

## HISTORIC FUEL PRICES AND EFFECTIVE FUEL TAX RATES

The following table provides historic fuel tax prices and the effective fuel tax rate from 1994 through 2019:

| Year | Price Per Gallon of Gasoline <sup>1</sup> | State Fuel Tax Per Gallon of Gasoline | Effective Tax Rate |
|------|---|---------------------------------------|--------------------|
| 1994 | \$1.06                                    | 17 cents                              | 16.0%              |
| 1995 | \$1.11                                    | 17 cents                              | 15.3%              |
| 1996 | \$1.22                                    | 17 cents                              | 13.9%              |
| 1997 | \$1.21                                    | 20 cents                              | 16.5%              |
| 1998 | \$1.05                                    | 20 cents                              | 19.0%              |
| 1999 | \$1.14                                    | 21 cents                              | 18.4%              |
| 2000 | \$1.50                                    | 21 cents                              | 14.0%              |
| 2001 | \$1.45                                    | 21 cents                              | 14.5%              |
| 2002 | \$1.37                                    | 21 cents                              | 15.3%              |
| 2003 | \$1.55                                    | 21 cents                              | 13.5%              |
| 2004 | \$1.83                                    | 21 cents                              | 11.5%              |
| 2005 | \$2.25                                    | 23 cents                              | 10.2%              |
| 2006 | \$2.55                                    | 23 cents                              | 9.0%               |
| 2007 | \$2.82                                    | 23 cents                              | 8.2%               |
| 2008 | \$3.26                                    | 23 cents                              | 7.1%               |
| 2009 | \$2.34                                    | 23 cents                              | 9.8%               |
| 2010 | \$2.78                                    | 23 cents                              | 8.3%               |
| 2011 | \$3.53                                    | 23 cents                              | 6.5%               |
| 2012 | \$3.61                                    | 23 cents                              | 6.4%               |
| 2013 | \$3.52                                    | 23 cents                              | 6.5%               |
| 2014 | \$3.36                                    | 23 cents                              | 6.8%               |
| 2015 | \$2.41                                    | 23 cents                              | 9.5%               |
| 2016 | \$2.14                                    | 23 cents                              | 10.7%              |
| 2017 | \$2.41                                    | 23 cents                              | 9.5%               |
| 2018 | \$2.67                                    | 23 cents                              | 8.6%               |
| 2019 | \$2.54                                    | 23 cents                              | 9.1%               |
