<sup>1</sup>Prior to 2013, state school aid funding was based on a per-student formula payment. The state school aid funding included mill levy reduction grants, which provided a reduction in school district property tax levies. The 2013 Legislative Assembly approved the implementation of a new formula, which integrates property tax relief in the K-12 state school aid funding formula. Funding for the formula is provided through a combination of local tax sources, local revenue, and state school aid payments. The amount shown for the 2013-15 biennium reflects an estimate from the Department of Public Instruction, which was based on the per-student formula that was used prior to fiscal year 2013.

<sup>2</sup>This amount is an estimate based on the value of 115 mills statewide. In 2013 the Legislative Assembly approved the integration of property tax relief into the state school aid funding formula to provide for a mill levy buydown totaling 125 mills, 50 mills more than the previous biennium. The changes made in 2013 allow school districts to levy an additional 10 mills for general fund purposes; therefore, the mill levy reduction estimate used in the calculation above is 115 mills (125 mill buydown less the 10 mills of additional general fund levy authority).

<sup>3</sup>The Department of Health and Human Services is unable to determine the specific amount of general fund support in the department's legislative appropriation for paying the county costs of child welfare, service payments for elderly and disabled, and technology costs. The amount shown is the amount the department reported for the 2017-19 biennium.
