needs and access to financial counseling
  - Walks with individual in community and throughout entire duration of receiving services at the clinic
  - Serves as the connector to all services and supports as primary point of contact
  - Coordinates collaboration with client, care team, external providers, and natural supports
  - Ensures seamless access to various services so the individual can drive their own care
  - Coordinates between transitions in services and levels of care

Enhancing Stakeholder Relationships

- Public-private stakeholder partnerships are essential to CCBHC
  - Hired a full-time Community Behavioral Health Liaison in December 2024 to maintain, foster, and improve relationships with stakeholders throughout entire region
  - Care Coordination agreements with existing and new stakeholders to ensure "the golden thread" connects individuals for better care
  - Engage in consistent and ongoing communication with stakeholders to bridge communication and improve processes to better serve individuals

- Emphasis on developing strategies for working with multiple sectors:
  - ✓ Consumers/Community Members/Businesses
  - ✓ Law Enforcement
  - ✓ Criminal Justice
  - ✓ Schools
  - ✓ Healthcare
  - ✓ State, local, tribal services
  - ✓ Veteran serving agencies
  - ✓ Media
  - ✓ Religious, fraternal, civic, and volunteer organizations
  - ✓ Private/Non-profit Human Service organizations

NORTH Dakota | Health & Human Services
Be Legendary.

Expanding Services

SUD Services

- Exploring gaps in SUD services regionally
- Suboxone Clinic
- Aftercare subgroup
- SUD group programming

Services for Families

- Functional Family Therapy (FFT)
- Parent/Caregiver Support Role
- Focus on child and parent/caregiver

Miliary Culture and Veteran Service

- STAR Behavioral Health Tier 1 by all staff
- STAR Behavioral Health Tier 2 for all licensed staff

NORTH Dakota Be Legendary. | Health & Human Services

Crisis Services Goals and Initiatives

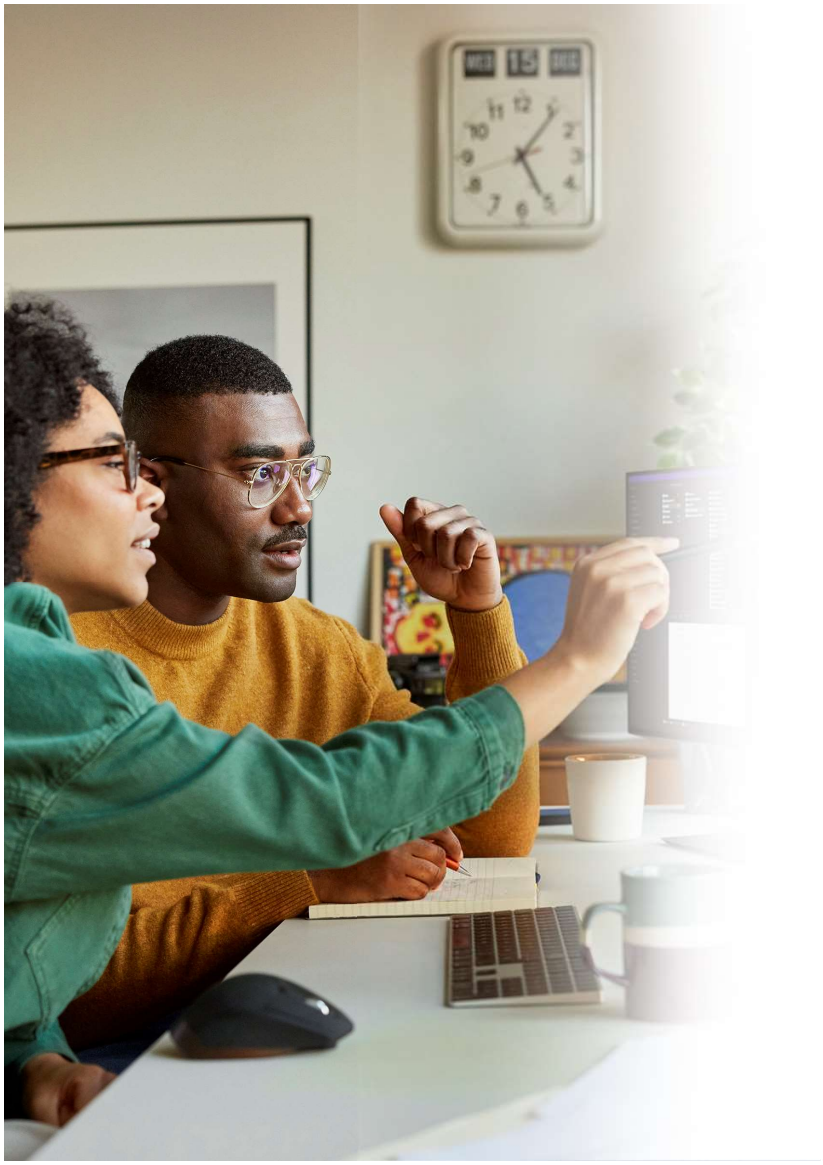
Full region daytime in person response

- Goal to add three afterhours Peer Support Specialists

Stakeholder Collaboration

- Rural police and sheriff departments
- Avel e-Care
- Emergency Departments

Drop-In Infrastructure Needs



- Contract with JLG Architects
- Modified drop-in availability

Afterhours CSU Services

- Statewide Contract with FasPsych/Legacy Aspire
- On site daily processing group offerings

NORTH Dakota Be Legendary. | Health & Human Services

Intent to Pursue CCBHC Certification

- Intent to Pursue Certification
  - Letter of Intent to pursue certification
  - Demonstration of alignment to certification criteria
  - Goals and objectives to implement or enhance criteria
  - Stakeholder letters of support

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/23/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:28 a.m. Chairman J. Nelson called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Workforce challenges
- Home and Community Based Services
- Aging and Disability Resource Link
- Older American Act Services
- Adult Protective Services
- Medicaid Tenets
- Long Term Care
- Medical Services

8:30 a.m. Nancy Nikolas Maier, Director, Adult and Aging Service, Health and Human Services, testified and presented a department overview on Long Term Care #30895.

10:28 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, spoke to funding #30895.

10:29 a.m. Nancy Nikolas Maier, Director, Adult and Aging Service, Health and Human Services, continued with testimony #30895.

10:49 a.m. Melanie Gaebe, North Dakota Policy Director for the Minnesota-North Dakota Chapter of the Alzheimer's Association testified in favor of the Adult and Aging Services budget #30786, #30794.

11:00 a.m. Sarah Aker, Executive Director, Medical Services Division, Health and Human Services, testified and presented a department overview #30888.

11:13 a.m. Nancy Nikolas Maier, Director, Adult and Aging Service, Health and Human Services, testified on home and community-based services #30888.

11:51 a.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

ALZHEIMER'S ASSOCIATION
Minnesota - North Dakota Chapter

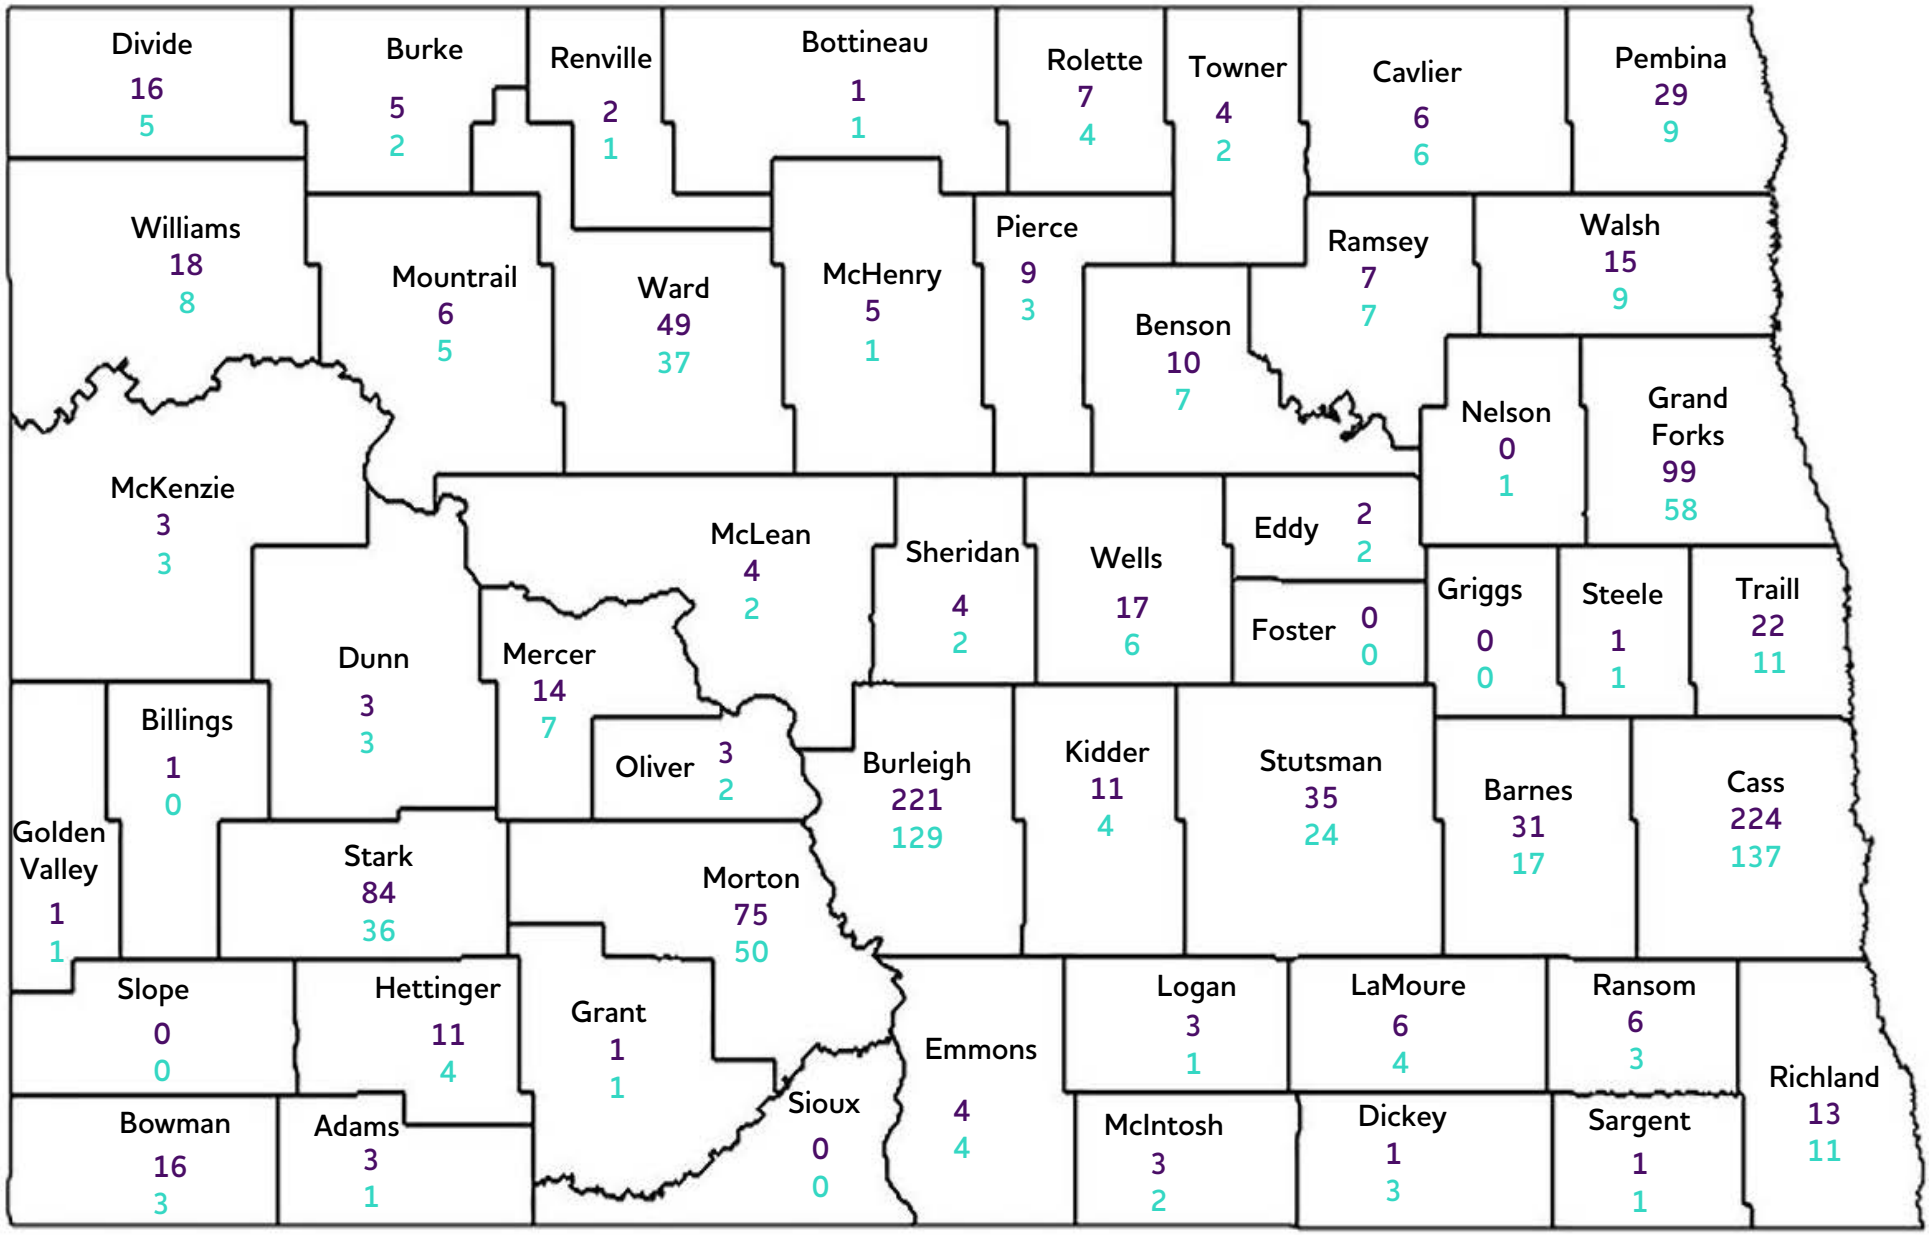
Testimony
House Bill 1012
House Appropriations
Human Services Division
Rep. Jon O. Nelson, Chairman
January 23, 2025

Good morning Chairman Nelson and members of the committee. My name is Melanie Gaebe and I am the North Dakota Policy Director for the Minnesota-North Dakota Chapter of the Alzheimer's Association**.** We have eight staff who provide programs and support to North Dakota residents impacted by Alzheimer's and other dementia, and their caregivers. Thank you for the opportunity to speak to you today in support of House Bill 1012. I stand here in support of the Adults and Aging Services budget proposals, in general and the Dementia Care Services Program funding specifically.

The Adults and Aging Services division administers our contract but we partner in so many ways beyond that one contract. There are many programs administered by the division who refer clients to us for assistance and we refer many clients to their support programs and services. This partnership continues to be a vital part of how we support people living with dementia and their caregivers.

Alzheimer's and dementia touch our lives as caregivers, loved ones, friends, and family; for those in the room today, please raise your hand if your life has been touched by this disease. And for those of you who may be new to the HR division, this is one of our standard questions. In the 2009 session, the legislature had the forethought to acknowledge how difficult Alzheimer's and other dementias are for the people living with the disease and their caregivers. That acknowledgement turned into action and the Dementia Care Services Program was the result.

The Dementia Care Services Program began in 2010, and we appreciate the continued funding included in this bill for the Dementia Care Services Program. Through the 15 year partnership between the State and the Alzheimer's Association, we have provided a lifeline for thousands of North Dakota families facing the unknown of living with or caring for someone with memory loss. The map provided shows the number of unduplicated caregivers and people living with dementia in each county who have received services since July 1, 2023. The Dementia Care Services Program has also provided dementia education for tens of thousands of community members and professionals across the state.



The Dementia Care Services Program has a number of goals. We provide information and education to professionals and the public regarding the symptoms of Alzheimer's disease and related dementias, the benefits of early detection and diagnosis, the availability of treatments, research opportunities, and available services. We also provide individuals with symptoms in alignment with mild cognitive impairment or dementia and their caregivers with consultation services and facilitate referrals to support their needs. Finally, we offer on demand training to direct care providers who manage and provide for the care of individuals with symptoms in alignment with mild cognitive impairment or dementia. The innovative services we provide allow people to remain safely in their homes and communities, delaying the need to be placed in long-term care facilities.

Dementia that is unmanaged negatively impacts the individual living with the disease, their caregivers, and ultimately creates a costly toll for communities and on the economy. The Dementia Care Services Program can help reduce higher costs related to dementia care. For example, studies have consistently shown that active management of dementia can improve the quality of life of affected individuals and their caregivers. Consider, for the current contract period, July 1, 2023 through December 31, 2024, this program has:

- Delivered **2,020** Care Consultations and Information and Referrals - for **1,217** caregivers on behalf of **698** people living with dementia, including **17** veterans living with dementia;
- Educated **2,932** community members across the state;
- Trained **110** law enforcement and **818** health care professionals; and
- Referred **57** people directly to the Aging and Disability Resource LINK.

The need for care and support across North Dakota continues to grow. Currently, just over eleven percent of our citizens over the age of 65 are living with dementia. As the number of people over the age of 65 grows, it will mean an increasing need for the services we provide.

Thank you again for the opportunity to be here today. I am happy to take any questions you might have.

- Caregivers (unduplicated) served by the DCSP
- Persons living with Dementia (unduplicated) served by the DCSP

Medical Services Presentation Roadmap

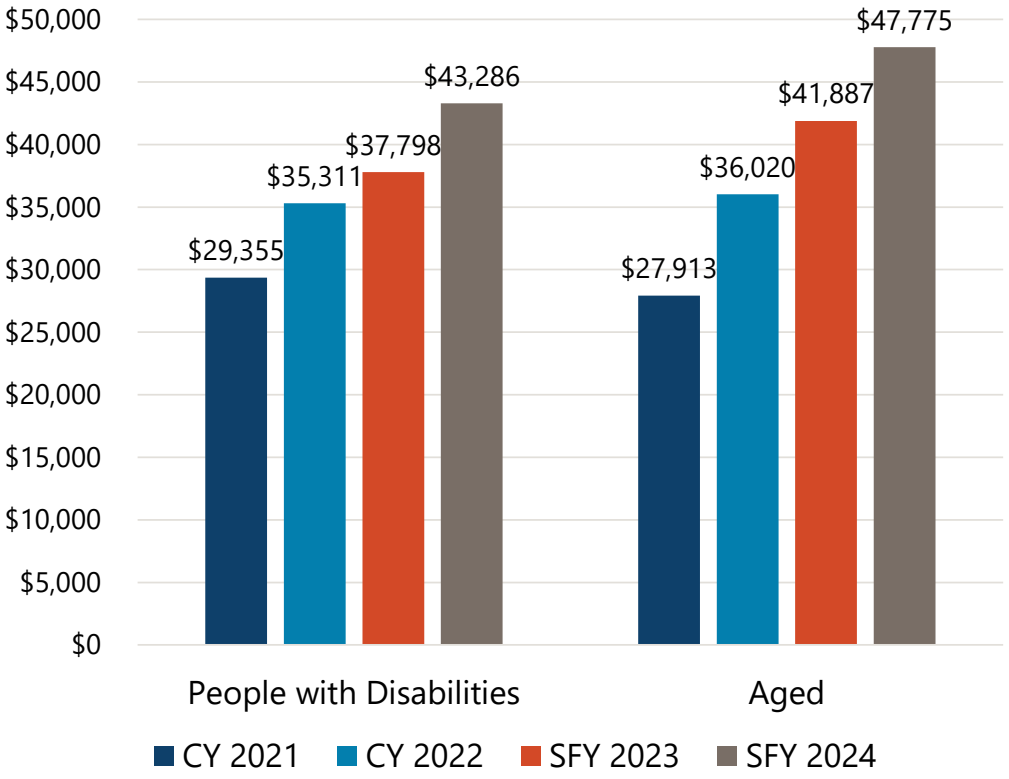
- Key Medicaid Tenets
- Long Term Care
  - 2025 – 2027 Budget & Other Resource Requirements
- Medical Services
  - 2025 – 2027 Budget & Other Resource Requirements
- Summary

NORTH Dakota | Health & Human Services
Be Legendary.

Key Medicaid Tenets

- Entitlement Program
  - Anyone who meets eligibility rules has a right to enroll and be served in Medicaid
    - HCBS waivers can be limited by a total number of slots.
  - Federal financial support
- Partnership with the Federal Government
  - Federal mandates and regulations obligate state action and expenditures
  - Federal approval required for changes to Medicaid program
- Not a traditional grant
  - Open ended funding source; no cap on total federal funds
  - Cost sharing model; State funding match required for use of federal funds

Rate Methodology Guiding Principles: Traditional Medicaid



- Predictable
- Consistent
- Transparent
- Data Driven
- Population Focused
- Quality & Outcomes Oriented
- Incentivizes Innovation, Efficiency & Community Based Care

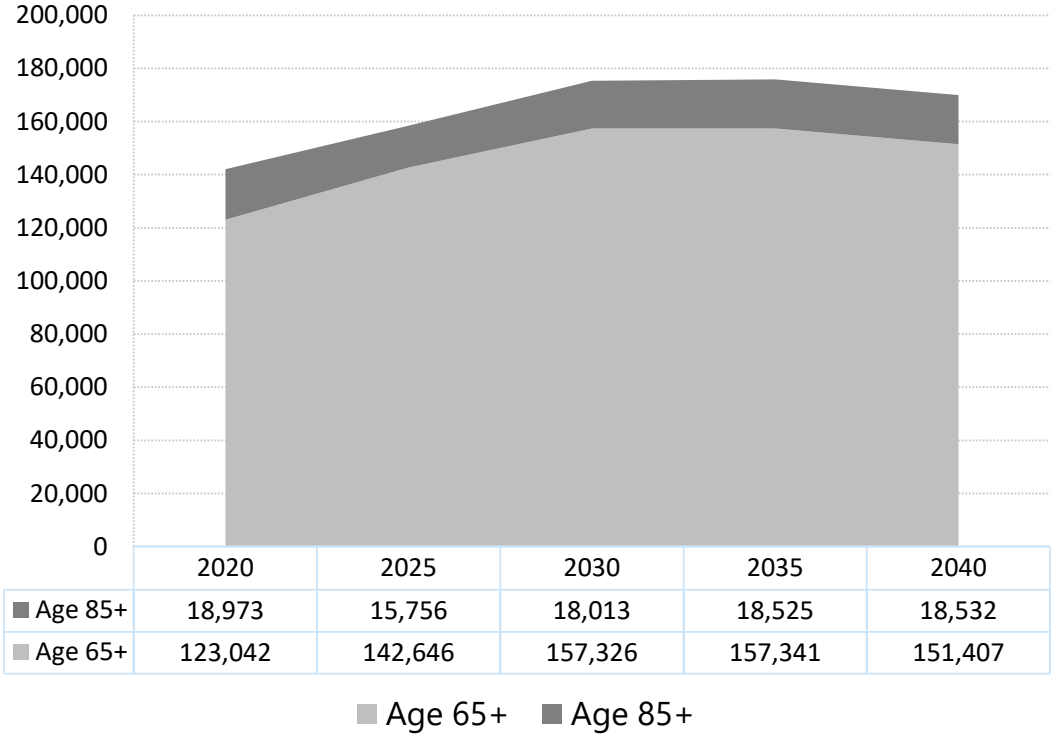
Per Capita Expenditures: Aged & People with Disabilities



- ND Medicaid ranked **1st for Aged per capita** expenditures.
- ND Medicaid ranked **7th for People with Disabilities per capita** expenditures.

Note: CY 2021 and CY 2022 Data obtained from Medicaid and CHIP Scorecard - Medicaid Per Capita Expenditures. SFY 2023 and SFY 2024 numbers calculated from ND TMSIS data.

NORTH Dakota Be Legendary. | Health & Human Services

Who we serve

Older adults and adults with physical disabilities make up a growing percentage of North Dakota's population

	2020	2025	2030	2035	2040
Age 85+	18,973	15,756	18,013	18,525	18,532
Age 65+	123,042	142,646	157,326	157,341	151,407

Source: 2024 ND State Data Center Population Projections

- The population age 65+ is expected to experience the **largest period of growth between now and 2035**
  - People age 65+ represent 18-19% of ND population
  - **Age 85+** consistently represents approx. 15% of total pop age 65+ but the **number of people** in that age group will **grow by 3,000** between now and **2035**

7 in 10

Americans 65+ will need LTC services for an average of 5 years

Long Term Care Eligibility

Functional Need

- Individuals must have a level of care that indicates a need for long term care.
- Assessments are used to measure an individual's needs. The assessment can help shape the care plan in addition to verifying eligibility.
- Functional needs can also drive acuity-based payments to providers.

+

Financial Need

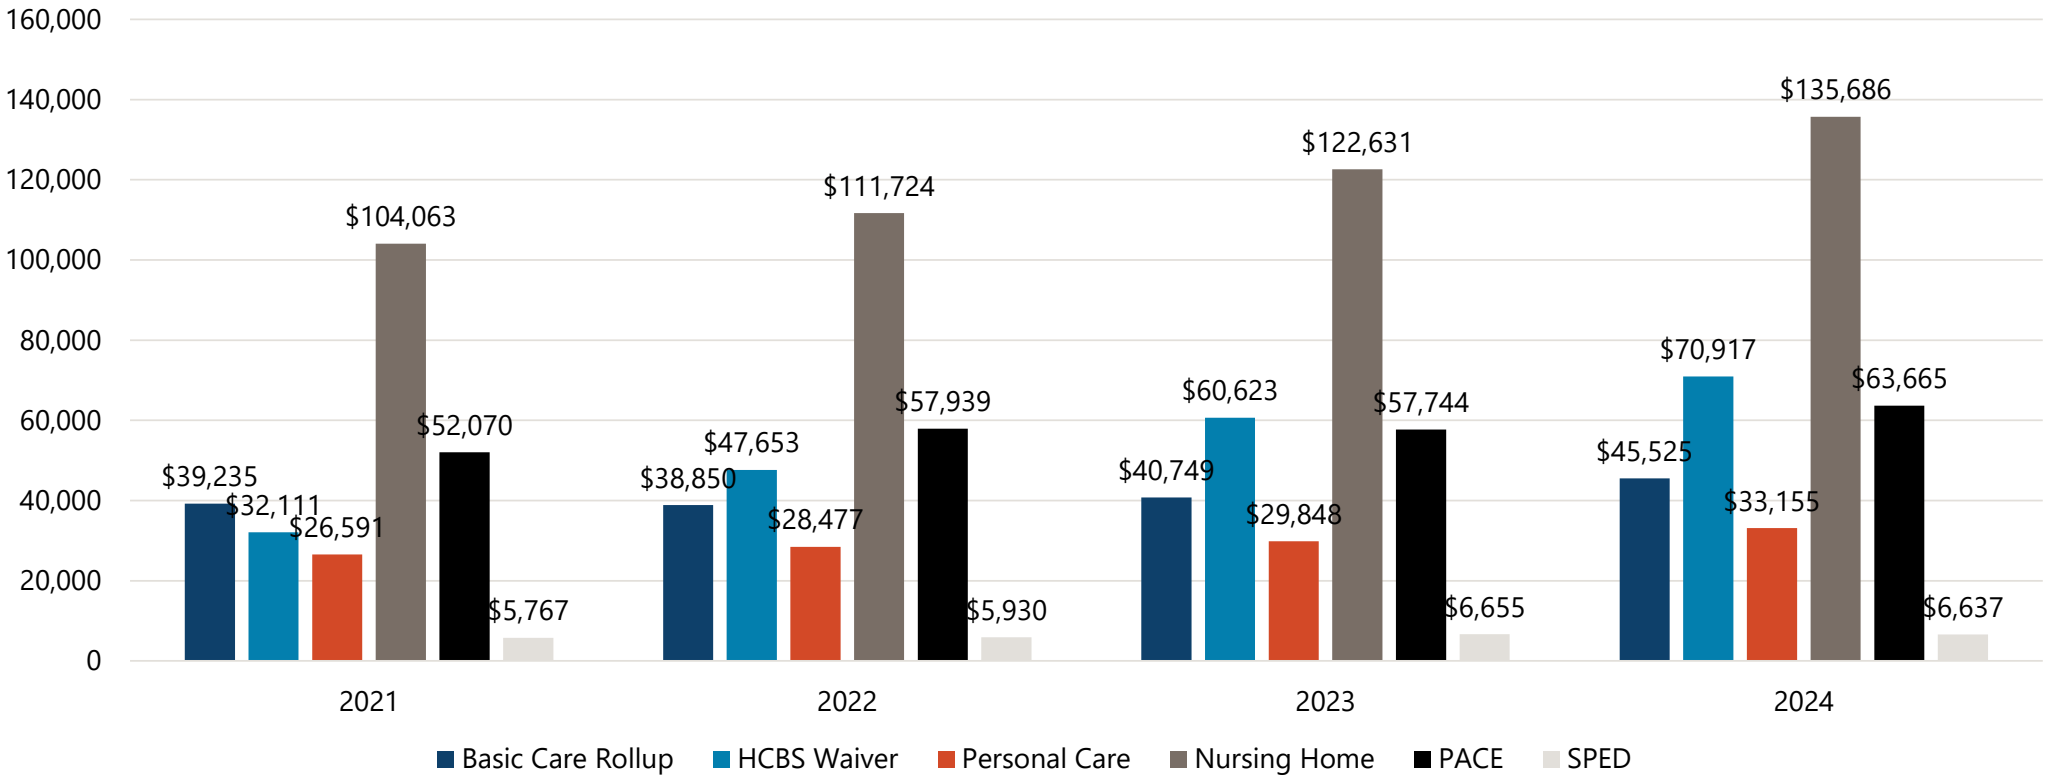
Income Limit

Income is any item an individual receives in cash or in-kind that can be used to meet basic needs.

Some Medicaid members must "spend down" their income to qualify for Medicaid. Members in an institution retain a personal needs allowance.

Asset Limit

Single: $3,000
Married: $6,000



Note: Special Spousal Impoverishment rules apply when the individual's spouse is not applying or not in a medical facility.

Medicaid LTC eligibility includes a 5-year lookback period to ensure that assets were not gifted or sold under fair market value.

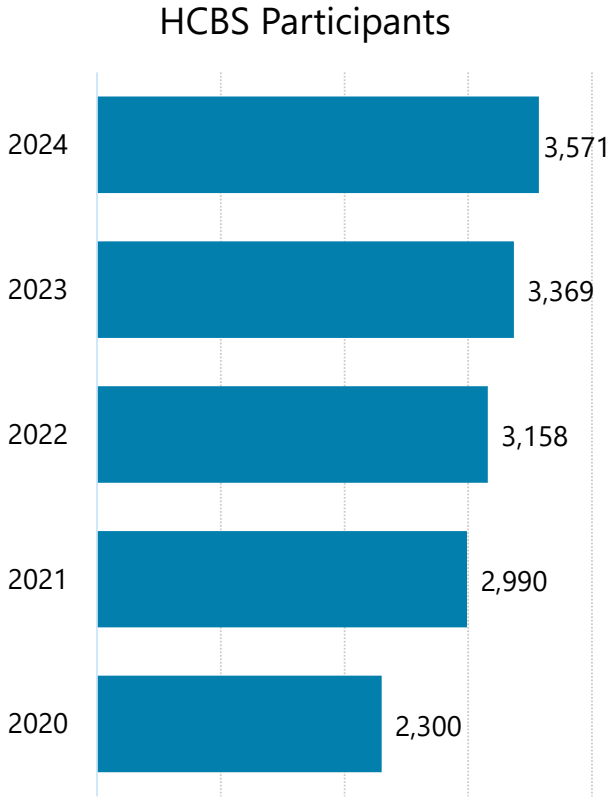
Nursing Facility Utilization & Expenditures



NORTH Dakota Be Legendary. | Health & Human Services

More North Dakotans are choosing home-based community care options every year

- ✓ The **demand** for in-home and community-based services has continued to **increase.**
- ✓ More HCBS participants have **complex needs** (medical and behavioral health) that increase the amount of time and skills necessary to provide **quality services.**
- ✓ **Rising acuity levels** have created a demand for more **complex services** and providers who can employ higher trained staff including **nurses and supervisory** staff.

54% increase since 2020

What is HCBS?
Services delivered in an **integrated setting**.

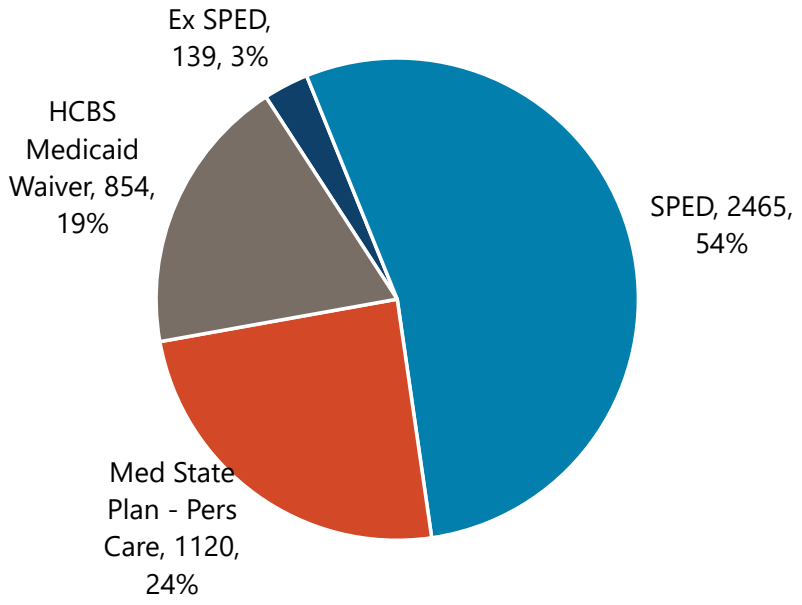
What is an integrated setting?
A private home, apartment etc., owned or rented by the individual or their family, or an individual adult foster care setting.

Cost to Continue: Home and Community Based Services Growth

Ongoing

Total	$64,814,924
General	$36,977,113
Federal	$27,837,811

The original submission of cost-to-continue related costs for HHS neglected to include HCBS Growth that is typically part of the calculation; the omission was an error and not reflective of change in policy or operation.



Demand for home and community-based services has continued to increase.

This is reflective of the growing number of North Dakota residents who are entering age ranges where health issues become more prevalent, as well as the success of the state's efforts to both divert and transition people from living in institutional settings.

Home-based community care options older adults and adults with physical disabilities

3,571

Number of people supported by HCBS in CY2024

Source: NDHHS HCBS Caseload Data Nov 2024 (unduplicated count)

- Primarily serves older adults and individuals with physical disabilities
- Recipients must be both functionally and financially eligible
- May have client cost share based on income
- Federal and state funds
- Recipients range in age from 17-104 years old

NORTH Dakota Be Legendary. | Health & Human Services

Adult & Aging Services

HCBS Case Management

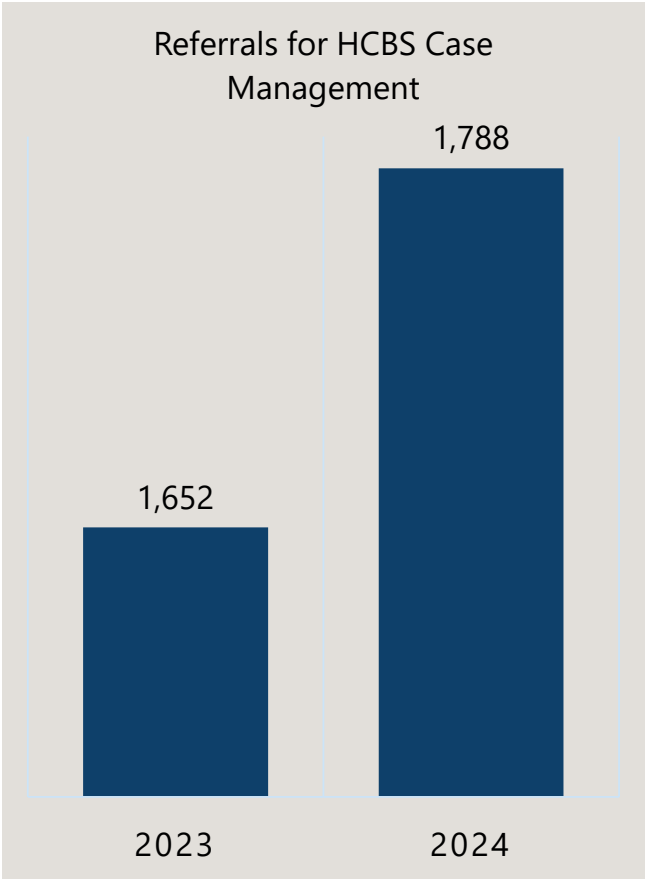
HCBS Case Managers

Provide the support and structure needed to connect eligible people in need of in-home and community- based care to qualified service providers (QSPs) in their community.

What do they do?

- Determine eligibility
- Conduct person-centered planning
- Assess needs
- Authorize services
- Monitor for health and safety
- Provide support and guidance to family caregivers

73 and **4**



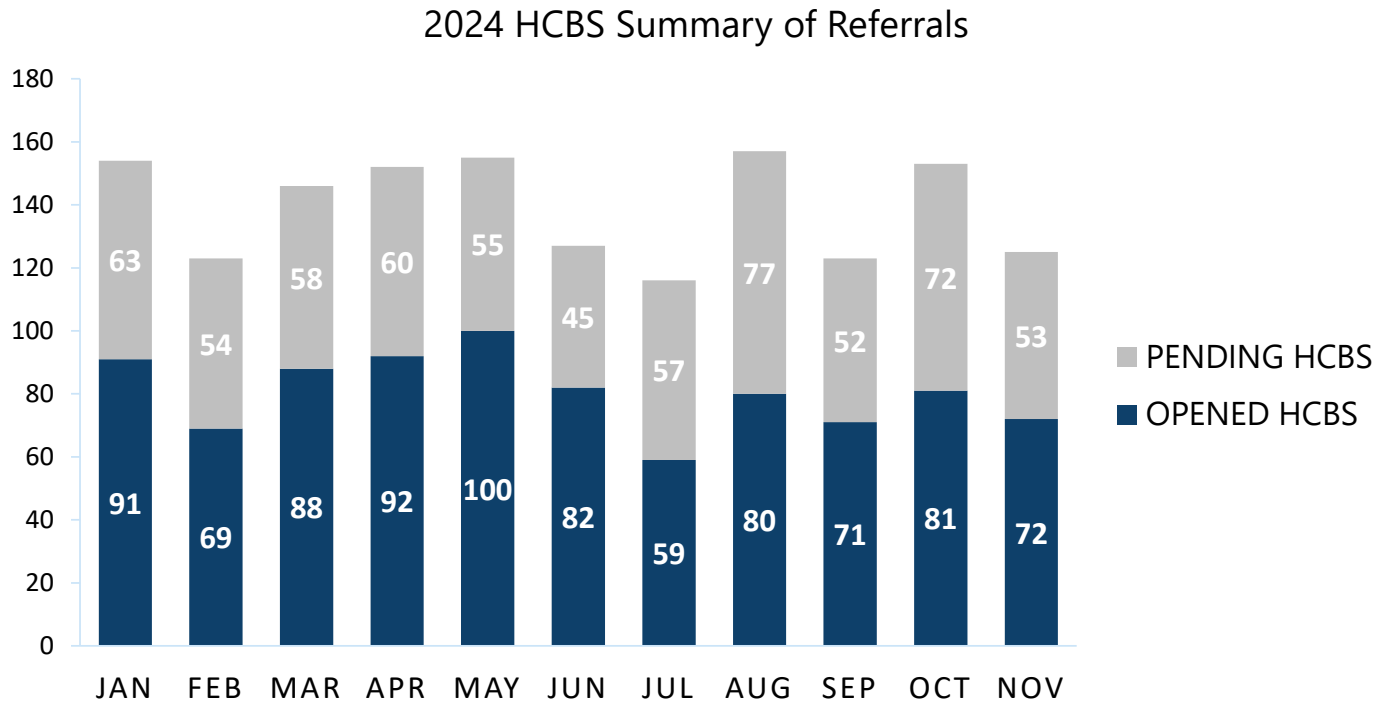
73 HCBS case managers and 4 Basic Care case managers are supervised by Adult & Aging Services

150 and **80**

On average, 150 new referrals and 80 new cases opened for HCBS each month

4,329

Provided Case Management to **3,538** HCBS recipients and **791** Medicaid Basic Care residents in 2024



Adult & Aging Services

HCBS Case Managers handle pending cases, new referrals and case closures

The nature of HCBS work means that caseloads are constantly changing -- there are many cases opening and closing each month due to:

- ✓ Changes in chronic health conditions
- ✓ Medical emergencies (stroke, falls) that increase level of disability and need for assistance
- ✓ Death

Adult & Aging Services

Supporting QSPs who deliver care is a top priority

Qualified Service Providers (QSPs)

Agency and individual independent contractors who enroll to provide various HCBS

1,359
Qualified Services Providers (QSPs) provide services

206
Agency QSPs

1,153
Individual QSPs

What motivates individual QSPs to enroll as a provider?
Someone important to them needed care.

Agency QSPs ranked the rate of compensation as the most important factor to retain employees.

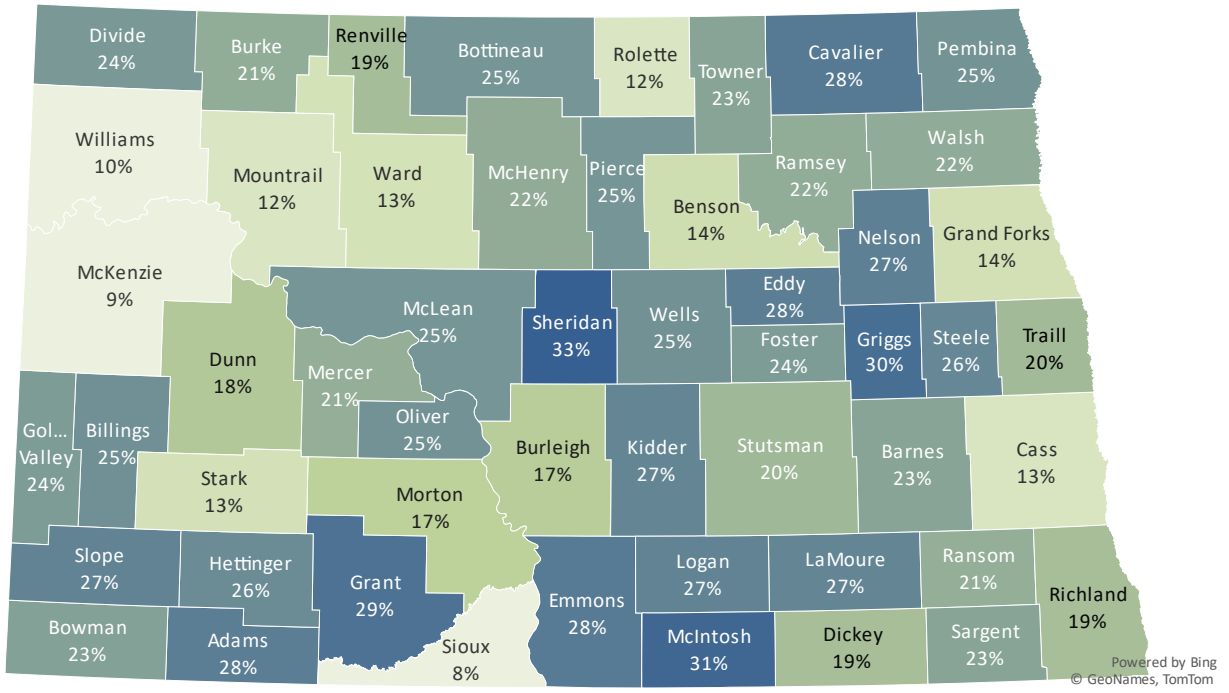
Connecting the Housing-Service Continuum to Budget

Long Term Care Services and Supports

Analysis of State Fiscal Year (SFY) 2020 and 2024 claims data | Average cost/month | Avg utilization/month

Between 2020 and 2024, North Dakota saw an increase in utilization of services at the entry-levels of the continuum of long term services and supports and a decrease in utilization of nursing home care.

Costs continued to increase across all service lines with the most significant increases associated with care types that serve the highest acuity levels.



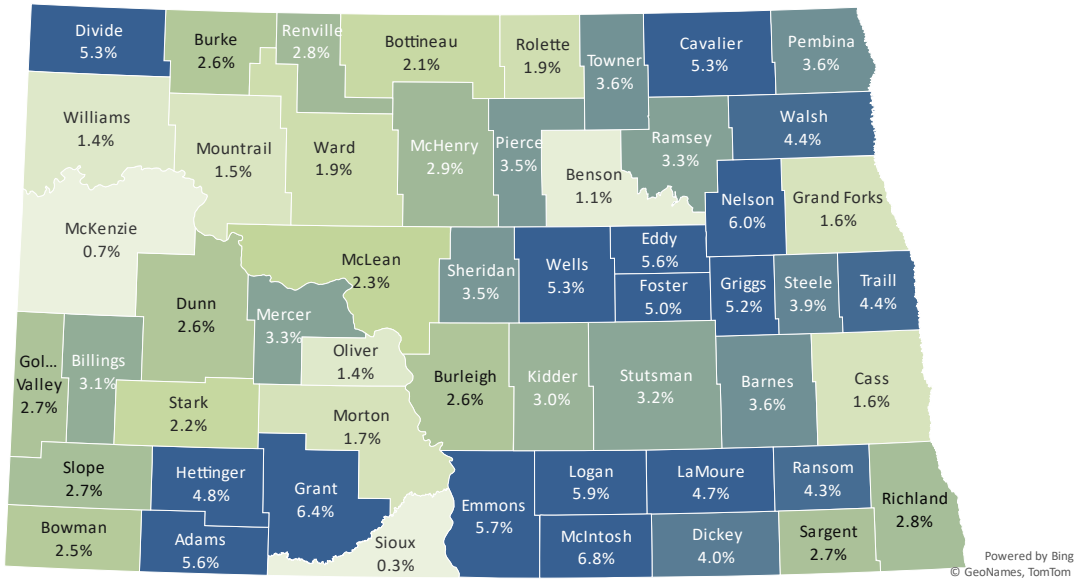
NORTH Dakota | Health & Human Services
Be Legendary.

There are several factors driving the need for the full array of Adult/Aging services and for HCBS generally

1. Population characteristics
   - % of people living alone
   - Age distribution
   - Disability prevalence
2. Demand
   - Shifting expectations about where/how to receive services
   - Technology-enabled environmental modifications
   - # of people needing services
3. Complexity of care needed
   - Co-occurrence of behavioral and physical health diagnoses

15.9% of ND population was age 65+ in 2022

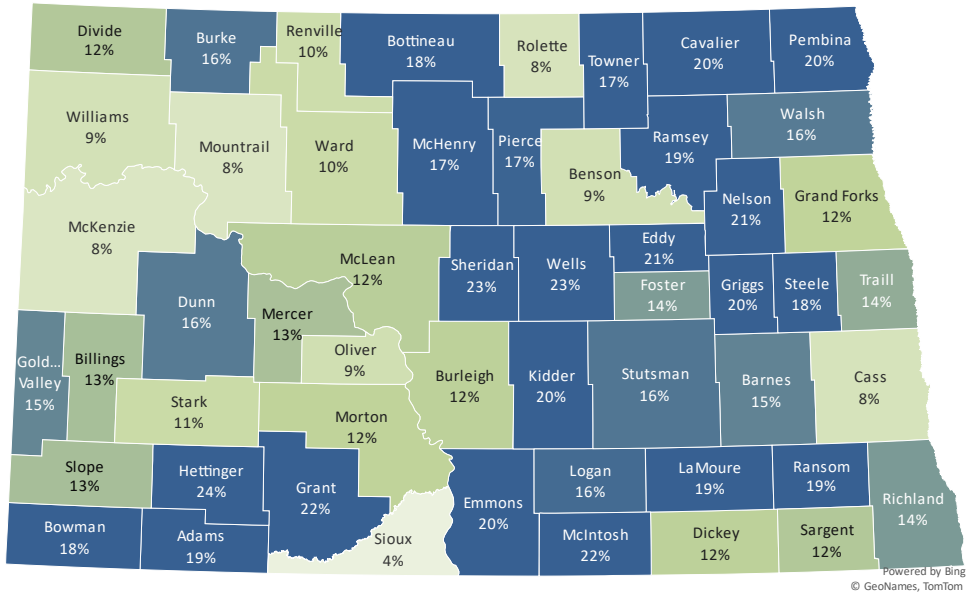
% of population age 65+ by county



NORTH Dakota Be Legendary. | Health & Human Services

The next 10 years will represent the most significant shift in demographics for ND and most US states

The patterns represented here (2022 data) will become more exaggerated between now and 2035

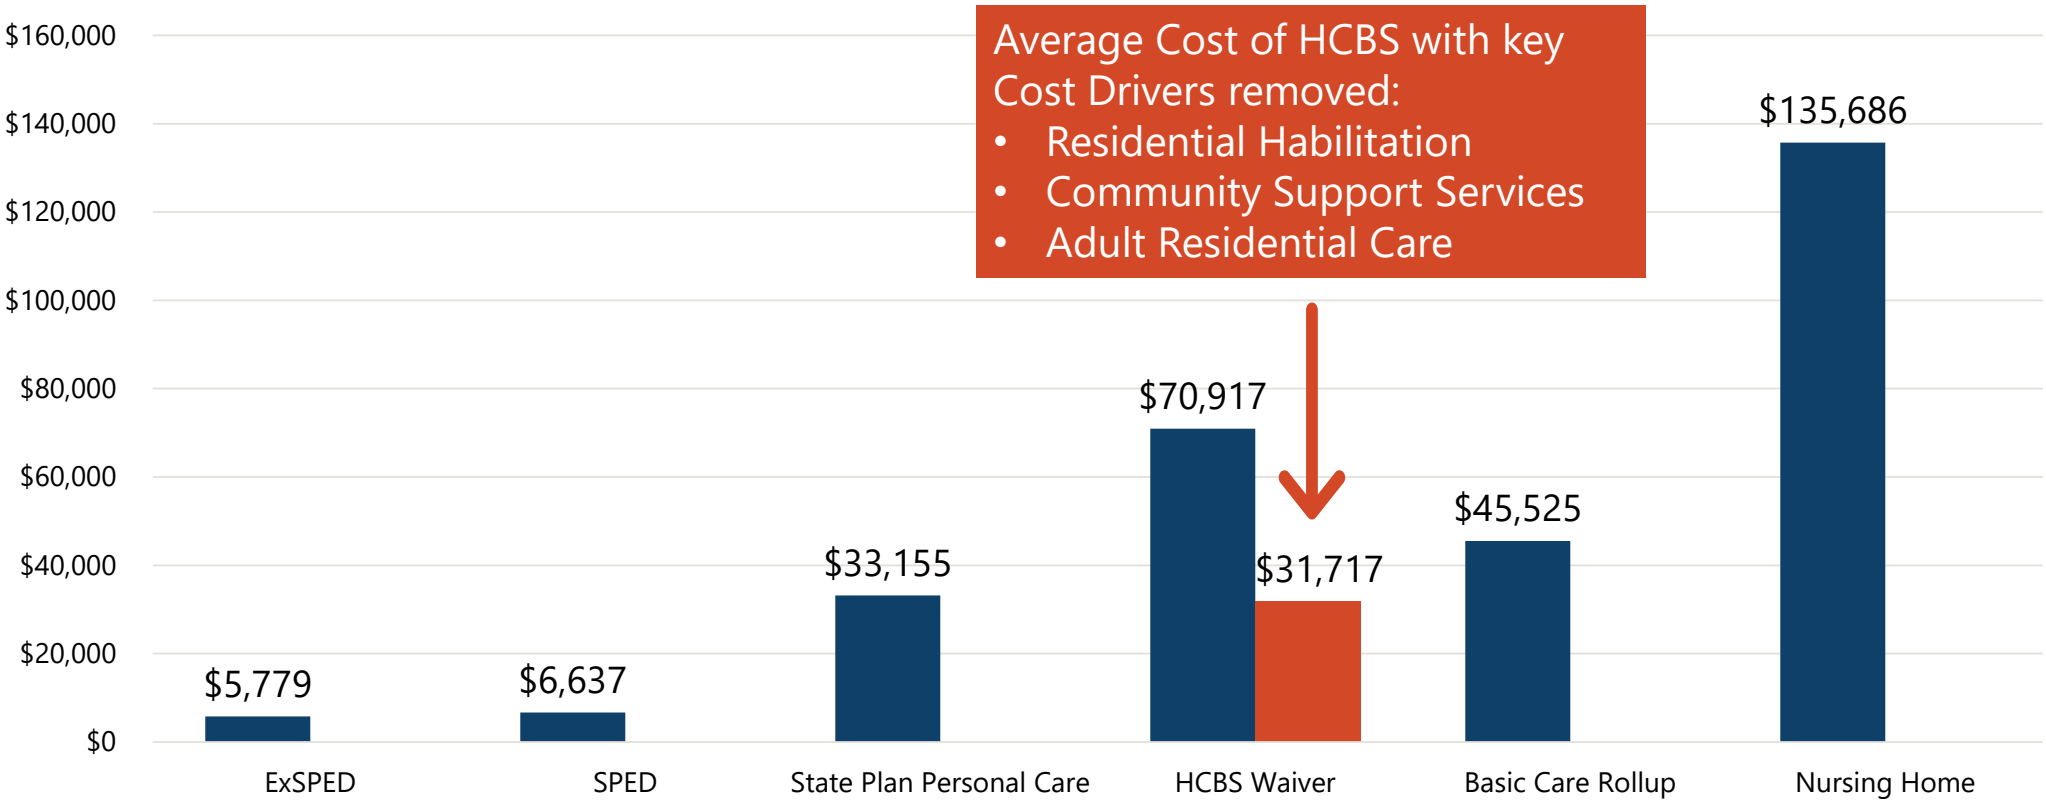


2.3% of ND population was age 85+ in 2022

% of population age 85+ by county

11.8% of ND households are someone age 65+ who is living alone

% of households by county consisting of a person age 65+ who is living alone (2022)



59% of current HCBS recipients **live alone** this is *above the national average* of 48%. → Lack of natural supports increases the need and amount of paid care necessary to maintain health and safety.

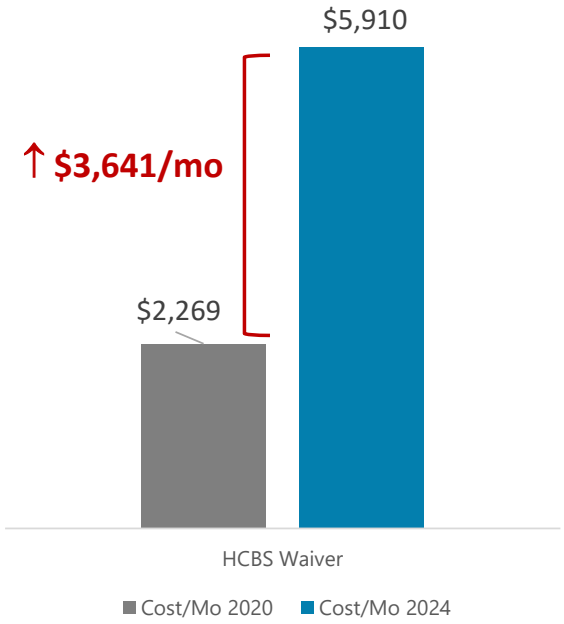
SFY 2024 Long Term Care Continuum

Average Cost Per Person



NORTH Dakota Be Legendary. | Health & Human Services

What's driving HCBS Waiver cost growth?

Today's HCBS Waiver serves individuals with **unique and complex needs**, including individuals:

- Transitioning from the State hospital
- Discharging from local hospitals
- Transitioning home from a nursing facility
- Who have received a "needs cannot be met" denial from a nursing facility

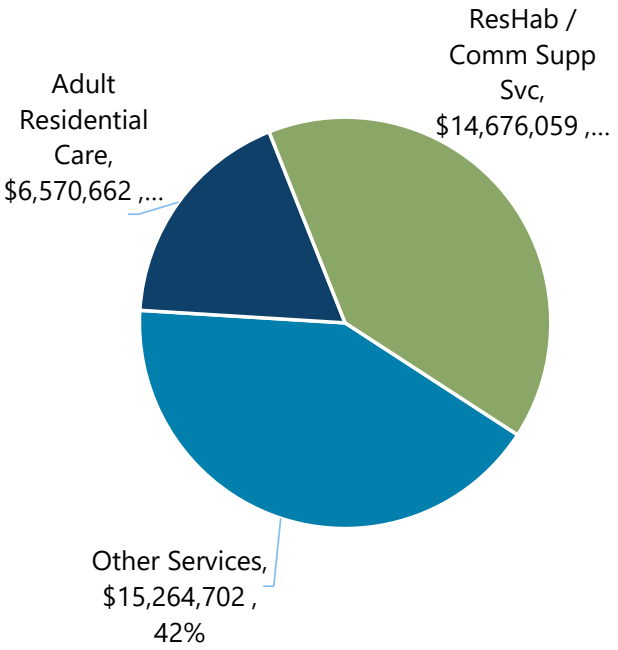
From 2020 to 2024, average monthly per person HCBS Waiver costs grew by 160%

Top HCBS Cost Drivers

1. **24-hour** delivery of complex cares
2. Prevalence of **serious mental illness** and **substance use disorder** in HCBS recipients
3. Increasing number of HCBS recipients with **complex medical** needs

NORTH Dakota | Health & Human Services
Be Legendary.

Cost driver #1



24-hour delivery of complex cares

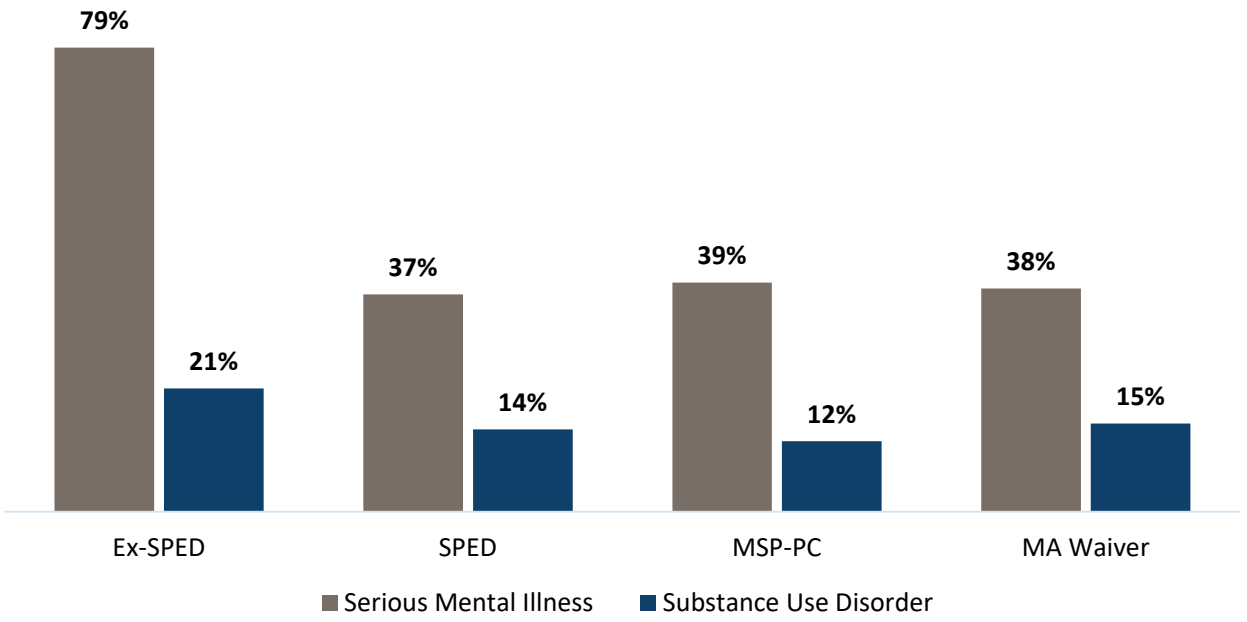
Adult Residential Care

- 24-hour residential services for individual with memory impairment or traumatic brain injury.
- Individuals have a daily need for a safe supervised structured environment, personal care, and medication supports.
- In SFY 24 **29%** (224) **of waiver participants** were enrolled in this service.
- Average cost per person per year = **$29,333**

Residential Habilitation and Community Support Svcs

- Up to 24-hour all inclusive supports for individuals who meet a nursing facility level of care and require daily services.
- Service requires providers to have a nurse and a care coordinator with a minimum of a 4-year degree.
- In SFY 24 **16%** (121) of waiver participants are enrolled in this service.
- Average cost per person per year = **$121,290**

16% of waiver **participants** account for **40%** of the **cost** of care



NORTH Dakota | Health & Human Services
Be Legendary.

Cost driver #2

Prevalence of Behavioral Health Needs

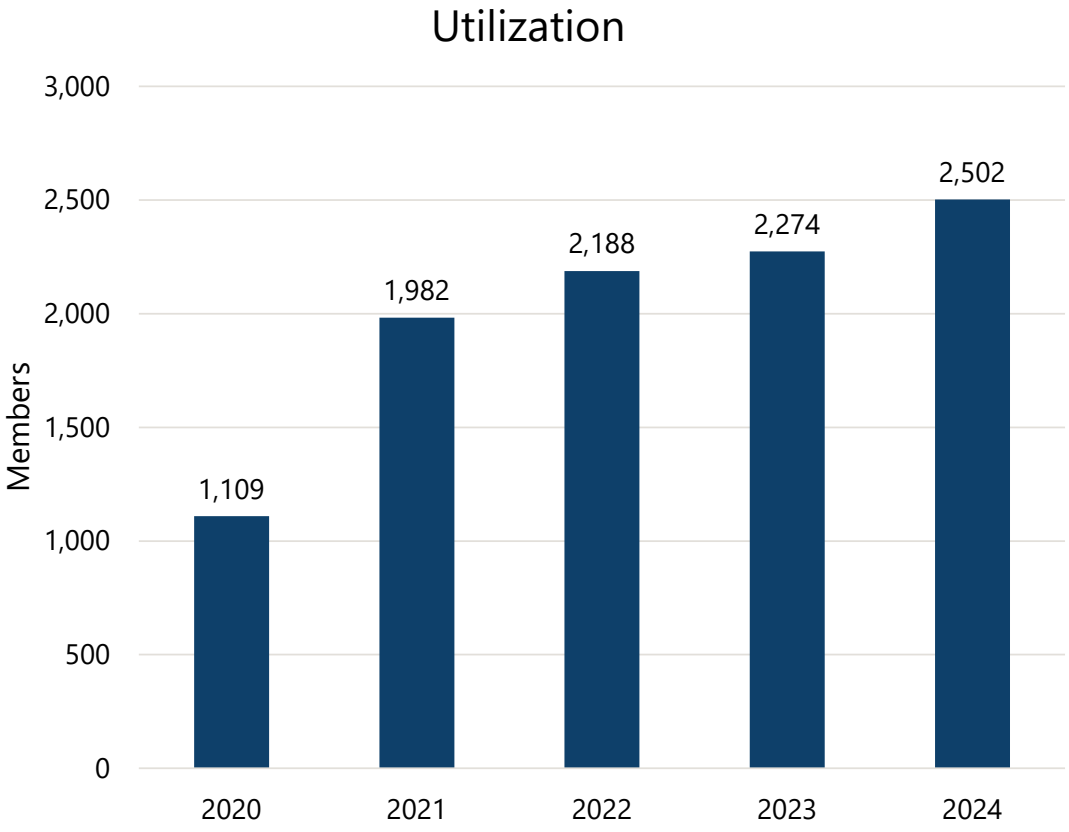
- An increasing number of individuals seeking HCBS services have significant behavioral health needs, including diagnoses of serious mental illness and substance use disorders.
- Family home care and other family caregiver service modes are common modes of service delivery.
- Appropriate caregiver training is essential to prevent caregiver burnout but upskilling and supporting QSPs remains a barrier.

% of HCBS participants by type of service reporting Serious Mental Illness (SMI) or Substance Use Disorder (SUD) as a primary issue

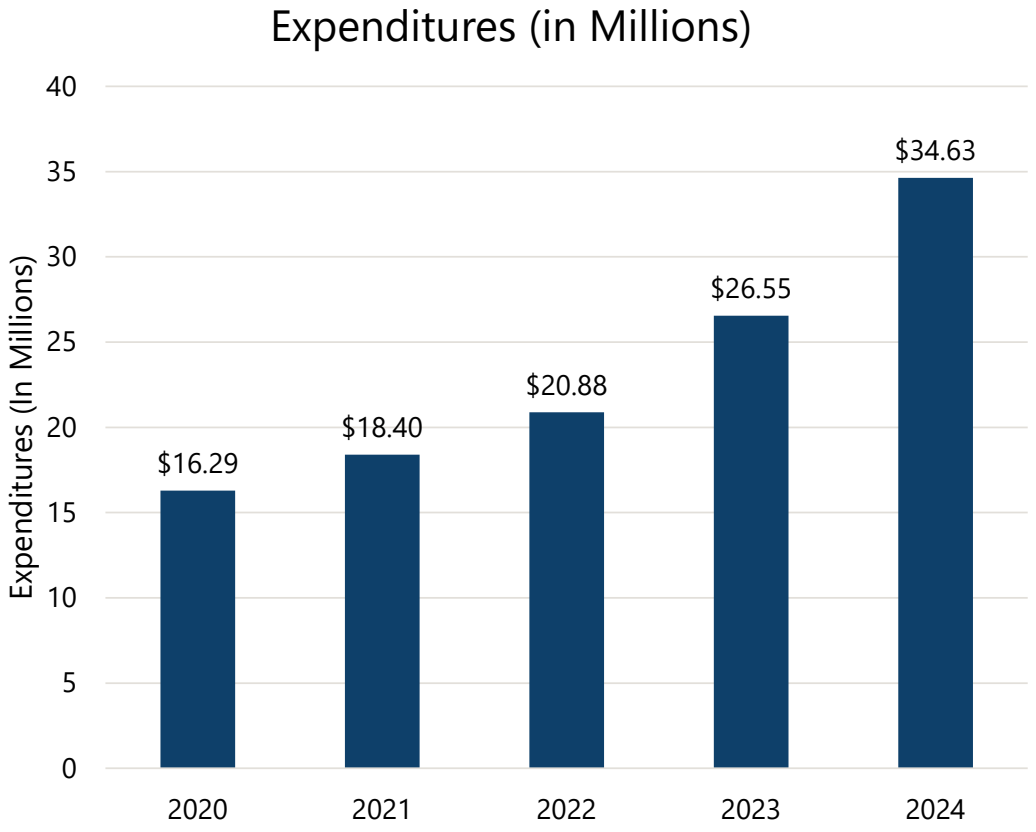
Source: NDHHS HCBS Case Management data system, 2024

NORTH Dakota Be Legendary. | Health & Human Services

Cost driver #3



Prevalence of Complex Medical Needs



Common medical conditions reported by HCBS participants
Osteo arthritis
Chronic obstructive pulmonary disease (COPD)
Stroke
Type 2 diabetes
Paralysis
Heart Failure
Age related physical impairment
Dementia
Brain Injury

Common medical tasks completed for HCBS participants
Medication Administration
Tracheostomy cares and suctioning
PEG tube feedings and medications
Insulin administration including sliding scale
Port dressing changes
Wound care
IV Therapy
Care coordination/ medical escort
Foley catheter

Primarily served with Residential Habilitation and Community Support services, with additional support from extended personal care and nurse education services

Qualified Service Provider Utilization & Expenditures

NORTH Dakota | Health & Human Services
Be Legendary.

Qualified Service Providers Targeted Rate Increase

Ongoing

Total	$5,392,656
General	$3,595,104
Federal	$1,797,552

Increase impacts the HCBS Waiver, DD Waiver, Autism Waiver, SPED, and Ex-SPED. Services impacted include nursing, personal care, respite, companionship, and homemaker services.

- ND's rates lag states in the region.
  - South Dakota did a comprehensive rate study of in-home providers in 2023 that reviewed baseline and benchmark wages and other costs for Qualified Service Provider services.

Select Qualified Service Provider Agency Rates per 15-minute unit					
	ND	MN	MT	SD	WY
Personal Care	$8.05	$5.95	$8.92	$10.88	$8.53
Homemaker	$7.14	$7.90	-	$10.88	$6.62
Respite	$7.93	$9.64	$6.02	$10.53	$7.50
Companion	$7.14	$7.90	-	$10.53	$7.60
Nursing	$17.64	$12.46	$19.30	$22.60	$19.15

QSP rate increases target areas of highest need

QSP Nursing Services

- **Nurse Education** – assessment, nursing plan of care development and training
- **Extended Personal Care** - hands-on medical care tailored to individual's needs, including skilled or nursing care
- **Updated Agency Rate -** $19.71 per 15-min unit

QSP Aide Services

- **Homemaker** – housework, meal prep, laundry, shopping assistance
- **Chore** – Heavy cleaning, snow removal, lawn care
- **Personal Care** (unit rate) – help with personal hygiene, mobility etc.
- **Respite** – short break for caregivers
- **Supported Employment** – on the job support to remain employed
- **Transitional Living** – independent living skills training
- **Updated Agency Rate -** $9.40 per 15-min unit

QSP Companion Services

- **Non-Medical Transportation – Escort** – help with mobility while shopping, banking etc.
- **Companionship** – socialization to reduce isolation
- **Supervision**- monitoring to ensure safety for people with cognitive impairment
- **Updated Agency Rate -** $9.10 per 15-min unit

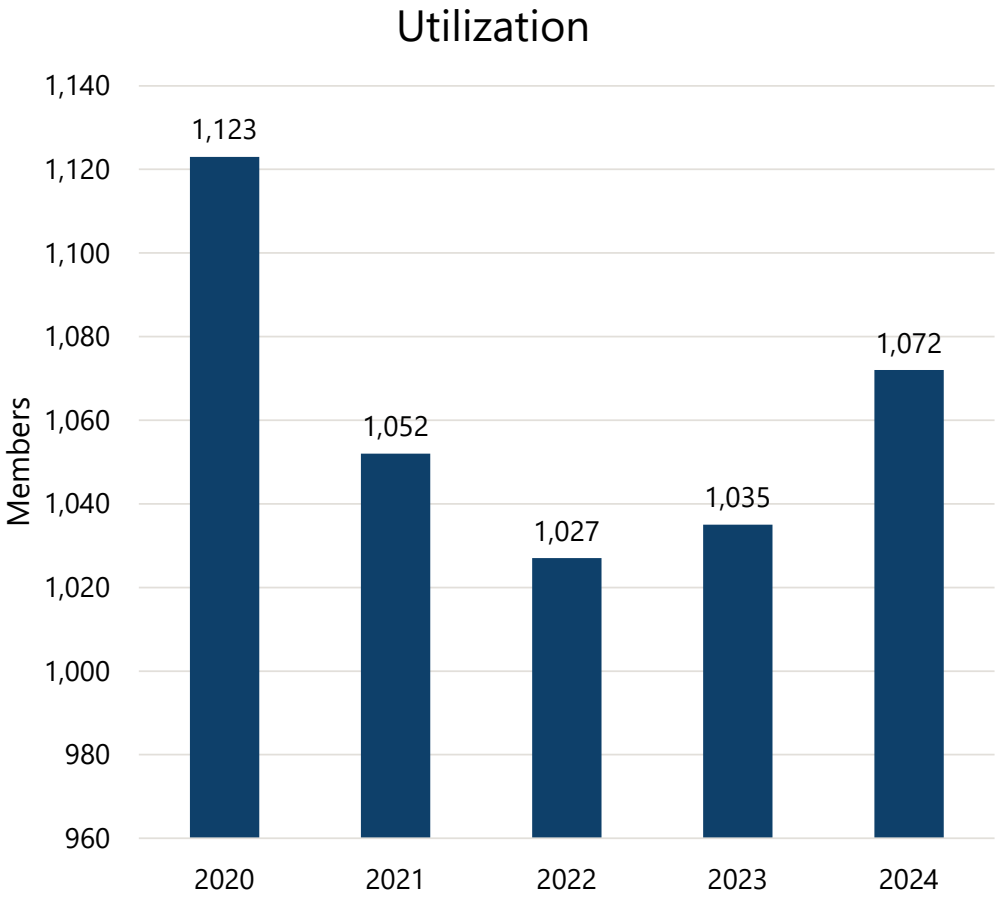
Private Duty Nursing & Home Health Targeted Rate Increase

Ongoing

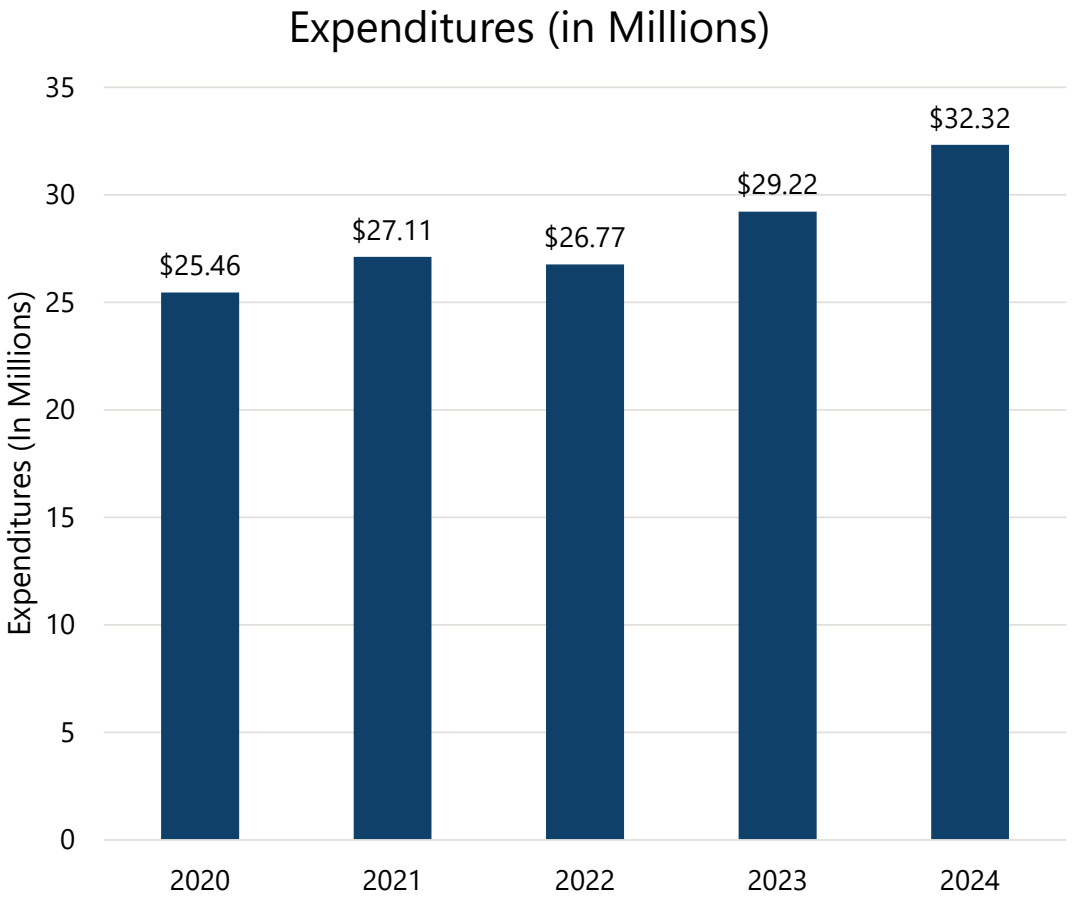
Total	$2,471,536
General	$1,235,768
Federal	$1,235,768

Increase rebases home health rates based on cost report information and aligns private duty nursing rates with home health skilled nursing.

Included in Medical Services Budget



- Private Duty Nursing rates lag Home Health which may disincentivize agencies from serving patients with long term care needs.



Home Health Rate, RN	Private Duty Nursing, RN
$140.57 (per visit)	$66.83 (per hour)

- Home Health rates have not been rebased since 2004.
- Current SFY25 average rate for Home Health is $140.57 per visit.
  - Rebase projected to increase average rate to $219 per visit.

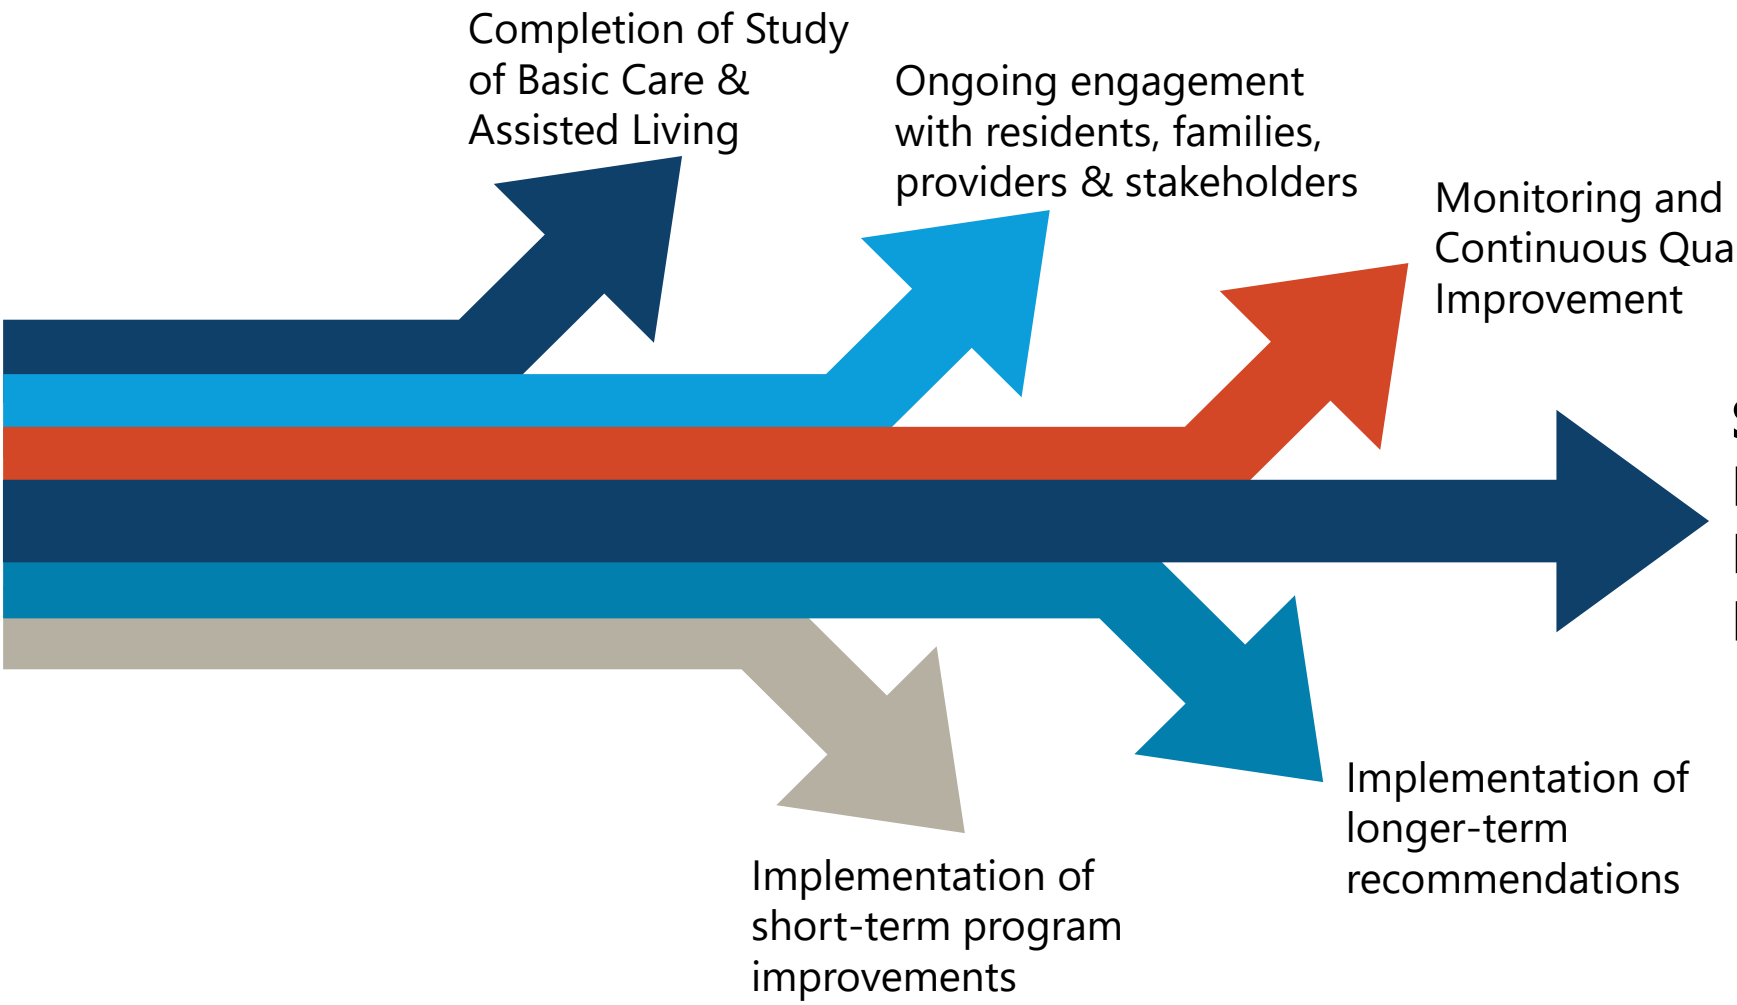
Basic Care, Assisted Living & Adult Residential Concerns

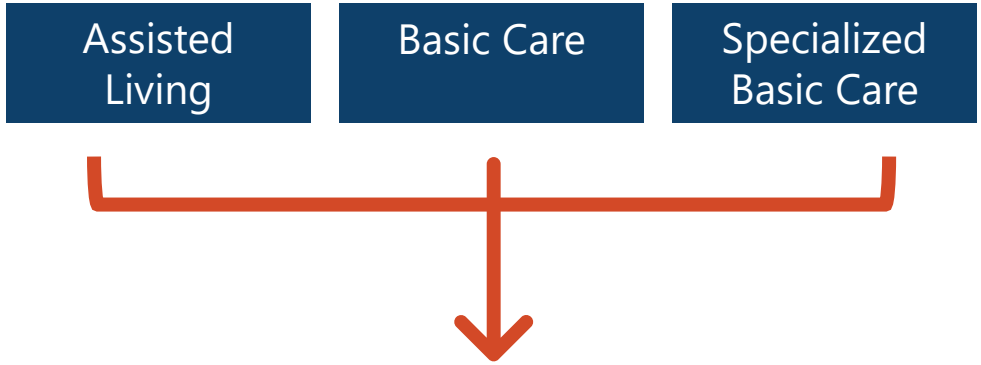


Top Health Response Section Concerns

- Infrequent Basic Care Facility Surveys (33-year inspection cycle)
- Lack of Assisted Living Licensure Standards

Top Medical Services Division Concerns

- Family Confusion
- Licensure Based on Payer Source
- Federal Funding Risk
- HCBS Settings Rule Compliance
- Department of Justice Risk



Basic Care Strategy

NORTH Dakota | Health & Human Services
Be Legendary.

Basic Care Study Recommendations

1. Streamline licensing by creating a new single licensure type to cover both assisted living and Basic Care facilities.
2. Strengthen existing assisted living and Basic Care policy and create additional policies to reflect current requirements within the program, incorporate best practices, and align with State and federal requirements, as applicable.
3. Develop and implement State-led universal assisted living and Basic Care training and materials to educate all stakeholders.
4. Adopt strategies to improve and expand the current service and programmatic array within Basic Care to integrate residents more comprehensively into the community.
5. Update regulatory oversight process based on implementation of recommendations.

New Streamlined Licensure

- HCBS Focused; Reduced Institutional Licensure Requirements
- Regulatory Partnership based on Collaboration & Incremental Enforcement
- Eligible for HCBS Waiver Participation & Reimbursement
- Allows Providers to Design their Service Array
- Supports More Choices for Elders & Families

Basic Care Study Recommendations

6. Implement quality improvement initiative requirements for Basic Care facilities to improve quality of care and align facilities with best practices.
7. Update regulations to use publicly available indexes for cost trending to align more consistently with observed trends in provider costs.
8. Implement a Fair Rental Value (FRV) methodology to reimburse Basic Care provider property costs.
9. Implement tiered add-on payments for residents with increased ADLs care need and align reimbursement methodologies.

Provider Inflation
Ongoing

Total	$5,396,854
General	$3,294,874
Federal	$2,101,980

Increase includes the following inflation of provider rates for the 2025-2027 biennium:

- SFY 2026: 1.5%
- SFY 2027: 1.5%

- Provider inflation is applied to provider rates in accordance with the rate methodology for the service.
  - Most provider rates paid from a fee schedule are updated each July 1.
  - Inflation is used as the adjustment factor to inflate costs forward from provider cost reports for most cost-based providers.
    - Some providers use a standardized index in place of inflation.

Appropriated Inflation, SFY 2019 - 2024					
2019	2020	2021	2022	2023	2024

North Dakota Medicaid Waivers

1915(c) Home and Community Based Services (HCBS) Waivers

- Autism Spectrum Disorder Waiver
- Children's Hospice Waiver
- Waiver for Medically Fragile Children
- Waiver for Home and Community Based Services
- Traditional Intellectual Disabilities and Developmental Disabilities HCBS Waiver

- 1915(c) waivers have two components of eligibility:
  - Functional Need
    - Assessments are used to measure an individual's needs. The assessment helps shape the care plan in addition to verifying eligibility.
  - Financial
    - For waivers, only the income of the individual applying for the waiver's income is used to determine financial eligibility.
    - Allows coverage of disabled individuals at incomes higher than those that would traditionally qualify for Medicaid.

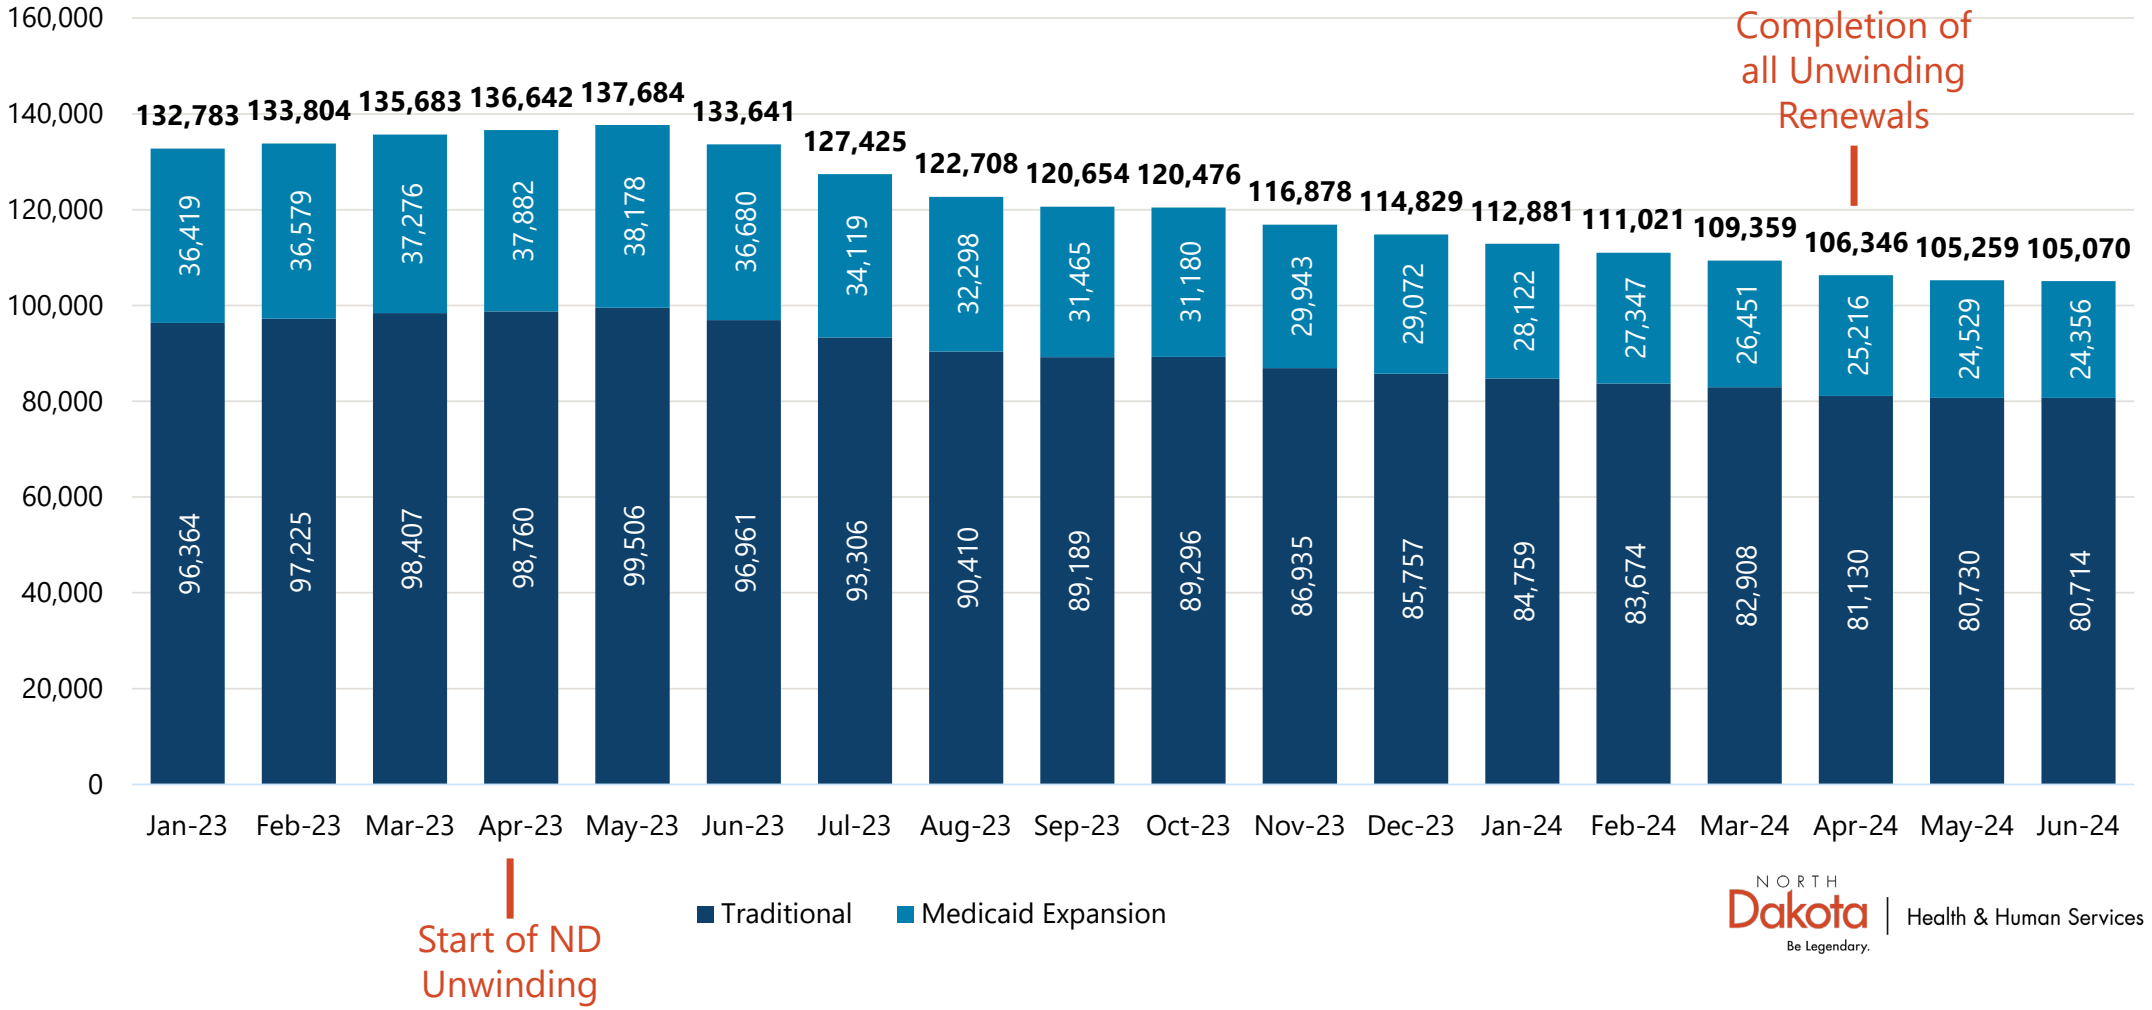
Public Health Emergency Continuous Eligibility Requirement

The Families First Coronavirus Response Act (FFCRA) passed in March 2020 provided an additional 6.2% FMAP to states.



- To receive the enhanced FMAP, states had to meet certain Maintenance of Effort requirements including continuous coverage of all individuals enrolled on or after March 2020.
  - Members could only be disenrolled from a state's Medicaid program if they asked to be disenrolled, moved out of state, or died.
- In December 2022, Congress delinked the Medicaid continuous coverage requirement from the PHE, allowing states to resume Medicaid coverage terminations effective April 1, 2023.
- "Unwinding" is a term used to refer to the return to normal Medicaid eligibility rules.

Medicaid & Incarceration

NORTH Dakota | Health & Human Services
Be Legendary.

Federal Fund Restrictions for Inmates

Federal Medicaid funds may not be used to pay for services for people while they are inmates of a public institution.

- Incarceration does **not** make a person ineligible. People who are held involuntarily in a correctional facility may be eligible for and enrolled in Medicaid.
  - ND Medicaid suspends Medicaid eligibility while an individual is incarcerated.
- Medicaid can make medical payments for incarcerated individuals when they are inpatients in a medical institution for 24 hours or more.
- There are some limited exceptions that allow the use of federal Medicaid funds for youth and young adults who are incarcerated.

Youth and Young Adults in Carceral Settings
Section 5121 of the Consolidated Appropriations Act, 2023

	Section 5121
Who is included?	Medicaid members under age 21 and former foster care youth* through age 26.
What Medicaid services are included?	Limited screenings, diagnostic services and case management.
When are the services covered?	*Post-adjudication*, 30 days prior to and following release.

NORTH Dakota | Health & Human Services
Be Legendary.

*Youth who age out of foster care at age 18 may receive Medicaid coverage through age 26.

Youth and Young Adults in Carceral Settings

Section 5121 of the Consolidated Appropriations Act, 2023

State Medicaid programs are required to:

1. Exchange data with all settings where the eligible population could be – state-run facilities, county jails and tribal jails.
2. Work with facilities to help people enroll in Medicaid if they are not already enrolled.
3. Work with facilities to provide access to covered services for the eligible group.

States must create an internal operational plan that shows how they will achieve compliance with estimated timeframes.

NORTH Dakota | Health & Human Services

Next Steps

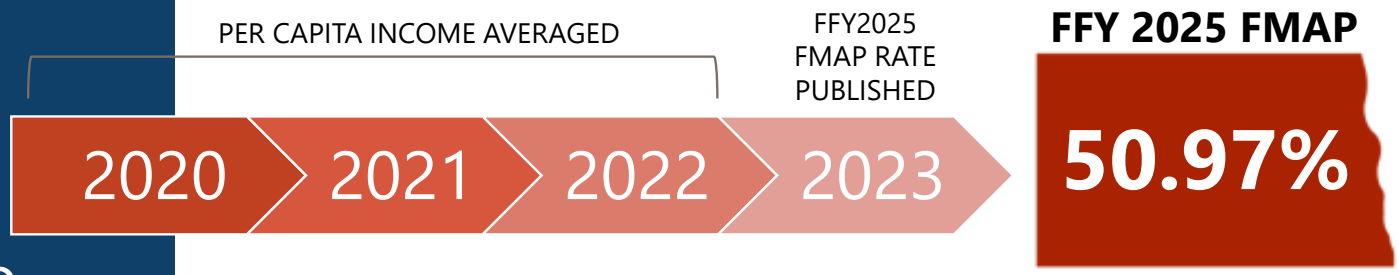
Focus on IT and automation

Create more tools, guidance and resources for correctional facilities

Partner across HHS – Medical Services, Economic Assistance, Zones and Human Service Centers – to ensure that correctional facilities are well-equipped to help people apply for and renew their Medicaid and become connected to services and support upon release.

Medicaid Financing

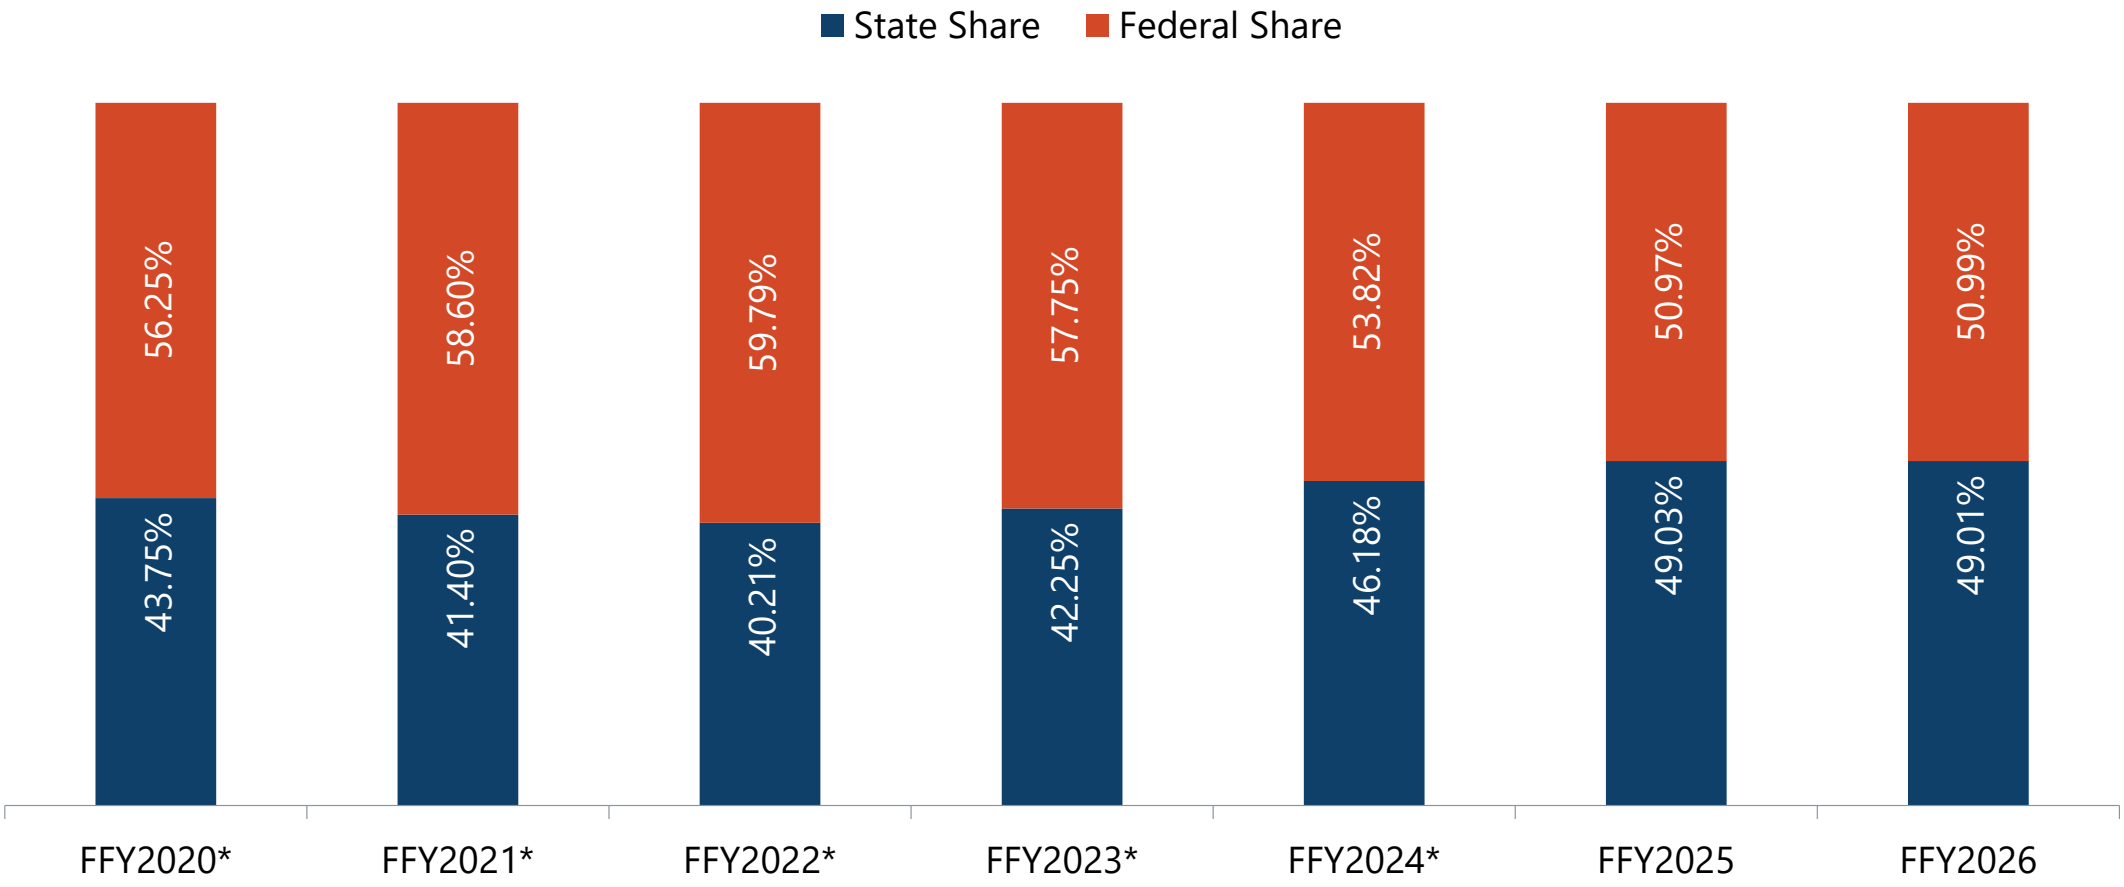
NORTH Dakota | Health & Human Services
Be Legendary.



What is the FMAP?

The federal government's share of a state's Medicaid expenditures is called the Federal Medical Assistance Percentage (FMAP).

States must contribute the remaining portion to qualify for federal funding.



The FMAP changes each federal fiscal year (October 1 – September 30) and is based on a funding formula related to a state's per capita income relative to the national average over a 3 year period.

$$FMAP = 1 - 0.45 \times \left(\frac{State\ Per\ Capita\ Income^2}{US\ Per\ Capita\ Income^2}\right)$$

NORTH Dakota Be Legendary. | Health & Human Services

FMAP

*The FMAP for FFY 2020 – 2023 includes a 6.2% increase due to the CARES Act during the Public Health Emergency. The FMAP was stepped down during the Unwinding period in FFY2023 and FFY2024

NORTH Dakota Be Legendary. | Health & Human Services

FMAP

Most services are funded with the state's regular FMAP. Certain services, populations, systems and administrative functions are funded with a different percentage:

- Children's Health Insurance Program (CHIP) Members
- Medicaid Expansion Members
- Services Received through Indian Health Service or a Tribal 638 Provider
- Administration
- Professional Medical Staff
- Certified Systems

Medicaid as a Funding Source

Medicaid federal regulation authorizes federal funding for administrative activities "as found necessary by the Secretary for the proper and efficient administration of the state plan."

Medicaid Administrative Claiming Examples:

- NDQuits
- School Based Administrative Claiming
- Nurse Aide Registry
- Waiver Case Management Staff

Tribal Care Coordination

NORTH Dakota | Health & Human Services
Be Legendary.

Tribal Care Coordination FMAP Background

In 2016, the Centers for Medicare and Medicaid Services (CMS) released State Health Official (SHO) letter #16-002 updating policy related to federal funding available for Medicaid eligible American Indians/Alaska Natives (AI/AN) for services "received through" an Indian Health Service (IHS) or Tribal facility, allowing care delivered under a care coordination agreement to qualify for 100% federal funding.

- Tribal Care Coordination legislation was passed in North Dakota in 2019 and amended in 2021.
- Section 50-24.1-40 of North Dakota Century Code requires 80% of savings generated by care coordination agreements to be directed to the Tribal Care Coordination Fund; the remaining 20% returns to the state general fund.

Tribal Care Coordination Savings Example

51% Federal 49% State

Under a **<u>care coordination agreement</u>** between the referring tribal health care organization and the non-tribal health care provider, traditional Medicaid FMAP is converted to 100% Federal Funding.

100% Federal

$49 is generated in savings due to conversion to 100% federal funding.

$49 Total State Savings

Savings is distributed under a **<u>tribal health care coordination fund agreement</u>** between ND Health and Human Services (HHS) and a tribal government:

$39.20 (80%) is allocated to the Tribal Care Coordination Fund.

$9.80 (20%) returns to the State General Fund.

NORTH Dakota | Health & Human Services
Be Legendary.

Direct Service & Self-Governance

Direct Service	Self-Governance
Tribes that either in whole or in part, receive primary health care directly from the Indian Health Service (IHS).	Tribes that negotiate with IHS and assume funding and control over programs, services, functions or activities or portions thereof, that IHS would otherwise provide.
Tribal care coordination agreements between Great Plains Indian Health Service and non-tribal healthcare providers. Tribes must authorize Great Plains IHS to enter into care coordination agreements on their behalf by either adding language to the fund agreement or by separate tribal resolution.	Tribal care coordination agreements are between the tribe and non-tribal healthcare providers.
• Turtle Mountain Band of Chippewa Indians • Sisseton-Wahpeton Oyate • Standing Rock Sioux Tribe	• Spirit Lake Nation • Mandan, Hidatsa and Arikara Nation (Three Affiliated Tribes)

Care Coordination & Tribal Health Care Coordination Fund Agreements

Care Coordination Agreements

Agreement between non-tribal provider and referring Tribal health care organization. Allows the state to convert regular FMAP into 100% federal funding and generate savings.

- Sanford and Great Plains Indian Health Service (2018)
- St. Alexius and Great Plains Indian Health Service (2018)
- Sanford and Mandan, Hidatsa and Arikara Nation (2021)

Tribal Health Care Coordination Agreement

Agreement between Tribe and ND HHS distributing 80% of savings into the Tribal Health Care Coordination Fund. Specifies the purposes that the funds can be used for, the requirement for annual reports and audit reports.

- Turtle Mountain Band of Chippewa Indians and ND HHS (2022)
- Mandan, Hidatsa and Arikara Nation and ND HHS (2024)
- Standing Rock Sioux Tribe and ND HHS (2024)

Tribal Health Care Coordination Fund

- The first distributions will be for claims from October 2022 through September 2024.
- Reports from tribes will be due every year by August 30 starting in 2025.
- Audits will be due every two years beginning in 2026.

Related Bills:
House Bill 1252 | Relating to Tribal Health Care Coordination Fund
House Bill 1461 | Relating to Tribal Health Care Coordination Fund

Tribes can use funding from the Tribal Health Care Coordination Fund for:

- Ten Essential Services of Public Health as defined by the Centers of Disease Control & Prevention
  1. Assess and monitor population health status, factors that influence health, and community needs and assets
  2. Investigate, diagnose, and address health problems and hazards affecting the population
  3. Communicate effectively to inform and educate people about health, factors that influence it, and how to improve it
  4. Strengthen, support, and mobilize communities and partnerships to improve health
  5. Create, champion, and implement policies, plans, and laws that impact health
  6. Utilize legal and regulatory actions designed to improve and protect the public's health
  7. Assure an effective system that enables equitable access to the individual services and care needed to be healthy
  8. Build and support a diverse and skilled public health workforce
  9. Improve and innovate public health functions through ongoing evaluation, research, and continuous quality improvement
  10. Build and maintain a strong organizational infrastructure for public health
- Development or enhancement of Community Health Representative (CHR) programs or services.

Note: No more than 50% of funds may be used for capital construction through June 30, 2025. Beginning July 1, 2025, no more than 35% of funds may be used for capital construction.

NORTH Dakota | Health & Human Services

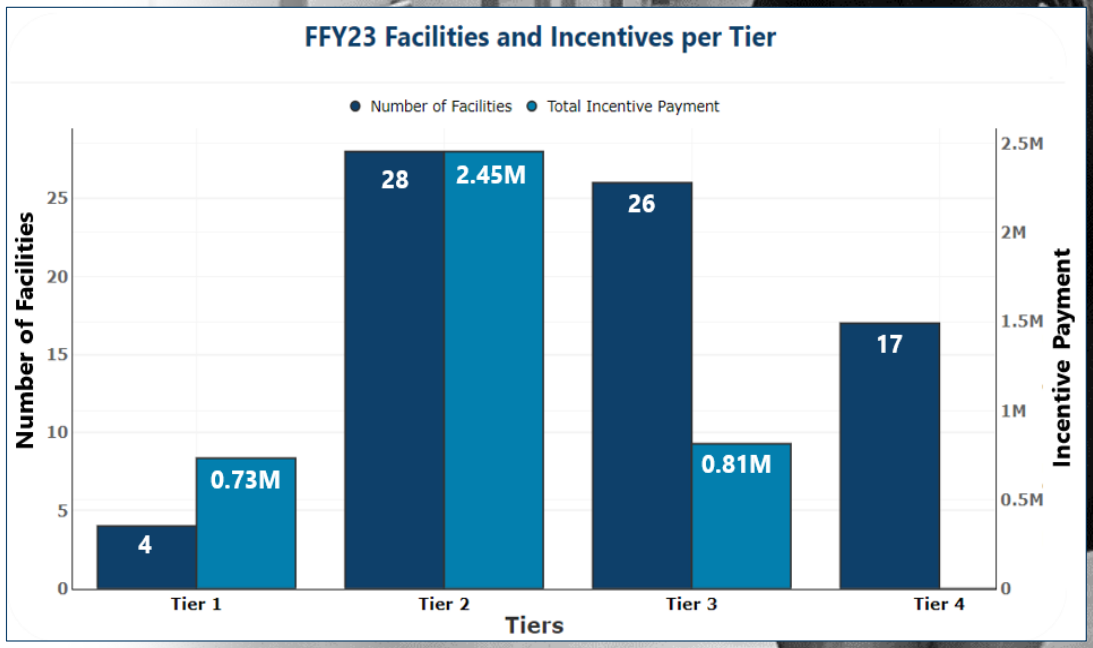
Nursing Facility Incentive Program

Improve resident outcomes through an incentive payment based on specific quality measures.

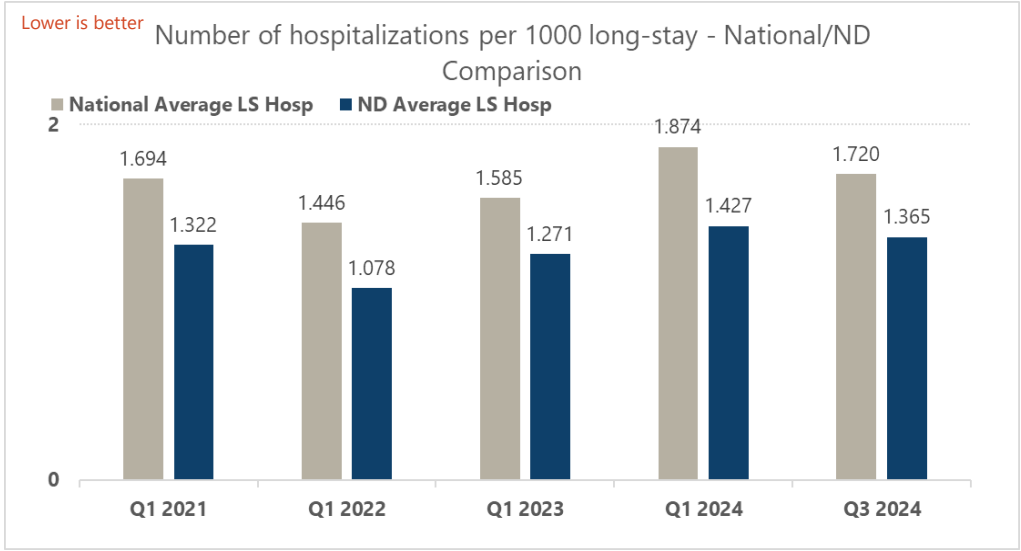


- Incentive program; no payments are at risk.
- All Medicare/Medicaid certified facilities that have been open 10 months will participate.

- Incentive fund distribution is done annually in June.
- Annual payments based on Quality Measure performance:
  - Tier 1: 100% of incentive payment
  - Tier 2: 85% of incentive payment
  - Tier 3: 60% of incentive payment
  - Tier 4: Not eligible for an incentive payment
- Nursing Facility Quality Measures:
  - Patient Care Measures
    - Long-Stay Urinary Tract Infections
    - Long-Stay Antipsychotic use
    - Long-Stay Pressure Ulcers
  - Facility Process Measures
    - Long-Stay Hospitalizations
    - ACHA/NCAL National Quality Award (Baldrige Framework)

NORTH Dakota | Health & Human Services
Be Legendary.

Initial Outcomes



- $4 million dollars distributed in June 2024
- 58 out of 75 Nursing Facilities received incentives to improve quality of care for residents
- Examples of reported use of funds include
  - New mattresses for entire facility
  - Staff bonuses
  - Building renovation
  - Staff training

Psychiatric Residential Treatment Facility Expenditures

NORTH Dakota | Health & Human Services
Be Legendary.

Value Based Care
Ongoing

Total	$2,000,000
General	$1,000,000
Federal	$1,000,000

Expand care focused on value to additional provider groups and continue to refine current programs to ensure populations are supported with person-centered care and support.

Included in Long Term Care Budget

Refinement and Expansion of Current Programs

- Continue to grow and refine current value-based programs.
- Review attributed populations and supports available to individuals with complex health care needs.
- Strengthen care coordination to ensure service delivery provides comprehensive, person-centered care focused on ensuring access and appropriate follow-up supports across multiple delivery systems.

Exploration of New Provider Groups

- Expand health system value-based program to rural delivery system to include critical access hospitals and associated primary care providers. Ensure rural VBP design builds on the current program to improve healthcare quality, accessibility, and sustainability in rural areas.
- Explore a value-based purchasing model with PRTFs and QRTP providers to drive towards enhanced services and outcomes for youth while ensuring stability of safety net service delivery for children with behavioral health needs in North Dakota.

Funding will support:

- Subject Matter Expertise
- Value Based Program Provider Workgroup Facilitator
- Service Infrastructure Development

Rates & Reimbursement

NORTH Dakota | Health & Human Services
Be Legendary.

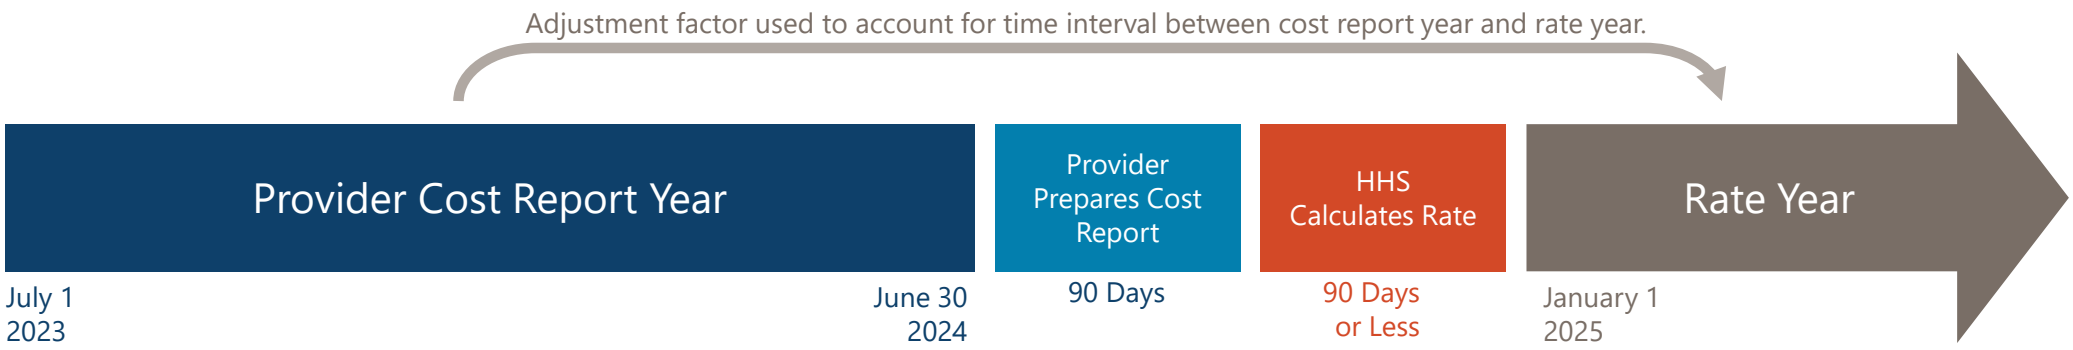
How does ND Medicaid pay for services?

Traditional Medicaid: Fee For Service (FFS)	**Medicaid Expansion: Managed Care Organization (MCO)**
State pays providers directly for each covered service received by a Medicaid member.	State pays a monthly fee called a capitation payment to the managed care organization (MCO).
Only services received by members are paid.	Monthly fee is paid to MCO regardless of member use of services.

Rate Methodology Guiding Principles Traditional Medicaid

- Predictable
- Consistent
- Transparent
- Data Driven
- Population Focused
- Quality & Outcomes Oriented
- Incentivizes Innovation, Efficiency & Community Based Care

Rate Methodologies in Fee For Service Medicaid



- **Cost Based Per Diem** – Uses cost reports as the basis for setting individual facility per diem payments. Per diem payments may be adjusted to account for patient acuity.
- **Classification System** – Defines an episode (ex. inpatient admission or outpatient visit) and assigns a classification based on services provided. May be used in conjunction with cost reports to assign facility specific base rates.
- **Relative Value Units** – Defines the resource intensity of a service. Used in conjunction with a conversion factor.
- **Fees –** List of reimbursements correlated to a nationally defined code set.
- **Percent of Charge –** Uses a defined percentage to reimburse based on billed charges.
- **Cost Settlement –** Compares provider costs to payments made by ND Medicaid.

What is a cost report?

A cost report is a financial document submitted by health care providers and outline the expenses incurred in delivering patient care and include data on operating costs, salaries, supplies, and other expenditures. Cost report data is used to set provider reimbursement rates.

- Cost reports cover a defined time period and are used to detail provider costs during that timeframe.
- Costs are generally broken into a few distinct categories:
  - Direct Care
  - Indirect Care
  - Property
  - Other

How are cost reports used to set rates?

The rate methodology for the service uses cost report data to calculate provider rates.

- An adjustment factor is used to inflate costs forward from the cost report year to the rate year.
- Some costs are not allowable (ex. lobbying) for use in calculating reimbursement rates.
- Cost categories have limits to ensure that costs are reasonable and efficient.
- Provider cost reports and underlying data may be audited to ensure that costs were appropriately reported and allocated.
- The department must prepare/calculate rates for multiple providers within the same 90 day timeframe.

NORTH Dakota | Health & Human Services
Be Legendary.

Upper Payment Limit

- Medicaid payments are required to be "consistent with efficiency, economy, and quality of care."
- CMS requires states to demonstrate compliance that payments for certain providers do not exceed an upper payment limit (UPL).
- The UPL is a reasonable estimate of the amount that would have been paid for the same service under Medicare payment principles.

Required Upper Payment Limit Demonstrations in North Dakota:

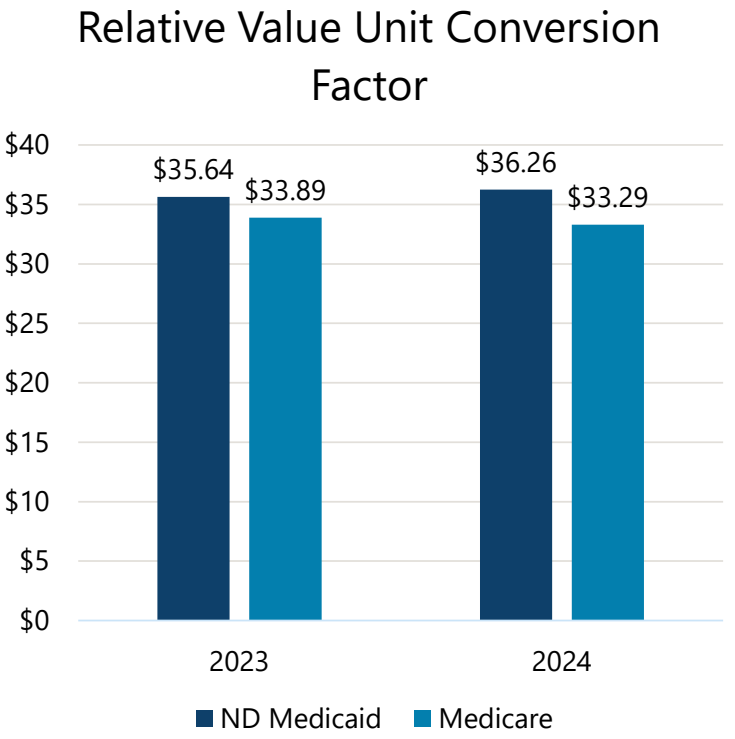
- Inpatient Hospital Services
- Outpatient Hospital Services
- Nursing Facility Services
- Institutions for Mental Disease (IMD)
- Clinic Services
- Intermediate Care Facility for the Individuals with Intellectual Disabilities (ICF/IID)
- Psychiatric Residential Treatment Facility (PRTF)

Federal Financial Participation Limit:

- Durable Medical Equipment

NORTH Dakota | Health & Human Services
Be Legendary.

Fee for Service: Inpatient Hospital Reimbursement



- Prospective Payment System (PPS) Hospitals – DRG per stay
- Critical Access Hospitals – Interim per diem with cost settlement when Medicare cost report is finalized
- Psychiatric Hospitals – Per diem
- Rehab Hospitals – Per diem
- Long Term Care Acute Hospitals – Percentage of charges
- Out-of-State Hospitals – Percentage of charges

Fee for Service: Outpatient Hospital Reimbursement

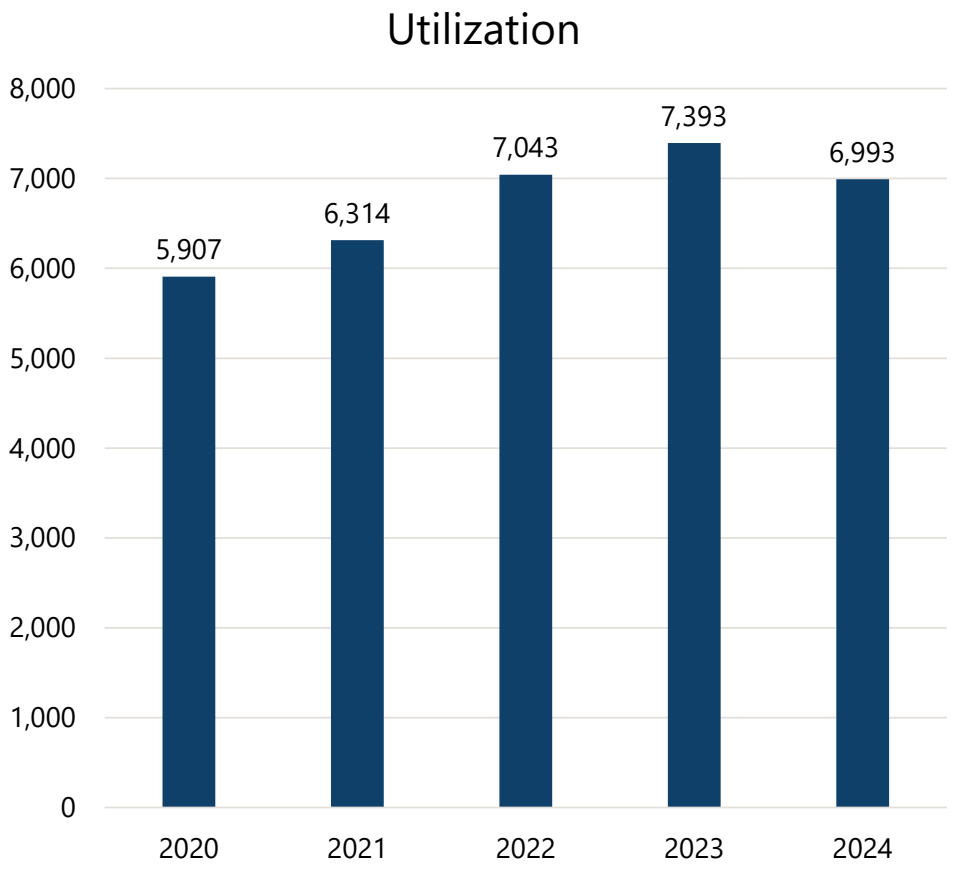
- Prospective Payment System (PPS) Hospitals – Enhanced Ambulatory Payment Groups (EAPG) per visit
- Critical Access Hospitals – Interim percentage of charges with cost settlement when Medicare cost report is finalized
- Psychiatric Hospitals – Percentage of charges
- Rehab Hospitals – Percentage of charges
- Long Term Care Acute Hospitals – Percentage of charges
- Out-of-State Hospitals – Percentage of charges

Fee for Service: Professional Services and Clinics

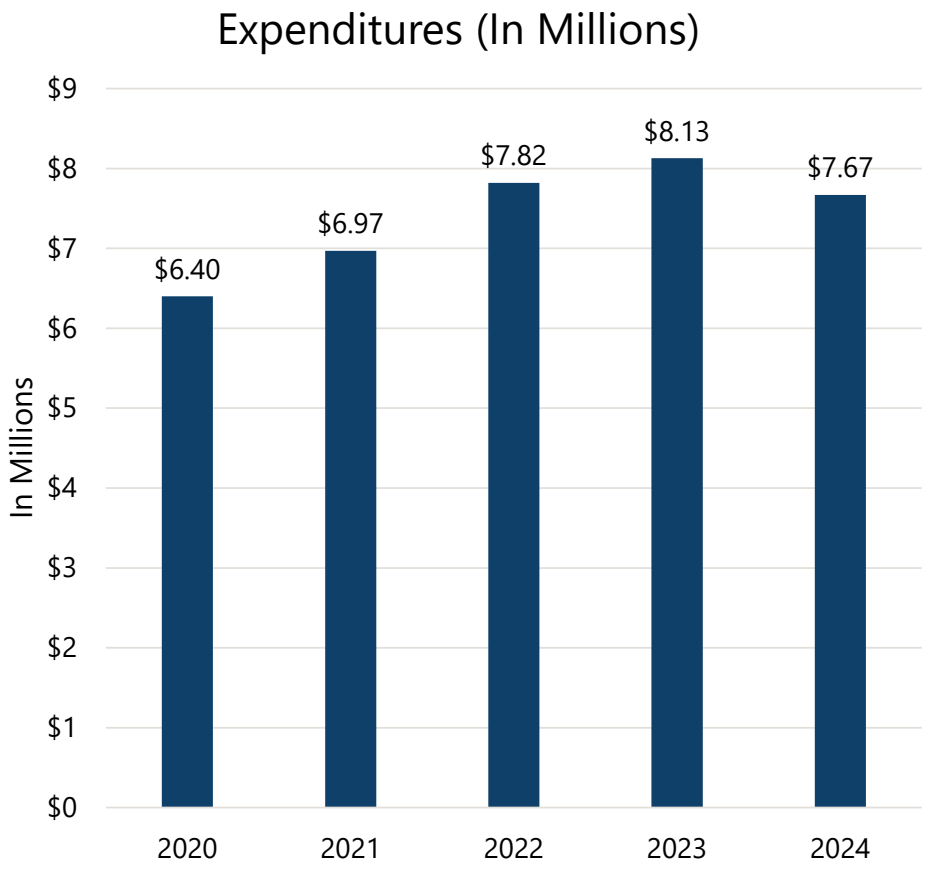
- Professional services
  - Relative Value Unit (RVU) and Conversion Factor used for most practitioner services
  - Fee (dental, transportation)
  - Center for Medicare and Medicaid Services (CMS) rates (labs, vaccines)
- RHCs and FQHCS
  - Encounter rate, one payment for all services the provider delivers on that day
  - FQHCs can be reimbursed for a medical visit, behavioral health visit and a dental visits on the same day

Provider Inflation
Ongoing

Total	$16,215,764
General	$6,949,693
Federal	$9,266,071



Increase includes the following inflation of provider rates for the 2025-2027 biennium:



- SFY 2026: 1.5%
- SFY 2027: 1.5%

- Provider inflation is applied to provider rates in accordance with the rate methodology for the service.
  - Most provider rates paid from a fee schedule are updated each July 1.
  - Inflation is used as the adjustment factor to inflate costs forward from provider cost reports for most cost-based providers.
    - Some providers use a standardized index in place of inflation.

Appropriated Inflation, SFY 2019 - 2024					
2019	2020	2021	2022	2023	2024
2.0%	2.5%	2.0%	0.25%	3.0%	3.0%

Medicaid Expansion Coverage

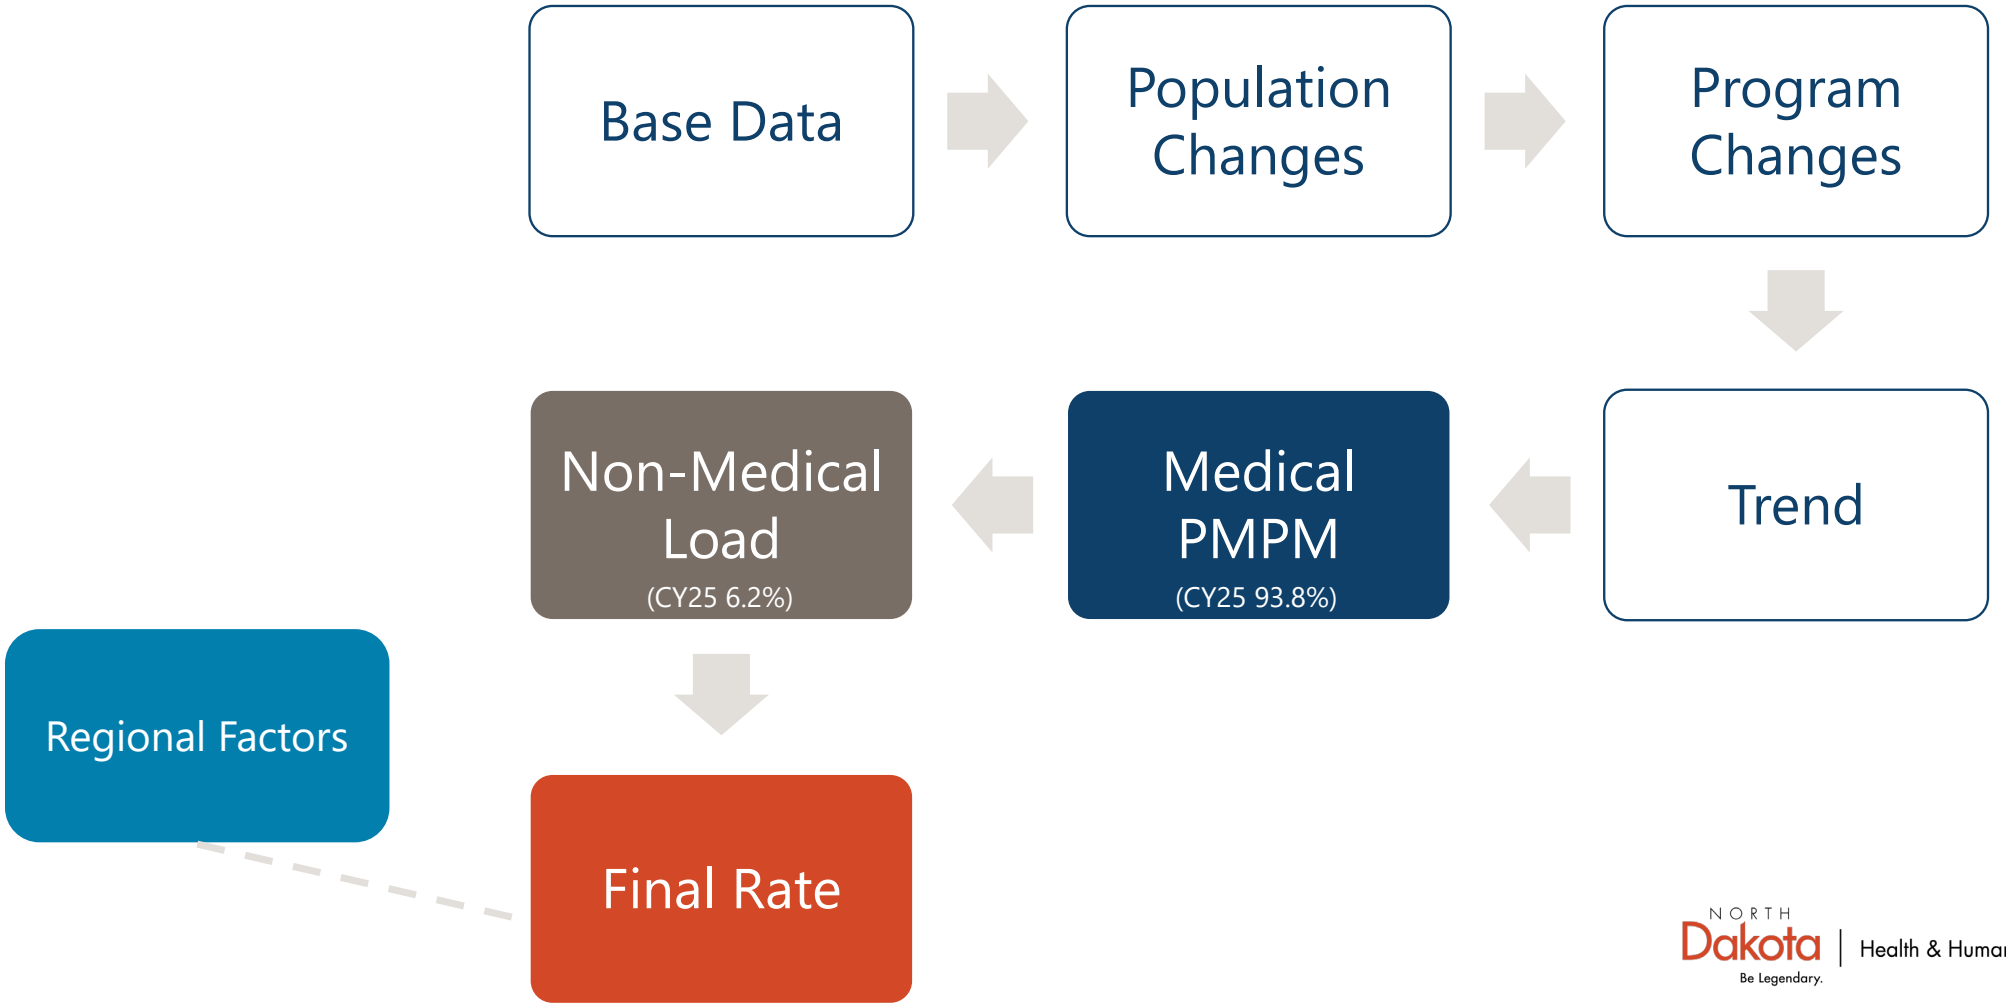
North Dakota provides Medicaid Expansion through risk based Managed Care.

- Current Vendor: Blue Cross Blue Shield of North Dakota (BCBS ND)

- There are a few key differences between Medicaid Expansion and traditional Medicaid.
- Medicaid Expansion **does not** cover:
  - Skilled Nursing Facility Services[1]
  - Dental Services[2]
  - Vision Services[2]
  - Any waiver services
  - Long Term Care services

[1] Only covers up to 30 days and only covers a skilled level of care
[2] Only covered for 19- and 20-year-olds

NORTH Dakota | Health & Human Services
Be Legendary.



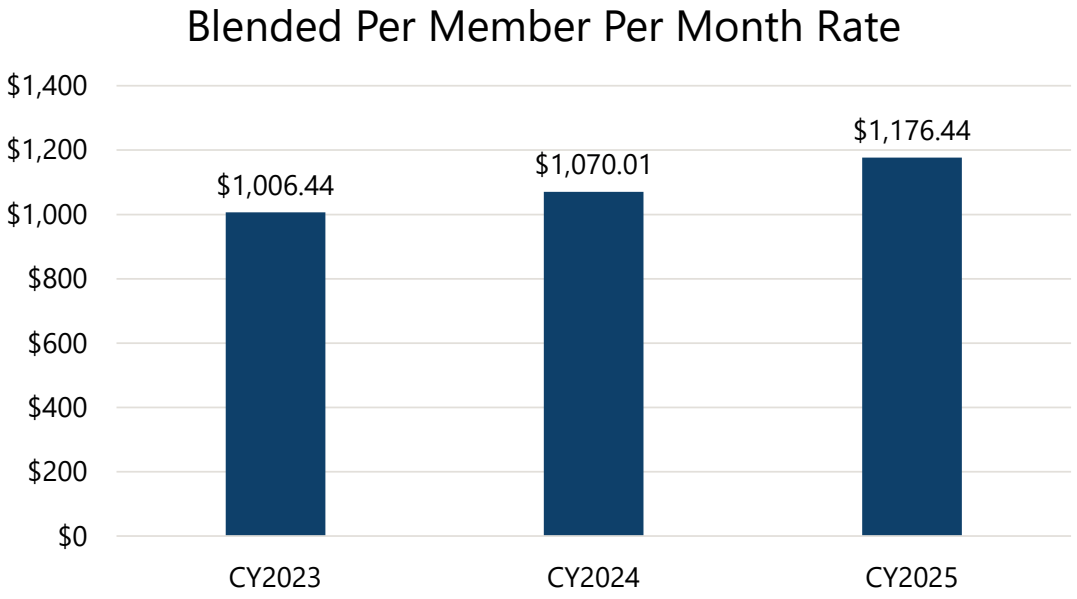
Managed Care

- **Managed Care Plans use their own provider networks.** Providers must enroll in Blue Cross Blue Shield to provide care to Medicaid Expansion members.
- **Managed Care Plans use their own coverage criteria, authorization process, and limits.** Providers must follow Blue Cross Blue Shield policies for Medicaid Expansion members.
- **Managed Care Plans use their own reimbursement methodology and fee schedules.** Providers are paid according to Blue Cross Blue Shield's policy for Medicaid Expansion members.
- **North Dakota Medicaid has carved out pharmacy benefits for Medicaid Expansion members.** Pharmacy benefits are the same for Medicaid Expansion and traditional Medicaid.

How does ND Medicaid pay for services?

Traditional Medicaid: Fee For Service (FFS)	**Medicaid Expansion: Managed Care Organization (MCO)**
State pays providers directly for each covered service received by a Medicaid member.	State pays a monthly fee called a capitation payment to the managed care organization (MCO).
Only services received by members are paid.	Monthly fee is paid to MCO regardless of member use of services.

Capitation Rate Development Process



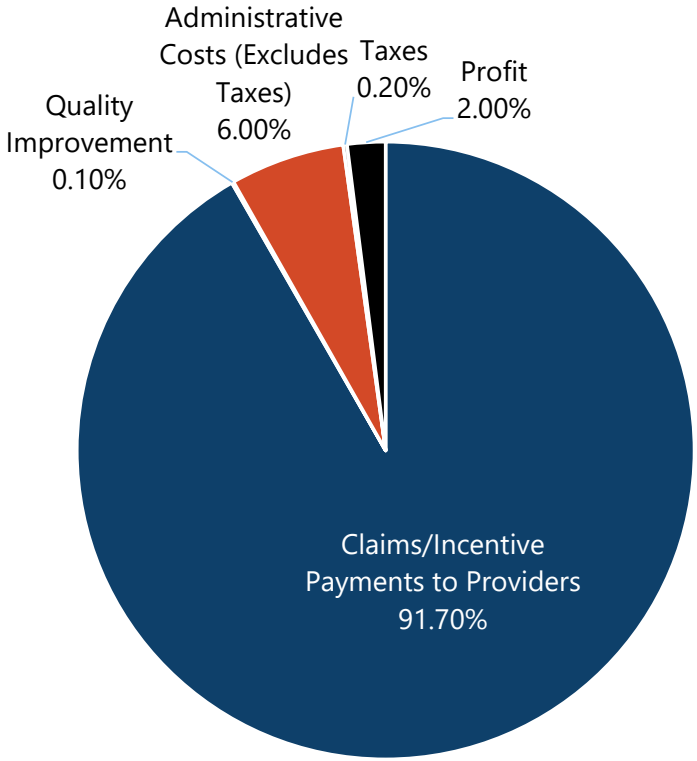
NORTH Dakota Be Legendary. | Health & Human Services

2025 Capitation Rates

CY2025 capitation rates are in development by our actuary in conjunction with HHS and BCBSND.

- CY2025 capitation rates implement Senate Bill 2012 provision to ensure that the capitation rate calculation assumes that MCO rates will not exceed 145% of Medicare reimbursement, except for services noted in Section 22.

- No decrease to the CY2025 Capitation Rates to comply with 145% of Medicare requirement.
  - Actuarial analysis showed BCBS was already at 144.5% in aggregate of Medicare.
- Overall, 9.1% increase in rates for CY2025.



NORTH Dakota Be Legendary. | Health & Human Services

Medical Loss Ratio (MLR) & Profit Cap

- Since reprocuring the Medicaid Expansion contract in 2022, ND Medicaid has used both a Medical Loss Ratio (MLR) and Profit Cap to protect the state.
  - Profit Cap: Overall limit on the amount of profit that can be retained by the plan.
  - Medical Loss Ratio: Requires a specific percentage of the total capitation is spent on services and quality improvement. Protects states from paying for excessive administrative expenses or profits.
- While providing overall protection to the state, a profit cap can be a disincentive to continued innovation and lowering administrative costs.
- For CY 2025, ND Medicaid will use a robust MLR as the key Managed Care risk mitigation strategy.

Allocation of Retained MCO Revenue

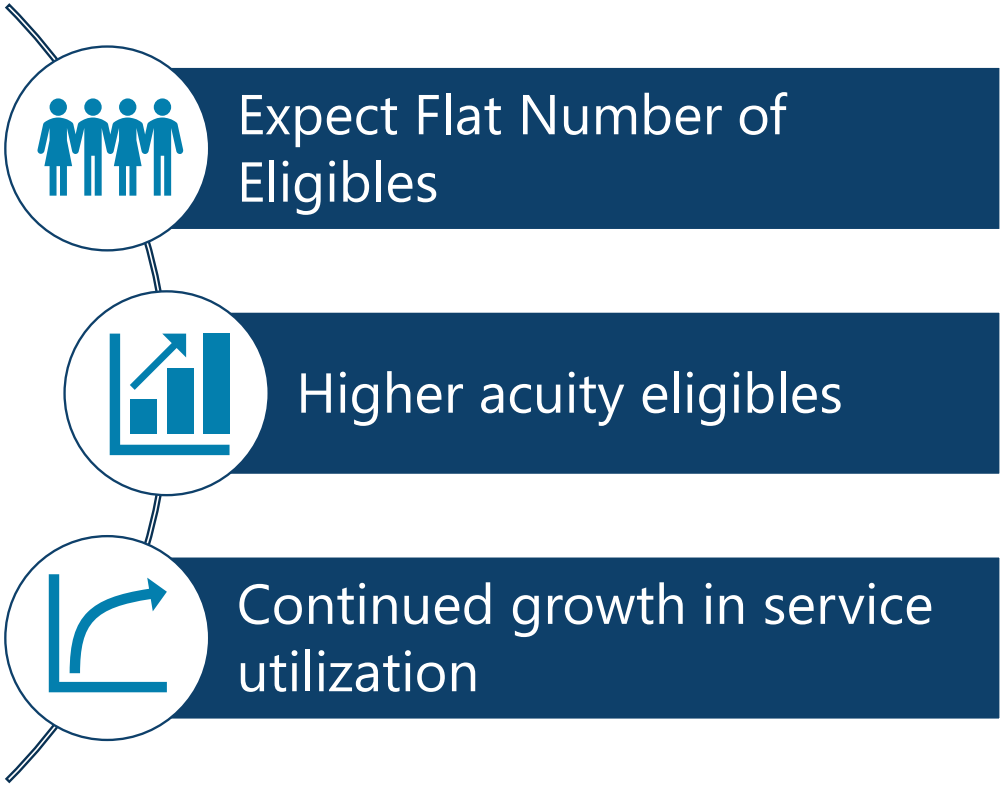
2023 – 2025 Medicaid Expansion Budget Assumptions



ND Medicaid developed the budget recommendation for the 2023 – 2025 Biennium in Spring & Summer 2022.

- Assumed PHE Unwinding was to begin **January 2024**
- Assumed:
  - 1.25% increase for 10 months during continued MOE.
  - 0.87% ramp down for 14 months of unwinding the PHE.
- Assumption ended the biennium (June 2025) at approximately 25,000 eligibles
- Projected Turnback:

Total	General	Federal
$157,548,409	$15,723,314	$141,825,096

Be Legendary.

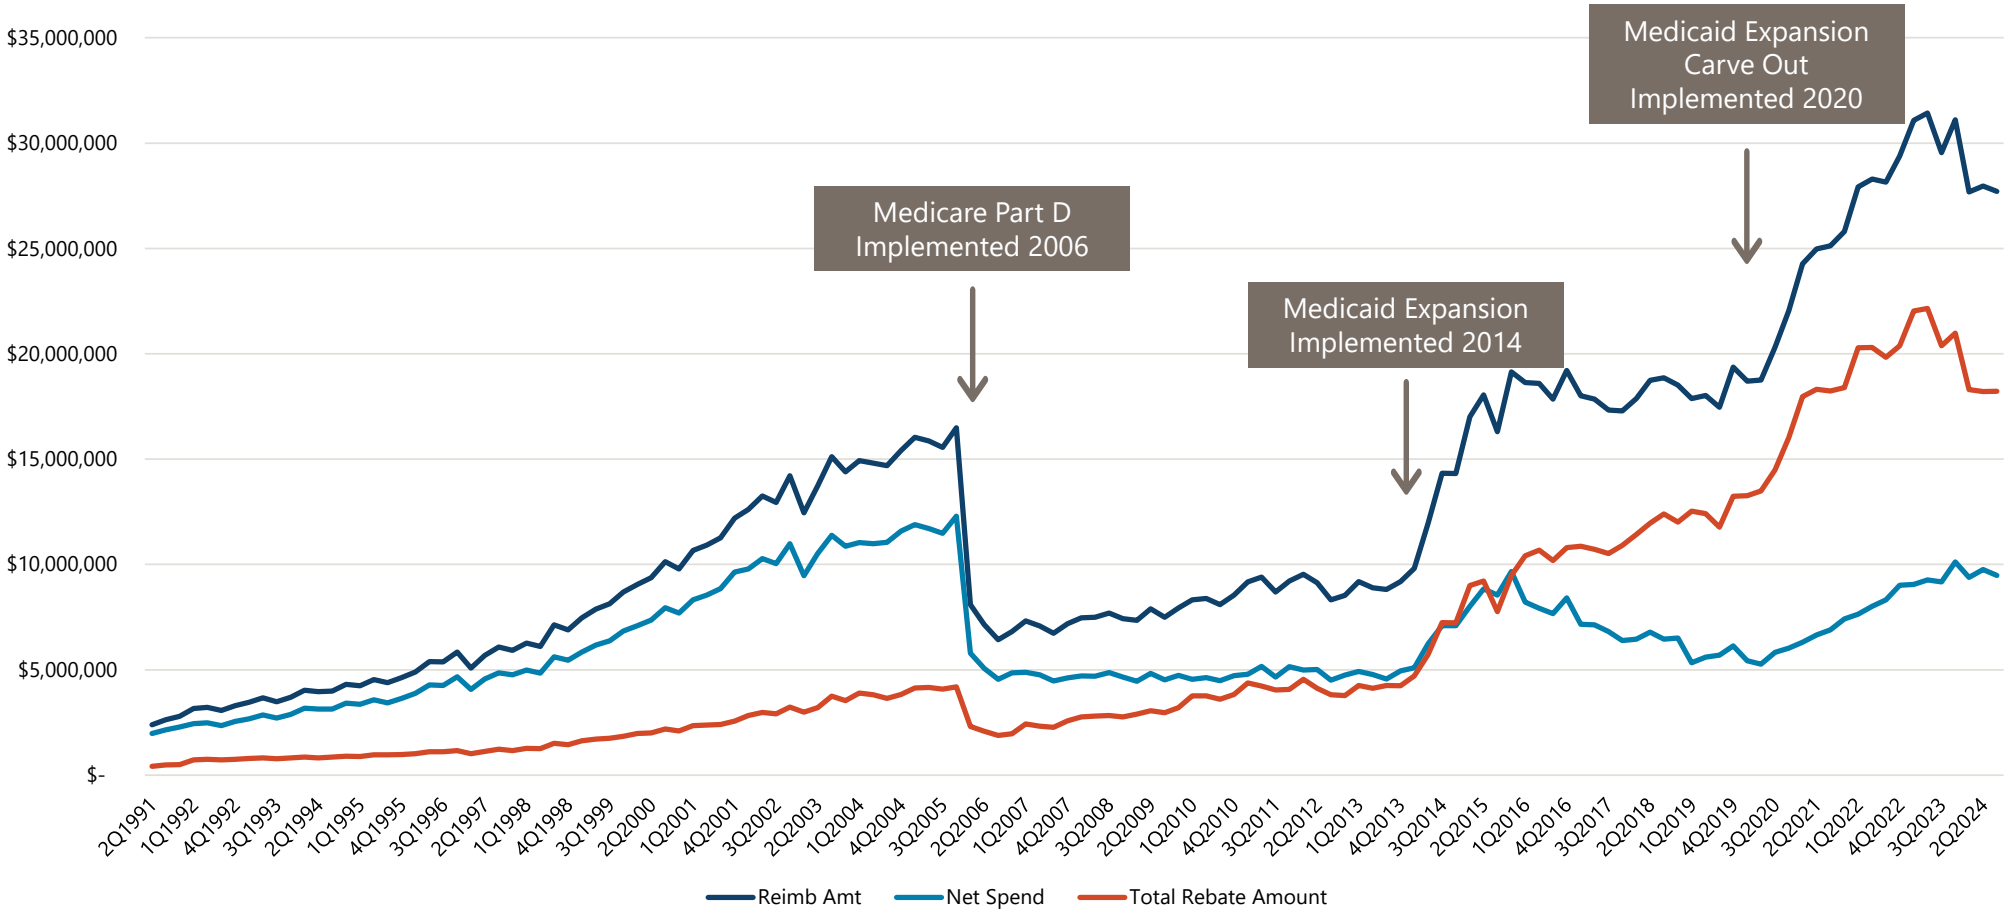
Drugs

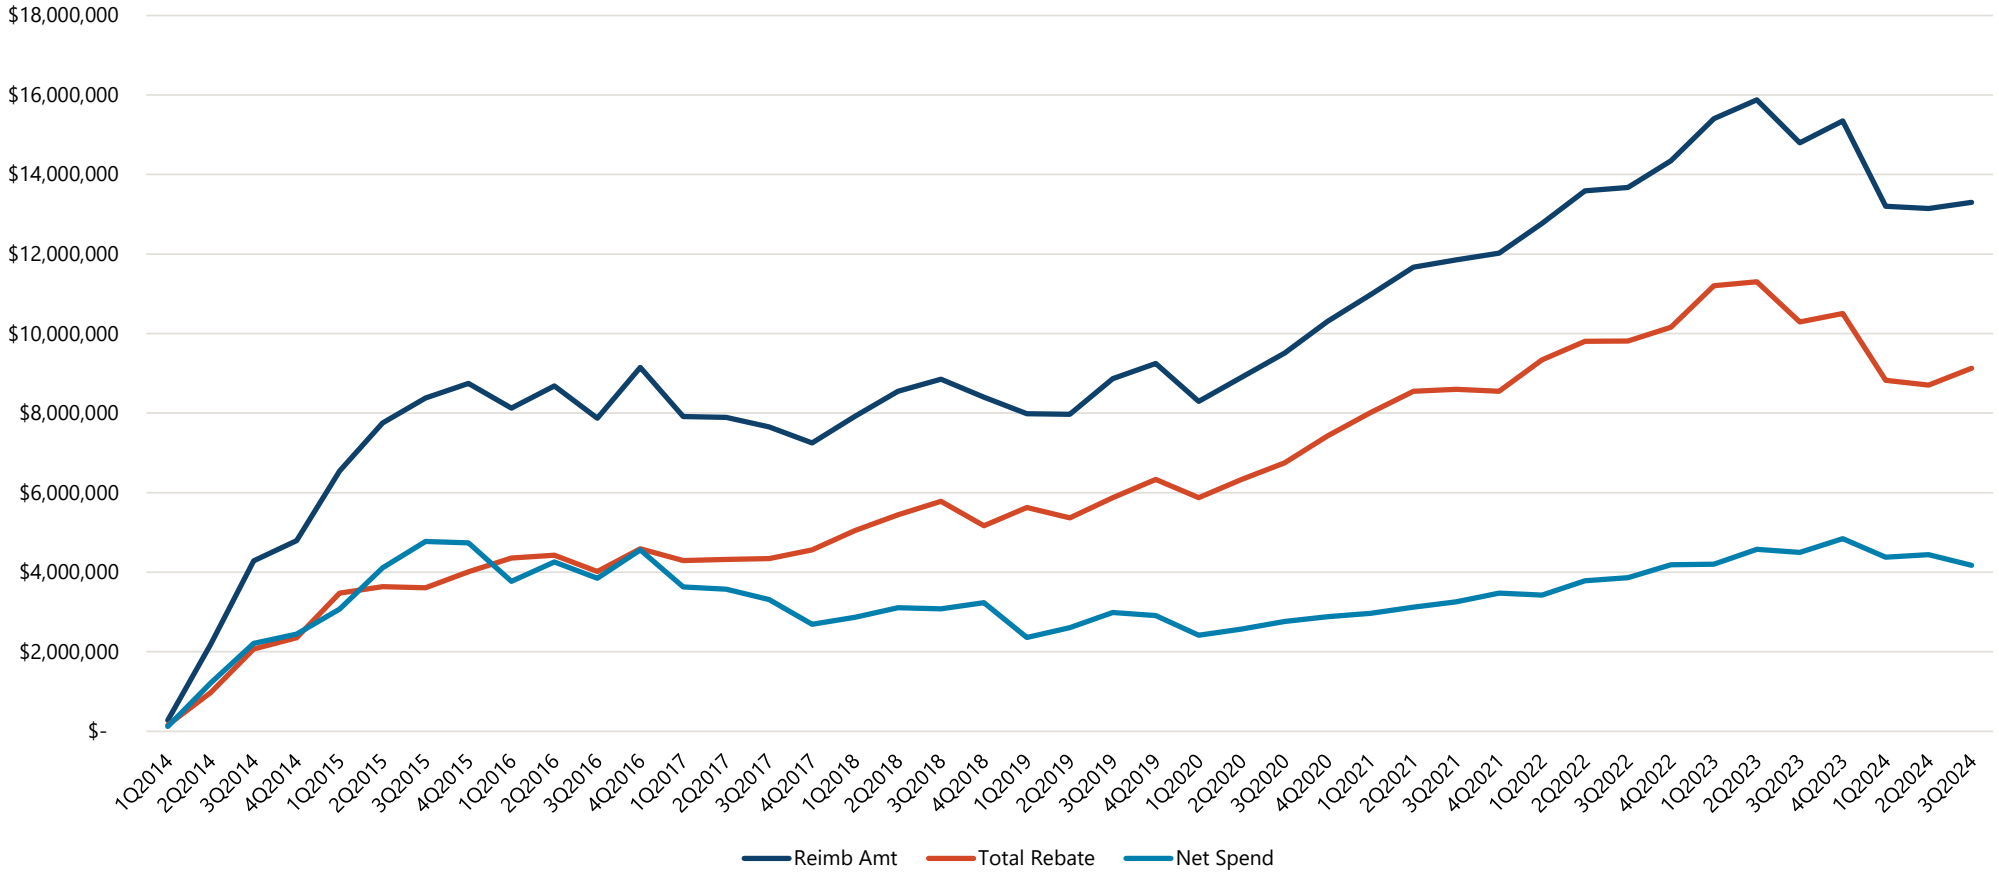
NORTH Dakota | Health & Human Services
Be Legendary.



Coverage

- **Prescription Only/Legend Drugs:** federal law requires Medicaid to cover all legend drugs of manufacturers who have signed a Medicaid Drug Rebate Agreement (MDRP)
  - Essentially all legend drugs are covered as most manufacturers participate in the MDRP
- **Over-the-Counter Drugs:** some are covered if they are part of the MDRP as outlined in the Pharmacy Provider Manual
- **Supplements/Vitamins:** some are covered as outlined in the Pharmacy Provider Manual
  - Medicaid works with the health division to cover some supplements required for treatment of diseases
- **Diabetic Supplies:** glucose test strips, meters, lancets, continuous glucose monitors, insulin syringes, tubeless insulin pumps, and pen needles as outlined in the Preferred Drug List (PDL)
- **Other:** inhaler spacers, injectable medication supplies (syringes, needles)

Drug Use Review



- **Drug Use Review (DUR) Board:**
  - Mandated by federal and state law; board meets quarterly to provide recommendations on our pharmacy prior authorization (PA) program and our DUR program. Six physicians and six pharmacists are voting members of the DUR Board.
- **Prior Authorization (PA):**
  - Over 900 PAs received in December 2024
  - A Preferred Drug List (PDL) is a requirement for supplemental drug rebate agreements. ND has decided to use it for our entire PA program. The PDL outlines coverage parameters for many medications, including PA criteria.
- **DUR Program:** Mandated by federal law; includes prospective and retrospective education on therapeutic duplication, drug-disease contraindication, drug-drug interaction, incorrect drug dosage, incorrect duration of drug treatment, drug-allergy, and clinical abuse/misuse edits
  - **Prospective DUR:** Prospective DUR requirements to ensure appropriate payment and provision of prescription drugs as well as drug counseling and patient profile requirements
  - **Retrospective DUR:** Roughly 400 cases reviewed two of every three months; once a quarter, a targeted mailing is done; letters are mailed to pharmacists and prescribers

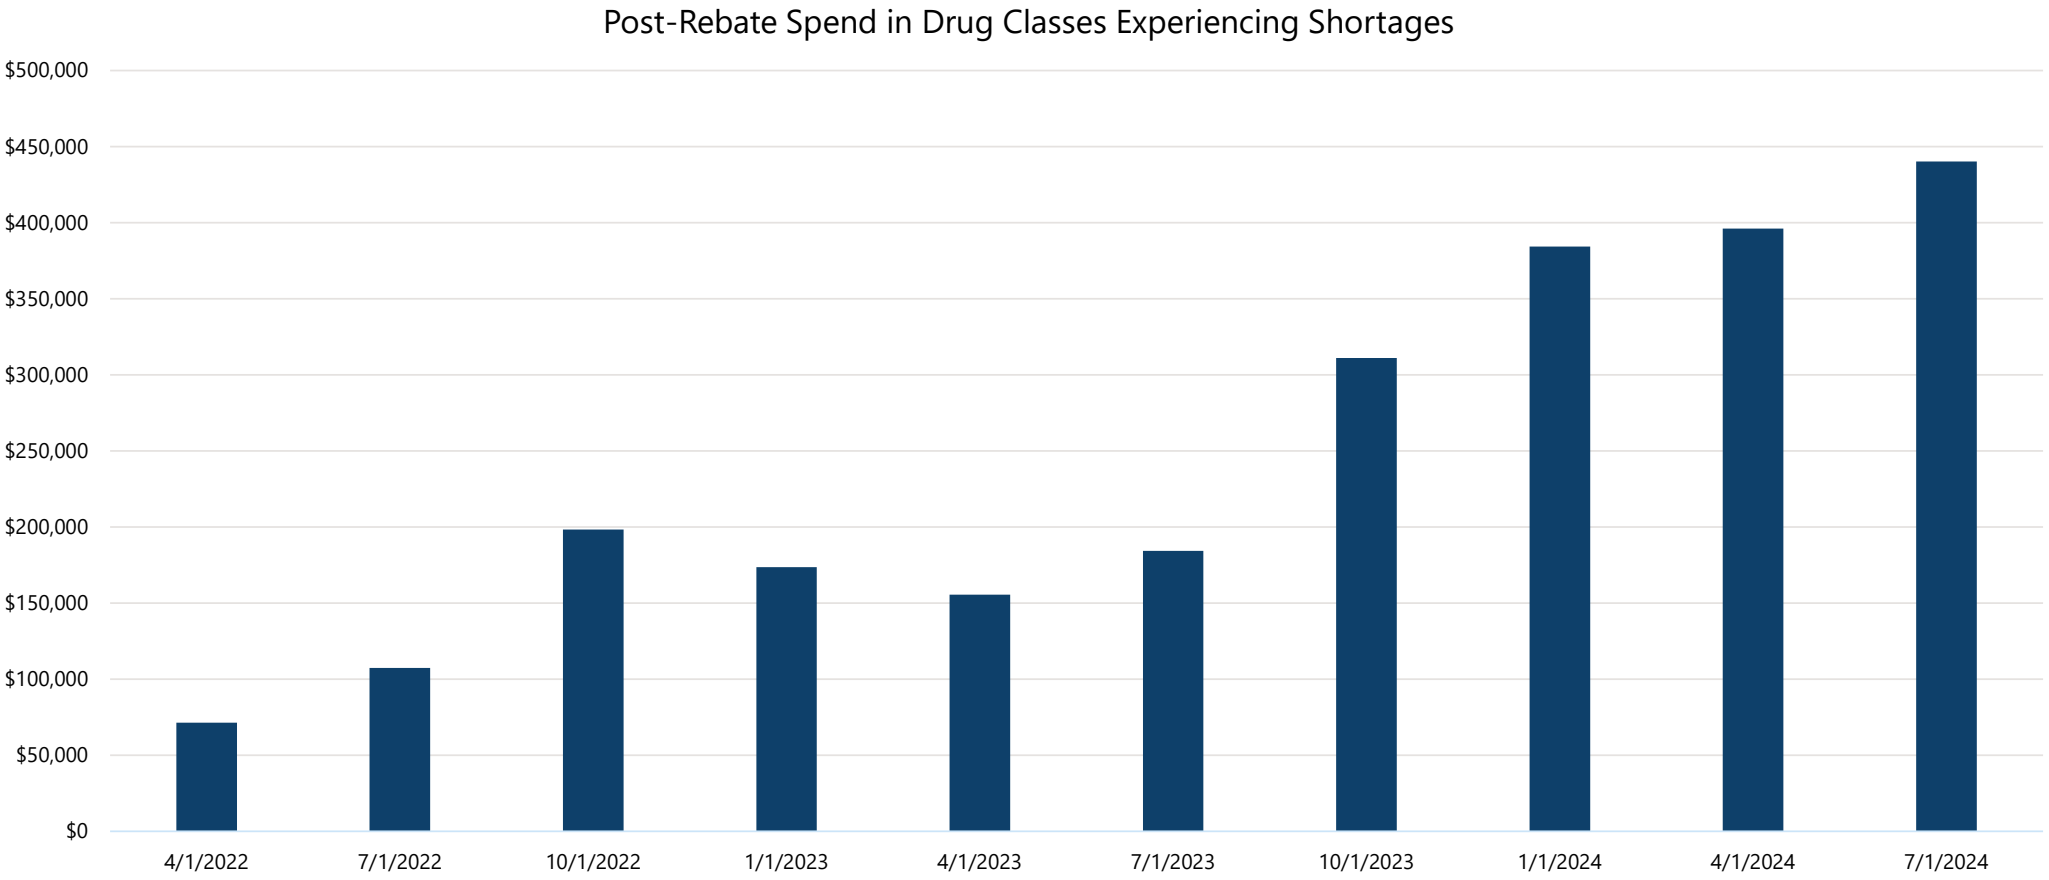
Drug Rebates are Increasingly Important

- Pre-rebate spend growing much faster than post-rebate spend

NORTH Dakota Be Legendary. | Health & Human Services



Total Prescription Drug Rebates

- Collected $811 million in total drug rebates since 1991.
  - Since Part D carved out, $700 million saved. (2006)
  - Since Medicaid Expansion, $594 million saved. (2014)
  - Since COVID, $351 million. (2020)
- More than 1/3rd of total rebate savings since the beginning of the program were collected in the last 4 years.
- Net spend for prescription drugs is $848 million since 1991.
- Total payment to providers is $1.659 billion since 1991.

Value Based Agreements - “Warranties”

- Currently 4 in place, 2 more offers
- Challenges:
  - Time consuming tracking of outcomes and negotiation of terms
  - Churn of eligibility limits length of warranty
  - Slow uptake by manufacturers:
    - Manufacturers won’t work with small states
    - Manufacturers won’t give offers to multi-state pools
    - Manufacturers are picking “one state to start with”

9. Mounjaro - $114.8 million (type 2 diabetes)
10. Trelegy – $114.4 million (COPD, asthma)

Areas of Focus – Hyper Cost Drugs

For the same 50 hyper-cost drugs

- Over $24.0 million spend for 1058 members in 4Q21 to 3Q22
- Over $38.5 million spend for 1799 members in 4Q23 to 3Q24

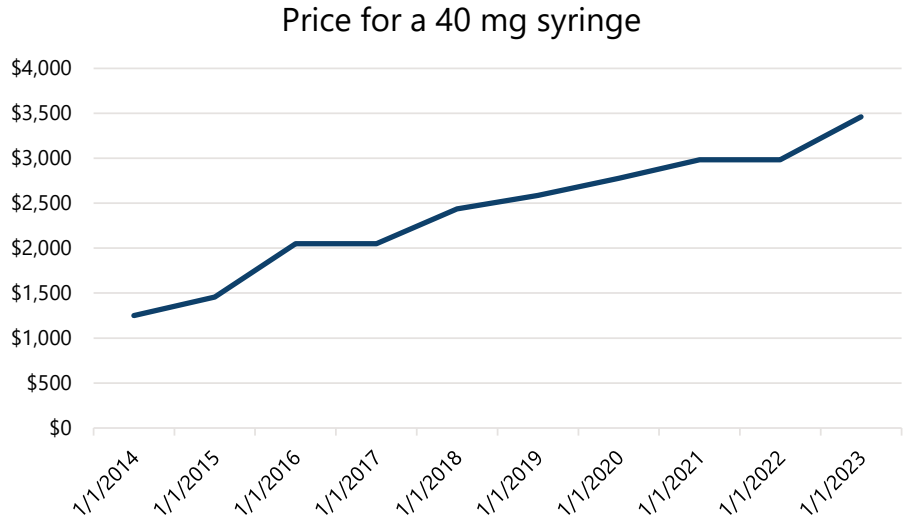
NORTH Dakota Be Legendary. | Health & Human Services

Areas of Focus – Hyper Cost Drugs

- These 50 hyper-cost drugs make up 33.7% of the drug budget (4Q23 to 3Q24)
  - Antipsychotics (Caplyta, Long-acting injectable aripiprazole, paliperidone and risperidone, Lybalvi, Rexulti, Vraylar)
    - Over $9.5 million for 1116 members
  - Cystic Fibrosis (Kalydeco, Orkambi, Trikafta)
    - Over $3.3 million for 21 members
  - Hemophilia (Jivi)
    - Over $800,000 for 1 member
  - Hepatitis C (sofosbuvir-velpatasvir)
    - Over $3.2 million for 144 members

Areas of Focus – Hyper Cost Drugs (cont.)

- HIV (Biktarvy, Dovato, Genvoya, Triumeq)
  - Over $2.6 million for 123 members
- Immunomodulators (Cosentyx, Dupixent, Rinvoq ER, Skyrizi, Stelara, Taltz, Tremfya)
  - Over $10.6 million for 247 members
- Multiple Sclerosis (Kesimpta)
  - Over $600,000 for 7 members
- Opioid Use Disorder (Brixadi, Sublocade)
  - Over $1.2 million for 171 members



Areas of Focus – Hyper Cost Drugs (cont.)

- Oncology (Imbruvica, Inlyta, Lonsurf, Lyparza, Revlimid, Tagrisso, Tibsovo, Xtandi, Xejula)
  - Over $1.9 million for 18 members
- Pulmonary Hypertension (Adempas, Remodulin, Tyvaso, Uptravi)
  - Over $800,000 for 8 members
- Tardive Dyskinesia (Austedo, Ingrezza)
  - Over $1.7 million for 32 members
- Others (Daybue, Epidiolex, Gattex, Hizentra, Koselugo, Ocaliva, Oxervate, Prevymis, Winrevair)
  - Over $2 million for 33 members

Areas of Focus – Drug Price Increases

- Indication Expansion and Interval Creep

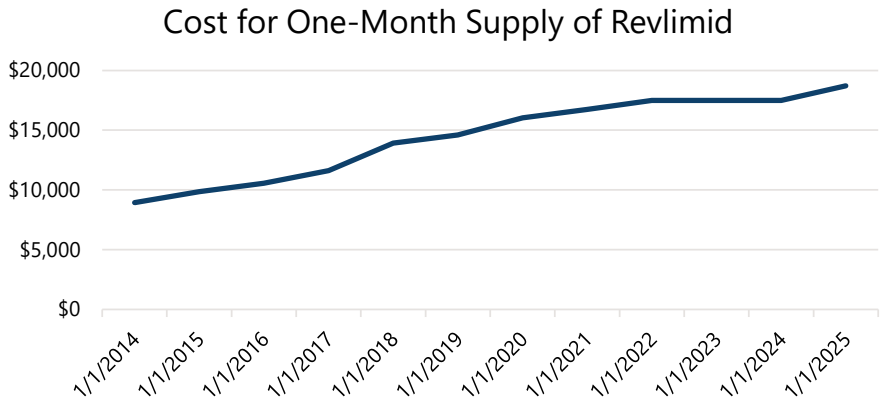
  Humira has increased its price by 177% since 2014 despite having 11 indication expansions and interval creep
  - 2009 FDA approved for 40 mg every 2 weeks
  - 2025 compendia supported for 80 mg every week
  - With interval creep – **potential spend has increased by over 1000%**

Year	Dosing schedule	Annual Cost
2014	40 mg every 2 weeks	$32,533.93
2025	80 mg every week	$359,977.02

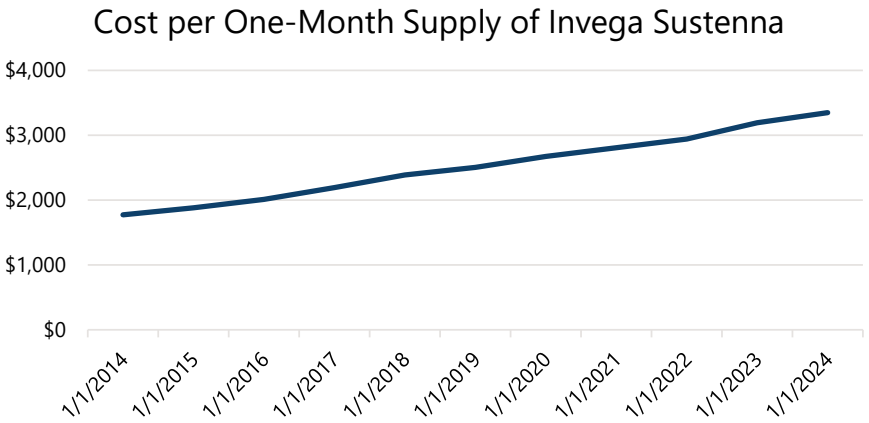
Areas of Focus – Drug Price Increases (cont.)

- Indication Expansion and Interval Creep

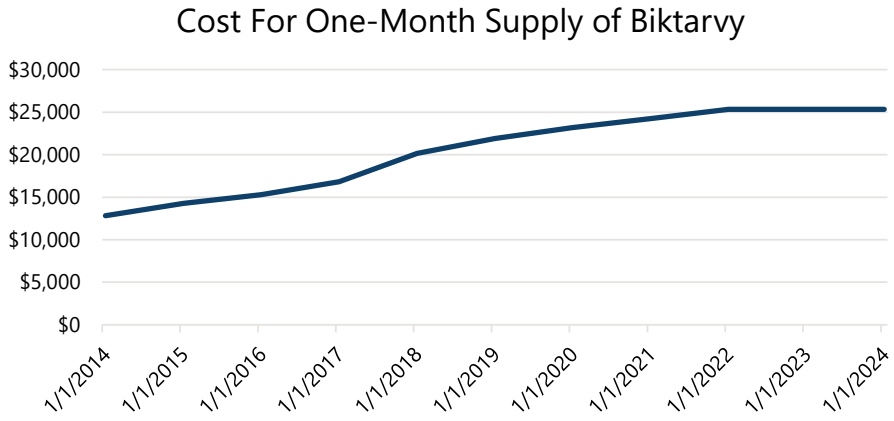
Stelara has increased its price by 130% since 2013 despite having 6 indication expansions and interval creep



- 2009 FDA approved for every 12-weeks
- 2016 FDA approved for every 8-weeks
- 2024 compendia supported for every 4-weeks
- With interval creep – **potential spend has increased by almost 700%**



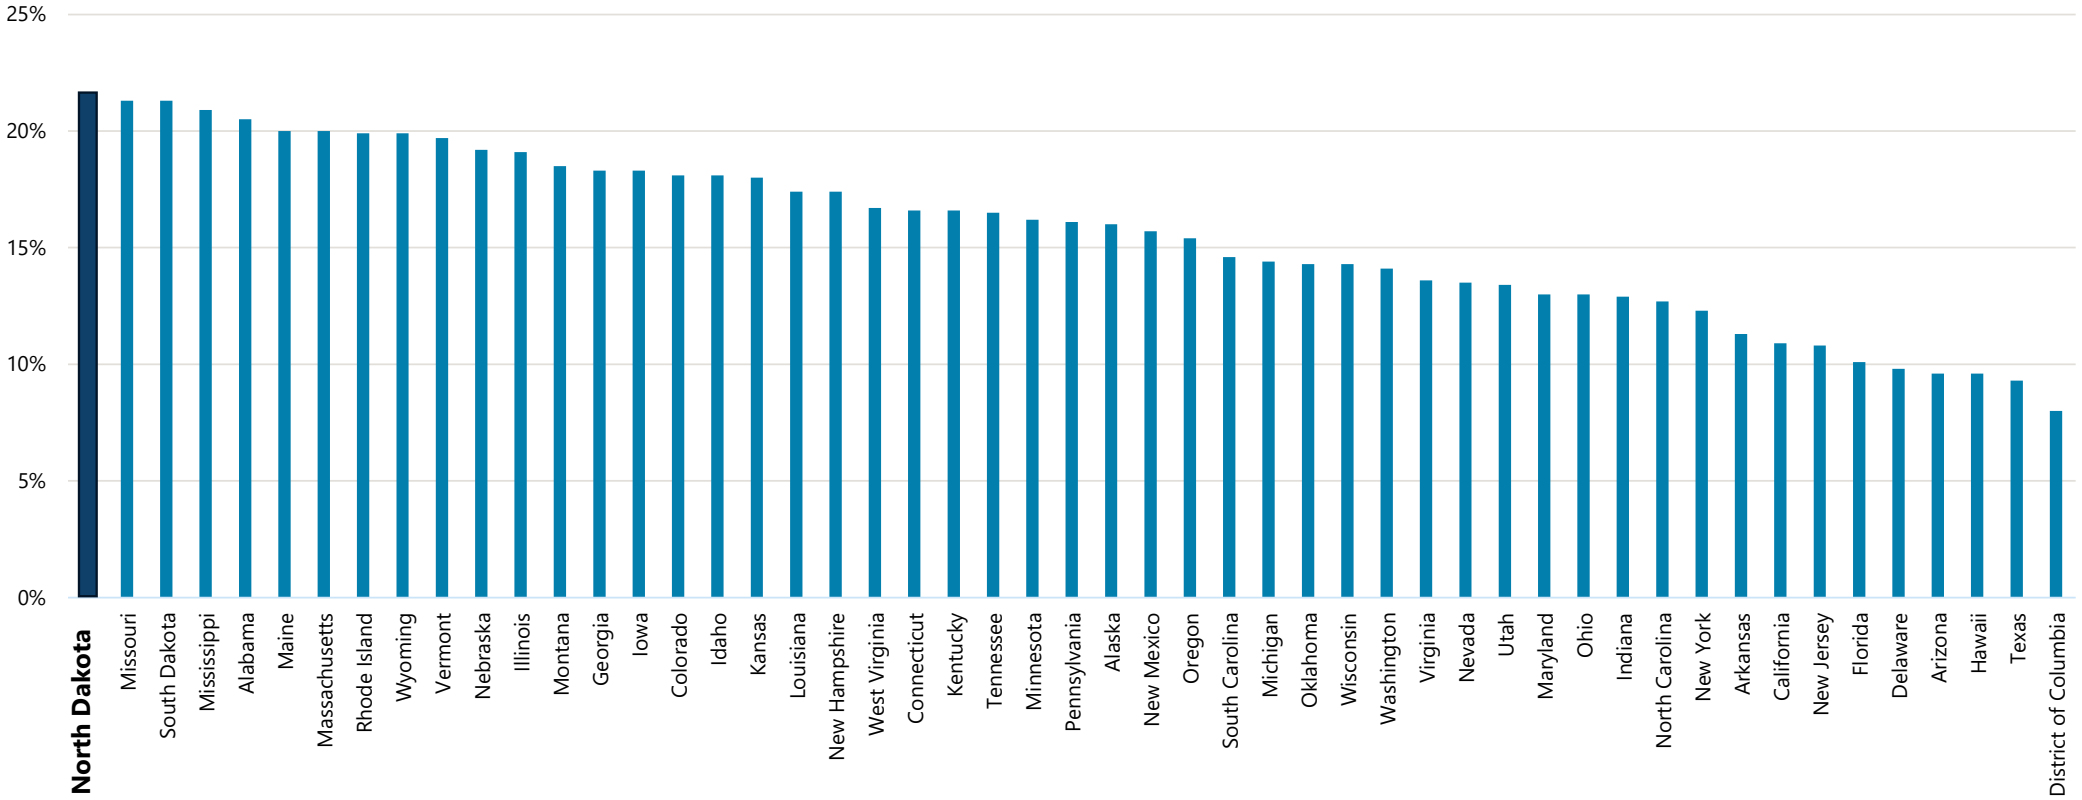
Year	Dosing schedule	Annual Cost
2013	every 12-week dosing	$52,311.48
2025	every 4-week dosing	$361,957.05



Cosentyx has received 6 indication expansions since 2015 and has increased its price by over 116%
Dupixent has received 13 indication expansions since 2017 and has increased its price by over 33%

Areas of Focus – Drug Price Increases

- Drug price increases of drugs are also notable in prior authorization excluded classes – Antipsychotics, HIV and Oncology



NORTH Dakota | Health & Human Services
Be Legendary.

Areas of Focus – Core Measures

Percentage of Long-Stay Nursing Home Residents Who Received an Antipsychotic Medication – FFY 2023

Note: Lower is better

NORTH Dakota Be Legendary. | Health & Human Services

Areas of Focus – Accelerated Approval

- Approved off surrogate endpoints rather than clinical outcomes, so confirmatory trials are necessary to establish efficacy and safety

- According to a 2022 Office of Inspector General Report:
  - 278 drugs have been granted accelerated approval as of 2021
    - 13% have been withdrawn
    - 34% of accelerated approval drugs have at least one confirmatory trial past its original planned complete date
    - $3.6 billion has been spent nationally from Medicaid from 2018 to 2021 on 18 of the drugs with delayed confirmatory trials

Areas of Focus – Accelerated Approval (cont.)

- Exondys 51 –
  - Approved in 2016 for Duchenne Muscular Dystrophy based on trials involving a total of 12 patients on Exondys 51 with continued approval based on verification of confirmatory trials
  - Failed to show difference in clinical outcome from placebo and external control group, median increase in dystropin levels after 48 weeks was 0.1%
  - Confirmatory trial results expected end of 2026 (original deadline 2020)
  - Annual Cost: $1.2 million for a 50 kg (110 lb) child

- Oxbryta –
  - FDA approved in 2019 for Sickle Cell Disease for the surrogate endpoint of increased hemoglobin
  - Removed from market in 2024 after showing a higher number of deaths than placebo
  - Annual Cost: $125,000

Summary

- Drugs continue to get more expensive due to many factors:
  - New drugs continue to list at higher and higher prices
  - The drugs being used are more expensive as newer more effective drugs are available
  - Many more cell and gene therapies are coming with limited opportunity for value-based agreements
  - More drugs are being approved for rare diseases and oncology at very expensive list prices, some without evidence of efficacy
  - Congressional changes (AMP cap removal and increased offset amounts)
  - Shortages

- Tools to minimize growth in spend:
  - Finding rebate opportunities
  - Utilization management
  - Eliminating fraud, waste, or abuse potential

Legislative Bills with Potential Budget Impact

•HB 1067 – allows Medicaid coverage for otherwise eligible children lawfully present in the US and extends the Autism Spectrum Disorder waiver age to 21.

•HB 1451 – requires Medicaid coverage for antiobesity medication.

•HB 1454 – would prohibit step therapy for medications.

•HB 1464 – requires coverage of doula services in Medicaid & Medicaid Expansion.

•HB 1485 – increases personal needs allowance by $10.

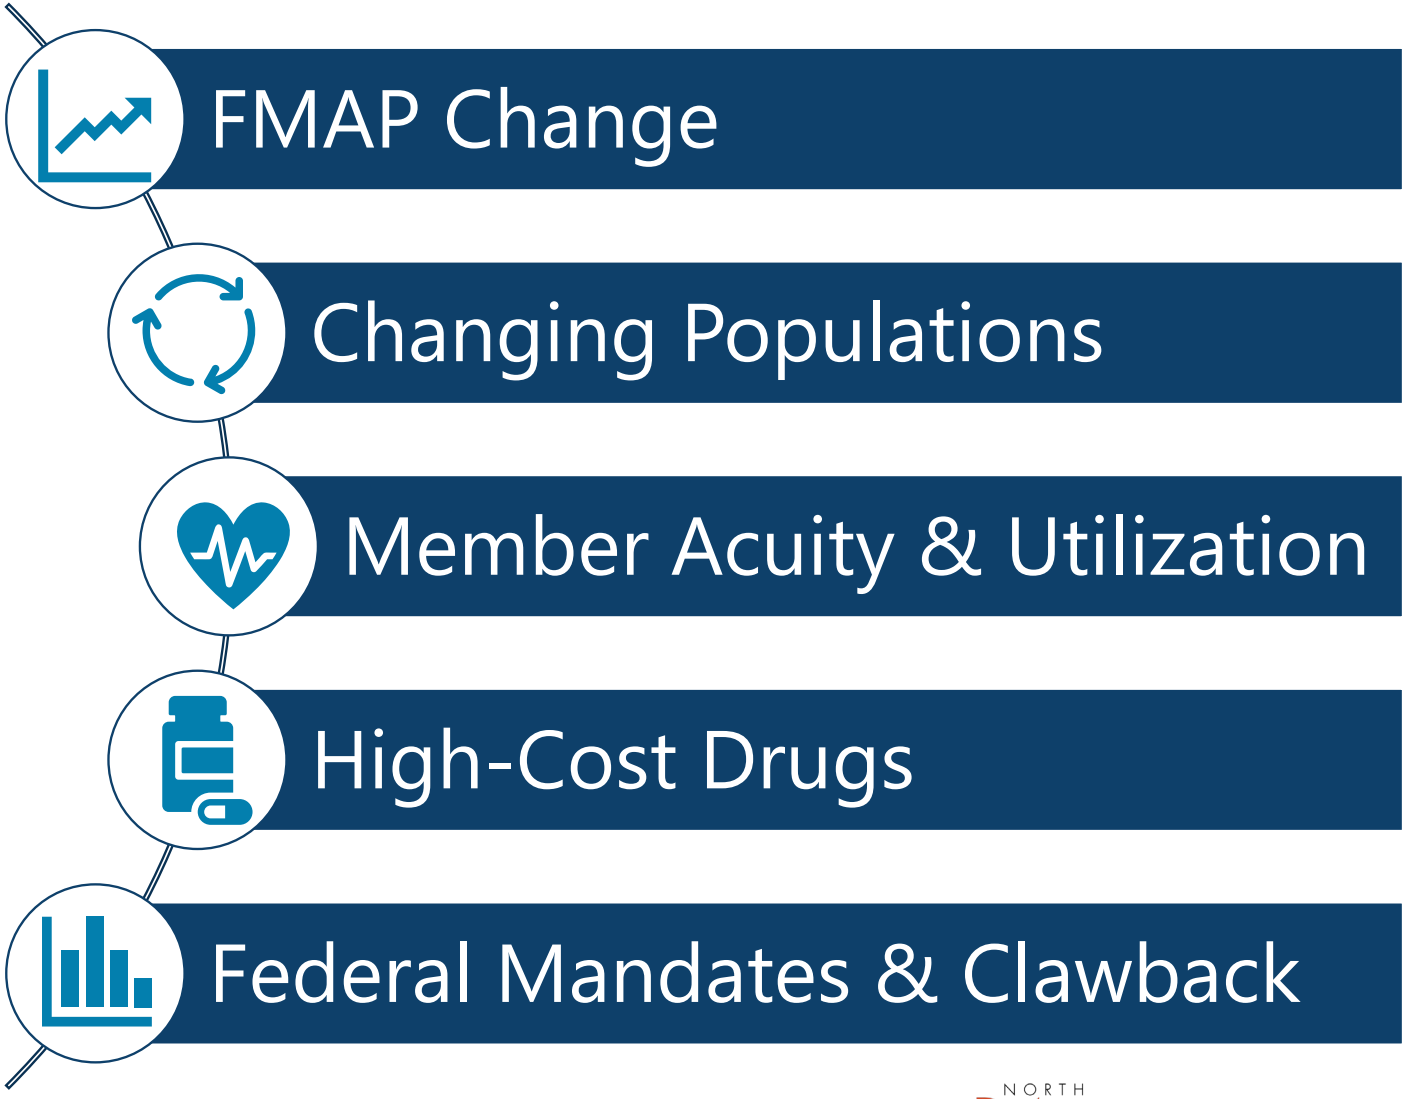
•SB 2096 – creates regional acute psychiatric treatment and residential supportive housing services.

•SB 2190 – mandates coverage of ABA services for a variety of psychological and medical diagnoses.

•SB 2231 – adds select dental services for Medicaid Expansion members.

•SB 2271 – revises adults residential rate methodology.

•SB 2305 – requires Medicaid waivers to include paid family caregiving.



•SB 2316 – requires Medicaid to contract for regional providers for ventilator and psychiatric long term care.

HB1012 Overview to House Appropriations

House Appropriations | Human Resources Division
Representative Nelson, Chairman

January 23, 2025, Nancy Nikolas Maier | Director, Adult and Aging Services Section

NORTH Dakota Be Legendary. | Health & Human Services

The Adult and Aging Services Section is designated as the State Unit on Aging. We administer and deliver more than 40 in-home and community-based services to eligible North Dakotans.

We also protect the health, safety, welfare and rights of vulnerable adults in the community and long-term care residents.

NORTH Dakota | Health & Human Services

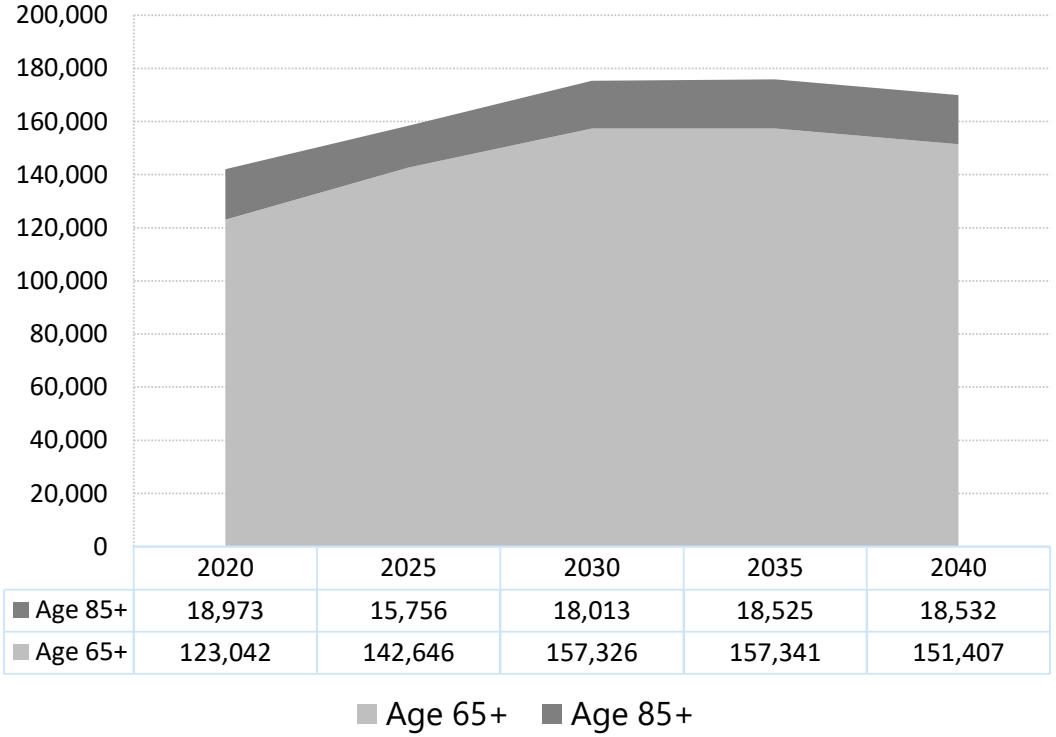
North Dakota demographic trends will contribute to the state's workforce challenges

North Dakota Population Projections 2020-2050 | ND Department of Commerce State Data Center



Source: ND 2024 Population Projection | State Data Center

The age shifts from 2020-2030 translate to **24-26,000 fewer people** in the peak "workforce ages" of **18-64**

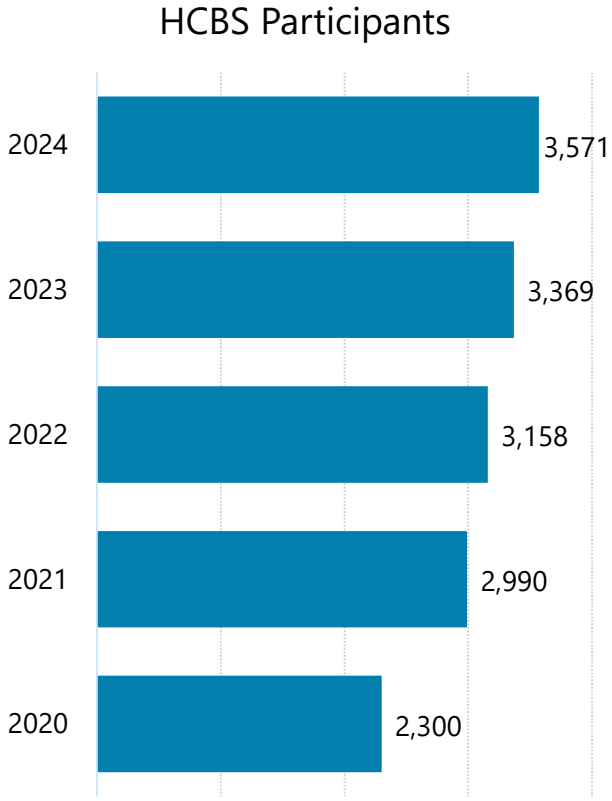
NORTH Dakota Be Legendary. | Health & Human Services

Who we serve

Older adults and adults with physical disabilities make up a growing percentage of North Dakota's population

	2020	2025	2030	2035	2040
Age 85+	18,973	15,756	18,013	18,525	18,532
Age 65+	123,042	142,646	157,326	157,341	151,407

Source: 2024 ND State Data Center Population Projections



- The population age 65+ is expected to experience the **largest period of growth between now and 2035**
  - People age 65+ represent 18-19% of ND population
  - **Age 85+** consistently represents approx. 15% of total pop age 65+ but the **number of people** in that age group will **grow by 3,000** between now and **2035**

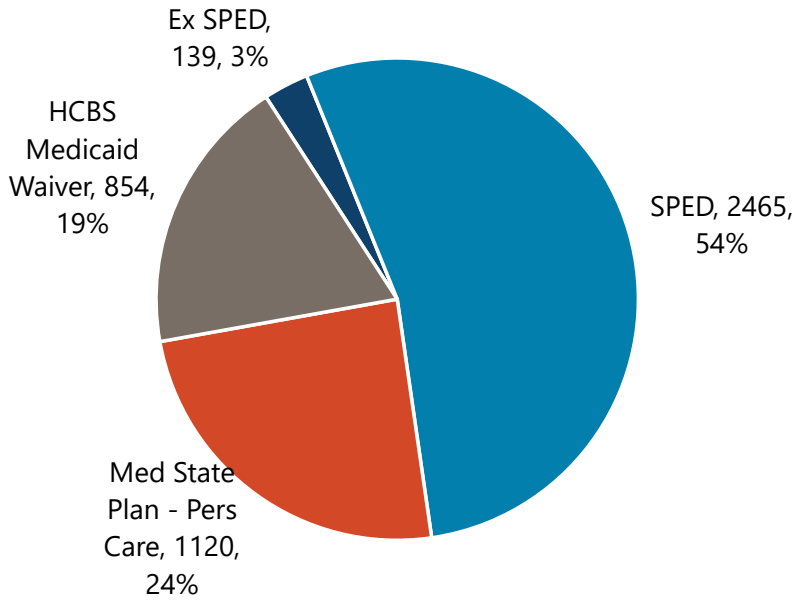
7 in 10

Americans 65+ will need LTC services for an average of 5 years

More North Dakotans are choosing home-based community care options every year

- ✓ The **demand** for in-home and community-based services has continued to **increase.**
- ✓ More HCBS participants have **complex needs** (medical and behavioral health) that increase the amount of time and skills necessary to provide **quality services.**
- ✓ **Rising acuity levels** have created a demand for more **complex services** and providers who can employ higher trained staff including **nurses and supervisory** staff.

54% increase since 2020



What is HCBS?
Services delivered in an **integrated setting**.

What is an integrated setting?
A private home, apartment etc., owned or rented by the individual or their family, or an individual adult foster care setting.

Home-based community care options older adults and adults with physical disabilities

3,571

Number of people supported by HCBS in CY2024

Source: NDHHS HCBS Caseload Data Nov 2024 (unduplicated count)

- Primarily serves older adults and individuals with physical disabilities
- Recipients must be both functionally and financially eligible
- May have client cost share based on income
- Federal and state funds
- Recipients range in age from 17-104 years old

NORTH Dakota Be Legendary. | Health & Human Services

Adult & Aging Services

HCBS Case Management

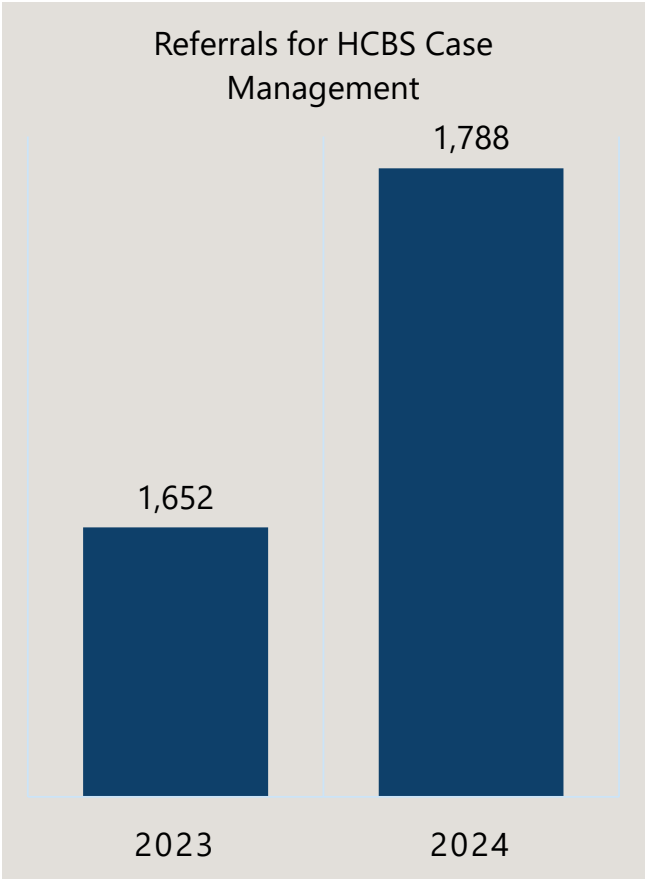
HCBS Case Managers

Provide the support and structure needed to connect eligible people in need of in-home and community- based care to qualified service providers (QSPs) in their community.

What do they do?

- Determine eligibility
- Conduct person-centered planning
- Assess needs
- Authorize services
- Monitor for health and safety
- Provide support and guidance to family caregivers

73 and **4**



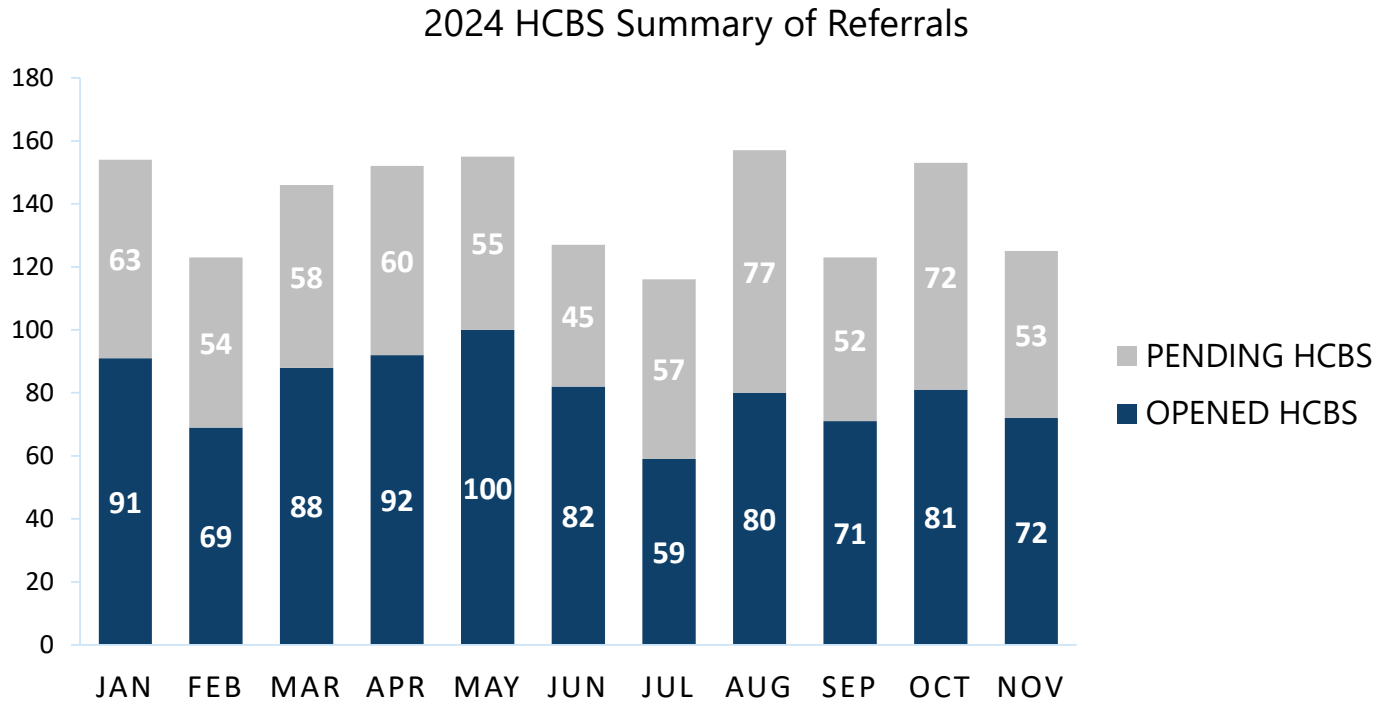
73 HCBS case managers and 4 Basic Care case managers are supervised by Adult & Aging Services

150 and **80**

On average, 150 new referrals and 80 new cases opened for HCBS each month

4,329

Provided Case Management to **3,538** HCBS recipients and **791** Medicaid Basic Care residents in 2024

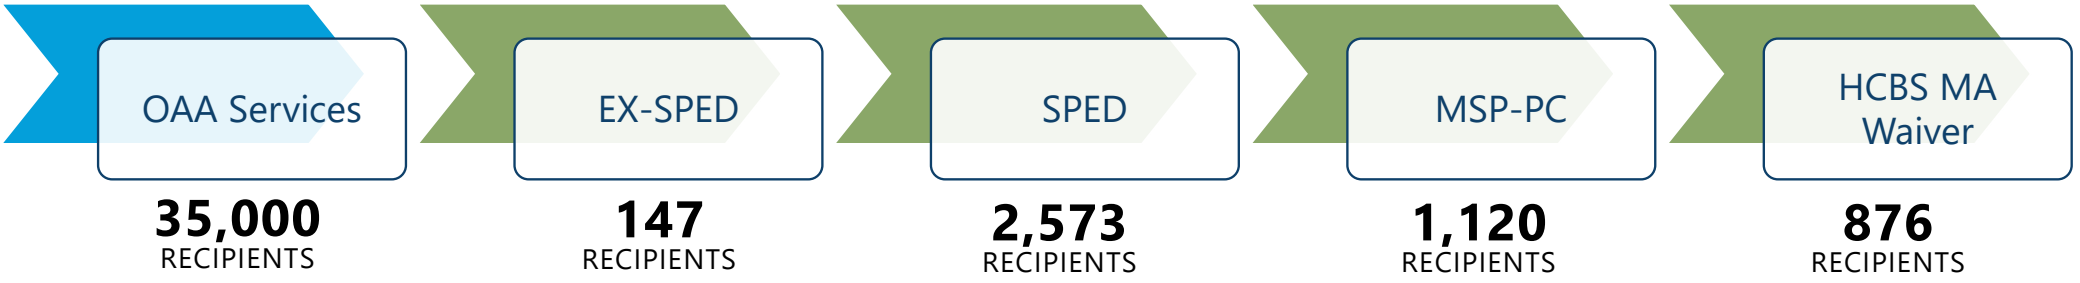


Adult & Aging Services

HCBS Case Managers handle pending cases, new referrals and case closures

The nature of HCBS work means that caseloads are constantly changing -- there are many cases opening and closing each month due to:

- ✓ Changes in chronic health conditions
- ✓ Medical emergencies (stroke, falls) that increase level of disability and need for assistance
- ✓ Death



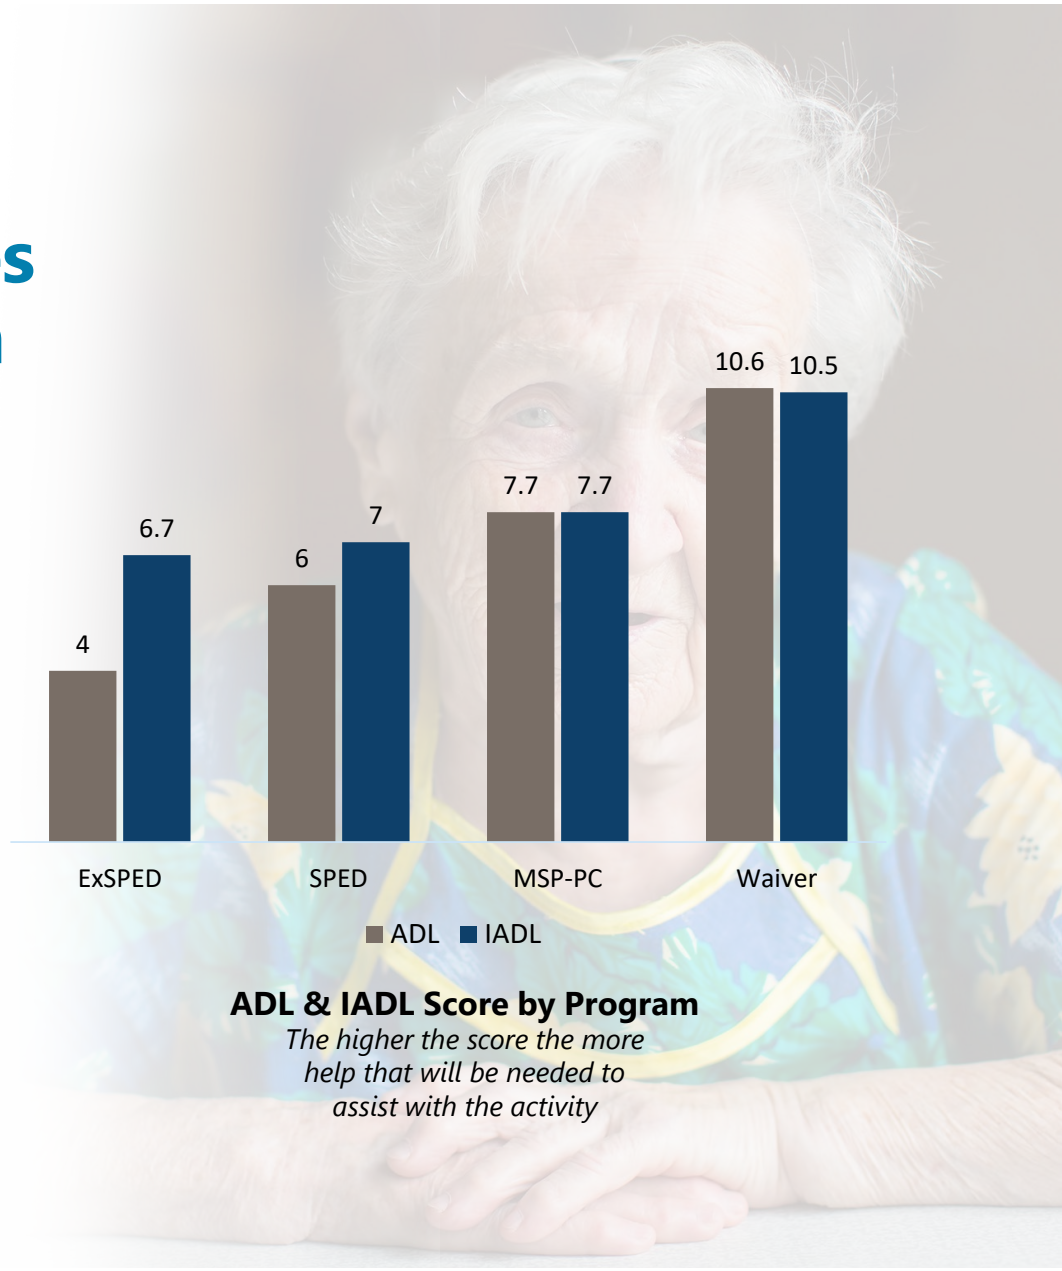
Continuum of home-based services available from early intervention to nursing facility *level of care*

Source: ND HHS, OAA FFY23 Report, HCBS Recipients CY2024

Early Intervention and preventative supports

24 hour supports
All inclusive services
TBI and Memory Care facilities
Adult Residential / Community Supports

Older American Act = OAA
Meals (group setting and at home), dementia supports, fall prevention, assistive tech, respite, fitness and preventative health care



SPED, Expanded SPED and Medicaid State Plan Personal Care (MSP-PC)
House cleaning, snow removal, lawn care companionship, emergency response system, rides to essential services, help with personal care (bathing, dressing, toileting)

HCBS Medicaid Waiver
Personal care (more extensive), supervision for wandering and intermittent care needs, education from a nurse, nurse-performed medical tasks. Up to 24-hour care.

Overall acuity level and the complexity of needs increases across the service continuum

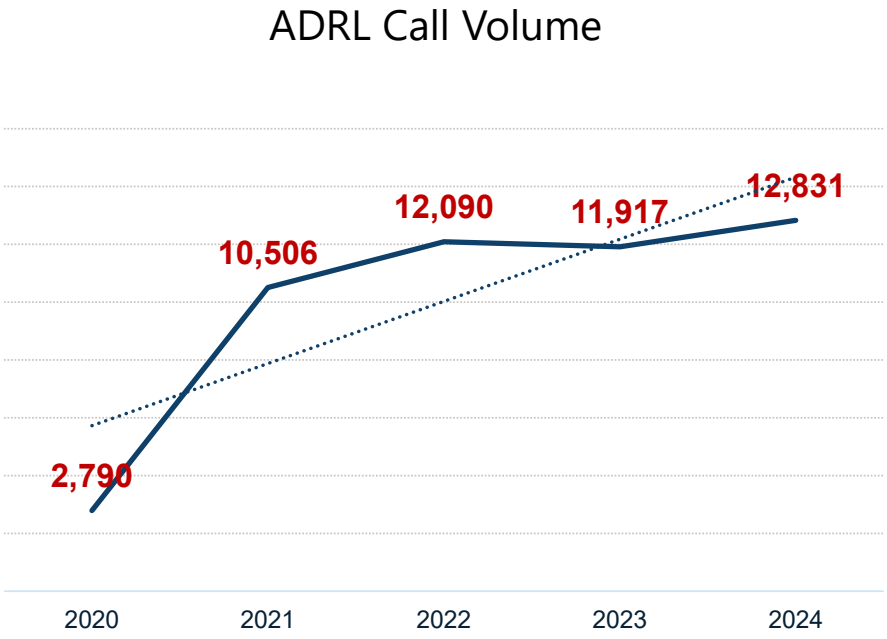
Activities of Daily Living(ADL) and Instrumental Activities of Daily Living (IADLs):

- Tasks we do to stay alive and well.
  - Eating, going to the bathroom,
  - Moving from place to place, shopping, housekeeping and meal preparation
- Difficulties with these tasks correspond to how much help, supervision, and hands-on care an older adult or adult with physical disability needs.
- Cooccurrence of behavioral health and complex medical needs increases the challenge of providing appropriate and effective care.

ADL & IADL Score by Program

The higher the score the more help that will be needed to assist with the activity

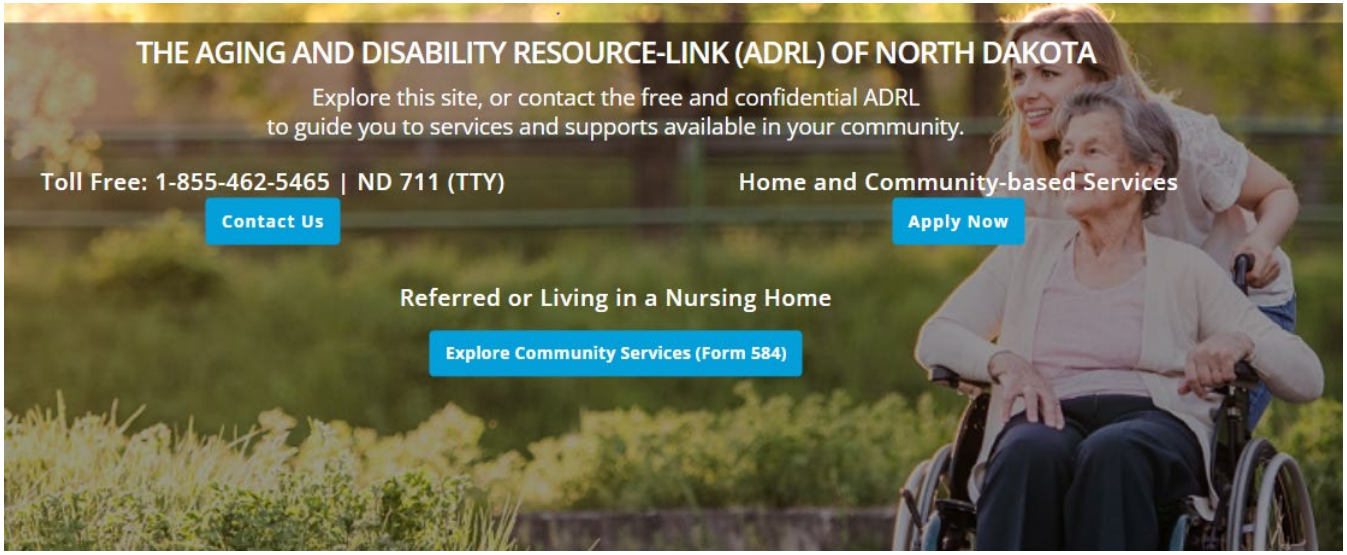
NORTH Dakota | Health & Human Services
Be Legendary.



Aging and Disability Resource Link (ADRL) is a simplified access point for info about services

ADRL's Dual Purpose

- Process to receive and route referrals for services (centralized intake for HCBS services for programs administered by Adult/Aging services)
- Help guide North Dakotans to services that can help them stay independent as long as possible



ND ADRL: 855-462-5465

- ✓ Based on "no wrong door" approach
- ✓ 6 people staff the ADRL (calls and emails)
  - FY2020-2024 = 50,134 calls, 48,768 unique website hits, 1,602 web intakes

The average wait time for the ADRL is 1 minute

ADRL – How it works

Who calls ADRL?

- 34% Self
- 30% Family/friends
- 18% Other Govt Svc
- 16% Healthcare Prof
- 2% SNFs

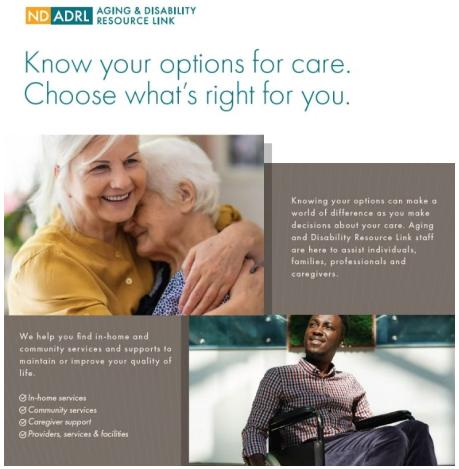
- 27% - age 0-60
- 37% - age 60-74
- 22% - age 75-84
- 14% - age 85+

Why are people calling?

- How can I find help for my parents...
- I am calling because I don't know where to begin....
- Help with what?
  - Household chores (cleaning, meal prep, buying groceries)
  - Personal care (ex. bathing, toileting, moving around their home and help getting outside)
  - Rent help and home modifications
  - Transportation to buy necessities and to medical appointments

- The ADRL team offers information, assistance, community referrals, and manages HCBS intake
- ADRL specialists assess HCBS eligibility by asking targeted questions
  - What's going on that made you decide to call?
  - Why do you need help?
  - What are your support systems? Resources? Where do you live?
- Referrals are sent to HCBS Case Managers who make a home visit, assess eligibility, create a care plan, and connect individuals with service providers

ADRL – How do people find out about it?



- Social Media Posts and Ads
- Community Partners and Providers
- Healthcare Professionals
- Community Events
- Professional Conferences
- Word of mouth
- Direct Mail
- Other Govt Agencies

Older Americans Act Services

Preventative Health

Community Aging in Place – Advancing Better Living for Elders (CAPABLE)

- **10** home visits from an **occupational therapist**, a **registered nurse**, and a **handyman** to help develop strategies to help "**age in place**" **11** individuals served in FFY23
- Evidence-based program produces results
  - Better **function**
  - Increased **motivation**
  - Reduced **depressive symptoms**, and
  - **Lower healthcare utilization**.

Falls Prevention Classes

- *Stepping On*
- *Tai Ji Quan*
- *Fit and Strong*

Family Caregiver Training

- *Powerful Tools for Caregivers*
- **364** individuals received falls prevention classes or caregiver training FFY23

Falls are the leading cause of injury among older adults.

Services Delivered By: ND Assistive, NDSU Extension, Master trainers certified to teach evidence-based classes

Older Americans Act Services

Supportive Services

Health Maintenance

Preventative services to assess and **maintain** the **health** and **well-being** of older adults

- Blood pressure/pulse/rapid inspection
- Foot care
- Home visits
- Medication set-up
- **3,663** individuals received health maintenance FFY23

Companionship

Services **reduce** social **isolation** for older adults and individuals with physical disabilities.

- Improves physical and mental health
- Helps prevent institutional placement
- **311** individuals received companionship FFY23

Services Delivered By: Senior Service Providers, Public Health, Qualified Service Providers (enrolled as companionship providers)

Older Americans Act Services

Assistive Devices and Telecommunications

Assistive Safety Devices Distribution

- Adaptive and **preventive health devices** for individuals aged 60 and older to support **independent living**
- Trained staff assist with purchasing, delivering, and installing devices such as grab bars, emergency response systems, medication dispensers, voice amplifiers, and seat lifts.
- **857** eligible individuals received **1,522** Assistive Safety Devices FFY23

Senior Safety Program - North Dakota Assistive

Telecommunications Equipment Distribution

- Specialized **telecommunications equipment** for individuals with **communication impairments**, including those who are deaf, hearing, speech, or mobility impaired.
- **232** eligible individuals received **320** telecommunications devices FFY23

Funded with OAA and state/federal telecom taxes assessed to landline and cell phone users

Services Delivered By: ND Assistive

Older Americans Act Services

Supportive Services

Legal Assistance Services

- **Legal advice** and **representation** for older adults with financial or social needs.
- Can assist with **legal issues** such as abuse, age discrimination, guardianship defense, health care, housing, income, long-term care, neglect, nutrition, protective services, and utilities.
- Advance Directive Workshops
- **826** individuals served in FFY23

Options Counseling

- Helped **509** older individuals, adults with physical disabilities, and their families **access** community services **and plan** for future care needs **--** regardless of income.
- Staff **assess needs** during home or virtual visits and **connect** individuals to **resources.**
- **522** visits were conducted statewide FFY23

Most common requests = help in finding in-home services and service providers

Services Delivered By: Legal Services of North Dakota, 6.5 HHS staff (Adult and Aging Services)

Caregiver Supports

Dementia Care Services

- Average **631** care consultations/information and assistance services per month for family caregivers and facility staff
- Average **107** attendees per month for their public and professional training SFY23

Lifespan Respite Grant

- Provides information and respite – short breaks for caregivers.

Family Caregiver Support

- **451** caregivers received care coordination, respite, and help paying for supplies, in FFY23

19,000 caregivers support 13,700 individuals 65+ who are living with Alzheimer's in ND.

Source: Alzheimer's Association (2024)

62,000 family caregivers in ND providing 58 million hours of unpaid family care.

Protect Vulnerable Adults

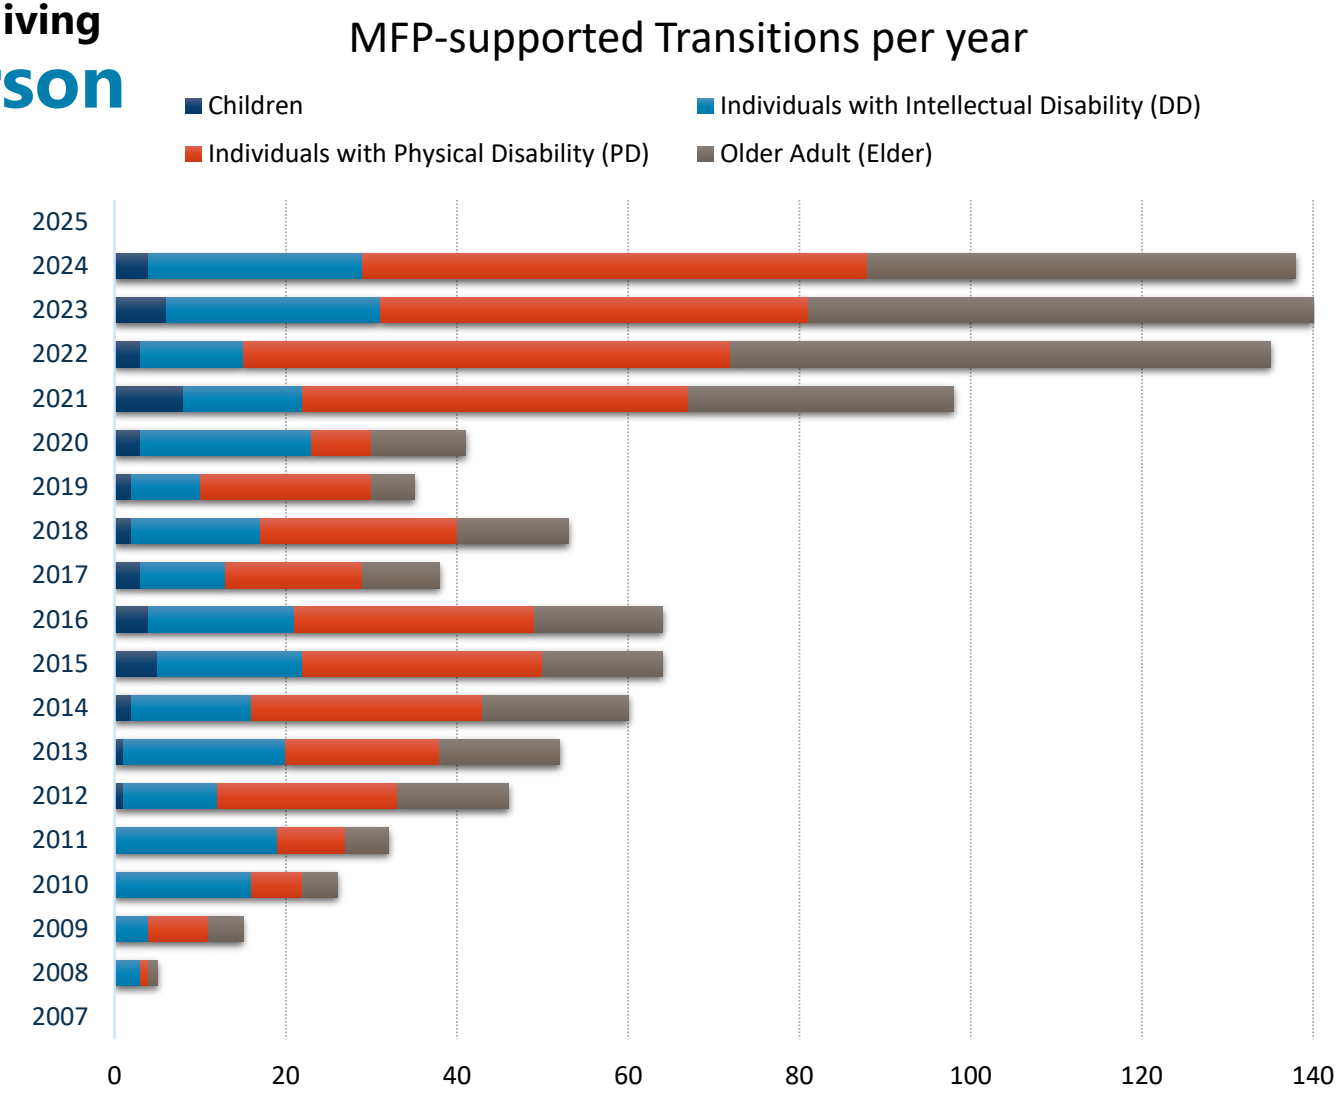
Guardianship Establishment Fund

Fund pays legal costs associated with petitioning for guardianship for income-eligible adults who are incapacitated

Demand for guardianship establishment has been growing



- 142 adults served by this Fund in 2021-23
- **261** adults served July 2023 – Dec 2024
- Current funds have almost been fully expended; HHS anticipates a wait list

$3,000 max petitioning cost per person *(increased by 23-25 legislature; previous cap was $2,500)*

Supporting in-home/community-based living

Money Follows the Person Grant

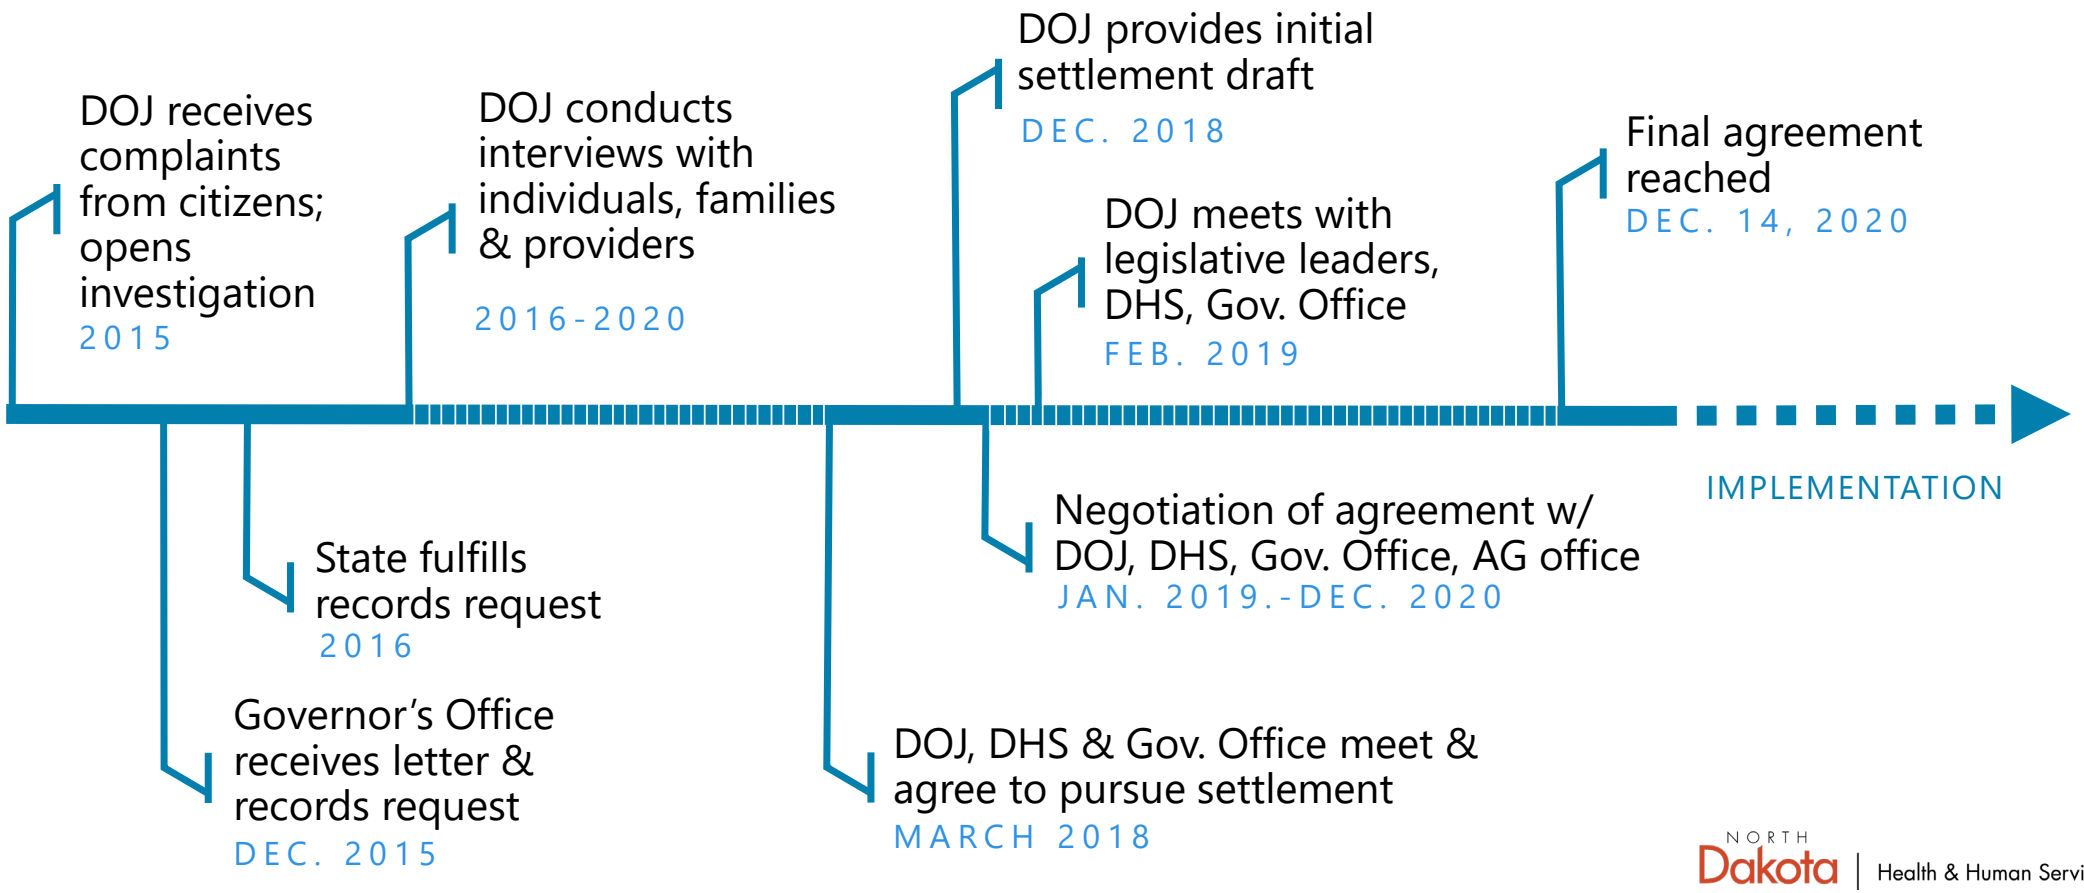
- Federal grant helps states expand HCBS usage to support LTSS and rebalance care systems.
- Eliminates barriers that prevent individuals from receiving LTSS in the setting of their choice
- MFP Grant started 2007 – ND award was $8.9 million
- Total award through 2024 - $60.5 million (fed) and $4.6 million (state)
- Supported transition out of institutional setting for 1,040 individuals over the past 17 years
- 38% of those transitions were done in the last 4 years.

Services Delivered By: Centers for Independent Living, ND Center for Persons with Disability Minot State, Qualified Service Providers

US DOJ Settlement Agreement Americans with Disabilities Act

- The Americans with Disabilities Act (ADA) requires public agencies to **eliminate unnecessary segregation** of persons with disabilities and provide services in the **most integrated setting appropriate** to the needs of the individual.
- In **1999** the Federal Supreme Court **Olmstead** decision **affirmed** the **ADA** requirements.
- Most **integrated setting** is an individual or family home

Implementing the Settlement Agreement between U.S. DOJ & State of North Dakota



PURPOSE is to ensure that ND will **meet Americans with Disabilities Act (ADA) requirements** by providing services, programs, and activities for individuals with physical disabilities in the most integrated setting appropriate to their needs.

Effective Dec. 14, 2020

Agreement will terminate eight years after effective date if Parties agree that the state has attained substantial compliance with all provisions and maintained that compliance for a period of one year.

DOJ Settlement Agreement Timeline

NORTH Dakota Be Legendary. | Health & Human Services

Settlement Agreement developed based on a variety of concerns

EXAMPLES PROVIDED BY DOJ

- **Unnecessary segregation** of disabled individuals in skilled nursing facilities
- Adults in skilled nursing facilities who would **rather be in their community**
- **Imbalance of funds** to skilled nursing facilities and community-based services
- **Lack of awareness** about existing transition services and available tools

Who are we trying to reach?

Target population members (TPMs)

Basic Eligibility

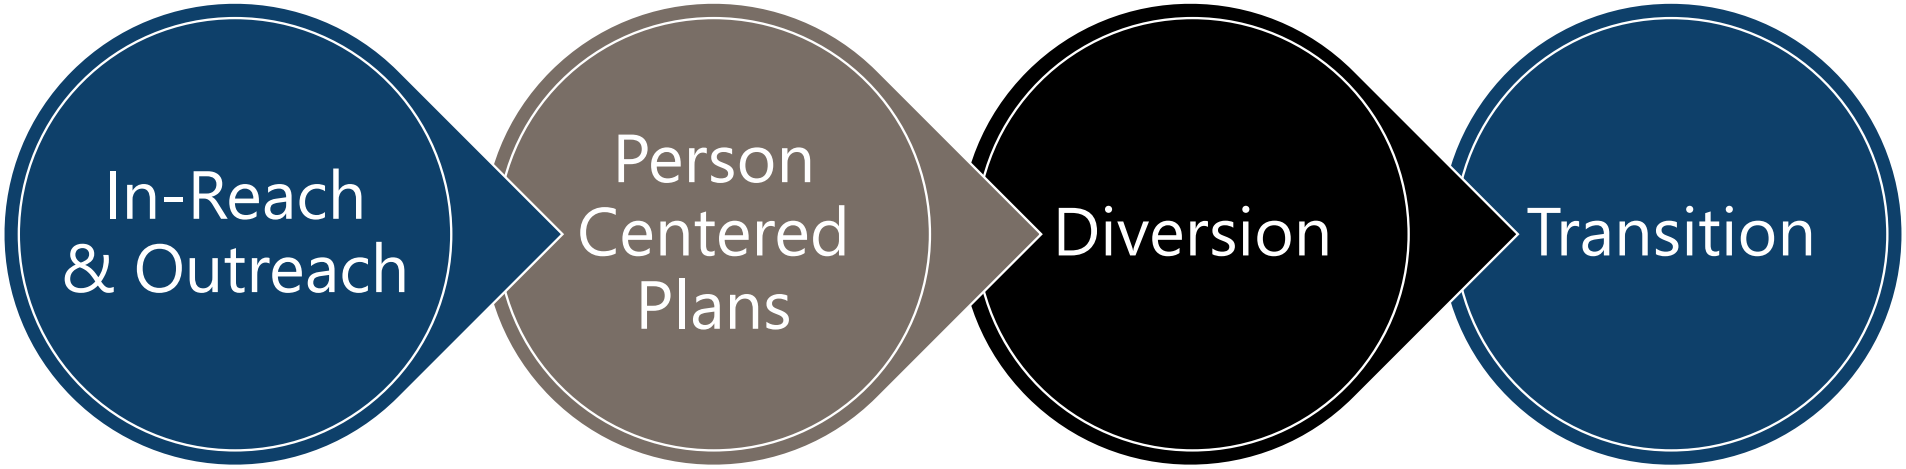
- Individual with physical disability
- Over age 21
- Eligible or likely to become eligible to receive Medicaid long-term services and supports (LTSS)
- Is likely to require LTSS for at least 90 days.

IF in skilled nursing setting

- Receive Medicaid-funded nursing facility services AND
  - Likely to require long term services and supports
- Receive nursing facility services AND
  - Likely to become eligible for Medicaid within 90 days, have submitted a Medicaid application, and have approval for a long-term nursing facility stay

IF in hospital or home setting

- Referred for a nursing facility level of care determination AND
  - Likely to need services long term
- Need services to continue living in the community AND
  - Currently have a HCBS Case Manager or have contacted the ADRL



49
PER 1000

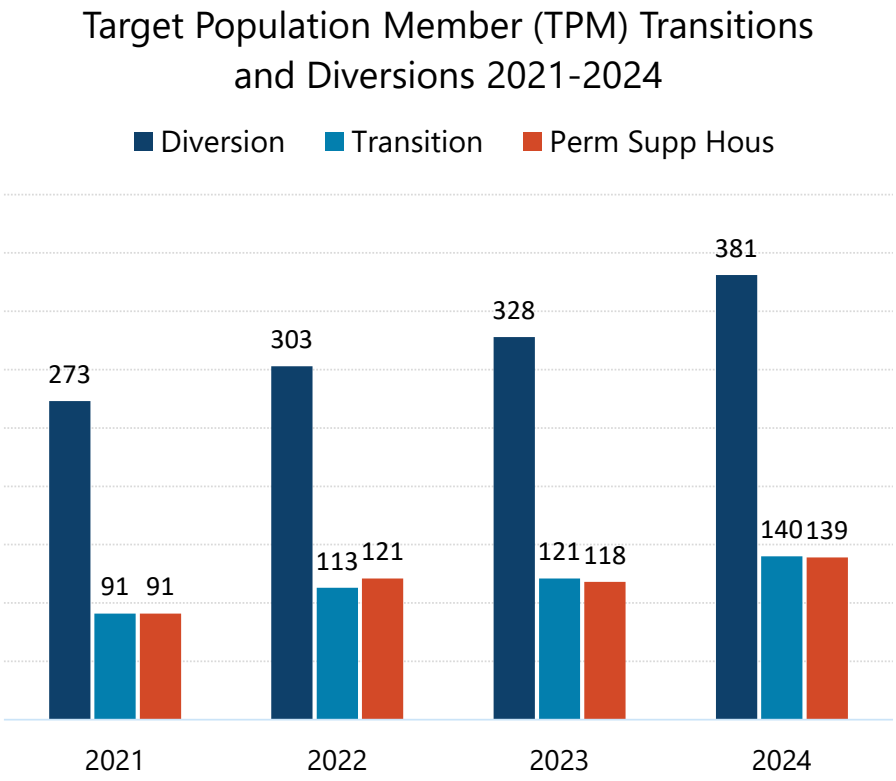
ND & DOJ Settlement Agreement Implementation Strategy

NORTH Dakota Be Legendary. | Health & Human Services



DOJ Settlement Agreement

HCBS is supporting increase in Transition and Diversion from institutional settings

"**Diversion**" happens when a Medicaid eligible individual who screens at a nursing facility level of care receives a set of services (HCBS, housing etc.) that allows them to remain in an integrated setting and avoid institutionalization.

"Transition" happens when a Medicaid eligible individual who resides at a nursing facility receives transition supports and a set of services (HCBS, housing etc.) that allows them to move to an integrated setting in the community.

"**Permanent Supported Housing**" is providing affordable housing, rental assistance, meeting with landlords, application assistance etc., in addition to other traditional HCBS that allows an individual to live in a private residence alone or with family, their significant other or roommates of their choosing.

NORTH Dakota Be Legendary. | Health & Human Services

DOJ Settlement Agreement Benchmarks

2020-2024

- **Transition at least 100 TPMs** by the end of **year 2 (2022)**, and by the end of **year 4 (2024) transition at least 60%** of those requesting to transition out of the SNF (within 120 days of request).
- **Divert** at least **100** TPMs within **2 years (2022)** and an **additional 150** by the end of **year 4 (2024)** who are choosing to receive care in the community.
- Provide permanent supported housing (rental assistance) to **20 TPMs in year 1 (2021)**, **30 in year 2 (2022), 60 in year 3 (2023).**

2025-2028

- **Transition 70% of TPMs by year 6 (2026) and 85% by year 7 (2027)** who are requesting transition out of the SNF (within 120 days of request).
- **Divert** an **additional 150 TPMs** to community-based services by **year 6** (2026) and **continue to divert** all who are **choosing to receive care in the community.**
- **Provide** permanent supported housing **(rental assistance)** to additional TPMs based on the aggregate need. *Note: Almost all transitions require some type of state or federally funded rental assistance.*

The Agreement will terminate **eight years (Dec 13, 2028)** after the effective date if the Parties agree that the State has attained substantial compliance with all provisions and maintained that compliance for a period of one year.

Included in Executive Budget Request

Rental assistance funds to support transition/diversion

US DOJ Settlement Agreement requires the State to provide permanent supported housing (PSH), including rental assistance as necessary, to a specified number of target population members each year.

- Year 1 – 20 people
- Year 2 – 30 people
- Year 3 – 60 people
- Year 4+ - # based on aggregate of need

Total	General	Federal	Other
$300,000	$300,000	$0	$0

This is an ongoing funding request.

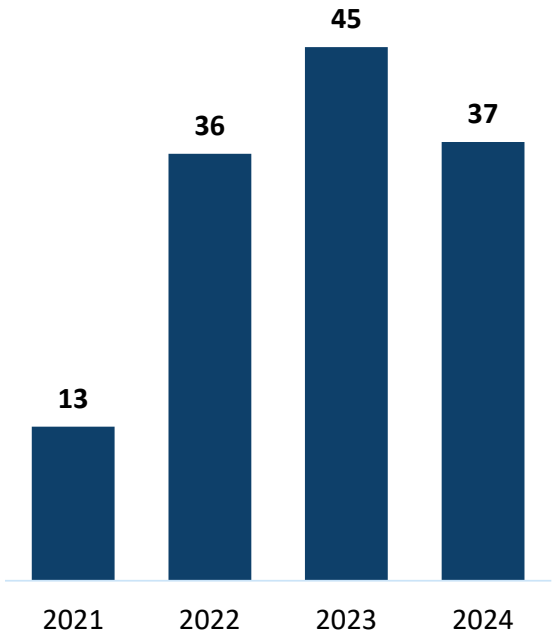
Be Legendary.

State-Funded Rental Assistance to support community living for TPMs

State funded Rental Assistance helps individuals pay for affordable housing in the community when the cost of housing is putting them at risk of housing instability.



This flexible housing resource also supports diversion efforts by paying housing costs during an institutional stay, to assure the individual does not lose their place to live in the community while they are recovering from an injury or other circumstance that causes them to be out of their home temporarily.

Top 5 Housing Barriers for TPMs

1. Finding an accessible unit
2. Credit issues
3. Rental assistance
4. Eviction History
5. Need for Environmental Mod

About 80% of TPMs list "housing" as a barrier

TPMs accessing
State-funded rental assistance

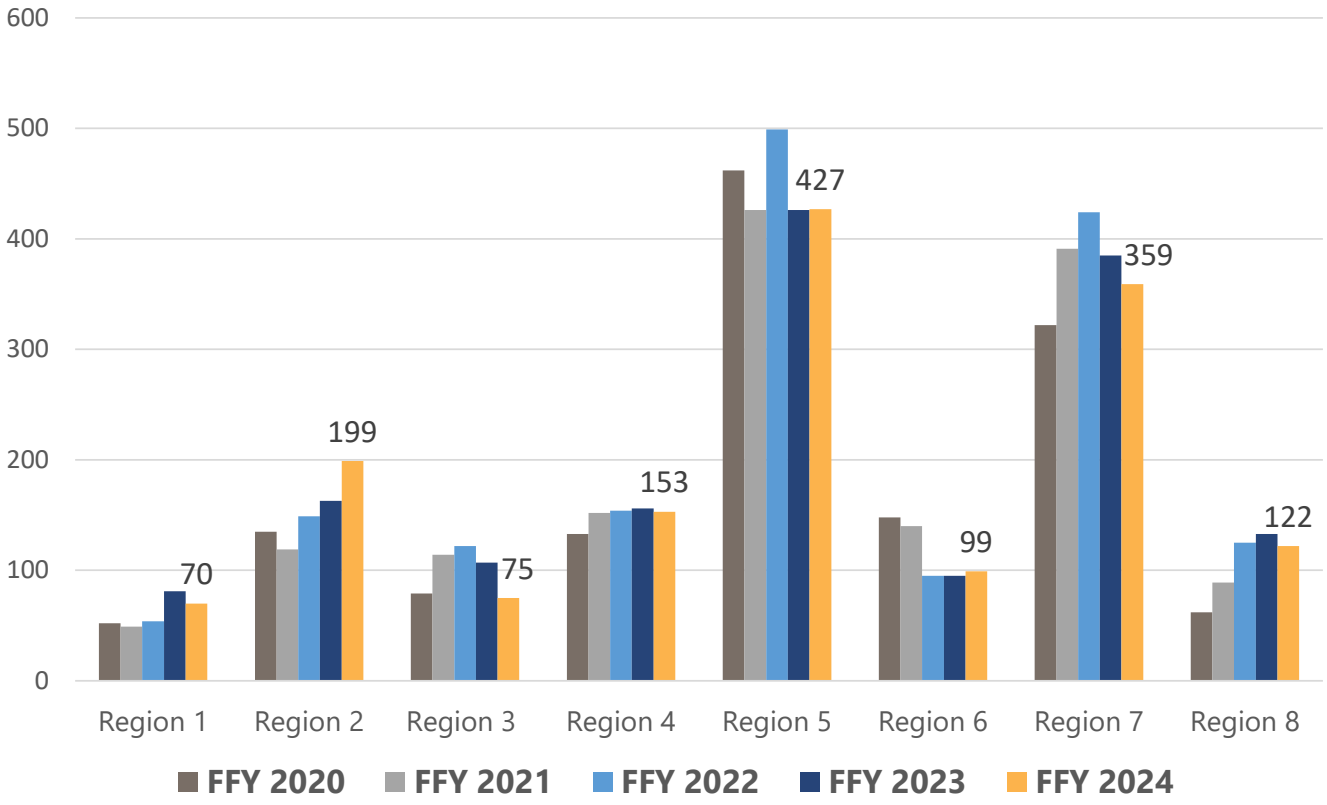
Included in Executive Budget Request

Adult Protective Services

HHS maintains responsibility for providing Adult Protective Services (APS) across North Dakota, which involves response to reports of abuse or neglect (including self-neglect) of vulnerable adults.

The APS unit has seen a growth in the number of report of suspected abuse/neglect over the last several years, with the most common types of reports related to self-neglect (i.e., inability to care for oneself) and financial abuse by others.

This request would allow HHS to more appropriately staff to the demand by adding resources to the **contracts** maintained with Mountrail/McKenzie and Cass Human Service Zones **for APS coverage**.



Total	General	Federal	Other
$718,522	$718,522	$0	$0

This is an ongoing funding request.

Protect Vulnerable Adults

Region 5: Cass HSZ

- 427 Investigations
- Reports have increased
- Complexity of cases is increasing

NORTH Dakota Be Legendary. | Health & Human Services

Protect Vulnerable Adults

APS Regional Coverage

** Territory served by contracted staff*

- ✓ HHS APS received almost 6,000 calls for a vulnerable adult report in 2024
  - Justice involvement
  - Homelessness
  - Housing providers
  - Family / Neighbors
- ✓ Rural areas are difficult for APS staff as there are not enough support services in rural communities, so they end up being more of a higher priority service as no one else can respond to concerns.

NORTH Dakota | Health & Human Services
Be Legendary.

Included in Executive Budget Request

Transition and Diversion support services

Flexible services designed to make it possible for people with special, and often significant, health needs to move out of institutional settings (like nursing homes, basic care facilities, and DD group homes) to community-based settings (owned or rented home).

The same set of services has been deployed to stop people from ever having to move to an institution (diversion) by supporting home mods to or moves between community settings.

The request anticipates funding sufficient to complete an estimated 500 transitions/diversions over the course of the biennium; this assumes an average cost per person served of $10,500. History from the pilot phase of this work show that most transitions assist individuals with a physical disability, support people at risk of homelessness or survivors of domestic violence. Most referrals come from HCBS case managers, from substance use treatment providers, centers for independent living, domestic violence centers, and community-based care coordinators (ex. Free Through Recovery).

Total	General	Federal	Other
$5,289,397	$2,733,934	$2,555,463	$0

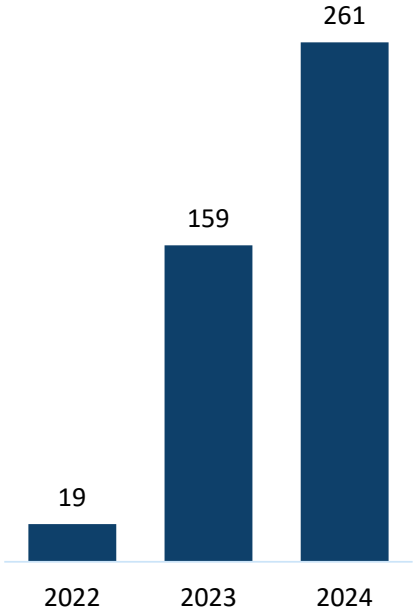
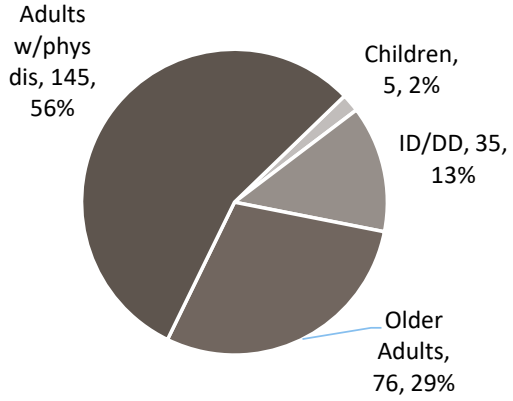
In SFY2024 people transitioned from:



$3,002

Average spent/transition (SFY24)



Diversions 2022-24

$3,742

Average spent/diversion (SFY24)

SFY2024 Diversions were completed for…

NORTH Dakota Be Legendary. | Health & Human Services

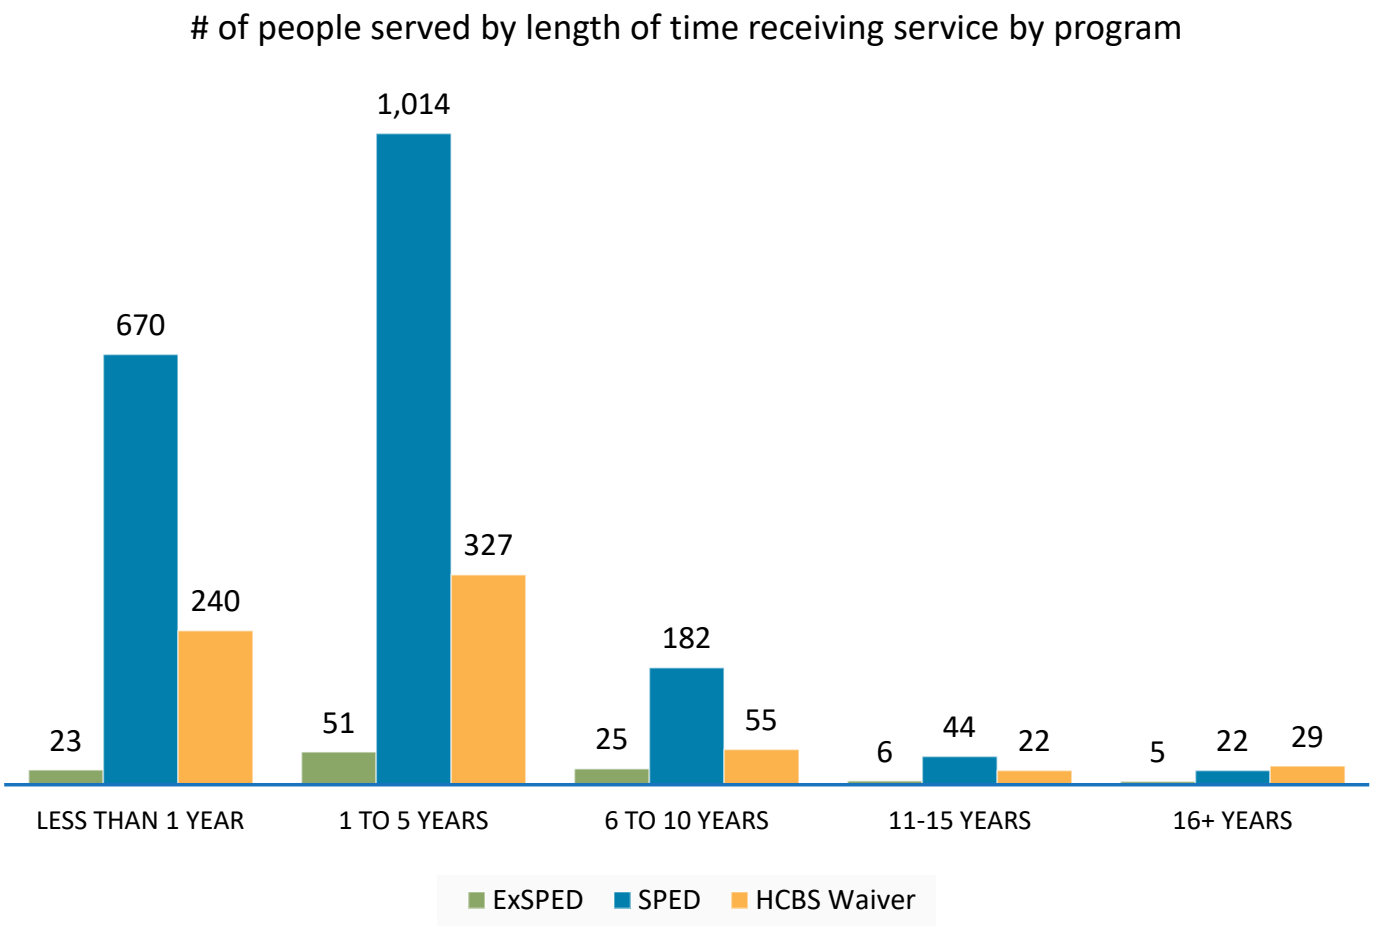
Transition and Diversion (T/D) Project

Flexible resources designed to help Medicaid-eligible individuals who are not eligible for or have needs not covered by other T/D services, become or remain stably housed in the community.

Who benefits from the T/D Project?

- In an institutional setting <60 days
- In an "alt congregate setting" (ex. basic care, agency adult foster care, DD-ICF) or already at home but need supports to maintain
- Child or Adult with Disability (based on fed definition) but is NOT necessary to meet a SNF-LOC to access services
- Covered by Medicaid Expansion

What else makes the T/D Project unique?

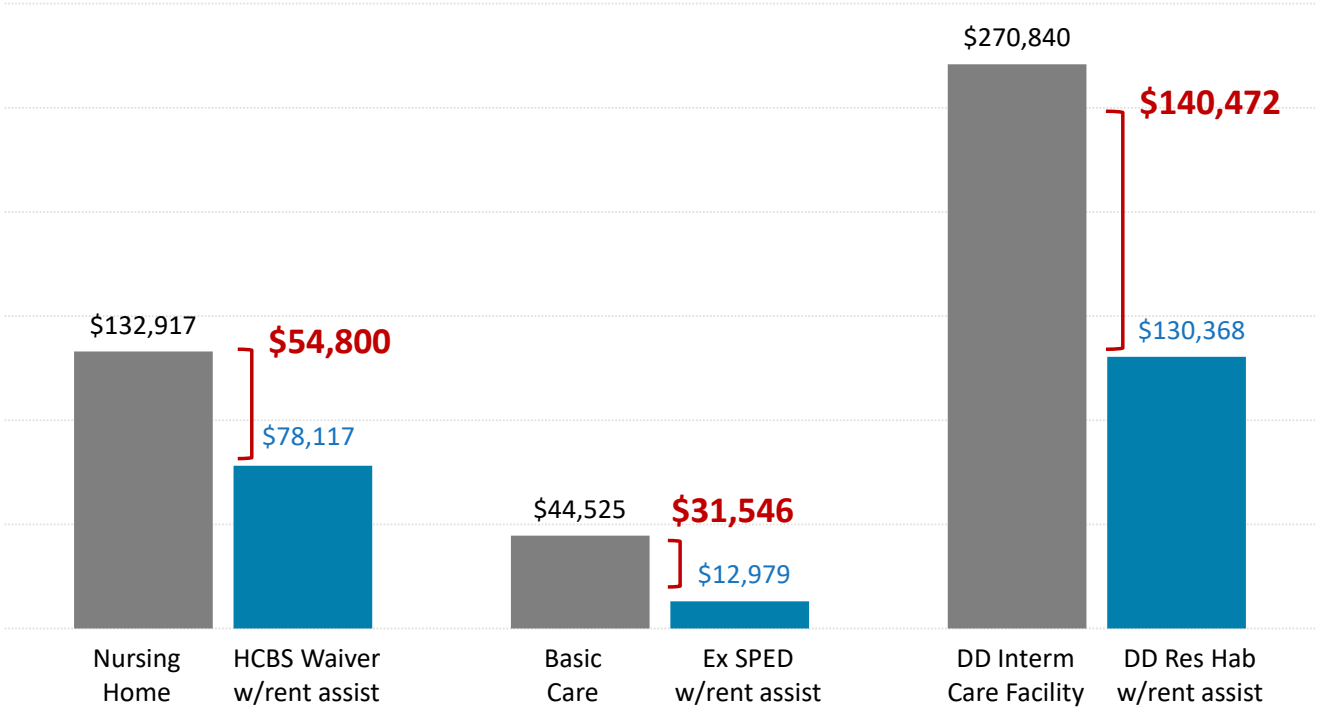


Can provide help with:

- Housing costs (deposits including first month's rent, app fees)
- Getting-started household furnishings and supplies
- Support services while Medicaid coverage is pending

NORTH Dakota | Health & Human Services
Be Legendary.

1-5 years is the typical duration of HCBS service to an individual



If people get the right supports in the beginning of the care continuum, people will stay out of later stage care longer.

If we can meet someone's needs in an earlier-stage service model, we will spend less over time than if they had to move to a later-stage service earlier than is necessary.

NORTH Dakota | Health & Human Services
Be Legendary.

Financial Impact of Transition & Diversion

Simulated **per person per year cost savings** associated with living and receiving services in a more integrated vs a less integrated setting

Note: Simulation assumes average annual cost for each service type (HHS 2024) plus an assumed average monthly payment for housing assistance for each community-based service (HCBS waiver, Ex SPED and DD Res Hab)

Transition and Diversion can be accomplished when resources are flexible enough to meet unique needs and broad enough to address barriers holistically.

NORTH Dakota Be Legendary. | Health & Human Services

Summary of Service Contracts

Who provides the care?

- Eight OAA Senior Nutrition Program (senior meals)
- Six Health Maintenance providers (OAA support svc)
- Four Tribal Nutrition/Home visiting agencies
- Three Adult Protective Services agencies (APS)
- Four Centers for Independent Living (Money Follows the Person Transition Coordination)
- Alzheimer's Association (Dementia Care services)
- ND Center for Persons with Disabilities (Housing facilitation for transition/diversion)
- ND Assistive (Senior Safety and Telecommunications)
- Legal Services of North Dakota (Legal Assistance)
- NDSU Extension (OAA support svc)
- Community of Care

Policy bills impacting Adult and Aging Services appropriation

- SB 2138 – volunteer-driven community-supported services
  - Bill to increase the amount of general funds appropriated for the Community of Care Grant from $120,000 a biennium to $250,000 a biennium.

- HB 1433 – dementia care coordination
  - Bill to add $250,000 in general funds to the HHS budget to fund a dementia care coordination position.

- HB 1460 – caregiver requirements
  - Bill to make modifications to substitute caregiver and respite care requirements in adult foster homes, which would impact access to and payment for affected services.

On the horizon for Adults & Aging Services

- Meet the increased demand for services
- Meet the continued implementation and reporting requirements of the US DOJ SA.
- Shortage of QSPs in “service desert” areas of the state.
- Shortage of nurses and providers with behavioral health experience to meet complex needs of HCBS recipients.
- Improve the quality of HCBS by improving the training and onboarding experience for providers.
- Help adults understand the benefits of investing in services that can support them in the first stage of age-related functional impairment. Using services when needs first arise may decrease the need for costly higher levels of care.
- Address the lack of supported decision-making services and guardians for people who lack capacity to self-direct
- Lack of affordable accessible housing units
- Increased federal regulation and compliance requirements for HCBS system.

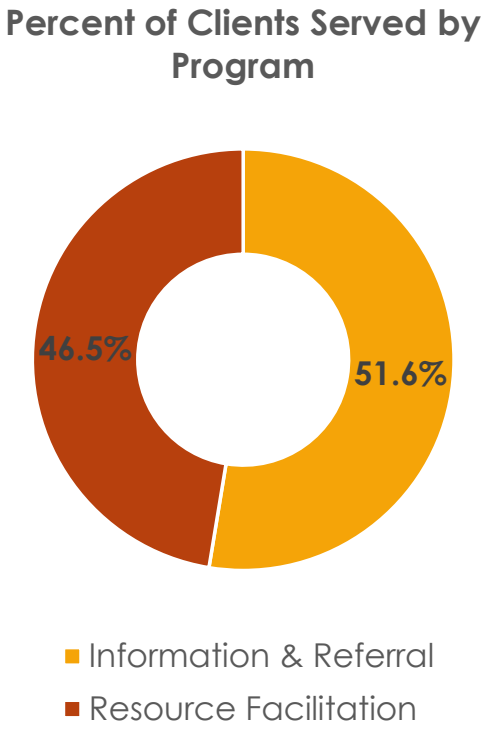
NDBIN Update
January 27, 2025

REBECCA QUINN, LMSW, CBIST

www.ndbin.org • 1 (855) 866-1884 • info@ndbin.org

NORTH DAKOTA BRAIN INJURY NETWORK

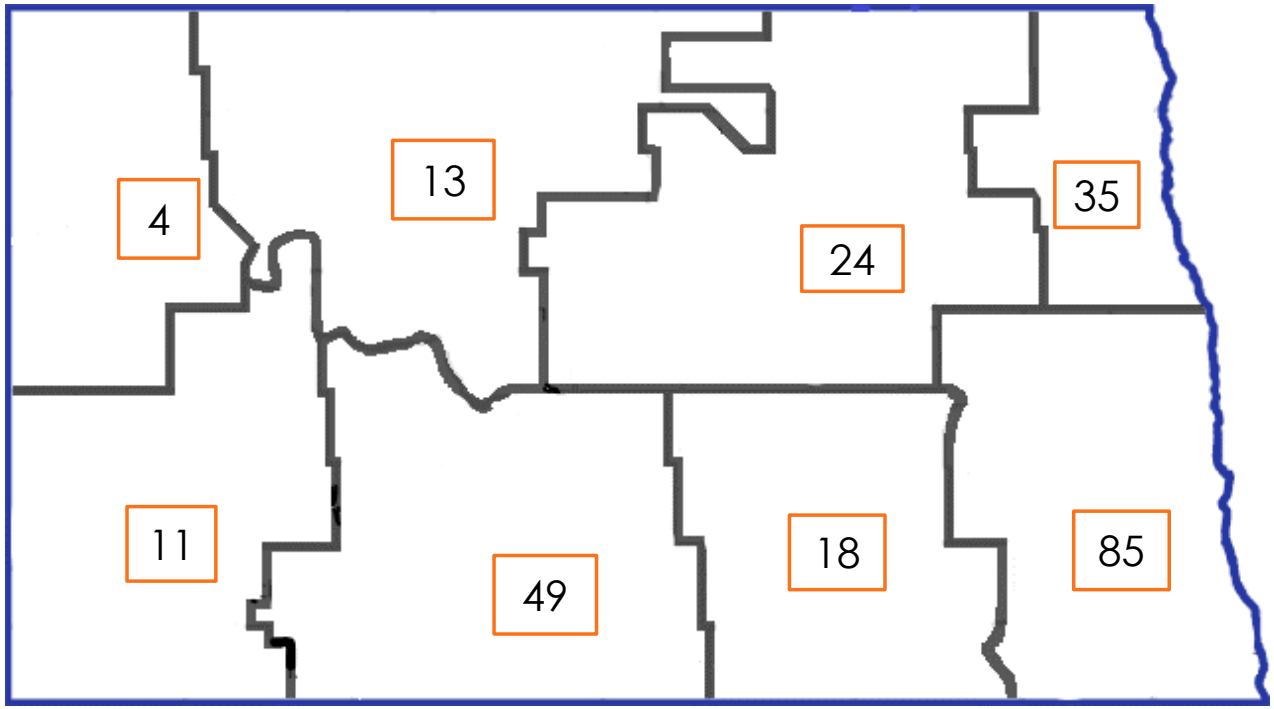
NDBIN role…..



- Contracted by HHS to serve as the central source of brain injury information, support, and training in the state.
- Developed because there had been identified a **lack of awareness, lack of training, and a lack of coordination across existing services.**

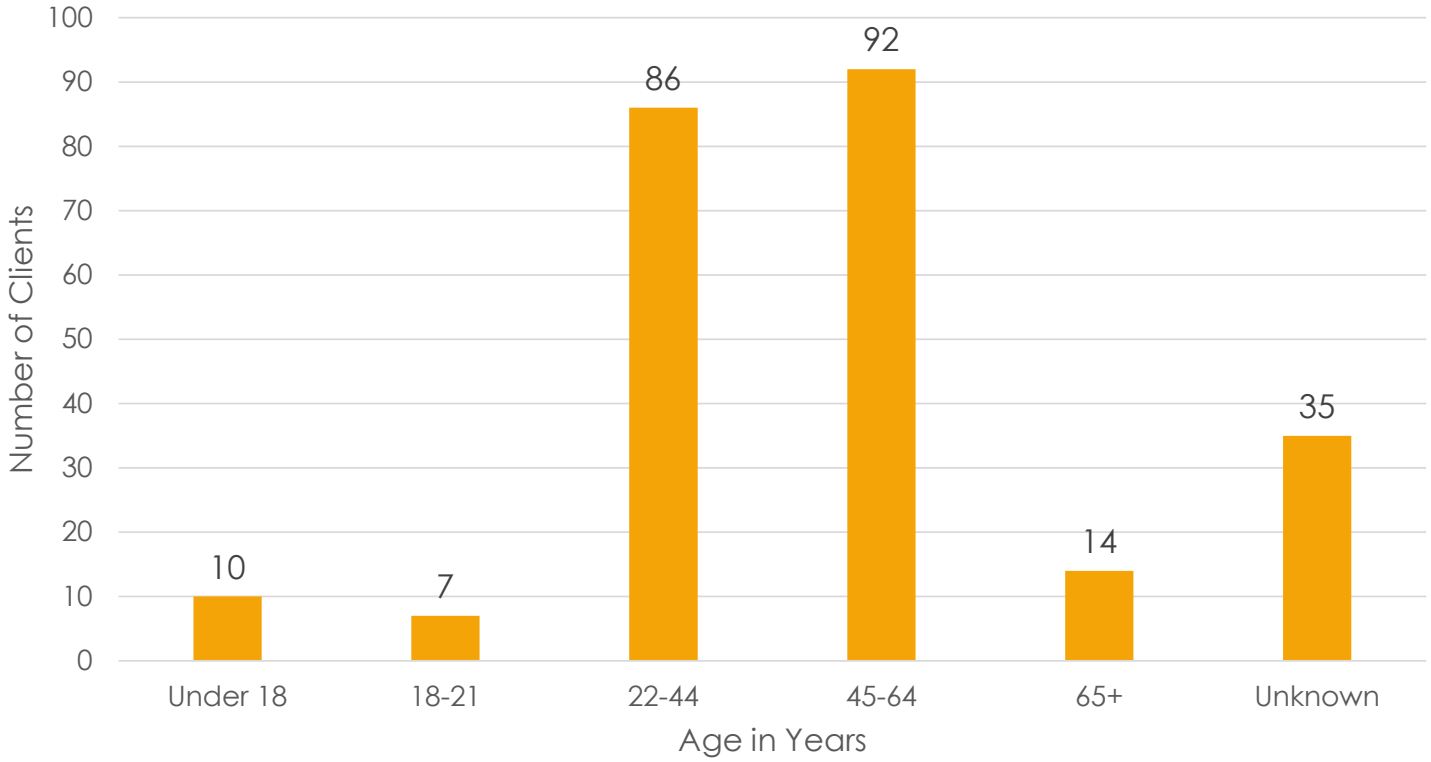
NDBIN meets these needs

- Outreach
- Toll-free number, website with searchable directory
- Informal supports and resource facilitation
- Education and training for individuals, family, and providers



Summary of Clients Served

- **244** unduplicated clients served from July 1, 2023 – December 31, 2024
  - **126** Information & Referral clients
  - **118** Resource Facilitation clients

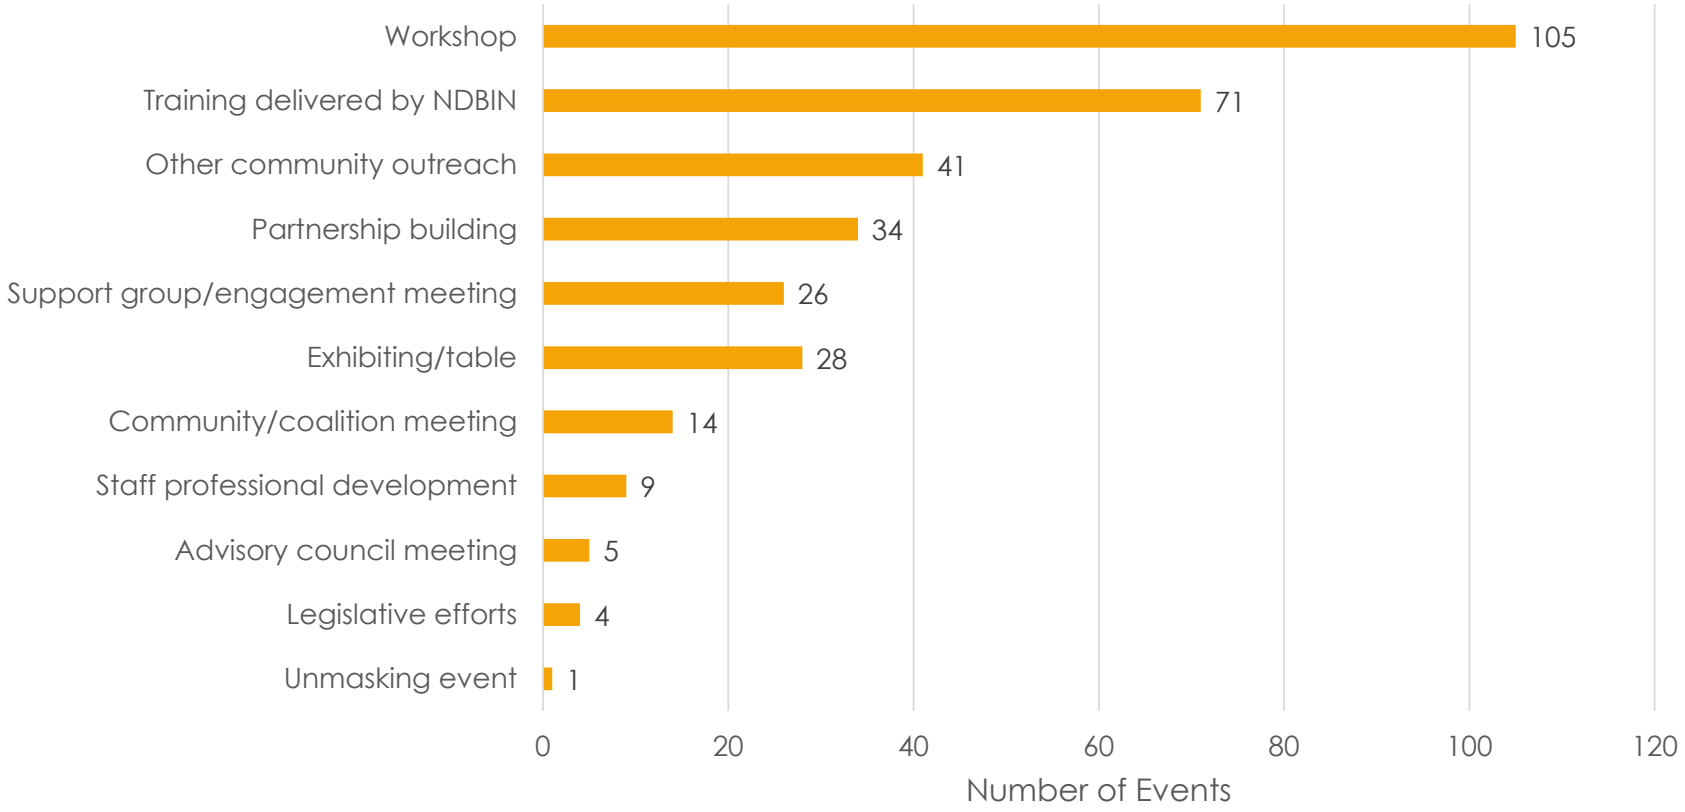


Clients Served by Region

34% of clients served were located in Region 5 (Fargo)

4 individuals we worked with were located out of state and looking to transition back to ND and 1 was unknown

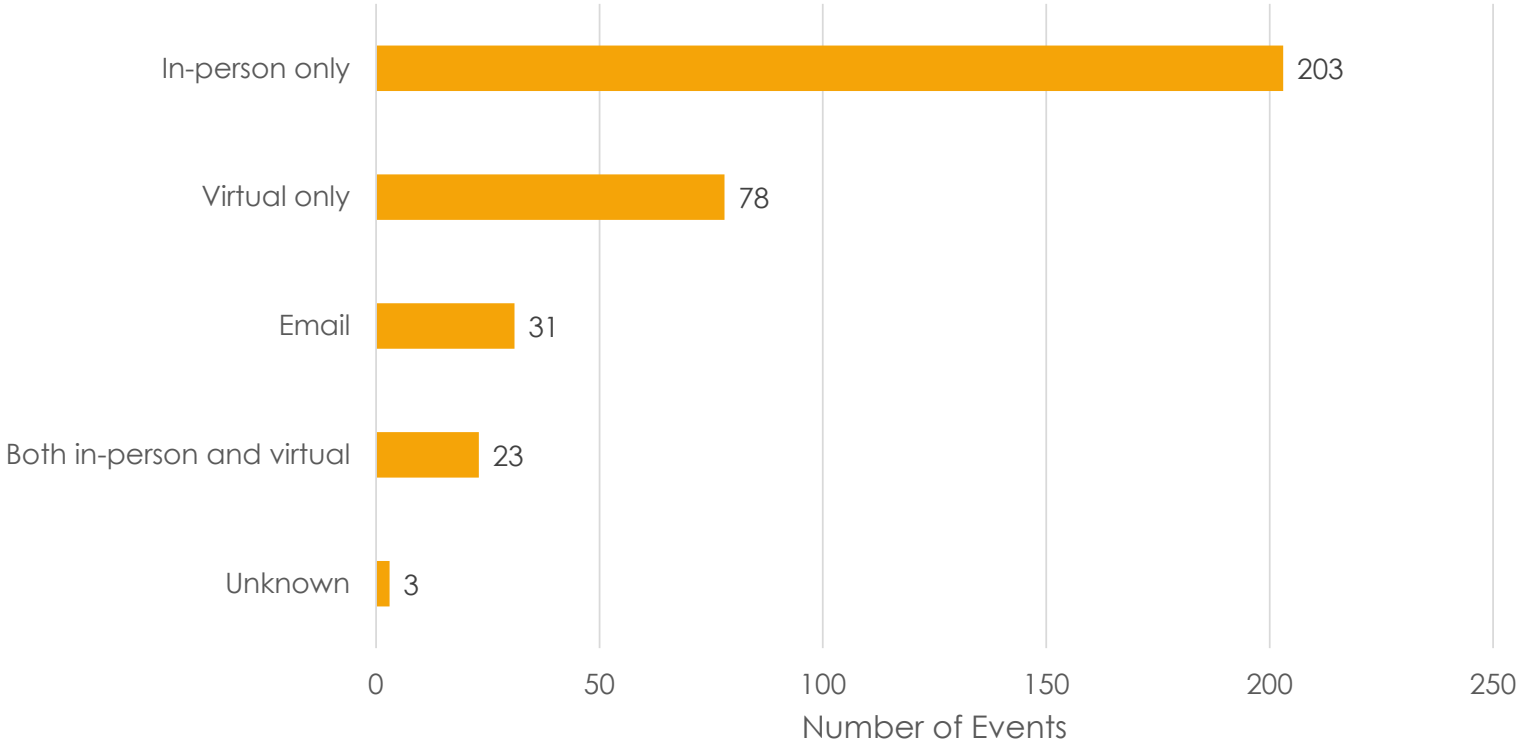
Clients Served by Age



37.7% of clients served were between the ages of 45 and 64 years old

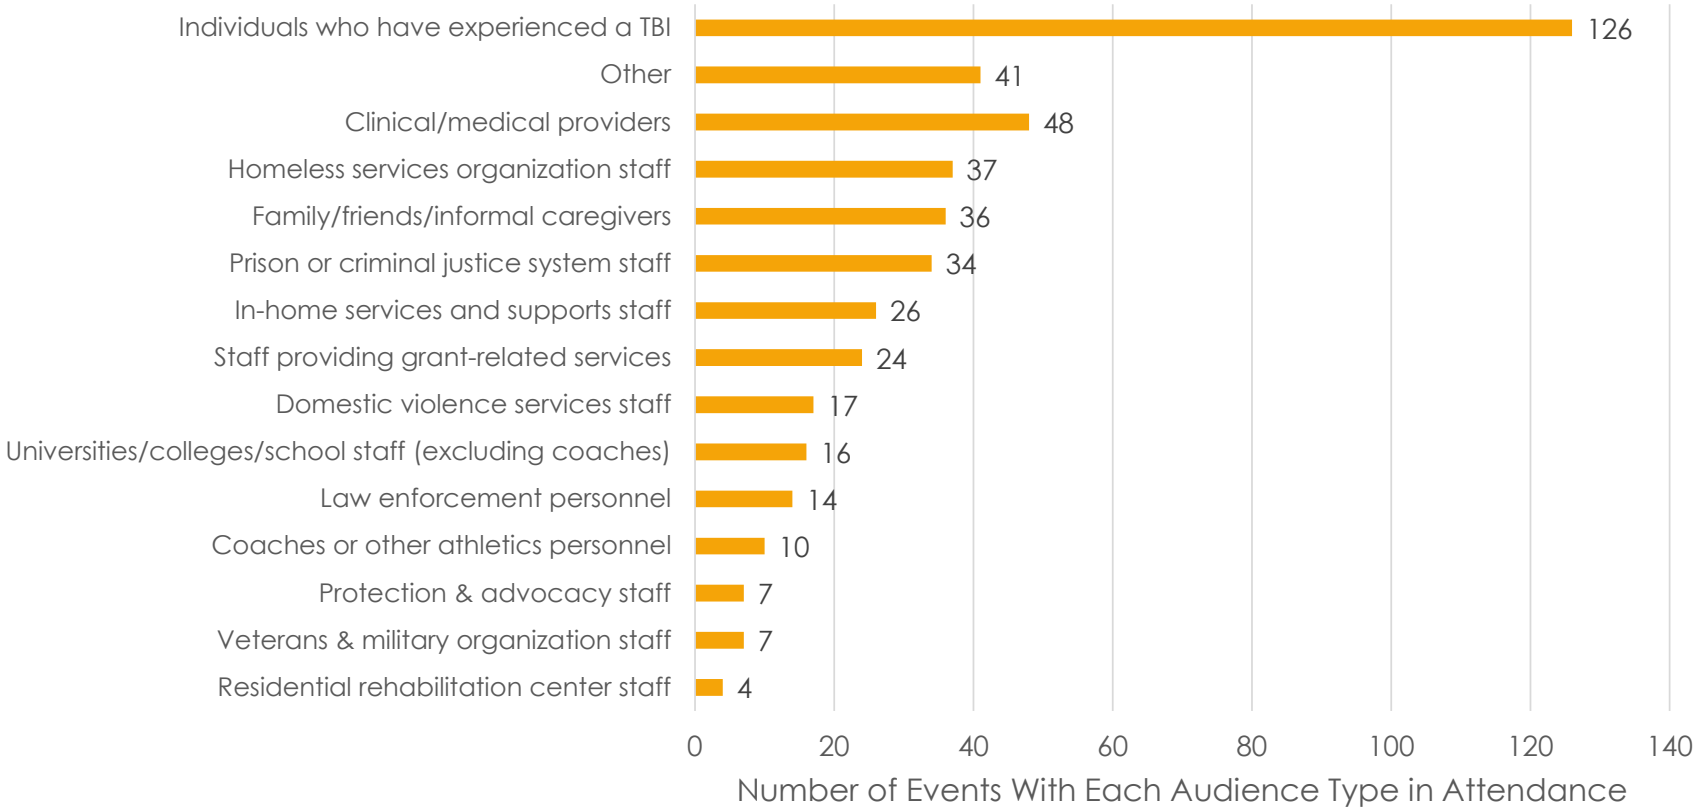
Community Outreach Summary

- **334** community outreach events from July 1, 2023 – December 31, 2024
- **4,100** individuals attended community outreach events



Community Outreach Events by Type

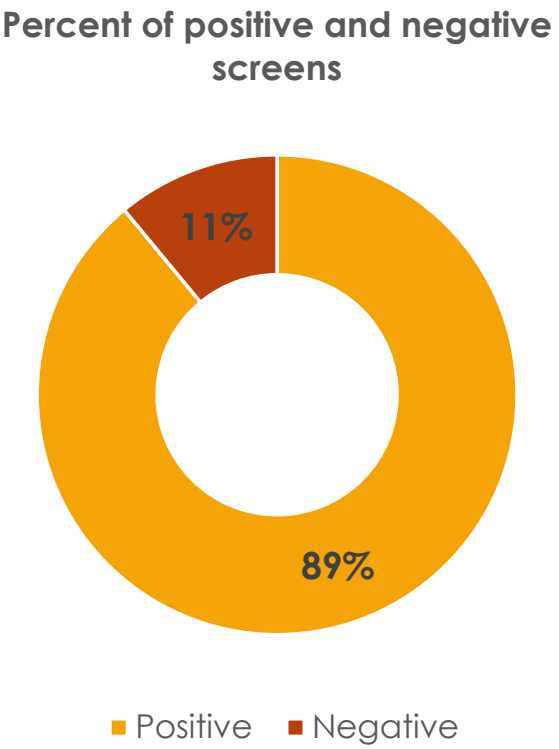
31.0% of outreach events were workshops



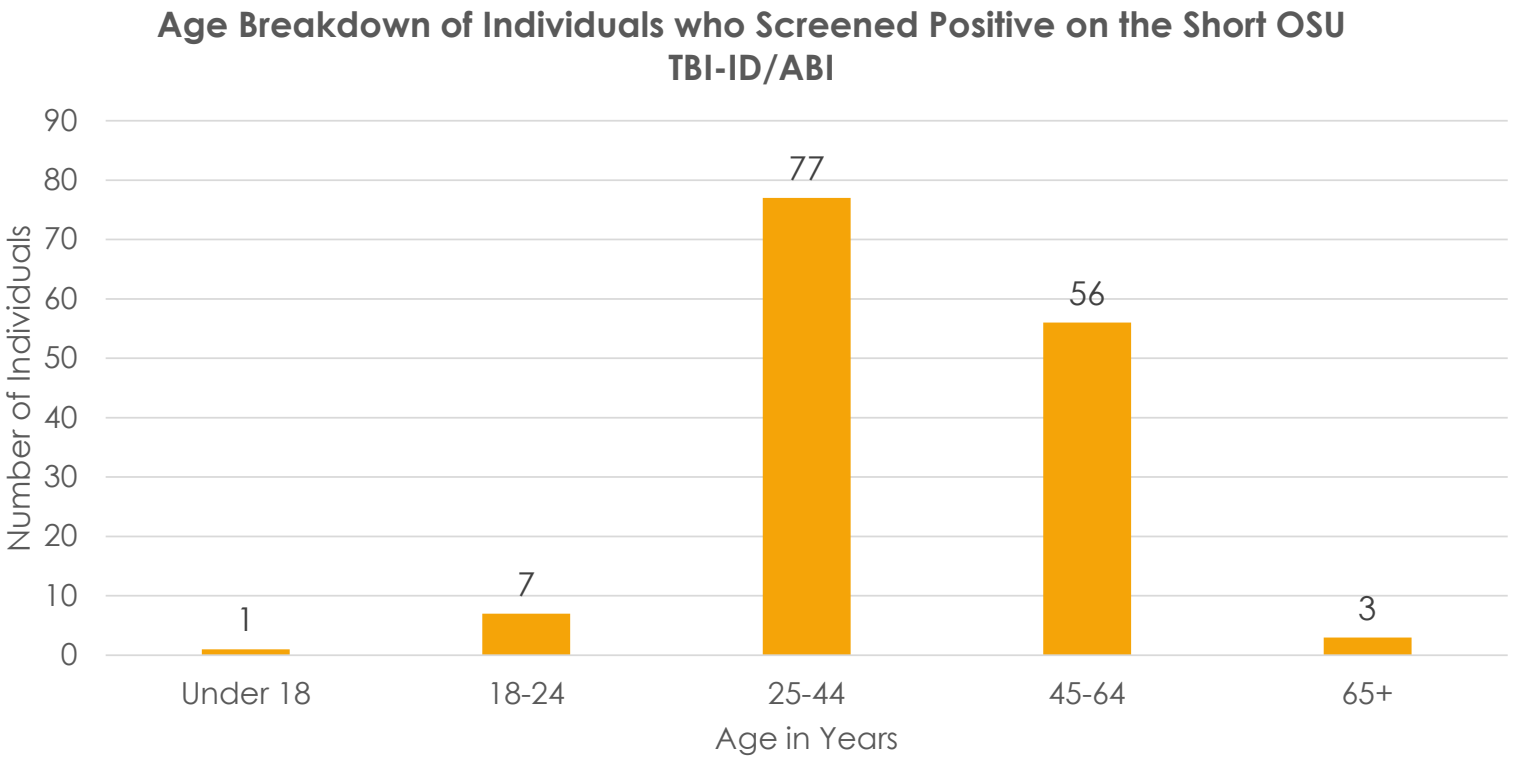
21% of outreach events were trainings delivered by NDBIN

Community Outreach Events by Format

60% of outreach events took pace in-person only



Community Outreach Events by Audience Type



Individuals who have experienced a TBI were the most common audience type at community outreach events

Brain Injury Screening

- Short OSU TBI-ID/ABI used to screen individuals for brain injury
- **159** individuals screened from July 1, 2023 – September 30, 2024
  - **141** screened positive/likely to have a brain injury
  - **18** screened negative/unlikely to have a brain injury

Brain Injury Screening

48.4% of individuals who screened positive for TBI were between the ages of 25 and 44 years old

Testimony
House Bill 1012
House Appropriations Human Services Division
Rep. Jon O. Nelson, Chairman
January 27, 2025

Chairman Nelson and members of the committee, my name is Rebecca Quinn, and I serve as the associate director for behavioral health at the Center for Rural Health at the University of North Dakota School of Medicine and Health Sciences. My testimony today is on behalf of all the individuals and families impacted by brain injury in North Dakota.

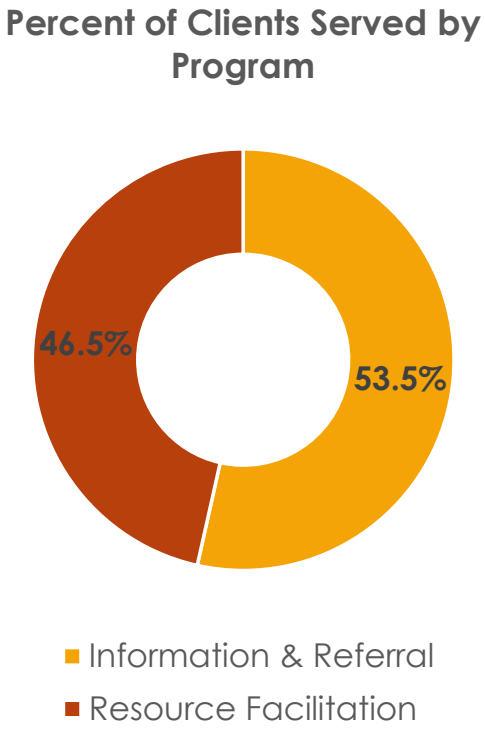
Brain injury impacts every facet of an individual's life and individuals with brain injury are represented across all service systems. Depending on the age of the injury, deficits the person may have, and resources available an individual may qualify for various service systems creating a vast array of available options. Throughout the development of North Dakota's brain injury services, there has been identified the need for a centralized brain injury hub to provide information, support, and training. The North Dakota Brain Injury Network meets these needs by providing a centralized, statewide source of information regarding brain injury and delivers resource facilitation services to individuals with brain injuries. The importance of NDBIN is to help individuals with brain jury, their families and the professionals working with them to navigate the complex system of care and resources that might be available.

During this biennium the budget for NDBIN was increased and with that was able to hire two new staff. We now have a total of five staff located throughout the state. This increase has allow for us to a much more regional approach and provide many more in person services and opportunities.

NORTH DAKOTA BRAIN INJURY NETWORK

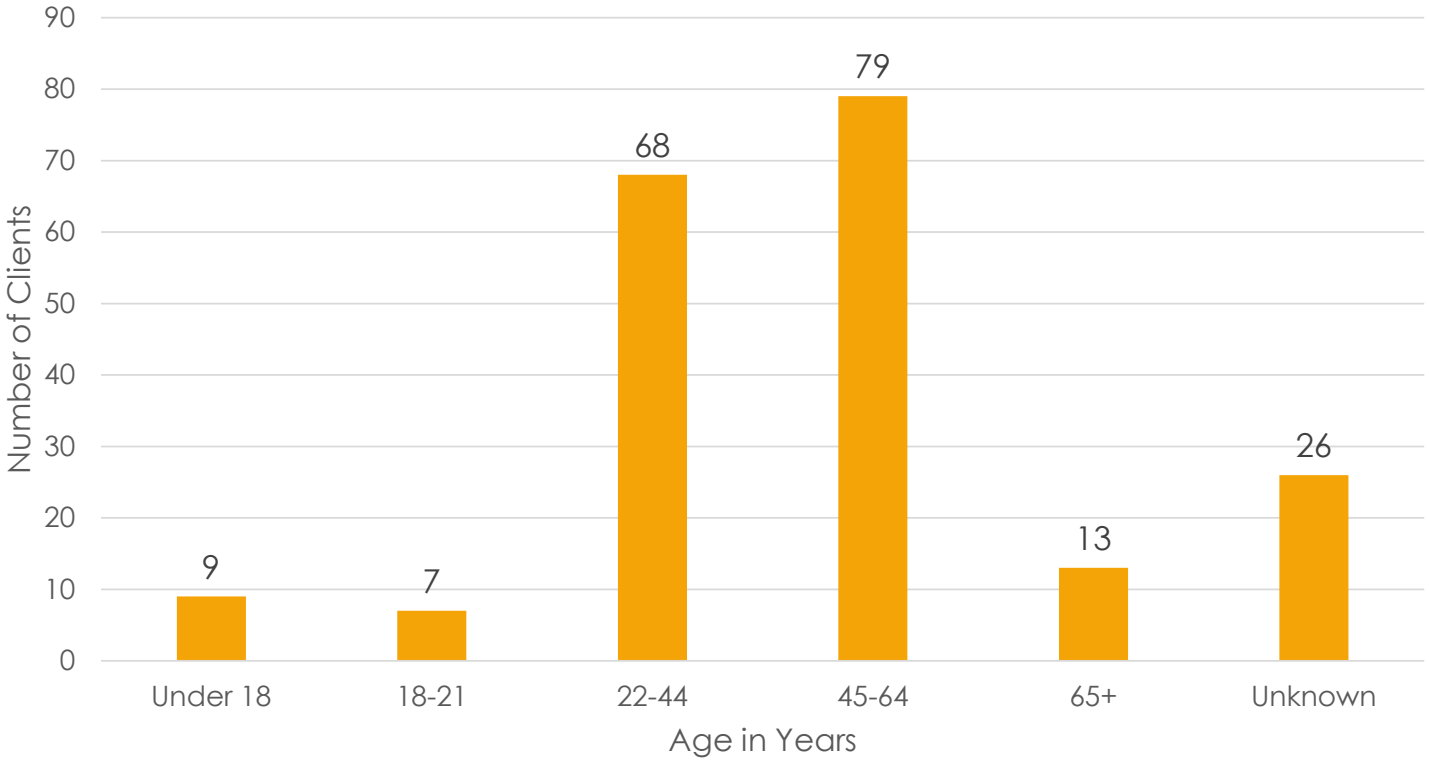
1301 N Columbia Rd Stop 9037
Grand Forks, ND 58202
855.866.1884 | www.ndbin.org

For the period of July 1, 2023 through Dec 31, 2023 the program has:



- Switched to a custom designed data tracking system that is currently in use by 11 other state brain injury programs. This has allowed us to be more effective, efficient, and accurate in tracking our data.
- 244 individuals with brain injury served with information and referral or resource facilitation services.
- Developed a Survivor Engagement Group that meets monthly to assist survivors in becoming more involved in advocacy
- 338 varied events provided to over 4,000 participants:
    - 112 support groups, Living Life Fully or Lunch and Learn sessions; this includes a session of Living Life Fully provide to the peer support specialist at the North Dakota State Penitentiary
    - 3 survivor focused book clubs
    - 3 Certified Brain Injury Specialist trainings and developed a new training course for Medicaid service providers
    - Annual Mind Matters Conference and virtual Concussion Symposium
- Continued to host and support our virtual brain injury screening platform and most recently developed a virtual brain injury in education platform to support educators working with students with brain injury
- Contracted for the completion of a Systems Study to help guide future efforts and gain feedback on current programing
- Applied for and received a Department of Justice Grant to partner with ND DOCR on integrating brain injury screening and training within DOCR.

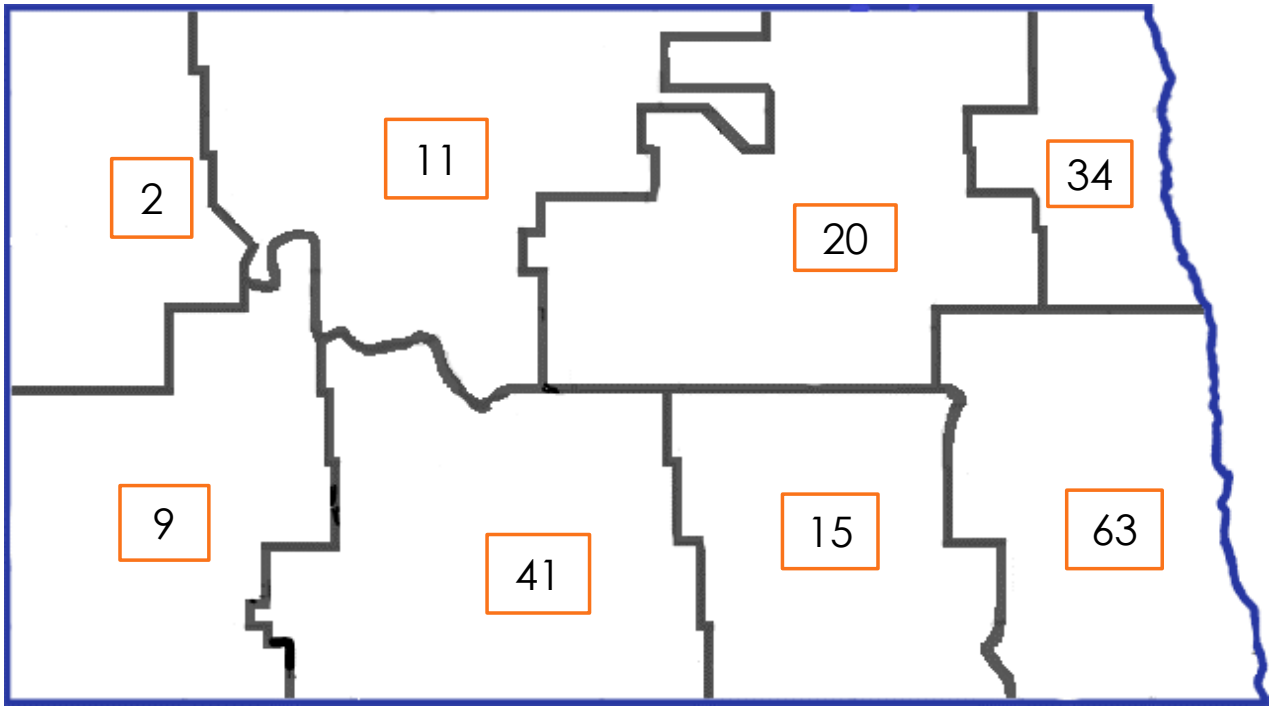
Thank you for your consideration,



Rebecca Quinn; LMSW, CBIST
Center for Rural Health
1301 N Columbia Road, Stop 9037
Grand Forks, ND 58202-9037

Summary of Clients Served

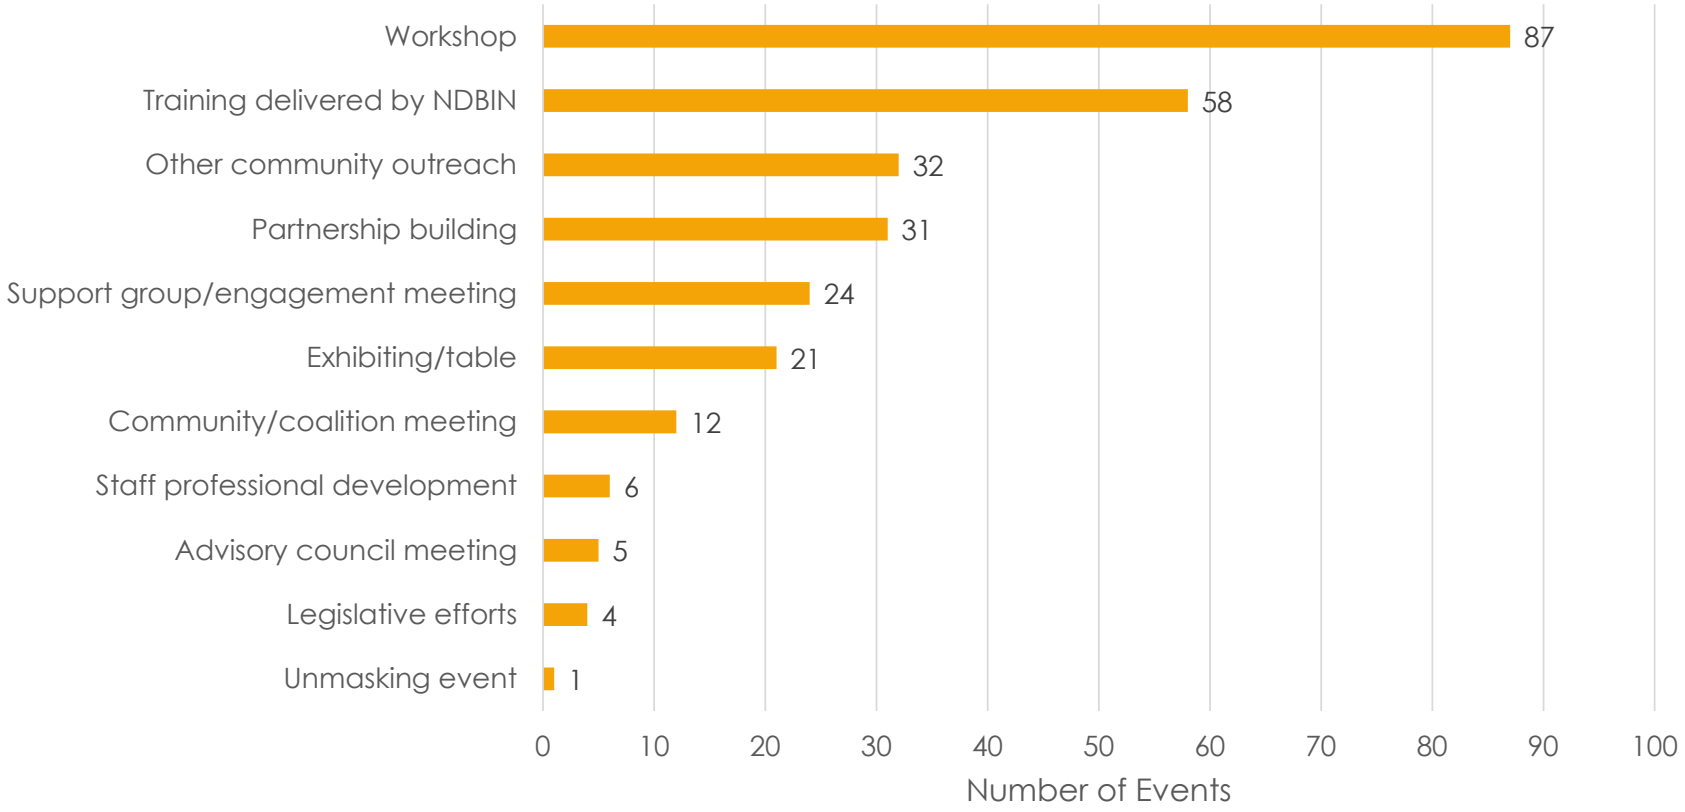
- **202** unduplicated clients served from July 1, 2023 – September 30, 2024
  - **108** Information & Referral clients
  - **94** Resource Facilitation clients



Clients Served by Age

39.1% of clients served were between the ages of 45 and 64 years old

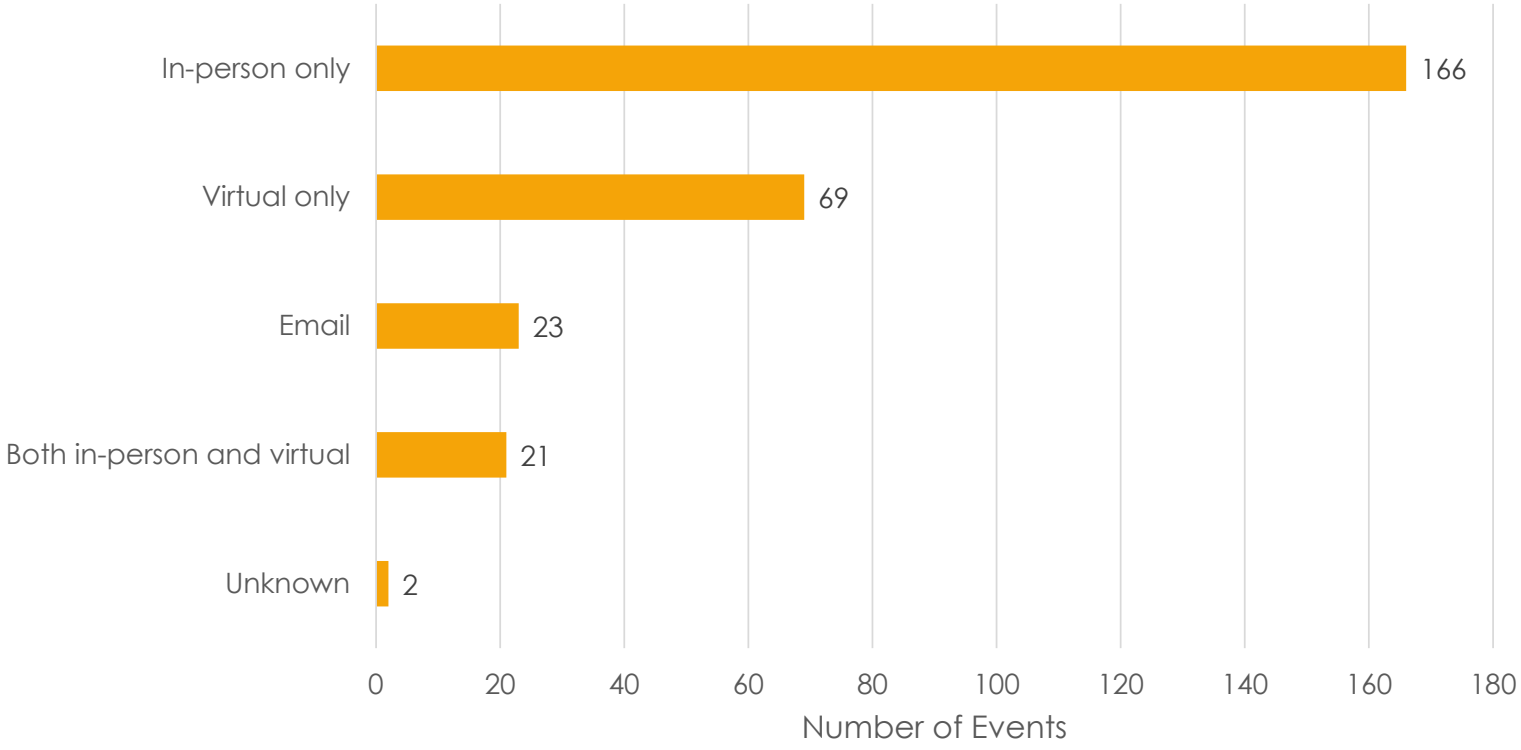
Clients Served by Region



31.2% of clients served were located in Region 5 (Fargo)

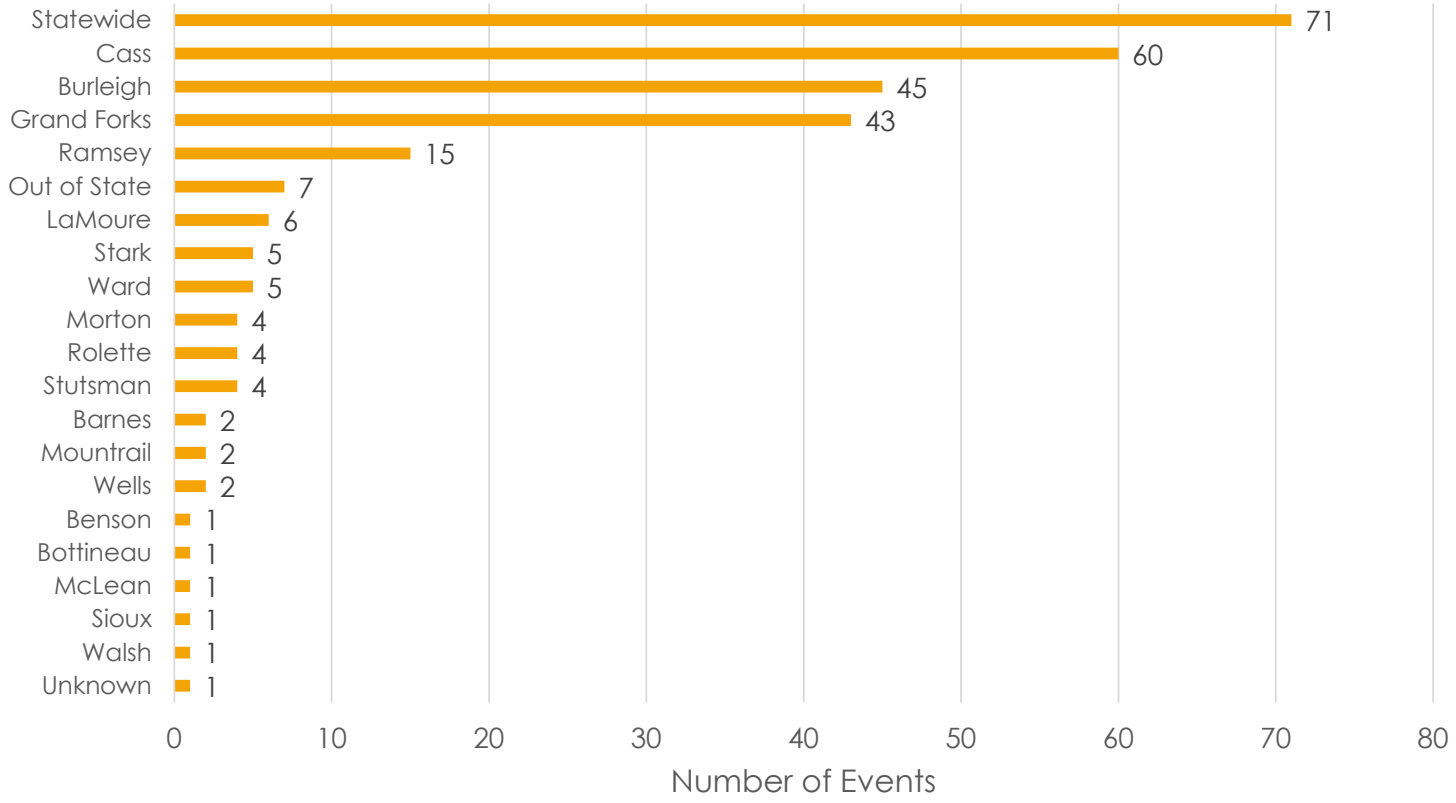
Community Outreach Summary

- **334** community outreach events from July 1, 2023 – December 31, 2024
- **4,100** individuals attended community outreach events



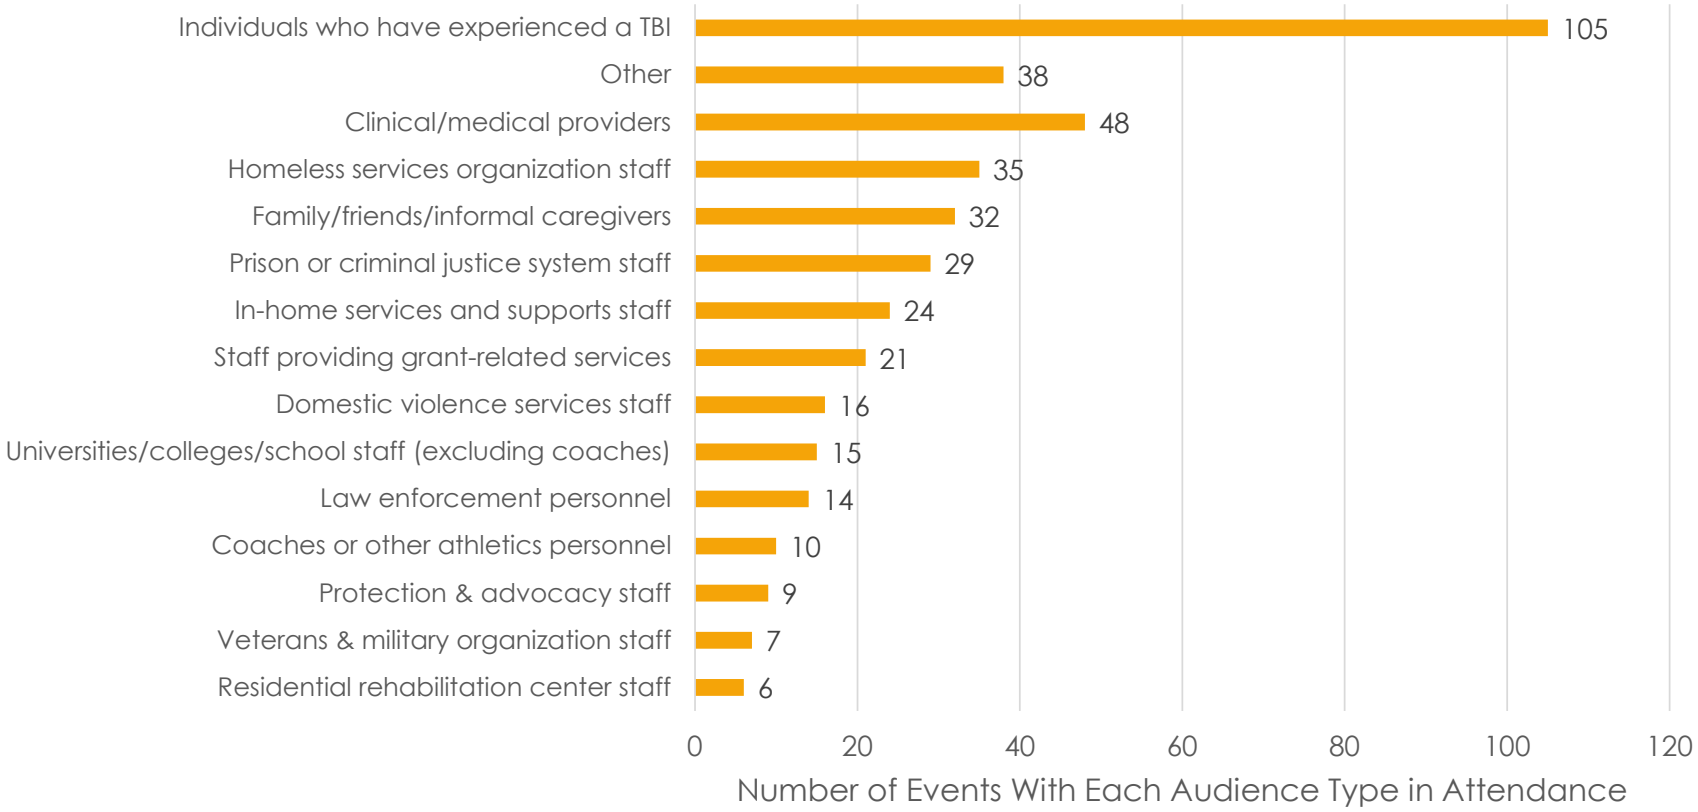
Community Outreach Events by Type

31.0% of outreach events were workshops



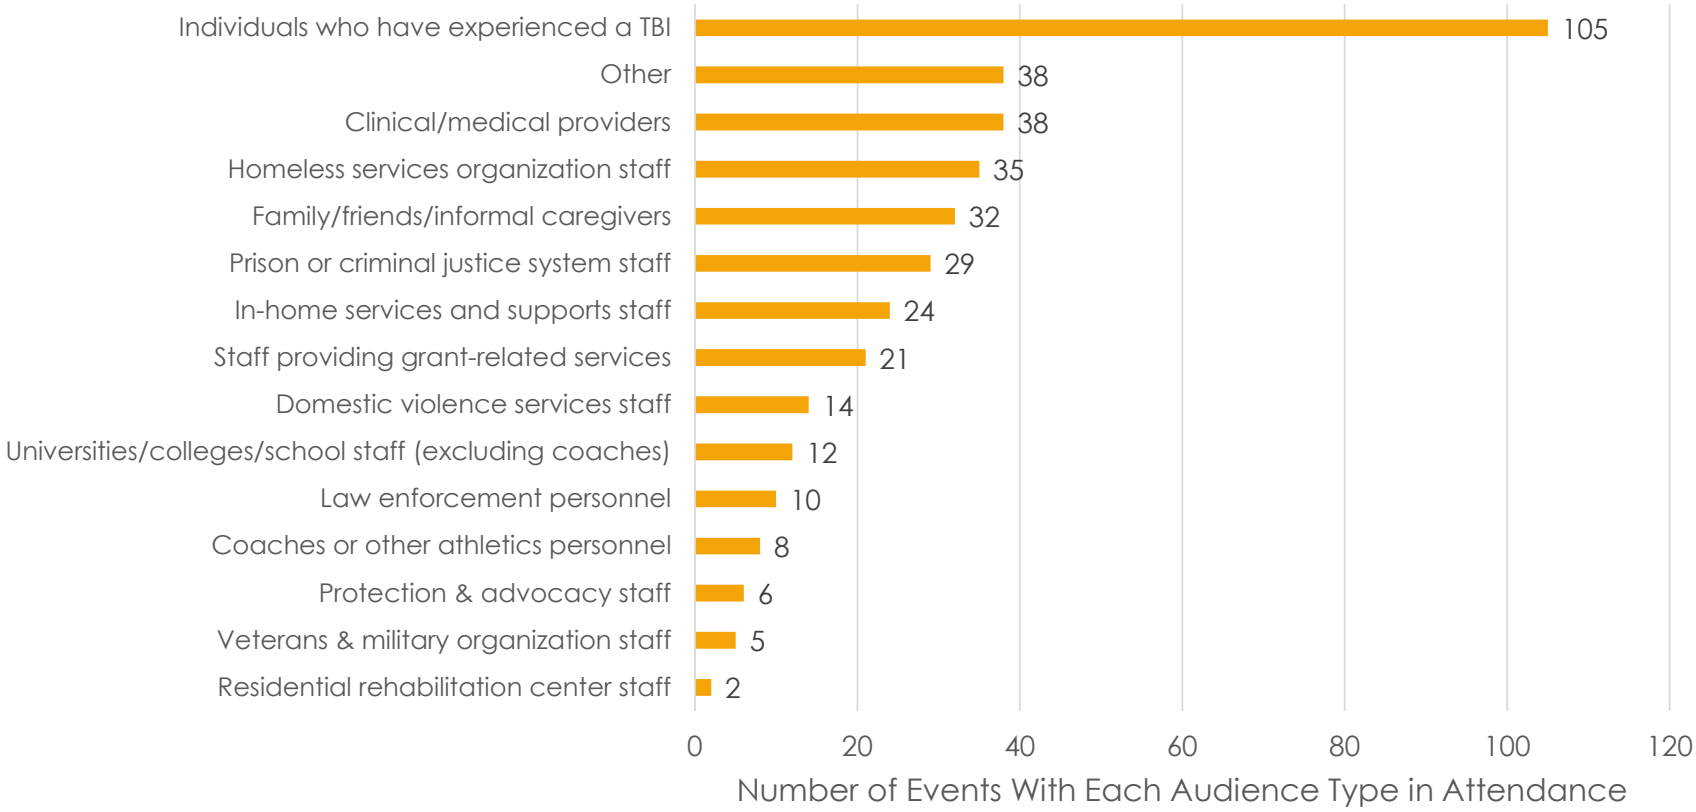
20.6% of outreach events were trainings delivered by NDBIN

Community Outreach Events by Format



59.1% of outreach events took pace in-person only

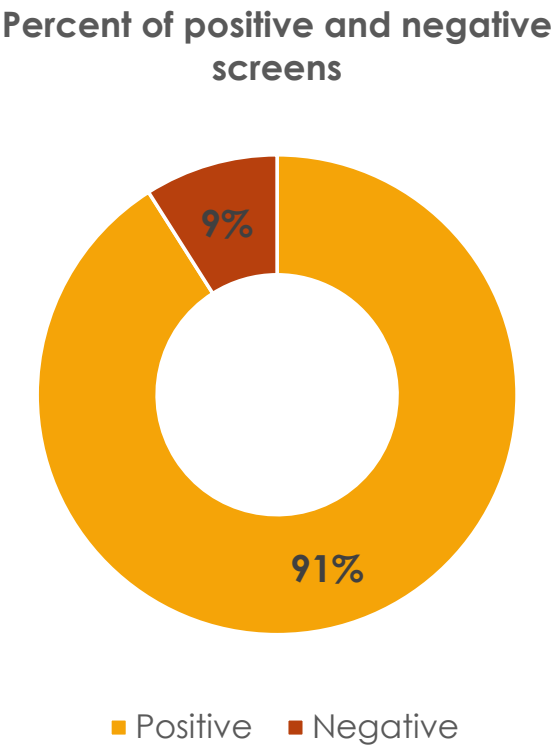
Community Outreach Events by Location



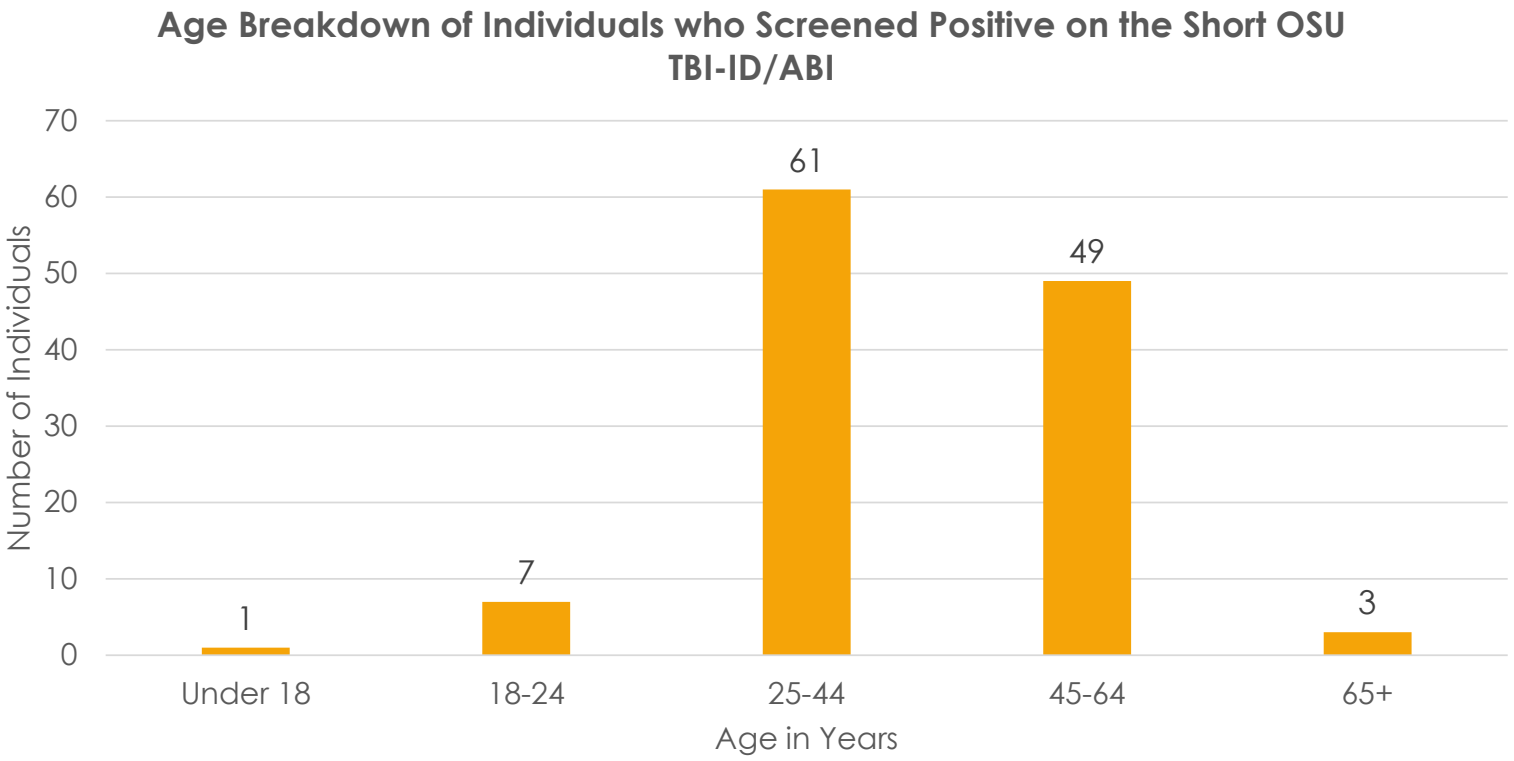
25.3% of community outreach events were statewide

Community Outreach Events by Audience Type

Individuals who have experienced a TBI were the most common audience type at community outreach events



Community Outreach Events by Audience Type



Individuals who have experienced a TBI were the most common audience type at community outreach events

Brain Injury Screening

- Short OSU TBI-ID/ABI used to screen individuals for brain injury
- **133** individuals screened from July 1, 2023 – September 30, 2024
  - **121** screened positive/likely to have a brain injury
  - **12** screened negative/unlikely to have a brain injury

Brain Injury Screening

50.4% of individuals who screened positive for TBI were between the ages of 25 and 44 years old

FAMILY VOICES OF NORTH DAKOTA®
Navigating Crossroads to Hope

Testimony on HB1012
2025 Legislative Session
January 27, 2025
Rep Nelson, House Appropriations Human Resource
Committee Chairperson

Representative Nelson and members of the Committee,

My name is Donene Feist and I am the Director for Family Voices of North Dakota (FVND), Inc. I want to provide to you today testimony on HB 1012 and the Special Health Services (SHS) Division within the Department of Health and Human Services. In my testimony will be providing input on the services of the SHS Division in addition to information on Family Voices of ND and the general fund dollars that flow through the SHS Division.

Family Voices of ND provides educational, informational, and peer support to families of children with special health care needs, medically complex or have a disability. For many years, a vital partner for us as an organization is the Department of Health and Human Services, specifically SHS. Family Voices of North Dakota is statewide family to family health information and education center who serves families of children with special health care needs in ND. Each state in the country and our territories has one family organization that has been designated as a family to family health information and education center. We are that entity for ND.

National prevalence data estimates from the National Survey obtained through the Data Resource Center indicate there is an estimated 39,467 children and youth with special health care needs (CYSHCN) in ND. One in five families in North Dakota (ND) has a child with special health care needs.

Indicator 1.11: Does this child have special health care needs (CSHCN) based on the CSHCN Screener?

	Children with special health care needs (CSHCN)	Non-CSHCN	Total %
%	**21.8**	**78.2**	**100.0**
C.I.	19.2 - 24.7	75.3 - 80.8	
Sample Count	346	1,179	
Pop. Est.	39,467	141,451	

C.I. = 95% Confidence Interval.
Percentages and population estimates (Pop.Est.) are weighted to represent child population in US.

Indicator 1.11: Does this child have special health care needs (CSHCN) based on the CSHCN Screener?

		Children with special health care needs (CSHCN)	Non-CSHCN	Total %
North Dakota	%	**21.8**	**78.2**	**100.0**
	C.I.	19.2 - 24.7	75.3 - 80.8	
	Sample Count	346	1,179	
	Pop. Est.	39,467	141,451	
Nationwide	%	**20.8**	**79.2**	**100.0**
	C.I.	20.4 - 21.3	78.7 - 79.6	
	Sample Count	26,489	82,776	
	Pop. Est.	15,144,222	57,591,048	

C.I. = 95% Confidence Interval.
Percentages and population estimates (Pop.Est.) are weighted to represent child population in US.

As you can see from the comparison charts we have a higher number of children with special health care needs, chronic conditions and disabilities than nationwide.
https://www.childhealthdata.org/

The Special Health Services Division has provided services to many of the families we serve for many years. They have been a partner with Family Voices of North Dakota since its beginning in 2001. A continued investment in this program is encouraged and supported. The programs offered within the Department should not go unnoticed. It is our belief these services play a crucial role for families of CYSHCN in the state. Services to families often serve a role in gap filling of necessary services not otherwise obtained.

Some of these services are:
Financial Coverage Program--helps families pay for medical services for eligible children. They can help pay for health visits and tests needed to diagnose many chronic health conditions. It may also provide the specialty care that is treated for an eligible condition, based on medical and financial eligibility. When there is suspicion of a diagnosis, it is a great comfort to know there is a resource that can assist with the diagnosis and treatment.
- **Diagnostic Services** – Provides coverage for services that promote early diagnosis of SHS eligible medical conditions to all children who meet medical and financial eligibility criteria.
- **Treatment Services** – Provides coverage for services to children with chronic health conditions who meet medical and financial eligibility criteria.

Multidisciplinary Clinics-our staff provides outreach to families at many of the multidisciplinary clinics. We repeatedly hear from families how wonderful it is to have these clinics throughout the state. These clinics allow families to see a number of providers regarding the child's condition

along with expertise in a manner that is easily accessible. Seeing providers at one time, avoiding multiple appointments decreases stress for the family. Examples of these clinics: Asthma, Down Syndrome, Cleft Palate, Spina Bifida, Cerebral Palsy, Muscular Dystrophy, and Cystic Fibrosis. Families remain positive regarding these clinics and are grateful that they are available across ND.

Russell Silver Syndrome and Metabolic Food Program- the Metabolic Food Program provides medical food and low-protein modified food products to individuals with Phenylketonuria (PKU) and Maple Syrup Urine Disease (MSUD). Russell Silver provides growth hormone treatment for children with Russell Silver Syndrome.

In addition to the services above provided, they also partner with many efforts across the state such as: Autism initiatives, Newborn Hearing Screens, Newborn Screens, and Medical Home initiatives. The Division provides to other agencies and community members a wealth of knowledge in implementation of care for children and youth with special health care needs and disabilities.

Newborn Screening and Follow-up- program is to identify conditions at an early age when treatment and intervention can prevent health problems, support early development, and save lives. Newborn screening is a very important test that every baby can benefit from. The testing involves a heel prick on a newborn between 24 and 48 hours after birth that can identify certain metabolic or genetic disorders that can cause serious illness, disability or death to the baby if not identified early. Newborn screening is a screening test and if there is an abnormal result, the newborn always requires further testing to confirm whether he or she has a disorder. There is a treatment available for all of the disorders that are screened, although some treatments may be lifelong.

Newborn screening consists of three simple tests:

Blood Spot – Newborns are screened for nearly 50 genetic and metabolic conditions.

Hearing Screening – Newborns are screened for hearing loss.

Pulse Oximetry Screening – Measures the amount of oxygen in a newborn's blood and can identify serious heart problems. This is also known as Critical Congenital Heart Disease (CCHD) screening.

Family Voices of ND plays a role as advisory members of the New Born Screen and Early Hearing Detection and Intervention. In both of these programs we assist with care coordination for these new families as they are receiving a new diagnosis and connection to services and follow up.

Care Coordination-Care coordination provided through SHS helps families access services and resources in their community, and when needed, across multiple service delivery settings. Although the primary focus of the care coordination is on the health care of the child, this service also attempts to meet the needs of the family.

There are many children who have very complex medical needs. The needs for families are many. While FVND also provides care coordination assistance, it cannot be understated, that care

coordination for children with special health care needs is a vital component to continued access of services. The needs are very much increasing each and every year.

Family Advisory-SHS has a family advisory committee. This committee advises and provides valuable input as family members on the ongoing services that is provided by the SHS Division. These families also provide valuable input to any changes that may take place and how would this affect families. There are not enough words that can be expressed for the valuable input of this committee. It also cannot be understated the enormous respect that the Division provides as equal collaborative partners at the table to families for their input. In my opinion a model for other state agencies. The SHS Division truly embrace family-centered care and the components of it.

In addition to the programs that are provided through SHS, it also is charged by the federal government to monitor and provide education and services on the following six core outcomes of children with special health care needs. The SHS Division has the expertise and knowledge, as well as partners, in all these areas. We encourage the legislative body moving forward on legislation for children with special health care needs to understand the following core outcomes and the technical assistance that can be provided by SHS.

Six Core Outcomes for children with special health care needs:
1-Children with Special Health Care Needs (CSHCN) whose families are partners in shared decision-making for child's optimal health. In all of SHS' work, the value placed on family is immeasurable.
2-CSHCN who receive coordinated, ongoing, comprehensive care within a medical home. SHS has provided expertise and continues to participate in development of medical home and the importance of comprehensive care.
3-CSHCN whose families have consistent and adequate private and/or public insurance to pay for the services they need. SHS understand the critical importance of both private and public funding to assure care for this population.
4-CSHCN who are screened early and continuously for special health care needs. SHS embraces the importance of identifying and treating children early and continuously.
5-CSHCN who can easily access community-based services. Many of the issues that both SHS and FVND hear from families are access to services. In ND, in a geographically vast state, access is not always easy. ND also does not always have the specialty providers available needed by this population of children.
6-Youth with special health care needs will receive the services necessary to make appropriate transitions to adult health care, work and independence. This is crucial for our youth who are transiting into adulthood.

While policies are fluid and ever changing we have moved beyond the Six Core Outcomes of children with special health care needs to a Blueprint for Change by the Federal Maternal and Child Health Bureau. The Blueprint for Change presents a vision for how to improve the system of services for CYSHCN through improved equity, access, quality of life and family well-being and financing. For more information on the Blueprint for Change a link to the National Center is here: https://www.aap.org/en/patient-care/national-center-for-a-system-of-services-for-children-and-youth-with-special-health-care-needs/

SHS supports school nursing initiatives and promotes the connection between health and academic achievement by ensuring nursing care is safely and effectively delivered to schools, particularly in rural communities.

The SHS Division is a model program that provides a great deal of services with a limited budget. FVND over the years has participated in the Block Grant and Needs Assessment process, which the Division takes very seriously. I hope you would consider an increase in the investment made to this program. It makes a huge impact for families of children with special health care needs and the children themselves. It is a model for agencies to replicate. Your ongoing support for this program is vital to families and children.

For the new members of the committee a little about Family Voices of North Dakota. We are one of three statewide parent organizations in the state. Last biennium we received $175,000 in general funds that flowed through the SHS Division.

In addition to the support and 1:1 assistance we provide to families, we also provide various trainings and workshops, which help families understand how systems work so that they can also be good stewards of state dollars and the programs of which their children are enrolled. This is done under the Family to Family Health Information Centers. There is one Family to Family in every state across the country. We are a chapter of Family Voices National who oversees all of the Health Information and Education Centers.

Our staff, who all are parents to children with special health care needs, medical complexities and disabilities provides assistance to families by helping them access and navigate services; explaining what the services mean, how systems work, and where the funding comes from. We provide emotional support to assist with their unique and individual needs. In many ways, we also have an Ombudsman type resource as when things go awry or something goes wrong our staff are often who is contacted to help them sort through and navigate this very complex system of care. We have staff in Fargo, Grand Forks, Bismarck, Dickinson, Williston and myself in Edgeley. Staff in Bismarck cover the Minot area, and I cover the Jamestown and Devils Lake area.

All of our services under the auspices of the statewide health information and education center are performed through a parent-to-parent or peer to peer mechanisms through our staff. Additionally, we operate a parent-to-parent matching program called North Dakota Parent-to-Parent which provides connection of one parent to another as a mentor for emotional support. Sanctioned by Parent to Parent USA. Additionally, in partnership with Designer Genes since 2012, we provide support through a project called Project Carson. Project Carson provides emotional and informational support to families who may receive a ***prenatal diagnosis or an at birth diagnosis***.

Families desperately need a place to go to get the help that they need. We often encounter families who are in crisis and experiencing difficulty accessing services because of denials and ineligibilities.

Again according to the 2022-2023 National Survey of Children's Health, there is approximately 39,467 children and youth who have a special health care need. FVND follows the Maternal and Child Health definition of children with special health care needs, which is those children and youth who have a chronic condition of at least one year, a physical disability or mental health/behavior health diagnosis. Additionally, there are many children and youth who may have a physical disability and a chronic health illness but also may have a co-occurring mental health diagnosis. Because of many families have a co-occurring condition, it often leaves families having to understand and navigate many systems and complicated silos. We receive our referrals through agencies, physician offices, out of state hospitals where a child/youth may be receiving services.

National Outcome Measure: Percent of children with special health care needs (CSHCN), ages 0 through 17, who receive care in a well-functioning system

		CSHCN who receive care in a well-functioning system	CSHCN who do not receive care in a well-functioning system	Total %
CSHCN qualifying on mental health criteria	%	**17.4**	**82.6**	**100.0**
	C.I.	10.5 - 27.5	72.5 - 89.5	
	Sample Count	23	144	
	Pop. Est.	3,642	17,285	
CSHCN NOT qualifying on mental health criteria	%	**21.2**	**78.8**	**100.0**
	C.I.	14.5 - 30.0	70.0 - 85.5	
	Sample Count	34	145	
	Pop. Est.	3,938	14,603	

C.I. = 95% Confidence Interval.
Percentages and population estimates (Pop.Est.) are weighted to represent child population in US.

That data also indicates that:

29.1% of this population utilize public insurance (this may include income eligible Medicaid and waivered Medicaid
17.5% use only private insurance
50.2% of this population use both private and public
27.2% of this population were currently at the time of the survey uninsured.
The number of uninsured for this population has doubled since my last testimony. One of the reasons may be that from the start of the pandemic as it was deemed a public health emergency, they may have been covered through public insurance.

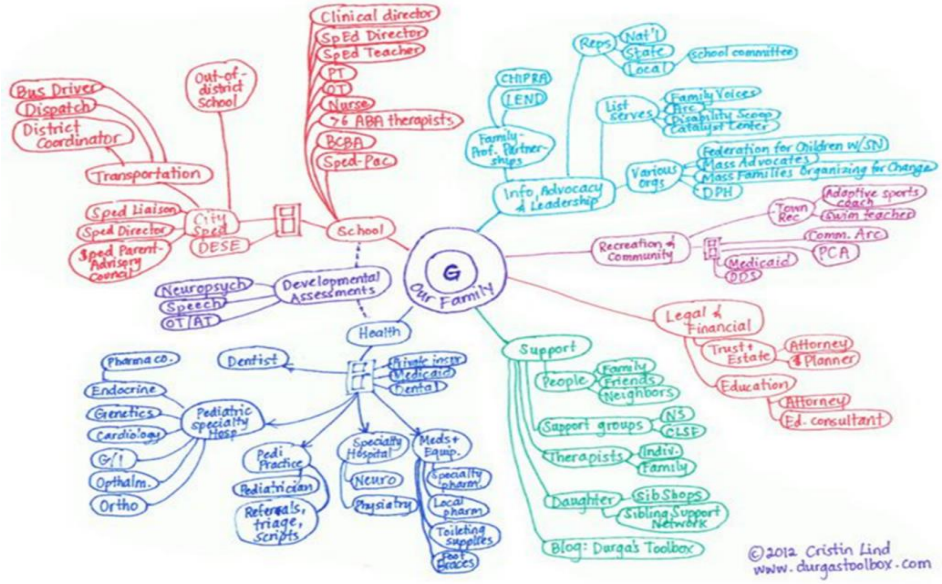
***People cannot access what they do not know exists*.** In essence, we do assist families, one of our most vulnerable population in accessing services they will need in raising their child with a chronic

illness and disability. A common theme we here from families is they were not told where to go to access services. If we were not available to provide that assistance, who then would provide this service to families?

Total Encounters of all calls from 6/1/22-5/31/24	**6/1/22-5/31/24**		
Families unduplicated	**2302**	**First time callers or new families to us**	
Families duplicated	**20704**	**This was in part due to the end of the public health emergency**	
Of the total number of families served/trained, instances of service related to the following issues:			
Individualized assistance (Includes one-on-one instruction, consultation, emotional support, care coordination and mentoring)	**9896**	**Partnering/decision making with providers**	**15042**
Basic contact information and referrals	**340**	**Accessing a medical home**	**4587**
Group training opportunities	**1772**	**Financing for needed health services**	**6133**
Meetings/Conferences and Public Events (includes outreach events and presentations)	**7926**	**Early and continuous screening**	**3625**
		Navigating systems/accessing community services easily	**14528**
		Adolescent transition issues	**2000**

As stated earlier, many times, our encounters with families are heightened because the family is in crisis. We have noted that the issues being presented by families today are being increasingly complex.

Our staff work with a large number of families who experience gaps in service, have difficulty understanding the complexities of our Medicaid systems and Medicaid waivers, and their private insurance who have children with very complex medical issues.



Many providers contact us to make a referral or to assist them in locating resources for families they are working with. Families often do not know where to begin. We will partner with them in making those connections to community resources, possible eligibility criteria and programs, assist them with the application process, follow up with them to assure their family needs are being met, and provide ongoing emotional and informational support.

This table is an example of the categories of calls, trainings and meetings with providers.

Table 2. Provider calls

Our organization provided health care information/education to providers to assist them in better providing services for CSHCN	**6/1/22-5/31/24**
Professionals unduplicated	**1532**
Professionals duplicated	**22479**
Of the total number of providers served/trained, instances of service related to the following issues:	
Partnering/decision making with providers	**14947**
Accessing a medical home	**4084**
Financing for needed health services	**7316**
Early and continuous screening	**4116**
Navigating systems/accessing community services easily	**12416**
Adolescent transition issues	**4780**

In the diagram below you will see children with a chronic condition or disability utilize many services. Most services that families encounter are in silos.

We know and can identify as best practice that families thrive when supported by others with lived experience. We also know that families build capacity, strength and confidence through support and coaching from another parent. Active engagement with families through responsive listening from others who have walked in the same shoes assists families in a manner that allows them to receive services necessary to meet their family and child's needs.

Families across North Dakota have repeatedly shared the difficulty in locating and accessing services when they call our offices. Raising a child or youth with special health care needs, accessing quality services and paying for them while still meeting the needs of the entire family and maintain employment is stressful. Following the pandemic emergency as the system changes within the Department as a whole this has been especially true. It has been most difficult for families to navigate this very complex system.

Representative Nelson and members of the committee, I have stood before you all for many years. The needs for families to live, thrive and survive in their community has also increased. We often **hope for the best, but don't know what the future holds in a world and system that wasn't built for our children.** There is no handbook or parenting book about raising a child with special health care needs and disabilities.

Most of our children don't fit a mold. All are uniquely their own, and many have multiple diseases or disorders so rare that often doctors have never seen. Early on families realize with a heavy heart, the world we live in isn't built for our children. Each and every day families are fighting someone about some aspect of their care. It could be a doctor, nurse, therapist, educator, or an insurance

company. Every day families launch battles for what we know our children need to thrive, and sometimes our fight ends in defeat.

Every day many families are fighting a battle against a disability, disease or chronic illness that we will never beat. Most of families know the very real implications of what can happen to our children at any given time.

Our role is not only to provide support, assistance in navigating and connecting to services to families, but through or various trainings and workshops, help families understand how systems work so that they can also be good stewards of state dollars and the programs of which their children are enrolled. A valued provider has stated "It is important to ensure that there are adequate supports for families, as these strengthen the family unit as a whole. This results in a decreased demand for providers as you are creating lasting change within the family unit."

We are requesting continued support of general fund dollars through SHS. The need for family support is not going away. Do the most vulnerable families in the state not deserve assistance? Our staff does incredible work in helping families with emotional and informational support. I couldn't be prouder of them.

In closing, let us remember as each of us makes decisions that will affect children—whether we are parents, educators, health professionals, or government officials—it is our duty to consider if that decision either affirms or denies a child's most basic human rights. Families are not looking for handouts, but they do often need a rope to hang on to, to keep from drowning in an every changing system. Family support is vital to help them live, thrive and survive in an every changing world.
Again, we are most appreciative of our partnership with SHS Division and their work.

Thank you for your consideration

NDDSVC

Member Program Overview

Serve	· More than 7,400 survivors of domestic violence/sexual assault
Educate	· More than 49,000 community members and professionals annually
Employ	· More than 330 employees
Provide	· Safety, healing, and education to all 53 counties and 3 tribal nations.
Represent	· More than 700 years of service (urban and rural communities)

NDDSVC

Domestic Violence Statistics (2023)

6,131 new victims

6,131 new victims* of domestic violence were served by 19 domestic violence advocacy centers across North Dakota.

**new = unduplicated for calendar year*

105

105 women were pregnant at the time they were assaulted.

4,205

At least 4,205 children were directly impacted by these incidents.

NDDSVC

Sexual Assault Statistics (2023)

1,288 primary victims

1,288 primary victims* and 221 secondary victims were served by 19 sexual assault advocacy centers across North Dakota.

242

At least 242 of primary victims were under the age of 18 years old at the time of the assault(s).

20,274

At least 20,274 services were provided to primary victims by advocacy center advocates from January to December 2023.

Statistics represent new victims served in 2023. New = unduplicated for calendar year. Primary victims refers to the victim/survivor whom the sexual assault and/or child sexual abuse was directed at. Secondary victims refers to those who are indirectly affected by the sexual assault—i.e., children, siblings, spouses or intimate partners, grandparents, other affected relatives, friends, neighbors, etc.

*There is also an estimated additional $340,000 distributed from the marriage license fees. This amount changes based on what is collected.

NDDSVC

2023 Funding Increase Impacts:

competitive wages, health insurance, additional staff to serve

"We were understaffed by 5 advocates at one point last spring and we weren't receiving ANY applications much less qualified applicants. Once we increased the wages, it was easier to hire and we have been fully staffed since then. It definitely helped retain the advocates we had as well." – AARC, Bismarck

"The increase in funding allowed us to hire a prevention specialist that is based in a school and they have a class called
'Empower Hour.' This is a class that focuses on healthy behaviors and helps social emotional learning using evidenced based curriculum...The class has been so well received and our staff member was even chosen 'teacher of the month' voted on by students." – ARN, Lisbon

"We were able to fill positions, after being understaffed by 25% for a year by making salaries more competitive. We were able to enhance our benefits package to include short term disability as well as retain our RST programming for our direct services team to address issues of vicarious trauma. This truly prevented potential closure of programming for victims due to lack of staffing and funding." – DVCC, Minot

House Bill 1012
House Appropriations—Human Resource Division
January 27, 2025
Brenda Stallman, Traill District Health Unit

Good morning, Chair Nelson and members of the House Appropriations—Human Resource Division Committee. My name is Brenda Stallman, and I am the Executive Officer for Traill District Health Unit located in Hillsboro. Traill District Health Unit provides public health services for the communities of Hillsboro, Mayville, Hatton, Clifford, Galesburg, Grandin, Buxton, and Reynolds.

NURSE HOME VISITS. SCHOOL NURSING. TB RESPONSE.
DISEASE PREVENTION. HEALTH EDUCATION.
JAIL NURSING. CAR SEAT DISTRIBUTION. VACCINATIONS.
STAFF SALARIES & BENEFITS. NUISANCE COMPLAINTS.

Members of the Committee, these are just a few of the responsibilities local public health units have that do not have designated funding for. We all juggle grants that change in scope and availability, but many of the duties we take on, like the previously mentioned items, do not have funding earmarked for them.

This is why state aid assistance provided by the ND legislature is so imperative. While what was appropriated in past sessions has been very carefully allocated to the needs of our individual units, an additional $2 million was sought in Governor Burgum's budget to cover the increased cost of delivering our services. Because this request is not

currently in the budget, we are asking that the additional $2 million requested be restored for a total of $10 million.

Ten million dollars divided over 28 health units that provide public health services to all 53 North Dakota Counties is a very wise investment. An investment that is necessary to help keep our seniors in their homes, diseases out of our schools, churches, and communities, and our citizens safe and healthy.

At Traill District Health Unit, state aid funds represent 6% of our total budget. We are facing loss of some of our current grant funding, yet the needs of the residents in our communities do not diminish. Instead, as people grow older and family members do not reside close by, our aging population seeks additional services. Our jails are full, and the medical needs of the inmates are complex and costly to manage. All three of the nurses at our agency, me included, have been working at TDHU for 30 plus years. Staff turnover is costly and will be substantial moving forward. Hiring professionals in public health and rural communities is difficult and costly.

I hope you agree that public health is a needed investment to keep our communities strong. We work closely and successfully with our community partners to be as efficient as possible. Thank you for your consideration of adding $2 million to state aid to local public health units.

Please reach out to me any time if you have questions. Thank you for the opportunity to provide this testimony.

Proposed Amendment

SECTION 1. AMENDMENT. Section 50-24.5-02.3 of the North Dakota Century Code is amended and reenacted as follows:

50-24.5-02.3. **Basic care payment rates.**

1. The department shall determine limits for the care of residents of basic care facilities that qualify as vendors of an aged, blind, and disabled persons program and for implementing provisions of this chapter based on data demonstrating the most recent costs that must be incurred for the care of residents in efficiently and economically operated basic care facilities. The department shall determine the limits every four years by July first, beginning with July 1, 2023.

2. The department shall establish the limits by using the median rates from the most recent data available. The direct care limit must be the median plus eighteen percent. The indirect care limit must be the median plus twelve percent.

3. For the rate year beginning July 1, 2023~~3~~5, the department shall increase rates and limits ~~three and one-half~~ four percent for inflation. For the rate year beginning July 1, 2024~~6~~, the department shall increase rates and limits three ~~and one-half~~ percent for inflation.

4. The department shall provide a rate increase in the amount of five dollars per day for the period beginning July 1, 2023~~3~~5, and ending June 30, 2025~~7~~, after which the increase is not effective. This rate increase may not be included in any calculation of inflation increase.

5. Within the limits of legislative appropriations, the department shall establish an uncompensated care expense of three hundred sixty-five days.

6. For the rate year beginning July 1, 2025, the department shall provide an operating margin of three percent based on the lessor of the actual direct and indirect care

categories or the direct and indirect care limits established for the rate year plus the food, utilities, and repairs and maintenance portions of the room and board rate all exclusive of the adjustment factor.

SECTION 2. APPROPRIATION. There is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from special funds derived from federal funds and other income the sum of $6,520,000, or so much of the sum as may be necessary, to North Dakota health and human services for the purpose of basic care payment, for the biennium beginning July 1, 2025, and ending June 30, 2027.

North Dakota Long Term Care ASSOCIATION

Care Needs of Basic Care Residents

- **60%** of residents have impaired mental status, ranging from early stage dementia to disorientation.
- **30%** of residents have a mental health diagnosis.
- **94%** of residents need full assistance with medication administration.
- **50%** of residents receive psychoactive drugs.
- **12** the number of medications the average basic care resident takes.
- **61%** of residents are independent in dressing, with 2% requiring extensive assistance.
- **41%** of residents are ambulatory and do not need any staff assistance, 68% use a walker or cane, and 12% use a wheelchair.
- **91%** of residents are independent in transferring and 86% are independent with toileting.
- **63%** of residents need assistance with bathing.

Basic Care Average Costs and State Reimbursement Rates

$	SFY 2018	SFY 2019	SFY 2020	SFY 2021	SFY 2022	SFY 2023	SFY 2024
Average Cost	$121.64	$130.52	$124.52	$133.92	$149.25	$167.29	$247.89
Average Rate	$117.13	$123.80	$122.83	$129.12	$137.56	$161.25	$164.76

2023-2024 Basic Care Payment Study

- The study was intended to address:
  - How property would be reimbursed.
  - The process of establishing annual inflationary adjustments.
  - Determine how the operating margin should be calculated.

NDLTCA Members' Proposed Solutions

1. Implement Annual Inflators

For the rate year beginning July 1, 2025, the department shall increase rates and limits **four** percent for inflation. For the rate year beginning July 1, 2026, the department shall increase rates and limits **three** percent for inflation.

Estimated Cost: $2.72 million additional state general funds

2. Continue the $5/Day Add-On for Basic Care

The Department shall provide a rate increase in the amount of **five** dollars per day for the period beginning July 1, 2025 and ending June 30, 2027.

Estimated Cost: $2.68 million for the biennium in state general funds.

3. Expand the 3% Operating Margin Across All Rate Components

For the rate year beginning July 1, 2025, the department shall provide an operating margin of **three** percent based on all the rate components except property.

Estimated Cost: $1.12 million of state general funds for the biennium.

Thank you

Nikki Wegner, ND Long Term Care Association

Testimony on Solutions for Financial Challenges in Basic Care
House Appropriations-Human Resources Division
January 27, 2025
HB 1012

Chairman Nelson and members of the Committee. My name is Nikki Wegner, President of the North Dakota Long Term Care Association. We represent 53 of the 66 basic care facilities in North Dakota. Thank you for the opportunity to testify in support of HB 1012 with an amendment to address the financial challenges facing basic care providers.

Basic care facilities play a vital role in supporting older adults and individuals with disabilities by providing a cost-effective alternative to nursing facility care. There are **2,097** licensed beds with an average occupancy of **72%**. These facilities are ideal for individuals who need assistance with daily living activities but do not require intensive medical oversight.

Top Reasons for Admission:

1. **Needs Assistance with Instrumental Activities of Daily Living**: Tasks such as managing finances, housekeeping, and daily nutritious meals.
2. **Needs assistance with Activities of Daily Living:** Personal care to maintain hygiene and routine activities like bathing, dressing, and medication management.
3. **Need for Supervision:** Ensuring safety and providing oversight for individuals with cognitive or physical limitations.

Basic care facilities are congregate residential settings providing 24-hour staffing. They are a critical component of the long term care continuum, providing quality support in a cost-effective and compassionate manner.

The age of basic care residents ranges from 27 to 104 years, with an average age of 79. Women make up 50% of basic care residents, compared to 64% in nursing facilities. Additionally, 60% of residents experience some level of cognitive impairment, and 30% have a mental health diagnosis.

Persistent financial shortfalls threaten the sustainability of these essential services. In 2024, basic care facilities received an average rate of **$164.76** per resident per day, while the average cost of care was **$247.89**, creating a significant shortfall of **$83.13** per resident daily.

Basic Care Average Costs and State Reimbursement Rates

$	SFY 2018	SFY 2019	SFY 2020	SFY 2021	SFY 2022	SFY 2023	SFY 2024
Average Cost	$121.64	$130.52	$124.52	$133.92	$149.25	$167.29	$247.89
Average Rate	$117.13	$123.80	$122.83	$129.12	$137.56	$161.25	$164.76
Difference	-$4.51	-$6.72	-$1.69	-$4.80	-$8.69	-$6.04	-$83.13

These ongoing losses, compounded over the past seven years, are placing an unsustainable strain on providers. Without adequate funding adjustments, facilities will face increasing challenges in continuing to serve residents who rely on the program. Investing in this program is not just necessary, it is critical to ensure the long-term viability of basic care in North Dakota.

Today, I will outline three critical solutions to stabilize and strengthen the basic care system, however first I will give you some background.

Background

In the 2023 session you approved $600,000 for a study of the basic care payment system. We were counting on that study to bring forward recommendations for addressing the payment shortfalls and implementing vital improvements. As shared with many of you during the interim, the study failed to address the payment deficiencies or provide solutions. Therefore, we are returning to request your support for urgent relief for basic care providers to ensure continued care for almost over 1,000 North Dakotans each year.

The study was intended to address:

- How property would be reimbursed.
- The process of establishing annual inflationary adjustments.
- Determine how the operating margin should be calculated.

Our solutions below begin to address these issues. Much work still needs to continue so we'd further recommend you add language to HB 1012, directing the department to work with basic care providers and the association to bring forth payment solutions to the 2027 legislative session.

Attached please see a proposed amendment, solutions for stabilizing basic care payments. Let me explain the three solutions in the amendment:

1. Implement Annual Inflators

For the rate year beginning July 1, 2025, the department shall increase rates and limits four percent for inflation. For the rate year beginning July 1, 2026, the department shall increase rates and limits three percent for inflation.

Rationale: Inflationary adjustments of 1.5% provided in the Armstrong Budget is inadequate for addressing chronic labor shortages, low wages, and the cost of food and medical supplies.

Estimated Cost: $2.72 million additional state general funds

2. Continue the $5/Day Add-On for Basic Care

The Department shall provide a rate increase in the amount of five dollars per day for the period beginning July 1, 2025 and ending June 30, 2027.

Rationale: Until a comprehensive property component system, such as a fair rental value system, can be implemented, the $5/day add-on remains essential. This temporary measure provides critical relief for providers who are chronically underfunded, allowing them to sustain operations and meet the needs of their residents.

This add-on has proven to be an effective stopgap and should remain in place until a permanent solution is developed.

Estimated Cost: $2.68 million for the biennium in state general funds.

3. Expand the 3% Operating Margin Across All Rate Components

For the rate year beginning July 1, 2025, the department shall provide an operating margin of three percent based on all the rate components except property.

Rationale:

Currently, the 3% operating margin is not applied across all rate components, leaving critical cost areas, such as food, utilities, and other operational needs, not allowed in the calculation. The average operating margin is $1.90, leaving minimal revenue to address critical needs such as wage increases, enhanced activity programming, and expanded food options to meet residents' preferences. Additionally, there is a two-year delay before providers are reimbursed for their costs. Expanding the margin to cover these other components is vital.

We recognize that North Dakota Department of Health and Human Services may need to request a Medicaid State Plan Amendment from the Centers for Medicare and Medicaid Services, potentially putting federal funds for basic care at risk. To mitigate this concern, we propose using state

general funds to implement the expanded margin, ensuring continued compliance with federal guidelines while supporting our providers.

Estimated Cost: $1.12 million of state general funds for the biennium.

Total for the biennium: $6.52 million

Conclusion

Together, these three features contained in the amendment represent a pragmatic and necessary approach to addressing the financial challenges faced by basic care providers. By aligning reimbursement rates with actual costs, expanding operating margins, and continuing targeted relief measures, we can ensure the long-term viability of basic care services in North Dakota.

I urge this committee to prioritize these solutions to safeguard access to quality care for residents who need a little assistance in a cost-effective environment. Thank you for your time and consideration. I am happy to answer any questions you may have.

Testimony on HB1012
2025 Legislative Session
January 27, 2025
Rep Nelson, House Appropriations Human Resource
Committee Chairperson

Representative Nelson and members of the Committee,

My name is Donene Feist and I am the Director for Family Voices of North Dakota (FVND), Inc. I want to provide to you today testimony on HB 1012 and the Special Health Services (SHS) Division within the Department of Health and Human Services. In my testimony will be providing input on the services of the SHS Division in addition to information on Family Voices of ND and the general fund dollars that flow through the SHS Division.

Family Voices of ND provides educational, informational, and peer support to families of children with special health care needs, medically complex or have a disability. For many years, a vital partner for us as an organization is the Department of Health and Human Services, specifically SHS. Family Voices of North Dakota is statewide family to family health information and education center who serves families of children with special health care needs in ND. Each state in the country and our territories has one family organization that has been designated as a family to family health information and education center. We are that entity for ND.

National prevalence data estimates from the National Survey obtained through the Data Resource Center indicate there is an estimated 39,467 children and youth with special health care needs (CYSHCN) in ND. One in five families in North Dakota (ND) has a child with special health care needs.

Indicator 1.11: Does this child have special health care needs (CSHCN) based on the CSHCN Screener?

	Children with special health care needs (CSHCN)	Non-CSHCN	Total %
%	**21.8**	**78.2**	**100.0**

Sample Count	346	1,179	
Pop. Est.	39,467	141,451	

C.I. = 95% Confidence Interval.
Percentages and population estimates (Pop.Est.) are weighted to represent child population in US.

Indicator 1.11: Does this child have special health care needs (CSHCN) based on the CSHCN Screener?

		Children with special health care needs (CSHCN)	Non-CSHCN	Total %
North Dakota	%	**21.8**	**78.2**	**100.0**
	C.I.	19.2 - 24.7	75.3 - 80.8	
	Sample Count	346	1,179	
	Pop. Est.	39,467	141,451	
Nationwide	%	**20.8**	**79.2**	**100.0**
	C.I.	20.4 - 21.3	78.7 - 79.6	
	Sample Count	26,489	82,776	
	Pop. Est.	15,144,222	57,591,048	

C.I. = 95% Confidence Interval.
Percentages and population estimates (Pop.Est.) are weighted to represent child population in US.

As you can see from the comparison charts we have a higher number of children with special health care needs, chronic conditions and disabilities than nationwide. https://www.childhealthdata.org/

The Special Health Services Division has provided services to many of the families we serve for many years. They have been a partner with Family Voices of North Dakota since its beginning in 2001. A continued investment in this program is encouraged and supported. The programs offered within the Department should not go unnoticed. It is our belief these services play a crucial role for families of

CYSHCN in the state. Services to families often serve a role in gap filling of necessary services not otherwise obtained.

Some of these services are:
Financial Coverage Program--helps families pay for medical services for eligible children. They can help pay for health visits and tests needed to diagnose many chronic health conditions. It may also provide the specialty care that is treated for an eligible condition, based on medical and financial eligibility. When there is suspicion of a diagnosis, it is a great comfort to know there is a resource that can assist with the diagnosis and treatment.

- **Diagnostic Services** – Provides coverage for services that promote early diagnosis of SHS eligible medical conditions to all children who meet medical and financial eligibility criteria.
- **Treatment Services** – Provides coverage for services to children with chronic health conditions who meet medical and financial eligibility criteria.

Multidisciplinary Clinics-our staff provides outreach to families at many of the multidisciplinary clinics. We repeatedly hear from families how wonderful it is to have these clinics throughout the state. These clinics allow families to see a number of providers regarding the child's condition along with expertise in a manner that is easily accessible. Seeing providers at one time, avoiding multiple appointments decreases stress for the family. Examples of these clinics: Asthma, Down Syndrome, Cleft Palate, Spina Bifida, Cerebral Palsy, Muscular Dystrophy, and Cystic Fibrosis. Families remain positive regarding these clinics and are grateful that they are available across ND.

Russell Silver Syndrome and Metabolic Food Program- the Metabolic Food Program provides medical food and low-protein modified food products to individuals with Phenylketonuria (PKU) and Maple Syrup Urine Disease (MSUD). Russell Silver provides growth hormone treatment for children with Russell Silver Syndrome.

In addition to the services above provided, they also partner with many efforts across the state such as: Autism initiatives, Newborn Hearing Screens, Newborn Screens, and Medical Home initiatives. The Division provides to other agencies and community members a wealth of knowledge in implementation of care for children and youth with special health care needs and disabilities.

Newborn Screening and Follow-up- program is to identify conditions at an early age when treatment and intervention can prevent health problems, support early

development, and save lives. Newborn screening is a very important test that every baby can benefit from. The testing involves a heel prick on a newborn between 24 and 48 hours after birth that can identify certain metabolic or genetic disorders that can cause serious illness, disability or death to the baby if not identified early. Newborn screening is a screening test and if there is an abnormal result, the newborn always requires further testing to confirm whether he or she has a disorder. There is a treatment available for all of the disorders that are screened, although some treatments may be lifelong.

Newborn screening consists of three simple tests:

Blood Spot – Newborns are screened for nearly 50 genetic and metabolic conditions.

Hearing Screening – Newborns are screened for hearing loss.

Pulse Oximetry Screening – Measures the amount of oxygen in a newborn's blood and can identify serious heart problems. This is also known as Critical Congenital Heart Disease (CCHD) screening.

Family Voices of ND plays a role as advisory members of the New Born Screen and Early Hearing Detection and Intervention. In both of these programs we assist with care coordination for these new families as they are receiving a new diagnosis and connection to services and follow up.

Care Coordination-Care coordination provided through SHS helps families access services and resources in their community, and when needed, across multiple service delivery settings. Although the primary focus of the care coordination is on the health care of the child, this service also attempts to meet the needs of the family.

There are many children who have very complex medical needs. The needs for families are many. While FVND also provides care coordination assistance, it cannot be understated, that care coordination for children with special health care needs is a vital component to continued access of services. The needs are very much increasing each and every year.

Family Advisory-SHS has a family advisory committee. This committee advises and provides valuable input as family members on the ongoing services that is provided by the SHS Division. These families also provide valuable input to any changes that may take place and how would this affect families. There are not enough words that can be expressed for the valuable input of this committee. It also

cannot be understated the enormous respect that the Division provides as equal collaborative partners at the table to families for their input. In my opinion a model for other state agencies. The SHS Division truly embrace family-centered care and the components of it.

In addition to the programs that are provided through SHS, it also is charged by the federal government to monitor and provide education and services on the following six core outcomes of children with special health care needs. The SHS Division has the expertise and knowledge, as well as partners, in all these areas. We encourage the legislative body moving forward on legislation for children with special health care needs to understand the following core outcomes and the technical assistance that can be provided by SHS.

Six Core Outcomes for children with special health care needs:
1-Children with Special Health Care Needs (CSHCN) whose families are partners in shared decision-making for child's optimal health. In all of SHS' work, the value placed on family is immeasurable.
2-CSHCN who receive coordinated, ongoing, comprehensive care within a medical home. SHS has provided expertise and continues to participate in development of medical home and the importance of comprehensive care.
3-CSHCN whose families have consistent and adequate private and/or public insurance to pay for the services they need. SHS understand the critical importance of both private and public funding to assure care for this population.
4-CSHCN who are screened early and continuously for special health care needs. SHS embraces the importance of identifying and treating children early and continuously.
5-CSHCN who can easily access community-based services. Many of the issues that both SHS and FVND hear from families are access to services. In ND, in a geographically vast state, access is not always easy. ND also does not always have the specialty providers available needed by this population of children.
6-Youth with special health care needs will receive the services necessary to make appropriate transitions to adult health care, work and independence. This is crucial for our youth who are transiting into adulthood.

While policies are fluid and ever changing we have moved beyond the Six Core Outcomes of children with special health care needs to a Blueprint for Change by the Federal Maternal and Child Health Bureau. The Blueprint for Change presents a vision for how to improve the system of services for CYSHCN through improved equity, access, quality of life and family well-being and financing. For more information on the Blueprint for Change a link to the National Center is here:

https://www.aap.org/en/patient-care/national-center-for-a-system-of-services-for-children-and-youth-with-special-health-care-needs/

SHS supports school nursing initiatives and promotes the connection between health and academic achievement by ensuring nursing care is safely and effectively delivered to schools, particularly in rural communities.

The SHS Division is a model program that provides a great deal of services with a limited budget. FVND over the years has participated in the Block Grant and Needs Assessment process, which the Division takes very seriously. I hope you would consider an increase in the investment made to this program. It makes a huge impact for families of children with special health care needs and the children themselves. It is a model for agencies to replicate. Your ongoing support for this program is vital to families and children.

For the new members of the committee a little about Family Voices of North Dakota. We are one of three statewide parent organizations in the state. Last biennium we received $175,000 in general funds that flowed through the SHS Division.

In addition to the support and 1:1 assistance we provide to families, we also provide various trainings and workshops, which help families understand how systems work so that they can also be good stewards of state dollars and the programs of which their children are enrolled. This is done under the Family to Family Health Information Centers. There is one Family to Family in every state across the country. We are a chapter of Family Voices National who oversees all of the Health Information and Education Centers.

Our staff, who all are parents to children with special health care needs, medical complexities and disabilities provides assistance to families by helping them access and navigate services; explaining what the services mean, how systems work, and where the funding comes from. We provide emotional support to assist with their unique and individual needs. In many ways, we also have an Ombudsman type resource as when things go awry or something goes wrong our staff are often who is contacted to help them sort through and navigate this very complex system of care. We have staff in Fargo, Grand Forks, Bismarck, Dickinson, Williston and myself in Edgeley. Staff in Bismarck cover the Minot area, and I cover the Jamestown and Devils Lake area.

All of our services under the auspices of the statewide health information and education center are performed through a parent-to-parent or peer to peer mechanisms through our staff. Additionally, we operate a parent-to-parent matching program called North Dakota Parent-to-Parent which provides connection of one parent to another as a mentor for emotional support. Sanctioned by Parent to Parent USA. Additionally, in partnership with Designer Genes since 2012, we provide support through a project called Project Carson. Project Carson provides emotional and informational support to families who may receive a ***prenatal diagnosis or an at birth diagnosis***.

Families desperately need a place to go to get the help that they need. We often encounter families who are in crisis and experiencing difficulty accessing services because of denials and ineligibilities.

Again according to the 2022-2023 National Survey of Children's Health, there is approximately 39,467 children and youth who have a special health care need. FVND follows the Maternal and Child Health definition of children with special health care needs, which is those children and youth who have a chronic condition of at least one year, a physical disability or mental health/behavior health diagnosis. Additionally, there are many children and youth who may have a physical disability and a chronic health illness but also may have a co-occurring mental health diagnosis. Because of many families have a co-occurring condition, it often leaves families having to understand and navigate many systems and complicated silos. We receive our referrals through agencies, physician offices, out of state hospitals where a child/youth may be receiving services.

National Outcome Measure: Percent of children with special health care needs (CSHCN), ages 0 through 17, who receive care in a well-functioning system

		CSHCN who receive care in a well-functioning system	CSHCN who do not receive care in a well-functioning system	Total %
CSHCN qualifying on mental health criteria	%	**17.4**	**82.6**	**100.0**
	C.I.	10.5 - 27.5	72.5 - 89.5	
	Sample Count	23	144	
	Pop. Est.	3,642	17,285	
CSHCN NOT qualifying on mental health criteria	%	**21.2**	**78.8**	**100.0**
	C.I.	14.5 - 30.0	70.0 - 85.5	
	Sample Count	34	145	
	Pop. Est.	3,938	14,603	

C.I. = 95% Confidence Interval.
Percentages and population estimates (Pop.Est.) are weighted to represent child population in US.

That data also indicates that:

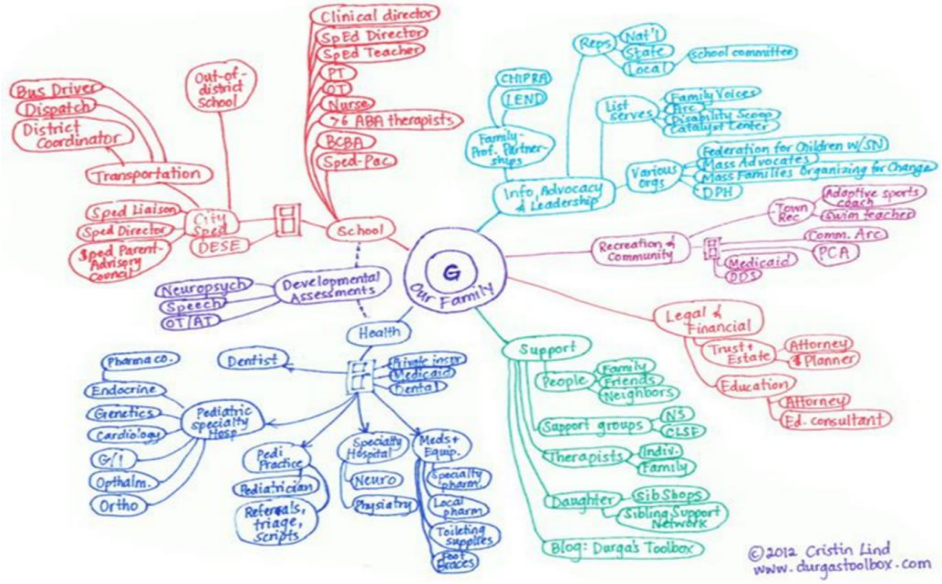
29.1% of this population utilize public insurance (this may include income eligible Medicaid and waivered Medicaid
17.5% use only private insurance
50.2% of this population use both private and public
27.2% of this population were currently at the time of the survey uninsured.
The number of uninsured for this population has doubled since my last testimony. One of the reasons may be that from the start of the pandemic as it was deemed a public health emergency, they may have been covered through public insurance.

People cannot access what they do not know exists. In essence, we do assist families, one of our most vulnerable population in accessing services they will need in raising their child with a chronic illness and disability. A common theme we here from families is they were not told where to go to access services. If we were not available to provide that assistance, who then would provide this service to families?

Total Encounters of all calls from 6/1/22-5/31/24	**6/1/22-5/31/24**		
Families unduplicated	**2302**	**First time callers or new families to us**	
Families duplicated	**20704**		
Of the total number of families served/trained, instances of service related to the following issues:			
Individualized assistance (Includes one-on-one instruction, consultation, emotional support, care coordination and mentoring)	**9896**	**Partnering/decision making with providers**	**15042**
Basic contact information and referrals	**340**	**Accessing a medical home**	**4587**
Group training opportunities	**1772**	**Financing for needed health services**	**6133**
Meetings/Conferences and Public Events (includes outreach events and presentations)	**7926**	**Early and continuous screening**	**3625**
		Navigating systems/accessing community services easily	**14528**
		Adolescent transition issues	**2000**

As stated earlier, many times, our encounters with families are heightened because the family is in crisis. We have noted that the issues being presented by families today are being increasingly complex.

Our staff work with a large number of families who experience gaps in service, have difficulty understanding the complexities of our Medicaid systems and Medicaid waivers, and their private insurance who have children with very complex medical issues.



Many providers contact us to make a referral or to assist them in locating resources for families they are working with. Families often do not know where to begin. We will partner with them in making those connections to community resources, possible eligibility criteria and programs, assist them with the application process, follow up with them to assure their family needs are being met, and provide ongoing emotional and informational support.

This table is an example of the categories of calls, trainings and meetings with providers.

Table 2. Provider calls

Our organization provided health care information/education to providers to assist them in better providing services for CSHCN	**6/1/22-5/31/24**
Professionals unduplicated	**1532**
Professionals duplicated	**22479**
Of the total number of providers served/trained, instances of service related to the following issues:	
Partnering/decision making with providers	**14947**
Accessing a medical home	**4084**
Financing for needed health services	**7316**
Early and continuous screening	**4116**
Navigating systems/accessing community services easily	**12416**
Adolescent transition issues	**4780**

In the diagram below you will see children with a chronic condition or disability utilize many services. Most services that families encounter are in silos.

We know and can identify as best practice that families thrive when supported by others with lived experience. We also know that families build capacity, strength and confidence through support and coaching from another parent. Active engagement with families through responsive listening from others who have walked in the same shoes assists families in a manner that allows them to receive services necessary to meet their family and child's needs.

Families across North Dakota have repeatedly shared the difficulty in locating and accessing services when they call our offices. Raising a child or youth with special health care needs, accessing quality services and paying for them while still meeting the needs of the entire family and maintain employment is stressful. Following the pandemic emergency as the system changes within the Department as a whole this has been especially true. It has been most difficult for families to navigate this very complex system.

Representative Nelson and members of the committee, I have stood before you all for many years. The needs for families to live, thrive and survive in their community has also increased. We often hope for the best, but don't know what the future holds in a world and system that wasn't built for our children. There is no handbook or parenting book about raising a child with special health care needs and disabilities.

Most of our children don't fit a mold. All are uniquely their own, and many have multiple diseases or disorders so rare that often doctors have never seen. Early on families realize with a heavy heart, the world we live in isn't built for our children. Each and every day families are fighting someone about some aspect of their care. It could be a doctor, nurse, therapist, educator, or an insurance company. Every day families launch battles for what we know our children need to thrive, and sometimes our fight ends in defeat.

Every day many families are fighting a battle against a disability, disease or chronic illness that we will never beat. Most of families know the very real implications of what can happen to our children at any given time.

Our role is not only to provide support, assistance in navigating and connecting to services to families, but through or various trainings and workshops, help families understand how systems work so that they can also be good stewards of state dollars and the programs of which their children are enrolled. A valued provider has stated "It is important to ensure that there are adequate supports for families, as these strengthen the family unit as a whole. This results in a decreased demand for providers as you are creating lasting change within the family unit."

We are requesting continued support of general fund dollars through SHS. The need for family support is not going away. Do the most vulnerable families in the state not deserve assistance? Our staff does incredible work in helping families with emotional and informational support. I couldn't be prouder of them.

A few things following other testimony by Departments: We are pleased that there is funding to move forward with the Cross Disability Waiver. We feel this is a vital step in closing the gaps in many areas for our families across the state. We are pleased also with the Family Caregiver Pilot that has transpired over the interim and that we hope will become active regularly within the waiver.

We are very concerned with the decrease of dollars in the autism waiver, as were told there are still at least 68 that remain on a wait list to access the waiver and can receive as many as 15-20 new applications per month. From the number of calls that we receive regarding new families diagnosed with autism, we believe this to be true. We realize that the cause is from utilization, however we feel if respite would move

to in home supports utilization would be increased. In our other 1915c waivers, respite assists in home support according to their person centered plan. It also provides respite when a caregiver needs a break, a night out per se. Families need both. For many families with autism, they need respite for in home support which is not currently an option.

While the system as a whole particular for SNAP, TANF and Medicaid, am sure a new call center automated system is great but we hear from families and have experienced ourselves that when things go awry it is very difficult to get the answers that our families need. During the renewals at the end of the pandemic and the reauthorizations one could be on hold over an hour and still not get the assistance they needed. Just last week, one staff was on hold over 45 minutes. Some of the folks on the call center did not have the expertise needed to get the help that was needed. We have requested a specific line or toll free number for the incidents that are difficult to help navigate an error, or identify how to help a family. Specifically to speak to someone in house with that expertise. Sometimes when families are in a crisis for time sensitive information or an approval to go out of state a call center is not helpful.

We hope in the future the state will really work hard to eliminate the gaps in services for children and youth across the board. While we have made huge strides for the adult systems including the mental health system, for children and youth we feel more could be done in this area.

Families are not looking for handouts, but they often need a rope to hang on to, to keep from drowning in an every changing system. Family support and assistance in service navigation is vital to help them live, thrive and survive in an every changing world. Again, we are most appreciative of our partnership with SHS Division and their work, and DHHS who work toward filling the gaps for children.

Thank you for your consideration

Testimony in support of:

House Bill 1012, with the 2025-27 Health & Human Services Executive Budget Recommendation for Appropriations to Federally Qualified Health Centers

January 27, 2025

Chairman Nelson, Vice Chair Stemen, and Committee Members:

My name is Rachel Thomas, and I work for Northland Health Centers as the Chief Financial Officer. Northland Health Centers serves eight communities in the central and northern areas of the state, with most of these communities having less than 500 individuals in the cities' populations. We provide primary medical, dental, and behavioral health care services, as well as medication-assisted treatment services in nearly all our communities.

On behalf of Northland Health Centers and our patients, I want to express our appreciation for the previous appropriations of state resources to community health centers. Our care teams and patients have seen firsthand the positive impact of these state appropriations, which have helped us fill gaps and respond to unmet needs in our communities.

Thanks to the state appropriations, we have been able to expand our behavioral health department. By the end of this spring, our behavioral health team will have nearly doubled. We plan to use our current year two funding towards opening a second location here in Bismarck, where the primary focus will be behavioral health care. By providing hometown behavioral health services as part of primary care, we can reduce the risk of preventable ER admissions and costly treatments.

In addition to gaps in behavioral health, our team observed another trend in rural communities – Individuals, including Veterans, struggling to access dentures. This can lead to difficulty eating and speaking clearly, among other challenges. In response, we were able to leverage our state investment to increase access to dentures for Veterans in our communities. This was deeply appreciated by patients. One patient commented, "I really really appreciate what you guys are doing. Once I am all done and get 'em fitted, it's going to change things quite a bit. I will be able to eat something besides soup!" Comments like this are why we do what we do everyday.

Today, we ask for your continued support for appropriating funds to community health centers, as listed in the 2025-2027 Health & Human Services Executive Budget Recommendation. This will allow us to expand our reach, invest in our communities, and fill gaps in care. Thank you for your consideration.

Testimony in support of:

House Bill 1012, with the 2025-27 Health & Human Services Executive Budget Recommendation for Appropriations to Federally Qualified Health Centers

January 27, 2025

Chairman Nelson, Vice Chair Stemen, and Committee Members:

My name is Jennie Cornell, and I am the Behavioral Health Supervisor at Northland Health Centers, as well as a licensed clinical social worker and licensed master addiction counselor. In my role as both a practicing provider and supervisor, I witness firsthand the growing need for mental health and substance use treatment in western North Dakota. As demand for these services continues to rise, Northland Health Centers is committed to expanding our behavioral health services to meet these critical needs and enhance the well-being of our communities.

North Dakota is experiencing a behavioral health crisis, with high rates of substance use disorders (SUDs) and mental health conditions, such as depression, anxiety, and trauma, affecting individuals across our state. However, many people—especially in rural and underserved areas—lack access to the care they need. As a provider of integrated primary and behavioral health care, I see the consequences of this daily, including long waitlists, geographic isolation, and financial barriers that prevent individuals from seeking help. This often leads to delayed treatment, which exacerbates the problem and results in preventable crises.

In response to this growing need, Northland Health Centers is expanding our behavioral health services to provide more accessible care to those in need. One of the key components of our expansion is the establishment of a new clinic in Bismarck. This new clinic will significantly increase our capacity to provide mental health and substance use treatment, offering much-needed space to serve more individuals and families in the region.

By opening this new facility, we will be able to offer a broader range of behavioral health services, including counseling, therapy, medication management, and substance use treatment, all under one roof. This integrated care approach is crucial to ensuring that individuals with mental health and substance use concerns receive comprehensive treatment in a timely manner. The Bismarck clinic will also help address the increasing demand for care in this urban area, where many individuals have struggled to find available services due to capacity limitations.

Expanding our services in Bismarck, in addition to our other locations, will reduce wait times and improve access to treatment for those living in both rural and urban parts of our region. We are confident that this expansion will have a positive impact not only on individual patients but also on the overall health of our community by addressing behavioral health needs earlier and more effectively.

Northland Health Centers remains dedicated to providing high-quality, integrated care to those facing mental health and substance use challenges. With the establishment of our new Bismarck clinic and our continued expansion of services, we are better equipped to meet the urgent need for treatment and improve outcomes for individuals throughout western North Dakota.

Thank you for your ongoing support as we continue to grow and enhance the services that are so vital to the health and well-being of our communities.

Community HealthCare Association of the Dakotas

House Appropriations Committee Human Resources Division
House Bill No. 1012

Testimony by:

Shelly Ten Napel, CEO
Community HealthCare Association of the Dakotas
January 27, 2025

Chairman Nelson and Members of the Committee. My name is Shelly Ten Napel, and I am the CEO of Community HealthCare Association of the Dakotas (CHAD). I am offering written testimony in support of the Dental Loan Repayment Program and the Health Care Professionals Loan Repayment Program.

CHAD is a non-profit membership organization that serves as the Primary Care Association for North Dakota and South Dakota, supporting community health centers across both states in their efforts to provide health care to underserved and low-income populations. The health centers we represent have locations in both urban and rural communities.

Community health centers (CHCs) are non-profit, community-driven primary care clinics that serve all individuals, regardless of their insurance status or ability to pay. North Dakota is home to five community health center organizations that provide comprehensive, integrated care to more than 36,000 individuals at 22 locations in 20 communities across the state. Sixteen percent of those patients are uninsured and about 40 percent have family incomes below the federal poverty level.

The community health center integrated care model includes primary care, mental health and substance use treatment, dental care, pharmacy services, and a range of case management services that can include help with transportation, finding social services, or assistance with insurance and financial enrollments. As a result, health centers employ a range of health professionals. Because we work in communities that are, by definition, underserved by the health care system, recruitment and retention of good staff is both challenging and critical to our ability to fulfill our mission of access to high quality health care for ALL North Dakotans. Our members share with us that support related to workforce recruitment and retention is their number one need.

Loan repayment programs are a great investment. They bring providers into underserved North Dakota communities for a fraction of the cost of providing a full health care services education. In rural communities, access to health care can support the long-term viability of a community, sustaining a vibrant main street. Rural providers often serve multiple roles by sustaining access to primary care, supporting the viability of nursing homes and hospitals, and possibly supporting local emergency services provider and public health. The need for additional dental providers and behavioral health providers across North Dakota is well documented.

Community HealthCare Association of the Dakotas

If the committee is seeking to increase the impact of the state's loan repayment programs, providers have shared feedback with the Department of Health and others that the state should consider increasing the amount of loan repayment to meet the continued rising cost of medical education. Decreasing the required numbers of years of service could also make the North Dakota loan repayment programs more competitive with those offered in other states.

In conclusion, I would like to emphasize the importance of loan repayment programs to the community health centers of North Dakota. This investment aligns with other state programs such as Area Health Education Centers, which help generate interest among students in health professions, and the range of other state investments in health services training. Those programs increase the *supply* of providers, which is definitely needed. Loan repayment plays a particular role in the *distribution* of the health care workforce because it provides targeted and high-value incentives for young professionals to start their careers in underserved communities and health professional shortage areas. Our mission as health centers is to provide care to populations and communities that otherwise could be left behind, but we cannot meet that mission without qualified health professionals willing to serve in those communities. We encourage the committee to support full funding for its loan repayment programs, and we would welcome the opportunity to work with the committee on maximizing the value and impact of those state investments.

Thank you!

Shelly Ten Napel, CEO
Community HealthCare Association of the Dakotas (CHAD)

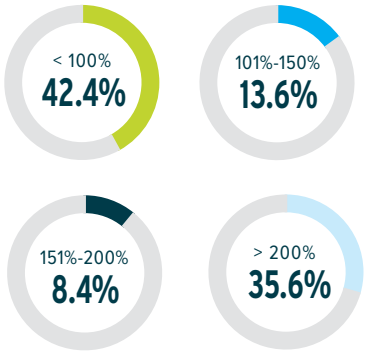
CHAD

WHAT IS A COMMUNITY HEALTH CENTER?



Community health centers (CHCs) are non-profit, community-driven primary care clinics that provide high-quality primary and preventive care to all individuals, regardless of their insurance status or ability to pay. Health centers are located in underserved and low-income urban and rural areas across North Dakota, providing access to affordable, quality health care for those who need it most. The centers serve as essential medical homes where patients can receive a wide array of services including medical, behavioral, and dental care along with help with transportation, interpretation, and other case management and care coordination services. In rural communities, health centers support a community's ability to retain local health care options, supporting access to health care where rural Dakotans live and work. North Dakota's network of five health center organizations provides care to over 36,000 patients each year at 22 locations in 20 communities across North Dakota.

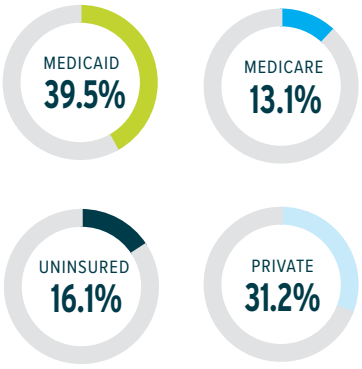
PATIENTS BY POVERTY LEVEL



This represents a distribution of patients for whom income is known. Income is unknown for 47.0% of patients.

TOTAL PATIENTS 36,376

37.9% of total patients served are people of color

PATIENTS BY PAYOR SOURCE

ECONOMIC VIABLILITY

Source: Calculations based on 2023 UDS Reports

In addition to the actual dollars that flow to local communities through health centers, their role in maintaining access to health care can have an enormous impact on the long-term economic viability of rural and urban communities throughout North Dakota. For our smaller communities, access to local health care is crucial to a town's ability to recruit new companies and maintain a healthy workforce without long out-of-town trips to the doctors or to pick up prescriptions. When a small town is able to retain access to health care, it can serve as a main street anchor, keeping other small businesses viable. Across rural and urban communities, CHCs keep health care affordable by providing health care services regardless of ability to pay and by helping patients find health coverage options that are right for them.

Community HealthCare Association of the Dakotas

Testimony:
In Support of House Bill 1012, with the 2025-27 Health & Human Services Executive Budget Recommendation for Appropriations to Federally Qualified Health Centers

House Appropriations Committee Human Resources Sub Committee
Representative Jon Nelson, Chair
January 27, 2025

Chairman Nelson, Vice Chair Stemen, and Members of the Committee:

My name is Shannon Bacon, and I serve as Director of External Affairs with the Community HealthCare Association of the Dakotas (CHAD). For over 35 years, CHAD has served as the non-profit primary care association representing our member Federally Qualified Health Centers (also known as community health centers) across North Dakota and South Dakota. These non-profit, community-driven clinics provide high-quality primary and preventive care to all individuals, regardless of their ability to pay. Health centers provide a sliding fee scale to individuals who are uninsured or underinsured, and they also provide care to individuals with a variety of insurance types.

I appreciate the opportunity today to express our members' appreciation for previous state appropriations and to ask for your continued support, as recommended by the Department of Health and Human Services executive budget in House Bill 1012.

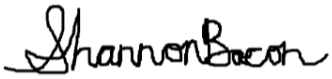
Here in North Dakota, five FQHCs provide care at 22 delivery sites in 20 communities, located in both rural and urban areas of our state. Rural health centers support a community's ability to retain local health care options, enabling people to access hometown primary care. In urban areas, they tend to care for underserved populations. FQHCs work to fit into the fabric of each community they serve, and they do that by building partnerships and working to strengthen and support existing services while filling gaps in care and addressing community-based needs.

In 2023, our member health centers provided comprehensive primary care, including medical, dental, behavioral health, and substance use treatment to over 36,000 unique patients with over 126,000 visits. Nearly 40% of these patients have Medicaid and 16% are uninsured. A recent study found that, on average, Medicaid patients receiving care at a health center saved the health care system 24% annually.

You'll hear directly from our member Northland Health Centers today about the real impact of these appropriations on their patients and communities. In addition, I want to share a few highlights of how this funding is helping our fellow North Dakotans:

- Coal Country Community Health Centers has utilized these state appropriations to support their Community Care Services program, which provides personalized chronic care management services to aging seniors. Participants receive support from nurses, a social worker, and a community health worker, to help them achieve their chronic care management goals and maintain independence in their homes. This can include referrals to community resources, nursing check-ins by phone or in-person, and coordination of care between the patients' pharmacy, specialists, testing centers, hospitals, and more.
- Family HealthCare has used state appropriations to expand medical, dental, and behavioral health services in innovative ways. This includes a new primary care clinic in LaMoure, which was established in 2024 through a partnership with LaMoure Public Health Unit.
- And thanks to state appropriations, Family HealthCare has been able to expand mobile health unit services, including the addition of optometry services. Their mobile health unit makes visits to schools, head start programs, and more. With two exam rooms, it is equipped to provide high-quality, comprehensive medical and dental care.
- Spectra Health has leveraged state appropriations to expand access to primary medical, behavioral health, and dental care. This includes expansion of psychiatric services within primary care through a Collaborative Care Model. In this model, a registry of patients with certain behavioral health diagnoses is created and discussed in regularly scheduled team meetings with a consultant psychiatrist. The psychiatrist reviews provider notes, patient history, and other information to provide recommendations on medications, laboratory testing, and treatment goals. Formal recommendations are recorded in the patient record as a resource for any member of the team. In addition to the regularly scheduled meetings, any team member can request a "curbside" consult regarding a patient who may not be demonstrating improvement or who has a more emergent need. This access to specialty consultation allows for faster, more efficient and cost-effective care for patients who would otherwise wait weeks to months for a specialist appointment.

These are just a few examples of how state funds are being used efficiently and effectively to improve access to care and reduce the costs of avoidable emergency or specialty care.



Community HealthCare Association of the Dakotas

From both a health and economic perspective, health centers are a smart investment.

Today, we ask for your continued support for appropriating funds to community health centers, as listed in the 2025-27 Health & Human Services Executive Budget Recommendation. This will allow us to expand our reach, invest in our communities, and fill gaps in care, all while contributing to the economic vitality of local communities.

Thank you for your consideration, and next you will hear from our member Northland Health Centers about the impact of this funding on their patients. I also welcome any questions.

Testimony
House Bill 1012
House Appropriations—Human Resources Division
January 27, 2025

Good morning, Chairman Nelson and members of the committee. I am Javayne Oyloe, Executive Officer of Upper Missouri District Health Unit (UMDHU). I have worked in public health for nearly 29 years. UMDHU provides local public health services to Divide, McKenzie, Mountrail and Williams Counties.

I am in support of the mission of the Public Health Division and the funding needed. Local public health made a request through the DHHS budget that was presented to Governor Burgum for an additional $2 million in state aid which would bring the total to $10 million. Although the additional funding wasn't in the governor's budget, state aid is needed to meet the local needs in our communities. State aid makes up 10% of the UMDHU budget for about $335,000 per year.

Each community has a few stories where local public health provided a safety net for local needs. For instance, when oil activity ramped up in our area UMDHU approved 1100 septic permits up from around 40 per year. Recently there was an active TB case where a group of our nurses and emergency response employees and a couple state employees helped to screen a couple hundred people in the community.

With a younger average age and the addition of new cultures in NWND Upper Missouri has adapted to meet the needs. We assist people who speak other languages with the use of interpreters, update records from other countries and assist schools often without reimbursement for these tasks.

Local public health works with many partners to address community needs and help to diminish healthcare costs by assisting with Medicaid and Medicare clients, the uninsured, provide outreach and after-hours clinics and meet people where they're at. There are times when we are the only provider people see. We help connect people to services and programs. We also help to allow the elderly to stay in their homes. UMDHU works very closely with partners from the Mandan, Hidatsa, and Arikara Tribes. The Public Health Division depends on us to be engaged with our communities every day with programs like WIC, disease prevention, septic systems, reproductive health, child passenger safety, emergency preparedness and tobacco and substance misuse prevention.

Local public health appreciates your support that helps us to maintain our role as a community safety net.

Testimony
HB 1012
House Appropriations-Human Resources Division
January 27, 2025

Chairperson Nelson and Members of the House Appropriations-Human Resources Division Committee:

My name is Erin Ourada, and I am the administrator at Western Plains Public Health, the local public health unit that covers Grant, Mercer, Morton, Oliver, and Sioux Counties. We employ a variety of public health professionals such as environmental health practitioners, dieticians, nurses, tobacco prevention specialists, and administrative support staff. These individuals implement the core functions of public health which are communicable disease control, chronic disease and injury prevention, environmental public health, maternal, child and family health, and access to clinical care.

I am in support of HB 1012 which includes $8,000,000 state aid to local public health units. However, I would like to encourage consideration to increase this amount to $10,000,000. State aid is one of our only flexible funding sources and fills gaps that other funding can't cover. In 2024 state aid only made up 13% of our annual collections. The flexibility of this funding allows us to adapt our programming to our community's needs. The needs of our communities sometimes vary greatly across the five counties we serve. One community may need more state aid devoted to newborn home visiting whereas the next community may need more state aid devoted to home visits and medication management with the elderly. Many other funding sources do not allow for this type of flexibility and thus our community's needs cannot always be uniquely met. Federal funding for instance often comes with strict eligibility criteria and restrictions, limiting our ability to respond to emergent or unique community needs.

My family was able to benefit from one of the programs implemented by WPPH with state aid funding. WPPH nurses use a special tool to screen certain elementary grades at almost every school in our jurisdiction. Recently, our daughter received a vision screen in 1st grade at her school and she failed the screening which prompted us to visit an eye doctor for an exam. This exam showed us that my daughter's right eye is not working well and so her left eye is being overworked. We had no idea as she wasn't having issues in school and was not showing any signs of having problems seeing. Thankfully, the doctor feels glasses should correct and prevent any long-term issues because we caught it in time. But it wasn't us that caught it, it was the preventative screen she had at school. The screen that we didn't have

to pay for, but which was provided by WPPH with state aid funding. Many don't see public health at work, but without it, we would all notice in one way or another.

Western Plains Public Health appreciates your support and is extremely grateful for state aid funding. We ensure that every dollar of state aid is used responsibly, tracking outcomes to demonstrate its value to the community. Thank you for your time and I can now answer any questions you may have.

Respectfully submitted,

Erin Ourada, MPH, REHS/RS

House Appropriations-Human Resources Committee
HB 1012 Testimony
January 27, 2025
Representative Nelson, Chair

Good morning, Chairman Nelson and Members of the House Appropriations- Human Resources Committee. I am Carlotta McCleary, Executive Director of Mental Health America of North Dakota and Executive Director of the North Dakota Federation of Families for Children's Mental Health. Today I speak on behalf of the Mental Health Advocacy Network (MHAN). MHAN advocates for a consumer/family driven mental health system of care that provides an array of service choices that are timely, responsive and effective. Our vision is for every North Dakotan to have access to the right service—whether it be preventative, treatment, or recovery; at the right time—when the service is needed; and at the right place—as near his or her home as possible.

MHAN is testifying in support of HB 2012. Our priorities and recommendations rely on implementing best practice models of service delivery, including continued pursuit of Certified Community Behavioral Health Clinics in all eight regions of North Dakota and maintaining the IMD Exclusion. Best practices understand that we first need to ensure our citizens receive assistance before they have emergencies. We must have a robust community mental health system of care so that we can reduce the reliance on our costly, intensive institutional care settings. We must have substantial and multifaceted mental health workforce, which includes utilizing those with lived experience to help people navigate services and embark on their recovery.

SAMHSA's best practices models also include crisis response systems. When a crisis emerges, we must rely on three pillars of crisis response. Those pillars are: 1) a place to call (988), 2) someone to respond (mobile crisis teams), 3) a place to go (crisis stabilization beds/safe beds).

MHAN Priorities For 69th Legislative Assembly

MHAN has realized that while we are not done making improvements to the adult mental health system, the efforts over the last decade have created a solid foundation for further progress. It is now time to expend the same energy in creating a solid foundation for the North Dakota children's mental health system.

Children's Mental Health Services: MHAN urges the state of North Dakota to make a substantial investment in community-based mental health services for children and youth with Serious Emotional Disturbance (SED). One in ten children in North Dakota has a SED, which is over 18,000 children. According to the most recent and corrected data from DHHS, during the 2023-2024 fiscal year, 1,086 children with SED received case management services through the Human Service Centers.

There is a need for high-fidelity wraparound services for children that are individualized to meet a child and family's needs. These are not simply children who have any mental illness or moderate mental illness, they are those with the most significant mental health challenges. When out-of-home placements are to occur, they should be as near their home as possible. A proper crisis response system can divert many from needing more costly out-of-home placements such as hospitalization.

Cross-Disability Waiver: MHAN is supporting the establishment of a cross-disability waiver and that it be inclusive of children with mental health needs. As stated earlier, North Dakota is lacking a full continuum of care for children's mental health services in both the public and private sector. Families who have a child with a mental health challenge are expected to make tremendous sacrifices to get their child access to care. Specifically including children with mental health needs into the cross-disability waiver will go a long way to address existing service gaps.

Family Support Organizations: Family organizations that serve children with mental health needs do great work with small budgets for families throughout the state of North Dakota. Those organizations and programs should continue to be supported and funded so that children with mental health needs and their families can receive assistance. Families would be lost without them.

Peer Support: MHAN supports efforts to make peer support more accessible. This could include making coverage for peer support eligible through standard Medicaid. MHAN believes that employers should be paid a reimbursement rate that allows for all peer support specialist positions to have a living wage with benefits. MHAN also supports the expansion of certification for family peer support specialists, who will be providing support for families raising children with mental health needs. ND Federation of Families has been providing this evidence-based practice to families since 1994 and wants to be part of the solution to needed children's mental health services.

Mobile Crisis Teams: MHAN strongly supports the continued expansion of mobile crisis teams statewide, especially in rural communities. MHAN also supports efforts to make

mobile crisis teams more functional and accessible for families with a child experiencing a mental health crisis.

Crisis Stabilization Beds: We want to build an appropriate regionalized children's crisis bed stabilization system that is responsive to the needs of children experiencing a mental health crisis. These crisis stabilization beds are the third pillar of SAMHSA's crisis response system. This prevents the escalation of crisis within the family unit, ER visits and hospitalizations. This allows for youth having a mental health crisis to have treatment at the most appropriate level on the continuum of care to meet their needs.

Supported Housing: MHAN supports the continuum of services required to support individuals to obtain and maintain housing. This would be a financial savings to the state, considering the cost of institutional care vs. community-based placements. This would also assist institutions to be able to offer successful transitioning to the community for persons. Additional supported housing is needed for persons with mental health needs including those that are justice involved and those transitioning out of institutional facilities to allow persons to live in the most integrated setting. This would assist in addressing current gaps related to housing and the service delivery system.

New State Hospital: MHAN supports the establishment of a new State Hospital that is both therapeutic and separated from any prison complex. The physical conditions at the existing State Hospital are as such that North Dakota has a significant risk of a catastrophic systems failure at any time. The expenses of repairing those facilities are so extensive that building a new facility became necessary. MHAN urges the legislature to build a new State Hospital.

This concludes my testimony, and I will be happy to answer any questions you may have.

HB 1012 Testimony
House Appropriations-Human Resources Division
Representative Nelson, Chairman
January 27, 2025

Chairman Nelson and members of the House Appropriations-Human Resources Division Committee, my name is Carlotta McCleary. I am the Executive Director for both North Dakota Federation of Families for Children's Mental Health (NDFFCMH) and Mental Health America of North Dakota (MHAND). NDFFCMH is a parent run organization focused on the needs of children and youth with emotional, behavioral, or mental disorders and their families. MHAND's mission is to promote mental health through education, advocacy, understanding and access to quality care for all individuals. Today I am testifying as the Executive Director for Mental Health America of North Dakota.

MHAND supports HB 1012 but has concerns with the proposed budget for the Mountainbrooke Recovery Center operated in Grand Forks, North Dakota. MHAND operates Mountainbrooke Recovery Center, under contract from Northeast Human Service Center. Recovery Centers are referred to as psycho-social rehabilitation centers in North Dakota Century Code and North Dakota Administrative Code, are part of an integrated, multi-disciplinary continuum of services for individuals with serious mental illness and/or those struggling with co-occurring disorders. There are eight regional recovery centers in North Dakota. Recovery Centers are a place where consumers can become educated about their mental illness and its treatment and where consumers can learn about the resources, they need to achieve their individualized recovery goals. They offer a range of skill-building and recovery activities. Mountainbrooke Recovery Center is one of the largest recovery centers in the state, with 230 members and an average daily

attendance of 30 to 35. Mountainbrooke has a staff of 5: 1 full-time employee and 4 part-time employees. All Mountainbrooke staff are individuals with lived experience.

From 2015 to 2019, MHAND did not receive an increase in the budget. During the last biennium, MHAND received an $16,672 inflationary increase over the biennium, but our rent increase surpassed that amount, to $22,320 for the biennium. To be clear, that rent increase is still at nearly half market value. However, our landlord has asked us to increase it to market value. Our monthly expenses are $18,730, but we currently receive $15,752.39 in contract reimbursement. That shows we are nearly $3,000 in the red every month. Our health insurance premiums have increased 7.5% each year and our electricity costs have increased about 10% since the last biennium. Due to the number of members present each day, we try to have two staff on at all times. We could use more staff for additional coverage, but our budget constraints do not allow it.

MHAND has addressed this with Northeast Human Service Center during the interim, providing documentation about our current expenses and our desire to both address the current shortfall and our needs for the upcoming biennium. Ultimately these requests were not included in the Governor's budget.

Mental Health America of ND believes that this is an integral service, and our staff believe in the mission of the recovery centers. However, MHAND does not have enough funds to continue operating Mountainbrooke Recovery Center at a loss.

Thank you for your time and I will be happy to answer any questions you may have.

Testimony
House Bill 1012
House Appropriations
Monday, January 27, 2025
Rolette County Public Health District

Testimony on the Importance of Enhanced State Aid Support
for Local Public Health

Chairman Vigesaa and members of House Appropriation committee. Thank you for the opportunity to submit written testimony today on the critical importance of state aid support for the Rolette County Public Health District. My name is Barbara Frydenlund, Administrator and I represent the Rolette County Public Health District, serving the county of Rolette and dedicated to safeguarding the global health and well-being of our county.

As with all Public health entities in North Dakota, Rolette County Public Health is fundamental to the well-being of our community. We provide services including immunizations, maternal and child health programs, disease prevention, health education and prevention programs, and emergency preparedness. These services are crucial in promoting public health, preventing outbreaks, and ensuring that all community members have access to preventive health services.

Rolette County continues to be one of the poorest counties within the state and country. Our mill levy value is limited by our low land values and non-taxable tribal lands within our county. Despite the federal designation of tribal lands in Rolette County, federal impact aid in lieu of tax base from tribal lands is not available to public health services. This is in sharp contrast to federal impact aid allocated to school districts within our service area. Though this is an important part of public-school finances we do have to be cognizant of the fact that children must be healthy to learn effectively. Current state aid does not factor in the poverty rate and health status of our population. The greater poverty the greater the health needs.

Currently Rolette County state aid payment accounts for three(3%) percent ($57,000.00) of our annual budget. As per the North Dakota Century Code, the max levy of local tax dollars that may be allocated to local public health is five mills and for us that equates to approximately $117,000.00. With currently no additional local dollars available to our agency, the importance of state aid is monumental. For reference thirty-three (33%) of our revenue is generated by a fee for service. Currently fifty-one (51%) of our revenue is received through federal to state passthrough grants. These grants are decreasing in availability. Again, for your reference our current immunization grant funding is $4800.00 per year, Emergency preparedness funding $3704.00 per year, Maternal Child Health funding is $17,500.00 with a required match of $13,125.00. From the above description you can see why supplemental funding such as state aid is essential to the viability of Rolette County Public Health.

State aid and local tax dollars are the only flexible funding available to local public health to address grant funding match, local community health priorities and foundational public health services. These two sources also supplement many of our programs including programs such as North Dakota health tracks and immunizations, in which state reimbursement does not equate with the costs of delivery of these essential services . For us these funds are extremely limited and pose a barrier to providing some local services and having adequate match for grants.

Our public health workforce has been reduced due to lack of available funding and additional cuts are inevitable, with decreased federal and state funding, increasing cost of supplies, the cost of living, the ever-increasing health insurance costs and non-competitive local public health salaries.

In addition to the above fiscal description, our public health district acts as a gap filler for individuals. We find ourselves spending much more time providing case management for families, connecting people to services within or outside of the area, providing educational services that do not have a funding source. Some of these services include chronic disease services, school health services, mental health first aid, CPR, fluoride varnish applications, car seat programs, babysitting programs, clinical care such as dressing changes, injections, sexual disease testing, just to name a few. Without additional local public health funding these services simply can't continue.

Immunization is one of the most effective public health interventions. It prevents the spread of infectious diseases and protects vulnerable populations. State aid support enables Rolette County Public Health District to procure vaccines and run immunization clinics, ensuring high vaccination coverage and herd immunity.

Maternal and child health programs are vital for reducing infant and maternal mortality rates. State funding ensures that these essential services are accessible to all mothers and children in the county, regardless of their socio-economic status.

Preventing diseases before they occur is more cost-effective than treating them after they have manifested. Rolette County Public Health District runs various health education programs, including those focused on chronic disease management, nutrition, and physical activity. State aid support facilitates these educational campaigns, helping to reduce the incidence of diseases such as diabetes, heart disease, and obesity.

We know only too well that in times of crisis, such as natural disasters or pandemics, local public health districts are on the front lines of response. Adequate state aid can ensure that Rolette County Public Health District is well-prepared with emergency plans, supplies, and trained personnel to handle such situations efficiently and effectively.

State aid support is a lifeline for public health districts. It ensures that they have the financial resources necessary to maintain and/or expand their services. For Rolette County Public Health District, <u>increased</u> state aid means:

1. Ensuring a competent workforce
2. Delivering effective public health strategies to engage the community in prevention programming
3. Addressing the health disparities that exist within our community, ensuring that everyone has the equal opportunity to achieve optimal health

Without an increase in state aid funding, Rolette County Public Health District would face significant challenges:

1. A lack of funding would force the district to cut back on services, leaving many community members without essential healthcare. Immunization rates could drop, disease outbreaks could rise, and maternal and child health programs could suffer.

2. Health inequities could widen as vulnerable populations lose access to critical services. This would exacerbate existing disparities and lead to poorer health outcomes for the community.

3. Without preventive services, more people would rely on emergency care for conditions that could have been managed or prevented. This would strain the healthcare system and increase costs for both individuals and the state.

4. State aid support is crucial for the sustainability and effectiveness of Rolette County Public Health District. It enables the district to provide comprehensive, high-quality care to all community members, regardless of their circumstances.

Investing in public health through state aid not only improves individual health outcomes but also strengthens the entire community, leading to a thriving and healthier future for all.

The importance of state aid support cannot be overstated. It is the backbone of public health infrastructure, ensuring that districts like Rolette County Public Health can continue to serve their communities effectively.

By securing and enhancing state aid support, we invest in a healthier, more resilient future for everyone.

Thank you for your time and consideration of allocating an additional $2,000,000.00 for local public health state aid to the NDHHS for the 2025-2027 biennium.

Fetal Alcohol Spectrum Disorders (FASD) In North Dakota: A 2025 Fact Sheet

Prevalence of Alcohol Use in Pregnancy		Reference
Early pregnancy alcohol use	42.4%	1,32
Alcohol use at end of pregnancy	8.4%	2,3,4
Women drinking during pregnancy identified by prenatal care providers	Unknown-Likely less than 1 in 10	

Neonatal Risks Associated with Prenatal Alcohol Exposure (PAE)		
Developing FASD among exposed children	1 in 13	5,32
Risk for stillbirth	40% higher	6,7
Drinking at the end of pregnancy and risk of SIDS for siblings of child with FASD	10.2x higher	7,10
Drinking at the end of pregnancy and risk of death from infectious diseases for siblings of child with FASD	13.7x higher	7,10,11
Mortality risk for sibling of a child with FAS	6.3x higher	7,11
Risk of recurrence in families with one affected child (FASD)	35% higher	1,5,10

Fetal Alcohol Spectrum Disorder (FASD)		
Prevalence and Incidence Estimates		
Newborns identified in NICU with FASD each year	< 5 per year	Estimated
New FASD cases per year	1% prevalence = 107 5% prevalence = 535	See Calculation *2
North Dakota FASD population: Children/youth (Birth – 18 yrs)	1% prevalence = 1,926 5% prevalence = 9,630	See Calculation *3
North Dakota FASD population: Adults with FASD (19-64 yrs)	1% prevalence = 4,815 5% prevalence = 24,075	See Calculation *4
North Dakota FASD population: Elderly with FASD (65+)	1% prevalence = 245 5% prevalence = 749	See Calculation *5
Pregnant women's chance of being screened for substance use at an emergency room visit	51% less likely	12,13

FASD and Health and Mental Health Impairments		
Number of comorbid disease conditions associated with FASD	Over 400	14,15

Risk of child or adolescent psychosis	24.5x higher	[15]
Risk of intellectual disability	23x higher (23%)	[15]
Risk of ADHD (Attention Deficit Hyperactivity Disorder)	10x higher (52%)	[15]
Risk of anxiety disorder	11x higher (35%)	[15]
Risk of FASD if ACEs score: 2-6 (Adverse childhood experiences)	2.1x higher	[17]
Risk of FASD if ACEs score: 7-10 (Adverse childhood experiences)	8.1x higher	[17]

Economic Costs For FASD North Dakota		
Annual cost of care per child	$22,810	[18]
Annual cost of care for children with FASD	1% prevalence= $43,932,060 5% prevalence= $219,660,300	See Calculation *6
Annual cost of care per adult	$24,308	[18]
Annual cost of care for adults with FASD	1% prevalence= $117,043,020 5% prevalence= $585,215,100	See Calculation *7
Cost of care per diagnosed individual by age 43	Over $1 million	See Calculation *6
Cost to prevent one case of FASD in a mother with a previous birth with FASD	$20,200	[18]
Cost to prevent one case of FASD in a mother with a previous birth with FASD a using programmatic intervention	$47,615	[18]
Net savings of lifetime cost per case from prevention	$1,235,800	[1,5,18]

Special Sub-populations		
Children/youth with FASD in foster care placement	32-40% higher than in general population (18.8%)	[33]
Children/youth with FASD in special education	10x higher than in general population	[19]

Children/youth with FASD in Canadian juvenile corrections	16x higher risk of incarceration	[20]
Diagnosed with FASD in adult prison	.0009%	[22]
Undiagnosed/misdiagnosed in adult prison	99.9%	[22]

Mortality Rates		
Individuals with FASD	4.3x higher	Calculated based on [7,10,11]
Siblings of individuals with FASD	5.3x higher	[7,10]
Birth mother of individual with FASD	44.8 x higher	[23,25]
Sudden Infant Death Syndrome	11.79 x	[28]
Stillbirth	2.78 x	[6]

North Dakota Diagnostic Demand and Capacity		
FASD diagnostic demand Annual Birth Cohort	1% prevalence 2/week 5% prevalence 2/day	[1]
FASD diagnostic capacity: Children/youth	1% prevalence 10/day	[1]
FASD diagnostic capacity: Juvenile corrections	2/month	[1]
FASD diagnostic capacity: Adult corrections	4/ month	[1]
Time to screen using the One Question Screen	1 minute	[29]
Time to screen using the E-FAST	3 minutes	[30]
Time to screen using the FASD Mini	3 minutes	[31]

ADHD: attention deficit hyperactivity disorder
FAS: Fetal Alcohol Syndrome
NICU: neonatal intensive care unit
SIDS: sudden infant death syndrome

*1. 7.6% women who drink in late pregnancy x 10,680 births= 812 women/7=116. Each year in North Dakota 116 women drink on the day they deliver.

*2. 1% Prevalence: 10,680 births x 0.01= 108
5% Prevalence: 10,680 births x 0.05= 535

*3. 1% Prevalence: 10,680 births x 0.01 x 18 years =1,926

5% Prevalence: 10,680 births x 0.05 x 18 years =9,630

*4. 1% Prevalence: 10,680 births x 0.01 x 45 years = 4,815
5% Prevalence: 10,680 births x 0.05 x 45 years =24,075

*5. 1% Prevalence: 10,680 births x 0.01 x 7 years =245
5% Prevalence: 10,680 births x 0.05 x 7 years =749

*6. 1% Prevalence: $22,810 cost per child x 1,926= $43,932,060
5% Prevalence: $22,810 cost per child x 9,630=$219,660,300

*7. 1% Prevalence: $24,308 cost per adult x 4,815=$117,043,020
5% Prevalence: $24,308 cost per adult x 24,075=$585,215,100

*8 Annual cost of care for children and youth = $22,810 (birth through 20) and cost for adults =$24,308 (from 21 and up) [19] ($22,810 x 20 years) + ($24,308 x 23 years) = $1,015,284.

Costs of FASD

Annually: $53,683 per Child and $49,077 per Adult.
Includes $25,993 in unreimbursed costs to family.

329% higher than ADHD

318% higher than autism

20 X higher than asthma

270% higher than diabetes

538% higher than epilepsy

Jan 27, 2025

Chairman Nelson, Members of the Committee, my name is Carl Young. I am the Executive Director of the Family Services Network here in North Dakota. In my work within the Fetal Alcohol Spectrum Disorder (FASD) space I work with people from every region of the state. I provide parent to parent support, Individualized Education Plan advocacy, and training for social workers and educators.

Through my work I frequently find it necessary to refer clients to the FAS Center at UND.

I speak to you today asking your committee to fund the FAS Center at UND, which was established by North Dakota law in 1993. The North Dakota Legislature established the FAS Center via the passage of House Bill 1313. Dr. Larry Burd is the Center's director. Through his efforts, many people have been able to get a proper diagnosis. However he is only able to see clients 2 days a week, with a third day dedicated to paperwork and follow-up with clients. The Center currently has a wait list of 2 months.

Through my work, which is not funded through the Center, I have been able to assist more than 50 families in the last year. I follow a multi-step process when referring clients to the Center. First, I have them schedule an appointment. Then I have them complete a pre-assessment that is offered through the University of California San Diego. It takes approximately 3 weeks to get the results of the pre-assessment. Pre-assessment helps give families hope.

Almost all the families I work with are either in a foster/adopt or a kinship care situation. Where fostercare is the situation, those families are travelling on the state costs to get care for the kids. Without the FAS Center at UND, these families would need to either travel to Minneapolis with the hopes of getting an appointment with Dr. Jeff Wozniak at the University of Minnesota or they would need to travel to Sioux Falls and the University of South Dakota. There are other options, however they don’t accept ND Medicaid, and it gets expensive taking kids to other states to get a diagnosis. When the kids are in care, that expense falls to the State of North Dakota.

How do I know about FASD? My son was diagnosed at the Center 8 years ago. We adopted him through foster care here in North Dakota. Before that diagnosis, he had been diagnosed with a significant number of mental health disorders and autism. The Centers for Disease Control and a large number of academic research papers show that the prevalence rate is at least 1 in 20 children. According to the National Center for Education Statistics in our school system, the average classroom size ranges from 19.3 in the self-contained classrooms to 20.4 students in departmentalized classrooms like we would see in middle school or high school levels. This would indicate that FASD affects at least one child in every classroom. Most of these children are undiagnosed. They are typically seen as extreme behaviors, not symptoms of a disorder.

What is the cost of care for a child with FASD? I would ask that you review the information in the

Carl Young - carl@fasdnd.com Glimpses of FASD - Meet Carl
https://youtu.be/irPey82-KcU?si=vu_5BGPmBjW0tQPL

charts in my supplemental handout which is available to each of you in the packet of files I gave you. I'll reference those numbers now.

The FAS Center at UND provides a significant service to our state. Last biennium the appropriation through the Legislature was $350,458. For whatever reason, this session the Department cut the funding from the budget. I am not here to question that logic. I am here to ask that you reinstate an appropriation for the Center. In my view, $350,458 is not enough, I'd like to see a higher number.

Currently in our state, other than the work I do, which doesn't include the Center, and is not funded by the Center, Dr. Burd is the only practitioner that I have been able to connect with who is working with this population. He doesn't provide support, the center only does diagnosis. While I am certain that there are people who are listening to this testimony, who would say they work with the population, I am not aware of who they are. I can't make referrals if I don't know there are professionals.

Right now, the FAS Center is the answer for so many kids.

I conclude with a few facts. During the last legislative session, this body saw fit to place Fetal Alcohol Spectrum Disorder in the state code as a developmental disability. We must ensure this population is served. We don't have special health care clinics like the Autism Pediatric Specialty Clinic.

A bit about my son for those of you who have never heard his story. He was born substance exposed right here in Bismarck. He is 23, and yes, I have his permission to talk about his case. By age 3, we began to see some significant behavioral challenges. By age 5 he was on adult doses of some psychotropic medications. At age 7 he first encountered the criminal justice system. At age 8, he had his first Psychiatric Residential Treatment Facility stay. He would have more. He was eventually diagnosed with Autism, where he was able to get some services, but not the correct services for his needs. At age 17, he left home. Since then, he has spent every Christmas and birthday in a detention facility. He has periods where he is free in society.

He does not have services or support. He does have a Developmental Disability case manager who checks in with him. In jail, he doesn't get support for his disability. His IQ is too high.

What areas of his life are affected: (this is typical in some way for most of those affected by prenatal alcohol exposure) my son has issues with Executive Function, Adaptive Life Skills, Understanding Cause and Effect, as well as Dysmaturity (while he is 23, developmental maturity is at approximately age 12)

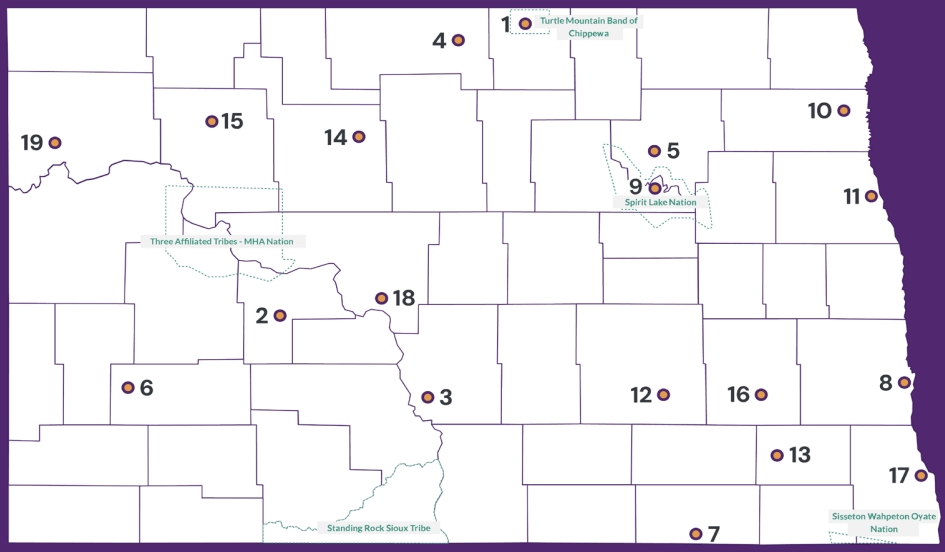
He has other symptoms that are too numerous to mention.

Our children with FASD deserve a level of basic care that includes diagnosis. If you take away the diagnostic clinic by not funding it, you end that basic level of care in our state. There is no

Carl Young - carl@fasdnd.com Glimpses of FASD - Meet Carl
https://youtu.be/irPey82-KcU?si=vu_5BGPmBjW0tQPL

one else. I am no therapist, clinician or doctor.

I am a parent with the lived experience of raising a child with the disorder. A disorder that is severely misunderstood, misdiagnosed, or under diagnosed across the state.



Our children deserve a diagnosis as early as possible, they shouldn't have to travel with their families to another state to get that diagnosis.

I thank you for your time and will stand for any questions.

North Dakota Domestic & Sexual Violence Coalition

North Dakota Domestic Violence Statistics 2023

6,131 new victims

6,131 new victims* of domestic violence were served by 19 domestic violence advocacy centers across North Dakota.

83%

83% of victims were women.

105

105 women were pregnant at the time they were assaulted.

4,205

At least 4,205 children were directly impacted by these incidents.

13%

At least 13% of victims were under the age of 25; 3% were under the age of 18.

21%

21% of new victims were people with disabilities. Of those, 13% were people with developmental disabilities, 35% had physical disabilities, and 52% were people with mental health disabilities.

**Statistics represent new victims served in 2023. New = unduplicated for calendar year.*

A closer look

At least 58% of victims were physically abused.

In at least 33% of cases, the abuser had a history of abusive behavior with other adults, including prior partners.

Weapons were used in at least 11% of cases. Of those, guns were used in 23% of cases, and knives were used in 17% of cases.

Alcohol use by the abuser was indicated in 23% of cases. Alcohol use by both the victim and abuser was indicated in 4% of cases.

Advocacy

29% of victims were self-referred to DV advocacy centers; 18% were referred by law enforcement.

Domestic violence advocacy centers provided victim assistance with 431 emergency protection orders.

NDDSVC

March 2024. Domestic violence statistics are compiled by the North Dakota Domestic & Sexual Violence Coalition (NDDSVC).

North Dakota Domestic & Sexual Violence Coalition

North Dakota Sexual Assault Statistics 2023

1,288 primary victims

1,288 primary victims* and 221 secondary victims were served by 19 sexual assault advocacy centers across North Dakota.

- At least **1,042** victims were female.
- At least **795** assailants were male.
- **55%** of cases were male assailant, female victim.
- **6%** of cases were male assailant, male victim.
- **16%** of cases were female assailant, female victim.
- **1%** of cases were female assailant, male victim.

Victim or assailant's gender was not identified in some cases.

A closer look

At least 34% of the assaults occurred in the victim or assailant's home.

At least 242 of primary victims were under the age of 18 years old at the time of the assault(s).

In adult cases, 6% of the assailants were strangers. In child cases, 4% of the assailants were strangers.

In at least 24% of all cases, the assailant was a friend/acquaintance/ date of the victim.

31% of new victims were people with disabilities. Of those, 17% were people with developmental disabilities, 29% had physical disabilities, and 54% were people with mental health disabilities.

Advocacy

45% of the crimes were reported to law enforcement.

At least 20,274 services were provided to primary victims by advocacy center advocates from January to December 2023.

At least 29% of the victims were referred to sexual assault service providers by themselves, friends, or family members.

27% of adult victims contacted the sexual assault advocacy center about the crime within 2 days of the assault. 14% of adult victims contacted a sexual assault advocacy center within 3-30 days after the assault.

NDDSVC

**Statistics represent new victims served in 2023. New = unduplicated for calendar year. Primary victims refers to the victim/survivor whom the sexual assault and/or child sexual abuse was directed at. Secondary victims refers to those who are indirectly affected by the sexual assault—i.e., children, siblings, spouses or intimate partners, grandparents, other affected relatives, friends, neighbors, etc.*

March 2024. Sexual assault statistics are compiled by the North Dakota Domestic & Sexual Violence Coalition (NDDSVC).

The Arc
North Dakota

House Appropriations - Human Resources Division
HB 1012 – Medical Services
January 27, 2025

Chairperson Rep. Nelson and Members of the Committee,

I am Kirsten Dvorak, executive director of The Arc of North Dakota. For 65 years, we have championed the human rights of individuals with intellectual and developmental disabilities (IDD), advocating for services and supports that empower them to lead meaningful, independent lives across North Dakota.

While opportunities for collaboration have been created through the Cross-Disability Advisory Council (CDAC), access to home and community-based services remains inadequate. Significant gaps persist in areas such as mental health services for children with Severe Mental Illness (SMI) and support for families navigating complex care needs. These challenges must be addressed to ensure that all North Dakotans with disabilities have access to comprehensive care. Refining the Level of Care criteria, which determines eligibility for specific services based on an individual's functional needs and medical conditions, is essential to closing service gaps and guaranteeing support for everyone in need, from birth to death.

The Arc of North Dakota strongly supports full funding for the CDAC and its efforts to advise the department toward a new waiver. Through collaboration with stakeholders, families, and service providers, the CDAC has fostered meaningful change. Over the biennium, the council established a strong foundation for the new cross-disability waiver by delivering actionable recommendations to streamline services, enhance access, and improve outcomes statewide.

This journey began with the 2021 legislative study under SB 2256, which proposed the Children’s Cross-Disability Waiver and continued with the creation of the CDAC through SB 2276 in 2023. These initiatives have already fostered collaboration and innovation, addressing systemic disparities and ensuring equitable care for children aged 3 to 21 with disabilities and complex health needs. Fully funding this initiative will streamline services, boost efficiency, and establish a cohesive care system statewide.

A foundational element of the newly proposed waiver is paid family caregiving, acknowledging the critical role families play in providing care and supporting the well-being of their loved ones. The findings from Alvarez and Marsal's review of the Department of Human Services (DHS) waiver system underscored significant service gaps for children with social deficits. It emphasized the need for family-centered education and support. These findings reinforce the importance of creating a robust and inclusive support network tailored to individual and family needs.

The proposed changes to the CDAC (SB2113) will focus on refining its mission to address the Level of Care criteria, ensuring that individuals with lived experience, such as adults with disabilities and family members of children receiving Medicaid services, contribute critical perspectives to this work. These new members will bring vital perspectives to the council's work, mainly refining the Level of Care criteria. By incorporating firsthand insights, CDAC aims to develop practical, equitable solutions to address service gaps and create a more inclusive care system. Their contributions will be pivotal in ensuring that the council's recommendations reflect the diverse needs of North Dakotans.

Investing in this initiative strengthens individual futures while fostering inclusive and supportive communities throughout North Dakota. The Arc of North Dakota urges the committee to prioritize funding for the Cross-Disability Advisory Council and the Children's Waiver. These initiatives exemplify North Dakota's commitment to valuing all its citizens' dignity, potential, and rights.

Thank you for your time and consideration. I am happy to answer any questions you may have.

Kirsten Dvorak
Executive Director
The Arc of North Dakota
701-222-1854

Testimony
House Bill 1012
House Appropriations—Human Resource Division
January 27, 2025
Southwestern District Health Unit

Good morning, Chairman Nelson and members of the Committee. My name is Sherry Adams and I am the Executive Officer for Southwestern District Health Unit (SWDHU). My health unit covers the eight counties of the Southwest which includes Adams, Billings, Golden Valley, Bowman, Slope, Dunn, Hettinger and Stark. I am writing to increase Local Public Health State Aid by two million dollars, which would bring the eight million dollars in the Governor's Budget to ten million dollars. We had submitted the ten-million-dollar request through the HHS budget process, but it was not brought over within the Governor's budget.

Local and state governmental public health agencies are recognized nationally as having the primary responsibility for promoting and protecting the public's health. We are the "boots on the ground" and serve as the foundation to the local public health system in a public health emergency. Local Public Health units work with numerous community partners to address community needs. Our local community health needs continue to grow and have become more complex, and increases in state aid funding is needed to ensure we are able to continue to support those needs. State aid is one of the few flexible streams of funding that local public health unit have and fills gaps not covered by other funding sources. (See attached Handouts)

Southwestern District Health Unit relies on State Aid Funding for a multitude of services. Some of those specific to our health unit are for Suicide Screening and referral, supplemental funds for communicable disease response (such as TB), environmental health services to outlying counties etc. Every Health Unit is able to use the funds for whatever gaps in their community that they have.

Local Public Health continues to struggle to fill vacant positions, primarily as we can not compete with private industry or sign-on bonuses. Much of our workforce has retired or will retire and we no longer see the longevity of new hires.

Another concern that is the uncertainty of future federal grants, whether or not we can get any increases of mill levy with property tax reform, and increased demands on local public health without additional funding.

Local Public Health is very passionate to be able to help meet the needs of our communities, but unfortunately without additional increases somewhere---like State Aid, we will either have to look at decreasing staff and or programs or both.

Thank you for the opportunity to provide comments. I would be happy to answer any questions you may have.

#31834

BUILDING HEALTHY COMMUNITIES
NORTH DAKOTA LOCAL PUBLIC HEALTH

2023 FUNDING STREAMS

5%
STATE AID

This provides local public health with funding to support the needs in our communities based on a report from 26/28 local public health units.

32%	FEDERAL
31%	LOCAL
24%	FEES
4%	TOBACCO
4%	GRANTS

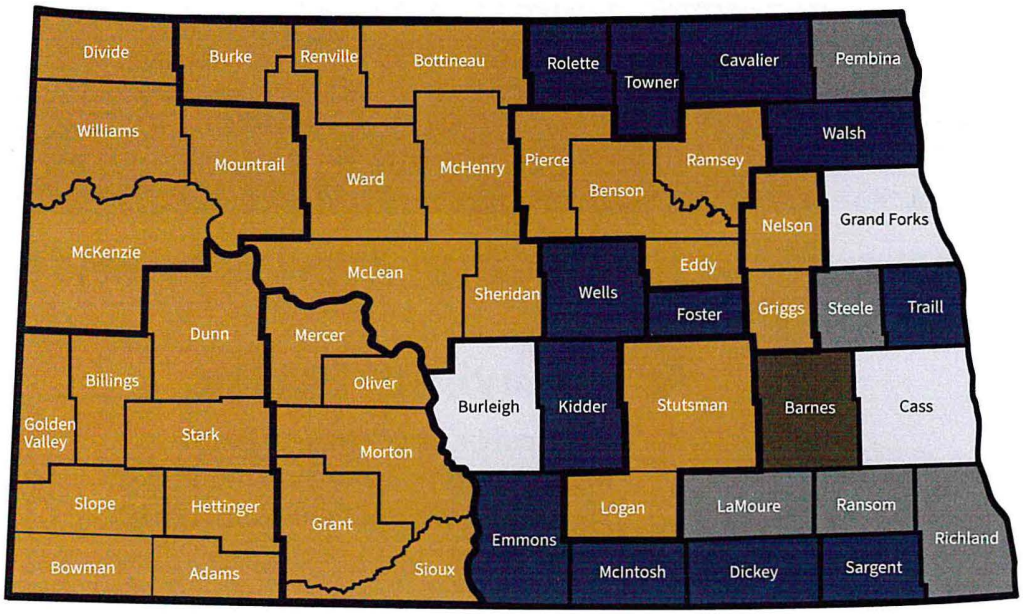
Federal: Money received directly from Federal goverment or as a pass through from NDHHS.
Local: Money received from local county, city or school funding.
State Funding: State aid received from ND Health, Environmental Health and local programs.
Tobacco Funding: Local Tobacco Program Funding for program staff.
Grants: Other grants from private foundation, not associated with above funding.
Fees: Payment for services (ie, environmental health licensing, nursing payments, lab fees).

2025 LEGISLATIVE PRIORITIES

Behavioral Health

Local public health units support **investments** and efforts for additional **community-based behavioral health services**.

Tobacco & Substance Use Prevention



Local public health units support investments in **substance use prevention** activities including efforts to **decrease access to nicotine/tobacco products** and to **reduce substance abuse deaths**.
Local public health units also support sustaining **indoor smoke-free air law**.

Environmental Health

Improper installation of onsite wastewater systems is a health threat to all of North Dakota's citizens and natural water resources. Local public health units support the **development** and **adoption** of **updated statewide onsite wastewater treatment standards** and for **statewide licensure** and **education** of onsite wastewater installers.

State Aid Support for Local Public Health Units

Why should state aid be increased from $8M to $10M for this biennium? (increase based on lost revenue (federal), retirement and insurance increases over the biennium)

Readiness and response

- Local public health works with local (school, city, county), state and tribal partners and leaders to coordinate efficient response to local emergencies.
- Ensure ability to respond to emergent public health needs across the state including but not limited to floods, tornadoes, winter storms, formula shortages, drug abuse/misuse response, food and housing insecurity response, etc.
- Need to build capacity to have the ability to respond to local needs and adapt to situations as they arise.

Attracting and retaining local public health professional workforce

- Retention of local public health professionals and qualified workforce has increased in cost due to economic factors, like inflation, and competition within the segment due to shortages. As with many agencies, the increase in insurance and retirement costs have added a fiscal burden. These benefits continue to be critically important for recruitment and retention of the workforce.
- Turnover in local public health workforce due to non-competitive salaries compared to private companies.
- Salary and fringe for staff needs to further increase provide a living wage that is competitive with private industry to retain the needed workforce. The cost of living has increased in the 2024 first quarter by 3.25%.
- Emphasizing and offering healthy living is helpful in attracting businesses and people to ND which increases the State's workforce. Efforts to cultivate wellness also help to "achieve the overarching goal of making North Dakota the healthiest state in the nation." (hhs.nd.gov/SHIP, page 2)

Addressing public health challenges

- Local public health units reported that the top health issue identified in their community health assessments are mental health, behavioral health and obesity.
- Local public health continues to see public health challenges of obesity, diabetes, substance use, lack of preventive screenings, etc.
- The state of North Dakota has been investing in growing the economy and attracting businesses to the state. Local public health serves a critical role in supporting growth in these communities. Local public health often fills gaps in our communities and increases access to services for those in need in our communities, e.g., helping senior citizens remain in their homes.

- Funding is essential to provide the level of fundamental public health services and programs that are needed. More outreach and services are required to meet the community's needs.
- North Dakota has seen an increase in state population through births and immigration. The staff available to serve communities needs to be retained both for community response and work in areas of prevention and screening.
- Many local public health units serve as regional hubs for many public health services. This highlights the importance of strong staffing levels, not only for emergency response, but also to rebuild the many other health department and community health priorities that have been impacted in recent years.

How will local public health use these funds?

- State aid funds are used to address community health priorities and community-based services not typically funded through grant sources or community partners.
- State aid dollars are used for grant matches.
- State aid funds are used largely for activities to reach disadvantaged, marginalized and disparate populations. These activities are not reimbursed through other mechanisms and require more staff time and travel, along with personal care and other practical assistance for children, young people and adults who need extra support: local public health focuses on meeting the client where they are at.
- State aid funds help decrease the cost burden of city/county governments as these entities are covering large portions of local public health budgets in some areas.

What is the risk if state aid is not increased?

- Every North Dakota citizen has the right to live a healthy and safe life. Local public health makes this right possible through the use of this funding as we are responsible for providing the following core functions as detailed out in NDCC 23-35-02:
    - Communicable disease control
    - Chronic disease and injury prevention
    - Environmental public health
    - Maternal, child, and family health
    - Access to clinical care
- Local public health response in the last two years included team members working to serve communities during shortages of infant formula, flooding, drought, winter storm outages, and disease mitigation and prevention services to implement routine programs.
    - These team members also conduct home visits for medication administration and foot care; serve families and foster families through health tracks for vision screenings and oral health screenings; they conduct nursing and developmental screenings; support schools with health screenings and routine wellness immunization clinics; and conduct environmental health inspections.
- Underfunding local public health will hinder the ability to respond to community needs.

- The need for local public health services has increased over the decades due to community growth, increased need for public health services and to assist with local needs.
- Local public health units are managed and administered locally to provide efficient and nimble response as necessary. Cities and counties support much of what local public health does which is augmented by the additional State contribution to reduce local financial burdens. There is growing concern among local jurisdictions about increasing local public health funding without more state investment especially with the outcry for lower property taxes and the Property Tax Elimination measure.
- Dedicated State Aid for Environmental Health is needed to address unfunded, locally emerging issues such as partnering with Department of Environmental Quality on Harmful Algal Blooms, nuisance complaints, education on Avian Influenza and other issues as they develop. Other areas of focus funded only by license/permit fees for our Environmental Health programs are onsite septic systems, safety inspections for food and beverage establishments, aquatic venues, tanning/body art establishments, lodging, and mobile home/RV campgrounds.

ND Local Public Health State Aid Funding History

	Biennium								
	2007-09	2009-2011	2011-13	2013-15	2015-17	2017-19	2019-21	2021-23	2023-25

- **Local public health cannot continue to meet the needs of the growing population without a strategic investment in State Aid to support workforce and program resources.**

HOUSE HUMAN RESOURCES
APPROPRIATIONS COMMITTEE

JANUARY 24, 2025

Chairman Nelson and members of the Committee, my name is Kandia Qual, Program Administrator for the Dacotah Foundation. My role within our agency is to oversee program operations within both the Fargo and Bismarck regions.

I am here to lend my support to the proposed budget presented by the Department of Health and Human Services.

First, I want to thank you for the many years of support your committee has given to the Department of Health and Human Services and the Regional Human Service Centers. I have been with our agency for more than 20 years and have worked closely with the Human Service Centers and presented to several of you throughout that time so I understand the constraints everyone is working within. The services our agency collaboratively provides would not be possible without your ongoing support. The funding we receive through our Human Service Center contracts allows us to provide essential recovery-based and residential services to the individuals in our communities who need it the most but who also experience many barriers to accessing assistance within private sector programs.

Throughout recent testimony, we have been hearing providers across the state voice the need for continued and strengthened funding. I am here to add my voice and support to that request. You have been provided a lot of data showing the changes over the past biennium in workforce trends as well as inflation costs associated in providing programs and services within the State of ND. While this is essential information to understand the concerns and issues as well as how to address them, I am going to speak from a slightly different perspective concerning the need for ongoing and strengthened funding support. I come from the 'boots on the ground' view as someone who is in the day-to-day operations trying to staff, maintain, and improve the programs in the regions I oversee.

Throughout my time with the agency, I have had the most direct experience within the Fargo region as that is where I am home-based. It is also the more competitive region for the job market so although transferrable across the state, I am most familiar to speak to what we are experiencing there. Dacotah Foundation, in Fargo, used to be able to maintain a staffing roster of approximately 90-95 employees. Our staff were frequently asking for extra hours to work and there were seldom any shifts open for them to pick up. We were competitive within the job market both in wages and benefits. Recruiting within the multi-college community was relatively easy. Fast forward through the pandemic, we now have an average staff roster of 55-60 employees. Due to the cost of inflation in all areas of life for our employees as well as us, as an agency, experiencing those same levels of inflation for our expenses, we are now struggling to recruit and retain employees. We are no longer able to be competitive with wages and benefits. The average starting wage in Fargo, regardless of the field of business, is $2-4/hour higher than we are able to start our employees at currently. Due to this, the

employees we are able to recruit now are coming to us with less experience and less education than what we were previously able to recruit. This equates to a need for more training hours on the front end to be at the necessary level of competency which is an added burden to our already strained budgets. Within the past month, we have had 4 interviews turn down offers we made for positions due to being offered $4-6/hour higher from another company. Also, within the past month, we have had 3 staff give their notice because they received offers with higher wages elsewhere now that they gained some minimal experience and education through us. We are in this constant state of recruitment and training only to have people leave within the first several months to a year because they now have the training for a higher wage elsewhere. I have been told by exiting staff that they love our agency and wish they could stay but they just can't turn down the financial gain of going elsewhere due to the current costs of living. On any given weekly schedule I post, we have approximately 20 open shifts that we don't have staff to fill. That equates to 160 direct care hours every week that we have to try to bargain and barter with staff to fill, offer overtime for or we are picking them up ourselves as supervisors and administrators. We don't mind working a direct care role side by side with our staff but this not only puts us into 12-16 hour work days multiple days a week but it takes us away from being able to complete other administrative and supervisory duties that assist in things such as interviewing, hiring, supporting staff growth and development and providing the quality management and development to the programs. I am seeing higher levels of burnout in both the direct care level and the supervisory level than I have seen over my many years with the agency. We are seeing people change positions, step down to less responsibility, or leave the field all together due to this. We desperately need to be able to increase our wages to become competitive again and maintain an adequate staffing roster to not only continue operations but to grow and strengthen the services we offer.

While the staffing issues and workforce changes have presented a hefty operational challenge within itself, inflation in general is also causing great concerns within our ability to operate in an adequate manner. The cost of goods, utilities, and repairs have increased dramatically. The cost of a gallon of milk was approximately $2.45 in 2018 (pre-pandemic), the cost of a gallon of milk now is approximately $4.78. We buy 25 gallons of milk per week between all of our Fargo programs, that's $233.00 more per month, or $2,796.00 more per year just for 1 grocery item that we have to purchase every month. Now consider the increase in meat prices, egg prices, and vegetable prices. You can see how quickly this adds up.

Regarding increased maintenance costs, our crisis units regularly serve individuals that are experiencing very intense symptoms of their mental health and are often agitated, escalated and in situations of distress while they are attempting to stabilize their symptomology. This often results in behaviors that cause damage to our property. This might be destruction of property as a result of violence or damage because of symptoms of their illness. Some examples of the day-to-day things we encounter are things such as someone stuffed almost a whole roll of paper towels down the toilet because they were experiencing delusions about the toilet or an individual tore apart the fabric on their mattress because they were paranoid there was a listening device implanted in it. We have had 3 large, expensive windows broken out this year by individuals that were escalated but didn't want to hurt anyone else so they

punched out a glass window before we could intervene. All of these scenarios are part of our day-to-day experiences while we attempt to help individuals stabilize the symptoms of their mental health but they also cost a significant amount of money to repair and replace, particularly with inflation costs. We are as creative as we can get with repairs. We have had painting parties instead of hiring painters, we have sought out donations of supplies needed, I have plunged and snaked more toilets than the average person and we have all worked together to learn how to do as much maintenance as we can in the most creative and inexpensive ways possible. Even with those solutions, we have had approximately $20,000 in repair expenses at the crisis unit so far this year. This expense is just related to the crisis unit, our other programs, both in Fargo and Bismarck all experience the same concerns with maintenance, destruction of property, and increased food and supply costs due to the intense inflation the nation has experienced.

Those of us who work in this field have a passion for what we do. We believe there is hope, we believe in recovery, and we believe everyone deserves the opportunity to not only survive but to thrive within their life. Programs such as ours provide stabilization, a solid base for recovery and we give support and hope to those that need it most in their most dire times. However, in order to continue to provide these essential services, today we are asking for and needing your support towards the funding increases in the North Dakota DHHS budget. Without these funding increases to counteract the intense inflation levels and workforce concerns we have all faced, programs such as ours will not be able to continue to provide the essential services we do to our most vulnerable populations which will begin to impact communities as a whole in many concerning ways.

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/27/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:30 p.m. Vice Chairman Stemen called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Long Term Care
- Heartview Foundation
- Tobacco Free North Dakota
- Dakota Boys and Girls Ranch
- Fraser Stepping Stones Resource Center
- Designer Genes

2:31 p.m. Nikki Wegner, President, North Dakota Long Term Care Association, testified in favor of HB 1012 and submitted testimony #31883 and continued with previous testimony #31470, #31471, #31469.

2:58 p.m. Kiara Tuchscherer, Administrator, Good Samaritan Society, Fargo, ND, testified in favor of HB 1012 and submitted testimony # 31333.

3:01 p.m. Kurt Snyder, Chief Executive Officer, Heartview Foundation, testified in favor of HB 1012 and submitted testimony #31928.

3:17 p.m. Heather Austin, Executive Director, Tobacco Free North Dakota, testified in favor of HB 1012 and submitted testimony #31618, # 31938.

3:28 p.m. Tim Gienger, Senior Director of Residential Partnerships, Dakota Boys and Girls Ranch, took a neutral stance on HB 1012 and submitted testimony #31318.

3:53 p.m. Bruce Murry, Lobbyist, Fraser, Ltd, Fargo, ND, testified in favor of HB 1012 and Submitted testimony #31840.

3:58 p.m. Roxane Romanick, Organization Representative, Designer Genes of North Dakota, testified in favor of HB 1012and submitted testimony #31651.

4:04 p.m. Dave Marion, Business Development Director, Prairie Recovery Center, testified in favor of HB 1012 and submitted testimony #31571.

Katie Jo Armbrust, Grand Forks Housing Authority testified in favor of HB 1012 and submitted testimony #31861.

Bruce Murry, Lobbyist, Elevate Nursing, LLC, testified verbally in favor of HB 1012.

.

Additional written testimony:

Tina Kostad, submitted testimony in favor HB 1012, #31763.

4:16 p.m. Vice Chairman Stemen closed the meeting.

Jan Kamphuis, Committee Clerk

Neutral Testimony for

HB 1012

January 27, 2025

Greetings Chairman Nelson and Members of the committee,

My name is Tim Gienger, Senior Director of Residential Partnerships at Dakota Boys and Girls Ranch. Dakota Boys and Girls Ranch provides two levels of residential treatment to kids from all over the great state of North Dakota, Psychiatric Residential Treatment Facilities (PRTF) and Qualified Residential Treatment Facilities (QRTP).

Some of my testimony today, provided on the heels of the testimony you heard from the Department of Human Services over the last two weeks, is in support of what the department reported. And, some of it will bring to light the impact these policies, created with the money appropriated, have had on North Dakota children and families.

Psychiatric Residential Treatment Facilities provide a medical level of care for children who are suffering from psychiatric issues, most often brought on by horrendous trauma. These children may be living with bio parents, adoptive or foster parents, or family members. The vast majority of children served by Ranch PRTFs in Minot, Fargo, and Bismarck, are not in public custody or wards of the state but are from families privately asking for medical care. These are kids from your local communities—children who are hurting and who often draw heavily on the resources of local law enforcement, hospitals, schools, and human service agencies.

Dakota Boys and Girls Ranch also operates a Qualified Residential Treatment Program (QRTP) on its Minot campus. QRTP is a federally defined level of foster care and operates similarly to our PRTF's. We are currently licensed for 12 beds.

As you can imagine, these kids have high needs, which comes at a cost. We, and other North Dakota PRTF's are committed to providing high quality care and treatment to these children, but the financial cost is not sustainable. Until now, the Dakota Boys and Girls Ranch Foundation has been able to underwrite the best-in-class care and treatment these children need. We budget for a $2.5 million shortfall each year and rely heavily on the foundation to make up the difference. That means that in a good year, the foundation grants $2.5 million to the Ranch to care for North Dakota kids. Last year, the foundation granted $7.5 million to the Ranch. While our foundation has been strong, we have depleted the unrestricted funds and another year like that is not sustainable. Last year, we cared for 135 North Dakota children. What will happen to those children if we cannot provide them with the mental and behavioral health care they desperately need?

Neutral Testimony for

HB 1012

Rate Setting

The PRTF rate setting process was developed 30 years ago, a time when the economy was less volatile, children had fewer challenges, and we didn't have electronic health records, HIPPA regulations, and cybersecurity issues to manage. Accreditation, audits, billing, and the cost report have all become more complicated, requiring significant increases in staffing to meet regulations and best practices. These additional requirements, as well as erratic costs, specifically labor costs, put the burden on private providers to underwrite the increased costs of caring for the state's most vulnerable children and to manage cash flow until the new rates are put into place at least 16 months after the service is provided.

At the same time, North Dakota children come into PRTF's with much more challenging behaviors. In the last ten years, we have closed the state hospital, reduced QRTP and Life Skills and Transition Center beds, and refrained from placing kids in out-of-state facilities. The children with the most challenging behaviors have had to go somewhere, and private providers like the Ranch have picked up the slack. To do this, and keep our children and staff safe, we have had to increase staffing levels, including professional staff. We are also providing increased training, both to meet updated licensure requirements and to ensure our staff are prepared to meet the needs of the kids who come through our doors.

We had several meetings with Medical Services to address these issues and went through the administrative rules process with minimal success. A Senate Bill is being introduced this session to address the language written in the Century Code and to align this process with current practice while staying within federal Medicaid guidelines.

Parents accessing Medicaid

Some of the families we work with need to access Medicaid to cover the cost of their child's treatment. Parents are frustrated with Medical Services' new automated and centralized system. They tell us they want a consistent contact who can answer some of their ongoing questions regarding Medicaid. When we call to check coverages and claims, we are running into the same issues. Every time we call, we talk to a different person, and we rarely find someone who understands residential treatment coverage so get bounced around. We used to be assigned a point person who was responsive and able to answer our questions in a timely manner.

Behavioral Health Navigator/One Assessment

You heard Pam Sagness' testimony last week regarding the Behavioral Health Navigators. On July 1, 2024, DHHS implemented the One Assessment process, making it mandatory for the behavioral health navigators to be involved in admitting kids into a PRTF. Prior to July 2024, families would contact us directly, we would help them gather the information and records they needed for the Universal application and submit the information to Maximus to determine if the PRTF level of care was appropriate. We used this process with thousands of kids over the years, and a child was rarely

denied Medicaid services after we determined them to be eligible. I believe we had a 10-year stretch with no denials, so it is safe to say we had an almost 100% success rate when we screened them.

In June of 2024, we had 48 kids in PRTF care, which put us at capacity. By August 2024, our census dropped to 35 and we have struggled to get above 40 since the implementation of the One Assessment process, which includes the requirement that all applications go through the behavioral health navigator.

Pam reported last week that the navigators helped 304 people from October 2023-December 2024. Since July 1, 2024, 499 families/custodians have contacted us. We have referred 214 of those to the navigators. During that time, 98 kids who would have been admitted into PRTF treatment were not admitted. Frustrated families report that their children were not admitted into care for a variety of reasons.

The creation of behavioral health navigator positions has caused an undue burden on children and families who are trying to seek services. The services they so desperately need are available, however overregulation by the department is creating unnecessary barriers that make it difficult for children and families to receive care.

Voluntary Treatment Program

Last biennium, $453,424 was appropriated for the voluntary treatment program (VTP). This year, the request is a little over $1.3 million, which is a step in the right direction. These VTP funds are vital for families trying to access the QRTP level of care for their children.

System of Care Grant

The Ranch received funds from the System of Care Grant, which has allowed us to create a pilot project for aftercare services for children in our Bismarck PRTF program. Aftercare serves families for six months after their child is discharged from our treatment program, ensuring they are receiving the services they need to be successful in their home and at school. We ask that aftercare services be included in the PRTF rate so all children who receive PRTF treatment have the support they need to be successful.

Solutions

Rate strategy was identified in Sara Aker's testimony for medical services. It would be beneficial for us to work with medical services to find a rate structure that fits with today's PRTF operations.

The Ranch receives more family and referral contacts than the navigators and is able to provide navigation services that meet families' technology, literacy, and transportation needs. Perhaps funds should be appropriated to the Ranch for that service, which would allow DHHS to provide navigation services for a different population. Removing the requirement to go through DHHS' navigators would remove unnecessary government interference, thereby ensuring that children and families are connected to the right service at the right time and without undue delays. Families trying to access

services for their children are in crisis. They need help navigating the process so they can access services for their children in a timely manner.

I am not suggesting we provide services for children who don't need them, but that we remove barriers and unnecessary hoops for families whose children need the PRTF level of care. Families are being required to use technology they don't have. They are being asked to understand things that are not possible for them to understand, especially when they are in a state of crisis. They are being asked to access services that aren't available to them before they can be approved for the services they need. They are being asked to resubmit information because they used an outdated form, even though the information requested is the same. They are being asked to call during hours that don't work for them, and to recall information that is unrecallable and unnecessary.

These are just a few of the barriers families have had to endure. They get frustrated and often give up. Since July 1 of 2024, the State of North Dakota has made it harder for families to get their children the help they need. We owe it to them to do better. I recommend that the department revert to its previous way of admitting kids into the PRTF level of care, thereby removing the state-run barriers that make it difficult to impossible for children to access care.

HB 1012: Testimony on Solutions for Financial Challenges in Basic Care

House Appropriations-Human Resources Division

January 27, 2025

Good Afternoon Chairman Nelson and Members of the House Appropriations, Human Resource Division,

My name is Kiara Tuchscherer, and I'm the Administrator for the Good Samaritan Society in Fargo, where we've been providing care to residents aged 55 and older for over 17 years. We are a one-level Basic Care and Assisted Living facility with 72 apartments. As the Basic Care Director at Large for the ND Long Term Care Association and someone who works closely with residents, I thank you for the opportunity to speak to you today in support of HB 1012 with three critical amendments for basic care funding.

Let me share a couple of stories; I have changed these resident names in my testimonial. "John," a retired teacher, has been with us for four years. He's an active participant in our book club and exercise programs. John's experience shows the value of congregate care, he's able to stay engaged both mentally and physically in a community setting, which helps him thrive.

"Betty," who is 82 and has dementia, came to us after struggling in a more isolated living situation. Now, she has the social support she needs to stay safe and connected, and her family is grateful for the care and dignity we provide her. Expanding the **3% operating rate across all components, excluding property costs**, would provide about $1.12 million in financial support over the biennium. This would allow us to expand programs that keep residents like John and Betty engaged, active, and socially connected.

The **$5 per day add-on** for Basic Care rates in 2026 and 2027 would offer another $2.68 million, ensuring we can continue to meet residents' needs. Additionally, the 1.5% in Governor's Armstrong's budget the proposed **4%** inflator for 2026 and **3%** for 2027 would help us keep up with rising costs, ensuring we can maintain and recruit quality staff.

We are in constant competition with other healthcare facilities for staff, and without these increases, it's challenging to attract and retain the dedicated caregivers who provide the compassionate care our residents deserve. Financial support is essential for maintaining the staff that makes a real difference in residents' lives and for continuing the high level of care we offer.

Residents choose Good Samaritan Society because they want more than just a place to live, they want a community where they can stay connected, safe, and engaged. These proposed amendments will help us continue providing that, ensuring we can offer the personalized care, stability, and dignity our residents need.

I urge the adoption of these amendments to ensure Basic Care continues to thrive and meet the needs of residents like John and Betty.

Thank you for your time today. I'd be happy to answer any questions.

Written Testimony on HB1012 relating to Substance Use Disorder Voucher (1-27-2025)

Chairman Nelson and members of the House Human Resources Committee, for the record my name is Dave Marion, and I have the great fortune of working for the Prairie Recovery Center, located in rural Raleigh, North Dakota. Prairie Recovery Center is a one of a kind, committed residential agency working with individuals seeking addiction and mental health services. PRC provides short-term one of a kind residential service in a rural environment for recovery with committed staff and therapists experienced in substance use, mental health and trauma informed work. We pride ourselves on not being a cookie cutter program and client centered.

We are in support of the full funding of the ND Substance Use Disorder Voucher Program and its amazing impact that it has on so many through ND that received treatment in a timely manner and not sit on waiting lists. The SUD Voucher Program has served as a safety net for those without health insurance or adequate resources to access addiction treatment in ND and has been lifesaving. Many of these individuals are referred to us by parents, parole and probation, regional human service center and physicians. Most of these individuals have experienced an overdose in their lives and are at extreme risk and are referred to by professionals that find a lack of services for those most extreme needs. Over 210 individuals have been helped since July 2023 at the Prairie Recovery Center from the SUD Voucher. The ND SUD Voucher is one the most important tools in serving the increasing need for North Dakotans who have a substance use disorder. The voucher provides not only the ability of patients to obtain critical services in a timely manner, but it provides provider choice so patients can stay close to home and families as well of the bottle neck of waiting lists in the past. In addition, the voucher serves as a resource to keep patients out of emergency rooms, hospital beds and revolving doors in jails, and courts and get the treatment they need to change their life and get the confidence to do great things.

It is imperative that we not create more hurdles or restrict individuals from getting great quality services, at whatever level that is in the continuum of care. The SUD Voucher was established and supported by the Dept of Health and Human Services to address barriers to treatment and increase the ability of people to access treatment and services for substance use disorders. With one of the goals being to allow the individual to choose a provider with objectives to increase the number of providers and service options and those options communicated to individuals. Another Goal being able to improve access to quality services with objectives of SUD providers to provide evidence-based services on an individual need, in addition to reduce financial barriers for individuals accessing needed services.

With the ongoing pandemic that compounded, high alcoholism rates, Opioid Crisis and Meth resurgence we respectfully ask your support of full request for the voucher. Though some may see a significant cost, the effect on less emergency room visits, revolving door jail and court visits has been impactful. For those of us who serve patients that want better and are committed to changing their path know that The SUD Voucher has and will continue save lives and Prairie Recovery Center is a committed and a proven provider to do so.

Respectfully,

Dave Marion

January 27, 2025
2:00pm CST
House Appropriations – Human Resources Division Committee for the 69th ND Legislative Assembly

Chairman Nelson, and members of the House Appropriations – Human Resources Division Committee hello, my name is Heather Austin, and I am the Executive Director for Tobacco Free North Dakota. The mission of Tobacco Free North Dakota is to improve and protect the public health of all North Dakotans by reducing the serious health and economic consequences of tobacco use, the state's number one cause of preventable disease and death. We work to facilitate coalitions and to promote policy discussions across North Dakota, along with providing education and resources that are used to help prevent kids from ever starting the dangerous addiction to tobacco and nicotine. Thank you so much for your time today.

I am here to encourage continued, sustainable, and sufficient funding for the State Tobacco Prevention and Control Program in HB 1012, the bill relating to Department of Health and Human Services Budget and its Tobacco Prevention and Control Program.

Since the tobacco control program, with reduced funding, was restructured under the Department of Health back in 2017, TFND, ND Local Public Health Units, health system partners, and other DHHS grantees, continue to collaborate to accomplish the goals outlined in our State Plan for Tobacco Prevention and Control. The program has dealt remarkably well with doing the same work, or in some cases even more work, with less resources and funds. We have made great strides in what we accomplish for our citizens. Today we encourage a continued advancement of funding to address targeted issues facing our citizens, such as were identified by this body in 2023 to address youth prevention engagement and pharmacological access in rural communities.

To support these efforts, TFND is taking a lead alongside several partners fulfilling work in our communities and schools educating and advocating for policy that would reduce e-cigarettes and vaping (ENDS) among our youth while also highlighting the dangers of these products. With the additional funding allocated to this effort in last biennium's budget, we have continued to address the "vaping epidemic" announced by the FDA in 2018. TFND launched a "Train the Trainer" program in addition to our regular webinar series for continuing prevention education and our online resource hub. Combining efforts to empower local experts we can exponentially affect needs across ND. We hope to continue these efforts in the next biennium because we know that there is still more work to be done to save the newest generation from the serious health and economic consequences of a lifelong addiction to tobacco.

Another initiative TFND launched recently was designed to help young people with an additional resource to fight nicotine addiction, is a partnership with Truth Initiative, a national advocacy organization, to bring the "This is Quitting" program in North Dakota. "This is Quitting" is a free, confidential, text to quit vaping program meant for youth and young adults aged 13-24. They simply text VAPEFREEND to 88709 and can enroll in 12 weeks of daily interactive, customized, text messages

meant to give them tips and support to quit vaping and tobacco products. TFND views sponsoring this program as an important tool to help our kids, along with the proposed continued funding our comprehensive prevention and cessation programming in North Dakota.

Again, I am encouraged to see funding for both youth prevention and cessation treatment in the recommended budget for this biennium. I hope this committee approves those recommendations and continues to look for further ways to advance good investments in tobacco prevention and control in our state. I would also encourage the committee not to allow the proposed cut to the TCPC media line item. Educating North Dakotans about the dangers of nicotine for all citizens is still vital to reducing overall use. It would be a shame to lose the momentum gained in this area over the past several years, as new products continue to come out at a lightning pace to entice new users.

I hope my time in front of you today highlights that there is much being done for tobacco prevention and cessation policy in North Dakota, but that there is still so much more to do, and I think our combined efforts and collaborations are so important to continue to support with our time, talent, and treasure. Just think of the health impacts and potential for lives saved any increase in funding could provide for our state.

Along with my testimony, you are also receiving a copy of our Resolution of Support for a fully Funded Tobacco Prevention and Control Program for ND. The following organizations/entities signed TFND's resolution. (Attached): Bismarck Tobacco Free Coalition, Blue Zones Projects Grand Forks, Cavalier County Commission, C+K Counseling, Grand Forks Tobacco Free Coalition, Legacy High Stop the Cloud, Nelson-Griggs Board of Health, North Dakota Medical Association, Upper Missouri District Health Unit, Walsh County Board of Health, Walsh County Tobacco Free Coalition, Walsh County District Health, Walsh County Substance Use Prevention Coalition, and Western Plains Board of Health.

Again, thank you for this time in front of you, Chairman Nelson, and the Committee. It is very appreciated. Please vote Do Pass with continued funding for Tobacco Prevention and Control included in HB 1012.

May I take any questions?

Heather Austin

HB 1012
House Appropriations – Human Resources Division
Monday, January 20, 2025
Representative Jon Nelson, Chair

Chairman Nelson and Members of the House Appropriations – Human Resources Division:

My name is Roxane Romanick and I'm writing as the representative for Designer Genes of ND, Inc. Designer Genes' membership represents individuals with Down syndrome that either live in our state or are represented by family members in North Dakota. Designer Genes' mission is to strengthen opportunities for individuals with Down syndrome and those who support them to earn, learn, and belong.

We estimate that there are about 600 individuals with Down syndrome live in North Dakota and a majority of those individuals are screened to the Individuals with Intellectual Disabilities/Developmental Disabilities (IID/DD) 1915c Medicaid Waiver. One thing that is important to note is that our families who have individuals eligible for our Medicaid waivers depend on the service options within the waivers, but also depend on having access to State Plan Medicaid for their loved ones. Quality waiver service and State Plan options are one of our advocacy priorities as individuals with Down syndrome and their families are able to achieve quality lives in their communities with the formal supports of the Medicaid waivers and State Plan Medicaid.

Cross Disability Advisory Council and Waiver (Reference – Sarah Aker's Medical Services detail): First off, I'd like to thank you for your work and investment in the Cross Disability Advisory Council and continuing work towards a Cross-Disability 1915c Medicaid Waiver for children who fall through the eligibility cracks of our current waiver system. Designer Genes has been talking about this issue for many sessions because we have families whose children with Down syndrome fall off of waiver services when they turn 3. We appreciate the investment in the study by Alvarez and Marsal in the 2021-2022 interim and their continued work with the Cross Disability Advisory Council during the 2023 – 2024 interim. We support the Governor's budget request for continued work on the Cross Disability Waiver.

Special Health Services (Reference – Kim Mertz's Healthy and Safe Communities detail): We are in support of continued funding for Family Voices of North Dakota. Their partnership is invaluable when

supporting and educating our families. We partner with them on Project Carson, which seeks to support families across the state who receive a prenatal diagnosis. This is especially important for our organization as one of our priorities is to support all new diagnoses of Down syndrome which now are primarily happening pre-birth. We also partner with the Special Health Services Section to place new baby support packages into birthing hospitals across North Dakota. There is no state funding involved with this collaboration, but we appreciate the ability to work with the Newborn Screening team to make sure families have needed information when they find out their baby will have Down syndrome.

Autism Waiver (Reference Sarah Aker's Medical Services detail): While most of our families depend on the IID/DD Medicaid Waiver, never less we are concerned about the loss of $9 million dollars in the Autism Waiver line item. Any loss of funding for individuals with disabilities is concerning and also leaves a footprint for future funding decisions across disability populations. You questioned this decrease with the Department last week and it appears that it's due to a lack of providers and utilization. This is concerning, because we know that we have autistic individuals who struggle to remain in their communities and being institutionalized. We have students who are experiencing seclusion, restraint, expulsion and suspension in schools. We have need and there are reported to be 65 children on the wait list. Also, HB 1067 extends the age limit to 21 years of age for the Autism Waiver if passed. It is important to note that if a child can't use a waiver service option, then they are high risk for falling off the waiver and then also losing State Plan Medicaid benefits. The access to Applied Behavioral Analysis services is only through State Plan Medicaid benefits so falling off a Medicaid Waiver is high stakes for many families. North Dakota does have an option for families of children with disabilities to buy-in to State Plan Medicaid, but it is highly complicated to access and presently only 3 families are eligible for this option. This has been in place since 2007.

I'm afraid that you will hear from me again with additional comments on other sections of HB 1012, but until then I would answer any questions.

To whom it may concern,

My name is Tina Kostad and I am the mother of 3 adult children, 2 grandsons and a 10-year-old little boy who has FASD. At this point we do not know if he'll ever live on his own and although the chances are very slim, we will continue working as hard as we can to make his world the best it can be.

When Jaxson came into our lives, we didn't know how exposure would affect him and we did not care. We saw a beautiful little boy who needed love, and we so needed him. He went through a few long weeks of miserable withdrawals. It was heartbreaking to watch, but we had no idea the what the future held for him or us.

2 ½ years later, he was with us since birth, his tummy mom had become sober and asked us to officially adopt him. It was a wonderful day for everyone and a month after his 3rd birthday he became a Kostad! And the same week we finalized the sale of our home to pay for his adoption and expenses. It was meant to be.

Jaxson has struggled in so many areas. We have had his pediatrician voice that he has the most extreme ADHD he's ever seen. He has multiple diagnosis's including FASD and Autism level 2. He has a sleep disorder, sensory disorder, lacks impulse control and learning disability. When his meds are working the true little boy can be seen. He's got so much love and kindness. But unfortunately, he metabolizes them very quickly making his daily life a huge struggle.

I have tried to hold down even a part time job from home but unfortunately, I end up having to decide to quit to provide for Jaxson. We tried school last year and after 3 days we realized this would not be a possibility due to his needs therefore I've home-schooled him for the past 4years. You can imagine the financial drain that is on a family with a child who has special needs. And once again we may have to choose to lose the home, we purchased 4 years ago to make sure we can provide for his needs and appointments.

Our whole life is completely different. We've attended many classes to learn how to parent a child with a disability like this, we plan our whole day on what will help Jaxson best succeed. Such as we wake up at 5, sometimes we don't sleep because Jaxson can't sleep and needs to be closely watched all night long and day. We don't go to many public events

that will overwhelm him. This includes how we do our normal shopping. We don't spend much time with friends and family as it's hard for others to understand him. Going out for anything after 5 is almost never done because this is the time his meds wear off and he's unable to handle his surroundings.

May I add the most important thing that has happened since this beautiful boy came into our lives? He has taught us to be better people. We never judge a child who is struggling in a store or in public as we know they are doing their best. We know all about invisible disabilities. We know how to parent in more than one way. We know unconditional love. Life would never be this great without him in our lives and we thank every day, even the hardest days, that we were trusted to make his life better. He's given us more than we can ever give him.

His tummy mom is now pregnant with her 4th child and after seeing that drinking while pregnant has affected her last 2 children, especially Jaxson, she has been alcohol free this pregnancy. She hurts when she sees how her 2 little boys struggle but is so proud that she has overcome and will finally be able to give this baby a life without FASD. She NEVER wanted any of her children to suffer like this. She was uneducated. She is selfless and cared more about her children than the pain of letting others raise them. She has so much love and we are so proud of her.

Education is crucial for the future of our country. We need to give future moms the knowledge of the possible effects of any alcohol consumption during pregnancy. They deserve it, the children deserve it, as does everyone. FASD effects EVERYONE. We need to do better for our children, our state, and our country. It does start with one person. We can be that person.

I could go on and on about how FASD effects our son, our family, you, etc. but I've taken up so much of your time already. I appreciate you learning about our wonderful boy and how you can help out families like ours. And just like Jaxson, be the change for the better.

Sincerely,

Tina L. Kostad

1-27-25

SB 1012 (2025 LEGISLATIVE ASSEMBLY)
HUMAN RESOURCES DIVISION
HOUSE APPROPRIATIONS COMMITTEE
HONORABLE JON NELSON, CHAIRMAN
JANUARY 27, 2025
TESTIMONY OF BRUCE MURRY FOR FRASER, LTD

Good Afternoon, Chairman Nelson and members of the Human Resources Division of the House Appropriations Committee. I am Bruce Murry, a registered lobbyist for Fraser, Ltd. (Fraser) of Fargo, North Dakota. Fraser supports children, youth, and adults on their life's journey towards independence through four main programs: independent living, transitional youth services, mental health, and childcare.

Fraser's Stepping Stones Resource Center serves young adults (18-26) at risk of homelessness and other crises. We weave food, clothing, winter shelter, case management, employment supports, and onsite mental health professional visits into a unique center using the Transition to Independence Process. Our evidence-based process shares common features with the State's much-welcomed Certified Community Behavioral Health Centers. We often serve as a destination for police safety interventions, mental health treatment discharges, and emergency stabilization while awaiting other services.

We ask you to amend HB 1012 to renew funding for this unique program at $300,000 ($150,000 per year) on an ongoing basis. We will continue multiplying your investment to serve hundreds of threatened young adults from around the state. Private donations fund the majority of the Stepping Stones Resource Center's operations. The State's commitment reassures private donors that the program is broadly supported.

Our Valley Hope Counseling Services increase Fraser's ability to provide services to people with behavioral health needs with much quicker access to

professional mental health services. We appreciate this bill's increased access to behavioral telehealth services and urge you and the Department to continue that expansion. We also appreciate incentives for developing the workforce for professional behavioral health services in this and other bills.

Fraser supports the legislative platform of the North Dakota Association of Community Providers. North Dakota's efforts to ensure citizens with intellectual and developmental disabilities receive appropriate services in the least restrictive environment are extensive. The funding you've provided the Department and their expertise helps us build and retain our limited workforce. We also recognize the Life Skills and Transition Center's role as a safety net for the people we serve. Relying upon LSTC, providers can take the organizational risk to serve people with the highest needs in their communities.

In addition, Fraser wishes to thank the Legislative Assembly for its investments in developing the childcare workforce. Childcare supports the workforce for all of our other programs. Fraser's Child Care Center also struggles to find adequate staffing, and we appreciate the assistance to child care programs within the HB 1012 budget.

Thank you for the chance to address you today. I am happy to answer any of your questions now or as you deliberate. I will find the best expert at Fraser to answer any questions that I cannot.

Testimony in Support of HB 1012
House Appropriations – Human Resources Division

January 27th, 2025

Chairman Nelson and members of the committee,

My name is Katie Jo Armbrust and I work for the Grand Forks Housing Authority. Our organization provides housing assistance and services for more than 2,000 households in the Grand Forks area, primarily for those earning extremely low income.

This testimony reflects our support for the $260,000 in funding for 2025-2027 included in HB 1012 under Northeast Clinic's budget for operations of The Nest, our recently opened low-barrier emergency shelter for adult individuals. This program developed in 2024 to meet a community-wide need; The City recognized withdrawal management was not being utilized for its original purpose, for those in need of supervision while going through withdrawal, so much as a place being sought for shelter by people who were unable to access alternate resources in the community.

The Nest is a 24/7 emergency shelter that serves people who may be under the influence of substances as well as those who may be struggling with their mental health, unlike other shelters within the region. Staff work incredibly closely with partners such as the Grand Forks Police Department, Northeast, Altru Health System, Spectra Health, and other homeless providers. The Nest has received financial support from City of Grand Forks, County of Grand Forks, the State, and Altru Health System.

Since opening on October 2nd, 2024, we have supported 87 individuals in our 16-bed facility. Of the 114 days in operations, we have been at maximum capacity most of those days and have been over-capacity 29 of those days. As we work with a larger group to navigate a comprehensive response for people experiencing homelessness across the state, we appreciate the support from Northeast and the incredible collaboration to shelter those we mutually serve from the region.

Respectfully submitted,

Katie Jo Armbrust

About NDLTCA

About the North Dakota Long Term Care Association

The North Dakota Long Term Care Association (NDLTCA) is a non-profit trade association representing long term care facilities in North Dakota. Membership includes nursing facilities, basic care facilities, and assisted living facilities. NDLTCA began operating in 1977 and currently represents 184 nursing, basic care, and assisted living facilities. NDLTCA works closely with State and Federal government agencies along with other professional associations in its efforts to advocate on behalf of long term care and promote sound legislative and regulatory policies. NDLTCA is an affiliate of the American Health Care Association (AHCA) and the National Centers for Assisted Living (NCAL). AHCA and NCAL, located in Washington, D.C., are the largest organizations of long term care facilities in the nation. NDLTCA is governed by a 13 member Board elected by the membership. Overall policy of the NDLTCA is the responsibility of the Board. NDLTCA is dedicated to serving our members who strive to maintain the highest quality of care for the elderly and disabled.

Mission Statement

The North Dakota Long Term Care Association is a professional association of long term care and community service providers who enhance the lives of people we serve thorough collaboration, education and advocacy.

Vision Statement

The North Dakota Long Term Care Association continues to be recognized as an innovative leader in the continuum of care which has a positive impact on the quality of life of those we serve.

Additional information was gathered from the US Census Bureau - 2020, Nursing Facility cost reports, Pinnacle Quality Insight and CMS/Medicare.com.

Introduction

Greetings to All

North Dakota Long Term Care Association

As we embark on another year, we are pleased to introduce our new leadership. Nikki Wegner serves as the President, and Amy Kreidt is our Chair. Under their guidance, the North Dakota Long Term Care Association (NDLTCA) continues its mission to support our members and enhance the quality of care provided across our state.

Reflecting on the past year, we celebrate several notable successes, thanks in part to the support from the Legislative General Assembly. The Nursing Facility Incentive Program has played a pivotal role in driving positive changes and improving quality in our facilities. Additionally, the Fair Rental Value system for nursing homes has enabled many facilities to make much-needed updates and improvements to their buildings, further enhancing the care environment for residents.

We'd also like to extend a special thanks to Eide Bailly and LeeAnn Thiel for providing data that was instrumental in creating this publication.

However, the last couple of years has also brought its share of challenges. The finalization of the minimum staffing rule, ongoing workforce shortages, and reimbursement issues in basic care remain significant concerns. Despite these hurdles, our providers persevere, demonstrating resilience and commitment to the communities they serve.

We look forward to continued collaboration with legislators this session to address these challenges. By working together, we aim to support nursing homes, basic care, and assisted living providers, ensuring they can maintain, and improve the quality of care for North Dakota's aging population.

Thank you for your dedication and support as we strive to make a difference in long term care.

Warm regards,

Nikki Wegner
President

Amy Kreidt
Chair

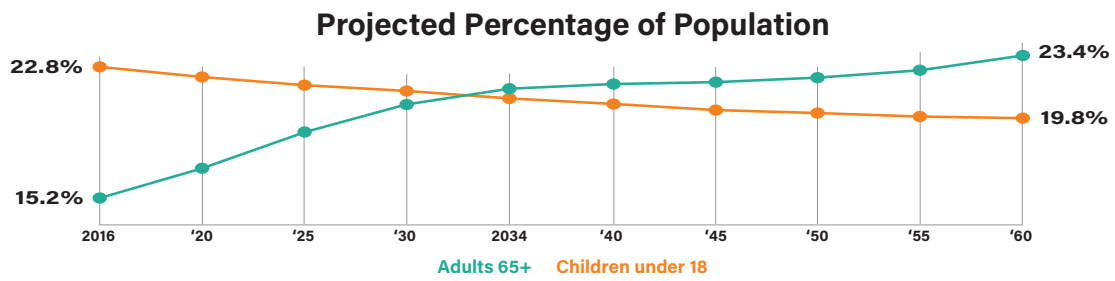
Long Term Care Facts

Aging In America

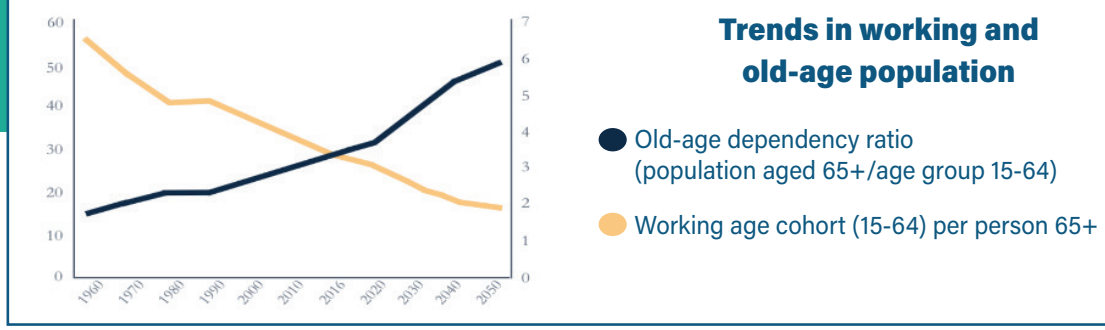
The aging of America, together with extended life expectancy, will result in unprecedented demand for long term care.

Long term care services are provided in a variety of settings, including nursing facilities, basic care, assisted living, swing beds, and home and community based settings.

The nation as a whole grew as the oldest Baby Boomers became seniors. For the first time in the US history older adults requiring long term care will outpace the number of available workforce participants.



17.1%
of North Dakota's population is made up of individuals 65+



1 out of 2 North Dakotans
will need long term care sometime during their lives

AN AGING NATION

For the first time in U.S. history, older adults are projected to outnumber children in 2034

The Future Workforce

Long Term Care Facts

Caregivers of North Dakota

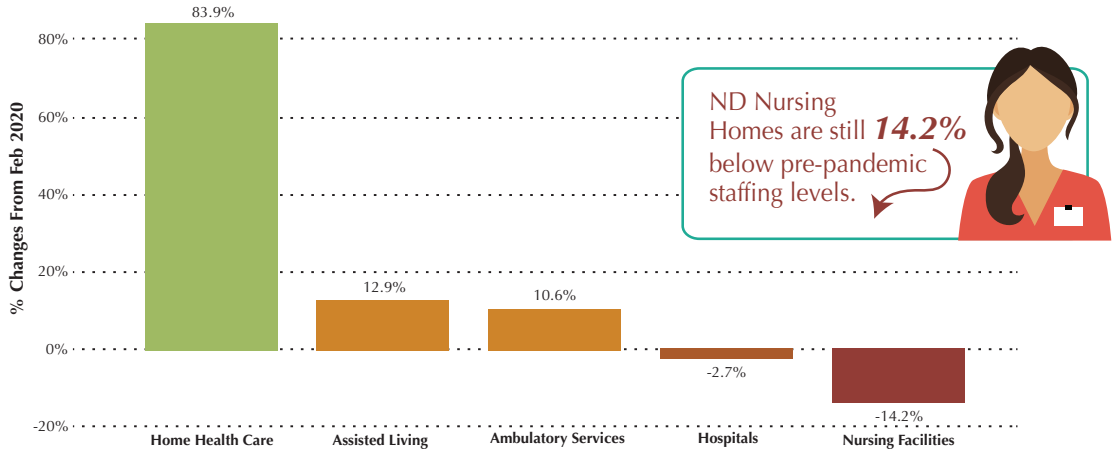
- Workforce is the number one issue facing long term care facilities.
- RN turnover is *34%* vs US RN turnover of 46%.
- **CNA turnover** in nursing facilities is *70%*.
- The oldest employee in long term care is **93 years old** in ND.

- ND nursing facilities use an average *13%* contract nursing vs. *8%* nationwide.
- ND had an increase of *14%* in contract nursing costs from 2022-2023 compared to *176%* from 2021-2022.
- Almost one-third *(26%)* of caregivers in ND long term care are age 50 or older.
- *13%* of the ND long term care workforce is at or over the age of 60.

Who Needs Care?

There are 1,290,000 people living in a nursing home in the US today, according to the 2020 US Census. This number is expected to almost double by 2050.

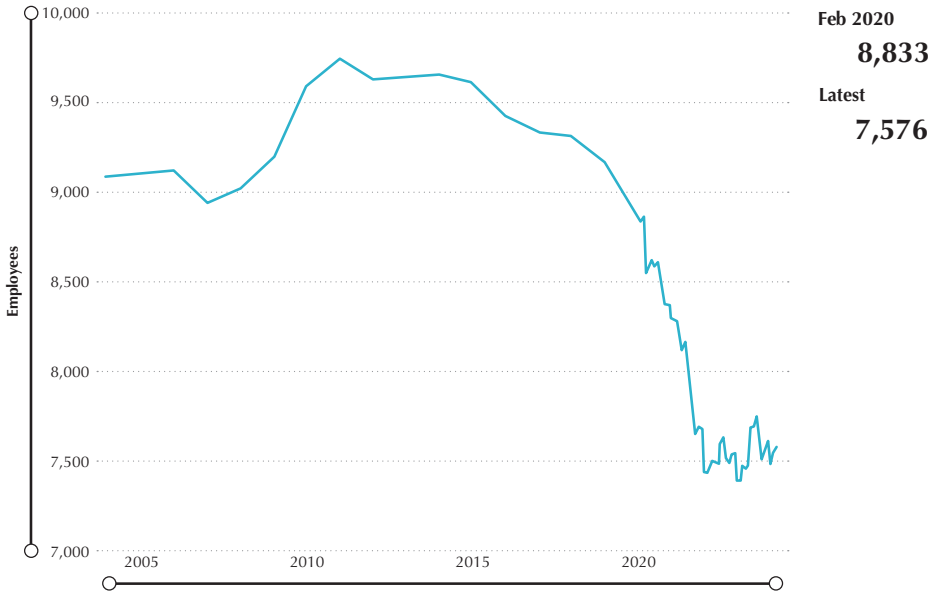
The need for personal assistance with everyday activities increases with age.



Risk factors for nursing home placement includes: Advanced age, female gender, living alone, cognitive impairment, dependence on assistance with activities of daily living, and behavioral changes.

The most common reasons given for nursing home placement are the need for assistance with daily care all day long, complex medical needs, and the need for constant supervision.

North Dakota nursing homes are caring for an older population, with the average age being 82 years old, compared nationally to 79 years old.



Workforce
Challenges and Solutions

Statewide Staffing Shortages

Workers Needed:

1,257 nursing home workers are required in ND to return to pre-pandemic levels.

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wages. NAICS Industries 623, 6231

- North Dakota Trends: Urban nursing homes show better staffing recovery than rural facilities, where competition for limited local workers is a significant challenge.

Workforce

Strategies to Address Staffing Shortages

- Reducing reliance on contract staff.
- Competitive sign-on bonuses and wage increases.
- Foreign nurse recruitment.
- Recruiting from underemployed U.S. regions, offering relocation assistance and housing support.
- Workforce development initiatives:
  - Partnerships with schools for on-the-job training, virtual learning, and apprenticeships.
  - A state database connecting students with local long term care positions to build community loyalty.

Ongoing Challenges

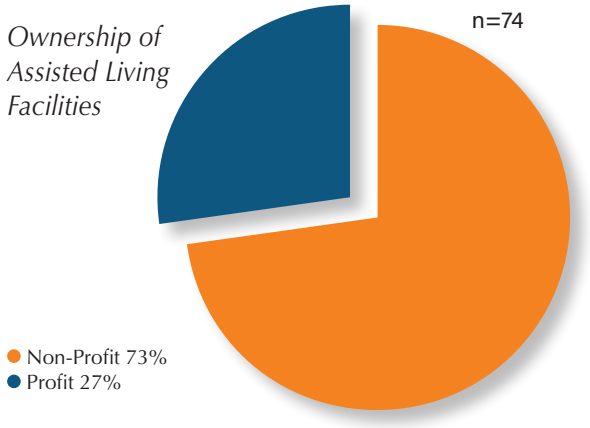
- Facilities continue to rely on temporary contract staff while navigating logistical, financial, and cultural barriers.
- Long-term solutions require sustained investment in workforce development and innovative recruitment strategies.

Commitment to Quality Care

Despite workforce challenges, long term care facilities in North Dakota and across the nation remain dedicated to providing high-quality care to residents.

Assisted Living Facts

ASSISTED LIVING AT A GLANCE

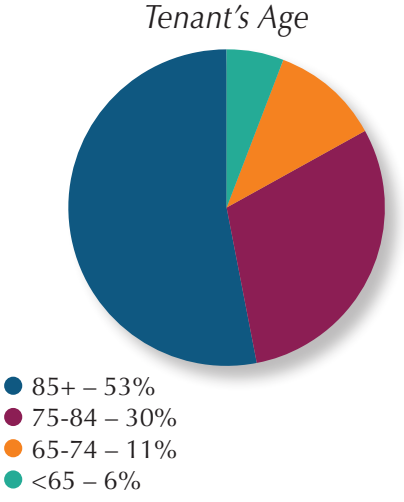


74 licensed assisted living facilities

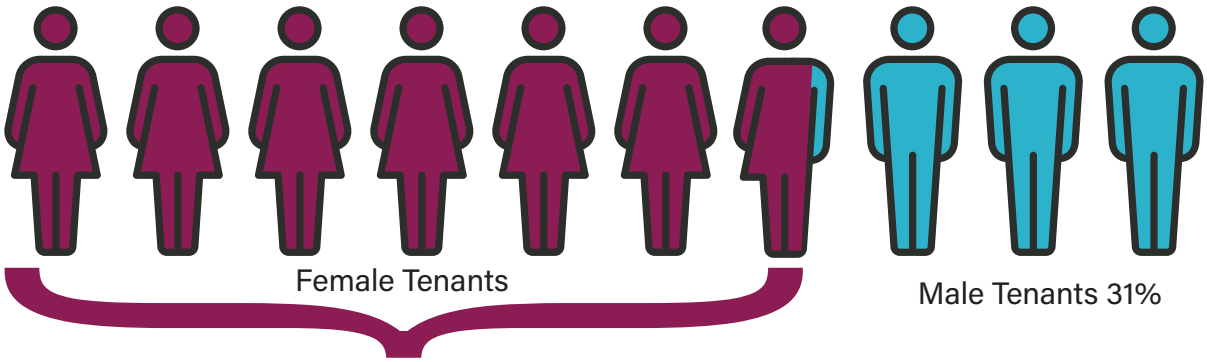
3,020 licensed units

2024 average occupancy was **79%**

n=19



Ownership of Assisted Living Facilities



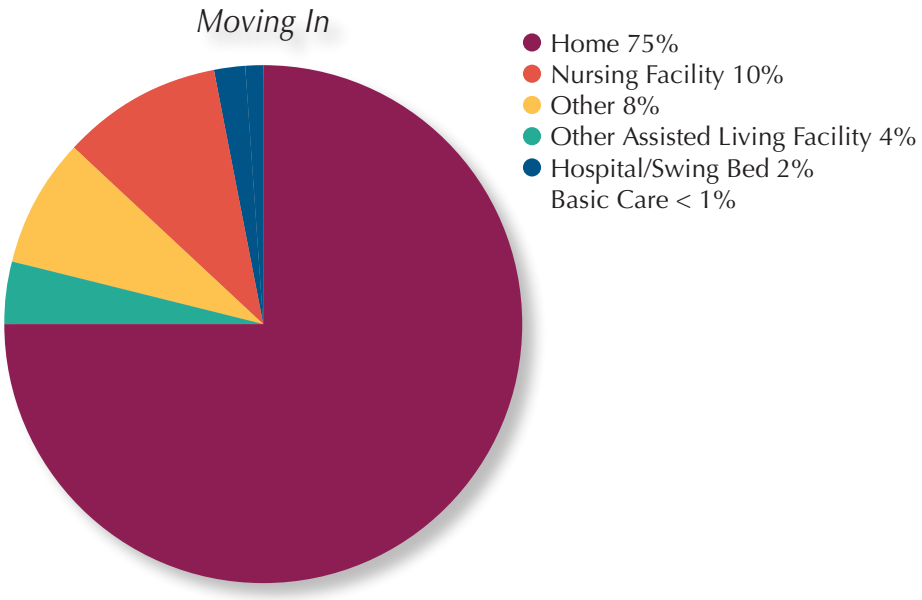
Assisted Living Facts

- An assisted living facility is a congregate residential setting with private apartments and contracted services.
- A la carte services are contracted based upon an agreed upon service plan.
- A typical rental package includes meals, housekeeping, activities, transportation, and laundry.
- Facilities provide a full range of services from bathing to medication management to hospice care.
- Assistance with instrumental activities of daily living (IADL*), personal care, falls, isolation, depression, and the need for supervision are the top issues precipitating the desire to move into an assisted living facility.
- Current tenants in ND range in age from 53 to 110 with the average age being 86.

Tenant's Age

Gender of Assisted Living Tenants

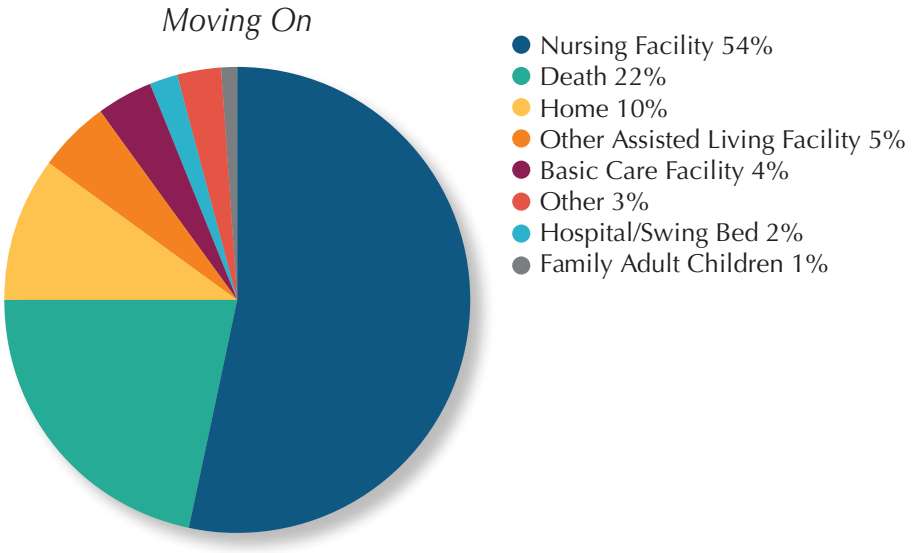
69% of tenants in North Dakota ASSISTED LIVING are female.



** Instrumental activities of Daily Living include: using the phone, shopping, meal preparation, managing medication, cleaning, transportation, managing money, caring for pets.*

Tenants - Moving In and Out

When individuals move into an assisted living facility, ***where do they come from?***



Most individuals were living in their own home prior to moving into an assisted living facility. The top four reasons for assisted living move-in:

1) Assistance with daily care
2) Needs assistance with IADLs
3) Falls
4) Social isolation/depression

When individuals move out of an assisted living facility, ***where do they go?***

Almost half of the individuals moving out of assisted living facilities are admitted to a skilled nursing facility. Advancing medical needs and changes in cognition necessitate the move to a higher level of care.

Assisted Living Facts

Care Needs of Assisted Living Tenants

39% of tenants have impaired mental status ranging from mild confusion or forgetfulness to a mental health diagnosis.

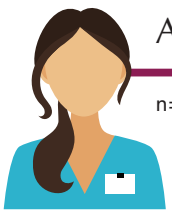
49% of tenants need full assistance with medication administration. These tenants on average take 10 over-the-counter and prescription medications daily.

94% of tenants are fully independent in eating, 97% independent with transferring, 95% with toileting, and 65% with dressing.

66% of tenants periodically use the assistance of a walker or cane.

38% of tenants need some assistance with bathing.

Assisted Living WORKFORCE



- Top issues impacting assisted living facilities are workforce, occupancy, and financial viability.
- As of August 1, 2024, 19 assisted living facilities reported the average time a nurse is onsite is 12 hours per day.
- In 2024 the mid-point CNA wage is $21.03.

Economic Impact

"*Total impact is the sum of direct, indirect, and induced effects on the economy of the state. Sources: CDC/ NCHS, National Post-acute and Long Term Care Study (2020), State Licensure Website, IMPLAN Economic Impact Data and Software"

WORKFORCE	ECONOMIC ACTIVITY	TAX REVENUE

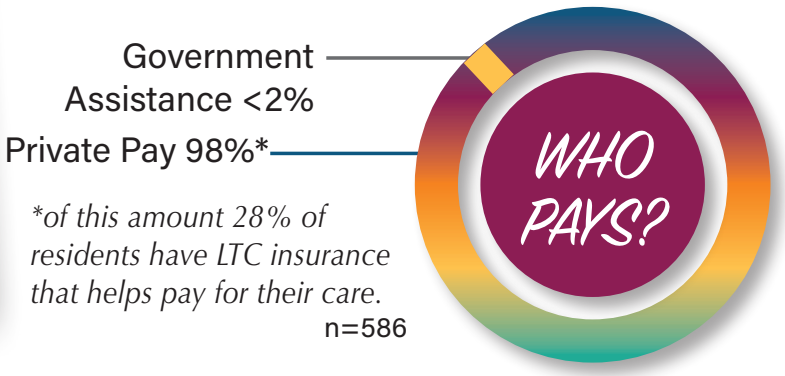
Assisted Living Facts

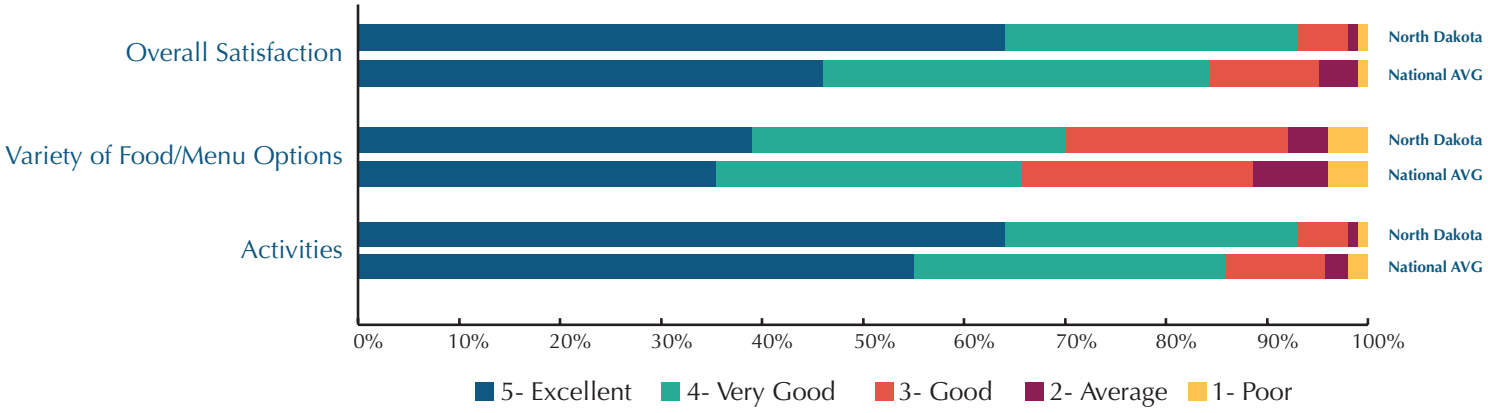
Assisted Living COST

In 2024, the average rent in an assisted living facility was $3,668 per month.



The cost for services in an assisted living facility varies dramatically, with an average of $2,248 per month.

The cost of assisted living is highly dependent on the size of the living space, the location in North Dakota, and the amenities in the rental and service package.



Who Pays the Bill in Assisted Living Facilities?

**of this amount 28% of residents have LTC insurance that helps pay for their care.*

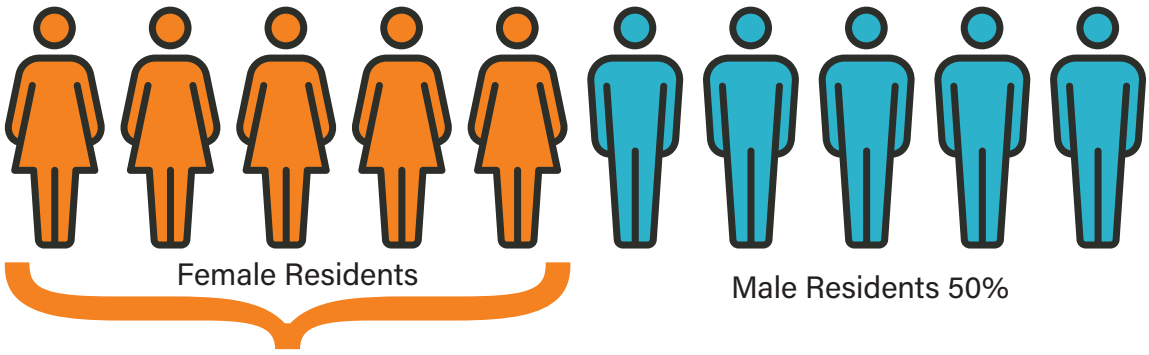
BASIC CARE AT A GLANCE

66 licensed basic care facilities

2,097 licensed units

2022 average occupancy was **72%**

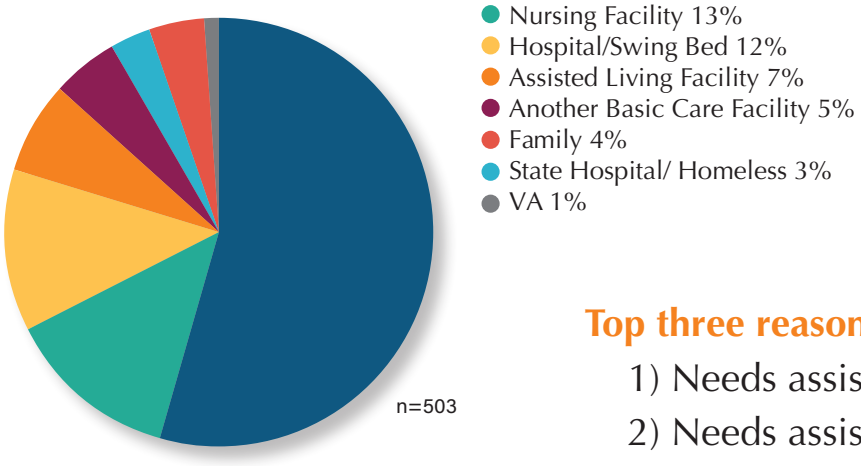
Ownership of Basic Care Facilities



Basic Care Facts

- A basic care facility is a congregate residential setting with private and semi-private rooms, providing 24-hour staffing.
- Congregate residential settings like basic care significantly reduce isolation, which is linked to improved mental and physical health outcomes for older adults. According to studies, social engagement in group living environments lowers the risk of depression by providing regular social interaction and a sense of community. Additionally, these settings help alleviate the healthcare workforce crisis by centralizing care delivery, thus reducing the need for in-home services and emergency hospital visits.*
- Current residents range in age from 27 to 104 years old, with the average age being 79.

Gender of Basic Care Residents



50% of residents in North Dakota BASIC CARE are female

Basic Care Facts

Basic Care COST

Seventy-four percent of residents living in basic care need assistance to pay for their care. After removing outliers, the average basic care assistance rate on July 1, 2023 is $158.69 per day. The average cost for providing care is $170.44 so for each resident served, the facility is losing almost $11.75 per resident per day.

All of our basic care facilities are operating at a loss.

Fewer than half of basic care facilities charge extra for private-pay residents. Among those that do, the average additional cost is $18 per day.

And 18% of basic care facilities charge an additional fee for private rooms, with an average cost of $15 per day.

Does LTC Insurance pay in Basic Care Facilities?

**8% of residents have LTC insurance that helps pay for their care.*

Continuing Care Community

Providing Comfort and Continuity of Care
THROUGHOUT THE SEASONS

Living in North Dakota comes with its unique challenges, especially when it comes to the harsh extremes of winter and summer. For older adults, navigating icy sidewalks, harsh winds, or sweltering heat can make getting out and about difficult—even hazardous. **Continuing Care Retirement Communities (CCRCs)** provide a solution by offering multiple levels of care under one roof, allowing seniors to stay connected, safe, and comfortable year-round.

Why Consumers Choose a Continuing Care Community

- **A Seamless Transition Between Care Levels**

  In CCRCs, spouses who require different levels of care can live in close proximity. For example, if one partner needs skilled nursing care while the other remains more independent in basic care or assisted living, they can continue to see each other daily by simply walking down the hall. This continuity helps maintain emotional bonds and reduces the stress associated with transitioning to different facilities.

- **Access to Comprehensive Services and Amenities**

  Tenants living in lower levels of care, such as basic care, assisted living, or independent living, can still access the many services and amenities available in the attached skilled nursing facilities or on-site clinics. These include:

  - Medical Services: Routine health check-ups and specialist consultations without having to leave the community.
  - Rehabilitation Therapy: Physical, occupational, or speech therapy conveniently accessible.
  - Social Activities: Shared community events, fitness classes, and social clubs that promote well-being and prevent isolation.

Continuing Care Community

More Than Just a Place to Live
A LIFESTYLE HUB

Enhanced Amenities for an Enriched Life

Many CCRCs are designed with vibrant, community-centered living in mind. These communities often feature:

- Restaurants and Cafes: On-site dining options allow residents to enjoy meals without braving the cold or heat.
- Movie Theaters: Entertainment options that are just a short walk away.
- Outdoor Spaces: Beautifully maintained gardens and walking paths for residents to enjoy when the weather permits.

Did You Know?

All of North Dakota's CCRCs include amenities like on-site clinics, therapy services, and/or indoor entertainment options, allowing residents to enjoy an active and fulfilling lifestyle year-round—without ever having to leave the comfort of their community if they so choose.

Safety and Convenience

With everything located within one community, residents can avoid the challenges of driving in severe weather conditions. Access to services, social activities, and essential care under one roof offers peace of mind for residents and families and ensures that residents can continue to enjoy their independence without sacrificing safety.

The Value of Continuity and Community

Continuing Care Retirement Communities in North Dakota provide more than just a living space—they offer peace of mind for seniors and their families, knowing that all levels of care are readily available. This means seniors can age in place, surrounded by friends, familiar faces, and the comforts of home, even as their care needs change.

Testimony of Kurt Snyder

Heartview Foundation

In Support of HB 1012

House Appropriations Committee- Human Resources Division

Jan. 27, 2025

Chair Nelson and members of the House Appropriations Committee- Human Resources Division:

My name is Kurt Snyder and I am the Chief Executive Officer of the Heartview Foundation. I would like to express Heartview Foundation's support of HB 1012, specifically for the Behavioral Health Division. The Heartview Foundation is a 501(c)3 nonprofit substance use treatment facility in North Dakota that was established in 1964. We currently have over 180 employees and offer a wide array of community-based services as well as 61 residential treatment beds. Our four locations in Bismarck-Mandan, Cando, and Dickinson, each have 16 beds or fewer and can serve individuals with Medicaid and Medicaid Expansion.

Mental health and substance abuse are growing issues, 17% of Americans had a substance use disorder in 2022. Heartview greatly benefits from the Behavioral Health Division's work in North Dakota, and we would like to focus our testimony on the major programs which benefit our clients.

SUD Voucher

In 2024, Heartview served 369 individuals with the SUD voucher program. Of those, 256 did not have other insurance and did not qualify for Medicaid or Medicaid Expansion. Heartview has several staff members who work directly with clients to ensure they are covered by private health insurance or apply for Medicaid or the SUD voucher. This program is vital to filling gaps of service and reducing barriers to care.

Opioid Settlement Funds

The Governor's recommendation includes $8 million to be distributed by the opioid settlement fund committee. During the last distribution period, Heartview received two grants. The first was for $426,000 to expand outpatient services in western North Dakota. We officially launched outpatient services and expanded access to medication for opioid use disorder this week on the third floor of St. Joe's Plaza in Dickinson. We have hired three additional addiction counselors and are now offering both residential and outpatient services in Dickinson. The second grant was for the Training Academy for Addiction Professionals (TAAP), which consists of Heartview and 15 other clinical training sites, received $613,000 to provide scholarships and a living wage for addiction counselor trainees. The goal of the grant was to fund 10 scholarships and 10 training positions. However, TAAP was able to fund 15

scholarships and 28 addiction counseling trainees. This provided a major boost to the pipeline and number of addiction counselors seeking and obtaining a license.

Medicaid/Medicaid Expansion Rates

Approximately 67% of Heartview patients in residential and day treatment (Heartview's highest levels of care) utilize Medicaid or Medicaid Expansion. Heartview is the largest substance abuse treatment center in North Dakota eligible to accept Medicaid and Medicaid Expansion and the program has been invaluable for us to serve the increased need in our state. No changes to Medicaid and Medicaid Expansion rates are currently included in this bill; Heartview supports a continuation of past rates for behavioral health needs.

Other Programs

With a growing addiction problem in North Dakota, it is imperative that access to addiction treatment is readily available. A strong state behavioral health division is invaluable to support the services available in North Dakota. Heartview also supports:

- Community Connect and Free Through Recovery- Peer support services can be an important piece of recovery
- Human Services Research Institute (HSRI)- Heartview supports HSRI and the Division of Behavioral Health's strategic plan, especially efforts to recruit and retain qualified behavioral health workforce.
- Certified Community Behavioral Health Clinics and the State Hospital- These programs provide a much-needed safety net for low-income individuals in crisis, as well as for individuals with mental health needs beyond our capacity.

Heartview Foundation encourages the committee to support the Behavioral Health budget to best serve North Dakota citizens. We are always willing to answer questions and any legislators who would like to learn more about Heartview are invited to call us to set up a tour. Thank you for your commitment to addressing the substance abuse crisis in our state.

NDTAAP

North Dakota Training Academy *for* Addiction Professionals

TAAP is a consortium of addiction counseling agencies in North Dakota collaboratively working together to offer quality learning experiences for licensed addiction counselor trainees in the state. The consortium aims to enhance education and opportunities available to individuals pursuing careers in addiction counseling by pooling resources, expertise and networking connections among participating agencies.

- Combines coursework & clinical experience
- Variety of training sites available
- Commitment to education & training
- Open application cycle
- Unique program designed to ensure trainee success

TAAP aims to prepare addiction counselor trainees for real life careers in the addiction field

Training Academy for Addiction Professionals

OPIOID SETTLEMENT FUND GRANT

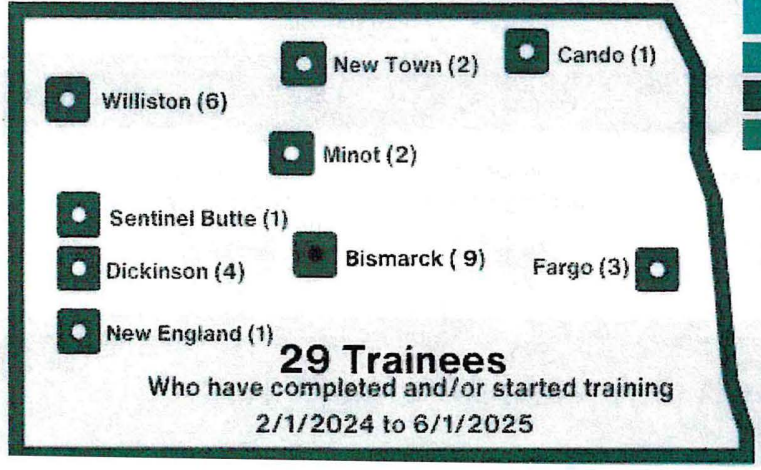
Statewide Program

5 YEAR PROJECTION



NDTAAP
North Dakota Training Academy *for* Addiction Professionals

The TAAP Consortium is increasing North Dakota's workforce by training the next generation of addiction counselors.

	PROJECTS	DETAILS	OUTCOME
20 TAAP Consortium Trainees	TAAP will increase the number of trainees from 10 to 20 trainees per year	TAAP will achieve 28 trainees this OSF Funding cycle	**Goal to complete 20 licensed addiction counselors in ND each year**
25 Trainees in the 5 other regional ND Consortiums	Provide funding to each of the other 5 ND Consortiums	TAAP distributes $100,000 to each consortium for trainee living wage	**Provide inclusive funding for addiction counselor trainees in the state-goal of other consortiums have an additional 25 trainees complete**
50 Additional Clinical Supervisors	Increase the number of Clinical Supervisors	Clinical supervisors paid $200 per week for full time and $200 per week for part time	**Recruit additional 50 clinical supervisors through financial incentive**

Investment

OSF Funding	Heartview	Partners
$613,000	$150,000	$75,000

Future Funding Needed
$1.5 M/Year

TAAP to ncrease paid trainee positions by 10 (total = 20)

TAAP to award 20 scholarships ranging from $1700-$10,000

Fund the 5 other ND consortiums to support addiction counselor trainees (5 trainees per consortium)

Additional administrative support

Additional funding for clinical supervision support

RESULT

North Dakota ADDING 40 licensed addiction counselors in the workforce per year.

The Board of Addiction Counseling Examiners are currently licensing 25 NEW licenses per year.

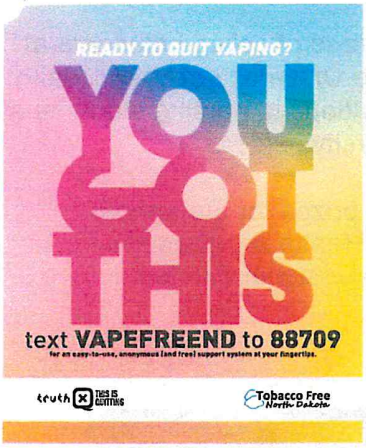
Tobacco Free North Dakota



TOBACCO FREE NORTH DAKOTA

TOBACCO PREVENTION AND CONTROL PROGRAM

MAKING A DIFFERENCE

THIS IS QUITTING

On April 1, 2022 in partnership with Truth Initiative, TFND launched "This Is Quitting" in North Dakota. We are one of a handful of states offering this program. TIQ is a text-to-quit resource for people aged 13-24. The program is specifically tailored for this age group and proven more effective than quitting alone. It it free and confidential.

As of April 1, 2024, 127 people have subscribed to "This Is Quitting," with more than half of 13-24 year olds enrolling in the program.

Changes will be coming to the program in 2025 to help grow its reach.

Tribal Partnerships and Collaboration

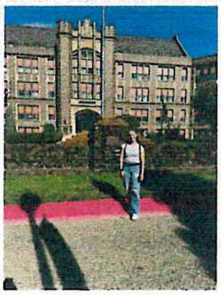
- Host quarterly webinar series with tribal partners covering issues unique to their communities.
- Also utilized TFND's train the trainer program and resources to develop local experts and a customized resources hub.
- Collaborating to co-host a customized Youth Action Summit for tribal youth next year.

COMMUNITY OUTREACH AND TRAINING

- Quit Week media campaign raising awareness to available cessation resources. The campaign has shown a marked increase in calls to NDQuits in the time surrounding the campaign. TFND's role is to help organize the social media and earned media with our grassroots partners. 2024 was our most successful earned media year.
- Hosted a 2-day tribal coalition training in June 2023 with representatives from three North Dakota tribes. TFND provided financial assistance to each community project
  - Spirit Lake Nation's project led to multiple community education sessions on the dangers of tobacco products, which resulted in one member attempting to quit vaping
- Hosted a full-day youth engagement workshop for local public health partners in April.
- Created a webinar training series-which is ongoing-covering topics from talking to youth, cessation best practices, lessons learned from Quit Week. These webinars are used to help train new tobacco coordinators at local public health units and the recordings are available on TFND's website and Youtube page.
- Assisted Professional Data Analysts in the creation of *The State of Tobacco Control in North Dakota* report
- Sponsored multiple tobacco treatment specialist trainings, resulting in more than 200 healthcare providers receiving TTS credentials

TOBACCO FREE NORTH DAKOTA

TOBACCO PREVENTION AND CONTROL PROGRAM



ACHIEVEMENTS

YOUTH INVESTMENT

- We continued our annual Video Essay Contest for high school seniors for the opportunity to win a college scholarship. Since the 2017-18 school year, we have awarded more than $10,000 in prize money to students.

TFND Executive Director Heather Austin with 2022 winner Madeline Erickson

Our 2024 winner Tia at Dickinson State University

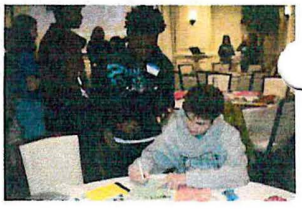
- TFND traveled all around the state doing school presentations: from 2017-2023 we've presented to more than 3,000 K-12 students at a number of events. We have now transitioned to a train the trainer program empowering local experts to use TFND resources in their community presentations to area schools. Through these efforts, we estimate we've reach several thousand more students.
- We've also reached hundreds of college students at community events, like the University of Mary Health Fair, and through presentations to nursing students at North Dakota State University.
- We continued sponsoring prizes for the annual Bismarck-Burleigh Public Health Big Tobacco Exposed College Graphic Designer Contest

YOUTH ACTION SUMMITS

The Break Free Youth Action Summits bring youth from around the state to learn how to become an advocate in their communities. Since the first summit in 2018, more than 1,200 students have learned about the importance of getting involved.

TFND hosted the summits in 2023 again with more than 250 people attending. With the help of guest speakers from Truth Initiative and Stanford REACH Lab, students learned valuable skills like peer to peer communication and how to get involved in their community advocacy.

Bismarck hosted its summit in October 2024, learning more about the legislative session. Fargo will be hosting its next summit in March 2025. These events are an invaluable resource to engage young people in outside advocacy.



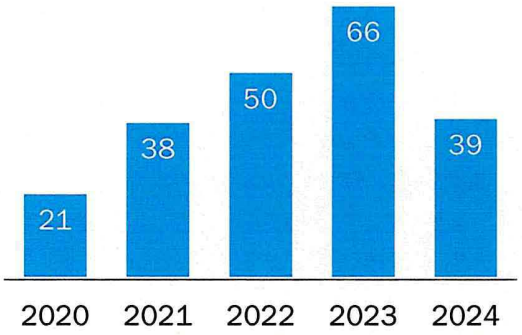
Sen. Michelle Axtman and Rep. Glenn Bosch speak to students about how they became legislators

Students present their idea on how to encourage young people to stay away from nicotine products.

Our 2023 presenters stop for a photo during the Fargo summit

Teamwork makes the dream work

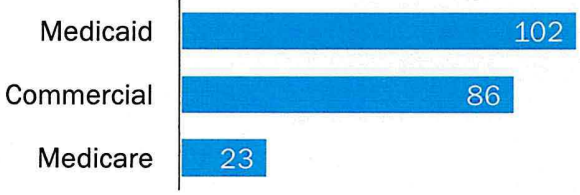
Vaping-Related Lung Injury in Vermont: Documenting the Harms



Despite mixed messaging, vaping is not harmless.

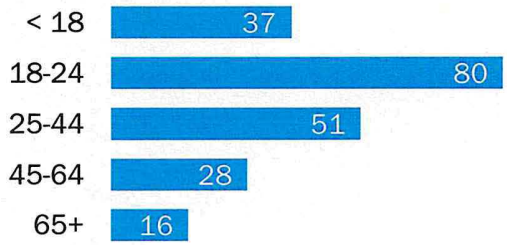
Vaping can lead to severe adverse health effects in the short-term and long-term, which includes injury to the lungs and pulmonary system. The rise of cases of e-cigarette or vaping product use-associated lung injury in 2019 led to the development of a medical code in 2020 (U07.0) that health care practitioners can use to **diagnose, treat or manage dabbing or vaping related lung injury.** This brief documents the use of the vaping-related injury claim code in Vermont from 2020 - 2024 using data from Komodo's Healthcare Map®. The Komodo Healthcare Map® is limited to patients that have at least two tobacco and nicotine dependence codes, so the number of patients and claims included in these analyses may represent an undercount of the number of vaping-related injury claims and patients, especially among youth.

Vaping-related injury health care claims have increased since 2020.



There have been **214 patients** across five years who have received at least one vaping-related injury code in Vermont.

Number of patients in Vermont with at least one vaping-related disorder claim



Over half of patients (55%) were insured through government insurance programs.

Number of patients by insurance type*

*Insurance type was missing for 3 patients

Age at first vaping-related injury code*

*Age was missing for 2 patients

58 patients **(27%) had at least two health care visits** where they received the vaping injury related claim, and of those, 31 patients (15%) had at least three visits.

Commercial Insurer Makeup

Individuals insured by the Veterans Health Administration and those who are uninsured are missing from this analysis. The most frequently used commercial providers in Vermont are included in the claims data, including Blue Cross Blue Shied VT, Cigna and MVP.

VERMONT
DEPARTMENT OF HEALTH

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/28/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:30 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Public testimony
- FTE Block Grant
- Vacancy Report
- Business Operations

8:30 a.m. Chelsea Ridge, Chair of ND Public Health Association Alcohol, Tobacco and Other Drug Section, provided neutral testimony for HB 1012, 31745.

8:35 a.m. Sara Stolt, Deputy Commissioner, Health and Human Services, testified and presented on business operations and the FTE block grant #32002, #32534.

9:08 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, testified on the block grant #32534.

9:25 a.m. Sara Stolt, Deputy Commissioner, Health and Human Services, continued with testimony #32002.

9:31 a.m. Marcie Wuitschick, Chief Human Resource Officer, spoke to FTE vacancies #32002.

9:33 a.m. Sara Stolt, Deputy Commissioner, Health and Human Services, continued with testimony #32002.

9:43 a.m. Donna Aukland, Chief Financial Officer, Health and Human Resources, clarified that they can make budget adjustments to travel professionals #32002.

9:49 a.m. Sara Stolt, Deputy Commissioner, Health and Human Services, continued with testimony #32002, # 32321, 32322, 32323, #32533.

10:48 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, presented the salary block grant financial report #32324. #32531.

11:03 a.m. Sara Stolt, Deputy Commissioner, Health and Human Services, continued with testimony #32002, #32535, #32325, #32326.

11:28 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services spoke to existing square footage.

11: 30 a.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

Neutral Testimony of HB 1012

Chelsea Ridge
North Dakota Public Health Association
Alcohol, Tobacco and Other Drugs Section, Chair
Williston, ND

Chairman Nelson, and members of the House Appropriations- Human Resources Division,

My name is Chelsea Ridge, and I am the chairwoman of the North Dakota Public Health Association (NDPHA) Alcohol, Tobacco, and Other Drugs Section. The mission of NDPHA is to improve, promote and protect health for residents of North Dakota through leadership in policy, partnerships, and best practices. I am here to provide neutral testimony to House Bill 1012, relating to the Department of Health and Human Services Budget, in hopes of restoring funding to local public health units through the Tobacco Prevention and Control Policy budget.

North Dakota was one of thirty-four states and territories that participated in a $438.5 million dollar settlement with JUUL Labs Inc., in which North Dakota will receive $6 million dollars over 6-10years. JUUL Labs Inc. was found guilty of willfully engaging in deceptive marking practices of addictive nicotine products to appeal to youth. In North Dakota, 18% of youth used ENDS products in the previous 30 days, many of whom using flavored products that have been marketed to kids by the tobacco industry, of whom an estimated 14,000 ND kids currently under 18 will die prematurely from tobacco related causes. E-cigarettes produce several dangerous chemicals including acetaldehyde, acrolein, and formaldehyde. These aldehydes can cause lung disease, as well as cardiovascular (heart) disease.

During the 2023 Legislature in HB 1004, 80% of the JUUL Lab Settlement funds were transferred from the Attorney General's Budget into the Community Health Trust and have not been allocated. On behalf of the members of the North Dakota Public Health Association we kindly request transparency and accountability in the allocation and utilization of JUUL Settlement funds, ensuring that resources are effectively utilized to achieve measurable outcomes in reducing tobacco and vaping use and improving public health outcomes in our youth statewide. We recommend the appropriation of JUUL Settlement funds, currently sitting in the Community Health Trust Fund and any future settlement allocations, be distributed in grants to local public health units specifically for youth tobacco prevention.

Thank you for your time and consideration

Sincerely,

Chelsea Ridge

Chelsea Ridge
North Dakota Public Health Association
Alcohol, Tobacco and Other Drugs Section, Chair
chelsearidge113@gmail.com

Resolution of Support to Appropriate JUUL Settlement Dollars for Youth Tobacco Prevention

Whereas JUUL Labs Inc. willfully engaged in deceptive marketing practices that appealed to youth.[1]

Whereas North Dakota was one of 34 states and territories that participated in a $438.5 million dollar settlement with JUUL Labs Inc., in which ND will receive $6 million dollars over 6-10 years.[2]

Whereas during the 2023 Legislature in HB 1004, 80% of the JUUL Lab Settlement funds were transferred into the Community Health Trust and have not been allocated.[3]

Whereas E-cigarettes produce several dangerous chemicals including acetaldehyde, acrolein, and formaldehyde. These aldehydes can cause lung disease, as well as cardiovascular (heart) disease.[4]

Whereas 18% of youth in ND used ENDS products in the previous 30 days, many of whom using flavored products that have been marketed to kids by the tobacco industry, of whom an estimated 14,000 ND kids currently under 18 will die prematurely from tobacco related causes.[5]

Therefore, let it be resolved that the North Dakota Public Health Association recommends:

1. Transparency and accountability in the allocation and utilization of settlement funds, ensuring that resources are effectively utilized to achieve measurable outcomes in reducing tobacco and vaping use and improving public health outcomes statewide.

2. The allocation of all JUUL Settlement funds, currently in the Community Health Trust Fund and any future JUUL Settlement allocations, be distributed to local public health youth tobacco prevention activities.

HB1012 FTE Detail and Business Operations Detail to House Appropriations

NORTH Dakota Be Legendary. | Health & Human Services

Sara Stolt | Deputy Commissioner
Jan. 28, 2025

Our Vision

North Dakota is the healthiest state in the nation.

Our Mission

HHS fosters positive, comprehensive outcomes by promoting economic, behavioral and physical health, ensuring a holistic approach to individual and community well-being.

NORTH Dakota | Health & Human Services
Be Legendary.

Our **Strategic Priorities**

Support the advancement of strong, stable, healthy families and communities.

Advance the foundations of well-being through access to high-quality services and supports closer to home.

Optimize disaster and epidemic response and recovery.

Advance excellence in agency infrastructure and operations.

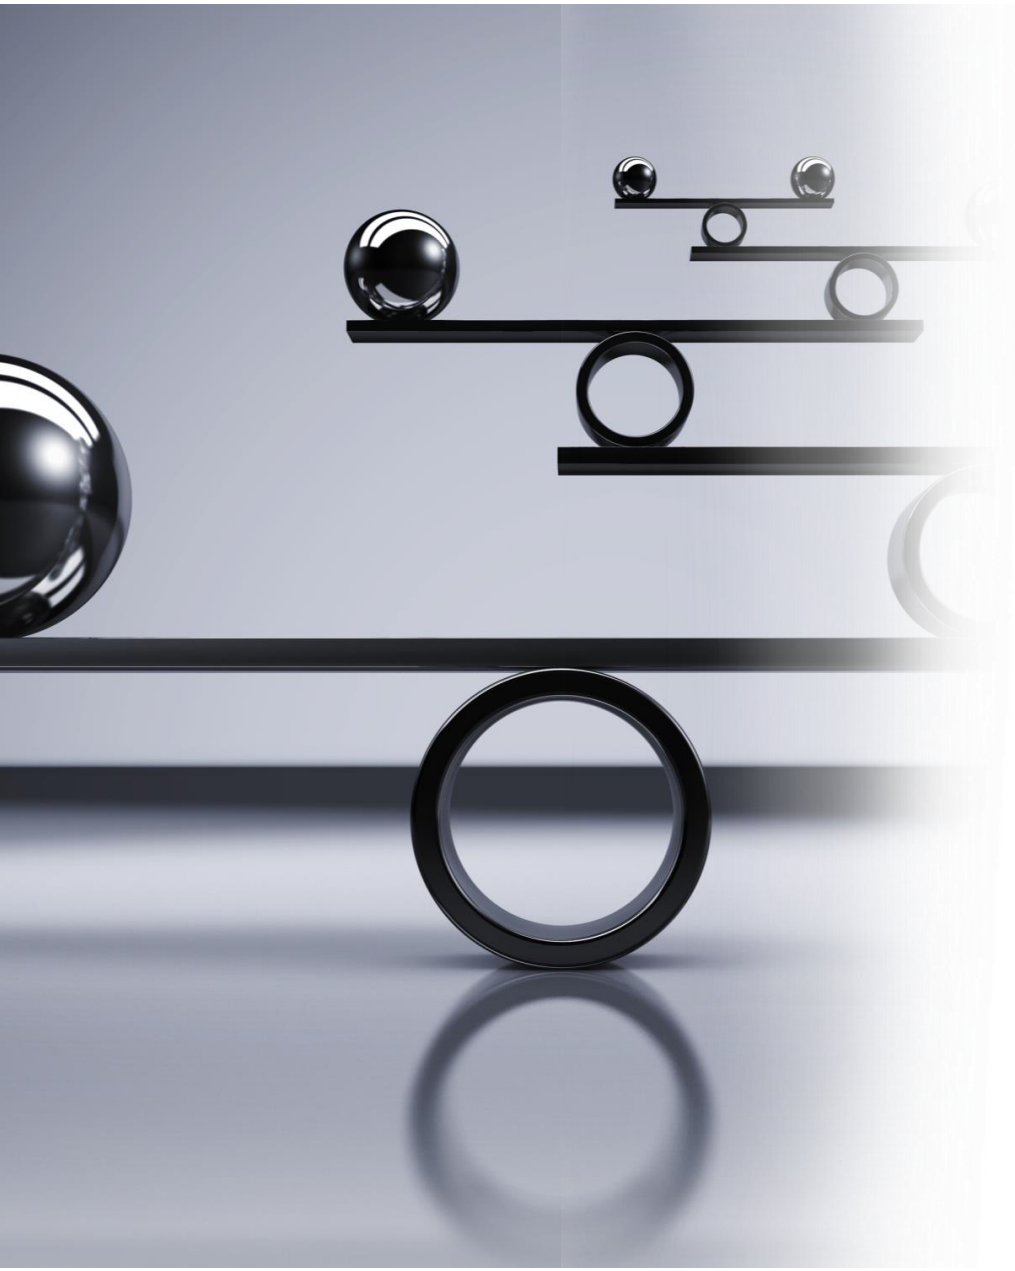
Deliver best-in-class, customer-centered experiences.

Foster a culture of excellence where every team member has a voice, adds value and is empowered to make a difference.

NORTH Dakota | Health & Human Services
Be Legendary.

FTE Block Grant

NORTH Dakota | Health & Human Services
Be Legendary.



Agency FTE Reports

5. Discuss any new positions approved for your agency for the 2023-25 biennium by the 2023 Legislative Assembly, the timing of filling the positions, amounts transferred from the OMB pool for the filled positions, and funding appropriated and the amount estimated to be spent for each position for the 2023-25 biennium.

6. Discuss employee turnover and the number of vacant positions during the 2023-25 biennium to date, the amount of savings relating to the vacant positions and employee turnover to date compared to the vacant position savings removed from your agency's budget by the 2023 Legislative Assembly, the amount of vacant position saving spent for

Terminology

- **FTE** full time equivalent position.
- **Position numbers** represent the jobs that have assigned position numbers, even if they aren't actively being filled. All open position numbers are counted in our vacancies. All positions have a unique position number.
- **Filled positions** are the actual number of positions that have people working in them today.
- **Churn** refers to turnover and salary savings that allows us to repurpose dollars to areas of emerging and critical need.

Alignment

- Legislative Council Reports
- OMB Reports
- HHS Reports

Vacancy Report Example

Position A:

- Budgeted $200,000 for the 23-25 biennium
- Budgeted for 24 months
- Utilized 12 months of budgeted salary and benefits

Position B:

- Not budgeted for in the 23-25 biennium
- Added in June 2024 to address a critical need within a program
- Utilizing salary savings ($100,000) from Position A to fund the position
- Accounting for this full salary in our vacancy report double counts Position A's salary
- The salary for Position B should not be accounted for on the vacancy report.

Current FTE vacancies - point in time (12-1-24)

374.63 Vacant Positions – Phases summarized as follows:

Phase	Description	Number
1	Part of current budget, position number established, job description completed and in process of being classified then posted	109.00
2	Position posted; actively recruiting and has not yet closed	112.52
3	Position posting closed; applications being reviewed and interviews scheduled	42.9
4	Position has been offered and offer is pending	16
5	Position is filled; new team member not started as of 12/1/24	79.5
Remove	Not budgeted for in 23-25 and/or can be deleted	11.71
Freeze	Federal Hiring Freeze does not allow for filling position(s)	3.0
	TOTAL	**374.63**

What is the HHS FTE block grant?

During the 2023 Legislative Session, lawmakers:

- Approved the HHS salary appropriation
- Removed the **total number** of FTE appropriation

RESULT: HHS is responsible for staying within our salary appropriation but now has flexibility on total number of FTEs

NOTE: Block grant includes all compensation, overtime, bonuses paid, promotional increases, health insurance premiums, etc.

NORTH Dakota | Health & Human Services
Be Legendary.

Why is this important?

Historically limited by a total cap on FTEs each biennium:

- Prohibits adding necessary positions in a timely manner
- Limits repurposing positions
- Inability to be nimble in addressing staffing needs based on client acuity or need

NORTH Dakota | Health & Human Services
Be Legendary.

The FTE Block Grant has allowed HHS …

To quickly respond and hire for immediate or emerging business needs

Flexibility to support new work

To support state workforce by transitioning long-term temp employees to FTE

To address overtime and team member capacity by adding essential positions

Dakota | Health & Human Services
Be Legendary.

How does it work?

Group A: Temporary converting to FTE

- Position is already working 30+ hours per week
- Anticipated to exist for more than 3 years
- Long-term funding is available (now and in future)
- Prioritized within established goals of HHS
- Complete SFN 50

Group B: Refilling basic vacancies

- Natural turnover
- Positions that are being filled with the same role as the previous incumbent
- Repurpose existing vacant position (1.0 FTE)
- Positions must be currently funded in the division's salary budget
- Hiring can occur within HR-established vacancy thresholds
- Complete SFN 50

Group C: Short-term needs

- Short-term
- Less than 720 hours (emergency status)
- Interns, summer students, co-op
- Position is budgeted for or sufficient rollup exists to cover cost
- Prioritized within established goals of HHS
- Complete SFN 50

EXECUTIVE DIRECTOR APPROVAL

Group D: Requesting New FTE

- New FTE requests
- Long-term full-time temp request
- Repurposing more than 1.0 existing FTE
- Prioritized based on identified goals of HHS
- Reviewed for approval by a committee including Operations, Program, Finance, HR and Commissioner.
- Established threshold for turnover/vacancy exists for each operations, direct service and program

COMMITTEE APPROVAL

Example of Repurposing Position with Block Grant

- A full time FTE with benefits is available in a rural city in ND. The position has been posted twice with no candidates applying. Historically we would have limited options in how to address this.
- With the block grant, we can explore two college students with alternate schedules who might be each interested in 20 hours per week. They choose to remain on their parents' health insurance.
- We are then able to hire them at an hourly rate, no benefits are paid out, and the client is still receiving the service locally. We have saved ourselves the cost of health insurance and not utilized an FTE, but utilized the block grant to be creative in filling the role.
- **This FTE can now be utilized for a different programmatic need as long as budgeted dollars still exist.**

Salary appropriation for 2023-2025 Biennium

- Total HHS Salary + Benefits = $551,714,842

NOTE: Block grant includes all compensation, overtime, promotional increases, health insurance premiums, bonuses, etc.

Timeline of FTE

23-25 Session	Beginning of Block Grant + FTE Committee July 2023-Present	Current State – As of 12/1/24
Beginning: 2475.83 FTE + 53 Temp to FTE + 53 New FTE 2581.83 Ending FTE*	• 50 long-term vacancies within the Behavioral Health Division were repurposed to fill new needs within Behavioral Health. • 50 additional long-term temps were transferred to FTE • Approved 92.5 new FTE, which are in various phases of being filled • Approved 56 new FTE in Behavioral Health	• 374.63 Vacant FTES • All requests are reviewed by the FTE committee for need and budget • HHS churn (turnover) allows us to be flexible in filling positions and utilize the unspent salary budget • Current filled positions is under 2581.83

*While the appropriation for the 107 (53.5 plus 53.5) new FTEs was added to the budget bill, the actual number of FTEs were not added because of the conversion to the FTE block grant for HHS.

Budget review to support FTE pool process

Process to reconcile the headcount with the dollars being spent:

- Actual Expenditures analyzed month by HHS leadership
- Compared to budgets for each section and by HHS as a whole
- Projections are established and then modified by trends over the biennium
- Finance reports are available by the fourth week of every month
- Section Director reviews monthly with Finance team accountant

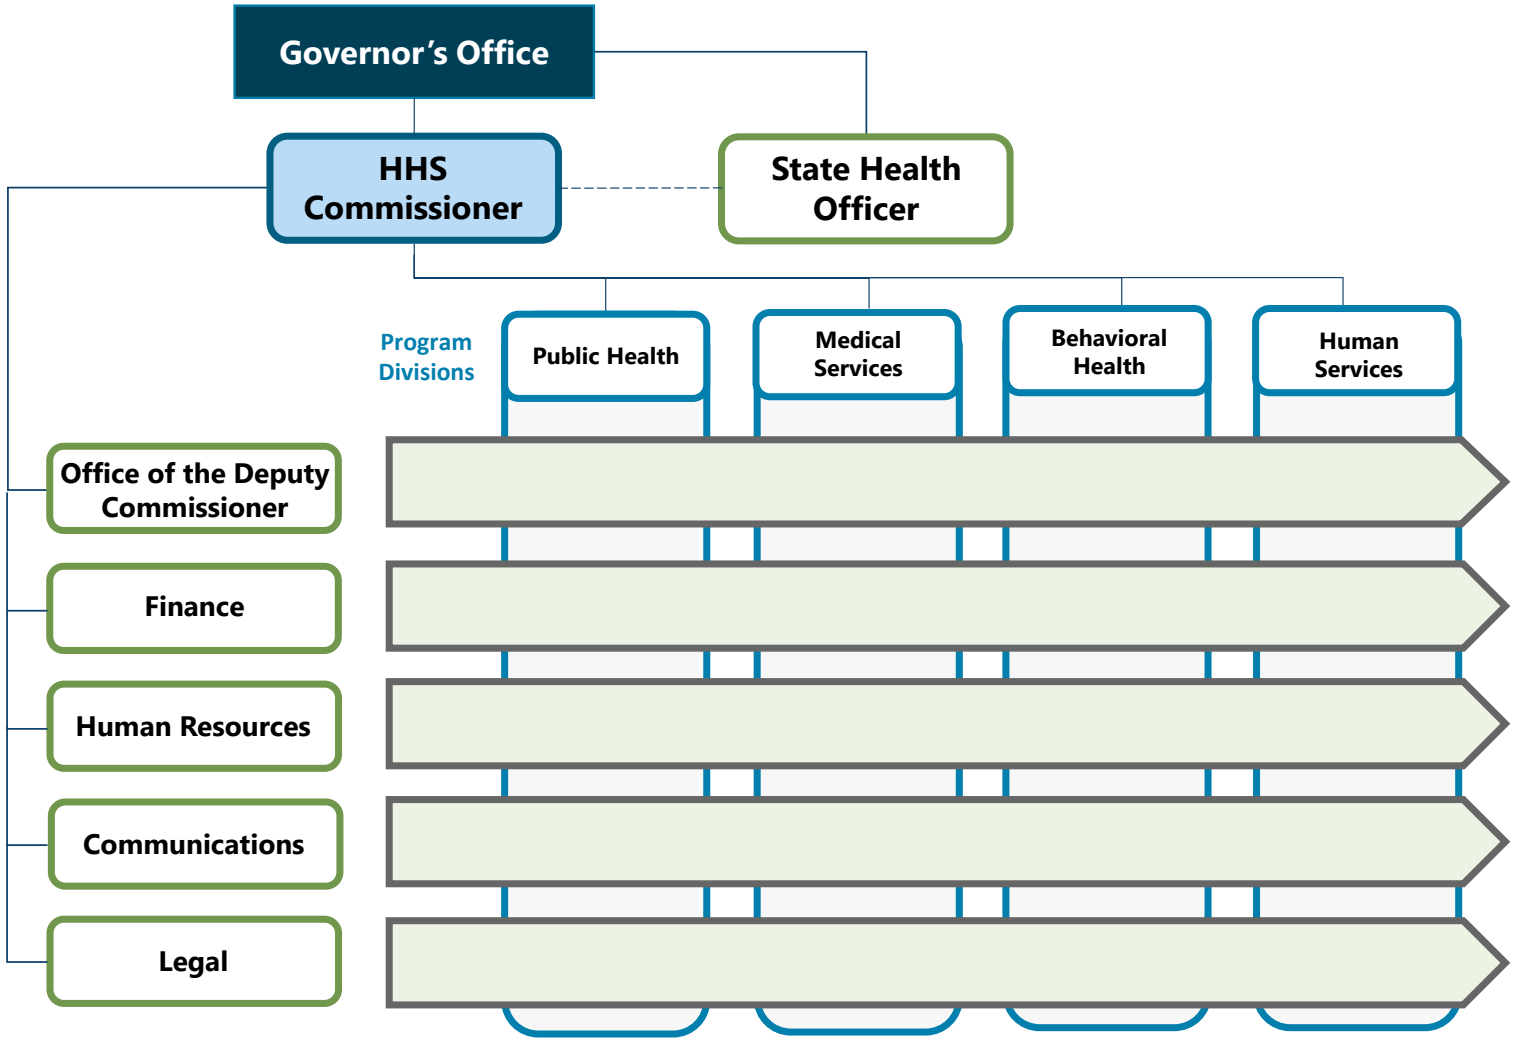
Salary Appropriation Reports

- 23-25 Legislative Base Budget
- 23-25 Expenditures
- 25-27 Budget Request

FTE Recap



1. HHS has never exceeded our salary appropriation nor exceeded the 23-25 FTE allocation.
2. The vacancy report provided by Legislative Council double counts salaries giving an inaccurate salary rollup total.
3. HHS went through a rigorous process to build out FTE block grant plan that was vetted with OMB and the Governor's Office.
4. The flexibility of this block grant has made a significant impact on our ability to serve North Dakotans

Legal Division

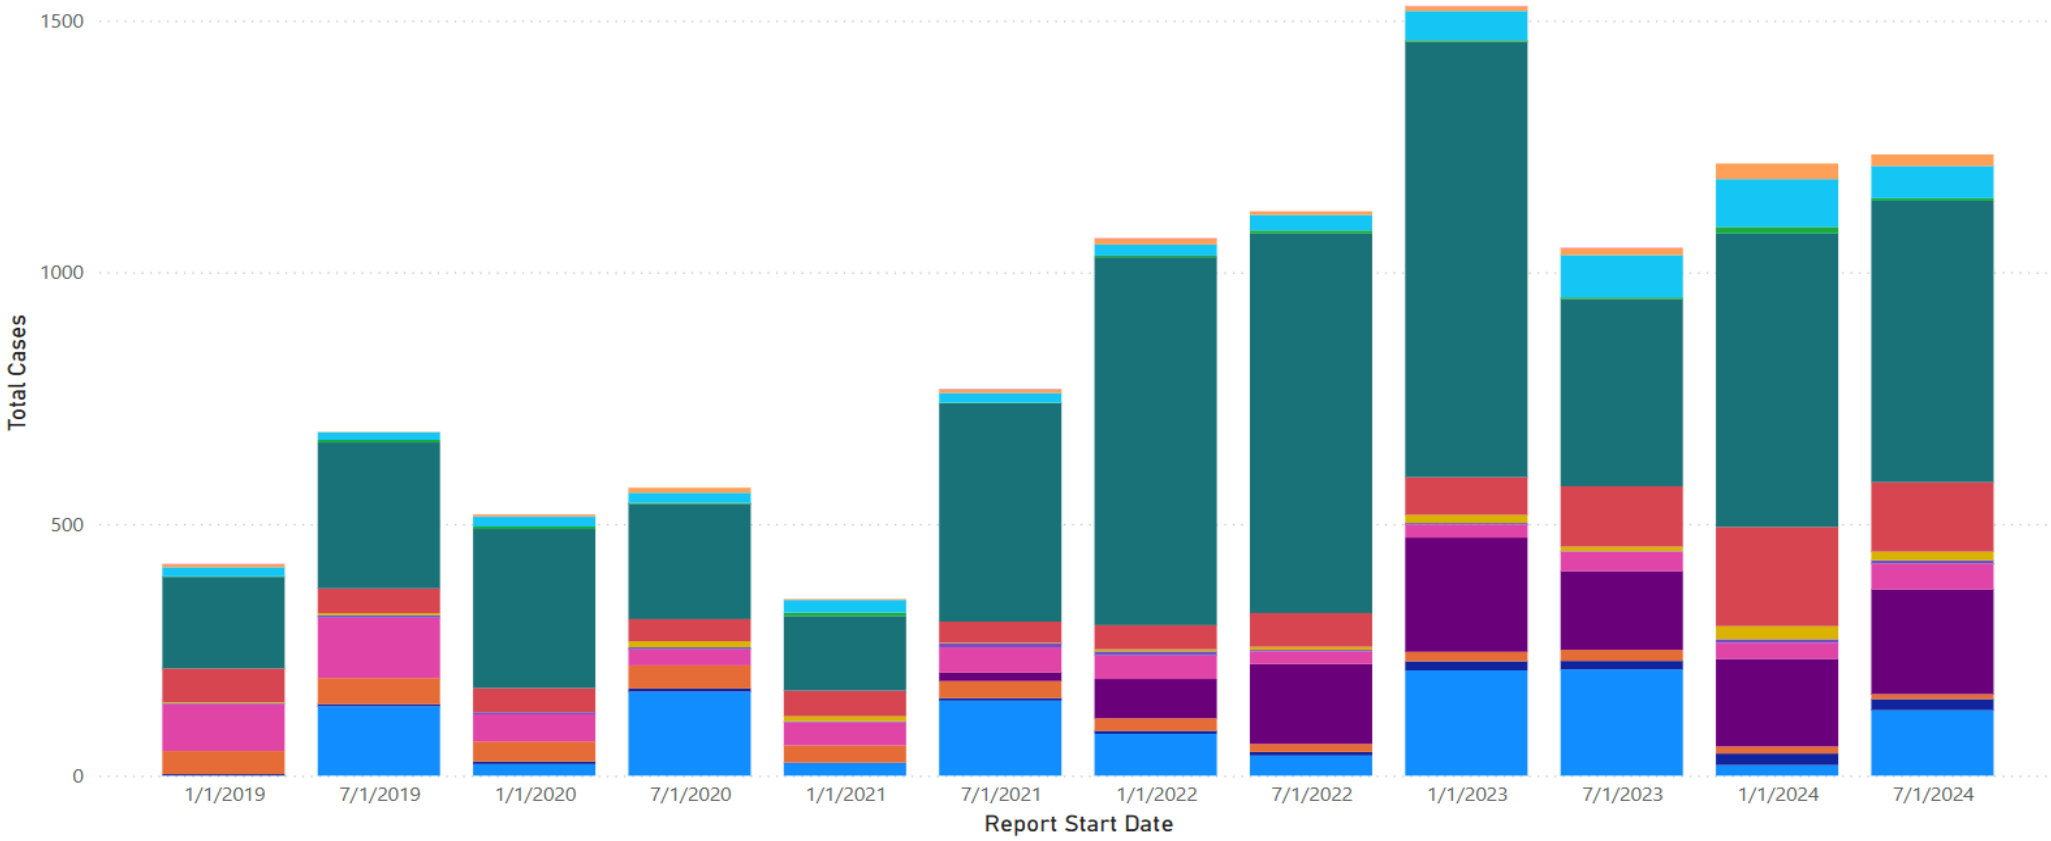
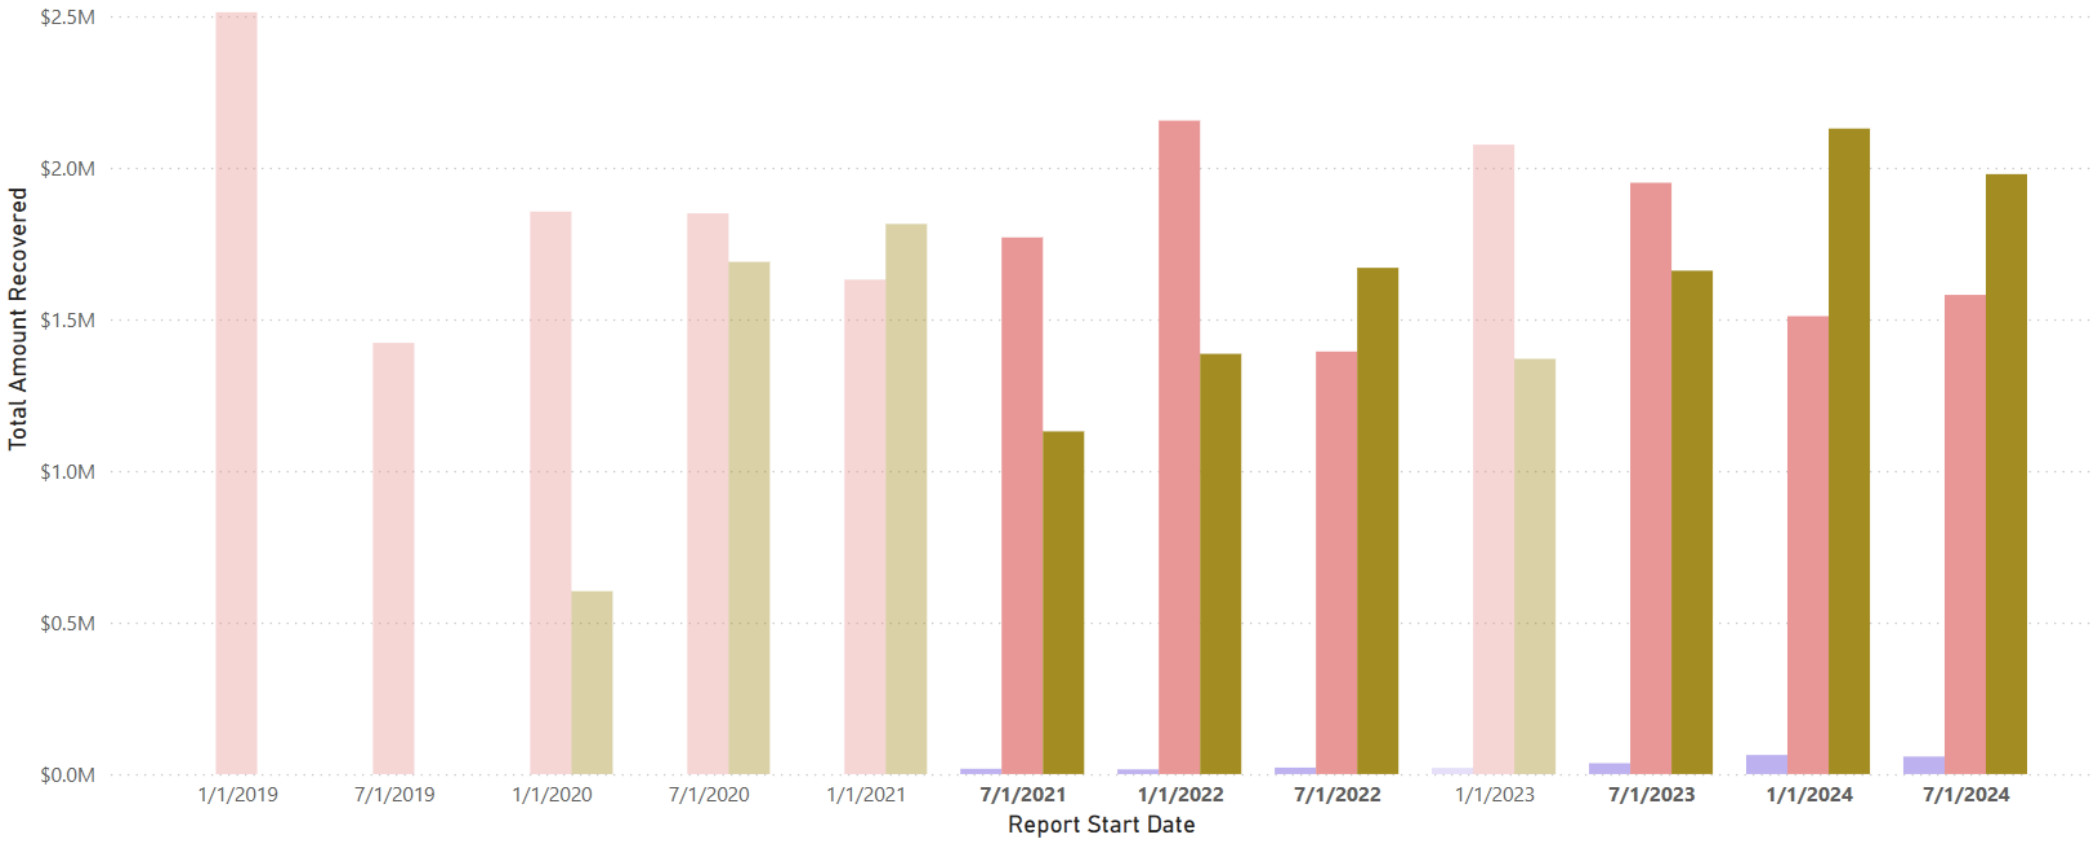
Restructured job duties to embed specific attorneys within the Department's divisions to:

- Increase response times back to Department staff, which translate into faster responses back to applicants, recipients, and our community partners;
- Create subject matter experts for each division to rely upon;
- Reduce involvement of direct care staff being involved in legal matters; and
- Be available to our legal community partners.



Legal Division – Challenges



- Increase in workload due to changes to federal and state law and regulations, new programs, or increase in appropriation to provide additional services and supports.
- Increase in the number of appeals, intentional program violations, and trust reviews.
- Finding legal solutions to address the ability to provide services or assistance to individuals with more complex needs.

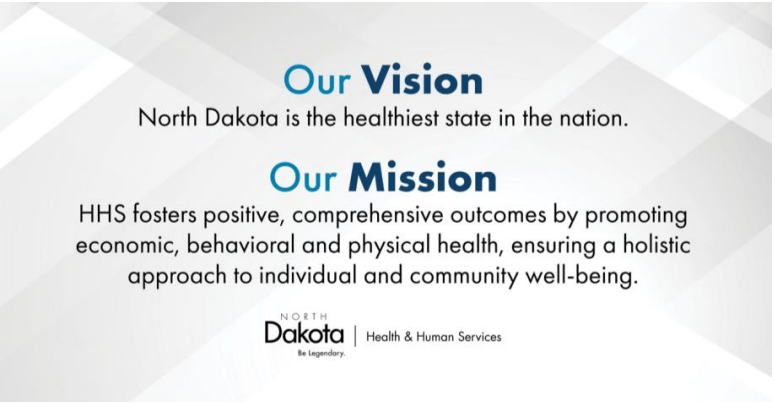
ND State Hospital Communications Specialist
Estimate to hire: February

- Provide dedicated support to the ND State Hospital team.
- Collaborate with human resources and State Hospital teams to develop communications plans and content to drive initiatives in workforce development and team member culture.
- Manage local media relations, crisis communications and local public community engagement.
- Collaborate with State Hospital Superintendent to strengthen internal operational communications.

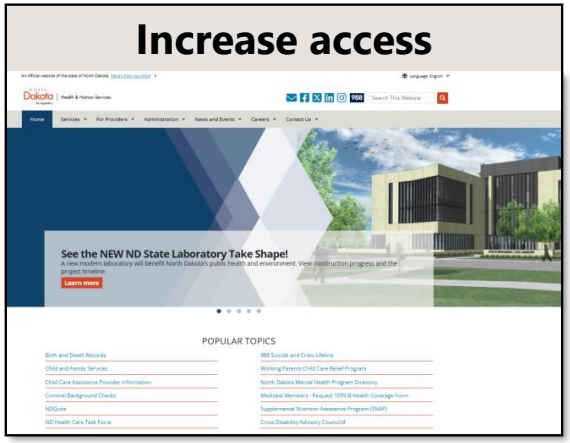


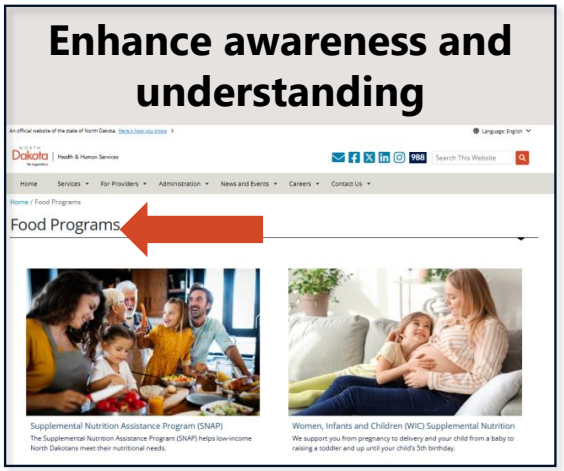
Human Service Zones Communications Specialist
Estimate to hire: March

- Collaborate with the Director of Human Service Zone Operations and program teams to develop and strengthen communications and communications delivery structure to support our Human Service Zone partners.
- Strengthen content on HHS Insider intranet, including for key focus areas such as Medicaid, 1915i home and community-based services; basic care assistance; and child welfare.
- Develop content to strengthen citizen experience on hhs.nd.gov.

Marketing Specialist ADA Compliance | Analytics
Estimate to hire: March/April

- Collaborate with legal team to ensure that hhs.nd.gov, social media, and other HHS communications meet Americans with Disabilities Act (ADA) compliance requirements.
- Track, analyze and report on communications metrics to help inform decisions and more fully optimize communications performance in serving North Dakotans.
- Ensure positive citizen experience on hhs.nd.gov in collaboration with NDIT.





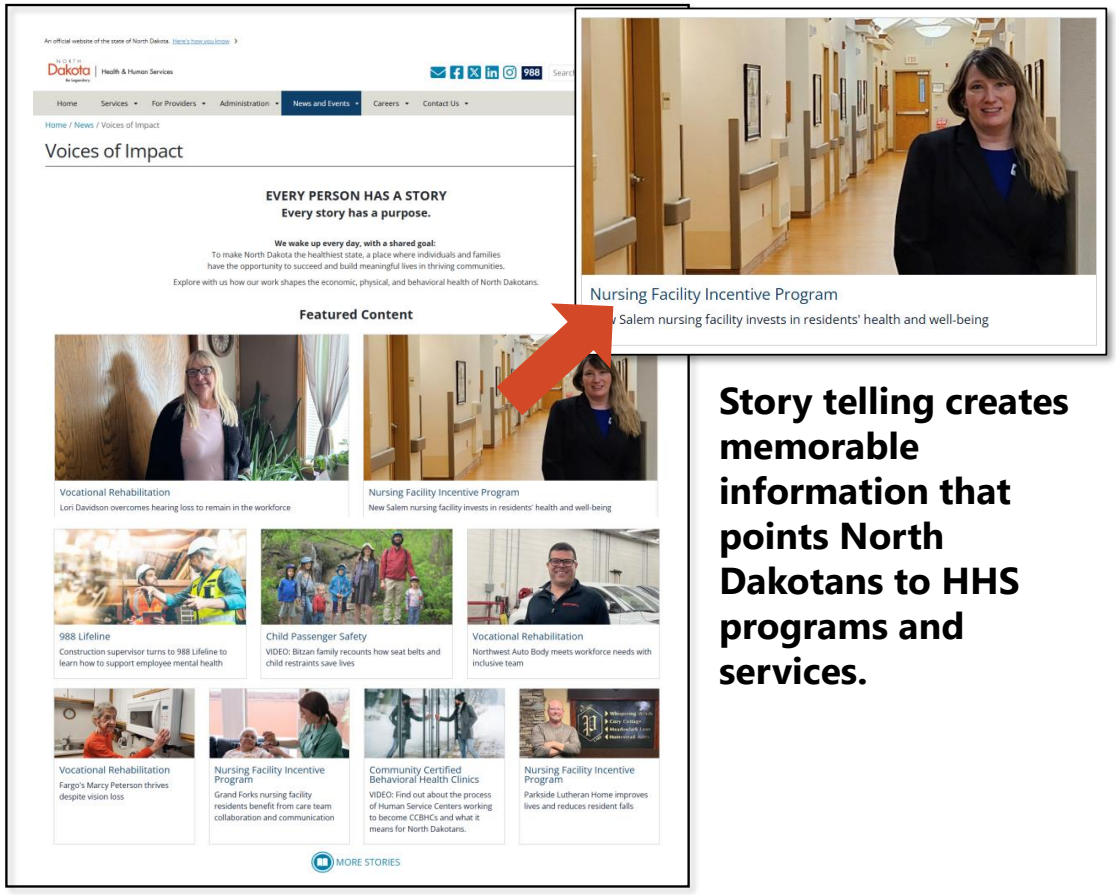
- **Benefits of strategic communications planning | collaboration**
- **Who we serve**
- **How we collaborate**
- **Where to improve**

NORTH Dakota Be Legendary. | Health & Human Services

Strong communications planning and collaboration benefits North Dakotans

Standalone websites integrated to one welcome door of service at **hhs.nd.gov**

SNAP and WIC promoted in **citizen-focused language** as food programs



Clear action steps

Embed in standard operations

Effective communications produce outcomes and measurable returns for HHS

Story telling creates memorable information that points North Dakotans to HHS programs and services.

Monthly | Quarterly communications performance updates

Our team provides communications support for HHS and North Dakotans

More than 150 programs and services

- Adult and Aging Services
- Behavioral Health Clinics
- Behavioral Health Policy
- Child Support
- Children and Family Services
- Criminal Background Check Unit
- Intellectual and Developmental Disabilities
- Disability Determination Services
- Disease Control and Forensic Pathology
- Early Childhood
- Economic Assistance
- Health Response and Licensure
- Health Statistics and Performance
- Healthy and Safe Communities
- Human Service Zone Operations
- Laboratory Services
- Life Skills and Transition Center
- Medicaid
- Medical Marijuana
- Ruth Meiers Adolescent Center
- State Council on Developmental Disabilities
- State Hospital
- Office of Refugee Services
- Vocational Rehabilitation

Over the past two years, we've focused on:

- Moving from reactive toward a more proactive communications approach; and
- Prioritizing our resources to core services and critical needs in collaboration with program teams.

NORTH Dakota | Health & Human Services
Be Legendary.

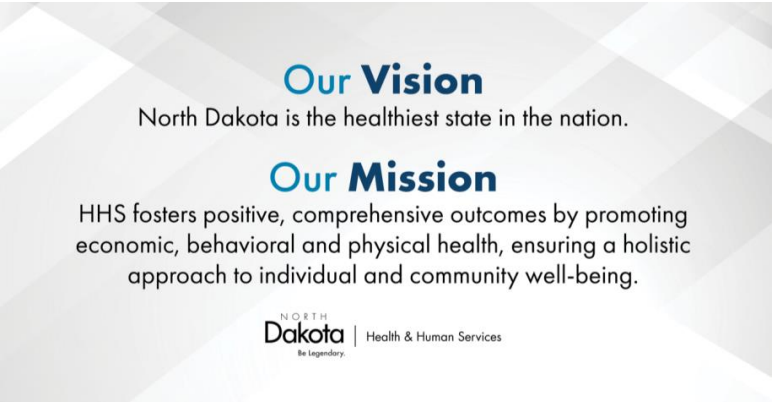
Timely collaboration is the key to a successful communication strategy

The agency has been transitioning from reactive toward more proactive engagement strategies

Communications team joins toward the end of the process

Moving from **reactive**

Communicate to North Dakotans



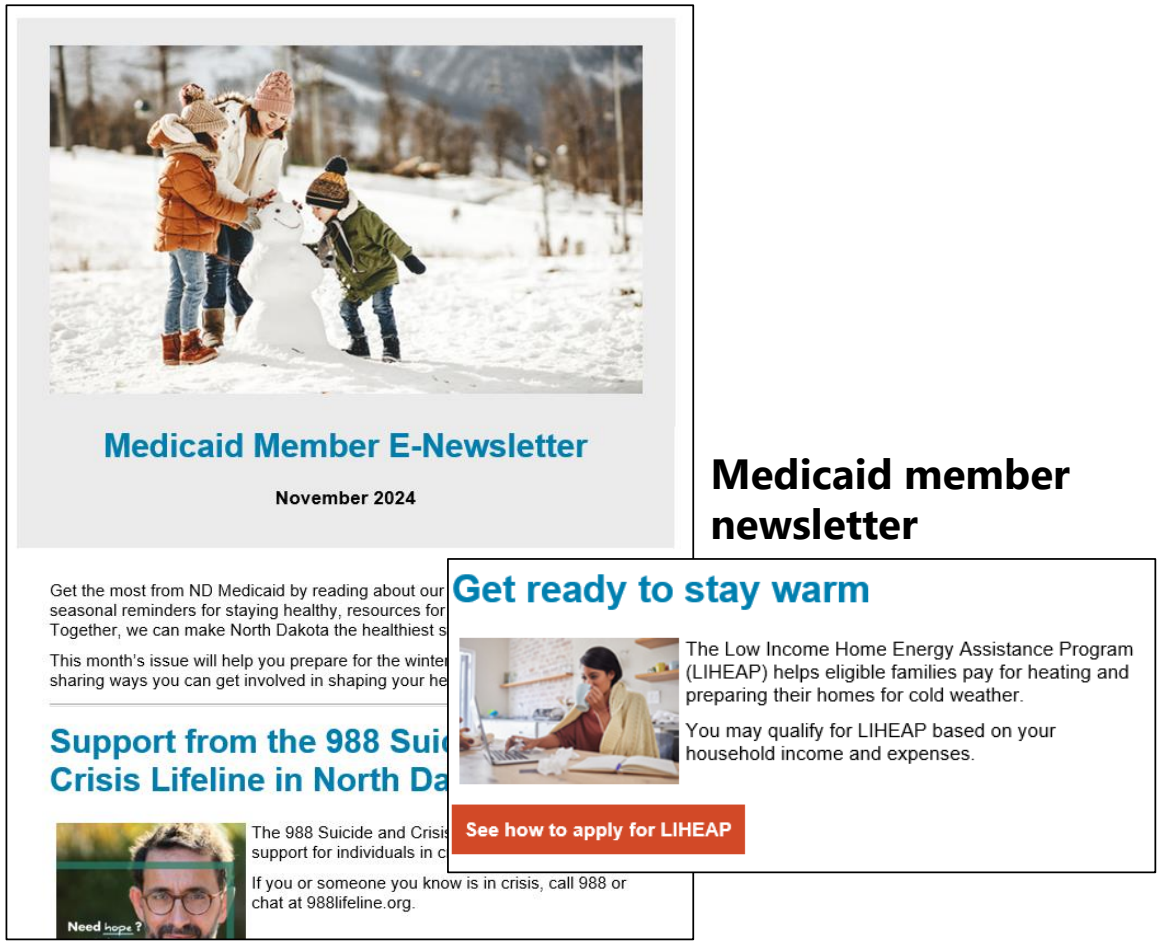
Toward a more **proactive approach**

Communicate to North Dakotans

Communications team is embedded as part of the planning process

Where is this working well?

NORTH Dakota Be Legendary. | Health & Human Services



Proactive communications planning and collaboration with Medicaid team put information into the hands of North Dakotans

Stay Covered ND
Medicaid Redetermination Campaign

- One-year campaign
- Supported the redetermination of more than **130,000 Medicaid participants**
- Leveraged partners and providers as critical communications touchpoints
- Tested text messaging as a way to reach North Dakotans – now adopted as a standard operation.

Cross walking HHS programs within Medicaid communications boosts awareness of resources for other health and well-being needs

Medicaid member newsletter

Social media

Medicaid and oral health programs featured together during Children's Dental Health Month

Increasing well-child visits: Medicaid Health Tracks seventh-year birthday card

Early claims data indicates increase in scheduled well-child visits for this age group.

What are we planning for now?

- The **refresh and relaunch of hhs.nd.gov**
- Department of Justice **Americans with Disability Act (ADA) compliance requirements taking effect April 2026**. We must meet legal requirements for all government communications including websites, enrollment portals, social media and beyond.
- The opening of the **new ND State Lab**
- Transition of Human Service Centers to **Behavioral Health Clinics**
- Communications enhancements for **human service zones and local public health units**
- Strengthened **media engagement**
- Informed decisions with **analytics**

Legislative Assembly
of North Dakota

HOUSE BILL NO. 1012

Introduced by

Appropriations Committee

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. APPROPRIATION. The funds provided in this section, or so much of the funds as may be necessary, are appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, and from other funds derived from special funds and federal funds, to the department of health and human services for the purpose of defraying the expenses of its various divisions, for the biennium beginning July 1, 2025, and ending June 30, 2027, as follows:

Subdivision 1.

BUSINESS OPERATIONS

	Base Level	Adjustments or Enhancements	Appropriation
Salaries and wages	$25,763,358	$0	$25,763,358
Operating expenses	155,308,399	0	155,308,399

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/28/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

2:34 p.m. Chairman J. Nelson called the hearing to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Budget
- Communications

2:34 p.m. Sara Stolt, Deputy Commissioner, Health and Human Services, continued with previous testimony on Business Operations #32002, #32326.

2:44 p.m. Donna Aukland, Chief Financial Officer, Health and Human Services, presented budget projections #32002.

3:06 p.m. Lynn Bargmann, Chief Communications Officer, presented and testified on the Communications Division #32002.

Additional written testimony:

Bailee A. Saltzman, Surrey, ND in opposition #32071

Tania S. Zerr, Fargo, ND in favor #32161

Cale Dunwoody, Fargo, ND in favor #32057

Linda Schroeder, West Fargo, ND in favor #32075

Michele Klabo, Jamestown, ND in favor #32108

Kari Kapp, Jamestown, ND in favor #32111

Nicole Darling, Fargo, ND in favor #32147

Krystal Hayes, Dickinson, ND in favor #32170

Ashley Isrig, Fargo, ND in opposition #32199

Trisha York, West Fargo, ND in opposition #32206

Kay Larson, Director, Early Childhood Section, Health and Human Services, submitted testimony #32188 in favor.

4:00 p.m. Chairman J. Nelson adjourned the meeting.

Jan Kamphuis, Committee Clerk

THE CHAMBER
FARGO MOORHEAD WEST FARGO

Letter of Support – HB 1012

Tuesday, January 28, 2025

Chairman Nelson and members of the House Appropriations - Human Resources Division Committee,

For the record, my name is Cale Dunwoody, and I have the distinct pleasure of serving as the Vice President of Public Policy for the Fargo Moorhead West Fargo Chamber of Commerce (FMWF Chamber). On behalf of our over 1,700 members, I respectfully offer testimony in support of House Bill 1012.

At the FMWF Chamber, our mission is to protect and promote business, inspire individuals, cultivate communities, and influence action. We commend the 68th Legislative Assembly for their critical investments to address the need for accessible, affordable, and quality childcare throughout our state. Childcare is central to the state's workforce challenges, and in order to adequately address workforce shortages, the state must also address childcare.

North Dakota continues to grapple with the shortage of childcare slots, particularly for infants and toddlers, due to the high costs associated with providing these essential services. Between 2017-2024 the cost of childcare in North Dakota increased 40% at traditional day care centers, and as much as 50% at home day care centers. A survey conducted by the Greater Fargo Moorhead Economic Development Corporation and the Southeastern Education Cooperative reported 71% of respondents identified high costs as a barrier to accessing childcare. This illustrates the impact rising prices has on the availability and stability of our state's workforce.

Awareness of available programs is also a barrier for families to access the care they require. Data from the same study indicated only 41% of respondents were aware CCAP and the working parent relief program were available to them. Lack of awareness is not isolated to our region as the Greater North Dakota Chamber reported only 33% of respondents statewide knew about these programs. Lack of adequate information on these programs inhibits economic growth as it limits the number of individuals participating in the labor force.

Addressing North Dakota's childcare shortage is a vital part of solving the workforce issue. Passage of this bill offers additional support to employers and working families, showing the state's commitment to investing in our future. We respectfully urge this committee and the 69th Legislative Assembly to continue to strategically invest into critical economic assistance opportunities and early childhood programs that reduce cost and increase access to quality childcare throughout North Dakota by giving this bill a DO PASS.

Thank you for your attention to this matter and your commitment to North Dakota.

THE CHAMBER
FARGO MOORHEAD WEST FARGO

Sincerely,

Cale Dunwoody
Vice President of Public Policy
Fargo Moorhead West Fargo Chamber of Commerce

#32071

1/27/2025

To whom it may concern,

This letter is in regard to the bill HB1012, which could cut funding on grants given by North Dakota Health and Human Services. The Inclusion grant is one that we current receive to help our children.

I have worked at a daycare for over 5 years. I started when it was a small at home daycare with 13 children. Now our daycare is at 2 locations with up to 30 children at each location. Since I have started working at a daycare, the number of children needing more 1 on 1 care has increased substantially. We currently have 15 children in our care that have more needs than many daycares can work with.

Whether it is speech delays, OT services, or behavioral needs, the Inclusion grant has been able to provide our daycare with the ability to not only buy specialized supplies that help the children grow, but to be able to keep on more staff so that the children with needs get more care.

Many daycares' staff to children ratios are around 1:10, whereas our daycare has been able to have ratios of around 1:5. This not only helps the children to have that extra support from us, but it helps the mental wellbeing of the staff members. Daycare work is very rewarding, but it is also very mentally and physically exhausting.

We all know that quality daycares in the state are very much needed. Having grants like the Inclusion grant help daycares out in so many ways.

Please do not take away much needed funding that helps the children that need it most.

Thank you for your time,

Bailee Saltzman

Kids 1st Daycare, LLC

Surrey, ND

House Appropriations – Human Resources Division

HB 1012 and funding for Early Childhood Education.

My name is Linda Schroeder. I live in West Fargo, and I have operated my in-home childcare business for 34 years or about 82,000 hours invested in providing care to children and supporting their families. It was not until Covid that childcare started to receive appreciation and support for the service that is provided to children and families. I like to think it was a piece of silver lining in a time that was very challenging. I never closed my program during Covid. The parents of the families were working at the hospital, banks, maintenance, driving trucks, and many other providers were right there on the front line's day in and day out. Without quality childcare people can't show up for work. The unfortunate result during this time was that many of the people that pulled their kids and stopped paying for childcare, yet they were still being paid and receiving unemployment. Many providers did not initially qualify for unemployment. As a result, they left childcare because of no income. When the workforce took steps to reestablish itself many providers took other jobs that paid more than what they are making caring for children.

North Dakota started to really look at childcare and recognize how vital it is in the process of building a strong economy, establishing and reaching goals. Each year more opportunities, programs and support systems are included in this crucial business that supports our workforce. This needs to be addressed annually with steps for improvement in the forefront of our minds.

It is my hope that you fully fund the Early Childhood Programs and not consider any recommended cuts. The needs of the children, providers and families continue to escalate. Food prices are constantly increasing. Ongoing training is needed to navigate the many behavioral, emotional and academic needs of children. I have more therapists than ever before coming into my program to provide services and offer support to children. The challenges that schools deal within unprecedented numbers we see in our programs first as they are with us before entering school. We are faced with trying to navigate the growth and development of children while trying to support the families which are often overwhelmed. We need help with supplies, equipment, and training. School systems have a staff an in-home provider does all of this alone. My day starts with self-care for kids as many come straight from bed without even having used the bathroom. Their hair still has the ponytails that I put in the day before. This care and nurturing continue throughout the day. I have washed and changed clothes, clipped nails, brushed teeth and provided dignity to children and grace to overwhelmed parents. These and many more challenges are present in 90% of the families I have supported.

When discussing and allocating funds please think of your children, grandchildren, nieces and nephews, friends and neighbors now and in the future. We need to focus on not only recruiting early childhood educators but also supporting the providers we have so that they don't leave the early childhood workforce. Our future depends on it. North Dakota can lead the way!

Smiles
Linda Schroeder

January 27, 2025

To whom it may concern,

My name is Michelle Klabo, I am a licensed group provider located in Jamestown. I currently care for 9 children full time. I have been a childcare provider for almost 11 ½ years. I have a bachelor's degree in early childhood education and have been a Step 4 provider on the QRIS rating system with Bright and Early program for 7 years.

I am writing in favor of fully funding the bill with the original $7 million budget and not cut funding by 2 million. Early childhood is vital for our state to continue to grow and build high quality childcare in North Dakota.

I appreciate our state's support over the last couple of years with additional grants we received. I believe early childhood education is essential to keep the workforce continuing in North Dakota and additional funds from these grants helps us achieve higher quality-based environments. Parents can go to work knowing they are leaving their child in a high-quality childcare focusing on safety, environments, development, connections, and relationships.

The quality improvement grants I received in the past 7 years have been around 10K. With this funding, I have been able to purchase materials for the children, a rainbow playset, outside toys, educational materials, and art supplies. Over the last 2 years, I have been able to keep my rates lower for my parents. My program rate is significantly less than other providers in my area. This additional funding from Bright and Early and other state programs helped me maintain a lower rate, but also to use the funds to purchase additional materials needed. Being a quality rated program children in my care can meet their academic, social-emotional, physical, and cognitive goals.

State programs like Bright and Early are necessary to keep children on the right path, 90% of a child's brain is developed in the first five years of life. These years count and by having high-quality step 4 programs help with this. This additional state funding is necessary to make a child's experience in the childcare industry a success for their future in life.

Sincerely,

Michelle Klabo, Owner

ABC Learn-N-Play

Kari Kapp

Kari.kapp16@gmail.com

1/27/2025

To whom it may concern,

My name is Kari Kapp, and I live in Jamestown ND and I am asking to continue to fully fund the bill with the original proposed amount of $7 million dollars.

I have been in the Early childhood profession for over 30 years, and I run an in-home childcare that is going on 25 years this June. I do not have any staff and wear many hats in my quality rated program. I am currently licensed for 16, and on a typical day average 10 children.

I have participated in Bright & Early since it started, for I was one of the first in-home childcare to participate in the QRIS. My Program is one of 2 Nationally Accredited in the state, and I have my Associates Degree in Early Childhood. I did receive money in the past for renewing my step 4 and staying Quality Rated with an estimated amount of $10,000 and it was very nice to receive the $3000 in 2024. Being a step 4 Provider and having a family on assistance has been a nice little incentive bonus too.

Receiving these funds from state programs and the QRIS has helped me in many ways! Being Nationally Accredited, it helps me afford to stay accredited, and purchase items for my program to make sure that the children are in a safe, healthy, and social environment. This is very important for the social emotional area in a child's mental development. These funds also allow me to charge less than the going (market) rate in the area to make childcare affordable to parents.

Respectfully,

Kari Kapp

To whom it may concern,

I am the Site Coordinator at Hope Center for Learning-South in Fargo, ND. We have been licensed since August 2010. Our licensed capacity is 99 and we are currently serving 56 during the school year. We have been participating in Bright & Early since 2017. We are currently rated Step 3 and began working on Step 4 Rating in January 2025. I am writing to this to ask to approve of the ORIGINAL amount that was being awarded ($7 million), not the reduced to the amount of $5million.

I have been the coordinator at Hope Center for Learning-South since 2021. One thing I appreciated from the beginning was the high standard of care that was being provided. As I was getting to know the policies and procedures of the center something I heard frequently was that we do this because of what we've learned through involvement in Bright and Early. The support provided for the staff from the Bright and Early coaches and educators has been an invaluable asset to us providing high quality care to our children and families.

In addition to the support and education provided to us from Bright and Early coaches is the funding that we receive to help us continue to provide a high level of care for the children and families we serve. We received $8,000 in quality Improvement grants in 2022, 2023, and 2024. Past grant dollars have been used to maintain childcare spaces such as adding new carpeting and having the rooms painted. We have also used this funding to purchase additional furnishing including shelving, chairs, changing station, etc.

The 2024 grant dollars will be used to send all full-time staff (14 staff total) to the ND Early Childhood Conference in Bismarck in April 2025. With these funds we will be able to pay for wages, lodging, food, registration, etc. Being able to provide teachers with quality education opportunities helps us retain high quality early childhood teachers which is the key to any early childhood program. Funding to help us provide education and opportunities for staff is especially important now, when it seems like being able to hire qualified staff is becoming increasingly difficult.

Thank you for your time and consideration in this matter.

Nicole Darling

Written Testimony for North Dakota HB 1012

Submitted by: YMCA of the Northern Sky

Good morning, members of the Committee,
My name is Tania Zerr, and I am the Executive Director of Child Care Programs for the YMCA of the Northern Sky. I am writing to share how Quality Improvement Grants have positively impacted our programs and to strongly encourage you to maintain funding for these vital initiatives.

Overview of Our Programs
The YMCA of the Northern Sky serves over 2,300 children annually daily across our communities of Fargo, West Fargo, and Moorhead. We employ over 450 staff members, both full- and part-time, and operate:

- **4 Early Childhood Learning Centers**, two of which also provide afterschool care.
- **21 school-age afterschool programs** which are located throughout those communities.

Here is an overview of the children served at each Early Childhood location:

- **Fercho YMCA** (licensed since 1986): 8 infants, 10 toddlers, 75 preschoolers, 75 school-age children.
- **Schlossman YMCA** (licensed since 1997): 68 preschoolers, 80 school-age children.
- **West Fargo YMCA** (licensed since 2002): 24 infants, 20 toddlers, 128 preschoolers.
- **South at Urban Plains** (licensed since June 2023): 32 infants, 30 toddlers, 122 preschoolers, 60 school-age children. (Previously YMCA South (licensed since 1999) and (Previously YMCA Calvary (licensed since 2012)

All of our programs have historically been accredited by the National Association for the Education of Young Children (NAEYC). However, as the state introduced its Quality Rating System, we shifted our focus to Bright & Early ND due to the financial feasibility and the invaluable support it provides.

Achievements Through Bright & Early ND
We have been actively participating in the Bright & Early ND Quality Rating System since its inception. Three of our four Early Childhood programs are proud to be Step 3 programs, with one location actively working toward Step 3. The coaching, technical assistance, training, and funding provided by this initiative have been instrumental in helping us maintain high-quality programming for the children and families we serve.

Use of Quality Improvement Grants
In 2023, we received grant funding that allowed us to make critical investments in our programs. Specifically:

- **Expansion and Growth:** We added infant classrooms at both our West Fargo location and our South at Urban Plains location using GROW Grant funding. This expansion would not have been possible without this financial support, which enabled us to meet increasing community demand for child care.

- **Facility Improvements:** Remodeling projects are prohibitively expensive for child care programs. For example, adding a single sink and tiling to a classroom at our West Fargo location cost $35,000. Without grant funds, these essential improvements would not have been possible.

- **Equipment and Supplies:** We updated outdated equipment, shelving, cribs, chairs, and tables—some of which had been in use since our programs first opened.

Why These Grants Matter
Child care programs operate on extremely tight budgets, with 90% of revenue coming from parent tuition fees. Our largest expenses are staff salaries and benefits. Without Quality Improvement Grants, we could not afford the updates and investments necessary to provide safe, high-quality learning environments for our children. These grants ensure that we can meet state standards, expand our capacity, and offer the resources our staff need to deliver excellent care.

Impact on the Community
The funding provided through these grants doesn't just benefit our programs; it strengthens the entire community. When we can expand infant care, update equipment, and train our staff, we directly support working families and contribute to the development of the next generation.

Closing
I urge you to maintain funding for Quality Improvement Grants. The $2 million being considered for cuts would jeopardize the progress child care providers like the YMCA of the Northern Sky have made in enhancing the quality of care. These grants are not just investments in programs—they are investments in children, families, and the future of North Dakota.

Thank you for your time and consideration. I am happy to answer any questions.

Sincerely,

Tania Zerr

Krystal Hayes
Dickinson, ND
Niki_sweetrose@hotmail.com
1/28/2025

To whom it may concern,

My name is Krystal (Niki) Hayes, and I live in Dickinson, ND and I am asking to continue to fully fund the bill with the original proposed amount of $7 million dollars. I have been in the Early Childhood profession for over 15 years. I have worked at home care, group care and preschool. During that time our programs severely depended on the funding we received through many programs offered by the state. We stayed open during Covid because of funding and that allowed others in ND to continue working while we cared for their children. Not only do I believe that Early Childcare is the one of the major backbones of our society, our country literally couldn't function without childcare.

All children deserve quality care, this isn't an area that cutting funding should even be an option. This truly is a thankless industry filled with loving and caring providers that deserve resources and more importantly all the support that can be offered. I will always be in favor of supporting our children's caregivers and educators.

Thank you,

Krystal Hayes

Quality Recognition

1540 Quality

Bright & Early ND is ND's Quality Rating and Improvement System (QRIS). A QRIS is a systematic approach to assess, improve, and communicate the level of quality in early childhood programs. Bright & Early ND was developed to help early childhood programs offer high-quality care that supports each child's learning and development. ND's quality efforts are supported with a variety of grants, incentives and supports.

# of children served:	11,500 spaces in programs that have achieved Step 2, 3 or 4
Provider involvement:	931 providers participating in QRIS
Expenditures:	185 quality grant awards - $595,000 (FY 2023-2025) $2.7 million for QRIS coaching supports (FY2023-25)
Measurable outcomes:	91 programs are actively renewing or pursuing the next quality step, which includes 42 in the January 2025 cohort • 41 - Step 2 • 36 - Step 3 • 14 - Step 4 In CY2024, participating programs received 1,386 hours of coaching support.
Other data:	In 2023, 128 observations were completed, and by 2024, that number rose to 182, marking a 42% increase in the number of programs able to use data to inform quality improvement

Stanley| Best in Class

25% growth in QRIS participation

Here's what Heather Reyes from Wolf Pup Daycare in Watford City has to say...

"The coaches were there the entire time and helped answer any questions I had, and helped provide support in areas that I didn't know I needed. As a childcare director, it isn't easy especially when it comes to being on a strict budget. It can also be challenging to keep staff if there aren't any benefits to offer them.

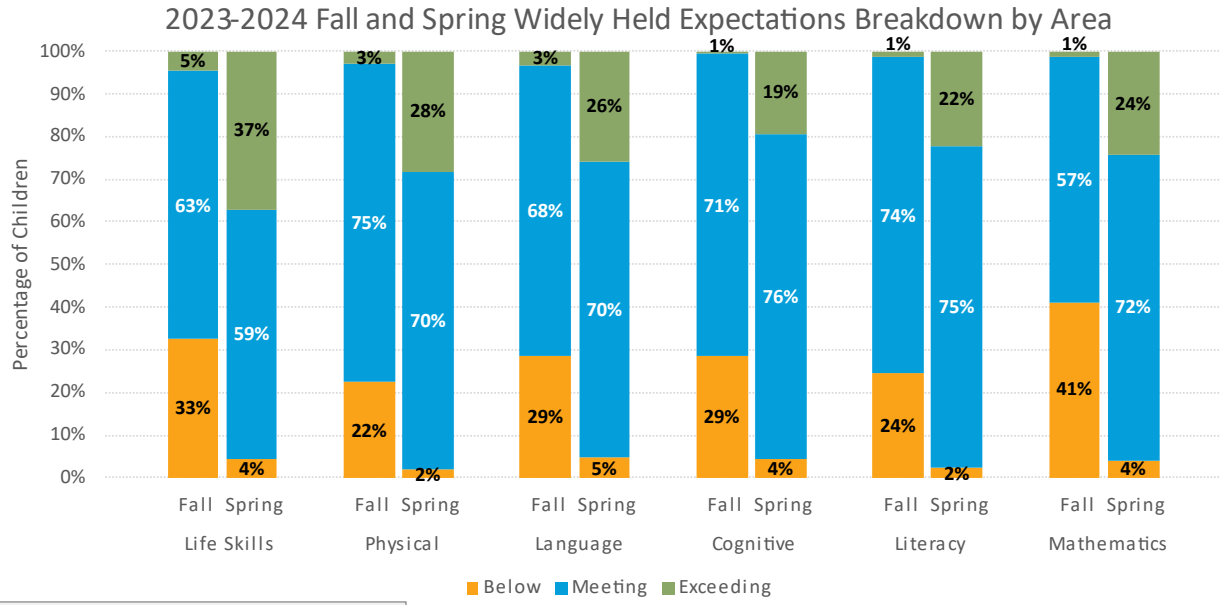
When the incentives were offered to all staff, it was so greatly appreciated by everyone who received it. The incentives and grants have helped our facility in so many ways. We were able to replace old furniture and toys with new ones and get our classrooms new equipment and quality materials that we haven't been able to have before. We noticed a huge difference in the children's behavior and how excited each child was engaging with the new materials. It honestly felt like a whole new environment. We care for children from the ages of 0-5 and have 16 classrooms and over 150 kids so you can only imagine how these benefits are much needed and how much they do help and benefit us. Having these benefits honestly helps make things less stressful!"

Deb Habedank from Center for Child Development at NDSU, Fargo adds...

"Coaching professionals who meet face-to-face with our team to guide and support quality improvement... reviewed the Bright & Early ND process with us, helped prepare our program for the assessments, and held our team accountable to making long term improvements that are developmentally appropriate for young children. The coach also provided resources and effective support which was only a phone call away; Our educators were excited and proud to share the QRIS process and results with our parents, administration, and the community."

Jody Cymbaluk from Little Scholars Preschool in Williston says...

"The quality of care that this funding has helped increase has been monumental. Our childcare facility has been able to offer a lower teacher/student ratio, hire staff with higher education, offer ongoing staff training opportunities, retain staff, offer family engagement opportunities, and nurture relationships with parents to promote a positive diverse learning experience for their children.



This productive combination has in return fostered a happier staff, less stress for working parents & enabled a higher quality childcare setting in what is an oil impacted county."

Best in Class

Quality

Best in Class is a targeted state investment in programs committed to delivering the highest quality experiences to children and their families in the year before kindergarten. It includes focused efforts to serve children who might be least likely to have the opportunity to access high quality experiences like those offered in Best in Class settings.

# of children served:	1164 (2024-25)
Provider involvement:	57 program awards - 22 small & 59 large groups
Costs and benefits:	$6.21 M (2024-25)
Measurable outcomes:	Fall/Winter/Spring progress checks Shown to the right, Fall 2023-Spring 2024

Preschool Development Grant – Birth to Five supports state systems building. HHS conducted a needs assessment, and is engaging in activities to support family engagement, quality improvement, workforce supports, and direct services to young children.

Update and Revise

- Core Competencies for Early Childhood Practitioners
- Career Pathways
- Quality Improvement System
- Mandated Health and Safety Training

Develop

- Core Competencies for licensing specialists and coaches
- Coursework: licensing, early learning standards, adult learning principals
- Early Childhood Integrated Dataset (ECIDS)
- One-stop shop for providers – Insight Data Systems Enhancement Project
- Family Engagement and Kindergarten Transition resources

Expand/Offer

- More professional development opportunities
- Courses and resources available in languages other than English
- Statewide conference for early childhood mixed delivery system
- Opportunities for providers to participate in rule making processes

Included in Executive Budget Request

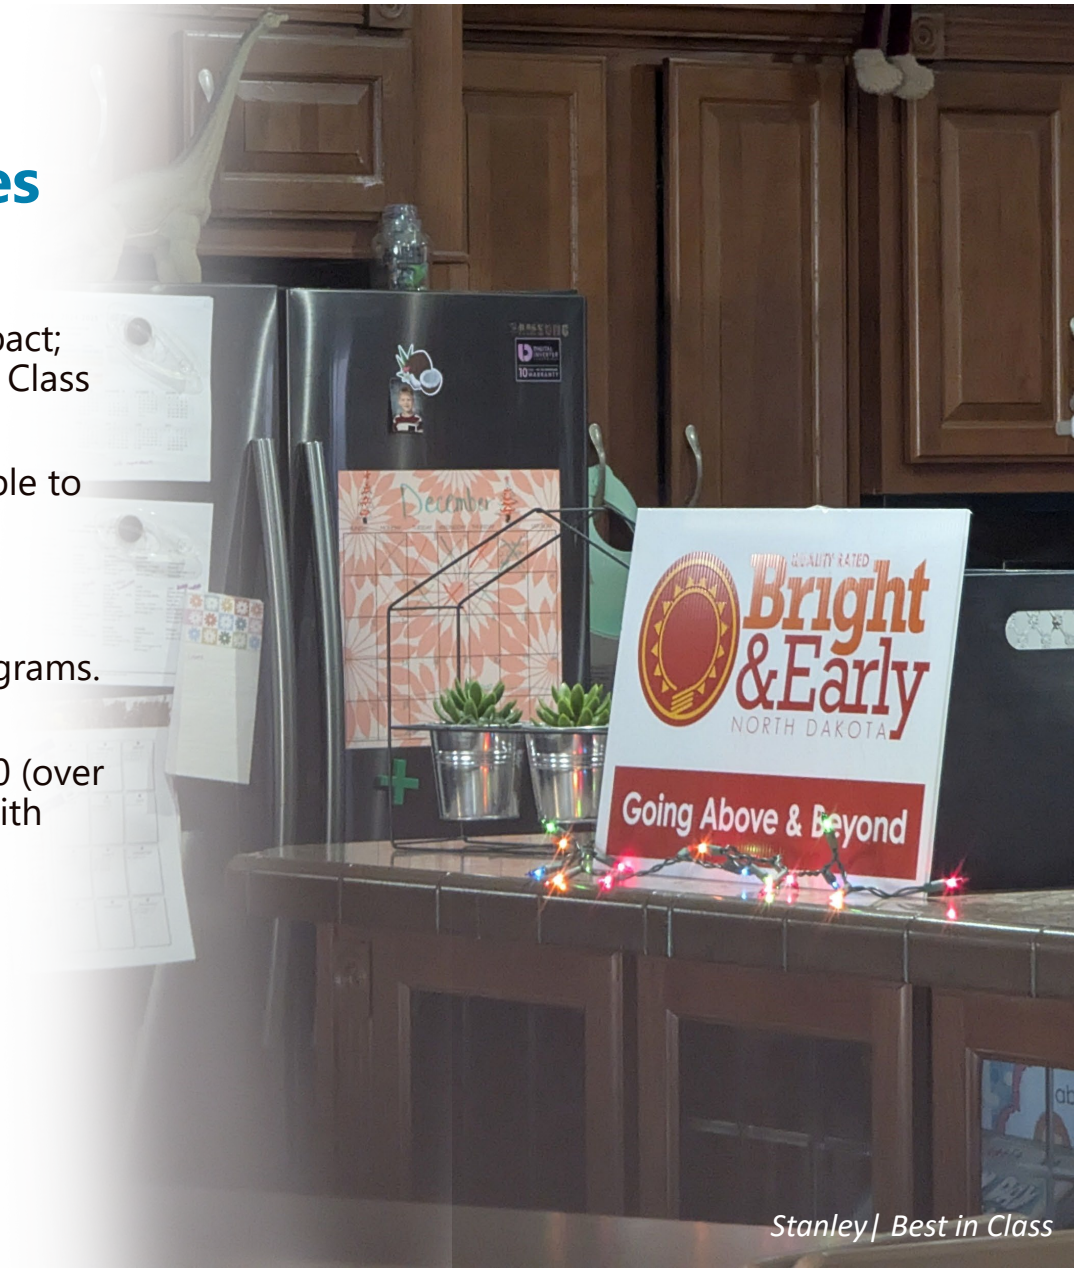
Best in Class program expansion

- Since its inception in 2021, Best in Class has grown to serve more than 1,200 children (in 2024-25), with programs in 53 ND communities, 49 of which are rural.
- This request would allow more programs to apply to become Best in Class sites
- Best in Class participation would be expected to grow to serve approximately 1,500 children in year 1 of the biennium and 1,800 children by year 2, with approximately 80-90 total program sites anticipated.
- This request represents an expanded investment of $6 M (over the base budget level of $12 M).

Total	General	Federal	Other
$6,000,000	$6,000,000	$0	$0

This is a one-time funding request. (SIIF)

Stanley| Best in Class



Included in Executive Budget Request

Expand access to Teaching Strategies outcome measurement tool

- Capturing good data is essential to our ability to measure impact; the state makes Teaching Strategies GOLD available to Best in Class and Step 3-4 quality rated programs to accomplish this goal.
- This request increases the number of programs who will be able to use Teaching Strategies for **data collection on quality and outcomes.**
- Adding access to outcome reporting tools would add data collection capacity for 2,000 children in new quality rated programs.
- Data collection portfolios to support quality and outcome measurement represents an expanded investment of $100,000 (over the base budget level of $372,000, which is partially funded with federal dollars).

Total	General	Federal	Other
$100,000	$100,000	$0	$0

This is a one-time funding request. (SIIF)

Stanley| Best in Class

Included in Executive Budget Request

Inclusion support for child care providers

Inclusion Supports connect private child care programs and families with both coaching and financial resources designed to help assure that children with special needs can maintain their place in an integrated child care setting.

- Today there are 5 inclusion coaches who support the more than 1,100 child care programs across ND
- 1 of those coaching roles is supported with funding that expires in 2025. This request would allow us to maintain the current network of 5 inclusion specialists serving the state.
- Inclusion supports are used by 100-200 providers/families each year; the inclusion specialist funded in this request would likely work directly with 30-40 families/providers over the course of the biennium.

Total	General	Federal	Other
$172,500	$172,500	$0	$0

This is a one-time funding request. (SIIF)

Included in Executive Budget Request

Investing in early childhood infrastructure supports

The added investment in infrastructure capacity has eliminated the waiting list. Since HB 1540, any provider who wants to join a quality cohort has been able to do so.

- The number of programs actively pursuing the "next " quality step has **doubled** in the last year, with each cohort full to capacity.
- This means more quality-rated programs were eligible for grant support as well as enhanced CCAP reimbursement based on quality tiers.
- Children and families have the added benefit of improved quality in their local child care environments.

- Quality infrastructure supports impact the majority of licensed providers in some way, with more intensive supports going to quality cohort participants and providers receiving intensive coaching (estimated 200 providers per biennium)

Total	General	Federal	Other
$3,000,000	$3,000,000	$0	$0

This is a one-time funding request. (SIIF)

This item was included in 2023-25 HB 1540 as one time funding of $3 million)

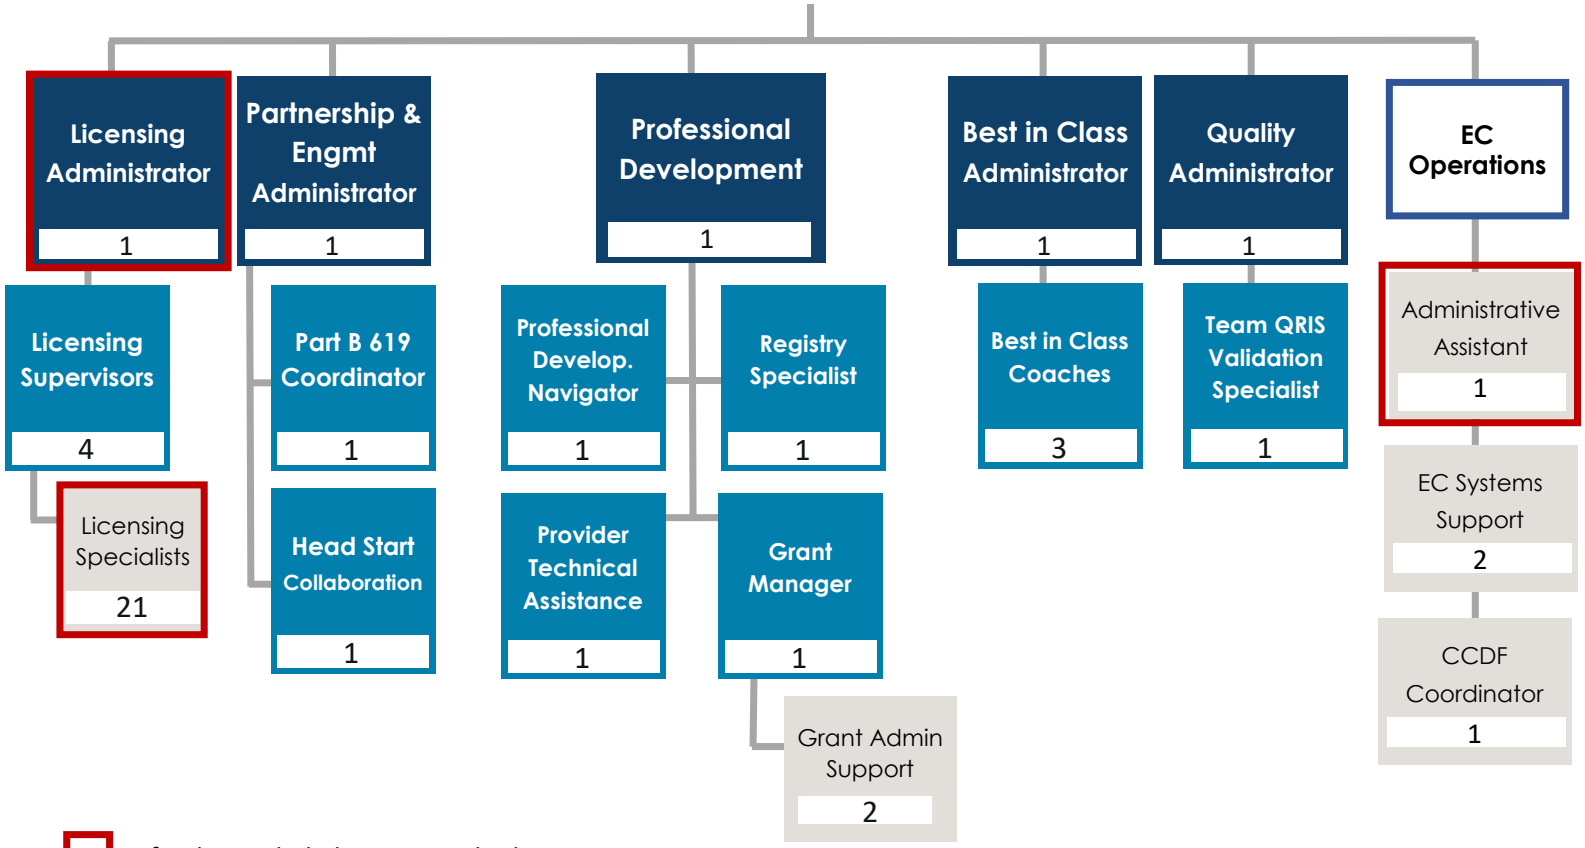
NORTH Dakota | Health & Human Services
Be Legendary.

Included in Executive Budget Request

Child Care Provider Grants

- Grants and resources to child care providers has made possible hundreds of facility, quality and inclusion grants, a brand new shared services infrastructure as well as child care start-ups and expansions.
- The grants and incentives are designed to be flexible and responsive to program needs.
- This request would allow HHS to continue to support not only new program start-ups and existing program expansions, but also preservation of programs at risk of closure through transition/transfer.
- The grant/incentive funding for providers would be expected to impact 400-500 child care programs.

Total	General	Federal	Other
$5,000,000	$5,000,000	$0	$0



This is a one-time funding request. (SIIF)

This item was included in 2023-25 HB 1540 as one time funding of $7 million)

Total Federal	**$ 28,318,922**	**$ 19,924,944**	**$ 26,890,597**	**$ 1,428,325**
Total Other	**$ -**	**$ -**	**$ -**	**$ -**

Note: Because the projection uses the 2023-25 legislative base as its starting point, one-time funds and carryover are not included. However, expenses associated with those items are included.

For Early Childhood, the Preschool Development Grant (PDG) of $21,514,027 is not included in this table. Adding $21,514,027 of PDG to the Operating source line will return the projection to a status of “under budget”.

Early Childhood-related Policy Bills with Budget Impact

		Federal	General
SB 2306	Child care worker recruitment and retention grants		$23,935,162 (fiscal note est)
HB 1119	Potential increase in CCAP reimbursement to child care providers whose license type changes as a result of child care license framework simplification		$225,826 (fiscal note est)

Continued investment in child care makes a difference!

Our goal when children are not with their parents, is that they are in safe and engaging care environments.

State investments in quality, inclusive care, facilities, start up, above and beyond training, infrastructure and shared services make it possible for child care providers to create and sustain nurturing environments for children.

Appendix

Early Childhood Timeline
July 2023-Dec 2024

Early Childhood Progress and Accomplishments July 2023 – Dec 2024

July 2023

- Launch of Best in Class '23-'24 cohort (71 sections in 50 programs)
- Tribal CCDF collaboration with Turtle Mountain
- Launched ND Pyramid Model State Leadership Team
- 107 programs, consisting of 352 classrooms, working towards a QRIS Step 2, 3, or 4 Quality Rating
  For more info on QRIS: https://www.hhs.nd.gov/cfs/early-childhood-services/brightnd

August 2023

- Wrap up COVID-funded child care grants and prepare to launch new round of state-funded grants
- Pipeline to Career presentation at CTE Professional Dev conference
- Conducting statewide survey on transition from Part C to Part B 619 services
- Tribal CCDF Collaboration with Trenton Indian Service Area
- Revised Early Childhood outcomes training for Early Childhood Special Education and posted on DPI PD Hub
- Commissioner Jones moderated a panel and breakout session on Best in Class at the Governor's Summit on Innovative Education
- Completed procurement for Early Childhood Integrated Dataset project; set to kickoff in September

Early Childhood Career Pathway Pipeline Development

HHS Early Childhood is partnering with Department of Career and Technical Education, DPI, and higher ed to improve career pathway opportunities for students interested in pursuing careers in the field – including opportunities that may provide on-the-job training, in partnership with local child care programs.

Team members presented to a room of 75+ family consumer science teachers at the Career and Technical Education Professional Development Conference

Early Childhood Progress and Accomplishments

Sept. 2023

- QRIS cohort began
- Tribal CCDF Consultation with Spirit Lake and Three Affiliated Tribes
- Completed PDG-r Year 2 non-complete continuation application
- Final liquidation of CRRSA and ARPA Stabilization funds

Oct. 2023

- Participating with NDDPI in a national Kindergarten Sturdy Bridge Learning Community
- Launched annual market rate survey
- Shared Services kick off meeting with Child Care Aware of North Dakota
- Additional live scan machines for Cass County and full-time staff person in place

Nov. 2023

- Hosted an Early Childhood Emergency Preparedness Table Top Exercise
- Supported Early Childhood Council Meeting
- Launched CCAP Tiered Quality Based Bonuses for providers participating in North Dakota's Quality Rating and Improvement System

Dec. 2023

- Submitted annual CCDF Quality Progress Report
- Attended PDG B-5 Convening
- Public Hearing for administrative rules

Tribal CCDF Consultation

Re-established relationships with Tribal CCDF Administrators to increase coordination between STATE and tribes in implementing CCDF-funded child care services. Discussed subsidy, background checks, professional development offerings that are accessible to CCDF eligible child care providers, and more.

Criminal Background Check Efficiency

Criminal Background Check Unit increased ability to process and complete background checks in a more timely manner.

New additional live scan machines were installed in Cass County and a full-time staff person was hired at South East Human Service Center to better assist individuals completing the fingerprinting process.

Early Childhood Progress and Accomplishments

Jan. 2024

- Shared the key findings from the North Dakota PDG Needs Assessment
- Campaign to raise awareness of Child Care Assistance
- NDIT and SERVOS Early Childhood Solution Workshop
- QRIS cohort began

Feb. 2024

- Began organizing paper licensing records for digitization and ease of future records retention
- Admins participated in Microsoft Project training and began developing workplans for outstanding PDG activities
- Kicked off writing of CCDF Triennial state plan draft

March 2024

- Attended the Administrative Rules hearing; new rules go into effect April 1
- Completed PDG-r annual report
- Awarded 2024.2025 Best in Class recipients
- Applications rolling in for Facility Grants
- Final preparation for Office of Child Care Triennial monitoring visit in April.

2023 PDG Needs Assessment

See what matters most to families and providers, opportunities, and recommendations at https://www.hhs.nd.gov/cfs/early-childhood-services/pdgb5

Partnering with licensed child care providers to raise awareness of Child Care Assistance Program (CCAP)

Marketing material packages were sent to licensed child care programs to distribute to current and prospective families to help ensure all families have access to resources that support working families and strengthen our workforce.

Early Childhood Progress and Accomplishments

April 2024

- Begin approving Facility Improvement Grants
- Supported the ND Early Childhood Council meeting
- Participated in Office of Child Care onsite monitoring visit

May 2024

- Maxed our initial budget of $1M for Facility Improvement Grants
- Hosted a public comment period on the CCDF Triennial Plan
- Onsite Kindergarten Sturdy Bridge visit at Grafton Public School

June 2024

- Convened the Professional Development Work Group to update Core Competencies
- Field Trip with Commissioner Salter to highlight supports starting in early childhood through graduation and into adulthood, emphasizing the transformational narrative that emerges when we prioritize comprehensive support from the beginning

July 2024

- Revised grants and resources budget, allocating an additional $1M to Facility Improvement Grants
- Participated in a panel at the Hunt Institute Legislative Retreat
- Announced first non-traditional hour child care partnership pilot
- Hosted a Professional Development Day for Best in Class teachers to learn about the Creative Curriculum for PreK

Best in Class and Early Childhood Special Education Field Trip Showcase

HHS Early Childhood and HHS Life Skills and Transition Center hosted area legislators for a field trip to see first hard the effective ways Grafton Public Schools, Upper Valley Special Education, NDDPI, and HHS support kids starting in early childhood all the way through graduation. Our first stop was at Grafton Public Schools early childhood wing to learn about the impact Best in Class has had for their community, the growth they've seen in children, the satisfaction of staff participating in Best in Class, successful kindergarten transition and how they transitioned their early childhood special education services for three year olds.

Celebrating Innovation: Non-Traditional Hour Child Care Pilot

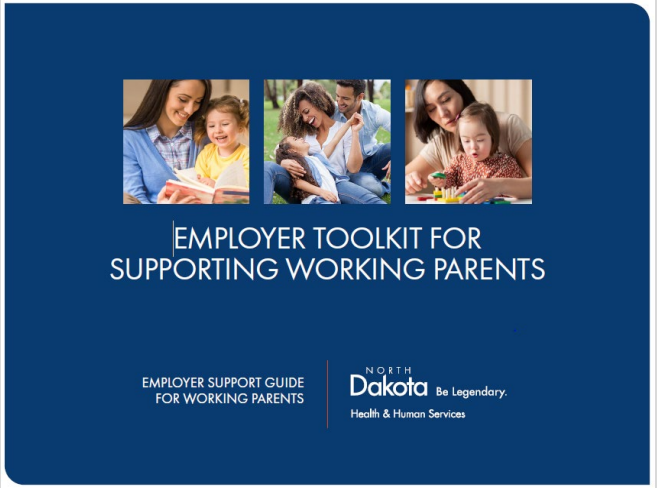
Early Childhood Progress and Accomplishments

Aug 2024

- Presented "Serving Children in the Years Before Kindergarten" at Back to School Drill Down for school administrators and leaders
- Launched a data system and workflow to manage Best in Class applications and milestones.
- Promoted Child Care Assistance and the new Employer Toolkit at MainStreet Summit.

Sept 2024

- Presented an Early Childhood Update to the Interim Education Committee as part of ND DPI's PreK-12 Strategic Vision Framework
- Hired a Lead Data Systems Specialist to manage Early Childhood Integrated Data Sets (ECIDS)
- Final liquidation of ARPA CCDF Supplemental funding



Oct 2024

- Selected a vendor for Instructional Design to create our first ever child care licensing courses, early learning standards, principals of adult learning, and update mandated training, to include training available in other languages
- Met with state Head Start directors to learn about the impacts and effects of new performance standards
- Awarded three additional non-traditional hour child care pilot grants and participated in an evening site visit at Gifted Stars in Fargo to see them in action

HHS unveils Employer Toolkit for supporting Working Parents

A quick, easy guide focused on resources and programs employers can use to support working parents and help their business recruit and retain valuable employees, foster a supportive work environment, and position their business as a sought-after employer of choice.

https://www.hhs.nd.gov/supporting-working-parents

Early Childhood Progress and Accomplishments

Nov 2024

- Hosted Early Childhood Special Education unit directors in Fargo
- Preparation for federal Office of Special Education Programs monitoring in January
- Convened the Professional Development Workgroup to continue review and update recommendations for the Core Competencies for Early Childhood Practitioners.

Dec 2024

- Finalized a large IT project and state contract with vendor for Insight Data System Enhancements
- Sneak peek at ECIDS dashboards
- Best in Class tour in child care settings
- Discussed Department Early Childhood policy bill and decoupling training from license renewal with the Early Childhood Services Advisory Board

What's next

- Launch an application for LEAs to participate in a Kindergarten Transition program funded by the PDG grant
- Host an Early Childhood Conference April 11 -12 in conjunction with Week of the Young Child

Stanley | Best in Class

Best in Class

HHS invited local legislators to join a Best in Class tour of child care settings in Stanley and Rugby.

Both programs have been able to retain and attract staff thanks in part to the Child Care Worker Benefit that launched in July.

This benefit is available to any child care staff working 25+ hrs/week and is equal to Child Care Assistance Program state max rate.

Rugby | Best in Class

To whom it may concern,

My name is Ashley Isgrig, and I am the Site Coordinator at Hope Center for Learning-North in Fargo, ND. We have been a licensed childcare facility since August 2009, with a licensed capacity of 111 children. Currently, we serve 49 children during the school year. Since 2017, we have proudly participated in the Bright & Early program and are currently on Step 3.

I have been at Hope Center for Learning since February 2018. In June 2024, I stepped into the role of Site Coordinator after serving as the lead preschool teacher for several years. I began my career in early childhood education without formal training, and Bright & Early was a game-changer for me. The program's coaching and resources helped me develop the skills and knowledge necessary to create a high-quality classroom environment, which has been invaluable in my professional journey. I will forever be grateful for the guidance I received from my coach, and I know that Bright & Early continues to be a vital resource for the ongoing development of both new and experienced educators.

In addition to the training and support Bright & Early provides, the funding we receive through this program has played a crucial role in helping us maintain the high standard of care we offer to the children and families we serve. In the past three years, we've received $8,000 annually in Quality Improvement grants, which have been essential for maintaining our childcare spaces. These funds have allowed us to update the learning environment by installing new carpeting, painting classrooms, and purchasing new furnishings such as shelves, chairs, and changing stations—improvements that directly impact the quality of care we provide.

The grant funding for 2024 will be used to send all 14 full-time staff members to the ND Early Childhood Conference in Bismarck. This investment in our staff's professional development is crucial. It enables us to cover wages, lodging, meals, and registration costs, providing our teachers with access to valuable learning opportunities that would otherwise be unaffordable. Continuing education for our staff is essential, not only for their professional growth but for the continued success of our center. Well-educated, well-trained teachers are critical to improving outcomes for children, and these opportunities allow us to attract and retain qualified professionals in an industry plagued by high turnover and underfunding.

The challenges facing early childhood educators—underpaid and often undereducated—are real, and without the support of programs like Bright & Early, it would be much more difficult to provide the quality care and education that young children need during these

formative years. The impact of this funding is profound: it empowers teachers, enhances the learning environment, and, ultimately, sets up children for success in their educational journeys.

I urge you to consider the long-term benefits of sustaining funding for early education programs like Bright & Early. The future of our children depends on the quality of care and education they receive in their early years. Without continued funding, we risk losing essential resources that help create and maintain high-quality learning environments that children need to thrive.

Thank you for your time and consideration.

Sincerely,
Ashley Isgrig
Site Coordinator
Hope Center for Learning-North

To Whom it May Concern:

My name is Trisha York, and I am the Director/Owner of Learning Universe Childcare in West Fargo, ND. We are located at 705 Main Ave E Suite A, West Fargo, ND 58078 and have been in operation for 18.5 years. We have been licensed since 2006, are licensed for 78 children, and currently have 10 staff. We are currently Step 2 in Bright and Early ND and have been participating since 2012. We received $3000 for completing and executing our Step 2, we have also received $3000 in Inclusion Grant money, and $9920 from the Facility Improvement Grant.

We have used this money for so many things throughout the Center. We have used it to add money to our hourly pay to help retain and keep teachers at the Center. We used it to help purchase sensory and educational items for our kiddos that have Autism and hearing loss. We bought Nugget couches and Nugget Chunks to help with climbing and exploring, along with making a safe quiet space for those who need it most. We also used it to replace all the crib mattresses in our infant room, purchase new cots for our toddler classroom, replace all the bathroom fixtures in 3 bathrooms along with replacing the floor in those 3 bathrooms. We replaced our fridges and freezers with commercial grade ones and added 1 full stand-up fridge and 1 full stand-up freezer. We also replaced our 10-year-old shed that stores our outdoor toys along with a 6-seat stroller for our infant classroom.

This money has had such a positive impact on not only the kiddos and their families, but also the teachers at the Center. How amazing is it when a kiddo comes into the Center and has new toys to play with and explore all while learning and educating themselves with those toys. Teachers also need that extra hourly wage to help make a living wage to be able to continue to work in early childhood. They also enjoy getting new items to help educate our littlest learners in their classrooms. This money also helps keep the early childhood field in competition with any other entry level job in the community. I appreciate all the grants the state has given us thus far and hope the state can continue to these awesome opportunities not only for our Home, Group, and Centers in North Dakota but most importantly for our earliest learners in our state. I am in favor of fully funding the 7 million dollars that was originally allocated for this bill, not the cutting the 2 million dollars.

Trisha York

2025 HOUSE STANDING COMMITTEE MINUTES

Appropriations - Human Resources Division
Roughrider Room, State Capitol

HB 1012
1/29/2025

A BILL for an Act to provide an appropriation for defraying the expenses of various divisions of the department of health and human services; to provide an exemption; and to provide for a report.

8:30 a.m. Chairman J. Nelson called the meeting to order.

Members Present: Chairman J. Nelson, Vice Chairman Stemen, Representatives B. Anderson, Berg, Mitskog, Murphy, O' Brien, Wagner.

Discussion Topics:

- Economic Assistance
- Temporary Assistance for Needy Families
- Low-Income Home Energy Assistance Program
- Child Care Assistance Program
- Housing Stability Program
- Budget

8:33 a.m. Michele Gee, Director, Economic Assistance Division, Health and Human Services, presented and testified on the division of Economic Assistance, #32202.

11:23 a.m. Eric Haas, Assistant Chief Financial Officer, Health and Human Services, testified to underfunding #32202.

11:23 a.m. Michele Gee, Director, Economic Assistance Division, Health and Human Services, continued with testimony #32202.

11:30 a.m. Donna Aukland, Chief Financial Officer, Health and Human Services, spoke to one time funding.

11:32 a.m. Michele Gee, Director, Economic Assistance Division, Health and Human Services, continued with testimony #32202.

11:38 a.m. Jessica Thomasson, Executive Director, Human Services Division, Health and Human Services discussed schedule adjustments #32188.

11:40 a.m. Kay Larson, Director, Early Childhood Section, Health and Human Services, presented and testified on the budget section of Early Childhood previous #32188.

Additional written testimony:

Lori and Jeff Kenney, Parents/Guardians, Audubon, MN, in favor of HB 1012 #32453.

11:53 a.m. Chairman J. Nelson adjourned the hearing.

Jan Kamphuis, Committee Clerk

HB1012 Overview – Economic Assistance

House Appropriations | Human Resources Division
Representative Jon Nelson, Chairman

NORTH Dakota | Health & Human Services
Be Legendary.

January 28, 2025, Michele Gee | Director, Economic Assistance Section

Economic Assistance

Helping lower-income North Dakotans when they are struggling to make ends meet by connecting them to resources that can help meet their basic needs preventing greater and more damaging crises.

<u>Core Programs:</u>

- Supplemental Nutrition Assistance Program (SNAP)
- Temporary Assistance for Needy Families (TANF) Program
- Low-Income Home Energy Assistance Program (LIHEAP)
- Child Care Assistance Program (CCAP)
- Housing Stability Program

+ Eligibility determination process for Medicaid

NORTH Dakota | Health & Human Services
Be Legendary.

Our Work

Economic Assistance is a section of the Human Services Division. Our teams work can be categorized into three different focuses:

Program Administration

- Federal Compliance
- State Law & Administrative Rules
- State Plan
- Federal Reporting
- Federal & State Agreements

Supporting Service Delivery

- Program & Policy Support
- Learning & Development
- Benefit Issuance
- Integrated Eligibility System Development & Maintenance

Program Integrity & Performance

- Program Monitoring
- Federal & State Quality Reviews
- Federal & State Audits
- Performance Improvement

Chapter	Chapter Name
50-06	Department of Heath and Human Services
50-09	Aid to Dependent Children ((Includes TANF)
50-33	Child Care Assistance

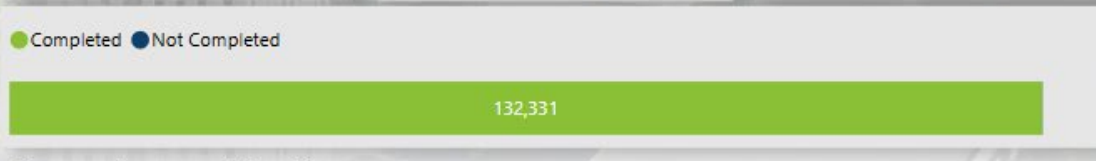
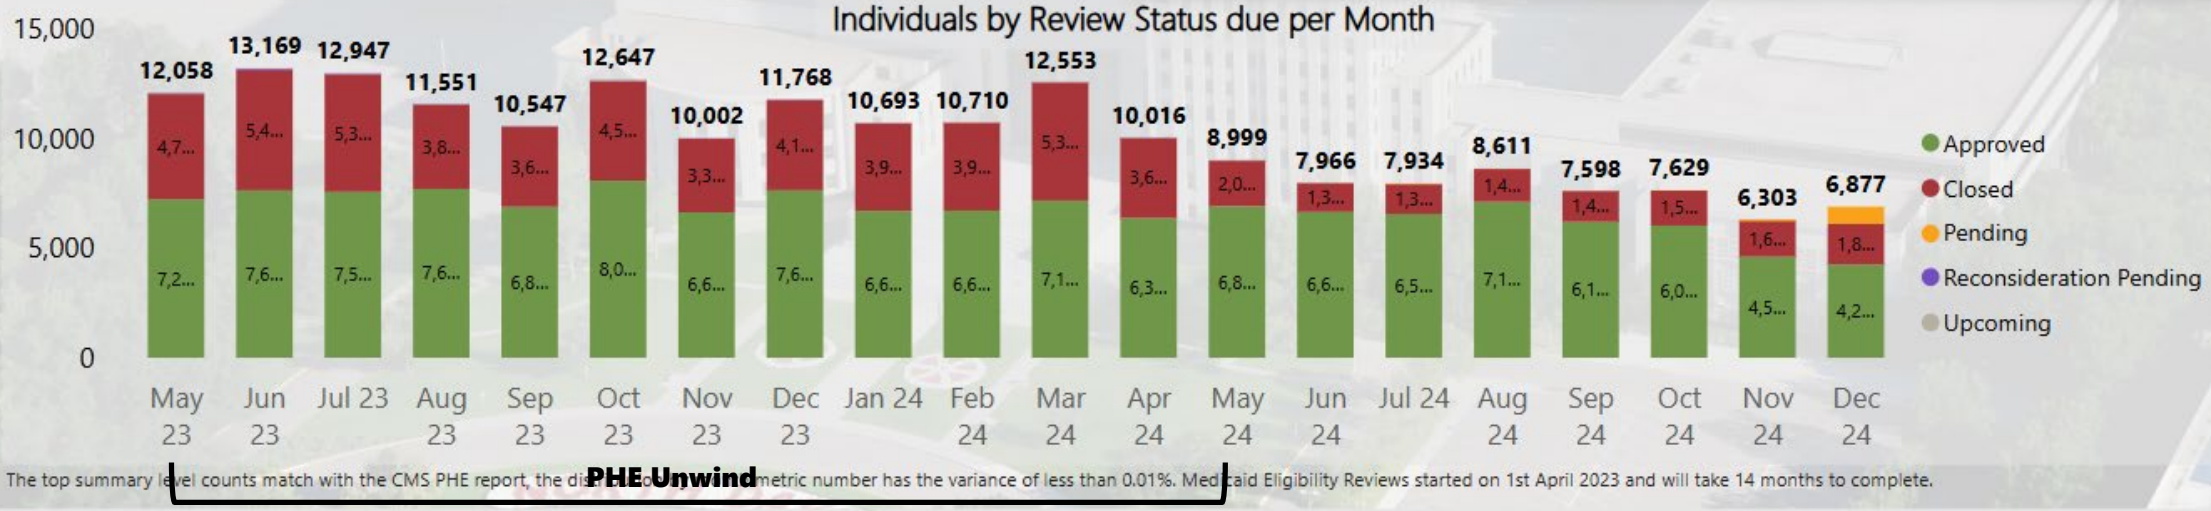
Medicaid Renewals Dashboard



Data as of date
December 31, 2024



Total Medicaid Individuals Due For Review

132,378
Individuals

Medicaid Individuals By Review Status

132,331	47	0
Completed	Pending	Upcoming

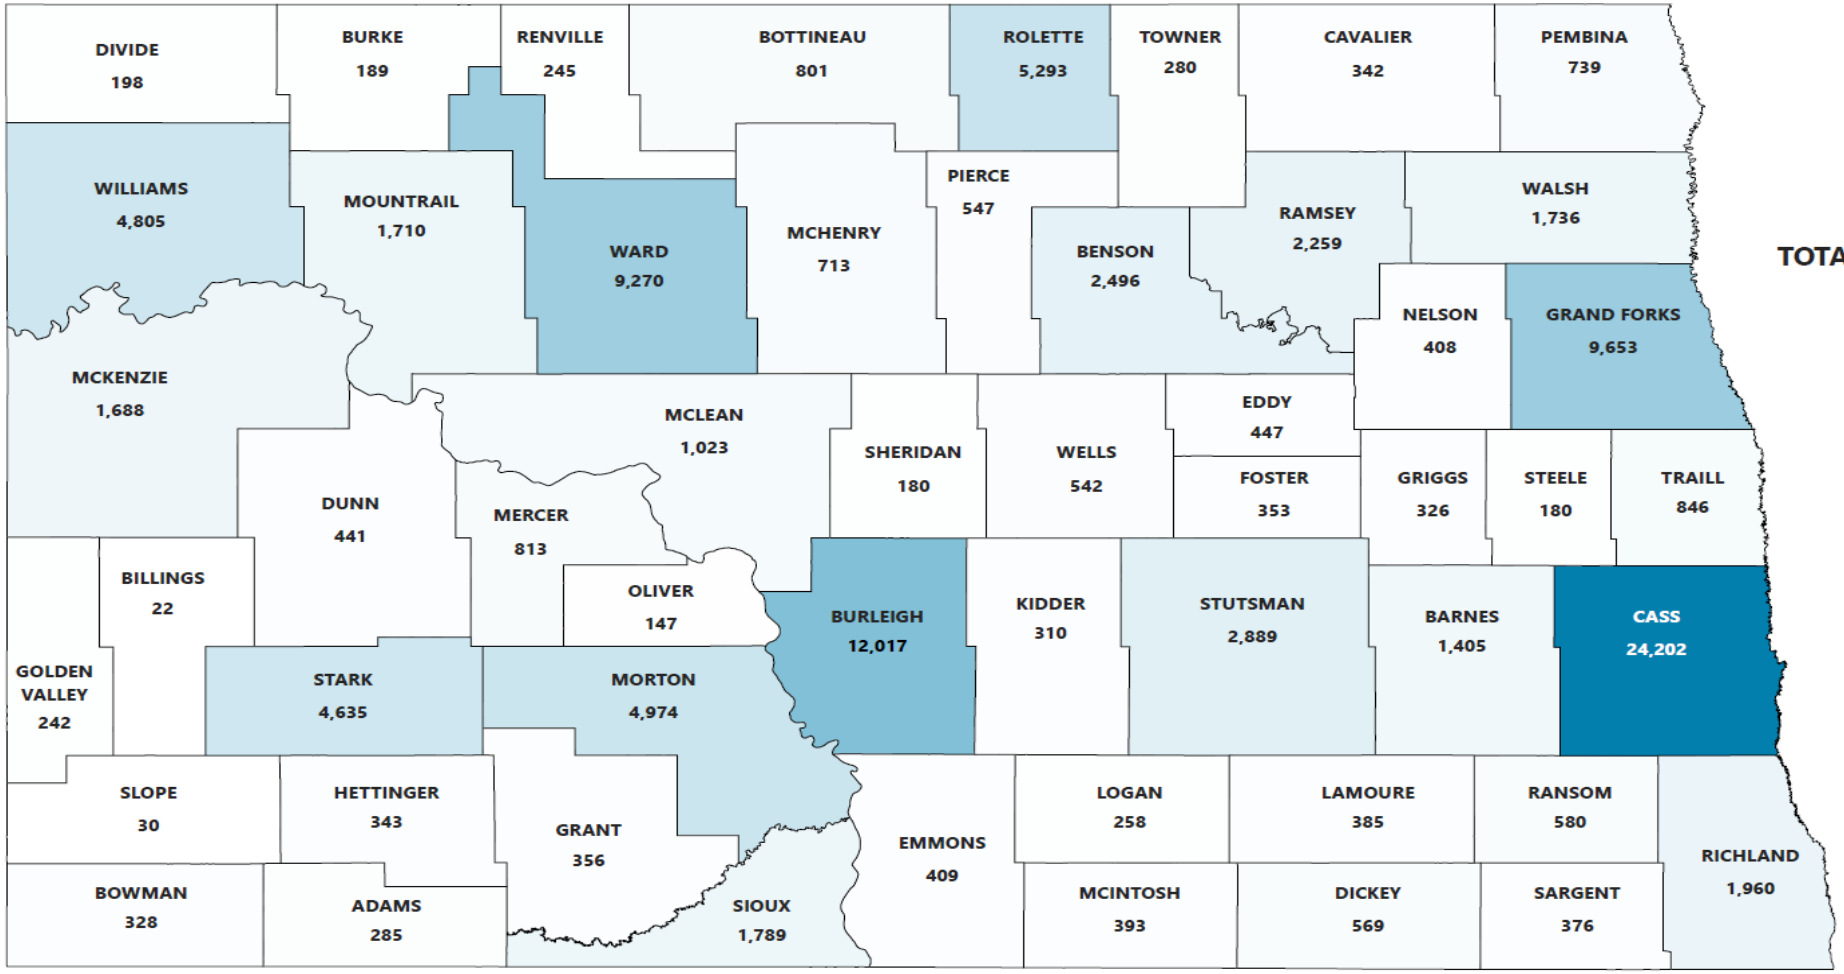
PHE Unwind

The top summary level counts match with the CMS PHE report, the dis... metric number has the variance of less than 0.01%. Medicaid Eligibility Reviews started on 1st April 2023 and will take 14 months to complete.

Individuals: The number of individuals who were enrolled as of March 31*st* when the continuous coverage ended, whose benefits were to be reviewed during the 14-month PHE unwinding period.
Approved: The number of Individuals whose renewal was processed and approved.
Pending: The number of Individual whose benefits review has started but is not completed.
Closed: The number of Individuals whose renewal was processed and denied.

Upcoming: The number of Individuals whose benefits will be reviewed but the renewal process has not yet started.
Completed: The number of Individuals whose review is completed. Includes both approved and closed individuals.
Reconsideration Pending: People whose eligibility is being reconsidered in "90-day reconsideration period" (individual submitted their forms after their initial due date).
*Web users can right click the graph and select 'Show as a table' to view the details of the Reconsideration Pending Reviews counts.

Public Health Emergency Continuous Eligibility Requirement



The Families First Coronavirus Response Act (FFCRA) passed in March 2020 provided an additional 6.2% FMAP to states.

- To receive the enhanced FMAP, states had to meet certain Maintenance of Effort requirements including continuous coverage of all individuals enrolled on or after March 2020.
    - Members could only be disenrolled from a state's Medicaid program if they asked to be disenrolled, moved out of state, or died.
- In December 2022, Congress delinked the Medicaid continuous coverage requirement from the PHE, allowing states to resume Medicaid coverage terminations effective April 1, 2023.
- "Unwinding" is a term used to refer to the return to normal Medicaid eligibility rules.

Medicaid

Average processing time from July – December 2024 was 20.8 days

Program Administration

Low Income Home Energy Assistance Program (LIHEAP)

Help households with home heating costs by paying a portion of their heating bills and assisting with home modifications to support energy efficiency.

2024 LIHEAP Heating Season

(October 2023 – May 2024)

- **14,118** - Households served
- **$794** - Average payment per household
- **$11.2 million** - Total LIHEAP dollars supporting North Dakotans
- **16.5%** - Households with a child **under age 5**
- **33%** - Households with an individual **65 or older**

NORTH Dakota | Health & Human Services
Be Legendary.

Other LIHEAP Services

There are over 230 service vendors participating in LIHEAP, providing the following services.

Cooling Devices

Eligible households can receive help with the cost of purchasing and repairing air conditioners and other cooling devices.

Furnace Issues

Repair or replacement of unsafe furnaces or those that cannot be repaired.

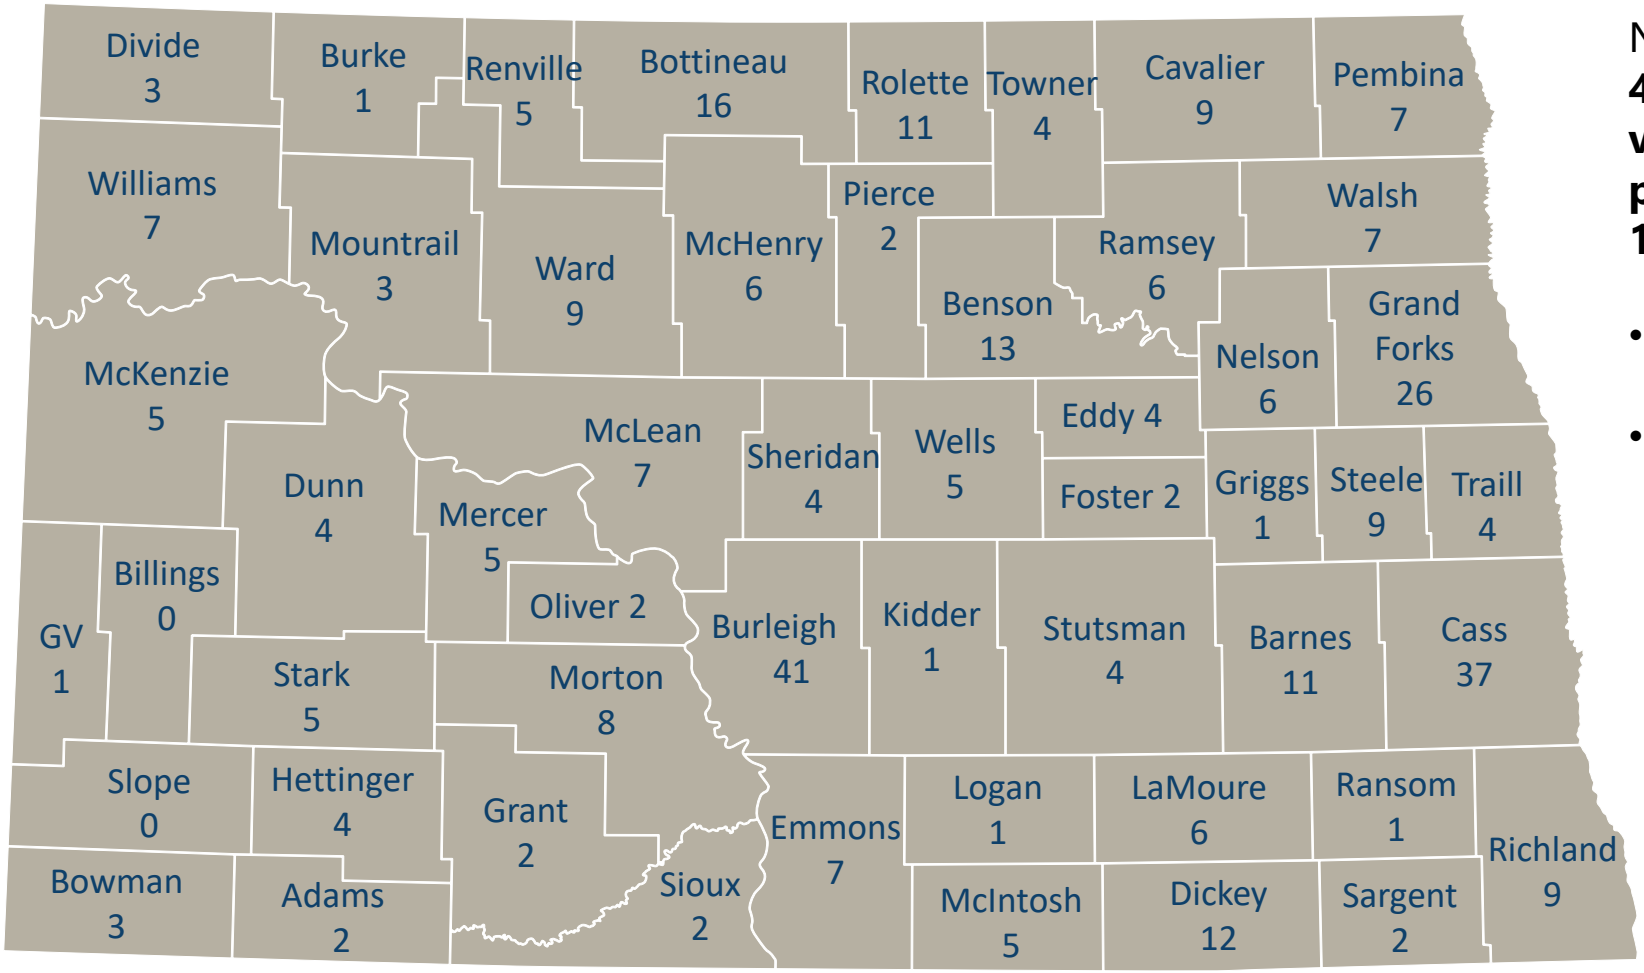
Furnace & Chimney Cleaning

Home Weatherization

Energy-saving improvements such as proper insulation and sealing windows and doors

Emergency Assistance

Prevent shut-offs, purchase or rental of supplemental heating devices, temporary shelter outside the home.



Outreach

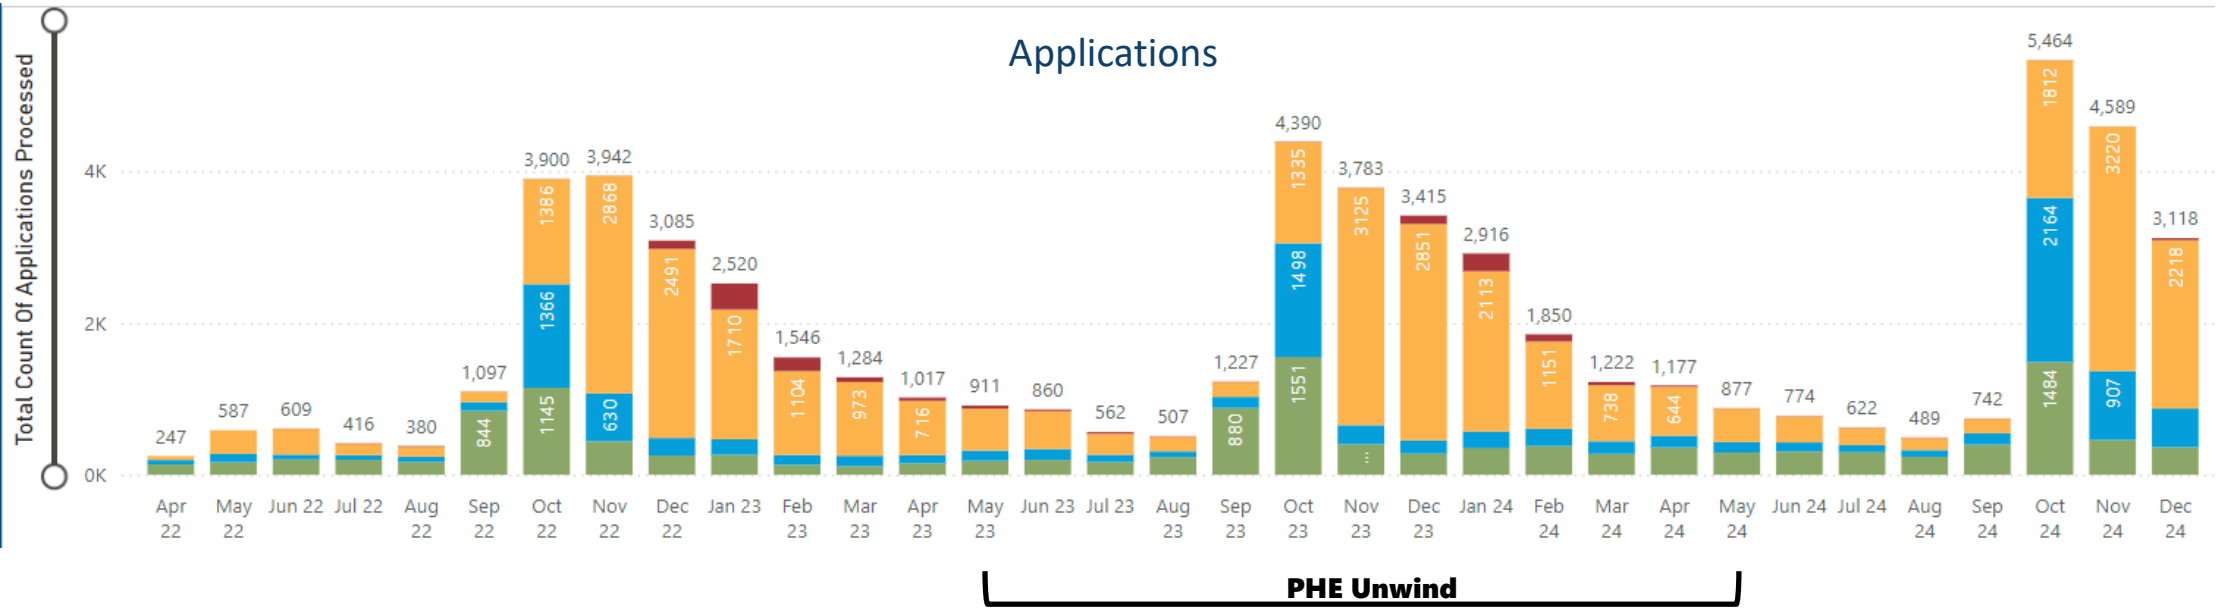
Application assistance to families in their community or homes.

NORTH Dakota Be Legendary. | Health & Human Services

LIHEAP Impacts Local Economies

Authorized Service & Energy Providers by County

North Dakota has **450+** participating **vendors and utility providers**, serving **14,000+ households**



- 258 Fuel Vendors
- 232 Service Vendors

LIHEAP Processing

Average processing time from July – December 2024 was 18.7 days

LIHEAP Application Processing Timeliness

Excellent	0-5 days
Target	6-10 days
Federal	11-45 days
Untimely	45+ days

Program Integrity and Performance

LIHEAP Quality Control Reviews

State reviews of LIHEAP are conducted by the Economic Assistance Policy Division Quality Control Unit (QC).

State Reviews

- Occur each year
- 25 cases sampled monthly
- Measures are taken to ensure at least one case from each human service zone office is selected yearly

LIHEAP Performance

Accuracy of case processing is measured as an improper payment error rate.

How is an error rate calculated?

$$\text{error rate} = \frac{\text{improper payments for reviews completed}}{\text{total payments of reviews completed}}$$

FFY 22	FFY 23	FFY 24
4.2% Overall Error Rate	0.85% Overall Error Rate	*3.12% Overall Error Rate
State Review	State Review	State Review

* QC Reviews thru 07/2024

**LIHEAP does not have a federally-established target rate*

LIHEAP Looking Ahead:
Changes & Improvements

- Supporting affordable housing by limiting energy burden to **6% or less of the family's total income** *(effective October 2024)*
- Converting ND LIHEAP from a partial-year (i.e., heating season) to a **year-round program** *(effective Summer 2025)*
    - Families will no longer need to reapply for LIHEAP at the beginning of every heating season.
    - Eligibility will be determined on an annual review cycle (similar to other programs).
    - Expands access to financial support for cooling costs during the summer months.

NORTH Dakota | Health & Human Services
Be Legendary.

Child Care Assistance Program (CCAP)

Pays a portion of child care costs for working families and those in training or education programs, with no co-pay required for families at or below 30% of the state median income.

June-November 2024

- **6,178** – Average # children served/month
- **3,812** - Average # families served/month
- **$882** - Average payment per child/month
- **$32.6 million** - Total CCAP dollars supporting families
